

California Fish and Game Commission Meeting Binder

Day 1, Part 1 (Items 1-17)

December 11-12, 2019
Sacramento

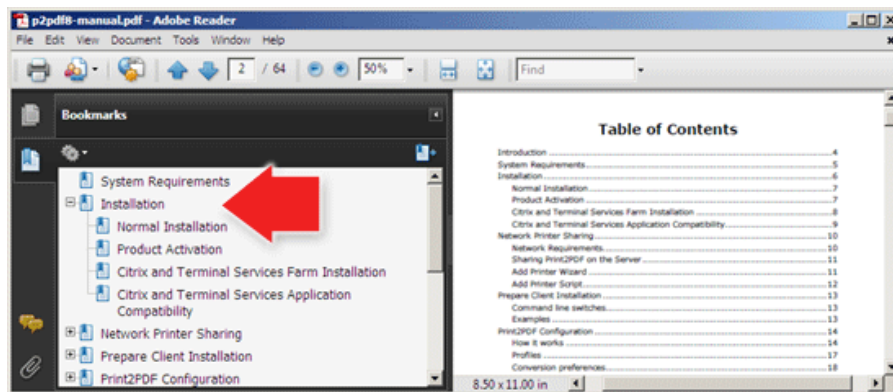

EASY GUIDE TO USING THE BINDER

Note: We make every effort to ensure that documents we produce are compliant with Americans with Disabilities Act standards, pursuant to state and federal law; however, some materials included in our meeting binders that are produced by other organizations and members of the public may not be compliant.

1. Download and open the binder document using your Adobe Acrobat program/app.
2. If a bookmark panel does not automatically appear on either the top or left side of the screen, click/tap on the “bookmark symbol” located near the top left-hand corner.

3. To make adjustments to the view, use the Page Display option in the View tab. You should see something like:

4. We suggest leaving open the bookmark panel to help you move efficiently among the staff summaries and numerous supporting documents in the binder. It's helpful to think of these bookmarks as a table of contents that allows you to go to specific points in the binder without having to scroll through hundreds of pages.
5. You can resize the two panels by placing your cursor in the dark, vertical line located between the panels and using a long click /tap to move in either direction. ⇐||⇒
6. You may also adjust the sizing of the documents by adjusting the sizing preferences located on the Page Display icons found in the top toolbar or in the View tab.
7. Upon locating a staff summary for an agenda item, notice that you can obtain more information by clicking/tapping on any item underlined in blue.
8. Return to the staff summary by simply clicking/tapping on the item in the bookmark panel.
9. Do not hesitate to contact staff if you have any questions or would like assistance.

OVERVIEW OF FISH AND GAME COMMISSION BUSINESS MEETINGS

- This year marks the beginning of the 150th year of operation of the California Fish and Game Commission in partnership with the California Department of Fish and Wildlife. Our goal is the preservation of our heritage and conservation of our natural resources through informed decision making. These meetings are vital in achieving that goal. In that spirit, we provide the following information to be as effective and efficient toward that end. Welcome and please let us know if you have any questions.
- We are operating under the Bagley-Keene Open Meeting Act and these proceedings are being recorded and broadcast via <https://videobookcase.com/>.
- In the unlikely event of an emergency, please note the location of the nearest emergency exits. Additionally, the restrooms are located _____.
- Items may be heard in any order pursuant to the determination of the Commission President.
- The amount of time for each agenda item may be adjusted based on time available and the number of speakers.
- Speaker cards need to be filled out **legibly** and turned in to the staff **before** we start the agenda item. Please make sure to list the agenda items you wish to speak to on the speaker card.
- We will be calling the names of several speakers at a time so please line up behind the speakers' podium when your name is called. If you are not in the room when your name is called you may forfeit your opportunity to speak on the item.
- When you speak, please state your name and any affiliation. Please be respectful. Disruptions from the audience will not be tolerated. Time is precious so please be concise.
- To receive meeting agendas and regulatory notices about those subjects of interest to you, please visit the Commission's website, www.fgc.ca.gov, and sign up for our electronic mailing lists.
- All petitions for regulation change must be submitted in writing on the authorized petition form, FGC 1, Petition to the California Fish and Game Commission for Regulation Change, available at <https://fgc.ca.gov/Regulations/Petition-for-Regulation-Change>.
- **Reminder!** Please silence your mobile devices and computers to avoid interruptions.
- **Warning!** The use of a laser pointer by someone other than a speaker doing a presentation may result in arrest.

INTRODUCTIONS FOR FISH AND GAME COMMISSION MEETINGS

Fish and Game Commission

Eric Sklar	President (Saint Helena)
Jacque Hostler-Carmesin	Vice President (McKinleyville)

REVISED* MEETING AGENDA **December 11-12, 2019**

Natural Resources Building – Auditorium, First Floor
1416 Ninth Street, Sacramento, CA 95814

The meeting will be live streamed; visit www.fgc.ca.gov the day of the meeting.

***This agenda is revised to change the meeting start time on December 11 to 9:30 AM, add Item 4(B) concerning western Joshua tree, and delete Item 36(B)(I) concerning Petition #2019-002: Trap endorsement for commercial nearshore fishery permits (which has been withdrawn).**

Note: See important meeting deadlines and procedures at the end of the agenda. Unless otherwise indicated, the California Department of Fish and Wildlife is identified as Department and CCR indicates California Code of Regulations.

Invitation: The Commission invites members of the public to join commissioners and staff for a field trip related to falconry that will take place west of Sacramento following the meeting on Thursday afternoon; details will be released before the Commission meeting. Members of the public are welcome but must provide their own transportation.

DAY 1 – DECEMBER 11, 2019, 9:30 AM

Call to order/roll call to establish quorum

1. Consider approving agenda and order of items

2. General public comment for items not on agenda

Receive public comment regarding topics within the Commission's authority that are not included on the agenda.

Note: The Commission **may not** discuss or take action on any matter raised during this item, except to decide whether to place the matter on the agenda of a future meeting (sections 11125 and 11125.7(a), Government Code).

3. California Waterfowler's Hall of Fame

Commission recognition of newly-inducted members of the California Waterfowler's Hall of Fame.

CONSENT ITEMS

4. Western Joshua tree

- (A) Receive a petition to list western Joshua tree (*Yucca brevifolia*) as a threatened or endangered species under the California Endangered Species Act (CESA). (Pursuant to Section 2073.3, Fish and Game Code, and subsection 670.1(c), Title 14, CCR)
- (B) Consider approving the Department's request for a 30-day extension to review the petition. (Pursuant to Section 2073.5, Fish and Game Code)

5. Shasta snow-wreath

- (A) Receive a petition to list Shasta snow-wreath (*Neviusia cliftonii*) as a threatened or endangered species under CESA. (Pursuant to Section 2073.3, Fish and Game Code, and subsection 670.1(c), Title 14, CCR)
- (B) Consider approving the Department's request for a 30-day extension to review the petition. (Pursuant to Section 2073.5, Fish and Game Code)

6. Mountain lion

Receive 90-day evaluation report from the Department for the petition to list mountain lion (*Puma concolor*) as a threatened or endangered species under CESA. (Pursuant to Section 2073.5, Fish and Game Code)

The Department will recommend that this item be continued to a future meeting.

7. Wild trout waters policy

Receive Department recommendation and consider adopting proposed amendments to the Commission's Designated Wild Trout Waters policy. (Pursuant to Section 1727, Fish and Game Code)

8. Possession of nongame animals (nutria)

Consider adopting proposed changes to regulations for possession of nongame animals, in order to exclude nutria (*Myocastor coypus*) from the list of nongame animals that can be possessed alive with a special permit. (Amend Section 473, Title 14, CCR)

9. Delta Fisheries Management Policy and Striped Bass Policy

Discuss and consider adopting a Commission Delta Fisheries Management Policy and an amended Striped Bass Policy.

10. Executive director's report

Receive an update from the executive director on staffing and legislative information.

- (A) Staff report
 - I. Consider staff request to submit comments to the California Law Revision Commission for Phase I review of its tentative recommendation for a new California Fish and Wildlife Code
- (B) Legislative report and possible action
 - I. Discuss HR 3399 and consider authorizing a comment letter to support including California in the federal nutria eradication program

11. Strategic planning

Receive an update on the strategic planning process and discuss potential goals and objectives.

12. Department informational items (wildlife and inland fisheries)

The Department will highlight wildlife and inland fisheries items of note since the last Commission meeting.

- (A) Director's report
- (B) Law Enforcement Division
- (C) Wildlife and Fisheries Division, and Ecosystem Conservation Division
 - I. Inland salmon 2019 season update and water flow
 - II. Update on Wildlife Waystation closure transition

13. Tribal Committee

Discuss and consider approving draft agenda topics for the next committee meeting. Consider approving new topics to address at a future committee meeting.

- (A) Work plan development
 - I. Update on work plan and draft timeline
 - II. Discuss and consider approving new topics

14. Wildlife Resources Committee

Discuss and consider approving draft agenda topics for the next committee meeting. Consider approving new topics to address at a future committee meeting.

- (A) Work plan development
 - I. Update on work plan and draft timeline
 - II. Discuss and consider approving new topics

15. Mammal hunting

Consider authorizing publication of notice of intent to amend mammal hunting tag quotas and seasons regulations.

(Amend sections 360, 361, 362, 364, and 364.1, Title 14, CCR)

16. Waterfowl hunting (annual)

Consider authorizing publication of notice of intent to amend waterfowl hunting regulations.

(Amend sections 502 and 507, Title 14, CCR)

- 17. Public use of Department of Fish and Wildlife lands**
Consider authorizing publication of notice of intent to amend wildlife areas and ecological reserves regulations.
(Amend sections 550, 550.5, 551, 552, 630, and 702, Title 14, CCR)
- 18. Central Valley sport fishing**
Consider authorizing publication of notice of intent to amend Central Valley sport fishing regulations.
(Amend sections 2.35 and 7.00, and amend subsections 7.50(b)(5), (68), (124), and (156.5), Title 14, CCR)
- 19. Klamath River Basin sport fishing**
Consider authorizing publication of notice of intent to amend Klamath River Basin sport fishing regulations.
(Amend subsection 7.50(b)(91.1), Title 14, CCR)
- 20. Upper Klamath-Trinity spring Chinook salmon sport fishing emergency regulations (90-day extension)**
Consider adopting a 90-day extension of the upper Klamath-Trinity river spring Chinook salmon emergency regulations.
(Re-adopt subsection 7.50(b)(91.2), Title 14, CCR)
- 21. Upper Klamath-Trinity spring Chinook salmon sport fishing (certification of compliance)**
Consider authorizing publication of notice of intent to implement a certificate of compliance for the upper Klamath-Trinity river spring Chinook salmon emergency regulations.
(Add subsection 7.50(b)(91.2), Title 14, CCR)
- 22. Foothill yellow-legged frog**
Consider and potentially act on the petition, Department's evaluation report, and comments received to determine whether listing foothill yellow-legged frog (*Rana boylei*) as an endangered or threatened species under CESA is warranted.
(Pursuant to sections 2075 and 2075.5, Fish and Game Code)
Note: Findings will be adopted at a future meeting.
- 23. Status reviews for threatened and endangered species**
Receive status reviews from the Department for Baker's larkspur (*Delphinium bakeri*) and Clara Hunt's milkvetch (*Astragalus claranus*), which are listed as threatened or endangered under CESA, including a presentation on the legal mandate and process.
(Pursuant to Section 2077, Fish and Game Code)
- 24. Wildlife and inland fisheries petitions for regulation change**
Consider requests submitted by members of the public to adopt, amend, or repeal a regulation.
(Pursuant to Section 662, Title 14, CCR)
 - (A) Action on current petitions
 - I. Petition #2019-019 AM 1: Remove reticulated Gila monster from list of restricted species

- II. Petition #2019-020: Increase brown trout bag and possession limit within the Klamath-Trinity River basin
- III. Petition #2019-021: Change leader length restriction for fishing tackle in anadromous waters from less than six feet to less than thirteen feet
- (B) Action on pending regulation petitions referred to staff or the Department for review – None scheduled at this time

25. Wildlife and inland fisheries non-regulatory requests from previous meetings

Consider action on non-regulatory requests submitted by members of the public at previous meetings.

Recess

DAY 2 – DECEMBER 12, 2019, 8:30 AM

Call to order/roll call to establish quorum

26. General public comment for items not on agenda

Receive public comment regarding topics within the Commission's authority that are not included on the agenda.

Note: The Commission **may not** discuss or take action on any matter raised during this item, except to decide whether to place the matter on the agenda of a future meeting (sections 11125 and 11125.7(a), Government Code).

27. Department informational items (marine)

The Department will highlight marine items of note since the last Commission meeting.

- (A) Director's report
- (B) Law Enforcement Division
- (C) Marine Region
 - I. Sea cucumber fishery collaborative management
 - II. Pacific Fishery Management Council update

28. Marine Resources Committee

Discuss updates and recommendations from the November 5, 2019 committee meeting. Consider approving new topics to address at a future committee meeting.

- (A) November 5, 2019 meeting summary
 - I. Receive and consider adopting recommendations
- (B) Work plan development
 - I. Update on work plan and draft timeline
 - II. Discuss and consider approving new topics

29. Annual recreational ocean salmon and Pacific halibut regulations

Receive and discuss an update on Pacific Fishery Management Council process and timeline, and automatic conformance to federal regulations.
(Pursuant to Section 1.95, Title 14, CCR)

- 30. Whale and turtle protections in the recreational Dungeness crab fishery**
Receive update and potentially provide direction on draft Department-proposed regulation changes to provide additional whale and turtle protections in the recreational Dungeness crab fishery.
- 31. Statewide Marine Protected Areas (MPAs) Program**
Receive annual report from the Department on management activities of its Statewide MPAs Program.
- 32. Marine Life Management Act (MLMA) Master Plan implementation**
Receive Department update and possibly provide direction on a draft prioritized list of fisheries for more focused management, as prescribed in the MLMA master plan prioritization framework.
- 33. Hog Island Oyster Company**
Consider approving lease amendments applied for by Hog Island Oyster Company for State Water Bottom Lease Nos. M-430-10, M-430-11, M-430-12, and M-430-15 for purposes of aquaculture in Tomales Bay.
(Pursuant to Section 15400, Fish and Game Code)
- 34. Charles Friend Oyster Company State Water Bottom Lease No. M-430-04**
Consider approving renewal of Charles Friend Oyster Company's State Water Bottom Lease No. M-430-04 for purposes of aquaculture in Tomales Bay for a period of 15 years.
(Pursuant to Section 15406, Fish and Game Code)
- 35. Marine items of interest from previous meetings**
These items are generally updates on agenda topics recently heard before the Commission.
- (A) Department overview of razor clam sampling for domoic acid levels
- 36. Marine petitions for regulation change**
Consider requests submitted by members of the public to adopt, amend, or repeal a regulation.
(Pursuant to Section 662, Title 14, CCR)
- (A) Action on current petitions – None scheduled at this time
(B) Action on pending regulation petitions referred to staff or the Department for review
- I. Petition #2019-004 Retrieval of abandoned lobster traps
- 37. Commission administrative items**
- (A) Next meeting – February 5-6, 2020 in Sacramento (dates to be reconsidered)
(B) Rulemaking timetable updates
(C) New business

Adjourn

EXECUTIVE SESSION

(Not Open to Public)

At a convenient time during the regular agenda of the meeting listed above, the Commission will recess from the public portion of the agenda and conduct a closed session on the agenda items below. The Commission is authorized to discuss these matters in a closed session pursuant to Government Code Section 11126, subdivisions (a)(1), (c)(3), and (e)(1), and Fish and Game Code Section 309. After closed session, the Commission will reconvene in public session, which may include announcements about actions taken during closed session.

- (A) Pending litigation to which the Commission is a Party
 - I. Dennis Sturgell v. California Department of Fish and Wildlife, and California Fish and Game Commission (revocation of Dungeness crab vessel permit No. CT0544-T1)
 - II. Public Interest Coalition v. California Fish and Game Commission (CEQA compliance during adoption of dog collar regulation)
 - III. Aaron Lance Newman v. California Fish and Game Commission (revocation of hunting and sport fishing privileges)
 - IV. Adam Aliotti and Alicia Dawn, Inc. v. California Fish and Game Commission, and California Department of Fish and Wildlife (suspension of commercial fishing license and tier-1 spot prawn trap vessel permit)
 - V. Almond Alliance of California et al. v. California Fish and Game Commission and California Department of Fish and Wildlife (bumble bees California Endangered Species Act determination)
- (B) Possible litigation involving the Commission
- (C) Staffing
- (D) Deliberation and action on license and permit items
 - I. Consider Agency Case No. 18ALJ11-FGC, the appeal filed by Louis Ferrari regarding transferability of a nearshore fisheries permit.
 - II. Consider the Proposed Decision in Agency Case No. 18ALJ04-FGC, the appeal filed by Meo Nguyen regarding the Department's denial of a request to transfer a salmon vessel permit.

IMPORTANT COMMISSION MEETING PROCEDURES INFORMATION

WELCOME TO A MEETING OF THE CALIFORNIA FISH AND GAME COMMISSION

This year marks the beginning of the 150th year of operation of the Commission in partnership with the California Department of Fish and Wildlife. Our goal is the preservation of our heritage and conservation of our natural resources through informed decision making; Commission meetings are vital in achieving that goal. In that spirit, we provide the following information to be as effective and efficient toward that end. Welcome and please let us know if you have any questions.

PERSONS WITH DISABILITIES

Persons with disabilities needing reasonable accommodation to participate in public meetings or other Commission activities are invited to contact the Reasonable Accommodation Coordinator at (916) 651-1214. Requests for facility and/or meeting accessibility should be received at least 10 working days prior to the meeting to ensure the request can be accommodated.

STAY INFORMED

To receive meeting agendas and regulatory notices about those subjects of interest to you, please visit the Commission's website, www.fgc.ca.gov, to sign up on our electronic mailing lists.

SUBMITTING WRITTEN COMMENTS

The public is encouraged to comment on any agenda item. Submit written comments by one of the following methods: E-mail to fgc@fgc.ca.gov; mail to California Fish and Game Commission, P.O. Box 944209, Sacramento, CA 94244-2090; delivery to California Fish and Game Commission, 1416 Ninth Street, Room 1320, Sacramento, CA 95814; or hand-deliver to a Commission meeting. Materials provided to the Commission may be made available to the general public.

COMMENT DEADLINES

The Written Comment Deadline for this meeting is 5:00 p.m. on November 27, 2019. Written comments received at the Commission office by this deadline will be made available to Commissioners prior to the meeting.

The Late Comment Deadline for this meeting is noon on December 6, 2019. Comments received by this deadline will be made available to Commissioners at the meeting.

After these deadlines, written comments may be delivered in person to the meeting – Please bring ten (10) copies of written comments to the meeting.

NON-REGULATORY REQUESTS

All non-regulatory requests will follow a two-meeting cycle to ensure proper review and thorough consideration of each item. All requests submitted by the Late Comment Deadline (or heard during general public comment at the meeting) will be scheduled for receipt at this meeting and scheduled for consideration at the next business meeting.

PETITIONS FOR REGULATION CHANGE

Any person requesting that the Commission adopt, amend, or repeal a regulation must complete and submit form FGC 1, titled, "Petition to the California Fish and Game Commission for Regulation Change" (as required by Section 662, Title 14, CCR). The form is available at <https://fgc.ca.gov/Regulations/Petition-for-Regulation-Change>. To be received by the Commission at this meeting, petition forms must have been delivered by the Late Comment Deadline (or delivered during general public comment at the meeting). Petitions received at this meeting will be scheduled for consideration at the next business meeting, unless the petition is rejected under staff review pursuant to subsection 662(b), Title 14, CCR.

VISUAL PRESENTATIONS/MATERIALS

All electronic presentations must be submitted by the Late Comment Deadline and approved by the Commission executive director before the meeting.

1. Electronic presentations must be provided by email to fgc@fgc.ca.gov.
2. All electronic formats must be Windows PC compatible.
3. It is recommended that a print copy of any electronic presentation be submitted in case of technical difficulties.
4. A data projector, laptop and presentation mouse will be available for use at the meeting.

CONSENT CALENDAR

A summary of all items will be available for review at the meeting. Items on the consent calendar are generally non-controversial items for which no opposition has been received and will be voted upon under single action without discussion. Any item may be removed from the consent calendar by the Commission upon request of a Commissioner, the Department, or member of the public who wishes to speak to that item, to allow for discussion and separate action.

LASER POINTERS

Laser pointers may only be used by a speaker during a presentation; use at any other time may result in arrest.

SPEAKING AT THE MEETING

To speak on an agenda item, please complete a "Speaker Card" and give it to the designated staff member before the agenda item is announced. Cards will be available near the entrance of the meeting room. Only one speaker card is necessary for speaking to multiple items.

1. Speakers will be called in groups; please line up when your name is called.
2. When addressing the Commission, give your name and the name of any organization you represent, and provide your comments on the item under consideration.
3. If there are several speakers with the same concerns, please appoint a spokesperson and avoid repetitive testimony.
4. The presiding commissioner will allot between one and three minutes per speaker per agenda item, subject to the following exceptions:
 - a. The presiding commissioner may allow up to five minutes to an individual speaker if a minimum of three individuals who are present when the agenda item is called have ceded their time to the designated spokesperson, and the individuals ceding time forfeit their right to speak to the agenda item.

- b. Individuals may receive advance approval for additional time to speak if requests for additional time to speak are received by email or delivery to the Commission office by the Late Comment Deadline. The president or designee will approve or deny the request no later than 5:00 p.m. two days prior to the meeting.
 - c. An individual requiring an interpreter is entitled to at least twice the allotted time pursuant to Government Code Section 11125.7(c).
 - d. An individual may receive additional time to speak to an agenda item at the request of any commissioner.
5. If you are presenting handouts/written material to the Commission at the meeting, please provide **ten** (10) copies to the designated staff member just prior to speaking.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

2. GENERAL PUBLIC COMMENT (DAY 1)**Today's Item****Information** ☒**Action** ☐

Receive public comments, petitions for regulation change, and requests for non-regulatory actions for items not on the agenda.

Summary of Previous/Future Actions

- **Today's receipt of requests and comments** **Dec 11-12, 2019; Sacramento**
- Consider granting, denying or referring Feb 5-6, 2020; Sacramento

Background

This agenda item is primarily to provide the public an opportunity to address FGC on topics not on the agenda. Staff also includes written materials and comments received prior to the meeting as exhibits in the meeting binder (if received by written comment deadline), or as late comments at the meeting (if received by late comment deadline), for official FGC "receipt."

Public comments are generally categorized into three types under general public comment: (1) petitions for regulation change; (2) requests for non-regulatory action; and (3) informational-only comments. Under the Bagley-Keene Open Meeting Act, FGC cannot discuss any matter not included on the agenda, other than to schedule issues raised by the public for consideration at future meetings. Thus, petitions for regulation change and non-regulatory requests generally follow a two-meeting cycle (receipt and direction); FGC will determine the outcome of the petitions for regulation change and non-regulatory requests received at today's meeting at the next in-person FGC meeting following staff evaluation (currently Feb 5-6, 2020).

As required by the Administrative Procedure Act, petitions for regulation change will be either denied or granted and notice made of that determination. Action on petitions received at previous meetings is scheduled under a separate agenda item titled "Petitions for regulation change." Action on non-regulatory requests received at previous meetings is scheduled under a separate agenda item titled "Non-regulatory requests."

Significant Public Comments

1. New petitions for regulation change are summarized in Exhibit 1, and the original petitions are provided as exhibits 3-7.
2. Requests for non-regulatory action are summarized in Exhibit 2, and the original requests are provided as exhibits 8-10.
3. Informational comments are provided as exhibits 11-12.

Recommendation

FGC staff: Consider whether any new future agenda items are needed to address issues that are raised during public comment.

Exhibits

1. [Summary of new petitions for regulation change received by Nov 27, 2019 at 5:00 p.m.](#)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

2. [Summary of requests for non-regulatory action received by Nov 27, 2019 at 5:00 p.m.](#)
3. [Petition #2019-022: Multi-day fishing trips](#)
4. [Petition #2019-023: Ravens](#)
5. [Petition #2019-024: Depredating or otherwise injurious birds](#)
6. [Petition #2019-025: Beavers](#)
7. [Petition #2019-026: Caples Creek](#) (*Note: this petition is currently under review by FGC staff, and has not been formally accepted.*)
8. [Email from Robin Patton](#), requesting FGC and DFW help and guidance with coyote management through public education and enforcing wildlife feeding laws in Yorba Linda, received Oct 7, 2019.
9. [Letter from Heidi Gregory](#), General Manager of Tomales Bay Oyster Company, requesting an amendment to State Water Bottom Lease No. M-430-05 for purposes of aquaculture, received Nov 19, 2019
10. [Email from Ken Bates](#), requesting issuance of an experimental gear permit to take Pacific Herring in Humboldt Bay by lampara bait net, received Nov 20, 2019
11. [Email from Diane Nygaard](#), via Dennis Nygaard, representing Preserve Calavera, providing a study of the impacts of recreational activities on wildlife, with specific reference to Carlsbad Highlands Ecological Reserve, received Oct 10, 2019
12. [Email from Nancy Dunn](#) concerning hunting laws, received Oct 12, 2019

Motion/Direction (N/A)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

3. CALIFORNIA WATERFOWLER'S HALL OF FAME**Today's Item**Information ☐Action ☒

Recognize newly inducted members of the California Waterfowler's Hall of Fame.

Summary of Previous/Future Actions

As a sponsor of the California Waterfowler's Hall of Fame, FGC annually recognizes inductees through the presentation of signed resolutions.

Background

The California Waterfowler's Hall of Fame was established in 2006 to recognize those individuals who have made significant contributions to enhancing waterfowl and their habitats in California.

A small group of interested waterfowlers was instrumental in establishing the Hall of Fame so that major contributions and achievements of biologists, academics/professors, federal/state administrators, legislators, sportsmen, agriculturalists and other conservationists could be recognized. The selection committee includes representatives from the California Waterfowl Association, Ducks Unlimited, Conservations Solutions, Gaines and Associates, University of California Davis, National Audubon Society, and DFW.

Inductees or their representatives will be presented with certificates by the California Waterfowl Association. This year's inductees are L. Ryan Broddrick, Dean A. Cortopassi, John M. Eadie, Richard Janson, and Mickey W. Saso.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Recognize this year's Waterfowler's Hall of Fame inductees with FGC resolutions.

Exhibits

1. [Resolution for L. Ryan Broddrick](#)
2. [Resolution for Dean A. Cortopassi](#)
3. [Resolution for John M. Eadie](#)
4. [Resolution for Richard Janson](#)
5. [Resolution for Mickey W. Saso](#)

Motion/Direction

Moved by _____ and seconded by _____ that the Commission recognizes L. Ryan Broddrick, Dean A. Cortopassi, John M. Eadie, Richard Janson, and Mickey W. Saso as members of the California Waterfowler's Hall of Fame.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

4. WESTERN JOSHUA TREE (CONSENT)**Today's Item****Information** ☐**Action** ☒

- (A) Receive a petition to list western Joshua tree as a threatened or endangered species under the California Endangered Species Act (CESA).
- (B) Consider DFW's request for a 30-day extension to review the petition.

Summary of Previous/Future Actions

- | | |
|------------------------------------------------------------------------------------------------|---------------------------------|
| • Received petition | October 21, 2019 |
| • FGC transmitted petition to DFW | November 1, 2019 |
| • Published notice of receipt of petition | November 22, 2019 |
| • Today's public receipt of petition and action on DFW's request for a 30-day extension | Dec 11-12, 2019; Sacramento |
| • Receive DFW evaluation of petition | Apr 15-16, 2020; Sacramento |
| • Determine if petitioned action may be warranted | Jun 24-25, 2020; Santa Ana Area |

Background

- (A) On Oct 21, 2019, FGC received a petition (Exhibit 1) from the Center for Biological Diversity to list western Joshua tree (*Yucca brevifolia*) as endangered under CESA. On Nov 1, 2019, FGC staff transmitted the petition to DFW for review. A notice of receipt of petition was published in the California Regulatory Notice Register on Nov 22, 2019.
- (B) California Fish and Game Code Section 2073.5 requires that DFW evaluate the petition and submit a written evaluation with a recommendation to FGC within 90 days of receiving the petition; under this section, DFW may request an extension of up to 30 days to complete the evaluation. DFW has requested a 30-day extension (Exhibit 2) which would change the due date for DFW's evaluation from Jan 30, 2020 to Feb 28, 2020.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Approve DFW's request for an extension of 30 days under a motion to adopt the consent calendar.

Exhibits

1. [Petition, received Oct 21, 2019](#)
2. [DFW memo, received Nov 22, 2019](#)

Motion/Direction

Moved by _____ and seconded by _____ that the Commission adopts the staff recommendations for items 4-8 on the consent calendar.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

5. SHASTA SNOW-WREATH (CONSENT)**Today's Item****Information** ☐**Action** ☒

- (A) Receive a petition to list Shasta snow-wreath as a threatened or endangered species under the California Endangered Species Act (CESA).
- (B) Consider approving the Department's request for a 30-day extension to review the petition.

Summary of Previous/Future Actions

- Receive petition Oct 4, 2019
- FGC transmitted petition to DFW Oct 10, 2019
- Publish notice of receipt of petition Nov 22, 2019
- **Today's public receipt of petition and action on DFW's request for a 30-day extension** **Dec 11-12, 2019; Sacramento**
- Receive DFW evaluation of petition Apr 15-16, 2020; Sacramento
- Determine if the petitioned action may be warranted Jun 24-25, 2020; Santa Ana Area

Background

- (A) On Oct 4, 2019, FGC received a petition (Exhibit 1) from Kathleen S. Roche and the California Native Plant Society to list Shasta snow-wreath (*Neviusia cliftonii*) as endangered under CESA. On Oct 10, 2019, FGC staff transmitted the petition to DFW for review. A notice of receipt of petition was published in the California Regulatory Notice Register on Nov 22, 2019.
- (B) California Fish and Game Code Section 2073.5 requires that DFW evaluate the petition and submit a written evaluation with a recommendation to FGC within 90 days of receiving the petition; under this section, DFW may request an extension of up to 30 days to complete the evaluation. DFW has requested a 30-day extension (Exhibit 2) which would change the due date for DFW's evaluation from Jan 8, 2020 to Feb 7, 2020. Staff expects that the Feb 5-6, 2020 meeting date will be rescheduled to a later date in Feb under Agenda Item 37(A); such a change may allow for receipt of the petition evaluation in Feb and potential action on the petition in Apr.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Approve DFW's request for an extension of 30 days under a motion to adopt the consent calendar.

Exhibits

1. [Petition, received Oct 4, 2019](#)
2. [DFW memo requesting an extension of 30 days, received Oct 29, 2019](#)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

Motion/Direction

Moved by _____ and seconded by _____ that the Commission adopts the staff recommendations for items 4-8 on the consent calendar.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

6. MOUNTAIN LION (CONSENT)**Today's Item****Information** ☒**Action** ☐

Receive 90-day evaluation report from DFW for the petition to list mountain lion as a threatened or endangered species under CESA.

Summary of Previous/Future Actions

- | | |
|---------------------------------------------------------------------------------|------------------------------------|
| • Received petition | Jun 25, 2019 |
| • FGC transmitted petition to DFW | Jul 5, 2019 |
| • Published notice of receipt of petition | Jul 26, 2019 |
| • Public receipt of petition and action on DFW's request for a 30-day extension | Aug 7-8, 2019; Sacramento |
| • Receive DFW 90-day evaluation | Dec 11-12, 2019; Sacramento |
| • Determine if petitioned action may be warranted | Feb 5-6, 2020; Sacramento |

Background

A petition to list one or more evolutionarily significant units of mountain lion (*Puma concolor*) in southern and central coastal California as threatened or endangered under CESA was submitted by the Center for Biological Diversity and the Mountain Lion Foundation (petitioners) on Jun 25, 2019. On Jul 5, 2019, FGC transmitted the petition to DFW for review. A notice of receipt of petition was published in the California Regulatory Notice Register on Jul 26, 2019.

California Fish and Game Code Section 2073.5 requires that DFW evaluate the petition and submit a written evaluation with a recommendation to FGC within 90 days of receiving the petition; under this section, DFW may request an extension of up to 30 days to complete the evaluation.

At the Aug 2019 FGC meeting, DFW requested and FGC granted a 30-day extension. At the time this staff summary was prepared, FGC staff did not anticipate receiving the evaluation for this meeting and expects DFW will recommend this item be continued to a future meeting.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Schedule receipt of the petition evaluation for the Feb 5-6, 2020 FGC meeting.

Exhibits (N/A)**Motion/Direction**

Moved by _____ and seconded by _____ that the Commission adopts the staff recommendations for items 4-8 on the consent calendar.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

7. WILD TROUT WATERS POLICY (CONSENT)**Today's Item**Information ☐Action ☒

Potentially approve proposed amendments to FGC's policy on Commission Designated Wild Trout Waters.

Summary of Previous/Future Actions (N/A)**Background**

California Fish and Game Code Section 7260(c), grants FGC the authority to designate Heritage Trout Waters recognizing the beauty, diversity, historical significance, and special value of California's native trout. Designations are limited to waters that support populations that best exemplify indigenous strains of native trout within their historic drainages and that provide anglers with an opportunity to catch native trout consistent with the conservation of native trout. Any stocking of heritage trout waters shall meet the criteria established by Chapter 7.2, commencing with Section 1725, of Division 2 of the California Fish and Game Code.

California Fish and Game Code Section 1727 requires that DFW annually submit to FGC a list of no less than 25 miles of stream or stream segments and at least one lake deemed suitable for designation as wild trout waters. DFW proposes the addition of two new waters:

1. North Fork Smith River, from the confluence with Middle Fork Smith River upstream to the Oregon state line, including Stoney Creek, Diamond Creek, and North Fork Diamond Creek, and excluding all other tributaries (Del Norte County).
2. Hilton Lake #5 located at the latitude/longitude of 37°28'37.99"N, 118°45'39.39W and an elevation of 10,700 feet in the Hilton Creek drainage (Mono County).

Exhibit 1 provides more detail on the proposed changes, including policy text with proposed amendments and maps of the proposed waters. Note that staff recommends excluding reference to "near Tom's Place" given the advent of GIS coordinates, reference to the watershed, impermanence of businesses, and distance between the lake and resort (over 10 miles).

Significant Public Comments (N/A)**Recommendation**

FGC staff: Under a motion to adopt the consent calendar, approve amendments to the policy on Commission Designated Wild Trout Waters as described in this staff summary and, for Hilton Lake #5, excluding reference to Tom's Place.

DFW: Approve the recommended amendments.

Exhibits

1. [DFW memo, received Nov 22, 2019](#)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

Motion/Direction

Moved by _____ and seconded by _____ that the Commission adopts the staff recommendations for items 4-8 under the consent calendar.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

8. POSSESSION OF NONGAME ANIMALS (NUTRIA) (CONSENT)**Today's Item**Information ☐Action ☒

Consider adopting proposed changes to regulations to exclude nutria from the list of nongame animals that can be possessed alive with a special permit.

Summary of Previous/Future Actions

- | | |
|-----------------------------------|------------------------------------|
| • Notice hearing | Aug 7-8, 2019; Sacramento |
| • Discussion hearing | Oct 9-10, 2019; Valley Center |
| • Today's adoption hearing | Dec 11-12, 2019; Sacramento |

Background

Nutria (*Myocastor coypus*) is a mammal of the order Rodentia; subsection 671(c)(2)(J) designates nutria, as part of that order, as a "detrimental animal." Based on its designation, possession is restricted but not prohibited entirely. Nutria is a semi-aquatic rodent native to South America that is a highly destructive, invasive species. The detrimental impacts caused by nutria includes harm to the State's wildlife, wetland habitats, waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture. Since early 2017, DFW has been planning and implementing eradication efforts with multiple partners in response to discovery of a pregnant nutria in a managed wetland in the San Joaquin Valley.

Under current law, possession of live nutria can be authorized by DFW under a restricted species permit. DFW has identified that, in addition to eradication efforts already underway, banning the possession of any live nutria is necessary to help prevent new introductions of nutria in the state. The proposed regulation scheduled for adoption today would amend Section 473, to make possession of live nutria unlawful and authorize DFW to deny any application for the possession of live nutria.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Determine, based on the record, that this approval is exempt from the California Environmental Quality Act (CEQA) pursuant to the guidelines in sections 15307 and 15308, Title 14, California Code of Regulations, under two CEQA categorical exemptions (Class 7 and Class 8), and adopts the proposed regulations in Section 473, as recommended by DFW, related to the possession of nongame animals in order to exclude possession of live nutria.

DFW: Determine that the action is exempt from CEQA, and adopt the proposed regulation changes as detailed in the initial statement of reasons (ISOR).

2. [Draft notice of exemption](#)
3. [Economic and fiscal impact statement \(Std. 399\)](#)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

Motion/Direction

Moved by _____ and seconded by _____ that the Commission adopts the staff recommendations for items 4-8 on the consent calendar.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

9. DELTA FISHERIES POLICY AND STRIPED BASS POLICY**Today's Item****Information** ☐**Action** ☒

Discuss and consider adopting an FGC Delta Fisheries Management Policy and an amended Striped Bass Policy.

Summary of Previous/Future Actions

- | | |
|-------------------------------------------------------------------------------------------|------------------------------------|
| • Delta Fisheries Forum | May 24, 2017 |
| • WRC vetting of draft policy | Sep 2018 – May 2019 |
| • FGC accepted WRC recommendation to schedule | Jun 12-13, 2019; Redding |
| • Discussion of draft policy and postponement of consideration | Aug 7-8, 2019; Sacramento |
| • Update on progress with stakeholder discussions | Oct 9-10, 2019; Valley Center |
| • Today's discussion and potential adoption of draft policies – update on progress | Dec 11-12, 2019; Sacramento |

Background

An effort to review existing policy and potentially adopt a new policy concerning fisheries management in the Sacramento San-Joaquin Delta (Delta) has been underway since 2017. This year, effort has focused on WRC vetting and FGC discussion of a draft Delta Fisheries Management Policy. See Exhibit 1 for a detailed background.

In Aug 2019, FGC received a revised draft Delta Fisheries Management Policy, vetted through the WRC, for discussion and potential adoption. Following extensive public comment at the meeting, FGC accepted a staff recommendation to postpone further discussion of the draft policy until the Dec 2019 meeting. The purpose of the delay was to continue stakeholder discussions with FGC staff and DFW regarding both the draft policy and existing FGC Striped Bass Policy, and to invite a broader array of participants. Staff provided an update on progress at FGC's Oct 2019 meeting.

Responsive to FGC direction, staff has held three meetings and one conference call with DFW and a broad group of stakeholders and organizations representing fishing and water interests. The current policy drafts presented for discussion today (exhibits 2 and 3) represent the current state of those discussions.

Noteworthy changes to the draft Delta Fisheries Management Policy (Exhibit 2) from previous drafts include:

- Addition of definitions for “the Delta” and “Delta fisheries”;
- Refinement of the meaning of “best available science”; and
- Considerations for balancing and prioritizing recovery of various Delta fish species.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

With respect to revising the existing Striped Bass Policy, significant disagreements still remain, primarily centered around the vision for striped bass management; staff has presented three versions for consideration today – two from stakeholders and one from staff (Exhibit 3). Suggested changes to the Striped Bass Policy reflected in all three current drafts include:

- Agreement to remove the current adult population goal of 3 million; and
- Addition of further activities DFW is encouraged to undertake in support of striped bass, including monitoring.

Today, DFW will provide a verbal presentation on the state of the science regarding Delta fisheries, to provide context for FGC consideration of the new draft policy options.

Significant Public Comments

1. The Congressional Sportsman's Foundation applauds the work so far on the policies, and requests that FGC adopt an objective standard for striped bass restoration (Exhibit 4).
2. A fisheries student states that striped bass are not a main culprit for the decline of Central Valley salmonids. He urges the protection of salmon, steelhead, and striped bass (Exhibit 5).
3. A scientist states that predation is a minor factor in juvenile salmonid mortality and criticizes current striped bass regulations (Exhibit 6).
4. An angler provides some striped bass data and asserts that current striped bass limits should be maintained or increased (Exhibit 7).

Recommendation

FGC staff: Authorize staff to continue discussions with stakeholders on the draft Delta policy and potential amended FGC Striped Bass Policy.

Motion/Direction (N/A)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

10A. EXECUTIVE DIRECTOR'S REPORT – STAFF REPORT**Today's Item****Information** ☐**Action** ☒

Receive the executive director's staff report, including updates on positions, website and document accessibility, sesquicentennial planning, and the most recent California Law Revision Commission tentative recommendation related to the California Fish and Game Code.

Summary of Previous/Future Actions (N/A)**Background*****Staffing Update***

Two positions in the FGC office continue to be filled through out-of-class assignments, one of which is the deputy executive director. Efforts to fill the deputy position are currently underway; following completion of the exam process, interviews will be scheduled with qualified applicants.

Three FGC staff have accepted promotions and will be leaving in the coming days. Staff Services Analyst Sergey Kinchak accepted a promotion at DFW Region 2; his last day is Dec 13. Seasonal clerk Ian Williams accepted a permanent job with the California Department of Motor Vehicles effective Dec 16. Recruitment efforts for both positions will commence shortly. Finally, our Sea Grant State Fellow, Maggie McCann, accepted an environmental scientist position with DFW Fisheries Branch effective Dec 13; her departure is a little earlier than expected, but recruitment efforts for next year's fellow are complete.

Staff is pleased to announce that Rose Dodgen will join FGC staff in the new year as the 2020 Sea Grant State Fellow. Rose is finalizing work related to her master's degree in biological sciences at California Polytechnic State University, San Luis Obispo.

See Exhibit 1 for more information about staff time and activities.

Website / Document Accessibility

Our move to the new state-approved website template is largely complete; however, complying with state-mandated accessibility standards is proving to be time-consuming and challenging since there is often not a standard method for complyin. The challenge is especially great given the large volume of materials FGC posts to its website, not only FGC-generated materials, but also materials received from other organizations and the public, the majority of which are not compliant. Staff is actively working to find solutions to this challenging situation.

150th Anniversary Celebration

As FGC enters its sesquicentennial year, preparations are underway to properly recognize this important milestone on Apr 2, 2020. Earlier this fall, staff formed a planning committee to develop a list of potential events, such as tours or events at DFW wildlife areas and ecological reserves, creating a perpetual award to recognize outstanding conservation efforts, and updating publications on the history of FGC. A formal celebratory event is being explored for

STAFF SUMMARY FOR DECEMBER 11-12, 2019

the week of the Apr 2020 FGC meeting in Sacramento. Staff looks forward to bringing forth specific ideas for approval at FGC's Feb 2020 meeting.

California Law Revision Commission

Late last year the California Law Revision Commission (CLRC) released a tentative recommendation to revise and replace the California Fish and Game Code with a California Fish and Wildlife Code (Exhibit 2); CLRC is seeking public comment and will consider comments prior to making its final recommendation to the California State Legislature.

CLRC's nearly 1,300-page tentative recommendation has two components: hundreds of "comments" about individual sections and proposed reorganization of the code (including renumbering all current code sections).

Initially, CLRC requested comments by Jan 2020, but has since divided the comment process into two phases, first focused on what are referred to as comments and second focused on the reorganization. The first phase comments are due to CLRC no later than Jul 1, 2020; with the assistance of DFW legal staff, FGC staff is in the process of conducting an analysis of each comment and evaluating potential impacts to Title 14. The second phase comments are due to CLRC no later than Jul 1, 2021.

Consistent with the authority you granted the executive director in 2017, staff will develop and submit comments on the first phase to CLRC prior to the deadline, at which time staff will begin its review for the second phase.

Significant Public Comments (N/A)**Recommendation (N/A)****Exhibits**

1. [Staff Report on Staff Time Allocation and Activities](#), dated Dec 3, 2019
2. [California Law Revision Commission: Tentative Recommendation, Fish and Wildlife Code](#), dated Dec 2018 and *Tentative Recommendation, Fish and Wildlife Code: Conforming Revisions*, dated Feb 2019 (corrected)

Motion/Direction (N/A)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

10B. EXECUTIVE DIRECTOR'S REPORT – LEGISLATIVE REPORT**Today's Item****Information** ☐**Action** ☒

Review and discuss legislation of interest and provide staff direction on potential actions.

Summary of Previous/Future Actions (N/A)**Background**

FGC staff has prepared a list of state and federal legislation that may affect FGC's resources and workload or be of interest (below). DFW has provided a report on state bills it has identified as being of interest, including the current status of each (Exhibit 1).

Today is an opportunity for FGC to provide direction to staff concerning proposed legislation and regulatory actions. At any meeting, FGC may direct staff to provide information to or share concerns with bill authors or regulatory agencies. FGC members may also take positions on bills at the same meeting an update is provided.

State Legislation*Legislative Calendar Highlights for 2019-2020*

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| • Last day for any bill to pass. Interim recess began upon adjournment. | Sep 13, 2019 |
| • Last day for Governor to sign or veto bills passed by the legislature on or before Sep 13 and in the Governor's possession after Sep 13 | Oct 13, 2019 |
| • Statutes take effect | Jan 1, 2020 |
| • Legislature reconvenes | Jan 6, 2020 |
| • Last day for bills to be introduced | Feb 21, 2020 |

Bills Introduced during the 2019-2020 Session

A number of the state bills identified in DFW's report (Exhibit 1) may affect FGC's resources and workload or are potentially of interest; listed below are those assembly bills (AB) or senate bills (SB) that were vetoed or chaptered in the first year of this legislative session.

- AB 44 (Friedman) Fur products: prohibition (Chaptered)
- AB 273 (Gonzalez) Fur-bearing and nongame mammals: recreational and commercial fur trapping: prohibition (Chaptered)
- AB 454 (Kalra) Migratory birds: California Migratory Bird Protection Act (Chaptered)
- AB 834 (Quirk) Freshwater and Estuarine Harmful Algal Bloom Program (Chaptered)
- AB 1254 (Kamlager-Dove) Bobcats: take prohibition: hunting season: management plan (Chaptered)
- AB 1260 (Maienschein) Endangered wildlife (Chaptered)
- SB 1 (Atkins) California Environmental, Public Health, and Workers Defense Act of 2019 (Vetoed)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

- SB 62 (Dodd) Endangered species: accidental take associated with routine and ongoing agricultural activities: state safe harbor agreements (Chaptered)
- SB 262 (McGuire) Commercial fishing: landing fees: sea cucumbers (Chaptered)
- SB 307 (Roth) Water conveyance: use of facility with unused capacity (Chaptered)
- SB 395 (Archuleta) Wild game mammals: accidental taking and possession of wildlife: collision with a vehicle: wildlife salvage permits (Chaptered)

Federal Legislation

- *H.R. 30 (SAVES Act)*: Rep. Louie Gohmert (TX-1). Status: House – 02/05/2019. Committee on Natural Resources. Referred to the Subcommittee on Water, Oceans, and Wildlife.

Summary: Limits the protection of endangered and threatened species to species that are native to the United States, thus removing protection given to non-native species in the United States that are listed as threatened or endangered.

- *H.R. 548 (FISH Act)*: Rep. Ken Calvert (CA-42). Status: House – 02/04/2019. Committee on Natural Resources. Referred to the Subcommittee on Water, Oceans, and Wildlife.

Summary: Amends the Endangered Species Act of 1973 to vest in the Secretary of the Interior functions under that Act with respect to species of fish that spawn in fresh or estuarine waters and migrate to ocean waters, and species of fish that spawn in ocean waters and migrate to fresh waters.

- *H.R. 3399 (To amend the Nutria Eradication and Control Act of 2003 to include California in the program, and for other purposes)*: Rep. Josh Harder (CA-10). Status: House – 09/24/2019. House Natural Resources Subcommittee on Water, Oceans, and Wildlife. Subcommittee hearings held.

Summary: Amends the Nutria Eradication and Control Act of 2003 to include California in the list of states enrolled in the program, and allocates \$7,000,000 to California for each of the fiscal years 2020 through 2025 for the purposes of the program. These funds will be used in California to implement measures to eradicate nutria, and restore marshland, public and private wetlands, and agricultural lands damaged by nutria.

- *H.R. 1240 (Young Fishermen's Development Act of 2019)*: Rep. Don Young (AK-At Large). Status: House – 05/08/2019. House Natural Resources Subcommittee on Water, Oceans, and Wildlife. Subcommittee hearings held.

Summary: Effort to preserve United States fishing heritage through a national program dedicated to training and assisting the next generation of commercial fishermen.

- *H.R. 3742 (Recovering America's Wildlife Act (RAWA))*: Rep. Debbie Dingell (MI-12). Status: House – 10/17/19. House Natural Resources Subcommittee on Water, Oceans, and Wildlife. Subcommittee hearings held.

Summary: Amends the Pittman-Robertson Wildlife Restoration Act to make supplemental funds available for management of fish and wildlife species of greatest conservation need as determined by State fish and wildlife agencies, and for other

STAFF SUMMARY FOR DECEMBER 11-12, 2019

education and enforcement related purposes. The Secretary of the Treasury shall annually transfer \$1.3 billion to a fund established for the management and implementation of wildlife and habitat conservation and restoration programs.

- *S. 2092 (Modernizing the Pittman-Robertson Fund for Tomorrow's Needs Act)*: Senator Jim Risch (ID). Status: Senate – 07/11/2019. Read twice and referred to the Committee on Environment and Public Works.

Summary: Provides flexibility to state agencies to use Pittman-Robertson funds for the recruitment, retention, and reactivation of hunters and recreational shooters. The bill does not increase taxes or existing user fees, but would allow state fish and wildlife agencies to use existing revenues in new ways. This legislation is identical to H.R. 877 that was introduced earlier this year by Representatives Austin Scott (GA), Mark Veasey (TX), Debbie Dingell (MI), and Richard Hudson (NC).

Significant Public Comments

A request made at the Oct 2019 FGC meeting during public comment requested that FGC write a letter regarding HR 3399, to support including California in the federal nutria eradication program.

Recommendation

FGC staff: Authorize the executive director to work with President Sklar to draft and send a comment letter to the coauthors of HR 3399 expressing support for including California in the federal nutria eradication program.

Exhibits

1. [DFW legislative report, dated Nov 25, 2019](#)
2. [HR 3399 as introduced in the House of Representatives, dated Jun 21, 2019](#)

Motion/Direction

Moved by _____ and seconded by _____ that the Commission approves delegating authority to its executive director to work with President Sklar to draft and send a comment letter to the coauthors of HR 3399 based on themes discussed today regarding support for including California in the federal nutria eradication program.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

11. STRATEGIC PLANNING**Today's Item****Information** ☒**Action** ☐

This is a standing agenda item as FGC develops a new strategic plan. Staff will provide an update on current progress and request feedback from commissioners.

Summary of Previous/Future Actions

- | | |
|--------------------------------------------|------------------------------------|
| • Adopted mission, vision, and core values | Dec 12-13, 2018; Oceanside |
| • Received updates on second phase | Feb, Apr, Jun 2019; various |
| • Discussed seven key questions | Aug 7-8, 2019; Sacramento |
| • Most recent update | Oct 9-10, 2019; Valley Center |
| • Today's update and feedback | Dec 11-12, 2019; Sacramento |
| • Consider goals and draft plan | Feb 5-6, 2020; Sacramento |

Background

In anticipation of FGC's upcoming 150-year anniversary in 2020, a strategic planning process was initiated in early 2018 (Exhibit 1 provides additional background). In the first of a three-phase process, FGC reassessed its mission and vision, and developed a set of core values, in concert with staff and stakeholders. Adopted in Dec 2018, the revised mission, vision, and new core values (Exhibit 2) are serving to guide a forward-thinking update to the strategic plan.

In Jun 2019, staff reported that the second phase of the planning process was ramping up, to consist primarily of data gathering and synthesis with staff, stakeholders and commissioners. An Aug 2019 FGC discussion was held in a workshop format so that commissioners, staff, and stakeholders could have a direct dialogue about several key questions related to FGC's performance and priorities (Exhibit 3).

After the Aug discussion, staff finalized and sent to a randomly selected subset of FGC's mailing list members an online survey designed to solicit broader input on key questions. Of the nearly 700 email invitations sent, 97 respondents (14%) participated in the survey. Exhibit 4 provides a report of compiled survey responses; for questions with individualized responses, staff synthesized responses into key themes (Exhibit 4). In addition, to date staff has conducted in-depth interviews with 17 individuals, including commissioners and leadership from DFW, other agencies, non-governmental organizations and legislative staff. Questions are similar to those of the online survey, but also include questions about the new mission and vision statements; key themes from these interviews will be shared today.

The information gathered during this phase will be used to help guide development of draft goals as part of a draft strategic plan for FGC consideration in Feb 2020. Today, FGC will receive an overview of the public survey and in-depth stakeholder interview results. Staff is seeking feedback on the key emerging themes and potential goals to include in the draft strategic plan during the third phase.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

12. DEPARTMENT INFORMATIONAL ITEMS (WILDLIFE AND INLAND FISHERIES)**Today's Item****Information** ☒**Action** ☐

This is a standing agenda item to receive and discuss informational updates from DFW.

- (A) Director's report
- (B) Law Enforcement Division
- (C) Wildlife and Fisheries Division and Ecosystem Conservation Division
 - I. Inland salmon 2019 season update and water flow
 - II. Update on Wildlife Waystation closure transition (Exhibit C1)

Summary of Previous/Future Actions (N/A)**Background**

Verbal reports on items of interest since the last FGC meeting are expected at the meeting for items (A) through (C). DFW news releases of potential interest are provided as exhibits B1 and C1.

Significant Public Comments (N/A)**Recommendation (N/A)****Exhibits**

- B1. [DFW news release: Wildlife Officers Shut Down Illegal Cannabis Grows on CDFW Property, dated Nov 15, 2019](#)
- C1. [DFW news release: New Wildlife Care Fund Established for Animals at Wildlife Waystation, dated Nov 25, 2019](#)

Motion/Direction (N/A)

STAFF SUMMARY FOR DECEMBER 11-12, 2019

13. TRIBAL COMMITTEE (TC)**Today's Item****Information** ☐**Action** ☒

Discuss and consider approving draft agenda topics for the next TC meeting. Consider approving new topics for TC to address at a future meeting.

Summary of Previous/Future Actions

- | | |
|----------------------------------------------------|------------------------------------|
| • Most recent TC meeting | Oct 8, 2019; TC, Valley Center |
| • Today consider approving TC agenda topics | Dec 11-12, 2019; Sacramento |
| • Next TC meeting | Jan 17, 2020; TC, Los Angeles Area |

Background**(A) TC Work Plan and Timeline**

FGC directs the work of TC. The updated work plan in Exhibit 1 includes topics and timelines for items referred by FGC to TC. Draft agenda topics proposed for the Jan 2020 TC meeting—in addition to the standing staff, committee and state agency updates—include eight topics for FGC review and consideration today:

1. Discuss and potentially recommend a definition of co-management
2. Discuss and potentially recommend topics for annual tribal planning meeting
3. Discuss simplifying statewide inland fishing regulations
4. Presentation regarding current levels of commercial kelp and seaweed harvest
5. Discuss and potentially make a recommendation regarding proposed commercial kelp and algae harvest management regulations
6. Receive and discuss a presentation from DFW on pinniped predation studies
7. Update on FGC's Coastal Fishing Communities Project
8. Receive and discuss updates from DFW on various species' management plans

(B) New TC Topics

No new topics are proposed by staff at this time.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Approve draft agenda topics for the Jan 17, 2020 TC meeting, as discussed today.

Exhibits

1. [TC work plan](#), updated November 2019

Motion/Direction

Moved by _____ and seconded by _____ that the Commission approves the draft agenda topics for the Oct 2019 Tribal Committee meeting as discussed today.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

14. WILDLIFE RESOURCES COMMITTEE (WRC)**Today's Item****Information** ☐**Action** ☒

Discuss and consider approving draft agenda topics for the next WRC meeting. Consider approving new topics for WRC to address at a future committee meeting.

Summary of Previous/Future Actions

- | | |
|-----------------------------------------------------------------------------------------------|------------------------------------|
| • Most recent WRC meeting | Sep 10, 2019; WRC, Santa Rosa |
| • Today's update | Dec 11-12, 2019; Sacramento |
| • Next WRC meeting | Jan 16, 2020; WRC, Long Beach |
| • WRC meeting to develop recommendation for statewide sport fishing simplification rulemaking | Mar 5, 2019; WRC, Sacramento |

Background**(A) WRC Work Plan**

FGC directs committee work. The work plan in Exhibit 1 includes topics and timelines for items referred by FGC to WRC. Agenda topics proposed for the Jan 2020 WRC meeting are:

- Update and initial vetting of the Simplification of Statewide Inland Sport Fishing Regulations proposal
- Update on the American Bullfrog and Non-native Turtle Stakeholder Engagement Project

Note that the Simplification of Statewide Inland Sport Fishing Regulations proposal will be discussed in detail again at the Mar 5, 2020 WRC meeting, where the committee is expected to develop a recommendation to present to FGC in Apr 2020. The Mar WRC meeting was added to the schedule by FGC for this single purpose.

(B) New WRC Topics

No new topics have been identified at this time.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Approve the draft agenda for the Jan 2020 WRC meeting.

Exhibits

1. [WRC work plan, updated Nov 25, 2019](#)

Motion/Direction

Moved by _____ and seconded by _____ that the Commission approves the draft agenda for the January 2020 Wildlife Resources Committee meeting.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

15. MAMMAL HUNTING**Today's Item****Information** ☐**Action** ☒

Consider authorizing publication of notice of intent to amend mammal hunting tag quotas and seasons regulations (deer, archery deer, bighorn sheep, elk and SHARE elk).

Summary of Previous/Future Actions

- | | |
|---------------------------------|------------------------------------|
| • WRC vetting | Sep 10, 2019; WRC, Santa Rosa |
| • Today's notice hearing | Dec 11-12, 2019; Sacramento |
| • Discussion hearing | Feb 5-6, 2020; Sacramento |
| • Adoption hearing | Apr 15-16, 2020; Sacramento |

Background

Proposed changes to the hunting regulations for various big game mammals are combined for concurrent action under a single rulemaking package. For the 2020-21 season, DFW is proposing changes to mammal hunting regulations contained in sections 360, 361, 362, 364, and 364.1 (Exhibit 1). In addition to changes to season dates to account for the annual calendar shift and other minor changes, DFW proposes the following changes as reflected in the initial statements of reasons (ISORs):

Deer (Additional Hunts) – Exhibit 2

- Adjust the number of deer tags available in additional hunts based on spring population surveys.

Deer (Archery Deer Hunts) – Exhibit 3

- Adjust the number of deer tags available for the archery hunt season based on spring population surveys.

Nelson Bighorn Sheep – Exhibit 4

- Adjust the number of Nelson bighorn ram tags available for the season based on bighorn sheep fall/winter population surveys.

Elk – Exhibit 5

- Modify the number of elk tag quotas specified for each hunt zone in accordance with management goals and objectives and within the proposed ranges.
- Modify season dates on Fort Hunter Liggett due to military use constraints, including DFW-administered general methods tule elk hunts, apprentice hunts, and archery-only hunts.

SHARE Elk Hunts – Exhibit 6

- Adjust Shared Habitat Alliance for Recreational Enhancement (SHARE) program elk tag quotas for each hunt area, in response to dynamic environmental and biological conditions, to achieve elk herd management goals and objectives, and maintain hunting quality.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

In all five ISORs where preliminary tag quota ranges are provided, the number of recommended tags will be proposed prior to the Apr 2020 adoption hearing pending completion of all surveys and data analyses.

Significant Public Comments (N/A)**Recommendation**

FGC staff: Authorize publication of a notice as recommended by DFW.

Committee: Authorize publication of a notice as recommended by DFW.

DFW: Authorize publication of a notice as proposed in the ISORs.

Exhibits

1. [DFW memo, received Nov 13, 2019](#)
2. [Draft economic and fiscal impact statement \(Std. 399\)](#)
3. [Draft deer ISOR](#)
4. [Draft archery deer ISOR](#)
5. [Draft bighorn sheep ISOR](#)
6. [Draft elk ISOR](#)
7. [Draft SHARE elk ISOR](#)

Motion/Direction

Moved by _____ and seconded by _____ that the Commission authorizes publication of a notice of its intent to amend Section 360 et al., related to mammal hunting regulations for the 2020-21 season.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

16. WATERFOWL HUNTING**Today's Item****Information** ☐**Action** ☒

Consider authorizing publication of notice of intent to amend waterfowl regulations.

Summary of Previous/Future Actions

- | | |
|---------------------------------|------------------------------------|
| • WRC vetting | Sep 10, 2019; WRC, Santa Rosa |
| • Today's Notice hearing | Dec 11-12, 2019; Sacramento |
| • Discussion hearing | Feb 5-6, 2020; Sacramento |
| • Adoption hearing | Apr 15-16, 2020; Sacramento |

Background

DFW proposes changes to migratory waterfowl regulations in the initial statement of reasons (ISOR; Exhibit 3) to comply with the proposed frameworks for the 2020-21 seasons as approved by the Pacific Flyway Council. The proposed frameworks are scheduled to be adopted by the U. S. Fish and Wildlife Service in late Apr 2020.

A range for season length and bag limits (zero bag limit represents a closed season) is also provided for black brant. The ranges are necessary, as the black brant frameworks cannot be determined until the Pacific Flyway Winter Brant Survey is conducted in Jan 2020.

DFW proposes the following changes in Section 502:

- open the duck season on the second Sat in Oct and close Jan 20 for the Northeastern Zone – 103 days;
- open the duck season on the fourth Sat of Oct and close Jan 31 for the Southern San Joaquin Valley Zone, Southern California Zone, and Balance of State Zone – 100 days;
- open the regular goose season on the fourth Sat in Oct and close Jan 31 for the Southern San Joaquin Valley Zone and the Southern California Zone – 100 days;
- open the Late Season for geese on the weekend after the Youth Hunt Days for the Balance of State Zone and for the Imperial County Special Management Area. If the Veterans and Active Military Personnel Waterfowl Hunting Days is enacted as described below, the Late Season for geese would occur after those hunting days;
- designate two days as Veterans and Active Military Personnel Waterfowl Hunting Days for the Northeastern, Southern San Joaquin Valley, Southern California and Balance of State zones; and
- allow up to five days of falconry-only season for the Balance of State Zone, the Southern San Joaquin Valley Zone and the Southern California Zone.

DFW also proposes to change Section 507 to:

- remove reference to lead shot to comply with existing law.

STAFF SUMMARY FOR DECEMBER 11-12, 2019

Significant Public Comments (N/A)**Recommendation**

FGC staff: Authorize publication of a notice as recommended by DFW.

Committee: Authorize publication of a notice as recommended by DFW.

DFW: Authorize publication of a notice as proposed in the ISOR.

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, 1416 Ninth Street, Suite 1320, Sacramento, CA 95814 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: TONY Brasil Barcellos

Address: _____

Telephone number: _____

Email address: N/A

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Section 1.17, 200, 205, 265 Fish and Game Code and Section 27.15, 200, 205, 209, 265, 275 Fish and Game Code

3. Overview (Required) - Summarize the proposed changes to regulations: I'd like the Fish and Game Commission to change Section 27.15 Multi day fishing trips to as long as each person didn't catch over his daily limit, come in to dock filled his fish and placed it on ice in a cooler the person would not be in violation for over limits.

4. Rationale (Required) - Describe the problem and the reason for the proposed change: The problem is as I explained in my letter dated July 3, 2019. Because we live over one hundred miles from the Ocean we would like to fish for more than one day, come in to dock, and stay for the next day.

SECTION II: Optional Information

5. **Date of Petition:** Oct. 15, 2019
6. **Category of Proposed Change**

July 3, 2019
Tony & Elvis Barcellos

To the California Fish And Game Commission.

My Son Elvis, and I went fishing off Morro Bay Harbor December 28, 2018 thru December 30, 2018. On December 28, we each caught 9 rockfish, we filletted the fish, and placed the fish in a ziplock bag then placed the fish on ice in the cooler in the truck.

On December 29, we went out fishing again, we each caught 9 rockfish, and 1 legal lingcod, and repeated the same process as on the previous day. On December 30, went out fishing again and we each caught 10 rockfish and 4 legal lingcod. On this day a fish and game warden, asked my son Elvis if we had any fish in the truck, my son told him yes, from the previous two days. We told the warden we lived over one hundred miles from Morro Bay, and that the way we read the regulations on the book, that the over limits pertained to in the boat.

The warden decided to write each one of us a citation. I would like to ask the Commission to consider changing 14CCR 27.15. Multi-Day Fishing Trips, to allow keeping the fish for each separate day as long one didn't catch over the legal limit for each day, I would appreciate your consideration, and your correspondence.

Sincerely Yours
Tony Barcellos

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Karl Gene Kerster

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Title 14

3. Overview (Required) - Summarize the proposed changes to regulations: Add ravens to crows to hunt them both for the same season. Change §485. American Crow. To read §485. American Crow And Raven

4. Rationale (Required) - Describe the problem and the reason for the proposed change: Ravens can be highly destructive to native wildlife including, but not limited to desert tortoises, and ducks. Adding ravens to the crow season would or could facilitate a significant, cost-effective method to use hunters and hunting to manage ravens as needed in a non-political and nimble way. Additionally, it would make moot any concern of ravens being incorrectly identified as crow, by people who are hunting crows, because it would be permissible to hunt either species. Raven breast is exceptional fair on the grill on a par with sandhill crane.

SECTION II: Optional Information

5. Date of Petition: 10/24/2019

6. Category of Proposed Change

10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents: § 21.43 Depredation order for blackbirds, cowbirds, grackles, crows and magpies. A Federal permit shall not be required to control yellow-headed redwinged, rusty, and Brewer's blackbirds, cowbirds, all grackles, crows, and magpies, when found committing or about to commit depredations upon ornamental or shade trees, agricultural crops, livestock, or wildlife, or when concentrated in such numbers and manner as to constitute a health hazard or other nuisance: Provided: (a) That none of the birds killed pursuant to this section, nor their plumage, shall be sold or offered for sale, but may be possessed, transported, and otherwise disposed of or utilized.
11. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing: Cost savings for the CDFW. Sporting opportunities for hunters.
12. **Forms:** If applicable, list any forms to be created, amended or repealed:

Subject: Addendum to petitions from Karl G Kerster

In regard to the two petitions I submitted recently:
I request to waive time requirements for both petitions.
I appear to have submitted incomplete documentation regarding the
Rulemaking Authority section.

For the Raven/Crow petition please include: Authority cited: Sections 355, 356, 3004.5 and 3800, Fish and Game Code. Reference: Sections 355, 356, 3004.5 and 3800, Fish and Game Code.

For the depredation species petition please include:

Authority cited: Sections 200, 265, 1050, 3960.2, 4150, 4181 and 4181.5, Fish and Game Code.
Reference: Sections 3003.1, 3960, 3960.2, 4150, 4152, 4181 and 4181.5, Fish and Game Code.

Thank you,
Karl Gene Kerster

Tracking Number: (2019-025)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, 1416 Ninth Street, Suite 1320, Sacramento, CA 95814 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Thomas Wheeler, Environmental Protection Information Center (EPIC)
Address: 145 G St., Ste. A, Arcata, CA 95521
Telephone number: (707) 822-7711
Email address: tom@wilcalifornia.org

Additional Co-Petitioners: Center for Biological Diversity, Occidental Arts and Ecology Center, Northcoast Environmental Center, Safe Alternatives for our Forest Environment,

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: FGC 200, 203, 1050, 4009.5, 4180, 4181

3. Overview (Required) - Summarize the proposed changes to regulations:

Petitioners propose changing the regulations concerning the taking of beaver in the state to better reflect the beaver's unique ecological importance by clarifying the circumstances under which the California Department of Fish and Wildlife may issue a depredation permit for beavers. The proposed changes would require landowners to exhaust feasible non-lethal deterrence before killing and removing beavers, and require the Department to consider impacts to listed species from issuance of a depredation permit. The suggested changes not only better recognize the unique and valuable role beavers play in aquatic ecosystems, but also helps to shield the state against litigation and better aligns California's rules with those of other states.

Amend 14 CCR 401

§ 401. Issuance of Permit to Take Animals Causing Damage.

(a) Application. A person who is a property owner or tenant may apply to the department for a permit to take elk, bear, bobcat, beaver, wild pigs, deer, wild turkeys, or gray squirrels that are damaging or

destroying, or immediately threatening to damage or destroy, land or property. A bobcat in the act of injuring or killing livestock may be taken immediately provided the property owner or tenant applies for a permit from the department the next working day following the take.

(b) Permit Period.

(1) Permits issued pursuant to this section for beaver, wild pigs, or gray squirrels shall be valid for a period not to exceed one year.

(2) Permits issued pursuant to this section for bobcat, elk, bear, wild turkey, or deer shall be valid for a period not to exceed 60 consecutive days.

(3) Permits issued pursuant to this section authorizing the use of dogs for bear or bobcat shall authorize no more than three dogs and shall be valid for a period not to exceed 20 consecutive days.

(4) Permits may be renewed if damage or threatened damage to land or property continues to exist.

(c) Required Information and Conditions of Permit.

(1) The department shall collect the following information before issuing a depredation permit:

(A) The name, mailing address, and contact information of the property owner, including telephone, facsimile, and email. If the owner is a business entity, contact information for the person acting on behalf of the business.

(B) The name, mailing address, and contact information of the tenant (if applicable), including telephone, facsimile, and email.

(C) The name, mailing address, and contact information of any dog handlers or agents as described in subdivision (e), including telephone, facsimile, and email.

(D) The county and address of the location of the damage caused by depredation, or the nearest landmark or cross streets.

(E) A full description of the land or property damaged, destroyed, or immediately threatened, and the date the damage or threat occurred.

(F) The species suspected of damaging, destroying, or threatening land or property, and the method of identifying the species.

(G) A description of all non-lethal or less-lethal measures undertaken to prevent damage caused by animals prior to requesting the permit.

(H) A description of corrective actions that will be implemented to prevent future occurrence of the damage.

(I) The proposed method of take.

(J) Whether dogs will be used to pursue or take the animal, and if so, why dogs are needed, and the number of dogs to be used.

(2) The department may add terms and conditions to the permit necessary to protect wildlife and ensure public safety. To be valid, the permit shall contain a statement signed by the applicant that he/she has read, understands, and agrees to be bound by all the terms of the permit.

(3) The department may not issue any permit that would authorize activities that would violate federal, state or local law.

(4) For the taking of beaver, the department may issue a permit only if the department finds that the applicant has used at least one non-lethal deterrence or mitigation method prior to issuance of the permit, unless the department finds that exigent circumstances, such as a risk to human safety, require immediate lethal action. Non-lethal methods include, but are not limited to, wrapping trees, fencing, flow control devices, and other beaver deterrence. If the permit would remove beaver or their dams in areas occupied by endangered or threatened salmonids or other state or federally-listed species dependent on freshwater habitats maintained by beaver, the department shall analyze impacts to such species, document its findings in a report to accompany the permit, and include mitigation measures to eliminate harm to such species.

(d) Methods of Take.

(1) Animals taken pursuant to a permit may be taken in any legal manner except as herein provided and in accordance with the provisions of Section 465.5 of these regulations. Permits to take deer shall include conditions that comply with Fish and Game Code section 4181.5. Permits to take bear and bobcat with dogs shall include conditions that comply with Fish and Game Code Section 3960.2. No steel-jawed leghold traps may be used to take mammals, and no iron-jawed or any type of metal-jawed traps may be used to take squirrels or bears. No poison may be used. The department may specify the caliber and type of firearm and ammunition, archery equipment or crossbow to be used. The department may require that a permittee take animals alive by the use of live traps.

(2) The permittee and/or agent shall ensure that all animals are killed in a humane manner instantly and prevent any injured animal from escaping.

(e) Government Employees and Designated Agents.

(1) An employee of a federal, State, or local government agency or local district with responsibilities including but not limited to animal control, animal damage control, irrigation, flood, or natural resource reclamation, while acting in his/her official capacity may take depredating animals on the property designated in a permit issued pursuant to this section.

(2) The permittee may designate up to three other persons, including any dog handler who will be utilized in any pursuit, as his/her agents to take animals under the terms of the permit. A designated agent shall be any person who is acting under the direction and control of the permittee and who is 21 years of age or older. The designated agent(s) shall be named on the permit. The permittee may substitute designated agents with prior written approval of the department.

(f) Persons Prohibited from Taking Animals. No person shall take animals pursuant to the permit if he/she has been convicted of a violation related to the take or possession of game or furbearing mammals in the past 24 months or if he/she is on probation and may not hunt or possess a firearm as part of the terms of probation. A landowner who is on probation and may not hunt or possess a firearm as part of the terms of probation shall designate a qualified agent to take animals under a permit.

(g) Reports Required.

(1) Holders of permits authorizing take of wild pigs shall provide a report listing the date and sex of each wild pig taken. A report shall be submitted whether or not any animals were taken. The reporting period shall be by calendar month. The permittee or designated agent shall complete and submit the report to the department on or before the 15th day of the following month. Reports shall be submitted to the address provided by the department.

(2) Holders of permits authorizing the use of dogs to take bear or bobcat shall comply with the requirements of Fish & Game Code section 3960.2 and shall submit a report to the department within 30 days of permit issuance. Reports shall be submitted to the address provided by the department. Reports shall include the following information:

(A) Date of kill and the sex of any bear or bobcat that was killed.

(B) Details regarding all pursuits, including any information about a pursued bear or bobcat, even if the animal was not killed.

(C) An explanation of why any pursued bear or bobcat was not killed, and whether such bear or bobcat was harmed.

(3) Holder of permits authoring take of beavers shall provide a report documenting whether associated natural structures, such as beaver dams, were removed, destroyed, or otherwise altered.

(h) Tagging Animals. All animals taken pursuant to a permit, except wild pigs, shall be immediately tagged with tags provided by the department. Wild pigs shall be tagged prior to being transported from the property designated in the permit. Tags for animals except wild pigs shall be completed at the time the animal is taken. Tags for wild pigs shall be completed before the wild pigs are removed from the property. Tags shall clearly show the permittee's name, address, date and location the animal was taken and shall include the signature of the person taking the animal. The report portion of each tag shall be

mailed to the department without delay. No tags are required for squirrels or beavers.

(i) Utilization of Carcass. Animals taken pursuant to this permit must be disposed of as required in the permit. No animals, except wild pigs, may be utilized by the permittee or designated agent. The permittee or designated agent may leave the carcass of any wild pig where it was taken for reasons of high air temperatures, disease, parasites, or conditions which preclude use of the carcass. A person who makes every reasonable attempt to utilize the carcass of any wild pig as required in this subsection shall be deemed to be in compliance with Section 4304 of the Fish and Game Code. (1) After any taking of bear, the permittee or agent shall comply with Section 367.5 of these regulations, except the skull shall not be returned to the permittee or agent.

(j) Suspension and Revocation of Permits.

(1) Permits may be suspended temporarily by the director for a breach or violation of the permit by the holders thereof, their agents, servants, employees or any person acting under their direction and control. The commission shall be notified of any such suspension and subsequently may revoke or reinstate the permit, or fix the period of its suspension, after written notice to the permittee and the permittee has been afforded an opportunity to be heard.

(2) Any person who has had his/her permit revoked or suspended by the commission shall be required, upon application for a new or subsequent permit, to appear before the commission and demonstrate to its satisfaction that the use of such a permit will be consistent with depredation control, with these regulations, and with the laws under which they are promulgated.

(k) It is unlawful for a permittee or agent to violate any of the terms or conditions of a permit issued pursuant to this section.

(l) The permit does not invalidate any city, county, or state firearm regulation.

4. Rationale (Required) - Describe the problem and the reason for the proposed change:

The North American beaver (*Castor canadensis*) is native to California. Accordingly, the flora and fauna of the state have co-evolved with the beaver, developing unique and complex interwoven relationships. Beavers, however, are currently missing from much of their historic range and the effects of their absence are felt by the species that co-evolved with beavers. Beaver create freshwater habitats used by a variety of wildlife, including fish, birds, and other mammals. Their dams filter stream water, improve water quality, raise the water table, increase water storage, and repair eroded riparian areas. In particular, beavers have a significant beneficial relationship to many species currently listed as threatened or endangered under the California Endangered Species Act and/or the federal Endangered Species Act, such as coho salmon. The proposed amendments to the regulations recognize the unique ecological importance of beavers and take steps towards promoting our co-existence with beavers by prohibiting the commercial trapping of beavers, and by requiring that non-lethal or less-lethal measures have been taken to avoid and minimize conflicts with humans. The proposed regulations are in line with how many other states now manage beavers.

Beavers are Biologically Important to California

Beavers are native to much of California, from arid desert streams, to high mountain meadows, to coastal forests. California's beavers were nearly extirpated from the state by over trapping. Although some attempts have been made to reintroduce beavers or assist in their dispersal, beavers remain missing from much of their historic territory, in particular northern California coastal streams and high mountain meadows where the benefits of beavers may be most acutely felt.

The total impact of beavers to the hydrologic characteristics of streams is difficult to overestimate. Beaver dams increase in-stream storage capacity, which in turn has been shown to result in greater summer flows, even going so far as to result in continual flow in previously seasonal streams. Impoundment of water also has been shown to stabilize water temperatures. Beaver dams slow stream flow resulting in increased sedimentation, thereby raising incised channels to the point where streams are reconnected to their historic floodplains.

Beaver dams are so ecologically important that watershed restoration groups are now turning to “beaver dam analogs,” human engineered approximations of beaver dams, to provide the same ecological functions. Unlike beaver dams, continual human maintenance—and cost—is required.

Broadly, the presence of beaver has been shown to increase bird, fish, invertebrate, amphibian and mammalian abundance and diversity. Turning specifically to native fish species, the overall net effect of beavers is positive, as many of these hydrologic changes associated with beaver dams benefit fish. Over 80 species of North American fish have been documented using beaver ponds; 48 of which commonly use beaver pond habitats. The slow current and large surface to edge ratio has been shown to increase vegetation and aquatic invertebrates, providing substantially improved forage compared to unimpounded streams. The slow current also requires less expense of energy for fish. Turning specifically to coho salmon, the effects of these changes are perhaps most pronounced. For overwinter use, coho salmon use side channel habitat influenced by beaver dams at a higher density, and were larger and had a better juvenile survival rate than juvenile salmon in side channels not impacted by beavers. Similarly, beaver dams are important during the summer, as are salmon who were found upstream of beaver dam were not only consistently larger, but also occurred there in higher densities. One study found, for example, that though these upstream reaches accounted for less than 1% of the total available habitat, these dam-influenced areas contained over a third of the total juvenile salmon for the entire watercourse.

Beavers also have been shown to have positive benefits to other species. Beaver dams are associated with increased riparian habitat, such as willow. This willow serves as important habitat for the southwestern willow flycatcher (*Empidonax traillii extimus*) and least Bell’s vireo (*Vireo bellii pusillus*). Tidewater goby (*Eucyclogobius newberryi*), listed as “endangered” under the Endangered Species Act, has been shown to utilize both inundated areas behind beaver dams and bank burrows made by beavers. (USFWS 2005). Beaver dams are thought to provide important refugia for endangered California red-legged frogs (*Rana draytonii*) and western pond turtles (*Actinemys marmorata*), a “species of special conservation concern” in California.

New Regulations Pose Minimal Hardship for Landowners

In some places, beavers can conflict with human uses of the landscape, as dams can cause flooding for adjacent lands. Additionally, beavers may remove some riparian vegetation or may alter the structure or composition of riparian areas in a way that is undesirable to a landowner. As the rules are currently written, it is too easy to obtain a permit to take beaver through a depredation permit, thereby discouraging non-lethal deterrence. The proposed rulemaking would not prohibit lethal removal of beavers but it would ensure that beavers are taken (killed) only when necessary, after non-lethal measures have been attempted. Further, the rules would still allow for the lethal removal of beaver if exigent circumstances require their removal.

Coexistence with beavers is often possible with minimal effort by landowners. Many beavers are removed because of the dams that they produce impound areas with water against the wishes of property

owners. A variety of devices and techniques have been developed to reduce impoundment and flooding. Beavers are also taken because of impacts to vegetation adjacent to waterways. This vegetation can easily be protected with hardware cloth or welded wire mesh wrapped around the base of the tree. The Department maintains a guide on “Living with Beavers,” which is attached to this petition, that discusses many of the ways humans can co-exist with beavers.

Proposed Regulations Insulate State Against Litigation

The proposed rulemaking also insulates the Department against potential litigation under the Endangered Species Act (ESA). In issuing permits to allow the taking of beavers, the Department may violate the ESA if such taking would, in turn, take any other species subject to the Endangered Species Act’s take prohibition. By making clear that the Department is unable to authorize the taking of beavers if such taking would result in the violation of the ESA or any other law and by requiring the Department to conduct a site-specific investigation of potential impacts, the Department will avoid future litigation.

As it relates here, the ESA prohibits any person, including state and local governments, from “tak[ing] any [endangered or threatened] species within the United States or the territorial sea of the United States.” 16 U.S.C. § 1538(a) (1) (B). In addition, the ESA makes it unlawful for any person “to attempt to commit, solicit another to commit, or cause to be committed, any offense defined” in the ESA. *See* 16 U.S.C. § 1538(g). The term “‘take’ means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.” § 1532(19). In turn, “[t]ake’ is defined...in the broadest possible manner to include every conceivable way in which a person can ‘take’ or attempt to ‘take’ any fish or wildlife.” S.Rep. No. 93-307, at 7 (1973); *see also Babbitt v. Sweet Home Chapter of Communities for a Great Oregon*, 515 U.S. 687 (1995) (citing Senate and House Reports indicating that “take” is to be defined broadly). Pursuant to 16 U.S.C. § 1538(g), “It is unlawful for any person to...cause to be committed[] any offense defined in this section,” which includes the taking of a protected species. The Department, in issuing permits, is subject to the Act’s prohibition on authorizing take.

As the First Circuit Court of Appeals found in *Strahan v. Cox*, “The statute not only prohibits the acts of those parties that directly exact the taking, but also bans those acts of a third party that bring about the acts exacting a taking.” *Strahan v. Cox*, 127 F.3d 155, 163 (1st Cir. 1997) cert. den. 525 U.S. 830 (1998). This includes situations where a government authorizes another to conduct activities that would result in a violation of the act. In *Strahan*, the court found Massachusetts officials liable under the ESA for licensing commercial fishermen who employ methods known to harm listed whales.¹

The proposed regulation would make clear the Department’s obligation to deny any permit application that may cause the taking of any listed species or may otherwise cause a violation of federal, state, or local laws. Furthermore, it directs the Department to make a finding on impacts to listed species if lethal removal may adversely impair a listed species. Lastly, the proposed regulations would require a report if a beaver dam were to be removed.

Proposed Regulations are Consistent with Regulations in Other States

¹ The First Circuit is not alone. A long-line of “*Strahan-take*” cases have been upheld in courts across the country, including in California. *See Coalition for a Sustainable Delta v. McCamman*, 725 F. Supp. 2d 1162, 1167–68 (E.D. Cal. 2010) (recognizing that state regulating agencies may be held liable for take under the ESA, but holding there were disputes of material fact regarding whether the striped bass sportfishing regulations at issue caused take of listed salmonids).

In recognizing the unique biological importance of beavers and limiting their take to reduce impacts on the environment, California would join many other states who have come to recognize the importance of beaver in restoring and preserving healthy aquatic ecosystems. Massachusetts, for example, requires individuals to apply to remove beavers and limits their removal when beavers are causing material harm or when they pose a threat to human health or safety. Further, if removal of beavers, dams, or the de-watering of ponds may impact listed species, applicants have to seek other separate advance approval from the state. As another example, New York requires a site-specific consideration of local beaver populations and requires the state to inform applicants of the positive ecological benefits of beavers and alternatives to trapping prior to issuance of a depredation permit.

SECTION II: Optional Information

5. **Date of Petition:**
6. **Category of Proposed Change**
☐ Sport Fishing
☐ Commercial Fishing
☐ Hunting
☒ Other, please specify: Depredation permit issuance
7. **The proposal is to:** *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*
☒ Amend Title 14 Section(s): 401
☐ Add New Title 14 Section(s):
☐ Repeal Title 14 Section(s):
8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition**
Or ☒ Not applicable.
9. **Effective date:** If applicable, identify the desired effective date of the regulation.
If the proposed change requires immediate implementation, explain the nature of the emergency:
10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents: “Living with Beavers, produced by the California Department of Fish and Wildlife, is attached to this petition. .
11. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing: The state already created resources on non-lethal methods of dealing with beavers, and the costs of implementing those methods on site will be the responsibility of the applicant. The proposed regulatory changes would likely result in fewer permit applications, reducing the need for processing and oversight of permits issued by the agency. If the

agency continues to issue permits to kill beavers in areas occupied by listed species that depend upon beavers, however, more resources may be required to analyze, document, and mitigate impacts to listed species.

12. Forms: If applicable, list any forms to be created, amended or repealed:

Living with Beavers

The American Beaver (*Castor canadensis*) is the largest living rodent in North America, with adults averaging 40 pounds in weight and measuring more than 3 feet in length, including the tail. These semi-aquatic mammals have webbed hind feet, large incisor teeth, and a broad, flat tail (Figures 1 and 2).

Figure 1. Photo by Cheryl Reynolds and courtesy of Worth A Dam

Once among the most widely distributed mammals in North America, beavers were eliminated from much of their range in the late 1800s because of unregulated trapping and loss of suitable habitat. Beaver are native to California and historically occurred along the coast, throughout the Central Valley, Colorado River basin, and into the Sierra Nevada and Cascades mountain ranges. However, by the early the 20th century their geographic range had decreased dramatically as a result of intensive fur-trapping and loss of suitable habitat caused by extensive land and water development. Between 1923 and 1950, the State of California conducted a successful reintroduction program using parachutes in some instances to plant beavers in remote mountain locations (Hensley 1946). Today, interest in beavers in California is on the rise as the benefits to fish and wildlife habitat, surface water storage and ground water recharge become more apparent during drought conditions.

Life History

Beavers are monogamous and mate for life. Females reach sexual maturity at 1.5 to 3 years of age and will typically birth 1-4 or more kits per year, depending on habitat quality and the availability of food. Beavers typically breed only once per year during the winter months, giving birth to kits in late spring, though significant variation occurs depending on latitude and climate (Baker and Hill 2003).

Beavers maintain family units which consist of an adult breeding pair, young of the year and young from the previous year. Sometimes, when habitat quality is poor or population levels are near their carrying capacity, older offspring will remain with the family unit for more than 2 years.

Beavers are strict herbivores and they generally prefer grasses, leaves, and aquatic plants such as cattails, bulrushes, and water lilies. Fermentation by special intestinal microorganisms allows beavers to digest 30 percent of the cellulose they ingest. In the fall and winter, they feed primarily on the bark and cambium of trees and shrubs. Aspen, cottonwood, willow and alder are preferred woody species in California. Beavers sometimes consume growing crops, and in some cases may travel 100 yards or more from a pond or stream to reach corn fields, soybean fields, and other growing crops. In these cases they generally cut the plants off at ground level and drag them back to the water.

Beavers do not hibernate. When the surface of the water is frozen, beavers eat bark and stems from a food “cache” they have anchored to the bottom of the waterway for the winter. They have also been seen swimming under the ice to retrieve roots and stems of aquatic plants. They are generally nocturnal, but it is not uncommon to see beavers during daylight hours, particularly in larger water bodies. They generally do not stray far from the relative safety of water.

Viewing Beavers

Look for signs of beavers during the day; look for the animals themselves before sunset or sunrise. Approach a beaver site slowly and downwind. (Beavers have poor eyesight but excellent hearing and sense of smell.) Look for a V-shaped series of ripples on the surface of calm water. A closer view with binoculars may reveal the nostrils, eyes, and ears of a beaver swimming.

Figure 2. Beaver at French Creek, Siskiyou County. Photo by M. Stapleton.

If you startle a beaver and it goes underwater, wait quietly in a secluded spot and chances are that it will reemerge within one or two minutes. However, beavers are able to remain underwater for at least 15 minutes by slowing their heart rate.

When seen in the water, beavers are often mistaken for muskrats. Try to get a look at the tail: Beavers have a broad, flat tail that doesn't show behind them when swimming, whereas muskrats have a thin tail that is either held out of the water or sways back and forth on the water's surface as the animal swims.

Beavers stand their ground and should not be closely approached when cornered on land. They face the aggressor, rear up on their hind legs, and hiss or growl loudly before lunging forward to deliver extremely damaging bites.

Wildlife Habitat Benefits

Beavers are well known for their construction efforts. They create dams and lodges for shelter and protection, largely with woody material. The woody material used in construction is either gathered from the ground locally, or from small and medium sized trees that the beavers fell with their teeth (Figures 4 and 5). The orange tooth enamel of their incisors is thicker on the front than the back, allowing for a self-sharpening wear pattern that maintains their chisel-like edge.

Figure 3. A beaver uses its tail as a prop in order to sit upright. (Miller and Yarrow 1994)

Depending on the type of water body and local habitat conditions, beavers may also construct burrows in the bank of a stream or river. These bank dens may be used in lieu of, or in conjunction with a lodge (Figure 5) and often take advantage of natural features such as logs or stumps.

Figure 4. Beavers have self-sharpening incisors. Photo courtesy Washington Dept. of Fish and Wildlife.

Beaver dams create habitat for many other animals and plants of California. Deer and elk

frequent beaver ponds to forage on shrubby plants that grow where beavers cut down trees for food or for use in constructing their dams and lodges. Weasels, raccoons, and herons hunt frogs and other prey along the marshy edges of beaver ponds. Sensitive species such as red-legged, yellow-legged and Cascade frogs all benefit from habitat created by beaver wetlands. Migratory water birds use beaver ponds as nesting areas and resting stops during migration. Ducks and geese often nest on top of beaver lodges since they offer warmth and protection, especially when lodges are formed in the middle of a pond. Willow flycatchers use the shrubby re-growth of chewed willow stumps to seek shelter and find food.

The trees that die as a result of rising water levels attract insects, which in turn feed woodpeckers, whose holes later provide homes for other wildlife. In coastal rivers and streams, young coho salmon and steelhead may use beaver ponds to find food and protection from high flows and predators while waiting to grow big enough to go out to sea (Pollock et al. 2003).

Figure 5: Beaver pond and lodge on Sugar Creek, Siskiyou County. Photo by CDFW's Mary Olswang.

Preventing Conflicts

Beaver activities can cause problems, but before beginning a beaver control action, assess the problem and aim to match the most appropriate and cost-effective controls to the situation. There are two basic control methods used in California: prevention and lethal control. There are many non-profit organizations in California that support alternatives to lethal control. [The Benefits of Beaver to California & Stewardship Strategies Resource List](#) is a valuable educational resource.

Practical tips for minimizing conflict. It is almost impossible as well as cost prohibitive to exclude beavers from ponds, lakes, or impoundments.

Exclusion

Fencing off groups of trees or shrubs or garden plots with a low fence (three feet tall) will protect them. Since beavers generally do not like to stray far from water (this opens them up to greater risk of predation), fences may be effective even if they do not completely surround the area (if you choose to fence only part of an area, fence the portion of the area toward the water source, and part way along the sides). The fence should be constructed of woven or welded wire and be well anchored to the ground, so that beavers do not crush it, crawl under it, or walk over it.

An electrified wire strung 4-6" above the ground may also be an effective beaver deterrent. Fence chargers, wiring, and wire hangers suitable for use on pets and other small animals are generally available at hardware stores, feed stores, and home improvement centers.

Protection of individual trees and plants

Valuable trees and other plants adjacent to waterways may be protected from beavers by encircling them with hardware cloth (chicken wire is generally too flimsy), welded wire mesh or sheet metal (WDFW 2015). Welded wire mesh of 2" x 4" seems to be an optimal material in terms of

effectiveness, durability, aesthetics and cost of construction. The barrier should afford 6 inches to one foot of space between the barrier and the tree, extend at least three (preferably four) feet above ground level and be dug into the ground 3-4 inches for maximum effectiveness (Figure 6).

Alternatively, painting tree trunks with a sand and paint mixture may also prevent beaver gnawing, and may be more aesthetically pleasing than metal barriers. Beavers do not find the sand to be appetizing, and the mixture will be effective for approximately two years. The sand/paint ratio should be approximately 8 ounces (2/3 cup) of fine sand to one quart of latex paint.

Prevent flooding

Have you ever cut a notch into the dam and come back the next day to see it patched and re-enforced with mud? Beavers are attracted to the sound of running water and will repair most dam breaches and plug most culverts and pipes that are installed in order to drain the ponds. Beavers also require a certain depth of water to move around and escape predation.

A variety of devices and designs have been developed for controlling beaver impoundments and keeping blocked culverts open. The Flexible Leveler and Beaver Deceiver are two examples. Visit <http://www.beaversolutions.com/> for more information.

Modification of beaver dams, or any construction work within lakes or within the bed and bank of a stream, may require a Streambed Alteration Agreement permit from the California Department of Fish and Wildlife (CDFW). Before attempting to install any beaver devices, contact CDFW in order to determine for assistance.

Depredation Regulations

If all alternatives are exhausted and beavers are continuing to damage or threaten to damage land or property, the owner or tenant of such property may apply to the Department for a permit to kill the depredating animals. Upon satisfactory evidence of such damage or destruction, the Department shall issue a revocable permit allowing the taking of such animals (Fish and Game Code §4181). No animals killed pursuant to such a permit may be utilized by the permittee or his agent (Title 14, California Code of Regulations, §401(i)). For additional information, contact your regional Department of Fish and Wildlife office or visit <https://www.wildlife.ca.gov/Regions>.

Public Health Concerns

Beavers can be infected with the bacterial disease tularemia that is transmitted by ticks, flies and ingestion of contaminated water (Gaydos 1998). Human can also contract the disease by eating infected meat or allow an open wound come in contact with an infected animal.

Figure 6. Drawing by Jenifer Reese (Miller and Yarrow 1994)

Beavers defecate in the water in which they live. Ingested water by humans may cause Giardia, a common flu-like infection.

Tracking Number: (2019-026)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, 1416 Ninth Street, Suite 1320, Sacramento, CA 95814 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Stanley Backlund, Trout Unlimited El Dorado

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: In 1945 the Fish and Game Commission received the responsibility for promulgating regulations to manage sport fishing and hunting. This act was done by the Legislature, through a constitutional amendment. The Fish and Game Commission has a wide range of responsibilities that continually expands and includes: Seasons, bag limits and methods of take for game animals, sport fishing and some commercial fishing. Beginning October 1, 2015, every person or agency recommending that a regulation be added, amended, or repealed must submit a petition to the commission using the authorized petition form: [FGC 1](#).

3. Overview (Required) - Summarize the proposed changes to regulations: Revise the bag limit for fishing on Caples Creek in El Dorado County. The winter regulations shall be applied year round. The effect is to reduce the summer take from five fish to zero.

4. Rationale (Required) - Describe the problem and the reason for the proposed change: Caples Creek was designated as a Wild Trout Water by the DFW in 2015. No management changes have been made in the interim. Wild Trout Waters are those that support self-sustaining (wild) populations of trout, are aesthetically pleasing and environmentally productive, provide adequate catch rates in terms of numbers of trout, and are open to public angling. Fish populations in Caples Creek do not support this definition. Surveys do not find rainbow trout where observed prior to designation. Restricting take should result in a rebound of fish population. Our El Dorado Chapter of Trout Unlimited has a goal to create an improved fishery with a large population of Rainbow Trout including fish in excess of 12 inches in length. This change will allow fish repopulation, improve fishing opportunity and result in an increase in visitation to the region. The existing five fish limit allows removal of the prior population.

Surveys conducted in 1998, 1999, 2000 and 2001 prior to licensing found rainbow trout at all survey sites. In 2011 the DFW found densities of 849 rainbow trout per mile averaged from all sites. Their angling survey yielded 1-2 fish per hour. In 2011, 41 brook trout and 4 brown trout were reported. Limited surveys of the creek have been performed four times from 2011 to 2017. No Rainbow Trout were detected. Fishing by members of our Trout Unlimited chapter in 2013 and 2014 was unproductive. There are 58 Wild Trout Waters in California. Forty of them have special regulations limiting catch. Caples is deserving of a limit to protect fish stock.

SECTION II: Optional Information

5. Date of Petition: March 22, 2019

6. Category of Proposed Change

- ☒ Sport Fishing
- ☐ Commercial Fishing
- ☐ Hunting
- ☐ Other, please specify:

7. The proposal is to: *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

- ☒ Amend Title 14 Section(s): Division 1-Department of Fish and Wildlife Freshwater Sport Fishing Regulations, 7.5 Waters with Special Fishing Regulations, (b) Special Regulations, (4.5)
- ☒ Add New Title 14 Section(s): 7.5 Waters with Special Fishing Regulations, (b) Special regulations. (New paragraph) Caples Creek: Open all year. Only artificial lures with barbless hooks may be used. 0 trout.
- ☐ Repeal Title 14 Section(s): None

8. If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition [Click here to enter text.](#)
Or ☒ Not applicable.

9. Effective date: If applicable, identify the desired effective date of the regulation.
If the proposed change requires immediate implementation, explain the nature of the emergency: April 26, 2020.

10. Supporting documentation: Identify and attach to the petition any information supporting the proposal including data, reports and other documents: Attachment 1 provides links to the survey data referenced in paragraph 4.

11. Economic or Fiscal Impacts: Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing: This regulatory change is expected to expand catch and release opportunities in Caples Creek thereby increasing visitation and recreational spending in the three counties of El Dorado, Amador and Alpine.

12. Forms: If applicable, list any forms to be created, amended or repealed:

None

SECTION 3: FGC Staff Only

Date received: [Received by email on Friday, November 22, 2019 at 11:00 AM.](#)

FGC staff action:

- ☐ Accept - complete
- ☐ Reject - incomplete
- ☐ Reject - outside scope of FGC authority

Tracking Number 2019-026

Date petitioner was notified of receipt of petition and pending action: _____

Meeting date for FGC consideration: _____

FGC action:

- ☐ Denied by FGC
- ☐ Denied - same as petition _____
- ☐ Granted for consideration of regulation change

Re: Living with Coyotes Meeting Wed Oct 8, 2019 at Rincon Govt Center

Dear Commissioners and Powers that Be,

I am a long time resident of Yorba Linda which is down south in Orange County. I've lived in California all my life.

Having always respected and lived in harmony with our large variety of beautiful wildlife, I need to ask your help for the 70,000 residents in my city. I've asked the State on different occasions and they have always turned down my requests. This has now resulted in issues being escalated (as I have along predicted) to where communities have been divided into the Hatfields vs McCoys when it comes to Coyotes.

Yorba Linda is bordered by the obvious wilderness of the large Santa Ana River and the 15,000 acre Chino Hills State Park. We are an ever-growing 'gentrified' semi-rural city with many new homes still being built. As with many cities, our continued problem is that newcomers (as well as negligent long-timers) do not follow wildlife guidelines. It's mostly due to lack of wildlife education, complacency, laziness and lack of enforcement/fines.

Unfortunately, some folks are eventually brought to reality by the tragic loss of a pet. It is then when these grieving people become easy prey by outside radical groups (OC Coyote & Evict Coyotes) that encourage and coach them to make trouble for the City/County/State and even instruct them on how to secretly/illegally kill coyotes while inciting as many as possible on our neighborhood www sites with made up stories/phony pix and misinformation. They brag about killing coyotes with crossbows and convince residents that it's absolutely ok to kill coyotes by baiting/luring innocent coyotes to your yard, use a collarum trap, shoot them in the head with a rifle and then put the lifeless carcass in a double black, plastic, hefty garbage bag and throw it in the trash. And if caught, just be ready with a story that the coyote was attacking you or your family or pet and you were just protecting your family and property. And to do likewise when you just wanna use one of your shiny new guns and "Shoot as many as you want because Calif considers Coyotes like vermin and rats and it's your 2nd Amendment Right".

CAUTION: It's probably 100% chance that these organized, radical types have been/will be attending your meetings as they have also invaded ours.

In fact, our recent Coyote Awareness Mtg in May (attended also by Senator Chang) was infiltrated by outside radicals (whose www site proved their deliberately planned trouble making). It got so out of control that the mtg had to be abruptly ended before residents' questions were answered.

For some reason, assuming that people will follow laws and guidelines while using common sense and due diligence is about as naïve as hoping for World Peace. That's why we need you.

I could write pages and pages of all the work and efforts I've made; however, I found out today that you're having a big meeting further down south this coming Wednesday Oct 9th. It's too far for me to attend so I had to write you real FAST. Please keep in mind that I have previously tried and tried to get proper assistance from my City/County/State to no avail.

So here are my 3 top main requests for your intervention:

- 1) Calif State law has long prohibited the 'feeding' of wildlife. The problem is that the law remains so lamely worded that it's not enforced. Folks think it just means don't share a bag of In-N-Out burgers with wildlife. So it needs to be more clearly and strictly worded to prohibit deliberate feeding AND especially to include the accidental, on-purpose, lazy, negligent feeding.

Remember in the very old days when Natl Parks used to feed bears at their large trash dumps with visitors excitedly watching in special grandstands? So of course the bears then associated food with people which scared the people who demanded the bears be destroyed. Stupidity and ignorant mistakes caused the deaths of a great many innocent bears. But these days you just try leaving even one single Pringles chip in the back seat of your car and the guys in Smokey Bear hats will descend upon you like thunder. Thank God.

So we gotta do the same for all our wildlife. And since too many folks don't observe laws unless they've very clearly written with significant fines, we need to start by simply updating our wildlife feeding laws and ENFORCE THEM. Calif always tells me NO whenever I ask them to; however, both State and County tell me that my City is free to write their own ordinance??? But then my City tells me NOPE and puts blame back on State and County. A lil too much finger pointing, don't cha think?

- 2) There's a new law (AB44?/AB273) prohibiting the killing of coyotes for their pelts. I've tried to get State and local officials to tell me how hopefully this helps prevent the flagrant killing of coyotes, but no one knows the details. Our coyotes do NOT cause the problems. They just wander thru their own ancient paths, storm channels, dried lake beds, etc. Of course they're gonna eat open food garbage, vegetable gardens, over burdened fruit trees, unsecured chickens or small pets when chuckleheads don't follow guidelines and leave them out in the open.

Just one example: At our May coyote mtg, we witnessed the worst public confession of negligent coyote feeding in our City's history. An HOA Board member stood and said "We have 40 coyotes in the back of our condo complex and YOU have to come KILL THEM ALL!" (Yup,

that's right, she said forty.) She finally confessed that their residents never followed guidelines or rules to close the lids on all their many, large, commercial size, heavily food-laden dumpsters. She admitted they had created 40 coyotes that now thrived in the back of their dense, heavily landscaped property. (I later went to see it for validation-it was like a Club Med Paradise for Coyotes). She said they could hear the pups' cries in the bushes and admitted they hadn't been harmed or confronted (why would they with full bellies from a 24/7 heavenly coyote buffet). But she was nasty and rude, demanding that F&W come out immediately and kill them all! (I could write a book about that night.....)

- 3) Wildlife Education only reaches a tiny % of the population. It's common in our cities to have new neighbors and revolving neighbors as well as existing lackadaisical neighbors or new Parents or 1st time Pet owners, etc that all need the wildlife laws and guidelines hammered into their heads. On our neighborhood sites we kindly share info and various links to EVERYTHING they need as well as tips and advice; however, it only reaches a small part of our population and some don't take it as seriously as if it had come directly to them from the appropriate agencies. Plus we continue to have a growing problem with trolls from radical groups that encourage them to ignore it.

And we're not allowed to encourage education thru Neighborhood Watch groups and HOAs because I'm told by Orange County Sheriff's Dept that the main contact info for those groups must be kept secret and that the Sheriff's Dept never gets involved with wildlife education or coyote issues.

I've asked YL for a F&W Wildlife Watch Program. For the 1st time they didn't tell me flat NO but they didn't say yes, just that they'll look at it. By the way, the City also nixed my request to put up all the City's wildlife caution signs that I've seen used over the decades. I think they get an ulcer envisioning how the caution signs would look next to all their big shiny signs that say "NEW HOMES FOR SALE, \$2 MILLION AND UP".

So I also asked County Animal Care if they could do as they have done in the past which is to go door to door with their wildlife info. I even have a past L.A. Times article stating that the County went door to door advising residents and/or leaving flyers regarding wildlife (it was after a drought). That's the only way you're ever going to notify everyone (unless you do a mass mailing to every address?). We of course also have lots of bobcats, mountain lions, rattlesnakes and birds of prey but it's that ole Coyote that always gets the rap. It makes the most sense for the County to distribute info again since they're always going door to door making sure cats & dogs are licensed-so it can't be a budget issue excuse. But....again the County told me NO.

So we're in great need of your help and guidance. I could write much more and I've done a huge amount of work, educated scads of people and spoken to as well as assisted a large number of agencies, experts and biologists.

What needs to be done is simple but we need your leadership. We gotta get folks educated and enforce more clearly worded laws. It's also critical that whenever it might be ultimately necessary as a last resort to take unfortunate action against any wildlife, we **MUST MAKE ABSOLUTELY CERTAIN THAT EVERY INSTANCE IS VALIDATED AND WELL DOCUMENTED.**

There is enormous written proof that radical groups encourage and teach people to make phony incident claims and they tell them what lies they can simply tell in order to get an innocent wildlife animal killed.

And do you want me to get into the large number of unethical trappers that secretly break trapping laws just so they can get \$2,300 and more for killing each innocent coyote? It's a huge semi-black market, underground business. They'll even lie and tell the most gullible people that they're just going to catch them in a comfy cage and take them by truck to 'relocate' them up to Big Bear mountain. It's so rampant they make jokes of all the secret killings or comment openly about how dumb residents must be to think that all their gunshots must be fireworks. There's virtually no oversight which makes it open season on unsuspecting, innocent Coyotes. The City and County only say 'Oh well, if we didn't see the killing happen, we can't do anything about it.' The unethical/illegal practice also causes our Coyotes to ultimately breed in higher numbers to compensate for the killings.

Please don't let our coyotes suffer a debacle of deadly consequences similar to that of our precious bears that were killed simply from eating at Natl Park trash dumps. Have we not learned anything? Our Coyotes need you just as much now as our Bears did long ago.

It's totally unacceptable that our problems continue to be allowed by the 2-legged varmint kind.

Please help,

Robin Patton

FISH AND GAME
COMMISSION
2019 NOV 19 PM 12:36

Tomaes Bay Oyster Company, LLC

PO Box 847, 15479 Hwy One
Marshall, California 94940
415-663-1242

November 14, 2019

To: Melissa Miller-Henson, California Fish and Game Commission

Subject: Request to make amendment to State Water Bottoms Aquaculture Lease M-430-05

Dear Madam,

Tomaes Bay Oyster Company, LLC (TBOC) is requesting an amendment to State Water Bottom Aquaculture Lease #M-430-05.

TBOC would like to request the addition of approved species, Kumamoto oyster (*Crassostrea Sikamea*), Olympic oyster (*Ostrea Lurida*), Bay Mussels (*Mytilus Trossulus*), and Manila clam (*Venerupis Philippinsum*).

TBOC would also like to amend approved culture methods to include floating long lines and tipping bags.

Floating long lines oyster bags attach to a long line and that line is anchored to the bottom of the bay using helix-type anchors that screw down into the mud and are removed in the same way. The anchors are steel, auger-type mud screws four feet long and their full length is screwed into the soft mud bottom, making for a very secure hold. A rope line is attached to the eye of the anchor at the mud surface. A buoy is tied onto the top end of this buoy line. A loop is twisted into this secured line. The end of a long half-inch rope is tied into the loop. This long line is stretched some fifty feet and tied into another anchor added in the same manner as described.

After another fifty feet is stretched, a third anchor is embedded and so on until the full 200 feet of line is set.

Typically, there are four or five anchors securing the long line. The long line itself has loops twisted into it every three or four feet and at each loop a floating bag is tied to the loop using a three-foot tether or connecting rope. The tether line permits each bag to be free floating and able to respond freely to wind and wave action. Once the lines are set, the floating bags will be brought out to the lines by boat, and one bag tied to each eyelet, one after another, for the full length of the line. Some of the lines hold as many as 125 bags. The bag's floatation is supplied by plastic molded tubes 2 ½ feet long and three inches round. The tubes have already been wired into the mesh of the bag before the seed is introduced.

California Fish and Game Commission

November 14, 2019

Tipping bag system:

What we refer to as 'Golden Nugget' bags or tipping/swinging bag culture.

Using this approach, oyster bags are suspended off the bottom of the bay by being tied to half inch lines that are held up by pvc stakes spaced every seven feet. The line is pulled taught and sits in the notches cut into the pvc stakes. Each bag has floatation attached at the bottom but not the top. When the tide moves in, the bag lifts and when the tide falls the bag slowly falls, causing the oysters to tumble over one another and work against one another.

If there is any other information you need about these requests please let me know.

Thank you for attention to this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Heidi Gregory', with a long horizontal line extending to the right.

Subject: Experimental Gear Permit for herring 2019-2020

Sent from my iPad

Request for Experimental Gear Permit by
Ken Bates, F/V Ironic
November 20, 2019

I am requesting the issuance of an experimental gear permit to take Pacific Herring in Humboldt Bay by lampara bait net as described in the Fish and Game code. I wish to fish during the 2019-2020 season. I hold Herring Permit #H-1-E and have held this Permit since 1974.

I am working to access alternative markets for Pacific Herring. These markets are volume specific. Because it is not possible to control catch rates and dead discards when taking Herring with gill net gear, I am requesting the opportunity to take herring with small scale lampara gear. This will allow me to release excess catch, alive and unharmed. Please take a moment to see YouTube video "Herring research in Humboldt (Herring Survey work for the Department)

I understand that my request is allowed under Chapter 9: Section 8606(b), "a permit may authorize new methods of using existing gear otherwise prohibited by this code and may authorize that use of existing gear in areas otherwise closed to that use by this code".

Thank you.
Ken Bates

Subject: Recreation Impacts on Wildlife
Attachments: Larson et al. 2016 Effects of Recreation on Animals.pdf; 20190413 SDUT Wildlife officials, mountain bikers fight turf war.pdf

Mr. President and Commissioners

The att are follow-up to my public comments at the F & G Commission meeting on October 9, 2019 about the adverse impacts of even non-consumptive recreation on wildlife.

The Larson et al study reviewed 274 articles and found impacts across geographic areas, taxa and recreation types.

The UT article highlights the issue in our local area of concern- Calavera Highlands Ecological Reserve.

Thank you.

Wildlife officials, mountain bikers fight turf war over Carlsbad reserve

April Esconde, wildlife officer with the California Department of Fish and Wildlife, says mountain bikers have been cited recently in the Carlsbad Highlands Ecological Reserve where bikes are not allowed. (K.C. Alfred / San Diego Union-Tribune)

California State Fish and Wildlife is boosting enforcement of Carlsbad Highlands Ecological Reserve, where mountain bikers have carved trails into the hillsides

By DEBORAH SULLIVAN BRENNAN

APRIL 13, 2019
8:36 AM

State wildlife officials are shutting down a spiderweb of bike trails that weave across Carlsbad Highlands Ecological Reserve, and warning bikers to stay out, in a campaign to stop illegal use of the sensitive property.

Their actions began last week, and are continuing as state game wardens patrol the site for mountain biking, vandalism and off-leash dogs. Since Saturday, wardens have issued two tickets and nearly 200 warnings to users who don't know or don't follow the site's rules.

The ramped-up enforcement results from a years-long standoff between wildlife officials and mountain bikers over use of the site, said Ed Pert, manager of the California Department of Fish and Wildlife, South Coast Region. Mountain bikers have carved trails across the slopes, moved boulders to build jumps, and torn down signs and barricades meant to keep out cyclists.

“We’ve been out there for years and years telling people this is illegal,” Pert said. “They just don’t want to hear it.”

On Patrol

Last weekend, a team of wardens patrolled key trailheads at the reserve, directing cyclists off the property. Members of the San Diego Mountain Biking Association showed up in force to stake their claim, arguing for continued access, said Wildlife Officer April Esconde. Wardens kept watch throughout the week, informing the public of the bike restrictions. On Thursday morning, Esconde stopped a mountain biker on a path near the west side of the preserve.

Signs show that says bikes aren't allowed in the Carlsbad Highlands Ecological Reserve on Thursday April 11, 2019. Mountain bikers have been getting tickets recently in the reserve. (Photo by K.C. Alfred/San Diego Union-Tribune) K.C. Alfred/San Diego Union-Tribune

“You’re not allowed to ride here,” she warned him.

“Oh no, when did that start?” asked the man, who did not give his name. “I totally respect the rules and regulations, but it’s a bummer, because I don’t have anywhere to ride anymore.”

How to Choose the Right Bank for Your Nonprofit

By First Republic Bank

The tug-of-war over the Carlsbad reserve illustrates the problems with managing open space in urban areas such as San Diego, where undeveloped land is diminishing, while the number of people competing for that space is rising. The natural terrain that's essential to native plants and animals is also attractive to people seeking outdoor experiences. So when developers purchase conservation land as mitigation for building on other parcels, there are conflicting expectations for what should be allowed there.

"Wildlife agencies and environmental groups work very hard during the CEQA (California Environmental Quality Act) process to make sure we get adequate offset for the projects," Pert said. "As soon as that gets set aside, it gets inundated by recreational users. And that's very frustrating for people who protect wildlife."

Ben Stone, trails coordinator for the San Diego Mountain Biking Association, maintains that those land acquisitions should include public use by hikers, mountain bikers and others.

"I think when most people hear open space, they assume there's a component of it that's open to the public," he said.

The enforcement campaign in Carlsbad shines light not only on that preserve, but also on the viability of habitat conservation plans, which seek to balance construction of homes and roads, with a commitment to preserve natural resources. It's a challenge that plays out in numerous areas of San Diego and California.

"This is a real test for us, to say, will this work?" Pert said. "If we can't get people to stay off of an area, or stop pulling out signs, then we really need to rethink that whole model."

Wild lands in the city

The 473-acre reserve, located behind Sage Creek High School, was established in 2000 as a conservation bank to offset environmental impacts of nearby home developments. Its brushy hills are habitat for native species including the California gnatcatcher, a federally threatened songbird, and thread-leaved Brodiaea, a purple-flowering plant listed as endangered in California.

Quail, hawks and deer use the site, along with smaller creatures, said Gabriel Penaflor, who manages the site and nine other reserves in North County. On Thursday, a tarantula and caterpillars crawled across the trails, while white butterflies flitted overhead.

Gabriel Peñaflor, California Dept. of Fish and Wildlife Reserve Manager walks along unauthorized bike trails in the Carlsbad Highlands Ecological Reserve on Thursday April 11, 2019. Mountain bikers have been ticketed recently in the reserve because bikes are not allowed. (Photo by K.C. Alfred/San Diego Union-Tribune) K.C. Alfred/San Diego Union-Tribune

Hikers and runners can visit the preserve and leashed dogs are permitted, but bicycles and horses aren't allowed. Wildlife officials say those restrictions are necessary to lighten the human footprint on the land. Mountain bikers used the site before it became a reserve, however, and feel they're entitled to continued access, alongside hikers.

"There were mountain bike trails out there when they bought it," Stone said. "They didn't take that into consideration."

A wild ride

It would be difficult for anyone visiting the site now not to take the trails into consideration now, though. Scores of them criss-cross the slopes, with some running parallel, just a few feet apart, or featuring jumps across intersecting trails. Erosion has chiseled deep ruts on some routes, and from an aerial view, they appear as fissures on the landscape.

The speed and volume of traffic also make mountain bikers hard to ignore, officials said. People on foot risk collisions with cyclists, Pert said, so some stay away because of safety concerns. Illegal mountain biking, he said, is crowding out legal use of the site.

Gary Murphy, head coach for the north county coastal team of the National Interscholastic Cycling Association, said, however, that students from adjacent Sage Creek High and other local schools should be able to ride trails through their own neighborhood.

“I want my kids and my friends’ kids to be able to go out and ride in dirt,” Murphy said. “Because there’s no more dirt left. It’s all concrete.”

Pert points out that the land was purchased for wildlife conservation, not recreation. Arguing that they should be able to ride in the reserve because they have traditionally done so is like claiming they should be allowed to ride across a nearby golf course, or in the backyards of neighboring homes, since those used to be open space as well, he said.

Instead, he said, there need to be other places open for mountain biking, or other ways of incorporating outdoor recreation into plans for new construction. In addition, he said, developers who pay for mitigation may also have to fund ongoing enforcement of the properties, along with education about their ecological value.

A tarantula walks across a trail in Carlsbad Highlands Ecological Reserve on Thursday April 11, 2019. (Photo by K.C. Alfred/San Diego Union-Tribune) K.C. Alfred/San Diego Union-Tribune

Diane Nygard, president of Preserve Calavera, a local conservation group, said regulators and environmentalists have suggested other places for bike trails, including Veterans Memorial Park in Carlsbad, and El Corazon, a stretch of city-owned property in Oceanside. They also point out that mountain bikers are allowed to ride on city-owned property near Lake Calavera in Carlsbad.

Stone said those sites aren't sufficient, and called on state officials to reach a compromise plan on the Carlsbad Highlands Ecological Reserve.

"They keep coming back and saying, 'Ed you have to find a compromise'" about bike trails in the reserve, Pert said. "I say, I can't make a compromise because it's illegal."

Trails and tribulations

If there's one thing the two sides can agree on, it's the determination of mountain bikers to build trails in their desired locations. Stone argues that their persistence is fueled by efforts to ban them.

"The failure to designate a network of well-designed and easily accessible trails that avoid the most sensitive habitats on site have led to the haphazard patchwork of trails found at (Carlsbad Highland Ecological Reserve) today," the Mountain Biking Association wrote in a statement.

Pert and other wildlife experts, however, doubt that legalizing bike trails would dampen riders' industrious efforts to construct new ones.

"From our experience, when mountain bikers are allowed on a trail, they just build new trails," he said.

As Esconde patrolled the reserve Thursday morning, she noted the challenge of policing these remaining islands of natural land.

"It's a draw, because it's so beautiful that everyone wants to come here," she said.

"Yeah, they're loving it to death right now," Penaflor, the reserve manager, said.

Abstract

Outdoor recreation is typically assumed to be compatible with biodiversity conservation and is permitted in most protected areas worldwide. However, increasing numbers of studies are discovering negative effects of recreation on animals. We conducted a systematic review of the scientific literature and analyzed 274 articles on the effects of non-consumptive recreation on animals, across all geographic areas, taxonomic groups, and recreation activities. We quantified trends in publication rates and outlets, identified knowledge gaps, and assessed evidence for effects of recreation. Although publication rates are low and knowledge gaps remain, the evidence was clear with over 93% of reviewed articles documenting at least one effect of recreation on animals, the majority of which (59%) were classified as negative effects. Most articles focused on mammals (42% of articles) or birds (37%), locations in North America (37.7%) or Europe (26.6%), and individual-level responses (49%). Meanwhile, studies of amphibians, reptiles, and fish, locations in South America, Asia, and Africa, and responses at the population and community levels are lacking. Although responses are likely to be species-specific in many cases, some taxonomic groups (e.g., raptors, shorebirds, ungulates, and corals) had greater evidence for an effect of recreation. Counter to public perception, non-motorized activities had more evidence for a negative effect of recreation than motorized activities, with effects observed 1.2 times more frequently. Snow-based activities had more evidence for an effect than other types of recreation, with effects observed 1.3 times more frequently. Protecting biodiversity from potentially harmful effects of recreation is a primary concern for conservation planners and land managers who face increases in park visitation rates; accordingly, there is demand for science-based information to help solve these dilemmas.

Introduction

Visitation to protected areas, ranging in scope from international ecotourism to local park visits, was recently estimated at 8 billion visits per year [1]. In the United States, the number of participants in outdoor recreation increased by 7.5% and total visitor days increased by 32.5% between 2000 and 2009 [2]. Driven in part by rapid growth in international tourism [3], recreation and ecotourism are also expanding in the developing world [4]; visits to protected areas in Africa, Asia, and Latin America increased by 2.5 to 5% between 1992 and 2006 [5].

Recreation is commonly assumed to be compatible with biodiversity conservation, in contrast to more well-known threats such as population growth and development at protected area edges [6,7] or subsistence use within reserves to help sustain local livelihoods [8]. Most protected areas have a dual mandate to conserve biodiversity and improve human welfare through resource use or outdoor recreation [8,9]. Accordingly, recreation is permitted in over 94% of International Union for Conservation of Nature (IUCN) protected areas globally (categories Ib–VI; [10,11]). In the United States and other developed nations, providing opportunities for outdoor recreation has historically been an important reason for the designation of protected areas [12], whereas in the developing world, ecotourism has been embraced as a potential win-win solution for poverty alleviation and conservation [8]. Furthermore, there are numerous benefits of outdoor recreation for human health and communities. People with access to natural areas have lower mortality rates [13], and outdoor play promotes mental and physical health in children [14]. Recreation and ecotourism can also be a source of economic revenue for protected areas and the communities around them [15,16], and can help garner support for conservation [17].

Despite these benefits, there is growing recognition that outdoor recreation can have negative impacts on biological communities. Recreation is a leading factor in endangerment of plant and animal species on United States federal lands [18], and is listed as a threat to 188 at-risk bird species globally [19]. Effects of recreation on animals include behavioral responses such as increased flight and vigilance [20,21]; changes in spatial or temporal habitat use [22,23]; declines in abundance, occupancy, or density [9,24,25]; physiological stress [26,27]; reduced reproductive success [28,29]; and altered species richness and community composition [30,31]. Many species respond similarly to human disturbance and predation risk, meaning that disturbance caused by recreation can force a trade-off between risk avoidance and fitness-enhancing activities such as foraging or caring for young [32].

Although there is a growing body of empirical studies of the effects of recreation on animals, a recent global review of the scientific literature does not exist. Early reviews [33–36] provide valuable definitions and conceptual frameworks, but were not systematic and need updating to reflect studies published in recent decades. In addition, contemporary reviews have restricted their scope by location or habitat type [37–39], taxonomic group [40–45], or recreation activity [46–48].

We conducted a global review of the published scientific literature to synthesize effects of non-consumptive recreation across all animal taxa. Such a review adds to the evidence base necessary to help bridge the gap between conservation science and practice [49]. To aid decision-makers faced with dilemmas about managing the demand for recreation while trying to fulfill mandates to protect species, it is critical to understand the degree to which biodiversity conservation and recreation are compatible, and under what circumstances. First, we examined trends in recreation research, including publication rates over time, geographic distribution, and study design. Second, we investigated which taxonomic groups were most commonly studied, and which had more or less evidence for effects of recreation. Similarly, we investigated which recreation activities and types of responses (e.g., behavioral, abundance, or

survival) were most frequently measured, and what effects were observed. Finally, we examined management strategies proposed by the authors to avoid or mitigate these effects.

Methods

Search strategy

Because our objective was to locate studies of all animal species and all types of recreation, our search protocol was designed to produce a broad list of articles. We did not include taxonomic keywords since titles and abstracts often refer only to the study's focal species. Instead, we limited the search to journals within four categories within the Institute for Scientific Information Web of Science database (Thompson Reuters, New York, NY, USA) that were the most relevant to our goals: biodiversity conservation, ecology, zoology, and behavioral sciences. From this list, we removed journals that were not published in English, or could not be reasonably expected to publish articles on recreation and animals ($n = 166$ journals included in the final list). We then searched the database with the Boolean search string: ($ts = (touris^* OR recreat^*) AND so = (journal list)$), where ts indicates topic keywords and so restricts the search to the list of 166 journals described above. This search strategy has high sensitivity (the proportion of all relevant information that the search locates) and low specificity (the proportion of search results that are relevant), which helps reduce bias and increase repeatability [50]. To reduce the effect of dissemination bias in our analysis, we included articles published in regional and lesser-known journals as well as the most widely-read publications [51]. Since our search strategy made use of the journal category feature within Web of Science, we were not able to replicate the search in other databases. However, our strategy produced a more thorough and comprehensive list of articles than if we had restricted our search with taxonomic keywords.

Screening and data extraction

Our keyword search (performed 30 January 2013 and again on 21 March 2016) resulted in a comprehensive list of 2,306 articles. We first reviewed titles and abstracts and eliminated obviously irrelevant records (e.g., tourism management papers with no wildlife component; Fig 1). We then reviewed the full text of the remaining 403 articles and assessed them against our inclusion criteria, recording the reason for rejection if necessary [50]. We excluded consumptive activities, which we define following Duffus and Dearden [34] as activities that “purposefully remove or permanently affect wildlife” (e.g., hunting, fishing). We focused on non-consumptive forms of recreation (e.g., hiking, skiing) because these activities are permitted more widely throughout protected areas. However, studies examining consumptive activities as a source of disturbance for non-target species (e.g., effects of fishing on waterbirds; [52]) were retained. We also rejected articles if they did not study one or more animal species ($n = 2$), did not test effects of non-consumptive recreation via a statistical test ($n = 70$), did not collect empirical field data (e.g., were review or simulation articles; $n = 23$), studied the effects of recreation infrastructure independently of human activity (e.g., presence of ski lifts; $n = 20$), or examined recreation as a vector for invasive species dispersal ($n = 14$). Experimental treatments designed to mimic recreational activities were included. The final list included 274 articles (S1 Appendix) with 2,048 distinct results.

Data collected from each article included publication information, geographic location (country and continent), study design, taxonomic group(s), recreation activities, response types and effects found, and management recommendations (Table 1). For articles that studied multiple species, recreation activities, or response types, we treated each combination of variables as a separate “result,” rather than attempting to determine an overall effect for each article, which would ignore valuable findings from within each article. For example, Banks and

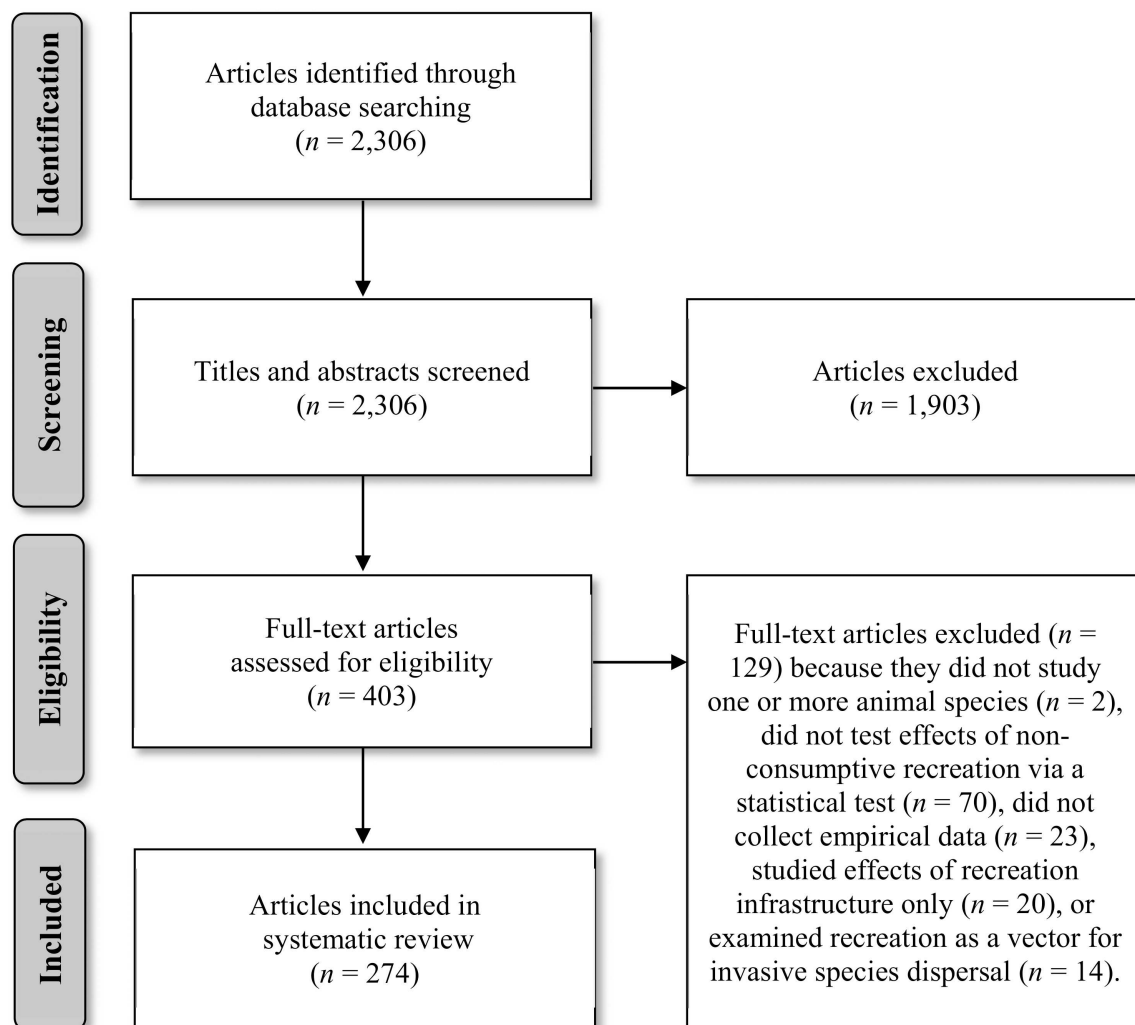

Fig 1. PRISMA literature search flow diagram. The number of studies that were located, retained, and discarded are shown at each stage of the literature review process.

doi:10.1371/journal.pone.0167259.g001

Bryant [24] examined the effects of hiking and dog-walking on bird abundance and richness, so we recorded four combinations of “results” in our database. While results from the same study often rely on the same animal populations, locations, and data collection efforts, we examined each result separately since effects often differed. Because each article could be considered an experimental unit, we added a random effect for article in the analysis to control for this potentially confounding factor (see “Statistical analysis”).

The “effect” variable (Table 1), which was the response variable for several of our research questions, was a binary variable indicating whether the recreation effect documented by the authors was statistically significant (as defined by the authors). We categorized all significant effects as negative, positive, or unclear. Negative responses were consistent with the following effects of recreational disturbance at the community, population, or individual (behavioral or physiological) levels: decreased species richness or diversity; decreased survival, reproduction, occurrence, or abundance; behaviors typically assumed to reflect negative responses to anthropogenic disturbance (e.g., decreased foraging or increased vigilance); and physiological condition typically assumed to reflect disturbance effects (e.g., decreased weight or increased stress).

Table 1. List of variables collected from articles included in the review of the effects of non-consumptive recreation on animals.

Category	Variable	Description or list of categories	Data type
Publication	Author(s)		text
	Title		text
	Journal		text
	Journal type	Behavior, conservation, ecology, ecosystem/region-specific, general biology, taxa-specific, zoology/wildlife, other	categorical
Geographic	Publication year		numeric
	Continent		categorical
	Country		text
	Habitat type	Agricultural, beach, desert, forest, freshwater, grassland, marine, polar, shoreline, urban, scrub/shrub, tundra, wetland, other	categorical
Study design	Measure of recreation*	Direct observation, experimental treatment, expert opinion, remote monitoring, permitted use, proxy	categorical
	Experiment	Was it an experimental study?	yes/no
	Control	Did the study include a control treatment? (e.g. a “no-recreation” site)	yes/no
	Replication	Did the study replicate treatments, study sites, observation periods, etc?	yes/no
Effect	Effect*	Did the authors find a significant recreation impact?	yes/no
	Effect direction*	Positive, negative, unclear	categorical
Taxonomic	Multiple species	Were multiple species studied?	yes/no
	Taxa group	Amphibian, bird, fish, invertebrate, mammal, reptile	categorical
	Scientific name*		text
	Common name*		text
Recreation	Activity*	Alpine skiing, beach use, biking, boating (non-motorized), camping, nordic ski/snowshoeing, dog-walking, equestrian, hiking/running, motorized (boat), motorized (land), motorized (snow), swimming/diving, wildlife feeding, wildlife viewing (boat), wildlife viewing (land), other (aquatic), other (terrestrial)	categorical
Response	Type*	Abundance, behavioral, community (species richness, diversity, or composition), occurrence, physiological, reproductive, survival, other	categorical
Management	Recommendations	Cap visitation, improve infrastructure, rule change, staff training, spatial restrictions, temporal restrictions, visitor education, none, other	categorical

* For articles that studied multiple species, recreation activities, or response variables, we treated each combination of variables as a separate “result,” and recorded the information marked with an asterisk (*) for each result individually.

doi:10.1371/journal.pone.0167259.t001

Conversely, positive responses were in the opposite direction. We were unable to classify some responses as positive or negative and labeled them “unclear.” Examples of unclear effects were behavioral responses that did not have obvious fitness consequences (e.g., decreased vocalizing) and results with non-linear responses (e.g., highest reproductive success at an intermediate level of recreation). We note that positive responses do not necessarily imply beneficial outcomes for biodiversity conservation; for example, an increase in species richness could be attributable to an increase in non-native species.

We caution that a statistically significant effect of recreation does not necessarily provide insight into the effect’s magnitude or biological significance. Authors may also include statistically significant results while omitting non-significant findings due to publication bias [53]. A formal meta-analysis framework can help researchers summarize effect sizes and detect and adjust for publication bias [54], but the study design must be similar across all studies included, with comparable predictor and response variables [55]. This was not feasible given the broad scope of our review, and accordingly, we do not make statistical comparisons among groups. Ultimately, we believe our approach provides a meaningful representation of the weight of evidence that currently exists.

Publication trends and geographic distribution

We summarized the number of articles by publication year, journal type, country, continent, and habitat type. Journals were classified into eight broad types using the journal title and online aims and scope statement to identify the appropriate primary category. Articles were also assigned to one or more habitat classes on the basis of authors' descriptions ([Table 1](#)).

Study design

To examine how recreation studies have been designed and conducted, we recorded the proportion of articles that used an experimental design and included controls and replication. For our purposes, any kind of an experimental treatment (e.g., experimental boat passes near a raptor nest; [\[56\]](#)) counted as an experimental design, and any treatment or site without recreation counted as a control. We also examined the method used to measure recreation: direct observation (with human observers), experimental treatment (e.g., researchers simulating recreation activities), expert opinion, remote monitoring (e.g., automatic counters), permitted use (e.g., whether a site was open to a specific recreational activity), or proxy variables (e.g., car counts).

Taxonomic groups

We examined differences in research focus and evidence for recreation effects among six broad taxonomic groups: amphibians, birds, fish, invertebrates, mammals, and reptiles. We divided groups with sufficient sample size (≥ 15 results on ≥ 3 different species) into narrower taxonomic classifications (Classes for invertebrates and fish; Orders for birds, mammals, and reptiles; amphibians were omitted due to small sample size). We then subdivided Classes or Orders with sufficient sample sizes (≥ 15 results on ≥ 3 different species) once again into Orders or Families. We also grouped species by their IUCN status [\[57\]](#).

Recreation activities

We grouped recreation activities into 18 types ([Table 1](#)) and created broader categories for more general comparisons: winter terrestrial (snow and ice-based activities such as skiing and snowmobiling), summer terrestrial (land activities not requiring snow or ice), and aquatic activities. We also compared motorized and non-motorized activities.

Response types

We categorized animal responses into eight types: community (species richness, diversity, or composition metrics), survival, reproduction, abundance, occurrence, behavior, and physiological measures, as well as "other" responses (e.g., sex ratio). For more general comparisons, we also grouped the response types hierarchically into community-, population- (survival, reproduction, abundance, and occurrence), and individual-level (behavior and physiological) responses.

Management recommendations

To qualify the management recommendations noted in the articles and provide a useful synthesis for land managers, we categorized recommended management actions as follows: spatial restrictions, capping visitation, increasing visitor education, temporal restrictions, improving infrastructure, adding or changing rules, enforcement of existing rules, staff training, or "other" ([Table 2](#)). Calls for additional research, although common in the literature, were not considered to be management recommendations.

Table 2. General management recommendations suggested by authors of articles included in the review.

Recommendation	Examples	Frequency (%) [*]
Spatial restrictions	Designate a trail-free area within protected area; establish minimum approach distances to animals	32.1
Visitor education	Educate SCUBA divers about the impacts of human contact on coral; instruct visitors about effects of noise on sensitive species	15.0
Cap visitation	Limit the number of visitors that can enter the area per day	14.2
Temporal restrictions	Limit recreational access during the breeding season	13.1
Rule change	Restrict boat speed in sensitive areas; prohibit wildlife feeding	9.9
Physical improvements	Restore habitat; install fencing around sensitive areas	9.5
Other	Species translocations; increased use of private land for conservation	8.8
Enforcement	Enforce leash laws; keep people on trails	6.9
Staff training	Train staff to recognize signs of animal disturbance	2.2
No recommendations		40.5

^{*} Percentages do not sum to 100 because some articles made more than one management recommendation.

doi:10.1371/journal.pone.0167259.t002

Statistical analysis

We used linear regression to assess trends in the total number of articles over time as well as the proportion of included articles out of the total publication volume in the selected journals. To assess gaps in the literature, we used chi-square goodness of fit tests to determine if the distribution of articles differed significantly from an expected distribution. For journal type, the expected distribution was the proportion of journals in the journal set that belonged to each type. For geographic distribution, we compared the distribution of articles by continent to the total land area and human population density of each continent. For IUCN status and taxonomic groups, the expected distribution was the number of known species in each group, starting with the broadest groups and progressing down to Family when possible [57]. We did not use chi-square tests if articles were counted under more than one category (e.g., articles examining multiple types of recreation, such as hiking, biking, and equestrian) since this violates the assumption of independence.

We estimated the amount of evidence for a recreation impact as the overall percentage of results that found a statistically significant effect of recreation. These percentages were estimated for results summarized by taxonomic groups, recreation activities, and response types. Because most articles included multiple results, the percentages (\pm SE) we report are least-squares means and standard errors obtained from models that included article as a random effect. We used generalized linear mixed models (GLMMs) with a logit link function to estimate the frequency of overall effects among taxonomic groups, recreation activities, and response types, and we used proportional odds models [58] to estimate the proportion of overall effects that were negative, positive, or unclear. All statistical analyses were conducted in R using packages lme4, ordinal, and lsmeans [59–62].

Results

Publication trends and geographic distribution

The earliest articles discovered by our search were published in 1981, and the peak year was 2008 with 23 articles. The number of articles published per year that met our criteria increased 23.5% on average per year from 1981 to 2015 ($\beta = 0.66$, 95% CI = (0.53, 0.80), $p < 0.0001$). This increase was not solely a result of increasing publication volume; the proportion of

Fig 2. Published articles on the effects of non-consumptive recreation on animals by publication year. The numbers of articles are shown as raw numbers (shaded bars) and as percentages of the overall publication volume in the journal set used in this review (trendline; a second order polynomial function).

doi:10.1371/journal.pone.0167259.g002

included articles out of the total articles published in the journal set increased by 8.8% on average per year ($\beta = 0.000043$, 95% CI = (0.000033, 0.000053), $p < 0.0001$; Fig 2). The distributions of the journal set into journal types (e.g., conservation, wildlife) and individual articles into journal types were significantly different ($\chi^2 = 632.4$, $df = 7$, $p < 0.0001$). Most of the included articles were published in conservation (38.7%) and wildlife (19.7%) journals, followed by ecology (13.5%), taxa-specific (13.1%), ecosystem or region-specific (9.9%), and behavior journals (3.3%); very few articles were published in general biology (0.7%) or other (0.7%) journal categories.

Geographically, studies of recreation on animals were conducted mostly in North America (37.7%), Europe (26.6%), and Oceania (13.1%), and relatively few in South America (9.1%), Asia (5.5%), Africa (5.1%), and Antarctica (2.9%; Fig 3A). This distribution among continents was not proportional to the land area ($\chi^2 = 366.3$, $df = 6$, $p < 0.0001$) nor human population density ($\chi^2 > 500$, $df = 6$, $p < 0.0001$) of the continents. The United States accounted for 27.0% of the articles, followed by Australia (7.7%), Spain (5.8%), New Zealand (5.5%), the United Kingdom (4.7%), Argentina (4.4%), and Canada (4.4%). Most studies were conducted in forest (35.4%), marine (23.4%), grassland (15.7%), and shoreline (13.9%) habitats (Fig 3B). The least well-studied habitat types were polar (2.9%), and desert (1.5%), as well as human-modified habitats (agricultural and urban, representing 10.2% of articles combined).

Study design

Less than one-third (30.3%) of the articles contained an experimental component, and 60.9% of articles contained controls. Most (85.4%) articles had replication of study sites, treatments, or groups. Direct observation was the most common method for measuring recreation (38.1% of results), followed by proxy variables (19.9%), expert opinion (19.6%), and experimental treatment (18.0%). Permitted use as a measure of recreation was less common (12.5%), as was remote monitoring (6.7%).

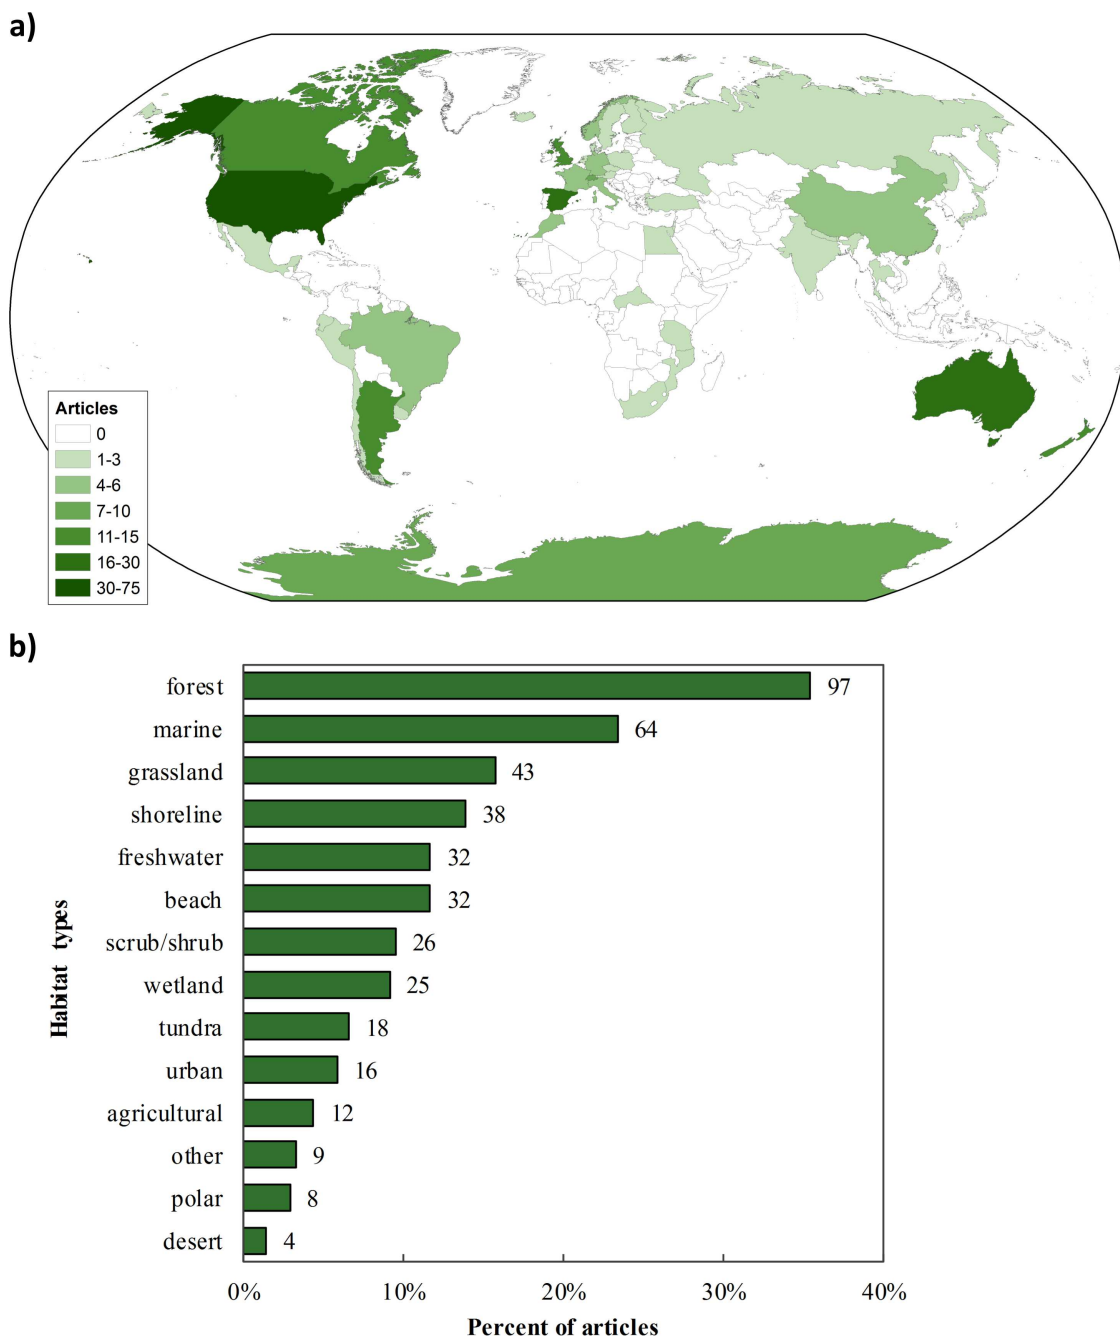

Fig 3. Distribution of published articles on the effects of non-consumptive recreation on animal species. Panel (a) shows the countries where studies were conducted, and panel b) shows the distribution of studies into major habitat type (s). Since some studies involved multiple habitat types, the sum (424) is greater than the total number of articles (274). Numbers at the end of bars represent the total number of articles in each category.

doi:10.1371/journal.pone.0167259.g003

Taxonomic groups

Research effort in our sample of articles was not proportional to the number of species within all taxonomic groups at the broadest level ($\chi^2 = 377.3$, $df = 5$, $p < 0.0001$), nor to the number of species in bird ($\chi^2 = 988.7$, $df = 5$, $p < 0.0001$) and mammal ($\chi^2 = 290.3$, $df = 3$, $p < 0.0001$)

Orders or invertebrate Classes ($\chi^2 = 98.1$, $df = 2$, $p < 0.0001$; Fig 4). Mammals (41.6%) and birds (36.9% of articles) were the focus of the majority of recreation studies, followed by invertebrates (12.4%), reptiles (5.5%), fish (5.1%), and amphibians (0.7%). Studies of a single species were more common (69.0%) than those that examined at least two species. Research on mammals focused mainly on ungulates (28.9%), carnivores (26.3% of articles), cetaceans (21.9%), and primates (12.3%). Among birds, the most commonly researched Orders were Passeriformes (passerine birds; 24.8% of articles), Charadriiformes (wading birds and gulls; 23.8%), Sphenisciformes (penguins; 13.9%), and Accipitriformes (hawks, eagles, vultures; 9.9%). Many of the invertebrate studies (35.2%) focused on the effects of snorkeling or SCUBA diving on corals, followed by studies on arachnids, bivalves, and insects (each 14.7%). The most commonly studied fish Class was Actinopterygii (ray-finned fish; 57.1%), followed by Chondrichthyes (sharks, stingrays; 42.9%). Research on reptiles focused on Orders Squamata (lizards, snakes; 78.6%) and Testudines (turtles; 21.4%).

We identified the IUCN status of the species for 68.7% of results, representing 305 unique species; the remaining results examined multiple species or species not evaluated by the IUCN. The distribution of these results into IUCN status categories was not proportional to the distribution of all animal species into these categories ($\chi^2 = 108.3$, $df = 5$, $p < 0.0001$), with many more species than expected in the least concern category (80.7%), slightly more than expected in the near threatened (6.9%), and fewer than expected in the data deficient (1.6%), vulnerable (6.5%), endangered (3.6%), and critically endangered (0.1%) categories. Endangered species that were studied included three mammals (black howler monkey *Alouatta pigra*, Hector's dolphin *Cephalorhynchus hectori*, and the Barbary macaque *Macaca sylvanus*), three fish (dusky grouper *Epinephelus marginatus*, Nassau grouper *Epinephelus striatus*, and the brownstriped gaunt *Anisotremus moricandi*), two birds (Egyptian vulture *Neophron percnopterus* and the yellow-eyed penguin *Megatypus antipodes*), two reptiles (wood turtle *Glyptemys insculpta* and Lilford's wall lizard *Podarcis lilfordi*), and the boulder star coral *Montastraea annularis*. The only critically endangered animals were the Western lowland gorilla *Gorilla gorilla gorilla* and the Mexican howler monkey *Alouatta palliata mexicana*.

Of the 274 articles analyzed, 93.1% documented at least one effect of recreation on animal populations, individuals, or communities. Negative effects of recreation were the most frequent (59.4%), followed by unclear (25.9%) and positive (14.7%) effects. Most (83.6%) of the unclear effects were behavioral responses.

Taxonomic groups with the most negative effects were amphibians ($68.4 \pm 20.2\%$ of results), reptiles ($56.3 \pm 9.2\%$), and invertebrates ($51.0 \pm 5.1\%$), while mammals ($5.3 \pm 1.9\%$) and birds ($4.3 \pm 2.0\%$) had the most positive effects (Fig 4). Among bird Orders, evidence for overall and negative effects was greatest in Accipitriformes (e.g., eagles, hawks; 70.7 ± 10.7 and $47.7 \pm 24.4\%$; Fig 4). Positive effects were greatest in Anseriformes (e.g., ducks, swans; $10.4 \pm 22.6\%$) and Passeriformes (passerine birds; $6.9 \pm 7.7\%$). Evidence of negative effects among Charadriiformes Families was greatest in Charadriidae (e.g., plovers, lapwings; $58.2 \pm 18.6\%$). Among Passeriformes Families, Corvidae (e.g., crows, crows) had the most positive effects ($56.0 \pm 4.9\%$). Among mammal Orders, Artiodactyla (even-toed ungulates) had the most negative effects ($48.5 \pm 8.0\%$) and Rodentia (rodents) had the most positive effects ($14.4 \pm 12.3\%$). At the family level, Bovidae (e.g., bison, bighorn sheep) had by far the most overall effects ($93.8 \pm 19.3\%$) and Delphinidae (dolphins) was also high ($70.8 \pm 6.8\%$). Several invertebrate Classes had considerable negative effects, including Anthozoa (corals; $56.6 \pm 4.2\%$), Gastropoda (e.g., snails, slugs; $55.5 \pm 6.7\%$), and "other" (e.g., insects, crabs; $51.4 \pm 6.0\%$). Finally, the "other" grouping of fish Classes (e.g., sharks, stingrays) had more evidence for an overall and positive effect ($64.9 \pm 8.7\%$ overall and $25.8 \pm 15.7\%$ positive) than Actinopterygii (ray-finned fish; $34.8 \pm 8.5\%$ overall and $5.4 \pm 9.2\%$ positive). Of the reptile

Fig 4. Evidence for an effect of recreation by taxonomic group. Evidence is measured as the proportion of results that were statistically significant. For articles that studied multiple recreation activities, species, or response variables, each combination of variables was treated as a separate result. Common names are examples of species occurring in the included articles. We present taxonomic groups that have at least 15 results and 5 species represented; the remaining taxa are included in “other” categories for comparative purposes. Numbers following bars show the number of results, number of articles, and count of unique species. Articles that studied functional groups or communities rather than individual species (e.g., insectivorous birds) were added to the relevant “other” category and were not counted as species. Error bars show standard error for the sum of all effects.

doi:10.1371/journal.pone.0167259.g004

orders, Order Testudines (turtles) had more overall effects ($75.0 \pm 12.5\%$) effects than Order Squamata (lizards, iguanas; 52.3 ± 7.5). For both Orders, all of the effects were negative. Low sample sizes precluded comparisons among amphibian taxa.

Recreation activities

The articles in our sample examined a wide variety of recreation activities (Fig 5A). Summer terrestrial activities were the most common, studied by 66.7% of articles, followed by aquatic (27.8%) and winter terrestrial (5.6%). Motorized forms of recreation, including off-highway vehicles, snowmobiles, and motorized boats, were examined in 26.3% of articles. Hiking was studied much more often than any other recreation activity (27.5% of articles). Wildlife viewing was also relatively frequently studied, with 10.3% of articles studying land-based and 6.6% studying boat-based wildlife viewing.

Winter terrestrial activities had the most evidence of overall ($77.3 \pm 7.8\%$ of results; Fig 5B) and negative ($64.4 \pm 10.1\%$) effects, compared to $58.5 \pm 2.7\%$ (overall) and $39.6 \pm 4.6\%$ (negative) for other terrestrial and $57.0 \pm 3.8\%$ (overall) and $33.4 \pm 7.1\%$ (negative) for aquatic activities. Although motorized and non-motorized activities had similar evidence for overall effects ($57.0 \pm 5.1\%$ and $58.4 \pm 2.5\%$), non-motorized had greater negative effects ($40.3 \pm 4.0\%$ versus $34.0 \pm 8.6\%$). Activities with the most evidence of overall effects included each of the snow activities (cross-country ski/snowshoeing: $81.0 \pm 8.6\%$, motorized-snow: $77.8 \pm 13.9\%$, alpine skiing: $71.0 \pm 8.2\%$), as well as boat-based wildlife viewing ($65.4 \pm 5.4\%$) and beach use ($64.8 \pm 8.2\%$; Fig 5B).

Response types

Response types were not studied evenly; behavioral (45.5% of articles) and abundance (24.1%) responses to recreation were the most common (Fig 6A). Only 9.3% of articles measured community metrics (species richness, diversity, or composition) and 1.9% measured survival. Omitting survival responses due to small sample size, community responses had the most overall effects ($64.6 \pm 6.6\%$ of results), followed by behavioral ($63.5 \pm 2.8\%$) and physiological ($62.5 \pm 4.9\%$) responses; reproductive responses ($36.7 \pm 6.3\%$) had the fewest overall effects (Fig 6B). Physiological ($52.7 \pm 4.8\%$) and occurrence ($51.3 \pm 4.6\%$) responses had the most negative effects, while behavioral responses had the most positive effects ($9.8 \pm 2.5\%$).

Management recommendations

More than one-third (40.5%) of the included articles did not provide management recommendations (Table 2). Of those that did include recommendations, the most common types were spatial restrictions (32.1%), visitor education (15.0%), and limiting visitation (14.2%), Enforcement of existing rules (6.9%) and staff training (2.2%) were the least frequently suggested management categories.

Fig 5. Recreation activities in the articles included in this review. Panel (a) shows the percent of articles that included each recreation activity (numbers of articles follow the bars), and panel (b) shows the percent of results in which a statistically significant effect of recreation on an animal species was observed (number of results follow the bars). Total percentages are divided into negative, positive, and unclear effects of recreation. Error bars show standard error for the sum of all effects.

doi:10.1371/journal.pone.0167259.g005

Discussion

Although published research on recreation effects on animals increased by an order of magnitude from 1981 to 2015, the percentage of the literature devoted to the subject remains small (0.16% of publication volume of the target journals in the peak year), and many gaps in knowledge remain. The literature is geographically biased in favor of North America and Europe, and taxonomically biased toward birds and mammals. Over 93% of reviewed articles documented at least one effect of recreation, and as expected, the majority of these effects were negative. Non-motorized and winter terrestrial activities had notable evidence for negative effects. Additionally, some of the least studied taxonomic groups (reptiles, amphibians, and invertebrates) had the greatest evidence for negative effects of recreation.

Though the amount of literature on this topic has increased in recent decades, it may not be reaching a broad audience even among conservation scientists and wildlife ecologists. Over 20% of articles were published in journals specific to a taxonomic group, geographic region, or ecosystem, whereas few were published in the broadest journals. Since the broadest journals are also among the highest-impact publications (e.g., *Science*, *Nature*), this could also indicate that the topic of recreation impacts on animals is not viewed as important within the peer-reviewed literature.

