REPORT OF THE 1996 GAME TAKE HUNTER SURVEY

Hunter game take questionnaires were mailed to 18,000 randomly selected hunting licensees on January 24,1997. These individuals represented approximately 5.7 percent of the total number of licenses sold (318,351) in 1996. Two follow-up mailing were sent to nonrespondents after the initial mailing. The first follow-up mailing consisted of a postcard reminder which was mailed on February 25, 1997. The second follow-up mailing contained the entire hunter take questionnaire packet and it was mailed on April 8, 1997. There were 242 questionnaires returned undeliverable, which left a total of 17,758 possible respondents. A total of 8,273 persons returned the questionnaire, representing approximately 2.6 percent of the total number of licenses sold. It was determined through the analysis of the survey that there was a hunting effort of approximately 318,351 hunting licensees who spent 5,340,857 days in the field.

For the past several years, follow-up mailings to nonrespondents have significantly increased response to the questionnaires. The increase reduces nonresponse bias, the phenomenon of more successful individuals (e.g., hunters) being more inclined to return a questionnaire than unsuccessful or nonparticipating individuals. Nonresponse bias is one of the principle causes of inflated bag and hunter-use figures in surveys of this type. However, statistical analysis of survey data indicated high validity for species pursued by large number of hunters. For more information concerning this survey please contact Daniel P. Connelly (916-653-6640) or D. Sam Blankenship (916-653-1759). Since 1992, this survey has been a cooperative effort between the Wildlife Management Division and the License Revenue Branch.

* 1987 - 1991 Hunter surveys did not seperate wild pheasant bag totals from l.g.b.c. bag totals. Therefore, the bag totals for these years are a combination of wild pheasant and l.g.b.c. bag totals.
1992 - 1996 Bag totals are exclusively wild pheasant bag.

** 1987 - 1991 Sage Grouse bag totals are taken directly from Hunter Survey results. Whereas, 1992 - 1996 are extrapolated bag totals.

			ALL HUNTERS = 318,351			

Due to one hunter often hunting more than one species, the percent of All Hunters per species totals more than 100% and the number of hunters per species exceeds the total number of hunters reported (342,920).

Also, the total number of hunters (Table 7) for each species will be lower than the total number of hunters by counts (Table 9) because one hunter might hunt in more than one county for a given species.

*Note: The inflated value in the "did not hunt" category is most likely related to the effect of using 1993, 1994, and 1995 license sales data. The three successive years of data were used because an inadequate number of 1995 sales data available on a data base at the time of the initial survey.
