30. STRATEGIC PLANNING

Today's Item Information ☑ Action □

This is a standing agenda item for 2018-19 FGC meetings as FGC develops a new strategic plan. Today FGC will receive an update on the next steps in the strategic planning process.

Summary of Previous/Future Actions

First FGC strategic planning meeting
 Adopted mission, vision and core values
 Feb 22, 2018; Sacramento
 Dec 12-13, 2018; Oceanside

• Today's update Feb 6, 2019; Sacramento

Next update
 Apr 17-18, 2019; Santa Monica

Background

FGC created its current strategic plan in 1998, which includes a mission statement and a vision statement. Over the ensuing 20 years much has changed, among them a commission with broader authorities, a more ecosystem-based approach to addressing fish and wildlife issues, and new challenges facing wildlife populations. With its upcoming 150-year anniversary, FGC determined that the time is right to reassess its mission, vision, and to develop a set of core values to guide a forward-thinking update to the strategic plan.

During the first phase of its strategic planning process, FGC held several public discussions and a workshop with stakeholders about draft core values and mission and vision statements. At its Dec 2018 meeting, FGC brought the first phase of planning to a close by adopting the core values and revised mission and vision statements that had been developed in concert with staff and stakeholders (Exhibit 1). FGC also indicated that the core values and mission and vision statements would be reevaluated during the third, and final, planning phase.

The second phase of the planning process will consist primarily of data gathering and synthesis with staff, stakeholders and commissioners. Staff is in need of the assistance of a contractor with strategic planning expertise, to help ensure that the process stays on track for a complete and valuable product by FGC's 150-year anniversary as well as to provide greater objectivity during the data gathering and synthesis; staff has not yet been successful in obtaining outside funding for a contractor. Alternatively, staff plans to conduct a limited number of in-person interviews with key stakeholders and more broadly administer an online survey during the second phase.

Staff will provide the next update to FGC in Apr 2019.

Significant Public Comments

A commenter suggests that the mission and vision statements are too long and provides an example of how to make the statements more succinct and useful (Exhibit 2).

California Fish and Game Commission Commission Mission, Vision and Core Values

Adopted December 13, 2018

Mission

The mission of the California Fish and Game Commission, in partnership with the California Department of Fish and Wildlife, is to provide leadership for transparent and open dialogue where information, ideas and facts are easily available, understood and discussed to ensure that California will have abundant, healthy, and diverse fish and wildlife that thrive within dynamic ecosystems, managed with public confidence and participation, through actions that are thoughtful, bold, and visionary in an ever-changing environment.

We recognize our responsibility to hold California's fish and wildlife and their habitats in the public trust, as well as their cultural and intrinsic value, and therefore work collaboratively with other federal, tribal, state and local government agencies, non-governmental organizations and the people of California to establish scientifically-sound policies and regulations to protect, enhance and restore California's native fish and wildlife in their natural habitats, and to secure a rich and sustainable outdoor heritage for all generations to experience and enjoy through both consumptive and non-consumptive activities.

Vision

The vision of the California Fish and Game Commission is a healthy and biodiverse, natural California in which an array of native fish and wildlife thrive within dynamic ecosystems and inspire human interaction and enjoyment.

Core Values

Integrity

We hold ourselves to the highest ethical and professional standards, pledging to transparently fulfill our duties and deliver on our commitments to protect and hold California's fish and wildlife and their ecosystems in the public trust, to ensure consistency of expectations and outcomes. We ensure that our choice or order of decision-making does not arbitrarily prioritize one interest group over others. We hold ourselves accountable to act in accordance with our values and code of ethics, even when it is difficult. Our actions reflect honesty, truthfulness, respect and accuracy.

Transparency

We recognize the important and wide-ranging impacts the Commission's decisions have on California's wildlife, wildlife habitat and residents, and that these decisions should be made based on a variety of inputs in an open, inclusive and public process that solicits a diverse set of perspectives. We strive to communicate with our partners, our stakeholders and the public responsively and openly about how and why decisions are made. We use adaptive processes and consistently gather as much information as possible to ensure the Commission is best informed for thoughtful decision-making, while acknowledging that decisions are most often made with incomplete information.

Innovation

We respond to the ever-changing natural and human environments by evaluating the efficiency and effectiveness of our decisions and processes, identifying new ideas that challenge conventional wisdom and historical biases, and seeking opportunities for innovation. We recognize that innovation always involves some element of risk, and that creative problem-solving and implementing forward-thinking solutions where value is added is key to meeting the constantly evolving needs of our stakeholders and California's fish and wildlife. We take time to frame challenges, adapt, and execute new and useful ideas, including applying advances in sound science, evolving concepts of wildlife management, and public values toward wildlife in new and bold ways. We encourage novelty, creativity and flexibility as we proactively meet challenges and problem-solve.

Collaboration

We value collaboration, including teamwork and partnerships, in problem-solving and in developing policies and regulations. Teamwork is actively fostered and is one of the main ways we function. Collaborative efforts extend beyond the Commission and its staff to empower a diversity of stakeholders, other federal, tribal, state and local agencies, non-governmental organizations, and the people of California to participate in our problem-solving and decision-making processes and, where appropriate, engage in working groups that are inclusive and transparent.

We pursue productive and considerate partnerships, rather than relationships solely based on a formal legal agreement, and celebrate one another's successes as we take them to the next level together. A partnership is a mutually beneficial arrangement that leverages resources to achieve shared goals between and among the partners, based on mutual respect, open-mindedness, trust, and genuine appreciation of one another's contribution. Our primary partner is our sister agency, the California Department of Fish and Wildlife.

Excellence

We pursue quality, proactively assessing performance and striving to continuously improve the delivery of fair and accessible services, work products and decisions, as well as the efficiency and cost-effectiveness with which these are delivered. We are committed to being and delivering the best, and are diligent about creating better ways of doing what we do. We take pride in our efforts and what we make possible. We approach every challenge with an expectation and determination to succeed.

Stewardship

We hold the state's wildlife and their habitats and ecosystems in trust for the public, respecting that they have intrinsic value and are essential to the well-being of all California residents. We give attention to the environmental and human stressors, including climate change, development and other threats, that affect the resilience and health of our wildlife and their habitats and ecosystems. We use credible science, evolving concepts of wildlife management, and public values toward wildlife to evaluate programs, policies and regulations that will help achieve our stewardship goals. We recognize the dynamic nature of and stay abreast of changes in science, and that it should include the evaluation principles of relevance, inclusiveness, objectivity, transparency, timeliness, verification, validation and peer review of information as appropriate.

Subject: Re: Commission adopts revised mission and vision statements, six core values

Your mission and vision statement are wat too long and need to be shorter and to the point. like:

Mission: To promote a healthy environment where wildlife can thrive.

Vision: Wildlife in California living in a healthy and natural environment.