Fig 6. Types of animal responses to recreation in the articles included in this review. Response types have been categorized into community-, population-, and individual-level responses. Panel a) shows the percent of articles in which each response type is tested (numbers of articles follow the bars). Panel b) shows the percent of results in which a statistically significant effect of recreation on an animal species was observed (number of results follow the bars). Total percentages are divided into negative, positive, and unclear effects of recreation. Error bars show standard error for the sum of all effects.

doi:10.1371/journal.pone.0167259.g006

The articles had a strong geographic bias toward North America and Europe. This reflects global patterns in visitation to protected areas since over 80% of visits occur in these two continents [1]. A surprising number of studies were conducted in Antarctica, as a result of a growing ecotourism industry that often includes visits to penguin colonies [63]. As South America, Africa, and Asia contain most of the world's biodiversity hotspots [64] as well as popular ecotourism destinations including Brazil, South Africa, Thailand, and Indonesia [65], we see an immediate need for studies of recreation effects in these areas. The few studies conducted in tundra, polar, and desert habitat types is likely a result of low rates of recreation and tourism occurring in these areas. However, our findings and those of Sato et al. [39] about the impacts of alpine activities indicate that it is an important area for future study.

Further, the distribution of articles among broad taxonomic groups was skewed in favor of mammals and birds, a trend consistent with conservation science as a whole [66]. However, these are large, diverse groups that still warrant more research; for example, passerine birds were the most frequently studied avian Order in our set of articles, but the 73 species examined therein comprise ~1% of the 5,000+ species in the Order. There is also an urgent need to understand more about the potential effects of recreation on invertebrates, fish, reptiles, and amphibians. We found only two articles on amphibians, but their known sensitivity to human disturbance [67] highlights the need to understand whether and how recreation affects them. Current research on recreation effects on animals does not include many species of urgent conservation concern; only about 10% of species studied are globally threatened (IUCN status of critically endangered, endangered, or vulnerable). Recreation may not be the primary reason for their endangerment, but it is a threat worth understanding because the disturbance may take place in the very protected areas designated to conserve these species. Finally, relatively few articles (31.0%) examined more than one species, and studies of species from

multiple trophic levels were especially rare (3.6%). More research is needed on community-level effects of recreation, including potential cascading effects [68].

Examination of the study designs of the included articles revealed some notable trends. A fairly high percentage (30%) of articles included an experimental component; most of these were recreation treatments applied in order to compare behavioral responses. Over 80% of results examined recreation as a categorical variable, typically with three or fewer levels (e.g., low vs. high recreation activity). Though a categorical approach is simpler to implement and analyze, it limits the ability of researchers to evaluate how responses may change with different recreation intensities. It has proven difficult to develop hypothesized response curves representing how animals respond to increasing levels of recreational use due to the diversity of responses [69]. Future research should measure recreation across intensity gradients to help verify the existence of thresholds and the shape of these relationships.

Most (59%) of the effects of recreation on animals documented in the reviewed articles were negative effects. This was particularly true for reptiles, amphibians, and invertebrates, although sample sizes were low. Among invertebrate Classes, Anthozoa (corals) frequently had physical damage or reduced abundance in areas frequented by recreational divers [70,71]. Though the rate of negative effects was generally lower for birds, mammals, and fish, some lower taxonomic groups had more evidence for negative effects of recreation. For example, Order Accipitriformes (e.g., eagles, hawks) had more evidence for negative effects compared to other bird Orders, consistent with a prior meta-analysis of human disturbance on nesting birds of prey [41]. Family Charadriidae (e.g., plovers, lapwings) also had considerable evidence for negative effects of recreation, which parallels a recent study that found that species from this Order (Charadriiformes) were more frequently threatened by tourism than other bird Orders [19]. Of the mammals, Order Artiodactyla (e.g., deer, bison) had substantial evidence for negative effects, mostly consisting of behavioral responses to recreation activity. Many researchers have investigated factors that influence ungulate flight responses, including speed of approach, animal and human group size, and habitat type [43,45]. For fish, several studies found negative physiological effects of wildlife viewing on Class Chondrichthyes (e.g., sharks, stingrays; [72,73]), and negative effects of diving on fish communities [70].

Evidence for positive effects of recreational activity was much less common. Birds, particularly corvids, had more evidence for positive effects compared to most other broad taxonomic groups. Many corvids are urban adaptors [74], and several studies found that they quickly habituate to human disturbance, allowing them to tolerate or even thrive in the presence of recreationists [75,76], sometimes at the expense of other species [77]. Mammals also had a relatively high rate of positive effects. Of the mammal Orders, rodents had the most evidence for positive effects; all but one of these effects were behavioral and most resulted from habituation (e.g., reduced flight responses in areas with higher levels of recreation; [78,79]. Habituation to recreation was discussed in many (39.4%) of the included articles and typically resulted in positive responses in our coding system (e.g., reduced flight initiation distances in habituated animals), but whether habituation is a beneficial outcome for animals (e.g., by reducing costly behavioral responses to humans) is unclear and warrants further study [80,81].

We found that non-motorized activities had more evidence for negative effects than motorized activities. Motorized activities are often expected to be more harmful to animals because of vehicle speed and noise [43], but our results suggest the opposite across a wide range of study locations and taxa. A few articles directly compared motorized and non-motorized activities; four mammals (guanaco *Lama guanicoe*, wolverine *Gulo gulo*, coyote *Canis latrans*, and bobcat *Lynx rufus*) showed behavioral or occurrence responses to non-motorized but not to motorized recreation [22,82,83], whereas the reverse was found for Hector's dolphin (*Cephalorhynchus hectori*) behavior [84] and ghost crab (*Ocypode quadrata*) abundance [85].

However, motorized activities often cover larger spatial extents than non-motorized activities, and since most studies did not compare effects across multiple spatial scales, it is possible that their impact has been underestimated. Additionally, motorized vehicles can also cause other types of harm not explored here, such as soil loss and vegetation disturbance [86]. A meta-analysis designed to explicitly compare the magnitude of effects of motorized and non-motorized recreation would be a valuable contribution to the literature.

Our results also suggest that winter terrestrial activities have greater evidence for effects on animals than summer terrestrial or aquatic activities, though the number of articles was small. A recent review of winter recreation effects on animals [39] supports this conclusion, finding that over half of the reviewed articles reported overall detrimental effects, particularly on birds and on species richness and diversity. There are several possible explanations for this result. Movement away from recreationists may be more energetically costly in snowy conditions [87]. For many species, food availability and quality is lower during winter [82,88], limiting their ability to relocate to avoid areas with human activity. There could also be habitat effects since vegetation in alpine and sub-alpine environments regenerates slowly, so habitat degradation caused by winter recreation could be more severe than that caused by other recreational activities in more temperate climates [39,89].

Overall, authors observed individual-level (behavioral and physiological) and community-level effects more frequently than most population-level (occurrence, abundance, and reproduction) effects. Though rarely measured, negative effects of recreation on survival—a particularly important response to understand for conservation purposes—were observed 1.4 times more frequently than the next highest response types (physiology and occurrence). Behavioral metrics, which were studied far more often than other types of responses, may be popular because they can be simpler to measure and have been proposed as a proxy for demographic parameters [90]. Nonetheless, behavioral metrics may not reflect the true population consequences of anthropogenic disturbance [91]. Study duration can also influence conclusions; one long-term study found that low-level recreation had an effect on dolphin habitat use that was not observed in a short-term behavioral study [81,92], while another found that short-term behavioral responses did not result in changes in the distribution or relative abundance of waterbirds [93].

Though most articles documented recreation effects, few presented specific, practical steps to minimize impacts. About 40% of the articles did not describe any management or mitigation actions, and many more contained only vague suggestions. We see a strong need for empirical tests of the effectiveness of management actions, which were rare. Encouraging examples of successful mitigation actions do exist, such as educating divers about avoiding damage to coral reefs [94], using volunteers to deter harassment of fur seals [95], and installing fences to establish disturbance-free areas [96,97]. This type of practical evaluation of management strategies is critical in assessing the ability of protected areas to meet demands for both recreational opportunities and the conservation of biodiversity. Interviewing practitioners would be a useful direction for future research in order to assess the type and extent of management strategies currently being employed. Even where management recommendations are provided in the scientific literature, it is unclear to what extent they are received by protected area managers [98]; a search of unpublished reports and other communications on the subject would help inform how well conservation scientists are reaching decision-makers.

The effects of recreation on animals is still a relatively unknown and low-profile topic in the conservation science literature, despite growing evidence that detrimental impacts can occur from a wide variety of recreational activities. Further, biophysical disturbances associated with recreation and tourism—including habitat conversion for roads and resorts, pollution from vehicles, and the spread of invasive species—are likely to have additional effects [19], increasing

the overall impact of the recreation and tourism industry. Recreation effects may also act synergistically with other threats to biodiversity such as urbanization and land-use change [18], which may result in increased access for recreation. This is a troubling problem for managers and conservation practitioners, since recreation is an integral part of protected areas worldwide [12]. Finding an appropriate balance between biodiversity conservation and outdoor recreation is complicated, especially since impacts vary among species and recreation activities. We must start by simply acknowledging that these uses are not necessarily compatible for all species, in all locations. This will make it easier to justify additional research on this topic, establish restrictions on recreation, and encourage changes in the behavior of recreationists, leading to improved conservation outcomes.

I was glad to see there may be changes in some of our laws regarding hunting. Waterfowl in particular some migratory have become extinct in our area of Massachusetts and I miss seeing them. We need much less hunting permissioned than is realized. I don't believe it was the intention of the Creator to have duck pheasant quail and other species on the dog and cat food cans and most dogs and cats will back that up by not eating it if they have a choice to not ingest blood. Our Creator assigned them a life not shortened by us. We don't have the right to end them.

CALIFORNIA FISH AND GAME COMMISSION
RESOLUTION HONORING

L. Ryan Broddrick

WHEREAS, the Waterfowler's Hall of Fame was established in 2006 to recognize those individuals who have made significant contributions to enhancing waterfowl and their habitats in California; and

WHEREAS, many wildlife professionals, have dedicated their life's work to management and research to conserve waterfowl and their habitats; and

WHEREAS, many sportsmen and women and other conservationists have served a critical role in conserving our waterfowl by preserving, restoring, and enhancing natural habitats, managing agricultural habitats with wildlife in mind, and implementing other land uses specifically designed to benefit waterfowl; and

WHEREAS, some sportsmen and women and other conservationists have significantly benefited waterfowl by advocating legislation and other policies that provide needed resources for nesting and wintering waterfowl populations;

NOW THEREFORE, BE IT RESOLVED, that the California Fish and Game Commission hereby recognizes the addition of Mr. L. Ryan Broddrick to the Waterfowler's Hall of Fame.

FURTHER, BE IT RESOLVED, that the California Fish and Game Commission recognizes Mr. Broddrick's life work to lead the hunting, fishing and conservation communities in proactive and meaningful collaborative efforts that effectively promote conservation. He has served as director of the California Department of Fish and Wildlife, chair of California Waterfowl, western regional director of conservation policy for Ducks Unlimited, and executive director of the Northern California Water Association.

FINALLY, BE IT RESOLVED, that the California Fish and Game Commission further recognizes that Mr. Broddrick's conservation efforts in California wouldn't be where they are today without his concerted efforts. He has put his heart and soul into educating staff, elected leaders, business leaders, sportsmen and women, and conservationists that we have the responsibility to preserve the magic of the marsh.

NOW THEREFORE, BE IT RESOLVED, that the California Fish and Game Commission hereby recognizes the addition of Mr. Dean (Dino) A. Cortopassi to the Waterfowler's Hall of Fame.

FURTHER, BE IT RESOLVED, that the California Fish and Game Commission recognizes Mr. Cortopassi for his successful strategic approach to addressing wetland and waterfowl conservation issues in the Delta. He has long been concerned with subsidence issues in the Delta and was one of the pioneers in growing rice in the Delta as a means of combating soil loss.

FINALLY, BE IT RESOLVED, that the California Fish and Game Commission further recognizes Mr. Cortopassi for creating and managing The Wetland Preservation Foundation. Under the foundation, landowners will be relieved from the burden of management and levee maintenance if they agree to let a portion of their land be converted by the foundation into a wetland reserve.

NOW THEREFORE, BE IT RESOLVED, that the California Fish and Game Commission hereby recognizes the addition of Dr. John M. Eadie to the Waterfowler's Hall of Fame.

FURTHER, BE IT RESOLVED, that the California Fish and Game Commission recognizes Dr. Eadie for his significant accomplishments in advancing undergraduate and graduate students at UC Davis, grantsmanship, University Extension, and waterfowl research. Notably, he was instrumental in starting the California Waterfowl Association College Camp at Bird Haven Ranch, providing a guided waterfowl hunt experience for UC Davis students from non-hunting backgrounds.

FINALLY, BE IT RESOLVED, that the California Fish and Game Commission further recognizes Dr. Eadie's publishing of over 100 manuscripts, principally on waterfowl ecology, and his leadership in wintering energetics, wood duck and goldeneye nesting ecology, and rice and moist-soil management.

BEFORE THE CALIFORNIA FISH AND GAME COMMISSION

A Petition to List the Western Joshua Tree (*Yucca brevifolia*) as Threatened under the California Endangered Species Act (CESA)

Center for Biological Diversity
October 15, 2019

Notice of Petition

For action pursuant to Section 670.1, Title 14, California Code of Regulations (CCR) and Division 3, Chapter 1.5, Article 2 of the California Fish and Game Code (Sections 2070 *et seq.*) relating to listing and delisting endangered and threatened species of plants and animals.

I. SPECIES BEING PETITIONED:

Species Name: Western Joshua tree (*Yucca brevifolia*) as either a full species, or as the subspecies *Yucca brevifolia brevifolia*.

II. RECOMMENDED ACTION: Listing as Threatened

The Center for Biological Diversity submits this petition to list the western Joshua tree (*Yucca brevifolia*) as Threatened pursuant to the California Endangered Species Act (California Fish and Game Code §§ 2050 *et seq.*, “CESA”). The western Joshua tree (*Yucca brevifolia*), long recognized as a subspecies or variety (*Yucca brevifolia brevifolia*), has recently been recognized as a full species distinct from its close relative, the eastern Joshua tree (*Yucca jaegeriana*).

This petition demonstrates that the western Joshua tree is eligible for and warrants listing under CESA based on the factors specified in the statute and implementing regulations. Specifically, the western Joshua tree meets the definition of a “threatened species” since it is “a native species or subspecies of a ... plant that, although not presently threatened with extinction, is likely to become an endangered species in the foreseeable future in the absence of the special protection and management efforts” Cal. Fish & Game Code § 2067.

In the event the Commission determines that full-species taxonomy is not sufficiently established, petitioners request listing of the taxa as a subspecies/variety *Yucca brevifolia brevifolia*. Additionally, while petitioners believe that the western Joshua tree warrants protection under CESA throughout its range in California, in the event the Commission determines that it does not, the Commission must assess whether either of the two population clusters of the species (denoted as *Y. brevifolia* North [YUBR North] and *Y. brevifolia* South [YUBR South] in the petition) separately warrant listing as ecologically significant units (ESUs).

Cover photo of tallest (25 m) known *Yucca brevifolia* in western Antelope Valley in 1925 from Webber (1953). The tree was burned by vandals in 1930, generating outrage and sparking early desert protection efforts culminating in the 1936 creation of Joshua Tree National Monument.

III. AUTHOR OF PETITION:

Brendan Cummings
Center for Biological Diversity
PO Box 549
Joshua Tree, CA 92252
(510) 844-7141
bcummings@biologicaldiversity.org

I hereby certify that, to the best of my knowledge, all statements made in this petition are true and complete.

Executive Summary

The Center for Biological Diversity submits this petition to list the western Joshua tree (*Yucca brevifolia*) as Threatened pursuant to the California Endangered Species Act (CESA). This petition demonstrates that the western Joshua tree is eligible for and warrants listing under CESA based on the factors specified in the statute and implementing regulations.

Under CESA, a “threatened species” is “a native species or subspecies of a ... plant that, although not presently threatened with extinction, is likely to become an endangered species in the foreseeable future in the absence of the special protection and management efforts...” A plant is an “endangered species” when it is “in serious danger of becoming extinct throughout all, or a significant portion, of its range due to one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, or disease.” While the western Joshua tree is not at imminent risk of extinction, it faces significant and growing threats, primarily from climate change, that ultimately threaten the viability of the species in all or a significant portion of its range in California; it consequently meets the definition of a “threatened species.”

Long considered a single species with two subspecies or varieties, the Joshua tree has recently been recognized as comprised of two distinct species, the western Joshua tree (*Yucca brevifolia*) and the eastern Joshua tree (*Y. jaegeriana*). The two species are geographically separated, genetically and morphologically distinguishable, and have different obligate pollinators.

Both species occur in California, with the western Joshua tree having a boomerang-shaped range from Joshua Tree National Park, westward along the northern slopes of the San Bernardino and San Gabriel Mountains, through the Antelope Valley, northward along the eastern flanks of the southern Sierra Nevada and eastward to the edges of Death Valley National Park (green areas on

map). The eastern Joshua tree's range in California is centered in the Mojave National Preserve (yellow areas on map).

While both the western and eastern species of Joshua tree are of conservation concern, the fate of the western Joshua tree in California is particularly alarming, as recent studies indicate that the species' range is contracting at lower elevations, recruitment is limited, and mortality is increasing, all of which would likely reflect a population already starting to decline due to recent warming. Even greater changes are projected to occur over the coming decades.

Climate change represents an existential threat to western Joshua trees. Even in the absence of climate change, the convergence of factors necessary for recruitment results in successful establishment of new seedlings only a few times in a century. Such recruitment has already largely stopped at the drier, lower limits of the species' range. Prolonged droughts, which are projected to occur with greater frequency and intensity over the coming decades, will not only preclude recruitment across ever-greater areas of the species' range, but will lead to higher adult mortality, either directly due to temperature and moisture stress or indirectly due to increased herbivory from hungry rodents lacking alternative forage. Whether or not the species' pollinating moth will be able to keep pace with a changing climate is highly questionable. The Joshua tree's ability to colonize new habitat at higher elevations or latitudes is extremely limited and no such range expansion is yet occurring, even as the lower elevation and southern edge of its range is already contracting. And there is no safe refuge, as the higher elevation areas in which Joshua trees are projected to best be able to survive increasing temperatures and drying conditions are at great risk of fire due to the prevalence of invasive non-native grasses. Absent rapid and substantial reductions in GHG emissions *and* protection of habitat, the species will likely be extirpated from all or most of California by the end of the century.

In addition to climate change and fire, the western Joshua tree is threatened by habitat loss and degradation from other human activities. The portion of the species' range where management is most protective—Joshua Tree National Park—is also the area where the early impacts of climate change are already being felt most severely. Other areas of federal land that are home to the species are subject to poorly-regulated activities including off-road vehicle use, cattle grazing, power and pipeline rights-of-way and large-scale energy projects that consume or degrade habitat. And while much of the western Joshua tree's range is on public lands, approximately 40% of its range in California is on private land, of which only a tiny fraction is protected from development. Under current growth projections, virtually all of this habitat will be lost in the coming decades absent strengthened protection under the law.

The Joshua tree has long been the most iconic species of the Mojave Desert. Given the well-publicized threats facing the species in the face of climate change, it has recently become an emblem of our society's failure to address the climate crisis. But the Joshua tree is also uniquely situated to become an example of successful action to save a species threatened by climate change. Action taken in and by California to save the species can serve as a model for proactive climate adaptation efforts not just in California but around the world. Listing the species under CESA is not just a symbolically important act of California recognizing the threats the species faces from climate change, but also can serve as the impetus for meaningful management actions that can help ensure the species remains a living icon in perpetuity.

The Western Joshua Tree Warrants Listing as Threatened under the California Endangered Species Act (CESA)

1 Introduction

This petition summarizes the available scientific information regarding the taxonomy and natural history of the western Joshua tree (*Yucca brevifolia*), its distribution and abundance in California, population trends and threats, and discusses the limitations of existing management measures in protecting the species. As demonstrated below, western Joshua trees meet the criteria for protection as “threatened” under the California Endangered Species Act (CESA) and would benefit greatly from such protection.

2 Life History

2.1 Taxonomy

Joshua tree taxonomy has long been subject to some dispute and confusion. Often referenced as being within the Families Liliaceae or Agavaceae, under the molecular-based taxonomic system developed by the Angiosperm Phylogeny Group, the species is now considered as being within the Asparagaceae (AGP IV 2016; ITIS 2019).

The Joshua tree has until recently been treated by most authorities as a single species, *Yucca brevifolia* Engelm., comprised of two varieties or subspecies, *Yucca brevifolia brevifolia* (western Joshua tree) and *Yucca brevifolia jaegeriana* (eastern Joshua tree) (ITIS 2019).¹ The two forms are for the most part geographically separated, genetically and morphologically distinguishable, and have different obligate pollinators. The two forms may be the result of allopatric speciation, though some gene flow between them has been documented in a small area in Nevada (Yoder et al. 2013; Royer et al. 2016). Lenz (2007) believed the differences in flower and fruit morphology between *Y. b. brevifolia* and *Y. b. jaegeriana* as well as each having different obligate pollinators were sufficient to recognize *Y. b. jaegeriana* as a full species, *Y. jaegeriana*.

More recent studies focused on pollinator interactions have confirmed significant morphological differences in the styler canals of the flowers of the two forms, which correspond to differences in ovipositor length in their respective pollinators (Godsoe et al. 2008; Starr et al. 2013; Yoder et al. 2013). Smith et al. (2008) used genetic markers to determine that western and eastern Joshua trees likely diverged over 5 million years ago, which corresponds to the time when the Bouse Embayment, an extension of estuarine waters of the Gulf of California, extended into the Mojave, separating western and eastern areas (Pellmyr and Segraves 2003). Starr et al. (2013) and Yoder et al. (2013) also found genetic differentiation between the two forms but declined to recognize them as separate species.² Royer et al. (2016) expanded on these studies

¹ Other previously described subspecies/varieties including *Y.b. herberti*, *Y.b. weberi* and *Y.b. wolfei* are considered synonyms of *Y. brevifolia* (ITIS 2019; Wallace 2017).

² Yoder et al. (2013) noted that whether *Y. b. brevifolia* and *Y. b. jaegeriana* represent full species “is heavily dependent on the species concept we use to make that judgment.” Starr et al. (2013) noted that “[t]he validity of this

using molecular techniques and found “evidence for strong genome-wide patterns of divergence between the Joshua tree species” and noted their results “revealed extensive genetic differentiation between *Y. brevifolia* and *Y. jaegeriana*.” Royer et al. (2016) followed Lenz (2007) and recognized *Y. brevifolia* and *Y. jaegeriana* as full species.

Most recently, in a broad review of the science regarding Joshua trees, the U.S. Fish and Wildlife Service treated *Y. brevifolia* and *Y. jaegeriana* as separate species for purposes of federal Endangered Species Act (ESA) consideration (Wallace 2017; USFWS 2018; USFWS 2019).³ Petitioners follow Lenz (2007), Royer et al. (2016), Cole et al. (2017) and USFWS (2018) and treat *Y. brevifolia* and *Y. jaegeriana* as full species. However, since CESA provides for the protection of both species and subspecies, regardless of whether it is treated as a species (*Y. brevifolia*) or subspecies (*Y. b. brevifolia*), the western Joshua tree is eligible for and warrants listing under the statute.

2.2 Species Description⁴

The earliest known written description of the Joshua tree is an unflattering entry in the Fremont Report in which it was noted that “their stiff and ungraceful form makes them to the traveler the most repulsive tree in the vegetable kingdom . . .” (Fremont 1845). Over time, Joshua trees became increasingly more appreciated, with Griffin (1930) referring to them as “one of the outstanding plants of the desert,” Runyon (1930) characterizing them as “grotesque in the extreme...yet they are magnificent,” Little (1950) somewhat undecidedly calling them “picturesque or grotesque,” and Jaeger (1965) calling them “at once the most spectacular and most characteristic tree of the Mohave Desert.”

More technically, the Jepson Flora describes Joshua trees as follows:

Habit: Plant 1--15 m. *Stem:* erect, above ground, generally branched above, rosettes at tips, well above ground. *Leaf:* 15--35 cm, 0.7--1.5 cm wide, dark green, expanded base 2--4 cm, 4--5 cm wide, +- white, margins minute-serrate, yellow. *Inflorescence:* 3--5 dm, distal generally +- 1/2 exserted from rosettes. *Flower:* erect; perianth 4--7 cm, +- bell-shaped, parts lanceolate to oblong, +- fused at base, cream to +- green; filaments thick; pistil +- 3.5 cm. *Fruit:* capsule, spreading to erect in age, 6--8.5 cm, ellipsoid, dry, spongy, or leathery in youth. (Hess 2012).

Among the numerous natural history accounts of the Joshua tree, Gucker (2006), prepared for the U.S. Forest Service and readily available online,⁵ is among the most comprehensive. The following is largely adapted from Gucker (2006).

designation [two species] is not yet certain, and here, we conservatively refer to the two morphotypes as subspecies.”

³ As discussed *infra*, while the taxonomic and other life history discussions in USFWS (2018) represent a comprehensive summary of the available science, the threats analysis in the document is highly problematic and shows some evidence of political interference driving its ultimate conclusions.

⁴ Because the bulk the scientific literature cited in this petition treats Joshua trees as a single species without distinction between *Y. brevifolia* and *Y. jaegeriana*, this petition generally refers just to the “Joshua tree,” highlighting difference between the two taxa where appropriate.

The Joshua tree is a 5 to 20 meters tall, evergreen, tree-like plant. Trees exceeding 10 meters are rare. Tree size and growth form vary with site and climate conditions, as well as between the two species. *Y. brevifolia* typically have one main stout stem or trunk that measures 0.3 to 1 meter in diameter and have an expanded base. *Y. jaegeriana* typically have multiple stems. Trunks are fibrous, and the bark or periderm is soft and cork like. Bark plates measure 7.5 to 15 cm long and 2.5 to 5 cm in thickness. (Gucker 2006).

Figure 1. Western Joshua tree (*Yucca brevifolia*) and Easter Joshua tree (*Yucca jaegeriana*).

Older plants generally have extensive branching. Young trees typically lack branches and are covered with persistent reflexed leaves. Trees normally reach 1 to 3 meters tall before branching. Branches are 2 to 5 meters and fork at 0.5 to 1-meter intervals. Inner branches are typically erect, and outer branches can be horizontal or drooping. (Gucker 2006).

Leaves are clustered in rosettes at the branch ends. Clusters are commonly 0.3 to 1.5 meters long and 0.3 to 0.5 meters in diameter. Leaves are linear, needle shaped and measure 15 to 35 cm long by 0.7 to 1.5 cm wide, with enlarged bases attaching them to the branch. Leaf shape is slightly triangular and leaf margins are lined with small teeth. Spines measuring 7 to 12 mm occur at the leaf tips. Leaf clusters are longer (1-1.5 meters) on juvenile plants than on mature plants (0.3-1 meters). Outer leaf layers are thick and waxy to reduce water loss. Dead leaves are persistent and fold down, covering the branches and coating the trunks of young trees. (Gucker 2006).

Joshua tree flowers occur in dense, heavy panicles that measure 20 to 40 cm long. Individual flowers are round to egg shaped and measure 2.5 to 5 cm wide. Flowers have a musky scent, with the early botanist Trelease (1893) describing the smell as “so oppressive as to render

⁵ <https://www.fs.fed.us/database/feis/plants/tree/yucbre/all.html>

the flowers intolerable in a room.” Fruits are indehiscent capsules, which become spongy and dry with age. Egg-shaped capsules are 6 to 10 cm long and approximately 5 cm in diameter. Fruits develop at the base of the inflorescence while the upper portion is still in flower. Mature fruits contain 30 to 50 black seeds, which are flat to thickened with smooth to undulate surfaces. Seeds are 7 to 11 mm long. (Gucker 2006).

Figure 2. *Yucca brevifolia* fruit and seeds.

The two species of Joshua trees are morphologically distinguishable. *Y. jaegeriana* is sometimes referred to as dwarf Joshua tree as it is often smaller (3-6 meters tall), with shorter leaves (<22 cm) and shorter branches (0.7-1 meter) compared to *Y. brevifolia*. *Y. brevifolia* is less stocky, often 5 to 12 meters tall, with longer leaves (19-37 cm) and higher branches (2-3 meters above ground) compared to *Y. jaegeriana*. *Y. jaegeriana* displays true dichotomous branching while *Y. brevifolia* is not truly dichotomous. (Gucker 2006).

Lenz (2007) described the vegetative differences between the two species as follows:

Yucca brevifolia s.s. is arborescent with a distinct trunk and, usually, stout branches; *Y. jaegeriana* is generally smaller and branched from near the base, the branches somewhat slender. The two possess dissimilar patterns of branching, *Y. brevifolia* having pseudodichotomous (monopodial) branching; *Y. jaegeriana*, until flowering, has true dichotomous branching. The species differ in leaf length; *Y. brevifolia* having leaves 15–35 cm long, those of *Y. jaegeriana* 10–20 cm. Leaf length is variable, depending at least in part on environmental conditions. (internal citations omitted)

Additionally, Lenz (2007) noted the differences in flower morphology between *Y. brevifolia* and *Y. jaegeriana*:

Flowers of *Y. brevifolia* are nearly globular or depressed globular, the broadly ovate, fleshy, cream-colored perianth segments are strongly incurved, and the flowers never fully expand. Flowers of *Y. jaegeriana* are narrowly campanulate, conspicuously swollen at the base, somewhat constricted above, and the narrowly oblong perianth

segments are usually greenish, and recurved at their tips. The ovaries of *Y. brevifolia* are conical and taper from the base; those of *Y. jaegeriana* are lance-ovoid. Fruits of *Y. brevifolia* are ovoid to broadly ovoid; those of *Y. jaegeriana* are ellipsoid.

Figure 3: Flowers of *Y. brevifolia* (L) and *Y. jaegeriana* (R) above a 6" ruler. Source: Lenz 2007.

Studies on flower morphology in the context of pollination have concluded that the statistically greatest discernable difference between *Y. brevifolia* and *Y. jaegeriana* is in the length of the stylar canal—the path through which the female yucca moth inserts her ovipositor when laying eggs (Godsoe et al. 2008; Starr et al. 2013).

According to Warren et al. (2016), flower panicles grow primarily at the tips of branches that are oriented to the south, and when on branches that are not oriented in a southerly direction, the flower panicles themselves tend to bend or tilt toward the south. Such orientation may provide energetic and/or pollinator benefits (Warren et al. 2016).

2.3 Reproduction and Growth

Joshua trees reproduce both sexually and asexually, although patterns of sexual and clonal reproduction have not been thoroughly investigated (Sweet et al. 2019).

2.3.1 Asexual reproduction

Asexual reproduction is by rhizomes, branch sprouts, and/or basal sprouts. Rhizome production and clonal growth can be triggered by stem damage as well as certain environmental conditions. Dormant buds beneath the periderm may grow when older stems are bent or injured. Joshua trees with extensive rhizome growth and clonal form are typically shorter and have less branching than single-stemmed trees. In some cases, basal buds do not develop into distinct rhizomes, and stems grow adjacent to the main stem as sprouts. (Gucker 2006).

Some Joshua tree populations are largely if not entirely clonal, including in the Liebre Mountains and along the southern and western slopes of the Tehachapi Mountains. In these areas Joshua trees can occur in clumps nearly 30 feet (8 m) in diameter, with 30 to 40 trunk-like stems. A single clone in Gorman Creek was determined to occupy approximately one acre (0.4 ha) and was comprised of several hundred stems (Gucker 2006). Joshua trees with this growth form were previously classified as *Y. b. var. herbertii* (Webber 1953)(Figure 4) but are now known to be a clonal form of *Y. brevifolia* (ITIS 2019).

Figure 4: Type specimen of *Y. b. var. herbertii* in western Antelope Valley in 1946. Source: Webber (1953)

The extent of cloning apparently increases with increased elevation, with Joshua trees in low-elevation dry areas rarely forming more than 1 or 2 stems, but 2 to 3 stems are common, and some clumps are found, in higher, moister areas. A mix of temperature, high winds and abundant snowfall, as well as fire, may be the causal mechanisms of higher levels of Joshua tree cloning. (Gucker 2006). In a study following a large fire in Joshua Tree National Park in 1999, DeFalco et al. (2010) found that 33% of plants that were censused in burned areas sprouted from the root crown or stem after the fire compared with 15% in unburned areas. Recently, Harrower and Gilbert (2018) found enhanced clonality and lack of seedling recruitment on the lower elevation margins of the Joshua tree range in addition to the previously reported prevalence of cloning at higher elevation sites.

2.3.2 Sexual reproduction

Sexual reproduction of Joshua trees is by seed production. As described above, bisexual flowers occur in dense, heavy panicles that measure 20 to 40 cm long. Individual flowers are

round to egg shaped and measure 2.5 to 5 cm by 1 to 2 cm wide.

Esque et al. (2015) noted that while flowering has been observed in Joshua trees as small as 1 meter in some areas, trees that were over 30-years old at their study site had yet to flower. Flowering is considered episodic and rare, generally occurring only in wetter years (Gucker 2006). Reports differ on timing of flowering, with, for instance, Hess (2012) indicating April and May, Waitman et al. (2012) stating February through March, and Harrower and Gilbert (2018) indicating between February and April. Recently, Cornett (2018) reported an apparently unprecedented flowering event in November, following heavy October rains and warmer than usual temperatures immediately thereafter.

Irrespective of timing, Joshua tree flowers require insect pollination to produce seeds.

Pollination and seed production

Joshua tree, as with almost all yuccas, have an obligate pollination mutualism with yucca moths (Lepidoptera, Prodoxidae). Female moths carry pollen to Joshua tree flowers in specialized mouthparts, inject eggs into the floral ovaries using a bladelike ovipositor, and then actively apply pollen to the stigmatic surface to fertilize the flower. As a Joshua tree flower develops into a fruit, the moth eggs hatch and the emerging larvae eat a portion of the developing seeds. The moths are the sole pollinators of Joshua trees, and in turn, the Joshua tree seeds are the only food source for the moths (Pellmyr and Segraves 2003; Yoder et al. 2013).

Joshua trees are now known to be pollinated by two species of moth, *Tegeticula synthetica* and *T. antithetica*, the latter only described in 2003 by Pellmyr and Segraves. Outside of the narrow region in Nevada where *Y. brevifolia* and *Y. jaegeriana* are sympatric and hybridize, *T. synthetica* is the sole pollinator of *Y. brevifolia* and *T. antithetica* is the sole pollinator of *Y. jaegeriana*. While *T. synthetica* is about 30% larger than *T. antithetica*, the apparently more important difference in the two moths is the size of their ovipositors, with the difference in length of each matching the difference in the length of the stylar canal of their respective host plants, with the ovipositor of the western moth (*T. synthetica*) being about 50% larger than that of the eastern species (*T. antithetica*) (Pellmyr and Segraves 2003; Godsoe et al. 2008).⁶

The parallel differences between stylar canal length and ovipositor length between the two species of moths and two types of Joshua tree suggest that selection exerted by their pollinators is the best explanation for the morphological divergence of the trees. Since the female moth's ovipositor must be long enough to reach the ovules but not so long as to injure them, coevolution acting upon moth and tree should favor matching between the length of the moth's ovipositor and the flower's stylar canal (Godsoe et al. 2008; Yoder et al. 2013; Cole et al. 2017). Using molecular clock techniques, Pellmyr and Segraves (2003) concluded that the two moths diverged approximately 10 million years ago, while Smith et al. (2008) later determined that the split between the moth species likely occurred 1.14 million years ago.

⁶ In addition to the pollinating *Tegeticula* moths, bogus yucca moths of the sister genus *Prodoxus* also lay their eggs in Joshua tree flowers. Adult *Prodoxus* lack the specialized mouthparts used for pollination and the larvae feed on plant tissues other than seeds (Althoff et al. 2004).

Studies in Tikaboo Valley in Nevada where both the two moth species and the two types of Joshua trees are sympatric demonstrate that *T. antithetica* can successfully fertilize *Y. brevifolia* and reproduce in their fruits, but *T. synthetica* do not successfully rear larvae on *Y. jaegeriana* (Smith et al. 2009; Starr et al. 2013; Yoder et al. 2013). Consequently, gene flow is largely unidirectional, with flow from *Y. jaegeriana* into *Y. brevifolia* but not from *Y. brevifolia* into *Y. jaegeriana* (Starr et al. 2013).

Once pollinated, fruits form in early summer and seeds are mature in mid-summer (Waitman et al. 2012). Fruits are indehiscent capsules, which become spongy and dry with age. Egg-shaped capsules are 6 to 10 cm long and approximately 5 cm in diameter. Fruits develop at the base of the inflorescence while the upper portion is still in flower. Mature fruits contain 30 to 50 black seeds, which are flat to thickened with smooth to undulate surfaces. Seeds are 7 to 11 mm long. (Gucker 2006).

Seed predation and dispersal

While *Tegeticula* moths are necessary for pollination, their larvae are the first predators that Joshua tree seeds experience. In one study, the range of larvae per fruit was 0 to 6, with an average of 1.4. These larvae consumed or damaged 7% of seeds (Keeley et al. 1985). Borchert and DeFalco (2016) found much higher levels of larvae predation, with 19.5% damaged in a year of widespread fruiting and 42.8% damaged in a subsequent year of reduced flowering and fruiting. Seed production was more than 100 times greater in the first year of the study, leading the authors to speculate that Joshua trees may be a masting species.

Just as a portion of a Joshua tree's seed production goes to its pollinator, a large percentage of its seed production goes to its primary dispersers, various scatter-hoarding rodents. Among the current consumers (and likely dispersers) of Joshua tree seeds in California are the white-tailed antelope squirrel (*Ammospermophilus leucurus*), Mojave ground squirrel (*Xerospermophilus mohavensis*) and California ground squirrel (*Otospermophilus beecheyi*), all of which are known to climb Joshua trees to remove the fruits for later consumption and/or to eat through the desiccated fruits in situ to reach the seeds (Lenz 2001). Once fruits are on the ground, numerous other species will dismantle the fruits and eat and/or cache the seeds, including the round-tailed ground squirrel (*Xerospermophilus tereticaudus*), rock squirrel (*Otospermophilus variegatus*), Merriam's kangaroo rats (*Dipodmys merriami*), canyon mice (*Peromyscus crinitus*) and woodrats (*Neotoma sp.*) (Lenz 2001; Vander Wall et al. 2006; Waitman et al. 2012; Borchert and DeFalco 2016). Among these species, the white-tailed antelope squirrel and Merriam's kangaroo rats have been identified as the most frequent agents of seed removal and caching (Waitman et al. 2012; Borchert and DeFalco 2016).

Studies by Vander Wall et al. (2006), Waitman et al. (2012) and Borchert and DeFalco (2016) have all highlighted the importance of seed dispersal by scatter-hoarding rodents. In the study by Vander Wall et al. (2006), more than 99% of tracked seeds were removed by rodents from placement below Joshua trees, with 84% found in rodent caches at a mean maximum distance of 30 meters. Subsequent surveys found 46% of caches intact, 51% of caches missing entirely, a handful of caches largely empty but with a few remnant seeds below ground and

numerous new secondary caches established. Over the subsequent months, rodents ate most of the cached seeds. Ultimately, well under 1% of cached seeds were documented as eventually germinating from identified caches the following spring. Nevertheless, Vander Wall et al. (2006) concluded that “the dismantling of yucca pods by rodents is very important because there is no other known mechanism for Joshua tree seeds to exit the indehiscent seed pods,” and “that seeds that are not harvested by seed-caching rodents probably have no chance of establishing a seedling.”

While a rodent eats the vast majority of the seeds it removes from a Joshua tree fruit, it also acts as the primary seed disperser, moving seeds upwards of 50 meters from the source tree (Vander Wall et al. 2006; Waitman et al. 2012; Borchert and DeFalco 2016). Waitman et al. (2012) concluded that rodents not only disperse seeds, but also, via the act of caching them, increase the likelihood of germination as seeds that have been buried in soil have a much greater chance of establishing seedlings than those left on the soil surface. Consequently, the Joshua tree’s relationship with the predating rodent, which liberates its seeds from an otherwise inescapable pod, disperses them, and caches many where they have a higher chance of germination, may, as with the pollinating moth, be one of obligate mutualism (Vander Wall et al. 2006; Waitman et al. 2012).⁷

Waitman et al. (2012) also noted the limitations of the mutualistic relationship between Joshua trees and rodents, as it requires sufficient seed production such that the caching rodent collects more seeds than it can eat: “Small seed crop size along with an overabundance of rodents may shift this interaction from mutualism toward seed predation by rodents.” Given seed production is apparently greatest in wetter years, in drought years virtually all seeds may be consumed by rodents, resulting in no seedlings being produced that year.

While almost all authors recognize the current importance of rodent seed dispersal, several have hypothesized that the large effort in fruit production by Joshua trees without a specialized dispersal agent may indicate that current fruit production is an evolutionarily relict designed to attract a now extinct megaherbivore dispersal agent, with Cole et al. (2011) identifying ground sloths and Lenz (2001) suggesting Columbian mammoths. Cole et al. (2011) note that evidence supports “the concept that the species’ current mobility is constrained by the earlier extinction of the Shasta ground sloth and other possible seed vector(s).” However, Waitman et al. (2012) discount the role of the sloths in seed dispersal and conclude that “seed-caching rodents are responsible for seed dispersal today, and we suspect that they were an important, if not the sole, means of dispersal in the past.”

Additionally, several authors have identified wind as an important seed dispersal agent (e.g. Lenz 2001, citing earlier accounts), with Gucker (2006) noting that as fruits become overmature, skins crack and moisture is released, making fruits lighter and more easily wind dispersed, and that finding clumps of 2 or more seedlings is likely evidence that the dried fruits

⁷ However, unlike the Joshua tree’s relationship with *Tegeticula* moths, where both tree and moth absolutely need each other to successfully reproduce, the tree’s relationship with the rodent is more one-sided; the Joshua tree may be dependent upon the rodent to disperse its seeds, but the rodent – while certainly benefiting from the tree’s seeds – can generally subsist on other food sources in its absence.

were wind dispersed. The largest known modern dispersal distances for Joshua trees of 151 meters in the Antelope Valley and 251 meters in Lanfair Valley were recorded by Lenz (2001) and ascribed to wind. However, Waitman et al. (2012), based upon wind tunnel tests of fruits and seeds, discount wind dispersal of seeds as playing a significant role for Joshua tree reproduction.

As further discussed *infra*, whether by wind or rodents, seed dispersal of Joshua trees is generally considered quite limited, likely constraining the ability of the species to extend its range in response to changing conditions (Lenz 2001; Cole et al. 2011).

Germination and growth

In laboratory conditions, Joshua tree seeds germinate readily and do not require any pretreatment (Gucker 2006). Waitman et al. (2012) had germination rates of 99% on freshly harvested seeds, while other experiments had germination rates of 98% and 72% after 6 months and 1.5 years of storage, respectively (Gucker 2006).

Longevity of viable seeds in the soil seed bank is limited. Waitman et al. (2012) reported that “a small fraction of seeds” emerged the year following their experiment, indicating that in some circumstances viability is at least two years. Reynolds et al. (2012) observed that seeds in the ground “rapidly lost germinability through time. Longevity of seeds in the soil declined by about 50% per year, which indicates that *Y. brevifolia* has little capacity for seed dormancy.” Borchert and DeFalco (2016) noted that in most years when fruit production is enough to satiate predation by larvae and rodents, uneaten fruits may remain on the tree and “may function as a viable aerial seed bank well after fruit maturation,” since seed germinability is likely longer in an intact fruit than in the soil.

Notwithstanding very high laboratory germination rates, seedling production in the field is extremely low. Of the 1000 seeds tracked by Vander Wall et al. (2006), 836 were cached by rodents, but only three of these were documented to ultimately produce seedlings. Of seeds planted in artificial caches in enclosures that precluded rodent harvest, only 14.8% germinated (Vander Wall et al. 2006). In another enclosure study, Waitman et al. (2012) reported only 3.2% of cached seeds produced seedlings in the field, while 36% of pots in an artificial growing chamber produced seedlings. Buried seeds, both in the field and laboratory, were most likely to produce emergent seedlings when 1 to 3 cm deep, depths similar to the caches rodents were observed making (Waitman et al. 2012). Both Vander Wall et al. (2006) and Waitman et al. (2012) reported higher seedling emergence rates from caches under shrub cover. However, both studies also found that rodents cache seeds without regard to shrub cover.

Reynolds et al. (2012) described the climate conditions supporting emergence and postulated that “there are fewer opportunities of emergence in the far western Mojave Desert, and under the current climate regime *Y. brevifolia* in that area may be most vulnerable to demographic change resulting from low and infrequent recruitment and may already have occurred.” Subsequent studies (e.g. Sweet et al. 2019) have demonstrated that this demographic change due to low recruitment is already underway.

Once a seedling emerges, it faces a long, arduous path to adulthood, with high mortality

until it exceeds 25 cm in height (Esque et al. 2015). Survival of seedlings requires periods of cool temperatures, little to no herbivory, summer rain, and some amount of yearly precipitation over a period of several years (USFWS 2018).

Growth rates are dependent on factors ranging from age, precipitation, presence of nurse plants, temperature and (at least in labs) photoperiod (Gucker 2006). Over the years various studies have indicated differing rates of growth. In one study in Joshua Tree National Park, unbranched seedlings grew at an average rate of 7.6 cm/year for the first 10 years and an average of 3.8 cm/year thereafter, with other studies showing annual growth rates of was 5.9 cm/year and 11.7 cm/year (Gucker 2006). More recently, Esque et al. (2015) measured a long-term mean annual growth rate of 3.12 ± 1.96 cm over 22 years and noted that long-term growth rates in other contemporaneous studies elsewhere in the Mojave were comparable.

Lab studies suggest that cold periods are required for optimal seedling growth, as 3-year old seedlings kept at 4 °C for 2 months produced twice as many new leaves after the cold treatment as seedlings without the cold treatment. Other lab experiments suggest that day length affects the growth of seedlings, with seedlings exposed to 10 hours of daylight producing the longest and most leaves, while seedlings grown in 16 hours of daylight produced the shortest and fewest leaves (Gucker 2006).

Perhaps the most important factor in seedling survival and growth is the presence of nurse plants. Several studies have found successful seedling emergence tied to shrub cover (Bittingham and Walker 2000; Vander Wall et al. 2006; Waitman et al. 2012), with blackbrush (*Coleogyne ramississima*) generally noted as the most important nurse plant. The benefits of a shrub canopy for a young Joshua tree include increased soil moisture, decreased insolation, reduced soil temperatures, decreased evapotranspiration, increased nutrients, decreased herbivory, and/or lower wind desiccation (Bittingham and Walker 2000; Gucker 2006).

Figure 5: Young Joshua tree emerging from nurse plant.

Once established, a Joshua tree is relatively long-lived. However, aging a Joshua tree or determining maximum lifespan is difficult as the plants lack annual growth rings. While one early report of a 20-meter tall Joshua tree estimated the plant to be 1000 years old (Little 1950), most early studies postulated that large trees can be 300 years old with an average life span of 150 years (Gucker 2006). More recent studies based on growth rate and long-term monitoring have reached similar conclusions. Gilliland et al. (2006), based upon growth rates generated from a 14-year census of a Joshua tree woodland, estimated that the oldest tree was 321 years, with mean age of trees of 62.2 years. Estimates based on observed patterns of survivorship produced similar results, with a median life expectancy of 89 years, with 5% of the population projected to reach 383 years. Esque et al. (2015) estimated a generation time of 50-70 years based on data collected during a 22-year study.

Summing up reproduction and recruitment by Joshua trees, Esque et al. (2015) highlighted the challenges Joshua trees face:

[R]ecruitment of *Y. brevifolia* requires a convergence of events, including fertilization by unique pollinators, seed dispersal and caching by rodents, and seedling emergence from a transient seed bank triggered by isolated late-summer rainfall. Alignment of these convergent events likely results in successful establishment of new seedlings only a few times in a century. (internal citations omitted)

As further discussed *infra*, the Joshua tree's recruitment challenges make the species particularly vulnerable to climate change.

2.4 Habitat Requirements

Joshua trees occur in desert grasslands and shrublands in hot, dry sites on flats, mesas, bajadas, and gentle slopes in the Mojave Desert (Gucker 2006). Soils in Joshua tree habitats are silts, loams, and/or sands and variously described as fine, loose, well drained, and/or gravelly, while the plants can reportedly tolerate alkaline and saline soils (Gucker 2006). Cole et al. (2011) characterizes populations as discontinuous and reaching their highest density on the well-drained sandy to gravelly alluvial fans adjacent to desert mountain ranges.

Lenz (2001) reports that plants tolerate temperatures of -25°C to 51°C and annual precipitation ranges of 98 to 268 mm. According to USFWS (2018), the temperature range for western Joshua trees ranges from a low of -8.1°C to a mean summer high of 37.2°C and the species occurs in areas averaging more than 82 mm of rainfall and less than 738 mm of rainfall per year. Went (1957), based on field observations and laboratory experiments, noted that non-juvenile Joshua trees required annual exposure to low temperatures for optimal growth. Turner (1982) postulated that such a need for cold winter temperatures may explain why Joshua trees are largely limited to the higher and cooler periphery of the Mojave.

Temperature and precipitation are likely the prime constraints on the species, with Cole et al. (2011) noting that "the northern portion of Joshua tree's range is spatially limited by extreme winter cold events, but at lower elevations it is limited by extreme high temperature events in

summer or winter. Mean precipitation patterns primarily limit the range from the east and west, as well as above and below its elevational range during various portions of the year. Low late-spring (April and May) precipitation seems to prevent Joshua tree from growing in lower elevation portions of the Mojave Desert.” Temperature and precipitation requirements are further discussed *infra* with regard to climate impacts on the species.

Figure 6. Average annual precipitation in range of *Y. brevifolia* (USFWS 2018).

The reported upper and lower elevation limits of Joshua trees vary significantly in the published literature (Gucker 2006). The recent Species Status Assessment by USFWS (2018) is based upon a comprehensive review of distribution records and describes the elevational range for *Y. brevifolia* as 750 meters (2461 ft) up to 2200 meters (7218 ft), and between 600 meters (1969 ft) and 2000 meters (6500 ft) for *Y. jaegeriana*.

Joshua trees are not restricted to any one desert scrub or xeric woodland community and can be found in many different plant alliances throughout their range (Turner 1982). For example, within Joshua Tree National Park, Harrower and Gilbert (2018) characterized their study area of Joshua trees as encompassing four broad eco-regional vegetation types: Sonoran–Colorado Desert scrub, Mojave–Sonoran creosote bush scrubland, Mojave mid-elevation desert, and pinyon–juniper woodland.

While Joshua tree habitat may not be limited by particular plant associations, as discussed *supra*, for successful reproduction and recruitment, Joshua trees require the presence of their obligate pollinator, rodents to disperse and cache seeds and nurse plants to shelter emerging seedlings.

3 Current and Historical Distribution

The current range of Joshua trees (both species)⁸ extends from northwestern Arizona to southwestern Utah west to southern Nevada and southeastern California at elevations between 600 and 2200 meters of elevation and between 34° to 38° latitude (USFWS 2018). The current range of the Joshua tree is but a small fraction of its range during the late Pleistocene.

Plant material from Shasta ground sloth dung and packrat middens indicates that during the Pleistocene the Joshua tree had a much larger southern distribution extending well into the Sonoran Desert, where its range may have encompassed La Paz, Maricopa, Pinal, Yuma, and Pima counties in Arizona; Imperial and Riverside counties in California; mainland Mexico; and northern Baja California, Mexico (Cole et al. 2011) (Figure 7).

Figure 7: Current and Pleistocene range of the Joshua tree. Source: USFWS (2018), based on Cole et al. (2011).

The Joshua tree's historical range contracted northward along the southern edge of its range as climates warmed at the start of the Holocene. As noted by Cole et al. (2011), this contraction was not matched by northward expansion:

Although the rapidly warming climate of the early Holocene would seem to have opened up vast new areas of potential range to the north, the fossil record does not record any significant northward expansion over the last 11,700 years.

⁸ Because the split of Joshua trees into two species has only recently been recognized, much of the literature describing their past and present range does not explicitly distinguish between the two. The current range of *Y. brevifolia* is readily discernable from that of *Y. jaegeriana* and is described *infra*. However, while the historic range of Joshua trees is broadly known from subfossil records, the portion of that range that is ascribable to each species has yet to be determined.

Cole et al. (2011) ascribed the lack of northward expansion to the Joshua tree's extremely limited dispersal ability, potentially a result of the extinction of the Shasta ground sloth which may have been a primary seed disperser for the species.

Since the end of the Pleistocene, the Joshua tree's distribution has been remarkably stable throughout the Holocene into the present day (Cole et al. 2011; Holmgren et al. 2010).

There are currently five regional populations of Joshua trees distributed across the Mojave, southern Great Basin, and western Sonoran Deserts, with the vast majority of trees occurring within the Mojave.⁹ Of the five populations, two are of *Y. brevifolia* and three of *Y. jaegeriana*, with a sixth small hybrid population in Tikaboo Valley, Nevada. One of the *Y. brevifolia* populations is entirely in California (YUBR South in Figure 8), while the other is shared with Nevada (YUBR North in Figure 8). Only one of the three *Y. jaegeriana* populations occurs in California (primarily in the Mojave National Preserve), and this population is shared with Nevada and Arizona (YUJA Central in Figure 8) (USFWS 2018).

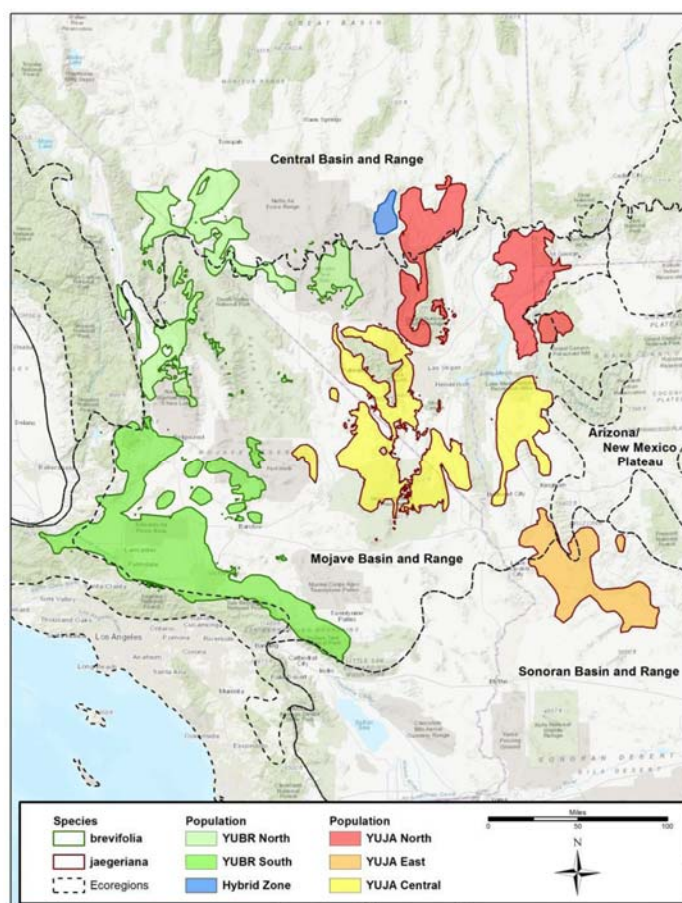

Figure 8. Current Joshua tree distribution. Source: USFWS 2018.

⁹ While numerous published studies have characterized the range of Joshua trees, USFWS (2018) is the most complete synthesis of range data; consequently, petitioners cite primary to that document in this section.

Y. brevifolia occurs almost exclusively in the Mojave Desert in unevenly distributed populations. A small portion of its northern extent occurs within the Great Basin Desert (Figure 8). The primary distinguishing feature of these two desert regions is the presence of creosote bush in the Mojave Desert and Sagebrush steppe in the Great Basin. The southern extent of *Y. brevifolia*'s range is in the Little San Bernardino Mountains of Joshua Tree National Park. The northern extent of its range is near Alkali, Nevada. The western extent is near the Hungry Valley State Vehicular Recreation Area near Gorman, California. The eastern extent of its range is in Tikaboo Valley, Nevada, where it co-occurs with *Y. jaegeriana* (USFWS 2018).

USFWS (2018), treats *Y. brevifolia* as comprised of two geographically separate populations, (YUBR) South and YUBR North.¹⁰ YUBR South is entirely within California. This population occurs within the area stretching from Joshua Tree National Park, north to Ridgecrest and Red Mountain. This area is comprised of alluvial plains, fans, and bajadas of the major valleys lying between scattered mountain ranges. On the southern and western edge of the population boundary, *Y. brevifolia* occurs in transitional areas characterized by higher elevations and more rainfall with semi-desert montane chaparral to pinyon-California juniper woodlands. There is some variation in vegetation from north to south, but the basins typically are dominated by creosote bush (*Larrea tridentate*) and white bursage (*Ambrosia dumosa*) and the higher elevations are characterized by junipers and pinyons (USFWS 2018).

In the YUBR South range, average annual rainfall varies between 82.4 mm and 738.1 mm and minimum temperatures range from -5.7°C at the upper elevational limit (2200 meters) to 4.8°C at the lower elevational limit (750 meters). Mean summer high temperature are between 23.4-37.2°C. Less than 10 percent of annual precipitation occurs in summer in most areas occupied by *Yucca brevifolia* (USFWS 2018).

The geographic area in which YUBR South is situated is comprised of 3.7 million acres, with just over 50% in private ownership, 48% federally owned, and just under 2% state, county and local owned (USFWS 2018). USFWS (2018) estimates that 3,255,088 acres of this area was suitable for Joshua trees based on soils and other habitat factors.¹¹ However, Joshua tree do not occupy the entirety of this area, as they can have a patchy and disjunct distribution. Notably, the Bureau of Land Management's (BLM's) calculation of Joshua tree woodland on lands under its jurisdiction is substantially less than this larger area estimated by USFWS (2018). USFWS (2018) mapped 841,220 acres within the area of YUBR South as on BLM lands. BLM (2006) itself calculated that only 3275 acres of "Joshua tree woodland" occur on its lands in the West Mojave Plan (WEMO) area, which includes all of YUBR South. While this extreme difference between the two estimates is partly attributable to Joshua trees occurring in other plant community types that occupy much larger areas (e.g. "blackbrush scrub" and "creosote bush scrub"), it does highlight that areas of dense concentrations of Joshua trees occupy a relatively small fraction of the larger mapped areas.

¹⁰ As discussed *infra*, each of these populations may constitute an evolutionarily significant unit (ESU).

¹¹ A peer reviewer of USFWS (2018) pointed out that "the potential distribution of Joshua tree under current climate conditions is vastly overestimated" (Smith 2018). This is discussed in greater detail in the section of the federal ESA listing decision, *infra*.

Additionally, the cities of Palmdale, Lancaster, Hesperia, Victorville, and Yucca Valley, as well as numerous smaller communities are within the mapped YUBR South area. While *Y. brevifolia* currently persists in the less-developed areas of these communities, it is absent from the more developed areas as well as the agricultural lands in the region. The Antelope Valley, where the largest of these cities are situated, is the area where the greatest habitat loss of *Y. brevifolia* has already occurred.

The YUBR North population occurs in the area north of Inyokern, along the west and north margins of Death Valley, to Goldfield, Nevada, and east to the Nevada Test Site. In contrast to the mostly creosote bush shrubland of the lower elevations in YUBR South, the vegetation of this higher and cooler zone includes single-leaf pinyon, juniper, and sagebrush. The elevation range of the species in this population is between 1500 and 2200 meters. Average annual rainfall varies between 95.8 mm and 429 mm, minimum temperatures range from -8.1 to 3.6°C, mean summer temperatures range between 20.4 and 36.3°C, and summer precipitation comprises up to a quarter of the mean annual precipitation (USFWS 2018).

In contrast to the area of YUBR South, which is majority private land, the area of YUBR North is overwhelmingly (96%) federal land (USFWS 2018). The approximately 2 million acres comprising the YUBR North area is about evenly split between California and Nevada. USFWS (2018) estimates that almost all of this area (1,941,701 acres) is suitable for Joshua trees.

4 Abundance and Population Trends

Due to the species' patchy distribution within its range, highly variable population density (4 to 840 trees per acre) and lack of range-wide population surveys, a reliable estimate of Joshua tree population size is not available (USFWS 2018). Similarly, no range-wide population trends have been documented. However, recent studies carried out in portions of the species' range indicate that density is negatively correlated with increasing temperature, the species range is contracting at lower elevations, recruitment is limited, and mortality is increasing, all of which would likely reflect a population already starting to decline.

DeFalco et al. (2010), in a study in Joshua Tree National Park, found that recent drought and fire had resulted in significant mortality of *Y. brevifolia* in the park. Five years after a fire, 80% of burned trees in the study area had died, with smaller trees (<1 m tall) dying more rapidly. But perhaps more surprising, DeFalco et al. (2010) found that unburned trees also had high mortality rates during the same study period (1999-2004), with 26% of unburned trees also dying. As with post-fire mortality, smaller trees died in the initial years of the drought with mid-size and larger trees showing effects in later years. Mortality was ascribed both to water stress itself, as well as herbivory by pocket gophers (*Thomomys bottae*), which likely turned to Joshua tree stems, roots and periderm as alternative food sources due to reduced herbaceous cover during the drought (DeFalco et al. 2010).

In a recent study, Harrower and Gilbert (2018) investigated various life-history parameters of Joshua trees in Joshua Tree National Park and found the "ratio of dead to living trees was greater at the lower elevations where the sites are warmer and drier than sites at higher elevation." Their results "suggest that the range of Joshua trees is contracting at the lower

elevations where there was no seedling recruitment and high tree mortality.” Harrower and Gilbert (2018) also note that Joshua trees “do not seem to be moving successfully into higher elevations,” potentially due to limitations on numbers of pollinating moths at these higher elevations. This finding is consistent with that of St. Clair and Hoines (2018) who found Joshua tree stand density negatively correlated with increasing temperature.

A series of small-scale studies in Joshua Tree National Park summarized in Cornett (2014) documented a 93% decline in Joshua tree abundance between 1990 and 2013 at one site, a 16% decline in Joshua tree numbers between 1988 and 2008 at second site, and a 73% decrease from 1990 through 2013 at a third site. Fire contributed to the decline at the third site, but even that site had declined by 18% prior to the fire. Cornett (2014) noted that declines at these three sites, which “represent a broad geographical sampling” of Joshua trees in the Park, and along with the documented mortality of some of the largest (and presumably oldest) trees in Park, “would seem to indicate *Yucca brevifolia* numbers are declining throughout the Park.”

Regardless of whether Joshua tree abundance is already declining, it is virtually certain that abundance will decline in the foreseeable future. The impacts of climate change, fire, habitat loss and other sources of mortality are discussed further below.

5 Factors Affecting Ability to Survive and Reproduce

As discussed in the Life History sections *supra*, Joshua tree survival and reproductive success is tied to multiple factors, many of which are influenced by climate. Importantly, survival varies greatly by size class, with relatively high survival among adults, but very high mortality rates for seedlings and smaller individuals (DeFalco et al. 2010; Esque et al. 2015). As noted by Esque et al. (2015), because *Y. brevifolia* “is long lived the current distribution of reproductive adults may mask the effects of recent changes in climate on recruitment and survival of seedlings and juveniles, which are more sensitive to the vagaries of desert conditions.” Consequently, while some impacts such as reduced recruitment may already be observable, impacts such as adult mortality and consequent population declines and range reductions may have a lag time before their presence is felt on the landscape (Svenning and Sandel 2013).

Among the factors affecting *Y. brevifolia*’s ability to survive and reproduce are predation, invasive species, wildfire, drought, climate change and habitat loss due to development. These factors are often related, synergistic, and collectively threaten the continued viability of the species.

5.1 Predation

Predation plays an important role in Joshua tree survival at every life stage. Before a seed even leaves a fruit, *Tegeticula* moth larvae eat a portion of the seeds, with Keeley et al. (1985) observing 7% of seeds in a fruit consumed or damaged (Keeley et al. 1985). Borchert and DeFalco (2016) found much higher levels of larvae predation, with 19.5% damaged in a year of widespread fruiting and 42.8% damaged in a subsequent year of reduced flowering and fruiting. Rodents then cache and ultimately consume the vast majority of seeds, with fewer than 1% of

seeds germinating (Vander Wall et al. 2006; Waitman et al. 2012; Borchert and DeFalco 2016). In drought years, virtually all seeds may be consumed by rodents, resulting in no seedlings being produced that year (Waitman et al. 2012).

Cattle have been documented grazing on the inflorescences of small Joshua trees. Lybbert and St. Clair (2017) documented floral herbivory by cows on *Yucca brevifolia* less than 2 m tall consumed 40% of inflorescences on their study plot. However, since the majority of Joshua trees flower above that 2 m threshold, only 6% of inflorescences overall were consumed by cattle. The fact that *Yucca brevifolia* evolved into a taller tree form than other yuccas might be a vestige of a growth-escape strategy to escape herbivory from a now extinct species, such as the Shasta ground sloth (Cole et al. 2011; Lybbert and St. Clair 2017).¹²

Drought years and fire also result in increased herbivory on seedlings and pre-reproductive Joshua trees (DeFalco et al. 2010; Esque et al. 2015), as the reduced availability of herbaceous forage forces small herbivores to use alternative food sources, including *Y. brevifolia* stems and leaves (DeFalco et al. 2010; Esque et al. 2015). DeFalco et al. (2010) found widespread evidence of tissue damage to Joshua trees in burned areas (28% of plants) from pocket gophers (*Thomomys bottae*), with lesser levels (16%) evident in unburned areas. Such damage occurred predominantly in lower elevation sites. In most areas Joshua tree survival rates dropped with evidence of rodent damage, with the effects most pronounced in burned areas.

In a separate study, Esque et al. (2015) found that herbivory by black-tailed jackrabbits (*L. californicus*) resulted in 55% mortality of pre-reproductive *Y. brevifolia* <25 cm tall on their study site in a single drought year. In addition to jackrabbits, Esque et al. (2015) documented damage to pre-reproductive plants from pocket gophers, white-tailed antelope squirrels (*Ammospermophilus leucurus*), and woodrats (*Neotoma sp.*).

While predation alone is likely not presently a threat to Joshua tree persistence, it can result in zero reproductive success in one or a sequence of dry years, as well as high mortality levels to seedlings and small plants (<25 cm tall), and even adults. This effect is magnified in areas that burn. Burned trees are likely physiologically more vulnerable to herbivore damage, while the lack of other herbaceous plants deprives young Joshua trees of nurse plants which shield them from herbivory. Moreover, jackrabbits, pocket gophers and other herbivores lack alternative food sources and turn to Joshua tree stems, roots and periderms for sustenance following such events (DeFalco et al. 2010; Esque et al. 2015). As discussed *infra*, both wildfire and droughts are predicted to increase in frequency and intensity in the coming decades, likely rendering the impacts of seed predation and herbivory on stressed and shrinking populations of Joshua trees more significant.

¹² Notably, cattle grazing can have significant impacts on other yuccas, with Lybbert and St. Clair (2017) documenting complete reproductive failure of *Y. baccata* and consequent apparent local extirpation of that species' pollinating moths on their study plot due to high levels of herbivory on the species' flowers by cows. *Y. baccata* is notably shorter than *Y. brevifolia* with its flowers within easy reach of cattle. The Joshua tree's evolutionary adaptation to survive sloth herbivory may have pre-adapted it to better survive cattle grazing.

5.2 Invasive species

Invasive plant species are widely established in the Mojave Desert throughout the range of *Yucca brevifolia*. And while invasive species represent a relatively small percentage of the flora, they represent a huge percentage of the biomass. Brooks and Berry (2006) found that in a high rainfall year (1995) nonnative annual species comprised 6% of the flora and 66% of the annual biomass, with those numbers increasing to 27% and 91% respectively in a low rainfall year (1999). The grasses red brome (*Bromus rubens*) and *Schismus* spp., along with the forb redstem fillaree/stork's bill (*Erodium cicutarium*) comprised 99% of the alien biomass. More recently, Sahara mustard (*Brassica tournefortii*) has spread into the Mojave, including into Joshua tree woodland (Frakes 2017; Brooks et al. 2018).

Figure 9: Carpet of desiccated invasive *Schismus* spp. between *Y. brevifolia*.

The abundance and diversity of alien species in the Mojave is positively correlated with disturbance, including livestock grazing, off-highway/off-road vehicle (OHV or ORV) use, fire, urbanization, roads, and agriculture. As summarized by Brooks and Berry (2006):

Alien annuals had high density, biomass, or cover near roads, in an area of OHV use compared to an area where OHV use was lower, in an area where both OHV use and grazing were present compared to an area where both disturbances had been excluded for at least 10 years, in two grazed areas compared with ungrazed areas, and in areas near livestock watering sites.... These studies indicate that species richness and biomass of alien annual plants are positively correlated with disturbance (internal citations omitted).

Invasive species are also aided by nitrogen deposition as a result of air pollution (Brooks 2003). As noted by Allen et al. (2009), the “western Mojave Desert is affected by air pollution generated in the Los Angeles air basin that moves inland with the predominant westerly winds.

The pollution contains both oxidized and reduced forms of nitrogen (N), which are of concern because they are deposited on soil and plant surfaces and thus fertilize plants” (internal citations omitted). Fertilization disproportionately benefits nonnative species leading to increased abundance and biomass of invasive species such as *Bromus rubens* and *Schismus* spp. (Brooks 2003; Allen et al. 2009; Allen et al. 2011; Bytnerowicz et al. 2016).

Figure 10: Map showing nitrogen deposition rates in California, with areas of high levels overlapping the range of YUBR South. Source: Bytnerowicz et al. 2016.

While the rapid spread of invasive species in the Mojave is resulting in competitive impacts on native annuals, and has also been demonstrated to have direct competitive impacts on native perennial species including creosote bush (*Larrea tridentata*) (DeFalco et al. 2007), direct competitive impacts of invasives on *Yucca brevifolia* have not been thoroughly studied. To the degree there is competition it would likely be most significant with emergent seedlings under nurse plants as this is the most vulnerable life stage of the Joshua tree (Reynolds et al. 2012).

The much bigger issue is that these invasive plants have altered fire dynamics, leading to larger and more frequent fires that are killing innumerable Joshua trees. As succinctly described by Barrows and Murphy-Mariscal (2012), “[m]ore frequent fires in the Mojave Desert are the result of the interaction of increased nitrogen deposition and the competitive advantage that nitrogen gives to invasive grasses such as red brome, *Bromus rubens*.” Similarly, Pardo et al. (2011) highlighted the dire consequences for *Y. brevifolia*: “In Joshua Tree National Park in southern California, N deposition favors the production of sufficient invasive grass biomass to sustain fires that threaten the survival of the namesake species.” As discussed below, the altered

fire regimes in the Mojave represent a significant threat to the Joshua tree at the individual and population level.

Figure 11: Fire-killed *Y. brevifolia* in a carpet of *Bromus rubens*.

5.3 Wildfires

Wildfire is one of the greatest threats to the persistence of *Yucca brevifolia*, particularly as the species' range contracts in the face of climate change and the frequency and severity of fire in the species' range increases (DeFalco et al. 2010; Holmgren et al. 2010; Vamstad and Rotenberry 2010; Cole et al. 2011; Barrows & Murphy-Mariscal 2012; Sweet et al. 2019).

5.3.1 Joshua tree response to fire

Some early researchers suggested that Joshua trees are well-adapted to fire due to the fact that damaged trees can resprout after fire (Webber 1953). Older adult trees are more fire resistant than younger trees as the apical meristems grow above the level of most ground fires while the flammable dead leaves on the main trunk that can facilitate fire spread into the crown are largely shed as the tree matures (Gunter 2006). And even if top-killed or damaged by fire, a Joshua tree can sprout from the root crown, rhizomes, and/or branches. Similarly, previous studies also found that Joshua trees can at least partially repopulate some burned areas via such sprouting (Loik et al. 2000a).

However, several longer-term studies have subsequently demonstrated that Joshua trees have relatively low post-fire survival, are slow to repopulate burned areas, and successful recruitment from resprouting requires sufficient precipitation in the years following fire (DeFalco et al. 2010; Vamstad and Rotenberry 2010; Abella et al. 2009).

As summarized by Brooks et al. (2018), “Yucca species such as Joshua tree and Mojave yucca (*Yucca schidigera*) often survive burning, but Joshua trees typically die within the first few years after fire due to drought and herbivory stress.” Moreover, Joshua trees are particularly vulnerable to fires as the “relatively small size and dense packing ratio of dead Joshua tree leaves compared with dead Mojave or banana yucca leaves increase the frequency at which they are completely burned and may explain why Joshua trees are more frequently killed by fire” (Brooks et al. 2018). It can take several decades before a Joshua tree sheds the dead leaves on its trunk, leaving the adult tree more fire resistant.

DeFalco et al. (2010) carried out a detailed study of Joshua tree survival in both burned and unburned areas of Joshua Tree National Park that paints a grim picture for species’ future in the face of increasing fire.

Five years after the Juniper Fire Complex of May 1999, approximately 80% of burned *Y. brevifolia* died compared with 26% in adjacent unburned sites. This high postfire mortality of *Y. brevifolia* is consistent with other studies including 90% mortality six years after a 1978 fire in Lower Covington Flat at Joshua Tree National Park and 64 – 95% mortality at sites censused 1 to 47yr after fires in Mojave and Sonoran deserts of California. Declining survival during the first year is attributed to immediate losses of small *Y. brevifolia* (< 1 m tall) whose active meristems close to the ground are vulnerable to extreme fire temperatures and flames that consume whole plants. As they age and grow taller, *Y. brevifolia* shed leaves from the trunk and are less likely to burn, unlike younger plants whose aging leaves are still attached and provide ladder fuel. Thus, taller plants likely sustained less proportional burn injury to the outer periderm tissue during the fire, and steep declines in this size class occurred only after the consecutive dry periods that began in the autumn months during 1999 and 2000 (internal citations omitted).¹³

Post-fire mortality in this study was likely the result of the interplay of drought and herbivory with fire. During the dry years subsequent to the fire, herbaceous plants were scarce, and pocket gophers (*Thomomys bottae*) gnawed the periderm and hollowed stems of *Y. brevifolia* causing many of them to topple. Pocket gopher damage reduced plant survivorship at low-elevation, unburned sites and diminished survival of burned plants in all but the driest site, which already had low survival (DeFalco et al. 2010).

The loss of *Y. brevifolia* was not only amplified by the lack of precipitation following the wildfire but also by herbivores that damaged burned plants. Herbaceous annual plants were scarce during the growing season following the 1999 fire, and many perennials were dormant due to low autumn through spring precipitation that triggers germination and breaks leaf dormancy. Widespread incidence of tissue damage by *T. bottae* in burned areas implies that the roots and periderm of *Y. brevifolia* that did not die immediately in the fire offered an

¹³ Noteworthy in the DeFalco et al. (2010) study is the fact that mortality of even unburned trees was high (26%) over the five years of their study. This was ascribed to a combination of drought stress and herbivory by pocket gophers. As discussed *infra*, such prolonged droughts are likely to be more frequent in a changing climate.

alternative succulent food source in denuded areas where shrubs and grasses were incinerated (DeFalco et al. 2010) (internal citations omitted).

DeFalco et al. (2010) observed that 33% of censused Joshua trees in burned areas sprouted from the root crown or stem after the fire. These are in line with other studies that found 25% of Joshua trees sprouting from the root crown after a 1978 fire (but with only 10% surviving five years later) and 28% sprouting from the root crown (and 2% from the stem) one year after a 1995 fire (Loik et al. 2000a).

Postfire sprouting prolonged Joshua tree survival in the DeFalco et al. (2010) study, but only at the wetter, high-elevation sites. As noted by DeFalco et al. (2010), “sprouting can provide some advantage to survival only when precipitation is sufficient (e.g., at higher-elevation sites or during wet years). Thus, sprouting of *Y. brevifolia* in the Mojave Desert presents an uncertain recovery strategy in postfire landscapes, especially in the face of herbivory and recurring low-precipitation years.”

One area where Joshua trees may be more adapted to fire is along the far western edge of their range. As observed by Brooks et al. (2018),

Joshua tree populations along the extreme western edge of the desert bioregion near the Sierra Nevada and Transverse Ranges often resprout and survive more readily after fire than those further east. A cycle of relatively frequent fire and resprouting can result in short, dense clusters of Joshua tree clones, such as those found near Walker Pass, in the western end of the Antelope Valley, and in pinyon-juniper woodlands at ecotones with the Transverse Ranges such as Cajon Pass. High resprouting rates of Joshua trees in these areas may have evolved in local ecotypes that became adapted to shorter fire return intervals along the western desert ecotones than in other parts of the desert bioregion.¹⁴

Recruitment of new Joshua trees into burned areas is infrequent and slow. In one study no seedlings or saplings were observed in burned areas less than 10 years old, and fewer than 10 individuals per hectare were present on burned areas more than 40 years old in Joshua Tree National Park (Brooks et al. 2018). Another study found that Joshua trees were still rare on a site 65 years after a fire (Vamstad and Rotenberry 2010).

Among the factors inhibiting Joshua tree recolonization of burned sites are the lack of seeds due to mortality of seed-producing adults and the loss of suitable establishment sites due to the burning of nurse plants (DeFalco et al. 2010; Reynolds et al. 2012). Nurse plants in arid environments are known to moderate insolation, soil moisture, temperature, and humidity

¹⁴ Notably, the distinguishable clonal form of Joshua trees in these areas was once recognized as its own subspecies or variety, *Y.b. herbertii*, which is now considered a synonym of *Y. brevifolia* (Wallace 2017). Regardless of taxonomy, Joshua trees in these areas warrant special monitoring and protection as they may hold adaptations that make them particularly resilient in the face of increasing fires and climate change.

beneath their canopies and improve conditions for seedling establishment (Reynolds et al. 2012). Nurse plants also shield seedlings from herbivory (Esque et al. 2015).

Blackbrush (*Coleogyne ramosissima*) is one of the most important nurse plants for Joshua tree seedlings (Brittingham and Walker 2000) but is also one of the most vulnerable shrubs to fire (Brooks et al. 2018). Blackbrush are highly flammable, and once ignited tend to completely combust and are killed. Blackbrush stands can take centuries to recover, with the fastest documented recovery being on the order of 50 to 75 years (Brooks et al. 2018). Because of their extreme flammability and slow recovery, the mid-elevation zone dominated by blackbrush and home to Joshua trees is likely the most susceptible area to type conversion via the grass/fire cycle as a result of the arrival of non-native grasses (Brooks et al. 2018).

In the Joshua Tree National Park fire studied by Loik et al. (2000a), blackbrush was eliminated from the burned area with no signs of recovery. Loik et al. (2000a) postulated that “the time required for Joshua trees to begin recruitment via seeds will be delayed until *C. ramosissima* becomes re-established.”

As summarized by DeFalco et al. (2010), the “recruitment of *Y. brevifolia* is a slow process even without the impediments introduced by accelerated fire-return intervals.” And with such accelerated return intervals it may be impossible: “The return of *Y. brevifolia* to prefire densities and demographic structure may take decades to centuries or be entirely unlikely, especially in light of potential changes to regional desert climate in combination with plant invasions and the potential for recurrence of subsequent fires” (Reynolds et al. 2012).

5.3.2 Increasing wildfire frequency and intensity in the Mojave

Large fires have been historically infrequent in Joshua tree woodlands, and the recent increase in fire size and frequency is partially due to invasion of exotic grasses, principally *Bromus* spp. and *Schismus* spp. (Brooks and Matchett, 2006; Vamstad and Rotenberry 2010; Klinger and Brooks 2017; Syphard et al. 2017; Brooks et al. 2018; Maloney et al. 2019).

Winters with relatively high amounts of precipitation produce an increase in biomass of native and especially non-native annual plants sufficient to carry fire in invaded habitats. The most dramatic changes have occurred in middle elevation shrublands dominated by creosote bush, blackbrush and Joshua trees. This zone is more susceptible than other areas of the Mojave Desert to increased fire size following years of high rainfall (Brooks and Matchett 2006).

The increase in fine, flashy fuel biomass from exotic plant species has increased the fire potential of these habitats sufficiently to allow for more frequent large fires than were carried by native vegetation alone (Brooks and Matchett 2006; Vamstad and Rotenberry 2010). The exotic grasses are of particular concern as they can form a continuous fuelbed for fire well into the hot, dry summer months and tend to not disarticulate as quickly as the native annual plants. While annuals, desiccated upright *Bromus* stems can be found on the landscape upwards of three years after senescence (Jurand and Abella 2013) and *Schismus* remnants can persist as fuel on the landscape for over a year (Brooks et al. 2018). Increased cover of invasive annual grass increases both the chance of a fire igniting and facilitates fire spread. This can both decrease the

time interval between the previous and subsequent fire as well as the extent of burning (Klinger and Brooks 2017).

Several recent reviews have documented fire frequency and extent in the Mojave over the past century (Tagestad et al. 2016; Syphard et al. 2017; Brooks et al. 2018). Each of these studies recognized that precipitation was a primary driver of fire frequency and extent, with wetter periods fostering the growth of invasive grasses which carry fire, and drier periods leading to fewer and smaller fires. Tagestad et al. (2016) summarized both short and long-term impacts of precipitation variation.

Long-term drought or above-average precipitation periods can have landscape-scale effects on the health and distribution of perennial plant species and the frequency and size of fires. Short-term increases in winter and summer precipitation can have an even greater effect on the likelihood of fire. High winter precipitation creates ephemeral flushes of herbaceous biomass resulting in continuous fuelbeds that promote the spread of fire. High summer precipitation brings thunderstorms with accompanying lightning and high winds which contribute to the ignition and spread of fires. Cumulative years of higher than normal precipitation also appear to have an effect on the potential for fire. This is especially a concern in areas invaded by annual grasses which exhibit a profound response to increased cool-season precipitation (internal citations omitted).

Particularly worrisome is that a sequence of wet years can lead to enormous fires, such as happened throughout the Mojave, including in the range of *Y. brevifolia* in 2005:

The 2005 Mojave Desert fire season, which burned an area equal to 132% of the total area that burned during the previous 25 years, was preceded by three extremely high precipitation years, suggesting that multiple years of high precipitation can have a cumulative effect on the accumulation of fuels (Tagestad et al. 2016).

According to Brooks et al. (2018), accounts by agency fire managers of the 2005 fires “indicate that these fires exhibited extreme fire behavior not previously observed in the Mojave Desert,” and they attributed this largely to continuous cover of taller than average red brome in the burn areas.

One consistent finding of recent California Desert fire studies is that fires are not evenly distributed by ecological zone or area, but that mid-elevation areas (the zone predominately occupied by Joshua trees) are particularly susceptible. Brooks et al. (2018) found, based upon fire data from 1972 to 2007, that “although fire occurrence across large parts of the warm deserts may be relatively low, they can be much higher and pose significant land management challenges in localized areas. The majority of fire area in the Mojave section of California occurred in the middle-elevation zone.” Brooks et al. (2018) also noted that in “the middle elevations of the Mojave Desert there was also evidence of a significant increase in annual fire area.”

Tagestad et al. (2016) similarly observed that between “1976 and 2010 there were 227 fires

in the Mojave Desert greater than 405 ha (1000 acres). These fires burned a total of 758,477 ha (1,874,230 acres) with most of the burned area occurring in the middle elevation zones receiving sufficient precipitation for growth of fuels.” Notably, blackbrush, a critical nurse plant for Joshua tree seedlings, experienced exceptional rates of burning, as “areas identified as historical blackbrush communities have experienced more multiple fires than all the other communities combined.”

Brooks et al. (2018) also found that fires in the California Desert “are clustered in regional hot spots where they are more frequent and burn more proportional area than desert-wide averages. These areas all occur in the Mojave ecological section, with one hot spot at the ecotone with the Colorado section in the vicinity of Joshua Tree National Park.” A recent mapping effort by Syphard et al. (2017) clearly shows that a disproportionate number of fires, including large fires, occur in the western Mojave range of *Y. brevifolia* (Figure 12).

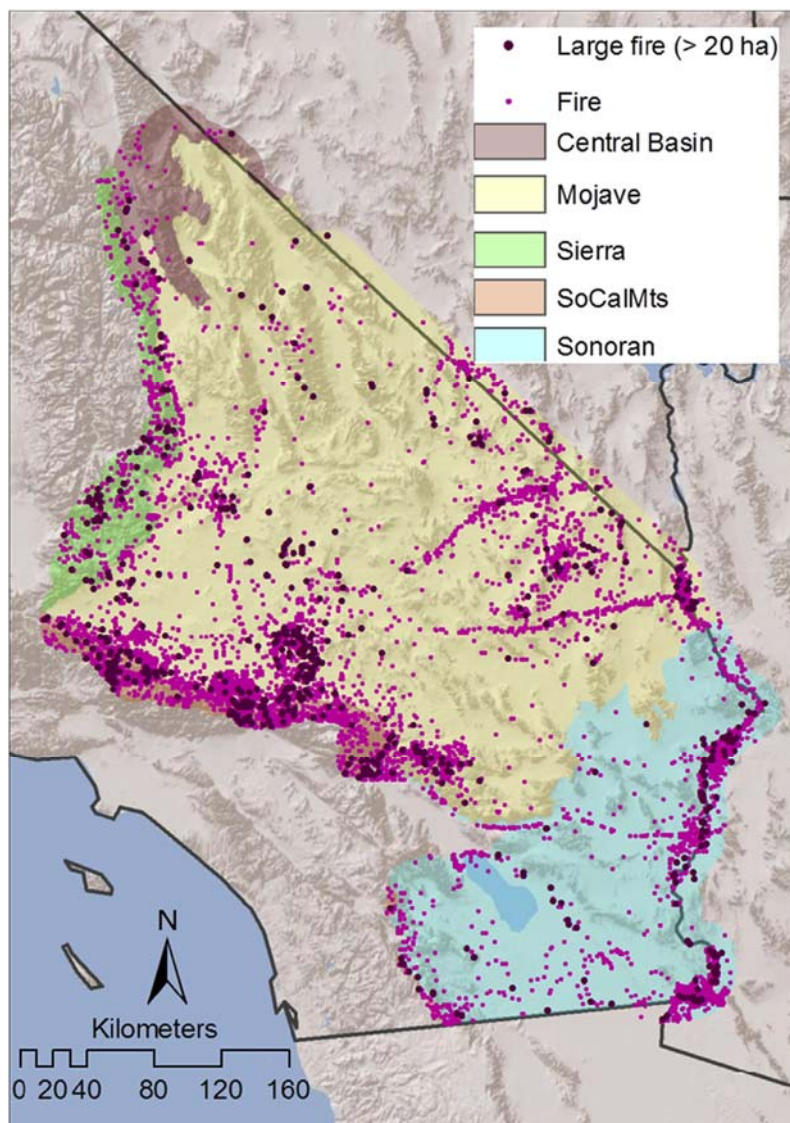

Figure 12. Fire occurrence between 1990-2010 in California Desert. Source: Syphard et al. (2019).

Fires in the Mojave are started by a mix of accidental and intentional human activities as well as lightening. Lightning frequency is higher in the desert than in any other California bioregion and is a significant source of fire (Brooks et al. 2018). Various studies have looked at the relationship of human caused versus lightening fires. One study found that the significant increase in fire frequency in the Mojave from 1980 to 1995 was associated with increased numbers of fires caused by humans, with the number of lightning-caused fires remaining constant. Although most human fires were small and started along roadsides, the less frequent large fires typically occurred in remote areas far from major roads and were started by lightning (Brooks et al. 2018). The influence of roads on fire ignitions is such that the outlines of Interstate Highways 5 and 40 can be discerned by the fire patterns reflected in the map in Figure 12.

Hopkins (2018), using data from Short (2017), tallied approximately 10,000 fires in the California desert from 1992 to 2015, and found that lightning accounted for only 10% of the fires, but 40% of the fires that burned more than 500 acres. Of the 90% that were human caused, equipment use was responsible for 22%, arson 8%, children 6%, smoking 5%, debris burning 5%, campfires 4%, and most of the remainder to unspecified miscellaneous causes.

A recent comprehensive analysis of fire records in the California Desert found that in “the Mojave, powerlines and other types of energy infrastructure (oil and gas wells, wind turbines, and power plants) were the most important anthropogenic land use contributors to large fires” (Syphard et al. 2017). The relationship between development and fire is also significant, with Syphard et al. (2019) warning that “[w]ith more fires occurring in close proximity to human infrastructure, there may also be devastating ecological impacts if development continues to grow farther into wildland vegetation.”

Fire fueled by invasive grasses is already significantly affecting Joshua tree woodlands. As Holmgren et al. (2010) summarized regarding conditions in Joshua Tree National Park (JTNP),

With each subsequent fire the native plants vanish but these invasive grasses thicken and expand, fuelling ever larger and more frequent wildfires, inducing what has been called the ‘grass–fire cycle’. Prior to 1965, fire records at the park suggest that most lightning-caused fires, which happened in May through September, seldom spread more than a few tens of metres from the strike... [*B. rubens*] spread dramatically and began fuelling large fires in both the Mojave and Sonoran Deserts. At JTNP, fires measuring in the thousands of acres burned in 1979, 1995, 1999 and 2006. The increase in fire size and frequency could transform JTNP vegetation in a matter of decades.

The specific impacts of more frequent and intense fire on Joshua trees themselves are also significant. Esque et al. (2015) described these impacts:

Recent increases in fire frequency caused by invasive species throughout the range of *Y. brevifolia* have also affected all life stages of the species, and survival from intense fires is low even among large individuals. The impact of fire on seedling and juvenile survival is particularly exacerbated because fires tend to track the same

heavy precipitation years that are most suitable for *Y. brevifolia* seedling emergence (internal citations omitted).

Perhaps most importantly, areas identified as potential late-century climate refugia for *Y. brevifolia* are particularly vulnerable to fire, with over a third of the area identified as refugia by Barrows and Murphy-Mariscal (2012) burned between 1967 and 2012, and half the refugia identified under a moderate warming scenario by Sweet et al. (2019) burned as of 2018 (Figure 13).

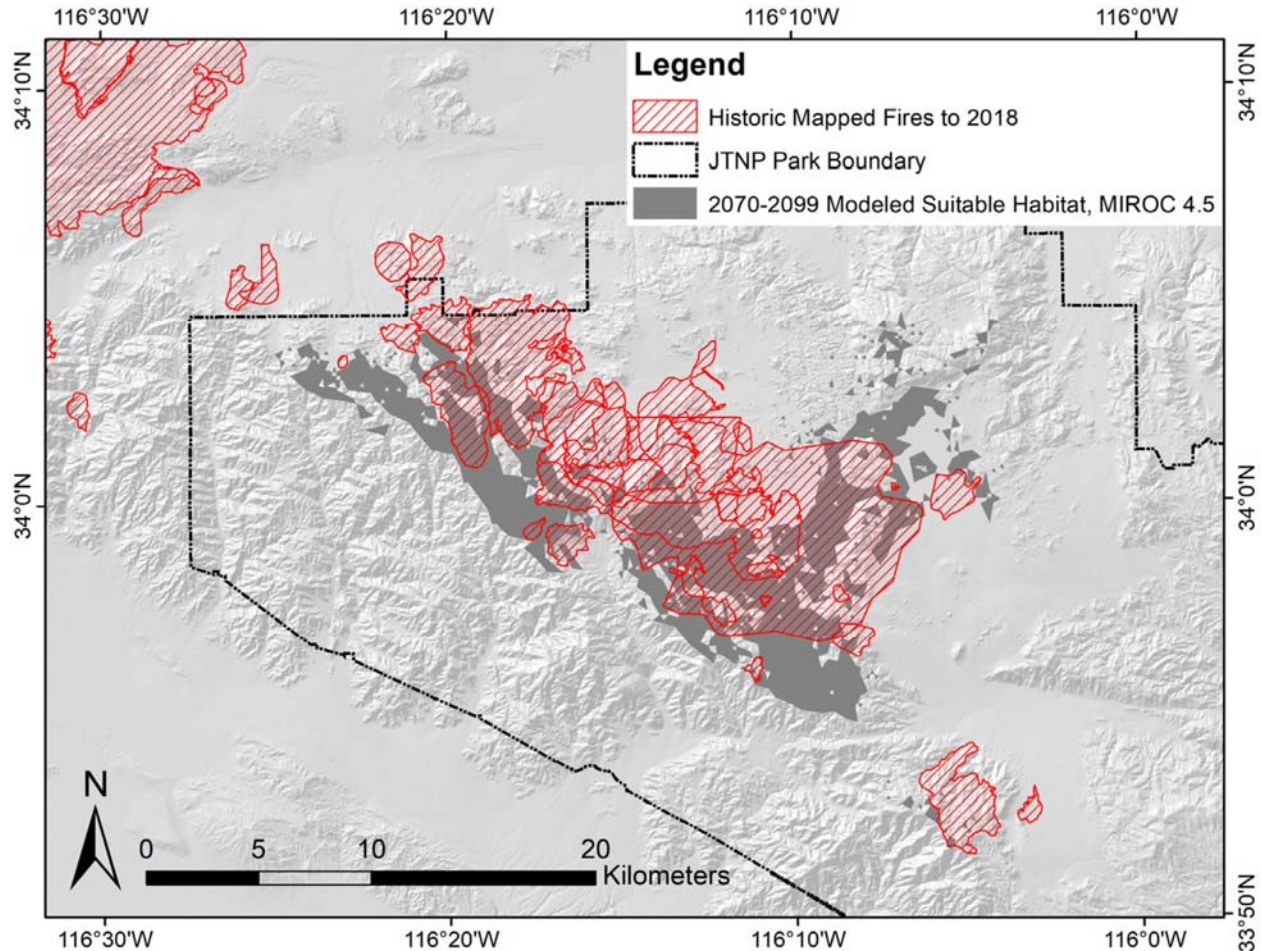

Figure 13. Historic fires in JTNP through 2018 in relation to modeled Joshua tree suitable habitat under a moderate warming scenario. Source: Sweet et al. (2019).

In sum, Joshua tree woodlands are generally not adapted to fire, and recover slowly, if at all (Abella et al. 2009; DeFalco et al. 2010; Vamstad and Rotenberry 2010; Brooks et al. 2018). Moreover, as noted by DeFalco et al. (2010), “the slower decline in survival for burned *Y. brevifolia* at the more mesic, high-elevation sites underscores the importance of postfire climate conditions on defining the demographic structure of recovering *Y. brevifolia* populations.” As discussed *infra*, a rapidly changing climate with greater heat stress and more intense droughts will make postfire recovery increasingly unlikely; and as fire increases in frequency and/or intensity, it will threaten the continued viability of ever-shrinking populations of *Y. brevifolia*.

5.4 Climate Change

Climate change represents the single greatest threat to the continued existence of *Yucca brevifolia*. Even under the most optimistic climate scenarios, western Joshua trees will be eliminated from significant portions of their range by the end of the century; under warming scenarios consistent with current domestic and global emissions trajectories, the species will likely be close to being functionally extinct in the wild in California by century's end (Dole et al. 2003; Cole et al. 2011; Sweet et al. 2019).

5.4.1 Current and projected climate change in the range of *Y. brevifolia*

A strong, international scientific consensus has established that human-caused climate change is causing widespread harms to human society and natural systems, and climate change threats are becoming increasingly dangerous. In a 2018 *Special Report on Global Warming of 1.5°C* from the Intergovernmental Panel on Climate Change (IPCC), the leading international scientific body for the assessment of climate change, describes the devastating harms that would occur at 2°C warming above pre-industrial levels, highlighting the necessity of limiting warming to 1.5°C to avoid catastrophic impacts to people and life on Earth (IPCC 2018). Average global temperature has already risen approximately 1°C (IPCC 2018).

In addition to warming, many other aspects of global climate are changing. Thousands of studies conducted by researchers around the world have documented changes in surface, atmospheric, and oceanic temperatures; melting glaciers; diminishing snow cover; shrinking sea ice; rising sea levels; ocean acidification; and increasing atmospheric water vapor (USGCRP 2017).

Climate change is increasing stress on species and ecosystems, causing changes in distribution, phenology, physiology, vital rates, genetics, ecosystem structure and processes, and increasing species extinction risk (Warren et al. 2011). A 2016 analysis found that climate-related local extinctions are already widespread and have occurred in hundreds of species, including almost half of the 976 species surveyed (Wiens 2016). A 2016 meta-analysis reported that climate change is already impacting 82% of key ecological processes that form the foundation of healthy ecosystems and on which humans depend for basic needs (Scheffers et al. 2016). The Mojave Desert in which the Joshua tree resides has already experienced many of these impacts, with, for example, bird occupancy and site-level species richness declining by about 50% over the past century (Iknayan and Beissinger 2018), and this decline linked to water stress related to increased cooling needs (Riddell et al. 2019).

Deserts have warmed and dried more rapidly over the last 50 years than other ecoregions, both globally and in the contiguous United States (USGCRP 2017). According to California's Fourth Climate Change Assessment: Inland Deserts Summary Report (Hopkins 2018), the California Desert has already experienced significant warming. Over the second half of the 20th century, daily maximum temperatures warmed by 0.4-0.7°F [0.22-0.39°C], comparing 1976-2005 with 1961-1990, and daily minimum temperatures warmed by 0.3-0.6 °F [0.17-0.33°C] over the same period.

Other studies have documented even greater warming in the range of the Joshua tree. The Washington Post, using NASA and NOAA county-level temperature datasets from 1895 to 2018, demonstrated that many areas of the United States have already had temperature increases well above the global average (Mufson et al. 2019).¹⁵ The four California counties in which *Y. brevifolia* occurs — San Bernardino, Los Angeles, Kern and Inyo — have already experienced average annual temperature increases of 1.9, 2.3, 1.7 and 2.3°C respectively.

Hopkins (2018) projects that daily maximum temperatures will increase by 5-6°F [2.8-3.3°C] for 2006-2039, by 6-10°F [3.3-5.6°C] for 2040-2069, and 8-14°F [4.4-7.8°C] for 2070-2100 on average for the region, with ranges depending on future greenhouse gas emissions (RCP 4.5 and RCP 8.5 scenarios). By the end of the century, the hottest day of the year is projected to rise by at least 6°F [3.3°C], and up to 9°F [5°C] on average. Extremely hot days, defined as temperatures >95°F [35°C], averaged 90 per year in the Mojave during the 1981-2000 period, and will increase to up to 141 days by the end of the century under RCP 8.5.

While temperature projections for the Mojave are unidirectional (it will be a lot hotter), precipitation projections are more complicated and divergent. For the suite of downscaled climate models used by Hopkins (2018), there is little projected change in average rainfall each year to the end of the century (<10%), even under different emissions scenarios. However, these projections show an increase in interannual variability, with reductions in minimum annual precipitation of up to 50% and increases in maximum annual precipitation of 40-65% by the end of the century, as well as an increase of winter precipitation (falling mainly in December, January, and February).

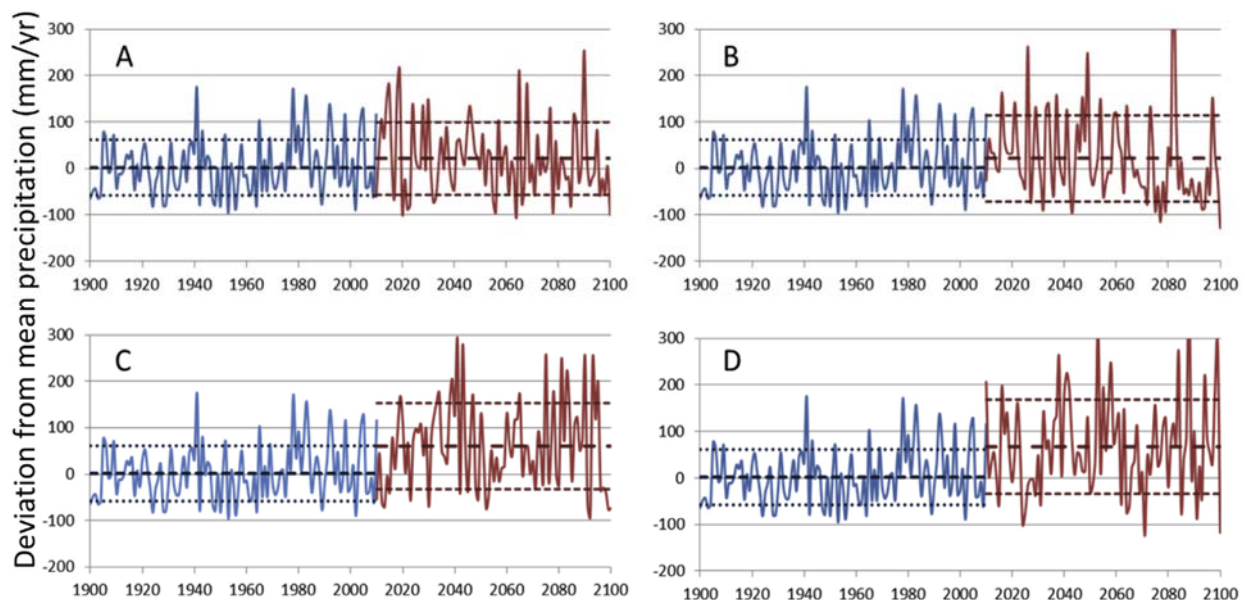

Figure 14: Plot of future modeled and historic precipitation in the Mojave Desert from global climate model/scenarios: A) GFDL/B1, B) GFDL/A2, C) IPSL/B1 and D) IPSL/A2. Source: Tagestad et al. (2016).

¹⁵ Available at <https://www.washingtonpost.com/graphics/2019/national/climate-environment/climate-change-america/>

Tagestad et al. (2016) came to similar conclusions, noting that “recent analysis of regional climate models over southwest North America indicate increased winter precipitation in the future within the Mojave ecoregion.” Tagestad et al. (2016), using climate models that best matched historic annual and seasonal precipitation records in the Mojave (GFDL_CM2.1 and IPSL_CM4), found that average annual precipitation is predicted to be higher than the historical average, although with greater annual and decadal variation, that there would be numerous, extended periods of high precipitation (Figure 14), and due to the invasive grass fueled link between winter precipitation and fire, concluded that “fire will be more prevalent in the Mojave Desert for many periods during the next century.”

In sum, average annual temperatures in the range of *Y. brevifolia* have already increased well over 1.5°C (Mufson et al. 2019), and daily maximum temperatures over the remainder of the 21st century under current emissions trajectories will increase by over 7°C (Hopkins 2018). Precipitation will increase in variability, with more extreme and prolonged droughts, while an overall increase in winter precipitation will foster more growth of invasive grasses, leading to more frequent and more intense fire (Hopkins 2018; Tagestad et al. 2016). Given Joshua trees are already suffering from the warming that has occurred to date, these additional changes pose a significant threat to the persistence of *Y. brevifolia* in California.

5.4.2 Climate change impacts on Joshua trees

Researchers have been raising the alarm about threats to the Joshua trees for decades. More than half a century ago, Webber (1953) stated of the species that “[r]egardless of the present wide distribution and large concentration of yuccas, its future appears very dim. This gloomy outlook is mainly due to the plant’s failure to reproduce and its destruction by man.” In 2000, Loik et al. (2000a) raised the specter of climate change, predicting that “[c]hanges in the local climate due to anthropogenic greenhouse gases may cause warming of the microclimate near the soil surface thereby precluding the future establishment of *Yucca brevifolia*.” A year later, Lenz (2001) noted that “Joshua trees in many areas appear physically stressed in all probability due to less than optimum growing conditions,” and speculated that “depending upon the intensity and duration of global warming its long-range survival may depend upon the availability of a refugium.”

Over the past 20 years, modeling of Joshua tree future distribution in a warming climate has become more sophisticated, has used more accurate and comprehensive distribution data, has produced projections at ever-finer spatial scales and has increasingly used field data to validate model performance. And while model projections of potential range expansion have varied greatly and have not distinguished between *Y. brevifolia* and *Y. jaegeriana*, every published modeling effort has predicted range contractions along the western edge of the Joshua tree’s range in California, which largely corresponds to the range of *Y. brevifolia* in the state. A review of these studies demonstrates that *Y. brevifolia* will face massive range contractions within the foreseeable future that threaten the continued viability of the species.

Thompson et al. (1998) published the first modeled projection of the future range of Joshua trees under changing climate conditions. Using data on temperatures and precipitation levels where the species is currently found, Thompson et al. (1998) calculated that Joshua tree potential

future habitat under doubled CO₂ conditions was almost 8-fold greater than present habitat, extending as far north as Washington state, south into Mexico and east into Texas. The modeling effort predicted retraction of range along its western edge in California. This study, which dealt with 16 different tree species, did not analyze other habitat variables or dispersal ability and used a model that poorly matched the current distribution of the species (e.g. the model predicted presence in the Coast Ranges under then current climate conditions).

Shafer et al. (2001) carried out a similar modeling effort looking at the future range of Joshua trees, finding that “[u]nder each of the future climate scenarios, its simulated potential range is fragmented and displaced northward and eastward.” The Shafer et al. (2001) study addressed 15 different species of trees, used three climate variables (mean temperature of the coldest month, growing degree days, and a moisture index) and a 25-km grid scale.¹⁶ Consequently, the results are course, but still roughly consistent with later modeling efforts (e.g. Cole et al. 2011), and most notably show almost complete extirpation of the species from California (Figure 15). The projected potential expanded range extending into northern Nevada and Utah as well as Washington state does not account for how the species might disperse into these new areas of potential habitat.

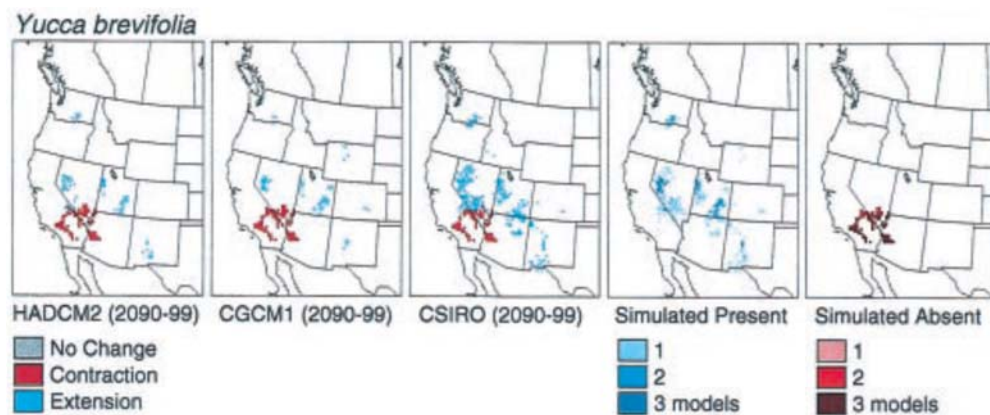

Figure 15: Modeled future range of Joshua Trees. Source: Shafer et al. (2001).

Dole et al. (2003) subsequently modeled future range for Joshua trees in a doubled CO₂ world, finding that “a considerable portion of the current range of *Y. brevifolia* will become climatically unfavorable for this species, but that significant amounts of new habitat may become available.” While Dole et al. (2003) did not take dispersal into account in the modeling, they noted that it would be a factor in real-world application, and in “the worst-case scenario, *Y. brevifolia* will migrate too slowly to fill potential new habitat, while much of its current range will become climatically unfavorable.”

Dole et al. (2003) also noted a further potential limitation in the model which assumed “the distribution of *Y. brevifolia* is in equilibrium with current climate.” Significant subsequent research (e.g. Barrows and Murphy-Mariscal 2012; Harrower and Gilbert 2018; Sweet et al.

¹⁶ The current distribution data used to develop the model in Shafer et al. (2001) is also questionable as the paper states “*Yucca brevifolia* (Joshua tree) is found in the deserts of the southwest US and northwest Mexico.” The species has likely been absent from Mexico for thousands of years (Cole et al. 2011).

2019) has confirmed that at least in the southern part of its range, current climate conditions are already deleterious to Joshua tree survival and/or reproduction. Notwithstanding these model limitations, which almost certainly overestimate projected future habitat, modeled habitat loss is roughly congruent with the key results of Shafer et al. (2001) and Cole et al. (2011), with the species disappearing from 76% of its current range. Notably, much of the new area deemed climatically suitable for *Y. brevifolia* in California is developed agricultural land in the San Joaquin Valley and therefore highly unlikely to ever actually be occupied by the species.¹⁷

Figure 16: Modeled future range of Joshua Trees. Pink is lost range, green is maintained range and blue is expanded range. Source: Dole et al. (2003).

Cole et al. (2011) built a sophisticated species distribution model with climate and habitat variables derived from a comprehensive dataset of presence/absence data throughout the current range of the Joshua tree. Late Pleistocene and Holocene records were also compiled to generate a map of past distribution of the species. The study differed from previous models in its use of actual specific data points for presence and habitat variables for the species and the testing of the models to simulate the current range of the species.

Construction of an independent test data set of Joshua tree current presence and absence allowed the evaluation of multiple suitable climate models for Joshua tree. Model concordance was found to increase with the inclusion of measures of monthly temperature variability (maximum and minimum rather than just mean), finer spatial scale (~1 km rather than ~4 km), and applying a 40-year mid-20th-century baseline (1930–1969) climate rather than a 30-year late-20th century baseline (1970–1999).¹⁸

¹⁷ Dole et al. (2003) also modeled the impact of doubled CO₂ concentrations on the physiology of Joshua trees given there is some evidence that certain plant species are more resistant to freezing in high CO₂ conditions. Such modeling showed a 14% increase in projected new habitat and a slight increase (from 24% to 29%) of current habitat areas that would remain suitable. However, the authors recognized that the impacts of CO₂ induced warming were more significant than the physiological effects of CO₂ itself.

¹⁸ Cole et al. (2011) selected 1930 to 1969 as their climatic baseline period “because evidence suggests that Joshua tree recruitment was greater during this interval than during the latter part of the 20th century. For instance, survey results show minimal to no recent Joshua tree recruitment within the southern Mojave Desert in recent years, and

The methodology of Cole et al. (2011) consequently address many of the shortcomings of climate niche models that have been raised by some (Pearson and Dawson 2003; Fitzpatrick and Hargrove 2009).

All of the individual climate models, as well as an ensemble of 22 global circulation models (GCMs) utilized by Cole et al. (2011), project a severe (~90%) decline in the area of suitable climates for Joshua trees by 2070 to 2099, as the southern parts of its range becomes climatically unsuitable.

Cole et al. (2011) also modeled areas where the species could potentially naturally expand its range in the future, as well as areas that might be suitable for relocation or assisted migration (Figure 17).

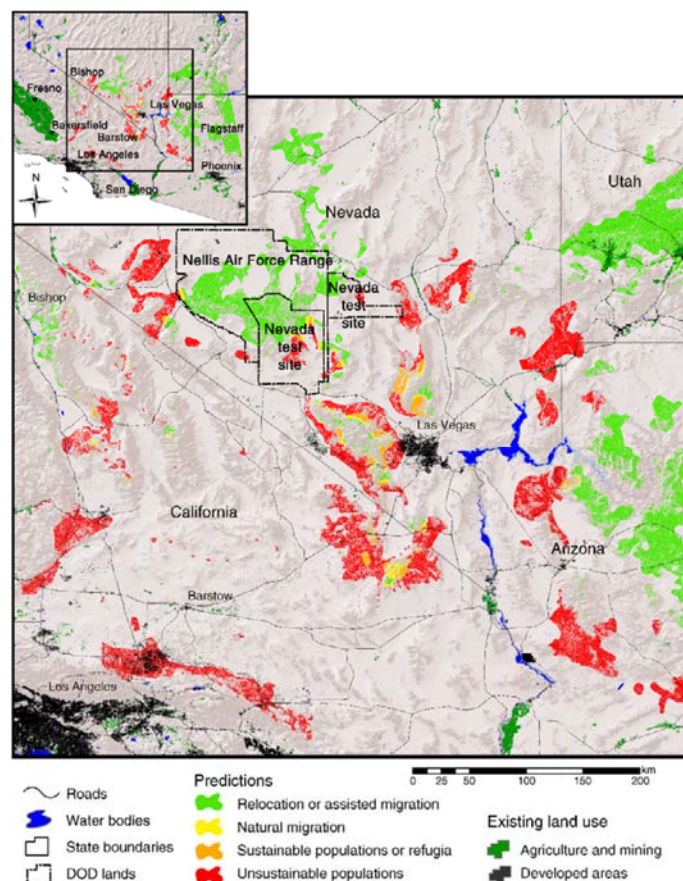

Figure 17. Areas with existing Joshua tree populations where a majority of the models used by Cole et al. (2011) predict future climates unsuitable for survival (red); current populations with future climates favorable for Joshua tree persistence (orange); areas within 2 km of current populations with future favorable climates and suitable substrates where natural migration could possibly occur (yellow); and protected areas with future favorable climates and suitable substrates where assisted migration might be possible (green). Source: Cole et al. (2011)

Joshua trees tall enough to be tallied in recent vegetation plots likely became established during this 1930–1969 interval or before.”

In determining potential natural expansion areas, Cole et al. (2011) looked at rates of migration discernable from paleontological data as well as from modern studies of seed dispersal by rodents. Such data reveals minimal actual northward range shift over the Holocene, corresponding to a migration rate of 2 meters a year. Similar migration rates could be calculated based on studies of rodent seed caching activity and Joshua tree generation time. Cole et al. (2011) postulated that their results “suggest that the species migrational capacities have been ineffective following the extinction of Pleistocene megaherbivores that may have acted as seed vectors, especially the Shasta ground sloth.” Given a 2-meters a year range expansion would total less than 200 meters by century’s end and would be largely invisible in any mapping effort, Cole et al. (2011) used “a generous estimate of potential natural migration of 2 km over the next 60 to 90 years” to designate areas of potential natural migration. This suggests that the colonization of mapped areas of natural migration might in fact also require assisted migration to occur in a meaningful timeframe.

Cole et al. (2011) summed up the relationship between the Joshua tree’s past, its present limited present dispersal abilities, and future projections to highlight the severe range contraction in will undergo in the coming decades.

As climate rapidly warmed at the start of the Holocene, the widely dispersed range of Joshua tree severely contracted from the south, leaving only the populations near what had been its northernmost limit. The Holocene and recent history of Joshua tree suggests that its migrational capacity may be severely limited. Its ability to spread northward into new suitable habitats during the Holocene may have been inhibited by the somewhat earlier extinction of its primary megafaunal dispersers, especially the Shasta ground sloth. Because GCM models project a climate warming of a similar pace and magnitude to that of the early Holocene over the next 60 to 90 years, Joshua tree could undergo a similar decline in its southernmost populations to that of the early Holocene.

Cole et al. (2011) do not predict the complete extirpation of Joshua trees from their current range, noting that the “results predict the survival of some natural Joshua tree populations throughout the next century, but most will be greatly reduced in area.” Importantly, because the authors modeled the Joshua tree present and future distribution as a single species, they did not distinguish between *Y. brevifolia* and *Y. jaegeriana*. From their mapping however, it appears that the majority of the areas for which Joshua trees are projected to persist are in the range of *Y. jaegeriana*. *Y. brevifolia* disappears almost entirely from its current range in California (Figure 17).¹⁹

¹⁹ A subsequent study by Notaro et al. (2012) included Joshua trees among 170 tree and shrub species for which they modeled projected range shifts by the end of the century. They noted that the projected northward shift of the species and decline in its southern range in response to warming was consistent with that described by Cole et al. (2011). However, unlike Cole et al. (2011), they did not consider dispersal ability in projecting range expansion and consequently concluded that the species would experience a “robust range expansion” of 143%. Importantly, their analysis was limited to the “Southwest United States” which did not include California. Consequently, regardless of other limitations of their analysis that may render the results suspect, the results shed no light on the future status of *Y. brevifolia* in California.

While the Cole et al. (2011) study looked at the future of Joshua trees throughout their range, Barrows and Murphy-Mariscal (2012) examined the status and fate of *Y. brevifolia* in Joshua Tree National Park (JTNP). The approach Barrows and Murphy-Mariscal (2012) took was one of niche modeling:

In lieu of local-scale predictions of how precipitation or temperature will shift, modeling the sensitivity of species to a gradient of climate change scenarios can provide insights as to potential effects of local-scale changes in temperature and precipitation. A useful tool in assessing species sensitivity to changing conditions is niche modeling which includes habitat variables, such as climate and terrain, in an attempt to assess the complex interaction of factors that constrain a species' distribution (internal citations omitted).

To assess the validity of the niche models, Barrows and Murphy-Mariscal (2012) used "citizen scientist" volunteers to collect Joshua tree recruitment data throughout their range in the park to determine whether modeled shifts in suitable habitat coupled with recent temperature increases approximate current demographic response patterns, specifically successful seedling recruitment. The key climate variable used was summer maximum temperature, which was changed incrementally by increasing mean maximum July temperature by 1°C, 2°C, and then 3°C.

Since the niche models were developed based on data of existing adult Joshua trees, the model projects the distribution of suitable habitat for the species when those individuals were recruited into the population, conditions when summer temperatures may have been up to 1°C cooler than current conditions. Shifting mean maximum summer temperatures upwards by 1°C, 2°C, and then 3°C resulted in modeled reductions in the extent of suitable habitat for Joshua trees of 30-35%, 66-78% and 90-98% respectively, depending upon the precipitation variables used.

The niche model Barrows and Murphy-Mariscal (2012) developed for juvenile Joshua trees (individuals 30 cm or less in height) based on their current distribution, resulted in a total suitable habitat area about half of that for adult trees. The juvenile model was a near match for the boundaries of the +1°C adult model. The match between the current juvenile model and the +1°C adult model provides some level of model validation consistent with the hypothesis that early levels of climate change may have already had an impact on Joshua tree recruitment. Put another way, adult Joshua trees in JTNP were recruited into the population under climate conditions where summer maximum temperature was approximately 1°C cooler than present; warming to date may not be fatal to established adult Joshua trees, but it has apparently already shrunk the area of suitable habitat for recruitment by half.²⁰

Barrows and Murphy-Mariscal (2012) contrasted their results to those of Dole et al. (2003)

²⁰ Barrows and Murphy-Mariscal (2012) noted that "we searched for but did not find any areas of non-fire related mortality of Joshua trees within JTNP." This seems at odds with DeFalco et al. (2010) who reported 26% mortality of unburned Joshua trees following drought in their study area in JTNP. A subsequent study by Harrower and Gilbert (2018) also documented significant non-fire mortality in the park, indicating that the current climate, at least at lower elevations, is already deleterious to adult Joshua trees.

and Cole et al. (2011), both of which indicated that similar expected levels of climate change would result in no suitable habitat for Joshua trees within the central or southern portions of their current distribution. Barrows and Murphy-Mariscal (2012) ascribed the differences as being due to the scales of analyses rather than differences in models or model assumptions, since finer-scale analysis can incorporate local adaptations as well as topographic-climate complexities that may provide refugia.

Barrows and Murphy-Mariscal (2012) declared their analysis “represents a more optimistic scenario than previously published models of climate change impacts on Joshua trees.” However, given their +3°C model found that Joshua tree range in the park could be curtailed by 90 to 98% and noted that red brome fueled wildfires could burn any remaining refugia, it is somewhat difficult to share their optimism. Moreover, Barrows and Murphy-Mariscal (2012) used a +3°C increase in summer maximum temperature as their “extreme” scenario, while Hopkins (2018) projects that summer maximum temperatures may hit that level before mid-century and may exceed +7°C by century’s end.

The most recent species distribution modeling effort for Joshua trees paints an even more concerning portrait of the species’ future. Sweet et al. (2019) sought to identify the existence and extent of potential climate refugia for *Yucca brevifolia* within JTNP. Similar to Barrows and Murphy-Mariscal (2012), this study developed species distribution models (SDMs) validated with field data:

By combining finer scale topographic and climate datasets, using more refined climate models and a more comprehensive set of Joshua tree location data, our objective was to construct SDMs to forecast this species’ response to multiple future climate scenarios. Then, with the aid of volunteer community scientists, we collected Joshua tree demographic data across their range within the park. We aimed to identify the existence and extent of potential Joshua tree climate refugia and validate this prediction using empirical demographic data on Joshua tree recruitment along a gradient that falls within and outside modeled refugia.

Sweet et al. (2019) used the species distribution modeling platform Maxent to develop relationships between Joshua tree presence points and a database of nine environmental variables including minimum and maximum temperature, precipitation, climatic water deficit (CWD), topography, and soil characteristics. They used the end-of-century (2070–2099) CMIP5 MIROC RCP 4.5, 6.0, and 8.5 emissions scenarios, representing CO₂ emissions under highly mitigated, moderately mitigated, and unmitigated scenarios, respectively. The results showed loss of the vast majority of *Y. brevifolia* suitable habitat under all scenarios. Under the RCP 4.5 and 6.0 scenarios, 18.6% and 13.9% of current occupied areas remained as refugia. However, under the RCP 8.5 scenario, which is closest to current emissions trajectories, suitable habitat was almost completely eliminated, with only 15 ha, or 0.02% remaining as refugia (Figure 18).

As with those identified by Barrows and Murphy-Mariscal (2012), the refugia identified by Sweet et al. (2019) are in areas of high fire risk, with the authors noting that the “areas mapped as Joshua tree refugia, which are found at higher elevation wetter areas, also tend to have the highest covers of invasive annual grasses.” Approximately half of the refugia mapped under the

RCP 4.5 scenario have already experienced fire in recent decades. As discussed *supra*, fire fueled by invasive grasses is a significant source of Joshua tree mortality and creates conditions that delay or preclude recruitment, and therefore has the potential to diminish the effectiveness of any climate refugia for the species.

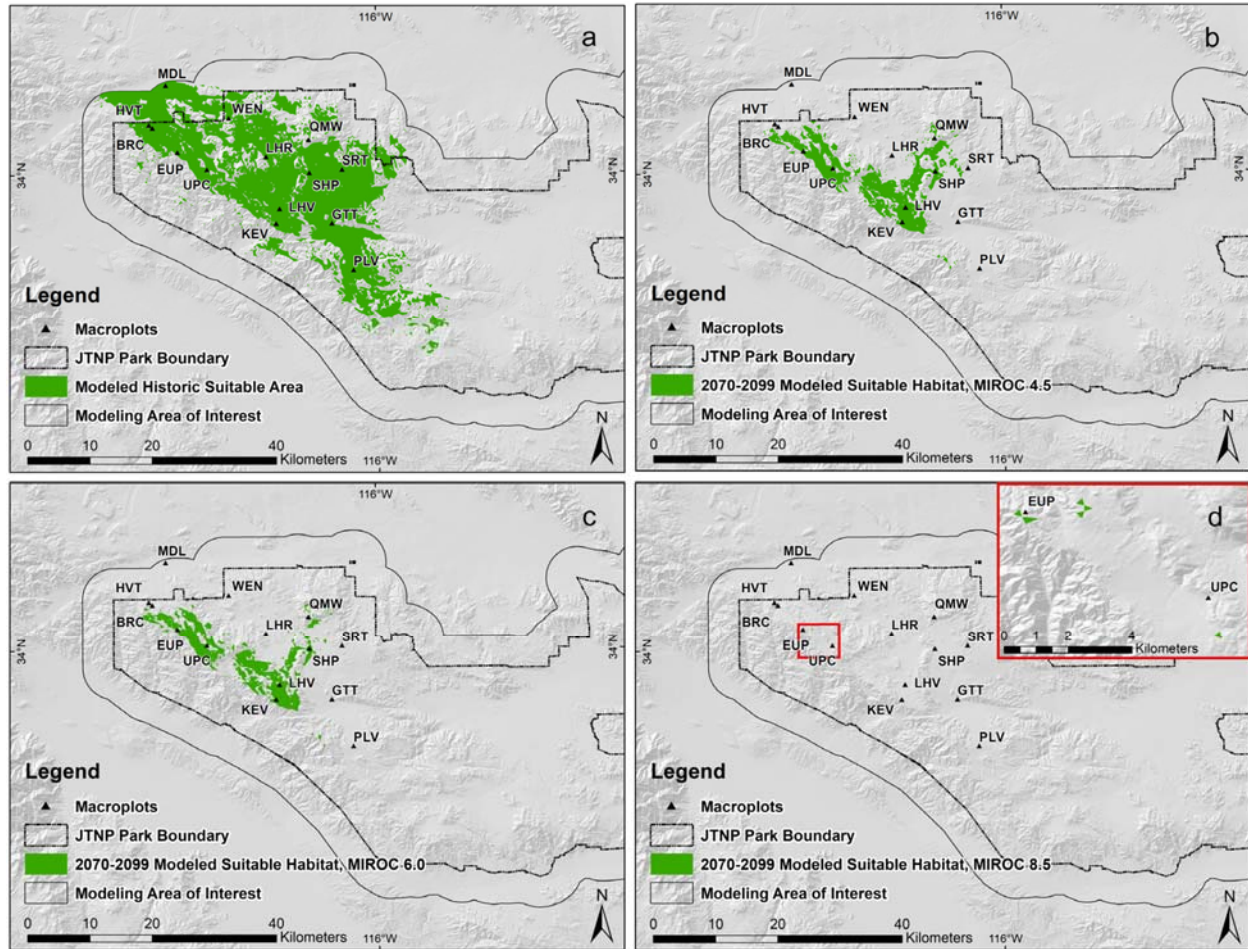

Figure 18: Map of historically suitable habitat (a) and end-of-century refugia for Joshua trees at JTNP. Modeled refugia are the area of overlap between current and future suitable habitat under 3 emission scenarios: RCP 4.5 (b), 6.0 (c), and 8.5 (d, with inset to display the modeled area). Source: Sweet et al. (2019).

The modeling results of Sweet et al. (2019) are similar to those of Barrows and Murphy-Mariscal (2012) in terms of overall trajectory and location of habitat loss in JTNP, but diverge in terms of how much area remains as refugia under their highest-warming scenarios. Barrows and Murphy-Mariscal (2012) projected between 2 and 10% of existing habitat would remain suitable in the park (916 to 4640 ha), while Sweet et al. (2019) projected only 0.02% would remain (15 ha). Sweet et al. (2019) ascribed the difference to finer scale habitat data, difference in climate scenarios used, and better and more dense information on Joshua tree presence. Put another way, the more detail we learn about the current status of Joshua trees, the bleaker their future appears.

Sweet et al. (2019) also used field data on distribution of juvenile trees (defined as smaller

than 60 cm) to validate their modeling results.²¹ They explained their rationale as follows:

Large, long-lived species, such as Joshua trees, have an advantage over short-lived species, as they can weather year-to-year variation and short-term droughts. Still, long-term persistence, especially over the time reflected in climate change estimates, depends on where and when species reproduce, recruit, and establish on a landscape. Other studies have found differences between the adult distribution and the distribution of juveniles or seedlings on the landscape. Since the establishment stage of trees and other perennial species is a vulnerable and important stage, the density of seedlings in a given area can provide early indications of future distribution shifts.

In order to study the future distribution of Joshua trees at JTNP, therefore, a field-based assessment of current recruitment patterns may be foretelling of changes in the population of Joshua trees on the landscape. Joshua tree annual survivorship is age- and precipitation-dependent; low precipitation levels have an inordinate negative impact on survivorship of smaller plants. With the levels of increased aridity that this region has already experienced, it follows that demographic shifts in Joshua trees should be apparent. The occurrence of young, healthy Joshua trees can therefore provide an empirical validation for modeled predictions of where climate refugia have already started to become established today (internal citations omitted).

Sweet et al. (2019) categorized 14 nine-hectare macroplots throughout the park that contained Joshua trees as high or low-recruiting depending on whether the density of documented juveniles was above or below the mean. They found that high-recruiting macroplots had significantly higher annual precipitation, and marginally significantly lower climatic water deficit and maximum summer temperature. Importantly, high-recruiting macroplots were geographically differentiated from low-recruiting macroplots in that they were located either within or significantly closer to predicted future refugia than low-recruiting macroplots. Moreover, when temperature and precipitation for refugia areas were plotted together with macroplots, there was considerable correspondence between the high-recruiting macroplots and the refugia. This result, which validated modeled predictions, was “not surprising—the factors that allow for recruitment (lower CWD, higher precipitation), especially in a desert environment, also differentiated, on a landscape scale, the areas supporting Joshua trees within the park.”

Studying the density of tree recruitment, Sweet et al. (2019) found early indications of a shift in Joshua tree recruitment and noted that “[i]f recruitment patterns portend the future distribution of adults on the landscape, this type of analysis allows a glimpse into changes that may occur even before those outlined in the modeled future scenarios.”

The Sweet et al. (2019) analysis was designed “to inform management with the most robust available predictions, focusing on areas where the species occurs already.” These “occupied climate refugia are most relevant to the conservation of the species for the next 50 yr, and perhaps longer.” Proper management and protection of these areas is critical the persistence

²¹ Barrows and Murphy-Mariscal (2012) also used juvenile distribution to validate their models but used a 30 cm rather than 60 cm cutoff to define “juveniles”.

of *Y. brevifolia*: “Since these refugia are also subject to threats such as fire and invasive species, management efforts aimed at reducing these threats provide on-the-ground actions that increase the likelihood that these areas will sustain this iconic species.” Management and recovery actions are further discussed *infra*.

The species distribution modeling studies discussed above individually and collectively lay out a compelling warning about the difficult future facing *Y. brevifolia* in California. Two of those studies also looked at field data and concluded that recruitment of Joshua trees was *already* being hampered by warming (Barrows and Murphy-Mariscal 2012; Sweet et al. 2019).

Additionally, multiple other field studies documenting the *current* impacts of warming, drought, invasive species, fire and other impacts on Joshua tree survival and recruitment reinforce the findings of these modeling efforts. The more recent of these studies have specifically looked at such impacts in the of context climate change (*e.g.* DeFalco et al. 2010 [fire, drought and herbivory]; Reynolds et al. 2012 [seed germination and recruitment]; Esque et al. 2015 [recruitment and juvenile growth]; Borchert and Defalco 2016 [reproduction, seed predation and dispersal]; Harrower and Gilbert 2018 [pollination]; St. Clair and Hoines 2018 [reproduction]). These studies and the documented impacts on *Y. brevifolia* are described in the sections on Reproduction, Abundance and Population Trends, and Factors Affecting Ability to Survive and Reproduce, *supra*.

Joshua tree persistence on the landscape is dependent not just on survival of Joshua trees themselves, but on successful recruitment, which is dependent upon their obligate pollinating moths, seed dispersing rodents and the presence of nurse plants. As summarized by Sweet et al. (2019), “[r]ecruitment, survival of populations, and certainly migration of the species will be affected by factors such as the availability of pollinators, dispersers, seed and seedling predators and other mutualisms on the landscape.” Climate change threatens to disrupt these essential relationships.

While multiple species can serve as its nurse plants, and a variety of rodents can act as seed dispersers, only a single species, *Tegeticula synthetica*, pollinates *Yucca brevifolia* in its California range (Pellmyr and Segraves 2003; Godsoe et al. 2008). And while clonal reproduction can prolong survival in certain locations and circumstances (DeFalco et al. 2010), ultimately long-term survival as a species likely requires the genetic diversity that sexual reproduction fosters (Harrower and Gilbert 2018). Consequently, the long-term viability of *Y. brevifolia* depends on maintaining its obligate mutualism relationship with *T. synthetica*.

A recent study by Harrower and Gilbert (2018) in JTNP sheds significant insight into the apparent fragility of the relationship between *Y. brevifolia* and *T. synthetica*. The authors succinctly lay out the problem:

Obligate mutualisms like the Joshua tree–yucca moth interaction are acutely sensitive to changes in climate. The interacting partners may respond differently, creating an asynchrony in species phenology that can lead to population decline and local extinction. Environmental changes that shift the outcome to fewer viable seeds or greater seed predation could be detrimental to both species. However, the climate

envelope within which this mutualism currently exists is narrow, and climate change effects in the Mojave Desert are expected to limit this envelope to only the highest elevations in Joshua Tree National Park (JTNP) within 90 yr, greatly reducing habitat with suitable climate and potentially extirpating the species from its namesake park (internal citations omitted).

Joshua trees are distributed across a 1200-m elevational range in JTNP from approximately 1000 m to 2200 m. Elevation gradients can serve as “natural experimental systems through systematic variation in abiotic and biotic factors,” and average daily summer temperature per site in the Harrower and Gilbert (2018) study declined steadily along the elevation gradient with the warmest site at 30.2°C and the coolest at 19.9°C. Harrower and Gilbert (2018) examined how the abundance of *Y. brevifolia* and *T. synthetica* varies by elevation and quantified how the outcome of the Joshua tree–yucca moth interaction shifts depending on the context of where it occurs and the impacts that may have on Joshua tree fitness.

The authors found a sharp dichotomy between intermediate elevation sites versus the highest and lowest sites. Tree abundance was highest at intermediate elevations, with a “marked peak at around 1250 m where the trees were numerous and large and produced many flowers; this peak coincided with a high abundance of moths, as well as high production of pods, seeds, fertile seeds, and seedlings that grew from seeds.” A positive relationship between moth abundance and successful sexual reproduction was found, with number of seedpods and fertile seeds per pod increasing with moth abundance. Moth abundance was significantly correlated with tree size, tree abundance, and number of flower panicles per tree, with larger trees having more panicles. These associations collectively indicate that reproductive success of both Joshua trees and yucca moths are greatest where the Joshua trees are abundant and vigorous, which currently is at intermediate elevations.

In stark contrast to intermediate elevation results, at the lowest and highest sites the number of dead Joshua trees peaked, while live trees were small and few and had few flowers, and no moths, seedpods, or seedlings were encountered. Reproduction was limited to clonal spread. Soil moisture was very low at the lower, warmer elevations and may have contributed to Joshua tree death. The authors noted that their observations were consistent with expectations from the models of Cole et al. (2011) and Barrows and Murphy-Mariscal (2012) and suggest that the range of Joshua trees is contracting at the lower elevations where there was no seedling recruitment and high tree mortality.

Harrower and Gilbert’s (2018) finding that at elevation extremes Joshua tree reproduction is almost exclusively clonal is consistent with previous accounts finding that Joshua tree clonality increases with elevation, but the lack of seedling recruitment and enhanced clonality at low elevations had not been previously reported. Trees produced flowers at both of the extremes, but no moths, fruit development, or seed set were observed in these areas. Consequently, the lack of seedlings could be explained by the lack of pollinators.

The presence of only clonal populations at the low and high ends of *Y. brevifolia* distribution has several very significant potential repercussions:

If trailing edge populations of (mostly clonal) Joshua trees are also those in the population that are best adapted to deal with the highest local temperatures, a lack of sexual outcrossing with populations at higher elevations could threaten overall species persistence due to reduced fitness of seedlings as the climate warms. Clones have reduced reproductive fitness, which could increase susceptibility to local extinction of the trees. The lack of pollinators, seed set, and seedlings at higher elevations suggests that Joshua trees are not currently expanding their range upslope (Harrower and Gilbert 2018) (internal citations omitted).

Harrower and Gilbert (2018) summarized the dilemma facing the *Y. brevifolia* and *T. synthetica* mutualism: “Joshua trees seem to be dying back at low elevations as predicted, but they do not seem to be moving successfully into higher elevations, where the mutualism is not successful.” Moths are absent at these higher elevations and it “remains to be seen if Joshua tree performance can improve at higher elevations and if it will be able to attract enough moths to successfully reproduce, or if moths can migrate to and survive at those locations.” Given “the survival of the species requires colonization of new habitats,” the current lack of a functioning pollination mutualism at the high elevation margins of the Joshua tree’s range raises serious doubts about the ability of the species to colonize new habitats, and ultimately to survive.²²

In sum, climate change represents an existential threat to *Y. brevifolia* in its California range. Even in the absence of climate change, the convergence of biotic and abiotic factors necessary for recruitment “results in successful establishment of new seedlings only a few times in a century” (Esque et al. 2015). Such recruitment has already largely stopped at the drier, lower limits of the species’ range (Barrows and Murphy-Mariscal 2012; Sweet et al. 2019). Prolonged droughts, which are projected to occur with greater frequency and intensity over the coming decades (Hopkins 2018), will not only preclude recruitment across ever-greater areas of the species’ range, but will lead to higher adult mortality, either directly due to temperature and moisture stress or indirectly due to increased herbivory from hungry rodents lacking alternative forage (DeFalco et al. 2010; Harrower and Gilbert 2018). Whether or not the species’ pollinating moth will be able to keep pace with a changing climate is highly-questionable (Harrower and Gilbert 2018). The Joshua tree’s ability to colonize new habitat at higher elevations or latitudes is extremely limited and no such range expansion is yet occurring, even as the lower elevation and southern edge of its range is already contracting (Cole et al. 2011; Harrower and Gilbert 2018). And there is no safe refuge, as the higher elevation areas in which Joshua trees are projected to best be able to survive increasing temperatures and drying conditions are at great risk of fire due to the prevalence of invasive grasses (Barrows and Murphy-Mariscal 2012; Sweet et al. 2019). Absent rapid and substantial reductions in GHG emissions *and* protection of habitat, the species will likely be extirpated from all or most of California by the end of the century.

²² Interestingly, certain higher elevation areas (but not the highest elevations) had the highest density of trees in the study, but very low moth abundance. These higher elevation sites were dominated by trees reproducing asexually. It is not clear whether moths are unable to thrive at these higher elevations or if the low numbers of flowers meant that location was unable to attract or support the moths. Harrower and Gilbert (2018) postulated that this elevation range, from 1500 to 1600 m, “where trees thrive but moths do not, may be an important transition zone for future work on the details of the Joshua tree–yucca moth climate mismatch.”

5.5 Habitat Loss to Development

While the overall outlook for *Y. brevifolia* is grim, the species has an advantage over many other climate-threatened species in that much of its habitat is at least nominally protected from other impacts. Its southernmost population is within the national park that bears its name, while some of its northernmost populations are in Death Valley National Park. As described in the Distribution section *supra*, YUBR North is 96% federal land, while, YUBR South is 48% federal land. Nevertheless, development presents a substantial threat to the species in a significant portion of its range.

Of the two *Y. brevifolia* populations, YUBR South has been the most impacted by human development and faces the greatest threats in its future. Over 50% of the land area comprising the habitat for this population is privately owned (USFWS 2018). The cities and towns of Apple Valley, Hesperia, Lancaster, Palmdale, Ridgecrest, Victorville, and Yucca Valley, along with many other smaller communities have been built in Joshua tree habitat in the YUBR South area. In recent decades these areas have grown rapidly, with the populations of Lancaster, Palmdale and Apple Valley all growing by approximately 36% between 2000 and 2018, Yucca Valley growing by 29.5% and Victorville by a staggering 93% during that same time period (SCAG 2019).

Human population growth in these areas and consequent loss of Joshua tree woodlands is expected to continue in the coming decades. The USFWS (2018), using the EPA's Integrated Climate and Land-Use Scenarios (ICLUS) modeling tool to predict future housing density growth in the range of the Joshua Tree, estimated that 41.6% of suitable habitat for *Y. brevifolia* in the YUBR South area would be lost to housing development by 2095 (Figure 19).²³ When combined with YUBR North, about a third of Joshua tree habitat would be lost for the species in California. Importantly, the ICLUS modeling done by USFWS only looks at housing density, not industrial, military or other development so likely represents an underestimate of development impacts.

In addition to urban growth, various other forms of development threaten Joshua tree habitat in California, including roads, highways, transmission lines, industrial facilities and large and small-scale renewable energy projects. While many of these impacts have been poorly quantified to date, according to USFWS (2018), renewable energy development has already resulted in the loss of 1.2% of mapped *Y. brevifolia* habitat, equating to about 68,000 acres. However, given USFWS included Nevada habitat in this calculation, while virtually all of the large-scale renewable energy development in the range of the species is in the YUBR South area, the actual total in California is likely closer to 2% of habitat lost to date. Under the Desert Renewable Energy Conservation Plan (DRECP) amendments to the California Desert Conservation Area (CDCA) Plan, of the 388,000 acres of development focus areas on BLM land subject to a streamlined review process to facilitate renewable energy development, approximately 50,000 acres fall within the mapped distribution for *Y. brevifolia* (USFWS 2018),

²³ In using the ICLUS model, USFWS (2018) ran development scenarios consistent with IPCC B1 and A2 climate scenarios. The 41.6% projection is from the A2 scenario which most closely matches current emissions trajectories. Under the lower-growth B1 scenario, 21.7% of YUBR South suitable habitat would be lost to housing development.

equating to more than 1% of additional habitat at risk from this type of development on federal lands and an unknown but potentially larger amount on private lands (Figure 19).²⁴

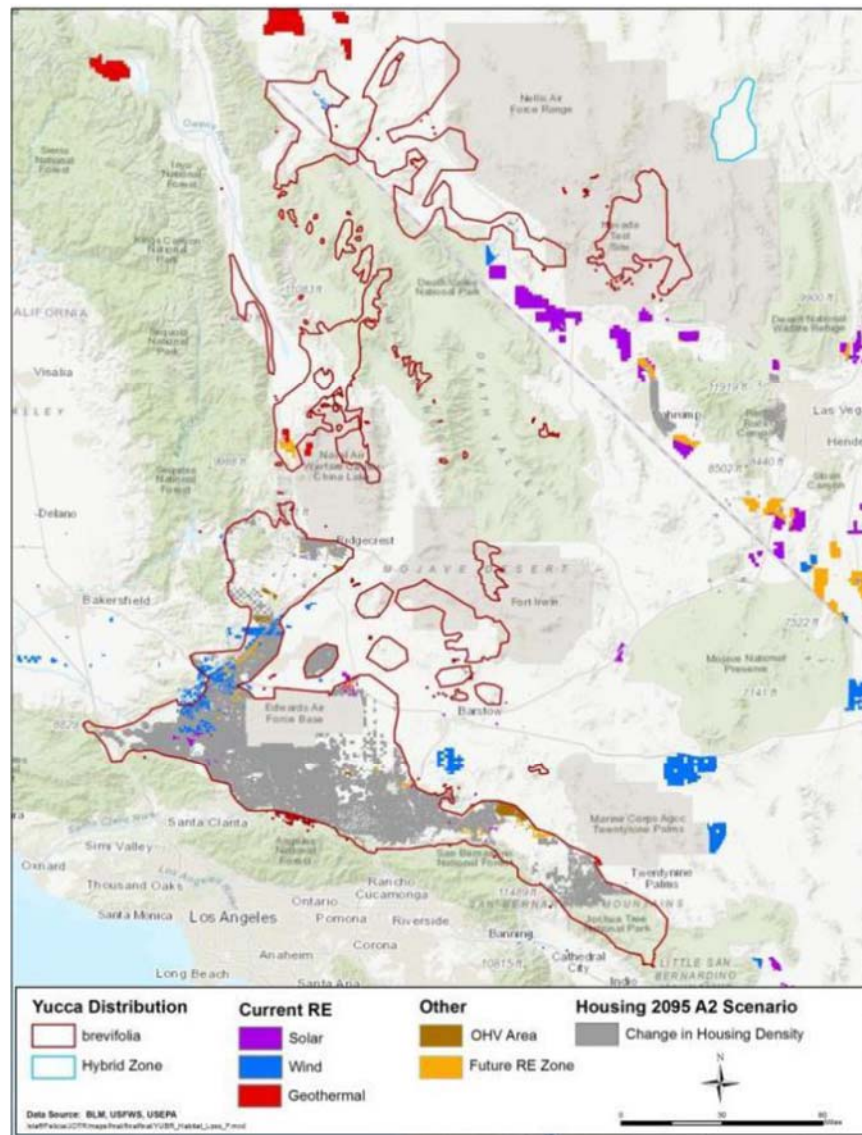

Figure 19: Map showing Joshua tree projected habitat loss due to urban growth, as well as current and projected habitat loss due to large-scale renewable energy projects. Source: USFWS (2018).

In sum, human development has already consumed hundreds of thousands of acres of habitat in the range of *Y. brevifolia*. Over the coming decades, over a million additional acres will be destroyed or degraded for housing, roads, energy projects and assorted other development (USFWS 2018). This large-scale loss or severe degradation of habitat is of conservation concern

²⁴ Notably, the Trump administration has initiated plans to roll back protections contained in the DRECP, which would likely subject additional areas of Joshua tree habitat to either renewable energy development or other forms of habitat degradation or destruction. <https://www.blm.gov/california/BLM-to-consider-changes-desert-renewable-energy-conservation-plan>.

for the species even absent the threats posed by climate change. However, given that *Y. brevifolia* in California will lose upwards of 90% of its range under likely climate scenarios, the added loss of habitat and the genetic resiliency and connectivity it provides will further push the species towards extirpation in California.

6 Degree and Immediacy of Threat

As demonstrated in the previous sections, the threats facing *Y. brevifolia* are severe and immediate. While extirpation is likely decades away, the species is already suffering the impacts of climate change, with recruitment failure and adult mortality at the hotter, lower elevation edges of its range (Barrows and Murphy-Mariscal 2012; Harrower and Gilbert 2018; Sweet et al. 2019). Moreover, the impacts of invasive grass fueled fire are already being felt, with approximately half of identified refugia areas in JTNP under moderate warming scenarios having burned in recent decades (Sweet et al. 2019). And perhaps most importantly, the impacts from current GHG emissions will continue to be felt for decades to come, with little time remaining to reduce such emissions before warming sufficient to drive *Y. brevifolia* to functional extinction becomes unavoidable. Consequently, while *Y. brevifolia* may not currently be “in serious danger of becoming extinct throughout all, or a significant portion, of its range,” it is certainly likely to become so “in the foreseeable future.” Cal. Fish & Game Code §§ 2062 & 2067.

7 Inadequacy of Existing Regulatory Mechanisms

No existing regulatory mechanism are currently in place at the international, national, state or local level that adequately address the threats facing *Y. brevifolia*.

7.1 Regulatory Mechanisms for Greenhouse Emissions Reductions

Given climate change is the greatest threat to the continued existence of the Joshua tree, ultimately the species cannot be saved absent global action to reduce such emissions. Unfortunately, such action is severely lacking in scale, speed and efficacy at all levels of government, both domestically and internationally.

The United States has contributed more to climate change than any other country. The U.S. is the world’s biggest cumulative emitter of greenhouse gas pollution, responsible for 25 percent of cumulative global CO₂ emissions since 1850, and is currently the world’s second highest emitter on an annual and per capita basis (Le Quéré et al. 2018). However, U.S. climate policy is wholly inadequate to meet the international Paris Agreement targets to avoid the worst dangers of climate change.

As summarized by the Fourth National Climate Assessment, efforts to mitigate greenhouse gas emissions do not approach the scale needed to avoid “substantial damages to the U.S. economy, environment, and human health and well-being over the coming decades”:

Climate-related risks will continue to grow without additional action. Decisions made today determine risk exposure for current and future generations and will either broaden or limit options to reduce the negative consequences of climate

change. While Americans are responding in ways that can bolster resilience and improve livelihoods, neither global efforts to mitigate the causes of climate change nor regional efforts to adapt to the impacts currently approach the scales needed to avoid substantial damages to the U.S. economy, environment, and human health and well-being over the coming decades (USGCRP 2018).

In 2016, the U.S. committed to holding the long-term global average temperature to well below 2°C and “to pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels” under the international Paris Agreement. Existing U.S. domestic laws including the Clean Air Act, Energy Policy and Conservation Act and others provide authority to executive branch agencies to require greenhouse gas emissions reductions from virtually all major sources in the U.S., sufficient to meet the Paris Agreement temperature commitment.

However, the Trump administration has focused on pushing through harmful rollbacks of federal climate policy, and federal agencies are either failing to implement or only partially implementing domestic law and policy mandating greenhouse gas reductions. Trump administration rollbacks of federal climate policy include rescinding the Climate Action Plan, repealing and replacing the Clean Power Plan, a plan to dramatically expand offshore oil drilling in all oceans along U.S. coast, an attempt to rescind the Obama-era withdrawal of offshore drilling in U.S. federal waters in most of the Arctic and parts of the Atlantic, lifting of the moratorium on new federal coal leases, weakening emissions standards for cars and light duty trucks, delaying the implementation of methane emissions standards for new and modified oil and gas facilities, and the intended withdrawal from the Paris Agreement.

As a result, current U.S. climate policy has been ranked as “critically insufficient” by an international team of climate policy experts and climate scientists who concluded in September 2019:

The Trump Administration has continued with its campaign to systematically walk back US federal climate policy. If it successfully implements all the proposed actions, greenhouse gas emissions projections for the year 2030 could increase by up to 400 MtCO₂e over what was projected when President Trump first took office. That’s almost as much as the entire state of California emitted in 2016 (CAT 2019).

To meet the carbon budget for keeping temperature rise below 1.5°C, most U.S. and global fossil fuels must remain undeveloped and fossil fuel production must be phased out globally within the next several decades (Rogelj et al. 2015). However, the U.S. is now the world’s largest oil and gas producer and third-largest coal producer (OCI 2019) due to U.S. policies that aggressively promote ever greater fossil fuel production. For example, in 2005, Congress exempted fracking from the Safe Drinking Water Act in legislation known as the “Halliburton Loophole.” Thereafter, fracking spread rapidly and facilitated a dramatic increase in U.S. natural gas and crude oil production (USEIA 2016). After Congress lifted the 40-year old crude oil export ban in December 2015, crude oil exports have skyrocketed and now hover at nearly three million barrels per day—about a quarter of all U.S. production (DiChristopher 2019). U.S. subsidies are also spurring fossil fuel production. A recent study assessing the impact of major federal and state subsidies on oil production found that these subsidies push nearly half of new

oil investments into profitability, potentially increasing U.S. oil production by 17 billion barrels over the next few decades (Erikson et al. 2017). In short, U.S. policy is incentivizing rather than reducing fossil fuel production.

And while U.S. policy and emissions are going in the wrong direction under the Trump administration, the rest of the world is doing little better. As summarized by CAT (2019), current policies, if actually implemented by all nations, will still result in over 3°C of warming, and even if all pledges and targets make pursuant to the Paris Agreement were met, warming would still be on the order of 2.6 to 2.9°C (Figure 20). This level is far above the 1.5°C threshold the world needs to stay below to avoid the worst impacts of climate change.

Figure 20: Graph showing mismatch between current emissions trajectories, international climate targets, and national policies and commitments. Source: CAT (2019).

In sum, both domestically and globally, government policies and commitments, not to mention actual actions, to avoid the worst impacts of climate change are woefully inadequate. These trends will lead to temperatures in the range of *Y. brevifolia* that are incompatible with reproduction and ultimately, survival of the species.

7.2 Mechanisms to protect habitat from fire, development and other threats

While the lack of effective regulatory mechanisms to address greenhouse pollution is largely determinative as to the question of whether *Y. brevifolia* qualifies for CESA protection,

mechanisms to protect the species from other threats are also insufficient.

7.2.1 Invasive species and fire

To date no legal, regulatory or management efforts have demonstrative effectiveness at addressing the severe threat that invasive species and consequent altered fire regimes pose to Joshua trees. While the National Park Service (NPS) has updated its fire management plans to address the increased threat of fire to the species, large fires continue to be a significant threat in JTNP (Sweet et al. 2019). Other areas in the species' range lack species-specific fire management plans. And while immediate suppression of fires in *Y. brevifolia* habitat can limit the spread of fires, protection of the species from fire ultimately requires invasive species management to reduce the fuel load. Given invasive species spread and abundance is linked to both disturbance (e.g. roads, ORVs, cows, urbanization) (Brooks and Berry 2006) and nitrogen deposition (Allen et al. 2009; Allen et al. 2011), each of these contributing factors will need to be addressed.

Disturbance is somewhat limited in the portions of the range of *Y. brevifolia* within national parks, but these areas harbor only approximately 10% of the species' current suitable range in California. The vast majority of the species' range in the state is on BLM, military and private lands that are not managed primarily for species protection and include activities such as ORV use, cattle grazing, military training, urban sprawl and activities that foster the spread of invasive species and/or the ignition of fires (USFWS 2018).

Notably, BLM recently (10/3/19) approved a Record of Decision for a vehicle route network in the West Mojave Planning Area, which encompasses the entire range of YUBR South and a portion of YUBR North. About a quarter of mapped Joshua tree habitat in YUBR South is on BLM land, while over half of YUBR North habitat is on BLM land. BLM approved an expansive ORV route network of 6000 miles of open vehicle routes in the plan area, ensuring that any public lands outside of wilderness will be highly fragmented, directly degrading habitat, exacerbating the spread of invasive species and increasing the number of human-caused ignitions (BLM 2019).

Nitrogen deposition impacts both disturbed and relatively undisturbed areas, with JTNP being one of the areas in the range of *Y. brevifolia* worst impacted by nitrogen deposition (Allen et al. 2011; Figure 10). As summarized by, Pardo et al. (2011), the threat is dire: "In Joshua Tree National Park in southern California, N deposition favors the production of sufficient invasive grass biomass to sustain fires that threaten the survival of the namesake species."

It is unlikely that nitrogen deposition will be adequately reduced throughout the range of *Y. brevifolia* for at least several decades, if ever. In the western areas of JTNP, nitrogen deposition is largely derived from nitric oxides (HNO_3) coming from automobile and powerplant pollution blown in from the greater Los Angeles area (Allen et al. 2009). In the eastern part of the park, deposition is largely from ammonia (NH_3) from local agricultural sources in the Coachella and Imperial Valleys (Allen et al. 2009). High rate of nitrogen deposition in the far western Mojave likely originate from a mix of smokestack and tailpipe pollution and agricultural sources in the San Joaquin Valley (Bytnerowicz et al. 2016). Even if California successfully decarbonizes its

vehicle fleet and power generation in the coming decades, nitrogen deposition from large-scale agriculture will likely continue to impact large areas of *Y. brevifolia* habitat for the foreseeable future.

Moreover, even if disturbance and nitrogen deposition are reduced and the further spread of invasive species can be curtailed, no fully-effective treatments currently exist to reduce or eliminate at a landscape scale the most pernicious invasive species (e.g. *Bromus* spp., *Schismus* spp., *Erodium cicutarium*), *Brassica tournefortii*) that have already become established in significant portions of the range of *Y. brevifolia* (Brooks et al. 2018).

7.2.2 Habitat loss and degradation

As discussed above, *Yucca brevifolia* stands to lose upwards of a third of its suitable habitat in California to development over the coming decades, including over 40% of its habitat in the YUBR South region. No existing state or federal regulatory mechanisms are currently operative in a manner that will meaningfully reduce this threat.

State and local mechanisms

A relatively small portion of the range of *Yucca brevifolia* occurs within California State Parks, including Red Rock Canyon State Park and Eastern Kern County Onyx Ranch State Vehicular Recreation Area in Kern County and Saddleback Butte State Park, Arthur B. Ripley Desert Woodland State Park, and Antelope Valley California Poppy Reserve in Los Angeles County. Collectively these make up less than 1% of the species range in the state (USFWS 2018). While these areas are protected from urban development and are generally to be managed for the protection of park resources, they alone are unlikely to prevent the decline and eventual extirpation of Joshua trees from the region. Saddleback Butte and Arthur B. Ripley Desert Woodland State Parks are small and isolated islands of protected habitat, comprised of approximately 3000 and 500 acres respectively. Antelope Valley California Poppy Reserve is approximately 1800 acres but contains only a few isolated clusters of Joshua trees. Red Rock Canyon State Park at approximately 27,000 acres is much more substantial in size, but is faced with many management challenges similar to adjacent BLM lands, particularly a proposed increase in ORV use in the Park. Similarly, the newly-created Eastern Kern County Onyx Ranch State Vehicular Recreation Area contains some Joshua tree woodland but is managed primarily for ORV use.²⁵ In any event, even if all other threats to *Y. brevifolia* in these parks were effectively managed, climate change and fire still threatened to extirpate the species from these parks over the coming decades.

The California Desert Native Plants Act, Cal. Food & Agricultural Code §§ 80001 – 80201, was passed “to protect California desert native plants from unlawful harvesting on both public and privately owned lands.” *Id.* at § 80002. Joshua trees are explicitly regulated under this provision. *Id.* at § 80073(a)(“yuccas”) & 80101(b)(1) (setting price for *Y. brevifolia* permits). The Act generally prohibits harvest of desert plants absent permits issued by the relevant county agricultural commissioner or sheriff. *Id.* at § 80073. Land clearing for agriculture and various

²⁵ Information on each of these parks is available at <https://www.parks.ca.gov/>.

other forms of development activities are generally exempted so long as the plants are not offered for sale and proper notice is given. *Id.* at § 80111. The statute also includes provisions designed to assure the survival and transplant of desert plants that are harvested pursuant to permits. *Id.* at § 80116. The Department of Fish and Wildlife is tasked with enforcing the statute. Cal. Fish & Game Code § 1925 (“The Department shall enforce the provisions of the California Desert Native Plants Act”).²⁶

Commercial collection was once seen as perhaps the greatest threat to the Joshua tree and other desert plants. As described in an early account about the threats commercial harvesters presented to the species in southern California, “As soon as they began to realize their beauty and unique character there began a wholesale foray into the desert to dig them up...At the present rate of destruction the cactus of the desert and the Joshua trees will be gone within two years” (Carr 1930). Various state and local laws and ordinances were ultimately passed to address this threat, including the California Desert Native Plants Act. While these measures have been largely effective at reducing the commercial harvest of Joshua trees, they have done little to slow the loss of habitat from agricultural conversion and development in the range of the species.

Among the local jurisdictions in the range of *Y. brevifolia* that currently have plant protection ordinances or other measures that nominally protect Joshua trees are Hesperia, Palmdale, Victorville, Yucca Valley, and Los Angeles and San Bernardino counties. While all of these provisions require consideration of Joshua tree retention in development plans, most exempt single-family homes and none act as an actual bar to tree removal, instead usually requiring transplantation, donation or making available for adoption trees removed from construction sites. *See, e.g.* Palmdale Municipal Code §§ 14.04.010 *et seq.* (requiring preservation of two Joshua trees per acre but allowing this metric to be met by donating removed trees to an offsite City-administered tree bank); Yucca Valley Ordinance 140 (allowing removal of Joshua trees for transplant if they interfere with “approved improvements or other ground disturbing activities” and “best efforts” are made to avoid the need to remove them).

The California Fish and Game Commission noted the inadequacy of these approaches when it adopted its California Policy for Native Plants in 2015:

The State’s policies and practices regarding native plants are in need of review and updating. More than 30 years ago state law focused on transplantation as a means of mitigating for listed plant species, however experience and numerous studies document that such practices are largely ineffectual over time and often damaging to species or population survival.²⁷

In sum, the California Desert Native Plants Act and similar local ordinances are, as recognized by the Commission, “largely ineffectual” at protecting imperiled plant species from habitat loss. These provisions may result in the near-term preservation of individual adult Joshua

²⁶ A similar statute, the Native Plant Protection Act provides comparable protections for “endangered or rare” native plants. Cal. Fish & Game Code §§ 1900-1913. The Joshua tree is not among the species regulated by this statute.

²⁷ Available at <https://fgc.ca.gov/About/Policies/Miscellaneous>.

trees in urban and suburban neighborhoods, but these areas are less likely to remain habitat long-term. Successful recruitment in such areas is likely constrained by lack of nurse plants and it remains highly uncertain whether pollinating moths will be able to persist with the resultant low Joshua tree densities (Harrower and Gilbert 2018)(“Having robust, dense, flowering trees is important to support and attract enough moths for successful seed set”). Consequently, these measures are inadequate to prevent extensive loss of Joshua tree habitat in the near-term and for the foreseeable future.

Other state statutes also are inadequate to protect Joshua trees from habitat loss. The California Environmental Quality Act (CEQA) is California’s landmark environmental law and establishes a state policy to prevent the “elimination of fish or wildlife species due to man’s activities, ensure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities....” Cal. Pub. Res. Code § 21001(c). Towards this end, state and local agencies are required to analyze and disclose the impacts of any discretionary decision or activity. CEQA contains a substantive mandate that agencies should not approve projects as proposed if there are feasible alternatives or mitigation measures which would substantially lessen the significant environmental effects of such projects. Cal. Pub. Res. Code § 21002.

CEQA requires a “mandatory finding of significance” if a project may “substantially reduce the number or restrict the range of an endangered, rare or threatened species.” Cal. Code Regs., tit. 14, § 15065(a)(1). CDFW has interpreted this provision to apply to species of special concern, which are species that are “experiencing, or formerly experienced, serious (noncyclical) population declines or range retractions (not reversed) that, if continued or resumed, could qualify it for State threatened or endangered status.”²⁸ CDFW further provides that species of special concern “should be considered during the environmental review process.” *Id.*; Cal. Code Regs., tit. 14, § 15380. Thus, a potentially substantial impact on a species of special concern, threatened species, or endangered species could be construed as “per se” significant under CEQA. *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449. And under CEQA, when an effect is “significant,” the lead agency approving the project must make a finding that changes or alterations have been incorporated into the project to avoid or mitigate its significant impacts, or that such changes are within the responsibility of another agency, or that mitigation is infeasible. Cal. Pub. Res. Code § 21081(a). These provisions therefore provide some protections to species that are listed as species of special concern, threatened, or endangered.

However, Joshua trees are not listed as a species of special concern or as threatened or endangered, such that a project that has the potential to impact the species would not necessarily qualify as a “significant effect” under a lead agency’s interpretation of CEQA. In such case, CEQA’s substantive mandate to adopt all feasible alternatives or mitigation measures might not be triggered.

CEQA also requires a “mandatory finding of significance” if a project may “substantially

²⁸ California Department of Fish and Wildlife, *Species of Special Concern*, available at <https://www.wildlife.ca.gov/Conservation/SSC>.

reduce the habitat of a fish or wildlife species; cause a fish or wildlife population to drop below self-sustaining levels; threaten to eliminate a plant or animal community.” Cal. Code Regs., tit. 14, § 15065. Moreover, CEQA’s “Environmental Checklist” in Appendix G of the CEQA Guidelines characterizes a project’s effects as “significant” if the project would “[c]onflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.”

While these provisions might theoretically offer some protection for Joshua trees, in practice they have not provided sufficient protection. Under CEQA, lead agencies have discretion to develop their own thresholds of significance. *East Sacramento Partnerships for a Livable City v. City of Sacramento* (2016) 5 Cal.App.5th 281, 300; Cal. Code Regs., tit. 14, § 15064(d). This allows local agencies—who are often under pressure from developers to approve projects—to make significance determinations that are inconsistent with independent scientific analysis, including CDFW’s analysis.

Even when a lead agency acknowledges that an effect is “significant,” CEQA allows a lead agency to adopt a “statement of overriding considerations” and approve a project if the agency finds that other factors outweigh the environmental costs of the project or that further mitigation is infeasible. Cal. Code Regs., tit. 14, § 15093(b); Cal. Pub. Res. Code § 21081. This means that even if a project may have a significant effect on a Joshua tree population, an agency could interpret CEQA as still allowing approval of the project. CEQA in practice is therefore inadequate to protect Joshua trees.

The Natural Community Conservation Planning Act is a voluntary conservation planning mechanism for proposed development projects within a planning area to avoid or minimize impacts to wildlife. Cal. Fish & Game Code §§ 2800-2835. The Act is designed to promote coordination among agencies and landowners to conserve unfragmented habitat areas and multihabitat management. Cal. Fish & Game Code § 2801(d).²⁹ The Act can also serve as a mechanism to authorize take of CESA listed species. *Id.* at § 2835.

There are no finalized Natural Community Conservation Plans (NCCPs) that cover the Joshua tree. One approved NCCP, the Coachella Valley MSHCP approaches the southern edge of the range of *Y. brevifolia* but does not include the species as a covered species. An NCCP that does overlap the range of the Joshua tree is the proposed Town of Apple Valley MSHCP.³⁰ This NCCP has been under development for several years with a planning agreement signed in 2017. However, *Y. brevifolia* is not on the proposed list of covered species for the NCCP. Previously, both the West Mojave Plan and the DRECP were intended to be joint plans covering both federal BLM lands and private lands subject to development, but each was ultimately implemented as a federal-only plan, neither of which treat the Joshua tree as a covered species. These plans are further discussed below. In sum, NCCPs may in the future provide some conservation benefit for Joshua trees, but have not done so to date and consequently cannot be considered as providing adequate protection in lieu of CESA listing.

²⁹ The NCCP Act is described on CDFW’s website at <https://www.wildlife.ca.gov/conservation/planning/NCCP>.

³⁰ Documents available at <https://www.wildlife.ca.gov/Conservation/Planning/NCCP/Plans/Apple-Valley-MSHCP>

Federal mechanisms

The primary federal regulatory mechanism with the potential to protect Joshua trees are management laws and plans governing federal lands. Almost all of the suitable habitat in YUBR north and half within YUBR South is on federal land. Consequently, management of these lands has an important role to play in determining the continued viability of Joshua trees in the state. As discussed above, approximately 10% of *Y. brevifolia* habitat is on NPS lands that are generally well-managed and should prevent significant habitat loss or degradation from activities such as ORV use, cattle grazing, road building or other forms of development. However, even within Death Valley National Park, the 86,400-acre Hunter Mountain Allotment is still active and overlaps with the range of *Y. brevifolia* in the park (NPS 2012). Nevertheless, these lands represent the best opportunities for active management measures to reduce the risk of fire and otherwise attempt to maintain *Y. brevifolia* on the landscape in the face of projected warming.

About 12 percent of the mapped distribution of the YUBR South population falls within military installations and a roughly comparable amount of the YUBR North population falls within such lands (USFWS 2018). The four bases in California with Joshua tree habitat - Edwards Air Force Base, Fort Irwin National Training Center, China Lake Naval Weapons Station and Twentynine Palms Marine Corps Air Ground Combat Center - have each developed Integrated Natural Resource Management Plans (INRMPs) pursuant to the Sikes Act, 6 U.S.C. §§ 670a-670o, that incorporate some avoidance and minimization measures that could reduce impacts to Joshua trees. These measures are summarized in USFWS (2018) and largely consist of avoidance where feasible and transplantation when conflicts are unavoidable. These measures largely mirror those required for private lands under state and local ordinances, which as discussed *supra*, are in the Commissions own words, “largely ineffectual.”

The majority of Joshua tree habitat on federal lands is on BLM lands. These areas are governed by the agency’s California Desert Conservation Area (CDCA) Plan as amended. The Northern and Eastern Mojave Plan (NEMO) area overlaps with most of the California range of the YUBR North populations and the West Mojave Plan (WEMO) area covers all of YUBR South and the southwestern portion on YUBR North. The 2016 Desert Renewable Energy Conservation Plan (DRECP) amendments cover the entirety of the species’ range in California. None of these plans provide adequate protection for *Y. brevifolia*. area

BLM’s NEMO plan does virtually nothing to specifically protect Joshua trees. The species is not mentioned in the Record of Decision (ROD) at all, and the only specific protection afforded to it is a prohibition on collecting downed trees for firewood (BLM 2002). Notably, Joshua tree protection is explicitly excluded from the plan’s measure to limit surface disturbance below certain thresholds:

It should be noted that some important plants, such as Joshua trees, which are important as an overstory plant but are not dominant, would not be a part of the evaluation trigger. Reestablishment of such plants could, of course, be a restoration requirement for a particular project, but they would not be used to trigger an evaluation for the purposes of reducing the cumulative disturbance total (BLM 2002).

In short, the NEMO plan was not designed with the intent of protecting Joshua trees, and the BLM apparently did not wish to have protection of the species act a barrier to any potential land-disturbing activities.

The WEMO plan is little better. As with NEMO, its ROD does not mention Joshua trees at all. The FEIS for the plan amendment was developed when the project was to also be a habitat conservation plan (HCP) covering private development in the plan area. In this context it discusses existing and proposed preservation of Joshua tree woodlands in the Antelope Valley by state and local entities, but the only specific conservation measure for Joshua trees that BLM itself takes is to prohibit harvesting of Joshua trees in designated conservation areas (BLM 2006). Given state law already prevents such harvest, this conservation measure is illusory. BLM approved the WEMO plan as a federal only plan with no HCP component. Under this alternative, BLM estimated that 54.1% of Joshua tree woodland habitat could be lost (BLM 2006).³¹

BLM recently completed an amendment to the WEMO plan dealing with vehicle routes (BLM 2019). Under this plan amendment, the route network is expanded to approximately 6000 miles of roads and trails open to ORVs. The ROD does not mention Joshua trees, the FSEIS does not meaningfully address impacts to Joshua trees, and the plan amendments do not add any specific measures to protect the species. Mentions of Joshua trees are cursory in the FSEIS, with for example, in a chart of subregions of the plan area, for one area BLM states that it “has an extensive Joshua Tree forest,” and immediately thereafter notes that “Gently terrain and good soils make ideal provide ideal OHV touring opportunities” [typos in original].³² In the ROD, BLM also reaffirms cattle grazing on all active allotments (BLM 2019). As discussed *supra*, invasive species and consequently fuel loads, and well as human-caused ignitions increase in areas subject to disturbance such as cattle grazing and ORV use (e.g. Brooks and Berry 2006). The recent plan amendment will both directly degrade Joshua tree habitat via increased vehicle use, while also indirectly exacerbating the conditions that lead to more frequent and more intense fires.

The more recent DRECP started as both a BLM plan and a state NCCP. Consequently, the environmental documents associated with it address the conservation of Joshua trees more directly than the overlapping BLM plans. However, the DRECP was ultimately adopted as a BLM-only plan, rendering much of the proposed broader conservation uncertain. Among the Joshua tree measures BLM adopted are an objective listed as “Conserve unique landscape features, important landforms, and rare or unique vegetation types identified within the BLM Decision Area, including...Areas of dense Joshua Tree woodland.” To meet this objective, the DRECP requires that for new actions, Joshua tree impacts are to be assessed in planning

³¹ As discussed in the Distribution section *supra*, “Joshua tree woodland” represents only a portion of the habitat types where the species occurs. However, it is the densest and highest quality habitat for the species.

³² The only other “analysis” of impacts to Joshua trees in the FSEIS, is an assertion repeated verbatim multiple time in the document that attempts to minimize harm from vehicles: “In remote or mountainous areas, most travel is confined to roads, so that the woodland communities (Joshua tree woodland, scrub oak, pinyon pine woodland, juniper woodland) suffer relatively fewer direct vehicle impacts” (BLM 2019).

decisions and “impacts to Joshua tree woodlands will be avoided to the maximum extent practicable, except for minor incursions” (BLM 2016).³³ In addition to the specific measures for Joshua trees, their habitat would likely gain better protection from various land designations made under the DRECP. However, the benefits for the species derived from the DRECP amendments to the CDCA Plan are in doubt, as the BLM announced that it was planning to revisit the conservation measures of the plan. See Notice of Intent to Amend the California Desert Conservation Area, Bakersfield, and Bishop Resource Management Plans and Prepare Associated Environmental Impact Statements or Environmental Assessments, 83 Fed. Reg. 4921 (February 2, 2018). That amendment process is currently ongoing.

In sum, outside of national parks and areas of congressionally designated wilderness, federal land management plans in the range of *Y. brevifolia*, if they address the species at all, at best provide for avoidance of harm to the extent “practicable” or “feasible.” Such protection is inadequate in the face of the difficulties the species will face in a rapidly changing climate.

8 USFWS’s Flawed Endangered Species Act Determination.

The strongest federal regulatory mechanism that could protect *Y. brevifolia* is the federal Endangered Species Act (ESA). However, on August 15, 2019 the USFWS found that listing Joshua trees (*Y. brevifolia* and *Y. jaegeriana*) throughout their multistate range was not warranted. Endangered and Threatened Wildlife and Plants; 12-Month Findings on Petitions to List Eight Species as Endangered or Threatened Species, 84 Fed. Reg. 41694 (August 15, 2019) (USFWS 2019). The finding was made in response to a 2015 petition by WildEarth Guardians seeking such listing.

While the 2018 species status assessment prepared by USFWS and relied upon by the agency in its decision is informative as to many aspects of Joshua tree taxonomy, natural history, distribution and threats, its conclusions are not at all determinative to the question of whether *Y. brevifolia* warrants listing under CESA. Most importantly, USFWS (2018) assessed whether Joshua Trees in their four-state range were threatened or endangered. And to the degree that the agency considered *Y. brevifolia* separately from *Y. jaegeriana*, it never examined the species’ status in just California, rather than California and Nevada combined. Under CESA, the only question is whether the species is imperiled in California. As both CDFW and the Commission have concluded—and appellate courts have upheld—the term “range” under CESA is construed to refer to the range of a species *within* California, not the worldwide range of the taxa. *California Forestry Assn. v. California Fish & Game Com.* (2007) 156 Cal.App.4th 1535, 1550-551.

Additionally, several of the analyses and conclusions contained in USFWS (2018) are flawed and served to downplay the threats and overstate the likely resilience of the species. For example, the agency used an upper “appropriate temperature range” for the species of 59°C (138°F). The same metric was used for all age classes, from seedlings to adults. This threshold

³³ DRECP documents are available at <https://eplanning.blm.gov/epl-front-office/eplanning/planAndProjectSite.do?methodName=dispatchToPatternPage¤tPageId=95675>

was based on a laboratory studies by Smith et al. (1983) in which detached leaves were placed in hot water for an hour and then examined for heat damage. The temperature at which a severed leaf demonstrates cell damage in a lab is a far different metric than the ambient temperature in which a Joshua tree can survive and successfully reproduce in the wild.³⁴ The temperature used by USFWS (2018) is higher than the hottest temperature (56.7°C; 134.1°F) ever measured on Earth. Notably, the highest lab air temperature that Smith et al. (1983) actually successfully reared Joshua trees was 45°C (113°F).³⁵

USFWS (2018) also downplays the risks of fire to *Y. brevifolia*. Using modeling to estimate invasive grass cover and link high coverage ratios (15-45%) as a proxy for increased fire frequency and severity, the agency estimated that approximately 1.4 percent of the YUBR South and 8.8 percent of the YUBR North current mapped distribution would be at risk in the next several decades. In contrast, Sweet et al. (2019) documented that half of the area of Joshua tree habitat in JTNP identified as refugia for the species under an RCP 4.5 pathway had already burned in recent decades. The total recent burn area in the park represents well over 10% of the current range of the species in the park and such fires are likely to increase within JTNP and throughout the range of the species.

Another severe limitation of USFWS (2018) is the complete discounting of species distribution modeling, which currently represents the best available science on the future status of the western Joshua tree. The agency admits that it did not carry out any such modeling, claiming that having quantitative information is somehow at odds with its goals in carrying out a status assessment.

We did not model future distribution based on predicted climate change scenarios. Instead, we used future scenarios to perform a qualitative evaluation of the impact of climate change on the current distribution. ... Our goal was to present information related to future climate outcomes, not to evaluate quantitative assessments of climate change on future Joshua tree distribution, therefore we did not construct ecological niche models (e. g., species distribution models) (USFWS 2018).

What USFWS claims it did in lieu of deploying ecological niche modeling was scenario planning, citing to Star et al. (2016) for its rationale.

Rather than focusing only on the most likely predictions, scenario planning identifies a range of possible future states. Scenarios are not predictions, and probabilities are not assigned to specific outcomes. By recognizing the limits of projections and acknowledging deep uncertainty, decision makers are not restricted to preparing for

³⁴ By way of comparison, according to industrial safety standards, a human can safely touch items as hot as 140°F without burning their hand, but prolonged exposure to air temperature of 140°F would lead to heat stress and ultimately be fatal.

³⁵ Among the various temperature ranges listed for the species in the wild, the highest is reported by Lenz (2001) as 51°C (124°F), which presumably corresponds to a one-time daily maximum temperature recorded somewhere in the species' range; this temperature is well above the average summer maximum of the hottest place in the United States, Furnace Creek in Death Valley (July average of 47°C (116°F)).

only one outcome, and can still act in the face of climate change while retaining flexibility.

USFWS (2018) also cites two older studies in an attempt to undermine the utility of such studies as well as the feasibility of doing them with regard to Joshua trees.³⁶

Furthermore, ecological niche models are often criticized for inaccurate projections of future occurrence (Fitzpatrick and Hargrove 2009, p. 2256). This is especially true for species where current distribution data are not extensive across the species range or information about physiological thresholds is lacking, such as Joshua tree (Pearson and Dawson 2003, p. 362). Given the absence of information about the adaptive capacity of Joshua tree, in combination with gaps in the occurrence data across the species' range, the probability of spurious conclusions seemed high.

The problems with USFWS's approach are many. First, USFWS did not *itself* need to model future distribution of Joshua trees, as this has already been done by multiple researchers, with Cole et al. (2011), Barrows and Murphy-Mariscal (2012) and Sweet et al. (2019) employing the most sophisticated of such efforts. Nowhere in USFWS (2018) is there even an acknowledgement that such modeling efforts have been undertaken and reported in these studies.³⁷

Second, while scenario planning may be useful in recovery planning or otherwise preparing for management responses to climate change, it has little utility in determining whether a species is "likely" to become endangered in the foreseeable future, as required by the ESA and CESA. 16 U.S.C. § 1532(20); Cal. Fish & Game Code § 2067 (ESA and CESA definitions of threatened species). In effect, USFWS (2018) is acknowledging that "[r]ather than focusing only on the most likely predictions" it instead applied a more nebulous framework that allowed it to "retain flexibility" and disregard not just the best available science, but also the plain language of the ESA.

Third, USFWS's reliance upon Pearson and Dawson (2003) and Fitzpatrick and Hargrove (2009) for its critique of ecological niche models is misplaced. The concerns raised by Pearson and Dawson (2003) and Fitzpatrick and Hargrove (2009) about the limitations of certain niche modeling efforts may be valid, but Cole et al. (2011), Barrows and Murphy-Mariscal (2012) and Sweet et al. (2019) all employed the measures raised by these earlier authors to improve the accuracy of their modeling, including, most importantly, validating their models against the current distribution of the species. Pearson and Dawson (2003) also note that information on dispersal abilities should also be included in modeling where possible, a factor clearly addressed in Cole et al. (2011).

³⁶Neither of these studies, nor Star et al. (2016), appear in the references section of USFWS (2018), indicating that they may have been added at the last-minute in an attempt to justify a legally and scientifically dubious conclusion.

³⁷Elsewhere in the document, USFWS (2018) cites to Cole et al. (2011) and Barrows and Murphy-Mariscal (2012) for other aspects of Joshua tree natural history or range. Sweet et al. (2019) had not been published at the time of USFWS (2018) but was released prior to the actual listing decision being published and should have factored into the final decision.

Additionally, the primary concern of Fitzpatrick and Hargrove (2009) is that climate change and future conditions will create novel environments with new species interactions, including many invasive species. This makes predictions about future species distribution less reliable, unless they account for such factors. But these concerns are addressed by Cole et al. (2011), Barrows and Murphy-Mariscal (2012) and Sweet et al. (2019) who examined the current and past status of *Y. brevifolia* across environmental gradients (elevation and latitude) and used increasingly finer-scale species distribution and climate data to refine their model outputs. Moreover, unlike USFWS who discarded such modeling entirely, Pearson and Dawson (2003) explicitly acknowledged the utility of such models: “In many cases, bioclimate envelope models provide perhaps the best available guide for policy making at the current time.” In the decade and half since this statement was published, such models have improved greatly and are even more useful for informing policy decisions.

Finally, USFWS’s failure to rely upon the published species distribution models was strongly criticized by one of the peer-reviewers of the status assessment.

[T]he assessment has not completed, and does not incorporate, a species distribution model, and thus draws invalid conclusions about future distributions under various climate change scenarios. Unfortunately, the problems are significant enough that the assessment’s conclusions are not scientifically sound, and should not be used for making a decision regarding whether to list Joshua trees under the ESA (Smith 2018).

Smith (2018) noted that species distribution models are the “accepted standard” for assessing future distribution of a species, described the finding of the various modeling efforts to date, compared these to the conclusions of the status assessment, and concluded that “[g]iven that the USFW assessment has not followed the conventional standards in the field for predicting future distributions, and makes predictions that are starkly different than those drawn by other workers making comparable model assumptions, I consider the assessment’s conclusions to be highly dubious.” Smith (2018) concluded with the recommendation that “[f]irst and foremost, the assessment simply MUST include a formal species distribution model.” (emphasis in original).

Smith (2018) also pointed out that the estimation of “suitable habitat” for Joshua trees was overstated in the status assessment.

[T]he way that ‘suitable habitat’ has been defined ignores important recent work on demographic trends in Joshua trees, with the result that the potential distribution of Joshua tree under current climate conditions is vastly overestimated.

Specifically, Smith (2018) pointed out USFWS (2018) had not taken into account climate change that has already occurred when it delineated such habitat.

In identifying the climate requirements for Joshua tree, the assessment uses the current distribution to determine suitable habitat.... There are two significant, interrelated problems with these assumptions. First, the current distribution of Joshua

tree includes individuals who are hundreds of years old, and that became established during pre-industrial climate conditions when global average temperatures were a full degree cooler than they are today, and about 0.75 degrees cooler than the 30-year average. Indeed, it is well established that long-lived trees can persist as relict stands of moribund adults that exist outside the range of suitable habitats required for long term population persistence.

In the case of Joshua trees in particular, we have very compelling evidence that the current distribution of mature trees does not reflect the climate requirements for successful germination and seedling establishment. For example, extensive mapping studies in Joshua Tree National Park found that seedlings occur only in a fraction of the area occupied by adults, and that this area corresponds to the predicted distribution under a 2-degree warming scenario (Barrows and Murphy-Mariscal, 2012). That is, the suitable habitat for seedlings is much smaller, includes a narrower range of climates, than would be predicted based on adult presence data. Although the Barrows and Murphy-Mariscal study considered only a small portion of the geographic range of Joshua trees, other workers have found similar patterns across the Joshua trees range.

Smith (2018) concluded that these errors rendered the conclusions of the assessment unreliable: “I consider the current assessment to not be based on the best available science, and its conclusion have no valid scientific basis.” USFWS did not address either of the primary problems identified by Smith (2018) when it finalized the status assessment.

In sum, USFWS’s determination to not protect Joshua trees under the ESA should not, and legally cannot, be a basis to fail to protect *Y. brevifolia* under CESA.

9 The Western Joshua Tree Warrants Listing under CESA.

As detailed above, in conformance with the requirements of Cal. Code Regs., tit. 14, § 670.1, this petition presents scientific information regarding the western Joshua tree’s life history, population trend, range, distribution, abundance, kind of habitat necessary for survival, factors affecting the ability to survive and reproduce, degree and immediacy of threat, impact of existing management efforts, suggestions for future management, availability of sources and information, and detailed distribution maps.³⁸

That information clearly demonstrates that the western Joshua tree (*Yucca brevifolia*) is eligible for and warrants listing under CESA based on the factors specified in the statute and implementing regulations. While *Y. brevifolia* is not at imminent risk of extinction, it still faces significant and growing threats, primarily from climate change, that ultimately threaten the viability of the species in all or a significant portion of its range in California in the foreseeable future; it consequently meets the definition of a “threatened species.”

³⁸ Information on suggestions for future management and availability of sources and information are contained in the Management Recommendations and References sections *infra*.

Under CESA, a “threatened species” is “a native species or subspecies of a ... plant that, although not presently threatened with extinction, is likely to become an endangered species in the foreseeable future in the absence of the special protection and management efforts” Cal. Fish & Game Code § 2067. A plant is an “endangered species” when it is “in serious danger of becoming extinct throughout all, or a significant portion, of its range due to one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, or disease.” Cal. Fish & Game § 2062.

Moreover, CDFW has concluded—and appellate courts have upheld—that when determining whether a species is threatened or endangered under CESA, the term “range” is construed to refer to the range of a species or subspecies *within* California, not the worldwide range of the species or subspecies. *California Forestry Assn. v. California Fish & Game Com.* (2007) 156 Cal.App.4th 1535, 1550-551. This means that regardless of how *Y. brevifolia* may fair in Nevada, the Commission and CDFW can only consider the status and fate of the species in California.

Additionally, in determining the foreseeable future in the context of climate change, CDFW has treated the rest of the century as foreseeable.

In considering what the ‘foreseeable’ future is for climate change effects, the Department relied on climate change projections to the end of the 21st century, as described by the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC 2007). The IPCC models and projections have been thoroughly vetted and validated in the series of Assessment Reports produced over the past 12 years. The Department considers the climate change projections to be the best available information on global climate change (Bonham 2013).

As discussed in the climate sections above, absent rapid and substantial reductions in greenhouse gas emissions, the best available science demonstrates that by the end of this century *Y. brevifolia* will be extirpated from, at a minimum, a significant portion of its range in California. Any places it remains will be in small, isolated refugia. These areas, if any, will likely be populated with low numbers of non-reproductive adult trees, themselves threatened by fire. At such point, if not already extirpated from the state, the species will certainly be “in serious danger of becoming extinct throughout all, or a significant portion, of its range” in California and be an “endangered species.” Consequently, it is a “threatened species” today.

In the event the Commission determines that full-species taxonomy for the western Joshua tree is not sufficiently established, petitioners request listing of the taxa as a subspecies/variety *Yucca brevifolia brevifolia*. Additionally, while petitioners believe that the western Joshua tree warrants protection under CESA throughout its range in California, if the Commission determines that it does not warrant range-wide listing, the Commission must assess whether either of the two population clusters of the species, YUBR North and YUBR South separately warrant listing as ecologically significant units (ESUs).

The Commission and CDFW have long recognized that ESUs can be designated and listed under CESA, and this interpretation of CESA has been upheld by the courts. *See California*

Forestry Assn. v. California Fish & Game Com. (2007) 156 Cal.App.4th 1535, 1540 (“Consistent with the policy of the CESA, we will hold that the term ‘species or subspecies’ includes evolutionarily significant units”); *Central Coast Forest Assn. v. Fish & Game Com.* (2018) 18 Cal.App.5th 1191, 1197, fn. 4 [“CCFA II”] (“An ESU is included within the term ‘species or subspecies’ in sections 2062 and 2067.”). While the ESU concept has primarily been applied to fish, the Commission recently listed an ESU of a mammal, the Pacific Fisher, as a “threatened species.” See 14 C.C.R. 670.5(b)(6)(J) (“Fisher (*Pekania pennant*) Southern Sierra Nevada Evolutionarily Significant Unit”). Moreover, unlike the federal ESA, where listing of distinct populations segments (DPSs), of which ESUs are subcategory, is restricted to vertebrate species (16 U.S.C. § 1532(16) (definition of “species”)), the ESU concept under CESA has no such limitation and applies to all listable taxa, including plants.

The populations currently delineated as YUBR North and YUBR South have been recognized for over 40 years and recently confirmed by USFWS (2018).

Rowlands (1978, p. 72) subdivided the Joshua tree range into five regions based on differences in geographic distribution, varieties (i.e., species in this SSA), vegetation, and temperature and rainfall amounts. Based on these regions and more current distribution models (Cole *et al.* 2011, pp. 139–140), we delineated two populations of *Yucca brevifolia* [*Y. brevifolia* south (YUBR South) and *Y. brevifolia* north (YUBR North)], and three populations of *Y. jaegeriana* [*Y. jaegeriana* central (YUJA Central), *Y. jaegeriana* north (YUJA North), and *Y. jaegeriana* east (YUJA East)]. We added a sixth population, the Hybrid Zone in Tikaboo Valley, to distinguish the geographic area where both species, and their pollinators, come into contact between YUBR North and YUJA North.

The two *Y. brevifolia* populations are separated by a small gap in their range, with the northern edge of YUBR South reaching the southern parts of China Lake and the southern boundary of YUBR North reaching the northern edge of the base (Figure 8). USFWS (2018) characterizes YUBR North habitats as “somewhat drier and less diverse than YUBR South,” with the lower elevations of YUBR South comprised of mostly creosote bush shrubland, while YUBR North associated vegetation including single-leaf pinyon, juniper, and sagebrush. At its simplest, YUBR South occurs mostly in the creosote dominated Western Mojave while YUBR North occurs in the area where the Northern Mojave transitions to the Great Basin and sagebrush becomes more dominant. This significant difference in habitat between the two population is sufficient to recognize them as ESUs for separate evaluation in the event full species listing is ultimately not deemed warranted by the Commission.

10 Recommended Management and Recovery Actions

For all species imperiled due to the impending loss of their suitable habitat as a result of climate change, the most important recovery actions are those that lead to rapid and steep greenhouse gas emissions reductions so as to minimize the additional warming that will occur in the climate system. However, given inertia in both the climate system and society, significant additional warming is unavoidable even under the most optimistic climate scenarios. Species that are already showing the effects of warming will continue to suffer and decline. For many

narrowly-endemic species with limited dispersal capabilities we will soon reach a point where little else can be done other than ex situ conservation in captivity and/or via assisted migration. It is hard to be optimistic about the fate of such species, as they will likely be lost from the wild even under more moderate warming scenarios.

While the threats facing *Y. brevifolia* in the coming decades are dire, unlike more narrowly-endemic species, the species has the benefit of being long-lived, with a relatively large current distribution spread across elevational and latitudinal gradients, much of which is in protected areas. Consequently, if the species and its habitat are protected early from other threats, and with active management to enhance recruitment and survival, and potentially dispersal, the western Joshua tree has a realistic chance of persisting in the wild. In this context, recommendations for the management and recovery of the western Joshua tree are as follows:

1. The governor declares a climate emergency and takes all necessary action to set California on a path to full decarbonization of our economy by no later than 2045 (e.g. banning the sale of new fossil fuel vehicles by 2030 and requiring the generation of all electricity from carbon-free sources by 2030).
2. CDFW prepares a recovery plan for *Y. brevifolia* pursuant to Cal. Fish & Game Code § 2079.1.
3. CDFW works with local jurisdictions within the range of *Y. brevifolia* to develop NCCPs that protect from development all high-density Joshua tree habitat remaining on private lands.
4. The California Department of Parks and Recreation develops and implements management plans (including fire management plans) focused on Joshua tree protection for state park units within the range of *Y. brevifolia* (Red Rock Canyon State Park and Eastern Kern County Onyx Ranch State Vehicular Recreation Area in Kern County and Saddleback Butte State Park, Arthur B. Ripley Desert Woodland State Park and Antelope Valley California Poppy Reserve in Los Angeles County).
5. The California Department of Parks and Recreation seeks to acquire habitat to expand and connect existing state parks for protection and restoration of Joshua tree habitat.
6. CDFW expands its cooperative work with relevant federal agencies (NPS, DoD, BLM, USFWS) to better protect Joshua trees on federal land.
7. CDFW works with the University of California, California Invasive Plants Council and other institutions and agencies to develop effective measures to control the spread of invasive grasses in *Y. brevifolia* habitat.
8. CDFW works with CAL-FIRE to develop protocols for fire suppression activities within the range of *Y. brevifolia* that maximize protection of the species, while minimizing ground disturbance that may foster the spread of non-native grasses and other invasive species.
9. CDFW works with relevant entities to establish and maintain a seed bank of *Y. brevifolia* collected throughout the range of the species to ensure protection of its genetic diversity.
10. CDFW works with relevant entities to identify potential sites for assisted migration and develop protocols for carrying out such activities.

11 Conclusion

The Joshua tree has long been the most iconic species of the Mojave Desert. Given the well-publicized threats facing the species in the face of climate change, it has recently become an emblem of our society's failure to address the climate crisis. But the Joshua tree is also uniquely situated to become an example of successful action to save a species threatened by climate change. Action taken in and by California to save the species can serve as a model for proactive climate adaptation efforts not just in California but around the world. Listing the species under CESA is not just a symbolically important act of California recognizing the threats the species faces from climate change, but also can serve as the impetus for meaningful management actions that can help ensure the species remains a living icon in perpetuity.

Memorandum

Date: November 18, 2019

To: Melissa Miller-Henson
Executive Director
Fish and Game Commission

From: Charlton H. Bonham
Director

Subject: Request for 30-day Extension, Western Joshua Tree (*Yucca brevifolia*) Petition

The California Department of Fish and Wildlife (Department) requests a 30-day extension of time pursuant to Fish and Game Code section 2073.5 to allow the Department additional time to analyze and evaluate a petition to list western Joshua tree (*Yucca brevifolia*) under the California Endangered Species Act and to complete its evaluation report. This extension would change the time for completion of the Department's evaluation report from 90 days, due January 30, 2020, to 120 days, due February 28, 2020.

If you have any questions or need additional information, please contact Richard Macedo, Habitat Conservation Planning Branch Chief at (916) 653-3861.

PETITION TO THE STATE OF
CALIFORNIA FISH AND GAME COMMISSION
TO LIST THE SHASTA SNOW-WREATH (*NEVIUSIA CLIFTONII*)
AS ENDANGERED UNDER THE CALIFORNIA ENDANGERED SPECIES ACT

September 30, 2019
KATHLEEN S. ROCHE

NOTICE OF PETITION

For action pursuant to Section 670.1, Title 14, California Code of Regulations (CCR) (California Code 2019) and Sections 2072 and 2073 of the Fish and Game Code (California Fish and Game Code 2019) relating to listing and delisting endangered and threatened species of plants and animals.

I. SPECIES BEING PETITIONED:

Common Name: Shasta snow-wreath

Scientific Name: *Neviusia cliftonii*

II. RECOMMENDED ACTION

To list as Endangered under the California Endangered Species Act (CESA) (California Code 2019 and California Fish and Game Code 2019).

CCR § 2062. Endangered species

"Endangered species" means a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant which is in serious danger of becoming extinct throughout all, or a significant portion, of its range due to one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, or disease. Any species determined by the commission as "endangered" on or before January 1, 1985, is an "endangered species."

I, Kathleen S. Roche, submit this petition to the California Fish and Game Commission (CFGC) to list the Shasta snow-wreath (*Neviusia cliftonii*) as “endangered” in California, under the California Endangered Species Act (California Fish and Game Code §§ 2050 et seq.[California Code 2019 and California Fish and Game Code 2019]) (“CESA”). This petition demonstrates that the Shasta snow-wreath clearly warrants listing under CESA based on factors specified in the statute. The California Native Plant Society (CNPS) has reviewed this petition and the CNPS Rare Plant Program Committee has assessed the petition’s scientific validity by evaluating the accuracy of information regarding taxonomy, ecology, life history, and demographic data presented herein. The CNPS Conservation Program Committee has assessed the petition’s

conservation merits by evaluating threats, stressors, and management information applicable to this species. Based upon their review of these factors, CNPS finds the current status of *Neviusia cliftonii* to merit consideration for listing as Endangered under the California Endangered Species Act. Therefore, the California Native Plant Society endorses this petition and should be considered a co-sponsor of this effort. We look forward to the Commission's response to this petition and processing of it pursuant to the procedures and timelines established at California Fish and Game Code §§ 2073 et seq. (CNPS 2019).

III. AUTHOR OF PETITION

Name: Kathleen S. Roche

Address: [REDACTED]

Phone: [REDACTED]

Email: [REDACTED]

I hereby certify that, to the best of my knowledge, all statements made in this petition are true and complete. All photos used with permission.

Date: September 30 2019: Kathleen S. Roche.

EXECUTIVE SUMMARY

The Shasta snow-wreath (*Neviusia cliftonii*) is a dicot, shrub in the rose family (Rosaceae) that is native to California and is endemic (limited) to northern California. The inflorescence is an umbel-like cluster of 3 to 5 flowers. The flower is a ball of about 50 long, whiskery white stamens each about half a centimeter long. There are sometimes white petals surrounding the stamens, although the petals are often absent.

The species was first described in 1992 and is now known from a total of 24 occurrences, restricted almost entirely to National Forest System lands with 6 out of 24 occurrences not, or not completely, on federal land. It is found exclusively in western Shasta County around the perimeter of Shasta Lake in northern California.

Shasta snow-wreath is one of only two species in the genus *Neviusia*. The other species within the genus is *Neviusia alabamensis*, a rare endemic of the southeast U.S. There are no other species of *Neviusia* in California nor adjacent states. There is agreement on the classification and the scientific name of this species (California Natural Diversity Database of the California Department of Fish and Wildlife (CDFW), CNPS Calflora, NatureServe, USDA Plants Database Heikens and Ertter 2019 in Jepson eFlora, Phipps 2019 in the Flora of North America). The California Fish and Game Commission (CFGF) has not previously reviewed this species for listing. A petition is also being submitted to US Department of Interior Fish and Wildlife Service (USFWS) for listing under the US Endangered Species Act (ESA).

Shasta snow-wreath remained unrecognized so long because its flowers, the most distinguishing feature, only appear for a week to 10 days in late April or early May. When not in flower, the plant resembles common shrubs such as oceanspray (*Holodiscus discolor*) and ninebark (*Physocarpus capitatus*).

There is very little empirical data about the response of Shasta snow-wreath to various management techniques, including response to fire. To learn more, permanent monitoring plots were established in 2011-2012 to better understand the ecology, response to disturbances such as

fire, and long-term viability of this endemic species. Results of the monitoring were published in 2017.

Nearly all occurrences of Shasta snow-wreath occur on lands that are actively managed. There is one occurrence in a Research Natural Area (RNA) on the Shasta-Trinity National Forest (STNF). The Shasta snow-wreath is classified as a Sensitive species by the United States Department of Agriculture (USDA) Forest Service (FS) and the United States Department of the Interior (USDI) Bureau of Land Management (BLM). That status applies to lands managed by the respective agencies. Six of the 24 occurrences are documented on non-federal lands (private or other) and are managed under the goals of the land owner.

Shasta snow-wreath is included on the California Department of Fish and Wildlife (CDFW) Special Vascular Plants, Bryophytes, and Lichens List, with a California Rare Plant Rank of 1B.2 (rare, threatened, or endangered in CA and elsewhere) but has no status under the California Endangered Species Act. The major action (raise Shasta Dam) that will modify habitat is proposed by the USDI Bureau of Reclamation (BOR) under the project name of Shasta Lake Water Resources Investigation (SLWRI).

The Shasta snow-wreath is threatened by four general factors as specified in California Endangered Species Act (CESA), and thus warrants state protection. The four factors specified under CESA are: Modification or curtailment of habitat or range; Overutilization; Disease and Predation; Existing Regulatory Mechanisms and Other Factors.

The species is threatened with significant **modification and curtailment of habitat**, as a result of the proposal to raise Shasta Dam, inundate (flood) additional acres and move other infrastructure. This inundation and other associated actions would affect **62 percent** of all known occurrences of the plant species (9 out of 24 occurrences by inundation plus 8 by other actions) of the entire known population of Shasta snow-wreath.

Additional curtailment of habitat is anticipated from other land management actions such as mining, road and trail maintenance and vegetation management such as prescribed fire (although some fire may be beneficial).

Habitat curtailment from other processes such as wildfire, landslides and climate change are anticipated. While some fire is expected to be beneficial, the parameters of what is beneficial and what is not are not documented or quantified.

Over utilization appears to be a minor factor as do **disease and predation**. The **existing regulations** are inadequate to reduce or prevent the proposed and on-going destruction of individuals and habitat and are not responsive to other factors that when added to the changes in habitat and occurrences are likely to lead to endangerment and or complete loss of this species. **Other natural and man-made factors** also appear to be minor factors at this time although climate change and geological instability as affected by expected changes in climate and wildfires are difficult to quantify at this time.

All of the four factors interact and pose a cumulative threat to the species.

INTRODUCTION

Shasta snow-wreath was not known to science until 1992, when it was discovered northeast of Redding, California, and described as a new species in *Neviusia*, previously a monotypic genus. Shasta snow-wreath remained unrecognized so long because its flowers, the most distinguishing feature, only appear for a week to 10 days in late April or early May. When not in flower, the plant resembles common shrubs such as oceanspray (*Holodiscus discolor* (Pursh) Maxim.) and ninebark (*Physocarpus capitatus* (Pursh) Kuntze) (Shevock et al. 1992).

Another factor that helped the wiry, deciduous shrub with soft, tooth-edged leaves remain anonymous to botanists is that it grows in places dominated by poison oak (*Toxicodendron diversilobum* ((Torr. & A. Gray) Greene) (Shevock et al. 1992). Its range is far from any university, in a geographic area that is poorly explored botanically, with fewer than average numbers of specimens on file at California herbaria. Unlike many new taxa that were collected numerous times but misidentified, there are no herbarium specimens of *Neviusia cliftonii* collected before 1992.

Shevock (1993a) indicates that “We decided to take advantage of the enthusiasm displayed by botanists in the new species and arranged an organized search for Shasta snow-wreath (Nelson 1993) to search for additional occurrences May Day weekend (April 30-May 2) in 1993.”

Shasta snow-wreath is one of only two species in the genus *Neviusia*. The other species within the genus is *Neviusia alabamensis*, a rare endemic of the southeast U.S. There are no other species of *Neviusia* in California nor adjacent states. There is agreement on the classification and the scientific name of this species (California Natural Diversity Database -CNDBB-of the California Department of Fish and Wildlife-CDFW-2018a, Calflora 2019, NatureServe 2019, USDA Plants Database 2019, Heikens and Ertter 2019 in UCB Jepson eflora, Phipps 2019 in Flora of North America eflora). The common name used here follows Kartesz and Thieret (1991).

The planning process to raise Shasta Dam (SLWRI) (US GPO 1980) by the Bureau of Reclamation (BOR) has included vegetation mapping and botanical surveys in the area, increased the botanical interest and concern in the flora surrounding Shasta Lake, and resulted in documentation of many of the currently known Shasta snow-wreath sites (USDI BOR Mid-Pacific Region 2014a).

These surveys associated with the BOR proposal and additional surveys have documented 24 element occurrences (CNDDDB 2018), with Jules et al. (2017) reporting 33 occurrences by splitting CNDDDB element occurrences into sub-colonies.

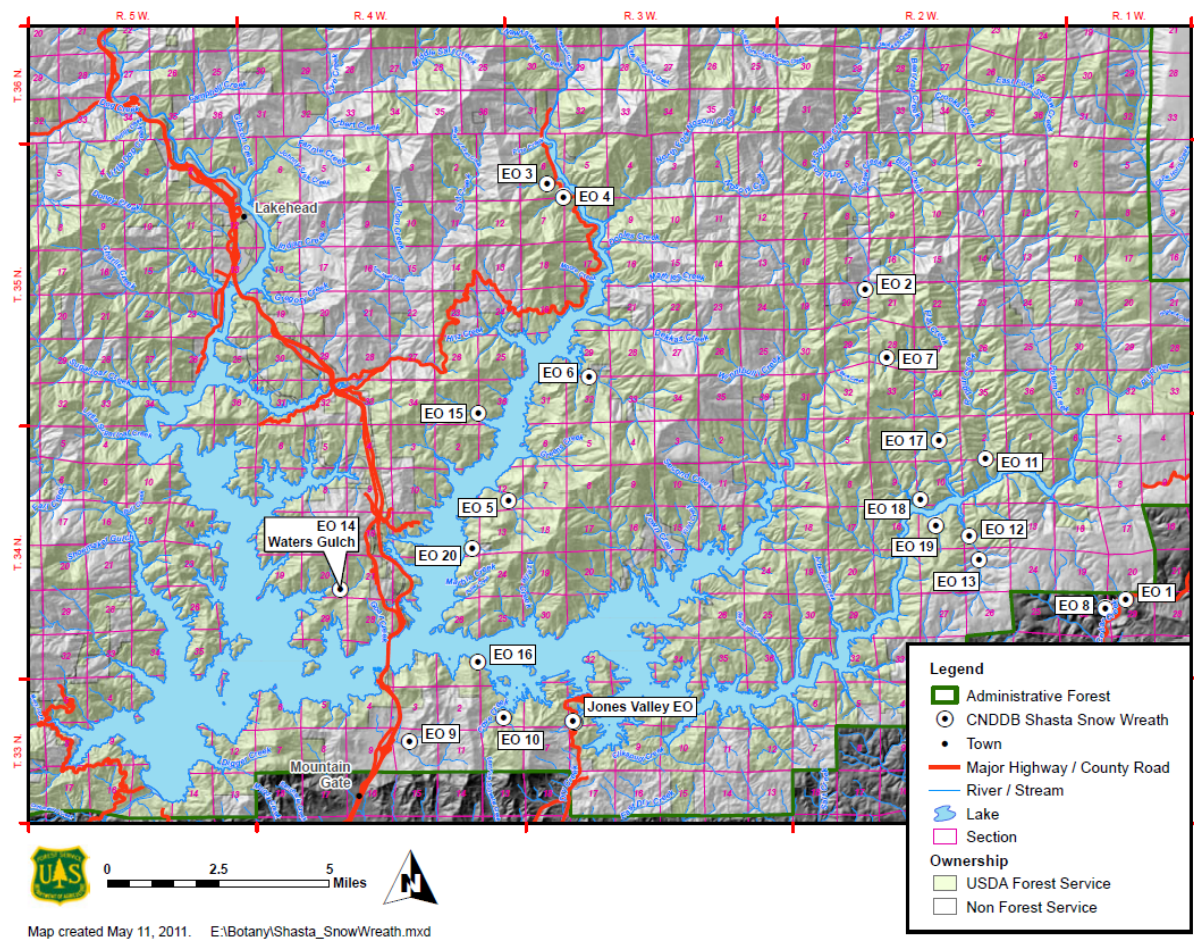

Shasta snow-wreath occurs within the Klamath Geomorphic province (USDI BOR 2014b) on Triassic age terrane (Cheng 1997, Ertter 1993). It was originally thought to occur only on limestone but is now documented to occur on other substrates (discussed in detail in following sections) (Lindstrand and Nelson 2005a, 2006). Permanent monitoring plots were established in 2011 in seven of the occurrences and an additional plot added in 2012 to better understand the ecology, response to disturbances such as fire, and long-term viability of this endemic species. These plots will be followed over time by the FS Regional Ecology Program and the Shasta-Trinity National Forest with the assistance of summer field crews hired through Humboldt State University. Shasta snow-wreath monitoring data was collected in 2011-2013 (personal communications Julie Kiersted Nelson 2013, Jules et al. 2017).

RANGE OF THE SPECIES

Shasta snow-wreath is endemic to California, occurring only near Shasta Lake in Shasta County. The total range covers about 250 square miles (NatureServe Explorer 2019; Lindstrand and Nelson 2005a, 2005b, 2006; DeWoody et al. 2012a; CNDDB 2018). There are now 24 documented element occurrences (DeWoody et al. 2012a, Lindstrand and Nelson 2005b, CNDDB 2018) (Figures 1 and 2, Table 1). Because of extensive searching between 1992-2016, it is unlikely that there will be many more occurrences discovered.

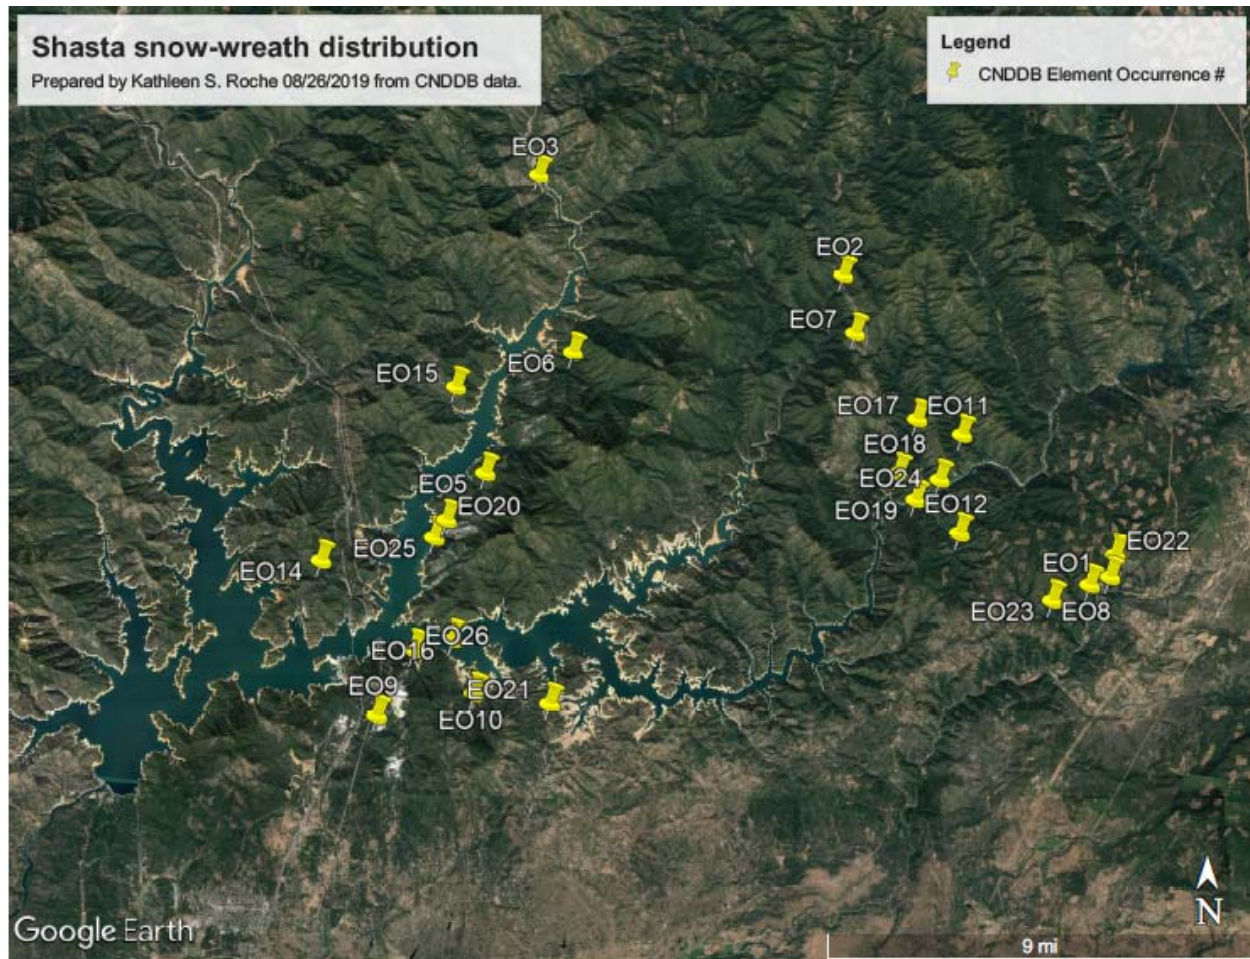

Shasta snow-wreath is presumed to have been more widespread and populations more connected along river corridors before the filling of Shasta Lake in 1948, as evidenced by the many populations that reach their lower limit at the full pool line of Shasta Lake (DeWoody et al. 2012a, Lindstrand and Nelson 2006). However, as a relict species, the geological history and resulting isolation of Shasta snow-wreath may have created an extinction debt because of time delays between the geological impacts on this species, such as destruction/isolation of habitat, and the species' potential disappearance (Jablonski 2002). The following images and table illustrate the distribution and other information about Shasta snow-wreath.

Figure 1. Shasta snow-wreath Map of Element Occurrences as of 2011.

Source: Julie Kiersted Nelson 2011, CNDDDB Element Occurrences 2011. (EOs 3 and 4 have since been combined into EO3 following more extensive survey work. The EO labeled as Jones Valley is CNDDDB EO 16.)

Source: Kathleen S. Roche 2019. EO= Element occurrence.

*Acres are extracted from CNDDDB Occurrence reports.

** Two occurrence were subsumed into other element occurrences. Total occurrences = 24.

LAND OWNERSHIP AND MANAGEMENT DIRECTION

Of the 24 documented element occurrences, all but 6 occur entirely on National Forest System (NFS) Lands that are managed by the Shasta Lake Ranger District of Shasta-Trinity National Forest, United States Department of Agriculture Forest Service (Figure 1 and 2, Table 1, CNDDDB 2018). Many of the occurrences on NFS lands are within the Whiskeytown–Shasta–Trinity National Recreation Area (NRA) as established by the U.S. Congress in 1965 (US GPO 1965). The emphasis of the NRA is to provide recreation associated with the reservoirs (lakes). The authorizing act, Public Law 89-336 also states in section 4(a)(3): “such management, utilization, and disposal of renewable natural resources as in the judgment of the respective Secretary will promote or is compatible with, and does not significantly impair, public recreation and conservation of scenic, scientific, historic, or other values contributing to public enjoyment.”

One occurrence is within the Devil’s Rock-Hosselkus Research Natural Area (DRH-RNA) of the Shasta-Trinity National Forest (USDA FS STNF1996, Cheng 1997). The DRH-RNA is managed for natural conditions as specified in the STNF LRMP (USDA FS STNF 1996) and FSM 4063 (USDA FS 2005). The DRH-RNA is 5,500 acres in size (Cheng 1997).

Six occurrences are partially or completely on non-federal or private lands (CNDDDB 2018) and these lands are managed to meet land owner goals.

CHRONOLOGY OF PAST EVENTS AND INVESTIGATIONS

56-33.9 million years ago - Shasta snow-wreath thought to have originated (Ertter 1993, deVore et al. 2004, Stebbins 1993).

1735 - Carl Linnaeus publishes *Systema Naturae* and established the binomial system of naming species (Linnaeus 1756). Shasta snow-wreath scientific name, *Neviusia cliftonii*, conforms to this naming system.

1850–1945 - Bully Hill area is explored and developed for mineral deposits (Albers and Robinson 1961, Lydon and O’Brien 1974).

1858 - Asa Gray named *Neviusia* as a new genus of the Rose family (Gray 1858).

1906 - Studies in flower pollination (Knuth 1906) has discussion of other members pollination strategies in other members of this tribe of plants.

- 1908-1939 - Delmar railroad operates from Bella Vista to the town of Pitt in the vicinity of the current Shasta Lake and provides services to Bully Hill Mine (Smith 2012) introducing settlers to the area.
- 1935-1945 - Bureau of Reclamation purchases and reserves lands for Shasta Lake reservoir (Stene 1996).
- 1945 - Shasta Lake is filled and inundates more than 29,500 acres (11,938 ha) (DeWoody et al. 2012a, USDI BOR 2015).
- 1945-2018 - Road within DRH-RNA intermittently maintained.
- 1948 - 2018 (estimated) - Waters gulch trail maintained intermittently with some disturbance to Shasta snow-wreath plants.
- 1965 - Legislation to establish the Whiskeytown Shasta-Trinity National Recreation Area in the State of California, and for other purposes (US GPO 1965).
- 1990's (estimated) - Road slide out occurred within DRH-RNA.
- 1992 - Shasta snow-wreath plants discovered by Dean W. Taylor and Glenn A. Clifton in May and described in Winter 1992 issue of NOVON (Shevock et al. 1992).
- 1993 - Organized search for additional element occurrences (Nelson 1993).
- 1994 - Wehr and Hopkins identify *Neviusia* in fossils at Republic, Washington (Wehr and Hopkins 1994).
- 1999 - Shasta Lake Water Resources Investigation (USDI BOR 2019) begins to investigate raising the height of Shasta Dam.
- 2001 (estimated) - Waters gulch occurrence of Shasta snow-wreath affected by brushing associated with a wildland fire response but was not burned (personal communications Julie Kiersted Nelson 2016a).
- 2004 - DeVore publishes on Fossil *Neviusia* leaves in Okanagon Highlands in southern British Columbia Canada (DeVore et al. 2004).
- 2005 - Lindstrand and Nelson describe additional occurrences of Shasta snow-wreath in Fremontia (Lindstrand and Nelson 2005a).
- 2006 - Lindstrand and Nelson describe habitat, geologic, and soil characteristics of Shasta snow-wreath in Madroño (Lindstrand and Nelson 2006).
- 2011 - Monitoring plots established (Jules et al. 2017) prescribed fire in one location Silverthorn, south side of Shasta Lake, north of Bear Mountain (Newburn and Payne 2014).

- 2011 - Green-Horse Habitat Restoration and Maintenance project planning begins 05/23/2011 (USDA Forest Service 2015).
- 2012 - Monitoring of response to prescribed fire (Jules et al. 2017).
- 2014 - Green-Horse project Draft Environmental Impact Statement (DEIS) proposing vegetation management in the area (USDA Forest Service 2015) released for comment 11/05/14.
- 2015 - On July 29, 2015, the Bureau of Reclamation transmitted to Congress the Final Feasibility Report and Environmental Impact Statement for the Shasta Lake Water Resources Investigation (USDI BOR 2015). The report describes the potential technical, environmental, economic, and financial evaluations prepared to date for alternatives to raise Shasta Dam, located approximately 10 miles northwest of Redding, California. The report also identifies next steps to identify construction cost share partners and project financing and develop the Recommended Plan. The project is intended to increase water supply and water supply reliability for agricultural, municipal and industrial, and environmental purposes and increase survival of anadromous fish populations in the upper Sacramento River.
- 2015 - Green-Horse project Draft Record of Decision (ROD) and Final Environmental Impact Statement (FEIS) posted to Shasta-Trinity National Forest webpage in December (USDA FS 2015).
- 2016 - Green-Horse project Record of Decision (Myers 2016) signed November 17, 2016.
- 2017 - Jules et al. (2017) publish results of *Neviusia* monitoring.
- 2017 - Green-Horse project implementation begins.
- 2018 – Hirz fire burns through Element Occurrence 3 (USDA FS STNF 2018).
- 2019 – Invasive plant treatment completed at Packers Bay (EPIC 2019).
- 2019 - Petition for listing filed with FWS on September 30, 2019.

CONSERVATION STATUS

Regulatory

Shasta snow-wreath is included on the California Department of Fish and Wildlife Special Vascular Plants, Bryophytes, and Lichens List (CDFW 2018a,) and *CNPS Inventory of Rare and Endangered Plants* (CNPS Rare Plant Program 2019) with a California Rare Plant Rank of [1B.2](#) (rare, threatened, or endangered in CA and elsewhere); this ranking confers conservation

status under the California Environmental Quality Act. Shasta snow-wreath is not currently listed under the California Endangered Species Act (CDFW 2018b). The intent of this document is to have it added to this list.

Shasta snow-wreath is currently listed as sensitive by the USDA Forest Service, Pacific Southwest Region under the Regional Forester's Sensitive Species list (USDA FS R5 2013, USDA FS 2005a in FSM 2670) and by the USDI BLM (2015) for California (USDI BLM 2015). Sensitive species are managed to avoid a trend towards federal listing (USDA FS 2005a in FSM 2670).

As Forest Plans are updated to the 2012 Planning Rule standards (USDA FS 2012), the Shasta-Trinity National Forest may, or may not, include Shasta snow-wreath in its "species of conservation concern (SCC)" list. Once this occurs management on the forest would then no longer be subject to the Regional Forester's Sensitive Species list. After revision, new Forest Plan components would address its status as a species of conservation concern. The SCC list will at least partially use NatureServe rankings. The NatureServe rankings (NatureServe Explorer 2019) for Shasta snow-wreath are:

- Global G2 – Imperiled,
- National N2- Imperiled,
- State of CA S2 – Imperiled.

The state status would also be considered in the evaluation of species of conservation concern as the Shasta-Trinity National Forest - Forest Plan is revised and is considered in any status for BLM public lands.

Shasta snow-wreath occurs within the Devil's Rock-Hosselkus Research Natural Area (DRH-RNA) as currently established. Research Natural Areas are managed for natural conditions. This status as an RNA could be revised with the Forest Plan Revision with the completion of additional environmental analysis specific to that status (Cheng 1997, USDA FS 2005b). The DRH-RNA has one occurrence of Shasta snow-wreath.

This petition information is being concurrently submitted to the CFGC and USFWS (Roche 2019b,c). For species listed under the Federal Endangered Species Act, the USFWS would be

consulted for plan components and project actions that may affect the listed species and/or its critical habitat.

Draft conservation strategy

Currently, there are no known draft conservation strategies other than the Forest Service Sensitive species status which applies to 19 occurrences and the Devils Rock-Hosselkus Research Natural Area policy and direction which applies to one occurrence.

Past Conservation Efforts

Shasta snow-wreath has been, and likely continues to be collected by botanists and gardeners for growing in personal gardens (reduced to possession—removed from federal ownership and committed to private ownership/possession).

Some of the Shasta snow-wreath material that has been removed from the wild might also provide for off-site conservation. The Dunsmuir Botanical Gardens in Dunsmuir, California has at least 2 specimens growing there. Located in the Dunsmuir City Park in far northern California, the Gardens encompass ten acres of hilly, wooded area with a meadow containing the various gardens. The purpose of the Dunsmuir Botanical Gardens is to enhance the natural setting of the Dunsmuir City Park for the enjoyment and horticultural education of the public through the establishment and maintenance of native and woodland plants (Dunsmuir Botanical Gardens 2014) Ertter and Shevock (1993) indicate that Members of the California Native Plant Society currently are cultivating *N. cliftonii* and that it is growing at East Bay Regional Parks Botanical Garden. Christman (2011) also documents nearby cultivation locations, while Breen (2019) and Tu (2019) document Shasta snow-wreath growing at the Hoyt Arboretum in Portland, Oregon since 1999. The California Native Plant Society, CNPS Calscape (2019) and Calflora (2019) indicate the species is occasionally available from nurseries commercially.

None of the Shasta snow-wreath is currently designated as a scientifically documented genetic resource of conservation value. There are no other known past conservation efforts other than this informal, non-systematic off-site conservation from those who have cuttings of this plant.

POPULATION STATUS

A population is a group of organisms of one species that interbreed and live in the same place at the same time (Biology 2019a).

Demographics

Demographics describe the size, structure, and distribution of a population, and spatial or temporal changes in response to birth, migration, aging, and death. Elzinga et al. (1998) indicate that a population's demographic distribution is the percentage of the population or number of individuals within classes such as seedling, non-reproductive adult, reproductive, and senescent. There is little knowledge of any age classes of Shasta snow-wreath. There are now 24 documented element occurrences (DeWoody et al. 2012a, CNDDDB 2018, Lindstrand and Nelson 2005). All of those comprise adult flowering occurrences with some degree of relatedness – e.g. of clonal origin. There are pictures of achenes. There is no confirmed documentation of seedlings. All plants grown in cultivation are clonal (from cuttings).

Population Record

The most complete population records are contained in the California Natural Diversity Database (CNDDDB 2018) and discussed in DeWoody et al. (2012a). There are now 24 documented element occurrences (DeWoody et al. 2012a, Lindstrand and Nelson 2005b, CNDDDB 2018). Because of extensive searching between 1992-2016, it is unlikely that there will be more occurrences discovered. Searches included those specific to Shasta snow-wreath and project surveys by the USDA Forest Service, Shasta-Trinity National Forest and occurred within the known distribution and beyond (personal information).

Jules et al. (2017) established monitoring plots starting in 2011 and report baseline information in their 2017 publication.

Viability

Viability is regarded as ability to survive or live successfully (Biology 2019b). The persistence of a population (population viability) into the future is based on many factors including the genetics, biology and natural history of the species, the natural disturbance elements of the area it

inhabits and anthropogenic factors that may directly threaten the persistence or may change the frequency or severity of natural disturbances and thus reduce persistence on the landscape.

Since there are no verified seedlings of Shasta snow-wreath, and there is a lack of information regarding the possible life stages, there is no opportunity to do a population viability analysis. Seed collected in 1992, did not germinate under any of the tested regimes at the University of California Botanical Garden (Ertter and Shevock 1993). There are no other reports of seed collected or of reproduction or viability testing. Achenes are known from photographs and from the type description. Achenes (seed structures) are known from photographs (Puentes 2011, Doyen 2015, Ertter and Shevock 1993) and the formal species description (Shevock et al. 1992).

De Witte and Stöcklin (2010) indicate that species' life-history and population dynamics are strongly shaped by the longevity of individuals, but life span is one of the least accessible demographic traits, particularly in clonal plants. Continuous vegetative reproduction of genets enables persistence despite low or no sexual reproduction, affecting genet turnover rates and population stability. Genet size is sometimes used to estimate age and there is some information available on genet size for Shasta snow-wreath. However, for quaking aspen, *Populus tremuloides*, molecular divergence detected by microsatellites was related to clone age with the help of demographic models of ramet and genet dynamics and indicated that genet size actually is not related to life span (De Witte and Stöcklin 2010).

The plants currently in existence are of unknown age but the species is considered a fossil species (Ertter 1993, Stebbins 1993).

Mortality

Historically, it is thought that populations were lost with the filling of Shasta Lake in 1948, as evidenced by the many populations that reach their lower limit at the full pool line of Shasta Lake (DeWoody et al. 2012a, Lindstrand and Nelson 2006). Monitoring of current populations began in 2011-2012 (Jules et al. 2017). There is no other documentation of loss of an Element Occurrence. There are two element occurrences that have been combined with other element occurrences as better data became available.

Informal observations (Nelson and Roche 2016) indicate that plants re-sprout from roots after some types of disturbances.

Shasta snow-wreath monitoring data was collected in 2011-2013 and published in 2017 (Jules et al. 2017). This on-going monitoring may provide information on persistence and mortality.

Population viability analysis:

Since there are no confirmed seedlings of Shasta snow-wreath, and incomplete information about longevity, there is no opportunity to do a population viability analysis.

Population expansion:

Shasta snow-wreath currently suffers from an inability to expand its range due to its relict status, lack of successful sexual reproduction, topographic limitations and associated climate differences and its ties to particular geological substrate/ancient terrane. It is surmised that, in the past, it was more widely distributed (DeVore et al. 2004).

It appears likely that the existing extent of the meta-population represents the potential extent of the entire meta-population.

NATURAL HISTORY

From the data available, Shasta snow-wreath appears to be an endemic, relict, long-lived, clonally propagated shrub that does occasionally produce seeds, apparently from sexual reproduction but those seeds are not confirmed to germinate in the wild or in attempts to propagate (Doyen 2015, Puentes/SPI 2011, Julie Kiersted Nelson personal communications 2016a, Erttter and Shevock 1993).

Fire and/or smoke has been documented to influence germination in a number of shrub species (Keeley 1987) and might be an influence for Shasta snow-wreath.

The following sections will discuss these characteristics in more detail.

Taxonomy and Species Description

The Shasta snow-wreath (*Neviusia cliftonii* Shevock, B. Ertter & D.W. Taylor) is a dicot, shrub in the rose family (Rosaceae) within the tribe Kerrieae.

The following information is from the Integrated Taxonomy Information System (ITIS 2016):

Kingdom	Plantae – plantes, Planta, Vegetal, plants
Subkingdom	Viridiplantae
Infrakingdom	Streptophyta – land plants
Superdivision	Embryophyta
Division	Tracheophyta – vascular plants, tracheophytes
Subdivision	Spermatophytina – spermatophytes, seed plants, phanérogames
Class	Magnoliopsida
Superorder	Rosanae
Order	Rosales
Family	Rosaceae – roses
Genus	<i>Neviusia</i> A. Gray – snow-wreath
Direct Children:	
Species	Neviusia alabamensis A. Gray – Alabama snow-wreath
Species	Neviusia cliftonii Shevock, Ertter & D.W. Taylor – Shasta snow-wreath

Shasta snow-wreath is thought to have established as a species about 56 to 33.9 million years ago based on landform, geologic age (Ertter 1993, Stebbins 1993).

Shasta snow-wreath was not known to science until 1992, when it was discovered northeast of Redding, California, and described as a new species in *Neviusia*, previously a monotypic genus (Shevock et al. 1992, Taylor 1993).

Shasta snow-wreath appears to be most closely related to Alabama snow-wreath (*Neviusia alabamensis*) a similar relict species located in the Southeastern United States (Shevock et al. 1992). The relictual nature of both species is thought to be associated with the ancient landforms that provide the respective habitat for each species. Adding to the science in support of the

relictual nature is recent identification of *Neviusia* fossils in the Okanagon Highlands of Washington (DeVore and Pigg 2007, DeVore et al. 2004, 2005, Wehr and Hopkins 1994).

In 1857, Asa Gray named *Neviusia* as a new genus of the Rose family, based on material from Alabama supplied by the Rev. Dr. Reuben Denton Nevius (Howard 1976, Gray 1857). *Neviusia* was placed in the tribe Kerriae, which at the time, it shared with two Asiatic genera, each with only a single species: *Kerria japonica* and *Rhodotypos scandens*. Potter et al. (2007) in a further study places fourth monotypic genus, *Coleogyne* in the Kerria tribe as well (Shevock 1993b).

Even though this part of Shasta County California was explored and settled in the 1850s and botanists traveled through it occasionally, Shasta snow-wreath remained incognito so long because its flowers, the most distinguishing feature, only appear for a week to 10 days in late April or early May. When not in flower, the plant resembles common shrubs such as oceanspray and ninebark (Shevock et al. 1992).

Description of Shasta snow-wreath from Shevock et al. (1992):

“Diffuse slender-branched understory shrub, stems erect, generally several, rarely > 1 cm diameter, the bark grayish near base, \pm reddish brown above, \pm exfoliating in strips, without obvious lenticels, herbage and young twigs \pm strigose, the hairs \pm 0.4 mm long; leaves alternate, primarily in upper 1/3 of plant, generally expanded at anthesis, the stipules linear-setaceous, free from the 4-10 (-15) mm-long petiole, often with small reddish glands, the leaf blade ovate to cordiform, 2-6(9 on sterile shoots) cm long, 1.5-5 (7) cm wide, \pm bicolored, bright green and sparsely strigose above, pallid and more densely strigose below, the venation craspedodromous with 3-8 2° veins per side, the margin coarsely toothed and shallowly lobed, the teeth apiculate; inflorescence \pm umbellate-corymbose, terminal mostly on short side branches, not otherwise pedunculate, the pedicels 1-3 cm long, very slender, *ca.* 0.3 mm thick (widening above); flowers(1-) 3-5 (-10), appearing after or with the leaves, the hypanthium \pm flat, \pm glabrous 2-3 mm diameter (pressed); sepals 5-6 \pm obovate 3.5-6 mm long, 2-4.5 mm wide, veiny, irregularly few toothed distally, spreading at anthesis, persisting in fruit; petals oblanceolate, 4-8 mm long, white, quickly deciduous; stamens many, *ca.* 50 or more, *ca.* equaling sepals, the filaments 4-5 mm long, white, \pm dilated, the anthers round, 0.3-0.4 mm long, yellow; pistils 3-6, the ovary densely white-strigose, the style \pm 3 mm long,

sparsely strigose; fruit \pm eccentrically ovoid achene, 3-4 mm long, brown, sparsely strigose.”

Shasta snow-wreath is currently known to clonally propagate (please also see following section on genetics). It occasionally produces achenes (Puentes 2011, Doyen 2015, Shevock et al. 1992, Ertter and Shevock 1993), apparently from sexual reproduction but the seeds within are not confirmed to germinate in the wild or in attempts to propagate (personal communications Julie Kierstead Nelson 2016b, Ertter and Shevock 1993).

Source: Stephanie Puentes 2011 © SPI from CalPhotos

Figure 4. *Shasta snow-wreath* achenes

Source: John Doyen 2015 © John Doyen from CalPhotos.

It is currently unknown as to whether the seeds are produced from selfing (fertilization by means of pollen from the same plant) or from cross pollination (see also following section on pollination). Knuth (1906) indicates that Alabama snow wreath (*Neviusia alabamensis*) and Japanese Kerria (*Kerria japonica*) are both self-sterile (the effect of pollen on the stigma of the same flower is inactive). In the 26 years of observation by botanists, no recently germinated seedlings have been confirmed (Nelson 2016b). The reproductive biology of the native populations of Shasta snow-wreath is little understood.

The known occurrences may, in actuality, be one or several very large clone(s) (see following section on genetics for more information on Shasta snow-wreath relatedness). Alabama snow-wreath, a similar closely-related species, grows as a suckering shrub up to six feet in height and, under ideal conditions, can produce dense thickets up to several yards across. The suckering habit may be the only means of replication that Alabama snow-wreath employs (Chafin and Owers 2010).

Since there are no confirmed seedlings of Shasta snow-wreath, there is no available information on life-cycle stages, time from seedling to maturity or longevity of individual plants. It is suspected that Shasta snow-wreath has persisted on the current landscape in perhaps the approximate same distribution in which it now occurs for up to 34 million years based on the base geology and fossil record in Canada (DeVore et al. 2004, 2005, 2007, Ertter 1993, Stebbins 1993, Wehr and Hopkins 1994, Irwin 2003). This is also supported by the genetic studies presented in the following sections. Another ancient species, Quaking aspen, *Populus tremuloides*, which employs a clonal growth habit only produces seedlings after major disturbances in the western United States (Romme et al. 2005) and might provide a model for Shasta snow-wreath as might other shrubs that have seeds that germinate after fire (Keeley 1987).

Genetics

In 2009, tissue samples were collected from 21 of 24 known populations for isozyme analysis.

This study assayed 17 isozyme loci to address 3 questions (DeWoody et al. 2012a).

1. How many genetic individuals compose each population?
2. How is genetic diversity distributed within and among populations?
3. Do patterns of genetic diversity or genetic similarity among populations correspond to geographic or ecological factors?

When assessed at 17 loci, a total of 48 multilocus genotypes were identified in the collection of 410 samples, indicating Shasta snow-wreath is capable of significant vegetative reproduction. Five populations were composed of a single genet each, with an average of 3.14 genets per population and a maximum of 15 genets in a single population. Allelic diversity was low, with a maximum of 3 alleles observed at one locus. Populations were differentiated, with 85% of the allele frequency variance distributed among populations. Multivariate analysis identified 3 clusters of genetically similar populations: one cluster composed of 15 populations, a second cluster composed of 5 populations, and one population being distinct. Individuals from the distinct population displayed unique alleles at 2 loci (AAT-1 and AAT-2). The distribution of populations among clusters did not correspond to geographic (watershed) or substrate classifications, indicating that additional, unmeasured factors may influence the genetic structure of this species. Five populations were composed of a single genet each with an average or 3.14 genets per population and a maximum of 15 genets in a single population.

DeWoody et al. (2012a) indicate that:

This survey of isozyme variation in the rare endemic *Neviusia cliftonii* revealed low levels of allelic and genotypic diversity. The lack of variation within many populations (only one or 2 genets identified in 57% of populations sampled) is consistent with regular vegetative reproduction of this woody species. The genet diversity is greater than that reported for the sole congener, *N. alabamensis*, which contained only one genotype per population at its marginal range (Freiley 1994). The low levels of allelic variation may be a consequence of the narrow range occupied by

N. cliftonii, or it may be due to historic population bottlenecks. For instance, the Shasta Lake area is known as an ancient landscape, a glacial and volcanic refuge, with high numbers of endemic species (Lindstrand and Nelson 2006). The low allelic variation may be a consequence of the narrowing of the *N. cliftonii* range during the most recent glacial maximum and subsequent climate variations (Lindstrand and Nelson 2006). Alternatively, the low variation may reflect a more recent bottleneck resulting from Shasta Dam and Shasta Lake. Construction of the dam likely increased fragmentation and decreased the size of some populations, which together can change the genetic structure of populations (Honnay et al. 2007, Aguilar et al. 2008). The low levels of genotypic variation within populations prevented statistical analysis for genetic signatures of population bottlenecks (sensu Cornuet and Luikart 1996).

DeWoody et al. (2012a) also indicate that:

One possible consequence of vegetative reproduction is a greater potential for populations to be genetically distinct, as vegetatively reproducing species tend to have poor dispersal capability (Ellstrand and Roose 1987, Silvertown 2008). Plants that have mechanisms for long-distance dispersal via either pollen or seed typically display lower levels of genetic differentiation between populations than those with limited dispersal (Hamrick and Godt 1996).

Pollination

Pollination is the primary step in seed formation. Shasta snow-wreath is currently known to clonally propagate but it does also rarely produce achenes (see earlier pictures, Puentes 2011, Doyen 2015, Shevock et al. 1992, Ertter and Shevock 1993), apparently from sexual reproduction but the seeds within are not confirmed to germinate in the wild or in attempts to propagate (personal communications Julie Kierstead Nelson 2016b, Ertter and Shevock 1993).

It is currently unknown as to whether the achenes/seeds are produced from selfing (fertilization by means of pollen from the same plant) or from cross pollination. Ertter and Shevock (1993) indicate that blossoms have no scent.

Knuth (1906) indicates that Alabama snow wreath (*Neviusia alabamensis*) and Japanese Kerria (*Kerria japonica*) are both self-sterile (the effect of pollen on the stigma of the same flower is inactive).

In the 26 years of observation by botanists, no recently germinated seedlings have been confirmed (Julie Kiersted Nelson personal communications 2016a, Ertter and Shevock 1993, Jules et al. 2017).

It is undetermined if pollination occurs via wind (anemophily) or by insects (entomophily). From the structure of the flowers, it would appear that Shasta snow-wreath might be wind pollinated.

Figure 5. Shasta snow-wreath flower structure

Source: Julie Kierstead Nelson 2016c.

However, from its location in the lower canopy, it would appear that insect pollination is more likely.

Figure 6. Shasta snow-wreath in the lower canopy.

Source: Julie Kierstead Nelson 2010a from CalPhotos.

There are no recorded observations of insects visiting blossoms of Shasta snow-wreath. Ertter and Shevock (1993) document a lack of scent from the blossoms. Ertter and Shevock (1993) also document the search for pollinators during the May 1993 surveys.

Japanese Kerria (*Kerria japonica*), the only other species within the tribe Kerriaea with recorded information, is insect pollinated (Plants for a Future 2012). Knuth (1906) indicates that Alabama snow wreath (*Neviusia alabamensis*) and Japanese Kerria (*Kerria japonica*) are both self-sterile (the effect of pollen on the stigma of the same flower is inactive). Pendleton and Pendleton (1998) indicate that *Coleogyne ramosissima*, within the tribe Kerria is wind pollinated.

Because it is thought that Shasta snow-wreath is a relict species that may have originated during the Eocene tertiary geological period (56 to 33.9 million years ago) (Ertter 1993, Stebbins 1993),

there may be a pollinator that is extinct and has led to an extinction debt (the future extinction of species due to events in the past). There was significant mass extinction of insects, at the end-Permian (Permian–Triassic; P-T) (Labandeira 2005) which may have affected the available pollinators for Shasta snow-wreath.

Kuussaari et al. (2009) indicate that extinction debt is a phenomenon that can easily remain unnoticed but that should be taken into account in conservation planning. Habitat loss, climate change and invasive species are the main global threats to biodiversity constituting key single and synergistic drivers of extinctions. The effects of these components of global change can be almost immediate in some cases, but often it takes a considerable amount of time for declining populations to disappear following environmental perturbations: delayed extinctions, also called extinction debt, are an important factor to consider in biodiversity conservation. However, as long as a species that is predicted to become extinct still persists, there is time for conservation measures such as habitat restoration and landscape management.

Terminology associated with extinction events from Kuussaari et al. (2009) that helps to explain the concept is shown below.

Equilibrium state: Also known as stable state. Situation in an ecological community when the number of species is not changing because the rate of local extinctions equals the rate of local colonizations.

Extinction: The disappearance of a species. Extinction might occur locally (at the level of a habitat patch), regionally (at a landscape level) or on larger spatial scales (at country, continent or global levels).

Extinction debt: In ecological communities, the number or proportion of extant specialist species of the focal habitat expected to eventually become extinct as the community reaches a new equilibrium after environmental disturbance such as habitat destruction, climate change or invasion of exotic species. In single species, the number or proportion of populations expected to eventually become extinct after habitat change.

Extinction threshold: The minimum amount of habitat area, connectivity and quality required for a species to persist.

Focal habitat: The habitat type that is currently under observation. Focal patch is the particular habitat patch under observation.

Habitat connectivity: The amount of focal habitat in the landscape surrounding the focal habitat patch (opposite to isolation). Ideally measures of connectivity take into account both the area and distance of the surrounding patches.

Habitat loss: Decrease in area of the focal habitat, used here as a surrogate for habitat area loss and habitat fragmentation, i.e., covering a decrease in both area and connectivity of habitat patches.

Metapopulation: A set of local populations that occupy a network of habitat patches and are linked by dispersal.

Relaxation time: Also known as time lag to extinction, extinction lag, time delay to extinction, time to extinction. The time taken for a community of species to reach a new equilibrium after an environmental disturbance. Extinction debt is gradually paid during the relaxation time as the expected extinctions are realized.

Pollination biologists have shown that pollination failure can occur at all steps in the dispersal process and at several different levels. Increased risk of pollination failure is associated with pollen if it is delivered to a stigma too little, too much, too late, too mixed in composition or too poor in quality. It is associated with pollinators when they are too few or too inconstant, and with plants when they are too specialized or too selective. It is associated with populations when they are too sparse, too small in number or too uniform genetically, and with communities when they are too fragmented, genetically impoverished or under rapid modification. Understanding the causes of pollination failure in plants can aid the successful conservation and recovery of rare plants, maintenance of crop yields, and sustainable use of wild plant resources such as forest timber (Wilcock and Neiland. 2002).

Climate change could also affect pollinators and phenology (bloom timing) such that pollinators are not available during the short bloom season for Shasta snow-wreath (Yang and Rudolf 2010).

Habitat

Shasta snow-wreath grows in the dense understory of black oak (*Quercus kelloggii*), yellow pine (*Pinus ponderosa*) dominated mixed conifer forests and foothill pine (*Pinus sabiana*) blue oak (*Quercus douglasii*) habitat around Shasta Lake north of Redding, California (Shevock et al. 1992, Lindstrand and Nelson 2005a, 2006, Jules et al. 2017, CNDDB 2018, figure 6). Shasta snow-wreath occupies sites on lower slopes of steep mountain valleys on various aspects on non-wetland sites (Calflora 2019, NatureServe 2016). It occurs in riparian sites within the yellow pine forest community (Calflora 2019).

Shasta snow-wreath was originally thought to occur only on limestone but is now documented to occur on other substrates (Shevock et al. 2005, Lindstrand and Nelson 2005a, Lindstrand and Nelson 2006). Figure 2 (Google Earth Image 2019) illustrates the variety of substrates.

Figure 7. *Neviusia cliftonii*; (shown with *Quercus kelloggii*)

Source: Julie Kierstead Nelson 2010b.

Currently, Shasta snow-wreath is found in 24 locations that occupy about 116 acres (NatureServe 2016, CNDDDB 2018) and that are spread across about 250 square miles. The occurrences are not directly connected by occupied or even suitable habitat. (NatureServe Explorer 2016, Lindstrand and Nelson 2005a, b, Lindstrand and Nelson 2006, DeWoody et al. 2012a, K.S. Roche observations 2016).

Shasta snow-wreath is presumed to have been more widespread and populations more connected along river corridors before the filling of Shasta Lake in 1948, as evidenced by the many populations that reach their lower limit at the full pool line of Shasta Lake (DeWoody et al. 2012a, Lindstrand and Nelson 2006).

Hanski and Ovaskainen (2001) indicate that to allow for long-term metapopulation persistence, a network of habitat fragments must satisfy a certain condition in terms of number, size, and spatial configuration of the fragments. The influence of landscape structure on the threshold condition can be measured by a quantity called metapopulation capacity, which can be calculated for real fragmented landscapes. Habitat loss and fragmentation reduce the metapopulation capacity of a landscape and make it less likely that the threshold condition can be met. If the condition is not met, the metapopulation is expected to go extinct, but it takes some time following habitat loss before the extinction will occur, which generates an extinction debt in a community of species.

Vellend et al. (2006) indicate that when habitats are fragmented, species are expected to go extinct from small isolated habitat patches, but this process of “relaxation” (Diamond 1972) takes time. Until relaxation is complete, such habitat patches are said to have an “extinction debt” (Tilman et al. 1994), in that some species are destined to go locally extinct even in the absence of further perturbations.

Climate

Sawyer (2006) indicates that the middle Sacramento River country of western Shasta County, where Shasta snow-wreath occurs, experiences hot summers and rainy winters. These lands do not lie in the rain shadow of the mountains to the west, since many winter storms move up the Sacramento Valley. Areas at higher elevations receive ample precipitation (60–100 in. annually), but the canyon lands receive only half that of the mountain slopes. Winter temperatures at lower elevations are mostly above freezing, and summer temperatures are very high. Only the highest peaks hold snow into the summer.

Newburn and Payne (2014) describe the climate for the Green-Horse project area that surrounds many of the occurrences of Shasta snow-wreath as: as Mediterranean, characterized by wet, cool winters and dry, warm summers. Mean annual precipitation varies from approximately 70 inches in the upper portions of the watersheds to nearly 40 inches at the lower end. About 90 percent of the precipitation falls between October and April, the majority of which occurs as rain with very little snowpack. Summer thunderstorms are common and can release significant localized rain.

These storms can also be dry with conditions that encourage fire ignition and spread from lightning strikes, with an event in June of 2008 being an example of this pattern (Bagley Fire).

Since the Shasta snow-wreath occurs in the vicinity of Shasta Lake, Shasta Dam is the closest and most pertinent quantitative weather and climate record. The temperature and precipitation at Shasta Dam from 1981 to 2010 is summarized in the table below.

Table 3. Temperature and Precipitation Data at Shasta Dam.

Measurement	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Annual
Average Max. Temperature (F)	52.5	56.7	61.3	68.5	77.5	86.0	95.2	93.7	87.8	75.2	60.5	53.1	72.3

Source: Western Regional Climate Center 2016.

Because Shasta snow-wreath is considered a living fossil (Ertter 1993, Stebbins 1993), the paleo climate is also worth examining. Wolfe (1978) indicates that the Paleocene and Eocene floras from North America...provide the basis for a number of climatic inferences: (1) An overall gradual warming took place from the Paleocene into the middle Eocene, with gradual cooling until the terminal Eocene event and (2) Cool intervals occurred during the late Paleocene, the late early to early middle Eocene, and the early late Eocene. Thus, the changes in climate may have affected the current existence, distribution and survival of Shasta snow-wreath. The paleo climate was influenced by continental movements, changes in ocean circulation patterns, building mountain ranges, and the Laurentide ice sheet (Minnich 2007). At different times, the paleo climate was warmer and dryer as well as colder and wetter than the current (Topel et al. 2012) meaning that Shasta snow-wreath appears to have considerable plasticity or adaptability to different climate regimes.

Fire History

Newburn and Payne (2014) discuss the fire history of the Green-Horse project area, which overlaps the distribution of Shasta snow-wreath, in their 2014 report:

...few forested regions have historically experienced fires as frequently and with such high variability in fire severity as the Klamath Mountains Bioregion (Taylor and Skinner 1998), this is primarily due to climatic variables and the diverse physical and biotic arrangement of the Klamath Mountains. South- and west-facing aspects and upper slope positions typically experienced higher severity fire than lower slopes and north- and east-facing aspects. On the eastern edge of the Klamath Mountains, median fire return intervals ranged from 8 to 38 years (Skinner et al. 2006). With frequent fire of low to mixed severity, fuel accumulations over most of the area were historically maintained at low levels, and landscape features such as ridge-tops and streams were often sufficient to impede fire spread (Skinner et al. 2006).

Newburn and Payne (2014) go on to indicate:

...fire suppression efforts were institutionalized after the establishment of the National Forest System (circa 1876-1905). Since the onset of fire suppression in the early 1900s, and with the increased effectiveness of mechanized suppression techniques (fire engines, aircraft, etc.) in later years, most of the fires were kept small until recent years. [Supporting references added: Calkin et al. 2014, USDI et al. 2001, Williams 2005.]

The acres burned by wildfire within the Green-Horse project area since 1920 are shown in the following table.

Table 4. Acres burned by wildfire in the Green-Horse project area 1920-2016, by decade

Decade	Acres Burned
1920s	7,592
1930s	20,239
1940s	247
1950s	0
1960s	0
1970s	0
1980s	0
1990s	0
2000s	51
2010s	5
Total	28,134

Source: Newburn and Payne 2014.

There were additional fires that occurred between 2016 and the present. Those have not been summarized here. There is a map of the Hirz fire of 2018 later in this document that provides a

visual comparison. The Mountain Fire (CalFire 2019) burned close to the Jones Valley habitat (Element Occurrence 16) in August 2019.

Geology and Soils

Kruckeberg (2002) indicates that plants are captive of their inanimate environments. All terrestrial higher plants are tethered to some kind of underpinning: soil rock water or other plants. In turn, the anchoring media are the products of physical and biological processes and materials. A major component of the origin and character is geological.

Shasta snow-wreath occurs within the Klamath Geomorphic province (USDI BOR Mid-Pacific Region 2014b) on Triassic age terrane (Cheng 1997, Ertter 1993).

Hotz (1971) indicates that:

The eastern Klamath belt where Shasta snow-wreath grows includes rocks that range in age from Ordovician (?) [sic] to Jurassic. Rocks of Ordovician (?) [sic] and Silurian age form an elongate belt on the east side of the province south of Yreka. A large area occupied by strata ranging in age from Devonian to Jurassic lies in the southeastern part of the province north of Redding. Both areas include lithologies typical of a eugeosynclinal environment of deposition that is, graywacke, sandstone, shale and mudstone, chert and chert pebble conglomerate, impure limestone, and a wide variety of volcanic rocks including greenstone, pillow lavas, volcanic breccias and pyroclastics of basaltic composition, spilite and keratophyre flows and pyroclastics, and andesitic flows and tuffs. Strata of the eastern Klamath belt are estimated to have an aggregate thickness of 40,000-50,000 feet.

The Devil's Rock Hosselkus limestone is Triassic in origin (Keeler-Wolf and Keeler-Wolf 1975, Keeler-Wolf 1989, Cheng 1997).

THREATS

The threats to Shasta snow-wreath are both anthropogenic and natural and are presented below in term of the factors required under the CESA.

Factor A. Modification or curtailment of habitat or range

The Shasta snow-wreath is endangered with significant destruction, modification, and curtailment of habitat and range, as a result of a number of actions which are discussed in more detail in the following paragraphs.

Inundation

Shasta snow-wreath occurrences and potential habitat is threatened by the BOR (Federal) Action proposed to raise Shasta Dam. Shasta Lake (Reservoir) currently stores 4.55 million acre-feet (MAF) of water and covers an area of about 29,500 acres with a shoreline of about 420 miles. The proposal, if implemented, at the highest raise level would inundate additional area up to about 32,300 acres of land surrounding the existing Shasta lake (reservoir) (USDI BOR 2015). Inundation would destroy known occurrences and potential habitat as well as change hydrology and drainage of habitat areas.

The BOR in its 2013 Draft Fish and Wildlife Coordination Act Report (USDI BOR 2013) indicates that at that date:

During botany surveys and vegetation and habitat mapping surveys (NSR 2004, Lindstrand and Nelson 2005a,b, Lindstrand 2007), Shasta snow-wreath was found at nine sites within the Inundation Zone of the SLWRI. Therefore, 43 percent (9 of 21 subpopulations) of the entire known population of Shasta snow-wreath could be lost (or partly lost) by the proposed raising of Shasta Dam; other subpopulations could potentially be disturbed by the relocation of roads, bridges, campgrounds, and other facilities due to the SLWRI (Lindstrand 2007). The subpopulations found within the Inundation Zone include: (1) a single, relatively large population occurring in riparian habitat along the Ripgut Creek riverine reach (Pit River Arm); (2) a large, previously known population along Campbell Creek (McCloud River Arm); (3) a very large population in riparian habitat along both sides of Stein Creek (Pit River Arm) extending from near the Stein Creek/Shasta Lake confluence to 0.25 mile upstream; (4) a small population found at an unnamed stream south of Cove Creek in riparian and mixed woodland habitat on the right bank, at the confluence with Shasta Lake; (5 and 6) one moderate and one large population along Blue Ridge on the main body of Shasta Lake in hardwood-conifer and ponderosa pine habitats immediately above the Shasta Lake high water line; and (7) a moderate-sized population in riparian habitat along both banks of Keluche Creek (McCloud River Arm) near the Keluche Creek/Shasta Lake confluence (NSR 2004, Lindstrand 2007).

Other disturbances associated with Dam raise

Other disturbances could occur from moving facilities or changing access and associated road construction (USDI BOR 2015). USDI BOR (2013) goes on to say that in addition to the nine subpopulations of Shasta snow-wreath within the Inundation Zone, another eight subpopulations of Shasta snow-wreath are potentially threatened by non-project related activities (e.g., mining, development, fire, invasive species, and other human-related disturbances) due to their location adjacent to State highways, county roads, forest roads, trails, homes, and transmission lines (Lindstrand 2007). Therefore, only 19 percent of all the known populations of Shasta snow-wreath (4 out of 21 subpopulations) are not currently threatened by SLWRI or non-project related activities (Lindstrand 2007). (See computations based on current EO numbers below).

From USDI BOR (2013):

...the [FWS] Service believes that the SLWRI could result in adverse affects to rare and special status species in the vicinity of Shasta Lake, riparian habitat along the Sacramento River, and aquatic habitat in the Delta. It is unknown at this time if raising Shasta Lake would inundate a significant portion of the limited habitat of the following seven rare, but not federally listed, species each of which is endemic to the vicinity of Shasta Lake: Shasta snow-wreath (*Neviusia cliftonii*), Shasta salamander (*Hydromantes shastae*), Shasta sideband snail (*Monadenia troglodytes troglodytes*), Wintu sideband snail (*Monadenia troglodytes wintu*), Shasta chaparral snail (*Trilobopsis roperi*), Shasta hesperian snail (*Vespericola shasta*), and a rare undescribed variety of red huckleberry (*Vaccinium parviflorum* –aka *shastense*) but with blue berries unofficially known as “Shasta huckleberry” (Nelson and Lindstrand 2015, Lindstrand and Nelson 2005a,b; NSR 2004; Lindstrand 2007; DeWoody and Hipkins 2007 [DeWoody et al. 2012b]; Nelson, personal communications 2007). Additional habitat would be disturbed by construction-related activities and the relocation of campgrounds, roads, bridges, and other facilities above the Inundation Zone. The raising of Shasta Dam and implementation of the SLWRI would result in the loss, degradation, and fragmentation of habitat and may result in the need to further evaluate the factors threatening some of these seven species pursuant to section 4 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.) (ESA).

Comprehensive effects analysis is not available, but partial information indicates the following: Shasta snow-wreath, in particular, could be adversely affected USDI BOR (2013).

Since additional occurrences of Shasta snow-wreath have been documented since 2007 (now 24 element occurrences as compared to 21 in 2007, Lindstrand 2007), **62 percent** of all known occurrences of the plant species (9 out of 24 occurrences by inundation plus 8 by other actions). Nine occurrences will be partly or completely inundated or affected by activities associated with raising Shasta Dam (Lindstrand and Nelson 2005a,b; Lindstrand 2007; CDFG 2007a). The CALFED Final Programmatic Environmental Impact Statement/ Environmental Impact Review (EIS/EIR) includes Shasta snow-wreath among “evaluated species for which direct mortality as a

result of implementing CALFED actions is prohibited as a condition of the Multi-Species Conservation Strategy” (CALFED Bay Delta Program 2000a,b, US GPO 2004).

Figure 11, illustrates the areas of potential affects from the dam raise, both inundation and associated actions.

Figure 11. USDI BOR Shasta Lake and Vicinity Portion of the Primary Study Area for Enlargement.

Source –USDI BOR 2014b.

Other Land Management Actions

Other actions that may affect habitat will occur as part of the on-going management of National Forest System (NFS) Lands for fire resilience. Eight occurrences of Shasta snow-wreath (33% of 24 total) are documented within the Green-Horse project area.

The Green-Horse Project Record of Decision (Myers 2016) indicates that:

- Prescribed broadcast burning or underburning would occur on approximately 41,6251 acres.
- Hand thinning and pruning of small trees and brush, followed by hand piling and pile burning or underburning, would occur on approximately 88 acres adjacent to private property.
- Hand thinning and pruning of small trees and brush, followed by hand piling and pile burning, would occur on approximately 35 acres surrounding recreation residences at Campbell Creek.
- Hand thinning and pruning of small trees and brush, followed by hand piling and pile burning or underburning, would occur on approximately 83 acres surrounding bald eagle nest sites.
- Approximately 4.61 miles (4 acres) of dozer line would be constructed or reconstructed in order to assist fire managers in safely conducting prescribed fire.

Fuels treatments would occur over a period of 7 to 10 years using a resource treatment strategy that would allow managers to adjust treatments over time if they discover new information or changed conditions. The proposed action does not include any commercial timber harvest, new forest system road or temporary road construction, existing road reconstruction or project-related road maintenance.

Under the selected alternative, a low-intensity surface fire (31 percent predicted for the project area) would damage some above-ground portions of individual plants, while underground portions would be unaffected, and plants would recover in the short term. A low-intensity surface fire within riparian/mesic habitats would likely benefit *Neviusia cliftonii* populations indirectly by reducing riparian vegetation cover and competition for understory resources (moisture, substrate, soil minerals, understory light), resulting in increased viability of these populations, until riparian vegetation recovers.

Riparian or generally mesic-associated species such as *Neviusia cliftonii* may also be affected by a loss of suitable habitat in the event of a high-intensity wildfire; however, since these species typically (although not exclusively) grow in moist environments where fire is less able to proliferate, negative impacts from these fire events may be more minor to moderate and shorter-term. If there were severe changes to the hydrologic regime from a high-intensity fire, though, negative impacts to these species would be major and longer-term.

In a high-intensity surface fire (0.03 percent predicted for the project area) –soil cover (e.g., woody debris, litter, duff) could be reduced which would also adversely impact the structural

stability of many plant species. Nutrients stored in the organic layer (such as potassium and nitrogen) vital for plant growth can also be lost or reduced in a high-intensity surface fire.

The Western Shasta Resource Conservation District under the Cow Creek Strategic Fuels Reduction Plan Update 2010 (WSRCD 2010) proposed fuelbreaks that may overlap the distribution of Shasta snow-wreath and may reduce the spread of wildfire in the area and into the area, once completed and if maintained (Figure 12).

Figure 12. Cow Creek Strategic Fuels Reduction Plan Map 4 of Special Status Wildlife and Plant Species.

Source: Western Shasta Resource Conservation District 2010.

Further, on-going vegetation encroachment including invasive species and forest trees threatens the destruction of habitat for Shasta snow-wreath.

USDI BOR (2013) indicates that Shasta snow-wreath is a slow growing species with a tendency to occur in relatively disturbed areas along the edge of the forest thus making the species especially vulnerable to invasive species (i.e., blackberry) and human-related threats (personal communications Julie Keirsted Nelson 2007).

Packers Bay invasive species project decision notice (Kennedy 2018) says:

The selected alternative would allow us to treat non-native invasive broom [Scotch broom (*Cytisus scoparius*), French broom (*Genista monspessulana*), and Spanish broom (*Spartium junceum*)] infestations, reduce or eliminate the seed bank, and re-establish native vegetation on approximately 112 acres of National Forest System lands. Treatments will include: 1) using chainsaws and hand tools to cut the broom near ground level; 2) cut vegetation will either be piled and burned, or hauled away for disposal in a landfill; 3) using hand-held herbicide applicator wands and/or hand-held spray bottles to apply the herbicide combined with a surfactant and a colorant (dye) to the freshly cut broom stumps; 4) follow-up treatments including herbicide application, hand pulling, and prescribed underburning within treated areas to kill broom seedlings and seed bank; and 5) re-vegetating treatment areas with native plants where needed to lower the potential for re-invasion of invasive plants. Two herbicides, aminopyralid and glyphosate, will be used initially and a selection process initiated to determine the most effective for cut stump treatment. Both are known to be effective on broom. This decision also includes implementing the design features, best management practices, and monitoring to protect natural resources which are described in section 4 of the Environmental Assessment (EA).

The modifications to Alternative 1 that the deciding official authorized are: Approximately 2 acres in the project area will be set aside for manual treatments without herbicides for a period of up to 10 years. Volunteers organized by the Environmental Protection Information Center (EPIC) will perform the treatments on a recurrent basis.

EPIC (2019) documents the manual treatments accomplished in 2019.

Forest Service road and trail maintenance could also threaten Shasta snow-wreath. Several populations occur immediately adjacent to roads and several populations occur immediately adjacent to trails.

Mining and logging particularly on private lands could threaten the existence of several occurrences (table 1). There are 6 of 24 (25% of total) occurrences on non-federal lands. These actions are regulated by the State of California and Shasta County. Since there is little or no requirement to protect Shasta snow-wreath, any ground disturbing actions on private land within occurrences or adjacent to occurrences could threaten individual clones and the habitat for Shasta snow-wreath.

Along with mining and logging on non-federal lands, other development within or adjacent to occurrences on private lands such as roads, houses or other structures could destroy habitat and result in the introduction of invasive species.

Invasive Species

In addition to the Packers Bay Invasive species project discussed above (Kennedy 2018, USDA FS STNF 2018), Jules et al. (2017) and CNDDDB (2018a,b) document the presence of Himalayan blackberry (*Rubus armeniacus*) which can increase rapidly and have severe effects on plant communities (CAL IPC 2004).

Wildfires

Wildfires may threaten or benefit the occurrences of Shasta snow-wreath. The Hirz Fire of 2018, removed above ground portions of clones which resulted in respouting. Jules et al. (2017) includes observations of a prescribed burn in Jones Valley in December 2011. Jules et al (2017) also note that:

The California black oak woodlands and Pacific ponderosa pine – Douglas-fir forests (Eyre 1980) where Shasta snow- wreath populations occur exhibit very high departures from pre-Euro-American settlement fire frequencies (Safford and Van de Water 2014) and the presence of relatively fire-intolerant Douglas-fir in the overstory is indicative of prolonged fire suppression. Historically, this vegetation experienced frequent wildfires with an average fire return interval of

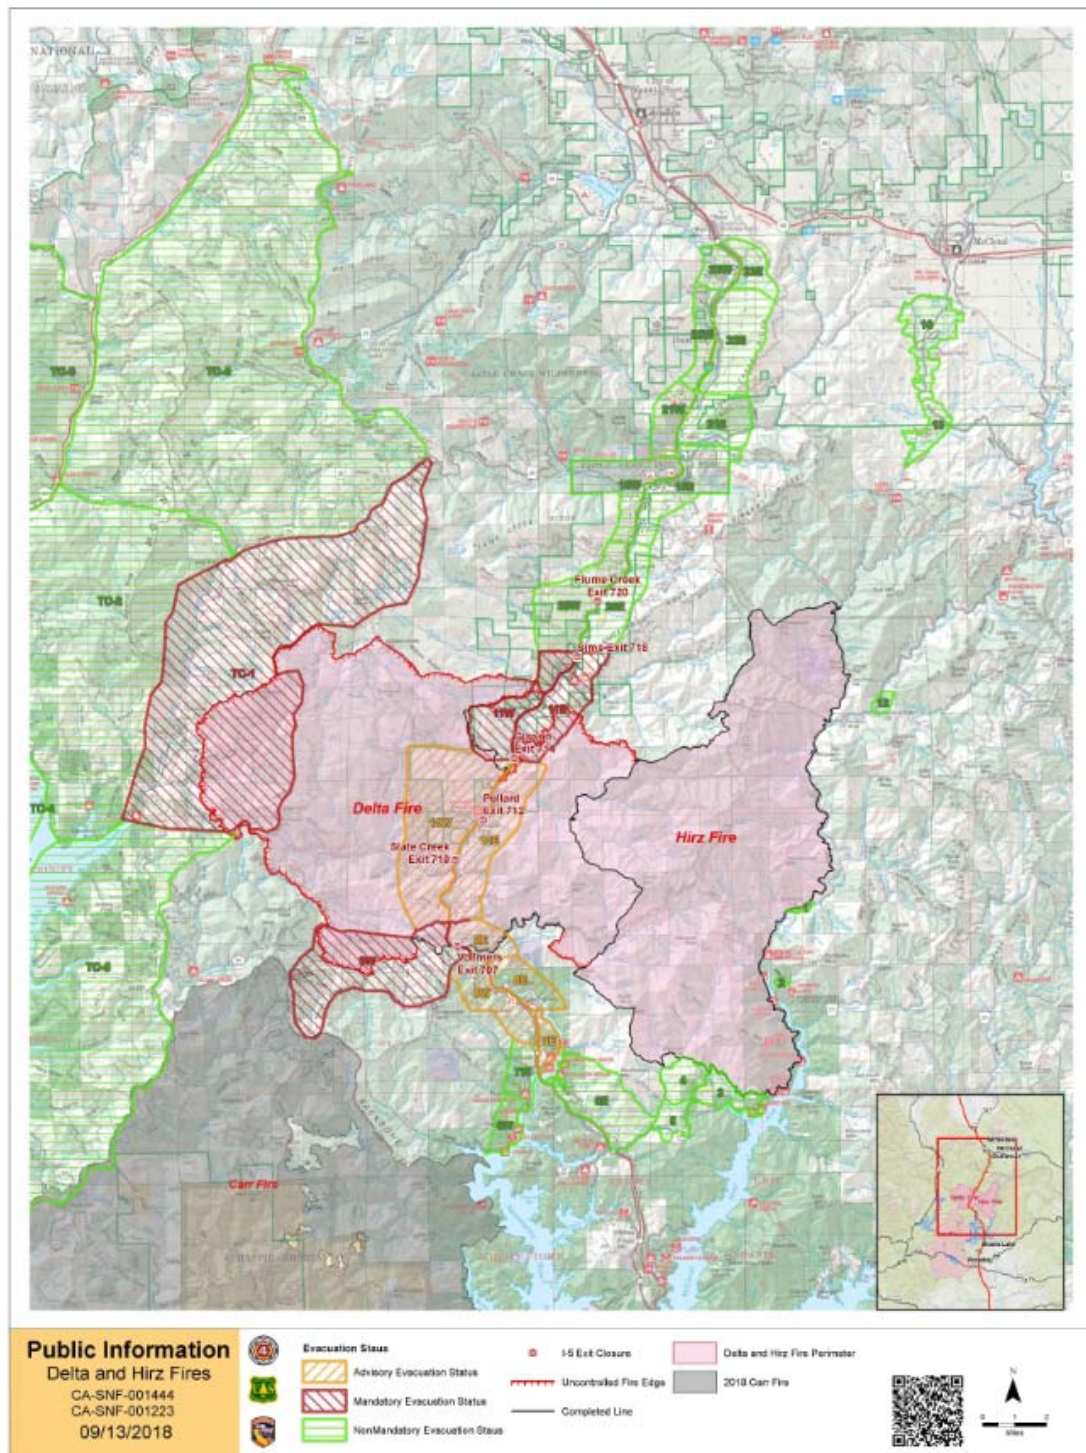

12 years (Taylor and Skinner 2003; Fry and Stephens 2006; Safford and Van de Water 2014). Restoring a more frequent fire return interval through prescribed burning or employing a mechanical fuels treatment to reduce canopy cover may benefit Shasta snow-wreath.

Repeat, short-interval fires may push ecosystems into new states, and recently there has been much discussion about disturbance regime thresholds beyond which ecosystem characteristics change dramatically due to a loss of resilience of the vegetation (Meng et al. 2014).

Wildfires can also facilitate the reproduction and/or representation of invasive species (Lambert 2010).

There is no specific information available about fire regimes in the paleo environment, however Byrne et al. (1991) indicate shifts between oak and pine as the dominant vegetation in much of northern California throughout the Holocene. These vegetation types are known to be susceptible to fire (Safford and Van de Water 2014).

Figure 13. Map of the Hirz and Delta Fires 2018.

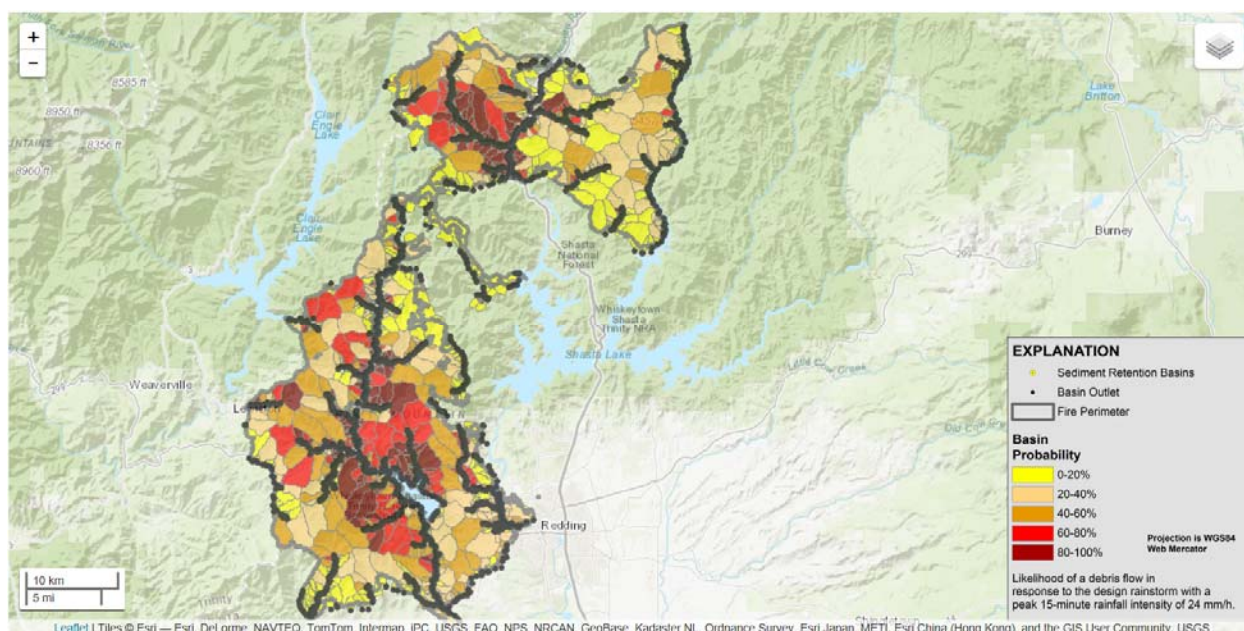

Source: NWCG Inciweb 2018.

Other Habitat Factors

Unstable Soils and Landslides

Shasta snow-wreath occurs in an area known to have unstable soils and landslides. That coupled with its occurrence in a zone of known extreme fire and precipitation events, could result in reductions in occurrences and habitat. Jules et al. (2017) documented soil slumping from prescribed fire in December of 2011. Figure 13 illustrates the risk of debris flows after recent fires.

Figure 14. Map of the Hirz and Delta Fires 2018 with likelihood of debris flow.

Source: USDI USGS Landslide Hazards Program 2018.

Climate Change

Climate change could influence the continued existence of Shasta snow-wreath (Young et al. 2012, Pacifici 2015). It is unknown how much resilience Shasta snow-wreath has to changes in temperature or moisture regimes and how those changes might influence other destructive forces such as fire and/or landslides.

Through legislation and Governor's Executive Orders, the State of California has mobilized to meet the challenges and opportunities posed by climate change. The overall strategy is embodied in reducing carbon emissions, promoting readiness for climate impacts, preserving biodiversity,

and conducting research to provide the best available science to guide our actions. In the course of this work, technical documents, strategies, and planning guidance have been produced by state agencies, including the California Department of Public Health (CDPH). The Climate Change and Health Profile Report (Maizlish 2017) seeks to provide a county-level summary of information on current and projected risks from climate change and potential health impacts. This report represents a synthesis of information on climate change and health for California communities based on recently published reports of state agencies and other public data.

Table 5. Summary of Cal-Adapt Climate Projections for the North Region.

RANGES	
Temperature Change 1990-2100	January average temperature increase of 0.5°F to 4°F by 2050 and 3°F to 6°F by 2100. July average temperature increase of 3°F to 5.5°F by 2050 and 8°F to 10°F by 2100, with larger temperature increases in the mountainous areas in the northeastern portion of the region. (Modeled high temperatures – average of all models; high carbon emissions scenario)
Precipitation	Annual precipitation is projected to decline by approximately an inch by 2050 and 2 inches by 2100 for most of the region. (CCSM3 climate model; high carbon emissions scenario)
Heat Wave	Heat wave is defined as five days above a temperature between 89°F and 99°F depending on location. By 2050 there is projected to be two to four more heat waves than 2010. Projected heat wave occurrence in 2100 is variable depending on location, between six and 15 per year.
Snowpack	March snowpack disappears by 2090 for most of the region with the exception of areas near Mt. Shasta. (CCSM3 climate model; high emissions scenario)
Wildfire Risk	Substantial increases in the likelihood of wildfires are projected in most of the region, especially in Shasta and Siskiyou counties where risks may be multiplied 6 to 14 times by the end of the century. (GFDL model, high carbon emissions scenario)

Source: Maizlish et al. 2017.

At different times, the paleo climate that Shasta snow-wreath has endured, was warmer and dryer as well as colder and wetter than the current (Töpel et al. 2012) meaning that Shasta snow-wreath appears to have considerable plasticity or adaptability to different climate regimes. However, the ability of Shasta snow-wreath to migrate to find suitable climate niches is limited due to the steep terrain and human introduced impediments.

Destruction, modification, and curtailment of the habitat for Shasta snow-wreath from human activities is an ongoing threat to its continued existence.

Factor B. Overutilization

Overutilization for commercial, recreational, scientific, or educational purposes is currently occurring and may increase in the future if the SLWRI project is implemented and brings additional human presence to the area.

Shasta snow-wreath has been, and likely continues to be collected by botanists and gardeners for growing in personal gardens (reduced to possession—removed from federal ownership and committed to private ownership/possession) and for deposit as pressed and dried herbarium specimens.

The California Native Plant Society, CNPS Calscape (2019) and Calflora (2019) indicate the species is occasionally available from nurseries commercially.

Factor C. Disease and predation

Disease and Predation could be possible threats to Shasta snow-wreath. There are no documented diseases of Shasta snow-wreath at present. Personal observations by Julie Kiersted Nelson (2016c) at Low Pass indicate that some leaves appear to be colonized by fungi.

Figure 15. Shasta snow-wreath (*Neviusia cliftonii*) with fungal spots, growing with Himalayan blackberry at Low Pass. October 2011.

Source: Julie Kierstead Nelson 2011.

Since this plant has been known to science for only a short time, the absence of evidence of disease cannot be construed as the absence of diseases. It is expected that Shasta snow-wreath would be subject to the same diseases of other similar shrubs (Oceanspray or Ninebark) such as powdery mildew (UC IPM 2018), sudden oak death (*Phytophthora ramorum*) or water mold (*Phytophthora spp.*) (Perry 2006) but so far there are no observations of these diseases. On-going monitoring could identify diseases present.

Climate change could make diseases more prevalent or make Shasta snow-wreath more susceptible to disease through stress (Elad and Pertot 2014). There is no information as to its susceptibility to other diseases such as water mold disease (*Phytophthora spp.*) or sudden oak death (*Phytophthora ramorum*). Other species within the rose family (Rosaceae) are known hosts, so it is possible that Shasta snow-wreath could be susceptible (USDA APHIS 2013).

There are also no observations of grazing damage from wildlife or cows/sheep. There are no active grazing allotments on NFS lands where Shasta snow-wreath occurs (USDA FS STNF 1996). Most of federal land on which Shasta snow-wreath occurs was acquired as part of the construction and flooding of Shasta Dam and Shasta Lake (reservoir) and as such never had federal grazing permits established. It is unknown if there are grazing permits on private lands where Shasta snow-wreath occurs.

Factor D. Existing regulatory mechanisms

The inadequacy of Existing Regulatory Mechanisms is also contributing to the threats to Shasta snow-wreath. Eighteen out of 24 (75%) occurrences are documented to be partially or completely on federal lands, either NFS or BLM administered public lands (See table 1 for details).

Shasta snow-wreath is included on the California Department of Fish and Wildlife Special Vascular Plants, Bryophytes, and Lichens List (CDFW CNDDDB 2018a) but has no state-listing status under the California Endangered Species Act (CANRA DFW Biogeographic Data Branch CNDDDB 2018b). This state listing would apply to occurrences on private lands and is considered in land management and project planning on federal lands. A state listing would be considered in the evaluation of species of conservation concern as the Shasta Trinity National Forest Land and Resource Management Plan is revised and in project planning.

Shasta snow-wreath is currently listed as sensitive by the USDA FS, Pacific Southwest Region (R5) under the Regional Forester's Sensitive Species list (USDA FS R5 2013) and by the USDI BLM (2015) for California. Sensitive species are managed to avoid a trend towards federal listing and consist of those species the Forest Service has identified as having a viability concern based on a significant current or predicted downward trend in population numbers or density and/or a significant current or predicted downward trend in habitat capability that would reduce a species' existing distribution.

As Forest Plans are updated to the 2012 Planning Rule standards (USDA FS 2012), the Shasta-Trinity National Forest (STNF) may, or may not, include Shasta snow-wreath in its "species of

conservation concern (SCC)” list. Once this occurs management on the forest would then no longer be subject to the Regional Forester’s Sensitive Species list (USDA FS R5 2013).

The SCC list will at least partially use NatureServe Rankings. The Shasta snow-wreath is listed by NatureServe (NatureServe Explorer 2019) as:

- G2 - Imperiled (Global).
- N2- Imperiled (National).
- State of CA S2 – Imperiled (State Level).

Shasta snow-wreath occurs within the Devil’s Rock-Hosselkus Research Natural Area (DRH-RNA) as currently established. Established Research Natural Areas are managed for natural conditions (Cheng 1997, USDA FS 2005). This status as an RNA could be considered for revision with the revision of the Shasta-Trinity National Forest Land and Resource Management Plan or under a separate process (USDA FS 2012).

Existing regulatory mechanisms appear to be inadequate to protect the species.

Factor E. Other factors

There are other Natural or Manmade Factors that continue to contribute to the threats to Shasta snow-wreath.

Pollination and Reproduction Challenges

Shasta snow-wreath is currently unknown to have any successful pollinators. It is undetermined if pollination occurs via wind (anemophily) or by insects (entomophily). Although there are pictures of achenes the viability of the seeds within is unknown and no seedlings have been observed. Germination attempts failed (Ertter and Shevock 1993). Only 48 genotypes have been identified.

Shasta snow-wreath occurs in an area known to have unstable soils and frequent landslides. That coupled with the its occurrence in a zone of known extreme precipitation events, could result in reductions in occurrences and habitat and influence the success of flowering and sexual reproduction if it occurs at all. Wildfires are other events that could drastically modify occurrences, habitat and pollinators. Extreme wildfire events are expected to increase under changing climatic conditions. Other weather conditions such as early or late frost could also

influence the function of flowers and insects if those are involved in reproduction at any time and thus influence reproductive success and genetic diversity.

Some of the Shasta snow-wreath material that has been removed from the wild might also provide for off-site conservation. The Dunsmuir Botanical Gardens in Dunsmuir, California has at least 2 specimens growing there. Located in the Dunsmuir City Park in far northern California, the Gardens encompass ten acres of hilly, wooded area with a meadow containing the various gardens. The purpose of the Dunsmuir Botanical Gardens is to enhance the natural setting of the Dunsmuir City Park for the enjoyment and horticultural education of the public through the establishment and maintenance of native and woodland plants (Dunsmuir Botanical Gardens 2014). Ertter and Shevock (1993) indicate that Members of the California Native Plant Society currently are cultivating *N. cliftonii* and that it is growing at East Bay Regional Parks Botanical Garden. Christman (2011) also documents off-site locations, while Breen (2019) and Tu (2019) document Shasta snow-wreath growing at the Hoyt Arboretum in Portland, Oregon since 1999. The California Native Plant Society (CNPS Calscape (2019) and Calflora (2019) indicate the species is occasionally available from nurseries commercially.

None of the Shasta snow-wreath is currently designated as a scientifically documented genetic resource of conservation value. There is no available documentation as to source or genetics of the cultivated plants.

No viable seeds of Shasta snow-wreath have been observed and no seedlings had been observed in over 20 years of informal monitoring. Seed collected in 1992, did not germinate under any of the tested regimes at the University of California Botanical Garden. There are no other reports of seed collected or of reproduction or viability testing. Achenes are known from photographs and from the type description.

Because Shasta snow-wreath occurs on an ancient landform and within topographic constrictions of that landform, it is likely unable to expand its range in response to changing circumstances including climate.

SUMMARY AND JUSTIFICATION

The Shasta snow-wreath is primarily endangered by significant destruction, modification, and curtailment of habitat and range through proposed and on-going projects but primarily by the proposed raising of the height of Shasta dam and the inundation of habitat. The SLWRI project would affect **62 percent** of all known occurrences of the plant species (9 out of 24 occurrences by inundation plus 8 by other actions) of the entire known population of Shasta snow-wreath.

Other proposed or on-going projects to manage vegetation may have both positive and negative effects on this species. Invasive plant species that can change and/or dominate Shasta snow-wreath habitat are documented within and surrounding known occurrences.

Overutilization appears to be a minor factor as do disease and predation. Other natural and man-made factors also appear to be a minor influence at this time although climate change and geological instability as affected by expected changes in climate and wildfires are difficult to quantify at this time.

The existing regulations are inadequate to reduce or prevent the proposed and on-going destruction of individuals and habitat and are not responsive to other factors that when added to the changes in habitat and occurrences are likely to lead to endangerment and or complete loss of this species.

URGENT RECOVERY ACTIONS NEEDED

Priority Category 1: Tasks needed to avoid imminent species extinction

Restriction of destruction/removal of occurrences, removal of above ground and below ground plant parts and modification of habitat for Shasta snow-wreath associated with the proposal to raise Shasta Dam such that occurrences and habitat would not be inundated or destroyed.

Priority Category 2: Tasks needed to maintain a viable population

The following list indicates priority category 2 tasks needed to maintain a viable population.

- Reduction in harmful disturbances to Shasta snow-wreath plants, plant parts and habitat that is occurring and planned to occur on federal lands. This reduction would occur as a

result of listing and consultation with USFWS and or CDFG/CDFW. Also, studies in what type and amount of disturbance might be beneficial.

- Habitat modeling through geographic information systems and field checking to determine if there are other occurrences and to ascertain best places for re-introduction. USDA-FS has the data and expertise to complete this. Alternately, this could be accomplished by independent contractors or University researchers.
- Collection and propagation of ramets/genets to conserve diversity in potential habitat and at an off-site location using best available science and plant propagation practices (Maschinski and Albrecht 2017). This would need to be funded and accomplished by independent researchers with CDFG/CDFW, USDA-FS and USFWS cooperation and coordination after listing.
- Studies in reproduction and pollination using best available science and methodology including studies of seeds and viability. This would need to be funded and accomplished by independent researchers with CDFG/CDFW, USDA-FS and USFWS cooperation and coordination after listing.
- Organized search for seedlings through-out its distribution. This would need to be funded and accomplished by independent researchers with CDFG/CDFW, USDA-FS and USFWS cooperation and coordination after listing.
- Ongoing control of invasive species and studies of effectiveness of control. This would need to be funded and accomplished by CDFG/CDFW, USDA-FS with USFWS cooperation and coordination after listing.
- Development of State level conservation agreements with non-federal landowners. This would need to be funded and accomplished by CDFG/CDFW, USFWS cooperation and coordination after listing.
- Support of actions to reduce climate change (Committee on Stabilization Targets for Atmospheric Greenhouse Gas Concentrations 2011). This would need to be funded and accomplished by the State of California, USDA-FS with USFWS cooperation and coordination after listing.
- Identification of fungal diseases currently affecting this species and determination of potential for spread and potential control. This would need to be funded and

accomplished by independent researchers with CFGC/CDFW, USDA-FS and USFWS cooperation and coordination after listing.

Request for Critical Habitat Designation Under Federal ESA

Under the California Endangered Species Act, there is no critical habitat designation process. This petition information is being concurrently submitted to the USFWS as well as the CFGC (Roche 2019b). There is a request to the USFWS to designate critical habitat under the Federal Endangered Species Act included in the Federal ESA petition. Under the Federal ESA, critical habitat is composed of the specific areas within the geographic area occupied by the species at the time it was listed, that contain the physical or biological features that are essential to the conservation of endangered and threatened species and that may need special management or protection. Critical habitat designations affect only Federal agency actions or federally funded or permitted activities. Critical habitat designations do not affect activities by private landowners if there is no Federal “nexus”—that is, no Federal funding or authorization. Federal agencies are required to avoid “destruction” or “adverse modification” of designated critical habitat. The ESA requires the designation of “critical habitat” for listed species when “prudent and determinable.” (USDI FWS 2017). Critical habitat is requested to be designated surrounding and including all occurrences on Federal Lands. This should include patches large enough to limit effects of human actions to existing occurrences and to provide for vegetative reproduction to spread from existing occurrences.

Memorandum

Date: October 28, 2019

To: Melissa Miller-Henson
Executive Director
Fish and Game Commission

From: Charlton H. Bonham
Director

Subject: Request for 30-day Extension, Shasta Snow-Wreath (*Neviusia cliftonii*) Petition

The California Department of Fish and Wildlife (Department) requests a 30-day extension of time pursuant to Fish and Game Code Section 2073.5 to allow the Department additional time to analyze and evaluate a petition to list Shasta snow-wreath (*Neviusia cliftonii*) under the California Endangered Species Act and to complete its evaluation report. This extension would change the time for completion of the Department's evaluation report from 90 days, due January 8, 2020, to 120 days, due February 7, 2020.

If you have any questions or need additional information, please contact Richard Macedo, Branch Chief, Habitat Conservation Planning Branch at (916) 653-3861.

Memorandum

Date: November 19, 2019

To: Melissa Miller-Henson, Executive Director
Fish and Game Commission

From: Charlton H. Bonham
Director

Subject: **Agenda Item for the December 11, 2019 Fish and Game Commission Meeting:
*Recommendations for Designation of new Wild Trout Waters for 2019***

Fish and Game Code, Section 7260(c), grants the Fish and Game Commission (Commission) the authority to designate Heritage Trout Waters recognizing the beauty, diversity, historical significance, and special value of California's native trout. Designations are limited to waters that: support populations that best exemplify indigenous strains of native trout within their historic drainages; provide anglers with an opportunity to catch native trout in a manner that promotes the conservation of native trout; where stocking of hatchery trout has been restricted; and where angling regulations maintain the wild trout fishery through natural reproduction.

Fish and Game Code, Section 1727(b), requires the Department of Fish and Wildlife (Department) to annually prepare a list of no less than 25 miles of stream or stream segments and at least one lake deemed suitable for designation as Wild Trout Waters and to submit this list to the Commission. To comply with these requirements, the Department proposes the following waters:

North Fork Smith River, from the confluence with Middle Fork Smith River upstream to the Oregon state line, including Stoney Creek, Diamond Creek, North Fork Diamond Creek, and excluding all other tributaries (Del Norte County).

This proposed Heritage Trout Water designation incorporates approximately 33 miles of perennial stream habitat, most of which are located on public lands administered by the U.S. Forest Service, Six Rivers National Forest. The North Fork Smith River and its tributaries contain self-sustaining populations of both Coastal Cutthroat Trout and Coastal Rainbow Trout within their historic range/native drainages and is a fast-action fishery (> 2 fish per hour), with trophy trout (>18") potential. The Smith River watershed is of state and national importance with National Recreational Area and Wild and Scenic River designations, prized salmonid fisheries, and the prestigious status of the longest free-flowing, undammed river system in the United States - making this fishery a unique resource in the state and a quintessential candidate for Heritage Trout designations.

The Department has conducted annual direct observation (snorkel) and intermittent angling surveys of this portion of the Smith River drainage, both of which support designation as a high-quality stream fishery, with robust populations of both Coastal Cutthroat and Rainbow trout. This designation will expand upon, and be contiguous with, the 2016, 2017, and 2018 designations in the South Fork Smith River drainage, which included: South Fork Smith River, from the confluence with Blackhawk Creek upstream to the Island Lake Trail crossing, including the following tributaries: Buck Creek, Quartz Creek, Eightmile Creek, Williams Creek, Harrington Creek and Prescott Fork and excluding all other tributaries (Del Norte County) (2016,2017); South Fork Smith River, from the confluence with Goose Creek upstream to the confluence with Blackhawk Creek, including Goose Creek and Hurdgyurdy Creek and excluding all other tributaries; and South Fork Smith River, from the confluence with Craigs Creek upstream to Goose Creek, including Craigs Creek, Rock Creek and Coon Creek and excluding all other tributaries (Del Norte County) (2018). The Department has consulted both Del Norte County Fish and Game Advisory Committee and Smith River Alliance regarding previous and current designations within the Smith River watershed.

Hilton Lake # 5 (Mono County). Hilton Lake #5 is located at the latitude/longitude of 37°28'37.99" N, 118°45'39.39W and elevation of 10,700 feet, in the Hilton Creek drainage, near Tom's Place.

Hilton Lake #5 is part of an interconnected lake complex known as Hilton Creek Lakes and is a fast-action fishery (>2 fish per hour) for Brook Trout. There are 10 lakes within this basin, eight of which support self-sustaining trout fisheries with varying species composition. Anglers have the opportunity to achieve a so-called "Sierra Grand Slam" (catching four trout species within the same day, including Brown, Brook, Rainbow and Golden trout in the Hilton Creek Lakes basin).

The basin is located in a remote and scenic wilderness setting. This Wild Trout designation expands upon the 2018 designation of Hilton Lake #4 and Hilton Lake #1 (aka Davis Lake) and 2017 designation of Hilton Lake #2 and incorporates approximately 6 surface acres of aquatic habitat. The HWTP has conducted angling assessments and visual reconnaissance of spawning habitat, both of which support designation as a high quality, self-sustaining, lake fishery. Future proposed designation of other lakes in the drainage is planned, with the long-term intent of having all the lakes supporting self-sustaining trout fisheries within the basin designated as Wild Trout Waters. Further evaluation of the visitor use patterns, fishing pressure, and potential harvest in Hilton Lake #3 is required.

The Department has verified that no restoration of amphibians or other native aquatic species is planned within the drainage; thus, no conflict exists with managing this area for recreational angling into the future.

Melissa Miller-Henson, Executive Director
Fish and Game Commission
November 19, 2019
Page 3

The recommended streams and lakes meet existing criteria to satisfy the requirements for designation as Wild and/or Heritage Trout Waters and no changes in angling regulations are necessary at this time.

COMMISSION DESIGNATED WILD TROUT WATERS

It is the policy of the Fish and Game Commission to:

I. Designate certain state waters to be managed exclusively for wild trout.

Commission designated wild trout waters should provide a quality experience by providing the angler with an opportunity to fish in aesthetically pleasing and environmentally productive waters with trout populations whose numbers or sizes are largely unaffected by the angling process.

Waters designated by the Commission for wild trout management shall meet the following criteria:

A. Angler Access:

1. Open for public angling with unrestricted access when of sufficient dimensions to accommodate anglers without overcrowding.

or

2. Open for public angling with controlled access under a plan approved by the Commission setting forth the number of anglers and the method of distribution.

B. Able to support, with appropriate angling regulations, wild trout populations of sufficient magnitude to provide satisfactory trout catches in terms of number or size of fish.

II. Wild trout waters shall be managed in accordance with the following stipulations:

A. Domestic strains of catchable-sized trout shall not be planted in designated wild trout waters.

B. Hatchery-produced trout of suitable wild and semi-wild strains may be planted in designated waters, but only if necessary to supplement natural trout reproduction.

C. Habitat protection is of utmost importance for maintenance of wild trout populations. All necessary actions, consistent with State law, shall be taken to prevent adverse impact by land or water development projects affecting designated wild trout waters.

III. The Department shall prepare and periodically update a management plan for each water designated as a wild trout water.

IV. Certain designated wild trout waters may be further designated by the Commission as "Heritage Trout Waters", to recognize the beauty, diversity, historical significance, and special values of California's native trout. Heritage Trout Waters shall meet the following additional criteria:

A. Only waters supporting populations that best exemplify indigenous strains of native trout within their historic drainages may qualify for designation.

B. Heritage Trout Waters shall be able to provide anglers with the opportunity to catch native trout consistent with the conservation of the native trout present.

V. Recognizing the importance of native trout to California's natural heritage, the Department shall emphasize education and outreach efforts to inform the public about our native trout, their habitats, and the activities for restoration of native trout when implementing the Heritage Trout Program.

A. Implement a Heritage Trout Angler Recognition Certificate through which anglers will have the opportunity to have their catches of California native trout recognized by the Commission. The criteria for receiving the formal recognition shall be maintained by the Department's Heritage and Wild Trout Program. To receive a certificate of recognition, anglers shall submit an application with supporting materials to the Department for review.

The following waters are designated by the Commission as "wild trout waters":

1. American River, North Fork, from Palisade Creek downstream to Iowa Hill Bridge (Placer County).
2. Carson River, East Fork, upstream from confluence with Wolf Creek excluding tributaries (Alpine County).
3. Clavey River, upstream from confluence with Tuolumne River excluding tributaries (Tuolumne County).
4. Fall River, from Pit No. 1 powerhouse intake upstream to origin at Thousand Springs including Spring Creek, but excluding all other tributaries (Shasta County).
5. Feather River, Middle Fork, from Oroville Reservoir upstream to Sloat vehicle bridge, excluding tributaries (Butte and Plumas counties).
6. Hat Creek, from Lake Britton upstream to Hat No. 2 powerhouse (Shasta County).
7. Hot Creek, from Hot Springs upstream to west property line of Hot Creek Ranch (Mono County).
8. Kings River, from Pine Flat Lake upstream to confluence with South and Middle forks excluding tributaries (Fresno County).
9. Kings River, South Fork, from confluence with Middle Fork upstream to western boundary of Kings Canyon National Park excluding tributaries (Fresno County).
10. Merced River, South Fork, from confluence with mainstem Merced River upstream to western boundary of Yosemite National Park excluding tributaries (Mariposa County).
11. Nelson Creek, upstream from confluence with Middle Fork Feather River excluding tributaries (Plumas County).
12. Owens River, from Five Bridges crossing upstream to Pleasant Valley Dam excluding tributaries (Inyo County).
13. Rubicon River, from confluence with Middle Fork American River upstream to Hell Hole Dam excluding tributaries (Placer County).
14. Yellow Creek, from Big Springs downstream to confluence with the North Fork of the Feather River (Plumas County).
15. Cottonwood Creek, upstream from confluence with Little Cottonwood Creek, including tributaries (Inyo County).
16. Klamath River, from Copco Lake to the Oregon border (Siskiyou County).
17. McCloud River, from Lake McCloud Dam downstream to the southern boundary of Section 36, T38N, R3W, M.D.B. & M. (Shasta County).
18. Deep Creek, from confluence with Green Valley Creek downstream to confluence with Willow Creek (San Bernardino County).
19. Middle Fork Stanislaus River, from Beardsley Afterbay Dam to Sand Bar Diversion Dam (Tuolumne County).
20. Truckee River, from confluence with Trout Creek downstream to the Nevada State line (excluding the property owned by the San Francisco Fly Casters Club) (Nevada and Sierra counties).
21. Sespe Creek, a 25-mile section between the Lion Campground and the boundary of the U.S. Forest Service, Los Padres National Forest (Ventura County).
22. East Fork Carson River, from Hangman's Bridge near Markleeville downstream to the Nevada state line (Alpine County).
23. Bear Creek, Bear Valley Dam (impounding Big Bear Lake) downstream to the confluence with the Santa Ana River (San Bernardino County).
24. Lavezolla Creek (Sierra County).
25. Laurel Lake #1 and Laurel Lake #2 (Mono County).

26. Middle Fork San Joaquin River - Northern boundary of the Devils Postpile National Monument downstream to the Lower Falls (3.6 miles); and footbridge just above the confluence with Shadow Creek downstream to the footbridge just above upper Soda Springs Campground (4 miles) (Madera County).
27. South Fork Kern River watershed from its headwaters downstream to the southern boundary of the South Sierra Wilderness (Tulare County).
28. Golden Trout Creek drainage, including tributaries, from confluence with the Kern River upstream to the headwaters (Tulare County).
29. Eagle Lake, north of Susanville (Lassen County).
30. Upper Kern River, from the Forks of the Kern, upstream to Tyndall Creek in Sequoia National Park (Tulare County).
31. Heenan Lake, near Markleeville and Monitor ~~Pass~~, Pass (Alpine County).
32. Upper Truckee River, including tributaries, upstream from the confluence with Showers Creek (El Dorado and Alpine counties).
33. Sacramento River, including tributaries, from Box Canyon Dam downstream to Scarlett Way in Dunsmuir (Siskiyou County) and from the county bridge at Sweetbriar downstream to Lake Shasta (Shasta County).
34. Long Lake (Plumas County).
35. Piru Creek, including tributaries, upstream of Pyramid Lake (Ventura and Los Angeles counties).
36. Upper Stony Creek including tributaries, upstream from Mine Camp Campground (Colusa, Glenn, and Lake counties).
37. Lower Honeymoon Lake (Fresno County).
38. Upper East Fork San Gabriel River, including tributaries, upstream from Heaton Flat (Los Angeles County).
39. Royce Lake # 2 (Fresno County).
40. Lower Yuba River, from Englebright Dam to the confluence with the Feather River (Yuba and Nevada counties).
41. Parker Lake (Mono County).
42. South Fork San Joaquin River and all tributaries from Florence Lake upstream to the boundary of Kings Canyon National Park including the Piute Creek drainage (Fresno County).
43. Sallie Keyes Lakes (Fresno County).
44. Sacramento River from Keswick Dam downstream to the Red Bluff Diversion Dam (Shasta and Tehama counties).
45. Pauley Creek from the confluence with the Downie River upstream to the headwaters (Sierra County).
46. Caples Creek from the confluence with the Silver Fork American River upstream to Caples Lake Dam (El Dorado and Alpine counties).
47. Putah Creek from Lake Solano upstream to Monticello Dam on Lake Berryessa (Solano and Yolo counties).
48. Lake Solano (Solano and Yolo counties).
49. Milton Reservoir (Nevada and Sierra counties).
50. Gerle Creek Divide Reservoir (El Dorado County).
51. Manzanita Lake (Shasta County).
52. Maggie Lake (Tulare County).
53. Little Kern River drainage, including tributaries, from the confluence with the Kern River upstream to the headwaters (Tulare County).
54. Hilton Lake #1 (Davis Lake) (Mono County).
55. South Fork Smith River, from the confluence with Blackhawk Creek upstream to the Island Lake Trail crossing, including the following tributaries: Buck Creek, Quartz

Creek, Eight Mile Creek, Williams Creek, Harrington Creek and Prescott Fork and excluding all other tributaries (Del Norte County).

56. South Fork Smith River, from the confluence with Goose Creek upstream to Blackhawk Creek, including Goose Creek and Hurdygurdy Creek and excluding all other tributaries (Del Norte County).

57. Hilton Lake # 2 (Mono County).

58. South Fork Smith River, from the confluence with Craigs Creek upstream to the confluence with Goose Creek, including Craigs Creek, Rock Creek, and Coon Creek and excluding all other tributaries (Del Norte County).

59. Hilton Lake # 4 (Mono County).

60. North Fork Smith River, from the confluence with Middle Fork Smith River upstream to the Oregon state line, including Stoney Creek, Diamond Creek, North Fork Diamond Creek, and excluding all other tributaries (Del Norte County).

61. Hilton Lake # 5 (Mono County). Hilton Lake #5 is located at the latitude/longitude of 37°28'37.99"N, 118°45'39.39W and elevation of 10,700 feet, in the Hilton Creek drainage, near Tom's Place.

The following "wild trout waters" are further designated by the Commission as "heritage trout waters".

1. Clavey River, upstream from confluence with Tuolumne River, excluding tributaries (Tuolumne County).

2. Golden Trout Creek drainage, including tributaries, from confluence with the Kern River upstream to the headwaters (Tulare County).

3. Eagle Lake, north of Susanville, (Lassen County).

4. Upper Kern River, from the Forks of the Kern, upstream to Tyndall Creek in Sequoia National Park (Tulare County).

5. Heenan Lake, near Markleeville and Monitor Pass (Alpine County).

6. Upper Truckee River, including tributaries, upstream from the confluence with Showers Creek (El Dorado and Alpine counties).

7. Piru Creek, including tributaries, upstream of Pyramid Lake (Ventura and Los Angeles counties).

8. Upper Stony Creek including tributaries, upstream from Mine Camp Campground (Colusa, Glenn, and Lake counties).

9. Upper East Fork San Gabriel River, including tributaries, upstream from Heaton Flat (Los Angeles County).

10. Lower Yuba River, from Englebright Dam to the confluence with the Feather River (Yuba and Nevada counties).

11. Little Kern River drainage, including tributaries, from the confluence with the Kern River upstream to the headwaters (Tulare County).

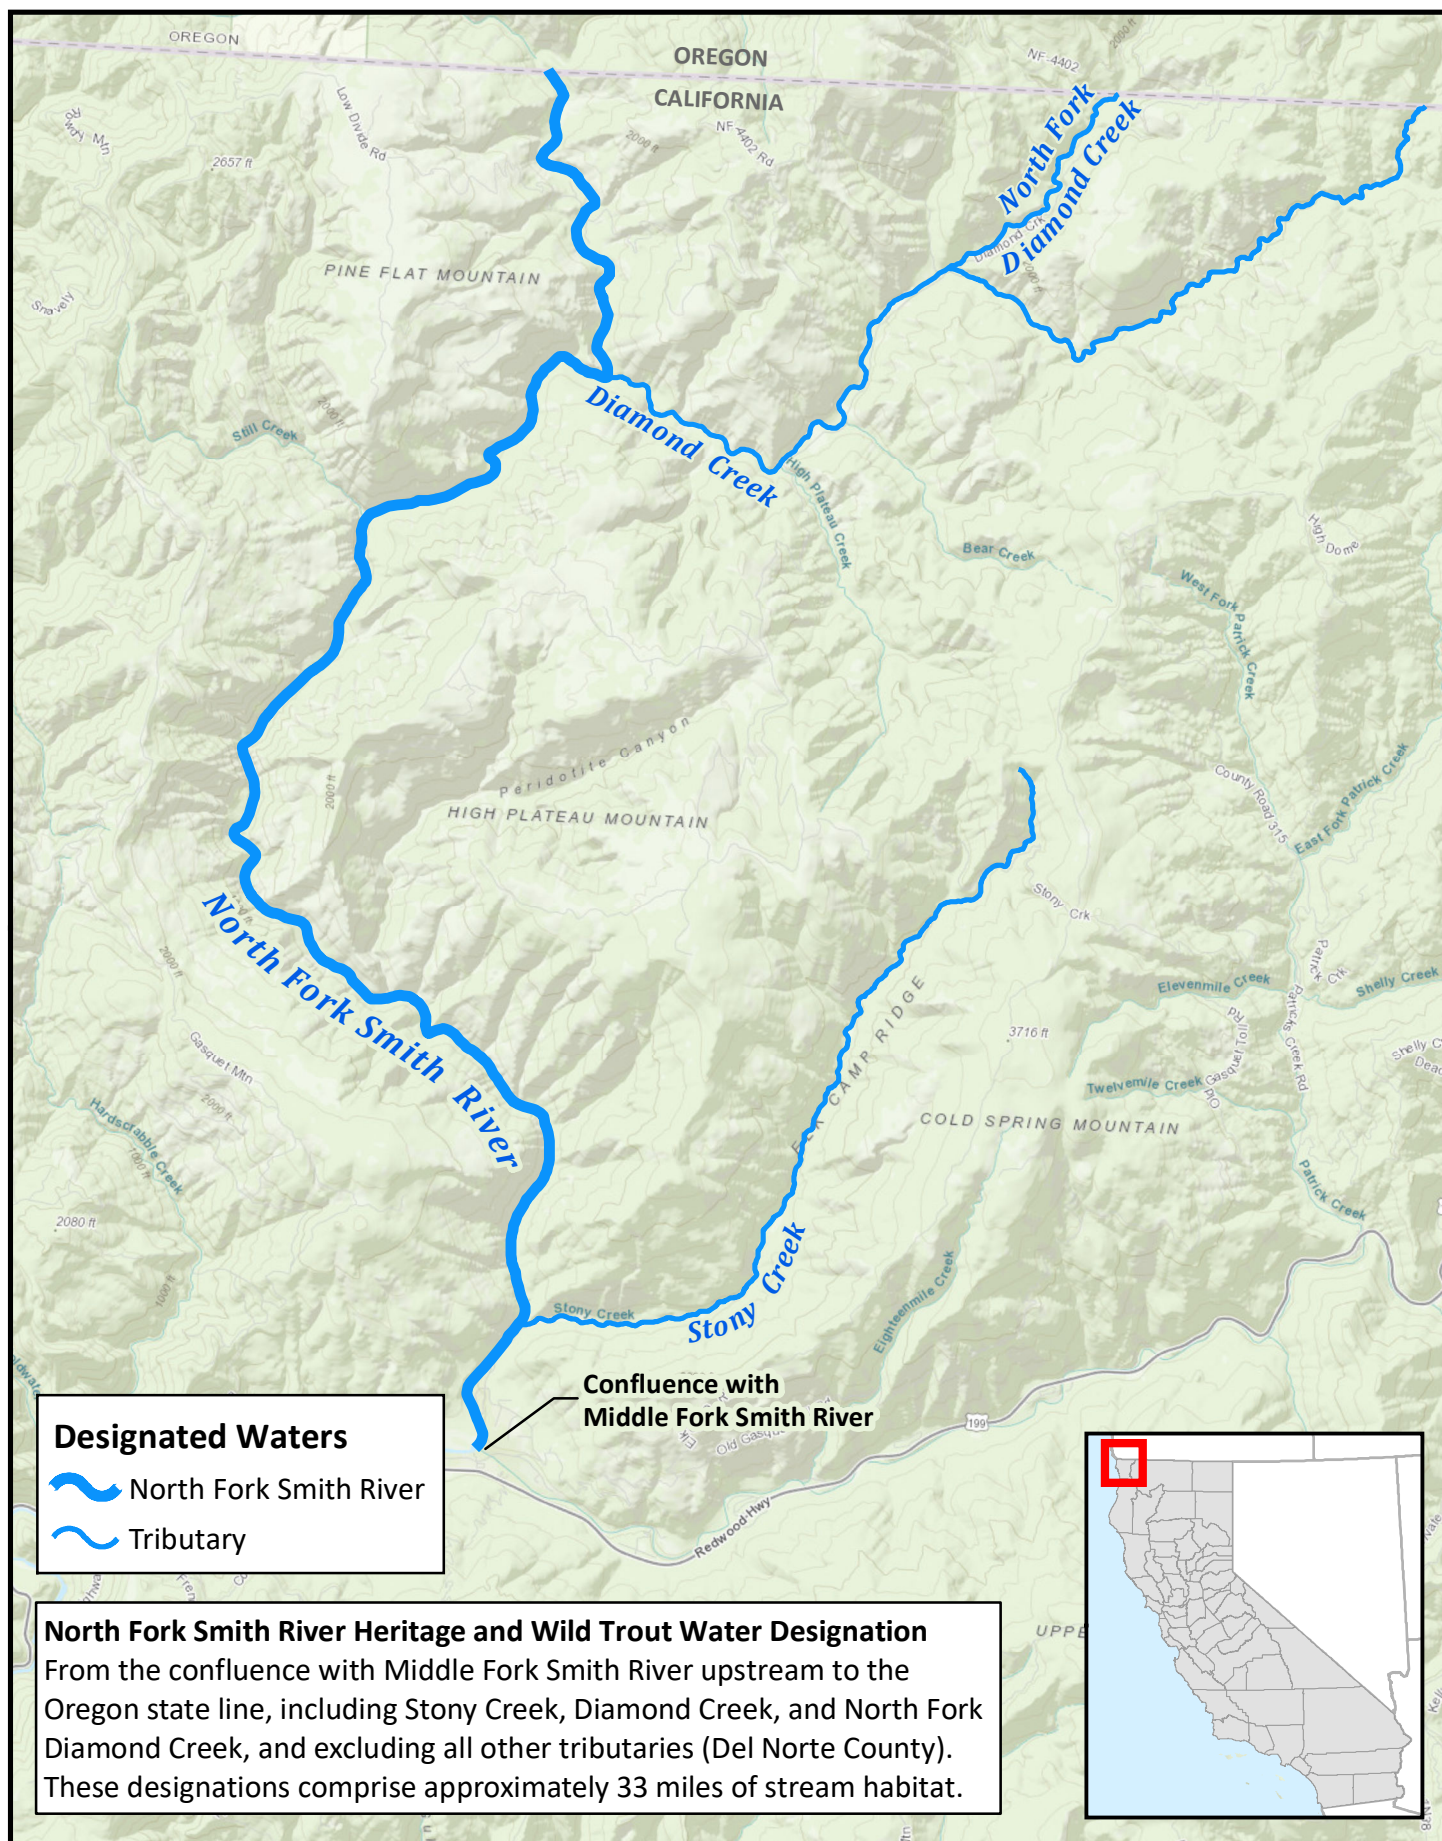

12. South Fork Smith River, from the confluence with Blackhawk Creek upstream to the Island Lake Trail crossing, including the following tributaries: Buck Creek, Quartz Creek, Eight Mile Creek, Williams Creek, Harrington Creek and Prescott Fork and excluding all other tributaries (Del Norte County).

13. South Fork Smith River, from the confluence with Goose Creek upstream to Blackhawk Creek, including Goose Creek and Hurdygurdy Creek and excluding all other tributaries (Del Norte County).

14. South Fork Smith River, from the confluence with Craigs Creek upstream to the confluence with Goose Creek, including Craigs Creek, Rock Creek, and Coon Creek and excluding all other tributaries (Del Norte County).

Hilton Lake #5 Designated Wild Trout Water - 2019

STATE OF CALIFORNIA
FISH AND GAME COMMISSION
INITIAL STATEMENT OF REASONS FOR REGULATORY ACTION

Amend Section 473
Title 14, California Code of Regulations
Re: Possession of Nongame Animals: Nutria

I. Date of Initial Statement of Reasons: June 11, 2019

II. Dates and Locations of Scheduled Hearings

- | | | |
|-------------------------|-----------|-------------------|
| (a) Notice Hearing: | Date: | August 7, 2019 |
| | Location: | Sacramento |
| (b) Discussion Hearing: | Date: | October 9, 2019 |
| | Location: | Valley Center |
| (c) Adoption Hearing: | Date: | December 11, 2019 |
| | Location: | Sacramento |

III. Description of Regulatory Action

- (a) Statement of Specific Purpose of Regulation Change and Factual Basis for Determining that Regulation Change is Reasonably Necessary:

This amendment of Section 473 would protect the State's wildlife, wetland habitats, waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture from the detrimental impacts caused by invasive nutria (*Myocastor coypus*) by banning the possession of live nutria and thereby preventing new introductions of nutria in the state. The Department of Fish and Wildlife ("Department") has implemented a multi-million dollar nutria eradication program, and this regulation is an important part of this effort.

Current Regulation

Section 671, Importation, Transportation and Possession of Live Restricted Animals, restricts the possession of many non-native species. Nutria are a mammal of the order Rodentia; subsection 671(c)(2)(J) designates all rodents, including nutria, as a "detrimental animal." Nonetheless, possession of live nutria is authorized "under permit issued by the department," i.e., a "Restricted Species Permit."

Subsection 671.1, Permits for Restricted Species, describes the types of Restricted Species Permits issued by the Department and the qualifications needed to obtain a Restricted Species Permit. In addition, subsection 671.1(c)(5) sets forth the criteria for denying a new Restricted Species Permit application and the amendment of an

existing permit. The criteria include failure to comply with the terms and conditions of the permit; failure to comply with state, federal, or municipal statutes or regulations; or, if the Department finds that application documents do not support the statement of use of the requested restricted species. But these denial criteria do not authorize the Department to deny an application solely because the applicant would like to possess a live nutria.

Section 650 authorizes the Department to issue permits to take or possess wildlife for scientific, educational, and/or propagation purposes ("Scientific Collecting Permits"). Like Section 671, Section 650 also provides for the legal possession of live nongame mammals, including nutria. Subsection 650(r), which addresses Permit Denial, sets forth criteria for denial of a new Scientific Collecting Permit application and the amendment of an existing permit. As with Restricted Species Permits, the Department does not have the authority to deny a request from a Scientific Collecting Permit applicant solely because the applicant would like to possess live nutria.

Section 679, Possession of Wildlife and Wildlife Rehabilitation, also provides for the legal possession of live nongame mammals, including nutria, by wildlife rehabilitation facilities authorized under a Department-issued permit to rehabilitate injured, diseased, or orphaned animals. Subsection 679(e)(2)(E) specifies that the Department may deny a permit if either an applicant fails to allow an inspection, the facility does not meet standards set forth in the Minimum Standards for Wildlife Rehabilitation, 2000, Third Edition, or if the applicant fails to meet all applicable standards specified in subsections 679(e)(2)(A)-(D). If the applicant is in good standing and qualified to handle and treat injured or diseased nutria, the Department does not have the authority to deny the request.

Section 473, Possession of Nongame Animals, states "Any nongame bird or mammal that has been legally taken pursuant to this chapter may be possessed." This regulation does not prohibit the possession of nutria pursuant to a Department-issued permit.

Proposed Regulation

The amendment of Section 473 makes it clear that the possession of a live nutria, including a live nutria possessed pursuant to a Department-issued permit, is unlawful. This amendment states:

"(b) It is unlawful to possess live nutria (*Myocastor coypus*), and the Department shall not issue any permit authorizing possession of any live nutria."

Thus, the proposed amendment to Section 473 would make any possession of live nutria unlawful and authorize the Department to deny any application for the possession of live nutria.

Background

Nutria are semi-aquatic rodents native to South America and are one of the world's most destructive invasive species. Nutria are notorious for the extensive damage their herbivory and burrowing cause to wetlands, water conveyance infrastructure, and agriculture. Nutria were initially introduced to North America for the fur trade in the early 1900s and farmed in California in the 1930s-40s. Following the collapse of the market, nutria were released into the environment and established feral populations. Nutria were subsequently eradicated from the state in the 1970s.

In March 2017, a pregnant nutria was discovered in a managed wetland in California's San Joaquin Valley. Recognizing the extensive impacts nutria will undoubtedly cause to California's wetlands and wildlife, water conveyance and flood protection infrastructure, and California's agriculture, the Department responded by instituting an Incident Command System ("ICS") and redirecting staff and resources to implement long-term planning and eradication efforts. Since that time over 525 nutria have been taken, with additional detections confirmed, across San Joaquin, Stanislaus, Merced, Fresno, Mariposa, and Tuolumne Counties. The State's response now includes the Department of Food and Agriculture, U.S. Department of Agriculture, Department of Water Resources, and U.S. Fish and Wildlife Service. This effort has already cost the State millions of dollars to respond to this introduction and resulting infestation. In FY 19-20, the Department is slated to receive an on-going budget from the Legislature to address the problem, an \$8.5 million grant from the Sacramento-San Joaquin Delta Conservancy, and will transition from the ICS to a dedicated, long-term Nutria Eradication Program; we anticipate the successful eradication of nutria from California, in total, will cost the State tens of millions of dollars.

Other State's Efforts at Eradication of Nutria

Resulting from broader introductions for the fur trade, nutria are now established in nearly 20 states, with most notable feral populations in Louisiana and the Chesapeake Bay. While both regions documented environmental damages in the 1950s, by the 1990s Louisiana had documented damage to and/or complete loss of over 100,000 coastal wetland acres and the Chesapeake Bay documented loss of over 50% of the marsh habitat within the Blackwater National Wildlife Refuge. Oregon and Washington have very high relative densities of nutria and have experienced extensive damage from nutria burrowing into levees, canals, and waterways.

The Chesapeake Bay Nutria Eradication Program was established in 2002, has now spent over \$17 million to remove approximately 14,000 nutria from the Peninsula, and anticipates declaring successful eradication within the next few years. In contrast, the nutria population in Louisiana has been estimated in the millions and beyond eradication. Since 2002, Louisiana has paid up to \$2.0 million per year in \$5/tail bounties for harvest of up to 400,000 nutria every year in an effort to contain

the population and reduce environmental damage. The populations in the Pacific Northwest are also beyond eradication, and the states have not been able to secure adequate funding for control.

(b) Goals and Benefits of the Regulation:

The goal of this regulation change is to prevent the possession of live nutria in California. This regulation will benefit the Department, the State, and its resources, by reducing the potential for future, additional introductions via released or escaped nutria. Ultimately, this regulation protects California's wetlands, waterways, infrastructure, water supplies, human health and safety, and agriculture.

(c) Authority and Reference Sections from Fish and Game Code for Regulation:

Authority: Section 4150, Fish and Game Code.

Reference: Sections 2118, 3005.5, and 4150, Fish and Game Code.

(d) Specific Technology or Equipment Required by Regulatory Change: None.

(e) Identification of Reports or Documents Supporting Regulation Change:

"Discovery of Invasive Nutria in California" (Attachment A)

"Nutria Eradication Program Update" (Attachment B)

(f) Public Discussions of Proposed Regulations Prior to Notice Publication:

Implementation of the eradication effort is ongoing and has been supported by individuals and environmental and agricultural groups interested in the protection of the environment and infrastructure from damage by nutria. To date, the following meetings regarding nutria have been held:

3/12/2018	CDFW outreach meeting to Ag Commissioners, trappers - San Luis NWR
3/12/2018	CDFW outreach meeting to Water Agencies, Land Managers - San Luis NWR
3/28/2018	Delta Conservancy Board Meeting
4/11/2018	Senate Ag Informational Committee Meeting
4/11/2018	Wildlands IPM Symposium
5/17/2018	Delta Protection Commission Meeting
5/19/2018	Grasslands Water District Public Meeting
5/22/2018	California Ag Commissioners and Sealers Association Spring Meeting
5/24/2018	Wildlife Conservation Board
6/13/2018	MARAC (Mutual Aid Region Information Exchange Meeting)
6/13/2018	San Joaquin Farm Bureau Board Meeting
6/22/2018	Central Valley Flood Protection Board
7/11/2018	San Joaquin Farm Bureau Federation Workshop/Coalition for a Sustainable Delta
7/16/2018	WAFWA AIS Committee

7/18/2018	MARAC meeting - Region IV (Modesto)
7/25/2018	MARIX Meeting - Region V (Fresno)
7/27/2018	Department of Water Resources field staff
8/6/2018	Stanislaus County Ag Advisory Board Meeting
8/16/2018	CA Invasive Species Council Meeting
8/21/2018	San Joaquin County Board of Supervisors Meeting
8/22/2018	State Parks' Division of Boating and Waterways field staff
8/23/2018	Rotary Club of Newman
9/5/2018	Collaborative Science and Adaptive Management Program - Policy Group Meeting
9/11/2018	Bay-Delta Science Conference
10/23/2018	San Joaquin Farm Bureau Water Committee
11/5/2018	Delta Stewardship Council - Delta Interagency Implementation Committee (DPIIC)
11/6/2018	Delta Rec District Winter Weather Briefing (CalOES hosted)
11/8/2018	Alameda County grower CE training
11/8/2018	California Invasive Plant Council
11/14/2018	SSJ Delta Conservancy Board Meeting
11/14/2018	CA Forest Pest Council Meeting
11/29/2018	Association of Applied IPM Ecologists Conference (Visalia)
12/6/2018	Delta Independent Science Board non-native species workshop
2/7/2019	Western Section of the Wildlife Society Annual Meeting
3/19/2019	Wildlands IPM Symposium
4/4/2018	Yolo Basin Foundation Flyway Nights
4/8/2019	Delta Plan Interagency Implementation Committee
4/12/2019	Mokelumne River Association
4/30/2019	Assembly Committee on Water, Parks, and Wildlife Hearing on AJR-8
5/18/2019	Grasslands Water District Public Meeting
5/21/2019	California Association of Ag Commissioners and Sealers Association Spring Meeting
5/24/2019	Central Valley Flood Protection Board
6/5/2019	California Invasive Species Action Week - Lunchtime Webinar Series

IV. Description of Reasonable Alternatives to Regulatory Action

(a) Alternatives to Regulation Change: No alternative was considered.

(b) No Change Alternative:

If no regulatory change occurs, live nutria could be lawfully possessed by holders of restricted species, wildlife, rehabilitation, and scientific collecting permits.

Possession of these animals would increase the risk of accidental or intentional reintroduction of nutria, frustrating Department efforts to eradicate this non-native invasive species and reverse the severe environmental impacts it causes.

(c) Consideration of Alternatives:

In view of information currently possessed, no reasonable alternative considered would be more effective in carrying out the purpose for which the regulation is proposed, would be as effective and less burdensome to affected private persons than the proposed regulation, or would be more cost-effective to affected private persons and equally effective in implementing the statutory policy or other provision of law.

V. Mitigation Measures Required by Regulatory Action: None.

VI. Impact of Regulatory Action

The potential for significant statewide adverse economic impacts that might result from the proposed regulatory action has been assessed, and the following initial determinations relative to the required statutory categories have been made:

(a) Significant Statewide Adverse Economic Impact Directly Affecting Businesses, Including the Ability of California Businesses to Compete with Businesses in Other States:

The proposed action will not have a significant statewide adverse economic impact directly affecting business, including the ability of California businesses to compete with businesses in other states. The proposed action is an additional component of the state's nutria eradication program that is anticipated to minimize the costly risks to infrastructure and resources that nutria pose. Reducing the potential for the spread of escaped nutria should help protect California's business activities that draw upon well-functioning wetlands, waterways, infrastructure, and water supplies, such as agriculture and associated businesses.

(b) Impact on the Creation or Elimination of Jobs Within the State, the Creation of New Businesses or the Elimination of Existing Businesses, or the Expansion of Businesses in California; Benefits of the Regulation to the Health and Welfare of California Residents, Worker Safety, and the State's Environment:

The Commission anticipates no impacts on the creation or elimination of jobs within the state and no impact on the creation of new businesses or the elimination of existing businesses because the proposed amendment is anticipated to aid in the preservation of existing water infrastructure with no cost to current business activities. The Commission anticipates benefits to the health and welfare of California residents by the protection of water supplies. The proposed action is not anticipated to directly affect worker safety. The Commission anticipates benefits to the State's environment by supporting strategies that further the control of invasive species.

(c) Cost Impacts on a Representative Private Person or Business:

The agency is not aware of any cost impacts that a representative private person or business would necessarily incur in reasonable compliance with the proposed action.

- (d) Costs or Savings to State Agencies or Costs/Savings in Federal Funding to the State:

No new costs to the State. Additionally, the proposed action will aid in the prevention of future importations and releases, preventing loss of state agency and/or federal funding to response costs.

- (e) Nondiscretionary Costs/Savings to Local Agencies: None.
- (f) Programs Mandated on Local Agencies or School Districts: None.
- (g) Costs Imposed on Any Local Agency or School District that is Required to be Reimbursed Under Part 7 (commencing with Section 17500) of Division 4, Government Code: None.
- (h) Effect on Housing Costs: None.

VII. Economic Impact Assessment

- (a) Effects of the Regulation on the Creation or Elimination of Jobs Within the State:

The Commission anticipates no impacts on the creation or elimination of jobs within the state because the proposed action would have such limited scope to affect businesses or the demand for labor.

- (b) Effects of the Regulation on the Creation of New Businesses or the Elimination of Existing Businesses Within the State:

The Commission does not anticipate any effects of the proposed regulation on the creation of new businesses or the elimination of existing businesses within the state because it would not directly affect the demand for business products or services.

- (c) Effects of the Regulation on the Expansion of Businesses Currently Doing Business Within the State:

The Commission does not anticipate the any effects of the proposed regulation on the expansion of businesses currently doing business within the state because the proposed action would not directly affect the demand for business products or services.

- (d) Benefits of the Regulation to the Health and Welfare of California Residents:

The Commission anticipates benefits to the health and welfare of California residents by contributing toward the protection of water supplies.

(e) Benefits of the Regulation to Worker Safety:

The Commission does not anticipate benefits to worker safety because the proposed amendment would not impact working conditions.

(f) Benefits of the Regulation to the State's Environment:

The Commission anticipates benefits to the State's environment through support of strategies that control damaging invasive species.

(g) Other Benefits of the Regulation: None.

Informative Digest/Policy Statement Overview

This amendment of Section 473 would ban the possession of live nutria to prevent new introductions of nutria in the state. Nutria affect the State's wildlife by damaging wetland habitats, and put waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture at risk from damage through their burrowing and herbivory of aquatic vegetation. The Department has implemented a multi-million dollar nutria eradication program, and this regulation is an integral part of this effort.

Possession of nutria is only possible under a permit issued by the Department. But, the permit denial provisions in California Code of Regulations, Title 14, subsection 671.1(c)(5), sections 670 and 650 have no provisions for banning the possession of live nutria in California.

Section 473 provides exceptions to FGC 4150, allowing for the possession of legally taken non-game birds and mammals, including rodents such as nutria, but not prohibiting the possession of live nutria pursuant to a Department-issued permit. Thus, the Commission proposes an addition to subsection 473(b) stating:

“It is unlawful to possess live nutria (*Myocastor coypus*), and the Department shall not issue any permit authorizing possession of any live nutria.”

Goals and Benefits of the Regulation:

The goal of this regulation change is to prohibit any possession of live nutria and ensure the Department no longer issues permits allowing the possession of live nutria in California. This regulation will benefit the Department, State, and its resources by reducing the potential for future, additional introductions via released or escaped nutria and thereby protect California's wildlife, wetland habitats, waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture.

Proposed Regulatory Language

Section 473, Title 14, CCR, is amended to read:

§ 473. Possession of Nongame Animals.

(a) Any nongame bird or mammal that has been legally taken pursuant to this chapter may be possessed.

(b) It is unlawful to possess live nutria (*Myocastor coypus*), and the Department shall not issue any permit authorizing possession of any live nutria.

Note: Authority cited: Section 4150, Fish and Game Code. Reference: ~~Section~~ Sections 2118, 3005.5, and 4150, Fish and Game Code.

Discovery of invasive nutria in California

Landowners, we need your help...

CDFW has deployed nutria survey teams from the Delta through the San Joaquin Valley and needs written access permissions to enter or cross private properties for the purposes of conducting nutria surveys and, where detected, implementing trapping efforts. Landowners and tenants, [we need your help](#); so CDFW can survey for and remove destructive nutria from your properties, complete and submit the [Nutria Project Temporary Entry Permit](#).

How to Report a Sighting

Suspected observations or potential signs of nutria should be **photographed** and immediately reported to CDFW's [Invasive Species Program online](#), by e-mail to invasives@wildlife.ca.gov, or by phone at (866) 440-9530. Observations on state or federal lands should be immediately reported to local agency staff on the property. Reports will be followed up on by the interagency nutria response team and will help in their eradication effort. If possible, photos of animals should include views of the whiskers, front or hind foot, or tail; for optimal photos of tracks, include an object for size reference (e.g., pencil, quarter, wallet) and take the photo from the side, at an angle ($\leq 45^\circ$) to cast shadows into the track.

Please consult the [nutria identification flyer \(PDF\)](#) or "Nutria Identification" section below for reference images and other commonly confused species. Additionally, the Delta Stewardship Council has developed a convenient [nutria pocket guide](#) to aid in field identification of nutria; to request the printed pocket guide(s), please contact CDFW at Invasives@wildlife.ca.gov or (866) 440-9530.

General Information

For general information on nutria biology and ecology please see the [nutria species profile page](#).

Large, male nutria trapped in a private wetland in Merced County, June 2017. CDFA photo.

Nutria Impacts

Through their extensive herbivory and burrowing habits, nutria have devastating impacts on wetland habitats, agriculture, and water conveyance/flood protection infrastructure. Nutria consume up to 25% of their body weight in above- and below-ground plant material each day. Due to their feeding habits, up to 10 times the amount of plant material consumed is destroyed, causing extensive damage to the native plant community, soil structure, and nearby agricultural crops. The loss of plant cover and soil organic matter results in severe erosion of soils, in some cases converting marsh to open water. Further, nutria burrow into banks and levees, creating complex dens that span as far as 6 meters deep and 50 meters into the bank and often cause severe streambank erosion, increased sedimentation, levee failures, and roadbed collapses.

Wetland loss caused by nutria damage in Blackwater National Wildlife Refuge, Delmarva Peninsula, Chesapeake Bay. Left, normal marsh in 1939 before nutria introduction in the 1940s. Right, by 1989, over 50% of the Refuge's marshes had been converted to open water due to the destructive feeding habits of nutria. Photos courtesy of USFWS.

An exclosure experiment in a Louisiana marsh demonstrating the severe ecological damages caused by nutria herbivory in wetland habitats. Photo courtesy of Louisiana Dept. of Wildlife and Fisheries.

Nutria burrowing causes extensive damage to water infrastructure, banks, and levees, and creates a hazard for people, livestock, and machine operators. Potential levee and dike failures due to nutria burrowing have serious implications for flood protection, water delivery, and agricultural irrigation in California. Left, nutria burrow in Tualatin National Wildlife Refuge in Oregon. Photo courtesy of USFWS. Right, extensive burrowing damage by nutria in Oregon. Photo courtesy of Trevor Sheffels, PSU.

Discovery in California

Confirmed detections of nutria in California can be viewed in the [nutria detection map \(PDF\)](#). As of May 22, 2019, 510 nutria have been taken in California, with several additional animals confirmed present, across Merced, Stanislaus, San Joaquin, Fresno, Tuolumne, and Mariposa Counties. In September 2018, the first reproducing population of nutria within the legal Sacramento-San Joaquin Delta boundary was discovered south of Lathrop (San Joaquin County). In May 2019, a nutria was detected near Rough and Ready Island, approximately 16 miles north of the nearest known population and previous detections.

Nutria Taken in California, by County (as of 5/22/19)

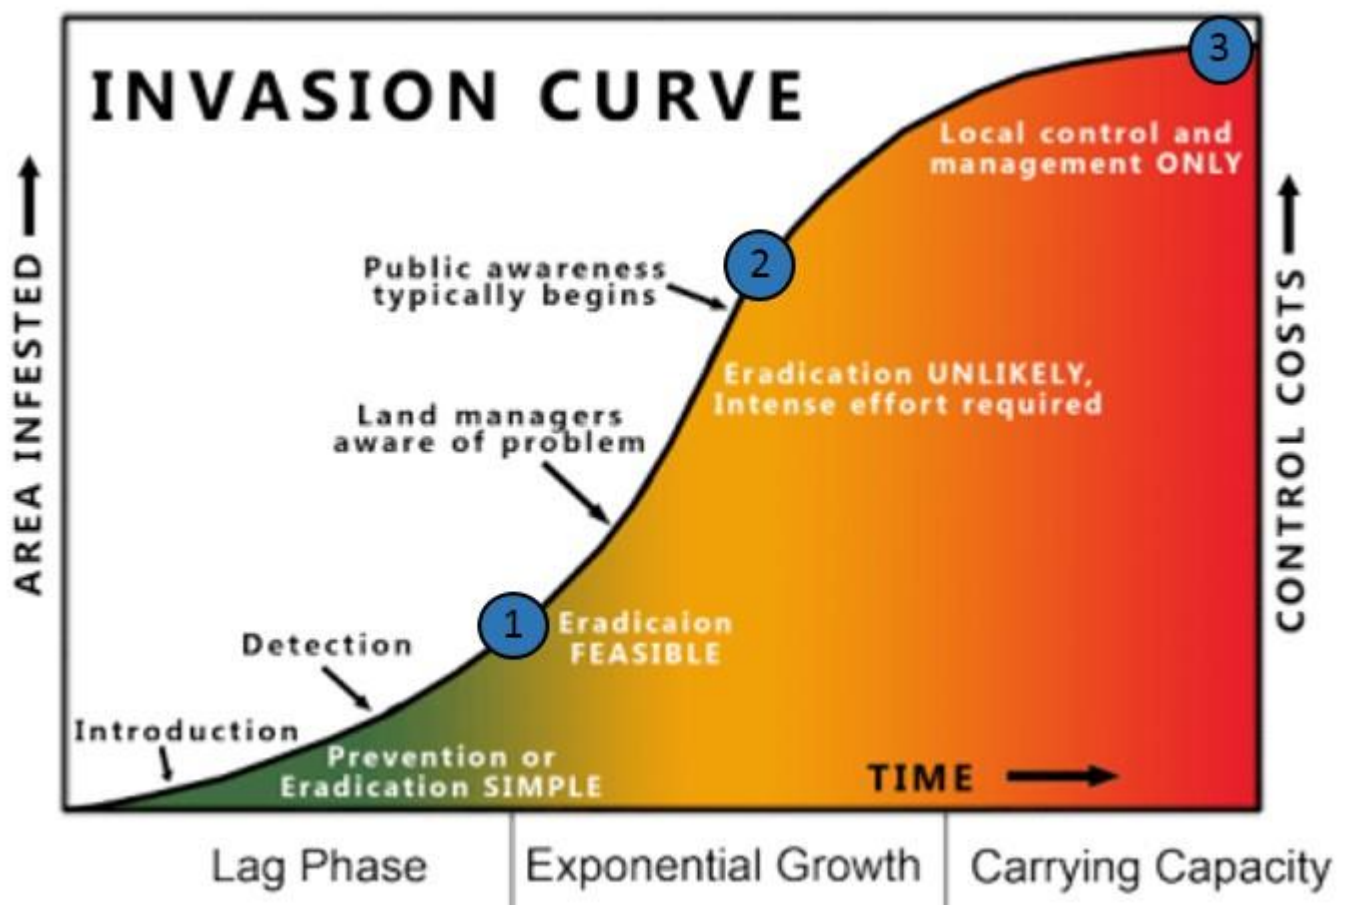

Total	Merced	San Joaquin	Stanislaus	Mariposa	Fresno
510	430	65	12	2	1

Eradication Effort

CDFW is collaborating with other agencies and local partners to develop the most effective strategy for eradicating nutria from California. As depicted in the "Invasion Curve" figure below, invasive species infestations typically experience a lag phase, while population size and area infested are relatively small, successful eradication is most feasible, and control efforts are most cost-efficient. As time progresses, the population size, area infested, and costs required for control increase exponentially, and the probability of successful eradication is lost.

Conceptually, (1) represents where we believe the current extent of the nutria population is in California; eradication is feasible with rapid response; (2) represents the nutria population in the Chesapeake Bay (Delmarva Peninsula) prior to implementation of the [Chesapeake Bay Nutria Eradication Project \(CBNEP\)](#). The CBNEP strategically removed over 14,000 nutria from 2000-2015 and has not detected a nutria since early 2015. (3) represents the [nutria population in Louisiana](#), where population control costs up to \$2 million dollars each year for bounty harvests alone.

Currently, there is a small window of opportunity to successfully eradicate the population of nutria from California. As time progresses, the population size and geographic area of infestation are increasing, along with the effort, resources, and funds required for successful eradication. Over time, the probability of successful eradication decreases, and California would be left to manage and mitigate the devastating impacts of nutria on wetlands, agriculture, and water conveyance/flood control infrastructure.

The interagency Nutria Response Team includes representatives from CDFW, the California Departments of Food and Agriculture, Parks and Recreation, and Water Resources, the U.S. Department of Agriculture, the U.S. Fish and Wildlife Service and local county agricultural commissioner offices. The team is currently preparing an eradication plan, the first stage of which is determining the full extent of the infestation. Assistance from local landowners and the public throughout the Central Valley, Sacramento-San Joaquin Delta, and beyond is critical to successfully delineating the population.

Take by Landowners/Hunters

CDFW has classified nutria as a nongame mammal. [Fish and Game Code §4152](#) specifies property owners or their agents (who possess written permission from the owner or tenant) may take nutria at any time by any legal means to address damage to crops or property. Restrictions apply to the use of traps and types of traps. Nutria are a Restricted Species in California under the California Code of Regulations, Title 14, Section 671, and cannot be imported, transported, or possessed live in the state of California.

Given their very similar appearances, particularly in overlapping size classes, citizens should take extra precaution to [distinguish nutria from other aquatic mammals \(PDF\)](#); the majority of nutria reports received by CDFW have been muskrats, as have been some "nutria" featured in the media. Any nutria taken on private or public land should be reported to CDFW as soon as possible for purposes of delineating the extent of the infestation. At minimum, CDFW needs photos to confirm identification; preferably, CDFW needs the carcass to determine sex, age, and reproductive status.

Nutria Identification

Nutria are large, semi-aquatic rodents that reach up to 2.5 feet in body length, 12- to 18-inch tail length and +20 pounds in weight. Nutria strongly resemble native beaver and muskrat, but are distinguished by their round, sparsely haired tails and white whiskers (see CDFW's [nutria ID guide \(PDF\)](#) or Delta Stewardship Council's [nutria pocket guide](#)). Both nutria and muskrat often have white muzzles, but muskrats have dark whiskers, nearly triangular (laterally compressed) tails and reach a maximum size of five pounds. Beavers have wide, flattened tails and dark whiskers and reach up to 60 pounds. Other small mammals can sometimes be mistaken for nutria if seen briefly or in low light conditions, including river otters and mink.

Adult nutria discovered in a private pond in Tuolumne County, east of Don Pedro Reservoir. Though muskrats may have a white muzzle, both muskrats and beaver have dark whiskers. Nutria have characteristic white whiskers, and most often have conspicuous, dark ears with light-colored fur underneath, as seen in this image. Photo courtesy of Peggy Sells.

California has several aquatic mammals that occur in the same habitats and may be confused with nutria. Top left, muskrat, note the nearly triangular tail and dark whiskers that distinguish muskrats from small nutria, photo courtesy of Missouri Dept. of Conservation. Top right, American beaver, note the broad, flat tail that, along with dark whiskers, distinguishes small beavers from nutria, CDFW photo. Bottom, American mink, note the fully furred tail, dark whiskers, and weasel-like body form, photo courtesy of Alaska Dept. of Fish and Game.

2017-07-12 7:56:06 AM

Left, juvenile river otters, pictured here in a cattail marsh, may also be mistaken for nutria. Note the long body and thick, fully-furred tail, CDFW photo. Right adult river otter, photo courtesy of National Park Service.

Nutria often have a dark undercoat, with lighter-colored guard hairs. Their dark, conspicuous ears, with lighter fur underneath, are helpful in distinguishing nutria from other aquatic mammals when their round tail is not clearly visible. CDFW photos.

Left, nutria front foot, showing the four toes visible in tracks and the barely visible fifth, residual toe on the inner, lower area of the foot. Right, nutria hind foot, showing the webbing between the inner four toes and outer, fifth toe free from webbing. CDFW photos.

Habitat

Nutria can be found anywhere in or near freshwater or estuaries. Thus far, they have been found in cattail and tule marshes, ponds, canals, sloughs, and rivers. All currently known locations are upstream of the Sacramento-San Joaquin Delta, which provides a vast amount of ideal and interconnected habitat for nutria.

Look for nutria and signs of nutria presence in wetlands, canals, rivers, and creeks, along levees and riparian areas, in flooded agricultural fields adjacent to waterways, and in the transition zone between wetland and terrestrial habitat.

Because nutria are wasteful feeders, signs of presence typically include cut, emergent vegetation (e.g. cattails and bulrushes), with only the basal portions eaten and the cut stems left floating, or grazed tops of new growth. Nutria create runs between feeding sites and burrows. Nutria often pile cuttings to create feeding/grooming platforms. Nutria construct burrows with entrances typically below the water line, though changing water levels may reveal openings. Nutria tracks have four visible front toes and, on their hind feet, webbing between four of five toes. Tracks are often accompanied by narrow tail drags.&

Nutria cuttings have a 45 degree angle bite and often have a residual strip attached to the stem. CDFW photos.

Top left, nutria often pile their vegetation cuttings into feeding/grooming beds. Top right, cattails cut by nutria and left lying in the marsh, a characteristic sign of nutria presence. Bottom, a vegetation clearing or "eat out" with cuttings floating throughout the area, characteristic signs of nutria herbivory damage. CDFW photos.

Nutria create "runs" in the vegetation between feeding areas and near entry/exit points along the water's edge. CDFW photo.

Nutria scat is distinctly grooved and floats on the water's surface. CDFW photos.

Nutria Eradication Program Update

Since implementing the Nutria Eradication Incident Command System in March 2018, the California Department of Fish and Wildlife's redirected field crews, along with three USDA-Wildlife Services trappers and the California Department of Food and Agriculture's delimitation crews, have:

- Completed full and/or rapid assessments on over 480K acres
- Set up 753 camera stations
 - Conducted over 2845 camera checks
- Confirmed nutria within 143 [40-acre] cells (Figure 1)
- Deployed 1269 trap sets for a total of 16018 trap nights
- Taken or accounted for the take of 525 nutria (since Mar 2017)
 - Merced- 438
 - San Joaquin- 69 (68 from Walthall Slough)
 - Stanislaus- 15
 - Mariposa- 2
 - Fresno- 1
- Of 521 necropsies:
 - 1.18 sex ratio (M:F)
 - Of the females captured:
 - 25% of juvenile (2-6 mos.) females have been pregnant
 - 59% of subadult (6-14 mos.) females have been pregnant
 - 75% of adult (>14 months of age) females have been pregnant
 - Along with the pregnant females, 626 fetal nutria have been removed from the population
 - Litter size ranged from 2-11, with an average of 6.1
 - Average litter size for adult females (> 14 mos.) is 6.8

With dedicated program funding anticipated through the Governor's FY 19-20 budget and grants from the Wildlife Conservation Board, U.S. Fish and Wildlife Service, and Sacramento-San Joaquin Delta Conservancy (SSJDC), including a new \$8.5 M award from the SSJDC, the Department is currently building a dedicated team of 30-40 to eradicate nutria from California. The Department expects to transition from the ICS into the dedicated program during summer 2019.

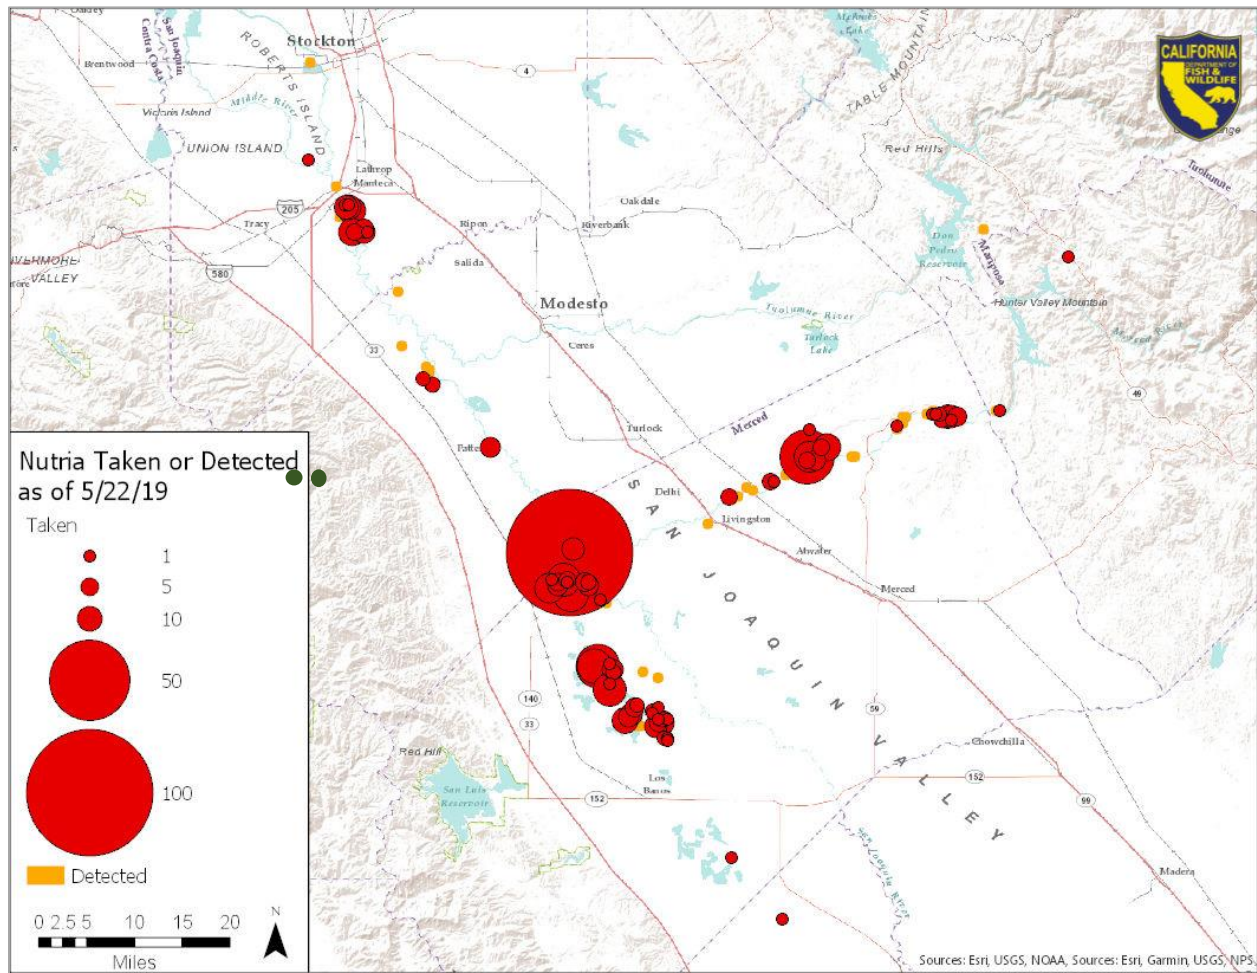

Figure 1. As of June 2019, 525 nutria have been taken or otherwise confirmed taken in California, with the following distribution of take by county: Merced – 438; San Joaquin – 69; Stanislaus – 15; Mariposa – 2; Fresno – 1; Tuolumne – 0; confirmed present. Map of take densities by 40-acre cell is as of 5/22/19.

Project Title: Amend Title 14, CCR, Section 473, Possession of Non-game Animals: Nutria

Project Applicant: California Fish and Game Commission

Project Location - Specific:

Statewide

Project Location - City: N/A Project Location - County: N/A

Description of Nature, Purpose and Beneficiaries of Project:

The amendment of Section 473 would ban the possession of live nutria (*Myocastor coypus*), to prevent new introductions of the destructive rodent to the state.

Name of Public Agency Approving Project: California Fish and Game Commission

Name of Person or Agency Carrying Out Project: California Department of Fish and Wildlife

Exempt Status: **(check one):**

- ☐ Ministerial (Sec. 21080(b)(1); 15268);
☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
☒ Categorical Exemption. State type and section number: Sections 15307, 15308, Title 14, CCR
☐ Statutory Exemptions. State code number: _____

Reasons why project is exempt:

The proposed amendments do not have the possibility of impact on the environment because the changes are an effort to protect the State's wildlife, wetland habitats, waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture from the detrimental impacts caused by invasive nutria (*Myocastor coypus*).

Lead Agency

Contact Person: Melissa Miller-Henson Area Code/Telephone/Extension: 916-653-4899

If filed by applicant:

1. Attach certified document of exemption finding.
2. Has a Notice of Exemption been filed by the public agency approving the project? ☒ Yes ☐ No

Signature: _____ Date: _____ Title: Executive Director

☒ Signed by Lead Agency ☐ Signed by Applicant

Authority cited: Sections 21083 and 21110, Public Resources Code. Date Received for filing at OPR: _____
Reference: Sections 21108, 21152, and 21152.1, Public Resources Code.

DRAFT

December 12, 2019

ATTACHMENT TO NOTICE OF EXEMPTION Amendment of Section 473, Title 14, California Code of Regulations Possession of Nongame Animals: Nutria

The California Fish and Game Commission (Commission) has taken final action under the Fish and Game Code and the Administrative Procedure Act (APA) with respect to the project discussed on December 11, 2019. In taking its final action for the purposes of the California Environmental Quality Act (CEQA, Pub. Resources Code, § 21000 *et seq.*), the Commission adopted the regulations relying on the CEQA exemption for projects where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.

Regulations

In an effort to protect the State's wildlife, wetland habitats, waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture from the detrimental impacts caused by invasive nutria (*Myocastor coypus*), the amendment of Section 473 would ban the possession of live nutria to prevent new introductions of the destructive rodent to the state. The Department of Fish and Wildlife has implemented a multi-million dollar nutria eradication program and the regulation is an important part of this effort.

Categorical Exemptions to Protect Natural Resources and the Environment

The purpose of this explanation is to describe staff's analysis of use of the categorical exemptions under the California Environmental Quality Act (CEQA) as it relates to this regulatory action.

The Commission's adoption of the proposed regulations is an action subject to CEQA. The review by Department staff pursuant to CEQA Guidelines Section 15300, Title 14, CCR, leads staff to conclude that adoption of the regulations would properly fall within the Class 7 and Class 8 categorical exemptions (sections 15307, 15308). These two exemptions are related to agency actions authorized by statute to protect natural resources and the environment.

The proposed amendments do not have the possibility of impact on the environment because the changes are an effort to protect the State's wildlife, wetland habitats, waterways, water supplies, water conveyance and flood protection infrastructure, and agriculture from the detrimental impacts caused by invasive nutria (*Myocastor coypus*),

No Exceptions to Categorical Exemptions Apply

As to the exceptions to categorical exemptions set forth in CEQA Guidelines section 15300.2, including the prospect of unusual circumstances and related effects, staff has reviewed all of the available information possessed by the Department relevant to the issue and does not believe adoption of the regulations poses any unusual circumstances that would constitute an exception to the categorical exemptions set forth above.

A. ESTIMATED PRIVATE SECTOR COST IMPACTS *Include calculations and assumptions in the rulemaking record.*

1. Check the appropriate box(es) below to indicate whether this regulation:

- | | |
|----------------------------------------------------------------|---------------------------------------------------------------------------|
| <input type="checkbox"/> a. Impacts business and/or employees | <input type="checkbox"/> e. Imposes reporting requirements |
| <input type="checkbox"/> b. Impacts small businesses | <input type="checkbox"/> f. Imposes prescriptive instead of performance |
| <input type="checkbox"/> c. Impacts jobs or occupations | <input type="checkbox"/> g. Impacts individuals |
| <input type="checkbox"/> d. Impacts California competitiveness | <input checked="" type="checkbox"/> h. None of the above (Explain below): |

Presently there are no businesses or persons to be impacted by this regulation***If any box in Items 1 a through g is checked, complete this Economic Impact Statement.******If box in Item 1.h. is checked, complete the Fiscal Impact Statement as appropriate.***2. The _____ estimates that the economic impact of this regulation (which includes the fiscal impact) is:
(Agency/Department)

- ☐ Below \$10 million
- ☐ Between \$10 and \$25 million
- ☐ Between \$25 and \$50 million
- ☐ Over \$50 million *[If the economic impact is over \$50 million, agencies are required to submit a [Standardized Regulatory Impact Assessment](#) as specified in Government Code Section 11346.3(c)]*

3. Enter the total number of businesses impacted: _____

Describe the types of businesses (Include nonprofits): _____

Enter the number or percentage of total
businesses impacted that are small businesses: _____

4. Enter the number of businesses that will be created: _____ eliminated: _____

Explain: _____

5. Indicate the geographic extent of impacts: ☐ Statewide
☐ Local or regional (List areas): _____

6. Enter the number of jobs created: _____ and eliminated: _____

Describe the types of jobs or occupations impacted: _____

7. Will the regulation affect the ability of California businesses to compete with
other states by making it more costly to produce goods or services here? ☐ YES ☐ NO

If YES, explain briefly: _____

(REGULATIONS AND ORDERS)**

STD. 399 (REV. 12/2013)

ECONOMIC IMPACT STATEMENT (CONTINUED)**B. ESTIMATED COSTS** *Include calculations and assumptions in the rulemaking record.*

1. What are the total statewide dollar costs that businesses and individuals may incur to comply with this regulation over its lifetime? \$ _____
 - a. Initial costs for a small business: \$ _____ Annual ongoing costs: \$ _____ Years: _____
 - b. Initial costs for a typical business: \$ _____ Annual ongoing costs: \$ _____ Years: _____
 - c. Initial costs for an individual: \$ _____ Annual ongoing costs: \$ _____ Years: _____
 - d. Describe other economic costs that may occur: _____
2. If multiple industries are impacted, enter the share of total costs for each industry: _____
3. If the regulation imposes reporting requirements, enter the annual costs a typical business may incur to comply with these requirements. *Include the dollar costs to do programming, record keeping, reporting, and other paperwork, whether or not the paperwork must be submitted.* \$ _____
4. Will this regulation directly impact housing costs? ☐ YES ☐ NO
 If YES, enter the annual dollar cost per housing unit: \$ _____
 Number of units: _____
5. Are there comparable Federal regulations? ☐ YES ☐ NO
 Explain the need for State regulation given the existence or absence of Federal regulations: _____
 Enter any additional costs to businesses and/or individuals that may be due to State - Federal differences: \$ _____

C. ESTIMATED BENEFITS *Estimation of the dollar value of benefits is not specifically required by rulemaking law, but encouraged.*

1. Briefly summarize the benefits of the regulation, which may include among others, the health and welfare of California residents, worker safety and the State's environment: _____
2. Are the benefits the result of: ☐ specific statutory requirements, or ☐ goals developed by the agency based on broad statutory authority?
 Explain: _____
3. What are the total statewide benefits from this regulation over its lifetime? \$ _____
4. Briefly describe any expansion of businesses currently doing business within the State of California that would result from this regulation: _____

D. ALTERNATIVES TO THE REGULATION *Include calculations and assumptions in the rulemaking record. Estimation of the dollar value of benefits is not specifically required by rulemaking law, but encouraged.*

1. List alternatives considered and describe them below. If no alternatives were considered, explain why not: No other alternative were considered.
 The proposed action was found to be the most effective and least burdensome to affected private persons and businesses.

**ECONOMIC AND FISCAL IMPACT STATEMENT
(REGULATIONS AND ORDERS)**

STD. 399 (REV. 12/2013)

ECONOMIC IMPACT STATEMENT (CONTINUED)

2. Summarize the total statewide costs and benefits from this regulation and each alternative considered:

Regulation: Benefit: \$ _____ Cost: \$ _____

Alternative 1: Benefit: \$ _____ Cost: \$ _____

Alternative 2: Benefit: \$ _____ Cost: \$ _____

3. Briefly discuss any quantification issues that are relevant to a comparison of estimated costs and benefits for this regulation or alternatives: _____

4. Rulemaking law requires agencies to consider performance standards as an alternative, if a regulation mandates the use of specific technologies or equipment, or prescribes specific actions or procedures. Were performance standards considered to lower compliance costs? ☐ YES ☐ NOExplain: _____
_____**E. MAJOR REGULATIONS** *Include calculations and assumptions in the rulemaking record.****California Environmental Protection Agency (Cal/EPA) boards, offices and departments are required to submit the following (per Health and Safety Code section 57005). Otherwise, skip to E4.***1. Will the estimated costs of this regulation to California business enterprises **exceed \$10 million**? ☐ YES ☐ NO***If YES, complete E2. and E3******If NO, skip to E4***

2. Briefly describe each alternative, or combination of alternatives, for which a cost-effectiveness analysis was performed:

Alternative 1: _____

Alternative 2: _____

(Attach additional pages for other alternatives)

3. For the regulation, and each alternative just described, enter the estimated total cost and overall cost-effectiveness ratio:

Regulation: Total Cost \$ _____ Cost-effectiveness ratio: \$ _____

Alternative 1: Total Cost \$ _____ Cost-effectiveness ratio: \$ _____

Alternative 2: Total Cost \$ _____ Cost-effectiveness ratio: \$ _____

4. Will the regulation subject to OAL review have an estimated economic impact to business enterprises and individuals located in or doing business in California exceeding \$50 million in any 12-month period between the date the major regulation is estimated to be filed with the Secretary of State through 12 months after the major regulation is estimated to be fully implemented?

☐ YES ☐ NO*If YES, agencies are required to submit a [Standardized Regulatory Impact Assessment \(SRIA\)](#) as specified in Government Code Section 11346.3(c) and to include the SRIA in the Initial Statement of Reasons.*

5. Briefly describe the following:

The increase or decrease of investment in the State: _____

The incentive for innovation in products, materials or processes: _____

The benefits of the regulations, including, but not limited to, benefits to the health, safety, and welfare of California residents, worker safety, and the state's environment and quality of life, among any other benefits identified by the agency: _____

11. DELTA FISHERIES MANAGEMENT POLICY

Today's Item

Information ☐

Action ☒

Discuss the potential adoption of a Delta Fisheries Management Policy and compatibility of the FGC Striped Bass Policy.

Summary of Previous/Future Actions

- | | |
|-----------------------------------------------|----------------------------------|
| • Delta Fisheries Forum | May 24, 2017; Sacramento |
| • WRC discussion | Sep 20, 2018; WRC, Sacramento |
| • WRC discussion | Jan 10, 2019; WRC, Ontario |
| • WRC discussion and recommendation | May 16, 2019; WRC, Sacramento |
| • FGC accepted WRC recommendation to schedule | Jun 12-13, 2019; Redding |
| • Today's discussion | Aug 7-8, 2019; Sacramento |

Background

In Jun 2016, FGC received a regulation change petition (Tracking Number 2016-011) from the Coalition for a Sustainable Delta and others requesting to increase the bag limit and reduce the minimum size limit for striped bass and black bass in the Sacramento-San Joaquin Delta (Delta) and rivers tributary to the Delta. The expressed intent of the petition was to reduce predation by non-native bass on fish that are native to the Delta and listed as threatened or endangered under the federal or California endangered species acts, including winter-run and spring-run Chinook salmon, Central Valley steelhead, and delta smelt.

While the regulation change petition was formally withdrawn prior to FGC action, FGC requested that WRC schedule a discussion to explore the issue more comprehensively; the request also included a review of the existing FGC Striped Bass Policy that was adopted in 1996 and focuses on restoring and maintaining striped bass for recreational fishing opportunity (Exhibit 6). FGC staff was directed to hold a half-day forum focused on the State's vision for managing fisheries in the Delta for the benefit of native fish species and sport fisheries, implementation of the State's vision, and soliciting stakeholder input on potential actions FGC could consider related to this topic.

Held in May 2017, the forum was publicized and open to the public. The forum included a state agency panel discussion, an overview of FGC's policies and regulations for sport fisheries in the Delta, and a full group discussion. The discussion included two presentations by representatives for the original petition, consistent with direction provided by FGC. One of the recommendations that emerged from that forum was FGC adoption of a policy for fisheries management in the Delta that would provide science-based guidance to balance native fish needs with sport fishing opportunities in management decisions. The Coalition for a Sustainable Delta offered a proposed draft policy which, together with stakeholder and DFW input, formed the basis for the initial draft policy.

At its Sep 2018, Jan 2019, and May 2019 meetings, WRC discussed the draft policy and in May developed a recommendation that FGC schedule consideration of the draft policy. At its Jun

STAFF SUMMARY FOR AUGUST 7-8, 2019
(For background purposes only)

2019 meeting, FGC received the draft Delta Fisheries Management Policy advanced from WRC (Exhibit 5). At that meeting and following, stakeholders raised several significant issues with the draft policy. Following considerable public comment regarding the draft policy and current Striped Bass Policy, FGC accepted WRC's recommendation and directed staff to add the draft policy to the Aug 2019 meeting for discussion.

At this time, staff believes that additional discussions between stakeholders and staff of DFW and FGC are warranted to explore how to resolve the identified issues before FGC considers the draft Delta Fisheries Management Policy and any potential changes to the FGC Striped Bass Policy. Postponing discussion would allow dialogue to proceed and give additional stakeholders the chance to participate in ongoing discussions. Staff recommends that FGC consider new draft policies (based on discussions with stakeholders) at its Dec 2019 meeting in Sacramento, which will facilitate participation by stakeholders from in and around the Delta. If approved, FGC staff will provide a progress update at FGC's Oct 2019 meeting.

Significant Public Comments

1. The American Sportfishing Association and Coastside Fishing Club ask FGC to focus on the root causes of poor Delta health and oppose any effort to reduce long-term recreational fishing opportunities (Exhibit 1).
2. The California Sportsfishing League emphasizes the economic importance of striped bass, states that predation from non-native game fish in the Delta is a "red herring", and opposes a repeal of the FGC Striped Bass Policy. The league states that reductions in fishing opportunity run counter to the State's R3 project and ask that discussions be scheduled near the greater Sacramento area (Exhibit 2).
3. The Northern California Guides and Sportsmen's Association states that predation on salmonid species is a minor stressor. The association asks that the item be tabled until Dec to allow for ongoing discussions to ensue, and that any further FGC conversations take place in the vicinity of the potential impacts of the draft Delta Fisheries Management Policy (Exhibit 3).
4. The Congressional Sportsman's Foundation states that striped bass contribute to a healthy Delta ecosystem and that predation is not a significant factor driving Delta fish population abundances. They oppose the repeal of the Striped Bass Policy (Exhibit 4).

Recommendation

FGC staff: Postpone discussion of the draft policy to the Dec 2019 FGC meeting to allow FGC and DFW staff time to work with stakeholders on ways to address the issues that have been raised.

Motion/Direction

Moved by _____ and seconded by _____ that the Commission postpones discussion of the draft Delta Fisheries Management Policy and Commission's Striped Bass Policy until the December 2019 meeting.

California Fish and Game Commission

Developing a Delta Fisheries Management Policy

December 3, 2019 version of draft Delta Fisheries Management Policy
tracked against the August 1, 2019 draft version

It is the policy of the Commission that:

The Sacramento-San Joaquin Delta has faced, and continues to experience, declines in pelagic fishes and anadromous salmonids. This policy is intended to guide management decisions that could affect fish species and other aquatic resources. The Delta, for the purposes of this policy, means the Sacramento-San Joaquin Delta as defined in Section 12220 of the California Water Code. "Delta fisheries" includes listed species, species of greatest conservation need, native species, and game fish. It is the policy of the Fish and Game Commission (Commission) that:

- I. The Commission and Department of Fish and Wildlife (Department) shall seek to collaborate and coordinate with other agencies whose actions may affect with jurisdiction over species and other resources in the Sacramento-San Joaquin Delta (Delta) and its tributaries as the Department manages Delta they manage fisheries, state and federally listed fish species, such as salmonids and smelt, and other aquatic resources. The Commission and Department will provide feedback to other agencies on any actions in the Delta that could have significant, adverse impacts to California's fisheries.
- II. The Commission and Department shall strive to manage these resources holistically, sustainably, and consistent with the direction of the legislature to protect, restore, and enhance the Delta ecosystem.
- III. The Department shall rely on credible the best available science (as defined by Section 33 of the Fish and Game Code) to develop strategies and recommendations for managing Delta fisheries, and listed species in the Delta. Using this information, the Department shall strive to improve habitat conditions (such as water temperature for and flows, water quality, and food) and manage other stressors (such as disease, predation and prey availability, and competition) alleviate threats to promote recovery of Delta fisheries (where applicable), listed species.
- IV. Recognizing that listed species have highest priority, theThe Department shall manage Delta fisheries listed fish species to protect and enhance each species' abundance, distribution, and genetic integrity to support their each species' resiliency and (where applicable) recovery.
- V. The Department shall manage Delta fisheries in a manner that provides for maximizing sustainable recreational angling opportunities while avoiding or minimizing adverse effects to native and listed species, species of greatest conservation need, and recovery activities.
- I. ~~Based on current best available science and evaluations of past management of Delta fisheries, the Commission and Department shall not develop or enhance fisheries in the~~

~~Delta which may pose a direct threat to the survival of, or significantly limit, recovery of a listed species.~~

- VI. To the extent feasible, the Commission and the Department shall support scientific research on habitat or species improvement projects and investments to help ~~advance~~ the policy goals set forth herein. The Department should determine and identify clear, objective-based~~consider identified~~ research needs when developing research and recovery project plans, making research investments, making research and recovery funding decisions, and when reviewing and/or authorizing research projects. ~~The Department may consider the permitted scientific sampling of non-native fish outside sport fishing size and bag limits to advance scientific research to support native species in the Delta, where statutorily permitted and practical.~~ Where feasible, the Department should encourage and permit recreational anglers to contribute to scientific research of native and non-native species on predator-prey relationships to help inform efforts to protect and enhance Delta fisheries; such studies should be carefully considered in light of the overall population goals for, and effect on, both the study target and related ~~native~~ species.

Clean version of draft Delta Fisheries Management Policy as revised December 3, 2019

It is the policy of the Commission that:

The Sacramento-San Joaquin Delta has faced, and continues to experience, declines in pelagic fishes and anadromous salmonids. This policy is intended to guide management decisions that could affect fish species and other aquatic resources. The Delta, for the purposes of this policy, means the Sacramento-San Joaquin Delta as defined in Section 12220 of the California Water Code. "Delta fisheries" includes listed species, species of greatest conservation need, native species, and game fish. It is the policy of the Fish and Game Commission (Commission) that:

- I. The Commission and Department of Fish and Wildlife (Department) shall seek to collaborate and coordinate with other agencies whose actions may affect species and other resources in the Delta and its tributaries as the Department manages Delta fisheries and other aquatic resources. The Commission and Department will provide feedback to other agencies on any actions in the Delta that could have significant, adverse impacts to California's fisheries.
- II. The Commission and Department shall strive to manage these resources holistically, sustainably, and consistent with the direction of the legislature to protect, restore, and enhance the Delta ecosystem.
- III. The Department shall rely on credible science (as defined by Section 33 of the Fish and Game Code) to develop strategies and recommendations for managing Delta fisheries. Using this information, the Department shall strive to improve habitat conditions (such as water temperature and flows, water quality, and food) and manage other stressors (such as disease, predation and prey availability, and competition) to promote recovery of Delta fisheries (where applicable).
- IV. Recognizing that listed species have highest priority, the Department shall manage Delta fisheries to protect and enhance each species' abundance, distribution, and genetic integrity to support their resiliency and (where applicable) recovery.
- V. The Department shall manage Delta fisheries in a manner that provides for maximizing sustainable recreational angling opportunities while avoiding or minimizing adverse effects to native and listed species, species of greatest conservation need, and recovery activities.
- VI. To the extent feasible, the Commission and the Department shall support scientific research on habitat or species improvement projects and investments to help the policy goals set forth herein. The Department should determine and identify clear, objective-based research needs when developing research and recovery project plans, making research investments, making research and recovery funding decisions, and when reviewing and/or authorizing research projects. Where feasible, the Department should encourage and permit recreational anglers to contribute to scientific research of native and non-native species to help inform efforts to protect and enhance Delta fisheries; such studies should be carefully considered in light of the overall population goals for, and effect on, both the study target and related species.

California Fish and Game Commission

Revising the Striped Bass Policy

December 3, 2019 versions of draft revised Striped Bass Policy
tracked against currently-adopted version

Stakeholder Draft Version 1:

It is the policy of the Commission that:

- I. The Department of Fish and ~~Game~~ Wildlife shall work toward stabilizing and then restoring the presently declining striped bass fishery of the Sacramento-San Joaquin Estuary. This ~~goal~~ is consistent with Commission policy that the Department shall emphasize programs that ensure, enhance, and prevent loss of sport fishing opportunities.
- II. The Department shall ensure that actions to increase striped bass abundance are consistent with the Department's long-term mission and public trust responsibilities including those related to threatened and endangered species and other species of special concern. Recognizing issues associated with potential incidental take of these species, the department's goal is to restore the striped bass population to a healthy, self-sustaining growing population and robust recreational fishery. An appropriate target objective is to restore the population to 1 million adults within the next 5 to 10 years. an appropriate interim objective is to restore the striped bass population to the 1980 population level of 1.1 million adults within the next 5-10 years.
- ~~III. The long-term striped bass restoration goal, as identified in the Department's 1989 Striped Bass Restoration Plan, is 3 million adults.~~
- ~~IV.~~ III. The Department shall work toward these goals through any appropriate means. Such means may include actions to help maintain, restore, and improve habitat; beneficial to striped bass, reduce impacts of invasive aquatic vegetation, improve water quality, reduce loss of striped bass, pen-rearing of fish salvaged from water projects and diversions, fish screens; and artificial propagation and assess the status and population of striped bass in the Delta.

Stakeholder Draft Version 2:

It is the policy of the Commission that:

- I. The Department of Fish and Game ~~Wildlife~~ shall ~~work toward stabilizing and then restoring the presently declining~~ monitor and manage striped bass fishery ~~of in~~ the Sacramento-San Joaquin Estuary. This goal is consistent with Commission policy that the Department shall emphasize programs that ensure, enhance, and prevent loss of ~~sport fishing~~ recreational angling opportunities.
- II. The Department shall ensure that actions to increase striped bass abundance are consistent with the Department's long-term mission and public trust responsibilities including those related to threatened and endangered species and other species of ~~special concern~~ greatest conservation need. In light of the foregoing, the Department will seek to achieve a sustainable striped bass population in order to maintain or increase recreational angling opportunities, taking into account the availability of habitat to support the species as well as the need to avoid taking any action that would result in incidental take of listed species.
- ~~III. The long-term striped bass restoration goal, as identified in the Department's 1989 Striped Bass Restoration Plan, is 3 million adults.~~
- ~~IV.~~ III. The Department shall work toward these goals through any appropriate means. Such means may include actions to help maintain, restore, and improve habitat; beneficial to striped bass, reduce impacts of invasive aquatic vegetation, improve water quality, reduce loss of striped bass, pen-rearing of fish salvaged from water projects and diversions, fish screens, and artificial propagation and assess the status and population of striped bass in the Delta.

Commission Staff Draft Version:

It is the policy of the Commission that:

- I. The Department of Fish and ~~Game-Wildlife~~ shall ~~work toward stabilizing and then restoring the presently declining~~ monitor and manage the striped bass fishery of the Sacramento-San Joaquin Estuary. ~~This goal is consistent with Commission policy that the Department shall emphasize programs that ensure, enhance, and prevent loss of sport fishing opportunities.~~
- II. The Department shall ensure that actions to increase striped bass abundance are consistent with the Department's long-term mission and public trust responsibilities including those related to threatened and endangered species and other species of greatest conservation need, special concern. Recognizing issues associated with potential incidental take of these species, ~~an appropriate interim objective is to restore the striped bass population to the 1980 population level of 1.1 million adults within the next 5-10 years.~~ the Department shall strive to maintain a healthy, self-sustaining striped bass population in support of a robust recreational fishery.
- III. ~~The long-term striped bass restoration goal, as identified in the Department's 1989 Striped Bass Restoration Plan, is 3 million adults.~~
- IV-III. The Department shall work toward these goals through any appropriate means. Such means may include actions to help maintain, restore, and improve habitat; beneficial to striped bass, reduce impacts of invasive aquatic vegetation, improve water quality, reduce loss of striped bass, pen-rearing of fish salvaged from water projects and diversions, fish screens; and artificial propagation and assess the status and population of striped bass in the Delta.

Mr. Eric Sklar, President
California Fish and Game Commission
1416 Ninth Street, Suite 1320
Sacramento, CA 95814

November 27, 2019

RE: Striped Bass and Delta Fisheries Management Policies

Dear President Sklar and Members of the Fish and Game Commission:

The Congressional Sportsmen's Foundation (CSF) is supportive of the amendments made to the Delta Fisheries Management Policy with the statutory definition of "credible science" included. However, CSF has remaining concerns over the amendments to the Striped Bass Policy.

Established in 1989, the Congressional Sportsmen's Foundation (CSF) works with the Congressional Sportsmen's Caucus, the largest, most active bipartisan caucus on Capitol Hill with nearly 250 Members of Congress from both the House and Senate. Fifteen years ago, CSF extended the legislative network from Washington, DC to states across the country, establishing the bipartisan National Assembly of Sportsmen's Caucuses, which today is made up of 49 state legislative caucuses, and includes over 2,500 legislators. Ten years ago, CSF established a bipartisan Governors Sportsmen's Caucus, which includes more than half the governors from throughout the country. Together, this collective force of bipartisan elected officials works to protect and advance hunting, angling, recreational shooting and trapping for the nearly 40 million sportsmen and women who spend \$90 billion annually on our outdoor pursuits.

The California Outdoor Sporting Caucus joined the National Assembly of Sportsmen's Caucuses in 2004 to represent the interest of the Golden State's 1.82 million hunters and anglers, who spend \$3.5 billion annually and support more than 56,000 jobs within the state.

CSF commends the ongoing efforts of the Commission and the California Department of Fish and Wildlife (Department) to work with stakeholders to update these policies responsibly to manage Delta resources holistically and sustainably to protect and enhance the Delta ecosystem. However, CSF is concerned that without objective standards for working toward stabilizing and then restoring the presently declining striped bass fishery of the Sacramento-San Joaquin Estuary, under section I, the policy is ineffective.

In 1996, the Commission recognized the importance of the Striped Bass recreational fishery in the Sacramento-San Joaquin Estuary by implementing measurable objectives in the form of restorative population levels and time frame achievement markers. While population targets in numbers of fish are

The Sportsman's Voice in the Nation's Capitols

difficult to estimate and hard to achieve on a consistent basis, there are other methods to estimate population abundance and sustainability that could be used as management criteria. CSF appreciates the intent of the policy to stabilize and restore the striped bass populations, but the 2019 draft Striped Bass Policy lacks any measurable objectives and without such markers, limits the Commission's ability to ensure these policies are being upheld.

Thus, CSF respectfully requests that the Commission consider adopting an objective standard for stabilizing and then restoring the presently declining striped bass fishery, to ensure that both the Commission and the Department can effectively manage striped bass that contribute to a healthy Delta ecosystem and provides an economically valuable and recreationally important fishery.

CSF thanks the Commission for its continued dedication to managing the Delta fisheries resources holistically, including managing for striped bass and species of greatest concern that contribute to a productive, sustainable and economically viable recreational fishery.

Sincerely,

Chris Horton
Senior Director Fisheries Program

RE: Comments on Proposed Amendments to Striped Bass Policy

Dear President Sklar and Commissioners:

My name is Jacob Stout, I'm a 24-year-old angler from West Sacramento. My passion for these local waters borderlines on the deranged. That passion has taken me to study Fisheries Management at Humboldt State University. I have dedicated my entire life to protect the integrity of the fisheries I grew up fishing.

I've been fishing these waters my entire life and striped bass have been one of the most incredible species I've ever had the privilege to enjoy. I'm also speaking on behalf of my friends and family and community when I tell you how important these fish are. That being said, it's also a controversial species that I still have much to learn about. I've seen the boils of striper feasting as the hatchery trucks dump their salmonids in the water. I've also seen returning adult "jack:" salmon down the throat of 40lb stripers. So, I already understand the concern that salmonids, another cherished fishery of mine, are negatively affected by stripers.

However, I do not believe that Striped bass are a main culprit for the decline of salmonids in the Central Valley. Nor do I believe that the science supports the hypothesis that reducing the striped bass population will increase juvenile salmonid survival. The Central Valley is a disturbed ecosystem that has been dammed, diverted, and irrigated extensively. I spend many hours on the water and have seen thousands of salmon and steelhead in irrigation canals where they die with no hope of successful reproduction. My home is on the Deep Water Ship Channel where I personally witness thousands of fish every year swim in circles in "the locks" where they are either caught by hook and line or they die and decompose with no hope of successfully spawning.

I urge you to prioritize the protection of these species (salmon, steelhead, and stripers). Please spend our tax dollars ensuring these species have more high quality spawning, rearing and transitional habitats. Please don't let stripers become a scapegoat. Please hold water management agencies accountable for their impacts on species of the California Central Valley. Thank you.

Sincerely,

Jacob Stout

RE: Comments on Delta Fisheries Management Policy and Striped Bass Policy

Dear President Sklar and Commissioners:

Since 1989, I have been employed by the State of California's Departments of Fish and Wildlife and Water Resources as a biologist, associate biologist, and lastly as a senior environmental scientist. I became an American Fisheries Society, Certified Fisheries Professional in 2004. I was elected to several fish-related Board of Directors, and currently sit on the Salmonid Restoration Federation Board since 2014. I earned my undergraduate degree in Biology at UC Santa Cruz, my masters at San Jose State University via Moss Landing Marine Laboratories, and my doctorate in Animal Biology at UC Davis studying sub-adult Striped Bass distribution, habitat use, and movement patterns in the Sacramento-San Joaquin Estuary.

Science shows that the Delta's native fish decline is not largely due to predation by Striped Bass.

This is the first letter that I have written to the Fish and Game Commission (FGC) over my 30-year career. I convey this fact as a measure of my concern, disappointment, and frustration with the FGC on another misguided attempt to amend the Striped Bass Policy (4/5/1996) and failure to meet the commitments made in 1996 to restore the declining population. The FGC must make decisions based upon the decades of defensible science and expert scientists' testimonies reporting that the population declines in the Delta's native fishes are a result of over-allocation of water between competing interests, and not predation by the "Scapecfish" Striped Bass.

The Striped Bass population has been declining since at least the early 1990s as evident in the Striped Bass Policy which (1). recognized "the decline in the Striped Bass fishery in the Sacramento-San Joaquin Estuary" and "emphasized programs to prevent loss of sport fishing opportunities"; (2). committed to "restore the adult population to 1.1 million adults within 5-10 years; and (3). committed to the "long-term restoration goal of 3 million adults." More recent studies have shown that multiple fish species' populations have declined in Delta, including Striped Bass (Sommer et al. 2007; and others).

Predation is one of several much larger factors attributing to juvenile salmonid mortality as they migrate to the Pacific Ocean. Entrainment (e.g., suctioned up along with 10 million acre-feet of water) into the Central Valley and State Water Projects, elimination of floodplain rearing habitat, smaller water diversions, lack of food availability, and poor water quality are widely recognized factors influencing juvenile salmonid mortality. Predation on juvenile salmonids by piscivorous avians, and aquatic and marine mammals remains relatively unstudied in the Sacramento-San Joaquin Estuary. Populations of

pelicans, cormorants, mergansers, river otters, harbor seals, and sea lions have increased since the 1960s and 70s due to changes in pesticide regulations, hunting regulation, and Marine Mammal Protection Act, while the Striped Bass population has continued to decline.

Relevant Striped Bass Reproductive Life History and Female Age at Sexual Maturity

Striped Bass is an anadromous (spawn in rivers, young rear in estuarine and marine habitats, adults use all habitats), iteroparous (spawns multiple times over life time), long-lived (>20 years) fish. Females and males become sexually mature at different ages and lengths. Most females reach sexual maturity at five or six years old at approximately 20 inches in length, while males mature at 2 years old at approximately 8.5 inches in length (Moyle 1976; CDFG 1989). Striped Bass do not have external body characteristics to distinguish males from females. The sex of mature fish can be determined once captured by applying pressure near the fish's vent to expel sperm or eggs. In late spring, when river water temperatures warm near 65F, females broadcast spawn eggs which can be fertilized by many males.

Fishing Regulation inherently reduce the Striped Bass Population Due to Female Sex-Bias Size Length

The current California Striped Bass Fishing regulation catch size is 18 inches in length. Age at Length studies have shown that Striped Bass reaching 18 inches can be three years old, but generally under six years old. Since female Striped Bass reach sexual maturity at approximately 20 inches, the current 18 inches regulation removes females from the population prior to reaching sexual maturity. This results in a reduction of females to perpetuate the population. The average six-year-old female produces 500,000 eggs while a 15-year-old female (> 46 inches) can produce three million eggs. Removing three to five-year-old sexually immature females from the population potentially equates to eliminating millions of future juvenile Striped Bass from the population.

The current California fishing regulation continues to contribute to the decline of the population and inhibits restoration of the population - completely contrary to the mandate of the Striped Bass Policy. Amending the Striped Bass Policy is unnecessary because the current fishing regulation has and continues to reduce the reproductive potential of the population. If the goal of the Striped Bass Policy is to "restore the adult population" then the catch length should be increased to at least 26 inches and a maximum catch length (e.g., 39 inches or greater released) should be explored.

Among the U.S. East Coast States (e.g., CT, DE, MA, ME, NC, NH, NJ, NY, and VA) where Striped Bass populations have also declined and the Policy goals are to restore the population, the minimum catch length is 28 inches with a bag limit of two fish per day. Additionally, some States also have a maximum catch length of 38 inches with fish over this length being released. These fishing regulations are ensuring that all females have the opportunity to become sexually mature and spawn at least once prior to being removed from the population. Additionally, the maximum catch length is protecting larger females which have the highest fecundity (e.g., greatest number of eggs).

Negative Societal Impacts and Workforce Implications from Further Reducing Fishing Opportunities

I retired from State Service earlier this year, and now teach and conduct research on anadromous fishes as a retired annuitant at Humboldt State University's Department of Fisheries Biology. Rarely a day goes by when I am not asked by students about how a "girl became a fisheries scientist, especially way back then..." Laughing, I usually answer by asking, "Why do you want to be a fisheries biologist?". The answer is always the same regardless of gender, ethnicity, age, socio-economic status, year of undergraduate or

graduate education, or where raised – they all reply, “I love fishing”. It’s my answer, also. Family traditions turn into adolescent passions which lead to careers in the Natural Resource fields.

Like many of my students, I spent a lot of time with my family fishing for Striped Bass because the fishery is open year-around, and unlike the other two fisheries that are open year-round (e.g., Black Bass and White Sturgeon), fisherpersons have a high likelihood of catching a Striper nearly anywhere, anytime in the Sacramento-San Joaquin Estuary.

The FGC recognized an overall social disconnect from nature and wildlife in its first-ever set of six core values. Further reducing the Striped Bass population by increasing the bag limits and decreasing catch length will not reduce the social disconnect from nature and wildlife, in fact it negatively impacts society – Especially families who spend their bonding time while fishing on the riverbank or boat, most likely for Striped Bass.

Concluding Remarks

Scientific studies have shown that the Delta’s native fish decline is not largely due to predation by Striped Bass, the Striped Bass population continues to decline, and other piscivorous predator populations have increased in the Sacramento-San Joaquin Estuary.

Current California fishing regulation inherently reduces the Striped Bass population due to the female sex-bias size length which removes females prior to sexual maturity and first spawning. The fishing regulation contributes to the decline of the population and inhibits its restoration.

The continued discussion around increasing or removing the bag and size limits on Striped Bass is perceived by some (e.g., Coalition for a Sustainable Delta) as a “low-cost, no brainer” solution to increasing the survival of native fishes in the Delta. In reality, amending the existing Striped Bass Policy is very costly to society (e.g., family integrity) and contributes to the “brain drain” of California’s future Natural Resources workforce, and will not result in the recovery of the Delta’s native fishes. The FGC should remain committed to the mandates in the Striped Bass Policy of restoring the adult population made over two decades ago.

Lastly, I suggest that the FGC investigate the concept of separately managing the 140-year-old Sacramento-San Joaquin Estuary Striped Bass population and the transient populations straying into other watersheds (e.g., Carmel, Russian, Eel and Klamath rivers). If the FGC is interested in my idea, I would gladly discuss my proposal.

Sincerely,

Dr. Cynthia Le Doux-Bloom

Subject: Comments on item #9 on the Dec. 11th FGC agenda

November 26, 2019

To: Fish and Game Commission Members

Re: Dec. 11th Fish and Game Commission Meeting.
Agenda Item #9 – Delta Fisheries Management Policy & Striped Bass
Policy

Dear Commissioners - Maintain today's striper limit!

I ask that the current limit on striped bass (2 fish over 18") be retained. This fishery has been around for over 100 years and is one of the three primary fisheries in the SF Bay and Delta, along with our salmon and halibut. The striped bass and salmon fisheries have co-existed for decades, until the last several years.

Why the decline? Overfishing? Water exports?

My current personal fishing experiences in the last 5 years have been poor (declining size of striped bass), and the poor results of the annual F&G Trawl Netting Survey in the Delta tells us that the striper fishery has crashed.

If we don't retain the current limits for stripers, the striped bass fishery will quickly be gone, resulting in serious negative consequences to remaining struggling salmon and halibut fisheries which will then be overfished.

Below are examples of the results of the Annual Dept. of Fish and Game's Fall Trawl Netting Survey in the Delta to determine the health of our fisheries:

1967: 18,677 juvenile stripers netted.

1998: 1,224 juvenile stripers netted.

2011: 272 juvenile stripers netted.

2018: Only 72 juvenile stripers netted.

So what is happening?

Please recognize that removing the current striped bass limit will result in the elimination of the striped bass.

This will result in enormous economic losses to businesses in the Delta and the SF Bay, such as guides, boat dealers, boat repair shops, bait shops, RV parks and launch ramps, motels, restaurants, gas stations - you name it.

This is a big deal!

Keep today's limit! An even better solution to improve the striper fishery would be to change the current keep limit from two fish per day to ONE fish per day.

Always,
Michael Evert, a fisherman

California Fish and Game Commission

Staff Report on Staff Time Allocation and Activities

December 3, 2019

Commission staff time is a tangible and invaluable asset. Especially since the Commission's staff is so small, where and how staff members spend their time is important. This report identifies where Commission staff allocated time to general activity categories (see table; sample tasks for each general category begin on the next page) and to specific activities during October and November 2019.

The general allocation table summarizes time across all staff classifications, though some classifications require a greater emphasis on certain task categories than others. For example, advisors can spend 30% or more of their time on special projects due to committee project assignments, while regulatory analysts spend up to 70% of their time on regulatory program tasks.

Of note during this reporting period is a substantial increase in staff time for special projects. Items such as web accessibility, strategic planning, California Fishing Communities Definitions Workshop, California Law Revision Commission tentative recommendation for a new Fish and Wildlife Code and other tasks have increased in recent months. Increased leave time in November is the result of staff illnesses and the Thanksgiving holiday. Finally, of significant note is that during this reporting period, commission staff reports zero vacancies; except for a brief period in 2018, this is the first occurrence of having no vacancies in many years.

General Allocation

Task Category	October Staff Time	November Staff Time
Regulatory Program	18%	13%
Non-Regulatory Program	3%	4%
Commission/Committee Meetings	29%	19%
Legal Matters	5%	6%
External Affairs	6%	5%
Special Projects	13%	14%
Administration	22%	19%
Leave Time	10%	26%
Unfilled Positions	0%	0%
Total Staff Time ¹	105%	105%

¹ Total staff time is greater than 100% due to overtime

Activities for October 2019

- Prepared for and conducted two publicly noticed meetings (October 8 Tribal Committee; October 9-10 Commission)
- Began preparations for one publicly noticed meeting (November 5 Marine Resources Committee)
- Participated in the Policy Advisory Committee for Marine Protected Areas working groups
- Assisted in the production of and participated in the Sea Grant State Fellow recruitment screening and interviews
- Conducted stakeholder discussion about draft delta fisheries management policy and potential revisions to Commission Striped Bass Policy
- Participated in multi-agency Chronic Wasting Disease Task Force meeting
- Participated in plastic pollution interagency meeting with California Natural Resources Agency
- Participated in MPA Statewide Leadership Team and *Other Uses Subgroup* meetings
- Conducted joint meeting with DFW Regulations Unit
- Prepared for and conducted Coastal Fishing Communities Definition Workshop
- Participated in northern spotted owl stakeholder forum
- Began sesquicentennial planning

Activities for November 2019

- Finalized preparations for and conducted one publicly noticed meeting (November 5 Marine Resources Committee)
- Began preparations for one publicly noticed meeting (December 11-12 Commission)
- Participated in the California Hunting and Conservation Coalition meeting
- Began deputy executive director recruitment
- Conducted stakeholder discussion about draft delta fisheries management policy and potential revisions to Commission Striped Bass Policy
- Conducted Sea Grant State Fellow interviews
- Participated in Red Abalone Fishery Management Plan Project Team and Administrative Team meetings
- Began in-person strategic planning interviews
- Participated in Nimbus Hatchery Tour
- Participated in the California Natural Resources Agency's Marine Protected Areas Milestones meeting
- Participated in the Integrated Ocean Observing for a Changing California Coastline workshop

General Allocation Categories with Sample Tasks

Regulatory Program

- Coordination meetings with DFW to develop timetables and notices
- Prepare and file notices, re-notices, and initial/final statements of reasons
- Prepare administrative records

Non-Regulatory Program

- DFW partnership, including joint development of management plans and concepts
- Process and analyze non-regulatory requests

- Track and respond to public comments
- Consult, research and respond to inquiries from the Office of Administrative Law

- Develop, review and amend Commission policies
- Research and review adaptive management practices
- Review and process California Endangered Species Act petitions

Commission/Committee Meetings and Support

- Research and compile subject-specific information
- Review and develop policies
- Develop and distribute meeting agendas and materials
- Agenda and debrief meetings
- Prepare meeting summaries, audio files and voting records
- Research and secure meeting venues

- Develop and distribute after-meeting memos/letters
- Make travel arrangements for staff and commissioners
- Conduct onsite meeting management
- Process submitted meeting materials
- Provide commissioner support (expense claims, office hours, etc.)
- Process and analyze regulatory petitions

Legal Matters

- Public Records Act requests
- Process appeals and accusations
- Process requests for permit transfers

- Process kelp and state water bottom leases
- Litigation
- Prepare administrative records

External Affairs

- Engage and educate legislators, monitor legislation
- Maintain state, federal and tribal government relations

- Correspondence
- Respond to public inquiries
- Website maintenance

Special Projects

- Coastal Fishing Communities
- Fisheries Bycatch Workgroup
- Streamline routine regulatory actions
- Strategic planning

- Aquaculture best management practices
- Website accessibility issues
- Service Based Budgeting Initiative

Administration

- Staff training and development
- Purchases and payments
- Contract management
- Personnel management
- Budget development and tracking
- Health and safety oversight
- Internal processes and procedures
- Document archival

Leave Time

- Holidays
- Sick leave
- Vacation or annual leave
- Jury duty
- Bereavement

STATE OF CALIFORNIA

CALIFORNIA LAW REVISION COMMISSION

TENTATIVE RECOMMENDATION

Fish and Wildlife Code

December 2018

The purpose of this tentative recommendation is to solicit public comment on the Commission's tentative conclusions. A comment submitted to the Commission will be part of the public record. The Commission will consider the comment at a public meeting when the Commission determines what, if any, recommendation it will make to the Legislature. It is just as important to advise the Commission that you approve the tentative recommendation as it is to advise the Commission that you believe revisions should be made to it.

COMMENTS ON THIS TENTATIVE RECOMMENDATION SHOULD BE RECEIVED BY THE COMMISSION NOT LATER THAN **January 1, 2020**.

The Commission will often substantially revise a proposal in response to comment it receives. Thus, this tentative recommendation is not necessarily the recommendation the Commission will submit to the Legislature.

California Law Revision Commission
c/o UC Davis School of Law
Davis, CA 95616
<commission@clrc.ca.gov>

SUMMARY OF TENTATIVE RECOMMENDATION

In 2010, the Secretary of the Natural Resources Agency was directed to convene a committee to develop and submit a “strategic vision” for the Fish and Game Commission and the Department of Fish and Game (now the Department of Fish and Wildlife.) The resulting report recommended that the Law Revision Commission be tasked with cleaning up the Fish and Game Code.

In response to that report, Senator Fran Pavley and Assembly Member Jared Huffman (the Chairs of the Senate Natural Resources and Water Committee and the Assembly Water, Parks, and Wildlife Committee at that time) requested that the Commission conduct a comprehensive review and clean-up of the Fish and Game Code, noting “the need for a comprehensive, thorough review and updating of the Fish and Game Code, to identify obsolete, inconsistent or duplicative sections, and to provide support for more readily understood and enforceable fish and wildlife regulations.” Authority to conduct that study was granted by concurrent resolution in 2012 and reaffirmed in subsequent resolutions.

In order to achieve the greatest degree of improvement to the organization and expression of the Fish and Game Code, the Commission decided to prepare a recommendation that would repeal the existing code and replace it with a new Fish and Wildlife Code. The new code would continue the substance of the former code in a more user-friendly form, without making any significant substantive change to the effect of existing law.

This tentative recommendation presents a complete draft of the proposed Fish and Wildlife Code. It was prepared pursuant to Resolution Chapter 158 of the Statutes of 2018.

FISH AND WILDLIFE CODE

1 In 2010, the Secretary of the Natural Resources Agency was directed to convene
2 a committee to develop and submit a “strategic vision” for the Fish and Game
3 Commission and the Department of Fish and Game (now the Department of Fish
4 and Wildlife.)¹ The resulting report recommended, among other things, that the
5 Law Revision Commission be tasked with cleaning up the Fish and Game Code.²

6 In response to that recommendation, Senator Fran Pavley and Assembly
7 Member Jared Huffman (the Chairs of the Senate Natural Resources and Water
8 Committee and the Assembly Water, Parks, and Wildlife Committee at that time)
9 requested that the Commission conduct a comprehensive review and clean-up of
10 the Fish and Game Code, noting “the need for a comprehensive, thorough review
11 and updating of the Fish and Game Code, to identify obsolete, inconsistent or
12 duplicative sections, and to provide support for more readily understood and
13 enforceable fish and wildlife regulations.”³ In 2012, the Legislature directed the
14 Commission to conduct the requested study:

15 [The] Legislature approves for study by the California Law Revision
16 Commission the new topic listed below:

17 Whether the Fish and Game Code and related statutory law should be revised to
18 improve its organization, clarify its meaning, resolve inconsistencies, eliminate
19 unnecessary or obsolete provisions, standardize terminology, clarify program
20 authority and funding sources, and make other minor improvements, without
21 making any significant substantive change to the effect of the law[.]⁴

22 In order to achieve the greatest degree of improvement to the organization and
23 expression of the Fish and Game Code, the Commission decided to prepare a
24 recommendation that would repeal the existing code and replace it with a new Fish
25 and Wildlife Code. The new code would continue the substance of the former code
26 in a more user-friendly form, without making any significant substantive change to
27 the effect of existing law.

28 This tentative recommendation presents a complete draft of the proposed Fish
29 and Wildlife Code. The general character and noteworthy features of the proposed
30 legislation are discussed below.

1. 2010 Cal. Stat. ch. 424.

2. See *California Fish & Wildlife Strategic Vision, Recommendations for Enhancing the State’s Fish and Wildlife Management Agencies*, A13 (April 2012).

3. See Memorandum 2012-5, pp. 22-23.

4. 2012 Cal. Stat. res. ch. 108 (ACR 98 (Wagner)).

PURPOSE

The purpose of the proposed law is to improve the organization and expression of the Fish and Game Code, to make it easier to understand, use, and maintain, without making any significant substantive changes to the effect of that law.

The Fish and Game Code was last recodified in 1957.⁵ While some provisions of the Code have not changed since then, the Code has a whole has been extensively modified and supplemented over the course of the last 61 years. That change has occurred piecemeal, with hundreds of individual bills and initiatives aimed at addressing specific issues as they arise.

Over time, that kind of uncoordinated change can lead to structural disorganization. New provisions are added in whatever location seems correct at the time, rather than according to a systematic plan. As a result, provisions addressing different topics may be grouped together and provisions addressing a common topic may be spread to multiple locations.

For example, Division 2 of the existing Fish and Game Code is headed “Department of Fish and Wildlife.” That division contains 22 chapters. As expected, some of the provisions of Division 2 establish the department and define its general duties and powers. However, the great majority of the provisions in that division do not. Instead, they govern a miscellaneous collection of regulatory programs, on a wide range of topics. In most cases, those programs have more in common with the content of other divisions of the code than they do with Division 2. For example, Chapter 7.2 of Division 2 addresses “Trout Management.” One would expect that content to be located in Division 3 (“Fish and Game Generally”) or Division 6 (“Fish”), rather than in Division 2 (“Department of Fish and Wildlife”). Similar issues exist throughout the code.

Structural disorganization makes it harder and more costly to use the code. A member of the public, judge, attorney, or policy maker who needs to find the law governing a particular topic cannot rely on the code’s organizational headings as a reliable guide. Instead, a user will need to search the entire code to find relevant law, which may be scattered across several locations.

For all of those reasons, it would be beneficial to recodify the Fish and Game Code. Recodification would allow for a reassessment of the overall content of the code and the creation of a new organizational structure that better suits the current state of the law. Provisions that govern a common topic could be grouped together, with headings that create a logical connection between related subjects. That is the purpose of the proposed law.

5. 1957 Cal. Stat. ch. 456.

NONSUBSTANTIVE REFORM

In directing the Commission to conduct this study, the Legislature specifically provided that the Commission should not recommend any “significant substantive change to the effect of the law.”⁶

The Commission has exercised care to abide by that limitation, ensuring that the proposed law would not result in any significant substantive change in outcomes under the affected statutes.

Specific measures taken by the Commission to avoid making any significant substantive change in the law are described below.

Objective and Participatory Study Process

The Commission’s study process is well-suited to the development of a nonsubstantive reform of the Fish and Game Code, for the following reasons:

- The Commission is neutral and objective, with no special interest in the subject of fish and game. The Commission has no motivation to introduce significant substantive changes into fish and game law.
- The Commission has considerable experience in drafting legislation to recodify complex bodies of law without making any significant substantive change.⁷
- The Commission’s work is transparent. All materials are publicly distributed. All deliberations are conducted at open public meetings.
- The Commission actively solicits input from affected interest groups. Interim drafts of the proposed law were provided to those groups for review. Any objection that a change would have a substantive effect were carefully analyzed and addressed by the Commission. Any future objections will be treated similarly.
- In proposing legislative reform, the Commission prepares a thorough report that explains the purpose and effect of the proposed law, and sets out a complete draft of the proposed legislation, with a detailed table of contents and a table showing the disposition of every affected section. This report facilitates public review of the proposed law.

Commission Comments

In preparing a recommendation, the Commission drafts an explanatory “Comment” for every section that is added, amended, or repealed.⁸ A Comment

6. *Id.*

7. For example, in 2009 the Commission recommended the nonsubstantive recodification of the deadly weapon statutes, an important and sensitive body of law. See *Nonsubstantive Reorganization of Deadly Weapon Statutes*, 38 Cal. L. Revision Comm’n Reports 217 (2009); enacted as 2010 Cal. Stat. ch. 178, 2010 Cal. Stat. ch. 711. After beginning its work on the Fish and Game Code, the Commission was assigned the task of preparing nonsubstantive recodifications of the California Public Records Act and specified statutes governing hazardous materials. See 2018 Cal. Stat. ch. res. 158.

indicates the derivation of a section and often explains its purpose, its relation to other law, and potential issues concerning its meaning or application.

For the most part, the Comments in this tentative recommendation state expressly, for each affected section, that the proposed law is not intended to make any change to the substance of the affected provision.

On completion of a final recommendation, the full recommendation, including the proposed legislation and the Comments, will be presented to the Legislature and the Governor. If legislation is introduced to effectuate the proposed law, the full recommendation will be provided to each member of every policy committee that reviews the legislation.

Commission materials that have been placed before and considered by the Legislature are considered evidence of legislative intent,⁹ and are entitled to great weight in construing statutes.¹⁰ The materials are a key interpretive aid for practitioners as well as courts,¹¹ and courts may judicially notice and rely on them.¹² Courts at all levels of the state¹³ and federal¹⁴ judicial systems use

8. The Comments follow each section of the proposed legislation *infra*.

9. See, e.g., *Fair v. Bakhtiari*, 40 Cal. 4th 189, 195, 147 P.3d 653, 657, 51 Cal. Rptr. 3d 871, 875 (2006) (“The Commission’s official comments are deemed to express the Legislature’s intent.”); *People v. Williams*, 16 Cal. 3d 663, 667-68, 547 P.2d 1000, 128 Cal. Rptr. 888 (1976) (“The official comments of the California Law Revision Commission on the various sections of the Evidence Code are declarative of the intent not only of the draft[ers] of the code but also of the legislators who subsequently enacted it.”).

10. See, e.g., *Dep’t of Alcoholic Beverage Control v. Alcoholic Beverage Control Appeals Bd.*, 40 Cal. 4th 1, 12-13 n.9, 145 P.3d 462, 469 n.9, 50 Cal. Rptr. 3d 585, 593 n.9 (2006) (Commission’s official comments are persuasive evidence of Legislature’s intent); *Hale v. S. Cal. IPA Med. Group, Inc.*, 86 Cal. App. 4th 919, 927, 103 Cal. Rptr. 2d 773, 778 (2001):

In an effort to discern legislative intent, an appellate court is entitled to take judicial notice of the various legislative materials, including committee reports, underlying the enactment of a statute. (*Kern v. County of Imperial* (1990) 226 Cal.App.3d 391, 400, fn. 8, 276 Cal.Rptr. 524; *Coopers & Lybrand v. Superior Court* (1989) 212 Cal.App.3d 524, 535, fn. 7, 260 Cal. Rptr. 713.) In particular, reports and interpretive opinions of the Law Revision Commission are entitled to great weight. (*Schmidt v. Southern Cal. Rapid Transit Dist.* (1993) 14 Cal.App.4th 23, 30, fn. 10, 17 Cal.Rptr.2d 340.)

Co. v.*

1 Commission materials to construe statutes enacted on Commission
2 recommendation.¹⁵

3 The Commission's Comments will make clear that, with a small number of
4 specifically identified exceptions, the proposed law should be construed as a
5 nonsubstantive reorganization of the law.

6 *Statements of Legislative Intent*

7 The proposed law would be known as the Fish and Wildlife Code of 2020.¹⁶ It
8 would include a number of codified general provisions to expressly state the
9 purpose and effect of the recodification.

10 Proposed Section 10 would make clear that a provision of the proposed law is
11 intended as a restatement and continuation of the provision that it restates, rather
12 than a new enactment, and that any reference to a restated provision is deemed to
13 include a reference to the section that restates it (and vice versa):

14 (a) A provision of this code, insofar as it is substantially the same as a
15 previously existing provision relating to the same subject matter, shall be
16 construed as a restatement and continuation thereof, and not as a new enactment.

17 (b) A reference in a statute or regulation to a previously existing provision that
18 is restated and continued in this code shall, unless a contrary intent appears, be
19 deemed a reference to the restatement and continuation.

20 (c) A reference in a statute or regulation to a provision of this code that is
21 substantially the same as a previously existing provision, shall, unless a contrary
22 intent appears, be deemed to include a reference to the previously existing
23 provision.

24 (d) A reference in a regulation to a provision of the former Fish and Game
25 Code, rather than to the provision of this code that continues the former provision,
26 has no effect on the validity of the regulation.

27 In addition, proposed Sections 15 and 20 would make clear that restatement of a
28 provision is not intended to have any effect, positive or negative, on a judicial

McDonell (*In re McDonell*), 204 B.R. 976, 978-79 (B.A.P. 9th Cir. 1996) (bankruptcy appellate panel); *In re Garrido*, 43 B.R. 289, 292-93 (Bankr. S.D. Cal. 1984) (bankruptcy court).

15. See, e.g., *Jevne v. Superior Court*, 35 Cal. 4th 935, 947, 111 P.3d 954, 962, 28 Cal. Rptr. 3d 685, 694-95 (2005) (Commission report entitled to substantial weight in construing statute); *Collection Bureau of San Jose v. Rumsey*, 24 Cal. 4th 301, 308 & n.6, 6 P.3d 713, 718 & n.6, 99 Cal. Rptr. 2d 792, 797 & n.6 (2000) (Comments to reenacted statute reiterate the clear understanding and intent of original enactment); *Brian W. v. Superior Court*, 20 Cal. 3d 618, 623, 574 P.2d 788, 791, 143 Cal. Rptr. 717, 720 (1978) (Comments persuasive evidence of Legislature's intent); *Volkswagen Pac., Inc. v. City of Los Angeles*, 7 Cal. 3d 48, 61-63, 496 P.2d 1237, 1247-48, 101 Cal. Rptr. 869, 879-80 (1972) (Comments evidence clear legislative intent of law); *Van Arsdale v. Hollinger*, 68 Cal. 2d 245, 249-50, 437 P.2d 508, 511, 66 Cal. Rptr. 20, 23 (1968) (Comments entitled to substantial weight), *overruled on other grounds*, *Privette v. Superior Court*, 5 Cal. 4th 689, 696, 854 P.2d 721, 21 Cal. Rptr. 2d 72 (1993); *County of Los Angeles v. Superior Court*, 62 Cal. 2d 839, 843-44, 402 P.2d 868, 870-71, 44 Cal. Rptr. 796, 798-99 (1965) (statutes reflect policy recommended by Commission).

16. See proposed Section 1(b) *infra*. The title will require adjustment if the proposed legislation is enacted in a different year.

1 interpretation of the restated provision or a judicial holding regarding the
2 provision's constitutionality:

3 15. (a) A judicial decision interpreting a provision of the former Fish and Game
4 Code is relevant in interpreting any provision of this code that restates or
5 continues that provision of the former Fish and Game Code.

6 (b) However, in enacting the Fish and Wildlife Code of 2020, the Legislature
7 has not evaluated the correctness of any judicial decision interpreting a provision
8 of the former Fish and Game Code.

9 (c) The enactment of the Fish and Wildlife Code of 2020 is not intended to, and
10 does not, reflect any assessment of any judicial decision interpreting any
11 provision of the former Fish and Game Code.

12 20. (a) A judicial decision determining the constitutionality of a provision of the
13 former Fish and Game Code is relevant in determining the constitutionality of any
14 provision of this code that restates or continues that provision of the former Fish
15 and Game Code.

16 (b) However, in enacting the Fish and Wildlife Code of 2020, the Legislature
17 has not evaluated the constitutionality of any provision enacted by that act, or the
18 correctness of any judicial decision determining the constitutionality of any
19 provision of the former Fish and Game Code.

20 (c) The enactment of the Fish and Wildlife Code of 2020 is not intended to, and
21 does not, reflect any determination of the constitutionality of any provision
22 enacted by that act.

23 The provisions discussed above are particularly important with respect to
24 provisions that were added by initiative or to effectuate an initiative. They would
25 make clear that the initiative provisions are continued in the proposed law and are
26 not new enactments. They would also make clear that enactment of the proposed
27 law should not be construed as acquiescence in any court case construing the
28 continued provisions or an indication that the Legislature has assessed the
29 constitutionality of the provisions. The proposed law would take no stand on and
30 have no effect on such issues.

31 *Conservative Drafting*

32 Any large body of statutes will include some language that could be stated more
33 clearly. The Commission has taken a conservative approach to such language,
34 leaving it mostly unchanged.

35 There are three main reasons for this approach:

36 (1) With a recodification of this magnitude, it would not be reasonable
37 to expect reviewers to scrutinize a large number of stylistic or
38 grammatical changes to determine whether they would have a
39 problematic substantive effect.

40 (2) It is common for statutory language to be the product of
41 negotiation, where compromise depended on the precise wording
42 of the language. Such compromises should not be undone solely
43 for reasons of stylistic improvement.

(3) Many provisions in the Fish and Game Code were added by initiative. The California Constitution sharply restricts the Legislature’s ability to amend an initiative statute.¹⁷ However, in this context, “amend” means to alter the substance of the law added by initiative. “In deciding whether [a] particular provision amends [an initiative statute], we simply need to ask whether it prohibits what the initiative authorizes, or authorizes what the initiative prohibits.”¹⁸ Continuing the language of initiative statutes without significant change helps to avoid any possibility that an impermissible amendment would be made. This is reinforced by the rule in proposed Section 10(a), discussed *supra*, which provides that “[a] provision of this code, insofar as it is substantially the same as a previously existing provision relating to the same subject matter, shall be construed as a restatement and continuation thereof, and not as a new enactment.” It is further reinforced by the Commission’s Comments to the provisions at issue, which uniformly declare that the provisions are continued without substantive change. Recall that Commission Comments are considered to be evidence of legislative intent.¹⁹

However, there are three situations in which the proposed law would make significant changes to existing language:

- (1) Provisions that are difficult to understand were restated for clarity.
- (2) Provisions that contain clear errors were revised to correct the errors.
- (3) In a small number of cases, minor substantive or technical improvements were made.

In every instance where language would be significantly changed, the proposed change is identified in a Note that follows the affected section. This will make it easier for reviewers to focus on those provisions. Notes are also used to provide information, without posing a question (e.g., to identify sections that were added or amended by 2018 legislation).

Legislative Process

After the Commission completes its study process and issues a final recommendation, the proposed law would be scrutinized carefully in the legislative process. This would serve as a final safeguard against any unintended substantive change in the law.

17. See Cal. Const. art. 2, § 10 (“The Legislature may amend or repeal a referendum statute. The Legislature may amend or repeal an initiative statute by another statute that becomes effective only when approved by the electors unless the initiative statute permits amendment or repeal without the electors’ approval.”).

18. *People v. Superior Court (Pearson)*, 48 Cal. 4th 564, 571; 227 P.3d 858; 107 Cal. Rptr. 3d 265 (2010).

19. See discussion of Commission Comments, *supra*.

DRAFTING APPROACH

Structure of Proposed Law

The existing Fish and Game Code is organized into four levels: divisions, parts, chapters, and articles. Some existing codes include a fifth organizational level: titles. The proposed Fish and Wildlife Code would use titles, as an additional organizational level between parts and chapters. This provides as much latitude as possible to group similar provisions together, and then combine similar groupings into a logical hierarchical structure.

The provisions of the proposed Fish and Wildlife Code would be numbered to avoid over-crowding and leave room for future development of the law.

This approach complies with the Legislature's directive to improve the organization of the Fish and Game Code.²⁰ It allows for a more coherent and intuitive organizational structure, which should make it easier for a reader to find relevant provisions within the statute.

Short, Simple Sections

One common problem in statutory drafting is code sections that are excessively long. Excessively long sections can obscure relevant details of law, especially if a single section addresses several different subjects.

A better approach is to divide the law into a larger number of smaller sections, with each section limited to a single subject. Short sections have numerous advantages. They enhance readability and understanding of the law, and make it easier to locate and refer to pertinent material. In contrast to a long section, a short section can be amended without undue technical difficulties and new material can be inserted where logically appropriate, facilitating sound development of the law. The use of short sections is the preferred drafting technique of the California Code Commission,²¹ the Legislature,²² the Legislative Counsel,²³ and the Law Revision Commission.²⁴

For those reasons, the proposed law would divide lengthy sections into shorter and simpler provisions.

Definitions

As with existing law, the proposed law would group most of the definitions that have code-wide application near the beginning of the proposed law, in alphabetical

20. 2016 Cal. Stat. res. ch. 150.

21. California Code Commission, *Drafting Rules and Principles for Use of California Code Commission Draftsmen*, 1947-48 Report, app. G, at 4.

22. Senate & Assembly Joint Rule 8 (May 14, 2009).

23. Legislative Counsel of California, *Legislative Drafting Manual* 26-28 (1975).

24. Commission Staff Memorandum 76-24 (Feb. 17, 1976); First Supplement to Commission Staff Memorandum 85-64 (May 31, 1985).

1 order. This approach makes it easier for members of the public, attorneys, judges,
2 and the Legislature to quickly determine whether a term is subject to a statutory
3 definition.

4 Definitions that have a narrower scope of application have been located near the
5 provisions that they govern (often in a dedicated location near the beginning of
6 that law, along with other general provisions).

7 There is one definition that is likely to be confusing in some situations. The
8 existing definition of “fish,” which applies to the entire Fish and Game Code,
9 includes animals that are not considered fish biologically (i.e., invertebrates and
10 amphibians).²⁵ It is not clear whether every use of that term is intended to have the
11 defined meaning. Notwithstanding that potential source of confusion, the
12 Commission is not recommending any change to the application of the
13 definition.²⁶ Making such a change would require a determination of legislative
14 intention in hundreds of sections, which is not practicable in this study.

15 **Cross-References**

16 The Fish and Game Code contains numerous cross-references. The
17 reorganization of existing law will require that the existing references be updated
18 to reflect the numbering of the new code.

19 To facilitate review of the cross-reference updates made in this tentative
20 recommendation, the Commission has provided two tables, located at the end of
21 the proposed legislation. Those tables show the disposition of each provision of
22 existing law and the derivation of each provision of the proposed law.

23 There are also many provisions in other codes that refer to the Fish and Game
24 Code. Those cross-references will also need to be conformed to the proposed law.
25 Revisions to make those conforming changes will be included in a separate
26 tentative recommendation.

27 **REQUEST FOR PUBLIC COMMENT**

28 The Commission seeks public comment on its tentative recommendation.
29 Comments supporting the proposed approach are just as important as comments
30 suggesting changes to that approach or expressing other views.

25. See Fish & Game Code § 45.

26. See proposed Section 380 *infra*.

FISH AND WILDLIFE CODE

Note: The document that follows contains a proposed recodification of the existing Fish and Game Code

A draft of an official Commission “Comment” follows each proposed code section. Those Comments will be included in any final recommendation.

The Comments indicate the source of each recodified provision and describe how it compares with prior law. Courts have routinely held that the Commission’s Comments are evidence of legislative intent with regard to any legislation that implements a Commission recommendation.

There is a “disposition table” at the end of the proposed legislation. It summarizes, in tabular form, the disposition of every provision of the existing code. If an existing provision would not be continued in the new code, the table identifies that provision as “not cont’d.”

After the disposition table, there is a “derivation table.” That table shows the source of every provision of the proposed Fish and Wildlife Code. Provisions that do not have a source in existing law are identified as “New.”

Some code sections in the proposed recodification are followed by a “Note.” These Notes are intended to be temporary, and will not be part of the Commission’s final recommendation. **They provide information and flag issues on which the Commission would particularly like to receive public comment.**

However, the Commission welcomes public comment on *any* issue relating to the content of the recodification. Comments should be directed to Brian Hebert at bhebert@clrc.ca.gov.

Article 3. Seizure of Take	102
§ 4510. Seizure of take	102
§ 4512. Sale or donation of seized take	103
§ 4514. Reuse of seized take	103
§ 4516. Donation or destruction of seized take	103

§ 4518. Purchase of seized take	104
TITLE 3. HUNTING, TRAPPING AND FISHING GENERALLY	104
CHAPTER 1. LICENSE SUSPENSION OR REVOCATION	104
§ 4550. Suspension or revocation of license	104
§ 4552. Suspension or revocation for specified offenses	104
§ 4554. Effect of termination of probation and dismissal of charges	105
§ 4556. Procedures governing revocation or suspension	105
CHAPTER 2. FORFEITURE	105
§ 4570. Forfeiture of device or apparatus	105
§ 4572. Forfeiture of vehicle	107
CHAPTER 3. HUNTING AND FISHING GUIDES	107
§ 4590. Commission revocation of guide license	107
§ 4592. Court revocation of guide license	108
§ 4594. Court revocation of privilege to hunt, fish, or guide	108
CHAPTER 4. MISCELLANEOUS OFFENSES	108
§ 4600. Interference with lawful activities	108
§ 4602. Scientific permit revocation	109
TITLE 4. HUNTING	109
CHAPTER 1. UNLAWFUL TAKE	109
§ 4700. Taking without license	109
§ 4702. Violation of specific regulations	109
§ 4704. Ancillary consequences for specified violations	110
§ 4706. Punishment for third and subsequent convictions	110
§ 4708. Triple possession limit	111
§ 4710. Taking during trespassing	111
§ 4712. Use of sodium cyanide	112
§ 4714. Lead ammunition	112
CHAPTER 2. HUNTING-RELATED INJURIES	112
§ 4750. Failure to aid injured person	112
§ 4752. Reporting injury	112
§ 4754. Killing or wounding of human being while hunting	113
§ 4756. Petition for new trial	113
§ 4758. Killing or wounding domestic animal while hunting	113
§ 4760. Report of court order prohibiting take of bird or mammal	114
§ 4762. Proof of financial responsibility	114
§ 4764. Cancellation of guarantee of financial responsibility	115
§ 4766. Additional financial responsibility based on claim or judgment	115
CHAPTER 3. HUNTING CLUB	115
§ 4770. Commercial hunting club	115
TITLE 5. TRAPPING	116
§ 4800. Unmarked trap	116
§ 4802. Body-gripping trap	116
§ 4804. Fur dealer license	116
§ 4806. Violation by trapping licensee	116
TITLE 6. FISHING	117
CHAPTER 1. VIOLATION OF SPECIFIED REGULATIONS	117
§ 4850. Violation of specific regulations	117
CHAPTER 2. FISHING LICENSES	117
Article 1. Sport Fishing License	117
§ 4860. Fishing without required validation	117
§ 4862. Valid license in possession	118

§ 4864. Fishing in specified waters without ocean enhancement validation	119
Article 2. Commercial Fishing License	119
§ 4870. Suspension or revocation	119
§ 4872. License revocation or suspension proceeding at commission meeting	119
§ 4874. License forfeiture	120
§ 4876. Approaching federal vessel	120
Article 3. Live Freshwater Fish Bait License	121
§ 4880. Revocation	121
CHAPTER 3. COMMERCIAL VESSELS	121
Article 1. Commercial Fishing Vessel Registration	121
§ 4900. Suspension or revocation of registration for specified violations	121
Article 2. Commercial Salmon Vessel Permit	123
§ 4910. Revocation of permit based on fraud	123
§ 4912. Appeal of revocation or denial or permit transfer	123
§ 4914. Reversal of revocation order or denial of permit renewal or transfer	123
§ 4916. Suspension or revocation of commercial salmon fishing privilege	123
§ 4918. Determination of civil damages following suspension or revocation	124
Article 3. Passenger Fishing Boat	125
§ 4930. Forfeiture, suspension, or revocation of license	125
§ 4932. License suspension for unlawful sale or purchase of fish	125
§ 4934. Commercial boat registration suspension for unlawful sale or purchase of fish	125
CHAPTER 4. NETS AND TRAPS	127
Article 1. Geographical Restrictions	127
§ 4950. Waters upstream from Carquinez Bridge	127
Article 2. Gill and Trammel Nets	127
§ 4960. Provisions not exclusive	127
§ 4962. Violation of Section 18040, 18045, 18050, or 18065	127
§ 4964. Sharks and swordfish	128
Article 3. Seizure of Nets and Traps	128
§ 4975. Tagging	128
§ 4980. Removal of seized net from vessel	128
§ 4982. Bond	129
§ 4984. Exceptions to release of net or trap on bond	129
§ 4986. Forfeiture	130
§ 4988. Surrender of net obtained on bond	130
Article 4. Lost Net	130
§ 5000. Lost set net	130
CHAPTER 5. FISHERIES	130
§ 5050. Nearshore fishery violation	130
CHAPTER 6. FISH-RELATED COMMERCE	131
§ 5100. Suspension of license	131
§ 5102. Suspension based on specified convictions	131
§ 5104. Reporting take of shark or swordfish	131
§ 5106. Marine aquaria pet trade	132
§ 5108. Sale or disposition of fish or amphibians in specified circumstances	132
CHAPTER 7. LANDING FEES	133
§ 5150. Landing fees	133
CHAPTER 8. COMMERCIAL FISHING REPORTS	133
§ 5170. Suspension or revocation of commercial fishing license or privileges	133
§ 5172. Required record of fishing activities	133

TITLE 7. WILDLIFE PROPAGATION, DOMESTICATION, POSSESSION, AND SALE	133
CHAPTER 1. IMPORTATION, TRANSPORTATION, AND POSSESSION GENERALLY	133
§ 5200. Penalty	133
§ 5204. Civil action	134
§ 5206. Additional costs and fees.....	134
§ 5208. Confiscated animal	134
§ 5210. Permit revocation	135
CHAPTER 2. AQUATIC ORGANISMS	135
§ 5250. Planting of fish	135
§ 5252. Placement of aquatic organisms	135
§ 5254. Importation of diseased aquatic organism.....	136
§ 5256. Permit to move quarantined aquatic plant or animal.....	136
§ 5258. Importation of aquatic plant or animal	136
§ 5260. Placement of aquatic nuisance species.....	136
§ 5262. Potentially diseased plants or animals.....	137
§ 5264. Permit required for importation of live aquatic organism	137
§ 5266. Caulerpa algae	138
CHAPTER 3. MAMMALS	138
§ 5280. Elk	138
§ 5282. Elephants	138
CHAPTER 4. DOMESTICATION.....	138
§ 5290. Domestication of game animals	138
CHAPTER 5. IVORY	139
§ 5300. Criminal penalty	139
§ 5302. Payment of reward	139
§ 5304. Forfeiture	140

§ 5320. Fully protected bird	141
CHAPTER 3. GAME BIRDS	142
§ 5330. Trophy wild turkey	142
§ 5332. Pigeon	142
CHAPTER 4. NONGAME BIRDS	143
§ 5340. Taking nongame bird	143
§ 5342. Taking or possession of migratory nongame bird	143
§ 5344. Possession of parts of nongame bird	143
CHAPTER 5. BIRDS-OF-PREY	144
§ 5350. Birds-of-prey	144
TITLE 9. MAMMALS.....	145
CHAPTER 1. PROTECTED MAMMALS	145
§ 5400. Fully protected mammal.....	145
§ 5402. Mountain lion	146
CHAPTER 2. GAME MAMMALS	146
Article 1. Game Mammals Generally.....	146
§ 5450. Trophy mammals.....	146
Article 2. Bears	147
§ 5460. Use of signal-emitting device to traffic in bear parts	147

§ 5462. Commercial use of bear parts	147
§ 5466. Forfeiture of bear tags	148
Article 3. Deer.....	148
§ 5480. Forfeiture of deer tags	148
Article 4. Sheep.....	149
§ 5490. Bighorn sheep.....	149
CHAPTER 3. NONGAME MAMMALS [RESERVED].....	149
CHAPTER 4. MARINE MAMMALS	149
§ 5520. Marine mammals.....	149
§ 5522. Orca	149
CHAPTER 5. BURROS	149
§ 5540. Burros	149
§ 5542. Burro sanctuary	150
TITLE 10. FISH	150
CHAPTER 1. PROTECTED FISH	150
§ 5600. Fully protected fish.....	150
CHAPTER 2. TYPES OF FISH	150
Article 1. Anchovies	150
§ 5650. Anchovies	150
Article 2. Bass.....	150
§ 5660. White bass	150
Article 3. Carp.....	151
§ 5670. Grass carp	151
Article 4. Halibut	151
§ 5680. Halibut	151
Article 5. Herring	152
§ 5690. Herring	152
§ 5692. Revocation of herring permit	152
Article 6. Marlin.....	152
§ 5700. Marlin	152
Article 7. Salmon	153
§ 5710. Salmon.....	153
Article 8. Sardine	153
§ 5720. Sardine	153
Article 9. Sturgeon.....	154
§ 5730. Sturgeon	154
§ 5732. Sturgeon egg processing.....	154
TITLE 11. INVERTEBRATES	155
CHAPTER 1. ABALONE.....	155
§ 5800. Take of abalone from ocean waters.....	155
§ 5802. Prohibited take of abalone	155
§ 5804. Prohibited take of abalone in excess amounts	157
§ 5806. Suspension of license or permit based on pending criminal charge.....	158
§ 5808. Revocation of license or permit upon conviction.....	158
CHAPTER 2. CRAB	159
Article 1. Crab Generally	159
§ 5820. Crab	159
Article 2. Dungeness Crab	160
§ 5830. Taking or landing Dungeness crab without permit	160
§ 5832. Additional penalty for fishing without permit.....	160
§ 5834. Ocean waters	161

§ 5836. Trap limit program	161
CHAPTER 3. LOBSTER	162
§ 5850. Lobster permit requirement	162
§ 5852. Suspension of permit pending criminal proceeding	162
CHAPTER 4. MUSSELS	163
§ 5860. Dreissenid mussel control	163
§ 5862. Liability of reservoir owner or manager.....	163
CHAPTER 5. SEA CUCUMBER	163
§ 5870. Commission regulation	163
CHAPTER 6. SQUID	164
§ 5880. Revocation of privileges for materially false statements	164
TITLE 12. AMPHIBIANS	164
§ 5900. Fully protected amphibians	164
TITLE 13. REPTILES	164
§ 5950. Fully protected reptiles	164
TITLE 14. PLANTS.....	165
CHAPTER 1. KELP	165
§ 6000. License revocation or nonrenewal.....	165
TITLE 15. HABITAT CONSERVATION AND ENHANCEMENT	165
§ 6050. Wildlife area pass	165
§ 6052. Wildlife habitat enhancement and management area.....	166
§ 6054. Shared Habitat Alliance for Recreational Enhancement Program	166
TITLE 16. PROTECTED AND MANAGED AREAS	166
§ 6100. Violation of specific regulations	166
§ 6102. Prohibited conduct in refuges.....	167
§ 6104. Unlawful take in marine protected area	167
TITLE 17. ACTIVITIES THAT AFFECT WILDLIFE	168
CHAPTER 1. ENDANGERED SPECIES AND OTHER PROTECTED WILDLIFE	168
§ 6200. Forfeiture of proceeds from take of endangered, threatened, or protected animals	168
§ 6202. Violation of California Endangered Species Act	168
§ 6204. Violation of specified provisions	169
§ 6206. Deposit of fines and forfeitures	169
CHAPTER 2. PLANNING AND MITIGATION	169
§ 6250. Nonpayment of CEQA fee	169
CHAPTER 3. WATER POLLUTION	170
Article 1. Criminal Enforcement.....	170
§ 6300. Base penalty	170
§ 6302. Additional penalty	170
Article 2. Civil Enforcement.....	170
§ 6320. Civil penalty for water pollution	170
§ 6322. Additional penalty based on volume of discharge	171
§ 6324. Limitation on application of civil penalty	171
§ 6326. Apportionment of penalty	171
§ 6328. Civil action	172
CHAPTER 4. WATER OBSTRUCTION AND DIVERSION	173
Article 1. Streambed Alteration	173
§ 6350. Streambed alteration.....	173
§ 6352. Civil penalty	173
§ 6354. Civil action	174
§ 6356. Apportionment of civil penalties	174

Article 2. Obstruction in Districts 2505, 2510, 2515, 2525, 2530, 2535, 2540, 2545, 2550, 2555, 2560, 2565, 2595, 2600, 2605, 2660, and 2665	174
§ 6380. Civil penalty	174
§ 6382. Civil penalties are not fines or forfeitures	175
§ 6384. Apportionment of civil penalty for violation connected to cultivation of controlled substance	175
§ 6386. Apportionment of civil penalty for violation unconnected to cultivation of controlled substance	175
§ 6388. Administrative penalty	176
§ 6390. Administrative penalties are not fines or forfeitures	176
§ 6392. Apportionment of administrative penalty for violation connected to cultivation of controlled substance	176
§ 6394. Apportionment of administrative penalty for violation unconnected to cultivation of controlled substance	176
§ 6396. Definition of “controlled substance”	177
Article 3. Obstruction in District 2520	177
§ 6410. Obstruction of Klamath River	177
CHAPTER 5. MINING	177
§ 6500. Vacuum or suction dredging	177
CHAPTER 6. CULTIVATION OR PRODUCTION OF CONTROLLED SUBSTANCE	177
§ 6550	
. “Controlled substance” defined	177
§ 6552. Cultivation or production of controlled substance on public land	178
§ 6554. Cultivation or production of controlled substance on other land	179
§ 6556. Consideration of civil penalty in conjunction with other penalties	180
§ 6558. Apportionment of penalty	180
§ 6560. Imposition of administrative penalty by Department of Fish and Wildlife	181
DIVISION 4. INTER-JURISDICTIONAL AGREEMENTS	182
PART 1. UNITED STATES	182
TITLE 1. ACCEPTANCE OF FEDERAL ACTS	182
§ 7200. Assent to Public Law 415, 75th Congress	182
§ 7205. Assent to Public Law 681, 81st Congress	183
TITLE 2. MANAGEMENT OF FISH AND WILDLIFE ON MILITARY LANDS	183
§ 7210. Statement of policy	183
§ 7215. Coordination and cooperation with military services	183
§ 7220. Regulations and agreements authorized	184
§ 7225. Management plans and programs	184
TITLE 3. FEDERAL BIRD RESERVATIONS	184
§ 7230. Acceptance of Migratory Bird Conservation Act	184
§ 7235. Consent of concerned county	184
§ 7240. Insufficient payments from United States to county	185

Article 1. Boat Registrations and Other Vessel Permits	332
§ 14750. Application of article	332
§ 14755. Activity requiring registration	332
§ 14760. Term	332
§ 14765. Fee for registration	332
§ 14770. Refund of fee based on death	333
§ 14775. Posting of registration on vessel.....	333
§ 14780. Issuance of registration number	333
§ 14785. Display of registration number.....	333
§ 14790. Report of lost, destroyed, or sold vessel.....	334
Article 2. Obligations and Prohibitions	334
§ 14850. Change of address	334
§ 14855. Additional application requirement for permit or other entitlement	334
§ 14860. Required insurance	334
§ 14865. Prohibition against multiple entitlements of same type	335
§ 14870. Preparation of fish on commercial fishing vessel for human consumption	335
§ 14875. Possession of specified fish on board commercial fishing vessel	336
§ 14880. Take or possession pursuant to sportfishing license	336
Article 3. Fuel Conservation Assistance Program.....	336
§ 15000. Purpose of program	336
§ 15005. Report to Legislature	337
CHAPTER 3. AIRCRAFT	337
§ 15050. Required registration	337
§ 15055. Requirement that registration be carried onboard	337
§ 15060. Fee for registration	337
CHAPTER 4. GEOGRAPHIC RESTRICTIONS	338
Article 1. Take	338
§ 15100. Take in Tomales Bay.....	338
§ 15105. Take only in baitfish traps	338
Article 2. Sale or Purchase.....	339

§ 15150. Sale or purchase of fish in District 2670 or Smith River	339
Article 3. Out-of-State Delivery of Fish	339
§ 15200. Permit to deliver fish out of state	339
TITLE 3. NETS GENERALLY	340
CHAPTER 1. GENERAL PROVISIONS	340
§ 15300. Length of meshes	340
§ 15305. Use near pier, wharf, jetty, breakwater, or dock	340
§ 15310. Recovery of isolated fish	341
CHAPTER 2. PUBLIC NUISANCE	341
§ 15400. Seizure	341
CHAPTER 3. SPECIAL RULES FOR IDENTIFIED WATERS	341
§ 15500. Districts 2625 and 2630	341
§ 15505. Districts 2630 and 2640	342
§ 15510. District 2685	342
§ 15515. Area upstream from Antioch area	342
§ 15520. Area in or near Klamath, Smith, Eel, Mad, Van Dusen, or Mattole Rivers	343
§ 15525. Take of mullet or carp in Salton Sea and New and Alamo Rivers	343
§ 15530. Salton Sea and New and Alamo Rivers	343
§ 15535. Possession of certain gear near Salton Sea and New and Alamo Rivers	344
§ 15540. Waters upstream from Carquinez Bridge	344
CHAPTER 4. SET NETS	345
Article 1. General Provisions	345
§ 15600. “Set net”	345
§ 15605. Markings	345
§ 15610. Breaking strength of footrope	346
§ 15615. Lost net	346
CHAPTER 5. ROUND HAUL NETS	347
Article 1. General Provisions	347
§ 15650. “Round haul net”	347
Article 2. Special District Rules	347
§ 15700. District 2505	347
§ 15705. District 2525	347
§ 15710. District 2540	347
§ 15715. District 2570	347
§ 15720. District 2575	347
§ 15725. District 2580	347
§ 15730. District 2585	348
§ 15735. District 2590	348
§ 15740. District 2595	348
§ 15745. District 2610	348
§ 15750. District 2615	348
§ 15755. District 2620	348
§ 15760. District 2625	348
§ 15765. District 2630	349
§ 15770. District 2635	350
§ 15775. District 2640	350
§ 15780. District 2645	351
§ 15785. District 2650	351
CHAPTER 6. BAIT NETS	351
§ 15900. “Bait net”	351
§ 15902. Authority of commission	351

§ 15910. Districts allowing use of bait nets	351
§ 15915. District 2630	352
CHAPTER 7. BEACH NETS	352
Article 1. General Provisions	352
§ 16000. “Beach net”	352
Article 2. Special District Rules.....	352
§ 16010. Possession on boat prohibited	352
§ 16015. Permitted use	353
§ 16020. Prohibition	353
§ 16025. District 2590	353
§ 16030. District 2625	353
CHAPTER 8. TRAWL NETS	353
Article 1. General Provisions	353
§ 16100. Legislative declaration	353
§ 16105. Conformity with federal regulations	354
§ 16110. Commission and department authority	354
§ 16115. “Trawl net”	355
Article 2. Prohibitions.....	355
§ 16150. Mesh size	355
§ 16155. Bag or cod-end	355
§ 16160. Prohibited roller gear	355
§ 16165. Bottom trawling in ocean waters	356
§ 16170. Required permit for vessel	356
§ 16175. Chafing gear	356
Article 3. Special District Rules.....	357
§ 16250. District 2550	357
§ 16255. District 2570	357
§ 16260. District 2575	357
§ 16265. District 2590	357
§ 16270. District 2615	357
§ 16275. District 2620	357
§ 16280. District 2625	358
§ 16285. District 2630	358
§ 16290. District 2635	358
§ 16295. District 2640	358
§ 16300. District 2645	358
§ 16305. District 2650	358
§ 16310. District 2685	358
Article 4. Special Rules for Identified Waters	359
§ 16350. Golden Gate Bridge area	359
§ 16355. Small cod-end mesh in specified area	359
CHAPTER 9. DIP NETS	359
Article 1. General Provisions	359
§ 16400. Permitted except where specifically restricted	359
Article 2. Special District Rules.....	359
§ 16450. District 2505	359
§ 16455. District 2515	359
§ 16460. District 2525	360
§ 16465. District 2540	360
§ 16470. District 2550	360
§ 16475. District 2625	360

§ 16480. District 2640	360
CHAPTER 10. BAITED HOOP NETS	360
Article 1. General Provisions [Reserved]	360
Article 2. Special District Rules.....	360
§ 16550. District 2620	360
§ 16555. District 2625	361
CHAPTER 11. CHINESE SHRIMP NETS	361
Article 1. General Provisions [Reserved]	361
Article 2. Special Rules for Identified Waters	361
§ 16650. Golden Gate Bridge area	361
TITLE 4. GILL NETS AND TRAMMEL NETS	361
CHAPTER 1. GENERAL PROVISIONS	361
§ 16800. Statement of intent	361
§ 16805. Legislative declarations	361
CHAPTER 2. MARINE RESOURCES PROTECTION ACT OF 1990	362
§ 16850.1. Statement of codification and implementation.....	362
§ 16850.2. Meaning of references	362
§ 16850.3. Prohibited use of gill or trammel net to take rockfish	363
§ 16850.4. Authorized use of gill nets and trammel nets	363
§ 16850.5. Permit process during transitional period.....	363
§ 16850.6. Fees for permit during transitional period.....	364
§ 16850.9. Use of funds in Marine Resources Protection Account	364
§ 16850.11. Unlawful take	365
§ 16850.12. Department monitoring of take	365
§ 16850.13. Use of gill nets and trammel nets	365
§ 16850.14. Ecological reserves.....	366
§ 16850.15. Closures to protect wildlife	366
§ 16850.16. Severability of provisions of chapter	367
CHAPTER 3. USE OF GILL NETS IN PARTICULAR DISTRICTS	367
§ 17000. Additional rules for Districts 2590, 2615 and 2620	367
§ 17005. “Impacted fisherman”	369
§ 17010. Order by department.....	369
§ 17015. Additional rules for specified northern California ocean waters	370
§ 17020. Ocean area south of Point Conception	371
§ 17025. Salton Sea and New and Alamo Rivers	372
CHAPTER 4. GILL AND TRAMMEL NETS	372
§ 18000. Legislative declaration	372
§ 18005. Required permit.....	372
§ 18010. Grandfathered and transferred permits	373
§ 18015. Appeal of permit denial.....	374
§ 18020. Regulations.....	374
§ 18025. Permit fee	375
§ 18030. Incidental catch of swordfish or marlin.....	375
§ 18035. Districts 2505, 2525, and 2540.....	375
§ 18040. Take of salmon, steelhead, or striped bass	376
§ 18045. Sale or possession for sale of salmon, steelhead, or striped bass	376
§ 18050. Purchase of salmon, steelhead, or striped bass.....	376
§ 18055. Districts 2515, 2535, and 2675.....	376
§ 18060. Districts 2570, 2575, 2580, 2585, and 2590.....	377
§ 18065. Districts 2595, 2600, and 2605	377
§ 18070. Point Reyes ocean area.....	377

§ 18075. Monterey County ocean area	378
§ 18080. Permissible net length	378
§ 18085. Districts 2615, 2620, 2625, and 2645	378
§ 18090. District 2630	379
§ 18095. South of Point Reyes headlands	380
§ 18100. Conversion of gill net to trammel net	380
CHAPTER 5. TRAMMEL NETS	380
§ 18200. “Trammel net”	380
§ 18205. Districts 2505, 2525, and 2540	380
§ 18210. Districts 2590, 2615, 2620, and 2625	381
§ 18215. District 2630	381
CHAPTER 6. TAKE OF SHARK AND SWORDFISH	381
§ 18300. Required permit	381
§ 18305. Transfer of permit (operative until March 31, 2019)	382
§ 18305. Transfer of permit (operative on March 31, 2019)	383
§ 18310. Application	383
§ 18315. Possession and use of permit	383
§ 18320. Specification of vessel	383
§ 18325. Fee	384
§ 18330. Eligibility for permit	384
§ 18335. Minimum landing requirement	384
§ 18340. Conditions for late application	384
§ 18345. Allowed locations and conditions for use of net	385
§ 18350. Mesh size	386
§ 18355. Seasonal prohibitions	386
§ 18360. Prohibited areas	387
§ 18365. Additional prohibitions	387
§ 18370. Take of thresher shark	388
§ 18375. Closure of fishery by director	388
§ 18380. Surrender of permit	388
§ 18385. Sale of swordfish	389
§ 18395. Legislative intent regarding marlin	389
§ 18400. Transitional program	389
§ 18405. Disclaimer	390
CHAPTER 7. TAKE OF OTHER FISH	391
§ 18500. Yellowtail, barracuda, and white sea bass	391
§ 18505. California halibut generally	391
§ 18510. Special rules for California halibut	392
TITLE 5. FISHING LINES	393
CHAPTER 1. GENERAL PROVISIONS	393
§ 18700. Legislative declaration	393
§ 18705. Permitted length	393
§ 18710. “Set line”	393
§ 18715. “Troll line”	393
§ 18720. “Vertical fishing line”	394
CHAPTER 2. SPECIAL DISTRICT RULES	394
§ 18800. District 2570	394
§ 18805. District 2575	395
§ 18810. District 2590	396
§ 18815. District 2615	397
§ 18820. District 2620	398

§ 18825. District 2625	399
CHAPTER 3. SET LINES	400
§ 18900. Set line	400
CHAPTER 4. TROLL LINES	400
Article 1. General Provisions	400
§ 18950. Use of troll line	400
Article 2. Special District Rules	401
§ 19000. District 2570	401
§ 19005. District 2575	401
§ 19010. District 2590	401
§ 19015. District 2595	401
§ 19020. District 2600	402
§ 19025. District 2605	402
§ 19030. District 2610	402
§ 19035. District 2615	402
§ 19040. District 2620	402
§ 19045. District 2625	402
§ 19050. District 2630	402
TITLE 6. TRAPS	403
CHAPTER 1. GENERAL PROVISIONS	403
§ 19150. “Definitions”	403
§ 19200. Allowed use of traps	403
§ 19205. Required permit	403
§ 19210. Destruction device	404
§ 19215. Required maintenance	404
§ 19220. Abandonment	404
§ 19225. Marking	404
§ 19230. Required marking of trap	404
CHAPTER 2. DISTURBANCE OF TRAPS	405
§ 19300. Disturbance of trap	405
§ 19305. Permit to pull or raise trap	405
§ 19310. Publicly employed safety personnel	405
§ 19315. Retrieval of commercial crab traps	406
CHAPTER 3. NUISANCE	408
§ 19400. Abatement of nuisance	408
CHAPTER 4. TRAPPING OF FINFISH	408
§ 19500. Criteria for use of trap	408
§ 19505. Take of species generally	409
§ 19510. Marine species	409
§ 19515. Special rules for Districts 2590, 2595 and 2600	410
CHAPTER 5. BAITFISH TRAPS	410
§ 19600. Baitfish traps	410
§ 19605. Fish that may be taken	410
§ 19610. Trap size	411
TITLE 7. OTHER GEAR	411
CHAPTER 1. GENERAL PROVISIONS	411
§ 19800. Slurp guns	411
§ 19805. Miscellaneous tools	411
§ 19810. Spears, harpoons, bows, and arrows	411
CHAPTER 2. DEVELOPMENT OF ALTERNATIVE FISHING GEAR	412
§ 19900. Revocation or non-renewal of permit	412

§ 19910. Request to terminate permit	412
TITLE 8. COMMERCIAL TAKE OF FRESHWATER FISH	414
CHAPTER 1. GENERAL PROVISIONS [<i>RESERVED</i>]	414
CHAPTER 2. TAKE.....	414
§ 20100. Allowed take	414
§ 20105. Centrachidae	414
TITLE 9. FISH-RELATED BUSINESSES	415
CHAPTER 1. GENERAL PROVISIONS	415
Article 1. Definitions	415
§ 20150. Application	415
§ 20155. “Commercial fisherman”	415
§ 20160. “Import”	415
§ 20165. “Process fish”	415
§ 20170. “Wholesale”	416
Article 2. Licensing Generally	416
§ 20200. Activity requiring license	416
§ 20205. Types of licenses	416
§ 20210. Conditions of license	417
§ 20215. Term of license	418
§ 20220. License on premises of business	418
§ 20225. Possession and display of identification	418
§ 20230. Fee for multi-function fish business license	419
§ 20235. Denial of application based on prior dishonored check	419
CHAPTER 2. SPECIALTY LICENSES.....	420
Article 1. General Provisions	420
§ 20300. Licensing for persons engaged in multiple businesses	420
Article 2. Fish Importer.....	420
§ 20350. Required license	420
§ 20355. Fee	420
Article 3. Fish Processor	420
§ 20400. Required license	420
§ 20405. Fee	421
Article 4. Fish Receiver	421
§ 20450. Required license	421
§ 20455. License fee.....	421
§ 20460. Cooperative association.....	422
Article 5. Fish Retailer	422
§ 20500. Required license	422
§ 20505. Fee	422
Article 6. Fish Wholesaler	422
§ 20550. Required license	422
§ 20555. Fee	423
Article 7. Marine Aquaria Receiver.....	423
§ 20600. Required license	423
§ 20605. License fee.....	423
§ 20610. Source of indigenous organisms	424
CHAPTER 3. MARINE AQUARIA PET TRADE	424
§ 20700. Definitions	424
§ 20705. Permit requirement	424
§ 20710. Permitted organisms	424
§ 20715. Scope of permit	426

§ 20720. Prohibited take or possession	426
§ 20725. Methods of take	427
§ 20730. Permit fee	428
§ 20735. Concurrent take or possession under scientific collector's permit.....	428
§ 20740. Closure of fishery	428
TITLE 10. LANDING FEES AND RECEIPTS	429
CHAPTER 1. GENERAL PROVISIONS	429
§ 20900. Definitions	429
§ 20905. Information from marine aquaria receivers	429
CHAPTER 2. LANDING FEE.....	429
§ 20950. Persons required to pay fee	429
§ 20955. Calculation of fee	430
§ 20960. Remittance of fee	431
CHAPTER 3. LANDING RECEIPTS	431
Article 1. Completion.....	431
§ 21000. Persons required to complete receipt.....	431
§ 21010. Method of completion by commercial fisherman	434
§ 21015. Advance notification to agent when specified fish landed.....	434
§ 21020. Content of receipt	435
§ 21025. Additional requirements applicable to completion of landing receipts.....	436
Article 2. Retention and Delivery of Copies	436
§ 21100. When receipt completed by fish receiver or marine aquaria receiver.....	436
§ 21105. When receipt completed by commercial fisherman	437
§ 21110. Delivery of copy to agent	437
§ 21115. Landing of groundfish	438
Article 3. Delivery to Department	438
§ 21150. Delivery of landing receipt to department.....	438
§ 21155. Unused landing receipts	439
CHAPTER 4. TRANSPORTATION RECEIPTS	439
§ 21200. Issuance of transportation receipt book.....	439
§ 21205. Purpose	439
§ 21210. Persons required to complete	439
§ 21215. Time of completion	440
§ 21220. Method of completion	440
§ 21225. Content	440
§ 21230. Retention and delivery of copies	442
§ 21235. Delivery to department.....	442
§ 21240. Void receipts	442
§ 21245. Unused receipts	442
CHAPTER 5. ACCOUNTING RECORDS	443
§ 21300. Accounting records	443
CHAPTER 6. PAYMENT AND USE OF FEE.....	444
§ 21350. Quarterly payment to department.....	444
§ 21355. Use of landing fee	444
§ 21360. Exceptions to use of landing fee	444
§ 21365. Overpayment of fee	445
§ 21370. Legal process to prevent collection of fee.....	446
§ 21375. Legal process to recover overpaid landing fee.....	446
CHAPTER 7. MISCELLANEOUS PROVISIONS	447
§ 21450. Weighmasters	447
§ 21455. Requirement to make catch available for inspection and sampling	447

TITLE 11. FISH PROCESSING.....	448
CHAPTER 1. GENERAL PROVISIONS	448
§ 21600. Definitions	448
§ 21605. Commission regulation	448
§ 21610. Department inspection.....	448
§ 21615. Grading of fish by commission	449
CHAPTER 2. REDUCTION PERMITS AND LICENSES	449
§ 21650. Authority of commission	449
§ 21655. Required finding	449
§ 21660. Hearing	449
§ 21665. Limit on number of permits	449
§ 21670. License to dispose of dead or dying fish	450
§ 21675. No limit on court authority	450
CHAPTER 3. VIOLATIONS.....	450
Article 1. Required Practices	450
§ 21750. Containers to allow viewing of fish and fish offal	450
Article 2. Prohibitions.....	450
§ 21800. Affirmative authorization of fish reduction required	450
§ 21805. Prohibited reduction	451
§ 21810. Unloading or weighing of specified fish	451
Article 3. Enforcement.....	451
§ 21850. Complaint alleging violation	451
§ 21855. Nuisance	452
TITLE 12. PASSENGER FISHING BOATS	453
§ 21900. Application of chapter	453
§ 21905. Activity requiring license	453
§ 21910. Commercial boat registration	454
§ 21915. License fee.....	454
§ 21920. Maintenance of records	454
§ 21930. Fishing from commercial passenger fishing boat	454
§ 21935. Ocean fishing.....	455
§ 21950. Possession limit for specified fish	455
TITLE 13. LIVE FRESHWATER FISH FOR BAIT	455
§ 22100. When license required	455
§ 22105. Term of license	456
§ 22110. License fee.....	456
§ 22120. Take only of permitted species	456
§ 22125. Restriction on gear used to take certain species	456
§ 22130. Exemption	456
TITLE 14. COMMERCIAL FISHING REPORTS	457
§ 22200. Required record of fishing activities	457
§ 22205. Confidentiality of department records.....	457
§ 22210. Compilation of reports by department	458
TITLE 15. COMMERCIAL FISHERIES	458
CHAPTER 1. MAGNUSON-STEVENSON FISHERY CONSERVATION AND MANAGEMENT ACT.....	458
Article 1. General Provisions.....	458
§ 22300. Defined terms	458
§ 22305. Declaration of legislative findings	459
§ 22310. Declaration of policy	459
§ 22315. Inapplicability of Administrative Procedure Act	460
Article 2. Adoption of New Regulations	460

§ 22400. Required public hearing	460
§ 22405. Adoption of regulations to conform state law	461
§ 22410. Hearing and report to Legislature prerequisite to adoption of regulation	461
§ 22415. Report to Legislature of need to conform state law	461
Article 3. Repeal or Amendment of Regulations.....	462
§ 22450. Amendment or repeal of regulation by director	462
§ 22455. Hearing and report to Legislature prerequisite to amendment or repeal of regulation	462
CHAPTER 2. LIMITED ENTRY FISHERIES	463
§ 22500. Eligibility	463
§ 22505. Partnerships	463
§ 22510. Accidental death of permittee.....	464
§ 22515. Transfer of permit of deceased permittee.....	465
CHAPTER 3. NEARSHORE FISHERIES MANAGEMENT ACT	465
§ 22600. Name	465
§ 22605. Legislative declaration	465
§ 22610. Definitions	466
§ 22615. Funding.....	466
§ 22620. Adoption of regulations.....	467
§ 22625. Costs of act	467
§ 22630. Required permit.....	467
§ 22635. Use of permit fees	468
CHAPTER 4. FAR OFFSHORE FISHERY	468
§ 22700. “Far offshore fishery”	468
§ 22705. Legislative declaration	469
§ 22710. Landing of fish taken in far offshore fishery.....	469
§ 22715. Declaration of intended landing	469
§ 22720. Prohibited fishing during declared trip.....	470
CHAPTER 5. RESTRICTION OR CLOSURE OF FISHERIES	470
§ 22800. Restriction on take based on unsustainable fishing.....	470
§ 22805. Removal of restriction	471
§ 22810. Appeal of closure or restriction	471
§ 22815. Development of alternative fisheries or alternative fishing gear	471
CHAPTER 6. COMMERCIAL FISHERIES CAPACITY REDUCTION PROGRAM	472
§ 22900. Federal groundfish buy-back program	472
§ 22905. Establishment of program	472
§ 22910. Capacity reduction fee.....	472
§ 22915. Regulation conforming state law with federal law.....	472
TITLE 16. MISCELLANEOUS PROGRAMS	473
CHAPTER 1. INSURANCE POOLING.....	473
§ 23100. Loss or damage to vessel or machinery.....	473
CHAPTER 2. EDUCATIONAL AND SCIENTIFIC PROGRAMS	473
§ 23150. Take for educational or scientific purposes.....	473
CHAPTER 3. MARKETING.....	473
§ 23200. Collection of an assessment on behalf of marketing council or commission	473
DIVISION 7. WILDLIFE PROPAGATION, DOMESTICATION, POSSESSION, AND SALE	474
PART 1. AQUACULTURE	474
TITLE 1. GENERAL PROVISIONS	474
§ 23300. Applicability of part	474
§ 23305. Governing provisions	474

TITLE 2. ADMINISTRATION	474
CHAPTER 1. AGENCY DUTIES AND POWERS	474
§ 23350. Coordination of agencies	474
§ 23355. Commission regulation	475
§ 23360. Preparation of environmental impact reports by department	475
§ 23365. Department aquaculture coordinator	476
CHAPTER 2. FEES AND COSTS	477
§ 23500. Costs for requested inspections	477
§ 23505. Evaluation of fees by department	477
TITLE 3. REGISTRATION	477
CHAPTER 1. GENERAL PROVISIONS	477
§ 23600. Registration requirement	477
§ 23605. Required information	477
§ 23610. Department review of registration	478
§ 23615. Denial of application based on prior dishonored check	478
CHAPTER 2. FEES	479
§ 23700. Registration fee (effective until January 1, 2023)	479
§ 23700. Registration fee (operative on January 1, 2023)	479
§ 23705. Surcharge fee (effective until January 1, 2023)	480
§ 23705. Surcharge fee (operative January 1, 2023)	480
§ 23710. Delinquent fee payment (effective until January 1, 2023)	481
§ 23710. Delinquent fee payment (operative January 1, 2023)	481
§ 23715. Expenditure of collected funds	482
§ 23720. Sales and production records	482
TITLE 4. AQUATIC ORGANISMS	483
§ 23800. Regulation of placement of organisms	483
§ 23805. Operation detrimental to adjacent wildlife	483
§ 23810. Permit required to place organisms	483
§ 23815. Movement of fish between registered aquaculturists	483
§ 23820. Fee for use of public land and waters	483
TITLE 5. ACQUISITION OF ORGANISMS	484
§ 23900. Sources for brood stock	484
§ 23905. Collection of organisms by registered aquaculturist	484
§ 23910. Sale of organisms by department	484
§ 23915. Ownership of progeny	484
TITLE 6. LEASING OF STATE WATER BOTTOMS	485
CHAPTER 1. GENERAL PROVISIONS	485
§ 24000. Authority and procedure	485
§ 24005. Lease required for marine finfish aquaculture	485
§ 24010. Standards for leases and regulation	485
§ 24015. Exemption from standards for specified restoration or enhancement plans	487
§ 24020. Disclaimer of application to other marine finfish aquaculture law or regulation	488
CHAPTER 2. LEASE PROCEDURE	488
§ 24100. Application for lease	488
§ 24105. Public notice of application	488
§ 24110. Notification to State Lands Commission	488
§ 24115. Lease to new bidders	489
CHAPTER 3. TERMS OF LEASE	489
§ 24200. Term of lease	489
§ 24205. Rent increases by Legislature	489

§ 24210. Renewal of lease	490
§ 24215. Periodic reports to commission	490
§ 24220. Oyster leases	490
CHAPTER 4. RIGHTS AND RESPONSIBILITIES OF LESSEE	491
§ 24300. Payment of rent	491
§ 24305. Lessee responsibility for infringement	491
§ 24310. Lessee rights to organisms	491
§ 24315. Accommodation of public activity in leased area	491
§ 24320. Termination of lease	492
§ 24325. Assignment of lease	492
CHAPTER 5. PROHIBITIONS	492
§ 24400. Protection of leased area	492
TITLE 7. DISEASE CONTROL	493
CHAPTER 1. ADMINISTRATION	493
§ 24500. Responsibilities for disease control	493
§ 24505. Inspection of areas by department	493
§ 24510. Aquaculture Disease Committee	493
§ 24515. Recommendation of regulations	494
§ 24520. Authorized action by director	494
§ 24525. Quarantine or destruction of other plants or animals infected with nonlisted disease	495
§ 24530. Coordination of action in government and private facilities	495
§ 24535. Investigation of reported disease or parasite	495
§ 24540. Prevention of importation of diseased aquatic plant or animal	495
§ 24545. Permit to move quarantined plant or animal	496
CHAPTER 2. CLAIMS	496
§ 24600. Compensation to owner of destroyed plant or animal	496
§ 24605. Claims against the department	497
§ 24610. Disallowing of claim	497
§ 24615. Liability for disease eradication	497
TITLE 8. IMPORTATION OF AQUATIC PLANTS AND ANIMALS	497
§ 24700. Application of title	497
§ 24705. Required approval by department	498
§ 24710. Prohibited importation	498
§ 24715. Application for importation	498
§ 24720. Application of California Environmental Quality Act	499
TITLE 9. AQUACULTURE DEVELOPMENT COMMITTEE	499
§ 24800. Composition of committee	499
§ 24805. Term of membership	499
§ 24810. Compensation	500
§ 24815. Meetings	500
§ 24820. Function of committee	500
TITLE 10. PROHIBITIONS	500
CHAPTER 1. GENERAL PROVISIONS	500
§ 24900. Unlawful taking	500
§ 24905. Prohibited fish cultural operations	500
CHAPTER 2. EXOTIC OR TRANSGENIC SPECIES	501
§ 24950. Application of chapter	501
§ 24955. Definitions	501
§ 24960. Prohibitions	501
§ 24965. Research pursuant to permit	502

§ 24970. Notification of permit application	502
PART 2. FISH HATCHERIES	502
TITLE 1. FISH HATCHERIES GENERALLY	502
§ 25100. Fish hatcheries	502
§ 25105. Liability arising from lease of real property	502
§ 25110. Claim for damages	503
§ 25115. Bird exclosures	503
§ 25120. County fish hatcheries	503
§ 25125. Nonprofit hatcheries	503
§ 25130. Mount Whitney Fish Hatchery	504
§ 25135. Transgenic species of salmonids	504
TITLE 2. ANADROMOUS FISH HATCHERIES	505
§ 25200. Permit to operate hatchery	505
§ 25205. Financial capability	505
§ 25210. Restrictions	505
§ 25215. Fish property of state	505
§ 25220. Conditions of permit	505
§ 25225. Disclaimer of state liability	506
TITLE 3. COOPERATIVE SALMON AND STEELHEAD REARING FACILITIES	506
§ 25300. Department agreement	506
§ 25305. Demonstration of financial ability	506
§ 25310. Property of state	507
§ 25315. Release determined by Commission	507
§ 25320. Funding of agreements	507
§ 25325. Department to make fish available	507
§ 25330. Location of release	507
PART 3. FISH PLANTING	508
TITLE 1. GENERAL PROVISIONS	508
§ 25400. Application of part	508
§ 25405. Spawn and ova	508
§ 25410. Permit to stock fish	508
§ 25415. Planting of fish	508
§ 25420. Fish cultural operations and scientific investigations	509
TITLE 2. AQUATIC NUISANCE SPECIES	509
§ 25500. Damages	509
§ 25505. Response costs	510
§ 25510. Reward	510
TITLE 3. ARTIFICIAL REEFS	510
§ 25600. Legislative findings and declaration	510
§ 25605. Definitions	511
§ 25610. Department administration	511
§ 25615. Elements of program	511
§ 25620. Allocation	511
TITLE 4. OCEAN FISHERY RESEARCH	512
§ 25700. Legislative findings and declaration	512
§ 25705. Definitions	513
§ 25710. Purpose of program	513
§ 25715. Creation of advisory panel	513
§ 25720. Administration of program	514
§ 25725. Use of funds	514
§ 25730. Contracting with nonprofit organizations	514

§ 25735. Participation by other entities	515
§ 25740. Name of program location	515
TITLE 5. MISCELLANEOUS PROVISIONS	515
§ 25850. Youth camps	515
§ 25855. Urban fishing program	515
PART 4. DOMESTICATION OF GAME ANIMALS	516
TITLE 1. GAME ANIMALS GENERALLY	516
§ 26000. License requirement	516
§ 26005. Sale of carcass	516
§ 26010. Class 1 and class 2 licenses	517
§ 26015. License fee	517
§ 26020. Term of license	517
§ 26025. Display of license	517
§ 26030. Carriers for hire	517
§ 26035. Tag requirement	518
§ 26040. Fee for tag	518
§ 26045. Report to Department	518
§ 26050. Poultry processing plants	518
§ 26055. Sale of meat by keeper of establishment	519
§ 26060. Sale of meat by retail meat dealer	519
§ 26065. Confinement and escape	520
§ 26070. Killing of domesticated game animals	520
§ 26075. Evidence of domesticated status	520
§ 26085. Domesticated reindeer	520
TITLE 2. MIGRATORY GAME BIRDS	521
§ 26200. Definition	521
§ 26205. License requirement	521
§ 26210. License to raise and release	521
§ 26215. Posting of area	522
§ 26220. Additional regulatory requirements	522
§ 26225. Care of birds	522
§ 26230. Inspection of birds and facilities	522
§ 26235. Condition of birds	522
§ 26240. Blinds	523
§ 26245. Shooting or taking near release point	523
§ 26250. Birds injured or killed	523
§ 26255. Retrieving dog	524
§ 26260. Seal	524
§ 26265. Inspection fee	524
§ 26270. Shooter required to have hunting license	524
§ 26275. Federal requirements	524
PART 5. PROPAGATION OF FUR-BEARING MAMMALS	525
§ 26400. Applicability of other code provisions	525
PART 6. IMPORTATION, TRANSPORTATION, AND POSSESSION	525
TITLE 1. GENERAL PROVISIONS	525
§ 26500. “Wild animal”	525
§ 26505. “Enforcing officers”	525
§ 26510. Legislative findings and declarations	526
TITLE 2. RESTRICTIONS	526
CHAPTER 1. GENERAL PROVISIONS	526
§ 26600. Adoption of regulations relating to importation and possession	526

§ 26605. Designated exemption from permit requirement.....	527
§ 26610. Commission to adopt regulations providing guidance to enforcing officers	527
§ 26615. Department to publish list of prohibited animals	527
§ 26620. Department to furnish descriptive explanatory material	527
CHAPTER 2. CLASSES OF RESTRICTED ANIMALS	528
§ 26700. Restricted birds	528
§ 26705. Restricted mammals	528
§ 26710. Restricted amphibians	529
§ 26715. Restricted fish	530
§ 26720. Restricted reptiles	530
§ 26725. Restricted invertebrates	530
§ 26730. Animals restricted by designation	531
§ 26735. Addition or deletion of animals from restriction	531
CHAPTER 3. ADDITIONAL PROHIBITIONS	531
§ 26850. Prohibition relating to gain, amusement, or sport	531
§ 26855. Prohibited take	531
§ 26860. Prohibited release of wild animal	532
§ 26865. Elk	532
§ 26870. Elephants	532
CHAPTER 4. LOCAL ENTITIES	533
§ 27020. Eligible local entity	533
TITLE 3. PERMITS	533
§ 27200. Issuance of permit	533
§ 27205. Denial of permit	534
§ 27210. Special entities	534
§ 27215. Fees	535
§ 27220. Advisory committee	535
§ 27225. Inspection of facilities	536
§ 27230. Permit for animal acquired prior to 1975	536
§ 27235. Required content of permit application	537
§ 27240. Content of permit	537
§ 27245. Distribution of copies of permit	537
§ 27250. Progeny of imported or possessed animals	537
§ 27255. Local ordinances	538
§ 27260. Required reporting of health and safety risk	538
§ 27265. Commission regulations relating to identification of health and safety risk	538
§ 27270. Department to establish registry	538
§ 27275. Required reporting of escape or release	538
§ 27280. Commission regulations relating to taking possession of permitted animal	539
TITLE 4. INSPECTION OF ARRIVING ANIMAL	539
§ 27400. Special definition of “enforcing officer”	539
§ 27405. Notification of law enforcement of arriving wild animal	539
§ 27410. Discovery of disease during inspection	540
§ 27415. Periodic subsequent examination of animal	540
TITLE 5. NONNATIVE WILD ANIMALS	540
§ 27500. “Nonnative wild animal”	540
§ 27505. Prohibitions	541
§ 27510. Animals found at large	541
TITLE 6. MAMMALS USED FOR HIRE	541
§ 27600. “Mammal”	541
§ 27605. Animal Trust Fund	542

§ 27610. Grants and donations	542
§ 27615. Regulations relating to grant program.....	542
TITLE 7. MISCELLANEOUS PROVISIONS	542
§ 27700. Prohibited release of wild animal.....	542
§ 27705. Civil action to recover costs	542
§ 27710. Regulations relating to caging standards	543
PART 7. IMPORTATION AND TRANSPORTATION OF LIVE PLANTS AND ANIMALS	543
TITLE 1. BIRDS	543
§ 28000. Prohibition against transport of specified live birds.....	543
TITLE 2. AQUATIC PLANTS AND ANIMALS.....	543
§ 28100. Potentially diseased plants or animals.....	543
§ 28105. Aquaculture exception.....	544
§ 28110. Approval from department required for importation	544
§ 28115. Packaging	544
PART 8. AQUATIC INVASIVE SPECIES	545
TITLE 1. GENERAL PROVISIONS [RESERVED]	545
TITLE 2. CAULERPA ALGAE	545
§ 28250. Prohibition	545
PART 9. IMPORTATION AND TRANSPORTATION OF DEAD ANIMALS	545
TITLE 1. DEAD WILD ANIMALS	545
§ 28400. Application of title	545
§ 28405. Transportation of more than bag limit.....	545
§ 28410. Marking on packaging containing animal	546
§ 28415. Parcel post generally prohibited	546
§ 28420. Transport of specified birds.....	546
§ 28425. Requirements for importation or possession	546
TITLE 2. DEAD DOMESTICATED BIRDS AND MAMMALS	547
§ 28500. Transport by common carrier	547
§ 28505. Domesticated game birds raised outside state	547
PART 10. PROHIBITED SALE AND POSSESSION FOR SALE.....	548
TITLE 1. POSSESSION IN EATING ESTABLISHMENT	548
§ 28600. Prohibition	548
TITLE 2. IVORY AND RHINOCEROS HORNS	548
§ 28650. Definitions	548
§ 28655. Prohibition	549
§ 28660. Prima facie evidence	550
TITLE 3. SALE OR PURCHASE OF BIRD OR MAMMAL FOUND IN WILD.....	550
§ 28750. Prohibition	550
DIVISION 8. BIRDS	551
PART 1. GENERAL PROVISIONS	551
§ 28900. Governance by other provisions	551
§ 28905. Bird nest or eggs.....	551
§ 28910. Sale or purchase of game or nongame bird	551
§ 28915. Control of birds unduly preying on other animals	551
PART 2. DISEASE CONTROL	551
TITLE 1. GENERAL PROVISIONS [RESERVED]	551
TITLE 2. AVIAN INFLUENZA WILDLIFE SURVEILLANCE ACT	551
§ 29050. Name of act	551
§ 29055. Findings and declarations	552
§ 29060. Consultation among agencies to develop plan	552

§ 29065. Avian Influenza Working Group.....	552
PART 3. CLASSES OF BIRDS	553
TITLE 1. MIGRATORY BIRDS.....	553
§ 29200. Taking.....	553
§ 29205. License to permit feeding	554
§ 29210. Commission regulations relating to Migratory Bird Treaty Act	554
§ 29215. Commission regulation in the absence of federal regulation	554
§ 29220. Effective date of regulation	555
§ 29225. President as ex officio member of Migratory Bird Conservation Commission	555
TITLE 2. GAME BIRDS	555
CHAPTER 1. GENERAL PROVISIONS	555
§ 29350. Use of mammal	555
§ 29355. Use of vehicle	555
§ 29360. Use of dog during closed season	556
§ 29365. Game bird club license	556
§ 29370. Waste	556
§ 29375. Transport out of state.....	556

Article 1. General Provisions	956
§ 58600. Described areas	956
Article 2. Pacific Grove Marine Gardens Fish Refuge	956
§ 58625. Description	956
§ 58630. Take of fish within refuge	956
TITLE 3. GAME REFUGES	957
CHAPTER 1. GAME REFUGES GENERALLY	957
§ 58700. Prohibitions	957
§ 58705. Take from navigable waters	957
§ 58710. Commission control of mammals and birds	957
§ 58715. Acquisition of land for game refuge	957
§ 58720. Possession of weapon in game refuge	958
§ 58725. Possession of bird or mammal in game refuge	958
§ 58730. Posted notices	959
§ 58735. Management and control	959
§ 58740. Education and outreach	959
CHAPTER 2. SPECIFIC GAME REFUGES	960
Article 1. General Provisions	960
§ 58800. Described areas	960
Article 2. Game Refuge 1C	960
§ 58825. Description	960
Article 3. Game Refuge 1F	961
§ 58850. Description	961
Article 4. Game Refuge 1G	961
§ 58875. Description	961
Article 5. Game Refuge 1H	962
§ 58900. Description	962
Article 6. Game Refuge 1I	962
§ 58925. Description	962
Article 7. Game Refuge 1J	963
§ 58950. Description	963
Article 8. Game Refuge 1N	963
§ 58975. Description	963
Article 9. Game Refuge 1P	964
§ 59000. Description	964
Article 10. Game Refuge 1R	964
§ 59025. Description	964
Article 11. Game Refuge 1S	965
§ 59050. Description	965
Article 12. Game Refuge 1V	965
§ 59075. Description	965
Article 13. Game Refuge 2A	966
§ 59100. Description	966
Article 14. Game Refuge 3F	966
§ 59125. Description	966
Article 15. Game Refuge 3G	966
§ 59150. Description	966
Article 16. Game Refuge 4D	967
§ 59175. Description	967
§ 59180. Firearm prohibition	968
Article 17. Game Refuge 4G	968

§ 59200. Description	968
Article 18. California Sea Otter Game Refuge	969
§ 59225. Description	969
§ 59230. Privately owned land	969
Article 19. Farallon Islands Game Refuge.....	969
§ 59250. Description	969
§ 59255. Regulated activity	970
Article 20. Johnsville Game Refuge	970
§ 59275. Description	970
§ 59280. Firearms and other devices.....	971
§ 59285. Possession.....	971
Article 21. Mount Tamalpais Game Refuge	971
§ 59300. Description	971
§ 59305. Take by private land owner	972
§ 59310. Firearm use by high school militia	972
§ 59315. Special rules on take.....	972
Article 22. Preston School of Industry Game Refuge.....	973
§ 59350. Description	973
TITLE 4. FISH AND GAME REFUGES	973
CHAPTER 1. FISH AND GAME REFUGES GENERALLY.....	973
§ 59400. Fish and game refuge is both a fish refuge and game refuge	973
CHAPTER 2. SPECIFIC FISH AND GAME REFUGES	973
Article 1. General Provisions.....	973
§ 59425. Described areas	973
Article 2. San Francisco Fish and Game Refuge	973
§ 59450. Description	973
§ 59455. Transport of animals.....	974
§ 59460. Use of land for water supply purposes	974
TITLE 5. WATERFOWL REFUGES	975
CHAPTER 1. WATERFOWL REFUGES GENERALLY	975
§ 59500. Prohibition	975
CHAPTER 2. SPECIFIC WATERFOWL REFUGES	975
Article 1. General Provisions.....	975
§ 59525. Described areas	975
Article 2. San Leandro Waterfowl Refuge	975
§ 59550. Description	975
TITLE 6. MARINE LIFE REFUGES.....	976
CHAPTER 1. MARINE LIFE REFUGES GENERALLY	976
§ 59600. Prohibition	976
CHAPTER 2. SPECIFIC MARINE LIFE REFUGES	976
Article 1. General Provisions.....	976
§ 59625. Described areas	976
Article 2. Bodega Marine Life Refuge	976
§ 59650. Description	976
§ 59655. Director.....	976
§ 59670. Prohibitions	977
§ 59675. University of California	977
Article 3. Catalina Marine Science Center Marine Life Refuge.....	977
§ 59700. Description	977
§ 59705. Director.....	978
§ 59710. Prohibitions	978

§ 59715. Exceptions to prohibitions	978
Article 4. City of Encinitas Marine Life Refuge.....	979
§ 59750. Description	979
Article 5. Dana Point Marine Life Refuge.....	979
§ 59775. Description	979
§ 59780. Director.....	980
§ 59785. Take	980
§ 59790. Entry prohibition	980
§ 59795. Exceptions to prohibitions.....	981
§ 59800. “Intertidal zone” defined	982
Article 6. Doheny Beach Marine Life Refuge	982
§ 59825. Description	982
§ 59830. Take of fish in refuge	982
Article 7. Hopkins Marine Life Refuge	983
§ 59850. Description	983
§ 59855. Director.....	983
§ 59860. Special prohibition	983
§ 59865. Exceptions to prohibition	983
Article 8. Irvine Coast Marine Life Refuge.....	984
§ 59900. Description	984
§ 59905. Take of fish in refuge	984
Article 9. James V. Fitzgerald Marine Reserve	985
§ 59925. Description	985
§ 59930. Take of fish in refuge	985
Article 10. Laguna Beach Marine Life Refuge.....	986
§ 59950. Description	986
§ 59955. Take of fish in refuge	986
Article 11. Newport Beach Marine Life Refuge.....	987
§ 59975. Description	987
§ 59980. Take of fish in refuge	987
Article 12. Niguel Marine Life Refuge.....	987
§ 60000. Description	987
§ 60005. Take of fish in refuge	988
Article 13. Point Fermin Marine Life Refuge.....	988
§ 60025. Description	988
§ 60030. Take of fish in refuge	988
Article 14. San Diego Marine Life Refuge.....	989
§ 60050. Description	989
§ 60055. University of California	989
Article 15. South Laguna Beach Marine Life Refuge	989
§ 60075. Description	989
§ 60080. Take of fish in refuge	990
TITLE 7. QUAIL REFUGES	990
CHAPTER 1. QUAIL REFUGES GENERALLY	990
§ 60200. Prohibition	990
CHAPTER 2. SPECIFIC QUAIL REFUGES.....	990
Article 1. General Provisions.....	990
§ 60225. Described areas	990
Article 2. Bolinas Quail Refuge.....	991
§ 60250. Description	991

TITLE 8. CLAM REFUGES	991
CHAPTER 1. CLAM REFUGES GENERALLY	991
§ 60300. Prohibition	991
CHAPTER 2. SPECIFIC CLAM REFUGES	991
§ 60325. Pismo clam bearing beaches	991
PART 2. MARINE LIFE PROTECTION ACT	992
TITLE 1. GENERAL PROVISIONS	992
§ 60400. Short title	992
§ 60405. Legislative findings and declarations	992
§ 60410. Definitions	993
§ 60415. Ocean Protection Council authority	994
§ 60420. Consultation with United States Navy	994
TITLE 2. PROTECTIONS.....	994
§ 60450. Take of fish in MPA or marine life reserve	994
§ 60455. Impact analysis	995
TITLE 3. MARINE LIFE PROTECTION PROGRAM.....	995
§ 60475. Marine Life Protection Program	995
§ 60480. Program elements	996
TITLE 4. MASTER PLAN	996
§ 60500. Master plan	996
§ 60505. Content of master plan	997
§ 60510. Workgroup actions	999
§ 60515. Peer review	999
§ 60520. Adoption of master plan	999
§ 60525. MPA siting	1000
§ 60530. Petitions of interested persons.....	1001
§ 60535. Other authority	1001
PART 3. MARINE MANAGED AREAS	1001
§ 60550. Designation, deletion, or modification of marine recreational management areas	1002
§ 60555. Marine Managed Areas Improvement Act.....	1002
PART 4. WILDLIFE MANAGEMENT AREAS, GAME FARMS, AND PUBLIC SHOOTING GROUNDS	1003
TITLE 1. GENERAL PROVISIONS	1003
§ 60600. Department powers	1003
§ 60605. State ownership and regulation	1003
§ 60610. Acquired property	1003
TITLE 2. PROTECTIONS.....	1004
§ 60625. Unlawful entry upon wildlife management area or public shooting ground.....	1004
§ 60630. Regulation of take in public shooting ground	1004
TITLE 3. OPERATION	1004
§ 60650. Acquired lands to operate on nonprofit basis	1004
§ 60655. Multiple recreational use	1004
§ 60660. Facilities	1004
§ 60665. Fees for use privileges.....	1005
§ 60670. Shooting permits	1005
§ 60675. Output of state game farm	1005
§ 60680. Payments to offset local taxes and assessments	1005
§ 60685. Mosquitos	1006
PART 5. WILDLIFE AREAS, RANGES, AND RESERVES	1007
§ 60700. Exchange or sale of property within specified areas	1007

§ 60705. Mineral rights	1008
§ 60710. Apiculture in wildlife area.....	1009
§ 60715. Lower Sherman Island	1010
§ 60720. Fish and wildlife enhancement facilities	1011
PART 6. ECOLOGICAL RESERVES	1011
TITLE 1. ECOLOGICAL RESERVES GENERALLY	1011
§ 60750. Legislative declaration	1011
§ 60755. “Ecological reserve” defined.....	1012
§ 60760. Acquisition of property	1012
§ 60765. Regulation of ecological reserves.....	1012
§ 60770. Ownership and regulation of property	1012
§ 60775. Valid title to acquired property	1013
§ 60780. Prohibited entry	1013
§ 60785. Facilities and programs	1013
§ 60790. Ecological reserves not wildlife management areas.....	1013
TITLE 2. SPECIFIC ECOLOGICAL RESERVES	1013
§ 60850. Upper Newport Bay Ecological Reserve Maintenance and Preservation Fund	1013
§ 60855. Magnesia Spring Ecological Reserve	1014
PART 7. PROTECTED SPAWNING AREAS	1014
§ 60900. Protected spawning areas	1014
PART 8. WILDERNESS AREAS	1016
§ 60950. Vehicle prohibition.....	1016
§ 60955. Exception to vehicle prohibition	1016
DIVISION 17. ACTIVITIES THAT AFFECT WILDLIFE	1017
PART 1. CALIFORNIA ENDANGERED SPECIES ACT	1017
TITLE 1. GENERAL PROVISIONS	1017
CHAPTER 1. SHORT TITLE AND LEGISLATIVE FINDINGS.....	1017
§ 62000. Short title	1017
§ 62005. Need for conservation	1017
§ 62010. General policy	1017
§ 62015. Scope of required mitigation	1018
§ 62020. Project approval and alternatives	1018
§ 62025. Mitigation and enhancement in lieu of infeasible alternatives.....	1018
§ 62030. Duty of state entities.....	1019
§ 62035. Cooperation of landowners	1019
CHAPTER 2. DEFINITIONS	1019
§ 62100. Application	1019
§ 62105. Candidate species	1019
§ 62110. Conserve, conserving, and conservation	1019
§ 62115. Endangered species	1020
§ 62120. Feasible.....	1020
§ 62125. Project.....	1020
§ 62128. Recover and recovery	1020
§ 62130. State lead agency	1021
§ 62135. Threatened species	1021
TITLE 2. LISTING OF ENDANGERED AND THREATENED SPECIES	1021
CHAPTER 1. GENERAL PROVISIONS	1021
§ 62200. Establishment and maintenance of lists	1021
§ 62205. Criteria.....	1021
§ 62210. Notice of pending actions.....	1022
CHAPTER 2. LISTING PROCESS.....	1022

Article 1. Petition	1022
§ 62250. Guidelines	1022
§ 62255. General content requirements	1022
§ 62260. Specific content requirements	1022
§ 62265. Referral of petition to department	1023
§ 62270. Publication of notice of petition	1023
§ 62275. Department-initiated petition	1023
§ 62280. Department evaluation and recommendation	1024
§ 62285. Public input during evaluation	1024
§ 62290. Amendment of petition	1024
Article 2. Public Hearing and Meeting	1025
§ 62350. Scheduling	1025
§ 62355. Public hearing	1025
§ 62360. Closure of public hearing and record	1025
§ 62365. Reopening administrative record	1025
§ 62370. Continuation of meeting	1026
§ 62375. Commission findings	1027
§ 62380. Notice of acceptance	1027
Article 3. Department Review	1027
§ 62400. Review	1027
§ 62405. Timing	1028
§ 62410. Draft status review report	1028
§ 62415. Final report	1028
§ 62420. Scope of inquiry	1029
Article 4. Commission Decision	1029
§ 62450. Meeting	1029
§ 62455. Public hearing	1029
§ 62460. Closure of public hearing and record	1030
§ 62465. Reopening administrative record	1030
§ 62470. Continuation of meeting	1030
§ 62475. Commission findings	1031
§ 62480. Writ of mandate	1032
§ 62485. Emergency regulation	1032
Article 5. Ongoing Review	1032
§ 62500. Five-year review of listed species	1032
§ 62505. Five-year review of species listed by both Commission and US Department of Interior	1033
§ 62510. Timing of initial five-year review	1033
§ 62515. Written report of five-year review results	1033
§ 62520. Discretionary review	1034
§ 62525. Triennial report	1034
TITLE 3. TAKE, IMPORTATION, EXPORTATION, OR SALE	1034
CHAPTER 1. PROHIBITION	1034
§ 62600. Take, possession, purchase, or sale	1034
§ 62605. Candidate species	1035
CHAPTER 2. GENERAL EXCEPTIONS	1035
§ 62650. Take for scientific, educational, or management purposes	1035
§ 62655. Take of fish authorized by specified provisions	1035
§ 62665. Take of fish authorized by Commission	1035
§ 62670. Take authorized by department	1035
§ 62675. Sale of organism by person who possessed it before it was listed	1036

§ 62680. Possession of animal possessed before it was listed	1036
CHAPTER 3. INCIDENTAL TAKE	1037
§ 62700. Incidental take	1037
§ 62705. Incidental take authorized by federal entity	1038
CHAPTER 4. SPECIFIC EXCEPTIONS	1039
Article 1. Quantification Settlement Agreement	1039
§ 63300. Take from specified effects of implementation of agreement.....	1039
§ 63305. Application of Section 63300	1039
§ 63310. Restoration study	1041
§ 63315. Advisory committee	1043
§ 63320. No exemption from other laws	1044
§ 63325. Related assessment by Resources Agency	1044
Article 2. Chinook Salmon	1044
§ 63350. Findings and declarations	1044
§ 63355. Enhancement of survival permit	1045
§ 63360. Experimental population	1046
Article 3. Rough Sculpin.....	1046
§ 63400. Spring Creek Bridge	1046
Article 4. Threespine Stickleback	1047
§ 63450. Bouquet Creek	1047
§ 63455. Metropolitan Water District of Southern California water supply facility	1048
Article 5. Lost River and Shortnose Sucker.....	1050
§ 63475. Klamath Hydroelectric Settlement Agreement	1050
Article 6. Limestone Salamander.....	1050
§ 63500. Ferguson Slide Permanent Restoration Project	1050
Article 7. Bluntnose Leopard Lizard	1052
§ 63510. Allensworth Community Services District	1052
CHAPTER 5. EXPERIMENTAL POPULATIONS	1052
§ 63550. Enhancement of survival permit	1052
§ 63555. Experimental population	1053
§ 63560. Public outreach	1054
CHAPTER 6. PERMIT APPLICATION FEE	1054
§ 63600. Definitions	1054
§ 63605. Collection and use of fee	1055
§ 63610. Timing	1056
§ 63615. Fee amounts.....	1056
§ 63620. Adjustment of fee amount	1057
§ 63625. Additional fee to cover costs	1057
§ 63630. Periodic review of fee amount	1058
§ 63635. Endangered Species Permitting Account	1058
§ 63640. Article XIII B of the California Constitution	1058
TITLE 4. AGRICULTURE	1059
CHAPTER 1. GENERAL PROVISIONS	1059
§ 63700. Accidental take in the course of lawful agricultural activities	1059
§ 63705. Routine and ongoing agricultural activities	1059
§ 63710. Application to take of fish species	1059
§ 63715. Application to timber harvesting	1059
CHAPTER 2. VOLUNTARY PROGRAM	1059
§ 63750. Authorization of voluntary programs	1059
§ 63755. Program requirements	1060
§ 63760. Take occurring while management practices followed.....	1060

§ 63765. Renewal of programs	1060
§ 63770. Report on program effects	1061
§ 63775. Nonrenewal or modification of program	1061
§ 63780. Educational outreach by nonprofit entity	1061
TITLE 5. CALIFORNIA STATE SAFE HARBOR AGREEMENT PROGRAM ACT	1062
CHAPTER 1. GENERAL PROVISIONS	1062
§ 63900. Short title	1062
§ 63905. Findings	1062
§ 63910. Definitions	1062
§ 63915. Purpose and effect	1064
§ 63920. Regulations	1064
§ 63925. List of qualified persons and program administrators	1064
§ 63930. Federal safe harbor agreement	1064
§ 63935. Sunset date	1065
CHAPTER 2. SAFE HARBOR AGREEMENT	1065
Article 1. Permissible take	1065
§ 63950. Department authorization of otherwise prohibited take	1065
§ 63955. Owens pupfish	1066
Article 2. Agreement	1066
§ 64000. Information to be submitted by landowner	1066
§ 64005. Treatment of proprietary information	1067
§ 64010. Department access to land or water proposed for enrollment	1068
§ 64015. Alteration or modification of enrolled property	1068
§ 64020. Advance notice of specified matters	1069
§ 64025. Department access to land after receiving notice	1069
§ 64030. Conveyance of enrolled land or water	1069
§ 64035. Agreement amendment	1070
§ 64040. Suspension or revocation of agreement	1070
§ 64045. Liability	1070
§ 64050. Neighboring landowner	1071
Article 3. Special Circumstances	1072
§ 64075. Forest land subject to conservation easement	1072
TITLE 6. RECOVERY PLAN	1072
§ 64100. Development of nonregulatory recovery plan	1072
§ 64105. Plan content	1073
§ 64110. Guidelines and criteria	1074
PART 2. PLANNING AND MITIGATION	1074
TITLE 1. GENERAL PROVISIONS	1074
§ 64400. Planning and environmental compliance division	1074
TITLE 2. NATURAL COMMUNITY CONSERVATION PLANNING ACT	1075
CHAPTER 1. GENERAL PROVISIONS	1075
§ 64500. Short title	1075
§ 64505. Findings and declarations	1075
§ 64510. Further findings and declarations	1076
§ 64515. Definitions	1076
§ 64520. Regulations	1078
§ 64530. Department compensation	1078
CHAPTER 2. PLANNING	1078
§ 64550. Authority to undertake planning	1078
§ 64555. Cooperative agreement to conduct planning	1079
§ 64560. Agreement requirements	1079

§ 64565. Implementation agreement	1080
§ 64570. Public participation in plan development and review	1081
§ 64575. Public review prior to approval	1082
§ 64580. Plan approval	1082
§ 64585. Approval of agreement not a “project”	1083
CHAPTER 3. IMPLEMENTATION	1083
§ 64600. Department actions	1083
§ 64605. Authorized take	1084
§ 64610. Assurances	1084
§ 64615. No effect on application of CEQA	1085
§ 64620. CEQA analysis	1085
§ 64625. Data and reports available for public review	1086
§ 64630. Use of conservation corps	1086
§ 64635. Injunctive relief	1086
§ 64640. Suspension of take or revocation of permit	1086
§ 64645. Breach of proportionality between take and conservation	1086
§ 64650. Local government authority to acquire land or water	1086
§ 64655. Effect on take in specified circumstances	1087
§ 64660. San Diego dedication of open space	1088
TITLE 3. ADVANCE MITIGATION AND REGIONAL CONSERVATION	
INVESTMENT STRATEGIES	1089
CHAPTER 1. GENERAL PROVISIONS	1089
Article 1. Legislative Findings and Intent	1089
§ 64700. Findings and declarations	1089
§ 64705. Legislative intent	1090
Article 2. Definitions	1090
§ 64710. Application	1090
§ 64715. Administrative draft natural community conservation plan	1090
§ 64720. Areas of conservation emphasis	1090
§ 64725. Compensatory mitigation	1090
§ 64730. Conservation action	1091
§ 64735. Conservation easement	1091
§ 64740. Focal species	1091
§ 64745. Habitat enhancement action	1091
§ 64750. Performance-based milestones	1091
§ 64755. Performance standards	1092
§ 64760. Permanently protect	1092
§ 64765. Regional conservation assessment	1092
§ 64770. Regional conservation investment strategy	1092
§ 64775. Regional level	1093
§ 64780. Sensitive species	1093
Article 3. Implementation and Scope	1093
§ 64800. Guidelines	1093
§ 64805. Fees	1093
§ 64810. Limitations	1093
§ 64815. Report to Legislature	1094
§ 64820. Effect on specified statutes	1094
CHAPTER 2. REGIONAL CONSERVATION ASSESSMENT	1094
§ 64850. Voluntary	1094
§ 64855. Proposal and approval	1094
§ 64860. Requirements	1094

CHAPTER 3. REGIONAL CONSERVATION INVESTMENT STRATEGY	1096
Article 1. Regional Conservation Investment Strategy Generally.....	1096
§ 64900. Purpose	1096
§ 64905. Voluntary	1096
§ 64910. Content	1096
§ 64915. Considerations	1098
§ 64920. Incorporation of regional conservation assessment.....	1098
§ 64925. Format	1098
§ 64930. Consistent metrics.	1098
§ 64935. Proposal and approval	1099
Article 2. Procedure	1099

DISPOSITION OF EXISTING LAW	1213
DERIVATION OF PROPOSED LAW	1245

Fish and Game Code (repealed)

SECTION 1. The Fish and Game Code is repealed.

Fish and Wildlife Code (added)

SEC. 2. The Fish and Wildlife Code is added, to read:

DIVISION 1. GENERAL PROVISIONS

PART 1. PRELIMINARY PROVISIONS

§ 1. Code title

1. (a) This code shall be known as the Fish and Wildlife Code.

(b) The act that added this code shall be known and may be cited as the “Fish and Wildlife Code of 2020.”

Comment. Subdivision (a) of Section 1 is comparable to former Fish and Game Code Section 1.

Subdivision (b) is new. It provides a convenient means of referring to the recodification of the former Fish and Game Code.

§ 5. Application of part

5. Unless the provision or context otherwise requires, the provisions of this part govern the construction of this code.

Comment. Section 5 is new. It is a common general provision in the codes. See, e.g., Prob. Code § 6.

§ 10. Restatement and continuation

10. (a) A provision of this code, insofar as it is substantially the same as a previously existing provision relating to the same subject matter, shall be construed as a restatement and continuation thereof, and not as a new enactment.

(b) A reference in a statute or regulation to a previously existing provision that is restated and continued in this code shall, unless a contrary intent appears, be deemed a reference to the restatement and continuation.

(c) A reference in a statute or regulation to a provision of this code that is substantially the same as a previously existing provision, shall, unless a contrary intent appears, be deemed to include a reference to the previously existing provision.

(d) A reference in a regulation to a provision of the former Fish and Game Code, rather than to the provision of this code that continues the former provision, has no effect on the validity of the regulation.

Comment. Subdivision (a) of Section 10 continues the first sentence of former Fish and Game Code Section 3 without substantive change.

Subdivision (b) is drawn from Government Code Section 9604.

Subdivision (c) is drawn from Family Code Section 2.

1 Subdivision (d) is new. It is added to make clear that any delay in updating regulations to
2 reflect the enactment of this code does not have any effect on the validity of the regulation. A
3 regulation continues to be valid even if it refers to a former Fish and Game Code provision.

4 **§ 15. Judicial decisions**

5 15. (a) A judicial decision interpreting a provision of the former Fish and Game
6 Code is relevant in interpreting any provision of this code that restates or
7 continues that provision of the former Fish and Game Code.

8 (b) However, in enacting the Fish and Wildlife Code of 2020, the Legislature
9 has not evaluated the correctness of any judicial decision interpreting a provision
10 of the former Fish and Game Code.

11 (c) The enactment of the Fish and Wildlife Code of 2020 is not intended to, and
12 does not, reflect any assessment of any judicial decision interpreting any provision
13 of the former Fish and Game Code.

14 **Comment.** Section 15 is new. Subdivision (a) makes clear that case law construing a
15 predecessor provision of the former Fish and Game Code is relevant in construing its successor
16 provision or provisions in the Fish and Wildlife Code.

17 Subdivisions (b) and (c) make clear that in enacting the act that created the Fish and Wildlife
18 Code of 2020, the Legislature has not taken any position on any judicial opinion interpreting any
19 provision of the former Fish and Game Code. These provisions only apply to the act that created
20 this code. They have no effect on the use of any prior or subsequent enactments in construing
21 statutes.

22 **§ 20. Constitutionality of provisions**

23 20. (a) A judicial decision determining the constitutionality of a provision of the
24 former Fish and Game Code is relevant in determining the constitutionality of any
25 provision of this code that restates or continues that provision of the former Fish
26 and Game Code.

27 (b) However, in enacting the Fish and Wildlife Code of 2020, the Legislature
28 has not evaluated the constitutionality of any provision enacted by that act, or the
29 correctness of any judicial decision determining the constitutionality of any
30 provision of the former Fish and Game Code.

31 (c) The enactment of the Fish and Wildlife Code of 2020 is not intended to, and
32 does not, reflect any determination of the constitutionality of any provision
33 enacted by that act.

34 **Comment.** Section 20 is new. Subdivision (a) makes clear that case law determining the
35 constitutionality of a predecessor provision of the former Fish and Game Code is relevant in
36 determining the constitutionality of its successor provision or provisions in the Fish and Wildlife
37 Code of 2020.

38 Subdivisions (b) and (c) make clear that in enacting the Fish and Wildlife Code of 2020, the
39 Legislature has not taken any position on the constitutionality of any provision of that act, or of
40 any provision of the former Fish and Game Code.

41 **§ 25. No impairment of privileges or rights**

42 25. This code shall not impair any privilege granted or right acquired under any
43 of the laws of this State prior to the date it takes effect.

1 **Comment.** Section 25 continues the second sentence of former Fish and Game Code Section 3
2 without substantive change.

3 **§ 30. Effect of headings**

4 30. Division, part, title, chapter, article, and section headings do not in any
5 manner affect the scope, meaning, or intent of the provisions of this code.

6 **Comment.** Section 30 continues former Fish and Game Code Section 4 without substantive
7 change.

8 **§ 35. Reference to specified part of code**

9 35. Unless otherwise expressly stated:

10 (a) “Division” means a division of this code.

11 (b) “Part” means a part of the division in which that term occurs.

12 (c) “Title” means a title of the part in which that term occurs.

13 (d) “Chapter” means a chapter of the division, part, or title, as the case may be,
14 in which that term occurs.

15 (e) “Article” means an article of the chapter in which that term occurs.

16 (f) “Section” means a section of this code.

17 (g) “Subdivision” means a subdivision of the section in which that term occurs.

18 (h) “Paragraph” means a paragraph of the subdivision in which that term occurs.

19 (i) “Subparagraph” means a subparagraph of the paragraph in which that term
20 occurs.

21 **Comment.** Subdivisions (a) through (e) of Section 35 are new. They are similar to Probate
22 Code Section 8, except that references to “title” have been added.

23 Subdivisions (f) and (g) of Section 35 restate former Fish and Game Code Section 73 without
24 substantive change.

25 **§ 40. Reference to statute includes amendments and additions**

26 40. Whenever reference is made to any portion of this code or of any other law
27 of this state, the reference applies to all amendments and additions heretofore or
28 hereafter made.

29 **Comment.** Section 40 continues former Fish and Game Code Section 5 without substantive
30 change.

31 **§ 45. Delegation**

32 45. Whenever a power is granted to, or duty is imposed upon, a public officer,
33 the power may be exercised or the duty may be performed by a deputy of the
34 officer, or by a person authorized, pursuant to law, by the officer, unless this code
35 expressly provides otherwise.

36 **Comment.** Section 45 continues former Fish and Game Code Section 6 without substantive
37 change.

1 **§ 50. Use of English in statements and reports**

2 50. Whenever a statement or report is required to be made, it shall be made in
3 the English language. Nothing in this section shall prohibit the department from
4 providing an unofficial translation of a statement or report in a language other than
5 English.

6 **Comment.** Section 50 continues former Fish and Game Code Section 7 without substantive
7 change.

8 See also Gov't Code §§ 7290-7299.8 (Dymally-Alatorre Bilingual Services Act).

9 **§ 55. Tenses**

10 55. The present tense includes the past and future tenses, and the future, the
11 present.

12 **Comment.** Section 55 continues former Fish and Game Code Section 8 without substantive
13 change.

14 **§ 60. Gender**

15 60. The masculine gender includes the feminine and the neuter.

16 **Comment.** Section 60 continues former Fish and Game Code Section 9 without substantive
17 change.

18 **§ 65. Number**

19 65. The singular number includes the plural, and the plural, the singular.

20 **Comment.** Section 65 continues former Fish and Game Code Section 10 without substantive
21 change.

22 **§ 70. Days**

23 70. Whenever in this code the doing of an act between certain dates or from one
24 date to another is allowed or prohibited, the period of time thereby indicated
25 includes both dates specified. The first date specified designates the first day of the
26 period, and the second day specified designates the last day of the period. No
27 period of time specified in this code exceeds one year unless otherwise expressly
28 provided.

29 **Comment.** Section 70 continues former Fish and Game Code Section 11 without substantive
30 change.

31 **§ 75. Mailed notice**

32 75. Unless otherwise specified by statute, any notice or other written
33 communication required to be sent to any person by this code or regulations
34 adopted pursuant to this code is sufficient notice, if sent by first-class mail to the
35 last address furnished to the department by that person.

36 **Comment.** Section 75 continues former Fish and Game Code Section 13 without substantive
37 change.

1 **§ 80. “Shall” and “may”**

2 80. “Shall” is mandatory and “may” is permissive.

3 **Comment.** Section 80 continues former Fish and Game Code Section 79 without substantive
4 change.

5 **§ 85. Order, rule, and regulation**

6 85. “Order,” “rule,” and “regulation” are used interchangeably and each includes
7 the others.

8 **Comment.** Section 85 continues former Fish and Game Code Section 64 without substantive
9 change.

10 **§ 90. Possession of animal taken out of state**

11 90. A provision of this code relating to the possession of birds, mammals, fish,
12 reptiles, or amphibians applies to birds, mammals, fish, reptiles, or amphibians
13 taken either in or outside of this state.

14 **Comment.** Section 90 continues former Fish and Game Code Section 2013 without substantive
15 change.

16 **§ 95. Animal parts**

17 95. A provision of this code that applies to a whole animal also applies to a part
18 of the animal.

19 **Comment.** Section 95 continues former Fish and Game Code Section 80 without substantive
20 change.

21 **§ 100. Conforming rule change**

22 100. (a) The commission or the department may make a conforming rule change
23 without complying with the rulemaking procedure specified in Article 5
24 (commencing with Section 11346) of Chapter 3.5 of Part 1 of Division 3 of Title 2
25 of the Government Code, if the rule change meets all of the requirements of this
26 section.

27 (b) To proceed under this section, the commission or department shall submit all
28 of the following to the Office of Administrative Law:

29 (1) A completed and signed form STD 400.

30 (2) A statement declaring that each proposed rule change in the submission is a
31 conforming rule change.

32 (3) A copy of the text of each regulation to be changed, with strikeout and
33 underscore showing the changes.

34 (c) On receipt of a submission described in subdivision (b), the Office of
35 Administrative Law shall file the changed regulations with the Secretary of State
36 and have them published in the California Code of Regulations.

37 (d) “Conforming rule change” means a change to a regulation in Title 14 of the
38 California Code of Regulations that deletes a reference to a former provision of
39 the Fish and Game Code and replaces it with a reference to the provision of this
40 code that restates or continues the former provision. “Conforming rule change”

1 includes a change to a regulation's citation of authority or reference, to delete a
2 reference to a former provision of the Fish and Game Code and replace it with a
3 reference to the provision of this code that restates or continues the former
4 provision.

5 **Comment.** Section 100 is new.

6 PART 2. DEFINITIONS

7 TITLE 1. GENERALLY APPLICABLE 8 DEFINITIONS

9 § 200. Application of definitions

10 200. Unless a provision or the context otherwise requires, the definitions in this
11 part govern the construction of this code and all regulations adopted pursuant to
12 this code.

13 **Comment.** Section 200 continues former Fish and Game Code Section 2 without substantive
14 change.

15 § 205. “Adaptive management”

16 205. “Adaptive management,” unless otherwise specified in this code, means
17 management that improves the management of biological resources over time by
18 using new information gathered through monitoring, evaluation, and other credible
19 sources as they become available, and adjusts management strategies and practices
20 to assist in meeting conservation and management goals. Under adaptive
21 management, program actions are viewed as tools for learning to inform future
22 actions.

23 **Comment.** Section 205 continues former Fish and Game Code Section 13.5 without
24 substantive change.

25 § 210. “Affix”

26 210. “Affix” means physically attach to, or imprint on, an electronic validation
27 to a license document.

28 **Comment.** Section 210 continues former Fish and Game Code Section 16 without substantive
29 change.

30 § 215. “Anadromous fish”

31 215. “Anadromous fish” means fish that spawn in fresh water and spend a
32 portion of their lives in the ocean.

33 **Comment.** Section 215 continues former Fish and Game Code Section 14 without substantive
34 change.

1 **§ 220. “Angling”**

2 220. “Angling” means the taking of, or attempting to take, fish by hook and line
3 with the line held in the hand, or by hook and line with the line attached to a pole
4 or rod that is closely attended or held in the hand in a manner that the fish
5 voluntarily takes the bait or lure in its mouth.

6 **Comment.** Section 220 continues former Fish and Game Code Section 15 without substantive
7 change.

8 **§ 225. “Aquaculture”**

9 225. (a) “Aquaculture” means that form of agriculture devoted to the
10 propagation, cultivation, maintenance, and harvesting of aquatic plants and
11 animals in marine, brackish, and fresh water.

12 (b) “Aquaculture” does not include species of ornamental marine or freshwater
13 plants and animals not utilized for human consumption or bait purposes that are
14 maintained in closed systems for personal, pet industry, or hobby purposes,
15 however, these species continue to be regulated under Part 7 (commencing with
16 Section 26500) of Division 7.

17 **Comment.** Section 225 continues former Fish and Game Code Section 17 without substantive
18 change.

19 **§ 230. “Bag limit”**

20 230. “Bag limit” means the maximum limit, in number or amount, of birds,
21 mammals, fish, reptiles, or amphibians that may lawfully be taken by any one
22 person during a specified period of time.

23 **Comment.** Section 230 continues former Fish and Game Code Section 18 without substantive
24 change.

25 **§ 235. “Bird”**

26 235. “Bird” means a wild bird or part of a wild bird.

27 **Comment.** Section 235 continues former Fish and Game Code Section 22 without substantive
28 change.

29 The reference to a “part” of an animal in this section is superfluous. See Section 95 (reference
30 to animal generally includes part of animal). It is retained solely for clarity, and is not intended to
31 affect the meaning of any other provision of this code that includes or omits a reference to a
32 “part” of an animal.

33 **§ 245. “Buy”**

34 245. “Buy” includes an offer to buy, purchase, barter, exchange, or trade.

35 **Comment.** Section 245 continues former Fish and Game Code Section 24 without substantive
36 change.

37 **§ 250. “Chumming”**

38 250. “Chumming” means the placing in the water of fish, or other material upon
39 which fish feed, for the purpose of attracting fish to a particular area in order that
40 they may be taken.

1 **Comment.** Section 250 continues former Fish and Game Code Section 27 without substantive
2 change.

3 **§ 255. “Closed season”**

4 255. “Closed season” means that period of time during which the taking of
5 birds, mammals, fish, amphibians, or reptiles is prohibited.

6 **Comment.** Section 255 continues former Fish and Game Code Section 29 without substantive
7 change.

8 **§ 280. “Commission”**

9 280. “Commission” means the Fish and Game Commission.

10 **Comment.** Section 280 continues the first clause of former Fish and Game Code Section 30
11 without substantive change.

12 **§ 285. “Commissioner”**

13 310. “Commissioner” means a member of the Fish and Game Commission.

14 **Comment.** Section 285 continues the second clause of former Fish and Game Code Section 30
15 without substantive change.

16 **§ 290. “County”**

17 290. “County” includes city and county.

18 **Comment.** Section 290 continues former Fish and Game Code Section 32 without substantive
19 change.

20 **§ 295. “Credible science”**

21 295. “Credible science” means the best available scientific information that is
22 not overly prescriptive due to the dynamic nature of science, and includes the
23 evaluation principles of relevance, inclusiveness, objectivity, transparency,
24 timeliness, verification, validation, and peer review of information as appropriate.
25 Credible science also recognizes the need for adaptive management, as scientific
26 knowledge evolves.

27 **Comment.** Section 295 continues former Fish and Game Code Section 33 without substantive
28 change.

29 **§ 300. “Day”**

30 300. “Day” means calendar day.

31 **Comment.** Section 300 continues the first clause of former Fish and Game Code Section 35
32 without substantive change.

33 **§ 305. “Department”**

34 305. “Department” means the Department of Fish and Wildlife.

35 **Comment.** Section 305 continues former Fish and Game Code Section 37 without substantive
36 change.

1 **§ 310. “Director”**

2 310. “Director” means the Director of Fish and Wildlife.

3 **Comment.** Section 310 continues former Fish and Game Code Section 39 without substantive
4 change.

5 **§ 315. “District”**

6 315. “District” means fish and wildlife district.

7 **Comment.** Section 315 continues former Fish and Game Code Section 41 without substantive
8 change.

9 **§ 320. “Ecosystem-based management”**

10 320. “Ecosystem-based management” means an environmental management
11 approach relying on credible science that recognizes the full array of interactions
12 within an ecosystem, including humans, rather than considering single issues,
13 species, or ecosystem services in isolation.

14 **Comment.** Section 320 continues former Fish and Game Code Section 43 without substantive
15 change.

16 **§ 325. “Exotic nonresident game bird”**

17 325. “Exotic nonresident game bird” means a bird of the order Galliformes that
18 is not established as a wild resident population in this state.

19 **Comment.** Section 325 continues former Fish and Game Code Section 3514 without
20 substantive change.

21 **§ 330. “Finfish”**

22 330. “Finfish” means any species of bony fish or cartilaginous fish.

23 **Comment.** Section 330 is drawn from Section 1.46 of Title 14 of the California Code of
24 Regulations. It is added for drafting convenience.

25 **§ 335. “Fish”**

26 335. “Fish” means a wild fish, mollusk, crustacean, invertebrate, amphibian, or
27 part, spawn, or ovum of any of those animals.

28 **Comment.** Section 335 continues former Fish and Game Code Section 45 without substantive
29 change.

30 The reference to a “part” of an animal in this section is superfluous. See Section 95 (reference
31 to animal generally includes part of animal). It is retained solely for clarity, and is not intended to
32 affect the meaning of any other provision of this code that includes or omits a reference to a
33 “part” of an animal.

34 **§ 340. “Fully protected amphibian”**

35 340. “Fully protected amphibian” means any of the following amphibians:

36 (a) Santa Cruz long-toed salamander (*Ambystoma macrodactylum croceum*).

37 (b) Limestone salamander (*Hydromantes brunus*).

38 (c) Black toad (*Bufo boreas exsul*).

Comment. Section 340 continues former Fish and Game Code Section 5050(b)(3)-(5) without substantive change.

§ 345. “Fully protected bird”

345. “Fully protected bird” means any of the following birds:

- (a) American peregrine falcon (*Falco peregrinus anatum*).
- (b) Brown pelican.
- (c) California black rail (*Laterallus jamaicensis coturniculus*).
- (d) California clapper rail (*Rallus longirostris obsoletus*).
- (e) California condor (*Gymnogyps californianus*).
- (f) California least tern (*Sterna albifrons browni*).
- (g) Golden eagle.
- (h) Greater sandhill crane (*Grus canadensis tabida*).
- (i) Light-footed clapper rail (*Rallus longirostris levipes*).
- (j) Southern bald eagle (*Haliaeetus leucocephalus leucocephalus*).
- (k) Trumpeter swan (*Cygnus buccinator*).
- (l) White-tailed kite (*Elanus leucurus*).
- (m) Yuma clapper rail (*Rallus longirostris yumanensis*).

Comment. Section 345 continues former Fish and Game Code Section 3511(b) without substantive change.

§ 350. “Fully protected fish”

350. “Fully protected fish” means any of the following fish:

- (a) Colorado River squawfish (*Ptychocheilus lucius*).
- (b) Humpback sucker (*Xyrauchen texanus*).
- (c) Lost River sucker (*Deltistes luxatus* and *Catostomus luxatus*).
- (d) Modoc sucker (*Catostomus microps*).
- (e) Mohave chub (*Gila mohavensis*).
- (f) Owens pupfish (*Cyprinodon radiosus*).
- (g) Rough sculpin (*Cottus asperimus*).
- (h) Shortnose sucker (*Chasmistes brevirostris*).
- (i) Thicktail chub (*Gila crassicauda*).
- (j) Unarmored threespine stickleback (*Gasterosteus aculeatus williamsoni*).

Comment. Section 350 continues former Fish and Game Code Section 5515(b) without substantive change.

 **Note.** Proposed Section 350 would continue Section 5515(b), which was amended by 2018 Cal. Stat. ch. 586. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 355. “Fully protected mammal”

355. “Fully protected mammal” means any of the following mammals:

- (a) Bighorn sheep (*Ovis canadensis*), except Nelson bighorn sheep (subspecies *Ovis canadensis nelsoni*) as provided by subdivision (b) of Section 35900
- (b) Guadalupe fur seal (*Arctocephalus townsendi*).

- 1 (c) Morro Bay kangaroo rat (*Dipodomys heermanni morroensis*).
- 2 (d) Northern elephant seal (*Mirounga angustirostris*).
- 3 (e) Pacific right whale (*Eubalaena sieboldi*).
- 4 (f) Ring-tailed cat (genus *Bassariscus*).
- 5 (g) Salt-marsh harvest mouse (*Reithrodontomys raviventris*).
- 6 (h) Southern sea otter (*Enhydra lutris nereis*).
- 7 (i) Wolverine (*Gulo luscus*).

8 **Comment.** Section 355 continues former Fish and Game Code Section 4700(b) without
9 substantive change.

10 **§ 360. “Fully protected reptile”**

11 360. “Fully protected reptile” means either of the following reptiles:

- 12 (a) Blunt-nosed leopard lizard (*Gambelia sila*).
- 13 (b) San Francisco garter snake (*Thamnophis sirtalis tetrataenia*).

14 **Comment.** Section 360 continues former Fish and Game Code Section 5050(b)(1)-(2) without
15 substantive change.

16  **Note.** Proposed Section 360 would continue Section 5050(b)(1)-(2), which was amended by
17 2018 Cal. Stat. ch. 224 as an urgency measure.

18 **§ 365. “Fur-bearing mammal”**

19 365. “Fur-bearing mammal” means any of the following mammals:

- 20 (a) Badger.
- 21 (b) Beaver.
- 22 (c) Fisher.
- 23 (d) Gray fox.
- 24 (e) Kit fox.
- 25 (f) Mink.
- 26 (g) Muskrat.
- 27 (h) Pine marten.
- 28 (i) Raccoon.
- 29 (j) Red fox.
- 30 (k) River otter.

31 **Comment.** Section 365 continues former Fish and Game Code Section 4000 without
32 substantive change.

33 **§ 370. “Game bird”**

34 370. “Game bird” means a resident game bird or a migratory game bird.

35 **Comment.** Section 370 continues former Fish and Game Code Section 3500(c) without
36 substantive change.

37 **§ 375. “Game mammal”**

38 375. (a) “Game mammal” means any of the following mammals:

- 39 (1) Black and brown or cinnamon bear (genus *Euarctos*).

- 1 (2) Deer (genus *Odocoileus*).
2 (3) Elk (genus *Cervus*).
3 (4) Jackrabbit and varying hare (genus *Lepus*), cottontails, brush rabbits, pigmy
4 rabbits (genus *Sylvilagus*).
5 (6) Mountain lion (genus *Felis*).
6 (7) Prong-horned antelope (genus *Antilocapra*).
7 (8) Tree squirrel (genus *Sciurus* and *Tamiasciurus*).
8 (9) Wild pig, including feral pig and European wild boar (genus *Sus*).
9 (b) Nelson bighorn sheep (subspecies *Ovis canadensis nelsoni*) are game
10 mammals only for the purposes of sport hunting described in subdivision (b) of
11 Section 35900.
12 (c) Notwithstanding subdivision (a) or any other provision of this code, the
13 mountain lion (genus *Felis*) shall not be listed as, or considered to be, a game
14 mammal by the department or the commission.
15 (d) Section 1025 does not apply to subdivision (b). Neither the commission nor
16 the department shall adopt any regulation that conflicts with or supersedes this
17 subdivision, or subdivision (c).
18 **Comment.** Subdivisions (a) and (b) of Section 375 continue former Fish and Game Code
19 Section 3950 without substantive change.
20 Subdivisions (c) and (d) restate former Fish and Game Code Section 3950.1 without
21 substantive change.

22  **Note.** Existing Fish and Game Code Section 3950.1 (which would be continued by proposed
23 Section 375(b) and (c)) was added to the existing code in 1990 by an initiative statute,
24 Proposition 117. The Commission believes that the nonsubstantive continuation of that provision
25 in proposed Section 375 would not be an impermissible amendment. See discussion of initiative
26 statutes *supra* at notes 20-22 and associated text.

27 **§ 380. “Guide boat”**

28 380. “Guide boat” means a boat or vessel under 25 feet in length, which is used
29 by a guide, who is licensed under Title 3 (commencing with Section 8800) of Part
30 1 of Division 6, in inland waters for any of the following purposes:

- 31 (1) For the business of packing or guiding.
32 (2) For compensation, to assist another person in taking or attempting to take
33 any fish or amphibian.
34 (3) For compensation, to assist another person in locating any bird or mammal.

35 **Comment.** Section 380 continues former Fish and Game Code Section 46 without substantive
36 change.

37 **§ 385. “Hook” and related terms**

38 385. “Hook” or “fishhook” means an implement to catch or hold fish or
39 amphibians. “Single hook” means any hook with one point and with or without a
40 barb; “double hook” means any hook with two points and with or without barbs;
41 “treble or triple hook” means any hook with three points and with or without

1 barbs. “Snag” or “gaff” hooks are hooks with or without handles used to take fish
2 in such manner that the fish does not take the hook voluntarily in its mouth.

3 **Comment.** Section 385 continues former Fish and Game Code Section 48 without substantive
4 change.

5 **§ 390. “Kelp”**

6 390. “Kelp” means kelp or other marine aquatic plants and the seeds thereof.

7 **Comment.** Section 390 continues former Fish and Game Code Section 51 without substantive
8 change.

9 **§ 395. “Limited entry fishery”**

10 395. “Limited entry fishery” means a fishery in which the number of persons
11 who may participate or the number of vessels that may be used in taking a
12 specified species of fish is limited by statute or regulation.

13 **Comment.** Section 395 continues former Fish and Game Code Section 8100 without
14 substantive change.

15 **§ 400. “Mammal”**

16 400. “Mammal” means a wild or feral mammal or part of a wild or feral
17 mammal, but not a wild, feral, or undomesticated burro.

18 **Comment.** Section 400 continues former Fish and Game Code Section 54 without substantive
19 change.

20 The reference to a “part” of an animal in this section is superfluous. See Section 95 (reference
21 to animal generally includes part of animal). It is retained solely for clarity, and is not intended to
22 affect the meaning of any other provision of this code that includes or omits a reference to a
23 “part” of an animal.

24 **§ 405. “Marine finfish aquaculture”**

25 405. “Marine finfish aquaculture” means the propagation, cultivation, or
26 maintenance of finfish species in the waters of the Pacific Ocean that are regulated
27 by this state.

28 **Comment.** Section 405 continues former Fish and Game Code Section 54.5 without
29 substantive change.

30 **§ 410. “Migratory game bird”**

31 410. “Migratory game bird” means any of the following birds:

32 (a) Band-tailed pigeon.

33 (b) Coot.

34 (c) Duck.

35 (d) Gallinule.

36 (e) Goose.

37 (f) Jacksnipe.

38 (g) Western mourning dove.

39 (h) White-winged dove.

1 **Comment.** Section 410 continues former Fish and Game Code Section 3500(b) without
2 substantive change.

3 **§ 415. “Mile”**

4 415. “Mile” means either a statute mile (5,280 feet) or a nautical mile (6,077
5 feet) depending on the application. Statute miles shall be the unit of measurement
6 for all land masses, rivers, streams, creeks, and inland bodies of water. Nautical
7 miles shall be the unit of measurement for all marine waters.

8 **Comment.** Section 415 continues former Section 55 without substantive change.

9 **§ 420. “Native California trout”**

10 420. “Native California trout” means any of the following fish:

- 11 (a) California golden trout.
- 12 (b) Coastal cutthroat trout.
- 13 (c) Coastal rainbow trout/steelhead.
- 14 (d) Eagle Lake rainbow trout.
- 15 (e) Goose Lake redband trout.
- 16 (f) Kern River rainbow trout.
- 17 (g) Lahontan cutthroat trout.
- 18 (h) Little Kern golden trout.
- 19 (i) McCloud River redband trout.
- 20 (j) Paiute cutthroat trout.
- 21 (k) Warner Valley redband trout.

22 **Comment.** Section 420 continues former Fish and Game Code Section 7261 without
23 substantive change.

24 **§ 425. “Net”**

25 425. “Net” means any gear made of any kind of twine, thread, string, rope, wire,
26 wood, or other materials used for the gilling, entangling, trapping, or impounding
27 of fish.

28 **Comment.** Section 425 continues former Fish and Game Code Section 56 without substantive
29 change.

30 **§ 430. “Nongame bird”**

31 430. “Nongame bird” means a bird occurring naturally in California that is not a
32 game bird or fully protected bird.

33 **Comment.** Section 430 continues the first sentence of former Fish and Game Code Section
34 3800(a) without substantive change.

35 **§ 435. “Nongame mammal”**

36 435. “Nongame mammal” means any of the following mammals:

- 37 (a) A mammal occurring naturally in California that is not a game mammal,
38 fully protected mammal, or fur-bearing mammal.

(b) A house cat (*Felis domesticus*) found within the limits of a fish and game refuge, except if in the residence of its owner or on the grounds adjacent to that residence.

Comment. Subdivision (a) of Section 435 continues the first sentence of former Fish and Game Code Section 4150 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 4151 without substantive change.

§ 440. “Nonresident”

440. “Nonresident” means a person who is not a resident as defined in Section 485.

Comment. Section 440 restates former Fish and Game Code Section 57 to reconcile the definition of the term “nonresident” with the definition of the term “resident” in former Fish and Game Code Section 70. See also Section 660 (“resident”).

 **Note.** Proposed Section 440 would restate existing Fish and Game Code Section 57 to eliminate an overlap between the definition of “nonresident” in that section and the definition of “resident” in existing Section 70 (which would be continued by proposed Section 660).

The Commission requests public comment on whether the revision would have any problematic effect.

§ 445. “Oath”

445. “Oath” includes affirmation.

Comment. Section 445 continues former Fish and Game Code Section 60 without substantive change.

§ 450. “Open season” and “season”

450. “Open season” means that period of time during which the taking of birds, mammals, fish, reptiles, or amphibians is allowed as prescribed in this code and regulations adopted by the commission. If used to define the period of time during which take is allowed, “season” means “open season.”

Comment. Section 450 continues former Fish and Game Code Section 62 without substantive change.

§ 455. “Person”

455. “Person” means any natural person or any partnership, corporation, limited liability company, trust, or other type of association.

Comment. Section 455 continues former Fish and Game Code Section 67 without substantive change.

§ 460. “Possession limit”

460. “Possession limit” means the maximum, in number or amount, of birds, mammals, fish, reptiles, or amphibians that may be lawfully possessed by one person.

Comment. Section 460 continues former Fish and Game Code Section 19 without substantive change.

1 **§ 465. “Project”**

2 465. For the purposes of this code, unless the context otherwise requires,
3 “project” has the same meaning as defined in Section 21065 of the Public
4 Resources Code.

5 **Comment.** Section 465 continues the definition of “project” in former Fish and Game Code
6 Section 711.2(a) without substantive change.

7 **§ 470. “Purchase”**

8 470. “Purchase” means “buy” as defined in Section 245.

9 **Comment.** Section 470 continues former Fish and Game Code Section 68 without substantive
10 change.

11 **§ 475. “Raw fur”**

12 475. “Raw fur” means any fur, pelt, or skin that has not been tanned or cured,
13 except that salt-cured or sun-cured pelts are raw furs.

14 **Comment.** Section 475 continues the second sentence of former Fish and Game Code Section
15 4005(a) without substantive change.

16 **§ 480. “Recycled water” or “reclaimed water”**

17 480. “Recycled water” or “reclaimed water” has the same meaning as “recycled
18 water” as defined in subdivision (n) of Section 13050 of the Water Code.

19 **Comment.** Section 480 continues former Fish and Game Code Section 89 without substantive
20 change.

21 **§ 485. “Resident”**

22 485. “Resident” means any person who has resided continuously in the State of
23 California for six months or more immediately prior to the date of application for a
24 license or permit, any person on active military duty with the Armed Forces of the
25 United States or auxiliary branch thereof, or any person enrolled in the Job Corps
26 established pursuant to Section 2883 of Title 29 of the United States Code.

27 **Comment.** Section 485 continues former Section 70 without substantive change.

28 **§ 490. “Resident game bird”**

29 490. “Resident game bird” means any of the following birds:

- 30 (a) California quail and varieties thereof.
- 31 (b) Dove of the genus *Streptopelia*, including, but not limited to, spotted dove,
32 ringed turtledove, and Eurasian collared-dove.
- 33 (c) Gambel’s or desert quail.
- 34 (d) Hungarian partridge.
- 35 (e) Mountain quail and varieties thereof.
- 36 (f) Red-legged partridge, including the chukar and other varieties thereof.
- 37 (g) Ring-necked pheasant and varieties thereof.
- 38 (h) Ruffed grouse.
- 39 (i) Sage hens or sage grouse.

1 (j) Sooty or blue grouse and varieties thereof.

2 (k) Wild turkey.

3 **Comment.** Section 490 continues former Fish and Game Code Section 3500(a) without
4 substantive change.

5 **§ 500. “Sell”**

6 500. “Sell” includes offer or possess for sale, barter, exchange, or trade.

7 **Comment.** Section 500 continues former Fish and Game Code Section 75 without substantive
8 change.

9 **§ 505. “Signature” or “subscription”**

10 505. “Signature” or “subscription” includes mark when the signer or subscriber
11 cannot write, such signer’s or subscriber’s name being written near the mark by a
12 witness who writes his own name near the signer’s or subscriber’s name; but a
13 signature or subscription by mark can be acknowledged or can serve as a signature
14 or subscription to a sworn statement only when two witnesses also sign their own
15 names.

16 **Comment.** Section 505 continues former Fish and Game Code Section 81 without substantive
17 change.

18 **§ 510. “Slurp gun”**

19 510. “Slurp gun” means a self-contained, hand-held device used to capture fish
20 by rapidly drawing water containing fish into a closed chamber.

21 **Comment.** Section 510 continues former Fish and Game Code Section 82 without substantive
22 change.

23 **§ 515. “Spiny lobster”**

24 515. “Spiny lobster” refers to the species *Panulirus interruptus*.

25 **Comment.** Section 515 continues former Fish and Game Code Section 8250 without
26 substantive change.

27 **§ 520. “Spouse”**

28 520. “Spouse” includes “registered domestic partner,” as required by Section
29 297.5 of the Family Code.

30 **Comment.** Section 520 continues former Fish and Game Code Section 9.2 without substantive
31 change.

32 **§ 525. “State”**

33 525. “State” means the State of California, unless applied to the different parts
34 of the United States. In the latter case, it includes the District of Columbia and the
35 territories.

36 **Comment.** Section 525 continues former Fish and Game Code Section 83 without substantive
37 change.

1 **§ 530. “State waters”**

2 530. “State waters” means “waters of the state,” as defined in Section 550.

3 **Comment.** Section 530 continues a part of former Fish and Game Code Section 89.1 without
4 substantive change.

5 **§ 535. “Take”**

6 535. “Take” means hunt, pursue, catch, capture, or kill, or attempt to hunt,
7 pursue, catch, capture, or kill.

8 **Comment.** Section 535 continues former Fish and Game Code Section 86 without substantive
9 change.

10 **§ 540. “Transport”**

11 540. “Transport” includes offer or receive for transportation.

12 **Comment.** Section 540 continues former Fish and Game Code Section 88 without substantive
13 change.

14 **§ 545. “Upland game bird”**

15 545. “Upland game bird” means any of the following birds:

16 (a) Band-tailed pigeon.

17 (b) California quail and varieties thereof.

18 (c) Dove of the genus *Streptopelia*, including, but not limited to, spotted dove,
19 ringed turtledove, and Eurasian collared dove.

20 (d) Gambel’s or desert quail.

21 (e) Hungarian partridge.

22 (f) Jacksnipe.

23 (g) Mountain quail and varieties thereof.

24 (h) Red-legged partridge including the chukar and other varieties.

25 (i) Ring-necked pheasant and varieties thereof.

26 (j) Ruffed grouse.

27 (k) Sage hen or sage grouse.

28 (l) Sooty or blue grouse.

29 (m) Western mourning dove.

30 (n) White-tailed ptarmigan.

31 (o) White-winged dove.

32 (p) Wild turkey.

33 **Comment.** Section 545 continues former Fish and Game Code Section 3683 without
34 substantive change.

35 **Notes.** (1) Existing Fish and Game Code Section 3683 separately lists the upland game birds
36 that are resident game birds, and those that are migratory game birds. Proposed Section 545
37 would list all upland game birds without indicating whether a listed bird was a resident or
38 migratory game bird.

39 **The Commission invites comment on whether that revision is appropriate.**

(2) Existing Fish and Game Code Section 3683(a)(8) identifies a white-tailed ptarmigan as a resident game bird that is also an upland game bird. However, existing Section 3500, which identifies resident game birds, does not list any ptarmigan as a resident game bird.

The Commission invites comment on this apparent discrepancy, and the proper classification of the white-tailed ptarmigan.

§ 550. “Waters of the state,” “waters of this state”

550. “Waters of the state” or “waters of this state” have the same meaning as “waters of the state” as defined in subdivision (e) of Section 13050 of the Water Code.

Comment. Section 550 continues a part of former Fish and Game Code Section 89.1 without substantive change. See also Section 530 (“state waters”).

§ 555. “Week”

555. “Week” means calendar week.

Comment. Section 555 continues the second clause of former Fish and Game Code Section 35 without substantive change.

§ 560. “Wildlife”

560. “Wildlife” means and includes all wild animals, birds, plants, fish, amphibians, reptiles, and related ecological communities, including the habitat upon which the wildlife depends for its continued viability.

Comment. Section 560 continues former Fish and Game Code Section 89.5 without substantive change.

TITLE 2. MARINE LIFE DEFINITIONS

§ 600. Application of definitions

600. The definitions in this chapter govern the construction of the following provisions, and all regulations adopted pursuant to those provisions:

(a) Title 6 (commencing with Section 4850) of Part 4 of Division 3

(b) Part 4 (commencing with Section 11500) and Part 6 (commencing with Section 14200) of Division 6.

(c) Title 4 commencing with Section (25700) of Part 3 of Division 7.

(d) Title 2 (commencing with Section 38200) of Part 3,

Part 12 (commencing with Section 39800), Part 13 (commencing with Section 40250), and Part 14 (commencing with Section 40550) of Division 10.

(i) Chapter 2 (commencing with Section 41350), Chapter 4 (commencing with Section 41600), and Chapter 5 (commencing with Section 41650) of Title 2 of Part 17 of Division 10.

(e) Part 4 (commencing with Section 45650), Part 6 (commencing with Section 46500), Part 9 (commencing with Section 49300), Part 13 (commencing with Section 50450), Part 14 (commencing with Section 50650), Part 15 (commencing

with Section 50850) and Part 16 (commencing with Section 51300) of Division 11.

(f) Section 54525.

(g) Title 2 (67000) of Part 3 of Division 17.

Comment. Section 600 continues former Fish and Game Code Section 90 without substantive change.

Notes. (1) Proposed Section 600 incorporates the revision of Section 90 made by 2018 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

(2) Existing Section 90 specifically prescribes the application of the definitions in existing Sections 90.1 through 99. In doing so, Section 90 provides in part that the definitions apply to “Division 6 (commencing with Section 5500).” That very large division spans hundreds of sections — Sections 5500 through 9101— all under the very general heading of “Fish.” In the proposed law, Division 6 was broken up and distributed to multiple locations in the proposed Fish and Wildlife Code. That makes it difficult to continue the existing cross-reference to Division 6 without some modification. It could be done, but would result in a much longer and more complicated cross-reference than the one set out in Section 600. Exact continuation of the existing cross-reference would also be problematic, because it would expressly apply the definitions to provisions that do not use the defined terms or that use the terms in connection with freshwater fish and fisheries (contrary to their intended application to marine life).

The cross-reference in proposed Section 600 was assembled by searching for every use of the defined terms in existing Division 6 and creating targeted cross-references to the provisions that use the terms. For the most part, the cross-references are to identifiable blocks of law that contain the relevant provisions, rather than to a long list of individual sections. That approach increases ease of use and it also anticipates the possibility that the defined terms could be used in related provisions in the future.

The cross-references do not include provisions that use the defined terms but that appear to apply to freshwater, rather than marine life (i.e., existing Sections 6401, 6440-6453, 7145, 7260, 7361, 8491, 8492).

The Commission invites comment on the approach taken in proposed Section 600. In particular, it would be helpful to know whether the cross-references could be further simplified. For example, could proposed Sections 600(d) and (e) simply refer to Divisions 10 (Fish) and 11 (Invertebrates) respectively?

§ 605. “Adaptive management”

605. “Adaptive management,” in regard to a marine fishery, means a scientific policy that seeks to improve management of biological resources, particularly in areas of scientific uncertainty, by viewing program actions as tools for learning. Actions shall be designed so that even if they fail, they will provide useful information for future actions. Monitoring and evaluation shall be emphasized so that the interaction of different elements within the system can be better understood.

Comment. Section 605 continues former Fish and Game Code Section 90.1 without substantive change.

§ 610. “Bycatch”

610. “Bycatch” means fish or other marine life that are taken in a fishery but which are not the target of the fishery. “Bycatch” includes discards.

1 **Comment.** Section 610 continues former Fish and Game Code Section 90.5 without
2 substantive change.

3 **§ 615. “Depressed”**

4 615. “Depressed,” with regard to a marine fishery, means the condition of a
5 fishery for which the best available scientific information, and other relevant
6 information that the commission or department possesses or receives, indicates a
7 declining population trend has occurred over a period of time appropriate to that
8 fishery. With regard to fisheries for which management is based on maximum
9 sustainable yield, or in which a natural mortality rate is available, “depressed”
10 means the condition of a fishery that exhibits declining fish population abundance
11 levels below those consistent with maximum sustainable yield.

12 **Comment.** Section 615 continues former Fish and Game Code Section 90.7 without
13 substantive change.

14 **§ 620. “Discards”**

15 620. “Discards” means fish that are taken in a fishery but are not retained
16 because they are of an undesirable species, size, sex, or quality, or because they
17 are required by law not to be retained.

18 **Comment.** Section 620 continues former Fish and Game Code Section 91 without substantive
19 change.

20 **§ 625. “Essential fishery information”**

21 625. “Essential fishery information,” with regard to a marine fishery, means
22 information about fish life history and habitat requirements; the status and trends
23 of fish populations, fishing effort, and catch levels; fishery effects on fish age
24 structure and on other marine living resources and users, and any other
25 information related to the biology of a fish species or to taking in the fishery that is
26 necessary to permit fisheries to be managed according to the requirements of this
27 code.

28 **Comment.** Section 625 continues former Fish and Game Code Section 93 without substantive
29 change.

30 **§ 630. “Fishery”**

31 630. “Fishery” means both of the following:

32 (a) One or more populations of marine fish or marine plants that may be treated
33 as a unit for purposes of conservation and management and that are identified on
34 the basis of geographical, scientific, technical, recreational, and economic
35 characteristics.

36 (b) Fishing for, harvesting, or catching the populations described in subdivision
37 (a).

38 **Comment.** Section 630 continues former Fish and Game Code Section 94 without substantive
39 change.

1 **§ 635. “Marine living resources”**

2 635. “Marine living resources” includes all wild mammals, birds, reptiles, fish,
3 and plants that normally occur in or are associated with salt water, and the marine
4 habitats upon which these animals and plants depend for their continued viability.

5 **Comment.** Section 635 continues former Fish and Game Code Section 96 without substantive
6 change.

7 **§ 640. “Maximum sustainable yield”**

8 640. “Maximum sustainable yield” in a marine fishery means the highest
9 average yield over time that does not result in a continuing reduction in stock
10 abundance, taking into account fluctuations in abundance and environmental
11 variability.

12 **Comment.** Section 640 continues former Fish and Game Code Section 96.5 without
13 substantive change.

14 **§ 645. “Optimum yield”**

15 645. “Optimum yield,” with regard to a marine fishery, means the amount of
16 fish taken in a fishery that does all of the following:

17 (a) Provides the greatest overall benefit to the people of California, particularly
18 with respect to food production and recreational opportunities, and takes into
19 account the protection of marine ecosystems.

20 (b) Is the maximum sustainable yield of the fishery, as reduced by relevant
21 economic, social, or ecological factors.

22 (c) In the case of an overfished fishery, provides for rebuilding to a level
23 consistent with producing maximum sustainable yield in the fishery.

24 **Comment.** Section 645 continues former Fish and Game Code Section 97 without substantive
25 change.

26 **§ 650. “Overfished”**

27 650. “Overfished,” with regard to a marine fishery, means both of the following:

28 (a) A depressed fishery.

29 (b) A reduction of take in the fishery is the principal means for rebuilding the
30 population.

31 **Comment.** Section 650 continues former Fish and Game Code Section 97.5 without
32 substantive change.

33 **§ 655. “Overfishing”**

34 655. “Overfishing” means a rate or level of taking that the best available
35 scientific information, and other relevant information that the commission or
36 department possesses or receives, indicates is not sustainable or that jeopardizes
37 the capacity of a marine fishery to produce the maximum sustainable yield on a
38 continuing basis.

39 **Comment.** Section 655 continues former Fish and Game Code Section 98 without substantive
40 change.

1 **§ 660. “Participants”**

2 660. “Participants” in regard to a fishery means the sportfishing, commercial
3 fishing, and fish receiving and processing sectors of the fishery.

4 **Comment.** Section 660 continues former Fish and Game Code Section 98.2 without
5 substantive change.

6 **§ 665. “Population”**

7 665. “Population” means a species, subspecies, geographical grouping, or other
8 category of fish capable of management as a unit.

9 **Comment.** Section 665 continues a part of former Fish and Game Code Section 98.5 without
10 substantive change.

11 **§ 670. “Restricted access”**

12 670. “Restricted access,” with regard to a marine fishery, means a fishery in
13 which the number of persons who may participate, or the number of vessels that
14 may be used in taking a specified species of fish, or the catch allocated to each
15 fishery participant, is limited by statute or regulation.

16 **Comment.** Section 670 continues former Fish and Game Code Section 99 without substantive
17 change.

18 **§ 675. “Stock”**

19 675. “Stock” means “population,” as defined in Section 665.

20 **Comment.** Section 675 continues a part of former Fish and Game Code Section 98.5 without
21 substantive change.

22 **§ 680. “Sustainable,” “sustainable use,” and “sustainability”**

23 680. “Sustainable,” “sustainable use,” and “sustainability,” with regard to a
24 marine fishery, mean both of the following:

25 (a) Continuous replacement of resources, taking into account fluctuations in
26 abundance and environmental variability.

27 (b) Securing the fullest possible range of present and long-term economic,
28 social, and ecological benefits, maintaining biological diversity, and, in the case of
29 fishery management based on maximum sustainable yield, taking in a fishery that
30 does not exceed optimum yield.

31 **Comment.** Section 680 continues former Fish and Game Code Section 99.5 without
32 substantive change.

DIVISION 2. ADMINISTRATION

PART 1. FISH AND GAME COMMISSION

TITLE 1. ORGANIZATION

§ 900. Fish and Game Commission

900. There is in the Resources Agency the Fish and Game Commission created by Section 20 of Article IV of the Constitution.

Comment. Section 900 continues former Fish and Game Code Section 101 without substantive change.

§ 905. Findings and declarations

905. (a) The Legislature finds and declares that the scope and responsibilities of the commission have significantly expanded over the years as the size and diversity of California's population have increased, and as the scientific knowledge of the habitat conservation and ecosystem-based management needs of wildlife has expanded. The members of the commission are expected to make complex public policy and biological decisions on behalf of the people of California. The commission is created by the California Constitution, which does not include any criteria or qualifications for selection and appointment of commissioners.

(b) It is therefore the intent of the Legislature to encourage the Governor and the Senate Committee on Rules to consider the following minimum qualifications in selecting, appointing, and confirming commissioners to serve on the commission:

(1) The degree to which the appointee will enhance the diversity of background and geographic representation of the commission.

(2) The appointee's demonstrated interest and background in, and familiarity with, wildlife and natural resources management programs at the state or federal level.

(3) The appointee's previous experience in public policy decisionmaking, including government processes involving public participation.

(4) The appointee's commitment to prepare for and attend meetings and subcommittee meetings of the commission and to comply with all applicable state conflict-of-interest laws.

(5) The extent of the appointee's exposure to and experience with the basic science underpinning the management of living natural resources.

(6) The appointee's diversity of knowledge of natural resource issues and related scientific disciplines, including, but not limited to, outdoor recreation.

Comment. Section 905 continues former Fish and Game Code Section 101.5 without substantive change.

1 **§ 910. Officers**

2 910. (a) The commissioners shall annually elect one of their number as president
3 and one as vice president, by a concurrent vote of at least three commissioners.

4 (b) The president or vice president may be removed from the position of
5 president or vice president by a vote, at any time, of at least three commissioners.

6 (c) In the event of a vacancy in either the position of president or vice president,
7 the commission shall fill that vacancy at the next regularly scheduled meeting of
8 the commission. The elected successor president or vice president shall serve for
9 the unexpired term of the predecessor until the annual election pursuant to
10 subdivision (a).

11 (d) The commission may not adopt or enforce a policy or a regulation that
12 provides for the president and vice president to be chosen by seniority nor may the
13 commission adopt or enforce any other policy or regulation that would make a
14 commissioner ineligible to be elected as president or vice president of the
15 commission.

16 **Comment.** Section 910 continues former Fish and Game Code Section 102 without substantive
17 change.

18 **§ 915. Compensation and expenses**

19 915. (a) Each of the commissioners shall receive one hundred dollars (\$100) for
20 each day of actual service performed in carrying out his or her official duties
21 pursuant to law, but the amount of this compensation shall not exceed for any one
22 commissioner the sum of five hundred dollars (\$500) for any one calendar month.
23 In addition to this compensation, the commissioners shall receive their actual and
24 necessary expenses incurred in the performance of their duties.

25 (b) The compensation and expenses provided in this section shall be paid out of
26 the Fish and Game Preservation Fund.

27 **Comment.** Section 915 continues former Fish and Game Code Section 103 without substantive
28 change.

29 **§ 920. Meetings**

30 920. (a) The commission shall hold no fewer than eight regular meetings per
31 calendar year, if the commission has adequate funding for related travel, including
32 funding for department travel. The commission may also hold special meetings or
33 hearings to receive additional input from the department and the public.

34 (b) The commission shall announce the dates and locations of meetings for the
35 year by January 1 of that year, or 60 days prior to the first meeting, whichever
36 comes first. Meeting locations shall be accessible to the public and located
37 throughout the state. To the extent feasible, meetings shall be held in state
38 facilities. In setting the dates and locations for regular meetings, the commission
39 shall also consider the following factors:

40 (1) Recommendations of the department.

41 (2) Opening and closing dates of fishing and hunting seasons.

1 (3) The schedules of other state and federal regulatory agencies whose
2 regulations affect the management of fish and wildlife of this state.

3 (c) The commission shall cause the notice of the schedule for regular meetings,
4 and notice of any change in the date and location of a meeting, to be disseminated
5 to the public in a manner that will result in broad dissemination and that complies
6 with the Administrative Procedure Act (Chapter 3.5 (commencing with Section
7 11340) of Part 1 of Division 3 of Title 2 of the Government Code).

8 **Comment.** Section 920 continues former Fish and Game Code Section 110 without substantive
9 change.

10 **§ 925. Marine resources committee**

11 925. The commission shall form a marine resources committee from its
12 membership consisting of at least one commissioner. The committee shall report
13 to the commission from time to time on its activities and shall make
14 recommendations on all marine resource matters considered by the commission.
15 The committee or its designee shall, to the extent practicable, attend meetings of
16 the department staff, including meetings of the department staff with interested
17 parties, in which significant marine living resource management documents are
18 being developed.

19 **Comment.** Section 925 continues former Fish and Game Code Section 105 without substantive
20 change.

21 **§ 930. Wildlife resources committee**

22 930. The commission shall form a wildlife resources committee from its
23 membership consisting of at least one commissioner. The committee shall report
24 to the commission from time to time on its activities and shall make
25 recommendations on all nonmarine resource matters considered by the
26 commission. The committee or its designee shall, to the extent practicable, attend
27 meetings of the department staff, including meetings of the department staff with
28 interested parties, in which significant wildlife resource management documents
29 are being developed.

30 **Comment.** Section 930 continues former Fish and Game Code Section 106 without substantive
31 change.

32 **§ 935. Commission staff**

33 935. The commission may employ a staff, including an executive director, to
34 assist the commission in conducting its operations, but neither the commission nor
35 its staff shall have or be given any powers in relation to the administration of the
36 department.

37 **Comment.** Section 935 continues former Section 104 without substantive change.

1 **§ 940. Code of conduct**

2 940. The commission shall adopt a code of conduct that requires, at a minimum,
3 that a commissioner adhere to the following principles:

4 (a) A commissioner shall faithfully discharge the duties, responsibilities, and
5 quasi-judicial actions of the commission.

6 (b) A commissioner shall conduct his or her affairs in the public's best interest,
7 following principles of fundamental fairness and due process of law.

8 (c) A commissioner shall conduct his or her affairs in an open, objective, and
9 impartial manner, free of undue influence and the abuse of power and authority.

10 (d) A commissioner understands that California's wildlife and natural resources
11 programs require public awareness, understanding, and support of, and
12 participation and confidence in, the commission and its practices and procedures.

13 (e) A commissioner shall preserve the public's welfare and the integrity of the
14 commission, and act to maintain the public's trust in the commission and the
15 implementation of its regulations and policies.

16 (f) A commissioner shall not conduct himself or herself in a manner that reflects
17 discredit upon state laws or policies, regulations, and principles of the
18 commission.

19 (g) A commissioner shall not make, participate in making, or in any other way
20 attempt to use his or her official position to influence a commission decision in
21 which the member has a financial interest.

22 **Comment.** Section 940 continues former Fish and Game Code Section 107 without substantive
23 change.

24 **TITLE 2. POWERS AND DUTIES**

25 **CHAPTER 1. REGULATION OF TAKE AND POSSESSION GENERALLY**

26 **Article 1. Authority**

27 **§ 1000. General authority**

28 1000. (a) There is hereby delegated to the commission the power to regulate the
29 taking or possession of birds, mammals, fish, amphibians, and reptiles.

30 (b) No power is delegated to the commission by this section to regulate either of
31 the following:

32 (1) The taking, possessing, processing, or use of fish, amphibians, kelp, or other
33 aquatic plants for commercial purposes.

34 (2) The taking or possession of a spike buck or spotted fawn. "Spike buck"
35 means a male deer with unbranched antlers on both sides that are more than three
36 inches in length. "Spotted fawn" means a deer one year of age or less that has
37 spotted pelage.

1 (c) This section and any regulations adopted pursuant to this section have no
2 effect on any provision of this code or any regulation adopted pursuant to this code
3 that relates to a matter described in paragraph (1) of subdivision (b).

4 **Comment.** Section 1000 continues former Fish and Game Code Section 200 without
5 substantive change.

6 **§ 1005. Limitations on authority**

7 1005. Nothing in this article confers upon the commission any power to regulate
8 any natural resources or commercial or other activity connected therewith, except
9 as specifically provided.

10 **Comment.** Section 1005 continues former Fish and Game Code Section 201 without
11 substantive change.

12 **§ 1010. Birds and mammals**

13 1010. Any regulation of the commission adopted pursuant to this chapter
14 relating to resident game birds, game mammals and furbearing mammals may
15 apply to all or any areas, districts, or portions of those areas or districts, at the
16 discretion of the commission, and may do any or all of the following as to any or
17 all species or subspecies:

- 18 (a) Establish, extend, shorten, or abolish open seasons and closed seasons.
- 19 (b) Establish, change, or abolish bag limits and possession limits.
- 20 (c) Establish and change areas or territorial limits for their taking.
- 21 (d) Prescribe the manner and the means of taking.
- 22 (e) Establish, change, or abolish restrictions based upon sex, maturity, or other
23 physical distinctions.

24 **Comment.** Section 1010 continues former Fish and Game Code Section 203 without
25 substantive change.

26 **§ 1015. Fish, amphibians, and reptiles**

27 1015. Any regulation of the commission adopted pursuant to this chapter that
28 relates to fish, amphibians, and reptiles, may apply to all or any areas, districts, or
29 portion of those areas or districts, at the discretion of the commission, and may do
30 any or all of the following as to any or all species or subspecies:

- 31 (a) Establish, extend, shorten, or abolish open seasons and closed seasons.
- 32 (b) Establish, change, or abolish bag limits, possession limits, and size limits.
- 33 (c) Establish and change areas or territorial limits for their taking.
- 34 (d) Prescribe the manner and the means of taking.

35 **Comment.** Section 1015 continues former Fish and Game Code Section 205 without
36 substantive change.

37 **§ 1020. Factors to be considered**

38 1020. When adopting regulations pursuant to Section 1010, the commission
39 shall consider populations, habitat, food supplies, the welfare of individual
40 animals, and other pertinent facts and testimony.

1 **Comment.** Section 1020 continues former Fish and Game Code Section 203.1 without
2 substantive change.

3 **§ 1025. Regulation that supersedes statute**

4 1025. (a) Any regulation adopted pursuant to this chapter may supersede any
5 section of this code designated by number in the regulation, but shall do so only to
6 the extent specifically provided in the regulation. A regulation that is adopted
7 pursuant to this section shall be valid only to the extent that it makes additions,
8 deletions, or changes to this code under one or both of the following
9 circumstances:

10 (1) The regulation is necessary for the protection of fish, wildlife, and other
11 natural resources under the jurisdiction of the commission.

12 (2) The commission determines that an emergency exists or will exist unless the
13 action is taken. An emergency exists if there is an immediate threat to the public
14 health, safety, and welfare, or to the population or habitat of any species.

15 (b) A regulation that is adopted pursuant to this section shall be supported by
16 written findings adopted by the commission at the time of the adoption of the
17 regulation setting forth the basis for the regulation.

18 (c) A regulation adopted pursuant to this section shall remain in effect for not
19 more than 12 months from its effective date.

20 **Comment.** Section 1025 continues former Fish and Game Code Section 219 without
21 substantive change.

22 Article 2. Procedure

23 **§ 1100. Application of article**

24 1100. (a) Except as provided in subdivision (b), this article applies to a
25 commission regulation that governs the take or possession of any bird, mammal,
26 fish, amphibian, or reptile.

27 (b) This article does not apply to a regulation governed by subdivision (b) of
28 Section 1000, or by Section 1005.

29 (c) Except as expressly provided, this article does not supersede any other
30 applicable law that governs the adoption, amendment, or repeal of a regulation.

31 **Comment.** Section 1100 continues former Fish and Game Code Section 250 without
32 substantive change.

33 **§ 1105. General rulemaking procedure**

34 1105. (a) When adopting, amending, or repealing a regulation governed by this
35 article, the commission shall conduct the following steps at separate public
36 meetings:

37 (1) Approve the submission of a notice of proposed action to the Office of
38 Administrative Law.

1 (2) Consider public comment on the proposed action. The department shall
2 participate in this process by reviewing and responding to all public comment.

3 (3) Make a final decision on the proposed action.

4 (b) The meetings required by this section may be regular or special meetings.

5 (c) The meetings required by this section shall be duly noticed to the public in
6 accordance with subdivision (c) of Section 920, and with the Administrative
7 Procedure Act (Chapter 3.5 (commencing with Section 11340) of Part 1 of
8 Division 3 of Title 2 of the Government Code).

9 (d) Within 45 days after the commission makes a final decision to adopt, amend,
10 or repeal a regulation governed by this article, the department shall publish and
11 distribute the regulation to each county clerk, district attorney, and judge of the
12 superior court in the state.

13 **Comment.** Section 1105 continues former Fish and Game Code Section 255 without
14 substantive change.

15 **§ 1110. Distribution of regulations**

16 1110. (a) The commission and the department may do anything that is deemed
17 necessary and proper to publicize and distribute a regulation governed by this
18 article so that persons likely to be affected will be informed of them. The failure of
19 the commission to provide any notice of a regulation governed by this article,
20 beyond what is required by Chapter 3.5 (commencing with Section 11340) of Part
21 1 of Division 3 of Title 2 of the Government Code, does not impair the validity of
22 the regulation.

23 (b) Notwithstanding any other law, the commission and the department may
24 contract with private entities to print regulations governed by this article, and other
25 public information. The printing contract shall include criteria to ensure that the
26 public information provided in the publication is easy to reference, read, and
27 understand.

28 (c) Printing contracts authorized by this section for which no state funds are
29 expended are not subject to Chapter 2 (commencing with Section 10290) of Part 2
30 of Division 2 of the Public Contract Code, except for Article 2 (commencing with
31 Section 10295) of Chapter 2 of Part 2 of Division 2 of the Public Contract Code.

32 (d) Material printed pursuant to subdivision (b) that contains advertisements
33 shall meet all specifications prescribed by the department. The printed material
34 shall not contain advertisements for tobacco products, alcohol, firearms, and
35 devices prohibited pursuant to Section 32625 of the Penal Code, Article 2
36 (commencing with Section 30600) of Chapter 2 of Division 10 of Title 4 of Part 6
37 of the Penal Code, or any provision listed in Section 16590 of the Penal Code, or
38 firearms not authorized by the commission as a legal method of sport hunting,
39 political statements, solicitations for membership in organizations, or any other
40 statement, solicitation, or product advertisement that is in conflict with the
41 purposes for which the material is produced, as determined by the commission.

1 (e) Neither the department nor the commission shall contract with private
2 entities to print the materials described in subdivision (b) if the letting of those
3 contracts will result in the elimination of civil service positions.

4 (f) The department or the license agent may give a copy of the current applicable
5 published regulations governed by this article to each person issued a license, at
6 the time the license is issued.

7 **Comment.** Section 1110 continues former Fish and Game Code Section 260 without
8 substantive change.

9 **§ 1115. Exemption from time requirements**

10 1115. A regulation governed by this article is not subject to the time periods for
11 the adoption, amendment, or repeal of a regulation prescribed in Sections 11343.4,
12 11346.4, 11346.8, and 11347.1 of the Government Code.

13 **Comment.** Section 1115 continues former Fish and Game Code Section 265 without
14 substantive change.

15 **§ 1120. Effective date of regulation**

16 1120. The adoption, amendment, or repeal of a regulation governed by this
17 article shall become effective at the time specified in the regulation, but not sooner
18 than the date of the filing.

19 **Comment.** Section 1120 continues former Fish and Game Code Section 270 without
20 substantive change.

21 **§ 1125. Effective period**

22 1125. A regulation governed by this article shall remain in effect for the period
23 specified in the regulation or until superseded by subsequent regulation of the
24 commission or by statute.

25 **Comment.** Section 1125 continues former Fish and Game Code Section 275 without
26 substantive change.

27 **CHAPTER 2. OTHER REGULATION**

28 **§ 1200. Commission practices and processes**

29 1200. By July 1, 2013, the commission shall adopt rules to govern the business
30 practices and processes of the commission.

31 **Comment.** Section 1200 continues former Fish and Game Code Section 108 without
32 substantive change.

33 **§ 1205. Disposition of accidentally killed birds and mammals**

34 1205. The commission may adopt regulations that it deems necessary for the
35 disposition of birds or mammals that are killed accidentally.

36 **Comment.** Section 1205 continues former Section 301 without substantive change.

1 CHAPTER 3. EMERGENCY REGULATIONS

2 **§ 1250. Emergency regulations**

3 1250. Notwithstanding any other provision of this code, the commission, when
4 adopting, amending, or repealing a regulation pursuant to authority vested in it by
5 this code, may, after at least one hearing, adopt, amend, or repeal that regulation
6 pursuant to Section 11346.1 of the Government Code, if it makes either of the
7 following findings:

8 (a) That the adoption, amendment, or repeal is necessary for the immediate
9 conservation, preservation, or protection of birds, mammals, fish, amphibians, or
10 reptiles, including, but not limited to, their nests or eggs.

11 (b) That the adoption, amendment, or repeal is necessary for the immediate
12 preservation of the public peace, health and safety, or general welfare.

13 **Comment.** Section 1250 continues former Fish and Game Code Section 399 without
14 substantive change.

15 CHAPTER 4. INVESTIGATION AND ADJUDICATION

16 **§ 1300. Authority to compel testimony and production of evidence**

17 1300. The commission or any person appointed by it to conduct a hearing may,
18 in any investigation or hearing, cause the deposition of witnesses, residing within
19 or without the state, to be taken in the manner prescribed by law for deposition in
20 civil actions in the superior courts of this state under Title 4 (commencing with
21 Section 2016.010) of Part 4 of the Code of Civil Procedure, and may compel the
22 attendance of witnesses and the production of documents and papers.

23 **Comment.** Section 1300 continues the first sentence of former Fish and Game Code Section
24 309(a) without substantive change.

25 **§ 1305. Hearings governed by Administrative Procedures Act**

26 1305. Any deliberation conducted by the commission, or conducted by any
27 person appointed by the commission to conduct hearings, is deemed to be a
28 proceeding required to be conducted pursuant to Chapter 5 (commencing with
29 Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code or
30 similar provision, within the meaning of paragraph (3) of subdivision (c) of
31 Section 11126 of the Government Code.

32 **Comment.** Section 1305 continues former Fish and Game Code Section 309(b) without
33 substantive change.

PART 2. DEPARTMENT OF FISH AND WILDLIFE

TITLE 1. ORGANIZATION

§ 1500. Department of Fish and Wildlife

1500. (a) There is in the Natural Resources Agency a Department of Fish and Wildlife administered through the director.

(b) The Department of Fish and Wildlife shall succeed to, and is vested with, all the duties, powers, purposes, responsibilities, property, and jurisdiction previously vested in the Department of Fish and Game.

(c) Whenever the term “Department of Fish and Game” appears in a law, the term means the “Department of Fish and Wildlife.”

(d) No existing supplies, forms, insignias, signs, logos, uniforms, or emblems shall be destroyed or changed as a result of changing the name of the Department of Fish and Game to the Department of Fish and Wildlife, and those materials shall continue to be used until exhausted or unserviceable.

Comment. Section 1500 continues former Fish and Game Code Section 700 without substantive change.

§ 1505. Administration and enforcement of code

1505. This code shall be administered and enforced through regulations adopted only by the department, except as otherwise specifically provided by this code or where this code requires the commission to adopt regulations.

Comment. Section 1505 continues former Fish and Game Code Section 702 without substantive change.

§ 1510. Commission sets general department policy

1510. General policies for the conduct of the department shall be formulated by the commission. The director shall be guided by those policies and shall be responsible to the commission for the administration of the department in accordance with those policies.

Comment. Section 1510 continues former Fish and Game Code Section 703(a) without substantive change.

§ 1515. Director

1515. The director shall be appointed by the Governor, and receive the annual salary provided for by Chapter 6 (commencing at Section 11550) of Part 1 of Division 3 of Title 2 of the Government Code.

Comment. Section 1515 continues former Section 701 without substantive change.

§ 1520. Deputy director

1520. There shall be one deputy director of the department who shall be a civil executive officer and shall be appointed by the Governor and serve at the pleasure

1 of the Governor. The compensation of the deputy director shall be fixed by the
2 director pursuant to law. The deputy director shall have duties as shall be assigned,
3 from time to time, by the director, and shall be responsible to the director for the
4 performance of those duties.

5 **Comment.** Section 1520 continues former Section 701.3 without substantive change.

6 **§ 1525. Director as appointing power for all department employees**

7 1525. (a) Notwithstanding any other provision of law, the director is the
8 appointing power of all employees within the department, and all employees in the
9 department are responsible to the director for the proper carrying out of the duties
10 and responsibilities of their respective positions.

11 (b) The changes made to subdivision (a) during the 2001-02 Regular Session of
12 the Legislature are declaratory of existing law.

13 **Comment.** Section 1525 continues former Section 704 without substantive change.

14 **§ 1530. Incorporation of specified law on state agencies**

15 1530. The provisions of Chapter 2 (commencing at Section 11150) of Part 1 of
16 Division 3 of Title 2 of the Government Code shall govern and apply to the
17 conduct of the department in every respect. Wherever in that chapter the term
18 “head of the department” or similar designation occurs, for the purposes of this
19 section it shall mean the director.

20 **Comment.** Section 1530 continues former Fish and Game Code Section 706 without
21 substantive change.

22 **TITLE 2. DEPARTMENT EMPLOYEES**

23 **§ 1600. Appointment of employees**

24 1600. The director shall, from time to time, employ or appoint, with or without
25 pay, those deputies, clerks, assistants, and other employees as the department may
26 need to discharge in proper manner the duties imposed upon it by law.

27 **Comment.** Section 1600 continues former Section 850 without substantive change.

28 **§ 1605. Legal defense of officers and deputies**

29 1605. It is the duty of the attorney for the department to act as counsel in
30 defense of any officer or deputy of the department, in any suit for damages
31 brought against the officer or deputy, on account of injuries to persons or property
32 alleged to have been received as a result of the negligence or misconduct of the
33 officer or deputy, occurring while the officer or deputy was performing official
34 duties.

35 **Comment.** Section 1605 continues former Fish and Game Code Section 707 without
36 substantive change.

1 **§ 1610. Entry onto private land**

2 1610. (a) Notwithstanding any provision of law, the status of a person as an
3 employee, agent, or licensee of the department does not confer upon that person a
4 special right or privilege to knowingly enter private land without the consent of
5 the owner, a search warrant, or an inspection warrant.

6 (b) Subdivision (a) does not apply to employees, agents, or licensees of the
7 department in the event of an emergency. For purposes of this section,
8 “emergency” means a sudden, unexpected occurrence, involving a clear and
9 imminent danger demanding immediate action to prevent or mitigate loss of, or
10 damage to, wildlife, wildlife resources, or wildlife habitat.

11 (c) Subdivision (a) does not apply to a sworn peace officer authorized pursuant
12 to subdivision (e) of Section 830.2 of the Penal Code or, if necessary for law
13 enforcement purposes, to other departmental personnel accompanying a sworn
14 peace officer. Subdivision (a) shall not be construed to define or alter any
15 authority conferred on those peace officers by any other law or court decision.

16 (d) Subdivision (a) does not apply to, or interfere with, the authority of
17 employees or licensees to enter and inspect land in conformance with Section
18 4604 of the Public Resources Code.

19 (e) This section is not intended to expand or constrain the authority, if any, of
20 employees, agents, or licensees of the department to enter private land to conduct
21 inspections pursuant to Section 21615 of this code or Section 8670.5, 8670.7, or
22 8670.10 of the Government Code.

23 (f) If the department conducts a survey or evaluation of private land pursuant to
24 this section, that results in the preparation of a document or report, the department
25 shall, upon request and without undue delay, provide the landowner either a copy
26 of the report or a written explanation of the department’s legal authority for
27 denying the request. The department may charge a fee for each copy, not to exceed
28 the direct costs of duplication.

29 **Comment.** Section 1610 continues former Section 857 without substantive change.

30 **§ 1615. Landowner complaint policy**

31 1615. The department, in cooperation with landowners and landowner
32 organizations, shall develop a statewide policy and procedure for recording and
33 processing landowner complaints regarding alleged misconduct by personnel of
34 the department and a written protocol that ensures compliance with Section 1610.

35 **Comment.** Section 1615 continues former Section 858(a) without substantive change.

TITLE 3. GENERAL POWERS AND DUTIES

§ 1675. Mission, core programs, service-based budget review

1675. (a) (1) The department's mission is to manage California's diverse fish, wildlife, and plant resources, and the habitats upon which they depend, for their ecological values and for their use and enjoyment of the public.

(2) The department's core programs are the following:

(A) Management of departmental lands and facilities.

(B) Biodiversity conservation.

(C) Hunting, fishing, and public use.

(D) Enforcement.

(E) Spill prevention and response.

(F) Communication, education, and outreach.

(3) The department, as a part of a service-based budget review, shall identify strategic goals that reflect the core programs identified in paragraph (2) and support the department's mission and statutory requirements.

(b) (1) The department shall contract with an independent entity to conduct a comprehensive service-based budget review and to consult on the development of a service-based budget tracking system. The selected contractor shall have experience conducting similar reviews and consulting on similar systems for a comparably sized state agency or department.

(2) The service-based budget review shall study and report on all of the following topics:

(A) For each strategic goal identified pursuant to paragraph (3) of subdivision (a), a definition of the service standards and essential activities required for the department to meet its mission and statutory requirements.

(B) Detailed cost estimates and staffing requirements for meeting the service standards and requirements identified pursuant to subparagraph (A), including applicable administrative costs.

(C) An analysis of how current service levels, activities, expenditures, and staffing levels compare with the service standards and costs identified pursuant to subparagraphs (A) and (B), respectively. The analysis shall explicitly identify instances and associated costs where the department is not currently meeting its mission or statutory requirements, as well as where it may be conducting activities outside its mission and statutory requirements.

(D) An analysis of the department's existing revenue structure and program activities supported by those fund sources. The analysis shall identify any instances where the nature of the activity suggests a different funding source, such as user fees or the General Fund, or a different revenue structure that could be allowable or more appropriate to support the activity, or both allowable and more appropriate to support the activity.

(E) The service-based budget review conducted pursuant to this section shall build upon the California Fish and Wildlife Strategic Vision: Recommendations

1 for Enhancing the State’s Fish and Wildlife Management Agencies, issued in April
2 2012, and the Supporting Healthy Fish and Wildlife Populations in California and
3 Getting People Outdoors: An Expenditure Concept to Invest in Our Natural
4 Heritage for All Californians, issued on November 2, 2017.

5 (3) (A) The service-based budget tracking system shall incorporate data
6 collected for the review pursuant to paragraph (2), including the costs and staffing
7 levels associated with both existing service levels and the service level standards
8 developed pursuant to subparagraph (A) of paragraph (2).

9 (B) The service-based budget tracking system shall allow the department to
10 continuously analyze service levels across its programs and the degree to which
11 service standards are being met.

12 (C) The service-based budget tracking system shall be developed as a tool to
13 inform ongoing and future fiscal decisionmaking processes.

14 (D) The service-based budget tracking system shall be the property of the state
15 even if it is developed using nonstate funding provided pursuant to subdivision
16 (d).

17 (4) To meet the goals of this subdivision, the department shall collect
18 information necessary to inform service-based budgeting.

19 (c) In conducting the service-based budget review and developing the service-
20 based budget tracking system pursuant to subdivision (b), the department shall
21 meet all of the following deadlines:

22 (1) By December 15, 2018, the department shall do all of the following:

23 (A) Enter into a contract with the independent entity to complete the service-
24 based budget review.

25 (B) Form an internal leadership team within the department to oversee and
26 manage the service-based budget review.

27 (C) Form an external advisory committee to advise the department and
28 independent entity on conducting the service-based budget review.

29 (D) Submit a report to the relevant budget and policy committees of the
30 Legislature and the Legislative Analyst’s Office summarizing the status of these
31 activities.

32 (2) By April 15, 2020, the department shall report in its legislative oversight
33 hearings regarding the status of the service-based budget review.

34 (3) By January 15, 2021, the department shall submit the final service-based
35 budget review report to the relevant budget and policy committees of the
36 Legislature and the Legislative Analyst’s Office.

37 (4) By April 15, 2021, the department shall report in its legislative oversight
38 hearings how the findings of the service-based budget review have been
39 incorporated into the department’s operations and budget and any changes the
40 department proposed to its operations or budget resulting from the service-based
41 budget review.

(d) (1) The department may enter into one or more agreements to accept funds from any person, nonprofit organization, or other public or private entity for purposes of this section.

(2) Funding provided pursuant to this subdivision may be used by the department for department staff, development of information technology systems, or other costs associated with the service-based budget review and the service-based budget tracking system.

(3) The Department of Finance may authorize expenditure of the funds provided pursuant to this subdivision no sooner than 30 days after providing notification of the expenditure to the chairperson of the Joint Legislative Budget Committee.

Comment. Section 1675 continues former Fish and Game Code Section 712.1 without substantive change.

 **Note:** Proposed Section 1675 would continue Section 712.1, which was added by 2018 Cal. Stat. ch. 51, with immediate effect.

§ 1700. Authority of department to take

1700. Nothing in this code or any other law shall prohibit the department from taking, for scientific, propagation, public health or safety, prevention or relief of suffering, or law enforcement purposes, fish, amphibians, reptiles, mammals, birds, and the nests and eggs thereof, or any other form of plant or animal life.

Comment. Section 1700 continues former Fish and Game Code Section 1001 without substantive change.

§ 1705. Capture and sale of birds and mammals

1705. The department may capture and sell birds and mammals, at prices to be fixed by the commission, to persons engaged in the domestication and sale thereof in this state.

Comment. Section 1705 continues former Fish and Game Code Section 1004 without substantive change.

§ 1710. Importation, propagation, and distribution of birds, mammals, or fish

1710. The department may import, propagate, and distribute birds, mammals, and fish.

Comment. Section 1710 continues former Fish and Game Code Section 1007 without substantive change.

§ 1715. Inspection

1715. The department may inspect the following:

(a) All boats, markets, stores and other buildings, except dwellings, and all receptacles, except the clothing actually worn by a person at the time of inspection, where birds, mammals, fish, reptiles, or amphibians may be stored, placed, or held for sale or storage.

1 (b) All boxes and packages containing birds, mammals, fish, reptiles, or
2 amphibians that are held for transportation by any common carrier.

3 **Comment.** Section 1715 continues former Fish and Game Code Section 1006 without
4 substantive change.

5 **§ 1720. Investigation of disease**

6 1720. The department shall investigate all diseases of, and problems relating to,
7 birds, mammals, or fish, and establish and maintain laboratories to assist in such
8 investigation.

9 **Comment.** Section 1720 continues former Section 1008 without substantive change.

10 **§ 1725. Environmental review of effect on salmon and steelhead**

11 1725. Whenever the department is required, or provided an opportunity, to
12 assess the adequacy of a project or to provide a detailed environmental impact
13 statement or similar document pursuant to Public Law 91-190 or Section 21100,
14 21101, or 21102 of the Public Resources Code, or any other provision of law, it
15 shall determine the extent to which salmon and steelhead resources will be
16 protected from damage by the project in question, together with the extent to
17 which the agency or person preparing the plans for such project has incorporated
18 therein plans for increasing the salmon or steelhead resources of this state. To the
19 fullest practicable extent, the department shall advise the commission at one of its
20 regular scheduled meetings of the state's comments on the project. In no event
21 shall more than one regular commission meeting transpire between the time the
22 department renders comments to the requesting person or agency and the time it
23 reports its findings to the commission.

24 **Comment.** Section 1725 continues former Fish and Game Code Section 1015 without
25 substantive change.

26 **§ 1730. Feeding animals**

27 1730. The department, in accordance with policies established by the
28 commission, may provide for the feeding of game birds, mammals, or fish when
29 natural foods are not available for that purpose, and may provide suitable area or
30 areas for that feeding, and may for those purposes expend money as is necessary
31 from the Fish and Game Preservation Fund.

32 **Comment.** Section 1730 continues former Fish and Game Code Section 1502 without
33 substantive change.

34 **§ 1740. Informal consultative procedures**

35 1740. (a) It is the policy of the state to anticipate and resolve potential conflicts
36 between the management, conservation, and protection of fish and wildlife
37 resources and their habitat and private and public activities that may affect them.

38 (b) Accordingly, the department may use any informal consultative procedures
39 prior to taking any formal action that will assist in the achievement of this policy.

1 (c) Any costs incurred by the department in engaging in informal consultative
2 procedures, including, but not limited to, fees charged by any neutral party acting
3 in the capacity of a mediator, discussion facilitator, or convener, are a proper
4 charge against any funds lawfully available to the department for this purpose.

5 (d) The authority conferred by this section is not intended, and shall not be
6 construed, to increase, decrease, duplicate, or supersede any other authority of the
7 department or the commission under this code or any other provision of law.

8 (e) As used in this section, “formal action” means any of the following:

9 (1) The adoption, amendment, or repeal of any rule, regulation, or order.

10 (2) Entering into, amending, or canceling an agreement.

11 (3) The issuance, suspension, or revocation of any permit, license, or other
12 entitlement.

13 **Comment.** Section 1740 continues former Section 1017 without substantive change.

14 **§ 1745. Biological research**

15 1745. The department shall expend funds necessary for biological research and
16 field investigation and for the collection and diffusion of statistics and information
17 that pertain to the conservation, propagation, protection, and perpetuation of birds
18 and their nests and eggs, and of mammals, reptiles, amphibians, and fish.

19 **Comment.** Section 1745 continues former Fish and Game Code Section 1000 without
20 substantive change.

21 **§ 1750. Educational displays**

22 1750. For the purpose of exhibiting fish and wildlife educational material at
23 fairs, hunting shows, or sport fishing shows and making other public displays, and
24 to make conservation educational materials on fish and wildlife available for any
25 public use, including fairs, hunting shows, sport fishing shows, schools, and civic
26 organizations, the department may:

27 (a) Accept on behalf of the state donations of money and services from any
28 person to defray any expenses that may be incurred by the department in
29 connection with those activities.

30 (b) Charge admissions or make a charge for the use of any departmental material
31 or exhibits to be used in a fair, hunting show, or sport fishing show, or by a civic
32 organization.

33 **Comment.** Section 1750 continues former Fish and Game Code Section 1005 without
34 substantive change.

35 **§ 1755. Gift of personal property from county**

36 1755. Notwithstanding Section 11005 of the Government Code, the department
37 may accept gifts of personal property if the donor is a county of the state and the
38 gift is purchased with fine money derived from fish and wildlife violations. The
39 department shall notify the Department of Finance 30 days in advance of
40 accepting these gifts.

1 **Comment.** Section 1755 continues former Fish and Game Code Section 1005.5 without
2 substantive change.

3 TITLE 4. COORDINATION WITH OTHER ENTITIES

4 **§ 1900. Service agreements**

5 1900. The department may enter into one or more agreements to accept services
6 from any person, nonprofit organization, or other public or private entity for
7 purposes relating to conservation programs, projects, and activities by the
8 department. Under the direction of the department, these services shall supplement
9 existing staff resources. Agreements for services for the management and
10 operation of department-managed lands shall be subject to the provisions of
11 Sections 2000 through 2035, inclusive.

12 **Comment.** Section 1900 continues former Fish and Game Code Section 1226(b) without
13 substantive change.

14 **§ 1905. Funding agreements**

15 1905. Notwithstanding any other law, the department may enter into one or
16 more agreements with any person, nonprofit organization, or other public or
17 private entity, as may be appropriate, to assist the department in its efforts to
18 secure long-term private funding sources for purposes relating to conservation
19 programs, projects, and activities by the department. The authority to enter into an
20 agreement under this section shall include, but not be limited to, the authority to
21 secure donations, memberships, corporate and individual sponsorships, and
22 marketing and licensing agreements.

23 **Comment.** Section 1905 continues former Section 1227 without substantive change.

24 **§ 1910. Science institute**

25 1910. (a) The director, in consultation with the Natural Resources Agency, shall
26 establish a formal program, which may be called the Science Institute, to assist the
27 department and commission in obtaining independent scientific review and
28 recommendations to help inform the scientific work of the department and the
29 commission. The program shall include one or more ad hoc independent scientific
30 committees consisting of independent scientists who are scientific experts in their
31 fields with expertise in biological sciences and with a range of multidisciplinary
32 expertise pertinent to the work of the department and the commission, and which
33 may be convened pursuant to this section. The purpose of the program shall be to
34 assist the department and the commission in obtaining and establishing an
35 independent and objective view of the scientific issues underlying important
36 policy decisions.

37 (b) The objectives of the program shall include, but not necessarily be limited to,
38 the following:

1 (1) Providing independent scientific guidance of the scientific research,
2 monitoring, and assessment programs that support the department's and the
3 commission's work with fish and wildlife species and their habitats.

4 (2) Providing the best available independent scientific information and advice to
5 guide and inform department and commission decisions.

6 (3) Promoting and facilitating independent scientific peer review.

7 (4) Promoting science-based adaptive management.

8 (5) Ensuring scientific integrity and transparency in decisionmaking.

9 (c) The department may consult with members of the ad hoc scientific
10 committees to assist the department in identifying other independent scientific
11 experts with specialized expertise as needed for independent peer review of
12 department reports, including, but not limited to, status review reports prepared for
13 purposes of informing decisions on petitions for listing of species under the
14 California Endangered Species Act (Part 1 (commencing with Section 62000) of
15 Division 17).

16 (d) The department shall consult with independent scientific advisors to develop
17 and revise as necessary a scientific integrity policy to guide the work of the
18 department and the commission. The scientific integrity policy may include, but is
19 not necessarily limited to, an ethical code of conduct for department scientists,
20 standards for independent peer review, and other best practices for ensuring
21 scientific integrity and public confidence in department and commission work
22 products and decisions.

23 (e) For marine fisheries and other marine resources, the department may utilize
24 the California Ocean Science Trust for the purposes of this section.

25 **Comment.** Section 1910 continues former Fish and Game Code Section 715 without
26 substantive change.

27 **§ 1915. Federal Water Pollution Control Act joint powers agreement**

28 1915. (a) The director or one or more of the director's designees may accept the
29 office of director or alternate director of an entity established by a joint powers
30 agreement providing for the establishment and conduct of an areawide waste
31 management planning process in accordance with the provisions of Section 208 of
32 the Federal Water Pollution Control Act.

33 (b) The office of director or alternate director of a joint powers entity established
34 pursuant to subdivision (a) is deemed compatible with the office of director of the
35 department, and with the office or employment of persons that the director may so
36 designate to serve the entity.

37 **Comment.** Subdivisions (a) and (b) of Section 1915 continue former Fish and Game Code
38 Section 701.5 without substantive change.

39 Subdivision (c) continues former Fish and Game Code Section 711.2(b) without substantive
40 change.

1 TITLE 5. REAL PROPERTY

2 CHAPTER 1. DEPARTMENT-MANAGED LANDS

3 § 2000. Definitions

4 2000. For purposes of this chapter, the following terms have the following
5 meanings:

6 (a) “Department-managed lands” includes lands, or lands and water, acquired
7 for public shooting grounds, state marine (estuarine) recreational management
8 areas, ecological reserves, and wildlife management areas. This subdivision does
9 not apply to Section 2040.

10 (b) “Nonconsumptive uses” means compatible uses other than hunting and
11 fishing.

12 **Comment.** Section 2000 continues former Fish and Game Code Section 1745(a) without
13 substantive change.

14 § 2005. Non-profit operation

15 2005. Department-managed lands shall be operated on a nonprofit basis by the
16 department.

17 **Comment.** Section 2005 continues former Fish and Game Code Section 1745(b)(1) without
18 substantive change.

19 § 2010. Management and operation contracts

20 2010. (a) The department may enter into contracts or other agreements for the
21 management and operation of department-managed lands with nonprofit
22 conservation groups, recognized under Section 501(c) of the Internal Revenue
23 Code, or resource conservation districts, as described in Chapter 3 (commencing
24 with Section 9151) of Division 9 of the Public Resources Code.

25 (b) The contracts or other agreements authorized pursuant to this section are not
26 subject to Part 2 (commencing with Section 10100) of Division 2 of the Public
27 Contract Code or Article 6 (commencing with Section 999) of Chapter 6 of
28 Division 4 of the Military and Veterans Code.

29 (c) The contracts or other agreements authorized pursuant to this section shall
30 adhere to the goals and objectives included in an approved management plan and
31 shall be consistent with the purpose for which the lands were acquired and
32 managed by the department. Any changes to the management plan shall be subject
33 to public review and comment.

34 **Comment.** Section 2010 continues former Fish and Game Code Section 1745(b)(2) without
35 substantive change.

36 § 2015. Property uses

37 2015. (a) Multiple recreational use of department-managed lands is desirable
38 and that use shall be encouraged by the commission. Except for hunting and

1 fishing purposes, only minimum facilities to permit other forms of multiple
2 recreational use, such as camping, picnicking, boating, or swimming, shall be
3 provided.

4 (b) Hunting, fishing, wildlife viewing, wildlife photography, conservation
5 education, and fish and wildlife research are priority uses compatible with
6 department-managed lands, except for ecological reserves where uses shall be
7 considered on an individual basis.

8 (c) Public uses of department-managed lands not described in subdivision (a) or
9 (b), or subdivision (b) of Section 2020, shall be authorized by regulations adopted
10 by the commission. The commission may require the purchase of a special use
11 permit for these other uses.

12 **Comment.** Section 2015 continues former Section 1745(c) and (d) without substantive change.

13 **§ 2020. Use fees and permits**

14 2020. (a) Except as provided in Sections 4452 and 56080, to defray the costs
15 associated with multiple use, the commission may determine and fix the amount
16 of, and the department shall collect, fees for any use privileges. Only persons
17 holding valid hunting licenses may apply for or obtain shooting permits for
18 department-managed lands.

19 (b) The department shall require the purchase of an entry permit for
20 nonconsumptive uses of department-managed lands, if the department finds that it
21 is practical and would be cost effective for the state to collect entry permit fees.

22 (c) The following shall apply if the department requires the purchase of an entry
23 permit pursuant to subdivision (b):

24 (1) The department shall require the purchase of an entry permit for
25 nonconsumptive uses of a department-managed land only if a sign providing
26 notice of the requirement has been posted at the department-managed land.

27 (2) To the extent feasible, the department shall allow nonconsumptive users to
28 purchase an entry permit onsite.

29 (3) The department shall use the Automated License Data System to sell an
30 entry permit.

31 (4) A nonconsumptive user shall have an entry permit in his or her immediate
32 possession while on department-managed lands.

33 **Comment.** Section 2020 continues former Fish and Game Code Section 1745(e)-(g) without
34 substantive change. See also Section 4452 (enforcement).

35 **§ 2030. Free access**

36 2030. The commission and department may continue to allow free access to a
37 department-managed land if the commission or department finds the best interests
38 of that area would be served by not fixing a fee for use privileges.

39 **Comment.** Section 2030 continues former Section 1745(j) without substantive change.

1 **§ 2035. Use of funds**

2 2035. (a) Except as provided in Section 2040, the moneys generated pursuant to
3 this chapter shall be deposited in the Native Species Conservation and
4 Enhancement Account within the Fish and Game Preservation Fund, and shall be
5 available, upon appropriation by the Legislature, to the department for the
6 management and operation of its lands.

7 (b) To the extent that the department is able to identify the source of the fee
8 revenue collected, the department shall provide no less than 35 percent of the
9 funds generated pursuant to this section to the department-managed lands from
10 which the fee revenues were collected.

11 **Comment.** Section 2035 continues former Fish and Game Code Section 1745(i) without
12 substantive change.

13 **§ 2040. Leasing of department-managed lands**

14 2040. (a) Notwithstanding any other provision of this code, the department may
15 lease department-managed lands for agricultural activities, including, but not
16 limited to, grazing, where consistent with the purpose for which the lands were
17 acquired, and compatible with the department's approved management plan for
18 the area, if available.

19 (b) The moneys collected from agricultural leases entered into pursuant to
20 subdivision (a) shall be deposited by the department into the Wildlife Restoration
21 Fund and, upon appropriation by the Legislature, may be used to support the
22 management, maintenance, restoration, and operations of department-managed
23 lands.

24 **Comment.** Section 2040 continues former Fish and Game Code Section 1745.1 without
25 substantive change.

26 **CHAPTER 2. OTHER DUTIES AND AUTHORITY**

27 **§ 2100. Management and listing of real property**

28 2100. (a) Subject to an appropriation of funds by the Legislature for that
29 purpose, for parcels wholly within its jurisdiction acquired on or after January 1,
30 2002, the department shall prepare draft management plans for public review
31 within 18 months of the recordation date.

32 (b)(1) On or before February 1 of each year, the department shall submit a list of
33 lands acquired during the previous two fiscal years and the status of the
34 management plans for each acquisition to the fiscal committees of each house of
35 the Legislature.

36 (2) Each fiscal committee in the Legislature shall consider the lists described in
37 paragraph (1) in its budget decisions for the department.

38 **Comment.** Section 2100 continues former Section 1019 without substantive change.

1 **§ 2105. Rights of way**

2 2105. (a) The department may obtain for the state rights of way over private
3 lands for the purpose of furnishing access for the public to lands or waters open to
4 public hunting or fishing, whenever rights of way are determined by the
5 commission to be necessary for public use. The rights of way shall not be acquired
6 by eminent domain proceedings.

7 (b) The department may construct or cause to be constructed any fences, signs,
8 or other structures as are necessary for the protection of a right of way, and the
9 cost of the construction shall be met out of the funds available to the department.

10 **Comment.** Section 2105 continues former Fish and Game Code Section 1009 without
11 substantive change.

12 **§ 2110. Grazing permits**

13 2110. The department, by and with the approval of the Department of General
14 Services, may sell grazing permits or otherwise dispose of excess vegetation or
15 other products, produced on lands acquired by the department.

16 **Comment.** Section 2110 continues former Fish and Game Code Section 1010 without
17 substantive change.

18 **TITLE 6. INSURANCE AND LIABILITY**

19 **§ 2200. Insurance**

20 2200. (a) The department may procure insurance for any of the following
21 purposes:

22 (1) For itself and landowners who agree to permit the department to use their
23 land as cooperative hunting, fishing, conservation or recreational areas, against
24 any liability resulting from the operation of those hunting, fishing, conservation or
25 recreational areas.

26 (2) For its employees or other persons authorized by the department to conduct
27 hunter education training courses against any public liability or property damage
28 resulting from that training.

29 (b) The cost of insurance procured pursuant to subdivision (a) shall be a proper
30 charge against and shall be paid out of the Fish and Game Preservation Fund.

31 **Comment.** Section 2200 continues former Fish and Game Code Section 1011 without
32 substantive change.

33 **§ 2205. Insurance relating to boarding of boats**

34 2205. The department may procure insurance for its employees for injury or
35 death against the liability of the owner or operator of any vessel boarded by an
36 employee as an observer.

37 **Comment.** Section 2205 continues former Fish and Game Code Section 1012 without
38 substantive change.

1 **§ 2210. Indemnification relating to fish screen, ladder, weir, or trap**

2 2210. In any lease, easement, or right-of-way in which the department leases
3 real property or obtains a grant of easement or right-of-way in real property for the
4 purpose of constructing, operating, or maintaining a fish screen, fish ladder,
5 fishweir, or fishtrap, the department may agree to indemnify and hold harmless the
6 lessor or grantor by reason of the uses of authorized by the lease, easement, or
7 right-of-way. Insurance may be purchased by the Department of General Services
8 to protect the department against loss or expense arising out of the lease,
9 easement, or right-of-way.

10 **Comment.** Section 2210 continues former Fish and Game Code Section 1013 without
11 substantive change.

12 **TITLE 7. UNLAWFUL ACTS**

13 **§ 2300. Submission of false or misleading information**

14 2300. (a) It is unlawful to submit, or conspire to submit, any false, inaccurate, or
15 otherwise misleading information on any application or other document offered or
16 otherwise presented to the department for any purpose, including, but not limited
17 to, obtaining a license, tag, permit, or other privilege or entitlement pursuant to
18 this code or regulations adopted pursuant to this code.

19 (b) For purposes of this section, “department” includes any department
20 employee, license agent, or any person performing the duties of a department
21 employee or license agent.

22 **Comment.** Section 2300 continues former Fish and Game Code Section 1054(a) and (c)
23 without substantive change.

24 See also Section 4874 (enforcement).

25 **PART 3. DEPARTMENT AND COMMISSION**

26 **§ 2400. General policy**

27 2400. It is the policy of the state that the department and commission do all of
28 the following:

29 (a) Seek to create, foster, and actively participate in effective partnerships and
30 collaborations with other agencies and stakeholders to achieve shared goals and to
31 better integrate fish and wildlife resource conservation and management with the
32 natural resource management responsibilities of other agencies.

33 (b) Participate in interagency coordination processes that facilitate consistency
34 and efficiency in review of projects requiring multiple permits, including, but not
35 necessarily limited to, joint state, federal, and local permit review teams that
36 enable early consultation with project applicants, and provide improved sharing of
37 data, information, tools, and science to achieve better alignment of planning,
38 policies, and regulations across agencies.

1 **Comment.** Section 2400 continues former Fish and Game Code Section 703.5 without
2 substantive change.

3 **§ 2405. Strategic planning**

4 2405. (a) The department and the commission shall develop a strategic plan to
5 implement proposals arising from any of the following:

6 (1) The strategic vision developed and submitted to the Governor and the
7 Legislature pursuant to Section 12805.3 of the Government Code.

8 (2) Any legislation enacted relating to the strategic vision process.

9 (3) The department's own proposals for reform.

10 (b)(1) The department and the commission may contract for consultants to assist
11 in the preparation of the strategic plan pursuant to subdivision (a).

12 (2) Contracts entered into pursuant to paragraph (1) shall terminate no later than
13 December 31, 2015.

14 (3) Contracts entered into pursuant to paragraph (1) shall be exempt from Part 2
15 (commencing with Section 10100) of Division 2 of the Public Contract Code.

16 **Comment.** Section 2405 continues former Fish and Game Code Section 1020 without
17 substantive change.

18 **§ 2410. Resource management decisionmaking methods**

19 2410. It is the policy of the state that the department and commission use
20 ecosystem-based management informed by credible science in all resource
21 management decisions to the extent feasible. It is further the policy of the state
22 that scientific professionals at the department and commission, and all resource
23 management decisions of the department and commission, be governed by a
24 scientific quality assurance and integrity policy, and follow well-established
25 standard protocols of the scientific profession, including, but not limited to, the
26 use of peer review, publication, and science review panels where appropriate.
27 Resource management decisions of the department and commission should also
28 incorporate adaptive management to the extent possible.

29 **Comment.** Section 2410 continues former Fish and Game Code Section 703.3 without
30 substantive change.

31 **PART 4. DISTRICTS**

32 **§ 2500. Fish and Wildlife Districts**

33 2500. (a) For the protection of fish and wildlife, the state is divided into districts
34 to be known and designated as provided in this part.

35 (b) Unless otherwise provided, the townships and ranges specified in this part
36 are referred to the Mount Diablo base and meridian.

37 **Comment.** Section 2500 continues former Fish and Game Code Section 11000 without
38 substantive change.

1 **§ 2505. District 2505**

2 2505. (a) The following constitutes Fish and Wildlife District 2505:

3 Those portions of the following counties not included in other districts: Shasta,
4 Tehama, Plumas, Butte, Sierra, Sutter, Yuba, Nevada, Placer, Sacramento,
5 Madera, Tulare; those portions of San Joaquin County lying east and north of the
6 east bank of the San Joaquin River and not included in District 2540; those
7 portions of Stanislaus and Merced Counties lying east of the west bank of the San
8 Joaquin River; those portions of Fresno County lying east of the west bank of
9 Fresno Slough, Fish Slough and Summit Lake; those portions of Kings County
10 lying east of the main power line of the San Joaquin Light and Power Company,
11 crossing the north line of Kings County in Section 4, T. 18 S., R. 19 E., southerly
12 to its crossing of State Highway No. 41 between Secs. 21 and 22, T. 21 S., R. 19
13 E., and east of State Highway No. 41 southerly to its intersection with State
14 Highway No. 33, and easterly of State Highway No. 33 from said intersection to
15 the south line of said county in Section 36, T. 24 S., R. 18 E.; those portions of
16 Kern County lying east of State Highway No. 33 between the northerly line of said
17 county in Section one (1), T. 25 S., R. 18 E., M. D. B. & M., and the City of Taft
18 and U. S. Highway No. 399 between the City of Taft and the City of Maricopa,
19 and lying north of State Highway No. 166 from the City of Maricopa easterly to
20 the intersection of said highway with U.S. Highway No. 99 in Section twelve (12),
21 T. 11 N., R. 20 W., S. B. B. & M., and lying east of U.S. Highway No. 99 from the
22 above-mentioned point of intersection to where the said U.S. highway crosses the
23 northern boundary line of Los Angeles County, not included in other districts.

24 (b) Any reference to “District 1” shall be construed as a reference to District
25 2505.

26 **Comment.** Subdivision (a) of Section 2505 continues former Fish and Game Code Section
27 11001 without substantive change.

28 Subdivision (b) is new.

29 **§ 2510. District 2510**

30 2510. (a) The following constitutes Fish and Wildlife District 2510:

31 Those portions of the following counties not included in other districts: Alpine,
32 El Dorado, Amador, Calaveras, Tuolumne and Mariposa.

33 (b) Except as otherwise provided, all of the provisions of this code relating to
34 District 2505 shall apply to District 2510.

35 (c) Any reference to “District 1 3/8” shall be construed as a reference to District
36 2510.

37 **Comment.** Subdivisions (a) and (b) of Section 2510 continue former Fish and Game Code
38 Section 11002 without substantive change.

39 Subdivision (c) is new.

40 **§ 2515. District 2515**

41 2515. (a) The following constitutes Fish and Wildlife District 2515:

1 Those portions of the Counties of Del Norte, Siskiyou, Trinity, and Humboldt
2 not included in other districts.

3 (b) Any reference to “District 1 1/2” shall be construed as a reference to District
4 2515.

5 **Comment.** Subdivision (a) of Section 2515 continues former Fish and Game Code Section
6 11003 without substantive change.

7 Subdivision (b) is new.

8 **§ 2520. District 2520**

9 2520. (a) The following constitutes Fish and Wildlife District 2520:

10 Those portions of the County of Modoc not included in other districts and that
11 portion of the County of Siskiyou lying east of the Weed-Klamath Falls Highway
12 between the north line of the County of Siskiyou and the Town of Weed and east
13 of the Pacific Highway between the Town of Weed and the junction of Pacific
14 Highway and the McCloud-Fall River Mills Highway and north and east of the
15 McCloud-Fall River Mills Highway to the Siskiyou and Shasta county line and
16 that part of Shasta County lying north and east of the McCloud-Fall River Mills
17 Highway to its junction with the road to Lake Britton at Dickson Flat and east of
18 that road through Burney Falls State Park to its junction with the Hat Creek-
19 Lassen Highway at the Redding-Alturas Highway and east of the Hat Creek-
20 Lassen Highway to Lassen Volcanic National Park and north and east to the north
21 and east boundary of Lassen Volcanic National Park to its junction with the
22 Lassen county line. That part of Lassen County north and east of the north and east
23 boundary of the Lassen Volcanic National Park to its junction with the north line
24 of District 2665 and east of the east boundary of District 2665 to its junction with
25 the Lassen-Plumas county line approximately one mile southeast of Coyote Peak
26 in Sec. 24, T. 28 N., R. 10 E. and north and west of the Plumas-Lassen county line
27 between the boundary of District 1915 and the Susanville-Taylorsville road.

28 (b) Any reference to “District 1 3/4” shall be construed as a reference to District
29 2520.

30 **Comment.** Subdivision (a) of Section 2520 continues former Fish and Game Code Section
31 11004 without substantive change.

32 Subdivision (b) is new.

33 **§ 2525. District 2525**

34 2525. (a) The following constitutes Fish and Wildlife District 2525:

35 Those portions of the following counties not included in other districts:
36 Mendocino, Glenn, Colusa, Yolo, Solano, Napa, Sonoma, and Marin; that portion
37 of San Francisco Bay lying westerly of a line drawn from California Point to San
38 Quentin Point; that portion of San Francisco Bay lying westerly of a line drawn
39 from San Quentin Point to San Pedro Point, in Marin County; that portion of San
40 Pablo Bay lying westerly of a line drawn from San Pedro Point to the south side of
41 the mouth of Novato Creek; and that portion of San Pablo Bay lying northerly of a

1 line drawn due east from the south side of the mouth of Novato Creek to the
2 westerly shore of Mare Island.

3 (b) Any reference to “District 2” shall be construed as a reference to District
4 2525.

5 **Comment.** Subdivision (a) of Section 2525 continues former Fish and Game Code Section
6 11005 without substantive change.

7 Subdivision (b) is new.

8 **§ 2530. District 2530**

9 2530. (a) The following constitutes Fish and Wildlife District 2530:

10 Lake County and the waters of Clear Lake.

11 (b) Any reference in this code to Clear Lake refers to District 2530.

12 (c) Except as otherwise provided, all of the provisions of this code relating to
13 District 2525 apply to District 2530.

14 (d) Any reference to “District 2 1/4” shall be construed as a reference to District
15 2530.

16 **Comment.** Subdivisions (a) through (c) of Section 2530 continue former Fish and Game Code
17 Section 11006 without substantive change.

18 Subdivision (d) is new.

19 **§ 2535. District 2535**

20 2535. (a) The following constitutes Fish and Wildlife District 2535:

21 Those portions of T. 24 N., R. 18 and 19 W.; 23 N., R. 17 and 18 W.; 22 N., R.
22 17 and 18 W.; 21 N., R. 17 W., west of the summit of the divide between the
23 Pacific Ocean and the south fork of the Eel River.

24 All of T. 12, 13, 14, 15, 16, 17, 18 N., R. 16 W.; and T. 12, 13, 14, 15, 16, 17,
25 18, 19 and 20 N., R. 17 W., and T. 17 and 18 N., R. 18 W.

26 All being townships located in western Mendocino County.

27 (b) Any reference to “District 2 1/2” shall be construed as a reference to District
28 2535.

29 **Comment.** Subdivision (a) of Section 2535 continues former Fish and Game Code Section
30 11007 without substantive change.

31 Subdivision (b) is new.

32 **§ 2540. District 2540**

33 2540. (a) The following constitutes Fish and Wildlife District 2540:

34 Those portions of the following counties not included in other districts: San
35 Francisco, Contra Costa, Alameda, San Mateo, Santa Cruz, Santa Clara, San
36 Benito, Monterey, San Joaquin, Stanislaus, Merced, Fresno, and Kings.

37 (b) Any reference to “District 3” shall be construed as a reference to District
38 2540.

39 **Comment.** Subdivision (a) of Section 2540 continues former Fish and Game Code Section
40 11008 without substantive change.

41 Subdivision (b) is new.

1 **§ 2545. District 2545**

2 2545. (a) The following constitutes Fish and Wildlife District 2545:

3 Those portions of the following counties not included in other districts: San Luis
4 Obispo, Santa Barbara, Ventura, and Kern.

5 (b) Except as otherwise provided all of the provisions of this code applicable to
6 District 2540 apply to District 2545.

7 (c) Any reference to “District 3 1/2” shall be construed as a reference to District
8 2545.

9 **Comment.** Subdivisions (a) and (b) of Section 2545 continue former Fish and Game Code
10 Section 11009 without substantive change.

11 Subdivision (c) is new.

12 **§ 2550. District 2550**

13 2550. (a) The following constitutes Fish and Wildlife District 2550:

14 Those portions of the following counties not included in other districts: San
15 Bernardino, Riverside, and Orange.

16 (b) Any reference to “District 4” shall be construed as a reference to District
17 2550.

18 **Comment.** Subdivision (a) of Section 2550 continues former Fish and Game Code Section
19 11010 without substantive change.

20 Subdivision (b) is new.

21 **§ 2555. District 2555**

22 2555. (a) The following constitutes Fish and Wildlife District 2555:

23 All of Los Angeles County not included within other districts.

24 (b) Except as otherwise provided, all of the provisions of this code applicable to
25 District 2550 apply to District 2555.

26 (c) Any reference to “District 4 1/8” shall be construed as a reference to District
27 2555.

28 **Comment.** Subdivisions (a) and (b) of Section 2555 continue former Fish and Game Code
29 Section 11011 without substantive change.

30 Subdivision (c) is new.

31 **§ 2560. District 2560**

32 2560. (a) The following constitutes Fish and Wildlife District 2560:

33 Those portions of the Counties of Mono and Inyo not included in other districts.

34 (b) Any reference to “District 4 1/2” shall be construed as a reference to District
35 2560.

36 **Comment.** Subdivision (a) of Section 2560 continues former Fish and Game Code Section
37 11012 without substantive change.

38 Subdivision (b) is new.

39 **§ 2565. District 2565**

40 2565. (a) The following constitutes Fish and Wildlife District 2565:

1 Those portions of the Counties of San Diego and Imperial not included in other
2 districts.

3 (b) Any reference to “District 4 3/4” shall be construed as a reference to District
4 2565.

5 **Comment.** Subdivision (a) of Section 2565 continues former Fish and Game Code Section
6 11013 without substantive change.

7 Subdivision (b) is new.

8 **§ 2570. District 2570**

9 2570. (a) The following constitutes Fish and Wildlife District 2570:

10 The ocean waters and tidelands of the State to the high-water mark lying
11 between the northern boundary of this State and a line extending due west from
12 the west end of the north jetty at the entrance of Humboldt Bay, excluding all
13 sloughs, streams, and lagoons.

14 (b) Any reference to “District 6” shall be construed as a reference to District
15 2570.

16 **Comment.** Subdivision (a) of Section 2570 continues former Fish and Game Code Section
17 11014 without substantive change.

18 Subdivision (b) is new.

19 **§ 2575. District 2575**

20 2575. (a) The following constitutes Fish and Wildlife District 2575:

21 The ocean waters and tidelands of the State to high-water mark between a line
22 extending due west from the west end of the north jetty at the entrance of
23 Humboldt Bay and the southern boundary of Mendocino County, excluding the
24 ocean waters between the north and south jetties at the entrance of Humboldt Bay
25 from the westerly end of each of said jetties in the Pacific Ocean to their
26 respective aprons on the shores of Humboldt Bay, and also excluding all sloughs,
27 streams, and lagoons.

28 (b) Any reference to “District 7” shall be construed as a reference to District
29 2575.

30 **Comment.** Subdivision (a) of Section 2575 continues former Fish and Game Code Section
31 11015 without substantive change.

32 Subdivision (b) is new.

33 **§ 2580. District 2580**

34 2580. (a) The following constitutes Fish and Wildlife District 2580:

35 The waters and tidelands to high-water mark of Humboldt Bay lying north of a
36 straight line running east from the center of apron at the approach of the south
37 jetty at the entrance of Humboldt Bay to the east shore line of the bay, including
38 the entrance of Humboldt Bay not included in District 2575, and excluding all
39 rivers, streams, and sloughs emptying into the bay.

40 (b) Any reference to “District 8” shall be construed as a reference to District
41 2580.

Comment. Subdivision (a) of Section 2580 continues former Fish and Game Code Section 11016 without substantive change.

Subdivision (b) is new.

§ 2585. District 2585

2585. (a) The following constitutes Fish and Wildlife District 2585:

The waters and tidelands to high-water mark of Humboldt Bay lying south of a straight line running east from the center of apron at the approach to the south jetty at the entrance of Humboldt Bay to the east shore line of the bay, excluding all rivers, streams, and sloughs emptying into the bay.

(b) Any reference to “District 9” shall be construed as a reference to District 2585.

Comment. Subdivision (a) of Section 2585 continues former Fish and Game Code Section 11017 without substantive change.

Subdivision (b) is new.

§ 2590. District 2590

2590. (a) The following constitutes Fish and Wildlife District 2590:

The ocean waters and the tidelands of the State to high-water mark lying between the southern boundary of Mendocino County and a line extending west from the Pigeon Point lighthouse in San Mateo County, including the waters of Tomales Bay to a line drawn from the mouth of the unnamed creek approximately 1500 feet north of Tomasini Point southwesterly 218° magnetic to the mouth of the unnamed creek at Shell Beach, and excluding Bodega Lagoon and all that portion of Bolinas Bay lying inside of Bolinas bar, that portion of San Francisco Bay lying east of a line drawn from Point Bonita to Point Lobos and all rivers, streams, and lagoons.

(b) Any reference to “District 10” shall be construed as a reference to District 2590.

Comment. Subdivision (a) of Section 2590 continues former Fish and Game Code Section 11018 without substantive change.

Subdivision (b) is new.

Note. The second paragraph of existing Fish and Game Code Section 11018 reads as follows: “The amendment of this section by the Legislature at the 1963 Regular Session has no effect on the cultivation of oysters by persons licensed under Article 4 (commencing with Section 6480), Chapter 5, Part 1, Division 6.”

The amendment referenced in this language changed the description of one of the geographical areas that comprise existing Fish and Game District 10. See 1965 Cal. Stat. ch. 1487. The statutory article referenced in the paragraph was repealed in 1971, and was not unambiguously continued in any presently existing sections of the code. See 1971 Cal. Stat. ch. 347. The cultivation of oysters is now more generally regulated under the aquaculture provisions of the existing code, and pursuant to oyster leases. See existing Fish and Game Code Sections 15406.5, 15406.7.

The Commission believes the second paragraph of existing Section 11018 is now obsolete, and would not be continued by proposed Section 2590.

The Commission invites comment on the discontinuation of the second paragraph of existing Section 11018 in the proposed law.

1 **§ 2595. District 2595**

2 2595. (a) The following constitutes Fish and Wildlife District 2595:

3 The waters and tidelands of San Francisco Bay to high-water mark bounded as
4 follows: Beginning at the extreme westerly point of Point Bonita; thence in a
5 direct line to the extreme westerly point of Point Lobos; thence around the shore
6 line of San Francisco Bay to the foot of Powell Street; thence in a direct line
7 northwesterly to Peninsula Point, the most southerly extremity of Belvedere
8 Island; thence in a direct line westerly to the easternmost point of the ferry dock at
9 Sausalito; thence southerly and westerly around the shore of San Francisco Bay to
10 the point of beginning.

11 (b) Any reference to “District 11” shall be construed as a reference to District
12 2595.

13 **Comment.** Subdivision (a) of Section 2595 continues former Fish and Game Code Section
14 11019 without substantive change.

15 Subdivision (b) is new.

16 **§ 2600. District 2600**

17 2600. (a) The following constitutes Fish and Wildlife District 2600:

18 The waters and tidelands of San Francisco Bay to high-water mark not included
19 in Districts 2595 and 2605, the waters and tidelands to high-water mark of San
20 Leandro Bay, Oakland Creek or estuary, San Antonio Creek in Alameda County,
21 Raccoon Strait, San Pablo Bay, the Carquinez Strait to the Carquinez Bridge, and
22 all lands and waters included within the exterior boundaries of these districts and
23 excluding all tributary sloughs, creeks, bays, rivers, and overflowed areas not
24 specifically described herein.

25 (b) Any reference to “District 12” shall be construed as a reference to District
26 2600.

27 **Comment.** Subdivision (a) of Section 2600 continues former Fish and Game Code Section
28 11020 without substantive change.

29 Subdivision (b) is new.

30 **§ 2605. District 2605**

31 2605. (a) The following constitutes Fish and Wildlife District 2605:

32 The waters and tidelands to high-water mark of San Francisco Bay lying to the
33 south of a line drawn between the Ferry Building at the foot of Market Street in
34 San Francisco and the mouth of the Oakland Creek or estuary in Alameda County,
35 excluding all streams, sloughs, and lagoons.

36 (b) Any reference to “District 13” shall be construed as a reference to District
37 2605.

38 **Comment.** Subdivision (a) of Section 2605 continues former Fish and Game Code Section
39 11022 without substantive change.

40 Subdivision (b) is new.

41 **§ 2610. District 2610**

42 2610. (a) The following constitutes Fish and Wildlife District 2610:

1 The waters and tidelands to high-water mark of that portion of Monterey Bay
2 lying to the south of a line drawn 100° magnetic from the extreme northerly point
3 of Point Pinos in a straight line easterly to the eastern shore of Monterey Bay.

4 (b) Any reference to “District 16” shall be construed as a reference to District
5 2610.

6 **Comment.** Subdivision (a) of Section 2610 continues former Fish and Game Code Section
7 11024 without substantive change.

8 Subdivision (b) is new.

9 **§ 2615. District 2615**

10 2615. (a) The following constitutes Fish and Wildlife District 2615:

11 The waters and tidelands to high-water mark of Monterey Bay and the Pacific
12 Ocean, lying between a line extending west from Pigeon Point Lighthouse and a
13 line extending west from Yankee Point, Carmel Highlands in Monterey County,
14 excluding the areas included in District 2610, and excluding all rivers, creeks,
15 sloughs and lagoons emptying into the Pacific Ocean and Monterey Bay within the
16 boundaries thus defined.

17 (b) Any reference to “District 17” shall be construed as a reference to District
18 2615.

19 **Comment.** Subdivision (a) of Section 2615 continues former Fish and Game Code Section
20 11025 without substantive change.

21 Subdivision (b) is new.

22 **§ 2620. District 2620**

23 2620. (a) The following constitutes Fish and Wildlife District 2620:

24 The ocean waters of the State and tidelands to high-water mark not included in
25 other districts, lying between a line extending due west from Yankee Point,
26 Carmel Highlands, in Monterey County, and a line extending from Point Rincon
27 near or at the common boundaries between Santa Barbara and Ventura Counties
28 westerly through Richardson Rock, and excluding all rivers, streams, sloughs, and
29 lagoons.

30 (b) Any reference to “District 18” shall be construed as a reference to District
31 2620.

32 **Comment.** Subdivision (a) of Section 2620 continues former Fish and Game Code Section
33 11026 without substantive change.

34 Subdivision (b) is new.

35 **§ 2625. District 2625**

36 2625. (a) The following constitutes Fish and Wildlife District 2625:

37 The ocean waters of the State and tidelands to high-water mark, and islands off
38 the coast and waters adjacent thereto, lying southerly of Fish and Wildlife District
39 1870, and northerly of a westerly extension of the boundary line between the
40 Republic of Mexico and San Diego County, excepting Districts 2630, 2635, 2640,
41 2645, and 2650, and excluding all rivers, streams, sloughs, lagoons, and bays.

1 (b) Any reference to “District 19” shall be construed as a reference to District
2 2625.

3 **Comment.** Subdivision (a) of Section 2625 continues former Fish and Game Code Section
4 11027 without substantive change.

5 Subdivision (b) is new.

6 **§ 2630. District 2630**

7 2630. (a) The following constitutes Fish and Wildlife District 2630:

8 The ocean waters and tidelands to high-water mark lying between the southerly
9 extremity of Malibu Point and the westerly extremity of Rocky Point (Palos
10 Verdes Point), excluding all rivers, streams and lagoons.

11 (b) Any reference to “District 19A” shall be construed as a reference to District
12 2630.

13 **Comment.** Subdivision (a) of Section 2630 continues former Fish and Game Code Section
14 11028 without substantive change.

15 Subdivision (b) is new.

16 **§ 2635. District 2635**

17 2635. (a) The following constitutes Fish and Wildlife District 2635:

18 The ocean waters and tidelands to high-water mark northerly of the following
19 line:

20 Beginning at the west end of the San Pedro Breakwater, thence in an extended
21 line following the axis of said San Pedro Breakwater, the middle breakwater and
22 the Long Beach Breakwater to the east end of the latter, thence to the outer end of
23 the west jetty of Anaheim Bay.

24 (b) Except as otherwise provided, all of the provisions of this code applicable to
25 Districts 2550 and 2555 apply to District 2635.

26 (c) Any reference to “District 19B” shall be construed as a reference to District
27 2635.

28 **Comment.** Subdivision (a) of Section 2635 continues former Fish and Game Code Section
29 11029 without substantive change.

30 Subdivision (b) is new.

31 **§ 2640. District 2640**

32 2640. (a) The following constitutes Fish and Wildlife District 2640:

33 Santa Catalina Island and the portion of the waters of the state within three
34 nautical miles of the island’s coast line on the northerly, easterly, and southerly
35 side of the island, lying between a line extending three nautical miles west
36 magnetically from the extreme westerly end of Santa Catalina Island to a line
37 extending three nautical miles southwest magnetically from the most southerly
38 promontory of China Point.

39 (b) Any reference to “District 20” shall be construed as a reference to District
40 2640.

41 **Comment.** Subdivision (a) of Section 2640 continues former Fish and Game Code Section
42 11030 without substantive change.

1 Subdivision (b) is new.

2 **§ 2645. District 2645**

3 2645. (a) The following constitutes Fish and Wildlife District 2645:

4 The waters lying around Santa Catalina Island, within three nautical miles of the
5 coast line of the island, which are not included in District 2640.

6 (b) Any reference to “District 20A” shall be construed as a reference to District
7 2645.

8 **Comment.** Subdivision (a) of Section 2645 continues former Fish and Game Code Section
9 11031 without substantive change.

10 Subdivision (b) is new.

11 **§ 2650. District 2650**

12 2650. (a) The following constitutes Fish and Wildlife District 2650:

13 The waters and tidelands to high water mark of San Diego Bay lying inside of a
14 straight line drawn from the southerly extremity of Point Loma to the offshore end
15 of the San Diego breakwater.

16 (b) Any reference to “District 21” shall be construed as a reference to District
17 2650.

18 **Comment.** Subdivision (a) of Section 2650 continues former Fish and Game Code Section
19 11032 without substantive change.

20 Subdivision (b) is new.

21 **§ 2655. District 2655**

22 2655. (a) The following constitutes Fish and Wildlife District 2655:

23 All of Imperial County and those portions of Riverside and San Bernardino
24 Counties lying south and east of the following line: Starting at the intersection of
25 Highway 99 with the north boundary of Imperial County, thence north along that
26 highway to the intersection with Highway 60 and 70; thence east along Highway
27 60 and 70 to its intersection with the Cottonwood Springs Road in Sec. 9, T. 6 S.,
28 R. 11 E.; thence north along that road and the Mecca Dale Road to Amboy; thence
29 east along Highway 66 to the intersection with Highway 95; thence north along
30 Highway 95 to the California-Nevada boundary.

31 (b) Any reference to “District 22” shall be construed as a reference to District
32 2655.

33 **Comment.** Subdivision (a) of Section 2655 continues former Fish and Game Code Section
34 11033 without substantive change.

35 Subdivision (b) is new.

36 **§ 2660. District 2660**

37 2660. (a) The following constitutes Fish and Wildlife District 2660:

38 The lands and waters lying within the drainage area of Rubicon and Little
39 Rubicon Rivers above their confluence in Sec. 13, T. 13 N., R. 13 E.; all lands and
40 waters lying within the drainage area of the South Fork of the American River and
41 all its tributaries above Chili Bar Bridge on the Placerville-Georgetown Highway;

1 all of the lands and waters lying within the drainage area of Webber Creek above
2 the Mother Lode Highway between El Dorado and Placerville; the waters of Lake
3 Tahoe and the Truckee River, and all streams flowing into that lake and river, and
4 all lands and waters within the drainage basin of that lake and river lying within
5 this State; the waters of Silver Lake, Twin Lakes, Twin Lake, Blue Lakes,
6 Meadow Lake, Wood Lake, Winnemucca Lake and Scott's Lake, Burnside Lake,
7 the Carson River, the West Fork of the Carson River, Willow Creek and
8 Markleeville Creek and all tributaries of those streams and all streams flowing into
9 those lakes and all lands and waters lying within the drainage basin of those lakes,
10 rivers and streams within this State; all the waters of the Cosumnes River and its
11 tributaries, and all lakes lying within the watershed of that river and tributaries
12 above the bridge on the Mother Lode Highway between Plymouth and Nashville,
13 all being within the Counties of Alpine, Amador, and El Dorado.

14 (b) Any reference to "District 23" shall be construed as a reference to District
15 2660.

16 **Comment.** Subdivision (a) of Section 2660 continues former Fish and Game Code Section
17 11034 without substantive change.

18 Subdivision (b) is new.

19 **§ 2665. District 2665**

20 2665. (a) The following constitutes Fish and Wildlife District 2665:

21 The waters of Lake Almanor and all streams flowing into that lake and all lands
22 lying within the drainage basin of those streams and lake, all being within the
23 Counties of Plumas and Lassen.

24 (b) Any reference to "District 25" shall be construed as a reference to District
25 2665.

26 **Comment.** Subdivision (a) of Section 2665 continues former Fish and Game Code Section
27 11035 without substantive change.

28 Subdivision (b) is new.

29 **§ 2670. District 2670**

30 2670. (a) The following constitutes Fish and Wildlife District 2670:

31 The waters of the Klamath River as described in the initiative act to create the
32 Klamath River Fish and Game District, approved by the electors on November 4,
33 1924, which initiative act provides:

34 The Klamath River Fish and Game District is hereby created and shall consist
35 of the Klamath River and the waters thereof, following its meanderings from
36 the confluence of the Klamath River and the Shasta River in the County of
37 Siskiyou to the mouth of the Klamath River in Del Norte County.

38 (b) Any reference to the "Klamath River district" shall be construed as a
39 reference to District 2670.

40 **Comment.** Subdivision (a) of Section 2670 continues the first three paragraphs of former Fish
41 and Game Code Section 11036 without substantive change.

42 Subdivision (b) is new.

1 **§ 2675. District 2675**

2 2675. (a) The following constitutes Fish and Wildlife District 2675:

3 The Klamath River and the waters thereof, following its meanderings from the
4 mouth of the Klamath River in Del Norte County to its confluence with the
5 Salmon River, and also the Trinity River and the waters thereof, following its
6 meanderings from its confluence with the Klamath River in the County of
7 Humboldt to its confluence with the south fork of the said Trinity River.

8 (b) Any reference to the “Trinity and Klamath River District” shall be construed
9 as a reference to District 2675.

10 **Comment.** Subdivision (a) of Section 2675 continues former Fish and Game Code Section
11 11037 without substantive change.

12 Subdivision (b) is new.

13 **§ 2680. District 2680**

14 2680. (a) The following constitutes Fish and Wildlife District 2680:

15 The ocean waters and tidelands lying within the following boundaries:

16 Beginning at the south side of the pier at San Simeon thence westerly three
17 miles, thence southerly to a point three miles west of the southern boundary of the
18 state park at Cambria in San Luis Obispo County, thence easterly to the southwest
19 point of the state park at Cambria.

20 (b) All of the provisions relating to District 2620 shall apply to District 2680.

21 (c) Any reference to “District 118” shall be construed as a reference to District
22 2680.

23 **Comment.** Subdivisions (a) and (b) of Section 2680 continue former Fish and Game Code
24 Section 11038 without substantive change.

25 Subdivision (c) is new.

26 **§ 2685. District 2685**

27 2685. (a) The following constitutes Fish and Wildlife District 2685:

28 The ocean and tidelands to high-water mark, not included in other districts,
29 excluding all rivers, streams, sloughs, and lagoons, bounded by a line beginning at
30 the intersection of the common boundary of Monterey and San Luis Obispo
31 Counties with the mean high-water mark, thence due west two miles to a point,
32 thence by a line following the coast line and parallel to it southerly to a point two
33 miles south of the intersection of the common boundary of Santa Barbara and
34 Ventura Counties with the mean high-water mark, thence north to the intersection
35 of the common boundary of Santa Barbara and Ventura Counties with the mean
36 high-water mark.

37 (b) Except as otherwise provided, all of the provisions relating to District 2620
38 shall apply to District 2685.

39 (c) Any reference to “District 118.5” shall be construed as a reference to District
40 2685.

41 **Comment.** Subdivisions (a) and (b) of Section 2685 continue former Fish and Game Code
42 Section 11039 without substantive change.

43 Subdivision (c) is new.

PART 5. GENERAL LICENSE PROVISIONS

TITLE 1. LICENSES GENERALLY

CHAPTER 1. FORM AND VALIDITY

§ 2800. Form

(a) The commission shall determine the form of all licenses, permits, tags, reservations, and other entitlements and the method of carrying and displaying all licenses, and may require and prescribe the form of applications therefor and the form of any contrivance to be used in connection therewith.

(b) For programs where the department has fee-setting authority, the department has the authority described in subdivision (a).

Comment. Section 2800 restates former Fish and Game Code Section 1050(b) without substantive change.

§ 2810. Licenses uniquely numbered

2810. Licenses of each class shall be uniquely numbered. Every license shall contain its expiration date and the fee for which it is issued. If no fee is either required by this code or established by the commission pursuant to Section 3000, the license shall so indicate.

Comment. Section 2810 continues former Fish and Game Code Section 1051 without substantive change.

§ 2815. Validity

2815. Any license, permit, tag, stamp, or other entitlement authorized pursuant to this code is not valid until it is filled out completely and accurately and the fee authorized or identified in statute or regulation for the license is received and paid to the department or its agent. It is the responsibility of the user to ensure that the license, permit, tag, stamp, or other entitlement is filled out completely and accurately.

Comment. Section 2815 continues former Fish and Game Code Section 1050.1 without substantive change.

See also Section 4874 (enforcement).

§ 2820. Validity of stamp

2820. Any stamp issued pursuant to this part is not valid unless affixed to the appropriate license document.

Comment. Section 2820 continues former Fish and Game Code Section 1052.5 without substantive change.

See also Section 4874 (enforcement).

CHAPTER 2. ISSUANCE

§ 2900. Issuance generally

2900. The department may issue and shall collect payment for any entitlement, document, or authorization for which a fee is authorized pursuant to this code.

Comment. Section 2900 continues former Fish and Game Code Section 1054.5 without substantive change.

§ 2905. Issuance

2905. All licenses, permits, tags, reservations, and other entitlements authorized by this code shall be prepared and issued by the department.

Comment. Section 2905 continues former Fish and Game Code Section 1050(a) without substantive change.

§ 2910. Terms and conditions of issuance

2910. Whenever this code provides for a permit, license, tag, reservation, application, or other entitlement, the commission, in accordance with the provision, shall prescribe the terms and conditions under which the permit, license, tag, reservation, application, or other entitlement shall be issued, except for those programs where the department has fee-setting authority, in which case the department shall retain that authority. The department shall issue the permit, license, tag, reservation, application, or other entitlement in accordance therewith and with the applicable provisions of law.

Comment. Section 2910 continues former Fish and Game Code Section 1050(c) without substantive change.

 **Note.** The last sentence of proposed Section 2910 appears to be superfluous. See proposed Sections 2905 (duty of department to issue license), 2910(a)-(b) (terms under which license can be issued). **Can that sentence be deleted without causing a problem?**

§ 2915. Applicant information confidential

2915. (a) Except as otherwise provided in this section, the names and addresses contained in records submitted and retained by the department for the purpose of obtaining recreational fishing and hunting licenses are confidential and are not public records.

(b) Notwithstanding any other provision of law, the department may release the confidential information described in subdivision (a) under the following circumstances:

(1) To an agent or authorized family member of the person to whom the information pertains.

(2) To an officer or employee of another governmental agency when necessary for the performance of his or her official duties.

(3) In accordance with Section 7315.

(4) Pursuant to a court order.

1 **Comment.** Section 2915 continues former Fish and Game Code Section 1050.6 without
2 substantive change.

3 **§ 2920. Proof of statements or facts**

4 2920. (a) The department may require the applicant for a license, tag, permit, or
5 other privilege or entitlement to show proof of the statements or facts required for
6 the issuance of the license, tag, permit, or other privilege or entitlement.

7 (b) For purposes of this section, “department” includes any department
8 employee, license agent, or any person performing the duties of a department
9 employee or license agent.

10 **Comment.** Section 2920 continues former Fish and Game Code Section 1054(b)-(c) without
11 substantive change.

12 See also Section 4874 (enforcement).

13 **§ 2925. Temporary document**

14 2925. Notwithstanding any other provision of this code, the department may
15 issue a temporary document that allows the holder of a license, permit, license tag,
16 license stamp, application, reservation, or other entitlement purchased through the
17 Internet to enjoy the privileges of the entitlement for a period not to exceed 30
18 calendar days from the date of purchase.

19 **Comment.** Section 2925 continues former Fish and Game Code Section 1050.3 without
20 substantive change.

21 **§ 2930. Limitation on number of licenses issued to one person**

22 2930. A person shall not obtain more than one license, permit, reservation, or
23 other entitlement of the same class, or more than the number of tags authorized by
24 statute or regulation for the same license year, except under one of the following
25 conditions:

26 (a) A nonresident hunting license issued pursuant to paragraph (4) or (5) of
27 subdivision (a) of Section 10210, or a short-term sport fishing license issued
28 pursuant to paragraph (3), (4), or (5) of subdivision (a) of Section 13100.

29 (b) The loss or destruction of an unexpired license, tag, permit, reservation, or
30 other entitlement, except a stamp or endorsement, provided that all the following
31 requirements are met:

32 (1) The applicant certifies the loss or destruction of the license, tag, permit,
33 reservation, or other entitlement by signed affidavit.

34 (2) There is proof, as determined by the department, that the original license, tag,
35 permit, reservation, or other entitlement was issued.

36 (3) The applicant pays a base fee of five dollars (\$5). The base fee shall be
37 adjusted annually pursuant to Section 3755, not to exceed the fee for the original
38 entitlement. The adjustment shall apply to the hunting license years commencing
39 on or after July 1, 1996, and the fishing license years commencing on or after
40 January 1, 1996.

1 (c) The loss or destruction of a stamp or endorsement imprinted on a base
2 license that was issued through the Automated License Data System, on payment
3 of a base fee of three dollars (\$3) for each stamp or endorsement replaced on any
4 base license document. The base fee shall be adjusted annually pursuant to Section
5 3755, not to exceed the fee for the original entitlement. The base fee shall apply to
6 the 2011 license year.

7 **Comment.** Section 2930 restates former Fish and Game Code Sections 1053.1(a) without
8 substantive change.

9 See also Section 4874 (enforcement).

10 **§ 2935. License voucher**

11 2935. (a) The department may allow a person to purchase a license voucher as a
12 gift for a licensee when the licensee's complete and accurate personal information,
13 as defined in regulation, is not provided by the license buyer at the time of
14 purchase.

15 (b) A license purchase voucher entitles the holder of the voucher to redeem it for
16 the specific license, permit, tag, or other privilege or entitlement, and license year
17 for which it was purchased.

18 (c) A license purchase voucher shall expire and be considered void if not
19 redeemed within the license year for which it was purchased.

20 (d) A license purchase voucher may be issued and redeemed by a person
21 authorized by the department to issue licenses.

22 (e) The license agent handling fee, as provided under Section 3350, shall only
23 apply to the sale of the license purchase voucher.

24 **Comment.** Section 2935 continues former Fish and Game Code Section 1061(a)-(e) without
25 substantive change.

26 **§ 2940. Issuance of hunting tags for fundraising purposes**

27 2940. (a) The department shall establish, and keep current, written policies and
28 procedures relating to the application process and the award of hunting tags for
29 fundraising purposes, as authorized pursuant to Section 32950, 34850, 34215, or
30 35900.

31 (b) The policies and procedures shall include, but need not be limited to, all of
32 the following:

33 (1) The application process and criteria.

34 (2) A standard application format.

35 (3) An appeal process.

36 (4) A requirement that all applications shall remain sealed until on or after a
37 filing date specified by the department.

38 (c) The department shall make the policies and procedures available to
39 interested parties 30 days before their implementation and shall receive and
40 consider any related recommendations.

1 (d) The department shall not require a minimum tag sale price, except as
2 otherwise provided in this code.

3 (e) It is the intent of the Legislature that the department develop policies and
4 procedures that seek to maximize both the revenues received by the department
5 and participation by qualified nonprofit organizations making application to sell
6 the tags as sellers of the tags.

7 **Comment.** Section 2940 continues former Section 1054.8 without substantive change.

8 CHAPTER 3. FEES

9 § 3000. Commission authority to set or change license fees

10 3000. (a) In any of the following circumstances, the commission may, by
11 regulation, establish or change the amount of a fee for an application or for the
12 issuance of a license, tag, permit, application, reservation, or other entitlement:

13 (1) This code does not specify whether the fee is to be collected.

14 (2) This code does not specify the amount of the fee.

15 (3) This code does not prohibit, by express reference to this section, the
16 commission from adjusting a statutorily imposed fee.

17 (b) Fees established by the commission shall be in an amount sufficient to
18 recover all reasonable administrative and implementation costs of the department
19 and commission relating to the program with regard to which the fee is paid. The
20 commission may establish a fee structure that provides for the phasing in of new
21 fees leading up to full cost recovery for the department and commission, provided
22 that full cost recovery is achieved within five years of the establishment of the fee.

23 (c) The commission may change the amount of a fee in accordance with Section
24 3755.

25 (d) This section does not apply to fees set by the department pursuant to Section
26 3750.

27 **Comment.** Section 3000 restates former Fish and Game Code Section 1050(d) without
28 substantive change.

29 § 3005. Application fee

30 3005. (a) Whenever this code provides for a license, tag, permit, reservation, or
31 other entitlement, the commission or department, as applicable, may establish a
32 nonrefundable application fee, not to exceed the lesser of (1) seven dollars and
33 fifty cents (\$7.50) or (2) an amount sufficient to pay the department's costs for
34 issuing the license, tag, permit, reservation, or other entitlement.

35 (b) The commission or department, as applicable, may adjust the application fee
36 in accordance with Section 3755.

37 **Comment.** Section 3005 restates former Fish and Game Code Section 1050(f) without
38 substantive change.

1 **§ 3010. Credit card payment**

2 3010. The department may accept a credit card charge as a method of payment.
3 Any contract executed by the department with credit card issuers or draft
4 purchasers shall be consistent with Section 6159 of the Government Code.
5 Notwithstanding Title 1.3 (commencing with Section 1747) of Part 4 of Division 3
6 of the Civil Code, the department may impose a surcharge in an amount to cover
7 the cost of providing the credit card service, including reimbursement for any fee
8 or discount charged by the credit card issuer.

9 **Comment.** Section 3010 continues former Fish and Game Code Section 1050.5 without
10 substantive change.

11 CHAPTER 4. VIOLATIONS

12 **§ 3050. Unlawful acts**

13 3050. It is unlawful for any person to do any of the following:

14 (a) Transfer any license, tag, stamp, permit, application, or reservation.

15 (b) Use or possess any license, tag, stamp, permit, application, or reservation
16 that was not lawfully issued to the user or possessor thereof or that was obtained
17 by fraud, deceit, or the use of a fake or counterfeit application form.

18 (c) Use or possess any fake or counterfeit license, tag, stamp, permit, permit
19 application form, band, or seal, made or used for the purpose of evading any of the
20 provisions of this code, or regulations adopted pursuant to this code.

21 (d) Predate, fail to date, or alter any date of any license, tag, or permit.

22 (e) Postdate the date of application or the date of issuance of the license, tag, or
23 permit. This subdivision does not apply to the date that a license, tag, or permit is
24 valid.

25 (f) Alter, mutilate, deface, duplicate, or counterfeit any license, tag, permit,
26 permit application form, band, or seal, or entries thereon, to evade the provisions
27 of this code, or any regulations adopted pursuant to this code.

28 **Comment.** Section 3050 continues former Fish and Game Code Section 1052 without
29 substantive change.

30 See also Section 4874 (enforcement).

31 TITLE 2. LICENSE AGENTS

32 CHAPTER 1. AUTHORIZED LICENSE AGENT

33 **§ 3200. Application and approval generally**

34 3200. (a) Any person, except a commissioner, officer, or employee of the
35 department, may submit an application to the department to be a license agent to
36 issue licenses, permits, reservations, tags, or other entitlements.

(b) A person shall only be authorized to be a license agent to issue licenses, permits, reservations, tags, and other entitlements, upon the written approval of the department.

Comment. Section 3200 continues former Fish and Game Code Section 1055.1(a)-(b) without substantive change.

§ 3205. Nonprofit as license agent for sale of lifetime licenses

3205. (a) The department may designate a nonprofit organization, organized pursuant to the laws of this state, or the California chapter of a nonprofit organization, organized pursuant to the laws of another state, as a license agent for the sale of lifetime licenses issued pursuant to Sections 10225 and 13105. These licenses may be sold by auction or by other methods and are not subject to the fee limitations prescribed in this code.

(b) An agent authorized to issue lifetime sport fishing licenses and lifetime hunting licenses under this section is exempt from subdivisions (a) and (c) of Section 3350. The license agent shall remit to the department the fees from the sale of lifetime licenses as defined in Sections 3031.2 and 13105.

Comment. Section 3205 continues former Fish and Game Code Section 1055.1(g) without substantive change.

Notes. (1) Does the exemption in proposed Section 3205(b) apply to any type of license sold by a license agent authorized to sell lifetime licenses under that section? Or does the exemption only apply to lifetime licenses sold by such a license agent?
(2) Are “nonprofit organizations” the only persons who can act as license agents for the sale of lifetime licenses?

§ 3210. Wildlife area passes and native species stamps

3210. The department may authorize any person other than a commissioner or an officer or employee of the department to issue, as an agent of the department, annual wildlife area passes and native species stamps, and to sell promotional materials and nature study aids pursuant to, and subject to the requirements of, this part. An agent thus authorized may add a handling charge pursuant to Section 3350 to the fee prescribed in Chapter 3 (commencing with Section 56050) of Title 6 of Part 2 of Division 15 for each annual wildlife area pass or native species stamp issued.

Comment. Section 3210 continues former Fish and Game Code Section 1055.3 without substantive change. Cross-references to repealed subdivisions of former Fish and Game Code Section 1055 are not continued.

CHAPTER 2. AUTOMATED LICENSE DATA SYSTEM

§ 3250. Provision of licenses

3250. (a) The department may provide licenses, permits, reservations, tags, or other entitlements to authorized license agents and shall collect, prior to delivery,

an amount equal to the fees for all licenses, permits, reservations, tags and other entitlements provided.

(b) Any licenses, permits, reservations, tags, or other entitlements provided pursuant to this section that remain unissued at the end of the license year may be returned to the department for refund or credit, or a combination of refund and credit, within six months of the item expiration date. No credit may be allowed after six months following the last day of the license year.

(c) Any license agent who pays the fees prior to delivery for licenses, permits, reservations, tags, or other entitlements is exempt from Sections 3360, 3365, and 3370.

Comment. Subdivision (a) of Section 3250 continues the first sentence of former Fish and Game Code Section 1055.1(c) without substantive change.

Subdivision (b) continues the third and fourth sentences of former Fish and Game Code Section 1055.1(c) without substantive change.

Subdivision (c) continues the second sentence of former Fish and Game Code Section 1055.1(c) without substantive change.

Notes. (1) Section 1055.1(c) was modeled after language in Section 1055(d), which describes license agents who prepay the Department of Fish and Wildlife for physical licenses and then sell them to the public. As a result of that origin, the language does not do a very good job of describing the ALDS system. **The Commission invites comment on whether proposed Section 3250(a) could be restated for greater accuracy.**

(2) The Commission's understanding is that ALDS is a print-on-demand system. Licenses are only printed when they have been purchased. Consequently, it is not clear that proposed Section 3250(b) has any meaningful application. The inclusion of that provision in existing Section 1055.1(c) may have been inadvertent. **The Commission requests public comment on whether the provision should be deleted as unnecessary.**

(3) Similarly, proposed Section 3250(c) continues the second sentence of existing Section 1055.1(c), which provides express exemptions for an ALDS license agent who pays for licenses "prior to delivery." The Commission's understanding is that ALDS sales are never pre-paid. Instead, charges for ALDS license sales are logged and electronic transfers are made periodically, after the fact. **The Commission requests public comment on whether the exemptions in Section 1055.1(c) apply to ALDS sales.**

§ 3255. Remittance

3255. (a) Except as provided in subdivision (b), each license agent authorized pursuant to Section 3200 shall remit to the department the fees prescribed in this code or in regulations adopted pursuant to this code for all licenses, permits, reservations, tags, and other entitlements by electronic means, such as electronic fund transfer. In order to facilitate the prompt remittance of revenues, the department is authorized to withdraw funds from the bank account of the license agent, including adjustments, by electronic transfer. License agents shall ensure that the total fees required for all licenses, permits, reservations, tags, or other entitlements necessary to perform the electronic transfer are available on the date specified by the license agent contract.

1 (b) A license agent shall report to the department on or before the end of the
2 next business day of the department any losses of fees received from the issuing of
3 licenses, permits, reservations, tags, or other entitlements.

4 (c) Except as provided in subdivision (b), any fees not transmitted or made
5 available to the department within seven days following the due date as specified
6 by the department are delinquent, and delinquent fees are subject to interest and
7 penalties prescribed in Section 3360. Interest and penalties shall be computed
8 beginning one day following the due date as specified by the department.

9 **Comment.** Subdivision (a) of Section 3255 continues former Fish and Game Code Section
10 1055.6(a) without substantive change.

11 Subdivision (b) continues former Fish and Game Code Section 1055.6(b) without substantive
12 change.

13 Subdivision (c) continues former Fish and Game Code Section 1055.6(d) without substantive
14 change.

15 **§ 3260. Advertisement of Automated License Data System website**

16 3260. (a) A nonprofit conservation organization seeking promotion, exposure,
17 and awareness of the organization on the Automated License Data System Online
18 License Service Internet Web site, as feasible, through the display of the
19 organization's logo, or other graphics agreed upon by the organization and the
20 department, to give a prospective license buyer the opportunity to link
21 electronically to the organization's Internet home page, shall submit, by
22 September 30 of each year, a letter to the department providing evidence that the
23 organization meets the criteria set forth in subdivision (c). If the department
24 determines that the nonprofit conservation organization is eligible, it shall include
25 the organization's logo or other graphics in a space with a link to the
26 organization's Internet home page on the Automated License Data System Online
27 License Service Internet Web site for a time period agreed upon by both parties.

28 (b) The department may impose a charge on a nonprofit conservation
29 organization for inclusion on the Automated License Data System Online License
30 Service Internet Web site pursuant to subdivision (a) that shall not exceed the
31 costs associated with the direct administration of this section.

32 (c) As used in this section, "nonprofit conservation organization" means an
33 entity that the department determines meets all of the following:

34 (1) It is a nonprofit organization described in Section 501(c)(3) of the Internal
35 Revenue Code (26 U.S.C. Sec. 501(c)(3)), that is exempt from taxation under
36 Section 501(a) of that code (26 U.S.C. Sec. 501(a)).

37 (2) It is registered with the Attorney General.

38 (3) Its goals and objectives are related to the conservation of sport fish or game
39 species.

40 (4) In at least one of the previous three calendar years, it has entered into, or
41 been obligated under, a contract or other agreement, including, but not limited to,
42 a license, easement, memorandum of understanding, or lease, with the department
43 to perform habitat or other wildlife conservation work, to provide hunting or

1 fishing opportunities for the public, to raise funds on behalf of the department,
2 including, but not limited to, the sale of hunting fundraising tags or related items,
3 or to otherwise provide assistance to the department that is consistent with the
4 department's mission.

5 (d) The department shall deposit revenues of the charge imposed pursuant to
6 subdivision (b) in the Fish and Game Preservation Fund, to be available, upon
7 appropriation by the Legislature, exclusively to pay all initial and ongoing costs
8 associated with the direct administration of this section, including, but not limited
9 to, a portion of the costs of making changes to the Automated License Data
10 System necessary to implement this section.

11 (e) The department shall implement the links from the Automated License Data
12 System Online License Service Internet Web site by January 1, 2015, if it
13 determines that date is feasible.

14 **Comment.** Section 3260 continues former Fish and Game Code Section 1065 without
15 substantive change.

16 CHAPTER 3. FINANCIAL PROVISIONS

17 § 3350. Handling charge

18 3350. (a) Authorized license agents shall add a handling charge to the fees
19 prescribed in this code or in regulations adopted pursuant to this code for any
20 license, permit, reservation, tag, and other entitlement issued by the license agent
21 in an amount that is 5 percent of the face value of the item rounded to the nearest
22 five cents (\$0.05).

23 (b) The handling charge added pursuant to subdivision (a) shall be incorporated
24 into the total amount collected for issuing the license, permit, reservation, tag, and
25 other entitlement, but the handling charge shall not be included when determining
26 license fees in accordance with Section 3755. A license agent may issue any
27 license, permit, reservation, tag, or other entitlement for any amount up to 10
28 percent less than the fee prescribed in this code or in regulations adopted pursuant
29 to this code. The license agent shall remit to the department the full amount of the
30 fees as prescribed in this code or in regulations adopted pursuant to this code for
31 all licenses, permits, reservations, tags, and other entitlements issued.

32 (c) The handling charge required by subdivision (a) is the license agent's only
33 compensation for services. The license agent shall not be entitled to any other
34 additional fee or charge for issuing any license, permit, reservation, tag, or other
35 entitlement authorized pursuant to this section.

36 **Comment.** Section 3350 continues former Fish and Game Code Section 1055.1(d)-(f) without
37 substantive change.

38 § 3360. Failure of license agent to account

39 3360. (a) It is unlawful for a license agent to fail or refuse to account for
40 licenses, permits, reservations, tags, and other entitlements or any fees received

1 from their issuance as required by Section 3255 or upon demand by an authorized
2 representative of the department.

3 (b) In addition to subdivision (a), any license agent who fails to remit fees to the
4 department on or before the date required by Section 3255 shall pay interest and
5 penalties prescribed for sales and use taxes and, except as otherwise provided in
6 this code, the department shall collect amounts owing under the procedures
7 prescribed for sales and use taxes provided in Chapters 5 (commencing with
8 Section 6451) and 6 (commencing with Section 6701) of Part 1 of Division 2 of
9 the Revenue and Taxation Code, insofar as they may be applicable, and for those
10 purposes, “board” means the department.

11 **Comment.** Section 3360 restates former Fish and Game Code Section 1059(b) without
12 substantive change. See also Section 4450 (enforcement).

13 **§ 3365. Separate accounting required**

14 3365. All license, tag, permit, reservation, and other entitlement money shall be
15 accounted for separately from other funds of a license agent, and shall at all times
16 belong to the state.

17 **Comment.** Section 3365 continues former Section 1057 without substantive change.

18 **§ 3370. Bond**

19 3370. A license agent who fails to transmit the fees or accounting reports
20 required by Section 3255 not later than 60 days following the due date as specified
21 by the department may be required to execute, in favor of the department, a bond,
22 payable to the department, in a sum determined by the department in order to
23 continue as a license agent. The bond shall secure the accurate accounting and
24 payment to the department of the funds collected and the performance of the
25 duties imposed upon the license agent by this article.

26 **Comment.** Section 3370 continues former Fish and Game Code Section 1056 without
27 substantive change.

28 **§ 3375. Preferred claim**

29 3375. In case of an assignment for the benefit of creditors, receivership, or
30 bankruptcy, the state shall have a preferred claim against the license agent’s
31 assignee, receiver, or trustee for all moneys owing the state for the issuing of
32 licenses, permits, reservations, tags, and other entitlements as provided in this
33 code and shall not be estopped from asserting that claim by reason of the
34 commingling of funds or otherwise.

35 **Comment.** Section 3375 continues former Fish and Game Code Section 1058 without
36 substantive change.

PART 6. GENERAL FINANCIAL PROVISIONS

TITLE 1. STATE

CHAPTER 1. LEGISLATIVE FINDINGS, DECLARATIONS, AND INTENT

§ 3450. Legislative findings and declarations of 1978 (as amended in 2006)

3450. The Legislature finds and declares that the department has in the past not been adequately funded to meet its mandates. The principal causes have been the fixed nature of the department's revenues in contrast with the rising costs resulting from inflation, the increased burden on the department to carry out its public trust responsibilities, and additional responsibilities placed on the department by the Legislature. This lack of funding has prevented proper planning and personnel allocation. The lack of funding has required the department to restrict wildlife officer enforcement and to defer essential management of lands acquired for wildlife conservation. The lack of funding for fish and wildlife conservation activities other than sport and commercial fishing and hunting activities has resulted in inadequate wildlife and habitat conservation and wildlife protection programs.

Comment. Section 3450 continues former Fish and Game Code Section 710 without substantive change.

§ 3455. Legislative findings and declarations of 1990

3455. (a) The Legislature finds and declares that the department continues to be inadequately funded to meet its mandates. While revenues have been declining, the department's responsibilities have increased in order to protect public trust resources in the face of increasing population and resource management demands. The department's revenues have been limited due to a failure to maximize user fees and inadequate non-fee-related funding. The limited department revenues have resulted in the inability of the department to effectively provide all of the programs and activities required under this code and to manage the wildlife resources held in trust by the department for the people of the state.

(b) The Legislature further finds and declares that the department has been largely supported by fees paid by those who utilize the resources held in trust by the department. It is the intent of the Legislature that, to the extent feasible, the department should continue to be funded by user fees. All fees collected by the department, including, but not limited to, recreational hunting and fishing licenses, landing fees, commercial licenses, permits and entitlements, and other fees for use of the resources regulated or managed by the department, are user fees. To the extent that these fees are appropriated through the Budget Act for the purposes for which they are collected to provide services to the people of the State of

1 California, these user fees are not subject to Article XIII B of the California
2 Constitution.

3 (c) The Legislature further finds and declares that user fees are not sufficient to
4 fund all of the department's mandates. To fulfill its mandates, the department must
5 secure a significant increase in reliable funding, in addition to user fees.

6 **Comment.** Section 3455 continues former Fish and Game Code Section 710.5 without
7 substantive change.

8 **§ 3460. Legislative findings and declarations of 1992**

9 3460. (a) The Legislature finds and declares all of the following:

10 (1) The department continues to face serious funding instability due to revenue
11 declines from traditional user fees and taxes and the addition of new and expanded
12 program responsibilities.

13 (2) Historically, the recreational and commercial fishing industry has funded
14 much of the department's marine fisheries activities.

15 (3) As the state's population grows and development changes historic land uses,
16 fish and wildlife continue to be depleted, necessitating a significant portion of the
17 department's activities to be directed toward protecting fish and wildlife for the
18 benefit of the people of the state.

19 (b) It is the intent of the Legislature to extend the current user-based funding
20 system by allocating a portion of the marine resource protection costs to those who
21 use and benefit from recreational and commercial use of the marine resources.

22 (c) It is the Legislature's intent that, notwithstanding Section 3465, the
23 department shall cooperate with the Legislature, recreational users, conservation
24 organizations, the commercial fishing industry, and other interested parties to
25 identify and propose new alternative sources of revenue to fund the department's
26 necessary marine conservation, restoration, and resources management, and
27 protection responsibilities.

28 (d) It is further the intent of the Legislature to identify new funding sources and
29 to secure those sources to adequately fund the department's activities directed at
30 protecting and managing wildlife for the people of the state.

31 **Comment.** Section 3460 continues former Fish and Game Code Section 710.7 without
32 substantive change.

33 **§ 3465. Statement of legislative intent regarding funding**

34 3465. (a) It is the intent of the Legislature to ensure adequate funding from
35 appropriate sources for the department. To this end, the Legislature finds and
36 declares that:

37 (1) The costs of nongame fish and wildlife programs shall be provided annually
38 in the Budget Act by appropriating money from the General Fund, through
39 nongame user fees, and sources other than the Fish and Game Preservation Fund
40 to the department for these purposes.

(2) The costs of commercial fishing programs shall be provided out of revenues from commercial fishing fees, license fees, and other revenues, from reimbursements and federal funds received for commercial fishing programs, and other funds appropriated by the Legislature for this purpose.

(3) The costs of hunting and sportfishing programs shall be provided out of hunting and sportfishing revenues and reimbursements and federal funds received for hunting and sportfishing programs, and other funds appropriated by the Legislature for this purpose. These revenues, reimbursements, and federal funds shall not be used to support commercial fishing programs, free hunting and fishing license programs, or nongame fish and wildlife programs.

(4) The costs of managing lands managed by the department and the costs of wildlife management programs shall be supplemented out of revenues in the Native Species Conservation and Enhancement Account in the Fish and Game Preservation Fund.

(5) Hunting, sportfishing, and sport ocean fishing license fees shall be adjusted annually to an amount equal to that computed pursuant to Section 3755. However, a substantial increase in the aggregate of hunting and sportfishing programs shall be reflected by appropriate amendments to the sections of this code that establish the base sport license fee levels. The inflationary index provided in Section 3755 shall not be used to accommodate a substantial increase in the aggregate of hunting and sportfishing programs.

(6) The costs of a conservation and mitigation banking program, including, but not limited to, costs incurred by the department during its adoption of guidelines for, and the review, approval, establishment, monitoring, and oversight of, banks, shall be reimbursed from revenues of conservation and mitigation bank application fees imposed pursuant to Sections 65500 through 65670, inclusive.

(b) The director and the Secretary of the Natural Resources Agency, with the department's annual budget submittal to the Legislature, shall submit a report on the fund condition, including the expenditures and revenue, for all accounts and subaccounts within the Fish and Game Preservation Fund. The department shall also update its cost allocation plan to reflect the costs of program activities.

(c) For purposes of this section, "substantial increase" means an increase in excess of 5 percent of the Fish and Game Preservation Fund portion of the department's current year support budget, excluding cost-of-living increases provided for salaries, staff benefits, and operating expenses.

Comment. Section 3465 continues former Fish and Game Code Section 711 without substantive change.

Notes. (1) Existing Section 711(b) (which would be continued by proposed Section 3465(b)) is not a statement of legislative intent. It is a substantive provision. Moreover, it appears to duplicate the substance of existing Section 13001.5, with less detail. **Does existing Section 711(b) serve any purpose, or can it be deleted?**

(2) Existing Section 711(c) (which would be continued by proposed Section 3465(c)) provides a definition for the purposes of "this article." But existing Section 711 is the only section in the

1 referenced article that uses the defined term. **The provision's scope of application has been**
2 **narrowed accordingly.**

3 **§ 3470. Statement of legislative intent regarding nongame program funding**

4 3470. (a) It is the intent of the Legislature that the Department of Finance shall
5 include in the Governor's Budget sufficient moneys from the General Fund and
6 sources other than the Fish and Game Preservation Fund to pay the costs of the
7 department's nongame programs, including those necessary for the protection and
8 enhancement of California's nongame fish and wildlife and their habitat, the free
9 hunting and fishing license programs, and special repairs and capital outlay.

10 (b) It is the intent of the Legislature that the Department of Finance shall not
11 include in the Governor's Budget any appropriation from the Fish and Game
12 Preservation Fund for any program or project that is not expressly found to be an
13 activity relating to the protection or propagation of fish and wildlife, except to the
14 extent that moneys have been deposited in that fund from collections under a law
15 which is not related to the protection or propagation of fish and wildlife.

16 (c) Any study relating to funding of programs administered or conducted by the
17 department shall include express findings of whether the program is related to the
18 protection or propagation of fish and wildlife and shall describe the relationship.

19 **Comment.** Section 3470 continues former Fish and Game Code Section 712 without
20 substantive change.

21 **CHAPTER 2. ACCOUNTING**

22 **§ 3500. Fish and Game Preservation Fund**

23 3500. (a) The Fish and Game Preservation Fund in the State Treasury is
24 continued in existence.

25 (b) Wherever the term "Fish Commission Fund" or "Game Preservation Fund"
26 appears in any law, it means "Fish and Game Preservation Fund."

27 **Comment.** Subdivision (a) of Section 3500 continues former Fish and Game Code Section
28 13000 without substantive change.

29 Subdivision (b) continues former Fish and Game Code Section 12 without substantive change.

30 **§ 3505. Fund condition statement**

31 3505. (a) The department shall prepare annually, for inclusion in the Governor's
32 Budget, a fund condition statement for the Fish and Game Preservation Fund that
33 displays both of the following:

34 (1) Information relating to the total amounts of revenues and expenditures with
35 regard to the moneys in the fund that are deposited in an account or subaccount in
36 the fund.

37 (2) Information relating to revenues and expenditures with regard to all moneys
38 in the fund that are not deposited in an account or subaccount in the fund.

39 (b) For the purposes of subdivision (a), the department shall prepare the fund
40 condition statement in a manner that is similar to the fund condition statement

1 relating to the Fish and Game Preservation Fund included in the 2003-04
2 Governor's Budget.

3 (c) The department shall prepare, for posting on its Internet Web site on or
4 before January 10 of each year, a fund condition statement for each account or
5 subaccount in the fund.

6 **Comment.** Section 3505 continues former Fish and Game Code Section 13001.5 without
7 substantive change.

8 **§ 3510. Accounting method**

9 3510. The department shall account for revenues and expenditures of the money
10 in the Fish and Game Preservation Fund in a manner consistent with the laws and
11 applicable policies governing state departments generally for each activity or
12 program in which the department is engaged.

13 **Comment.** Section 3510 continues former Fish and Game Code Section 13200 without
14 substantive change.

15 **§ 3515. Program descriptions**

16 3515. In establishing the appropriate programs or activities for the purposes of
17 Section 3510, the department shall consider the following programs or activities:

- 18 (1) Freshwater fisheries activities.
- 19 (2) Marine fisheries activities.
- 20 (3) Wildlife management activities.
- 21 (4) Planning and environmental review.
- 22 (5) Law enforcement.
- 23 (6) Nongame and endangered species.
- 24 (7) General administration.

25 **Comment.** Section 3515 continues former Fish and Game Code Section 13201 without
26 substantive change.

27 **§ 3520. Payroll and other costs**

28 3520. (a) Payroll and other costs that are directly identifiable with specific
29 programs or activities shall be charged directly to accounts maintained for the
30 appropriate programs or activities.

31 (b) Payroll and other costs that are not identifiable with specific programs or
32 activities shall be allocated on an equitable basis to program or activity cost
33 accounts.

34 **Comment.** Section 3520 continues former Fish and Game Code Section 13202 without
35 substantive change.

36 **§ 3525. Basic principle of cost accounting system**

37 3525. The basic principle of the cost accounting system required by Section
38 3510 shall be that the total cost of operation of the department shall be accounted
39 for by accounting for the cost of each activity or program in which it is engaged.

1 **Comment.** Section 3525 continues former Fish and Game Code Section 13203 without
2 substantive change.

3 CHAPTER 3. REVENUE

4 Article 1. Deposit of Revenue

5 **§ 3600. Default deposit rule**

6 3600. Unless otherwise provided, all money collected under the provisions of
7 this code and of any other law relating to the protection and preservation of birds,
8 mammals, fish, reptiles, or amphibians shall be paid into the State Treasury to the
9 credit of the Fish and Game Preservation Fund.

10 **Comment.** Section 3600 continues former Fish and Game Code Section 13001(a) without
11 substantive change.

12 **§ 3605. Deposit of license revenue**

13 3605. The department shall pay into the State Treasury at least once a month the
14 money received by it from the sale of licenses issued under the provisions of this
15 code.

16 **Comment.** Section 3605 continues former Fish and Game Code Section 13002 without
17 substantive change.

18 **§ 3610. Deposit and apportionment of fines and forfeitures**

19 3610. (a) Unless otherwise provided by law, a fine or forfeiture imposed or
20 collected in any court of this state for a violation of a provision of this code, a
21 regulation adopted pursuant to this code, or any other law providing for the
22 protection or preservation of birds, mammals, fish, reptiles, or amphibians, shall
23 be deposited as soon as practicable after the receipt thereof with the county
24 treasurer of the county in which the court is situated.

25 (b) Amounts deposited pursuant to subdivision (a) shall be paid at least once a
26 month as follows:

27 (1) One-half to the Treasurer, by warrant of the county auditor drawn upon the
28 requisition of the clerk or judge of the court, for deposit in the Fish and Game
29 Preservation Fund in the State Treasury on order of the Controller. At the time of
30 transmittal, the county auditor shall forward to the Controller, on a form or forms
31 that the Controller may prescribe, a record of the imposition, collection, and
32 payment of the fines or forfeitures. The department may employ legal counsel and
33 may expend these funds to pay the costs of legal actions brought in the name of
34 the people relating to the enforcement of this code by a district attorney, city
35 attorney, or the department, as appropriate.

36 (2) One-half to the county in which the offense was committed.

37 **Comment.** Section 3610 continues former Fish and Game Code Section 13003 without
38 substantive change.

Article 2. Gifts, Grants, Donations, and Related Matters

§ 3650. Deposit of gifts and bequests

3650. All moneys collected or received from gifts or bequests, or from municipal or county appropriations or donations for purposes relating to conservation programs, projects, and activities by the department shall be deposited in the State Treasury to the credit of the Fish and Game Preservation Fund. All moneys deposited pursuant to this section shall be used for purposes relating to conservation programs, projects, and activities by the department.

Comment. Section 3650 continues former Fish and Game Code Section 1225 without substantive change.

§ 3655. Funding agreements

3655. The department may enter into one or more agreements to accept funds from any person, nonprofit organization, or other public or private entity for purposes relating to conservation programs, projects, and activities by the department. Any funds received pursuant to this section shall be deposited in the Fish and Game Preservation Fund. The funds received shall supplement existing resources for purposes relating to conservation programs, projects, and activities by the department.

Comment. Section 3655 continues former Fish and Game Code Section 1226(a) without substantive change.

§ 3660. Grants and donations for financing of K9 program

3660. Notwithstanding Section 11005 of the Government Code, the department may seek and accept grants and donations from private and public organizations and agencies for the purpose of administering the Canine (K9) Program. The acceptance of one-time donations valued over fifteen thousand dollars (\$15,000) shall require approval of the Department of Finance.

Comment. Section 3660 continues former Fish and Game Code Section 859 without substantive change.

§ 3665. Commemorative license

3665. (a) The department may issue collectible, commemorative licenses to any person for purposes of promoting and supporting licensed hunting, fishing, and resource conservation, subject to all of the following:

(1) A commemorative license may be designed and produced as the department may determine and shall be clearly marked and identified as a commemorative license, rendering it invalid for the take of any mammal, bird, fish, reptile, or amphibian.

(2) A commemorative license shall not confer any rights, privileges, or other entitlements to any person purchasing or in possession of such a license.

1 (3) Provisions of this code that govern hunting and sport fishing licenses do not
2 apply to the purchase of a commemorative license. A commemorative license shall
3 not qualify as evidence required in subdivision (a) of Section 10200.

4 (b) All funds derived from the sale of commemorative licenses shall be
5 deposited in the Fish and Game Preservation Fund.

6 **Comment.** Section 3665 continues former Fish and Game Code Section 1050.8 without
7 substantive change.

8 **§ 3670. Wildlife officer stamp**

9 3670. (a) The department may offer for sale a wildlife officer stamp to be
10 designed and produced as the department may determine. The wildlife officer
11 stamp may be purchased on a voluntary basis from the department or an
12 authorized licensed agent for a donation of not less than five dollars (\$5). The
13 department may also design an electronic version of the wildlife officer stamp to
14 be offered through the Automated License Data System. There shall be no
15 indication on any license or permit of the purchase of a wildlife officer stamp.

16 (b) All revenues from sales under this section shall be deposited in the Fish and
17 Game Warden Stamp Account that is hereby created in the Fish and Game
18 Preservation Fund to permit separate accountability for the receipt and expenditure
19 of these funds. Funds deposited in the Fish and Game Warden Stamp Account
20 shall be used, upon appropriation, to support the department's wildlife officers.

21 **Comment.** Section 3670 continues former Fish and Game Code Section 860 without
22 substantive change.

23 **Article 3. Fees**

24 **§ 3750. Department authority to set or change fees**

25 3750. (a) The department may, by regulation, establish fees and adjust
26 statutorily imposed fees for the filings, permits, determinations, or other
27 department actions described in Sections 9200, 66200 to 66245, inclusive, and
28 69780.

29 (b) The department may change the amount of a fee in accordance with Section
30 3755.

31 (c) Fees established by the department shall be in an amount sufficient to
32 recover all reasonable administrative and implementation costs of the department
33 relating to the program with regard to which the fee is paid. The department may
34 establish a fee structure that provides for the phasing in of new fees leading up to
35 full cost recovery for the department, provided that full cost recovery is achieved
36 within five years of the establishment of the fee.

37 **Comment.** Section 3750 restates former Fish and Game Code Section 1050(e) without
38 substantive change.

1 **§ 3755. Inflation based changes in fees**

2 3755. (a) The changes in the Implicit Price Deflator for State and Local
3 Government Purchases of Goods and Services, as published by the United States
4 Department of Commerce, shall be used as the index to determine an annual rate
5 of increase or decrease in the fees for licenses, stamps, permits, tags, or other
6 entitlements issued by the department.

7 (b)(1) The department shall determine the change in the Implicit Price Deflator
8 for State and Local Government Purchases of Goods and Services, as published by
9 the United States Department of Commerce, for the quarter ending March 31 of
10 the current year compared to the quarter ending March 31 of the previous year.
11 The relative amount of the change shall be multiplied by the current fee for each
12 license, stamp, permit, tag, or other entitlement issued by the department.

13 (2) The product shall be rounded to the nearest twenty-five cents (\$0.25), and
14 the resulting amount shall be added to the fee for the current year. The resulting
15 amount shall be the fee for the license year beginning on or after January 1 of the
16 next succeeding calendar year for the license, stamp, permit, tag, or other
17 entitlement that is adjusted under this section.

18 (c) Notwithstanding any other provision of law, the department may recalculate
19 the current fees charged for each license, stamp, permit, tag, or other entitlement
20 issued by the department, to determine that all appropriate indexing has been
21 included in the current fees. This section shall apply to all licenses, stamps,
22 permits, tags, or other entitlements, that have not been increased each year since
23 the base year of the 1985-86 fiscal year.

24 (d) The commission, with respect to any license, stamp, permit, tag, or other
25 entitlement issued by the commission shall comply with subdivisions (a) to (c),
26 inclusive.

27 (e) The calculations provided for in this section shall be reported to the
28 Legislature with the Governor's Budget Bill.

29 (f) The Legislature finds that all revenues generated by fees for licenses, stamps,
30 permits, tags, and other entitlements, computed under this section and used for the
31 purposes for which they were imposed, are not subject to Article XIII B of the
32 California Constitution.

33 (g) The department and the commission, at least every five years, shall analyze
34 all fees for licenses, stamps, permits, tags, and other entitlements issued by it to
35 ensure the appropriate fee amount is charged. Where appropriate, the department
36 shall recommend to the Legislature or the commission that fees established by the
37 commission or the Legislature be adjusted to ensure that those fees are
38 appropriate.

39 **Comment.** Section 3755 continues former Fish and Game Code Section 713 without
40 substantive change.

CHAPTER 4. EXPENDITURES

§ 3800. Expenditures generally

3800. Except as provided in Section 67530, the money in the Fish and Game Preservation Fund, commencing with the 2005-06 fiscal year, is available for expenditure, upon appropriation by the Legislature, for all of the following purposes:

(a) To the department for payment of refunds of sums determined by it to have been erroneously deposited in the fund, including, but not limited to, money received or collected in payment of fees, licenses, permits, taxes, fines, forfeitures, or services.

(b) To the department for expenditure in accordance with law for the payment of all necessary expenses incurred in carrying out this code and any other laws for the protection and preservation of birds, mammals, reptiles, amphibians, and fish.

(c) To the commission for expenditure in accordance with law for the payment of the compensation and expenses of the commissioners and employees of the commission.

Comment. Section 3800 continues former Fish and Game Code Section 13220 without substantive change.

§ 3805. Secret witness program

3805. Notwithstanding Sections 3600 and 3810, the money collected from the penalties on fines, penalties, or forfeitures levied pursuant to Section 4425 shall be used only to pay the department's costs of support for the department's secret witness program. The purpose of the secret witness program is to facilitate the enforcement of this code and regulations adopted pursuant to this code. Contributions to the secret witness program may also be made pursuant to subdivision (k) of Section 3915.

Comment. Section 3805 continues former Fish and Game Code Section 13006 without substantive change.

§ 3810. Loans to General Fund

3810. Notwithstanding any other provision of law, the Controller may use the Fish and Game Preservation Fund for loans to the General Fund as provided in Sections 16310 and 16381 of the Government Code.

Comment. Section 3810 continues former Fish and Game Code Section 13001(b) without substantive change.

TITLE 2. COUNTIES

§ 3900. County fish and wildlife propagation fund

3900. (a) The amounts paid to and retained in the county treasury pursuant to Sections 3610 and 5802 shall be deposited in a county fish and wildlife

1 propagation fund and expended for the protection, conservation, propagation, and
2 preservation of fish and wildlife, under the direction of the board of supervisors,
3 pursuant to this title.

4 (b) All proposed expenditures from a county fish and wildlife propagation fund
5 shall be reviewed first at a regular meeting of the county board of supervisors or
6 its designated county fish and game commission to ensure compliance with
7 Section 3915.

8 **Comment.** Section 3900 continues former Fish and Game Code Section 13100 without
9 substantive change.

10 **§ 3905. Agreement between counties**

11 3905. (a) The board of supervisors of any county may enter into a written
12 agreement with the board of supervisors of one or more counties for the
13 expenditure of any funds deposited in its fish and wildlife propagation fund
14 pursuant to Section 3900 for any purpose authorized by Section 3915 in either, or
15 any, of the counties for the joint benefit of both, or all, of the counties as the
16 judgment of the boards of supervisors may direct. The purchase of real property
17 necessary for that purpose is lawful and title to that property shall be taken in the
18 joint names of each county that contributes funds for that purpose. The property
19 may be deeded to the state upon the express condition that it shall be employed for
20 the purposes of this title within the counties.

21 (b) The board of supervisors of one or more counties may enter into a written
22 agreement with the department for the expenditure of any funds deposited in its
23 fish and wildlife propagation fund pursuant to Section 3900 for any purpose
24 authorized by Section 3915.

25 **Comment.** Section 3905 continues former Fish and Game Code Section 13101 without
26 substantive change.

27 **§ 3910. Expenditures subject to Gov't Code § 29000 et seq**

28 3910. Expenditures from the fish and wildlife propagation fund of any county
29 shall be subject to the provisions of Division 3 (commencing with Section 29000)
30 of Title 3 of the Government Code.

31 **Comment.** Section 3910 continues former Fish and Game Code Section 13102 without
32 substantive change.

33 **§ 3915. Authorized expenditures**

34 3915. Expenditures from the fish and wildlife propagation fund of any county
35 may be made only for the following purposes:

36 (a) Public education relating to the scientific principles of fish and wildlife
37 conservation, consisting of supervised formal instruction carried out pursuant to a
38 planned curriculum and aids to education such as literature, audio and video
39 recordings, training models, and nature study facilities.

40 (b) Temporary emergency treatment and care of injured or orphaned wildlife.

1 (c) Temporary treatment and care of wildlife confiscated by the department as
2 evidence.

3 (d) Breeding, raising, purchasing, or releasing fish or wildlife which are to be
4 released upon approval of the department pursuant to Sections 25410 and 25415
5 onto land or into waters of local, state, or federal agencies or onto land or into
6 waters open to the public.

7 (e) Improvement of fish and wildlife habitat, including, but not limited to,
8 construction of fish screens, weirs, and ladders; drainage or other watershed
9 improvements; gravel and rock removal or placement; construction of irrigation
10 and water distribution systems; earthwork and grading; fencing; planting trees and
11 other vegetation management; and removal of barriers to the migration of fish and
12 wildlife.

13 (f) Construction, maintenance, and operation of public hatchery facilities.

14 (g) Purchase and maintain materials, supplies, or equipment for either the
15 department's ownership and use or the department's use in the normal
16 performance of the department's responsibilities.

17 (h) Predator control actions for the benefit of fish or wildlife following
18 certification in writing by the department that the proposed actions will
19 significantly benefit a particular wildlife species.

20 (i) Scientific fish and wildlife research conducted by institutions of higher
21 learning, qualified researchers, or governmental agencies, if approved by the
22 department.

23 (j) Reasonable administrative costs, excluding the costs of audits required by
24 Section 3920, for secretarial service, travel, and postage by the county fish and
25 wildlife commission when authorized by the county board of supervisors. For
26 purposes of this subdivision, "reasonable cost" means an amount which does not
27 exceed 15 percent of the average amount received by the fund during the previous
28 three-year period, or ten thousand dollars (\$10,000) annually, whichever is greater,
29 excluding any funds carried over from a previous fiscal year.

30 (k) Contributions to a secret witness program for the purpose of facilitating
31 enforcement of this code and regulations adopted pursuant to this code.

32 (l) Costs incurred by the district attorney or city attorney in investigating and
33 prosecuting civil and criminal actions for violations of this code, as approved by
34 the department.

35 (m) Other expenditures, approved by the department, for the purpose of
36 protecting, conserving, propagating, and preserving fish and wildlife.

37 **Comment.** Section 3915 continues former Fish and Game Code Section 13103 without
38 substantive change.

39 **§ 3920. Audit**

40 3920. The department may audit, or require the county to audit, expenditures by
41 the county from its fish and wildlife propagation fund in order to determine
42 compliance with this title. If, after reviewing the audit, the department determines

1 that expenditures are not in compliance with this title, the department may require
2 that all expenditures from the fund be temporarily suspended, or it may seek
3 reimbursement of funds that the department determines, based on the audit, were
4 expended improperly, or both.

5 **Comment.** Section 3920 continues former Fish and Game Code Section 13104 without
6 substantive change.

7 DIVISION 3. LAW ENFORCEMENT

8 PART 1. PERSONNEL

9 TITLE 1. DEPARTMENT

10 **§ 4100. Deputized law enforcement officer as peace officer**

11 4100. (a) Every employee of the department designated by the director as a
12 deputized law enforcement officer is a peace officer as provided by Section 830.2
13 of the Penal Code. The authority of that peace officer extends to any place in the
14 state as to a public offense committed or which offense there is probable cause to
15 believe has been committed within the state.

16 (b) Every peace officer described in this section, before the date that he or she is
17 first deputized by the department, shall have satisfactorily completed the basic
18 course as set forth in the regulations of the Commission on Peace Officer
19 Standards and Training.

20 (c) Every peace officer described in this section shall be required to complete
21 regular training courses as required by the Commission on Peace Officer
22 Standards and Training.

23 **Comment.** Section 4100 continues former Fish and Game Code Section 856 without
24 substantive change.

25 **§ 4105. Minimum age of wildlife officer**

26 4105. Notwithstanding Section 18932 of the Government Code, the minimum
27 age limit for appointment to the position of wildlife officer of the department shall
28 be 18 years. An examination for the position of wildlife officer shall require a
29 demonstration of the physical ability to effectively carry out the duties and
30 responsibilities of the position in a manner that would not inordinately endanger
31 the health or safety of a wildlife officer or any other person.

32 **Comment.** Section 4105 continues former Fish and Game Code Section 854 without
33 substantive change.

34 **§ 4110. Deputy as peace officer**

35 4110. A deputy appointed to enforce the provisions of this code is a peace
36 officer. The deputy has all the powers and authority conferred by law upon peace

officers listed in Section 830.6 of the Penal Code to make arrests for violations of this code, and may serve all processes and notices throughout the state.

Comment. Section 4110 continues former Fish and Game Code Section 851 without substantive change.

§ 4115. Employee deputized to check sport fishing licenses

4115. (a) The director may deputize any employee of the department to check persons for licenses required under Section 12900 and to enforce any violation of that section.

(b) Before a person is deputized pursuant to this section for the first time, the person shall have satisfactorily completed a training course meeting the minimum standards of, and comparable to, the training for “level III reserve” as set forth in the regulations of the Commission on Peace Officer Standards and Training.

(c) A person who is deputized for the limited purpose stated in subdivision (a) shall not enforce any other provision of this code. Being deputized under this section does not make a person a peace officer subject to Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code.

Comment. Section 4115 restates former Fish and Game Code Section 853 without substantive change.

Note. Proposed Section 4110(c) restates the last sentence of existing Fish and Game Code Section 853 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“Any person, who is deputized for this limited purpose pursuant to this section, may not enforce any other provision of this code, and is not a peace officer subject to Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code.”

The restated provision would also make clear that a person who is already a peace officer does not lose that status as a result of being deputized under this section (rather than stating categorically that a deputized person “is not a peace officer,” proposed Section 4115(c) would instead make clear that being deputized “does not make a person a peace officer”).

The Commission requests public comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

TITLE 2. COUNTY

§ 4200. Appointment of county wildlife officer

4200. The board of supervisors of each county may, in its discretion, appoint a suitable person to serve for a period of two years from the date of appointment as wildlife officer of the county.

Comment. Section 4200 continues former Fish and Game Code Section 875 without substantive change.

§ 4205. Removal of county wildlife officer

4205. The board of supervisors may by a majority vote of its members remove the county wildlife officer at any time.

1 **Comment.** Section 4205 continues former Fish and Game Code Section 877 without
2 substantive change.

3 **§ 4210. Salary**

4 4210. The board of supervisors shall fix the salary to be paid and the expenses to
5 be allowed the county wildlife officer, which salary and expenses shall be paid
6 from the county treasury.

7 **Comment.** Section 4210 continues former Fish and Game Code Section 876 without
8 substantive change.

9 **§ 4215. Authority**

10 4215. The county wildlife officer shall enforce the state laws relating to the
11 protection of fish and wildlife. The wildlife officer has the powers and authority
12 conferred by law upon peace officers listed in Section 830.6 of the Penal Code.

13 **Comment.** Section 4215 continues former Fish and Game Code Section 878 without
14 substantive change.

15 **§ 4220. Quarterly activity report**

16 4220. The county wildlife officer shall report quarterly to the board of
17 supervisors, giving a detailed statement of all arrests made, convictions had, and
18 fines collected, and a general statement in regard to the management of the office
19 of county wildlife officer. A copy of the detailed statement shall, at the same time,
20 be filed with the department.

21 **Comment.** Section 4220 continues former Fish and Game Code Section 879 without
22 substantive change.

23 **§ 4225. Appointment of deputy**

24 4225. The board of supervisors of each county may, in its discretion, appoint a
25 deputy wildlife officer, to serve at the pleasure of the board.

26 **Comment.** Section 4225 continues former Fish and Game Code Section 880 without
27 substantive change.

28 **§ 4230. Deputy powers, duties, salary, and expenses**

29 4230. The deputy shall have the powers, perform the duties, receive the salary,
30 and be entitled to expenses, as the board of supervisors provides.

31 **Comment.** Section 4230 continues former Fish and Game Code Section 881 without
32 substantive change.

33 **§ 4235. Source of payment of deputy salary and expenses**

34 4235. The salary and expenses of a deputy county wildlife officer shall be paid
35 from the county treasury.

36 **Comment.** Section 4235 continues former Fish and Game Code Section 882 without
37 substantive change.

PART 2. GENERAL PROCEDURES

§ 4300. Rewards

4300. (a) The director may pay a reward from any funds available for that purpose to any person who furnished information that led to an arrest, a criminal conviction, a civil penalty, an administrative penalty, or for forfeiture of property, for any violation of this code or any regulation adopted pursuant to this code. The amount of reward, if any, shall be designated by the director with the advice of the CalTIP Award Board.

(b) This section does not apply to any action brought to recover damages under Section 4470.

Comment. Section 4300 continues former Fish and Game Code Section 2586 without substantive change.

§ 4305. Employee expenditure to procure evidence

4305. (a) Regularly employed law enforcement officers of the department may, when authorized by the director, expend sums authorized for the purchase of fish, birds, or mammals as evidence, or for expenditures related to the procurement of those types of evidence, or for expenditures made to investigate other violations of this code, without divulging the identity of the employee.

(b) The sums so expended shall be repaid to the law enforcement officer making the expenditure upon claims approved by the director. The claims, when approved, shall be paid out of the funds appropriated or made available by law for the support of the department.

Comment. Section 4305 continues former Fish and Game Code Section 855 without substantive change.

§ 4310. Environmental crimes task force

4310. (a) The Legislature finds and declares that:

(1) Poaching violations and other violations of the Fish and Wildlife Code have been increasing, and these violations have a detrimental impact on fish and wildlife and their habitats, which are held in trust by the state for the benefit of the people of the state.

(2) In order to deter illegal poaching and other violations that adversely impact fish and wildlife, it is important that the department coordinate with other law enforcement entities and the courts to facilitate effective enforcement and prosecution of these offenses.

(b) The department, to the extent feasible and subject to available resources, shall establish and coordinate an environmental crimes task force. The task force should involve the participation of the department's Office of General Counsel working with each of the department's law enforcement districts. The task force may include coordination with representatives from the California District Attorneys' Association, the Judicial Council, the Attorney General's office, and

1 the University of California. Objectives of the task force may include, but are not
2 limited to, providing training, education, and outreach to prosecutors and the
3 courts on Fish and Wildlife Code violations and providing other assistance as
4 appropriate in the prosecution of environmental crimes.

5 **Comment.** Section 4310 continues former Fish and Game Code Section 12028 without
6 substantive change.

7 **§ 4315. Electronic management of citations**

8 4315. (a) The department, on or before January 1, 2016, shall prepare and
9 submit to the relevant policy and fiscal committees of the Legislature a feasibility
10 study report on an electronic system to manage citations issued by fish and
11 wildlife wardens, exchange information on citations with the courts, and transfer
12 data on court dispositions to the Automated License Data System.

13 (b)(1) Pursuant to Section 10231.5 of the Government Code, the requirement for
14 submitting a report pursuant to subdivision (a) shall become inoperative on
15 January 1, 2017.

16 (2) A report to be submitted pursuant to subdivision (a) shall be submitted in
17 compliance with Section 9795 of the Government Code.

18 **Comment.** Section 4315 continues former Fish and Game Code Section 702.1 without
19 substantive change.

20 **§ 4320. Dashboard cameras**

21 4320. (a) The department may install patrol vehicle mounted video and audio
22 systems, commonly known as dashboard cameras, in patrol vehicles used by peace
23 officers described in Section 4105. A peace officer described in Section 4105 may
24 use the patrol vehicle mounted video and audio system to record any
25 communications or other actions involving the officer while the officer is in
26 uniform and acting within the scope of his or her authority.

27 (b) The department shall adopt a policy to establish standards regarding the
28 activation of patrol vehicle mounted video and audio systems and the preservation
29 and retention of recordings from patrol vehicle mounted video and audio systems,
30 subject to the following requirements:

31 (1) Once a patrol vehicle mounted video and audio system has been activated
32 pursuant to standards established by the department pursuant to subdivision (b),
33 the patrol vehicle mounted video and audio system shall record the duration of an
34 encounter.

35 (2) The department shall retain a recording from a patrol vehicle mounted video
36 and audio system for a minimum of 90 days and a maximum of one year, except if
37 the recording is necessary for a pending, or reasonably foreseeable civil or
38 criminal action, or for training or administrative purposes.

39 (3) The department shall provide access to a recording from a patrol vehicle
40 mounted video and audio system in accordance with all other provisions of law.

1 **Comment.** Section 4320 continues former Fish and Game Code Section 856.5 without
2 substantive change.

3 **§ 4325. Emblems**

4 4325. The department shall designate official wildlife officer emblems and their
5 placement. The department shall prohibit personnel of the department who are not
6 peace officers from wearing any patch, badge, bar, or other indicia of peace officer
7 status. The selection and configuration of official wildlife officer emblems shall be
8 established by the department in cooperation with California wildlife officers to
9 ensure that the public is readily able to distinguish wildlife officers from personnel
10 who are not peace officers.

11 **Comment.** Section 4325 continues former Fish and Game Code Section 858(b) without
12 substantive change.

13 **§ 4330. “Conviction” for purposes of suspension, revocation, or forfeiture of license or**
14 **permit**

15 4330. For the purpose of invoking any provision of this code, or any rule,
16 regulation, or order made or adopted under this code, relating to the suspension,
17 revocation, or forfeiture of any license or permit, a plea of nolo contendere or “no
18 contest” to, or forfeiture of bail from, a charge of a violation of any provision of
19 this code, or any rule, regulation, or order made or adopted under this code, is a
20 conviction of a violation thereof.

21 **Comment.** Section 4330 continues former Fish and Game Code Section 12158.5 without
22 substantive change.

23 **§ 4335. Collection of administrative penalty**

24 4335. After the expiration of the time period to appeal an administrative penalty
25 imposed pursuant to a provision of this code, the department may apply to the
26 clerk of the appropriate court for a judgment to collect the administrative penalty.
27 The application, including a certified copy of the order imposing the
28 administrative penalty, a hearing officer’s decision, if any, or a settlement
29 agreement, if any, shall constitute a sufficient showing to warrant issuance of the
30 judgment. The court clerk shall enter the judgment immediately in conformity
31 with the application. The judgment so entered has the same force and effect as,
32 and is subject to all the provisions of law relating to, a judgment in a civil action,
33 and may be enforced in the same manner as any other judgment of the court in
34 which it is entered.

35 **Comment.** Section 4335 continues former Section 12014 without substantive change.

PART 3. PENALTIES GENERALLY

§ 4400. Misdemeanor as default criminal penalty

4400. (a) Except as expressly provided otherwise in this code, any violation of this code, or of any rule, regulation, or order made or adopted pursuant to this code, is a misdemeanor.

(b) Unless otherwise provided, the punishment for a violation of this code that is a misdemeanor is a fine of not more than one thousand dollars (\$1,000), imprisonment in a county jail for not more than six months, or by both that fine and imprisonment.

Comment. Subdivision (a) of Section 4400 continues former Fish and Game Code Section 12000(a) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 12002(a) without substantive change.

§ 4405. Violation of regulations generally

4405. It is unlawful to violate any provision of Division 1 (commencing with Section 1.04) of Title 14 of the California Code of Regulations. The violation may be charged as a violation of this section or of the specific provision of Title 14, and shall be punishable as provided in Section 4400.

Comment. Section 4405 continues former Fish and Game Code Section 2020 without substantive change.

§ 4415. Suspension or revocation of license for failure to appear or pay fine

4415. (a) A license, tag, stamp, reservation, permit, or other entitlement or privilege issued pursuant to this code to a defendant who fails to appear at a court hearing for a violation of this code, or who fails to pay a fine imposed pursuant to this code, shall be immediately suspended or revoked. The license, tag, stamp, reservation, permit, or other entitlement or privilege shall not be reinstated or renewed, and no other license, tag, stamp, reservation, permit, or other entitlement or privilege shall be issued to that person pursuant to this code, until the court proceeding is completed or the fine is paid.

(b) This section does not apply to any violation of Section 3050, 3360, 25200, 39230, 54025, 54325, 66500, or 71010.

Comment. Section 4415 continues former Fish and Game Code Section 12002(d) without substantive change.

Note. By its terms, existing Section 12002(d) does not apply to a violation of Section 5653.9. The purpose of that exception is not clear, as Section 5653.9 (continued in proposed Section 71010) relates to department rulemaking. It does not establish a requirement or prohibition that can be violated. **The Commission invites comment to how the reference to Section 5653.9 should be understood.**

1 **§ 4420. Failure to appear is misdemeanor**

2 4420. Any person who is charged with a violation of this code or a regulation
3 adopted pursuant to this code, who willfully violates his or her written promise to
4 appear in court, or before a person authorized to receive a deposit of bail, is guilty
5 of a misdemeanor, regardless of the disposition of the charge upon which he or she
6 was originally arrested.

7 **Comment.** Section 4420 continues former Fish and Game Code Section 12020 without
8 substantive change, except that the provision is revised to make clear that it only applies to a
9 person charged with violating a provision of this code or a regulation enacted pursuant to this
10 code.

11 **§ 4425. Additional penalty for secret witness program**

12 4425. (a) In addition to any assessment, fine, penalty, or forfeiture imposed
13 pursuant to any other provision of law, an additional penalty of fifteen dollars
14 (\$15) shall be added to any fine, penalty, or forfeiture imposed under this code for
15 a violation of this code or a regulation adopted pursuant thereto. However, no
16 more than one additional penalty may be imposed in a single proceeding. The
17 revenue from this penalty shall be transferred to, and deposited in, the Fish and
18 Game Preservation Fund and used exclusively for the purposes of Section 3805.

19 (b) Subdivision (a) does not apply to a violation punishable pursuant to
20 subdivision (b) of Section 4700, subdivision (b) of Section 4862, or any regulation
21 relating to the wearing or display of a fishing license.

22 **Comment.** Section 4425 continues former Fish and Game Code Section 12021 without
23 substantive change.

24 **PART 4. PENALTIES FOR SPECIFIC MATTERS**

25 **TITLE 1. GENERAL ADMINISTRATIVE**
26 **REQUIREMENTS**

27 **§ 4450. Failure of license agent to account**

28 4450. A violation of subdivision (a) of Section 3360 is misdemeanor, to be
29 punished by a fine of not more than two thousand dollars (\$2,000), imprisonment
30 in a county jail for not more than one year, or both that fine and imprisonment.

31 **Comment.** Section 4450 combines and continues part of former Fish and Game Code Section
32 1059 and former Fish and Game Code Section 12002(b)(1), without substantive change.

33 **§ 4452. Entry permit for department managed lands**

34 4452. Failure to obtain an entry permit as required pursuant to Section 2020 is
35 an infraction, punishable by a fine of not less than fifty dollars (\$50) nor more than
36 two hundred fifty dollars (\$250). A person in possession of a valid hunting license,
37 sport fishing license, or trapping license shall be exempt from a requirement to
38 obtain an entry permit.

1 **Comment.** Section 4452 restates former Fish and Game Code Section 1745(h) without
2 substantive change.

3 **TITLE 2. TAKING AND POSSESSING IN**
4 **GENERAL**

5 **CHAPTER 1. CRIMINAL PENALTIES**

6 **§ 4460. Violation for personal gain**

7 4460. (a) Any person who illegally takes, possesses, imports, exports, sells,
8 purchases, barter, trades, or exchanges a bird, fish, mammal, reptile, amphibian,
9 or part of any of those animals, for profit or personal gain is guilty of a
10 misdemeanor punishable by a fine of not less than five thousand dollars (\$5,000)
11 nor more than forty thousand dollars (\$40,000), or imprisonment in a county jail
12 for not more than one year, or by both that fine and imprisonment.

13 (b) If a person is convicted of a second or subsequent violation of subdivision
14 (a), that person shall be punished by a fine of not less than ten thousand dollars
15 (\$10,000), nor more than fifty thousand dollars (\$50,000), or imprisonment in a
16 county jail for not more than one year, or by both that fine and imprisonment.

17 (c) If a second or subsequent violation of subdivision (a) also involves a
18 violation of Section 18040, 18045, 18050, or 18065 that is punishable by
19 subdivision (b) of Section 4962, the offense shall be punishable by a fine of not
20 more than fifty thousand dollars (\$50,000), or by imprisonment pursuant to
21 subdivision (b) of Section 4962, or by both that fine and imprisonment.

22 (d) Notwithstanding Section 802 of the Penal Code, prosecution of an offense
23 punishable under this section shall be commenced within three years after
24 commission of the offense.

25 (e) This section does not apply to fish taken pursuant to a commercial fishing
26 license issued pursuant to Section 14550, or fish sold pursuant to a commercial
27 fish business license issued in accordance with Title 9 (commencing with Section
28 20150) of Part 6 of Division 6.

29 (f) This section does not supersede Section 5802 or 5462.

30 (g)(1) Moneys equivalent to 50 percent of the revenue deposited in the Fish and
31 Game Preservation Fund from fines and forfeitures collected pursuant to this
32 section shall be allocated for the support of the Special Operations Unit of the
33 department, and used for law enforcement purposes.

34 (2) Moneys equivalent to 50 percent of the revenue from any fine collected
35 pursuant to this section shall be paid to the county in which the offense was
36 committed, pursuant to Section 3610. The board of supervisors shall first use
37 revenues pursuant to this subdivision to reimburse the costs incurred by the district
38 attorney or city attorney in investigating and prosecuting the violation. Any excess
39 revenues may be expended in accordance with Section 3915.

1 **Comment.** Section 4460 continues former Fish and Game Code Section 12012 without
2 substantive change.

3 The reference to a “part” of an animal in this section is superfluous. See Section 95 (reference
4 to animal generally includes part of animal). It is retained solely for clarity, and is not intended to
5 affect the meaning of any other provision of this code that includes or omits a reference to a
6 “part” of an animal.

7 See also Sections 4552, 4570 (enforcement).

8 **§ 4462. Knowing and intentional acts**

9 4462. (a) Unless a minimum punishment is otherwise provided, the punishment
10 for the knowing and intentional taking of a mammal, bird, or fish in excess of the
11 quantity permitted by other provisions of this code or regulations adopted pursuant
12 to this code, not in compliance with size or sex limitations in other provisions of
13 this code or regulations adopted pursuant to this code, or from which only external
14 body parts, including, but not limited to, antlers, horns, hides, feathers, or fins, are
15 removed for use in violation of this code or regulations adopted pursuant to this
16 code, shall be not less than two hundred fifty dollars (\$250) for a first violation,
17 and not less than five hundred dollars (\$500) and imprisonment in a county jail for
18 not less than 30 days for a second or subsequent violation. The court shall apply
19 not less than the minimum punishment as specified in this subdivision except in
20 those cases where the court determines that, as to the imprisonment sentence only,
21 the interests of justice would best be served by granting probation or suspending
22 the imposition or execution of the imprisonment sentence.

23 (b) If the court grants probation to any person punished under subdivision (a), in
24 addition to any other terms or conditions imposed by the court, the court may
25 impose as a condition of that probation that the person perform not more than 100
26 hours of community service in the county in which the violation occurred. To the
27 extent practicable, the service shall involve work relating to natural resources. The
28 service shall be performed during a time that does not interfere with the person’s
29 school attendance or employment. If the court requires a person to perform
30 community service under this subdivision, that person shall also be required to
31 attend a hunter safety course as described in Section 10405. The person, and not
32 the court, shall be responsible for paying all fees and costs related to the course.

33 (c) Unless a greater punishment is otherwise provided, the punishment for a
34 violation of this code subject to subdivision (a) is a fine of not more than two
35 thousand dollars (\$2,000), imprisonment in a county jail for not more than one
36 year, or both the fine and imprisonment.

37 **Comment.** Subdivisions (a) and (b) of Section 4462 continue former Fish and Game Code
38 Section 12003.1 without substantive change.

39 Subdivision (c) continues former Fish and Game Code Section 12002(b)(7) without substantive
40 change.

41 **§ 4464. Torture of animal**

42 4464. (a) Any person who violates Section 8110 shall be subject to a fine of not
43 less than five thousand dollars (\$5,000), nor more than forty thousand dollars

1 (\$40,000), or imprisonment in a county jail for not more than one year, or by both
2 that fine and imprisonment.

3 (b) Moneys equivalent to 50 percent of the revenue from any fine collected
4 pursuant to this section shall be paid to the county in which the offense was
5 committed, pursuant to Section 3610. The board of supervisors shall first use
6 revenues pursuant to this subdivision to reimburse the costs incurred by the district
7 attorney or city attorney in investigating and prosecuting the violation. Any excess
8 revenues may be expended in accordance with Section 3915.

9 **Comment.** Subdivision (a) of Section 4464 continues the second clause of the first sentence of
10 former Fish and Game Code Section 12013(c).

11 Subdivision (b) continues the former Fish and Game Code Section 12103(g) without
12 substantive change.

13 See also Section 4552 (enforcement).

14  **Note.** Under existing law, the provision prohibiting torture of animals is embedded in a
15 section that also punishes exceeding a possession limit by a factor of three. See existing Section
16 12013. Section 12013 has a number of provisions that apply, by their terms, to the entire section.
17 In analyzing those provisions, the Commission concluded that some of them were not relevant to
18 the prohibition on torture. See Section 12013(d)-(f). Those provisions were continued in proposed
19 Section 4708(c)-(e), but were not continued in this section.

20 **The Commission invites comment on whether that revision would cause any problematic**
21 **change in the law.**

22 CHAPTER 2. CIVIL AND ADMINISTRATIVE REMEDIES

23 Article 1. Civil Action

24 § 4470. Damages

25 4470. (a) It is the policy of this state to conserve its natural resources and to
26 prevent the willful or negligent destruction of birds, mammals, fish, reptiles, or
27 amphibians.

28 (b) The state may recover damages in a civil action against any person or local
29 agency that unlawfully or negligently takes or destroys any bird, mammal, fish,
30 reptile, or amphibian protected by the laws of this state.

31 (c) The measure of damages is the amount that will compensate for all the
32 detriment proximately caused by the taking or destruction.

33 (d) An action to recover damages under this section shall be brought in the name
34 of the people of the state, in a court in the county in which the cause of action
35 arose. The State Water Resources Control Board shall be notified of, and may join
36 in, any action brought under this section when the activities alleged to have caused
37 the destruction of any bird, mammal, fish, reptile, or amphibian may involve either
38 the unlawful discharge of pollutants into the waters of the state or other violation
39 of Division 7 (commencing with Section 13000) of the Water Code.

40 (e) This section does not apply to any of the following:

41 (1) Persons or local agencies engaged in agricultural pest control.

- (2) The destruction of fish in irrigation canals or works, or irrigation drainages.
- (3) The lawful destruction of a bird or mammal killed while damaging crops.
- (f) No damages may be recovered against a local agency pursuant to this section if a civil or administrative penalty is assessed against the local agency for the same detriment pursuant to Division 7 (commencing with Section 13000) of the Water Code.
- (g) Any recovery or settlement of money damages pursuant to this section, including, but not limited to, civil penalties, arising out of any civil action filed and maintained by the Attorney General in the enforcement of this section shall be deposited by the department in the subaccounts of the Fish and Wildlife Pollution Account in the Fish and Game Preservation Fund as specified in subdivision (a) of Section 67505.
- (h) For purposes of this section, “local agency” includes any city, county, city and county, district, public authority, or other political subdivision.
- Comment.** Subdivisions (a) through (f) and (h) of Section 4470 continue former Fish and Game Code Section 2014(a)-(e) and (g) without substantive change.
- Subdivision (g) combines and continues former Fish and Game Code Section 2014(f) and 12017(a)(1) without substantive change.

Notes. (1) Existing Section 2014(a) authorizes a civil action for unlawful or negligent taking or destruction of a specified animal. However, subdivision (b), stating the measure of damages in such an action, refers only to the detriment proximately caused by the *destruction* of the animal. Proposed Section 4470 would conform subdivision (b) to subdivision (a), to address scenarios in which an animal was wrongfully taken but not destroyed.

The Commission invites comment on whether this revision is appropriate.

(2) Existing Section 2014(d) reads as follows (with emphasis added):

This section does not apply to persons or local agencies engaged in agricultural pest control, to the destruction of fish in irrigation canals or works or irrigation drainages, or to the destruction of birds or mammals killed while damaging crops *as provided by law*.

The Commission has spent time researching the question of whether the phrase “as provided by law” that appears at the end of this subdivision was meant to apply to all three exceptions listed in the subdivision, or just the last listed exception. The Commission has preliminarily concluded, based on that research, that the phrase was intended to apply only to the last listed exception. Proposed Section 4470(e) would clarify that application.

The Commission invites comment on whether this revision of Section 2014(d) is appropriate.

(3) Existing Section 2014(e) (which would be continued by proposed Section 4470(f)) refers to “civil penalties” assessed against a local agency “pursuant to Division 7 (commencing with Section 13000) of the Water Code.” The term “civil penalty” can be understood to refer to both a civil penalty (as distinguished from a criminal penalty) assessed by a *court*, as well as administrative penalties assessed by an *administrative agency*. As sections in the referenced division of the Water Code provide for assessment of “civil penalties” imposed by both a court and by an administrative agency, the reference to “civil penalties” in proposed Section 4470(f) has been revised to refer to “civil or administrative penalty.”

The Commission invites comment on whether this revision is appropriate.

Article 2. Administrative Penalties

Note. This article would continue existing Chapter 6.5 (commencing with Section 2580) of Division 3 of the Fish and Game Code. Throughout the chapter, references to “civil liability” have been revised to refer to an “administrative penalty.” These changes are intended to make clear that the provisions refer to administrative enforcement, rather than a civil action in court.

The Commission invites comment on whether that substitution would cause any problems.

§ 4480. Definitions

4480. The definitions in this section govern the construction of this chapter.

(a) “Qualified hearing officer” means an attorney admitted to the State Bar of California who is knowledgeable in fish and wildlife law.

(b) “Transport” means to move, convey, carry, or ship by any means, or to deliver or receive for the purpose of movement, conveyance, carriage, or shipment.

Comment. Section 4480 continues former Fish and Game Code Section 2580 without substantive change.

§ 4482. Administrative penalty for acts done for profit or personal gain

4482. (a) The department may impose an administrative penalty upon any person pursuant to this title for any of the following acts done for profit or personal gain:

(1) Unlawfully export, import, transport, sell, possess, receive, acquire, or purchase, or unlawfully assist, conspire, or aid in the importing, exporting, transporting, sale, possession, receiving, acquisition, or purchasing of, any bird, mammal, amphibian, reptile, or fish which are taken or possessed in violation of this code or the regulations adopted pursuant to this code.

(2) Unlawfully export, import, transport, sell, possess, receive, acquire, or purchase, or unlawfully assist, conspire, or aid in the importing, exporting, transporting, sale, possession, receiving, acquisition, or purchasing of any plants, insects, or other species listed pursuant to the California Endangered Species Act (Part 1 (commencing with Section 62000) of Division 17), which are taken or possessed in violation of this code or the regulations adopted pursuant to this code.

(3) Unlawfully export, import, transport, sell, possess, receive, acquire, or purchase any bird, mammal, amphibian, reptile, or fish, or any endangered or threatened species, or any fully protected bird, mammal, or fish which has been taken, possessed, transported, or sold in violation of this code or the regulations adopted pursuant to this code.

(4) Unlawfully possess any bird, mammal, amphibian, reptile, or fish, or any endangered or threatened species, or any fully protected bird, mammal, or fish which has been taken, possessed, transported, or sold in violation of this code or any regulations adopted pursuant to this code within the maritime and territorial jurisdiction of the state or within the portions of the special maritime jurisdiction

1 of the United States upon which the State of California exercises concurrent
2 jurisdiction, either by statute, deputization, or by contract with the United States.

3 (5) Having exported, imported, transported, sold, purchased, or received any
4 bird, mammal, amphibian, reptile, or fish, or any endangered or threatened
5 species, or any fully protected bird, mammal, or fish, unlawfully make or submit
6 any false record, account, label, or identification thereof.

7 (6) Attempt to commit any unlawful act, or unlawfully attempt to commit any
8 act, described in paragraphs (1) to (5), inclusive.

9 (b) The department may impose an administrative penalty upon any person
10 pursuant to this article for unlawfully exporting, importing, possessing, receiving,
11 or transporting in interstate commerce any container or package containing any
12 bird, mammal, amphibian, reptile, or fish, or any endangered or threatened
13 species, or any fully protected bird, mammal, or fish unless the container or
14 package has previously been plainly marked, labeled, or tagged in accordance with
15 this code and the regulations adopted pursuant to this code.

16 (c) The department may impose an administrative penalty upon any person
17 pursuant to this article for any unlawful failure or refusal to maintain any records
18 or paperwork as required by this code.

19 **Comment.** Section 4482 continues former Fish and Game Code Section 2582 without
20 substantive change.

21 See also Section 4504 (enforcement).

22 **§ 4484. Application of article**

23 4484. (a) If the loss is lawful under this code and regulations adopted pursuant
24 to this code, this article does not apply to the loss of any bird, mammal,
25 amphibian, reptile, or fish as a result of any of the following acts:

26 (1) Implementing lawful forestry practices.

27 (2) Implementing lawful agricultural practices.

28 (3) Any development or maintenance activity carried out pursuant to the terms
29 of a permit issued by the federal government, the state, or any city, county, or
30 district, or any agency thereof.

31 (b) This article does not apply to any action brought to recover damages under
32 Section 4470.

33 (c) No administrative penalty shall be imposed under this article until the
34 guidelines for the imposition of the penalties are adopted by the commission
35 pursuant to Section 4504.

36 **Comment.** Subdivision (a) of Section 4484 continues former Fish and Game Code Section
37 2581 without substantive change.

38 Subdivision (b) combines and continues former Fish and Game Code Section 2586(b) and the
39 second sentence of former Fish and Game Code Section 500(d) without substantive change.

40 Subdivision (c) continues former Fish and Game Code Section 2583(b) without substantive
41 change.

1 **§ 4486. Consultation regarding penalty sought**

2 4486. Upon an actionable violation, the department shall consult, as to the
3 appropriate civil or criminal remedy, with the district attorney in the jurisdiction
4 where the violation was alleged to have occurred. Before proceeding with a civil
5 action, the department shall seek the concurrence of the Attorney General.

6 **Comment.** Section 4486 continues former Fish and Game Code Section 2584(a) without
7 substantive change.

8 **§ 4488. Administrative penalty based on constructive knowledge**

9 4488. Except as provided in subdivision (c) of Section 4484, any person who
10 violates this code or any regulation adopted to carry out this code, and, with the
11 exercise of due care, should have known that a bird, mammal, amphibian, reptile,
12 or fish, or an endangered or threatened species, or a fully protected bird, mammal,
13 or fish, was taken, possessed, transported, imported, received, purchased,
14 acquired, or sold in violation of, or in a manner unlawful under, this code, may be
15 assessed an administrative penalty.

16 **Comment.** Section 4488 continues the first sentence of former Fish and Game Code Section
17 2583(a) without substantive change.

18 **§ 4490. Penalty amounts**

19 4490. The administrative penalty imposed under this article by the department
20 shall not be more than ten thousand dollars (\$10,000) for each bird, mammal,
21 amphibian, reptile, or fish, or for each endangered or threatened species, or each
22 fully protected bird, mammal, or fish unlawfully taken, possessed, transported,
23 imported, received, purchased, acquired, or sold. This administrative penalty may
24 be in addition to any other penalty, civil or criminal, provided in this code or
25 otherwise by law.

26 **Comment.** Section 4490 continues the second and third sentences of former Fish and Game
27 Code Section 2583(a) without substantive change.

28 **§ 4492. Procedure**

29 4492. (a) The director, after investigation of the facts and circumstances, may
30 issue a complaint to any person on whom an administrative penalty may be
31 imposed pursuant to Section 4482 or 4488. The complaint shall allege the acts or
32 failures to act that constitute a basis for an administrative penalty and the amount
33 of the proposed administrative penalty. The complaint shall be served by personal
34 service or certified mail and shall inform the person so served that a hearing shall
35 be conducted within 60 days after the person has been served, unless the person
36 waives the right to a hearing. If the person waives the right to a hearing, the
37 department shall issue an order setting the penalty in the amount proposed in the
38 complaint. If the person has waived the right to a hearing or if the department and
39 the person have entered into a settlement agreement, the order shall be final.

1 (b) If the director issues a complaint pursuant to subdivision (a), the director
2 shall appoint a qualified referee or hearing board, composed of one or any
3 combination of the following persons:

4 (1) A qualified hearing officer, as defined in subdivision (a) of Section 4480.

5 (2) A retired judge of the Superior Court who is knowledgeable in fish and
6 wildlife law.

7 (3) A qualified neutral referee, appointed upon petition to the Superior Court in
8 which the violation was alleged to have occurred.

9 (c) Any hearing required under this section shall be conducted by the appointed
10 referee or hearing board according to the procedures specified in Sections 11507
11 to 11517, inclusive, of the Government Code, except as otherwise provided in this
12 section. In making a determination, the appointed referee or hearing board may
13 consider the records of the department in the matter, the complaint, and any new
14 facts brought to his or her attention by that person. The appointed referee or
15 hearing board shall be the sole trier of fact as to the existence of a basis for
16 liability under Section 4482 or 4488. The appointed referee or hearing board shall
17 make the determination of the facts of the case and shall prepare and submit the
18 proposed decision, including a recommended penalty, to the director for his or her
19 review and assistance in the penalty assessment process.

20 (d) The director may assess the recommended administrative penalty, reduce the
21 amount of the recommended penalty, or not impose any administrative penalty,
22 based upon the nature, circumstances, extent, and gravity of the prohibited acts
23 alleged, and the degree of culpability of the violator, or the director may enter into
24 a settlement agreement with the person in the best interests of the state or confirm
25 the amount of administrative penalties contained in the complaint. If the director
26 reduces the amount of the administrative penalty, does not impose the
27 administrative penalty, or enters into a settlement agreement, the director shall
28 seek the recommendation of the appointed referee or hearing board and enter into
29 the records of the case the reasons for that action, including the recommendation
30 of the appointed referee or hearing board. The decision of the director assessing
31 the administrative penalty is final. The proposed decision is a public record and
32 shall be served upon the person. The director may approve the proposed decision
33 in its entirety, or the director may reduce the proposed penalty and adopt the
34 balance of the proposed decision.

35 (e) Upon the final assessment of the administrative penalty, the department shall
36 issue an order setting the amount of the administrative penalty to be imposed. An
37 order setting the amount of an administrative penalty under this section becomes
38 effective and final upon the issuance of the order, and payment shall be made
39 within 30 days of issuance. Copies of the order shall be served by personal service
40 or by certified mail upon the person served with the complaint and upon other
41 persons who appeared before the director and requested a copy. Copies of the
42 order shall be provided to any person within 10 days of receipt of a written request
43 from that person.

(g) Within 30 days after service of a copy of an order setting the amount of the administrative penalty, any person so served may file with the superior court a petition for a writ of mandate for review of the order. In all proceedings pursuant to this subdivision, the court shall exercise its independent judgment on the evidence in the whole record. The filing of a petition for a writ of mandate shall not stay any other civil or criminal action.

(h) The records of the case, after all appeals are final, are public records, as defined in subdivision (d) of Section 6252 of the Government Code.

Comment. Section 4492 restates former Fish and Game Code Section 2584(b) through (h) without substantive change.

Note. Proposed Section 4492 is intended to restate existing Section 2584(b) through (h) to clarify the meaning of those provisions, without changing their substantive effect. The existing provision reads as follows:

2584. (b) The director shall appoint a qualified referee or hearing board, composed of one or any combination of the following persons:

(1) A qualified hearing officer, as defined in subdivision (a) of Section 2580.

(2) A retired judge of the Superior Court who is knowledgeable in fish and wildlife law.

(3) A qualified neutral referee, appointed upon petition to the Superior Court in which the violation was alleged to have occurred.

(c) The director, after investigation of the facts and circumstances, may issue a complaint to any person on whom a civil penalty may be imposed pursuant to Section 2582 or 2583. The complaint shall allege the acts or failures to act that constitute a basis for a civil penalty and the amount of the proposed civil penalty. The complaint shall be served by personal service or certified mail and shall inform the person so served that a hearing shall be conducted within 60 days after the person has been served, unless the person waives the right to a hearing. If the person waives the right to a hearing, the department shall issue an order setting liability in the amount proposed in the complaint. If the person has waived the right to a hearing or if the department and the person have entered into a settlement agreement, the order shall be final.

(d) Any hearing required under this section shall be conducted by a referee or hearing board according to the procedures specified in Sections 11507 to 11517, inclusive, of the Government Code, except as otherwise provided in this section. In making a determination, the hearing officer may consider the records of the department in the matter, the complaint, and any new facts brought to his or her attention by that person. The hearing officer shall be the sole trier of fact as to the existence of a basis for liability under Section 2582 or 2583. The hearing officer shall make the determination of the facts of the case and shall prepare and submit the proposed decision, including recommended penalty assessment, to the director for his or her review and assistance in the penalty assessment process.

(e) The director may assess the civil penalty, and may reduce the amount, or not impose any assessment, of civil penalties based upon the nature, circumstances, extent, and gravity of the prohibited acts alleged, and the degree of culpability of the violator; or the director may enter into a settlement agreement with the person in the best interests of the state or confirm the amount of civil penalties contained in the complaint. If the director reduces the amount of the civil penalty, does not impose the civil penalty, or enters into a settlement agreement, the director shall seek the recommendation of the hearing officer and enter into the records of the case the reasons for that action, including the hearing officer's recommendation. The decision of the director assessing the civil penalty is final. The proposed decision is a public record and shall be served upon the person. The director may approve the proposed decision in its entirety, or the director may reduce the proposed penalty and adopt the balance of the proposed decision.

(f) Upon the final assessment of the civil penalty, the department shall issue an order setting the amount of the civil penalty to be imposed. An order setting civil liability under this section

1 becomes effective and final upon the issuance thereof, and payment shall be made within 30 days
2 of issuance. Copies of the order shall be served by personal service or by certified mail upon the
3 person served with the complaint and upon other persons who appeared before the director and
4 requested a copy. Copies of the order shall be provided to any person within 10 days of receipt of
5 a written request from that person.

6 (g) Within 30 days after service of a copy of an order setting the amount of the civil penalty, any
7 person so served may file with the superior court a petition for a writ of mandate for review of the
8 order. In all proceedings pursuant to this subdivision, the court shall exercise its independent
9 judgment on the evidence in the whole record. The filing of a petition for a writ of mandate shall
10 not stay any other civil or criminal action.

11 (h) The records of the case, after all appeals are final, are public records, as defined in subdivision
12 (d) of Section 6252 of the Government Code.

13 **The Commission invites comment on whether the proposed restatement would cause any**
14 **substantive change in the meaning of the provision.**

15 **§ 4494. Penalty does not preclude forfeiture**

16 4494. The administrative penalties imposed under this article are in addition to
17 any forfeiture of equipment pursuant to Section 4570, or forfeiture of birds,
18 mammals, amphibians, reptiles, or fish pursuant to Section 4510.

19 **Comment.** Section 4494 continues former Fish and Game Code Section 2585 without
20 substantive change.

21 **§ 4496. Counsel**

22 4496. Notwithstanding Section 12511 of the Government Code, the department
23 may retain or appoint legal counsel to prepare and prosecute a civil action under
24 this article to recover an administrative penalty.

25 **Comment.** Section 4496 continues former Fish and Game Code Section 2587(a) without
26 substantive change.

27 **§ 4498. Limitation period**

28 4498. An action to recover an administrative penalty imposed under this article
29 shall be commenced within three years after discovery of the commission of the
30 offense.

31 **Comment.** Section 4498 continues former Fish and Game Code Section 2587(b) without
32 substantive change.

33 **§ 4500. Deposit of penalties and revenue**

34 4500. All administrative penalties and revenues from forfeitures collected
35 pursuant to this article shall be deposited in the Fish and Game Preservation Fund.

36 **Comment.** Section 4500 continues former Fish and Game Code Section 2588 without
37 substantive change.

38 **§ 4502. Implementing regulations**

39 4502. The commission and the department may adopt regulations as are
40 necessary to carry out their responsibilities under this article.

1 **Comment.** Section 4502 continues former Fish and Game Code Section 2589 without
2 substantive change.

3 **§ 4504. Guidelines for administrative penalties**

4 4504. (a) The commission shall, by regulation, adopt guidelines to assist the
5 director and the department in ascertaining the amount of administrative penalties
6 to be imposed pursuant to Section 4482 or 4488. The guidelines may include
7 monetary amounts or ranges of monetary amounts that the commission finds are
8 adequate to deter illegal actions and partially compensate the people of California
9 for losses to the fish and wildlife resources from illegal transactions described in
10 Section 4482 or 4488 for profit or personal gain.

11 (b) If the violation involves birds, mammals, amphibians, reptiles, or fish with a
12 value in the aggregate of less than four hundred dollars (\$400) and involves only
13 the transportation, taking, or receipt of fish or wildlife taken or possessed in
14 violation of this code, the guidelines shall provide that the administrative penalty
15 shall not exceed the maximum criminal fine provided by law for the violation in
16 this code or ten thousand dollars (\$10,000), whichever is less. For purposes of this
17 section, “value” means the retail market value if a market value exists, the
18 potential monetary gain to the accused or, for commercial species, the established
19 retail market value.

20 (c) The guidelines shall include consideration of the nature, circumstances,
21 extent, and gravity of the prohibited acts committed, and the degree of culpability
22 of the violator, including lesser penalties for acts that have little significant effect
23 upon the resources and greater penalties for acts that may cause serious injury to
24 the resources.

25 (d) Nothing in this article shall be used to establish a monetary value for fish or
26 wildlife resources in connection with any development, project, or land or water
27 use plan or activity as permitted by any federal, state, or local governmental
28 activity.

29 **Comment.** Section 4504 continues former Fish and Game Code Section 500(a) through (c),
30 and the first sentence of subdivision (d), without substantive change.

31 Article 3. Seizure of Take

32 **§ 4510. Seizure of take**

33 4510. (a) Any bird, mammal, fish, reptile, aquaculture animal or product, plant,
34 amphibian, or any part thereof, that has been taken, possessed, sold, imported, or
35 transported contrary to any of the laws of this state shall be seized by the
36 department.

37 (b) In accordance with the commission’s regulations, notice of seizure shall be
38 given to the person who had possession of the bird, mammal, fish, reptile,
39 aquaculture animal or product, plant, amphibian, or any part thereof, at the time of
40 the seizure if that person is known.

1 **Comment.** Section 4510 continues former Fish and Game Code Section 12159 without
2 substantive change.

3 See also Sections 4494, 4510 (enforcement).

4 **§ 4512. Sale or donation of seized take**

5 4512. Any seizure of any bird, mammal, fish, reptile, amphibian made under
6 circumstances in which it cannot be determined who took, possessed, sold,
7 imported, or transported the bird, mammal, fish, reptile, or amphibian contrary to
8 law may be sold or donated to a state, county, city, city and county, or any
9 charitable institution.

10 **Comment.** Section 4512 continues former Fish and Game Code Section 12162 without
11 substantive change.

12 **§ 4514. Reuse of seized take**

13 4514. All birds, mammals, fish, reptiles, aquaculture animals and products,
14 plants, or amphibians or any part thereof, seized in accordance with Section 4510,
15 the sale of which is not prohibited and that have a current market value of one
16 hundred dollars (\$100) or more, shall be packed, preserved, sold for bait, used for
17 fish food in state-owned fish hatcheries, or otherwise put to economical use
18 immediately upon seizure, at the prevailing market price for legal birds, mammals,
19 fish, reptiles, aquaculture animals and products, plants, amphibians, or part thereof
20 in effect on the date of seizure. Any proceeds thereof shall be placed in the Fish
21 and Game Preservation Fund. If the person from whom the birds, mammals, fish,
22 reptiles, aquaculture animals and products, plants, or amphibians were seized is
23 not convicted in a court of competent jurisdiction for the offense out of which the
24 seizure arose, then and in that event the proceeds shall be returned to that person.

25 **Comment.** Section 4514 continues former Fish and Game Code Section 12160 without
26 substantive change.

27 **§ 4516. Donation or destruction of seized take**

28 4516. The judge before whom any person is tried for taking, possessing, selling,
29 importing, or transporting birds, mammals, fish, reptiles, aquaculture animals and
30 products, plants, or amphibians, or parts thereof, contrary to the laws of this state
31 shall upon the conviction of the accused make an order forfeiting and disposing of
32 the birds, mammals, fish, reptiles, aquaculture animals and products, plants, or
33 amphibians, or parts thereof, in accordance with the provisions of Section 4514.
34 However, if the birds, mammals, fish, reptiles, aquaculture animals and products,
35 plants, or amphibians, or parts thereof, may not be sold lawfully or have a current
36 market value of less than one hundred dollars (\$100), the judge may at his or her
37 discretion order that the birds, mammals, fish, reptiles, aquaculture animals or
38 products, plants, amphibians, or parts thereof, be donated to a state, county, city,
39 or any charitable institution, or be destroyed.

40 **Comment.** Section 4516 continues former Fish and Game Code Section 12161 without
41 substantive change.

1 **§ 4518. Purchase of seized take**

2 4518. Any person who purchases a bird, mammal, fish, reptile, or amphibian
3 from the department pursuant to Sections 4512 or 4514 shall, upon delivery, pay
4 to the department, for deposit in the Fish and Game Preservation Fund, the
5 prevailing market price for a legal bird, mammal, fish, reptile, or amphibian in
6 effect on the date of seizure.

7 **Comment.** Section 4518 continues former Fish and Game Code Section 12163 without
8 substantive change.

9 **TITLE 3. HUNTING, TRAPPING AND FISHING**
10 **GENERALLY**

11 **CHAPTER 1. LICENSE SUSPENSION OR REVOCATION**

12 **§ 4550. Suspension or revocation of license**

13 4550. (a) In addition to any fine or other punishment imposed, a sport fishing or
14 hunting license may, in the discretion of the court, be suspended or revoked upon
15 the licensee's conviction of a violation of any provision of this code or regulation
16 adopted pursuant to this code, relating to hunting or fishing, for purposes other
17 than profit.

18 (b) Any person who obtains another hunting or fishing license during the period
19 his or her license has been suspended or revoked is guilty of a misdemeanor.

20 **Comment.** Section 4550 continues former Fish and Game Code Section 12158 without
21 substantive change.

22 **§ 4552. Suspension or revocation for specified offenses**

23 4552. (a) Upon a conviction of a violation of this code or any regulation adopted
24 pursuant thereto that is punishable pursuant to Section 4460, 4464, 4708, 5330,
25 5450, 5460, or 8110, the department may suspend or permanently revoke a
26 person's hunting or sport fishing license or permit privileges.

27 (b)(1) Any person whose privileges are suspended or revoked pursuant to this
28 section may appeal the suspension or revocation to the commission. The
29 commission shall initiate the appeal process within 12 months of the violator's
30 appeal request. The commission shall consider at least the nature, circumstances,
31 extent, and gravity of the person's violations, the person's culpability for the
32 violations, and the injury to natural resources by the violations, and may restore a
33 person's hunting or sport fishing license or permit privileges.

34 (2) The department may adopt regulations to implement this subdivision.

35 (c) Pursuant to subdivision (c) of Section 4570, a judge may order the seizure or
36 forfeiture of any device or apparatus, including a vessel, vehicle, or hunting or
37 fishing gear, that is used in committing an offense punishable under Section 4460,
38 4464, 4708, 5330, 5450, 5460, or 8110.

1 **Comment.** Section 4552 continues former Fish and Game Code Section 12154 without
2 substantive change.

3 **§ 4554. Effect of termination of probation and dismissal of charges**

4 4554. A termination of probation and dismissal of charges pursuant to Section
5 1203.4 of the Penal Code or a dismissal of charges pursuant to Section 1203.4a of
6 the Penal Code does not affect either a past revocation or suspension of any
7 license or permit to take fish or wildlife, or the authority of the commission or a
8 court to revoke or suspend a license or permit to take fish or wildlife.

9 **Comment.** Section 4554 continues former Fish and Game Code Section 12166 without
10 substantive change.

11 **§ 4556. Procedures governing revocation or suspension**

12 4556. (a) The commission shall adopt regulations and procedures governing the
13 revocation or suspension of hunting or sport fishing privileges. The regulations
14 shall provide for notice and opportunity for a hearing.

15 (b) Any person, whose license was revoked pursuant to Section 4552, 4706, or
16 4806, may appeal to the commission for reissuance of the license and termination
17 of the prohibition against the taking of fish, reptiles, amphibians, or birds or
18 mammals.

19 (c) After a public hearing at which the person has appeared in person, the
20 commission may terminate the prohibition and authorize the issuance of a license
21 if it finds that there are sufficient mitigating circumstances to warrant that action.

22 (d) It is unlawful for a person whose hunting or sport fishing privileges have
23 been revoked or suspended to obtain or attempt to obtain, or to possess a hunting
24 or sport fishing license, permit, or tag during that suspension or revocation period.

25 (e) Any person who violates subdivision (d) is guilty of an infraction punishable
26 by a fine of not less than one hundred dollars (\$100) or more than one thousand
27 dollars (\$1,000), or of a misdemeanor.

28 **Comment.** Section 4556 continues former Fish and Game Code Section 12155.5 without
29 substantive change.

30 **CHAPTER 2. FORFEITURE**

31 **§ 4570. Forfeiture of device or apparatus**

32 4570. (a) Except as provided in subdivision (b), the judge before whom any
33 person is tried for a violation of any provision of this code, or regulation adopted
34 pursuant to this code, may, upon the conviction of the person tried, order the
35 forfeiture of any device or apparatus that is designed to be, or is capable of being,
36 used to take birds, mammals, fish, reptiles, or amphibians and that was used in
37 committing the offense charged.

38 (b) The judge shall, if the offense is punishable under Part 1 (commencing with
39 Section 62000) of Division 17, or under Section 5320, 5400, 5900, 5950, or
40 38200, of this code, or under subdivision (c) of Section 597 of the Penal Code,

1 order the forfeiture of any device or apparatus that is used in committing the
2 offense, including, but not limited to, any vehicle that is used or intended for use
3 in delivering, importing, or exporting any unlawfully taken, imported, or
4 purchased species.

5 (c)(1) The judge may, for conviction of a violation of any of the following
6 offenses, order forfeiture of any device or apparatus that is used in committing the
7 offense, including, but not limited to, any vehicle used or intended for use in
8 committing the offense:

9 (A) Section 8000 relating to deer, elk, antelope, feral pigs, European wild boars,
10 black bears, and brown or cinnamon bears.

11 (B) Any offense that involves the sale, purchase, or possession of abalone for
12 commercial purposes.

13 (C) Any offense that involves the sale, purchase, or possession of sturgeon or
14 lobster, pursuant to Section 43150 or 49500.

15 (D) Any offense that involves a violation of Section 4460.

16 (E) A violation of subdivision (b) of Section 4708.

17 (2) In considering an order of forfeiture under this subdivision, the court shall
18 take into consideration the nature, circumstances, extent, and gravity of the
19 prohibited act committed, the degree of culpability of the violator, the property
20 proposed for forfeiture, and other criminal, civil, or administrative penalties
21 imposed on the violator under other provisions of law for that offense. The court
22 shall impose lesser forfeiture penalties under this subdivision for those acts that
23 have little significant effect upon natural resources or the property of another and
24 greater forfeiture penalties for those acts that may cause serious injury to natural
25 resources or the property of another, as determined by the court. In determining
26 whether or not to order forfeiture of a vehicle, the court shall, in addition to any
27 other relevant factor, consider whether the defendant is the owner of the vehicle
28 and whether the owner of the vehicle had knowledge of the violation.

29 (3) It is the intent of the Legislature that forfeiture not be ordered pursuant to
30 this subdivision for minor or inadvertent violations, as determined by the court.

31 (d) A judge shall not order the forfeiture of a vehicle under this section if there is
32 a community property interest in the vehicle that is owned by a person other than
33 the defendant and the vehicle is the only vehicle available to the defendant's
34 immediate family that may be operated on the highway with a class A, class B, or
35 class C driver's license.

36 (e) Any device or apparatus ordered forfeited shall be sold, used, or destroyed
37 by the department.

38 (f)(1) The proceeds from all sales under this section, after payment of any valid
39 liens on the forfeited property, shall be paid into the Fish and Game Preservation
40 Fund.

41 (2) A lien in which the lienholder is a conspirator is not a valid lien for purposes
42 of this subdivision.

(g) The provisions in this section authorizing or requiring a judge to order the forfeiture of a device or apparatus also apply to the judge, referee, or juvenile hearing officer in a juvenile court action brought under Section 258 of the Welfare and Institutions Code.

(h) For purposes of this section, a plea of nolo contendere or no contest, or forfeiture of bail, constitutes a conviction.

(i) Neither the disposition of the criminal action other than by conviction nor the discretionary refusal of the judge to order forfeiture upon conviction impairs the right of the department to commence proceedings to order the forfeiture of fish nets or traps pursuant to Section 4986.

Comment. Section 4570 continues former Fish and Game Code Section 12157 without substantive change.

See also Sections 4494, 5802 (enforcement).

§ 4572. Forfeiture of vehicle

4572. The judge before whom any person is tried and convicted of violating Sections 8120 and 9580 and, at the same proceeding, is also tried and convicted of violating Section 8015 or 8125 may, in the court's discretion, order the forfeiture of any motor vehicle or snowmobile used in committing one or more of the offenses charged. Any vehicle so forfeited shall be sold or destroyed by the department. The proceeds from the sale of a forfeited vehicle shall be paid into the Fish and Game Preservation Fund, except that any valid lien on the forfeited property shall first be paid from proceeds of the sale unless the lienholder is a conspirator. For purposes of this section, forfeiture of bail or a plea of nolo contendere shall constitute a conviction.

Comment. Section 4572 continues former Fish and Game Code Section 12157.5 without substantive change.

CHAPTER 3. HUNTING AND FISHING GUIDES

§ 4590. Commission revocation of guide license

4590. The commission may revoke a guide license or the privilege to guide upon a showing of any of the following:

(a) The licensee has been convicted of a violation of this code or any regulation adopted pursuant to this code.

(b) The licensee has knowingly permitted a client or other member of the party being guided to violate this code or any regulation adopted pursuant to this code, and that the licensee had the authority and means to prevent the violation.

(c) The licensee has failed to fulfill his or her responsibilities to a client.

Comment. Section 4590 continues former Fish and Game Code Section 2546 without substantive change.

1 **§ 4592. Court revocation of guide license**

2 4592. (a) When any person licensed as a guide under Section 8805 is found
3 guilty by a court of competent jurisdiction of violating or permitting the violation
4 of any provision of this code or regulation adopted pursuant to this code, the court,
5 in addition to any fine or other punishment imposed, may revoke the person's
6 guide license.

7 (b) Any person who obtains another guide license within two years after a guide
8 license issued to that person has been revoked or forfeited is guilty of a
9 misdemeanor.

10 **Comment.** Section 4592 continues former Fish and Game Code Section 12165 without
11 substantive change.

12 **§ 4594. Court revocation of privilege to hunt, fish, or guide**

13 4594. (a) The judge before whom any guide, as defined in Section 8800, is
14 arraigned for a violation of this code, or regulation adopted pursuant to this code,
15 may, upon the conviction of the person, order the revocation of the person's
16 privilege to hunt, fish, or guide for a period not to exceed three years from the date
17 of the conviction.

18 (b) For purposes of this section, a plea of nolo contendere or no contest or a
19 forfeiture of bail is a conviction.

20 (c) It shall be unlawful for any person to obtain, or attempt to obtain a guide
21 license, sportfishing license, or hunting license during a period of revocation
22 imposed under this section.

23 (d) Neither the disposition of the criminal action other than by conviction nor
24 the discretionary refusal of the judge to order revocation upon conviction impairs
25 the right of the department to commence proceedings to order revocation of the
26 guide license pursuant to Section 4590.

27 **Comment.** Section 4594 continues former Fish and Game Code Section 12156.5 without
28 substantive change.

29 **CHAPTER 4. MISCELLANEOUS OFFENSES**

30 **§ 4600. Interference with lawful activities**

31 4600. (a) Notwithstanding Section 4400, a person who violates Section 8130 is
32 guilty of an infraction punishable by a fine of not less than one hundred dollars
33 (\$100) and not to exceed one thousand dollars (\$1,000), or of a misdemeanor.

34 (b) Any person convicted for a violation of Section 8130 that occurred within
35 two years of a prior violation of Section 8130 that resulted in a conviction is guilty
36 of a misdemeanor, punishable by imprisonment in a county jail for a period of not
37 more than one year, by a fine of not less than one hundred dollars (\$100) and not
38 to exceed one thousand dollars (\$1,000), or by both imprisonment and fine.

39 **Comment.** Subdivision (a) of Section 4600 combines former Fish and Game Code Sections
40 2009(b) and 12000(b)(1) without substantive change.

1 Subdivision (b) continues former Fish and Game Code Section 2009(c) without substantive
2 change.

3 **§ 4602. Scientific permit revocation**

4 4602. If the holder of a permit issued under Section 9200 fails to submit
5 information or reports required in the permit, the department shall revoke an
6 existing permit, and may decline to issue a permit to that person or entity in
7 subsequent years.

8 **Comment.** Section 4602 continues former Fish and Game Code Section 1002(m) without
9 substantive change.

10 **TITLE 4. HUNTING**

11 **CHAPTER 1. UNLAWFUL TAKE**

12 **§ 4700. Taking without license**

13 4700. (a) Notwithstanding subdivision (b) of Section 4400, the punishment for
14 taking a mammal or bird for which a hunting license issued pursuant to Section
15 10210 is required or a tag, seal, or stamp is required, including a deer tag issued
16 pursuant to Section 56585, without having in one's possession the required valid
17 license, or without having in one's possession any required tag, seal, or stamp or
18 when the taking of that mammal or bird is prohibited by allowable season, limit,
19 time, or area, is punishable by a fine of not less than two hundred fifty dollars
20 (\$250) or more than two thousand dollars (\$2,000), or imprisonment in a county
21 jail for not more than one year, or by both that fine and imprisonment, or by any
22 greater punishment prescribed by this code.

23 (b) If a person is charged with an offense described in subdivision (a) and
24 produces in court a license, tag, seal, or stamp issued to the person and valid at the
25 time of the person's arrest and if the taking was otherwise lawful with respect to
26 season, limit, time, and area, the court may reduce the charge to an infraction
27 punishable by a fine of not less than fifty dollars (\$50) and not more than two
28 hundred fifty dollars (\$250).

29 **Comment.** Section 4700 continues former Fish and Game Code Section 12002.1 without
30 substantive change.

31 **§ 4702. Violation of specific regulations**

32 4702. Notwithstanding Section 4400, a person who violates any of the following
33 regulations in Title 14 of the California Code of Regulations is guilty of an
34 infraction punishable by a fine of not less than one hundred dollars (\$100) and not
35 to exceed one thousand dollars (\$1,000), or of a misdemeanor:

36 (a) Section 251.7.

37 (b) Sections 307, 308, and 311 to 313, inclusive.

38 (c) Sections 505, 507 to 510, inclusive, and 550 to 552, inclusive.

1 **Comment.** Section 4702 continues former Fish and Game Code Section 12000(b)(8)-(10)
2 without substantive change.

3 **Note.** Proposed Section 4864 would continue Section 12000(b)(8)-(10), which was amended
4 by 2018 Cal. Stat. ch. 189. Although that bill will not take effect until 2019, it is included here in
5 anticipation of its effect.

6 **§ 4704. Ancillary consequences for specified violations**

7 4704. (a) In addition to any other penalty or fine imposed pursuant to this code,
8 if a person has been convicted of one or more offenses that was a violation of a
9 section listed in subdivision (b) separate from the offense before the court, the
10 court may order as a condition of probation upon conviction of the offense before
11 the court that is also a violation of a section listed in subdivision (b), that the
12 person attend the hunter education course designated in Section 10405 and
13 perform community service, preferably relating to natural resources if that type of
14 community service is available, as follows:

15 (1) If the person has one separate conviction, not more than 200 hours of
16 community service.

17 (2) If the person has two or more separate convictions, not more than 300 hours
18 of community service.

19 (b) This section applies to violations relating to a taking in Sections 9500,
20 30505, 33205, and 34200, and a sale or purchase of parts of a bear in violation of
21 Section 33455.

22 **Comment.** Section 4704 continues former Fish and Game Code Section 12001.5 without
23 substantive change, except that an erroneous reference to former Fish and Game Code Section
24 3700 was replaced with a reference to Section 30505 (which continued former Fish and Game
25 Code Section 3700.1).

26 **Note.** Existing Section 12001.5 refers to a repealed provision, former Section 3700, which
27 required a “duck stamp” when taking duck. Physical “stamps” are no longer required when taking
28 duck. Instead, a person must have an electronically issued “duck hunting validation.” See Section
29 3700.1 (proposed Section 30505). The Commission believes that the reference to the repealed
30 provision should be replaced with a reference to Section 3700.1 (proposed Section 30505).
31 Proposed Section 4704(b) would make that change.

32 **The Commission invites comment on whether that addition would cause any problems.**

33 **§ 4706. Punishment for third and subsequent convictions**

34 4706. (a) Upon the third conviction of a person of a violation of any provision of
35 this code or regulation adopted pursuant to this code relating to the taking or
36 possession of a bird or mammal in a five-year period, and upon a conviction
37 subsequent to the three convictions during a five-year period, that person shall be
38 prohibited from taking a bird or mammal in the state for three years from the date
39 of the last conviction. The commission shall revoke a hunting license of a person
40 prohibited from taking a bird or mammal in this state for the period of prohibition.

41 (b) It shall be unlawful for a person to obtain, or attempt to obtain, a hunting
42 license during a period of prohibition.

1 **Comment.** Section 4706 continues former Fish and Game Code Section 12155 without
2 substantive change.

3 **§ 4708. Triple possession limit**

4 4708. (a) Any person who illegally takes or possesses in the field more than
5 three times the daily bag limit, or who illegally possesses more than three times
6 the legal possession limit, of fish, reptiles, birds, amphibians, or mammals, is
7 guilty of a misdemeanor, and shall be subject to a fine of not less than five
8 thousand dollars (\$5,000), nor more than forty thousand dollars (\$40,000), or
9 imprisonment in a county jail for not more than one year, or by both that fine and
10 imprisonment.

11 (b) If a person is convicted of a second or subsequent violation of subdivision
12 (a), that person shall be punished by a fine of not less than ten thousand dollars
13 (\$10,000), nor more than fifty thousand dollars (\$50,000), or imprisonment in a
14 county jail for not more than one year, or by both that fine and imprisonment.

15 (c) Nothing in this section prohibits a person from giving, receiving, or
16 possessing the legal possession limit of lawfully taken fish, reptiles, birds,
17 amphibians, or mammals.

18 (d) Nothing in this section prohibits a person from giving, receiving, or
19 possessing, at the personal abode of the donor or donee, lawfully taken migratory
20 game birds that are not required to be tagged pursuant to the federal Migratory
21 Bird Treaty Act (16 U.S.C. Sec. 703 et seq.) or regulations adopted pursuant to
22 that act.

23 (e) This section does not supersede Section 5462 5802, or 5804.

24 (f) Moneys equivalent to 50 percent of the revenue from any fine collected
25 pursuant to this section shall be paid to the county in which the offense was
26 committed, pursuant to Section 3610. The board of supervisors shall first use
27 revenues pursuant to this subdivision to reimburse the costs incurred by the district
28 attorney or city attorney in investigating and prosecuting the violation. Any excess
29 revenues may be expended in accordance with Section 3915.

30 **Comment.** Section 4708 continues former Fish and Game Code Section 12013(a), (b), and (d)-
31 (g) without substantive change.

32 See also Sections 4552, 4570 (enforcement).

33 **§ 4710. Taking during trespassing**

34 4710. The court before whom any person has been convicted of trespassing
35 under Section 602 of the Penal Code shall, in addition to any other fine or
36 forfeiture imposed, confiscate any bird or mammal taken while trespassing, and
37 shall dispose of the bird or mammal to a charitable institution or cause it to be
38 destroyed if unfit for human consumption.

39 **Comment.** Section 4710 continues former Fish and Game Code Section 12164 without
40 substantive change.

1 **§ 4712. Use of sodium cyanide**

2 4712. Notwithstanding any other provision of this code, a violation of Section
3 8140, or any rule or regulation adopted pursuant to that section, is punishable by a
4 fine of not less than three hundred dollars (\$300) or more than two thousand
5 dollars (\$2,000), or by imprisonment in a county jail for not more than one year, or
6 by both that fine and imprisonment. The Legislature may increase, but may not
7 decrease, these penalties.

8 **Comment.** Section 4712 continues former Fish and Game Code Section 12005.5 without
9 substantive change.

10 **Note.** Section 12005.5 was added by Proposition 4 (1998). The Commission believes that the
11 nonsubstantive continuation of those provisions in the proposed law would not be an
12 impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and
13 associated text.

14 **§ 4714. Lead ammunition**

15 4714. A person who violates any provision of Chapter 4 (commencing with
16 Section 10000) of Title 1 of Part 2 of Division 6 is guilty of an infraction
17 punishable by a fine of five hundred dollars (\$500). A second or subsequent
18 offense shall be punishable by a fine of not less than one thousand dollars (\$1,000)
19 or more than five thousand dollars (\$5,000).

20 **Comment.** Section 4714 continues former Fish and Game Code Section 3004.5(g) without
21 substantive change.

22 CHAPTER 2. HUNTING-RELATED INJURIES

23 **§ 4750. Failure to aid injured person**

24 4750. Every person who while taking any bird or mammal kills or injures
25 another person by the use of any firearm, bow and arrow, spear, slingshot, or other
26 weapon or device used in that taking and who knowingly either abandons that
27 person or fails to render to that injured person all necessary aid possible under the
28 circumstances is guilty of a felony.

29 **Comment.** Section 4750 continues former Fish and Game Code Section 3009 without
30 substantive change.

31 **§ 4752. Reporting injury**

32 4752. Any person who, while hunting, kills or wounds or witnesses the killing or
33 wounding of any human being, or domestic animal belonging to another, shall,
34 within 48 hours after the incident, forward a complete written report to the
35 Department of Fish and Wildlife, 1416 Ninth Street, Sacramento, California
36 95814, providing the full name and address of the person who forwarded the
37 report and all facts relating to the incident.

38 **Comment.** Section 4752 continues former Fish and Game Code Section 12151.5 without
39 substantive change.

1 **§ 4754. Killing or wounding of human being while hunting**

2 4754. (a) Whenever any person, while taking a bird or mammal, kills or wounds
3 any human being and that fact is ascertained by the department, the department
4 shall notify the district attorney of the county in which the act occurred. The
5 district attorney may thereupon bring an action in the superior court of the county
6 in which the act occurred for the purpose of determining the cause of the killing or
7 the wounding. These proceedings shall be conducted in the same manner as an
8 action to try a misdemeanor and the defendant may request that all findings of fact
9 shall be made by a jury. The court shall inform the defendant of the nature of the
10 proceedings and of the defendant's right to have a jury.

11 (b) If it is found that the defendant did the killing or wounding, but that it was
12 not intentional or negligent, the court shall dismiss the proceeding. Otherwise, if it
13 is found that the defendant did the killing or wounding intentionally, by an act of
14 gross negligence, or while under the influence of alcohol, the court shall issue an
15 order permanently prohibiting the defendant from taking any bird or mammal.

16 (c) If it is found that the defendant was negligent, but not grossly negligent, the
17 court shall issue an order prohibiting the defendant from taking any bird or
18 mammal for a period specified at the discretion of the court but not less than five
19 years.

20 (d) Any person who takes any bird or mammal in violation of an order issued
21 pursuant to this section is guilty of a felony.

22 **Comment.** Subdivisions (a) through (c) of Section 4754 continue former Fish and Game Code
23 Section 12150 without substantive change.

24 Subdivision (d) continues former Fish and Game Code Section 12001 without substantive
25 change.

26 See also Section 4756 (enforcement).

27 **§ 4756. Petition for new trial**

28 4756. Any person whose license has been revoked pursuant to Section 4754
29 may, upon petition, obtain a new trial in the court that originally revoked the
30 license. That trial shall be with a jury if requested as provided in Section 4754, and
31 shall be to determine if the revocation was based on an intentional or grossly
32 negligent act or an act committed while under the influence of alcohol, in which
33 case the petition shall be denied. If however, it was based on a negligent act not
34 amounting to gross negligence the court may review and redetermine the length of
35 time for which no license should be issued to the person. The court may authorize
36 the issuance of a license to the person after such time as the court shall determine
37 to be proper in light of the circumstances.

38 **Comment.** Section 4756 continues former Fish and Game Code Section 12150.5 without
39 substantive change.

40 **§ 4758. Killing or wounding domestic animal while hunting**

41 4758. (a) Whenever any person, while taking a bird or mammal, kills or wounds
42 any domestic animal belonging to another and that fact is ascertained by the

1 department, the department shall notify the district attorney of the county in which
2 the act occurred. The district attorney may thereupon bring an action in the
3 superior court of the county in which the act occurred for the purpose of
4 determining the cause of the killing or wounding. These proceedings shall be
5 conducted in the same manner as an action to try a misdemeanor and the defendant
6 may request that all findings of fact shall be made by a jury. The court shall
7 inform the defendant of the nature of the proceedings and of the defendant's right
8 to have a jury.

9 (b) If it is found that the defendant did the killing or wounding but that it was
10 not intentional or negligent, the court shall dismiss the proceeding. Otherwise, if it
11 is found that the defendant did the killing or wounding intentionally or
12 negligently, the court shall issue an order prohibiting the defendant from taking
13 any bird or mammal for a period of five years.

14 **Comment.** Section 4758 continues former Fish and Game Code Section 12151 without
15 substantive change.

16 **§ 4760. Report of court order prohibiting take of bird or mammal**

17 4760. (a) Whenever a person has been prohibited from taking any bird or
18 mammal pursuant to Section 4754 or 4758, the court in which the proceeding for
19 such action was had shall report the facts to the department at its Sacramento
20 headquarters office. The report shall show the date and place of the occurrence,
21 the name and address of the person who did the killing or wounding, the name and
22 address of the person who was killed or wounded or the name and address of the
23 owner of the animal, as the case may be, and such other information as the
24 department may require.

25 (b) The department shall maintain a record of all orders issued under Section
26 4754 or 4758. The record shall show the name and address of the person involved,
27 the date of such action, and the date of expiration of such order. The department
28 shall periodically transmit copies of such records to each person authorized to
29 issue a hunting license and to each district attorney in the state.

30 **Comment.** Section 4760 continues former Fish and Game Code Section 12152 without
31 substantive change.

32 **§ 4762. Proof of financial responsibility**

33 4762. (a) Any person who has been prohibited from taking any bird or mammal
34 pursuant to Section 4754 or 4758 shall not apply for a hunting license or take any
35 bird or mammal unless the person has filed with the department proof of ability to
36 respond in damages in an amount of at least ten thousand dollars (\$10,000) for
37 personal injury or death of any person, subject to a maximum of twenty thousand
38 dollars (\$20,000) for the injury or death of two or more persons in any one
39 accident and at least five thousand dollars (\$5,000) for property damage resulting
40 from any one accident.

41 (b) Proof of ability to respond in damages may be given by any of the following:

1 (1) The written certificate of any insurance carrier duly authorized to do
2 business within the state that it has issued to or for the benefit of the person named
3 a public liability insurance policy which is, at the date of the certificate, in full
4 force and effect. The certificate shall certify that the policy cited shall not be
5 canceled except upon 10 days' prior written notice to the department.

6 (2) A bond in the amount of twenty-five thousand dollars (\$25,000) approved by
7 a judge of a court of record. The bond shall be conditioned for the payment of the
8 amounts specified in this section and shall provide for the entry of judgment on
9 motion of the state in favor of any holder of any final judgment on account of
10 damages to property or injury to any person caused while the licensee is taking
11 any bird or mammal.

12 **Comment.** Section 4762 continues former Fish and Game Code Section 12150.6 without
13 substantive change.

14 **§ 4764. Cancellation of guarantee of financial responsibility**

15 4764. The department shall, upon request, cancel any bond or shall direct the
16 return to the person entitled thereto of any money or securities deposited pursuant
17 to this code as proof of ability to respond in damages:

18 (a) On the filing of an affidavit with the department that the person will not
19 thereafter engage in the taking of any bird or mammal.

20 (b) In the event of the permanent incapacity of such person to engage in the
21 taking of any bird or mammal.

22 (c) Upon the death of the person on whose behalf such proof was filed.

23 **Comment.** Section 4764 continues former Fish and Game Code Section 12150.7 without
24 substantive change.

25 **§ 4766. Additional financial responsibility based on claim or judgment**

26 4766. Whenever any claim is made or judgment is rendered against a person
27 required to file proof of ability to respond in damages, that person shall not apply
28 for a hunting license or take any bird or mammal until additional proof of ability
29 to respond in damages has been filed with the department in an amount sufficient
30 to provide proof of ability to respond in damages in the amount specified in
31 Section 4762 over and above all claims made against previously filed proof of
32 ability to respond in damages.

33 **Comment.** Section 4766 continues former Fish and Game Code Section 12150.8 without
34 substantive change.

35 **CHAPTER 3. HUNTING CLUB**

36 **§ 4770. Commercial hunting club**

37 4770. Any license issued pursuant to Section 10605 may be revoked by the
38 commission at one of the commission's regularly scheduled meetings, or by a
39 court of competent jurisdiction, upon the licensee's conviction of a violation of

1 this code, and no new license may be issued to the licensee during the same
2 license year.

3 **Comment.** Section 4770 continues former Fish and Game Code Section 3246 without
4 substantive change.

5 TITLE 5. TRAPPING

6 § 4800. Unmarked trap

7 4800. The punishment for a violation of Section 11020 is a fine of not more than
8 two thousand dollars (\$2,000), imprisonment in a county jail for not more than one
9 year, or both the fine and imprisonment.

10 **Comment.** 4800 restates former Fish and Game Code Section 12002(b)(2) without substantive
11 change.

12 § 4802. Body-gripping trap

13 4802. A violation of Section 11110, or any rule or regulation adopted pursuant
14 to this section, is punishable by a fine of not less than three hundred dollars (\$300)
15 or more than two thousand dollars (\$2,000), or by imprisonment in a county jail
16 for not more than one year, or by both that fine and imprisonment. The Legislature
17 may increase, but may not decrease, these penalties.

18 **Comment.** Section 4802 continues the part of former Fish and Game Code Section 12005.5
19 applicable to former Fish and Game Code Section 3003.1 without substantive change.

20  **Note.** Section 12002.5 was added by Proposition 4 (1998). The Commission believes that the
21 nonsubstantive continuation of those provisions in the proposed law would not be an
22 impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and
23 associated text.

24 § 4804. Fur dealer license

25 4804. Any license issued under Chapter 2 (commencing with Section 11300) of
26 Title 2 of Part 3 of Division 6 may be revoked by the commission at one of the
27 commission's regularly scheduled meetings, upon the licensee's conviction of a
28 violation of that chapter.

29 **Comment.** Section 4804 continues former Fish and Game Code Section 4043 without
30 substantive change.

31 § 4806. Violation by trapping licensee

32 4806. (a) No person who is licensed or required to be licensed pursuant to
33 Section 11200 and who is convicted of a violation of any provision of Section
34 11000, 11005, 11010, 11015, 11105, 11020, 11150, 11155, 11205, 32150, 32300,
35 or 35210 shall take any fur-bearing or nongame mammal in the state for three
36 years from the date of the next regularly scheduled meeting of the commission
37 held at least 30 days after the date of that conviction.

(b) The commission shall revoke the trapping license of the person who is prohibited from taking fur-bearing and nongame mammals in the state, if the person has one, for the period of prohibition.

(c) No person shall obtain, or attempt to obtain, a trapping license during a period of prohibition.

Comment. Section 4806 continues former Fish and Game Code Section 12156 without substantive change.

TITLE 6. FISHING

CHAPTER 1. VIOLATION OF SPECIFIED REGULATIONS

§ 4850. Violation of specific regulations

4850. Notwithstanding Section 4400, a person who violates any of the following regulations in Title 14 of the California Code of Regulations is guilty of an infraction punishable by a fine of not less than one hundred dollars (\$100) and not to exceed one thousand dollars (\$1,000), or of a misdemeanor:

(a) Sections 1.14, 1.17, 1.62, 1.63, and 1.74.

(b) Sections 2.00 to 5.95, inclusive, and 7.00 to 8.00, inclusive.

(c) Sections 27.56 to 30.10, inclusive.

(d) Sections 40 to 43, inclusive.

Comment. Section 4850 continues former Fish and Game Code Section 12000(b)(4)-(7) without substantive change.

CHAPTER 2. FISHING LICENSES

Article 1. Sport Fishing License

§ 4860. Fishing without required validation

4860. (a) Notwithstanding any other provision of law, a violation of Section 12905, 12910 or 12955 is an infraction, punishable by a fine of not less than fifty dollars (\$50), nor more than two hundred fifty dollars (\$250), for a first offense.

(b) If a person is convicted of a violation of Section 12905, 12910, or 12955 within five years of a separate offense resulting in a conviction of a violation of Section 12905, 12910, or 12955, that person shall be punished by a fine of not less than one hundred dollars (\$100), nor more than five hundred dollars (\$500).

(c) If a person is convicted of a violation of Section 12905, 12910 or 12955 and produces in court the required validation that was valid at the time of the violation, and if the sport fishing was otherwise lawful, the court may reduce the fine imposed for the violation to twenty-five dollars (\$25).

Comment. Section 4860 continues the part of former Fish and Game Code Section 12002.2.1 applicable to violations of former Fish and Game Code Sections 6596.1(a), 7149.45(a), and 7180.1(b) without substantive change. The reference to production in court of a Bay Delta sport

fishing enhancement stamp or validation is discontinued as obsolete. See 2009 Cal. Stat. ch. 381, § 2 (repealing former Fish and Game Code Section 7360, authorizing issuance of those stamps and validations). The reference to production in court of a sport fishing ocean enhancement stamp, a second rod sport fishing stamp, and a Colorado River special use stamp are also discontinued as obsolete. See 2015 Cal. Stat. ch. 683, § 19, 23, and 25 (repealing former Fish and Game Code sections authorizing issuance of those stamps).

The part of former Fish and Game Code Section 12002.2.1 applicable to a violation of Section 1.18 of Title 14 of the California Code of Regulations is discontinued as obsolete, as that section was repealed on January 13, 2010.

Note. As indicated in the Comment above, proposed Section 4860 would not include a number of cross-references that appear to be obsolete. **The Commission invites comment on whether any of those deletions would be problematic.**

§ 4862. Valid license in possession

4862. (a) Notwithstanding any other provision of law, a violation of Section 12900 or a regulation requiring a license to be displayed is an infraction, punishable by a fine of not less than one hundred dollars (\$100) nor more than one thousand dollars (\$1,000), for a first offense. If a person is convicted of a violation of Section 12900 or a regulation requiring a license to be displayed within five years of a separate offense resulting in a conviction of a violation of Section 12900 or a regulation requiring a license to be displayed, that person shall be punished by a fine of not less than two hundred fifty dollars (\$250) nor more than one thousand dollars (\$1,000).

(b) If a person is convicted of a violation of Section 12900 or a regulation requiring a license to be displayed and produces in court a sport fishing license issued pursuant to Section 12900 that was valid at the time of the violation, and if the sport fishing was otherwise lawful, the court may reduce the fine imposed for the violation to twenty-five dollars (\$25).

(c) If a person is charged with a violation of Section 12900 or a regulation requiring a license to be displayed and produces in court a lifetime sport fishing license issued in his or her name that was valid at the time of the violation, and if the sport fishing was otherwise lawful, the court may dismiss the charge.

(d) A person shall not be charged or convicted for both a violation of Section 12900 and a regulation requiring a license to be displayed for the same act.

Comment. Section 4862 continues former Fish and Game Code Section 12002.2 without substantive change.

Note. Existing Section 12002.2(c) (which would be continued by proposed Section 4862(c)) permits dismissal of a charged violation of existing Section 7145 (requiring possession of sport fishing license), if the person charged appears in court and produces a valid lifetime sport fishing license issued in his or her name. Proposed Section 4862 would make clear that the lifetime sport fishing license must have been valid at the time of the violation.

The Commission invites comment on whether this revision is problematic.

§ 4864. Fishing in specified waters without ocean enhancement validation

4864. Notwithstanding subdivision (a) of Section 4400, a person who violates Section 12910 is guilty of an infraction punishable by a fine of not less than one hundred dollars (\$100) and not to exceed one thousand dollars (\$1,000), or of a misdemeanor.

Comment. Section 4864 continues former Fish and Game Code Section 12000(b)(2) without substantive change.

Notes. (1) Proposed Section 4864 would continue Section 12000(b)(2), which was amended by 2018 Cal. Stat. ch. 189. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

(2) The penalty specified in Section 12000(b)(2), for a violation of Section 6596.1(a), appears to be in conflict with the penalty specified in Section 12002.2.1(a)(1) (proposed Section 4860). **The Commission invites comment on how that conflict should be resolved.**

Article 2. Commercial Fishing License

§ 4870. Suspension or revocation

4870. The commission, after notice and opportunity for hearing, may suspend, revoke, or cancel commercial fishing privileges for a period of time to be determined by the commission, for any of the following reasons:

(a) The person was not lawfully entitled to be issued the license, permit, or other entitlement.

(b) A violation of this code, the terms of the permit or other entitlement, or the regulations adopted pursuant thereto, by the licensee, permittee, person holding the entitlement, or his or her agent, servant, employee, or person acting under the licensee's, permittee's, or entitled person's direction or control.

(c) A violation of any federal law relating to the fishery for which the license, permit, or other entitlement was issued by the licensee, permittee, person holding the entitlement, or his or her agent, servant, employee, or person acting under the licensee's, permittee's, or entitled person's direction or control.

Comment. Section 4870 continues former Fish and Game Code Section 7857(b) without substantive change.

§ 4872. License revocation or suspension proceeding at commission meeting

4872. A proceeding to revoke or suspend a commercial fishing license shall be conducted at a regularly scheduled commission meeting.

Comment. Section 4872 continues former Fish and Game Code Section 7855 without substantive change.

1 **§ 4874. License forfeiture**

2 4874. A commercial fishing license is forfeited for the violation of Section 2300,
3 2815, 2820, 2920, 2930, 3050, 8300, or 10205, or of any of the provisions of this
4 code relating to the use of nets.

5 **Comment.** Section 4874 continues former Fish and Game Code Section 12153 without
6 substantive change.

7 **Note.** Existing Section 12153, which was last amended by 2015 Cal. Stat. ch. 683, cross-
8 refers to a range of existing code sections identified as “Sections 1050.1 to 1060, inclusive.”
9 However, Section 1060 was repealed by that same bill, and the substance of Section 1060 does
10 not appear to have been continued elsewhere in the code. The code section that numerically
11 preceded Section 1060 in the existing code at the time Section 12153 was last amended was
12 Section 1059. Proposed Section 4874 therefore cross-refers to the sections of the proposed law
13 that continue provisions that are numerically between existing Sections 1050.1 and 1059,
14 inclusive, that describe conduct engaged in by the holder of a commercial fishing license.

15 **The Commission seeks comment on whether this continuation of existing Section 12153 is**
16 **appropriate.**

17 **§ 4876. Approaching federal vessel**

18 4876. (a) The commission may suspend or revoke the commercial fishing
19 license of any licensee who operates a vessel in waters within the territorial
20 jurisdiction of the State and approaches:

21 (1) Within 500 yards of any vessel owned or operated by the United States
22 Government or any department or agency thereof, except when necessary to
23 comply with the laws or rules of navigation governing the safe movement of
24 vessels; or

25 (2) So close to any vessel owned or operated by the United States or any
26 department or agency thereof and engaged in transporting naval or military
27 equipment or personnel as to interfere with such transportation or to enable the
28 observation thereof, except when necessary to comply with the laws or rules of
29 navigation governing the safe movement of vessels.

30 (b) No license shall be suspended or revoked pursuant to this section until the
31 filing of a complaint with the commission by any of the following:

32 (1) The commanding officer of a vessel owned or operated by the United States
33 or any department or agency thereof.

34 (2) Any other officer of any such vessel who is authorized by his commanding
35 officer to file such complaint.

36 (3) Any commanding officer of any military or naval activity affected by the
37 licensee’s operation of a vessel, or any other officer of such activity authorized by
38 such commanding officer to file a complaint.

39 **Comment.** Subdivision (a) of Section 4876 continues former Fish and Game Code Section
40 7853 without substantive change.

41 Subdivision (b) continues former Fish and Game Code Section 7854 without substantive
42 change.

Article 3. Live Freshwater Fish Bait License

§ 4880. Revocation

4880. A live freshwater bait fish license may be revoked for a violation of the terms of the license.

Comment. Section 4880 continues a part of the second paragraph of former Fish and Game Code Section 8460 without substantive change.

CHAPTER 3. COMMERCIAL VESSELS

Article 1. Commercial Fishing Vessel Registration

§ 4900. Suspension or revocation of registration for specified violations

4900. (a) In addition to any other applicable penalty, a commercial boat registration may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon the second conviction in three years of the registrant, or the registrant's agent, servant, employee, or any other person acting under the registrant's direction or control, for a violation of any of the following provisions or regulations adopted pursuant thereto:

(1) Title 6 (commencing with Section 19150) of Part 6 of Division 6.

(2) Chapter 2 (commencing with Section 38550) of Title 2 of Part 4 of Division 10.

(3) Title 2 (commencing with Section 38950) of Part 6 of Division 10.

(4) Section 39305.

(5) Section 39555.

(6) Section 39655.

(7) Section 39760.

(8) Title 2 (commencing with Section 39850) of Part 12 of Division 10.

(9) Title 2 (commencing with Section 40300) of Part 13 of Division 10.

(10) Title 2 (commencing with Section 40750) of Part 15 of Division 10.

(11) Section 40905.

(12) Chapter 3 (commencing with Section 41450) of Title 2 of Part 17 of Division 10.

(13) Section 42110.

(14) Section 42205.

(15) Chapter 1 (commencing with Section 42250) of Title 2 of Part 18 of Division 10.

(16) Section 42350.

(17) Chapter 3 (commencing with Section 42800) of Title 2 of Part 20 of Division 10.

(18) Section 42905.

(19) Section 43355.

(20) Section 43555.

- 1 (21) Section 43655.
- 2 (22) Section 44205.
- 3 (23) Title 2 (commencing with Section 44400) of Part 25 of Division 10.
- 4 (24) Title 2 (commencing with Section 44750) of Part 26 of Division 10.
- 5 (25) Section 45800.
- 6 (26) Section 45805.
- 7 (27) Title 2 (commencing with Section 46800) of Part 6 of Division 11.
- 8 (28) Section 49010.
- 9 (29) Title 2 (commencing with Section 49450) of Part 9 of Division 11.
- 10 (30) Section 51010.
- 11 (31) Section 51015.
- 12 (32) Article 3 (commencing with Section 51100) of Chapter 2 of Title 2 of Part
- 13 15 of Division 11.
- 14 (33) Chapter 2 (commencing with Section 51400) of Title 2 of Part 16 of
- 15 Division 11.
- 16 (b) The commercial boat registration shall not be revoked unless both the first
- 17 and second convictions are related to the boat for which the commercial boat
- 18 registration is to be revoked, and are for violations which occurred when the
- 19 person convicted was the registrant or the registrant's agent, servant, employee, or
- 20 acting under the registrant's direction or control.
- 21 **Comment.** Section 4900 restates former Fish and Game Code Section 12002.6 without
- 22 substantive change.

23 **Note.** Proposed Section 4900(a) is intended to restate existing Fish and Game Code Section
24 12002.6(a) to clarify the meaning of that provision, without changing its substantive effect. The
25 existing provision reads as follows, with the restated language italicized:

26 Notwithstanding *Sections 12000, 12001, and 12002*, a commercial boat registration may be
27 revoked or suspended by the commission.... for a violation of any of the following provisions or
28 regulations adopted pursuant thereto:

- 29 (1) *Section 5521 or 5521.5.*
- 30 (2) *Article 2 (commencing with Section 8150), Article 3 (commencing with Section 8180),*
31 *Article 4 (commencing with Section 8210), Article 5 (commencing with Section 8250), Article 6*
32 *(commencing with Section 8275), Article 9 (commencing with Section 8370), Article 13*
33 *(commencing with Section 8495), and Article 15 (commencing with Section 8550) of Chapter 2 of*
34 *Part 3 of Division 6.*
- 35 (3) *Article 1 (commencing with Section 8601), Article 2 (commencing with Section 8620),*
36 *Article 4 (commencing with Section 8660), Article 5 (commencing with Section 8685), Article 6*
37 *(commencing with Section 8720), Article 7 (commencing with Section 8750), Article 8*
38 *(commencing with Section 8780), and Article 10 (commencing with Section 8830) of Chapter 3 of*
39 *Part 3 of Division 6.*
- 40 (4) *Article 1 (commencing with Section 9000) of Chapter 4 of Part 3 of Division 6.*

41 **The Commission invites comment on whether the restatement of the italicized language**
42 **above, in proposed Section 4900, would cause any substantive change in the meaning of the**
43 **provision.**

Article 2. Commercial Salmon Vessel Permit

§ 4910. Revocation of permit based on fraud

4910. The commission, after notice and opportunity for hearing and consultation with the review board, shall revoke a commercial salmon vessel permit issued pursuant to this chapter if the vessel permit was obtained by fraudulent means.

Comment. Section 4910 continues former Fish and Game Code Section 8246.4 without substantive change.

§ 4912. Appeal of revocation or denial or permit transfer

4912. A person whose commercial salmon fishing vessel permit is revoked by the commission may appeal the revocation to the commission by submitting the appeal in writing to the commission within 60 days of the decision.

Comment. Section 4912 continues former Fish and Game Code Section 8246.6, as it pertained to revocation, without substantive change.

§ 4914. Reversal of revocation order or denial of permit renewal or transfer

4914. (a) The commission shall reverse an order of revocation because of fraud, only if evidence is provided to the commission disputing the charges of fraud. If the commission finds there was no fraud after consideration of all of the evidence, the commission may order the revocation annulled, and, if the permit expiration date has passed during the pendency of the hearing on the appeal, the commission may order the department to renew the permit upon payment of the fees.

(b) Each appeal shall be heard and considered separately on its own merits.

Comment. Section 4914 continues former Fish and Game Code Section 8246.7, as it pertained to revocation, without substantive change.

§ 4916. Suspension or revocation of commercial salmon fishing privilege

4916. (a) At any time after notice of an order suspending or revoking of a person's commercial salmon fishing privilege is issued by the commission, and before the order of suspension or revocation is final, the commission may, with the agreement of the person subject to the action, compromise or dismiss the action to suspend or revoke the commercial salmon fishing privilege in the best interests of the state, or the commission may compromise or dismiss the action with the agreement of the person subject to the action on terms and conditions, which may include, but are not limited to, the payment of civil damages, the reduction of a revocation to a suspension for a specified period of time, or any other terms and conditions.

(b) The commission, after notice and opportunity for hearing and consultation with the review board, may suspend or revoke the commercial fishing privilege, authorized under a license issued for the purposes of Section 14500, for any violation of a term or condition of an agreement to compromise or dismiss a

1 separate suspension or revocation action which was made pursuant to subdivision
2 (a).

3 (c) If the commission orders a suspension or revocation of a person's
4 commercial salmon fishing privilege, any permit issued pursuant to this chapter
5 shall be renewed when the next renewal is due, or the permit shall expire as
6 provided in Section 41755.

7 (d) Civil damages imposed under subdivision (a) shall be due and payable on or
8 before a date which is 30 days after the compromise is entered into.

9 (e) Subdivision (a) does not apply if an action is brought under Section 4470 to
10 recover civil damages from the person subject to action under this section.

11 **Comment.** Subdivision (a) of Section 4916 continues former Fish and Game Code Section
12 8246(a) without substantive change.

13 Subdivision (b) continues former Fish and Game Code Section 8246(b) without substantive
14 change.

15 Subdivision (c) continues former Fish and Game Code Section 8246(c) without substantive
16 change.

17 Subdivision (d) continues former Fish and Game Code Section 8246.2(b) without substantive
18 change.

19 Subdivision (e) continues former Fish and Game Code Section 8246(d) without substantive
20 change.

21  **Notes.** (1) Existing Fish and Game Code Section 8246(b) (which would be continued by
22 proposed Section 4916(b)) refers to a license issued for the purposes of ... "Section 7852.3."
23 However, Section 7852.3, relating to the issuance of a commercial fishing license to a minor, was
24 repealed in 2003. See 2003 Cal. Stat. ch. 741. As it appears that cross-reference is now obsolete
25 (because any licenses issued pursuant to that repealed section could no longer be in effect),
26 proposed Section 4916(b) would not continue the cross-reference to former Section 7852.3.

27 **The Commission invites comment on whether the discontinuation of that cross-reference**
28 **would cause any problem.**

29 (2) Existing Fish and Game Code Section 8246.2(b) (which would be continued by proposed
30 Section 4916(d)) contains a reference to "[c]ivil damages imposed under subdivision (b) of
31 Section 8246." Similarly, existing Fish and Game Code Section 8246(d) (which would be
32 continued by proposed Section 4916(e)) provides that "subdivision (b) [of existing Section 8246]
33 does not apply if an action is brought to recover civil damages" under existing Section 2014. In
34 both cases, the reference to "subdivision (b)" appears to be a drafting error, as it is subdivision (a)
35 of Section 8246, rather than subdivision (b), that relates to civil damages.

36 Proposed Section 4916(d) and (e) would revise those references to refer to the provision
37 continuing Section 8246(a).

38 **The Commission invites comment on those revisions.**

39 **§ 4918. Determination of civil damages following suspension or revocation**

40 4918. The commission, in consultation with the department and the review
41 board, shall adopt regulations for the determination of civil damages provided for
42 in subdivision (a) of Section 4916, which give due consideration to the
43 appropriateness of the civil damages with respect to all of the following factors:

44 (a) The gravity of the violation.

45 (b) The good faith of the convicted licensee.

46 (c) The history of previous violations.

(d) The damage to the fishery.

(e) The cost of restoration of the fishery.

Comment. Section 4918 continues former Fish and Game Code Section 8246.2(a) without substantive change.

Note. Existing Fish and Game Code Section 8246.2(a) (which would be continued by proposed Section 4918) contains a reference to “civil damages provided for in subdivision (b) of Section 8246.” However, the reference to “subdivision (b)” appears to be a drafting error, as it is subdivision (a) of Section 8246, rather than subdivision (b), that relates to civil damages.

Proposed Section 4918 would revise that reference to refer to the provision continuing Section 8246(a).

The Commission invites comment on that revision.

Article 3. Passenger Fishing Boat

§ 4930. Forfeiture, suspension, or revocation of license

4930. A license issued under Title 12 (commencing with Section 21900) of Part 6 of Division 6 is subject to forfeiture, suspension, or revocation for a violation of Section 13600 or 13605, or for any offense for which a commercial fishing license may be forfeited, suspended, or revoked.

Comment. Section 4930 continues former Fish and Game Code Section 7924 without substantive change.

§ 4932. License suspension for unlawful sale or purchase of fish

4932. (a) In addition to any other applicable penalty, the commercial fishing license of the master of a vessel may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon conviction of the master or his agent, servant, employee, or person acting under his direction or control, for a violation of Section 13600 or 13605, or a regulation adopted pursuant to either of those sections, if the fish in question were taken from a vessel licensed pursuant to Section 21905.

(b) However, a master’s license shall not be revoked for the conviction of a violation occurring when the person convicted was not acting as the master’s agent, servant, employee, or acting under his direction or control.

(c) The master of a vessel is the person on board the vessel who is in charge of the vessel.

Comment. Section 4932 continues Fish and Game Code Section 12002.7 without substantive change. Principles of collateral estoppel may have application to a license revocation or suspension proceeding under this section. *Cf.* *People v. Sims*, 32 Cal. 3d 468, 651 P.2d 321, 186 Cal. Rptr. 77 (1982) (welfare fraud), *Gikas v. Zolin*, 6 Cal. 4th 841, 863 P.2d 745, 25 Cal. Rptr. 2d 500 (1993) (driving under the influence).

§ 4934. Commercial boat registration suspension for unlawful sale or purchase of fish

4934. (a) In addition to any other applicable penalty, the commercial boat registration of a commercial passenger fishing boat may be revoked or suspended by the commission, when requested by the department, for a period not to exceed

one year, upon conviction of the registrant, or the registrant's agent, servant, employee, or any other person acting under the registrant's direction or control, for a violation of Section 13600 or 13605, or a regulation adopted pursuant to that section, if the violation in question involves that boat.

(b) In addition to any other applicable penalty, the commercial boat registration of a commercial passenger fishing boat may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon conviction of any person other than a person specified in subdivision (a), for a violation of Section 13600 or 13605, if the fish or amphibians involved in the violation were taken from that boat, and the person committing the violation had committed a prior violation of Section 13600 or 13605 involving that boat within the previous three years.

(c) A commercial boat registration shall not be revoked under this section for a violation committed without the knowledge of the master, or an agent or employee of the registrant.

Comment. Section 4934 restates former Fish and Game Code Section 12002.4 without substantive change. Principles of collateral estoppel may have application to a license revocation or suspension proceeding under this section. *Cf. People v. Sims*, 32 Cal. 3d 468, 651 P.2d 321, 186 Cal. Rptr. 77 (1982) (welfare fraud), *Gikas v. Zolin*, 6 Cal. 4th 841, 863 P.2d 745, 25 Cal. Rptr. 2d 500 (1993) (driving under the influence).

Note. Proposed Section 4934 is intended to restate existing Fish and Game Code Section 12002.4 to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

12002.4. (a) Notwithstanding Sections 12000, 12001, and 12002, a commercial boat registration may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon conviction of the registrant, or the registrant's agent, servant, employee, or any other person acting under the registrant's direction or control, for a violation of Section 7121 or the regulations adopted pursuant thereto, if the violation in question involved a vessel licensed pursuant to Section 7920.

(b) Notwithstanding Sections 12000, 12001, and 12002, a commercial boat registration of a vessel licensed pursuant to Section 7920 may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon conviction of any other person for a violation of Section 7121, if the fish or amphibia involved in the violation were taken from the vessel and that person committed a prior violation of Section 7121 within three years on the vessel.

(c) The commercial boat registration shall not be revoked under this section for a violation which is unrelated to the vessel for which the commercial boat registration is to be revoked. Any violation committed without the knowledge of the master, or an agent or employee of the registrant, is unrelated to the vessel.

The Commission invites comment on whether proposed Section 4934 accurately continues the intended meaning of existing Section 12002.4.

CHAPTER 4. NETS AND TRAPS

Article 1. Geographical Restrictions

§ 4950. Waters upstream from Carquinez Bridge

4950. (a) The punishment for a first violation of Section 15540 is a fine of not more than two thousand dollars (\$2,000), imprisonment in a county jail for not more than one year, or both the fine and imprisonment.

(b) A second or subsequent violation of Section 15540 is punishable by a fine of not less than two thousand dollars (\$2,000) nor more than four thousand dollars (\$4,000), or imprisonment in a county jail for one year, or both that fine and imprisonment.

Comment. Subdivision (a) of Section 4950 continues former Fish and Game Code Section 12002(b)(5) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 12003 without substantive change.

Article 2. Gill and Trammel Nets

§ 4960. Provisions not exclusive

4960. The provisions of this article are not intended to be exclusive. Other provisions that govern gill and trammel nets include, but are not limited to, Title 4 (commencing with Section 16800) of Part 6 of Division 6.

Comment. Section 4960 is new.

Note. While the general approach taken in this tentative recommendation is to collect all provisions that govern the enforcement of specific provisions within this part, some provisions have not been treated in that way. Specifically, the Commission decided against making any significant changes to the gill and trammel net provisions that were enacted to implement constitutional provisions that were established by initiative. Enforcement provisions of that type were left in their original context.

Proposed Section 4960 was added to make clear that the provisions collected in this article are not the only provisions that govern gill and trammel nets.

§ 4962. Violation of Section 18040, 18045, 18050, or 18065

4962. (a) The punishment for a first conviction of a violation of Section 18040, 18045, 18050, or 18065 is a fine of not more than five thousand dollars (\$5,000), or imprisonment in a county jail for a period not to exceed six months, or the revocation of any license issued pursuant to Chapter 2 (commencing with Section 20300) of Title 9, or any combination of these penalties.

(b) The punishment for a second or subsequent conviction of a violation of Section 18040, 18045, 18050, or 18065, which offense occurred within five years of another offense which resulted in a conviction of Section 18040, 18045, 18050, or 18065 is a fine of not more than ten thousand dollars (\$10,000), or imprisonment pursuant to subdivision (h) of Section 1170 of the Penal Code, or

1 imprisonment in a county jail for a period not to exceed one year, or the revocation
2 of any license issued pursuant to Chapter 2 (commencing with Section 20300) of
3 Title 9, or any combination of these penalties.

4 **Comment.** Section 4962 continues former Fish and Game Code Section 12004 without
5 substantive change.

6 **§ 4964. Sharks and swordfish**

7 4964. If any person is convicted of falsely swearing a declaration under
8 subdivision (d) of Section 18365, in addition to any other penalty prescribed by
9 law, the following penalties shall be imposed:

10 (1) The fish landed shall be forfeited, or, if sold, the proceeds from the sale shall
11 be forfeited, pursuant to Sections 4510, 4512, 4514, and 4516.

12 (2) All shark or swordfish gill nets possessed by the permittee shall be seized
13 and forfeited pursuant to Section 4570 or subdivision (a) of Section 15400.

14 **Comment.** Section 4964 continues former Fish and Game Code Section 8576(e) without
15 substantive change.

16 **Article 3. Seizure of Nets and Traps**

17 **Note.** Existing Section 9008 provides that an illegally used trap is a nuisance that “shall be
18 seized pursuant to Article 3 (commencing with Section 8630) of Chapter 3,” which governs the
19 seizure of a net. The clear inference is that the procedure for seizure of a net also applies to the
20 seizure of a trap. That inference has been made express in this article, by revising its provisions to
21 refer to both nets and traps (they presently only refer to nets).

22 **The Commission invites comment on the appropriateness of that approach.**

23 **§ 4975. Tagging**

24 4975. (a) In lieu of a physical seizure of a net or trap pursuant to Section 15400
25 or 19400, a person authorized to make an arrest for a violation of any provision of
26 this code may attach to a net or trap used for taking fish in violation of this code a
27 tag of metal or other material, which shall be furnished by the department for that
28 purpose. The tag shall be impressed or printed with language stating that the net or
29 trap to which it is attached has been seized by the department as a public nuisance.
30 The act of attaching the tag shall be a seizure within the meaning of this section.

31 (b) Removal of a tag attached to any net or trap pursuant to this section by any
32 person other than a person authorized by the department, or the use of a tagged net
33 or trap by any person for fishing purposes, unless authorized by the department or
34 by the superior court, is a misdemeanor.

35 **Comment.** Section 4975 continues the former Fish and Game Code Section 8631 without
36 substantive change.

37 **§ 4980. Removal of seized net from vessel**

38 4980. Within three days after the department has been notified in writing that a
39 vessel carrying a seized net or trap has arrived in port, the department may remove

1 the net or trap from the vessel, unless the owner has filed a bond in accordance
2 with Section 4982. The notice shall be sufficient when delivered to the office of
3 the department nearest to the port at which the vessel has arrived.

4 **Comment.** Section 4980 continues former Fish and Game Code Section 8632 without
5 substantive change. The section has been made expressly applicable to traps, pursuant to former
6 Fish and Game Code Section 9008.

7 **Note.** It is not clear who would notify the department that a vessel carrying a seized net has
8 arrived in port. There does not seem to be any requirement that anyone provide such notice. **The**
9 **Commission invites comment on this.**

10 **§ 4982. Bond**

11 4982. (a) When a net or trap is seized pursuant to this article, the owner or any
12 other person otherwise entitled to possession of the net or trap may apply to the
13 superior court of the county or city and county in which the seizure was made, or
14 the county or city and county of which the claimant is a resident, for leave to file a
15 bond and regain possession of the net or trap, during the pendency of any
16 proceeding for forfeiture of the net or trap.

17 (b) The bond shall be in an amount determined by the judge to be the actual
18 value of the net or trap at the time of its release, and shall be conditioned on the
19 transfer of the net or trap to the custody of the department, if the net or trap is later
20 ordered forfeited.

21 (c) The bond shall be filed within three days after the seizure of the net or trap.
22 Upon filing the bond, the person on whose behalf it is given shall be put in
23 possession of the net or trap, and may use the net until it is ordered forfeited by a
24 judgment of the court.

25 **Comment.** Section 4982 continues former Fish and Game Code Section 8633 without
26 substantive change. The section has been made expressly applicable to traps, pursuant to former
27 Fish and Game Code Section 9008.

28 **§ 4984. Exceptions to release of net or trap on bond**

29 4984. Notwithstanding Section 4982, a net or trap seized pursuant to Section
30 15400 as illegal because of its size, manner of construction, materials used in its
31 construction, or configuration of its parts is presumed to be contraband, and shall
32 not be returned pending forfeiture, unless it can be and is modified to eliminate the
33 condition of illegality. This subdivision does not apply to a net or trap seized
34 pursuant to Section 15400 for illegal use.

35 (b) Notwithstanding subdivision (a), any net or trap seized pursuant to Section
36 15400 that is needed for evidence may be held for evidence.

37 **Comment.** Section 4984 continues the part of former Fish and Game Code Section 8635
38 applicable to nets without substantive change. The section has been made expressly applicable to
39 traps, pursuant to former Fish and Game Code Section 9008.

(b) In addition to, or in lieu of, a license or permit suspension or revocation, the commission may adopt and apply a schedule of fines for convictions of violations of Chapter 3 (commencing with Section 22600) of Title 15 of Part 6 of Division 6.

Comment. Section 5050 continues former Fish and Game Code Section 8589.5 without substantive change.

CHAPTER 6. FISH-RELATED COMMERCE

§ 5100. Suspension of license

5100. The commission, after notice and opportunity for hearing, may suspend, revoke, or cancel a commercial fish business license, permit, or other entitlement, for a period of time to be determined by the commission, for any of the following reasons:

(a) The person was not lawfully entitled to be issued the license, permit, or other entitlement.

(b) Any violation of this code, the regulations adopted pursuant to this code, or the terms of the permit or other entitlement by the licensee, permittee, person holding the entitlement, or his or her agent, servant, employee, or person acting under the licensee's, permittee's, or entitled person's direction or control.

(c) Any violation of any federal law relating to the fishery for which the license, permit, or other entitlement was issued by the licensee, permittee, person holding the entitlement, or his or her agent, servant, employee, or person acting under the licensee's, permittee's, or entitled person's direction or control.

Comment. Section 5100 continues former Fish and Game Code Section 8032.5(c) without substantive change.

§ 5102. Suspension based on specified convictions

5102. In addition to any other penalty prescribed in this code, a license issued pursuant to Chapter 2 (commencing with Section 20300) of Title 9 of Part 6 of Division 6 to a person who is convicted of a violation of Section 13600, 13605, 13915, 39105, 39555, or 43150 shall be suspended for not less than seven days nor more than 30 days. Each day a fish of the species designated in any of those sections is unlawfully possessed and each unlawful transaction involving the purchase or sale of a fish of those species by a wholesale fish dealer is a separate violation.

Comment. Section 5102 continues former Fish and Game Code Section 12002.9 without substantive change.

§ 5104. Reporting take of shark or swordfish

5104. Any license issued pursuant to Chapter 2 (commencing with Section 20300) of Title 9 of Part 6 of Division 6 may be revoked or suspended by the commission, when requested by the department, upon a conviction for a violation of Section 21000 for failure to report, or for inaccurately reporting, shark or

1 swordfish landings by fishermen operating under permits issued pursuant to
2 Section 18300, or subdivision (a) of Section 43655.

3 **Comment.** Section 5104 continues former Fish and Game Code Section 8581 without
4 substantive change.

5 **§ 5106. Marine aquaria pet trade**

6 5106. Notwithstanding subdivision (a) of Section 4400, a violation of a
7 provision of this chapter or any regulation adopted pursuant to Chapter 3
8 (commencing with Section 20700) of Title 9 of Part 6 of Division 6 is punishable
9 by a fine of not less than two thousand dollars (\$2,000), nor more than five
10 thousand dollars (\$5,000).

11 **Comment.** Section 5106 continues former Fish and Game Code Section 8598.6 without
12 substantive change.

13 **§ 5108. Sale or disposition of fish or amphibians in specified circumstances**

14 5108. (a) Notwithstanding any other provision of law, a violation of Section
15 13600 or 13605 by a person required to be licensed pursuant to Section 12900 is
16 punishable by a fine of not less than two thousand dollars (\$2,000) or more than
17 seven thousand five hundred dollars (\$7,500), except as provided in subdivisions
18 (b) or (c).

19 (b) If the violation in question involved the illegal sale or purchase of abalone
20 taken by a person required to be licensed pursuant to Section 12900, the violation
21 is punishable by a fine of not less than fifteen thousand dollars (\$15,000) or more
22 than forty thousand dollars (\$40,000).

23 (c) A violation of Section 13600 or 13605 by a person who for a commercial
24 purpose knowingly purchases or receives a fish or amphibian taken by a person
25 required to be licensed pursuant to Section 12900 is punishable by a fine of not
26 less than seven thousand five hundred dollars (\$7,500) or more than fifteen
27 thousand dollars (\$15,000).

28 **Comment.** Section 5108 continues former Fish and Game Code Section 12002.3 without
29 substantive change.

30 **Notes.** (1) Proposed Section 5108 would make the punishment prescribed by existing Section
31 12002.3(c) for the specified violation of existing Section 7121 expressly applicable to an
32 amphibian as well as fish, consistent with the prohibition in Section 7121.

33 **The Commission invites comment on whether this revision of the existing section is**
34 **problematic.**

35 (2) Existing Section 12002.3(b) (which would be continued by proposed Section 5108(b)),
36 provides a special penalty that applies if “the violation in question” involves abalone. It is not
37 entirely clear whether that provision in Section 12002.3(b) is intended to refer to a violation
38 described by existing Section 12002.3(a) (which would be continued by proposed Section
39 5108(a)), a violation described by existing Section 12002.3(c) (which would be continued by
40 proposed Section 5108(c)), or both.

41 **The Commission invites public comment on whether that apparent ambiguity is a**
42 **problem in practice, and if so, how it should be resolved.**

CHAPTER 7. LANDING FEES

§ 5150. Landing fees

5150. The commission, upon recommendation of the department, may suspend or revoke the commercial fishing privileges of any commercial fisherman, or the license of any person required to be licensed under Title 9 (commencing with Section 20150), who is convicted of a violation of Title 10 (commencing with Section 20900) of Part 6 of Division 6.

Comment. Section 5150 continues the part of former Fish and Game Code Section 8025(a) applicable to violations of Article 7.5 (commencing with Fish and Game Code Section 8010) of Chapter 1 of Part 3 of Division 6 of the former Fish and Game Code without substantive change.

CHAPTER 8. COMMERCIAL FISHING REPORTS

§ 5170. Suspension or revocation of commercial fishing license or privileges

5170. The commission, upon recommendation of the department, may suspend or revoke the commercial fishing privileges of any commercial fisherman, or the license of any person required to be licensed under Title 9 (commencing with Section 20150) of Part 6 of Division 6, who is convicted of a violation of Title 14 (commencing with Section 22200) of Part 6 of Division 6.

Comment. Section 5170 continues the part of former Fish and Game Code Section 8025(a) applicable to violations of Article 6 (commencing with Fish and Game Code Section 8010) of Chapter 1 of Part 3 of Division 6 of the former Fish and Game Code without substantive change.

§ 5172. Required record of fishing activities

5172. In addition to the penalty specified in subdivision (a) of Section 4400, failure to keep and submit records pursuant to Section 22200 may result in the revocation or suspension of a license or permit by the department or the commission when recommended by the department, for a period not to exceed one year.

Comment. Section 5172 continues former Fish and Game Code Section 8026(b) without substantive change.

TITLE 7. WILDLIFE PROPAGATION,
DOMESTICATION, POSSESSION, AND SALE

CHAPTER 1. IMPORTATION, TRANSPORTATION, AND POSSESSION
GENERALLY

§ 5200. Penalty

5200. (a) In addition to any other penalty provided by law, any person who violates Part 6 (commencing with Section 25600) of Division 7 or any regulation

implementing that part, is subject to a civil penalty of not less than five hundred dollars (\$500) nor more than ten thousand dollars (\$10,000) for each violation.

(b) Except as otherwise provided, any violation of Part 6 (commencing with Section 25600) of Division 7 or any regulation implementing that part is a misdemeanor punishable by imprisonment in a county jail for not more than six months, or by a fine of not more than one thousand dollars (\$1,000).

Comment. Section 5200 continues former Fish and Game Code Section 2125(a) without substantive change.

§ 5204. Civil action

5204. The Attorney General, or the city attorney of the city or the district attorney or county counsel of the county in which a violation of this title occurs, may bring a civil action to recover the civil penalty in Section 5200 and the costs of seizing and holding an animal listed in or designated pursuant to Sections 26700 through 26730, inclusive, except to the extent that those costs have already been collected as provided by Section 5208. The civil action shall be brought in the county in which the violation occurs, and any penalty imposed shall be transferred to the Controller for deposit in the Fish and Game Preservation Fund in accordance with Section 3600.

Comment. Section 5204 continues former Fish and Game Code Section 2125(b) without substantive change.

 **Note.** Existing Fish and Game Code Section 2125(a) provides for a civil penalty to be imposed against any person who violates the *chapter* in which Section 2125 appears, or any regulation implementing that chapter. However, Section 2125(b) authorizes designated officials from the county in which a violation of the *article* in which Section 2125 appears, to bring a civil action to recover that penalty.

The Commission invites comment on whether this distinction was intended, and if it was not, which reference was intended.

§ 5206. Additional costs and fees

5206. In an action brought under this chapter, in addition to the penalty specified in Section 5200, the reasonable costs of investigation, reasonable attorney's fees, and reasonable expert witness fees may also be recovered, and those amounts shall be credited to the same operating funds as those from which the expenditures for those purposes were derived.

Comment. Section 5206 continues former Fish and Game Code Section 2125(c) without substantive change.

§ 5208. Confiscated animal

5208. (a) If an animal is confiscated because the animal was kept in contravention of Part 6 (commencing with Section 26500) of Division 7 or any regulation implementing that part, the person claiming the animal shall pay to the department or the new custodian of the animal an amount sufficient to cover all reasonable expenses expected to be incurred in caring for and providing for the

1 animal for at least 30 days, including, but not limited to, the estimated cost of
2 food, medical care, and housing.

3 (b) If the person claiming the animal fails to comply with the terms of his or her
4 permit and fails to regain possession of the animal by the expiration of the first 30-
5 day period, the department may euthanize the animal or place the animal with an
6 appropriate wild animal facility at the end of the 30 days, unless the person
7 claiming the animal pays all reasonable costs of caring for the animal for a second
8 30-day period before the expiration of the first 30-day period. If the permittee is
9 still not in compliance with the terms of the permit at the end of the second 30-day
10 period, the department may euthanize the animal or place the animal in an
11 appropriate wild animal facility.

12 (c) The amount of the payments described in this section shall be determined by
13 the department, and shall be based on the current reasonable costs to feed, provide
14 medical care for, and house the animal. If the person claiming the animal complies
15 with the terms of his or her permit and regains possession of the animal, any
16 unused portion of the payments required pursuant to this section shall be returned
17 to the person claiming the animal no later than 90 days after the date on which the
18 person regains possession of the animal.

19 **Comment.** Section 5208 continues former Fish and Game Code Section 2125(d) without
20 substantive change.

21 **§ 5210. Permit revocation**

22 5210. The commission shall revoke a permit issued pursuant to Section 27200 if
23 it finds that a permittee has failed to meet the requirements for importing,
24 transporting, possessing, or confining any wild animal as established pursuant to
25 Section 26600.

26 **Comment.** Section 5210 continues former Fish and Game Code Section 2150(b) without
27 substantive change.

28 **CHAPTER 2. AQUATIC ORGANISMS**

29 **§ 5250. Planting of fish**

30 5250. Notwithstanding subdivision (b) of Section 4400, the punishment for each
31 violation of Section 25415 is a fine of not more than five thousand dollars
32 (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or
33 both the fine and imprisonment.

34 **Comment.** Section 5250 continues the part of former Fish and Game Code Section 12007
35 applicable to former Fish and Game Code Section 6400 without substantive change.

36 **§ 5252. Placement of aquatic organisms**

37 5252. Notwithstanding subdivision (b) of Section 4400, the punishment for each
38 violation of subdivision (b) of Section 23800 is a fine of not more than five

1 thousand dollars (\$5,000) or imprisonment in the county jail for a period not to
2 exceed one year, or both the fine and imprisonment.

3 **Comment.** Section 5252 continues the part of former Fish and Game Code Section 12007
4 applicable to former Fish and Game Code Section 15202 without substantive change.

5 **§ 5254. Importation of diseased aquatic organism**

6 5254. Notwithstanding subdivision (b) of Section 4400, the punishment for each
7 violation of a regulation issued pursuant to Section 24540 is a fine of not more
8 than five thousand dollars (\$5,000) or imprisonment in the county jail for a period
9 not to exceed one year, or both the fine and imprisonment.

10 **Comment.** Section 5254 continues the part of former Fish and Game Code Section 12007
11 applicable to former Fish and Game Code Section 15510 without substantive change.

12 **§ 5256. Permit to move quarantined aquatic plant or animal**

13 5256. Notwithstanding subdivision (b) of Section 4400, the punishment for each
14 violation of Section 24545 is a fine of not more than five thousand dollars
15 (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or
16 both the fine and imprisonment.

17 **Comment.** Section 5256 continues the part of former Fish and Game Code Section 12007
18 applicable to former Fish and Game Code Section 15509 without substantive change.

19 **§ 5258. Importation of aquatic plant or animal**

20 5258. Notwithstanding subdivision (b) of Section 4400, the punishment for each
21 violation of Section 24705 is a fine of not more than five thousand dollars
22 (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or
23 both the fine and imprisonment.

24 **Comment.** Section 5258 continues the part of former Fish and Game Code Section 12007
25 applicable to former Fish and Game Code Section 15600(a) without substantive change.

26 **§ 5260. Placement of aquatic nuisance species**

27 5260. (a) Notwithstanding subdivision (b) of Section 4400 or 5250, any person
28 who violates Section 25415 through the use of an aquatic nuisance species is
29 guilty of a misdemeanor, punishable by all of the following:

30 (1) Imprisonment in the county jail for not less than six months or more than one
31 year, a fine of not more than fifty thousand dollars (\$50,000) for each violation, or
32 both that imprisonment and fine.

33 (2) Revocation of all of the defendant's licenses and permits issued pursuant to
34 this code.

35 (b) This section shall not apply to the placement of any live fish, any fresh or
36 salt water animal, or any aquatic plant from the discharge or exchange of ballast
37 water from any vessel as defined by Section 21 of the Harbors and Navigation
38 Code.

39 (c) This section does not apply to the placement of an aquatic plant by a person
40 who was unaware that he or she was in possession of the plant. This exception

includes circumstances in which a plant becomes unknowingly and temporarily attached or affixed to a boat, boat trailer, or boat motor.

Comment. Section 5260 continues former Fish and Game Code Section 12023 (a), (d)-(e) without substantive change.

Notes. (1) Existing Fish and Game Code Section 12023 (which would be continued by proposed Section 5260) provides special punishment for violating existing Fish and Game Code Section 6400 (which would be continued by proposed Section 25415), “through the use of an aquatic nuisance species, as defined in Section 6431.” Existing Fish and Game Code Sections 12024 (which would be continued by proposed Section 25505) and 12026 (which would be continued by proposed Section 25510) also both refer to a person violating Section 6400 “through the use of an aquatic nuisance species.”

However, former Fish and Game Code Section 6431 was repealed in 2003 (see 2003 Cal. Stat. ch. 610) and there is now no definition of the term “aquatic nuisance species” in either the existing code, or in any current regulation adopted pursuant to the existing code.

The Commission invites comment on whether the current absence of a definition of the term “aquatic nuisance species” in the existing code is problematic, and should be addressed in the proposed law.

(2) Existing Fish and Game Code Section 12023 provides for a special punishment for a violation of existing Fish and Game Code Section 6400, “[n]otwithstanding Section 12002.” Another existing code section, Section 12007, also specifies a punishment for any violation of existing Section 6400, “[n]otwithstanding Section 12002.”

Because existing Section 12023 provides for a greater punishment than existing Section 12007, and for a specially defined violation of existing Section 6400, the Commission believes the Legislature intended Section 12023 to supersede Section 12007, whenever Section 12023 applies. Therefore, proposed Section 5260 (which would continue existing Section 12023) would begin with the caveat “Notwithstanding subdivision (b) of Section 4400 [which would continue existing Section 12002] or 5250 [which would continue the part of existing Section 12007 applicable to a violation of existing Section 6400],....”

The Commission invites comment on this revision of existing Fish and Game Code Section 12023.

§ 5262. Potentially diseased plants or animals

5262. Notwithstanding subdivision (b) of Section 4400, the punishment for each violation of Section 28100 is a fine of not more than five thousand dollars (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or both the fine and imprisonment.

Comment. Section 5262 continues the part of former Fish and Game Code Section 12007 applicable to former Fish and Game Code Section 2270 without substantive change.

§ 5264. Permit required for importation of live aquatic organism

5264. Notwithstanding subdivision (b) of Section 4400, the punishment for each violation of Section 28110 is a fine of not more than five thousand dollars (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or both the fine and imprisonment.

Comment. Section 5264 continue the part of former Fish and Game Code Section 12007 applicable to former Fish and Game Code Section 2271 without substantive change.

1 **§ 5266. Caulerpa algae**

5266. In addition to any other penalty provided by law, any person who violates
Section 28250 is subject to a civil penalty of not less than five hundred dollars
(\$500) and not more than ten thousand dollars (\$10,000) for each violation.

5 **Comment.** Section 5266 continues former Fish and Game Code Section 2300(c) without
6 substantive change.

7 CHAPTER 3. MAMMALS

8 **§ 5280. Elk**

9 5280. The department shall seize any elk imported in violation of Section 26865.

10 **Comment.** Section 5280 continues former Fish and Game Code Section 2118.4 without
11 substantive change.

12 § 5282. Elephants

5282. (a) Any person who violates Section 26870 is subject to the civil penalty set forth in Section 5204 or for each violation, and the restricted species permit for the elephant is subject to immediate suspension or revocation by the department. A person whose restricted species permit is suspended or revoked pursuant to this section may appeal the suspension or revocation to the commission by filing a written request for an appeal with the commission within 30 days of the suspension or revocation. A person who violates Section 26870 is not subject to the criminal penalties set forth in this code.

(b) The provisions of this section are in addition to, and not in lieu of, any other laws protecting animal welfare. This section shall not be construed to limit any state law or rules protecting the welfare of animals or to prevent a local governing body from adopting and enforcing its own animal welfare laws and regulations.

25 **Comment.** Section 5282 continues former Fish and Game Code Section 2128(b)-(c) without
26 substantive change.

27 CHAPTER 4. DOMESTICATION

28 **§ 5290. Domestication of game animals**

5290. Any license issued under Title 1 (commencing with Section 26000) of
Part 4 of Division 7 may be revoked by the commission upon conviction of the
licensee of a violation of any provision of this code, and no similar license may be
issued to the licensee during the same license year.

33 **Comment.** Section 5290 continues former Fish and Game Code Section 3218 without
34 substantive change.

CHAPTER 5. IVORY

§ 5300. Criminal penalty

5300. For a violation of any provision of Title 2 (commencing with Section 28650) of Part 10 of Division 7 or any rule, regulation, or order adopted pursuant to that title, the following criminal penalties shall be imposed:

(a) For a first conviction, where the total value of the ivory or rhinoceros horn is two hundred fifty dollars (\$250) or less, the offense shall be a misdemeanor punishable by a fine of not less than one thousand dollars (\$1,000), or more than ten thousand dollars (\$10,000), imprisonment in a county jail for not more than 30 days, or by both the fine and imprisonment.

(b) For a first conviction, where the total value of the ivory or rhinoceros horn is more than two hundred fifty dollars (\$250), the offense shall be a misdemeanor punishable by a fine of not less than five thousand dollars (\$5,000), or more than forty thousand dollars (\$40,000), imprisonment in a county jail for not more than one year, or by both the fine and imprisonment.

(c) For a second or subsequent conviction, where the total value of the ivory or rhinoceros horn is two hundred fifty dollars (\$250) or less, the offense shall be a misdemeanor punishable by a fine of not less than five thousand dollars (\$5,000), or more than forty thousand dollars (\$40,000), imprisonment in county jail for not more than one year, or by both the fine and imprisonment.

(d) For a second or subsequent conviction, where the total value of the ivory or rhinoceros horn is more than two hundred fifty dollars (\$250), the offense shall be a misdemeanor punishable by a fine of not less than ten thousand dollars (\$10,000), or more than fifty thousand dollars (\$50,000) or the amount equal to two times the total value of the ivory or rhinoceros horn involved in the violation, whichever is greater, imprisonment in county jail for not more than one year, or by both the fine and imprisonment.

Comment. Section 5300 continues former Fish and Game Code Section 2022(e) without substantive change.

§ 5302. Payment of reward

5302. (a) For any conviction or other entry of judgment imposed by a court for a violation of Title 2 (commencing with Section 28650) of Part 10 of Division 7 resulting in a fine, the court may pay one-half of the fine, but not to exceed five hundred dollars (\$500), to any person giving information that led to the conviction or other entry of judgment.

(b) This reward shall not apply if the informant is a regular salaried law enforcement officer, or officer or agent of the department.

Comment. Section 5302 continues former Fish and Game Code Section 2022(g) without substantive change.

1 **§ 5304. Forfeiture**

2 5304. Upon conviction or other entry of judgment for a violation of Title 2
3 (commencing with Section 28650) of Part 10 of Division 7, any seized ivory or
4 rhinoceros horn shall be forfeited and, upon forfeiture, either maintained by the
5 department for educational or training purposes, donated by the department to a
6 bona fide educational or scientific institution, or destroyed.

7 **Comment.** Section 5304 continues former Fish and Game Code Section 2022(h) without
8 substantive change.

9 **§ 5306. Enforcement under Penal Code Section 653o**

10 5306. Title 2 (commencing with Section 28650) of Part 10 of Division 7 does
11 not preclude enforcement under Section 653o of the Penal Code.

12 **Comment.** Section 5306 continues former Fish and Game Code Section 2022(j) without
13 substantive change.

14 **§ 5308. Administrative penalty**

15 5308. (a) In addition to, and separate from, any criminal penalty provided for
16 under Section 5300, an administrative penalty of up to ten thousand dollars
17 (\$10,000) may be imposed for a violation of Title 2 (commencing with Section
18 28650) of Part 10 of Division 7, or any rule, regulation, or order adopted pursuant
19 to that part.

20 (b) Penalties authorized pursuant to this section may be imposed by the
21 department consistent with all of the following:

22 (1) The chief of enforcement issues a complaint to any person or entity on which
23 an administrative penalty may be imposed pursuant to this section. The complaint
24 shall allege the act or failure to act that constitutes a violation, relevant facts, the
25 provision of law authorizing the administrative penalty to be imposed, and the
26 proposed penalty amount.

27 (2) The complaint and order is served by personal notice or certified mail and
28 informs the party served that the party may request a hearing no later than 20 days
29 from the date of service. If a hearing is requested, it shall be scheduled before the
30 director or his or her designee, which designee shall not be the chief of
31 enforcement issuing the complaint and order. A request for hearing shall contain a
32 brief statement of the material facts the party claims support his or her contention
33 that an administrative penalty should not be imposed or that an administrative
34 penalty of a lesser amount is warranted. A party served with a complaint pursuant
35 to this subdivision waives the right to a hearing if no hearing is requested within
36 20 days of service of the complaint, in which case the order imposing the
37 administrative penalty shall become final.

38 (3) The director, or his or her designee, shall control the nature and order of the
39 hearing proceedings. Hearings shall be informal in nature, and need not be
40 conducted according to the technical rules relating to evidence. The director, or his
41 or her designee, shall issue a final order within 45 days of the close of the hearing.

1 A final copy of the order shall be served by certified mail upon the party served
2 with the complaint.

3 (4) A party may obtain review of the final order by filing a petition for a writ of
4 mandate with the superior court within 30 days of the date of service of the final
5 order. The administrative penalty shall be due and payable to the department
6 within 60 days after the time to seek judicial review has expired or, where the
7 party has not requested a hearing of the order, within 20 days after the order
8 imposing an administrative penalty becomes final.

9 (c) Administrative penalties collected pursuant to this section shall be deposited
10 in the Fish and Game Preservation Fund and used for law enforcement purposes
11 upon appropriation by the Legislature.

12 **Comment.** Section 5308 continues former Fish and Game Code Section 2022(f) and (i)
13 without substantive change.

14 TITLE 8. BIRDS

15 CHAPTER 1. BIRDS GENERALLY

16 § 5310. Bird nest or eggs

17 5310. Except as provided in subdivision (d) of Section 4754, the punishment for
18 a violation of Section 28905 is a fine of not more than five thousand dollars
19 (\$5,000), imprisonment in a county jail for not more than six months, or by both
20 that fine and imprisonment.

21 **Comment.** Section 5310 continues the part of former Fish and Game Code Section 12002(c)
22 applicable to former Fish and Game Code Section 350 without substantive change.

23 **Note.** Existing Section 12002(c) provides as follows:

24 Except as specified in Sections 12001 and 12010, the punishment for violation of Section 3503,
25 3503.5, 3513, or 3800 is a fine of not more than five thousand dollars (\$5,000), imprisonment in
26 the county jail for not more than six months, or by both that fine and imprisonment.

27 However, Section 12010 addresses only the punishment for a violation of existing Section
28 3503.5 (governing the taking or possession of birds of prey). **The reference to existing Section**
29 **12010 has not been continued in proposed Section 5310.**

30 CHAPTER 2. PROTECTED BIRDS

31 § 5320. Fully protected bird

32 5320. Except as otherwise provided in Section 597 of the Penal Code, the
33 punishment for a violation of Section 30200 is a fine of not more than five
34 thousand dollars (\$5,000) or imprisonment in the county jail for not more than one
35 year, or both the fine and imprisonment.

36 **Comment.** Section 5320 continues former Fish and Game Code Section 12008(b) without
37 substantive change. continue the first two sentences of former Fish and Game Code Section
38 3511(a)(1) without substantive change.

39 See also Section 4570 (enforcement).

CHAPTER 3. GAME BIRDS

§ 5330. Trophy wild turkey

5330. (a) Notwithstanding Section 4400 or 4462, the punishment for any person who knowingly violated and has been convicted of any of the following provisions where the violation involved a wild turkey, is a fine of not less than two thousand dollars (\$2,000) nor more than five thousand dollars (\$5,000), or imprisonment in the county jail for not more than one year, or both that fine and imprisonment:

(1) Section 8015, if the person took an animal outside the established season.

(2) Section 8125.

(4) Section 257.5 of Title 14 of the California Code of Regulations.

(b) The commission shall adopt regulations to implement this section, including establishing a trophy designation and monetary value based on the size or related characteristics of wild turkeys.

(c) All revenue from fines imposed pursuant to this section for wild turkey violations shall be deposited in the Upland Game Bird Account established in Section 29515 and shall be used for the upland game bird conservation purposes described in that section.

(d) Moneys equivalent to 50 percent of the revenue from any fine collected pursuant to this section shall be paid to the county in which the offense was committed, pursuant to Section 3610. The county board of supervisors shall first use revenues pursuant to this subdivision to reimburse the costs incurred by the district attorney or city attorney in investigating and prosecuting the violation. Any excess revenues may be expended in accordance with Section 3915.

Comment. Section 5330 continues the part of former Fish and Game Code Section 12013.3 applicable to wild turkeys without substantive change.

See also Section 4552 (enforcement).

§ 5332. Pigeon

5332. (a) Except as provided in subdivision (b), any person who purposely takes any racing pigeon that at the time of taking is registered with a recognized organization is guilty of a misdemeanor.

(b) This section does not apply to either of the following:

(1) The taking of a registered racing pigeon by its owner.

(2) The incidental take of a registered racing pigeon while shooting or taking a wild band-tailed or domestic pigeon (*Columba livia*).

Comment. Section 5332 restates former Fish and Game Code Section 3680 without substantive change.

Note. Proposed Section 5332 is intended to restate existing Section 3680 to improve its clarity, without changing its substantive effect. The existing section reads as follows:

3680. Any person, other than the owner thereof, who at any time, by any means or in any manner, purposely takes any racing pigeon currently registered with a recognized organization, is guilty of a misdemeanor. However, the incidental take of registered racing pigeons with the

shooting or taking of wild band-tailed pigeons or domestic pigeons (*Columba livia*), is not a violation of this section.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

CHAPTER 4. NONGAME BIRDS

§ 5340. Taking nongame bird

5340. Except as provided in subdivision (d) of Section 4754, the punishment for a violation of Section 29850 is a fine of not more than five thousand dollars (\$5,000), imprisonment in the county jail for not more than six months, or by both that fine and imprisonment.

Comment. Section 5340 continues the part of former Fish and Game Code Section 12002(c) applicable to former Fish and Game Code Section 3800 without substantive change.

Note. Existing Section 12002(c) provides as follows:

Except as specified in Sections 12001 and 12010, the punishment for violation of Section 3503, 3503.5, 3513, or 3800 is a fine of not more than five thousand dollars (\$5,000), imprisonment in the county jail for not more than six months, or by both that fine and imprisonment.

However, Section 12010 addresses only the punishment for a violation of existing Section 3503.5 (governing the taking or possession of birds of prey). **The reference to existing Section 12010 has not been continued in proposed Section 5340.**

§ 5342. Taking or possession of migratory nongame bird

5342. Except as provided in subdivision (d) of Section 4754, the punishment for a violation of Section 29855 is a fine of not more than five thousand dollars (\$5,000), imprisonment in a county jail for not more than six months, or by both that fine and imprisonment.

Comment. Section 5342 continues the part of former Fish and Game Code Section 12002(c) applicable to former Fish and Game Code Section 3513 without substantive change.

Note. Existing Section 12002(c) provides as follows:

Except as specified in Sections 12001 and 12010, the punishment for violation of Section 3503, 3503.5, 3513, or 3800 is a fine of not more than five thousand dollars (\$5,000), imprisonment in the county jail for not more than six months, or by both that fine and imprisonment.

However, Section 12010 addresses only the punishment for a violation of existing Section 3503.5 (governing the taking or possession of birds of prey). **The reference to existing Section 12010 has not been continued in proposed Section 5342.**

§ 5344. Possession of parts of nongame bird

5344. (a) The feathers, carcass, skin, or part of any nongame bird possessed in violation of any provision of this code shall be seized by the department and delivered to a California Native American tribal government or a scientific or educational institution, used by the department, or destroyed.

(b) Notwithstanding Chapter 3 (commencing with Section 30000) of Title 3 of Part 3 of Division 8, an officer deputized pursuant to this code may interrupt an

ongoing salvaging of a dead nongame bird carcass, feathers, skin, or part if, in the officer's judgment, the activity causes a public disruption or safety hazard, or is detrimental to the ability of the department to prevent a possible violation of Section 30000. In that event, the officer may seize the carcass, feathers, skin, or part being salvaged, or may return the carcass, feathers, skin, or part to the general location from where it had been salvaged.

Comment. Subdivision (a) of Section 5344 continues the second sentence of former Fish and Game Code Section 3801.6(a) without substantive change.

Subdivision (b) restates former Fish and Game Code Section 3801.6(c) without substantive change.

Note. Proposed Section 5344(b) is intended to restate existing Section 3801.6(c) to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

Notwithstanding subdivisions (a) and (b), any officer deputized pursuant to this code may interrupt any ongoing salvaging of dead nongame carcasses, feathers, skins, or parts if, in the officer's judgment, the activity causes a public disruption, safety hazard, or is detrimental to the ability of the department to prevent a possible violation of this section. The officer may seize any of the salvaged feathers, carcasses, skins, or parts and has the option of returning them to the general location from where they were salvaged.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

CHAPTER 5. BIRDS-OF-PREY

§ 5350. Birds-of-prey

5350. Except as provided in subdivision (d) of Section 4754, the maximum punishment for each violation of Section 30110 is as follows:

(a) If the violation relates to a bird-of-prey designated as endangered, threatened, or fully protected, a fine of five thousand dollars (\$5,000), imprisonment in a county jail for a period of not to exceed one year, or both that fine and imprisonment.

(b) If the violation relates to a bird-of-prey that was taken from the wild and is subsequently reported to the department as having been bred in captivity, a fine of five thousand dollars (\$5,000), imprisonment in a county jail for a period of not to exceed one year, or both that fine and imprisonment.

(c) For all other violations of Section 30110, a fine of not more than five thousand dollars (\$5,000), imprisonment in a county jail for a period not to exceed six months, or both that fine and imprisonment.

Comment. Section 5350 combines and restates former Fish and Game Code Section 12010 and the part of former Fish and Game Code Section 12002(c) applicable to former Fish and Game Code Section 3503.5, without substantive change.

Note. Proposed Section 5350 is intended to combine and restate existing Section 12010 and the part of existing Section 12002(c) applicable to existing Section 3503.5, to clarify the meaning of those provisions without changing their substantive effect. The existing provisions read as follows:

12002. (c) Except as specified in Sections 12001 and 12010, the punishment for violation of Section 3503, 3503.5, 3513, or 3800 is a fine of not more than five thousand dollars (\$5,000), imprisonment in the county jail for not more than six months, or by both that fine and imprisonment.

12010. (a) Notwithstanding Section 12002, the maximum punishment for each violation of Section 3503.5 relating to a bird-of-prey designated as endangered, threatened, or fully protected is a fine of five thousand dollars (\$5,000) or imprisonment in the county jail for a period of not to exceed one year, or both the fine and imprisonment.

(b) Notwithstanding Section 12002, the maximum punishment for a violation of Section 3503.5 relating to any bird-of-prey that was taken from the wild and that is subsequently reported to the department as having been bred in captivity is a fine of five thousand dollars (\$5,000) or imprisonment in the county jail for a period of not to exceed one year, or both the fine and imprisonment.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

TITLE 9. MAMMALS

CHAPTER 1. PROTECTED MAMMALS

§ 5400. Fully protected mammal

5400. Except as otherwise provided in Section 597 of the Penal Code, the punishment for a violation of Section 32700 is a fine of not more than twenty-five thousand dollars (\$25,000) for each unlawful taking, imprisonment in the county jail for not more than one year, or both that fine and imprisonment.

Comment. Section 5400 combines and continues former Fish and Game Code Section 12008(c) and the part of former Fish and Game Code Section 12003.2 applicable to former Fish and Game Code Section 4700, without substantive change.

See also Section 4570 (enforcement).

Note. Proposed Section 5400 is intended to combine and continue the part of existing Fish and Game Code Section 12003.2 applicable to existing Section 4700, and existing Fish and Game Code Section 12008(c), while preserving the substantive effect of both provisions. The two existing provisions read as follows:

12003.2. Notwithstanding Section 12002 or 12008, the punishment for any violation of Section 4500 or 4700 is a fine of not more than twenty-five thousand dollars (\$25,000) for each unlawful taking, imprisonment in a county jail for the period prescribed in Section 12002 or 12008, or both the fine and imprisonment.

12008. Except as otherwise provided in Section 597 of the Penal Code, the punishment for a violation of any of the following provisions is a fine of not more than five thousand dollars (\$5,000) or imprisonment in the county jail for not more than one year, or both the fine and imprisonment:

...

(c) Chapter 8 (commencing with Section 4700) of Part 3 of Division 4.

The Commission invites comment on whether proposed Section 5400(c) continues both provisions without substantive change.

1 **§ 5402. Mountain lion**

2 5402. (a) A violation of Section 35350 is a misdemeanor punishable by
3 imprisonment in a county jail for not more than one year, or a fine of not more
4 than ten thousand dollars (\$10,000), or by both that fine and imprisonment.

5 (b) An individual is not guilty of a violation of this section if it is demonstrated
6 that, in taking or injuring a mountain lion, the individual was acting in self-defense
7 or in defense of others.

8 **Comment.** Section 5402 continues former Fish and Game Code Section 4800(c) without
9 substantive change.

10  **Note.** Existing Fish and Game Code Sections 4800 was added in 1990 pursuant to an
11 initiative statute, Proposition 117. The Commission believes that the nonsubstantive continuation
12 of that provision in the proposed law would not be an impermissible amendment. See discussion
13 of initiative statutes *supra* at notes 20-22 and associated text.

14 CHAPTER 2. GAME MAMMALS

15 Article 1. Game Mammals Generally

16 **§ 5450. Trophy mammals**

17 5450. (a) Notwithstanding Section 4400 or 4462, the punishment for any person
18 who knowingly violated and has been convicted of any of the following provisions
19 where the violation involved a trophy deer, elk, antelope, or bighorn sheep shall be
20 a fine of not less than five thousand dollars (\$5,000) nor more than forty thousand
21 dollars (\$40,000), or imprisonment in the county jail for not more than one year,
22 or both that fine and imprisonment:

23 (1) Section 8015, if the person took an animal outside the established season.

24 (2) Section 8125.

25 (3) Section 29370.

26 (4) Section 257.5 of Title 14 of the California Code of Regulations.

27 (5) Section 34200.

28 (6) Section 8300, if the person failed to procure the required license or tag prior
29 to taking a deer, elk, antelope, or bighorn sheep.

30 (b) The commission shall adopt regulations to implement this section, including
31 establishing a trophy designation and monetary value based on the size or related
32 characteristics of deer, elk, antelope, and bighorn sheep.

33 (c) All revenue from fines imposed pursuant to this section for deer, elk,
34 antelope, and bighorn sheep violations shall be deposited in the Big Game
35 Management Account established in Section 31900 and shall be used for the big
36 game management purposes described in that section.

37 (d) Moneys equivalent to 50 percent of the revenue from any fine collected
38 pursuant to this section shall be paid to the county in which the offense was
39 committed, pursuant to Section 3610. The county board of supervisors shall first

1 use revenues pursuant to this subdivision to reimburse the costs incurred by the
2 district attorney or city attorney in investigating and prosecuting the violation. Any
3 excess revenues may be expended in accordance with Section 3915.

4 **Comment.** Section 5450 continues the part of former Fish and Game Code Section 12013.3
5 applicable to specified mammals without substantive change.

6 See also Section 4552 (enforcement).

7 Article 2. Bears

8 § 5460. Use of signal-emitting device to traffic in bear parts

9 5460. (a) In addition to any other penalties provided in this code, any person
10 convicted of violating this code or any regulation adopted pursuant to this code
11 while using a signal-emitting device in conjunction with the take of bear for the
12 purpose of selling or trafficking in bear parts shall be subject to a fine of ten
13 thousand dollars (\$10,000) per bear part. For purposes of this section, a “signal-
14 emitting device” means any device capable of generating radio, cellular, satellite,
15 or other signal transmission for purposes of providing communication or location
16 information.

17 (b) All revenue from fines imposed pursuant to this section shall be deposited in
18 the Big Game Management Account established in Section 31900 and shall be
19 used for the big game management purposes described in that section.

20 (c) Moneys equivalent to 50 percent of the revenue from any fine collected
21 pursuant to this section shall be paid to the county in which the offense was
22 committed, pursuant to Section 3610. The county board of supervisors shall first
23 use revenues pursuant to this subdivision to reimburse the costs incurred by the
24 district attorney or city attorney in investigating and prosecuting the violation. Any
25 excess revenues may be expended in accordance with Section 3915.

26 **Comment.** Section 5460 continues former Fish and Game Code Section 12013.5 without
27 substantive change.

28 See also Section 4552 (enforcement).

29 § 5462. Commercial use of bear parts

30 5462. (a) Notwithstanding Section 4400, 4462, or 4800, and except as otherwise
31 provided in subdivision (c), the punishment for each violation of Section 33455
32 shall include both of the following:

33 (1) A fine of two hundred fifty dollars (\$250) for each bear part. As used in this
34 paragraph, “bear part” means an individual part or group of like parts of any bear
35 that the defendant knowingly and unlawfully sells, purchases, or possesses for
36 sale. For the purposes of this paragraph, claws, paws, or teeth from a single bear
37 that are knowingly purchased, sold, or possessed for sale with the intent that they
38 be delivered to a single end user shall be considered a single part.

1 (2) An additional fine of not more than five thousand dollars (\$5,000),
2 imprisonment pursuant to subdivision (h) of Section 1170 of the Penal Code or in
3 a county jail for not more than one year, or both that fine and imprisonment.

4 (b) If a conviction for violation of Section 33455 is based on the possession of
5 two bear gallbladders, and probation is granted or the execution or imposition of
6 sentence is suspended, it shall be a condition of that probation or suspended
7 sentence that a minimum term of 30 days be served in a county jail.

8 (c) A conviction for violation of Section 33455 based on possession of three or
9 more bear gallbladders is subject to all of the following:

10 (1) The punishment for the offense shall include both of the following:

11 (A) The fine specified in paragraph (1) of subdivision (a).

12 (B) An additional fine of not more than ten thousand dollars (\$10,000),
13 imprisonment in a county jail for not more than one year, or both that fine and
14 imprisonment.

15 (2) If probation is granted or the execution or imposition of sentence is
16 suspended, it shall be a condition of that probation or suspended sentence that a
17 minimum term of three months be served in a county jail.

18 (d) Consecutive sentences shall be imposed for separate violations of Section
19 33455.

20 **Comment.** Section 5462 continues former Fish and Game Code Section 12005 without
21 substantive change.

22 **§ 5466. Forfeiture of bear tags**

23 5466. (a) Any person who is convicted of a violation of any provision of this
24 code, or of any rule, regulation, or order made or adopted pursuant to this code,
25 relating to bears, shall forfeit any bear tags issued to that person, and new bear
26 tags shall not be issued to that person during the then current license year for
27 hunting licenses.

28 (b) A person described in subdivision (a) shall not apply for bear tags for the
29 following license year.

30 **Comment.** Section 5466 continues former Fish and Game Code Section 4754 without
31 substantive change.

32 **Article 3. Deer**

33 **§ 5480. Forfeiture of deer tags**

34 5480. (a) Any person who is convicted of a violation of any provision of this
35 code, or of any rule, regulation, or order made or adopted pursuant to this code,
36 relating to deer, shall forfeit any deer tags issued to that person, and no new deer
37 tags shall be issued to that person during the then current license year for hunting
38 licenses.

39 (b) No person described in subdivision (a) may apply for deer tags for the
40 following license year.

§ 5490. Bighorn sheep

Comment. Section 5490 continues former Fish and Game Code Section 12008.5 without substantive change.

CHAPTER 4. MARINE MAMMALS

Comment. Section 5520 continues the part of former Fish and Game Code Section 12003.2 applicable to former Fish and Game Code Section 4500 without substantive change.

Comment. Section 5522 continues former Fish and Game Code Section 4502.5(b) without substantive change.

Comment. Section 5540 continues former Fish and Game Code Section 12002(b)(3) without substantive change.

1 **§ 5542. Burro sanctuary**

2 5542. Any violation of Section 34065 is a misdemeanor.

3 **Comment.** Section 5542 continues the second sentence of subdivision (a) of former Fish and
4 Game Code Section 10931 without substantive change.

5 **TITLE 10. FISH**

6 **CHAPTER 1. PROTECTED FISH**

7 **§ 5600. Fully protected fish**

8 5600. Except as otherwise provided in Section 597 of the Penal Code, the
9 punishment for a violation of Section 38200 is a fine of not more than five
10 thousand dollars (\$5,000) or imprisonment in the county jail for not more than one
11 year, or both the fine and imprisonment.

12 **Comment.** Section 5600 continues former Fish and Game Code Section 12008(e) without
13 substantive change.

14 **CHAPTER 2. TYPES OF FISH**

15 **Article 1. Anchovies**

16 **§ 5650. Anchovies**

17 5650. (a) In addition to any other applicable penalty, the commercial fishing
18 license of the master of a vessel may be revoked or suspended by the commission,
19 when requested by the department, for a period not to exceed one year, upon the
20 second conviction in three years of the master or the master's agent, servant,
21 employee, or any other person acting under the master's direction or control, for a
22 violation of any provision of Title 2 (commencing with Section 38500) of Part 4 of
23 Division 10.

24 (b) A master's license shall not be revoked unless both the first and second
25 convictions are for a violation by the master or a violation occurring when the
26 person convicted was acting as the master's agent, servant, employee, or acting
27 under the master's direction or control.

28 (c) The master of a vessel is the person on board the vessel who is in charge of
29 the vessel.

30 **Comment.** Section 5650 continues the part of former Fish and Game Code Section
31 12002.8(d)-(f) applicable to the provisions of this chapter, without substantive change.

32 **Article 2. Bass**

33 **§ 5660. White bass**

34 5660. Notwithstanding subdivision (b) of Section 4400, the punishment for each
35 violation of Section 38870 is a fine of not more than five thousand dollars

1 (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or
2 both the fine and imprisonment.

3 **Comment.** Section 5660 continues the part of former Fish and Game Code Section 12007
4 applicable to former Fish and Game Code Section 6400.5 without substantive change.

5 Article 3. Carp

6 § 5670. Grass carp

7 5670. A violation of subdivision (e) of Section 39225 shall be punished by a fine
8 of not more than five thousand dollars (\$5,000), by imprisonment in a county jail
9 for not more than one year, or by both that fine and imprisonment.

10 **Comment.** Section 5670 continues part of subdivision (e) of former Fish and Game Code
11 Section 6455 without substantive change.

12 Article 4. Halibut

13 § 5680. Halibut

14 5680. (a) In addition to any other applicable penalty, the commercial fishing
15 license of the master of a vessel may be revoked or suspended by the commission,
16 when requested by the department, for a period not to exceed one year, upon the
17 second conviction in three years of the master or the master's agent, servant,
18 employee, or any other person acting under the master's direction or control, for a
19 violation of any provision of Chapter 2 (commencing with Section 39900) of Title
20 2 of Part 12 of Division 10.

21 (b) A master's license shall not be revoked unless both the first and second
22 convictions are for a violation by the master or a violation occurring when the
23 person convicted was acting as the master's agent, servant, employee, or acting
24 under the master's direction or control.

25 (c) The master of a vessel is the person on board the vessel who is in charge of
26 the vessel.

27 **Comment.** Section 5680 continues the part of former Fish and Game Code Section
28 12002.8(d)-(f) applicable to the provisions of this chapter, without substantive change.

29 **Note.** Existing Fish and Game Code Section 12002.8(d) (which would be continued by
30 proposed Section 5680(a)) applies to a violation of any of several articles of Chapter 2 of Part 3
31 of Division 6 of the existing code, including what is identified as "Article 13 (commencing with
32 Section 8495).

33 Three years after the last amendment of Section 12002.8, a new Section 8494 was inserted at
34 the beginning of that Article 13, rendering Section 12002.8(d)'s description of the article
35 technically inaccurate.

36 The Commission's analysis suggests that the inaccuracy represents only a drafting omission,
37 rather an affirmative intention to exclude Section 8494 from the application of Section
38 12002.8(d). Proposed Section 26700 is therefore drafted to apply to the proposed continuation of
39 Section 8494 (which is divided into multiple proposed sections in the chapter containing Section
40 5680).

§ 5690. Herring

(b) A master's license shall not be revoked unless both the first and second convictions are for a violation by the master or a violation occurring when the person convicted was acting as the master's agent, servant, employee, or acting under the master's direction or control.

Comment. Section 5690 continues the part of former Fish and Game Code Section 12002.8(d)-(f) applicable to the provisions of this chapter, without substantive change.

5692. The commission shall revoke the herring permit of a permittee convicted of any of the following violations:

(c) Failing to correctly file with the department the offer or the acceptance for a permit transferred pursuant to Section 40380.

§ 5700. Marlin

Comment. Section 5700 continues the first sentence of former Fish and Game Code Section 8582(b) without substantive change.

Article 7. Salmon

§ 5710. Salmon

5710. (a) In addition to any other applicable penalty, the commercial fishing license of the master of a vessel may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon the second conviction in three years of the master or the master's agent, servant, employee, or any other person acting under the master's direction or control, for a violation of any provision of Chapter 3 (commencing with Section 41450) of Title 2 of Part 17 of Division 10.

(b) A master's license shall not be revoked unless both the first and second convictions are for a violation by the master or a violation occurring when the person convicted was acting as the master's agent, servant, employee, or acting under the master's direction or control.

(c) The master of a vessel is the person on board the vessel who is in charge of the vessel.

Comment. Section 5710 restates the part of former Fish and Game Code Section 12002.8(d)-(f) applicable to the provisions of this chapter, without substantive change.

Note. Proposed Section 5710(a) is intended to restate the part of existing Fish and Game Code Section 12002.8(d) applicable to this chapter, to clarify the meaning of that existing provision without changing its substantive effect. The existing provision begins as follows, with the restated language italicized:

Notwithstanding *Sections 12000, 12001, and 12002*, the commercial fishing license of the master of a vessel may be revoked or suspended by the commission, when requested by the department....

The Commission invites comment on whether the restatement of the italicized language in proposed Section 5710(a) would cause any substantive change in the meaning of the provision.

Article 8. Sardine

§ 5720. Sardine

5720. (a) In addition to any other applicable penalty, the commercial fishing license of the master of a vessel may be revoked or suspended by the commission, when requested by the department, for a period not to exceed one year, upon the second conviction in three years of the master or the master's agent, servant, employee, or any other person acting under the master's direction or control, for a violation of any provision of Chapter 1 (commencing with Section 42250) of Title 2 of Part 18 of Division 10.

(b) A master's license shall not be revoked unless both the first and second convictions are for a violation by the master or a violation occurring when the person convicted was acting as the master's agent, servant, employee, or acting under the master's direction or control.

(c) The master of a vessel is the person on board the vessel who is in charge of the vessel.

Comment. Section 5720 restates the part of former Fish and Game Code Section 12002.8(d)-(f) applicable to the provisions of this article, without substantive change.

Note. Proposed Section 5720(a) is intended to restate the part of existing Fish and Game Code Section 12002.8(d) applicable to its article, to clarify the meaning of that existing provision without changing its substantive effect. The existing provision begins as follows, with the restated language italicized:

Notwithstanding *Sections 12000, 12001, and 12002*, the commercial fishing license of the master of a vessel may be revoked or suspended by the commission, when requested by the department....

The Commission invites comment on whether the restatement of the italicized language in proposed Section 5720(a) would cause any substantive change in the meaning of the provision.

Article 9. Sturgeon

§ 5730. Sturgeon

5730. (a) Notwithstanding Section 4400 or 4462, the punishment for a violation of Section 43150 is a fine of not less than five thousand dollars (\$5,000) nor more than ten thousand dollars (\$10,000), imprisonment in a county jail not to exceed one year, or both that fine and imprisonment.

(b) The court shall also permanently revoke any commercial fishing license or commercial fishing permit, and may permanently revoke any sport fishing license issued to the violator by the department.

(c) Any vessel, diving or other fishing gear or apparatus, or vehicle used in the commission of an offense subject to this section may be seized and may be ordered forfeited by the court pursuant to subdivision (c) of Section 4570.

(d) Fifty percent of the revenue deposited in the Fish and Game Preservation Fund from fines and forfeitures collected pursuant to this section shall be allocated for the support of the Special Operations Unit of the department, and used for law enforcement purposes.

Comment. Subdivision (a) of Section 5730 continues former Fish and Game Code Section 12006(a)(1) without substantive change.

Subdivisions (b)-(d) continue the part of former Fish and Game Code Section 12006(b) applicable to former Fish and Game Code Section 7370 without substantive change.

§ 5732. Sturgeon egg processing

5732. (a) Any person convicted of a violation of a provision of Chapter 4 (commencing with Section 43250) of Title 1 of Part 21 of Division 10, or a violation of any other provision of this code or any regulation adopted pursuant to this code relating to sturgeon, shall be prohibited from engaging in the business of canning, curing, preserving, packing, or otherwise processing, or dealing at

1 wholesale or retail in the eggs of sturgeon in this state, for one year from the date
2 of the conviction.

3 (b) Any person convicted of a second or subsequent violation of a provision of
4 Chapter 4 (commencing with Section 43250) of Title 1 of Part 21 of Division 10,
5 or a violation of any other provision of this code or any regulation adopted
6 pursuant to this code relating to sturgeon, within five years of another offense
7 resulting in a conviction of a violation of any of those provisions, is prohibited
8 from engaging in any activity for which a sturgeon egg processing license is
9 required, for five years from the date of the last conviction.

10 (c) The commission shall revoke any license issued pursuant to Chapter 4
11 (commencing with Section 43250) of Title 1 of Part 21 of Division 10 to a person
12 who is prohibited from engaging in that business under this section. No sturgeon
13 egg processing license revoked pursuant to this section shall be issued, reissued, or
14 reinstated during the period of prohibition prescribed in this section.

15 (d) It is unlawful for any person to obtain, or attempt to obtain, a sturgeon egg
16 processing license pursuant to Chapter 4 (commencing with Section 43250) of
17 Title 1 of Part 21 of Division 10 during the period of prohibition prescribed in this
18 section.

19 **Comment.** Section 5732 continues former Fish and Game Code Section 10005 without
20 substantive change.

21 TITLE 11. INVERTEBRATES

22 CHAPTER 1. ABALONE

23 § 5800. Take of abalone from ocean waters

24 5800. Notwithstanding subdivision (a) of Section 4400, a person who violates
25 Section 45700 is guilty of an infraction punishable by a fine of not less than one
26 hundred dollars (\$100) and not to exceed one thousand dollars (\$1,000), or of a
27 misdemeanor.

28 **Comment.** Section 5800 continues former Fish and Game Code Section 12000(b)(3) without
29 substantive change.

30 § 5802. Prohibited take of abalone

31 5802. (a) Notwithstanding Section 4400, and except as provided in Section
32 5804, the punishment for a violation of any provision of Section 45800 or 45805,
33 or any regulation adopted pursuant to either Section 45800 or 45805, or of Section
34 13600 or 13605 involving abalone, is a fine of not less than fifteen thousand
35 dollars (\$15,000) or more than forty thousand dollars (\$40,000) and imprisonment
36 in a county jail for a period not to exceed one year. The court shall permanently
37 revoke any commercial fishing license, commercial fishing permit, or sport fishing
38 license issued by the department. Any vessel, diving or other fishing gear or
39 apparatus, or vehicle used in the commission of an offense punishable under this

section, may be seized and may be ordered forfeited by the court pursuant to subdivision (c) of Section 4570. Notwithstanding any other provision of law, the commercial license of any person arrested for a violation punishable under this section may not be sold, transferred, loaned, or leased, or used as security for any financial transaction until disposition of the charges is final.

(b) Notwithstanding any other provision of law, the money collected from any fine or forfeiture imposed or collected for the taking of abalone for any purpose other than for profit in violation of this article or any other provision of law shall be deposited as follows:

(1) One-half in the Abalone Restoration and Preservation Account.

(2) One-half in the county treasury of the county in which the violation occurred.

Comment. Section 5802 continues former Fish and Game Code Section 12009 without substantive change.

Note. Existing Fish and Game Code Section 12009 (which would be continued by proposed Section 5802, immediately above) and existing Fish and Game Code Section 12006.6 (which would be continued by proposed Section 5804) both specify punishment for a violation of either existing Section 5521 or 5521.5. However, the punishment specified under Section 12006.6 is to be imposed only if the violation occurs in a specially described location, and the person committing the violation has engaged in specified excess take.

Section 12006.6 provides that punishment under that section shall be imposed “in addition to Section 12009,” suggesting Section 12006.6 is intended to *enhance* (i.e. add to) the punishment provided for under Section 12009. This construction of the two sections is also largely consistent with the punishments specified by the two sections, as the “base” punishment section (Section 12009) requires two aspects of punishment that are not part of the specified punishment under Section 12006.6 (jail time, and immediate revocation of any sport fishing license held by the offender).

However, the Commission still has several questions about the intended interrelationship between the two sections:

(a) Both sections provide for imposition of an identical fine – not less than fifteen thousand dollars (\$15,000) or more than forty thousand dollars (\$40,000). If it is correct that Section 12006.6 is intended to provide for enhanced punishment beyond that required by Section 12009, does that mean a person sentenced pursuant to Section 12006.6 can receive *double* that specified fine?

(b) The punishments called for by the two sections do not make clear which construction of the two sections is intended. For example, both sections provide for exactly the same fine – not less than fifteen thousand dollars (\$15,000) or more than forty thousand dollars (\$40,000). Does this mean that a person sentenced pursuant to Section 12006.6 can receive that same fine *twice*? That result would seem odd, given that Section 12006.6 provides for *no* additional jail time beyond the jail time required by Section 12009.

(c) Section 12009(b) provides (with emphasis added) that “[n]otwithstanding *any other provision of law*,” the money collected from *any* fine or forfeiture imposed or collected for the taking of abalone for any purpose other than for profit *in violation of this article or any other provision of law* shall be deposited as follows:

(1) One-half in the Abalone Restoration and Preservation Account.

(2) One-half in the county treasury of the county in which the violation occurred.

However, Section 12006.6(d), a “provision of law” described by Section 12009(b), provides that “[n]ot less than 50 percent of the revenue deposited in the Fish and Game Preservation Fund from fines and forfeitures collected pursuant to this section shall be allocated for the support of

the Special Operations Unit of the Wildlife Protection Division of the department and used for law enforcement purposes.” It is unclear how these apportionment provisions are intended to be reconciled.

The Commission invites comment on all of these issues.

§ 5804. Prohibited take of abalone in excess amounts

5804. Notwithstanding Section 4400, 4462, or 5808, and in addition to Section 5802, and notwithstanding the type of fishing license or permit held, if any person is convicted of a violation of Section 45800 or 45805, and the offense occurs in an area closed to the taking of abalone for commercial purposes, and the person takes or possesses more than 12 abalone at one time or takes abalone in excess of the annual bag limit, that person shall be punished by all of the following:

(a) A fine of not less than fifteen thousand dollars (\$15,000) or more than forty thousand dollars (\$40,000).

(b) The court shall order the department to permanently revoke, and the department shall permanently revoke, the commercial fishing license and any commercial fishing permits of that person. The person punished under this subdivision shall not, thereafter, be eligible for any license or permit to take or possess fish for sport or commercial purposes, including, but not limited to, a commercial fishing license or a sport fishing or sport ocean fishing license. Notwithstanding any other provision of law, the commercial license or permit of a person arrested for a violation punishable under this section may not be sold, transferred, loaned, leased, or used as security for any financial transaction until disposition of the charges is final.

(c) Any vessel, diving or other fishing gear or apparatus, or vehicle used in the commission of an offense punishable under this section shall be seized, and shall be ordered forfeited in the same manner prescribed for nets or traps used in violation of this code, as described in Article 3 (commencing with Section 4975) of Chapter 4, of Title 6, of Part 4 of Division 3 or in the manner prescribed in Section 4570.

(d) Not less than 50 percent of the revenue deposited in the Fish and Game Preservation Fund from fines and forfeitures collected pursuant to this section shall be allocated for the support of the Special Operations Unit of the Wildlife Protection Division of the department and used for law enforcement purposes.

Comment. Section 5804 continues former Fish and Game Code Section 12006.6 without substantive change.

Note. Existing Section 12006.6 provides a penalty for a specified offense. It states in part that it is “in addition to Section 12009,” which states a more severe penalty for what seems to be a less severe offense. Is the penalty in Section 12009 intended to be an additional enhancement of a sentence imposed under Section 12009? If not, how should the two provisions be understood?

The Commission invites comment on these points.

1 **§ 5806. Suspension of license or permit based on pending criminal charge**

2 5806. (a) When a complaint has been filed in a court of competent jurisdiction
3 charging a person with a violation that may result in suspension or revocation of
4 any license or permit to take abalone for a commercial purpose, and no disposition
5 of the complaint has occurred within 90 days after it has been filed in the court,
6 the department may suspend the license or permit of that person.

7 (b) Whenever the department proposes to suspend a license or permit under this
8 section, notice and an opportunity to be heard shall be given to the licensee or
9 permittee, before taking the action. The notice shall contain a statement setting
10 forth the proposed action and the grounds for the action, and notify the licensee or
11 permittee of his or her right to a hearing as provided in this section. Within 10
12 days after the receipt of the notice from the department, the licensee or permittee
13 may request a hearing. The hearing shall be held by the commission at the next
14 regularly scheduled hearing of the commission held more than 30 days after the
15 notice of intent to suspend the license or permit was sent. The licensee or
16 permittee shall be given 10 days' notice of the time and place of the hearing.

17 (c) A decision shall be made within a reasonable time on whether the license or
18 permit shall be suspended until the disposition of the complaint by the court. In
19 determining whether to order the suspension, the commission shall consider
20 whether or not the violation could have a detrimental effect on the resources and
21 whether or not a suspension is in the best public interest, and shall find whether
22 there is sufficient evidence that a violation has occurred. A failure to make a
23 finding that there is sufficient evidence that a violation has occurred, or a finding
24 there is insufficient evidence, shall terminate the proceedings under this section.

25 (d) If the person is acquitted of the charges in the complaint, or the charges are
26 dismissed, any suspension under this section is thereby terminated.

27 (e) No complaint shall be filed in a court charging a commercial abalone
28 violation unless evidence supporting the charge has been reviewed by the
29 appropriate county or city prosecuting agency, and a criminal complaint has been
30 issued by that agency.

31 **Comment.** Section 5806 continues former Fish and Game Code Section 12002.10 without
32 substantive change.

33 **§ 5808. Revocation of license or permit upon conviction**

34 5808. (a) The court shall order the department to permanently revoke, and the
35 department shall permanently revoke, the commercial fishing license and any
36 commercial fishing permit of any person convicted of either of the following:

37 (1) Taking or possessing abalone out of season.

38 (2) Taking or possessing abalone taken illegally from any area north of Point
39 Sur.

40 (b) The court shall order the department to permanently revoke, and the
41 department shall permanently revoke, the commercial fishing license and any

1 commercial fishing permit of any person convicted of either of the following
2 offenses, if the person possessed more than 12 abalone at the time of the offense:

3 (1) Removing abalone from the shell, or possessing abalone illegally removed
4 from the shell.

5 (2) Taking or possessing abalone that are less than the minimum size.

6 (c) Any person whose license or permit is revoked pursuant to subdivision (a) or
7 (b) shall not thereafter be eligible for any license or permit to take or possess fish
8 for a sport or commercial purpose.

9 **Comment.** Section 5808 continues former Fish and Game Code Section 12002.8(a)-(c)
10 without substantive change.

11 CHAPTER 2. CRAB

12 Article 1. Crab Generally

13 § 5820. Crab

14 5820. (a) In addition to any other applicable penalty, the commercial fishing
15 license of the master of a vessel may be revoked or suspended by the commission,
16 when requested by the department, for a period not to exceed one year, upon the
17 second conviction in three years of the master or the master's agent, servant,
18 employee, or any other person acting under the master's direction or control, for a
19 violation of any provision of Part 6 (commencing with Section 46500) of Division
20 11.

21 (b) A master's license shall not be revoked unless both the first and second
22 convictions are for a violation by the master or a violation occurring when the
23 person convicted was acting as the master's agent, servant, employee, or acting
24 under the master's direction or control.

25 (c) The master of a vessel is the person on board the vessel who is in charge of
26 the vessel.

27 **Comment.** Section 5820 restates the part of former Fish and Game Code Section 12002.8(d)-
28 (f) applicable to the provisions of this part, without substantive change.

Note. Proposed Section 5820(a) is intended to restate the part of existing Fish and Game Code Section 12002.8(d) applicable to this part, to clarify the meaning of that existing provision without changing its substantive effect. The existing provision begins as follows, with the restated language italicized:

Notwithstanding *Sections 12000, 12001, and 12002*, the commercial fishing license of the master of a vessel may be revoked or suspended by the commission, when requested by the department....

The Commission invites comment on whether the restatement of the italicized language in proposed Section 5820(a) would cause any substantive change in the meaning of the provision.

Article 2. Dungeness Crab

§ 5830. Taking or landing Dungeness crab without permit

5830. (a) The commission may revoke the commercial fishing license issued pursuant to Section 14550 of any person owning a fishing vessel engaging in the taking or landing of Dungeness crab by traps for which that person has not obtained a Dungeness crab vessel permit, and the commission may revoke the registration, issued pursuant to Section 14755, for that vessel.

(b) This section shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2030, deletes or extends the dates on which it becomes inoperative and is repealed.

Comment. Section 5830 continues former Fish and Game Code Section 8280.4 without substantive change.

Note. Proposed Section 5832 would continue Section 8280.4, which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 5832. Additional penalty for fishing without permit

5832. (a) In addition to criminal penalties authorized by law, a person who fishes without a Dungeness crab vessel permit, or who uses a Dungeness crab vessel permit to fish illegally on another vessel other than the permitted one, shall be subject to a fine not more than twenty thousand dollars (\$20,000) and, at the discretion of the department, revocation of the person's fishing license for a period not to exceed five years and revocation of the commercial boat registration license for a period not to exceed five years.

(b) This section shall become inoperative on April 1, 2019, and, as of January 1, 2020, is repealed, unless a later enacted statute that becomes operative on or before January 1, 2020, deletes or extends the date on which this section becomes inoperative or is repealed.

Comment. Subdivision (a) of Section 5832 restates former Fish and Game Code Section 8280.1(d) without substantive change.

Subdivision (b) continues Fish and Game Code Section 8280.1(e), as it applied to Section 8280.1(d), without substantive change.

Note. Proposed Section 5832 would continue Section 8280.1(d) and (e), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 5834. Ocean waters

5834. (a) Notwithstanding subdivision (a) of Section 4400, a violation of Section 47155 does not constitute a misdemeanor. Pursuant to Section 4870, the commission shall revoke the Dungeness crab vessel permit that was issued for use on the vessel that was used in violation of Section 47155.

(b) This section shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2030, deletes or extends the dates on which it becomes inoperative and is repealed.

Comment. Subdivision (a) of Section 5834 continues former Fish and Game Code Section 8279.1(c) without substantive change.

Subdivision (b) continues Fish and Game Code Section 8279.1(d), as it applied to Section 8279.1(c), without substantive change.

Note. Proposed Section 5834 would continue Section 8279.1(c) and (d), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 5836. Trap limit program

5836. (a) In addition to criminal penalties authorized by law, a violation of the requirements of the program adopted pursuant to Section 47610 shall be subject to the following civil penalties:

(1) Conviction of a first offense shall result in a fine of not less than two hundred fifty dollars (\$250) and not more than one thousand dollars (\$1,000) per illegal trap or fraudulent tag.

(2) Conviction of a second offense shall result in a fine of not less than five hundred dollars (\$500) and not more than two thousand five hundred dollars (\$2,500) per illegal trap or fraudulent tag, and the permit may be suspended for one year.

(3) Conviction of a third offense shall result in a fine of not less than one thousand dollars (\$1,000) and not more than five thousand dollars (\$5,000) per illegal trap or fraudulent tag, and the permit may be permanently revoked.

(b) The severity of a penalty within the ranges described in subdivision (a) shall be based on a determination whether the violation was willful or negligent and other factors.

(c) The portion of monetary judgments for noncompliance that are paid to the department shall be deposited in the Dungeness Crab Account created pursuant to subdivision (a) of Section 47660.

Comment. Section 5836 continues former Fish and Game Code Section 8276.5(b) without substantive change.

CHAPTER 3. LOBSTER

§ 5850. Lobster permit requirement

5850. (a) Notwithstanding Section 4400 or 4462, the punishment for a violation of Section 49500 is a fine of not less than five thousand dollars (\$5,000) nor more than ten thousand dollars (\$10,000), imprisonment in a county jail not to exceed six months, or both that fine and imprisonment.

(b) The court shall also permanently revoke any commercial fishing license or commercial fishing permit, and may permanently revoke any sport fishing license issued to the violator by the department.

(c) Any vessel, diving or other fishing gear or apparatus, or vehicle used in the commission of an offense subject to this section may be seized and may be ordered forfeited by the court pursuant to subdivision (c) of Section 4570.

(d) Fifty percent of the revenue deposited in the Fish and Game Preservation Fund from fines and forfeitures collected pursuant to this section shall be allocated for the support of the Special Operations Unit of the department, and used for law enforcement purposes.

Comment. Subdivisions (a) of Section 5850 continues former Fish and Game Code Section 12006(a)(2) without substantive change.

Subdivisions (b) through (d) continue the part of former Fish and Game Code Section 12006(b) applicable to former Fish and Game Code Section 8254 without substantive change.

§ 5852. Suspension of permit pending criminal proceeding

5852. (a) When a complaint has been filed in a court of competent jurisdiction charging a holder of a commercial lobster permit with a violation of Section 49600 or 49605, and no disposition of the complaint has occurred within 90 days after it has been filed in the court, the department may suspend the commercial lobster permit of the person.

(b) The permitholder whose permit was suspended under this section may, within 10 days after the receipt of the suspension notice from the department, request a hearing, and, within 20 days after the request has been made, a hearing shall be held by the commission. A decision shall be made within a reasonable time on whether the suspension of the permit shall be terminated or continued until the disposition of the complaint by the court.

(c) In determining whether to terminate or continue the suspension of the permit, the commission shall consider whether or not the violation could have a detrimental effect on the resources, and whether or not a continued suspension of the permit is in the best public interest.

(d) The commission shall also make a finding whether there is sufficient evidence that a violation has occurred. A failure to make a finding that there is sufficient evidence that a violation has occurred, or a finding that there is insufficient evidence of the violation, shall terminate the suspension of the permit under this section.

(e) If a permit holder whose permit is suspended pursuant to this section is subsequently acquitted of the charges against him or her in court, or those charges are dismissed, the suspension of the permit is automatically terminated.

Comment. Section 5852 continues the first six sentences of former Fish and Game Code Section 8254.7 without substantive change.

CHAPTER 4. MUSSELS

§ 5860. Dreissenid mussel control

5860. (a) In addition to any other penalty provided by law, any person who violates Chapter 1 (commencing with Section 49950) of Title 2 of Part 11 of Division 11, violates any verbal or written order or regulation adopted pursuant to that chapter, or who resists, delays, obstructs, or interferes with the implementation of that chapter, is subject to a penalty, in an amount not to exceed one thousand dollars (\$1,000), which shall be imposed administratively by the department.

(b) A penalty shall not be imposed pursuant to subdivision (a) unless the department has adopted regulations specifying the amount of the penalty and the procedure for imposing and appealing the penalty.

(c) This section shall remain in effect only until January 1, 2020, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2020, deletes or extends that date.

Comment. Subdivisions (a) and (b) of Section 5860 continue former Fish and Game Code Section 2301(f) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 2301(i), as it applied to Section 2301(f), without substantive change.

§ 5862. Liability of reservoir owner or manager

5862. (a) A violation of Chapter 2 (commencing with Section 50100) of Title 2 of Part 11 of Division 11 is not governed by subdivision (a) of Section 4400.

(b) In lieu of any other penalty provided by law, a person who violates Chapter 2 (commencing with Section 50100) of Title 2 of Part 11 of Division 11 is subject to a civil penalty in an amount not to exceed one thousand dollars (\$1,000) per violation, which shall be imposed administratively by the department.

Comment. Section 5862 continues the first two sentences of former Fish and Game Code Section 2302(f) without substantive change.

CHAPTER 5. SEA CUCUMBER

§ 5870. Commission regulation

5870. The commission may permanently revoke the sea cucumber permit of any person convicted of the unlawful taking of any California halibut while operating pursuant to a sea cucumber permit. The commission may revoke the sea cucumber permit of any person convicted of any other violation of this code or regulation

1 adopted pursuant thereto while operating pursuant to a sea cucumber permit. Any
2 revocation of a permit pursuant to this subdivision shall be in addition to any
3 action the department may take pursuant to subdivision (a) of Section 4400.

4 **Comment.** Section 5870 continues former Fish and Game Code Section 8405.3(c) without
5 substantive change.

6 CHAPTER 6. SQUID

7 § 5880. Revocation of privileges for materially false statements

8 5880. The commission shall revoke the commercial fishing license, the
9 commercial boat registration of any vessel, and, if applicable, any licenses issued
10 pursuant to Section 20205, 20400, or 20450, that are held by any person
11 submitting material false statements, as determined by the commission, for the
12 purpose of obtaining a commercial market squid vessel permit or a commercial
13 squid light boat owner's permit.

14 **Comment.** Section 5880 continues the second sentence of former Fish and Game Code Section
15 8429 without substantive change.

16  **Note.** Existing Section 8429 refers to a “commercial light boat owner’s permit.” Section 8428
17 refers to a “commercial *squid* light boat owner’s permit.” Presumably these are the same kind of
18 boat. Proposed Section 5880 was drafted based on that assumption (i.e., the word “squid” was
19 added). **The Commission invites comment on whether that would cause a problem.**

20 TITLE 12. AMPHIBIANS

21 § 5900. Fully protected amphibians

22 5900. Except as otherwise provided in Section 597 of the Penal Code, the
23 punishment for a violation of Section 52200 is a fine of not more than five
24 thousand dollars (\$5,000) or imprisonment in the county jail for not more than one
25 year, or both the fine and imprisonment.

26 **Comment.** Section 5900 continues the part of former Fish and Game Code Section 12008(d)
27 applicable to amphibians without substantive change.

28 See also Section 4570 (enforcement).

29 TITLE 13. REPTILES

30 § 5950. Fully protected reptiles

31 5950. Except as otherwise provided in Section 597 of the Penal Code, the
32 punishment for a violation of Section 53000 is a fine of not more than five
33 thousand dollars (\$5,000) or imprisonment in the county jail for not more than one
34 year, or both the fine and imprisonment.

35 **Comment.** Section 5950 continues the part of former Fish and Game Code Section 12008(d)
36 applicable to reptiles without substantive change.

37 See also Section 4570 (enforcement).

TITLE 14. PLANTS

CHAPTER 1. KELP

§ 6000. License revocation or nonrenewal

6000. (a) The commission may revoke a license and prohibit its reissuance for a period of not more than one year, in either of the following circumstances:

(1) The licensee harvested kelp from a bed that was closed, after the department served notice of the closure on the licensee and before the bed was reopened.

(2) The licensee violated any law or regulation of the commission relating to kelp.

(b) A proceeding pursuant to this section shall be conducted at one of the commission's regularly scheduled meetings.

Comment. Section 6000 restates former Fish and Game Code Section 6656 without substantive change.

Notes. (1) Proposed Section 6000 would restate existing Section 6656 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

6656. The commission may revoke and prohibit reissuance for a period of not more than one year, the license of:

(a) Any person who harvests any kelp from a bed which is closed, between the time of service of notice upon him or her of the closing of the bed and the decision of the commission upon a hearing as to the necessity for the closing.

(b) Any person who violates any law or regulation of the commission relating to kelp. The proceedings shall be conducted at one of the commission's regularly scheduled meetings.

The Commission invites comment on whether that restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 6656(a) provides a sanction for a person who harvests kelp from a bed that is closed, after notice of the closure and before "the decision of the commission upon a hearing as to the necessity for the closing." The latter language refers to one way in which a bed closure can end — if the commission decides, after an evidentiary hearing, that the closure is not necessary. See existing Section 6655. However, that is not the only way that a closure can end. If there is no hearing, or the commission affirms the closure, it will end automatically at the time specified in the closure order (which is not to exceed a period of one year). See existing Section 6654. Proposed Section 6000(a)(1) is phrased to be compatible with both possible endings.

The Commission invites comment on whether that revision would cause any problems.

TITLE 15. HABITAT CONSERVATION AND
ENHANCEMENT

§ 6050. Wildlife area pass

6050. (a) Notwithstanding Section 4400, a violation of Section 56030 is an infraction, not a misdemeanor, punishable by a fine of not less than one hundred dollars (\$100) and not more than five hundred dollars (\$500). If a person convicted of a violation of Section 56030 is granted probation, the court shall

1 impose as a condition of probation that the person pay at least the minimum fine
2 prescribed in this subdivision.

3 (b) If a person is convicted of a violation of Section 56030 and produces in court
4 a valid wildlife area pass, the court may reduce the fine imposed for the violation
5 of Section 56030 to fifty dollars (\$50).

6 **Comment.** Section 6050 continues former Fish and Game Code Section 12002.5 without
7 substantive change.

8 **Note.** Existing Section 12002.5 begins with the disclaimer, “Notwithstanding Section
9 12002....” The only provision of Section 12002 that appears to be relevant to the purpose of that
10 reference is Section 12002(a). Proposed Section 6050 would refer to the section that continues
11 Section 12002(a). **The Commission invites Comment on whether that revision would be**
12 **problematic.**

13 **§ 6052. Wildlife habitat enhancement and management area**

14 6052. After notice and a hearing, the commission may revoke a license issued
15 pursuant to Section 56525 for any violation of any provision of this code or any
16 regulations adopted pursuant thereto or for any violation of the terms of the
17 license.

18 **Comment.** Section 6052 continues former Fish and Game Code Section 3404(b) without
19 substantive change.

20 **§ 6054. Shared Habitat Alliance for Recreational Enhancement Program**

21 6054. The department may revoke, for up to three years, a public access
22 privilege granted pursuant to Title 7 (commencing with Section 56200) of Part 2
23 of Division 15, of any person who violates any provision of this code or regulation
24 adopted pursuant to this code while on any property that is subject to an agreement
25 under the SHARE program established under Title 7 (commencing with Section
26 56200) of Part 2 of Division 15.

27 **Comment.** Section 6054 continues former Fish and Game Code Section 1574(a) without
28 substantive change.

29 **TITLE 16. PROTECTED AND MANAGED AREAS**

30 **§ 6100. Violation of specific regulations**

31 6100. Notwithstanding Section 4400, a person who violates any of the following
32 regulations in Title 14 of the California Code of Regulations is guilty of an
33 infraction punishable by a fine of not less than one hundred dollars (\$100) and not
34 to exceed one thousand dollars (\$1,000), or of a misdemeanor:

35 (a) Section 630.

36 (b) Section 632, except if any of the following apply:

37 (1) The person who violates the regulation holds a commercial fishing license
38 issued pursuant to Section 14500.

(2) The person who violates the regulation is operating a boat or vessel licensed pursuant to Title 12 (commencing with Section 12900) of Part 6 of Division 6 at the time of the violation.

(3) The violation of the regulation occurred within two years of a prior violation of the regulation that resulted in a conviction.

(c) Except as provided in Section 6104, a person described in paragraph (1) or (2) of subdivision (b) who violates Section 632 of Title 14 of the California Code of Regulations is guilty of a misdemeanor punishable pursuant to Sections 4400 and 4415.

Comment. Section 6100 continues former Fish and Game Code Section 12000(b)(11)-(12) without substantive change.

Note. Proposed Section 6100(b)(2) and (c) would continue Section 12000(b)(12)(A), which was amended by 2018 Cal. Stat. ch. 189. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 6102. Prohibited conduct in refuges

6102. The punishment for a violation of Section 58550, 58700, 59500, 59600, 60200, or 60300 is a fine of not more than two thousand dollars (\$2,000), imprisonment in a county jail for not more than one year, or both the fine and imprisonment.

Comment. Section 6102 continues former Fish and Game Code Section 12002(b)(6) without substantive change.

§ 6104. Unlawful take in marine protected area

6104. (a) Notwithstanding Section 4400 or any other provision of this code, a person who holds a commercial fishing license issued pursuant to Section 14500, or is operating a commercial passenger fishing boat licensed pursuant to Title 12 (commencing with Section 21900) of Part 6 of Division 6, and, for commercial purposes, either unlawfully takes a fish, within any meaning provided in Section 535, within a marine protected area, as defined in Section 60410, or engages in, or knowingly facilitates another person's, fishing activity within the marine protected area, is guilty of a misdemeanor punishable by a fine of not less than five thousand dollars (\$5,000) nor more than forty thousand dollars (\$40,000), or imprisonment in the county jail for not more than one year, or by both that fine and imprisonment.

(b) If a person is convicted of a second or subsequent violation that is punishable pursuant to subdivision (a) and the violation occurred within 10 years of a prior violation that is punishable pursuant to subdivision (a) that resulted in a conviction, the department may suspend that person's license described in subdivision (a), as applicable, or other privilege issued pursuant to this code, and that person shall be punished by a fine of not less than ten thousand dollars (\$10,000) nor more than fifty thousand dollars (\$50,000), or imprisonment in the county jail for not more than one year, or by both that fine and imprisonment.

(c) A person whose license or other privilege is suspended pursuant to this section may appeal the suspension to the commission. The commission shall initiate the appeal process within 12 months of the violator's appeal request. The commission shall consider at least the nature, circumstances, extent, and gravity of the person's violations, the person's culpability for the violations, and the injury to natural resources by the violations, and may restore a person's license or other privileges.

(d) Notwithstanding Section 802 of the Penal Code, prosecution of an offense punishable under this section shall be commenced within three years after commission of the offense.

Comment. Section 6104 continues former Fish and Game Code Section 12012.5 without substantive change.

Note. Proposed Section 6104 would continue Section 12012.5, which was added by 2018 Cal. Stat. ch. 189. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

TITLE 17. ACTIVITIES THAT AFFECT WILDLIFE

CHAPTER 1. ENDANGERED SPECIES AND OTHER PROTECTED WILDLIFE

§ 6200. Forfeiture of proceeds from take of endangered, threatened, or protected animals

6200. The judge before whom any person is tried for a violation of a provision of this code that prohibits the taking of any endangered species, threatened species, or fully protected bird, mammal, reptile, amphibian, or fish may, in the court's discretion and upon the conviction of that person, order the forfeiture of any proceeds resulting from the taking of the endangered species, threatened species, or fully protected bird, mammal, reptile, amphibian, or fish.

Comment. Section 6200 continues former Fish and Game Code Section 12159.5 without substantive change.

§ 6202. Violation of California Endangered Species Act

6202. Except as otherwise provided in Section 597 of the Penal Code, the punishment for a violation of any provision of Part 1 (commencing with Section 62000) of Division 17 is a fine of not more than five thousand dollars (\$5,000) or imprisonment in the county jail for not more than one year, or both the fine and imprisonment.

Comment. Section 6202 continues former Fish and Game Code Section 12008(a) without substantive change.

1 **§ 6204. Violation of specified provisions**

2 6204. (a) Notwithstanding Section 4400 or 6202, the punishment for any
3 violation of Section 62600 or 62605 is a fine of not less than twenty-five thousand
4 dollars (\$25,000) or more than fifty thousand dollars (\$50,000) for each violation
5 or imprisonment in the county jail for not more than one year, or by both that fine
6 and imprisonment.

7 **Comment.** Section 6204 continues former Fish and Game Code Section 12008.1(a) without
8 substantive change.

9  **Note.** Existing Section 12008.1 begins with the disclaimer, “Notwithstanding Section
10 12002....” The only provision of Section 12002 that appears to be relevant to the purpose of that
11 reference is Section 12002(a). Proposed Section 6204 would refer to the section that continues
12 Section 12002(a). **The Commission invites Comment on whether that revision would be**
13 **problematic.**

14 **§ 6206. Deposit of fines and forfeitures**

15 6206. Notwithstanding any other law, the moneys collected from any fine or
16 forfeiture imposed or collected for violating Part 1 (commencing with Section
17 62000) of Division 17 shall be deposited as follows:

18 (a) One-half in the Endangered Species Permitting Account established pursuant
19 to Section 63635.

20 (b) One-half in the county treasury of the county in which the violation
21 occurred. The board of supervisors shall first use revenues pursuant to this section
22 to reimburse the costs incurred by the district attorney or city attorney in
23 investigating and prosecuting the violation. Any excess revenues may be expended
24 in accordance with Section 67525.

25 **Comment.** Section 6206 continues former Fish and Game Code Section 12008.1(b) without
26 substantive change.

27 CHAPTER 2. PLANNING AND MITIGATION

28 **§ 6250. Nonpayment of CEQA fee**

29 6250. Notwithstanding Section 4400, failure to pay the fee under Section 66215
30 is not a misdemeanor.

31 **Comment.** Section 6250 continues the first sentence of former Fish and Game Code Section
32 711.4(f) without substantive change.

33  **Note.** Existing Section 711.4(f) begins with the disclaimer, “Notwithstanding Section
34 12000....” The only provision of Section 12000 that appears to be relevant to the purpose of that
35 reference is Section 12000(a). Proposed Section 6250 would refer to the section that continues
36 Section 12000(a). **The Commission invites Comment on whether that revision would be**
37 **problematic.**

CHAPTER 3. WATER POLLUTION

Article 1. Criminal Enforcement

§ 6300. Base penalty

6300. The punishment for a violation of subdivisions (a) or (b) of Section 66500 is a fine of not more than two thousand dollars (\$2,000), imprisonment in a county jail for not more than one year, or both the fine and imprisonment

Comment. Section 6300 continues former Fish and Game Code Section 12002(b)(4) without substantive change.

§ 6302. Additional penalty

6302. (a) In addition to the penalty provided in Section 6300, any person convicted of a violation of Section 66500 is subject to an additional fine of all of the following:

(1) Not more than ten dollars (\$10) for each gallon or pound of material discharged. The amount of the fine shall be reduced for every gallon or pound of the illegally discharged material that is recovered and properly disposed of by the responsible party.

(2) An amount equal to the reasonable costs incurred by the state or local agency for cleanup and abatement and to fully mitigate all actual damages to fish, plant, bird, or animal life and habitat.

(3) Where the state or local agency is required to undertake cleanup or remedial action because the responsible person refuses or is unable to fully clean up the discharge, an amount equal to the reasonable costs incurred by the state or local agency, in addition to the amount of funds, if any, expended by the responsible person, in cleaning up the illegally discharged material or abating its effects, or both cleaning up and abating those effects.

(b) Notwithstanding the jurisdiction of the department over illegal discharges and pollution as provided in Article 1 (commencing with Section 66500) of Chapter 1, the fines specified in this section do not apply to discharges in compliance with a national pollution discharge elimination system permit or a state or regional board waste discharge permit.

Comment. Section 6302 continues former Fish and Game Code Section 12011 without substantive change.

Article 2. Civil Enforcement

§ 6320. Civil penalty for water pollution

6320. (a) A person who violates Article 1 (commencing with Section 66500) of Chapter 1 of Title 1 of Part 3 of Division 17 is subject to a civil penalty of not more than twenty-five thousand dollars (\$25,000) for each violation.

1 (b) The civil penalty imposed for each separate violation pursuant to this article
2 is separate, and in addition to, any other civil penalty imposed for a separate
3 violation pursuant to this article or any other provision of law, except as provided
4 in Section 6324.

5 (c) In determining the amount of a civil penalty imposed pursuant to this article,
6 the court shall take into consideration all relevant circumstances, including, but
7 not limited to, the nature, circumstance, extent, and gravity of the violation. In
8 making this determination, the court shall consider the degree of toxicity and
9 volume of the discharge, the extent of harm caused by the violation, whether the
10 effects of the violation may be reversed or mitigated, and with respect to the
11 defendant, the ability to pay, the effect of any civil penalty on the ability to
12 continue in business, any voluntary cleanup efforts undertaken, any prior history
13 of violations, the gravity of the behavior, the economic benefit, if any, resulting
14 from the violation, and any other matters the court determines justice may require.

15 **Comment.** Section 6320 continues former Fish and Game Code Section 5650.1(a)-(c) without
16 substantive change.

17 **§ 6322. Additional penalty based on volume of discharge**

18 6322. Except as provided in Section 6324, in addition to any other penalty
19 provided by law, a person who violates Article 1 (commencing with Section
20 66500) of Chapter 1 of Title 1 of Part 3 of Division 17 is subject to a civil penalty
21 of not more than ten dollars (\$10) for each gallon or pound of material discharged.
22 The total amount of the civil penalty shall be reduced for every gallon or pound of
23 the illegally discharged material that is recovered and properly disposed of by the
24 responsible party.

25 **Comment.** Section 6322 continues former Fish and Game Code Section 5650.1(i) without
26 substantive change.

27 **§ 6324. Limitation on application of civil penalty**

28 6324. A person shall not be subject to a civil penalty imposed under this article
29 and to a civil penalty imposed pursuant to Article 9 (commencing with Section
30 8670.57) of Chapter 7.4 of Division 1 of Title 2 of the Government Code for the
31 same act or failure to act.

32 **Comment.** Section 6324 continues former Fish and Game Code Section 5650.1(j) without
33 substantive change.

34 **§ 6326. Apportionment of penalty**

35 6326. All civil penalties collected pursuant to this article shall not be considered
36 fines or forfeitures as defined in Section 3610 and shall be apportioned in the
37 following manner:

38 (a) Fifty percent shall be distributed to the county treasurer of the county in
39 which the action is prosecuted. Amounts paid to the county treasurer shall be

1 deposited in the county fish and wildlife propagation fund established pursuant to
2 Section 3900.

3 (b) Fifty percent shall be distributed to the department for deposit in the Fish and
4 Game Preservation Fund. These funds may be expended to cover the costs of legal
5 actions or for any other law enforcement purpose consistent with Section 9 of
6 Article XVI of the California Constitution.

7 **Comment.** Section 6326 continues former Fish and Game Code Section 5650.1(h) without
8 substantive change.

9 **§ 6328. Civil action**

10 6328. (a) Every civil action brought under this article shall be brought by the
11 Attorney General upon complaint by the department, or by the district attorney or
12 city attorney in the name of the people of the State of California, and any actions
13 relating to the same violation may be joined or consolidated.

14 (b) In a civil action brought pursuant to this article in which a temporary
15 restraining order, preliminary injunction, or permanent injunction is sought, it is
16 not necessary to allege or prove at any stage of the proceeding that irreparable
17 damage will occur if the temporary restraining order, preliminary injunction, or
18 permanent injunction is not issued, or that the remedy at law is inadequate.

19 (c) After the party seeking the injunction has met its burden of proof, the court
20 shall determine whether to issue a temporary restraining order, preliminary
21 injunction, or permanent injunction without requiring the defendant to prove that it
22 will suffer grave or irreparable harm. The court shall make the determination
23 whether to issue a temporary restraining order, preliminary injunction, or
24 permanent injunction by taking into consideration, among other things, the nature,
25 circumstance, extent, and gravity of the violation, the quantity and characteristics
26 of the substance or material involved, the extent of environmental harm caused by
27 the violation, measures taken by the defendant to remedy the violation, the relative
28 likelihood that the material or substance involved may pass into waters of the
29 state, and the harm likely to be caused to the defendant.

30 (d) The court, to the maximum extent possible, shall tailor a temporary
31 restraining order, preliminary injunction, or permanent injunction narrowly to
32 address the violation in a manner that will otherwise allow the defendant to
33 continue business operations in a lawful manner.

34 **Comment.** Section 6328 continues former Fish and Game Code Section 5650.1(d)-(g) without
35 substantive change.

36  **Note.** Existing Section 5650.1 authorizes the imposition of a civil penalty, in a civil action,
37 for a violation of existing Section 5650 (proposed Section 66500). Existing Section 5650.1(e)
38 provides special rules for injunctive relief in a civil action brought pursuant to “this chapter.”
39 Given that Section 5650.1 appears to address only a violation of Section 5650, the reference to
40 “this chapter” appears to be erroneously overbroad. In proposed Section 6328, the reference has
41 been narrowed to “this article.” **The Commission invites comment on whether that revision**
42 **would cause any problems.**

CHAPTER 4. WATER OBSTRUCTION AND DIVERSION

Article 1. Streambed Alteration

§ 6350. Streambed alteration

6350. Notwithstanding Section 4400, the punishment for a second or subsequent violation of Section 69750 or Article 3 (commencing with Section 69850) of Chapter 2 of Title 3 of Part 4 of Division 17, on the same project or streambed alteration agreement, is a fine of not more than five thousand dollars (\$5,000) or imprisonment in the county jail for a period not to exceed one year, or both the fine and imprisonment.

Comment. Section 6350 continues the part of former Fish and Game Code Section 12007 that applies to Sections 1602 and 1605, without substantive change.

Notes. (1) Existing Section 12007 begins with the disclaimer, “Notwithstanding Section 12002....” The only provision of Section 12002 that appears to be relevant to the purpose of that reference is Section 12002(a). Proposed Section 6350 would refer to the section that continues Section 12002(a). **The Commission invites Comment on whether that revision would be problematic.**

(2) Existing Section 12007 refers to a “violation of Section 1602.” Proposed Section 70165 would narrow that cross-reference to the part of Section 1602 that appears to be relevant to the purpose of the reference (i.e., proposed Section 69795). **The Commission invites comment on whether that revision would cause any problems.**

§ 6352. Civil penalty

6352. (a) An entity that violates Title 3 (commencing with Section 69700) of Part 4 of Division 17 is subject to a civil penalty of not more than twenty-five thousand dollars (\$25,000) for each violation.

(b) The civil penalty imposed pursuant to subdivision (a) is separate from, and in addition to, any other civil penalty imposed pursuant to this section or any other provision of the law.

(c) In determining the amount of any civil penalty imposed pursuant to this section, the court shall take into consideration all relevant circumstances, including, but not limited to, the nature, circumstance, extent, and gravity of the violation. In making this determination, the court may consider the degree of toxicity and volume of the discharge, the extent of harm caused by the violation, whether the effects of the violation may be reversed or mitigated, and, with respect to the defendant, the ability to pay, the effect of any civil penalty on the ability to continue in business, any voluntary cleanup efforts undertaken, any prior history of violations, the gravity of the behavior, the economic benefit, if any, resulting from the violation, and any other matters the court determines that justice may require.

Comment. Section 6352 continues former Fish and Game Code Section 1615(a)-(c) without substantive change.

1 **§ 6354. Civil action**

2 6354. (a) Every civil action brought under Section 6352 shall be brought by the
3 Attorney General upon complaint by the department, or by the district attorney or
4 city attorney in the name of the people of the State of California, and any actions
5 relating to the same violation may be joined or consolidated.

6 (b) In any civil action brought pursuant to this title in which a temporary
7 restraining order, preliminary injunction, or permanent injunction is sought, it is
8 not necessary to allege or prove at any stage of the proceeding any of the
9 following:

10 (1) That irreparable damage will occur if the temporary restraining order,
11 preliminary injunction, or permanent injunction is not issued.

12 (2) That the remedy at law is inadequate.

13 (c) The court shall issue a temporary restraining order, preliminary injunction, or
14 permanent injunction in a civil action brought pursuant to this title without the
15 allegations and without the proof specified in subdivision (b).

16 **Comment.** Section 6354 continues former Fish and Game Code Section 1615(d)-(e) without
17 substantive change.

18 **§ 6356. Apportionment of civil penalties**

19 6356. All civil penalties collected pursuant to Section 6352 shall not be
20 considered fines or forfeitures as defined in Section 3610, and shall be apportioned
21 in the following manner:

22 (a) Fifty percent shall be distributed to the county treasurer of the county in
23 which the action is prosecuted. Amounts paid to the county treasurer shall be
24 deposited in the county fish and wildlife propagation fund established pursuant to
25 Section 3900.

26 (b) Fifty percent shall be distributed to the department for deposit in the Fish and
27 Game Preservation Fund. These funds may be expended to cover the costs of any
28 legal actions or for any other law enforcement purpose consistent with Section 9
29 of Article XVI of the California Constitution.

30 **Comment.** Section 6356 continues former Fish and Game Code Section 1615(f) without
31 substantive change.

32 Article 2. Obstruction in Districts 2505, 2510, 2515, 2525, 2530,
33 2535, 2540, 2545, 2550, 2555, 2560, 2565, 2595, 2600, 2605, 2660,
34 and 2665

35 **§ 6380. Civil penalty**

36 6380. (a) In addition to any penalties imposed by any other law, a person found
37 to have violated Section 68105 shall be liable for a civil penalty of not more than
38 eight thousand dollars (\$8,000) for each violation.

1 (b) Each day that a violation of Section 68105 occurs or continues without a
2 good faith effort by the person to cure the violation after receiving notice from the
3 department shall constitute a separate violation.

4 **Comment.** Section 6380 continues former Fish and Game Code Section 12025.1(a) without
5 substantive change.

6 **§ 6382. Civil penalties are not fines or forfeitures**

7 6382. All civil penalties imposed or collected by a court for a separate violation
8 pursuant to this article shall not be considered to be fines or forfeitures, as
9 described in Section 3610.

10 **Comment.** Section 6382 continues the first parts of former Fish and Game Code Section
11 12025.1(b) & (c) without substantive change.

12 **§ 6384. Apportionment of civil penalty for violation connected to cultivation of controlled**
13 **substance**

14 6384. All civil penalties imposed or collected by a court for a separate violation
15 pursuant to this article, in connection with the production or cultivation of a
16 controlled substance, shall be apportioned in the manner described in Section
17 6558.

18 **Comment.** Section 6384 continues the second part of former Fish and Game Code Section
19 12025.1(b) without substantive change.

20 **§ 6386. Apportionment of civil penalty for violation unconnected to cultivation of controlled**
21 **substance**

22 6386. All civil penalties imposed or collected by a court for a separate violation
23 pursuant to this article, not in connection with the production or cultivation of a
24 controlled substance, shall be apportioned in the following manner:

25 (a) Thirty percent shall be distributed to the county in which the violation was
26 committed pursuant to Section 13003. The county board of supervisors shall first
27 use any revenues from those penalties to reimburse the costs incurred by the
28 district attorney or city attorney in investigating and prosecuting the violation.

29 (b) (1) Thirty percent shall be distributed to the investigating agency to be used
30 to reimburse the cost of any investigation directly related to the violations
31 described in this article.

32 (2) If the department receives reimbursement pursuant to this subdivision for
33 activities funded pursuant to subdivision (f) of Section 4629.6 of the Public
34 Resources Code, the reimbursement funds shall be deposited into the Timber
35 Regulation and Forest Restoration Fund, created by Section 4629.3 of the Public
36 Resources Code, if there is an unpaid balance for a loan authorized by subdivision
37 (f) of Section 4629.6 of the Public Resources Code.

38 (c) Forty percent shall be deposited into the Fish and Game Preservation Fund.

39 **Comment.** Section 6386 continues the second part of former Fish and Game Code Section
40 12025.1(c) without substantive change.

1 **§ 6388. Administrative penalty**

2 6388. (a) Civil penalties authorized pursuant to Section 6380 may be imposed
3 administratively by the department according to the procedures described in
4 paragraphs (1) through (4), inclusive, of subdivision (a) of Section 6560.

5 (b) The department shall adopt emergency regulations to implement this section
6 in accordance with the Administrative Procedure Act (Chapter 3.5 (commencing
7 with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code).
8 The adoption of these regulations shall be deemed to be an emergency and
9 necessary for the immediate preservation of the public peace, health and safety, or
10 general welfare.

11 **Comment.** Section 6388 continues former Fish and Game Code Section 12025.1(d) without
12 substantive change.

13 **§ 6390. Administrative penalties are not fines or forfeitures**

14 6390. All administrative penalties imposed or collected by the department for a
15 separate violation pursuant to this article shall not be considered to be fines or
16 forfeitures, as described in Section 3610.

17 **Comment.** Section 6390 continues the first parts of former Fish and Game Code Section
18 12025.1(e) & (f) without substantive change.

19 **§ 6392. Apportionment of administrative penalty for violation connected to cultivation of**
20 **controlled substance**

21 6392. All administrative penalties imposed or collected by the department for a
22 separate violation pursuant to this article, in connection with the production or
23 cultivation of a controlled substance, shall be deposited according the provisions
24 of subdivisions (b) and (c) of Section 6560.

25 **Comment.** Section 6392 continues the second part of former Fish and Game Code Section
26 12025.1(e) without substantive change.

27 **§ 6394. Apportionment of administrative penalty for violation unconnected to cultivation of**
28 **controlled substance**

29 6394. (a) All administrative penalties imposed or collected by the department for
30 a separate violation pursuant to this article, not in connection with the production
31 or cultivation of a controlled substance, shall be deposited into the Timber
32 Regulation and Forest Restoration Fund, created by Section 4629.3 of the Public
33 Resources Code, to repay any unpaid balance of a loan authorized by subdivision
34 (f) of Section 4629.6 of the Public Resources Code.

35 (b) Any remaining funds from administrative penalties collected pursuant to this
36 section shall be apportioned in the following manner:

37 (1) Fifty percent shall be deposited into the Fish and Game Preservation Fund.

38 (2) Fifty percent shall be deposited into the Timber Regulation and Forest
39 Restoration Fund for grants authorized pursuant to subdivision (h) of Section
40 4629.6 of the Public Resources Code.

Comment. Section 6394 continues the second part of former Fish and Game Code Section 12025.1(f) without substantive change.

§ 6396. Definition of “controlled substance”

6396. For purposes of this article, “controlled substance” has the same meaning as defined in Section 11007 of the Health and Safety Code.

Comment. Section 6396 continues former Fish and Game Code Section 12025.1(g) without substantive change.

Article 3. Obstruction in District 2520

§ 6410. Obstruction of Klamath River

6410. (a) Every person, firm, corporation, or company that violates Section 69250 is guilty of a misdemeanor.

(b) The penalty for a violation of Section 69250 is a fine of not less than one thousand dollars (\$1,000), imprisonment in county jail for not less than 100 days, or both that fine and imprisonment.

Comment. Section 6410 continues part of the fourth paragraph of former Fish and Game Code Section 11036 without substantive change.

CHAPTER 5. MINING

§ 6500. Vacuum or suction dredging

6500. If a person uses vacuum or suction dredge equipment other than as authorized by a permit issued by the department consistent with regulations adopted pursuant to Section 71010, that person is guilty of a misdemeanor.

Comment. Section 6500 continues the third sentence of former Fish and Game Code Section 5653(c) without substantive change.

Note. Existing Section 5653(c) refers to “regulations implementing this section.” Proposed Section 6500 would revise the reference to refer to “regulations adopted pursuant to Section 71010.” This would parallel the scope of the regulations incorporated in existing Section 5653(a) (proposed Section 71050), the provision that establishes the underlying prohibition at issue in Section 5653(c). **The Commission believes that this would be a rational harmonization of the two provisions, but invites comment on whether it would cause any problems.**

CHAPTER 6. CULTIVATION OR PRODUCTION OF CONTROLLED
SUBSTANCE

§ 6550. “Controlled substance” defined

6550. For purposes of this chapter, “controlled substance” has the same meaning as defined in Section 11007 of the Health and Safety Code.

Comment. Section 6550 continues former Fish and Game Code Section 12025(h) without substantive change.

1 **§ 6552. Cultivation or production of controlled substance on public land**

2 6552. In addition to any penalties imposed by any other law, a person found to
3 have violated the code sections described in subdivisions (a) to (k), inclusive, in
4 connection with the production or cultivation of a controlled substance on land
5 under the management of the Department of Parks and Recreation, the Department
6 of Fish and Wildlife, the Department of Forestry and Fire Protection, the State
7 Lands Commission, a regional park district, the United States Forest Service, or
8 the United States Bureau of Land Management, or within the respective ownership
9 of a timberland production zone, as defined in Chapter 6.7 (commencing with
10 Section 51100) of Part 1 of Division 1 of Title 5 of the Government Code, of more
11 than 50,000 acres, or while trespassing on other public or private land in
12 connection with the production or cultivation of a controlled substance, shall be
13 liable for a civil penalty as follows:

14 (a) A person who violates Section 69750 in connection with the production or
15 cultivation of a controlled substance is subject to a civil penalty of not more than
16 ten thousand dollars (\$10,000) for each violation.

17 (b) A person who violates Section 66500 in connection with the production or
18 cultivation of a controlled substance is subject to a civil penalty of not more than
19 forty thousand dollars (\$40,000) for each violation.

20 (c) A person who violates Section 66525 in connection with the production or
21 cultivation of a controlled substance is subject to a civil penalty of not more than
22 forty thousand dollars (\$40,000) for each violation.

23 (d) A person who violates subdivision (a) of Section 374.3 of the Penal Code in
24 connection with the production or cultivation of a controlled substance is subject
25 to a civil penalty of not more than forty thousand dollars (\$40,000) for each
26 violation.

27 (e) A person who violates paragraph (1) of subdivision (h) of Section 374.3 of
28 the Penal Code in connection with the production or cultivation of a controlled
29 substance is subject to a civil penalty of not more than forty thousand dollars
30 (\$40,000) for each violation.

31 (f) A person who violates subdivision (b) of Section 374.8 of the Penal Code in
32 connection with the production or cultivation of a controlled substance is subject
33 to a civil penalty of not more than forty thousand dollars (\$40,000) for each
34 violation.

35 (g) A person who violates Section 384a of the Penal Code in connection with the
36 production or cultivation of a controlled substance is subject to a civil penalty of
37 not more than ten thousand dollars (\$10,000) for each violation.

38 (h) A person who violates subdivision (a) of Section 4571 of the Public
39 Resources Code in connection with the production or cultivation of a controlled
40 substance is subject to a civil penalty of not more than ten thousand dollars
41 (\$10,000) for each violation.

42 (i) A person who violates Section 4581 of the Public Resources Code in
43 connection with the production or cultivation of a controlled substance is subject

1 to a civil penalty of not more than ten thousand dollars (\$10,000) for each
2 violation.

3 (j) A person who violates Section 8000 in connection with the production or
4 cultivation of a controlled substance is subject to a civil penalty of not more than
5 ten thousand dollars (\$10,000) for each violation.

6 (k) A person who violates Section 8010 in connection with the production or
7 cultivation of a controlled substance is subject to a civil penalty of not more than
8 ten thousand dollars (\$10,000) for each violation.

9 **Comment.** Section 6552 continues former Fish and Game Code Section 12025(a) without
10 substantive change.

11 **§ 6554. Cultivation or production of controlled substance on other land**

12 6554. (a) In addition to any penalties imposed by any other law, a person found
13 to have violated the code sections described in this section in connection with the
14 production or cultivation of a controlled substance on land that the person owns,
15 leases, or otherwise uses or occupies with the consent of the landowner shall be
16 liable for a civil penalty as follows:

17 (1) A person who violates Section 69750 in connection with the production or
18 cultivation of a controlled substance is subject to a civil penalty of not more than
19 eight thousand dollars (\$8,000) for each violation.

20 (2) A person who violates Section 66500 in connection with the production or
21 cultivation of a controlled substance is subject to a civil penalty of not more than
22 twenty thousand dollars (\$20,000) for each violation.

23 (3) A person who violates Section 66525 in connection with the production or
24 cultivation of a controlled substance is subject to a civil penalty of not more than
25 twenty thousand dollars (\$20,000) for each violation.

26 (4) A person who violates subdivision (a) of Section 374.3 of the Penal Code in
27 connection with the production or cultivation of a controlled substance is subject
28 to a civil penalty of not more than twenty thousand dollars (\$20,000) for each
29 violation.

30 (5) A person who violates paragraph (1) of subdivision (h) of Section 374.3 of
31 the Penal Code in connection with the production or cultivation of a controlled
32 substance is subject to a civil penalty of not more than twenty thousand dollars
33 (\$20,000) for each violation.

34 (6) A person who violates subdivision (b) of Section 374.8 of the Penal Code in
35 connection with the production or cultivation of a controlled substance is subject
36 to a civil penalty of not more than twenty thousand dollars (\$20,000) for each
37 violation.

38 (7) A person who violates Section 384a of the Penal Code in connection with the
39 production or cultivation of a controlled substance is subject to a civil penalty of
40 not more than ten thousand dollars (\$10,000) for each violation.

41 (8) A person who violates subdivision (a) of Section 4571 of the Public
42 Resources Code in connection with the production or cultivation of a controlled

1 substance is subject to a civil penalty of not more than eight thousand dollars
2 (\$8,000) for each violation.

3 (9) A person who violates Section 4581 of the Public Resources Code in
4 connection with the production or cultivation of a controlled substance is subject
5 to a civil penalty of not more than eight thousand dollars (\$8,000) for each
6 violation.

7 (10) A person who violates Section 8000 in connection with the production or
8 cultivation of a controlled substance is subject to a civil penalty of not more than
9 eight thousand dollars (\$8,000) for each violation.

10 (11) A person who violates Section 8010 in connection with the production or
11 cultivation of a controlled substance is subject to a civil penalty of not more than
12 eight thousand dollars (\$8,000) for each violation.

13 (b) Each day that a violation of a code section described in this section occurs or
14 continues to occur shall constitute a separate violation.

15 **Comment.** Section 6554 continues former Fish and Game Code Section 12025(b) without
16 substantive change.

17 **§ 6556. Consideration of civil penalty in conjunction with other penalties**

18 6556. (a) A civil penalty imposed for each separate violation pursuant to this
19 chapter is in addition to any other civil penalty imposed for another violation of
20 this chapter, or any violation of any other law.

21 (b) A civil penalty imposed or collected by a court for a separate violation
22 pursuant to this chapter shall not be considered to be a fine or forfeiture, as
23 described in Section 3610.

24 (c) A civil penalty imposed pursuant to this chapter for the violation of an
25 offense described in subdivision (d), (e), or (f) of Section 6552 or paragraphs (4),
26 (5), or (6) of subdivision (a) of Section 6554, for which the person was convicted,
27 shall be offset by the amount of any restitution ordered by a criminal court.

28 **Comment.** Subdivision (a) of Section 6556 continues former Fish and Game Code Section
29 12025(c) without substantive change.

30 Subdivision (b) continues the first part of former Fish and Game Code Section 12025(d)
31 without substantive change.

32 Subdivision (c) continues former Fish and Game Code Section 12025(g) without substantive
33 change.

34 **§ 6558. Apportionment of penalty**

35 6558. A civil penalty imposed or collected by a court for a separate violation
36 pursuant to this chapter shall be apportioned in the following manner:

37 (a) Thirty percent shall be distributed to the county in which the violation was
38 committed, pursuant to Section 3610. The county board of supervisors shall first
39 use any revenues from those penalties to reimburse the costs incurred by the
40 district attorney or city attorney in investigating and prosecuting the violation.

1 (b) (1) Thirty percent shall be distributed to the investigating agency to be used
2 to reimburse the cost of any investigation directly related to the violations
3 described in this chapter.

4 (2) If the department receives reimbursement pursuant to this subdivision for
5 activities funded pursuant to subdivision (f) of Section 4629.6 of the Public
6 Resources Code, the reimbursement funds shall be deposited into the Timber
7 Regulation and Forest Restoration Fund, created by Section 4629.3 of the Public
8 Resources Code, if there is an unpaid balance for a loan authorized by subdivision
9 (f) of Section 4629.6 of the Public Resources Code.

10 (c) Forty percent shall be deposited into the Timber Regulation and Forest
11 Restoration Fund, created by Section 4629.3 of the Public Resources Code, and
12 used for grants authorized pursuant to Section 4629.6 of the Public Resources
13 Code that improve forest health by remediating former marijuana growing
14 operations.

15 **Comment.** Section 6558 continues former Fish and Game Code Section 12025(d) without
16 substantive change.

17 **§ 6560. Imposition of administrative penalty by Department of Fish and Wildlife**

18 6560. (a) A civil penalty authorized pursuant to this chapter may be imposed
19 administratively by the department, if all of the following occur:

20 (1) The chief deputy director or law enforcement division assistant chief in
21 charge of marijuana-related enforcement issues a complaint to any person or entity
22 on which a civil penalty may be imposed pursuant to this chapter. The complaint
23 shall allege the act or failure to act that constitutes a violation, any facts related to
24 natural resources impacts, the provision of law authorizing an administrative
25 penalty to be imposed, and the proposed penalty amount.

26 (2) The complaint and order is served by personal notice or certified mail and
27 informs the party served that the party may request a hearing not later than 20 days
28 from the date of service. If a hearing is requested, it shall be scheduled before the
29 director or his or her designee, which designee shall not be the chief deputy or
30 assistant chief issuing the complaint and order. A request for a hearing shall
31 contain a brief statement of the material facts the party claims support his or her
32 contention that no administrative penalty should be imposed or that an
33 administrative penalty of a lesser amount is warranted. A party served with a
34 complaint pursuant to this subdivision waives his or her right to a hearing if a
35 hearing is not requested within 20 days of service of the complaint, in which case
36 the order imposing the administrative penalty shall become final.

37 (3) The director, or his or her designee, shall control the nature and order of
38 hearing proceedings. Hearings shall be informal in nature, and need not be
39 conducted according to the technical rules relating to evidence. The director or his
40 or her designee shall issue a final order within 45 days of the close of the hearing.
41 A copy of the final order shall be served by certified mail upon the party served
42 with the complaint.

(4) A party may obtain review of the final order by filing a petition for a writ of mandate with the superior court within 30 days of the date of service of the final order. The administrative penalty shall be due and payable to the department within 60 days after the time to seek judicial review has expired, or, where the party did not request a hearing of the order, within 20 days after the order imposing an administrative penalty becomes final.

(5) The department may adopt regulations to implement this subdivision.

(d) All administrative penalties imposed or collected by the department for a separate violation pursuant to this chapter shall not be considered to be fines or forfeitures, as described in Section 3610.

(e) All administrative penalties imposed or collected by the department for a separate violation pursuant to this chapter shall be deposited into the Timber Regulation and Forest Restoration Fund, created by Section 4629.3 of the Public Resources Code, to repay any unpaid balance of a loan authorized by subdivision (f) of Section 4629.6 of the Public Resources Code. Any remaining funds from administrative penalties collected pursuant to this chapter shall be apportioned in the following manner:

(1) Fifty percent shall be deposited into the Timber Regulation and Forest Restoration Fund for grants authorized pursuant to subdivision (h) of Section 4629.6 of the Public Resources Code, with priority given to grants that improve forest health by remediating former marijuana growing operations.

(2) Fifty percent shall be deposited into the Fish and Game Preservation Fund.

Comment. Section 6560 continues former Fish and Game Code Section 12025(e) and (f) without substantive change.

DIVISION 4. INTER-JURISDICTIONAL AGREEMENTS

PART 1. UNITED STATES

TITLE 1. ACCEPTANCE OF FEDERAL ACTS

§ 7200. Assent to Public Law 415, 75th Congress

7200. The State of California hereby assents to the provisions of the act of Congress entitled “An act to provide that the United States shall aid the states in wildlife-restoration projects, and for other purposes,” approved September 2, 1937 (Public Law 415, 75th Congress). The department, with the approval of the commission, shall perform any acts needed to conduct or establish cooperative wildlife-restoration projects, as defined in that act of Congress, in compliance with that act and rules and regulations adopted under that act, and funds accruing to the State of California from license fees paid by hunters shall not be diverted for a purpose other than the administration of the department and the protection, propagation, preservation, and investigation of fish and wildlife.

1 **Comment.** Section 7200 continues former Fish and Game Code Section 400 without
2 substantive change.

3 **§ 7205. Assent to Public Law 681, 81st Congress**

4 7205. The State of California hereby assents to the provisions of the act of
5 Congress entitled “An act to provide that the United States shall aid the states in
6 fish restoration and management projects, and for other purposes,” approved
7 August 9, 1950 (Public Law 681, 81st Congress). The department, with the
8 approval of the commission, may perform any acts needed to conduct or establish
9 cooperative fish restoration projects, as defined in that act of Congress, in
10 compliance with that act and rules and regulations adopted under that act, and
11 funds accruing to the State of California from license fees paid by fishermen shall
12 not be diverted for a purpose other than the administration of the department and
13 the protection, propagation, preservation, and investigation of fish and wildlife.

14 **Comment.** Section 7205 continues former Fish and Game Code Section 401 without
15 substantive change.

16 **TITLE 2. MANAGEMENT OF FISH AND**
17 **WILDLIFE ON MILITARY LANDS**

18 **§ 7210. Statement of policy**

19 7210. It is the policy of the state to actively encourage the biologically sound
20 management of fish and other wildlife resources on lands administered by the
21 United States Department of Defense. The department may develop a program to
22 implement this title in cooperation with the military services.

23 **Comment.** Section 7210 continues former Fish and Game Code Section 3450 without
24 substantive change.

25 **§ 7215. Coordination and cooperation with military services**

26 7215. The department may coordinate and cooperate with all branches of the
27 United States military service, Department of Defense, for the purpose of
28 developing fish and wildlife management plans and programs on military
29 installations. The plans and programs shall be designed to provide biologically
30 optimum levels of fish and wildlife resource management and use compatible with
31 the primary military use of those lands. Military lands involved in programs
32 developed pursuant to this title shall not be available to the general public without
33 the consent of the military service administering the lands.

34 **Comment.** Section 7215 continues former Fish and Game Code Section 3451 without
35 substantive change.

1 **§ 7220. Regulations and agreements authorized**

2 7220. The commission may adopt regulations and authorize the department to
3 enter into agreements with the United States Department of Defense for the
4 administration of this title.

5 **Comment.** Section 7220 continues former Fish and Game Code Section 3452 without
6 substantive change.

7 **§ 7225. Management plans and programs**

8 7225. (a) Upon approval of specific management plans and programs, which
9 reflect the recommendations of the department, the commission may authorize
10 actions and adopt regulations governing those actions pursuant to this title.

11 (b) The provisions of Sections 34520, 34525, and 34530 do not apply to
12 regulations adopted pursuant to this title.

13 (c) The activities conducted pursuant to this program shall be reviewed annually
14 by the department and the commission.

15 **Comment.** Section 7225 continues former Fish and Game Code Section 3453 without
16 substantive change.

17 **TITLE 3. FEDERAL BIRD RESERVATIONS**

18 **§ 7230. Acceptance of Migratory Bird Conservation Act**

19 7230. The people of the state, through their legislative authority, accept the
20 provisions and benefits of the act of Congress known as the “Migratory Bird
21 Conservation Act,” approved February 18, 1929. Upon approval by the
22 commission, they consent to the acquisition by the United States, by purchase,
23 lease, gift, or devise, of areas of land, water, or land and water, within the state,
24 that the United States or its properly constituted officers or agents may deem
25 necessary for migratory bird reservations in carrying out the provisions of the act
26 of Congress; saving and reserving, however, to the state full and complete
27 jurisdiction and authority over any areas that is not incompatible with the
28 administration, maintenance, protection, and control thereof by the United States
29 under the terms of the act of Congress, and saving and reserving to all persons
30 within those areas all rights, privileges, and immunities under the laws of the
31 State, insofar as they are compatible with the administration, maintenance,
32 protection, and control of those areas by the United States under the terms of the
33 act of Congress.

34 **Comment.** Section 7230 continues former Fish and Game Code Section 10680 without
35 substantive change.

36 **§ 7235. Consent of concerned county**

37 7235. Prior to approval by the commission under Section 7230, the legislative
38 body of the county concerned shall have given its written consent to the
39 commission for the proposed acquisition.

1 **Comment.** Section 7235 continues former Fish and Game Code Section 10681 without
2 substantive change.

3 **§ 7240. Insufficient payments from United States to county**

4 7240. (a) If in any year, on lands hereafter acquired, the in lieu payments from
5 the United States to the county do not equal the taxes assessed on a given project,
6 the department shall pay from income derived from hunting privileges on the
7 project an amount equal to the balance of the taxes on the entire project.

8 (b) For the purposes of this section, the taxes on a given project are the assessed
9 taxes on the project at the time of acquisition, plus any subsequent increases that
10 may accrue from general county increases in the tax rates, but not subject to re-
11 evaluation of the project properties after the time of acquisition.

12 **Comment.** Section 7240 continues former Fish and Game Code Section 10682 without
13 substantive change.

14 **§ 7245. Federal compliance with state law**

15 7245. The consent of the state to the acquisition by the United States of land,
16 water, or land and water for migratory bird reservations in accordance with this
17 title, is subject to the condition that the United States conform to the laws of the
18 state relating to the acquisition, control, use, and distribution of water with respect
19 to the land acquired.

20 **Comment.** Section 7245 continues former Fish and Game Code Section 10683 without
21 substantive change.

22 **§ 7250. Conditions on continuing consent**

23 7250. The consent contained in Section 7230 continues only so long as the
24 property continues to belong to the United States and is held by it in accordance
25 and in compliance with each and all of the conditions and reservations as
26 prescribed in this title, and is used for the purposes for which it was acquired.

27 **Comment.** Section 7250 continues former Fish and Game Code Section 10684 without
28 substantive change.

29 **§ 7255. Additional consent**

30 7255. With the approval of the commission, the people of the state, through their
31 legislative authority, also consent to the declaration, withdrawal, or determination
32 of any part of any national forest or power site, and do further consent to the
33 condemnation of any lands lying and being below an elevation known and
34 described as minus 230-foot elevation below sea level, as a migratory bird
35 reservation under the provisions of the act of Congress cited in Section 7230.

36 **Comment.** Section 7255 continues former Fish and Game Code Section 10685 without
37 substantive change.

1 PART 2. STATES AND OTHER JURISDICTIONS

2 TITLE 1. RECIPROCAL AGREEMENTS WITH
3 ADJOINING STATES

4 **§ 7300. Reciprocal sport fishing license agreements**

5 7300. The commission, subject to the approval of the Attorney General, may
6 enter into reciprocal agreements with corresponding state or county official
7 agencies of adjoining states pertaining to the establishment of a basis whereby
8 valid sport fishing licenses issued by the parties to the reciprocal agreements may
9 be used by their licensees within the jurisdiction of either, in accordance with the
10 terms of the agreements.

11 **Comment.** Section 7300 continues former Fish and Game Code Section 390 without
12 substantive change.

13 **§ 7305. Reciprocal operational agreement with law enforcement**

14 7305. (a) The director, or a designated representative, may enter into reciprocal
15 operational agreements with authorized representatives of any Oregon, Nevada, or
16 Arizona state law enforcement agency, including, but not limited to, the Oregon
17 State Police, the Nevada Department of Wildlife, and the Arizona Game and Fish
18 Department, to promote expeditious and effective law enforcement service to the
19 public, and assistance between the members of the department and those agencies,
20 in areas adjacent to the borders of this state and each of the adjoining states
21 pursuant to Section 7310.

22 (b) The reciprocal operational agreement shall be in writing and may cover the
23 reciprocal exchange of law enforcement services, resources, facilities, and any
24 other necessary and proper matters between the department and the respective
25 agency.

26 (c) Any agreement shall specify all of the following:

27 (1) The involved departments, divisions, or units of the agencies.

28 (2) The duration and purpose of the agreement.

29 (3) Responsibility for damages.

30 (4) The method of financing any joint or cooperative undertaking.

31 (5) The methods to be employed to terminate an agreement.

32 (d) The director may establish operational procedures in implementation of any
33 reciprocal operational agreement that are necessary to achieve the purposes of the
34 agreement.

35 **Comment.** Section 7305 continues former Fish and Game Code Section 392 without
36 substantive change.

1 **§ 7310. Status of law enforcement officers of adjoining states**

2 7310. (a) A regularly employed law enforcement officer of an Oregon, Nevada,
3 or Arizona state law enforcement agency, including, but not limited to, the Oregon
4 State Police, the Nevada Department of Wildlife, or the Arizona Game and Fish
5 Department, is a peace officer in this state, if all of the following conditions are
6 met:

7 (1) The officer is providing, or attempting to provide, law enforcement services
8 within this state, within a distance of up to 50 statute miles of the contiguous
9 border of this state and the state employing the officer, or within waters offshore
10 of this state in the Exclusive Economic Zone.

11 (2) The officer is providing, or attempting to provide, law enforcement services
12 pursuant to either of the following:

13 (A) In response to a request for services initiated by a member of the
14 department.

15 (B) In response to a reasonable belief that emergency law enforcement services
16 are necessary for the preservation of life, and a request for services by a member
17 of the department is impractical to obtain under the circumstances. In those
18 situations, the officer shall obtain authorization as soon as practical.

19 (3) The officer is providing, or attempting to provide, law enforcement services
20 for the purpose of assisting a member of the department in response to
21 misdemeanor or felony criminal activity, pursuant to the authority of a peace
22 officer as provided in subdivision (e) of Section 830.2 of the Penal Code, or, in the
23 event of an emergency incident or other similar public safety problem, whether or
24 not a member of the department is present at the scene of the event.

25 (4) An agreement pursuant to Section 7305 is in effect between the department
26 and the agency of the adjoining state employing the officer, the officer acts in
27 accordance with that agreement, and the agreement specifies that the officer and
28 employing agency of the adjoining state shall be subject to the same civil
29 immunities and liabilities as a peace officer and his or her employing agency in
30 this state.

31 (5) The officer receives no separate compensation from this state for providing
32 law enforcement services within this state.

33 (6) The adjoining state employing the officer confers similar rights and authority
34 upon a member of the department who renders assistance within that state.

35 (b) Notwithstanding any other provision of law, a person who is acting as a
36 peace officer in this state in the manner described in this section shall be deemed
37 to have met the requirements of Section 1031 of the Government Code and the
38 selection and training standards of the Commission on Peace Officer Standards
39 and Training, if the officer has completed the basic training required for peace
40 officers in his or her state.

41 (c) A peace officer of an adjoining state shall not provide services within a
42 California jurisdiction during a period in which officers of the department are
43 involved in a labor dispute that results in a formal work slowdown or stoppage.

1 **Comment.** Section 7310 continues former Fish and Game Code Section 393 without
2 substantive change.

3 TITLE 2. INFORMATION RELEASE

4 **§7315. Release of information to other jurisdictions**

5 7315. The department may exchange or release to any appropriate federal, state,
6 or local agency or agencies in other states, for purposes of law enforcement, any
7 information collected or maintained by the department under any provision of this
8 code or any regulation adopted pursuant to this code.

9 **Comment.** Section 7315 continues former Fish and Game Code Section 391 without
10 substantive change.

11 TITLE 3. CALIFORNIA-ARIZONA COMPACT

12 **§ 7320. California-Arizona Compact authorized**

13 7320. (a) The commission may negotiate the terms of a compact between the
14 States of Arizona and California with any appropriate officials of the State of
15 Arizona in relation to reciprocal privileges and licenses for hunting and fishing by
16 residents of one of the states within the territorial jurisdiction of the other. The
17 negotiations shall include, but shall not be limited to, provisions relating to sport
18 fishing and the hunting of migratory waterfowl in, on, or along the Colorado
19 River.

20 (b) It is the primary purpose of this section to provide a method whereby the
21 hunting and fishing opportunities afforded by the Colorado River may be mutually
22 enjoyed by the residents of the States of Arizona and California despite the
23 difficulties and inconveniences that result from the fact that the boundary line
24 between the States of Arizona and California is the middle of the channel of the
25 Colorado River.

26 **Comment.** Section 7320 continues former Fish and Game Code Section 375 without
27 substantive change.

28 TITLE 4. WILDLIFE VIOLATOR COMPACT

29 CHAPTER 1. GENERAL PROVISIONS

30 **§ 7325. Enactment of Wildlife Violator Compact**

31 7325. The Wildlife Violator Compact is hereby enacted into law and entered
32 into with all other participating states.

33 **Comment.** Section 7325 continues former Fish and Game Code Section 716 without
34 substantive change.

1 **§ 7330. Statement of policy**

2 7330. It is the policy of this state in entering into the compact to do all of the
3 following:

4 (a) Promote compliance with the statutes, ordinances, and administrative rules
5 and regulations relating to the management of wildlife resources in this state.

6 (b) Recognize the suspension of wildlife license privileges of any person whose
7 license privileges have been suspended by a participating state and treat that
8 suspension as if it had occurred in the licensee's home state if the violation that
9 resulted in the suspension could have been the basis for suspension in the home
10 state.

11 (c) Allow a violator, except as provided in subdivision (b) of Section 7450, to
12 accept a wildlife citation and, without delay or detention, proceed on his or her
13 way whether or not the violator is a resident of the state in which the citation was
14 issued, if the violator's home state is a party to this compact.

15 (d) Report to the appropriate participating states, as provided in the compact
16 manual, any conviction recorded against any person whose home state was not the
17 issuing state.

18 (e) Allow the home state to recognize and treat convictions recorded against its
19 residents, if those convictions occurred in a participating state, as though they had
20 occurred in the home state.

21 (f) Extend cooperation to its fullest extent among the participating states for
22 enforcing compliance with the terms of a wildlife citation issued in one
23 participating state to a resident of another participating state.

24 (g) Maximize effective use of law enforcement personnel and information.

25 (h) Assist court systems in the efficient disposition of wildlife violations.

26 **Comment.** Section 7330 continues former Fish and Game Code Section 716.1 without
27 substantive change.

28 **§ 7335. Purposes of title**

29 7335. The purposes of this title include both of the following:

30 (a) To provide a means by which participating states may join in a reciprocal
31 program to effectuate the policies enumerated in Section 7330 in a uniform and
32 orderly manner.

33 (b) To provide for the fair and impartial treatment of wildlife violators operating
34 within participating states in recognition of the violator's right to due process and
35 the sovereign status of the participating states.

36 **Comment.** Section 7335 continues former Fish and Game Code Section 716.2 without
37 substantive change.

38 **CHAPTER 2. DEFINITIONS**

39 **§ 7340. Application of chapter**

40 7340. The definitions in this chapter govern the construction of this title.

1 **Comment.** Section 7340 restates the introductory clause of former Fish and Game Code
2 Section 716.3 without substantive change.

3 **§ 7345. “Board”**

4 7345. “Board” means the board of compact administrators established pursuant
5 to Section 7470.

6 **Comment.** Section 7345 continues former Fish and Game Code Section 716.3(a) without
7 substantive change.

8 **§ 7350. “Citation”**

9 7350. “Citation” means any summons, complaint, ticket, penalty assessment, or
10 other official document issued to a person by a wildlife officer or other peace
11 officer for a wildlife violation pertaining to sport fishing, hunting, or trapping,
12 which contains an order requiring the person to respond.

13 **Comment.** Section 7350 continues former Fish and Game Code Section 716.3(b) without
14 substantive change.

15 **§ 7355. “Collateral”**

16 7355. “Collateral” means any cash or other security deposited to secure an
17 appearance for trial in connection with the issuance by a wildlife officer or other
18 peace officer of a citation for a wildlife violation.

19 **Comment.** Section 7355 continues former Fish and Game Code Section 716.3(c) without
20 substantive change.

21 **§ 7360. “Compact manual”**

22 7360. “Compact manual” is a manual used and adopted by the participating
23 states that prescribes the procedures to be followed in administering the wildlife
24 violation compact in participating states.

25 **Comment.** Section 7360 continues former Fish and Game Code Section 716.3(d) without
26 substantive change.

27 **§ 7365. “Compliance”**

28 7365. “Compliance,” with respect to a citation, means the act of answering a
29 citation through an appearance in a court or tribunal, or through the payment of
30 fines, penalties, costs, and surcharges, if any.

31 **Comment.** Section 7365 continues former Fish and Game Code Section 716.3(e) without
32 substantive change.

33 **§ 7370. “Conviction”**

34 7370. “Conviction” means a conviction, including, but not limited to, any court
35 conviction for an offense related to sport fishing, hunting, or trapping, that is
36 prohibited by statute, ordinance, or administrative rule or regulation, that involves
37 the forfeiture of any bail, bond, or other security deposited to secure appearance
38 by a person charged with having committed an offense, the payment of a penalty

1 assessment, a plea of nolo contendere, and the imposition of a deferred or
2 suspended sentence by the court.

3 **Comment.** Section 7370 continues former Fish and Game Code Section 716.3(f) without
4 substantive change.

5 **§ 7375. “Court”**

6 7375. “Court” means a court of law, including a magistrate’s court and a justice
7 of the peace court.

8 **Comment.** Section 7375 continues former Fish and Game Code Section 716.3(g) without
9 substantive change.

10 The reference to a “justice of the peace court” in Section 7375 is retained, notwithstanding the
11 elimination of such courts in California, based on the existence of such courts in other states that
12 are members of the Interstate Violator Compact.

13 **§ 7380. “Home state”**

14 7380. “Home state” means the state of primary residence of a person.

15 **Comment.** Section 7380 continues former Fish and Game Code Section 716.3(h) without
16 substantive change.

17 **§ 7385. “Issuing state”**

18 7385. “Issuing state” means the participating state that issues a wildlife citation
19 to the violator.

20 **Comment.** Section 7385 continues former Fish and Game Code Section 716.3(i) without
21 substantive change.

22 **§ 7390. “License”**

23 7390. “License” means any license, permit, entitlement to use, or other public
24 document that conveys to the person to whom it is issued the privilege of sport
25 fishing, hunting, or trapping, that is regulated by statute, ordinance, or
26 administrative rule or regulation of a participating state.

27 **Comment.** Section 7390 continues former Fish and Game Code Section 716.3(j) without
28 substantive change.

29 **§ 7400. “Licensing authority”**

30 7400. “Licensing authority,” with reference to this state, means the department,
31 which is the state agency authorized by law to issue or approve licenses or permits
32 to sport fish, hunt, or trap.

33 **Comment.** Section 7400 continues former Fish and Game Code Section 716.3(k) without
34 substantive change.

35 **§ 7405. “Participating state”**

36 7405. “Participating state” means any state that enacts legislation to become a
37 member of the wildlife compact.

38 **Comment.** Section 7405 continues former Fish and Game Code Section 716.3(l) without
39 substantive change.

1 **§ 7410. “Personal recognizance”**

2 7410. “Personal recognizance” means an agreement by a person made at the
3 time of issuance of the wildlife citation that the person will comply with the terms
4 of the citation.

5 **Comment.** Section 7410 continues former Fish and Game Code Section 716.3(m) without
6 substantive change.

7 **§ 7415. “State”**

8 7415. “State” means any state, territory, or possession of the United States, the
9 District of Columbia, the Commonwealth of Puerto Rico, the Provinces of Canada,
10 and other countries.

11 **Comment.** Section 7415 continues former Fish and Game Code Section 716.3(n) without
12 substantive change.

13 **§ 7420. “Suspension”**

14 7420. “Suspension” means any revocation, denial, or withdrawal of any or all
15 license privileges, including the privilege to apply for, purchase, or exercise the
16 benefits conferred by any license for sport fishing, hunting, or trapping.

17 **Comment.** Section 7420 continues former Fish and Game Code Section 716.3(o) without
18 substantive change.

19 **§ 7425. “Terms of the citation”**

20 7425. “Terms of the citation” means those conditions and options expressly
21 stated upon a citation.

22 **Comment.** Section 7425 continues former Fish and Game Code Section 716.3(p) without
23 substantive change.

24 **§ 7430. “Wildlife”**

25 7430. “Wildlife” means all species of animals including, but not limited to,
26 mammals, birds, fish, reptiles, amphibians, mollusks, and crustaceans, which are
27 defined as “wildlife” and are protected or otherwise regulated by statute,
28 ordinance, or administrative rule or regulation in a participating state. The species
29 included in the definition of “wildlife” vary from state to state and the
30 determination of whether a species is “wildlife” for the purposes of this compact
31 shall be based on the law of the participating state.

32 **Comment.** Section 7430 continues former Fish and Game Code Section 716.3(q) without
33 substantive change.

34 **§ 7435. “Wildlife law”**

35 7435. “Wildlife law” means any statute, regulation, ordinance, or administrative
36 rule or regulation developed and enacted for the management of wildlife resources
37 and the uses thereof.

38 **Comment.** Section 7435 continues former Fish and Game Code Section 716.3(r) without
39 substantive change.

1 **§ 7440. “Wildlife officer”**

2 7440. “Wildlife officer” means any individual authorized in this state to issue a
3 citation for a wildlife violation.

4 **Comment.** Section 7440 continues former Fish and Game Code Section 716.3(s) without
5 substantive change.

6 **§ 7445. “Wildlife violation”**

7 7445. “Wildlife violation” means the violation of a statute, ordinance, or
8 administrative rule or regulation developed and enacted for the management of
9 wildlife resources and the uses thereof pertaining to sport fishing, hunting, and
10 trapping and for which a prosecution is initiated.

11 **Comment.** Section 7445 continues former Fish and Game Code Section 716.3(t) without
12 substantive change.

13 **CHAPTER 3. ISSUING STATE VIOLATION PROCEDURES**

14 **§ 7450. Issuance of citation**

15 7450. (a) Notwithstanding any other provision of law, when issuing a citation
16 for a wildlife violation for purposes of this title, a wildlife officer of the issuing
17 state may issue a citation to any person whose primary residence is in a
18 participating state in the same manner as though the person were a resident of the
19 issuing state, and shall not require that person to post collateral to secure
20 appearance, except as provided in subdivision (b), if the officer receives the
21 personal recognizance of the person that he or she will comply with the terms of
22 the citation.

23 (b) Personal recognizance is acceptable unless prohibited by ordinance of a city
24 or county, the policy of the issuing agency, a procedure or regulation, or by the
25 compact manual, and only if the violator provides adequate proof of identification
26 to the wildlife officer.

27 (c) Upon conviction or failure of a person to comply with the terms of a wildlife
28 citation, the appropriate wildlife officer shall report the conviction or failure to
29 comply to the licensing authority of the participating state in which the wildlife
30 citation was issued. The report shall be made in accordance with procedures
31 specified by the issuing state, and shall contain information as prescribed in the
32 compact manual.

33 (d) Upon receipt of the report of conviction or noncompliance pursuant to
34 subdivision (c), the licensing authority of the issuing state shall transmit to the
35 licensing authority of the home state of the violator the information in the form
36 and content prescribed in the compact manual.

37 **Comment.** Section 7450 continues former Fish and Game Code Section 716.4 without
38 substantive change.

1 CHAPTER 4. HOME STATE PROCEDURES

2 § 7455. Action by home state

3 7455. (a) Upon receipt of a report from the licensing authority of the issuing
4 state reporting the failure of a violator to comply with the terms of a citation, the
5 licensing authority shall notify the violator and shall initiate a suspension action.
6 The licensing authority shall suspend the violator's license privileges, in
7 accordance with the requirements of due process, until satisfactory evidence of
8 compliance with the terms of the wildlife citation has been furnished to the
9 licensing authority.

10 (b) Upon receipt of a report of conviction from the licensing authority of the
11 issuing state, the licensing authority of the home state may enter that conviction in
12 its records and may treat the conviction as though it occurred in the home state for
13 the purposes of the suspension of license privileges, if the violation that resulted in
14 the conviction would constitute a wildlife violation in the home state.

15 (c) The licensing authority of the home state shall maintain a record of actions
16 taken and shall make reports to issuing states as provided in the compact manual.

17 **Comment.** Section 7455 continues former Fish and Game Code Section 716.5 without
18 substantive change.

19 CHAPTER 5. RECIPROCAL RECOGNITION OF SUSPENSION

20 § 7460. Recognition of suspension in other state

21 7460. (a) As a participating member of the wildlife violator compact, the
22 licensing authority of this state may recognize the suspension of license privileges
23 of any person by any participating state if both of the following occur:

24 (1) The violation that resulted in the conviction would constitute a wildlife
25 violation in this state.

26 (2) The conviction that resulted in the suspension could have been the basis for
27 suspension under the statutes, ordinances, or administrative rules or regulations of
28 this state.

29 (b) The licensing authority shall communicate suspension information to other
30 participating states in the form and content prescribed by the compact manual.

31 **Comment.** Section 7460 continues former Fish and Game Code Section 716.6 without
32 substantive change.

33 CHAPTER 6. APPLICABILITY OF OTHER LAWS

34 § 7465. Right of participating state to apply its own laws

35 7465. Except as expressly required by this title, this title shall not be construed
36 to affect the right of any participating state to apply any of its statutes, ordinances,
37 or administrative rules or regulations relating to license privileges to any person or
38 circumstance, or to invalidate or prevent any agreement or other cooperative

1 arrangement between a participating state and a nonparticipating state, concerning
2 wildlife law enforcement.

3 **Comment.** Section 7465 continues former Fish and Game Code Section 716.7 without
4 substantive change.

5 CHAPTER 7. COMPACT ADMINISTRATOR PROCEDURES

6 § 7470. Establishment, duties, and powers

7 7470. (a)(1) A board of compact administrators is hereby established to serve as
8 a governing body for the resolution of all matters relating to the operation of this
9 compact. The board shall be composed of one member from each of the
10 participating states to be known as the compact administrator.

11 (2) A compact administrator of any participating state may provide for the
12 discharge of his or her duties and the performance of his or her functions as a
13 board member by an alternate, designated by that member. An alternate is not
14 entitled to serve unless written notification of his or her identity is provided to the
15 board.

16 (3) The compact administrator for this state shall be appointed by the director
17 and shall serve, and be subject to removal, in accordance with the laws of this
18 state.

19 (b) Each member of the board is entitled to one vote. No action of the board
20 shall be binding unless taken at a meeting at which a majority of the membership
21 of the board vote in favor thereof. Action by the board may only be taken at a
22 meeting at which a majority of the membership of the board is present.

23 (c) The board shall elect annually from its membership a chairperson and vice
24 chairperson.

25 (d) The board shall adopt bylaws, not inconsistent with this compact, and may
26 amend and rescind the bylaws.

27 (e) The board may accept for any of its purposes and functions under this
28 compact any donation and grant of money, equipment, supplies, materials, and
29 services, conditional or otherwise, from any state, the United States, or any
30 governmental agency, and may receive, utilize, and dispose thereof.

31 (f) The board may contract with, or accept services or personnel from, any
32 governmental or intergovernmental agency, individual, firm, or corporation,
33 including any private nonprofit organization or institution.

34 (g) The board shall formulate all necessary procedures and develop uniform
35 forms and documents for administering this compact. All procedures and forms
36 adopted pursuant to board action shall be contained in a compact manual.

37 **Comment.** Section 7470 continues former Fish and Game Code Section 716.8 without
38 substantive change.

CHAPTER 8. ENTRY INTO COMPACT AND WITHDRAWAL

§ 7475. Application of compact

7475. (a) This title shall become effective when it is adopted in substantially similar form by this state and one or more other states, subject to the following conditions:

(1) The entry into the compact shall be made by resolution executed and ratified by authorized officials of the applying state and submitted to the chairperson of the board of contract administrators.

(2) The resolution shall substantially be in the form and content as provided in the compact manual, and shall include all of the following:

(A) A citation of the authority authorizing the state to become a party to this compact.

(B) An agreement to comply with the terms and provisions of this compact.

(C) An agreement that the state entering into the compact agrees to participate with all participating states in the compact.

(b) The effective date of entry into the compact shall be specified by the applying state but shall not be less than 60 days after notice has been given by either the chairperson or secretary of the board to each participating state that the resolution from the applying state has been received.

(c) A participating state may withdraw from participation in this compact by giving written notice to the compact administrator of each participating state. The withdrawal shall not become effective until 90 days from the date on which the written notice of withdrawal is sent to each participating state. The withdrawal of any state shall not affect the validity of this compact as to the remaining participating states.

Comment. Section 7475 continues former Fish and Game Code Section 716.9 without substantive change.

CHAPTER 9. AMENDMENTS TO THE COMPACT

§ 7480. Amendment

7480. (a) This compact may be amended periodically. Amendments shall be presented in resolution form to the chairperson of the board, and shall be initiated by one or more participating states.

(b) The adoption of an amendment requires endorsement by all participating states and becomes effective 30 days after the date of the last endorsement.

(c) The failure of any participating state to respond to the appropriate authority within 60 days after receipt of a proposed amendment constitutes endorsement thereof.

Comment. Section 7480 continues former Fish and Game Code Section 717 without substantive change.

1 CHAPTER 10. CONSTRUCTION AND SEVERABILITY

2 § 7485. Liberal construction

3 7485. This compact shall be liberally construed to effectuate its purposes.

4 **Comment.** Section 7485 continues former Fish and Game Code Section 717.1 without
5 substantive change.

6 § 7490. Severability

7 7490. The provisions of this title are severable. If any provision of this title or its
8 application is held invalid or contrary to the constitution of any participating state
9 or of the United States, that invalidity shall not affect other provisions or
10 applications that can be given effect without the invalid provision or application.

11 **Comment.** Section 7490 continues former Fish and Game Code Section 717.2 without
12 substantive change.

13 TITLE 5. PACIFIC MARINE FISHERIES
14 COMPACT

15 CHAPTER 1. THE COMPACT

16 § 7500. Authority to execute compact

17 7500. The Governor is hereby authorized and directed to execute a compact on
18 behalf of this state with any or all of the states of Alaska, Idaho, Oregon, and
19 Washington for the purpose of cooperating with those states in the formation of a
20 Pacific States Marine Fisheries Commission.

21 **Comment.** Section 7500 continues former Fish and Game Code Section 14000 without
22 substantive change.

23 § 7505. Form and content of compact

24 7505. The form and contents of the Pacific Marine Fisheries Compact shall be
25 substantially as provided in this section and the effect of its provisions shall be
26 interpreted and administered in conformity with the provisions of this title:

27 PACIFIC MARINE FISHERIES COMPACT

28 The contracting states do hereby agree as follows:

29 Article I

30 The purposes of this compact are and shall be to promote the better utilization of
31 fisheries, marine, shell and anadromous, which are of mutual concern, and to
32 develop a joint program of protection and prevention of physical waste of those
33 fisheries in all of those areas of the Pacific Ocean over which the compacting
34 states jointly or separately now have or may hereafter acquire jurisdiction.

1 Nothing herein contained shall be construed so as to authorize the compacting
2 states or any of them to limit the production of fish or fish products for the purpose
3 of establishing or fixing the prices thereof or creating and perpetuating a
4 monopoly.

5 Article II

6 This agreement shall become operative immediately as to those states executing
7 it in the form that is in accordance with the laws of the executing state and when
8 the Congress has given its consent.

9 Article III

10 Each state joining herein shall appoint, as determined by state statutes, one or
11 more representatives to a commission hereby constituted and designated as the
12 Pacific States Marine Fisheries Commission, of whom one shall be the
13 administrative or other officer of the agency of that state charged with the
14 conservation of the fisheries resources to which this compact pertains. This
15 commission shall be invested with the powers and duties set forth herein.

The term of each commissioner of the Pacific States Marine Fisheries Commission shall be four years. A commissioner shall hold office until a successor shall be appointed and qualified but the successor's term shall expire four years from legal date of expiration of the term of the predecessor. Vacancies occurring in the office of a commissioner from any reason or cause shall be filled for the unexpired term, or a commissioner may be removed from office, as provided by the statutes of the state concerned. Each commissioner may delegate in writing from time to time, to a deputy, the power to be present and participate, including voting as a representative or substitute, at any meeting of or hearing by or other proceeding of the commission.

26 Voting powers under this compact shall be limited to one vote for each state
27 regardless of the number of representatives.

28 Article IV

29 The duty of the said commission shall be to make inquiry and ascertain from
30 time to time any methods, practices, circumstances and conditions as may be
31 disclosed for bringing about the conservation and the prevention of the depletion
32 and physical waste of the fisheries, marine, shell, and anadromous in all of those
33 areas of the Pacific Ocean over which the states signatory to this compact jointly
34 or separately now have or may hereafter acquire jurisdiction. The commission
35 shall have power to recommend the coordination of the exercise of the police
36 powers of the several states within their respective jurisdictions and said
37 conservation zones to promote the preservation of those fisheries and their
38 protection against overfishing, waste, depletion or any abuse whatsoever and to

1 assure a continuing yield from the fisheries resources of the signatory parties
2 hereto.

3 To that end the commission shall draft and, after consultation with the advisory
4 committee hereinafter authorized, recommend to the governors and legislative
5 branches of the various signatory states hereto legislation dealing with the
6 conservation of the marine, shell, and anadromous fisheries in all of those areas of
7 the Pacific Ocean over which the states signatory to this compact jointly or
8 separately now have or may hereafter acquire jurisdiction. The commission shall,
9 more than one month prior to any regular meeting of the legislative branch in any
10 state signatory hereto, present to the governor of that state its recommendations
11 relating to enactments by the legislative branch of that state in furthering the
12 intents and purposes of this compact.

13 The commission shall consult with and advise the pertinent administrative
14 agencies in the signatory states with regard to problems connected with the
15 fisheries and recommend the adoption of any regulations that it deems advisable
16 and which lie within the jurisdiction of the agencies.

17 The commission shall have power to recommend to the states signatory hereto
18 the stocking of the waters of the states with marine, shell or anadromous fish and
19 fish eggs or joint stocking by some or all of the states and when two or more of the
20 said states shall jointly stock waters the commission shall act as the coordinating
21 agency for the stocking.

22 Article V

23 The commission shall elect from its number a chairperson and a vice
24 chairperson and shall appoint and at its pleasure remove or discharge any officers
25 and employees as may be required to carry the provisions of this compact into
26 effect and shall fix and determine their duties, qualifications and compensation.
27 Said commission shall adopt rules and regulations for the conduct of its business.
28 It may establish and maintain one or more offices for the transaction of its
29 business and may meet at any time or place within the territorial limits of the
30 signatory states but must meet at least once a year.

31 Article VI

32 No action shall be taken by the commission except by the affirmative vote of a
33 majority of the whole number of compacting states represented at any meeting. No
34 recommendation shall be made by the commission in regard to any species of fish
35 except by the vote of a majority of the compacting states which have an interest in
36 the species.

1 Article VII

2 The fisheries research agencies of the signatory states shall act in collaboration
3 as the official research agency of the Pacific States Marine Fisheries Commission.

4 An advisory committee to be representative of the commercial fishers,
5 commercial fishing industry and any other interests of each state as the
6 commission deems advisable shall be established by the commission as soon as
7 practicable for the purpose of advising the commission upon any
8 recommendations as it may desire to make.

9 Article VIII

10 Nothing in this compact shall be construed to limit the powers of any state or to
11 repeal or prevent the enactment of any legislation or the enforcement of any
12 requirement by any state imposing additional conditions and restrictions to
13 conserve its fisheries.

14 Article IX

15 Continued absence of representation or of any representative on the commission
16 from any state party hereto, shall be brought to the attention of the governor
17 thereof.

18 Article X

19 The states agree to make available annual funds for the support of the
20 commission on the following basis:

21 Eighty percent of the annual budget shall be shared equally by those member
22 states having as a boundary the Pacific Ocean. Not less than 5 percent of the
23 annual budget shall be contributed by any other member state. The balance of the
24 annual budget shall be shared by those member states having as a boundary the
25 Pacific Ocean, in proportion to the primary market value of the products of their
26 commercial fisheries on the basis of the latest five-year catch records.

27 The annual contribution of each member state shall be figured to the nearest one
28 hundred dollars (\$100).

29 Article XI

30 This compact shall continue in force and remain binding upon each state until
31 renounced by it. Renunciation of this compact must be preceded by sending six
32 months' notice in writing of intention to withdraw from the compact to the other
33 parties hereto.

Article XII

Hawaii or any other state having rivers or streams tributary to the Pacific Ocean may become a contracting state by enactment of the Pacific Marine Fisheries Compact. Upon admission of any new state to the compact, the purposes of the compact and the duties of the commission shall extend to the development of joint programs for the conservation, protection and prevention of physical waste of fisheries in which the contracting states are mutually concerned and to all waters of the newly admitted state necessary to develop the programs.

This compact shall become effective upon its enactment by the states signatory to this compact and upon ratification by Congress by virtue of the authority vested in it under Article 1, Section 10, of the Constitution of the United States.

Comment. Section 7505 continues former Fish and Game Code Section 14001 without substantive change.

§ 7510. Operation of compact

7510. Participation by this State in this compact shall continue until the Legislature otherwise provides by law. Notice of intention to withdraw from the compact shall be executed and transmitted by the Governor after the Legislature provides by law for discontinuance of participation therein by this State.

Comment. Section 7510 continues former Fish and Game Code Section 14002 without substantive change.

CHAPTER 2. THE COMMISSION

§ 7550. Members

7550. In furtherance of the provisions contained in the compact there shall be three members of the Pacific States Marine Fisheries Commission from the State of California, appointed by the Governor by and with the advice and consent of the Senate. One commissioner shall be the administrative or other officer of the department or agency of this state charged with the conservation of its marine fisheries resources. Another commissioner shall be a Member of the Legislature of this state who is a member of a committee on interstate cooperation of the Legislature. Another member shall be a citizen of this state who shall have wide knowledge of and interest in the marine fisheries problem.

Comment. Section 7550 continues former Fish and Game Code Section 14100 without substantive change.

§ 7555. Term

7555. The term of each commissioner shall be four years. A commissioner shall hold office until a successor shall be appointed and qualified but the successor's term shall expire four years from the legal date of expiration of the term of the predecessor. Any commissioner may be removed from office by the Governor upon charges and after a hearing. The term of any commissioner who ceases to

1 hold the qualifications required shall terminate when a successor may be duly
2 appointed. Vacancies occurring in the office of a commissioner from any reason or
3 cause shall be filled for the unexpired term in the same manner as for a full term
4 appointment.

5 **Comment.** Section 7555 continues former Fish and Game Code Section 14101 without
6 substantive change.

7 **§ 7560. Compensation**

8 7560. Each commissioner who is not also a state officer shall receive one
9 hundred dollars (\$100) for each day of performing official duties pursuant to the
10 direction of the commission, and each commissioner shall receive actual and
11 necessary travel expenses incurred in performing official duties on behalf of the
12 commission.

13 **Comment.** Section 7560 continues former Fish and Game Code Section 14102 without
14 substantive change.

15  **Note.** Section 14102 provides for a per diem of \$10. That provision appears to be obsolete.
16 See Gov't Code § 11564.5 (default per diem is \$100, notwithstanding any other provision of law).
17 Proposed Section 7560 provides for the \$100 per diem provided under the Government Code.

18 **The Commission invites comment on whether this revision would be consistent with**
19 **existing practice.**

20 **§ 7565. Performance**

21 7565. All officers of the state are authorized and directed to do all things falling
22 within their respective provinces and jurisdiction necessary or incidental to the
23 carrying out of the compact in every particular. The policy of this state is to
24 perform and carry out the compact and to accomplish the purposes thereof. All
25 officers, bureaus, departments, and persons of and in the state government or
26 administration of the state are hereby authorized and directed at convenient times
27 and upon request of the commission to furnish the commission with information
28 and data possessed by them and to aid the commission by any means lying within
29 their legal rights.

30 **Comment.** Section 7565 continues former Fish and Game Code Section 14103 without
31 substantive change.

32 **§ 7570. Annual report**

33 7570. The commission shall keep accurate accounts of its activities and shall
34 report to the Governor and the Legislature on or before the thirty-first day of
35 December in each year, setting forth in detail the transactions conducted by it
36 during that calendar year and shall make recommendations for any legislative
37 action deemed by it advisable, including amendments to the statutes that may be
38 necessary to carry out the intent and purposes of the compact between the
39 signatory states.

40 **Comment.** Section 7570 continues former Fish and Game Code Section 14104 without
41 substantive change.

1 **§ 7575. Execution of compact**

2 7575. When the Governor on behalf of the state executes the compact, the
3 Governor shall sign under a recital that the compact is executed pursuant to the
4 provisions thereof, subject to the limitations and qualifications contained in the
5 sections of this title in aid and furtherance thereof.

6 **Comment.** Section 7575 continues former Fish and Game Code Section 14105 without
7 substantive change.

8 **DIVISION 5. NATIVE AMERICANS**

9  **Note.** The provisions collected in this division have been drafted to continue existing law
10 without any substantive change. When the Commission first examined these provisions, the
11 Department of Fish and Wildlife requested that the Commission's review of these provisions be
12 deferred until after the Department had completed its formal process of consulting with affected
13 tribes. See Memorandum 2016-48. The Commission agreed to do so. See Minutes of September
14 22, 2016, Commission Meeting.

15 At the same meeting, the Commission decided that it would not recommend any controversial
16 changes to the Fish and Game Code in this study. It seems likely that any significant change to
17 existing law regarding the authority of the state to regulate tribal fishing would implicate policies
18 that may be in dispute. Such policies are best addressed through direct consultation and
19 substantive reform, rather than as part of a mostly technical statutory clean-up project.

20 **The Commission invites public comment on whether there are any purely technical**
21 **changes that should be made to the provisions collected in this division.**

22 **PART 1. GENERAL PROVISIONS**

23 **§ 7600. Application of code**

24 7600. (a) Notwithstanding any other provision of law, the provisions of this code
25 are not applicable to California Indians whose names are inscribed upon the tribal
26 rolls, while on the reservation of that tribe and under those circumstances in this
27 state where the code was not applicable to them immediately before the effective
28 date of Public Law 280, Chapter 505, First Session, 1953, 83d Congress of the
29 United States.

30 (b) No Indian described in subdivision (a) shall be prosecuted for the violation
31 of any provision of this code occurring in the places and under the circumstances
32 described in subdivision (a). Nothing in this section, however, prohibits or restricts
33 the prosecution of an Indian for the violation of a provision of this code
34 prohibiting the sale of a bird, mammal, fish, amphibian, or reptile.

35 **Comment.** Section 7600 continues former Fish and Game Code Section 12300 without
36 substantive change.

37 **§ 7605. Tribal committee**

38 7605. The commission shall form a tribal committee from its membership
39 consisting of at least one commissioner. The committee shall report to the
40 commission from time to time on its activities and shall make recommendations

1 on all tribal matters considered by the commission. The committee or its designee
2 shall, to the extent practicable, attend meetings of the department staff, including
3 meetings of the department staff with interested parties, in which significant tribal
4 management documents are being developed.

5 **Comment.** Section 7605 continues former Fish and Game Code Section 106.5 without
6 substantive change.

7 PART 2. SPECIFIC PROVISIONS

8 CHAPTER 1. YUROK TRIBE

9 § 7650. Fishing

10 7650. Notwithstanding any other provision of this code, California Indians who
11 are bona fide registered members of the Yurok Indian Tribe may take fish, for
12 subsistence purposes only, from the Klamath River between the mouth of that
13 river and the junction of Tectah Creek with it, exclusive of tributaries, without
14 regard to seasons, under the following conditions:

15 (a) Upon application therefor, the department shall issue to any Yurok Indian
16 who is listed on the register of the Yurok Tribal Organization, as furnished to the
17 department, a renewable, nontransferable permit to take fish pursuant to this
18 section for a period of one calendar year. Any Indian of the Yurok tribe while
19 taking fish pursuant to this section shall have upon his person such valid permit,
20 and shall display it upon the request of any duly authorized officer.

21 (b) Hand dip nets, and hook and line only may be used for taking fish pursuant
22 to this section.

23 (c) Pursuant to this section not more than three trout or salmon or combination
24 thereof, or more than one sturgeon, may be taken in any one day. There is no bag
25 limit on any other fish.

26 (d) No Yurok Indian while fishing pursuant to this section may be accompanied
27 by any person who does not possess a valid permit as prescribed by this section. It
28 is unlawful for any person who does not hold such permit to accompany any
29 Yurok Indian who is taking fish pursuant to this section.

30 (e) The sale of any fish taken under the provisions of this section shall constitute
31 cause for permanent revocation by the commission of the permit held by the
32 person making the sale.

33 **Comment.** Section 7650 continues former Fish and Game Code Section 7155 without
34 substantive change.

1 CHAPTER 2. STATE-TRIBAL AGREEMENTS ON INDIAN FISHING BY
2 COVELLO INDIAN COMMUNITY

3 Article 1. Legislative Findings

4 **§ 7720. Legislative findings**

5 7720. The Legislature finds:

6 (a) Jurisdiction over the protection and development of natural resources,
7 especially the fish resource, is of great importance to both the State of California
8 and California Indian tribes.

9 (b) To California Indian tribes, control over their minerals, lands, water,
10 wildlife, and other resources is crucial to their economic self-sufficiency and the
11 preservation of their heritage. On the other hand, the State of California is
12 concerned about protecting and developing its resources; protecting, restoring, and
13 developing its commercial and recreational salmon fisheries; ensuring public
14 access to its waterways; and protecting the environment within its borders.

15 (c) More than any other issue confronting the State of California and California
16 Indian tribes, the regulation of natural resources, especially fish, transcends
17 political boundaries.

18 (d) In many cases, the State of California and California Indian tribes have
19 differed in their respective views of the nature and extent of state versus tribal
20 jurisdiction in areas where Indians have historically fished. Despite these frequent
21 and often bitter disputes, both the state and the tribes seek, as their mutual goal,
22 the protection and preservation of the fish resource. This division is an attempt to
23 provide a legal mechanism, other than protracted and expensive litigation over
24 unresolved legal issues, for achieving that mutual goal.

25 (e) This chapter creates a pilot project that will involve and encourage the efforts
26 of the State of California and the Covelo Indian Community of the Round Valley
27 Indian Reservation to reach a mutual agreement regarding the legal framework for
28 the exercise of Indian subsistence fishing in the boundary streams of the historic
29 1873 Round Valley Indian Reservation. It is hoped that this pilot project, if
30 successful, will provide the incentive for enactment of broader legislation that
31 would authorize similar negotiated agreements with other California Indian tribes.

32 **Comment.** Section 7720 continues former Fish and Game Code Section 16000 without
33 substantive change.

34 Article 2. Definitions

35 **§ 7725. Application of definitions**

36 7725. The definition in this article shall govern the construction of this chapter.

37 **Comment.** Section 7725 continues former Fish and Game Code Section 16001 without
38 substantive change.

1 **§ 7730. “Covelo Indian Community”**

2 7730. “Covelo Indian Community” means the confederated tribes of the Round
3 Valley Indian Reservation located in Mendocino County, California, recognized as
4 an Indian tribe by the Secretary of the Interior.

5 **Comment.** Section 7730 continues former Fish and Game Code Section 16002 without
6 substantive change.

7 **§ 7735. “Historic 1873 Round Valley Indian Reservation”**

8 7735. “Historic 1873 Round Valley Indian Reservation” means the reservation
9 described and set aside by Congress for the Covelo Indian Community in the Act
10 of March 3, 1873 (17 Stat. 633).

11 **Comment.** Section 7735 continues former Fish and Game Code Section 16005 without
12 substantive change.

13 **§ 7740. “Take”**

14 7740. “Take” means pursue, catch, capture, or kill, or attempt to pursue, catch,
15 capture, or kill.

16 **Comment.** Section 7740 continues former Fish and Game Code Section 16003 without
17 substantive change.

18 **§ 7745. “Traditional Indian fishing practice”**

19 7745. “Traditional Indian fishing practice” means a mode, method, or way of
20 taking fish that is recognized in the customs and traditions of the Covelo Indian
21 Community.

22 **Comment.** Section 7745 continues former Fish and Game Code Section 16004 without
23 substantive change.

24 Article 3. Negotiation and Approval of Agreement

25 **§ 7750. Subject of negotiations**

26 7750. Subject to the approval of the commission, the department may enter into
27 a mutual agreement or compact with the Covelo Indian Community respecting
28 jurisdiction and authority to regulate traditional Indian subsistence fishing
29 practices in the boundary streams of the historic 1873 Round Valley Indian
30 Reservation.

31 **Comment.** Section 7750 continues former Fish and Game Code Section 16006 without
32 substantive change.

33 **§ 7755. Submission of agreement to commission**

34 7755. Any agreement or compact entered into pursuant to Section 7750 shall be
35 submitted by the department to the commission for review and approval.

36 **Comment.** Section 7755 continues former Fish and Game Code Section 16007 without
37 substantive change.

1 **§ 7760. Commission review and approval**

2 7760. Any agreement or compact entered into pursuant to Section 7750 shall not
3 be effective until they are approved by the commission. The commission may
4 consider and approve an agreement or compact at any of its regular or special
5 meetings.

6 **Comment.** Section 7760 continues former Fish and Game Code Section 16008 without
7 substantive change.

8 **§ 7765. Meetings**

9 7765. The commission shall give notice of the time and place of any meeting at
10 which the approval of an agreement or compact entered into under this chapter
11 will be considered by publishing prior notice in any publication issued by the
12 Resources Agency or the department after determining the time and place of the
13 meeting. The commission shall make copies of the proposed agreement or
14 compact available to the public on request and the notice shall contain a statement
15 to that effect. All meetings required by this section shall be open to the public.

16 **Comment.** Section 7765 continues former Fish and Game Code Section 16009 without
17 substantive change.

18 Article 4. Enforceability of an Agreement or Compact

19 **§ 7775. Enforcement governed by agreement**

20 7775. Any agreement or compact entered into pursuant to this division shall be
21 enforceable by the parties only to the extent and in the forum or forums provided
22 for under the terms of the agreement or compact.

23 **Comment.** Section 7775 continues former Fish and Game Code Section 16010 without
24 substantive change.

25 **§ 7780. Regulations**

26 7780. The department may promulgate regulations consistent with the
27 provisions of any agreement or compact entered into pursuant to Section 7750.
28 The application and enforcement of those regulations shall be in accordance with
29 the express provisions of the agreement or compact.

30 **Comment.** Section 7780 continues former Fish and Game Code Section 16011 without
31 substantive change.

32 CHAPTER 3. STATE-TRIBAL AGREEMENTS ON INDIAN FISHING ON
33 THE KLAMATH RIVER

34 Article 1. Legislative Findings

35 **§ 7850. Legislative findings**

36 7850. The Legislature finds:

1 (a) Jurisdiction over the protection and development of natural resources,
2 especially the fish resource, is of great importance to both the State of California
3 and California Indian tribes.

4 (b) To California Indian tribes, control over their minerals, lands, water,
5 wildlife, and other resources within Indian country is crucial to their economic
6 self-sufficiency and the preservation of their heritage. On the other hand, the State
7 of California is concerned about protecting and developing its resources;
8 protecting, restoring, and developing its commercial and recreational salmon
9 fisheries; ensuring public access to its waterways; and protecting the environment
10 within its borders.

11 (c) More than any other issue confronting the State of California and California
12 Indian tribes, the regulation of natural resources, especially fish, transcends
13 political boundaries.

14 (d) In many cases, the State of California and California Indian tribes have
15 differed in their respective views of the nature and extent of state versus tribal
16 jurisdiction in areas where Indians have historically fished. Despite these frequent
17 and often bitter disputes, both the state and the tribes seek, as their mutual goal,
18 the protection and preservation of the fish resource. This chapter is an attempt to
19 provide a legal mechanism, other than protracted and expensive litigation over
20 unresolved legal issues, for achieving that mutual goal on the Klamath River.

21 (e) The department has exercised jurisdiction over the Klamath River from the
22 mouth of the river through the Yurok Reservation and the Hoopa Valley
23 Reservation, but the Bureau of Indian Affairs and the Indian tribes thereon have
24 also asserted jurisdiction over that river. The river itself lies within a disputed area
25 and proper management of the resource presents, therefore, unique and difficult
26 problems in the exercise of fishing practices by all user groups.

27 (f) Although commercial fishing may not be a traditional practice of the tribes
28 existing along the Klamath River within the boundaries of the land of the Yurok
29 Reservation and the Hoopa Valley Reservation, nevertheless, the department has
30 historically supported the concept of tribal fishing, including a tribal commercial
31 fishing industry where the industry is consistent with the need to preserve the
32 species, sound management, and where that usage would not adversely effect
33 other user groups, including sportfishing and the ocean commercial fishery.

34 (g) A commercial fishery existed on the Klamath River in the late 19th century
35 and early 20th century, in which the Indian tribes existing along the river
36 participated, but commercial fishing was abolished in 1933 with the passage of the
37 predecessor to Section 15150, and, further, that salmon resources have declined
38 historically due to past water developmental policies and timber harvesting
39 practices. With a reduced number of fish available, special laws are needed to
40 protect those resources and allocate them fairly among the various user groups.

41 (h) This division is not only enacted to provide the legal mechanism described
42 above, but is also intended to encourage cooperative agreements to allow
43 protection of the resource among all of the user groups. In so doing, the

1 Legislature recognizes the unique status of the Klamath River and the fishing
2 therein.

3 **Comment.** Section 7850 continues former Fish and Game Code Section 16500 without
4 substantive change.

5 Article 2. Definitions

6 § 7855. Application of definitions

7 7855. The definition in this article shall govern the construction of this chapter.

8 **Comment.** Section 7855 continues former Fish and Game Code Section 16510 without
9 substantive change.

10 § 7860. “Ceremonial or religious purposes”

11 7860. “Ceremonial or religious purposes” means fish taken by qualified Indian
12 tribal members of the Klamath River Indian Tribes for recognized religious or
13 ceremonial activities, which activities are consistent with the customs and
14 traditions of the particular tribe in the Klamath River Indian Tribes.

15 **Comment.** Section 7860 continues former Fish and Game Code Section 16517 without
16 substantive change.

17 § 7865. “Commercial fishing”

18 7865. “Commercial fishing” means the taking of fish by qualified Indian tribal
19 members of the Klamath River Indian Tribes, for sale or to be offered for sale
20 within California.

21 **Comment.** Section 7865 continues former Fish and Game Code Section 16518 without
22 substantive change.

23 § 7870. “Disputed area”

24 7870. “Disputed area” means that part of the Klamath River or Trinity River
25 where jurisdiction to regulate Indian fishing is asserted by both the State of
26 California and by one or more of the Indian tribes in the Klamath River Indian
27 Tribes or by the United States government acting as trustee therefor.

28 **Comment.** Section 7870 continues former Fish and Game Code Section 16515 without
29 substantive change.

30 § 7875. “Hoopa Valley Reservations”

31 7875. “Hoopa Valley Reservations” means those lands lying within the Hoopa
32 Square.

33 **Comment.** Section 7875 continues the second sentence of former Fish and Game Code Section
34 16514 without substantive change.

35 § 7880. “Klamath Fishery Management Council”

36 7880. “Klamath Fishery Management Council” means that council created
37 pursuant to Section 460ss–2 of Title 16 of the United States Code that is composed

1 of one representative each from the department, the Pacific Fishery Management
2 Council, National Marine Fisheries Service, Department of the Interior, Oregon
3 Department of Fish and Wildlife, the Hoopa Valley Business Council, non-Hoopa
4 Indians, the California commercial salmon fishing industry, the Oregon
5 commercial salmon fishing industry, the Klamath River in-river sportfishing
6 community, and the California offshore recreational fishing industry.

7 **Comment.** Section 7880 continues former Fish and Game Code Section 16520 without
8 substantive change.

9 **§ 7885. “Klamath River Indian Tribes”**

10 7885. “Klamath River Indian Tribes” means those tribes existing within the
11 boundaries of the Yurok Reservation and the Hoopa Valley Reservation, located in
12 Humboldt and Del Norte Counties in California, which tribes are recognized as
13 Indian tribes by the Secretary of the Interior.

14 **Comment.** Section 7885 continues former Fish and Game Code Section 16511 without
15 substantive change.

16 **§ 7890. “Subsistence purposes”**

17 7890. “Subsistence purposes” means fish or game taken by qualified Indian
18 tribal members of the Klamath River Indian Tribes for personal consumption by
19 the tribal members or their immediate families.

20 **Comment.** Section 7890 continues former Fish and Game Code Section 16516 without
21 substantive change.

22 **§ 7900. “Take”**

23 7900. “Take” means pursue, catch, capture, or kill, or attempt to pursue, catch,
24 capture, or kill.

25 **Comment.** Section 7900 continues former Fish and Game Code Section 16512 without
26 substantive change.

27 **§ 7905. “Traditional Indian fishing practice”**

28 7905. “Traditional Indian fishing practice” means a mode, method, or way of
29 taking fish that is recognized in the customs and traditions of the Klamath River
30 Indian Tribes.

31 **Comment.** Section 7905 continues former Fish and Game Code Section 16513 without
32 substantive change.

33 **§ 7910. “Yurok Reservation”**

34 7910. “Yurok Reservation” means the land extending one mile in width on each
35 side of the Klamath River from the mouth of the Klamath River to the confluence
36 of the Trinity and Klamath Rivers.

37 **Comment.** Section 7910 continues the first sentence of former Fish and Game Code Section
38 16514 without substantive change.

Article 3. Negotiation and Approval of Agreement

§ 7925. Subject of negotiations

7925. The director may enter into a mutual agreement or compact with the Hoopa Valley Business Council regarding the taking of fish from the Trinity River within the exterior boundaries of the Hoopa Valley Reservation or with the Yurok Tribe, or the Bureau of Indian Affairs acting as trustee for the Yurok Indians, regarding the taking of fish from the Klamath River within the exterior boundaries of the Yurok Reservation.

Comment. Section 7925 continues former Fish and Game Code Section 16530 without substantive change.

§ 7930. Timing

7930. Negotiations shall take place following the completion each year of the salmon allocation agreement recommended by the Klamath Fishery Management Council, and subsequently adopted by the Pacific Fishery Management Council and the United States Department of Commerce. Any agreement or compact under this division shall reflect those allocations.

Comment. Section 7930 continues former Fish and Game Code Section 16531 without substantive change.

§ 7935. Commercial sale of salmon

7935. Notwithstanding Sections 15150, 18040, 18045, and 18050, the compact or agreement may include provisions for commercial sales of salmon allocated to qualified Indian members of the Klamath River Indian Tribes and that the salmon may be taken by traditional Indian methods, including, but not limited to, use of gill nets, if the agreement or compact includes provisions for all of the following:

(a) Separating the salmon taken for commercial purposes from the salmon taken for subsistence use, which may include tagging or marking of the salmon to be sold.

(b) Limiting the number of the salmon to be sold.

(c) A portion of the sales to benefit the members or programs of the Klamath River Indian Tribes in accordance with the wishes of the tribes or the Bureau of Indian Affairs acting on behalf of the tribes as trustee.

Comment. Section 7935 continues former Fish and Game Code Section 16532 without substantive change.

Article 4. Enforceability of an Agreement or Compact

§ 7950. Enforcement governed by agreement

7950. Any agreement or compact entered into pursuant to this division shall be enforceable by the parties only to the extent and in the form or forms provided for under the terms of the agreement or compact.

1 **Comment.** Section 7950 continues former Fish and Game Code Section 16540 without
2 substantive change.

3 **§ 7955. Regulations**

4 7955. The department may adopt regulations consistent with the provisions of
5 any agreement or compact entered into pursuant to Section 7925 or 7930. The
6 application and enforcement of those regulations shall be in accordance with the
7 express provisions of the agreement or compact.

8 **Comment.** Section 7955 continues former Fish and Game Code Section 16541 without
9 substantive change.

10 DIVISION 6. HUNTING, TRAPPING, AND FISHING

11 PART 1. GENERAL PROVISIONS

12 TITLE 1. GENERAL PROHIBITIONS AND OBLIGATIONS

13 CHAPTER 1. GENERAL PROHIBITIONS

14 **§ 8000. Unauthorized take**

15 8000. (a) It is unlawful to take a bird, mammal, fish, reptile, or amphibian,
16 except as provided in this code or in a regulation adopted pursuant to this code.

17 (b) Possession of a bird, mammal, fish, reptile, or amphibian, or part of any of
18 those animals, in or on the fields, forests, or waters of this state, or while returning
19 therefrom with fishing or hunting equipment, is prima facie evidence the possessor
20 took the bird, mammal, fish, reptile, amphibian, or part of that animal.

21 **Comment.** Section 8000 continues former Fish and Game Code Section 2000 without
22 substantive change. The reference to a “part” of an animal in this section is superfluous. See
23 Section 95 (reference to animal generally includes part of animal). It is retained solely for clarity,
24 and is not intended to affect the meaning of any other provision of this code that includes or omits
25 a reference to a “part” of an animal.

26 See also Sections 4570, 6552, 6554 (enforcement).

27 **§ 8005. Accidental take**

28 8005. (a) Notwithstanding Sections 1025, 8000, or any other provision of law,
29 and notwithstanding any requirement for a permit or license or other entitlement to
30 take a species, the accidental taking of a bird, mammal, reptile, or amphibian by
31 collision with a motor vehicle while the vehicle is being operated on a road or
32 highway is not a violation of this code or a regulation adopted pursuant to this
33 code.

34 (b) For purposes of this section, “highway” means highway as defined by
35 Section 360 of the Vehicle Code and “road” means road as defined by Section 527
36 of the Vehicle Code.

(c) Nothing in this section authorizes a person to possess any bird, mammal, reptile, or amphibian accidentally taken by collision with a motor vehicle as provided in this subdivision. However, accidental takes on the road or highway may be removed by the state or local agency having jurisdiction over the road or highway.

(d) This section does not apply to Part 1 (commencing with Section 62000) of Division 17.

Comment. Section 8005 continues former Fish and Game Code Section 2000.5 without substantive change.

§ 8010. Unlawful possession

8010. It is unlawful to possess a bird, mammal, fish, reptile, amphibian, or part of any of those animals, taken in violation of this code or a regulation adopted pursuant to this code.

Comment. Section 8010 continues former Fish and Game Code Section 2002 without substantive change. The reference to a “part” of an animal in this section is superfluous. See Section 95 (reference to animal generally includes part of animal). It is retained solely for clarity, and is not intended to affect the meaning of any other provision of this code that includes or omits a reference to a “part” of an animal.

See also Sections 6552, 6554 (enforcement).

§ 8015. Season and possession limits

8015. (a) It is unlawful to take a mammal, bird, fish, reptile, or amphibian outside of an established season or to exceed a bag limit or possession limit established in this code or by a regulation adopted by the commission. Violation of an established season, bag limit, or possession limit may be charged as a violation of this section or of the specific code section or regulation that establishes the season or limit.

(b) Unless otherwise provided, it is unlawful to possess a fish, reptile, or amphibian, except during the open season where the fish, reptile, or amphibian was taken or during the 10-day period immediately following that open season. Any possession limit applicable during the open season applies during that 10-day period.

(c) Except as provided in Section 10805, it is unlawful to possess a game bird or mammal except during the open season where taken.

Comment. Section 8015 continues former Fish and Game Code Section 2001 without substantive change.

See also Section 4572, 5330, 5450 (enforcement).

Notes. (1) Subdivision (b) of proposed Section 8015 is intended to restate subdivision (b) of existing Section 2001 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

Unless otherwise provided, it is unlawful to possess fish, reptiles, or amphibians except during the open season where taken and for 10 days thereafter; and not more than the possession limit thereof may be possessed during the period after the close of the open season.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

(2) Subdivision (c) refers to “game” birds and mammals. The Commission has two questions regarding this reference.

(a) In subdivision (c), is the word “game” meant to modify only “birds,” or both “birds” and “mammals”?

(b) What is the rationale for limiting the application of subdivision (c) to “game” birds (and mammals)? Is there a reason that rationale does not apply to subdivisions (a) and (b)?

The Commission invites comment on both of these issues.

CHAPTER 2. SPECIAL PROHIBITIONS

§ 8110. Torture

8110. (a) Any person who maliciously and intentionally maims, mutilates, or physically tortures any fish, reptile, bird, amphibian, or mammal governed by this code is guilty of a crime.

(b) Nothing in this section affects any legal activity pursuant to this code, including, but not limited to, hunting, fishing, trapping, hunting dog training, hunting dog field trials, predation control, and efforts to dispatch a wounded mammal, bird, or fish taken legally.

Comment. Subdivision (a) of Section 8110 continues the first clause of the first sentence of former Fish and Game Code Section 12013(c) without substantive change.

Subdivision (b) continues the second sentence of former Fish and Game Code Section 12013(c) without substantive change.

See also Section 4664 (enforcement).

§ 8115. Prize

8115. (a) Except as specified in subdivisions (b), (c), and (d), it is unlawful to offer a prize or other inducement as a reward for the taking of a game bird, or the taking of any mammal, fish, reptile, or amphibian, in an individual contest, tournament, or derby.

(b) The department may issue a permit to a person authorizing that person to offer a prize or other inducement as a reward for the taking of a game fish, as defined by the commission by regulation, if it finds that there would be no detriment to the resource. The permit is subject to regulations adopted by the commission. The application for the permit shall be accompanied by a fee in the amount determined by the department as necessary to cover the reasonable administrative costs incurred by the department in issuing the permit. However, the department may waive the permit fee if the contest, tournament, or derby is for persons who are under 16 years of age or have a physical or mental disability, and if the primary purpose of the contest, tournament, or derby is to introduce those anglers to or educate them about fishing. All permits for which the fee is waived pursuant to this subdivision shall comply with all other requirements set forth in this section.

(c) This section does not apply to a person conducting what is generally known as a frog-jumping contest, or, in waters of the Pacific Ocean, what is generally known as a fish contest.

(d) This section does not apply to a person conducting an individual contest, tournament, or derby for the taking of a game bird or game mammal, if the total value of all prizes or other inducements is less than five hundred dollars (\$500) for the individual contest, tournament, or derby.

Comment. Section 8115 restates former Fish and Game Code Section 2003 to make clear that (1) the general prohibition in subdivision (a) applies to game birds, as well as all mammals, fish, reptiles and amphibians, and (2) the exception in subdivision (d) applies only to game birds and game mammals.

In subdivision (b), the word “disability” is not used in any defined sense.

Note. Proposed Section 8115(a) and (d) are intended to restate existing Fish and Game Code Section 2003(a) and (d) without changing their substantive effect, to make clear which references to types of animals are limited to “game” animals.

Existing Section 2003 reads as follows:

2003. (a) Except as specified in subdivisions (b), (c), and (d), it is unlawful to offer a prize or other inducement as a reward for the taking of a game bird, mammal, fish, reptile, or amphibian in an individual contest, tournament, or derby.

(b) The department may issue a permit to a person authorizing that person to offer a prize or other inducement as a reward for the taking of a game fish, as defined by the commission by regulation, if it finds that there would be no detriment to the resource. The permit is subject to regulations adopted by the commission. The application for the permit shall be accompanied by a fee in the amount determined by the department as necessary to cover the reasonable administrative costs incurred by the department in issuing the permit. However, the department may waive the permit fee if the contest, tournament, or derby is for persons who are under 16 years of age or have a physical or mental disability, and the primary purpose of the contest, tournament, or derby is to introduce those anglers to or educate them about fishing. All permits for which the fee is waived pursuant to this subdivision shall comply with all other requirements set forth in this section.

(c) This section does not apply to a person conducting what is generally known as a frog-jumping contest, or, in waters of the Pacific Ocean, what is generally known as a fish contest.

(d) This section does not apply to a person conducting an individual contest, tournament, or derby for the taking of a game bird or mammal, if the total value of all prizes or other inducements is less than five hundred dollars (\$500) for the individual contest, tournament, or derby.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of any provision of existing Section 2003.

§ 8120. Property damage

8120. It is unlawful for any person, while taking any bird, mammal, fish, reptile, or amphibian, to cause damage, or assist in causing damage, to real or personal property, or to leave a gate or bar open, or to break down, destroy, or damage a fence, or to tear down or scatter a pile of rails, posts, stone, or wood, or, through carelessness or negligence, to injure any livestock.

Comment. Section 8120 continues former Fish and Game Code Section 2004 without substantive change.

See also Section 4572 (enforcement).

1 **§ 8125. Lights**

2 8125. (a) Except as otherwise provided by this section, it is unlawful to use an
3 artificial light to assist in the taking of a game bird, game mammal, or game fish.

4 (b) It is unlawful for one or more persons to throw or cast the rays of a spotlight,
5 headlight, or other artificial light on a highway or in a field, woodland, or forest
6 where game mammals, fur-bearing mammals, or nongame mammals are
7 commonly found, or upon a game mammal, fur-bearing mammal, or nongame
8 mammal, while having in his or her possession or under his or her control a
9 firearm or weapon with which that mammal could be killed, even though the
10 mammal is not killed, injured, shot at, or otherwise pursued.

11 (c) It is unlawful to use or possess any night vision equipment to assist in the
12 taking of any bird, mammal, amphibian, reptile, or fish. For purposes of this
13 subdivision, “night vision equipment” includes but is not limited to the following:

14 (1) Any infrared or similar light, used in connection with an electronic viewing
15 device.

16 (2) Any optical device, including but not limited to binoculars or a scope, that
17 uses electrical or battery powered light amplifying circuits.

18 (d) This section does not apply to any of the following:

19 (1) Sport fishing in ocean waters, or other waters where night fishing is
20 permitted, if an artificial light is not used on or as part of the fishing tackle.

21 (2) Commercial fishing.

22 (3) The taking of a mammal that is expressly authorized by this code because the
23 mammal is damaging crops, livestock, or other property.

24 (4) The use of a hand-held flashlight that is no larger and emits no more light
25 than a two-cell, three-volt flashlight, and is not affixed to a weapon.

26 (5) The use of a lamp or lantern that does not cast a directional beam of light.

27 (6) Headlights of a motor vehicle that are operated in a usual manner and
28 without attempt or intent to locate a game mammal, fur-bearing mammal, or
29 nongame mammal.

30 (7) An owner of land devoted to the agricultural industry, or his or her
31 employee, while on that land.

32 (8) An owner of land devoted to the agricultural industry, or the owner’s
33 employee, while on land controlled by the owner in connection with the
34 agricultural industry.

35 (9) Other uses as the commission may authorize by regulation.

36 (e) A person shall not be arrested for violation of this section except by a peace
37 officer.

38 **Comment.** Section 8125 continues former Fish and Game Code Section 2005 without
39 substantive change.

40 **Notes.** (1) The exception to this section in existing Section 2005(d)(3) – continued in
41 proposed Section 8125(d)(7) and (8) – is convoluted. It appears to exempt owners of agricultural
42 land and their employees, but not tenants of such land. Is this distinction intended as a matter of

1 policy? If not, would it be sufficient for the exception to apply to “a person who owns or controls
2 land devoted to the agricultural industry, or that person’s employee, while on that land”?

3 **The Commission invites comment on this issue.**

4 (2) Existing Fish and Game Code Section 2005(d)(3) (which would be continued by proposed
5 Section 8125(d)(3)) provides that the section does not apply to the “taking of mammals governed
6 by Article 2 (commencing with Section 4180) of Chapter 3 of Part 3 of Division 4.” In the
7 proposed law, the many provisions contained in that cross-referenced article, which governs the
8 taking of depredator mammals, are continued in many different locations.

9 **The Commission invites comment on whether the continuation of that cross-reference in**
10 **proposed Section 8125(d)(3) by instead describing the subject matter of the cross-reference**
11 **would cause any problems.**

12 **§ 8130. Interference with lawful activities**

13 8130. (a) A person shall not willfully interfere with the participation of any
14 individual in the lawful activity of shooting, hunting, fishing, falconry, hunting
15 dog field trials, hunting dog training, or trapping at the location where that activity
16 is taking place.

17 (b) For purposes of this section, “interfere with” means any action that
18 physically impedes, hinders, or obstructs the lawful pursuit of any activity listed in
19 subdivision (a), including, but not limited to, any of the following:

20 (1) An action intended to frighten away animals from the location where the
21 lawful activity is taking place.

22 (2) Placing or maintaining a sign, gate, lock, or barricade that prohibits or denies
23 access to land without authorization from the landowner or lessee or an authorized
24 designee of the landowner or lessee.

25 (3) Placing food on land not belonging to the person placing the food for
26 purposes of eliminating the lawful ability to hunt due to the presence of bait, as
27 defined in this code or in a regulation adopted pursuant to this code.

28 (c) In order to be liable for a violation of this section, the person is required to
29 have had the specific intent to interfere with the participation of an individual who
30 was engaged in lawful shooting, hunting, fishing, falconry, hunting dog field trials,
31 hunting dog training, or trapping.

32 (d) This section does not apply to the actions of any peace officer or personnel
33 of the department in the performance of official duties. This section does not
34 obstruct the rights and normal activities of landowners or tenants, including, but
35 not limited to, farming, ranching, and limiting unlawful trespass.

36 **Comment.** Section 8130 continues former Fish and Game Code Section 2009(a), (d)-(f)
37 without substantive change.

38 See also Section 4600 (enforcement).

39 **§ 8135. Signs**

40 8135. It is unlawful to do any of the following:

41 (a) Post any sign indicating an area is a state or federal refuge unless established
42 by state or federal law.

(b) Post any sign prohibiting trespass or hunting on any land unless authorized by the owner or the person in lawful possession of that land.

(c) Maliciously tear down, mutilate, or destroy any sign, signboard or other notice forbidding hunting or trespass on land.

Comment. Section 8135 continues former Fish and Game Code Section 2018 without substantive change.

§ 8140. Use of sodium cyanide

8140. Notwithstanding Section 31605, subdivision (b) of Section 32150, Section 32155, 32305, 35215, 35610, 35710, or 36010 of this code, or Section 14063 of the Food and Agricultural Code, no person, including an employee of the federal, state, county, or municipal government, may poison or attempt to poison any animal by using sodium fluoroacetate, also known as Compound 1080, or sodium cyanide.

Comment. Section 8140 continues former Fish and Game Code Section 3003.2 without substantive change.

See also Section 4712 (enforcement).

Note. Section 3003.2 was added by Proposition 4 (1998). The Commission believes that the nonsubstantive continuation of those provisions in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

§ 8145. Explosives

8145. It is unlawful to use explosives in waters of the state inhabited by fish, except in one of the following circumstances:

(a) Pursuant to a permit first obtained by the user from the department, consistent with terms and conditions set by the commission. The department's decision to grant or deny a permit may be appealed to the commission by any person.

(b) In an emergency, to remove an accidental obstruction to the flow of water.

Comment. Section 8145 restates former Fish and Game Code Section 5500 without substantive change.

Note. Proposed Section 8145 is intended to restate existing Fish and Game Code Section 5500 to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

5500. It is unlawful to use explosives in the waters of this state inhabited by fish, except under a permit first obtained by the user from the department consistent with terms and conditions set by the commission, or except in case of emergency, to remove an accidental obstruction to the flow of water. Any person may appeal the department's decision to grant or deny a permit to the commission.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

CHAPTER 3. OBLIGATIONS

§ 8300. Possession of license

8300. Every person while engaged in taking a bird, mammal, fish, amphibian, or reptile shall have on his or her person, in his or her immediate possession, or where otherwise specifically required by law to be kept, any license, tag, stamp, or permit that is required in order to take the bird, mammal, fish, amphibian, or reptile. In the case of a person diving from a boat, the license or permit may be kept on the boat, or in the case of a person diving from shore, the license or permit may be kept within 500 yards of the shore.

Comment. Section 8300 continues former Fish and Game Code Section 1054.2 without substantive change.

See also Sections 4874, 5450 (enforcement).

§ 8305. Display of license, take, and equipment

8305. All licenses, tags, and the birds, mammals, fish, reptiles, or amphibians taken or otherwise dealt with under this code, and any device or apparatus designed to be and capable of being used to take any bird, mammal, fish, reptile, or amphibian, shall be exhibited upon demand to any person authorized by the department to enforce this code or any law relating to the protection and conservation of birds, mammals, fish, reptiles, or amphibians.

Comment. Section 8305 continues former Fish and Game Code Section 2012 without substantive change.

TITLE 2. SPECIAL SEASONS AND LIMITS

§ 8700. Fire seasons

8700. Whenever, because of extreme fire hazard, an area is closed to entry by the public by an order or proclamation issued or concurred in by the Governor, the commission may establish a season for hunting or fishing within the area. The season shall begin on or after the end of the closure, and correspond in length of time as nearly as possible to the amount of time the area was closed to hunting or fishing.

Comment. Section 8700 continues former Fish and Game Code Section 306 without substantive change.

§ 8705. Reduced limits based on scarcity

8705. (a) Whenever after due investigation the commission finds that game fish, resident game birds, migratory game birds, game mammals, fur-bearing mammals, game amphibians, or game reptiles have decreased in numbers in any area, district, or part of an area or district to the extent that a scarcity exists, the commission may reduce the daily bag limit and the possession limit on those fish, birds, mammals, amphibians, or reptiles that are in danger of depletion, for a period of

time that the commission may specify, or until new legislation addressing the scarcity becomes operative.

(b) A regulation adopted pursuant to this section shall be filed with the Secretary of State, and that filing shall be deemed a legal notice thereof.

(c) The regulation shall be published twice in at least one newspaper of general circulation in every county affected by the order. The publications shall be separated by a period of not less than one week and not more than two weeks. The regulation shall be posted in any public places in each county that the director may direct.

Comment. Section 8705 restates former Fish and Game Code Section 307 to make clear that it applies to “game” animals of the specified types.

Notes. (1) Proposed Section 8705 would continue existing Fish and Game Code Section 307 with minor revisions. The revisions would make clear that the section applies to “game” animals of the specified types (rather than all animals of those types). See also proposed Sections 445, 455, and 465 (“game amphibian,” “game fish,” and “game reptile” defined).

The Commission invites comment on the merits of those revisions.

(2) A provision of existing Section 307, continued in proposed Section 8705(b), requires that a regulation be filed with the Secretary of State. That requirement appears to be redundant. Existing Section 300 generally requires that “any regulation issued under any subsequent provisions of this code shall be filed with the Secretary of State, as required by Chapter 4 (commencing with Section 11370), Part 1, Division 3, Title 2, of the Government Code.”

The Commission invites comment on whether the filing requirement in Section 8705(b) can be deleted.

(3) Proposed Section 8705 also provides that the filing of the regulation with the Secretary of State “shall be deemed a legal notice thereof.” The Commission is not certain of the meaning of that provision. Moreover, the Commission is concerned that this statement could create a problematic negative inference that other regulations filed with the Secretary of State do not create “legal notice” of the regulation. See also Gov’t Code §§ 11343.6 (filing regulation with Secretary of State creates rebuttable presumption of regulation’s proper promulgation; courts shall take judicial notice of filed regulation), 11344.6 (publication of regulation in California Regulatory Notice Register creates rebuttable presumption of regulation’s proper promulgation; courts shall take judicial notice of filed regulation).

The Commission invites comment on whether the “legal notice” clause of Section 8705(b) should be deleted.

§ 8710. Prohibited take in protected areas

8710. (a) The commission at any time may close to the taking of any species or subspecies of bird or mammal any area newly stocked by the department with resident or migratory game birds or game or fur-bearing mammals, or any area where, in the judgment of the commission, added protection for birds or mammals is needed to properly conserve the birds or mammals, for such time as the commission may designate, or until such time as new legislation thereon enacted by the Legislature may become effective.

(b) The commission may at any time close any stream, lake, or other inland waters, or portions thereof, to the taking of any species or subspecies of fish to protect and properly conserve the fish, except for the taking of fish otherwise permitted by this code under a commercial fishing license, for such time as the

commission may designate, or until such time as new legislation thereon enacted by the Legislature may become effective.

Comment. Subdivision (a) of Section 8710 continues former Fish and Game Code Section 314 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 315 without substantive change.

§ 8715. Opening identified waters to take

8715. The commission may, at any time when facts are presented to the commission that were not presented to the commission at the time of a meeting held pursuant to Section 1105, open any stream, lake, or other inland waters, or portions thereof to the taking of any species or subspecies of fish for the proper utilization of the fish, for such time as the commission may designate, or until such time as new legislation thereon enacted by the Legislature may become effective.

Comment. Section 8715 continues former Fish and Game Code Section 315.3 without substantive change.

Note. Existing Fish and Game Code Section 315.3 (which would be continued by proposed Section 8715) references a Fish and Game Commission meeting held in December, pursuant to “Section 209.” However, former Fish and Game Code Section 209, which provided for such December meetings, was repealed in 2006, and replaced by Fish and Game Code 206, which did not limit either the dates or subject matter of Commission meetings. See 2006 Cal. Stat. ch. 667. In 2016, Section 206 was in turn repealed and replaced by Section 255. See 2016 Cal. Stat. ch. 546. Existing Section 255 would in turn be continued in the proposed law by proposed Section 1105.

The Commission invites comment on the substitution of proposed Section 1105 as a cross-reference in this provision, in place of the existing reference to “Section 209.”

§ 8720. Restricted take in Fish and Wildlife District 2655

8720. (a) Notwithstanding any other provisions of this code, in District 2655 the taking of birds, mammals, fish, amphibians, or reptiles shall be subject to regulations adopted, from time to time, by the commission, except that it is unlawful to take birds or mammals within one-eighth mile of any gallinaceous guzzler, if the area surrounding it is posted in the manner prescribed by the commission. In the Colorado River, in District 2655, the commission may adopt regulations in agreement with the proper authorities of the State of Arizona.

Comment. Section 8720 continues former Fish and Game Code Section 308 without substantive change.

Notes. (1) Is the prohibition in existing Section 308 against the take of birds or mammals within one-eighth mile of any gallinaceous guzzler, if the area surrounding the guzzler is posted in the manner prescribed by the commission (which would be continued by proposed Section 8720(b)) intended to apply only in existing District 22?

The Commission invites comment on this question.

(2) Should that prohibition against take around a gallinaceous guzzler also be made applicable to the take of animals others than birds and mammals?

The Commission invites comment on this question.

1 **TITLE 3. HUNTING AND FISHING GUIDES**

2 **CHAPTER 1. GUIDES GENERALLY**

3 **§ 8800. “Guide” defined**

4 8800. As used in this chapter, “guide” means any person who is engaged in the
5 business of packing or guiding, or who, for a fee, assists another person in taking
6 or attempting to take any bird, mammal, fish, amphibian, or reptile. “Guide” also
7 includes any person who, for profit, transports other persons, their equipment, or
8 both to or from a hunting or fishing area.

9 **Comment.** Section 8800 continues former Fish and Game Code Section 2535 without
10 substantive change.

11 **§ 8805. Guide license required**

12 8805. (a) It is unlawful for any person to engage in the business of guiding or
13 packing, or to act as a guide for any consideration or compensation, without first
14 having secured a guide license from the department.

15 (b) An employee of a licensee who acts as a guide only in connection with, and
16 within the scope of, his or her employment is exempt from the requirement of
17 subdivision (a) if all of the following conditions are met:

18 (1) The employment is subject to and the person is reported to the carrier of the
19 employer’s workers’ compensation insurance.

20 (2) The person is subject to and reported to the state and federal taxing
21 authorities for withholding of income tax.

22 (3) The person is reported to the department, on forms provided by the
23 department, as an employee of the guide prior to any contact with any person
24 being guided, and a registration fee has been paid. The base fee for an employee
25 guide registration for the 2004 license year shall be thirty-three dollars (\$33),
26 which shall be adjusted annually thereafter pursuant to Section 3755.

27 (c) A person who is licensed in another state to provide guide services for the
28 purposes of fishing is exempt from the requirements of subdivision (a) if all of the
29 following conditions are met:

30 (1) The state in which the person is licensed grants a similar exemption to
31 licensed guides who are residents of this state.

32 (2) Evidence of a valid guide license is provided to the department upon request.

33 (3) The person is engaged in the business of guiding only in conjunction with
34 and during the term of a multistate fishing tournament approved by the appropriate
35 agency in each of the affected states.

36 (4) The tournament sponsor provides to the department any information or
37 documents necessary to administer and enforce this paragraph, as determined by
38 the department, including, but not limited to, the identities of all guides
39 participating in the tournament, verification of another state’s license exemption,

1 and information sufficient to determine the validity of another state's guide
2 licenses.

3 (5) The tournament sponsor pays the department an amount, determined by the
4 department, to be sufficient to cover the department's cost to administer and
5 enforce this subdivision.

6 (6) The net proceeds of the tournament are used for resource management
7 projects or habitat improvement projects, or both.

8 (d) The commission shall adjust the amount of the fees specified in paragraph
9 (3) of subdivision (b), as necessary, to fully recover, but not exceed, all reasonable
10 administrative and implementation costs of the department and the commission
11 relating to those licenses.

12 **Comment.** Section 8805 continues former Fish and Game Code Section 2536 without
13 substantive change.

14 See also Section 4592 (revocation for violation of code or regulations).

15 **§ 8810. Exception**

16 8810. A person operating under a commercial passenger fishing boat license
17 issued pursuant to Section 21905 is not required to obtain a guide license.

18 **Comment.** Section 8810 continues former Fish and Game Code Section 2537 without
19 substantive change.

20 **§ 8815. Grazing permit required**

21 8815. If the licensee operates with pack or riding animals in any area in which a
22 grazing permit is required, the license is not valid unless the licensee has a valid
23 grazing permit for the area. A licensee shall not guide clients on any land under
24 the jurisdiction of the United States Department of the Interior or Department of
25 Agriculture where a permit is required without first obtaining the permit from that
26 federal agency.

27 **Comment.** Section 8815 continues former Fish and Game Code Section 2539 without
28 substantive change.

29 **§ 8820. Regulations**

30 8820. The commission shall adopt regulations governing the conduct and
31 qualifications of guides to ensure the safety and welfare of persons engaging the
32 services of a guide, and may adopt regulations governing the procedures for
33 applications for guide licenses. The qualifications shall include, but not be limited
34 to, knowledge of basic first aid and rescue operations.

35 **Comment.** Section 8820 continues former Fish and Game Code Section 2542 without
36 substantive change.

37 **§ 8825. Records**

38 8825. The commission may require licensed guides to maintain and submit
39 records of their operations. The records may be examined at any time by
40 representatives of the department. It is unlawful for any licensed guide to fail to

1 maintain or submit any required record or to refuse to allow the examination of a
2 record on request of a department representative.

3 **Comment.** Section 8825 continues former Fish and Game Code Section 2543 without
4 substantive change.

5 CHAPTER 2. LICENSE APPLICATION

6 § 8900. Information required

7 8900. An application for a guide license shall be on a form furnished by the
8 department on request. The application shall show all of the following:

9 (a) The name, date of birth, physical description, age, address, and telephone
10 number, if any, of the applicant.

11 (b) The area or areas of the state in which the applicant proposes to operate.

12 (c) The type of guiding or packing in which the applicant proposes to engage.

13 (d) The experience that qualifies the applicant for the type of guiding or packing
14 he or she proposes to conduct.

15 (e) The type and amount of the equipment, vehicles, animals, and other property
16 the applicant proposes to use in his or her operations.

17 (f) Any other information that the department or the commission may require.

18 **Comment.** Section 8900 continues former Fish and Game Code Section 2538 without
19 substantive change.

20 § 8905. License fee

21 8905. (a) The base fee for a guide license issued to a resident is one hundred
22 fifty dollars (\$150).

23 (b) The base fee for a guide license issued to a nonresident is three hundred fifty
24 dollars (\$350).

25 (c) The base fees specified in this section are applicable to the 2004 license year,
26 and shall be adjusted annually thereafter pursuant to Section 3755.

27 (d) The commission shall adjust the amount of the fees specified in this section,
28 as necessary, to fully recover, but not exceed, all reasonable administrative and
29 implementation costs of the department and the commission relating to those
30 licenses.

31 **Comment.** Section 8905 continues former Fish and Game Code Section 2540(a), (b), (d), and
32 (e) without substantive change.

33 § 8910. License duration

34 8910. A guide license is valid for the license year beginning on February 1 and
35 ending on January 31 of the succeeding year or, if issued after the beginning of the
36 license year, for the remainder of that license year.

37 **Comment.** Section 8910 continues former Fish and Game Code Section 2540(c) without
38 substantive change.

1 **§ 8915. Surety bond**

2 8915. Each applicant for a guide license shall submit proof of having obtained a
3 surety bond in the amount of not less than one thousand dollars (\$1,000),
4 conditioned on faithful performance of the guide and the guide's agents or
5 employees in fulfilling their responsibilities to their clients. No guide license shall
6 be issued to any applicant who does not submit proof of having a bond that is valid
7 for the term of the license.

8 **Comment.** Section 8915 continues former Fish and Game Code Section 2541 without
9 substantive change.

10  **Note.** The language used in existing Section 2541 to describe the purpose of the surety bond
11 referenced in the section is non-standard. Proposed Section 8915 would conform the language to
12 that used in more recently enacted provisions. See e.g., Fin. Code § 12104(g), Health and Safety
13 Code § 1376(b), Rev. & Tax. Code § 30165.1(b)(4)(B).

14 **The Commission invites comment on whether this revision is appropriate.**

15 **§ 8920. Grounds for refusal of license**

16 8920. The department may refuse to issue a guide license to an applicant upon a
17 showing of any of the following:

18 (a) The applicant has failed to fulfill his responsibilities to a client.

19 (b) The applicant has violated this code or any regulation adopted pursuant to
20 this code, or has knowingly permitted a client or another member of a party being
21 guided to violate this code or any regulation adopted pursuant to this code, and the
22 applicant had the authority and means to prevent the violation.

23 **Comment.** Section 8920 continues former Fish and Game Code Section 2544 without
24 substantive change.

25 **§ 8925. Appeal of refusal**

26 8925. An applicant denied a guide license by the department may request a
27 hearing before the commission and the commission shall determine whether or not
28 the license shall be issued.

29 **Comment.** Section 8925 continues former Fish and Game Code Section 2545 without
30 substantive change.

31 **TITLE 4. SPECIAL LICENSES**

32 **CHAPTER 1. LIFETIME LICENSES**

33 **§ 9105. Deposit of fees from lifetime licenses**

34 9105. Notwithstanding Section 3600, the department shall deposit funds from
35 the sale of lifetime hunting licenses and lifetime hunting privileges issued pursuant
36 to Section 10225, and lifetime sport fishing licenses and lifetime privileges issued
37 pursuant to Section 13105 as follows:

1 (a) For each lifetime fishing license issued pursuant to Section 13105, the
2 collected fee shall be deposited as follows:

3 (1) Of those funds, 66.67 percent shall be deposited into the Fish and Game
4 Preservation Fund.

5 (2) Of those funds, 33.33 percent shall be deposited into the Hatchery and Inland
6 Fisheries Fund.

7 (b) For each lifetime hunting license issued pursuant to Section 10225, 100
8 percent of the collected fee shall be deposited into the Fish and Game Preservation
9 Fund pursuant to Section 3600.

10 (c) For each lifetime sport fishing privilege package issued pursuant to
11 subdivision (e) of Section 13105, the collected fee shall be deposited as follows:

12 (1) Of those funds, 48.37 percent shall be deposited into the Fish and Game
13 Preservation Fund.

14 (2) Of those funds, 14.75 percent shall be deposited into the Hatchery and Inland
15 Fisheries Fund.

16 (3) Of those funds, 21.31 percent shall be deposited into the Steelhead Trout
17 account in the Fish and Game Preservation Fund.

18 (4) Of those funds, 15.57 percent shall be deposited into the California Ocean
19 Resources Enhancement and Hatchery Program account in the Fish and Game
20 Preservation Fund.

21 (d) The collected fee for each big game privilege package purchased pursuant to
22 subdivision (c) of Section 10225 shall be deposited as follows:

23 (1) Of those funds, 91.92 percent shall be deposited into the Big Game
24 Management Account in the Fish and Game Preservation Fund.

25 (2) Of those funds, 8.08 percent shall be deposited into the Fish and Game
26 Preservation Fund.

27 (e) The collected fee for each lifetime bird hunting privilege package issued
28 pursuant to subdivision (d) of Section 10225 shall be deposited as follows:

29 (1) Of those funds, 68.47 percent shall be deposited into the State Duck Stamp
30 Account in the Fish and Game Preservation Fund.

31 (2) Of those funds, 31.53 percent shall be deposited into the Upland Game Bird
32 Account in the Fish and Game Preservation Fund.

33 **Comment.** Section 9105 continues former Fish and Game Code Section 13005 without
34 substantive change.

35 CHAPTER 2. SURVIVAL SCHOOL

36 § 9150. Survival School

37 9150. (a) The commission may issue a permit authorizing a member of the
38 armed forces of the United States or a student or faculty member of an elementary
39 or secondary school in the public school system actually assigned to, and
40 participating in, an organized survival training course, to take fish, amphibians,
41 reptiles, birds, or mammals, except rare or endangered species, notwithstanding

1 any other law or regulation, pursuant to the terms and conditions of that permit. A
2 permit involving training by the armed forces of the United States shall be issued
3 to the commanding officer of the unit having jurisdiction over the conduct of the
4 survival training course. A permit involving training by an elementary or
5 secondary school in the public school system shall be issued to the governing
6 board or superintendent of the district having jurisdiction over that school and the
7 conduct of the survival training course. A permit shall be applicable only to the
8 area established for that survival training as designated by the commission in the
9 permit and for the species and numbers designated in the permit.

10 (b) The commission may revise a condition of a permit if it finds revision is
11 necessary to properly protect the fish, amphibians, reptiles, birds, or mammals in
12 the area.

13 (c) The term of a permit issued pursuant to subdivision (a) shall be for not more
14 than a calendar year.

15 (d) A report shall be submitted on the expiration of the permit period specified
16 pursuant to subdivision (c), or as otherwise required by the commission, of all fish,
17 amphibians, reptiles, birds, or mammals taken during the period covered by the
18 report in each permit area. A new permit shall not be issued until the report has
19 been submitted, and an existing permit may be canceled if a report is not
20 submitted when required by the commission.

21 (e) A person engaged in survival training taking a fish, amphibian, reptile, bird,
22 or mammal pursuant to a permit issued under this section shall not use a firearm,
23 bow and arrow, steel trap, explosive, chemical, poison, drug, net, or fish tackle,
24 except that hooks, handlines, and improvised poles and lines may be used to take
25 fish.

26 **Comment.** Section 9150 continues former Fish and Game Code Section 312 without
27 substantive change.

28 CHAPTER 3. SCIENTIFIC RESEARCH

29 § 9200. Permit for scientific, educational, or propagation take or possession

30 9200. (a) The department may issue permits, subject to restrictions and
31 regulations that the department determines are desirable, to take or possess, in any
32 part of the state, for scientific, educational, or propagation purposes, mammals,
33 birds and the nests and eggs thereof, fish, amphibians, reptiles, or any other form
34 of plant or animal life.

35 (b) The department may issue a permit that is valid for 36 months from the date
36 of issuance on the payment of a nonrefundable application fee of one hundred
37 dollars (\$100) and a permit fee of three hundred dollars (\$300), as adjusted under
38 Section 3755.

39 (c) Notwithstanding subdivision (b), the department may issue a permit without
40 fee that is valid for 12 months from the date of issuance to authorize only the

1 banding of birds and the exhibition of live or dead wildlife specimens by public
2 zoological gardens, scientific, or educational institutions.

3 (d)(1) The department may issue a special student permit that is valid for 12
4 months from the date of issuance on the payment of a nonrefundable application
5 fee of twenty-five dollars (\$25) and a permit fee of fifty dollars (\$50), as adjusted
6 under Section 3755, to any student in a school of collegiate level or a commercial
7 fishing class who is required by an instructor to collect specimens used in
8 laboratory work in the school under supervision and in connection with a course in
9 wildlife research or in the conduct of wildlife investigations and studies on behalf
10 of the public.

11 (2) All fish taken under permit for a commercial fishing class student shall be
12 taken in accordance with state law, except that subdivisions (a), (b), (c), and
13 paragraph (1) of subdivision (d) of Section 14500, and Sections 14615, 14750,
14 14755, 14765, 14775, 14780, 14785, and 14790 do not apply. All fish taken under
15 a permit for a commercial fishing class student may be sold only to a person
16 licensed to receive fish from commercial fishermen as provided in Section 20205,
17 20450, or 20460, or donated to a charitable institution. All funds received from the
18 sale of the fish shall be used solely for the support of commercial fishing classes.

19 (e) It is not necessary for the holder of the permit to have a sport fishing or
20 hunting license to collect any fish, amphibian, reptile, aquatic animal or plant,
21 bird, or mammal for scientific, educational, or propagation purposes in this state.

22 (f) Nothing in this section authorizes any act that violates Section 597 of the
23 Penal Code.

24 (g) A permit under this section does not authorize the taking of fish or mammals
25 from the ocean waters of the state that are within the boundaries of any city if the
26 city has filed with the department an objection to the taking.

27 (h) The adjustment of the nonrefundable application fee and permit fees
28 pursuant to Section 3755 that are specified in subdivisions (b) and (d) shall be
29 applicable to permits issued on or after January 1, 2013.

30 (i) The department, by regulation, may adjust the amount of the fees specified in
31 subdivisions (b) and (d) as necessary to fully recover, but not exceed, all
32 reasonable administrative and implementation costs of the department relating to
33 those permits.

34 (j) No permit under this section is required for species listed as threatened or
35 endangered pursuant to the California Endangered Species Act, when an entity
36 holds a valid permit or memorandum of understanding for the subject species and
37 the proposed activities, issued pursuant to Section 62650 or 62700.

38 (k) No permit under this section is required for fully protected species listed in
39 Section 340, 345, 350, 355, or 360, if the entity holds a valid memorandum of
40 understanding issued by the department for the subject species and proposed
41 activities, in accordance with the respective section.

42 (l) A permit or amendment issued pursuant to this section is not transferable
43 between individuals or entities.

1 **Comment.** Section 9200 continues former Fish and Game Code Section 1002(a)-(l) without
2 substantive change.

3 See also Section 4602 (enforcement).

4 **§ 9205. Issuance of permit to public, private, or nonprofit entity**

5 9205. (a) The department may issue a permit pursuant to Section 9200 to an
6 appropriate public, private, or nonprofit entity, or a person, as determined by the
7 department, in the name of a principal scientific investigator or the permitted
8 entity or person.

9 (b) The department may approve individual temporary employees or volunteers
10 to work under the permit, after receiving notification from the permittee. The
11 permittee shall have adequate supervision over any temporary employees or
12 volunteers approved to work under the permit.

13 (c) A permittee that allows a temporary employee or volunteer to work under a
14 permit without approval from the department in accordance with this section is
15 subject to Section 4400.

16 (d) The department shall charge a fee pursuant to subdivision (b) of Section
17 9200 for the issuance of a permit authorized by this section. If the department
18 determines that the costs to issue a permit authorized by this section are greater
19 than the costs to issue a permit pursuant to Section 9200, the department may
20 charge a permit fee in an amount that is greater than the amount imposed by
21 subdivision (b) of Section 9200 to recover those additional costs.

22 (e) The department may amend a permit issued under this section, including, but
23 not limited to, the addition or removal of individual temporary employees or
24 volunteers working under the permit, on the payment of a nonrefundable
25 application fee of one hundred dollars (\$100), as adjusted under Section 3755 or
26 regulations adopted by the department.

27 **Comment.** Section 9205 continues former Fish and Game Code Section 1002.5 without
28 substantive change.

29 **§ 9210. Transport of take pursuant to scientific or propagation permit**

30 9210. Mammals, birds and their nests and eggs, fish and their eggs, reptiles,
31 amphibians, mollusks, crustaceans, or any other form of plant or animal life taken
32 under the provisions of a scientific or propagation permit issued pursuant to
33 Section 9200 may be shipped or transported anywhere within or without the state
34 if prior written approval is obtained from the department and the shipment is
35 accompanied by the name, address, and permit number of the person holding the
36 scientific or propagation permit.

37 **Comment.** Section 9210 continues former Fish and Game Code Section 1003 without
38 substantive change.

PART 2. HUNTING

TITLE 1. GENERAL PROVISIONS

CHAPTER 1. GENERAL LICENSURE REQUIREMENT

§ 9500. Take without license or entitlement

9500. Except as provided in this code or regulations adopted pursuant to this code, every person who takes any bird or mammal shall procure a license or entitlement therefor.

Comment. Section 9500 restates former Fish and Game Code Section 3007 without substantive change.

See also Sections 4704, 5464 (enforcement).

CHAPTER 2. PROHIBITED METHODS

§ 9550. Shooting from vehicle

9550. It is unlawful to shoot at any game bird or mammal, including a marine mammal as defined in Section 32500, from a powerboat, sailboat, motor vehicle, or airplane.

Comment. Section 9550 continues former Fish and Game Code Section 3002 without substantive change.

 **Note.** The Commission invites comment on whether proposed Section 9550 should apply to all birds and mammals, only game birds and game mammals, or some other combination of categories.

§ 9555. Prohibited shotguns

9555. (a) It is unlawful to use or possess a shotgun larger than 10-gauge, or to use or possess a shotgun capable of holding more than six cartridges at one time, to take a mammal or bird.

(b) A shotgun that has been modified with the insertion of a plug is deemed, for the purpose of this section, to have a cartridge capacity equal to the number of cartridges that can be loaded into the weapon as modified.

(c) After a public hearing, the commission may adopt regulations relative to the ammunition capacity of shotguns for taking mammals or birds that are more restrictive than the limits provided in subdivision (a), or that it determines may be needed to conform to federal law.

Comment. Section 9555 continues former Fish and Game Code Section 2010 without substantive change.

§ 9560. Trap gun

9560. (a) It is unlawful to set, cause to be set, or placed any trap gun.

(b) A “trap gun” is a firearm loaded with other than blank cartridges and connected to a string or other contrivance with which contact will cause the firearm to be discharged.

Comment. Section 9560 continues former Fish and Game Code Section 2007 without substantive change.

Note. In the first sentence of existing Section 2007, which would be continued by subdivision (a) of proposed Section 9560, the intended meaning of the word “placed” is unclear.

(1) Is the term intended to have a different meaning than the word “set”? If so, what is the distinction? If not, can the word “placed” be deleted from the provision?

(2) Does the provision make it unlawful to place a trap gun, or to cause a trap gun to be placed?

The Commission invites comment on these questions.

§ 9565. Other prohibited methods of taking

9565. (a) It is unlawful to take birds or mammals with any net, pound, cage, trap, set line or wire, or poisonous substance, or to possess birds or mammals so taken, whether taken within or without this state, except as provided in this code or, when relating to ongoing mining operations, in accordance with a mitigation plan approved by the department pursuant to Title 2 (commencing with Section 71500) of Part 5 of Division 17.

(b) Proof of possession of any bird or mammal that does not show evidence of having been taken by means other than a net, pound, cage, trap, set line or wire, or poisonous substance, is prima facie evidence that the birds or mammals were taken in violation of this section.

(c) This section does not apply to any of the following:

(1) The lawful taking of a fur-bearing mammal, nongame bird, or nongame mammal.

(1) The lawful taking of a mammal found to be injuring crops or property.

(2) The taking of a bird or mammal under a depredation permit.

(3) The taking of a bird or mammal by an employee of the department acting in an official capacity.

(4) The taking of a bird or mammal in accordance with the conditions of a scientific or propagation permit by the holder of that permit.

Comment. Subdivision (a) of Section 9565 restates former Fish and Game Code Section 3005(a) without substantive change.

Subdivision (b) restates former Fish and Game Code Section 3005(c) without substantive change.

Subdivision (c) restates former Fish and Game Code Section 3005(d) without substantive change.

Notes. (1) The law governing mining mitigation plans has been relocated. A cross-reference to that law has been added to proposed Section 9565(a).

(2) Proposed Section 9565(c) restates existing Section 3005(d) for clarity. The existing subdivision read as follows:

3005. (d) This section does not apply to the lawful taking of fur-bearing mammals, nongame birds, nongame mammals, or mammals found to be injuring crops or property, to the taking of birds or mammals under depredation permits, to taking by employees of the department acting in

an official capacity, or to taking in accordance with the conditions of a scientific or propagation permit by the holder of that permit.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provisions.

(3) Existing Section 3005(d), which would be continued by proposed Section 9565(c), exempts from application of the section various specified *takings* of mammals and birds, but does not exempt *possession* of mammals or birds taken in any of those specified circumstances. That possession, which would seem to necessarily follow from the taking, would therefore appear to remain expressly prohibited by subdivision (a) of both sections.

The Commission invites comment on whether this distinction was intended to be drawn by the existing provision.

§ 9570. Herding with vehicle

9570. It is unlawful to pursue, drive, or herd any bird or mammal with any motorized water, land, or air vehicle, including, but not limited to, a motor vehicle, airplane, powerboat, or snowmobile, except in any of the following circumstances:

(a) On private property, by the landowner or tenant, to haze birds or mammals for the purpose of preventing damage by that wildlife to private property.

(b) Pursuant to a permit from the department issued under regulations adopted by the commission.

(c) In the pursuit of agriculture.

Comment. Section 9570 continues former Fish and Game Code Section 3003.5 without substantive change.

§ 9575. Remote use of computer or other device

9575. (a) It is unlawful for a person to shoot, shoot at, or kill a bird or mammal with a gun or other device accessed via an Internet connection in this state.

(b) It is unlawful for a person, firm, corporation, partnership, limited liability company, association, or other business entity to do either of the following:

(1) Own or operate a shooting range, site, or gallery located in the state for the purpose of online shooting or spearing of a bird or mammal.

(2) Create, maintain, or utilize an Internet Web site, or other service or business in this state, for the purpose of online shooting or spearing of a bird or mammal.

(c) It is unlawful to possess or confine a bird or mammal in furtherance of an activity prohibited by this section.

(d) It is unlawful for a person in this state to import into, or export from, this state a bird or mammal that is killed by a device accessed via an Internet connection.

(e) A bird or mammal that is possessed in violation of this section shall be subject to seizure by the department.

(f) For the purposes of this section, “online shooting or spearing” means the use of a computer or other device, equipment, software, or technology to remotely control the aiming and discharge of a weapon, including, but not limited to, a firearm, bow and arrow, spear, slingshot, harpoon, or other projectile device.

Comment. Section 9575 continues former Fish and Game Code Section 3003 without substantive change.

§ 9580. Unlawful entry onto land

9580. It is unlawful to enter land for the purpose of discharging a firearm or taking or destroying a mammal or bird, including waterfowl, on that land, without having first obtained written permission from the owner, the owner's agent, or the person in lawful possession of that land, if either of the following is true:

(a) The land belongs to or is occupied by another person and is either under cultivation or enclosed by a fence.

(b) There are signs of any size and wording forbidding trespass or hunting or both displayed along all exterior boundaries and at all roads and trails entering the land, including land temporarily inundated by water flowing outside the established banks of a river, stream, slough, or other waterway, at intervals not less than three to the mile, which fairly advise a person about to enter the land that the use of the land is so restricted.

Comment. Section 9580 continues former Fish and Game Code Section 2016 without substantive change.

See also Section 4572 (enforcement).

 **Note.** Existing Section 2016 by its terms prohibits entering specified lands only for the purpose of "discharging any firearm or taking or destroying any mammal or bird."

The Commission invites comment on whether proposed Section 9580 should be revised to include entering the specified lands for the purpose of taking or destroying any reptile or amphibian.

§ 9585. Bird or mammal calls

9585. It is unlawful to use any recorded or electrically amplified bird or mammal call or sound, or recorded or electrically amplified imitation of a bird or mammal call or sound, to assist in taking any bird or mammal, except nongame birds and nongame mammals as permitted by regulations of the commission.

Comment. Section 9585 continues former Fish and Game Code Section 3012 without substantive change.

§ 9590. Hunting at night

9590. (a) It is unlawful to take any bird or mammal, except a nongame mammal, between one-half hour after sunset and one-half hour before sunrise of the following day at the place of taking, except as otherwise provided in this code or under regulations adopted by the commission.

(b) The commission may adopt regulations prohibiting the taking of any nongame mammal between one-half hour after sunset and one-half hour before sunrise of the following day at the place of taking.

Comment. Section 9590 continues former Fish and Game Code Section 3000 without substantive change.

1 CHAPTER 3. OTHER PROHIBITIONS AND REQUIREMENTS

2 **§ 9700. Occupied buildings**

3 9700. It is unlawful for a person, other than the owner, person in possession of
4 the premises, or a person having the express permission of the owner or person in
5 possession of the premises, while within 150 yards of an occupied dwelling house,
6 residence, or other building, or within 150 yards of a barn or other outbuilding
7 used in connection with an occupied dwelling house, residence, or other building,
8 to either hunt or discharge a firearm or other deadly weapon while hunting. The
9 150-yard area is a “safety zone.”

10 **Comment.** Section 9700 continues former Fish and Game Code Section 3004(a) without
11 substantive change.

12 **§ 9705. Public roads**

13 9705. It is unlawful for a person to intentionally discharge a firearm or release
14 an arrow or crossbow bolt over or across a public road or other established way
15 open to the public in an unsafe and reckless manner.

16 **Comment.** Section 9705 continues former Fish and Game Code Section 3004(b) without
17 substantive change.

18 **§ 9710. Intoxication**

19 9710. It is unlawful to take a bird or mammal with a firearm, BB device as
20 defined in Section 16250 of the Penal Code, crossbow, or bow and arrow, while
21 intoxicated.

22 **Comment.** Section 9710 continues former Fish and Game Code Section 3001 without
23 substantive change.

24 **§ 9715. Possession of loaded long gun in vehicle**

25 9715. (a) It is unlawful to possess a loaded rifle or shotgun in any vehicle or
26 conveyance or its attachments that is standing on or along or is being driven on or
27 along any public highway or other way open to the public.

28 (b) A rifle or shotgun shall be deemed to be loaded for the purposes of this
29 section when there is an unexpended cartridge or shell in the firing chamber but
30 not when the only cartridges or shells are in the magazine.

31 (c) The provisions of this section shall not apply to peace officers or members of
32 the Armed Forces of this state or the United States, while on duty or going to or
33 returning from duty.

34 **Comment.** Section 9715 continues former Fish and Game Code Section 2006 without
35 substantive change.

1 **§ 9720. Hunting dogs**

2 9720. (a) It is unlawful for the owner of a dog engaged in hunting in an area
3 where the owner is authorized to hunt to fail to exercise physical control of the
4 dog, as required by this code or regulations adopted pursuant to this code.

5 (b) Dogs used for hunting that have been vaccinated for rabies in their county of
6 residence in conformity with state law regulating vaccinations in rabies areas are
7 not subject to rabies vaccination requirements of local ordinances outside their
8 county of residence.

9 **Comment.** Section 9720 continues former Fish and Game Code Section 3008 without
10 substantive change.

11 **§ 9725. Removal of hunting dog collar**

12 9725. (a) It is unlawful for a person to remove from a hunting dog any collar,
13 including an electronic or radio transmitting device, without possessing written
14 permission from the dog's owner allowing the removal of the collar.

15 (b) As used in this section, "hunting dog" means a dog in the field actively
16 engaged in the taking of mammals or birds, or a dog actively being trained for the
17 taking of mammals or birds, that is located in an area where mammals or birds can
18 be taken, at that time and place, in accordance with existing law.

19 (c) This section does not apply to a law enforcement officer or an animal control
20 officer in the performance of his or her duty, or to a person who is assisting an
21 injured dog.

22 **Comment.** Section 9725 continues former Fish and Game Code Section 2011.5 without
23 substantive change.

24 **§ 9730. Bounty**

25 9730. It is unlawful for any person, including state, federal, county, and city
26 officials or their agents, to authorize, offer or pay a bounty for any bird or
27 mammal. This section does not apply to any person with respect to the taking of
28 any bird or mammal on the private property of such person.

29 **Comment.** Section 9730 continues former Fish and Game Code Section 2019 without
30 substantive change.

31 **§ 9735. Bird or mammal in possession of another**

32 9735. (a) It is unlawful for any person to take, mutilate, or destroy any bird or
33 mammal lawfully in the possession of another.

34 (b) For the purpose of this section, a bird or mammal shall be deemed in
35 possession when it is actually reduced to physical possession or when it is
36 wounded or otherwise maimed and the person who wounded or otherwise maimed
37 it is in hot pursuit.

38 **Comment.** Section 9735 continues former Fish and Game Code Section 2011 without
39 substantive change.

1 **§ 9740. Capture or possession of live wild mammal or bird**

2 9740. (a) It is unlawful to capture any game mammal, game bird, nongame bird,
3 nongame mammal, or furbearer, or to possess or confine any live game mammal,
4 game bird, nongame bird, nongame mammal, or furbearer taken from the wild,
5 except as provided by this code or by regulations adopted pursuant to this code.
6 Any bird or mammal possessed or confined in violation of this section shall be
7 seized by the department.

8 (b) The commission may promulgate regulations permitting the temporary
9 confinement of game mammals, game birds, nongame birds, nongame mammals,
10 or furbearers for the purpose of treating the animals, if injured or diseased.

11 **Comment.** Section 9740 continues former Fish and Game Code Section 3005.5 without
12 substantive change.

13 **CHAPTER 4. NONLEAD AMMUNITION**

14 **§ 10000. Nonlead ammunition required in California condor range**

15 10000. (a) Nonlead centerfire rifle and pistol ammunition, as determined by the
16 commission, shall be required when taking big game, as defined in the
17 department's mammal hunting regulations (14 Cal. Code Regs. § 350), with rifle
18 or pistol, and when taking coyote, within the California condor range.

19 (b) For purposes of this section, "California condor range" means:

20 (1) The department's deer hunting zone A South, but excluding Santa Cruz,
21 Alameda, Contra Costa, San Mateo, and San Joaquin Counties, areas west of
22 Highway 101 within Santa Clara County, and areas between Highway 5 and
23 Highway 99 within Stanislaus, Merced, Madera, Fresno, Kings, Tulare, and Kern
24 Counties.

25 (2) Areas within deer hunting zones D7, D8, D9, D10, D11, and D13.

26 (c) The requirements of this section shall remain in effect in the California
27 condor range unless and until the more restrictive nonlead prohibitions required
28 pursuant to Section 10005 are implemented.

29 **Comment.** Section 10000 continues former Fish and Game Code Section 3004.5(a) without
30 substantive change.

31 See also Section 4714 (enforcement).

32 **§ 10005. Taking of wildlife in general**

33 10005. (a) Except as provided in subdivision (c), and as soon as is practicable as
34 implemented by the commission pursuant to subdivision (b), but by no later than
35 July 1, 2019, nonlead ammunition, as determined by the commission, shall be
36 required when taking all wildlife, including game mammals, game birds, nongame
37 birds, and nongame mammals, with any firearm.

38 (b) The commission shall promulgate regulations by July 1, 2015, that phase in
39 the requirements of this chapter. The requirements of this chapter shall be fully
40 implemented statewide by no later than July 1, 2019. If any of the requirements of

1 this chapter can be implemented practicably, in whole or in part, in advance of
2 July 1, 2019, the commission shall implement those requirements. The
3 commission shall not reduce or eliminate any existing regulatory restrictions on
4 the use of lead ammunition in California condor range unless or until the
5 additional requirements for use of nonlead ammunition as required by this chapter
6 are implemented.

7 (c)(1) The prohibition in subdivision (a) shall be temporarily suspended for a
8 specific hunting season and caliber upon a finding by the director that nonlead
9 ammunition of a specific caliber is not commercially available from any
10 manufacturer because of federal prohibitions relating to armor-piercing
11 ammunition pursuant to Chapter 44 (commencing with Section 921) of Title 18 of
12 the United States Code.

13 (2) Notwithstanding a suspension pursuant to paragraph (1), nonlead
14 ammunition shall be used when taking big game mammals, nongame birds, or
15 nongame mammals in the California condor range, as defined in Section 10000.

16 **Comment.** Subdivision (a) of Section 10005 continues former Fish and Game Code Section
17 3004.5(b) without substantive change.

18 Subdivision (b) continues former Fish and Game Code Section 3004.5(i) without substantive
19 change.

20 Subdivision (c) continues former Fish and Game Code Section 3004.5(j) without substantive
21 change.

22 See also Section 4714 (enforcement).

23 **§ 10010. Certification**

24 10010. (a) The commission shall maintain, by regulation, a public process to
25 certify ammunition as nonlead ammunition, and shall define, by regulation,
26 nonlead ammunition as including only ammunition in which there is no lead
27 content, excluding the presence of trace amounts of lead. The commission shall
28 establish and annually update a list of certified ammunition.

29 (b) The list of certified ammunition shall include, but not be limited to, any
30 federally approved nontoxic shotgun ammunition.

31 **Comment.** Section 10010 continues former Fish and Game Code Section 3004.5(c) without
32 substantive change.

33 **§ 10015. Providing reduced cost nonlead ammunition**

34 10015. (a) To the extent that funding is available, the commission shall establish
35 a process that will provide hunters with nonlead ammunition at no or reduced
36 charge. The process shall provide that the offer for nonlead ammunition at no or
37 reduced charge may be redeemed through a coupon sent to a permit holder with the
38 appropriate permit tag. If available funding is not sufficient to provide nonlead
39 ammunition at no charge, the commission shall set the value of the reduced charge
40 coupon at the maximum value possible through available funding, up to the
41 average cost within this state for nonlead ammunition, as determined by the
42 commission.

(b) The nonlead ammunition coupon program described in paragraph (1) shall be implemented only to the extent that sufficient funding, as determined by the Department of Finance, is obtained from local, federal, public, or other nonstate sources in order to implement the program.

(c) If the nonlead ammunition coupon program is implemented, the commission shall issue a report on the usage and redemption rates of ammunition coupons. The report shall cover calendar years 2008, 2009, and 2012. Each report shall be issued by June of the following year.

Comment. Section 10015 continues former Fish and Game Code Section 3004.5(d) without substantive change.

Note. Were the reports required in proposed Section 10015(c) prepared? If so, can that provision be omitted as obsolete?

§ 10020. Report on California condors

10020. The commission shall issue a report on the levels of lead found in California condors. This report shall cover calendar years 2008, 2009, and 2012. Each report shall be issued by June of the following year.

Comment. Section 10020 continues former Fish and Game Code Section 3004.5(e) without substantive change.

Note. Were the reports required in proposed Section 10020 prepared? If so, can that provision be omitted as obsolete?

§ 10025. Government officials exempted

10025. This chapter does not apply to government officials or their agents when carrying out a statutory duty required by law.

Comment. Section 10025 continues former Fish and Game Code Section 3004.5(h) without substantive change.

§ 10030. Notice

10030. The department shall notify those hunters who may be affected by this chapter.

Comment. Section 10030 continues former Fish and Game Code Section 3004.5(f) without substantive change.

TITLE 2. HUNTING LICENSES

CHAPTER 1. GENERAL PROVISIONS

§ 10200. Eligibility

10200. (a) No hunting license may be issued to any person unless that person presents to the person authorized to issue that license any of the following:

(1) Evidence that the person has held a hunting license issued by this state in a prior year.

1 (2) Evidence that the person holds a current hunting license, or a hunting license
2 issued in either of the two previous hunting years by another state or province.

3 (3) A certificate of completion of a course in hunter education, principles of
4 conservation, and sportsmanship, as provided in Title 3. A hunter education
5 instruction validation stamp shall be permanently affixed to certificates of
6 completion that have been issued before January 1, 2008.

7 (4) A certificate of successful completion of a hunter education course in
8 another state or province.

9 (5) Evidence of completion of a course in hunter education, principles of
10 conservation, and sportsmanship, which the commission may, by regulation,
11 require.

12 (b) The evidence required in subdivision (a) shall be forwarded to the
13 department.

14 (c) Subdivision (a) does not apply to any person purchasing a hunting license
15 under paragraph (5) of subdivision (a) of Section 10210. However, that license
16 shall not qualify as evidence required in subdivision (a) of this section.

17 **Comment.** Section 10200 continues former Fish and Game Code Section 3050 without
18 substantive change.

19 **§ 10205. Hunter education**

20 10205. Applicants for hunting licenses shall first satisfactorily complete a hunter
21 education equivalency examination and obtain a certificate of equivalency as
22 provided by regulations adopted by the commission, or show proof of completion
23 of a hunter education training course, or show a previous year's hunting license.

24 **Comment.** Section 10205 continues former Fish and Game Code Section 1053.5 without
25 substantive change.

26 See also Section 4874 (enforcement).

27 **§ 10210 (repealed July 1, 2020). Fees**

28 10210. (a) A hunting license, granting the privilege to take birds and mammals,
29 shall be issued to any of the following:

30 (1) A resident of this state, 18 years of age or older, upon the payment of a base
31 fee of thirty-one dollars and twenty-five cents (\$31.25).

32 (2) A resident or nonresident, who is under 18 years of age on July 1 of the
33 licensing year, upon the payment of a base fee of eight dollars and twenty-five
34 cents (\$8.25), regardless of whether that person applies before or after July 1 of
35 that year. A license issued pursuant to this paragraph shall be known as a junior
36 hunting license and a person who holds one of these licenses shall be known as a
37 junior hunter.

38 (3) A nonresident, 18 years of age or older, upon the payment of a base fee of
39 one hundred eight dollars and fifty cents (\$108.50).

40 (4) A nonresident, 18 years of age or older, valid only for two consecutive days
41 upon payment of the fee set forth in paragraph (1). A license issued pursuant to

1 this paragraph is valid only for taking resident and migratory game birds, resident
2 small game mammals, fur-bearing mammals, and nongame mammals, as defined
3 in this code or in regulations adopted by the commission.

4 (5) A nonresident, valid for one day and only for the taking of domesticated
5 game birds and pheasants while on the premises of a licensed game bird club, or
6 for the taking of domesticated migratory game birds in areas licensed for shooting
7 those birds, upon the payment of a base fee of fifteen dollars (\$15).

8 (b) The base fees specified in this section are applicable to the 2004 license year,
9 and shall be adjusted annually thereafter pursuant to Section 713.

10 (c) The commission shall adjust the amount of the fees specified in subdivision
11 (b), as necessary, to fully recover, but not exceed, all reasonable administrative
12 and implementation costs of the department and the commission relating to those
13 licenses.

14 (d) A person who is 16 or 17 years of age, is in possession of a valid junior
15 hunting license, and is issued an entry permit pursuant to Section 551 of Title 14
16 of the California Code of Regulations may hunt in the area described in the entry
17 permit unaccompanied by a person over 18 years of age but shall not be
18 accompanied by a person under 16 years of age.

19 (e) This section shall remain in effect only until July 1, 2020, and as of that date
20 is repealed, unless a later enacted statute, that is enacted before January 1, 2021,
21 deletes or extends that date.

22 **Comment.** Section 10210 continues former Fish and Game Code Section 3031, as amended by
23 2018 Cal. Stat. ch. 295, § 5, without substantive change.

24 See also Section 4700 (enforcement).

25 **Note.** This version of proposed Section 10210 would continue Section 3031, as amended by
26 2014 Cal. Stat. ch. 456, § 1. That provision was amended by 2018 Cal. Stat. ch. 295, § 5.
27 Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

28 **§ 10210 (operative on July 1, 2020). Fees**

29 10210. (a) A hunting license, granting the privilege to take birds and mammals,
30 shall be issued to any of the following:

31 (1) A resident of this state, 16 years of age or older, upon the payment of a base
32 fee of thirty-one dollars and twenty-five cents (\$31.25).

33 (2) A resident or nonresident, who is under 16 years of age on July 1 of the
34 licensing year, upon the payment of a base fee of eight dollars and twenty-five
35 cents (\$8.25), regardless of whether that person applies before or after July 1 of
36 that year. A license issued pursuant to this paragraph shall be known as a junior
37 hunting license and a person who holds one of these licenses shall be known as a
38 junior hunter.

39 (3) A nonresident, 16 years of age or older, upon the payment of a base fee of
40 one hundred eight dollars and fifty cents (\$108.50).

41 (4) A nonresident, 16 years of age or older, valid only for two consecutive days
42 upon payment of the fee set forth in paragraph (1). A license issued pursuant to

1 this paragraph is valid only for taking resident and migratory game birds, resident
2 small game mammals, fur-bearing mammals, and nongame mammals, as defined
3 in this code or in regulations adopted by the commission.

4 (5) A nonresident, valid for one day and only for the taking of domesticated
5 game birds and pheasants while on the premises of a licensed game bird club, or
6 for the taking of domesticated migratory game birds in areas licensed for shooting
7 those birds, upon the payment of a base fee of fifteen dollars (\$15).

8 (b) The base fees specified in this section are applicable to the 2004 license year,
9 and shall be adjusted annually thereafter pursuant to Section 3755.

10 (c) The commission shall adjust the amount of the fees specified in subdivision
11 (b), as necessary, to fully recover, but not exceed, all reasonable administrative
12 and implementation costs of the department and the commission relating to those
13 licenses.

14 (d) A person who is 16 or 17 years of age, is in possession of a valid resident or
15 nonresident hunting license, and is issued an entry permit pursuant to Section 551
16 of Title 14 of the California Code of Regulations may hunt in the area described in
17 the entry permit unaccompanied by a person over 18 years of age but shall not be
18 accompanied by a person under 16 years of age.

19 (e) This section shall become operative on July 1, 2020.

20 **Comment.** Section 10210 continues former Fish and Game Code Section 3031, as added by
21 2018 Cal. Stat. ch. 295, § 6, without substantive change.

22 See also Section 4700 (enforcement).

23 **Note.** This version of proposed Section 10210 would continue Section 3031, as amended by
24 2014 Cal. Stat. ch. 456, § 2, which was amended by 2018 Cal. Stat. ch. 295, § 6. Although that
25 bill will not take effect until 2019, it is included here in anticipation of its effect.

26 **§ 10215. Job Corps enrollees**

27 10215. For the purpose of obtaining a hunting license, enrollees in the Job
28 Corps, created by the Economic Opportunity Act of 1964 (Public Law 88-452),
29 shall be deemed to be residents of California.

30 **Comment.** Section 10215 continues former Fish and Game Code Section 3031.5 without
31 substantive change.

32 **§ 10220. Term of license**

33 10220. A hunting license authorizes the person to whom it is issued to take birds
34 and mammals, in accordance with law, for a term of one year from July 1 to June
35 30, or, if issued after the beginning of the term, for the remainder of the term.

36 **Comment.** Section 10220 continues the first part of former Fish and Game Code Section 3037
37 without substantive change.

38 **§ 10225. Lifetime license**

39 10225. (a) In addition to Section 10210, and notwithstanding Section 10220, the
40 department shall issue lifetime hunting licenses under this section. A lifetime
41 hunting license authorizes the taking of birds and mammals anywhere in this state

1 in accordance with the law for purposes other than profit for the life of the person
2 to whom issued, unless revoked for a violation of this code or regulations adopted
3 pursuant to this code. A lifetime hunting license is not transferable. A lifetime
4 hunting license is valid for one year from July 1 through June 30 and may be
5 renewed annually, regardless of any lapse of the license, at no additional cost to
6 the licensee. A lifetime hunting license does not include any special tags, stamps,
7 or fees.

8 (b) A lifetime hunting license may be issued to residents of this state, as follows:

9 (1) To a person 62 years of age or over, upon payment of a base fee of three
10 hundred sixty-five dollars (\$365).

11 (2) To a person 40 years of age or over, and less than 62 years of age, upon
12 payment of a base fee of five hundred forty dollars (\$540).

13 (3) To a person 10 years of age or over, and less than 40 years of age, upon
14 payment of a base fee of six hundred dollars (\$600).

15 (4) To a person less than 10 years of age, upon payment of a base fee of three
16 hundred sixty-five dollars (\$365).

17 (c) Upon payment of a base fee of four hundred forty-five dollars (\$445), a
18 person holding a lifetime hunting license shall be issued annually one deer tag
19 application pursuant to Section 34225 and five wild pig tags pursuant to Section
20 4654. Lifetime privileges issued pursuant to this subdivision are not transferable.

21 (d) Upon payment of a base fee of two hundred ten dollars (\$210), a person
22 holding a lifetime hunting license shall be entitled annually to the privileges
23 afforded to a person holding a state duck stamp or validation issued pursuant to
24 Section 30515 and an upland game bird stamp or validation issued pursuant to
25 Section 29505. Lifetime privileges issued pursuant to this subdivision are not
26 transferable.

27 (e) Nothing in this section requires a person less than 16 years of age to obtain a
28 license to take birds or mammals except as required by law.

29 (f) Nothing in this section exempts an applicant for a license from meeting other
30 qualifications or requirements otherwise established by law for the privilege of
31 sport hunting.

32 (g) The base fees specified in this section are applicable commencing January 1,
33 2004, and shall be adjusted annually thereafter pursuant to Section 3755.

34 (h) The commission shall adjust the amount of the fees specified in subdivisions
35 (b), (c), and (d), as necessary, to fully recover, but not exceed, all reasonable
36 administrative and implementation costs of the department and the commission
37 relating to those licenses.

38 **Comment.** Section 10225 continues former Fish and Game Code Section 3031.2 without
39 substantive change.

40 § 10230. “Free Hunting Day”

41 10230. (a) Notwithstanding Section 10210, the director may designate two days
42 per year as “Free Hunting Days.” One free hunting day may be established during

1 the fall hunting season, and the other free hunting day may be established during
2 the winter hunting season. The department shall publish the exact dates of the free
3 hunting days in annual publications of the department regarding current hunting
4 regulations.

5 (b) During a free hunting day, a California resident may hunt if accompanied by
6 a hunter who holds a valid hunting license issued by the State of California, has
7 held a valid hunting license for at least the last three consecutive years, is at least
8 21 years of age, and accompanies only one unlicensed hunter in the field at a time.
9 An unlicensed hunter shall participate in the free hunting days for only one license
10 year and shall complete a hunter education course approved by the department and
11 register with the department, or an agent of the department, prior to participating
12 in a free hunting day. While engaged in hunting activities, the unlicensed hunter
13 shall remain in close visual and verbal contact with the licensed hunter at all times
14 so that the licensed hunter is able to provide adequate direction and immediately
15 assume control of a firearm from the unlicensed hunter at any time.

16 (c) An unlicensed hunter who participates in a free hunting day shall have in his
17 or her possession all of the following:

18 (1) A certificate of completion of a course in hunter education as required in
19 paragraph (3) of subdivision (a) of Section 10200.

20 (2) Any required tags or report cards.

21 (3) Any required federal entitlements.

22 (4) Any required entry permits.

23 (d) Unlicensed hunters participating in free hunting days shall not take any
24 species that requires a draw or lottery to obtain a tag.

25 (e) An unlicensed hunter hunting pursuant to this section is subject to all of the
26 limitations, restrictions, conditions, statutes, rules, and regulations applicable to
27 the holder of a valid hunting license, except the requirement to possess a valid
28 hunting license.

29 (f) The department may adopt additional minimum requirements and restrictions
30 for a licensed hunter or unlicensed hunter participating in a free hunting day
31 pursuant to this section.

32 (g) This section shall not be implemented until the department's Automated
33 License Data System is fully operational for at least one year.

34 **Comment.** Section 10230 continues former Fish and Game Code Section 3040 without
35 substantive change.

36 **Note.** The Commission invites comment on whether subdivision (g) of this section is
37 obsolete.

38 CHAPTER 2. MILITARY PERSONNEL

39 § 10300. Disabled veteran or recovering service member

40 10300. (a) Pursuant to this section, the department shall issue to any disabled
41 veteran or recovering service member who has not been convicted of any violation

1 of this code a reduced fee hunting license that authorizes the licensee to take a bird
2 or mammal as authorized by this code and regulations adopted pursuant to this
3 code.

4 (b) The base license fee for a reduced fee hunting license shall be four dollars
5 (\$4) for the hunting license year beginning on July 1, 1995, and, for the following
6 years, this license fee may be annually reviewed and adjusted in accordance with
7 Section 3755.

8 (c) For the purposes of this section, the following terms have the following
9 meanings:

10 (1) “Disabled veteran” means a person having a 50 percent or greater service-
11 connected disability and an honorable discharge from military service.

12 (2) “Recovering service member” means a member of the military who meets
13 the definition of “recovering service member” in Section 1602(7) of the federal
14 National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181).

15 (d) A person applying for a reduced fee hunting license shall submit to the
16 department adequate documentation for the department to determine whether the
17 person is, in fact, eligible for a reduced fee hunting license. The department shall
18 not issue a reduced fee hunting license to a person unless it is satisfied that the
19 person has provided adequate documentation of eligibility for that license.

20 (e) A disabled veteran must submit the following documentation:

21 (1) Proof of an honorable discharge from military service.

22 (2) Proof of the disability described in paragraph (1) of subdivision (c), either by
23 certification from the United States Department of Veterans Affairs or by
24 presentation of a license issued pursuant to this section in the preceding license
25 year.

26 (f) A recovering service member must submit a letter to the department stating
27 that the person is a recovering service member as defined in subdivision (d), from
28 either that person’s commanding officer or a military medical doctor. The letter
29 may be submitted either in hard copy form or online.

30 **Comment.** Section 10300 continues former Fish and Game Code Section 3033 without
31 substantive change.

32 **§ 10305. Occupant of military medical facility**

33 10305. (a) Any member of the armed forces of the United States who is in a
34 military medical facility and who is at least 70 percent disabled shall, on
35 application, be issued a hunting permit by the department, in lieu of a hunting
36 license and appropriate tags, authorizing the taking of birds and mammals. If the
37 permit covers a period during which birds or mammals may only be taken or
38 shipped with appropriate tags, the department may issue those tags with the permit
39 or shall endorse the permit to authorize that taking and shipping without the tags.

40 (b) A permit issued pursuant to this section shall be valid only during the period
41 of time the permittee is in a military medical facility and is at least 70 percent
42 disabled.

1 (c) Certification by the commanding officer of the military medical facility shall
2 be sufficient proof of this period of time and extent of disability.

3 **Comment.** Section 10305 continues former Fish and Game Code Section 3038 without
4 substantive change.

5 **§ 10310. Special hunt by military personnel**

6 10310. Any organization conducting a special hunt by service members or
7 veterans residing in or assigned to a United States veterans or armed services
8 medical facility may apply to the commission for, and the commission may issue,
9 under terms and conditions it may impose, a permit to take birds and mammals
10 notwithstanding the provisions of Sections 9550 and 9715.

11 **Comment.** Section 10310 continues former Fish and Game Code Section 317 without
12 substantive change.

13 **CHAPTER 3. COLORADO RIVER HUNTING LICENSES**

14 **§ 10350. Qualification for license**

15 10350. A special Colorado River hunting license may be issued to any person
16 holding a hunting license issued by the State of Arizona.

17 **Comment.** Section 10350 continues former Fish and Game Code Section 3061 without
18 substantive change.

19 **§ 10355. Additional qualification**

20 10355. The department, in conformity with regulations adopted by the
21 commission, may issue a special Colorado River hunting license when the
22 commission finds and determines that under the laws of the State of Arizona
23 substantially similar licenses are authorized to be issued to licensees of the State of
24 California upon substantially the same terms and conditions as are provided in this
25 article for the issuance of licenses to licensees of the State of Arizona.

26 **Comment.** Section 10355 continues former Fish and Game Code Section 3060 without
27 substantive change.

28 **§ 10360. Allowed take**

29 10360. A special Colorado River hunting license shall entitle the holder of the
30 license to take only migratory waterfowl and only in, on, or along the Colorado
31 River in accordance with the applicable state and federal laws and regulations or
32 orders made pursuant to those laws and regulations.

33 **Comment.** Section 10360 continues former Fish and Game Code Section 3062 without
34 substantive change.

35 **§ 10365. Fee and term**

36 10365. (a) The fee for a special Colorado River hunting license shall be two
37 dollars (\$2).

1 (b) The license shall be valid until the end of the calendar year in which it is
2 issued.

3 **Comment.** Section 10365 continues former Fish and Game Code Section 3063 without
4 substantive change.

5 TITLE 3. HUNTER SAFETY

6 § 10400. Legislative declaration

7 10400. (a) It is the intent of the Legislature in enacting this title to ensure the
8 health and safety of its citizens engaged in activities requiring the use of hunting
9 implements.

10 (b) The Legislature finds and declares that individuals who engage in hunting
11 should possess an adequate understanding of hunter safety practices, principles of
12 conservation, and sportsmanship.

13 (c) It is also the intent of the Legislature that persons engaged in hunting be
14 mindful of their responsibilities to others, toward wildlife, and toward their natural
15 environment. The department shall take all steps necessary to carry out the
16 provisions of this title.

17 **Comment.** Section 10400 continues former Fish and Game Code Section 3049 without
18 substantive change.

19  **Note.** The Commission invites comment on whether any equivalent gender-neutral term
20 can be substituted for the term “sportsmanship” as used in subdivision (b) of proposed
21 Section 10400.

22 § 10405. Hunter instruction

23 10405. (a) The department shall provide for a course of instruction in hunter
24 education, principles of conservation, and sportsmanship, and for this purpose may
25 cooperate with any reputable association or organization having as one of its
26 objectives the promotion of hunter safety, principles of conservation, and
27 sportsmanship.

28 (b) The department may designate as a hunter education instructor any person
29 found by it to be competent to give instruction in the courses required in this title.

30 (c) A hunter education instructor shall issue a certificate of completion as
31 provided by the department to a person that completes a course of instruction in
32 hunter safety, principles of conservation, and sportsmanship.

33 (d) The department shall prescribe a minimum level of skill and knowledge to
34 be required of all hunter education instructors, and may limit the number of
35 students per instructor in all required classes.

36 (e) The department may revoke the certificate of an instructor when, in the
37 opinion of the department, it is in the best interest of the state to do so.

38 (f) In order to recruit and retain hunter education instructors, the department
39 shall offer special hunting opportunities to qualified hunter education instructors
40 by providing a limited number of existing tags and other hunting opportunities.

The department may provide these tags and hunting opportunities through any of the following methods:

(1) The private lands management program described in Title 8 (commencing with Section 56500) of Part 2 of Division 15.

(2) The Shared Habitat Alliance for Recreational Enhancement (SHARE) program described in Title 7 (commencing with Section 56200) of Part 2 of Division 15.

(3) Entering into cooperative agreements with federal, state, and local agencies that hold title to, or administer, lands or waters.

(4) Entering into cooperative agreements with landowners or tenants seeking depredation permits for game mammals as described in Section 31115, 34605, or 37365.

(5) Authorizing a maximum of 15 tags from the annual tag quota, as determined by the department.

(g) The department shall determine eligibility criteria for hunter education instructors seeking the hunting opportunities offered pursuant to subdivision (f). The department shall offer hunting opportunities to eligible hunter education instructors only by random drawing.

(h) The department may adopt regulations to implement this section.

Comment. Section 10405 continues former Fish and Game Code Section 3051 without substantive change.

Note. The Commission invites comment on whether any equivalent gender-neutral term can be substituted for the term “sportsmanship” as used in subdivisions (a) and (b) of proposed Section 10405.

§ 10410. Fee and expenses

10410. A person receiving instruction from a hunter education instructor shall not be charged a fee for the service provided by the instructor, but may be charged a fee to cover the costs incurred by the instructor in teaching the class. A record of these costs shall be kept for inspection by the department. Costs may include, but are not limited to, range fees, ammunition, and transportation of students.

Comment. Section 10410 continues former Fish and Game Code Section 3052 without substantive change.

§ 10415. Loss or destruction of certificate

10415. In the case of loss or destruction of a certificate of completion, a duplicate certificate may be issued by the instructor who issued the original certificate, or, by an instructor of the sponsoring organization having adequate records to establish successful completion of the course, or by the department if verified by adequate records to establish successful completion of the course. An administrative fee of three dollars (\$3) shall be charged for the issuance of a duplicate certificate, for the hunting license year commencing on July 1, 1990, and, for the following years as adjusted pursuant to Section 3755.

1 **Comment.** Section 10415 continues former Fish and Game Code Section 3053 without
2 substantive change.

3 **§ 10420. Material for instructors**

4 10420. The department shall furnish information on hunter safety, principles of
5 conservation, and sportsmanship that shall be distributed free of charge to persons
6 designated as hunter education instructors for instructional purposes.

7 **Comment.** Section 10420 continues former Fish and Game Code Section 3054 without
8 substantive change.

9 **TITLE 4. EXTENDED HUNTING**

10 **§ 10500. Authority of commission**

11 10500. (a) Whenever after due investigation the commission finds that game
12 mammals, other than deer, fur-bearing mammals, or resident game birds have
13 increased in numbers in any area, district, or portion thereof other than a refuge or
14 preserve established by statute, to the extent that a surplus exists, or to the extent
15 that the mammals or birds are damaging public or private property, or are
16 overgrazing their range, the commission may by regulation do any of the
17 following:

18 (1) Provide for a special hunting season for the mammals or birds, additional to,
19 or concurrent with any other open season specified by law.

20 (2) Provide for increased bag limits.

21 (3) Remove sex restrictions specified by law.

22 (4) Establish a license fee for special hunting and designate the number of
23 special licenses to be issued, the area in which the special hunting will be
24 permitted, the number and sex of animals or birds that may be killed by each
25 holder of a special license, and the conditions and regulations to govern the special
26 hunting.

27 (b) Cooperative hunting areas, as described in Section 10700, may be
28 established in connection with any area opened to hunting under the provisions of
29 this title.

30 **Comment.** Paragraphs (1)-(3) of subdivision (a) of Section 10500 continue former Fish and
31 Game Code Section 325 without substantive change.

32 Paragraph (4) of subdivision (a) continues former Fish and Game Code Section 329 without
33 substantive change.

34 Subdivision (b) continues former Fish and Game Code Section 330 without substantive
35 change.

36 **Note.** Existing Section 330, which would be continued by subdivision (b) of proposed Section
37 10500, contains a reference to “cooperative hunting areas, as described in Sections 1570 to
38 1572.” The versions of Sections 1570, 1571, and 1572 that described cooperative hunting areas
39 were repealed in 2003, with the provisions of the repealed sections continued, largely without
40 substantive change, in existing Section 1575. Existing Section 1575 would be continued in the
41 proposed law by proposed Section 10700.

The Commission invites comment on whether the inclusion of a reference to proposed Section 10700 in subdivision (b) of proposed Section 10500 is appropriate.

§ 10505. Required hearing

10505. (a) Before adopting a regulation pursuant to paragraph (1), (2), or (3) of subdivision (a) of Section 10500, the commission at an open meeting shall publicly announce the contents of the proposed regulation, and fix a time and place for a hearing on the proposed regulation in each county that would be affected by the regulation. The time for each hearing shall be at least 21 days after the announcement, and the place shall be the county seat of the affected county.

(b) Employees of the department that are necessary or are requested by any interested group of persons, shall be present at a hearing.

Comment. Subdivision (a) of Section 10505 continues former Fish and Game Code Section 326 without substantive change.

Subdivision (b) continues the first sentence of former Fish and Game Code Section 328 without substantive change.

§ 10510. Notice of hearing

10510. (a) Notice of a hearing held pursuant to Section 10505 shall be published at least once, and at least 10 days prior to the hearing, in a newspaper of general circulation in each of the counties in which a hearing is to be held, or if no newspaper of general circulation is published in that county or counties then in a newspaper of general circulation in an adjoining county. The hearing shall be conducted by either the commission, a member of the commission designated by it, or the director if requested so to do by the commission.

(b) At least 10 days prior to the hearing, the commission shall notify each member of the board of supervisors of an affected county, at the member's home address, of the details of the proposed regulation, and the time and date of the hearing.

Comment. Section 10510 continues former Fish and Game Code Section 327 without substantive change.

§ 10515. Commission decision

10515. After a hearing held pursuant to Section 10505 the commission may abandon the proposed regulation, or may make a final regulation, with any modifications it deems appropriate, or without modification.

Comment. Section 10515 continues the second sentence of former Fish and Game Code Section 328 without substantive change.

TITLE 5. COMMERCIAL HUNTING CLUB

§ 10600. Definitions

10600. For purposes of this title, the following terms have the following meanings:

1 (a) “Commercial hunting club” means property with respect to which a fee is
2 imposed or collected for either of the following:

3 (1) Taking or attempting to take birds or mammals on the property.

4 (2) Any type of entry or use permit that includes permission to take birds or
5 mammals on the property.

6 (b) “Property” means a number of contiguous legal parcels owned by one or
7 more owners and held out for a common purpose.

8 **Comment.** Section 10600 continues former Fish and Game Code Section 3240.5(a) without
9 substantive change.

10 **§ 10605. License required**

11 10605. A person, including but not limited to an owner, renter, or lessee, who is
12 in possession or control of a commercial hunting club, shall procure a commercial
13 hunting club license before a bird or mammal may be taken on the property.

14 **Comment.** Section 10605 restates a part of former Fish and Game Code Section 3240.5(b)
15 without substantive change.

16 See also Section 4770 (enforcement).

17 **§ 10610. Exceptions**

18 10610. (a) This title does not apply under any of the following circumstances:

19 (1) The fees described in subdivision (a) of Section 10600 that are received by
20 the owner, renter or lessee of the property are less than one hundred dollars (\$100)
21 per entrant and total less than one thousand dollars (\$1,000) between July 1 and
22 the following June 30. Pursuant to Section 3755, the department may adjust the
23 threshold amounts established in this paragraph.

24 (2) The property is used in conjunction with the Shared Habitat Alliance for
25 Recreational Enhancement (SHARE) program under Title 7 (commencing with
26 Section 56200) of Part 2 of Division 15.

27 (3) A domesticated game bird hunting club licensed under Section 29365
28 operates on the property.

29 (4) A domesticated migratory game bird shooting area licensed under Title 2
30 (commencing with Section 26200) of Part 4 operates on the property.

31 (5) The property is used by a hunting club or program licensed under regulations
32 adopted pursuant to this code.

33 (6) The property is used in conjunction with the private wildlife habitat
34 enhancement and management program under Title 8 (commencing with Section
35 56500) of Part 2 of Division 15.

36 (7) The property is used for an officially sanctioned field trial event pursuant to
37 regulations adopted pursuant to this code.

38 (8) The property is subject to a recorded state, federal, or nonprofit wildlife
39 conservation or agricultural easement or is enrolled in a habitat protection or
40 enhancement program under this code, including, but not limited to, Title 9
41 (commencing with Section 56700) of Part 2 of Division 15.

(b) This title does not apply to an owner of property that is rented or leased to a commercial hunting club, if the owner is not involved in the operation of the club and the club is licensed in accordance with this title.

Comment. Section 10610 continues former Fish and Game Code Section 3240.5(c)-(d) without substantive change.

§ 10615. Application for license

10615. (a) An application for a commercial hunting club license shall be submitted on a form furnished by the department. The application, which shall set forth all of the exemptions and conditions established in Sections 10600, 10605, and 10610, shall require the applicant to include all of the following information:

(1) The name of the club and the ownership.

(2) The business telephone number and mailing address of the club.

(3) The number of properties used by the club and the physical location of each property.

(4) The total acreage of the club property.

(5) A list of all species of game hunted on the club property.

(6) Information as to whether the club owner owns any of the properties used by the club.

(7) The name and address of each property owner, if the property owner is substantially involved in the operation of the club, but does not own the club.

(8) The signature and title of the applicant.

(9) Any other information the department may require.

(b) The department shall allow a commercial hunting club that leases or rents more than one property for hunting purposes to submit a single application listing each of the properties for which the club is seeking a license, if all of the information required for each property is submitted in a format approved by the department.

Comment. Section 10615 continues former Fish and Game Code Section 3241 without substantive change.

§ 10620. Fee

10620. (a) The department may issue a commercial hunting club license to any person upon submission of a completed application and payment of the required fee, according to the number of properties used by the club, as follows:

(1) The fee for one property shall be two hundred dollars (\$200).

(2) The fee for two to five properties shall be five hundred dollars (\$500).

(3) The fee for six to 10 properties shall be one thousand dollars (\$1,000).

(4) The fee for 11 or more properties shall be two thousand dollars (\$2,000).

(b) The fees specified in this section are applicable to the 2010 license year, and shall be adjusted annually thereafter pursuant to Section 3755.

Comment. Section 10620 continues former Fish and Game Code Section 3242 without substantive change.

1 **§ 10625. Transfer of license**

2 10625. The commission may transfer a commercial hunting club license to other
3 land owned or controlled by the licensee, in the same county as the originally
4 licensed land, without an additional fee, if the commission finds the new land
5 suitable for the purposes of the license and the transfer does not conflict with the
6 public interest.

7 **Comment.** Section 10625 continues former Fish and Game Code Section 3243.5 without
8 substantive change.

9 **§ 10630. Term and authority**

10 10630. A commercial hunting club license is valid for a term of one year from
11 July 1, or, if issued after the beginning of the term, for the remainder of the term.
12 A license authorizes the person to whom it is issued to maintain a hunting club in
13 accordance with the provisions of this code and regulations adopted by the
14 commission.

15 **Comment.** Section 10630 continues former Fish and Game Code Section 3245 without
16 substantive change.

17 **TITLE 6. COOPERATIVE HUNTING AREAS**

18 **§ 10700. Cooperative hunting areas**

19 10700. To provide added protection for landowners from the depredation of
20 trespassers and to provide additional hunting opportunities to public hunters and
21 private landowners, the department may contract with landowners for the
22 establishment of cooperative hunting areas according to terms as the respective
23 parties may agree upon, subject to the following conditions:

24 (a) Cooperative deer and elk hunting areas shall be at least 5,000 acres in size,
25 including the open, restricted, and portions thereof, and may consist of the
26 adjoining lands of one or more owners.

27 (b) The boundaries of each area shall be posted by the department with a sign
28 stating legal hunting may be allowed in the area if written permission is obtained
29 from the owner or the owner's duly authorized agent.

30 (c) The department shall enforce the trespass provisions of the Penal Code and
31 the provisions of this code within these areas.

32 (d) The commission may establish regulations and set fees for the management
33 and control of hunting in these areas.

34 **Comment.** Section 10700 continues former Fish and Game Code Section 1575 without
35 substantive change.

36 **Note.** The Commission invites comment on the meaning of the phrase "including the
37 open, restricted, and portions thereof" in subdivision (a) of this section.

TITLE 7. POSSESSION OF BIRDS AND
MAMMALS AFTER SEASON

§ 10800. “Donor intermediary” defined

10800. For the purposes of this title, “donor intermediary” means a recipient who receives a game bird, game mammal, or fur-bearing mammal from a donor to give to a charitable organization or charitable entity.

Comment. Section 10800 restates former Fish and Game Code Section 3080(a) to make clear that it applies to game mammals and fur-bearing mammals, rather than all mammals.

Note. Proposed Section 10800 would continue existing Fish and Game Code Section 3080(a) with minor revisions. The revisions would make clear that the section applies to game and fur-bearing mammals, rather than all mammals.

The Commission invites comment on the merits of those revisions.

§ 10805. Possession out of season

10805. A person may possess a game bird, game mammal, or fur-bearing mammal during a period other than the open season for that bird or mammal, up to the possession limit allowed for that bird or mammal during the open season, in any of the following circumstances:

(a) The person possesses a hunting license and a validated tag or tags for the species possessed, or a copy of the license and tag or tags. The license and tag or tags shall have been issued to that person for the current or immediate past license year.

(b) The person is a donor intermediary who received the game bird, game mammal, or fur-bearing mammal from a donor described in paragraph (a), and has a written confirmation of the donation that is signed and dated by the donor, and a photocopy of the donor’s hunting license and the applicable validated tag or tags from the current or immediate past license year.

(c) The person is a donor intermediary who received the game bird, game mammal, or fur-bearing mammal from a donor described in paragraph (a), and has a written confirmation of the donation signed and dated by the donor, which includes the donor’s name, address, hunting license number, and applicable tag numbers for the species possessed. The license and tag or tags shall be for the current or immediate past license year.

Comment. Section 10805 restates former Fish and Game Code Section 3080(b) to make clear that it applies to game mammals and fur-bearing mammals, rather than all mammals.

Note. Proposed Section 10805 would continue existing Fish and Game Code Section 3080(b) with minor revisions. The revisions would make clear that the section applies to game and fur-bearing mammals, rather than all mammals.

The Commission invites comment on the merits of those revisions.

1 **§ 10810. Required documentation**

2 10810. (a) The documentation required by Section 10805 shall be made
3 available to the department as described in Section 8305.

4 (b) There is no required format for the documentation. Any written
5 documentation containing the required information shall be deemed to comply
6 with Section 10805.

7 (c) A charitable organization or charitable entity receiving and distributing a
8 game bird, game mammal, or fur-bearing mammal for a charitable or humane
9 purpose shall maintain the documentation described in subdivisions (b) or (c) of
10 Section 10805 for one year from the date of disposal.

11 **Comment.** Section 10810 continues former Fish and Game Code Section 3080(c) to make
12 clear that it applies to game mammals and fur-bearing mammals, rather than all mammals.

13 **Note.** Proposed Section 10810 would continue existing Fish and Game Code Section 3080(c)
14 with minor revisions. The revisions would make clear that the section applies to game and fur-
15 bearing mammals, rather than all mammals.

16 **The Commission invites comment on the merits of those revisions.**

17 **§ 10815. Exception**

18 10815. This title does not authorize the possession of a game bird contrary to
19 regulations adopted pursuant to the federal Migratory Bird Treaty Act (16 U.S.C.
20 Sec. 703 et seq.).

21 **Comment.** Section 10815 continues former Fish and Game Code Section 3080(d) without
22 substantive change.

23 **§ 10820. Implementing legislation or regulations**

24 10820. On or before January 1, 2015, and subject to the requirements of Section
25 10815, the commission shall recommend legislation or adopt regulations to clarify
26 when a possession limit is not violated by processing into food lawfully taken
27 game birds, game mammals, or fur-bearing mammals.

28 **Comment.** Section 10820 continues former Fish and Game Code Section 3080(e) to make
29 clear that it applies to game mammals and fur-bearing mammals, rather than all mammals.

30 **Note.** Proposed Section 10820 would continue existing Fish and Game Code Section 3080(e)
31 with minor revisions. The revisions would make clear that the section applies to game and fur-
32 bearing mammals, rather than all mammals.

33 **The Commission invites comment on the merits of those revisions.**

34 **§ 10825. Cold storage**

35 10825. Cold storage plants and frozen food locker plants shall make and keep a
36 complete detailed record of all game birds, game mammals, or fur-bearing
37 mammals stored in the plants. A record of each game bird, game mammal, or fur-
38 bearing mammal shall be made at the time it is received at the plant for storage.
39 The record shall be open for inspection at all times by wardens of the department.

40 **Comment.** Section 10825 restates former Fish and Game Code Section 3086 to make clear that
41 it applies to game mammals and fur-bearing mammals, rather than all mammals.

Note. Proposed Section 10825 would continue existing Fish and Game Code Section 3086 with minor revisions. The revisions would make clear that the section applies to game and fur-bearing mammals, rather than all mammals.

The Commission invites comment on the merits of those revisions.

§ 10830. Taxidermy

10830. (a) Every person who prepares, stuffs, or mounts the skin of any fish, reptile, amphibian, bird, or mammal for another person for a fee shall make and keep an accurate and detailed record, as prescribed by regulations of the commission, regarding all fish, reptile, amphibian, bird, or mammal carcasses, skins, or parts thereof that are acquired, possessed, or stored for taxidermy purposes.

(b) The record required by this section shall be made at the time the fish, reptile, amphibian, bird, or mammal carcasses, skins, or parts thereof, are received, and shall include the name and address of each person from and to whom fish, reptile, amphibian, bird, or mammal carcasses, skins, or parts thereof are received or delivered and the number and species of all fish, reptile, amphibian, bird, or mammal carcasses, skins, or parts thereof received or delivered.

(c) The record shall be open for inspection at all times pursuant to regulations adopted by the commission.

(d) Where a taxidermist has prepared, stuffed, or mounted the skin of any fish, reptile, amphibian, bird, or mammal for another person and that person does not pay the cost thereof, or take delivery thereof, the taxidermist may sell the skin only if the commission adopts regulations permitting the sale, as provided in this subdivision.

(1) The commission may adopt regulations permitting a sale pursuant to Chapter 6 (commencing with Section 3046) of Title 14 of Part 4 of Division 3 of the Civil Code, and may adopt any other regulations governing the sale, including, but not limited to, regulations that require a taxidermist to record, and provide to the department, the name and address of any person failing to pay for work performed on a skin, that list species of fish, reptiles, amphibians, birds, or mammals whose prepared skins shall not be sold, and that limit the sales price of prepared skins to the actual cost of preparation.

(2) The commission may adopt regulations permitting a sale of a prepared skin pursuant to this subdivision only if the commission also adopts regulations that require the posting of a notice or otherwise giving notice at the place of business of the taxidermist informing patrons of this subdivision and regulations adopted pursuant to this subdivision.

(e) Upon the second conviction of any person of a violation of this section or any regulation adopted pursuant to this section, in any five-year period, and upon any conviction subsequent to the two convictions during a five-year period, it shall be unlawful for that person to conduct any of the activities described in subdivision (a) for three years from the date of the last conviction.

1 **Comment.** Subdivisions (a) through (d) of Section 10830 continue former Fish and Game
2 Code Section 3087 without substantive change.

3 Subdivision (e) continues former Fish and Game Code Section 12002.11 without substantive
4 change.

5 PART 3. TRAPPING

6 TITLE 1. GENERAL PROHIBITIONS AND 7 REQUIREMENTS

8 CHAPTER 1. GENERAL PROHIBITIONS

9 **§ 11000. Inspection and removal of animals**

10 11000. (a) It is unlawful to fail to visit and remove all animals from traps at least
11 once daily.

12 (b) If trapping is done pursuant to Section 32155, 32305, 35215, 35610, 35710,
13 or 36010, the inspection and removal shall be done by the person who sets the trap
14 or the owner of the land where the trap is set or an agent of either.

15 **Comment.** Section 11000 restates former Fish and Game Code Section 4004(d) without
16 substantive change.

17 See also Section 4806 (enforcement).

18 **§ 11005. Signs warning of conibear traps**

19 11005. (a) When any conibear trap is set on publicly owned land or land
20 expressly open to public use, it is unlawful to fail to post signs at each entrance
21 and exit to the property indicating the presence of conibear traps, and at least four
22 additional signs within a radius of 50 feet of each trap, one in each cardinal
23 direction, with lettering that is a minimum of three inches high stating: “Danger!
24 Traps Set For Wildlife. Keep Out.”

25 (b) Signs required to be posted by this section shall be maintained and checked
26 daily.

27 **Comment.** Section 11005 restates former Fish and Game Code Section 4004(f) without
28 substantive change.

29 See also Section 4806 (enforcement).

30 **Note.** Proposed Section 11005 is intended to restate existing Fish and Game Code Section
31 4004(f) to clarify the meaning of that provision, without changing its substantive effect. The
32 existing provision reads as follows:

33 4004. It is unlawful to do any of the following:

34

35 (f) When any conibear trap is set on publicly owned land or land expressly open to public use,
36 fail to post signs at every entrance and exit to the property indicating the presence of conibear
37 traps and at least four additional signs posted within a radius of 50 feet of the trap, one in each
38 cardinal direction, with lettering that is a minimum of three inches high stating: “Danger! Traps
39 Set For Wildlife. Keep Out.” Signs shall be maintained and checked daily.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 11010. Killing of trapped animal

11010. (a) It is unlawful to kill any trapped mammal by any of the following methods:

(1) Intentional drowning.

(2) Injection with any chemical not sold for the purpose of euthanizing animals.

(3) Thoracic compression, commonly known as chest crushing.

(b) The prohibition in subdivision (a) does not apply to either of the following:

(1) A lawfully set conibear trap that is set partially or wholly submerged in water to trap beaver or muskrat.

(2) A lawfully set colony trap that is set in water to trap muskrat.

Comment. Section 11010 restates former Fish and Game Code Section 4004(g) without substantive change.

See also Section 4806 (enforcement).

 **Notes.** (1) Proposed Section 11010 is intended to restate existing Fish and Game Code Section 4004(g) to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

4004. It is unlawful to do any of the following:

....

(g) Kill any trapped mammal in accordance with this section by intentional drowning, injection with any chemical not sold for the purpose of euthanizing animals, or thoracic compression, commonly known as chest crushing. This subdivision shall not be construed to prohibit the use of lawfully set conibear traps set partially or wholly submerged in water for beaver or muskrat or the use of lawfully set colony traps set in water for muskrat.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Section 4004(g) prohibits killing any trapped mammal “in accordance with this section.” In proposed Section 11010, that limiting language has been deleted. The Commission sees no policy reason why the prohibition on killing trapped mammals by certain methods should only apply to mammals that were trapped lawfully.

The Commission invites comment on whether the deletion of that language creates a problem.

(3) Although animals that are trapped are normally mammals, is it intended that this provision not apply to any other type of animal that is trapped, whether intentionally or inadvertently? The Notes that none of the other prohibitions in existing Section 4004 (which would be continued by the other proposed provisions in this chapter) are limited in their scope to mammals.

The Commission invites comment on whether the word “mammal” in proposed Section 11010(a) should be revised to read “animal.”

§ 11015. Removing or disturbing trap

11015. (a) It is unlawful to remove or disturb the trap of any person with a valid trapping license while the trap is being used by the licensee on public land, or on land where the licensee has permission to trap.

(b) Subdivision (a) does not prohibit the removal or disturbance of a trap by an employee of the department engaged in the performance of official duties.

Comment. Section 11015 continues former Fish and Game Code Section 4009 without substantive change.

See also Section 4806 (enforcement).

§ 11020. Unmarked trap

11020. (a) It is unlawful to set or maintain a trap that does not bear a mark as follows:

(1) If set or maintained by a federal, state, county, or city agency, a mark containing the name of that agency.

(2) If set pursuant to Section 32155, 32305, 35215, 35610, 35710, or 36010, an identifying mark as specified by the department.

(3) In all other cases, a number or other identifying mark registered to the department.

(b) No registration fee shall be charged pursuant to this section.

Comment. Section 11020 restates former Fish and Game Code Section 4004(c) without substantive change.

See also Sections 4800, 4806 (enforcement).

Note. Proposed Section 11020 is intended to restate existing Fish and Game Code Section 4004(c) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

4004. It is unlawful to do any of the following:

....

(c) Set or maintain traps that do not bear a number or other identifying mark registered to the department or, in the case of a federal, state, county, or city agency, bear the name of that agency, except that traps set pursuant to Section 4152 or 4180 shall bear an identifying mark in a manner specified by the department. No registration fee shall be charged pursuant to this subdivision.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

CHAPTER 2. BODY-GRIPPING TRAPS

Note. Existing Fish and Game Code Section 3003.1 is an initiative statute, added to the Fish and Game Code in 1998 by Proposition 4, Section 1. The Commission believes that the nonsubstantive continuation of that provision in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

§ 11100. Definitions

11100. For the purposes of this article, the following terms have the following meanings:

(a) A body-gripping trap is one that grips the mammal's body or body part, including, but not limited to, steel-jawed leghold traps, padded-jaw leghold traps, conibear traps, and snares. Cage and box traps, nets, suitcase-type live beaver

traps, and common rat and mouse traps shall not be considered body-gripping traps.

(b) Fur-bearing mammals, game mammals, nongame mammals, and protected mammals are those mammals so defined by statute on January 1, 1997.

Comment. Subdivision (a) of Section 11100 continues the second and third sentences of former Fish and Game Code Section 3003.1(a) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 3003.1(d) without substantive change.

 **Note.** Section 3003.1 was added by Proposition 4 (1998). The Commission believes that the nonsubstantive continuation of those provisions in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

§ 11105. Use of body-gripping trap for recreation or commerce in fur

11105. It is unlawful to use a body-gripping trap for recreation or commerce in fur.

Comment. Section 11105 continues former Fish and Game Code Section 4004(b) without substantive change.

See also Section 4806 (enforcement).

§ 11110. Use of body-gripping trap generally

11110. Notwithstanding Section 1700, 4400, 4450, 4462, 4600, 4702, 5540, 5800, 9200, 11000, 11005, 11105, 11010, 11020, 11155, 11220, 11225, 11235, 11300, 11310, 11340, Section 31110, subdivision (a) of Section 32150, Section 32155, 32305, 33520, 33710, 35000, 35215, 35610, 35710, 36010, 36015, 37150, subdivision (f) of Section 37355, or Section 37360:

(a) It is unlawful for any person to trap for the purposes of recreation or commerce in fur any fur-bearing mammal or nongame mammal with any body-gripping trap.

(b) It is unlawful for any person to buy, sell, barter, or otherwise exchange for profit, or offer to buy, sell, barter, or otherwise exchange for profit, the raw fur, as defined in Section 475, of a fur-bearing mammal or nongame mammal that was trapped in this state with a body-gripping trap.

(c) It is unlawful for any person, including an employee of the federal, state, county, or municipal government, to use or authorize the use of any steel-jawed leghold trap, padded or otherwise, to capture any game mammal, fur-bearing mammal, nongame mammal, protected mammal, or any dog or cat. The prohibition in this subdivision does not apply to federal, state, county, or municipal government employees or their duly authorized agents in the extraordinary case where the otherwise prohibited padded-jaw leghold trap is the only method available to protect human health or safety.

Comment. Section 11110 continues the first sentence of former Fish and Game Code Section 3003.1(a), subdivision (b), and subdivision (c), without substantive change.

See also Section 4802 (enforcement).

Note. Section 3003.1 was added by Proposition 4 (1998). The Commission believes that the nonsubstantive continuation of those provisions in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

CHAPTER 3. OTHER TRAPS

§ 11150. Steel-jawed, saw-toothed, or spiked jaw trap

11150. It is unlawful to use a steel-jawed leghold trap, or a trap with saw-toothed or spiked jaws.

Comment. Section 11150 continues former Fish and Game Code Section 4004(a) without substantive change.

See also Section 4806 (enforcement).

Note. Existing Fish and Game Code Section 4004 is located in a chapter entitled “Fur-Bearing Mammals.” However, the prohibitions in the section do not on their face appear to be limited in their application to only those mammals, and existing Section 4 provides that “Division, part, chapter, article, and section headings do not in any manner affect the scope, meaning, or intent of the provisions of this code.”

The Commission invites comment as to whether relocation of the prohibitions in Section 4004 as proposed would substantively change the meaning of any provision in Section 4004.

§ 11155. Conibear traps

11155. (a) It is unlawful to use a conibear trap that is larger than 6 inches by 6 inches, unless the trap is partially or wholly submerged in water.

(b) Notwithstanding subdivision (a), a lawfully set conibear trap that is 10 inches by 10 inches or less may be set pursuant to subdivision (g) of Section 465.5 of Title 14 of the California Code of Regulations, unless prohibited by the department as a permit condition.

Comment. Section 11155 restates former Fish and Game Code Section 4004(e) without substantive change.

See also Section 4806 (enforcement).

Note. Proposed Section 11155 is intended to restate existing Fish and Game Code Section 4004(e) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

4004. It is unlawful to do any of the following:

....

(e) Use a conibear trap that is larger than 6 inches by 6 inches, unless partially or wholly submerged in water. Unless prohibited by the department as a permit condition, a lawfully set conibear trap that is 10 inches by 10 inches or less may be set pursuant to subdivision (g) of Section 465.5 of Title 14 of the California Code of Regulations.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

TITLE 2. LICENSES

CHAPTER 1. TRAPPING LICENSE

§ 11200. Required license

11200. (a) Except as otherwise provided in this section, any person who traps fur-bearing mammals or nongame mammals, designated by the commission or who sells raw furs of those mammals, is required to obtain a trapping license.

(b) The license requirement imposed by this section does not apply to any of the following:

(1) Fur dealers.

(2) Officers or employees of federal, county, or city agencies or the department, when acting in their official capacities.

(3) Officers or employees of the Department of Food and Agriculture, when acting pursuant to the Food and Agricultural Code pertaining to pests, or when acting pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(4) Structural pest control operators licensed pursuant to Chapter 14 (commencing with Section 8500) of Division 3 of the Business and Professions Code, when trapping rats, mice, voles, moles, or gophers.

(5) Persons and businesses licensed or certified by the Department of Pesticide Regulation pursuant to Chapter 4 (commencing with Section 11701) and Chapter 8 (commencing with Section 12201) of Division 6 of, and Chapter 3.6, (commencing with Section 14151) of Division 7 of, the Food and Agricultural Code, when trapping rats, mice, voles, moles, or gophers.

(6) Persons trapping mammals in accordance with Section 32305, 32155, 35215, 35610, 35710, or 36010, except when providing trapping services for profit.

Comment. Subdivision (a) and paragraph (b)(1) of Section 11200 restate the first sentence of former Fish and Game Code Section 4005(a) without substantive change.

Paragraphs (b)(2)-(5) continue former Fish and Game Code Section 4005(e) without substantive change.

Paragraph (b)(6) continues former Fish and Game Code Section 4005(c) without substantive change.

See also Section 4806 (enforcement).

Notes. (1) Proposed Sections 11200(a) and 11200(b)(1) are intended to restate the first sentence of existing Fish and Game Code Section 4005(a) to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

Except as otherwise provided in this section, every person, other than a fur dealer, who traps fur-bearing mammals or nongame mammals, designated by the commission or who sells raw furs of those mammals, shall procure a trapping license.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) **The Commission invites comment on the meaning of “designated by the commission” in Section 4005(a).**

(3) The definition of “raw fur” in Section 4005(a) is continued by proposed Section 475.

1 **§ 11205. Sale of raw fur**

2 11205. No raw furs taken by persons providing trapping services for profit may
3 be sold.

4 **Comment.** Section 11205 continues former Fish and Game Code Section 4005(d) without
5 substantive change.

6 See also Section 4806 (enforcement).

7 **Note.** Although existing Section 4005(d) could be read as applying broadly to *all* persons
8 providing trapping services for profit, the provision is oddly placed (in the middle of Section
9 4005) if that is its intended effect. Instead, it may be that the provision is intended to apply only
10 to persons providing trapping services for profit *that are described in existing Section 4005(c)*,
11 the paragraph immediately preceding Section 4005(d).

12 **The Commission invites comment on this issue.**

13 **§ 11210. Standards for license**

14 11210. The department shall develop standards that are necessary to ensure the
15 competence and proficiency of applicants for a trapping license. No person shall
16 be issued a trapping license until passing a test of knowledge and skill in trapping.

17 **Comment.** Section 11210 continues former Fish and Game Code Section 4005(b) without
18 substantive change.

19 **§ 11215. Fee for license**

20 11215. (a) The fee for a trapping license is as follows:

21 (1) For a resident of this state 16 years of age or older, a base fee of forty-five
22 dollars (\$45), adjusted under Section 3755.

23 (2) For a resident of this state under the age of 16 years, a base fee of fifteen
24 dollars (\$15), adjusted under Section 3755.

25 (3) For a nonresident of this state, a base fee of two hundred twenty-five dollars
26 (\$225), adjusted under Section 3755.

27 (b) The commission shall adjust the amount of the fees specified in subdivision
28 (a) as necessary to fully recover, but not exceed, all reasonable administrative and
29 implementation costs of the department and the commission relating to those
30 licenses.

31 **Comment.** Subdivision (a) of Section 11215 continues former Fish and Game Code Section
32 4006(a) without substantive change.

33 Subdivision (b) continues former Fish and Game Code Section 4006(c) without substantive
34 change.

35 **§ 11220. Authorization and term**

36 11220. A trapping license authorizes the licensee to do both of the following:

37 (a) Take fur-bearing mammals and nongame mammals during the open season
38 for those mammals, for a term of one year beginning on July 1, or if the license is
39 issued after the beginning of a term, for the remainder of that term.

40 (b) Sell the raw fur of any animal taken pursuant to subdivision (a).

41 **Comment.** Section 11220 restates former Fish and Game Code Section 4007 without
42 substantive change.

1 **Notes.** (1) Proposed Section 11220 is intended to restate existing Fish and Game Code
2 Section 4007 to improve its clarity, without changing its substantive effect. The existing
3 provision reads as follows:

4 4007. A trapping license authorizes the person to whom it is issued to take, during the open
5 season, fur-bearing mammals and nongame mammals for a term of one year from July 1st, or if
6 issued after the beginning of such term, for the remainder thereof and to sell the raw fur of any
7 such animal.

8 **The Commission invites comment on whether the restatement would cause any**
9 **substantive change in the meaning of the provision.**

10 (2) Section 4007 provides that a trapping license authorizes both specified take of specified
11 animals during a specified term, and the sale of raw fur from the animals taken. However, the
12 phrasing of the provision makes it unclear whether the sale of raw fur may also only occur during
13 the specified term.

14 **The Commission invites comment on whether, under Section 4007, a trapper may sell**
15 **raw fur from an animal taken pursuant to a trapping license at any time, or only during the**
16 **period in which the trapping license is valid.**

17 **§ 11225. Statement of prior year's take**

18 11225. No trapping license shall be issued to any applicant within one year
19 following the expiration of any trapping license previously issued to the applicant,
20 unless the applicant has submitted to the department a sworn statement showing
21 the number of each kind of fur-bearing mammal and nongame mammal taken
22 under the previous license, and the names and addresses of any persons to whom
23 the mammals were shipped or sold.

24 **Comment.** Section 11225 continues former Fish and Game Code Section 4008 without
25 substantive change.

26 **§ 11230. Issuance to nonresident**

27 11230. (a) A trapping license may be issued to a nonresident only if the state in
28 which the nonresident resides provides for issuance of a nonresident trapping
29 license to California residents.

30 (b) A nonresident issued a license under subdivision (a) may take only those
31 species, and may take or possess only that quantity of a species, that a resident of
32 California may take or possess under a nonresident trapping license or permit in
33 the state of residence of that nonresident.

34 **Comment.** Section 11230 continues former Fish and Game Code Section 4006(b) without
35 substantive change.

36 **§ 11235. Commission regulations**

37 11235. The commission may adopt regulations that it determines to be necessary
38 to regulate the taking and sale of fur-bearing mammals or nongame mammals
39 taken under a trapping license.

40 **Comment.** Section 11235 continues former Fish and Game Code Section 4009.5 without
41 substantive change.

CHAPTER 2. FUR DEALER LICENSE

§ 11300. Required license

11300. (a) A person engaging in, carrying on, or conducting wholly or in part the business of buying, selling, trading or dealing in raw furs of fur-bearing mammals or nongame mammals is a fur dealer and shall procure a fur dealer license.

(b) No fur dealer license shall be required of a licensed trapper selling raw furs that were lawfully taken, or a domesticated game breeder selling raw furs of animals that the breeder has raised.

Comment. Section 11300 continues former Fish and Game Code Section 4030 without substantive change.

See also Section 4804 (enforcement).

§ 11305. Fee for license

11305. A revocable fur dealer license shall be issued to any person upon payment of a base fee of seventy dollars (\$70), as adjusted under Section 3755.

Comment. Section 11305 restates former Fish and Game Code Section 4031 without substantive change.

§ 11310. Authorization and term

11310. A fur dealer license authorizes the person to whom it is issued to buy, sell, barter, exchange, or possess raw furs or parts thereof of fur-bearing mammals and nongame mammals for a term of one year beginning on July 1, or if the license is issued after the beginning of the term, for the remainder of the term.

Comment. Section 11310 continues former Fish and Game Code Section 4034 without substantive change.

§ 11315. Fur agent license

11315. (a) Any person who is employed by a licensed fur dealer to engage in the business of buying, selling, trading, or dealing in raw furs only on behalf of the fur dealer, and not on the person's own behalf, is a fur agent.

(b) Except as otherwise provided in this code, it is unlawful to act as a fur agent without a fur agent license.

(c) A revocable fur agent license shall be issued to any person who is employed by a licensed fur dealer upon payment of a base fee of thirty-five dollars (\$35), as adjusted under Section 3755.

Comment. Subdivisions (a) and (b) of Section 11315 continues former Fish and Game Code Section 4032 without substantive change.

Subdivision (c) continues former Fish and Game Code Section 4033 without substantive change.

See also Section 4804 (enforcement).

1 **§ 11320. Display of license**

2 11320. A fur dealer license or fur agent license shall be shown upon request to
3 any person authorized to enforce the provisions of this code.

4 **Comment.** Section 11320 continues former Fish and Game Code Section 4035 without
5 substantive change.

6 **§ 11325. Record of transfers**

7 11325. (a) A fur dealer licensed pursuant to this chapter shall maintain a true
8 and legible record of any transfer of raw furs that includes:

9 (1) The license number, name, and address of any seller.

10 (2) The signature, name, and license number, if applicable, of any buyer.

11 (3) The number and species of raw furs transferred, by county of take.

12 (4) The price paid or terms of exchange.

13 (5) The date of transfer.

14 (6) Any other information that the department requires.

15 (b) The record of sale, exchange, barter, or gift shall be available for inspection
16 at any time by the department.

17 **Comment.** Subdivision (a) of Section 11325 continues former Fish and Game Code Section
18 4037 without substantive change.

19 Subdivision (b) continues former Fish and Game Code Section 4038 without substantive
20 change.

21 **§ 11330. Annual report**

22 11330. Each licensed fur dealer shall submit an annual report to the department
23 on the sale, exchange, barter, or gift of raw furs, on forms furnished by the
24 department. No license shall be renewed until the report is received.

25 **Comment.** Section 11330 continues former Fish and Game Code Section 4040 without
26 substantive change.

27 **§ 11335. Confidentiality of documents**

28 11335. The receipts, records, and reports required by this chapter, and the
29 information contained in those documents, shall be confidential, and the records
30 shall not be public records. Any publication of information in the documents shall
31 preserve the confidentiality of the persons involved.

32 **Comment.** Section 11335 continues former Fish and Game Code Section 4041 without
33 substantive change.

34 **§ 11340. Regulation**

35 11340. The commission may regulate the buying, selling, trading, or dealing in
36 raw fur or part of raw fur of any fur-bearing mammal or nongame mammal under
37 a fur dealer license.

38 **Comment.** Section 11340 continues former Fish and Game Code Section 4042 without
39 substantive change.

40 See also Section 4804 (enforcement).

1 **§ 11350. Purchase of raw fur from unlicensed person**

2 11350. It shall be unlawful for any fur dealer to purchase the raw fur of any fur-
3 bearing mammal or nongame mammal from any person who does not hold a valid
4 trapping license, fur dealer license, or fur agent license.

5 **Comment.** Section 11350 continues former Fish and Game Code Section 4036 without
6 substantive change.

7 See also Section 4804 (enforcement).

8 **PART 4. FISHING GENERALLY**

9 **TITLE 1. GENERAL PROVISIONS**

10 **§ 11500. Restriction on take based on human health risk**

11 11500. (a) (1) If the Director of Environmental Health Hazard Assessment, in
12 consultation with the State Public Health Officer, determines, based on thorough
13 and adequate scientific evidence, that any species or subspecies of fish is likely to
14 pose a human health risk from high levels of toxic substances, the Director of Fish
15 and Wildlife may order the closure of any waters or otherwise restrict the taking in
16 state waters of that species.

17 (2) After the Director of Fish and Wildlife orders the closure of any waters or
18 restricts the taking of any species of fish pursuant to paragraph (1), he or she shall
19 notify the commission and request that the commission schedule a public
20 discussion of the closure or restriction at its next scheduled full commission
21 meeting.

22 (b) (1) When the Director of Environmental Health Hazard Assessment, in
23 consultation with the State Public Health Officer, determines that a health risk no
24 longer exists, the Director of Environmental Health Hazard Assessment shall
25 notify the Director of Fish and Wildlife and shall request that any waters closed
26 pursuant to subdivision (a) be reopened for fishing and any restrictions imposed
27 pursuant to subdivision (a) be lifted.

28 (2) Upon receiving the notification and request pursuant to paragraph (1), the
29 Director of Fish and Wildlife shall open any waters closed pursuant to subdivision
30 (a) and lift any restrictions imposed pursuant to subdivision (a) in a manner that
31 promotes a fair and orderly fishery.

32 (c) It is unlawful to take any fish from any closed waters or to otherwise violate
33 any restriction on take imposed pursuant to this section.

34 (d) If there is a delay in the opening of any waters for Dungeness crab season
35 pursuant to this section, the Director of Fish and Wildlife may further delay
36 opening those waters in order to provide 72-hours notice before a gear setting
37 period. If, with 72-hours notice, the gear setting period would begin on a federal
38 holiday, a state holiday, the day before Thanksgiving Day, December 24, or
39 December 31, the director may delay opening those waters for the additional time

1 that is necessary to begin the gear setting period on the next day that is not one of
2 those days.

3 (e) Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of
4 Title 2 of the Government Code does not apply to actions taken pursuant to this
5 section.

6 **Comment.** Section 11500 continues former Fish and Game Code Section 5523 without
7 substantive change.

8 **Note.** Proposed Section 11500 would continue Section 5523, which was amended by 2018
9 Cal. Stat. ch. 663 as an urgency measure.

10 **§ 11505. Take from propagation or conservation facilities**

11 11505. It is unlawful to take a fish in a pond, reservoir, or other water-retaining
12 structure that belongs to or is controlled by the department and used for
13 propagating, raising, holding, protecting, or conserving fish.

14 **Comment.** Section 11505 continues former Fish and Game Code Section 1124 without
15 substantive change.

16 **§ 11510. Fish spear or gaff**

17 11510. (a) It is unlawful for a person to possess a fish spear or gaff within 300
18 feet of a lake or stream in this state, at a time when spearing is prohibited in that
19 lake or stream.

20 (b) This section does not apply to either of the following acts:

21 (1) Possession of a gaff carried as an accessory while angling.

22 (2) Possession of a fish spear or gaff in one's own home.

23 **Comment.** Section 11510 restates former Fish and Game Code Section 5507 without
24 substantive change.

25 **Note.** Proposed Section 11510 is intended to restate existing Fish and Game Code Section
26 5507 to clarify the meaning of that provision, without changing its substantive effect. The
27 existing provision reads as follows:

28 5507. It is unlawful for any person to possess, except in his home, any fish spear or gaff within
29 300 feet of any lake or stream in this State, at any time when spearing is prohibited in such lake
30 or stream. This section does not apply to the possession of a gaff carried as an accessory while
31 angling.

32 **The Commission invites comment on whether the restatement would cause any**
33 **substantive change in the meaning of the provision.**

34 **§ 11515. Possession when size or weight cannot be determined**

35 11515. (a) It is unlawful to possess on a boat, or to bring ashore, a fish for which
36 a size or weight limit is prescribed, in such a condition that its size or weight
37 cannot be determined.

38 (b) The commission may adopt regulations allowing fish other than whole fish
39 to be brought ashore, which establish sizes or weights for cleaned or otherwise cut
40 fish equivalent to sizes or weights for whole fish.

1 **Comment.** Section 11515 continues former Fish and Game Code Section 5508 without
2 substantive change.

3 **§ 11520. Possession when species cannot be determined**

4 11520. (a) It is unlawful to possess on a boat, or to bring ashore, a fish in such a
5 condition that its species cannot be determined, except as otherwise provided in
6 this code or regulations adopted pursuant to this code.

7 (b) Subject to Section 11515, the commission may adopt regulations allowing
8 fish taken by a person fishing from a vessel licensed pursuant to Section 21905 to
9 be brought ashore in such a condition that its species cannot be determined.

10 **Comment.** Section 11520 continues former Fish and Game Code Section 5509 without
11 substantive change.

12 **§ 11525. Removal of eggs**

13 11525. (a) It is unlawful to take any fish for the sole purpose of removing its
14 eggs, except for the purpose of developing a brood stock for aquaculture purposes
15 under Part 1 (commencing with Section 23300) of Division 7 pursuant to
16 regulations adopted by the Fish and Game Commission.

17 (b) The commission shall determine ownership and regulate distribution of
18 progeny taken from wild brood stock, other than those obtained pursuant to
19 Section 23900.

20 **Comment.** Section 11525 continues former Fish and Game Code Section 5503 without
21 substantive change.

22 **§ 11535. Use of artificial bait**

23 11535. A river, stream, lake, or other body of water restricted by the
24 commission to the use of only artificial flies or artificial lures for fishing shall be
25 posted by the department at logical places of entry so as to inform persons fishing
26 in those waters as to the nature of the restrictions.

27 **Comment.** Section 11535 continues former Fish and Game Code Section 5516 without
28 substantive change.

29 **§ 11540. Predatory fish**

30 11540. The department may take any fish that, in its opinion, is unduly preying
31 upon any bird, mammal, or fish. The commission may prescribe the terms of a
32 permit to take any fish that, in the opinion of the department, is harmful to other
33 species of fish and should be reduced in numbers.

34 **Comment.** Section 11540 continues former Fish and Game Code Section 5501 without
35 substantive change.

1 TITLE 2. FISHERIES GENERALLY

2 CHAPTER 1. TROUT AND STEELHEAD CONSERVATION AND MANAGEMENT
3 PLANNING ACT OF 1979

4 § 11700. Name of act

5 11700. This act shall be known as the Trout and Steelhead Conservation and
6 Management Planning Act of 1979.

7 **Comment.** Section 11700 continues former Fish and Game Code Section 1725 without
8 substantive change.

9 § 11705. Declaration of policy

10 11705. The Legislature hereby finds and declares that it is the policy of the state
11 to do all of the following:

12 (a) Establish and maintain wild trout stocks that, to the extent possible, should
13 be native fish, in suitable waters of the state that are readily accessible to the
14 general public as well as in those waters in remote areas.

15 (b) Establish angling regulations designed to maintain the wild trout fishery in
16 those waters by natural reproduction.

17 (c) Discourage artificial planting of hatchery-raised hybrid and nonnative fish
18 species in wild trout waters or in other areas that would adversely affect native
19 aquatic and nonaquatic species.

20 **Comment.** Section 11705 continues former Fish and Game Code Section 1726 without
21 substantive change.

22 § 11710. Declaration of need

23 11710. The Legislature further finds and declares all of the following:

24 (a) Hatchery production and stocking of California's waters started over 140
25 years ago and is an enduring part of California's history and attempts to steward
26 its natural resources.

27 (b) Sustainable and adaptive management provides and improves recreational
28 angling opportunities while protecting and maintaining native and wild trout
29 fisheries, other species, and their mutual habitat.

30 (c) Management of the genetic diversity of California's native trout species is
31 imperative.

32 (d) Habitat restoration and the protection of cold water ecosystems are both of
33 utmost importance to maintaining healthy wild trout populations, ensuring and
34 promoting angler opportunities, and the sustainability of the inland trout fishery.

35 (e) The department shall seek to provide and enhance diverse recreational
36 angling opportunities in California.

37 **Comment.** Section 11710 continues former Fish and Game Code Section 1726.1 without
38 substantive change.

1 **§ 11715. Determinations by department**

2 11715. (a) For the purposes of this chapter, “trout” includes steelhead trout.

3 (b) The department, in administering its existing wild trout program, shall
4 maintain an inventory of all California trout streams and lakes to determine the
5 most suitable angling regulations for each stream or lake. The department shall
6 determine for each stream or lake whether it should be managed as a wild trout
7 fishery, or whether its management should involve the temporary planting of
8 native trout species to supplement wild trout populations that is consistent with
9 this chapter. In maintaining the inventory, the department shall give priority to
10 those streams and lakes that have the highest biological potential for producing
11 sizeable wild trout, which are inhabited by rare species, or where the quality of the
12 fishery is threatened or endangered and take into consideration public use. The
13 biological and physical inventories prepared and maintained for each stream,
14 stream system, or lake shall include an assessment of the resource status, threats to
15 the continued well-being of the fishery resource, the potential for fishery resource
16 development, and recommendations, including necessary changes in the allowed
17 take of trout, for the development of each stream or lake to its full capacity as a
18 fishery, consistent with this chapter.

19 (c) This section does not provide any public entity or private party with any new
20 or additional authority to affect the management of, or access to, any private land
21 without the written consent of the owner. Privately owned lakes and ponds not
22 open to the use of the general public shall be subject to this section only with the
23 written consent of the owner. This chapter shall not be construed as authorizing or
24 requiring special treatment of adjacent land areas or requiring land use restrictions.
25 It is the intent of the Legislature that this chapter should not diminish the existing
26 authority of the department.

27 (d) The department shall make the inventory maintained pursuant to subdivision
28 (b) publicly available on the department’s Internet Web site and the department
29 shall continuously revise that inventory with the goal of reviewing every
30 watershed once per decade.

31 **Comment.** Section 11715 continues former Fish and Game Code Section 1726.4 without
32 substantive change.

33 **§ 11720. Declaration regarding funding**

34 11720. The Legislature further finds and declares that activities and programs
35 mandated by this chapter are a continuation and perpetuation of the department’s
36 existing wild trout program and other programs, and as such they shall be funded
37 from existing budgetary resources.

38 **Comment.** Section 11720 continues former Fish and Game Code Section 1726.5 without
39 substantive change.

1 **§ 11725. Declaration of intended development**

2 11725. (a) In order to provide for a diversity of available angling experiences
3 throughout the state, it is the intent of the Legislature that the commission
4 maintain the existing wild trout program, and as part of the program, develop
5 additional wild trout waters in the more than 20,000 miles of trout streams and
6 approximately 5,000 lakes containing trout in California.

7 (b) The department shall prepare a list of no less than 25 miles of stream or
8 stream segments and at least one lake that it deems suitable for designation as wild
9 trout waters. The department shall submit this list to the commission for its
10 consideration at the regular October commission meeting.

11 (c) The commission may remove any stream or lake that it has designated as a
12 wild trout fishery from the program at any time. If any of those waters are
13 removed from the program, an equivalent amount of stream mileage or an
14 equivalent size lake shall be added to the wild trout program.

15 (d) The department shall prepare and complete management plans for all wild
16 trout waters not more than three years following their initial designation by the
17 commission and update the management plan every five years following
18 completion of the initial management plan.

19 **Comment.** Section 11725 continues former Fish and Game Code Section 1727 without
20 substantive change.

21 **§ 11730. Update of trout management plan**

22 11730. (a) Every five years the department shall update the Strategic Plan for
23 Trout Management published in November 2003 as necessary to guide the state's
24 trout management.

25 (b) The Strategic Plan for Trout Management shall be intended to ensure all of
26 the following:

27 (1) Thriving and self-sustaining, wild and native trout populations throughout
28 their historic ranges.

29 (2) Providing and improving angling opportunities for wild and native trout and
30 other trout.

31 (3) Providing for the conservation of wild and native trout.

32 (4) Environmental sustainability and overall ecosystem and watershed health.

33 (c) The Strategic Plan for Trout Management shall be guided by all of the
34 following considerations:

35 (1) Adaptively managing trout populations, including, but not limited to,
36 stocking practices, to establish thriving and self-sustaining native and wild trout
37 fisheries in wild trout waters and, where possible, in other waters.

38 (2) Increasing angler satisfaction.

39 (3) Ensuring appropriate age distribution of wild trout when appropriate.

40 (4) Establishing ecologically and environmentally sustainable hatchery and
41 stocking practices for native trout, including, but not limited to, the following:

42 (A) Hatchery and stocking practices consistent with this chapter.

1 (B) Stocking plans shall include consideration of angler satisfaction and public
2 use of, and access to, the waters for angling. This may include, but is not limited
3 to, harvest and catch rates, including, but not limited to, trophy catch rates, the
4 potential for high angler satisfaction, and where appropriate, put and grow
5 stocking.

6 (C) Native trout shall be preferentially stocked when stocking is employed.

7 (D) Designing stocking plans to maintain and optimize the genetic diversity of
8 trout populations and to be consistent with the direction provided by the strategic
9 trout management team.

10 (E) Stocking plans for species listed in Section 420 shall not exceed the
11 documented biological carrying capacity of the water or ecosystem.

12 (5) Integrating stakeholder involvement into the planning process.

13 (6) Monitoring and evaluating management processes through angler surveys,
14 public meetings coordinated with county fish and game commissions, or by other
15 means.

16 (d) The department shall prepare and complete trout management plans
17 consistent with the Strategic Plan for Trout Management for all wild trout waters
18 not more than three years following their initial designation by the commission.
19 The department shall update the management plan every five years or as necessary
20 following completion of the initial management plan. The department shall
21 prepare trout management plans for other waters consistent with the Strategic Plan
22 for Trout Management as appropriate.

23 (e) Before implementation, the Strategic Plan for Trout Management produced
24 by the department shall be reviewed by the strategic trout management team, the
25 hatchery operations committee, and an ad hoc peer review committee convened by
26 the department to ensure compliance with sound management practices, improved
27 genetic diversity, and use of the best available scientific information.

28 (f) The Strategic Plan for Trout Management and plans completed pursuant to
29 subdivision (d) shall be publicly available on the department's Internet Web site.

30 **Comment.** Section 11730 continues former Fish and Game Code Section 1728 without
31 substantive change.

32 **§ 11735. Priority for stocking native hatchery-produced species**

33 11735. (a) The department shall give priority to stocking native hatchery-
34 produced species in California's waters, where stocking is determined to be
35 appropriate by the department. Stocking of hatchery-produced fish is not
36 appropriate in all of California's waters, including, but not limited to, stocking in
37 California's waters that would adversely affect species listed under the federal
38 Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.) or the California
39 Endangered Species Act (Part 1 (commencing with Section 62000) of Division
40 17).

1 (b) Hatchery-produced trout shall be stocked to support sustainable angling
2 recreation and promote angler access to trout fishing, including, but not limited to,
3 urban fisheries.

4 (c) The department may provide outreach and educational materials to all
5 anglers to promote awareness of environmental sustainability, ecosystem health,
6 fish genetics, angling opportunities, and fish population management.

7 (d) Educational programs utilizing the hatcheries shall be encouraged.

8 (e) The department shall ensure that all trout stocked in waters of the state for
9 recreational purposes are unable to reproduce through triploidy or other means,
10 with the exception of fish planted into brood stock lakes, surplus brood stock
11 planted according to fishery management decisions, fish planted to supplement
12 waters that the department has determined to be genetically isolated from native
13 fish populations, and native trout species produced for recovery and restoration
14 within their native range.

15 (f) The department may develop, conduct, and respond to regular angler
16 preference and satisfaction surveys. This is not a substitute for a preferred
17 scientific data collection and monitoring program that would facilitate adaptive
18 management of California's inland trout fisheries.

19 (g) The department shall review angling regulations periodically and adjust
20 those regulations to ensure consistency with the strategic plan described in Section
21 11730.

22 **Comment.** Section 11735 continues former Fish and Game Code Section 1729 without
23 substantive change.

24 **§ 11740. Intradepartmental strategic trout management team**

25 11740. (a) By January 1, 2014, the department shall form an intradepartmental
26 strategic trout management team to provide direction and oversee trout
27 management statewide. Working under the framework of the Strategic Plan for
28 Trout Management, the strategic trout management team shall direct and
29 implement focused management and monitoring efforts for trout at the watershed
30 level, in cooperation with local stakeholders.

31 (b) The strategic trout management team shall be responsible for developing
32 basin management plans that are conservation based and are consistent throughout
33 California for inland watersheds.

34 (c) The basin plans in subdivision (b) shall be reviewed by an ad hoc peer
35 review committee, which may be convened under the guidance of the
36 department's Science Institute to ensure compliance with sound management
37 practices and utilization of the best available scientific information.

38 **Comment.** Section 11740 continues former Fish and Game Code Section 1730 without
39 substantive change.

1 CHAPTER 2. SALMON, STEELHEAD TROUT, AND ANADROMOUS
2 FISHERIES PROGRAM ACT

3 § 11800. Title

4 11800. This chapter shall be known and may be cited as the Salmon, Steelhead
5 Trout, and Anadromous Fisheries Program Act.

6 **Comment.** Section 11800 continues former Fish and Game Code Section 6900 without
7 substantive change.

8 § 11805. Definitions

9 11805. Unless the context clearly requires a different meaning, the following
10 definitions govern the construction of this chapter:

11 (a) “Production” means the survival of fish to adulthood as measured by the
12 abundance of the recreational and commercial catch together with the return of
13 fish to the state’s spawning streams.

14 (b) “Program” means the program for protecting and increasing the naturally
15 spawning salmon and steelhead trout of the state provided for in Section 11825.

16 **Comment.** The introductory clause of Section 11805 continues former Fish and Game Code
17 Sections 6910.

18 Subdivision (a) continues former Fish and Game Code Section 6911 without substantive
19 change.

20 Subdivision (b) continues former Fish and Game Code Section 6912 without substantive
21 change.

22 § 11810. Legislative findings

23 11810. The Legislature, for purposes of this chapter, finds as follows:

24 (a) According to the department, the natural production of salmon and steelhead
25 trout in California has declined to approximately 1,000,000 adult chinook or king
26 salmon, 100,000 coho or silver salmon, and 150,000 steelhead trout.

27 (b) The naturally spawning salmon and steelhead trout resources of the state
28 have declined dramatically within the past four decades, primarily as a result of
29 lost stream habitat on many streams in the state.

30 (c) Much of the loss of salmon and steelhead trout and anadromous fish in the
31 state has occurred in the central valley.

32 (d) Protection of, and an increase in, the naturally spawning salmon and
33 steelhead trout resources of the state would provide a valuable public resource to
34 the residents, a large statewide economic benefit, and would, in addition, provide
35 employment opportunities not otherwise available to the citizens of this state,
36 particularly in rural areas of present underemployment.

37 (e) Proper salmon and steelhead trout resource management requires
38 maintaining adequate levels of natural, as compared to hatchery, spawning and
39 rearing.

40 (f) Reliance upon hatchery production of salmon and steelhead trout in
41 California is at or near the maximum percentage that it should occupy in the mix

1 of natural and artificial hatchery production in the state. Hatchery production may
2 be an appropriate means of protecting and increasing salmon and steelhead in
3 specific situations; however, when both are feasible alternatives, preference shall
4 be given to natural production.

5 (g) The protection of, and increase in, the naturally spawning salmon and
6 steelhead trout of the state must be accomplished primarily through the
7 improvement of stream habitat.

8 (h) Funds provided by the Legislature since 1978 to further the protection and
9 increase of the fisheries of the state have been administered by the department in a
10 successful program of contracts with local government and nonprofit agencies and
11 private groups in ways that have attracted substantial citizen effort.

12 (i) The department's contract program has demonstrated that California has a
13 large and enthusiastic corps of citizens that are eager to further the restoration of
14 the stream and fishery resources of this state and that are willing to provide
15 significant amounts of time and labor to that purpose.

16 (j) There is need for a comprehensive salmon, steelhead trout, and anadromous
17 fisheries plan, program, and state government organization to guide the state's
18 efforts to protect and increase the naturally spawning salmon, steelhead trout, and
19 anadromous fishery resources of the state.

20 **Comment.** Section 11810 continues former Fish and Game Code Section 6901 without
21 substantive change.

22 **§ 11815. Legislative policy declarations**

23 11815. The Legislature, for purposes of this chapter, declares as follows:

24 (a) It is the policy of the state to significantly increase the natural production of
25 salmon and steelhead trout by the end of this century. The department shall
26 develop a plan and a program that strives to double the current natural production
27 of salmon and steelhead trout resources.

28 (b) It is the policy of the state to recognize and encourage the participation of the
29 public in privately and publicly funded mitigation, restoration, and enhancement
30 programs in order to protect and increase naturally spawning salmon and steelhead
31 trout resources.

32 (c) It is the policy of the state that existing natural salmon and steelhead trout
33 habitat shall not be diminished further without offsetting the impacts of the lost
34 habitat.

35 **Comment.** Section 11815 continues former Fish and Game Code Section 6902 without
36 substantive change.

37 **§ 11820. Nonprofit salmon release and return operations**

38 11820. (a) It is the policy of the state and the department to encourage nonprofit
39 salmon release and return operations subject to this code operated by, or on behalf
40 of, licensed commercial salmon fishermen for the purpose of enhancing

1 California's salmon populations and increasing the salmon harvest by commercial
2 and recreational fishermen.

3 (b) The department shall, to the extent that funds and personnel are available,
4 cooperate with fishing organizations in the siting and establishment of those
5 operations to ensure the protection of natural spawning stocks of native salmon.
6 The organizations conducting the operations may receive salmon eggs and
7 juvenile salmon for the purposes of the operation, and, where appropriate, shall
8 have priority to receive salmon eggs and juvenile salmon for those purposes after
9 the needs of habitat mitigation efforts, and state hatcheries are met.

10 **Comment.** Section 11820 continues former Fish and Game Code Section 6903 without
11 substantive change.

12 **§ 11825. Creation of program**

13 11825. (a) The department shall, with the advice of the Advisory Committee on
14 Salmon and Steelhead Trout and the Commercial Salmon Trollers Advisory
15 Committee, prepare and maintain a detailed and comprehensive program for the
16 protection and increase of salmon, steelhead trout, and anadromous fisheries.

17 (b) The program shall identify the measures the department will carry out to
18 achieve the policies set forth in Section 11815.

19 **Comment.** Subdivision (a) of Section 11825 continues former Fish and Game Code Section
20 6920(a) without substantive change.

21 Subdivision (b) continues former Fish and Game Code Section 6921 without substantive
22 change.

23 **§ 11830. Consultation with other agencies**

24 11830. The department shall consult with every public agency whose policies or
25 decisions may affect the goals of this program to determine if there are feasible
26 means for those public agencies to help the department achieve the goals of this
27 program.

28 **Comment.** Section 11830 continues former Fish and Game Code Section 6920(b) without
29 substantive change.

30 **§ 11835. Report of determined elements of program**

31 11835. The department shall determine the initial elements of the program and
32 transmit a report describing those elements to the Legislature and the Advisory
33 Committee on Salmon and Steelhead Trout by March 31, 1989.

34 **Comment.** Section 11835 continues former Fish and Game Code Section 6924 without
35 substantive change.

36 **Note.** Existing Fish and Game Code Section 6924 (which would be continued by proposed
37 Section 11835) requires the Department to take specified actions within six months of the
38 effective date of the chapter in which Section 6924 appears (Chapter 8 (commencing with Section
39 6900) of Part 1 of Division 6 of the existing code).

40 The effective date of that chapter (added by 1988 Cal. Stat. ch. 1545) was January 1, 1989,
41 suggesting the strong likelihood that the Department has long ago complied with the one-time
42 requirements of Section 6924.

1 **The Commission invites comment on whether existing Section 6924 can be discontinued**
2 **from the proposed law as obsolete.**

3 **§ 11840. Ineligibility**

4 11840. Measures that are the responsibility of other agencies or persons, such as
5 the repair or replacement of dysfunctional fish screens, are not eligible for funding
6 under the program.

7 **Comment.** Section 11840 continues former Fish and Game Code Section 6923 without
8 substantive change.

9 **§ 11845. Program elements**

10 11845. The program shall include, but is not limited to, all of the following
11 elements:

12 (a) Identification of streams where the natural production of salmon and
13 steelhead trout can be increased primarily through the improvement of stream and
14 streambank conditions without effect on land ownership, land use practices, or
15 changes in streamflow operations.

16 (b) Identification of streams where the natural production of salmon and
17 steelhead trout can be increased only through the improvement of land use
18 practices or changes in streamflow operations.

19 (c) Identification of streams where the protection of, and increase in, salmon and
20 steelhead trout resources require, as a result of significant prior loss of stream
21 habitat, the construction of artificial propagation facilities.

22 (d) A program element for evaluating the effectiveness of the program.

23 (e) Recommendations for an organizational structure, staffing, budgeting, long-
24 term sources of funding, changes in state statutes and regulations and federal and
25 local government policy and such other administrative and legislative actions as
26 the department finds to be necessary to accomplish the purposes of this chapter.

27 (f) Identification of measures to protect and increase the production of other
28 anadromous fisheries consistent with policies set forth in Section 11815.

29 (g) Identification of alternatives to, or mitigation of, manmade factors that cause
30 the loss of juvenile and adult fish in California's stream system.

31 **Comment.** Section 11845 continues former Fish and Game Code Section 6922 without
32 substantive change.

33 **§ 11850. Study of effect of reduced flow**

34 11850. (a) Subject to the availability of funds for the purposes of this section,
35 the department shall contract with the University of California to conduct a study
36 of the effects that reduced waterflows at the mouths and upstream estuaries of
37 rivers selected under subdivision (b) would have on existing salmon and steelhead
38 populations, and on existing or prospective salmon and steelhead population
39 restoration or reintroduction programs.

1 (b) The department shall select the rivers to be included in the study, and shall
2 limit its selection to rivers that satisfy both of the following conditions:

3 (1) The river is within the combined river systems described in paragraph (7) of
4 subdivision (a) of Section 1215.5 of the Water Code.

5 (2) The river is the subject of an application filed with the State Water
6 Resources Control Board to appropriate water in an amount equal to more than
7 three cubic feet per second or more than 500 acre feet per annum of storage,
8 involving the delivery of water by means other than a pipeline, natural
9 watercourse, well, or aqueduct, to any place of use that is outside of the protected
10 area described in paragraph (7) of subdivision (a) of Section 1215.5 of the Water
11 Code.

12 (c) The findings of the study conducted under this section shall be a factor in
13 any decision of the State Water Resources Control Board to approve or deny an
14 application to appropriate water from any river selected under this section. If the
15 application involves the delivery of water, by means other than a pipeline, natural
16 watercourse, well, or aqueduct, to any place of use outside of the protected area
17 described in paragraph (7) of subdivision (a) of Section 1215.5 of the Water Code,
18 the board may not approve that application until after the study has been
19 completed.

20 (d) Any study conducted pursuant to this section shall conclude within five years
21 of the start of that study.

22 (e) This section applies to the University of California only if the Regents of the
23 University of California, by resolution, make it applicable to the university.

24 **Comment.** Section 11850 continues former Fish and Game Code Section 6930 without
25 substantive change.

26 CHAPTER 3. KEENE-NIELSEN FISHERIES RESTORATION ACT OF 1985

27 § 11900. Title

28 11900. This chapter shall be known and may be cited as the Keene-Nielsen
29 Fisheries Restoration Act of 1985.

30 **Comment.** Section 11900 continues former Fish and Game Code Section 2760 without
31 substantive change.

32 § 11905. Legislative findings and declarations

33 11905. The Legislature finds and declares as follows:

34 (a) Many of California's significant fish and wildlife resources in inland and
35 coastal waters have declined as the result of many development projects which
36 have provided valuable economic growth.

37 (b) Fish and wildlife have been adversely affected by water developments that
38 have significantly altered water flows in many of California's rivers and streams,
39 thereby affecting fish and wildlife, their habitat, adjacent riparian habitat,
40 spawning areas, and migration routes.

1 (c) Fish and wildlife are important public resources with significant economical,
2 environmental, recreational, aesthetic, and educational values.

3 (d) California intends to make reasonable efforts to prevent further declines in
4 fish and wildlife, to restore fish and wildlife to historic levels where possible, and
5 to enhance fish and wildlife resources where possible.

6 (e) Protection of, and an increase in, the naturally spawning salmon and
7 steelhead trout resources of the state would provide a valuable public resource to
8 the residents, a large statewide economic benefit, and would, in addition, provide
9 employment opportunities not otherwise available to the citizens of this state,
10 particularly in rural areas of underemployment.

11 (f) The protection of, and increase in, the naturally spawning salmon and
12 steelhead trout resources of the state should be accomplished primarily through the
13 improvement of stream habitat.

14 (g) The Salmon, Steelhead Trout, and Anadromous Fisheries Program Act
15 (Chapter 2 (commencing with Sec. 11800)), declares that it is the policy of the
16 state to increase the state's salmon and steelhead trout resources, and directs the
17 department to develop a plan and program that strives to double the salmon and
18 steelhead trout resources.

19 **Comment.** Section 11905 continues former Fish and Game Code Section 2761 without
20 substantive change.

21 **§ 11910. Fisheries Restoration Account**

22 11910. (a) The Fisheries Restoration Account is hereby created in the Fish and
23 Game Preservation Fund. The moneys in the Fisheries Restoration Account are
24 hereby appropriated to the department for expenditure in fiscal years 1991–92 to
25 1993–94, inclusive, pursuant to subdivision (b).

26 (b) The moneys in the Fisheries Restoration Account may be expended for the
27 construction, operation, and administration of projects designated in the plan
28 developed by the department in accordance with the Salmon, Steelhead Trout, and
29 Anadromous Fisheries Program Act (Chapter 2 (commencing with Sec. 11800)),
30 and projects designed to restore and maintain fishery resources and their habitat
31 that have been damaged by past water diversions and projects and other
32 development activities. Expenditures shall not be authorized for a project to be
33 funded under this subdivision before a date that is 30 days after the department has
34 furnished a copy of the proposal for the project to be funded, together with
35 supporting descriptions, to the Joint Committee on Fisheries and Aquaculture and
36 to the Joint Legislative Budget Committee. These projects shall have as their
37 primary objective the restoration of fishery resources identified in the Salmon,
38 Steelhead Trout, and Anadromous Fisheries Program Act. Projects may include,
39 but shall not be limited to, watershed assessments, fisheries restoration planning,
40 acquisition of lands, restoration of habitat, restoration or creation of spawning
41 areas, construction of fish screens or fish ladders, stream rehabilitation, and
42 installation of pollution control facilities. Projects for restoration or creation of

1 spawning areas shall utilize natural spawning rather than hatcheries to the extent
2 possible.

3 Under no circumstances shall any water project be absolved under this
4 subdivision of any mitigation requirements that are placed upon it under existing
5 law.

6 No land shall be acquired pursuant to this chapter by eminent domain
7 proceedings.

8 (c) Priority for funding shall be given to projects that employ fishermen, fish
9 processing workers, and others who are unemployed or underemployed due to the
10 elimination of a commercial fishing season as a result of restrictions imposed by
11 federal regulations. This priority shall remain in effect only as long as those
12 restrictions are in force.

13 (d) Expenditures shall not be authorized for multiyear projects funded under
14 subdivision (b) before a date that is 30 days after the department has submitted an
15 annual progress report on the project and a copy of the work schedule for
16 subsequent year funding of the project to the Joint Committee on Fisheries and
17 Aquaculture and to the Joint Legislative Budget Committee.

18 (e) The department shall conduct a preproject and postproject evaluation on each
19 project recommended in the plan and program developed by the department in
20 accordance with the Salmon, Steelhead Trout, and Anadromous Fisheries Program
21 Act for which money has been appropriated from the Fisheries Restoration
22 Account.

23 (f) The department may expend not more than 5 percent of the funds annually
24 appropriated from the Fisheries Restoration Account for the administration of
25 projects.

26 (g) The department may contract for services for the purpose of conducting a
27 preproject and postproject evaluation or for the administration of projects.

28 (h) The department shall, during the last fiscal year of funding, conduct a review
29 of all previous and ongoing projects to determine if the elements of the plan and
30 program developed by the department pursuant to the Salmon, Steelhead Trout,
31 and Anadromous Fisheries Program Act are being met, including the goal of
32 doubling the 1988 population of salmon and steelhead trout, as declared in Section
33 11815.

34 **Comment.** Section 11910 continues former Fish and Game Code Section 2762 without
35 substantive change.

36 **§ 11915. Partial funding of projects**

37 11915. The department may advance partial finding, of up to 50 percent of the
38 amount contracted for, to contractors for projects under subdivision (b) of Section
39 11910 if the director finds the organization meets all of the following
40 requirements:

41 (1) It has a previously demonstrated record of successfully completing one or
42 more fishery restoration projects funded under contract with the department.

1 (2) It utilizes generally accepted accounting procedures.

2 (3) It demonstrates that the project can be accomplished more efficiently and
3 economically with partial funding advanced at the initiation of the project.

4 **Comment.** Section 11915 continues former Fish and Game Code Section 2762.2 without
5 substantive change.

6 **§ 11920. Administrative costs of Advisory Committee on Salmon and Steelhead Trout**

7 11920. In addition to subdivision (b) of Section 11910, the moneys in the
8 Fisheries Restoration Account may be expended, upon appropriation by the
9 Legislature, by the department to fund the administrative costs of the Advisory
10 Committee on Salmon and Steelhead Trout.

11 **Comment.** Section 11920 continues former Fish and Game Code Section 2762.5 without
12 substantive change.

13 **§ 11925. Allocation from Cigarette and Tobacco Products Surtax Fund**

14 11925. The department shall, after consultation with the Advisory Committee on
15 Salmon and Steelhead Trout, allocate that amount of moneys appropriated to the
16 department from the Public Resources Account in the Cigarette and Tobacco
17 Products Surtax Fund that the department determines to be necessary to pay the
18 costs for the advisory committee.

19 **Comment.** Section 11925 continues former Fish and Game Code Section 2762.6 without
20 substantive change.

21 **§ 11930. Consultation with other agencies and committees in determining projects**

22 11930. The director shall consult with the Resources Agency, the Department of
23 Water Resources, the State Water Resources Control Board, the State Coastal
24 Conservancy, the San Francisco Bay Conservation and Development Commission,
25 and the California Coastal Commission in determining projects proposed for
26 funding pursuant to Section 11910.

27 **Comment.** Section 11930 continues former Fish and Game Code Section 2763 without
28 substantive change.

29 **§ 11935. Consultation with other agencies and committees in developing projects**

30 11935. The director shall consult with other responsible state agencies and
31 appropriate fishery advisory committees, including, but not limited to, the
32 Advisory Committee on Salmon and Steelhead Trout and the Striped Bass Stamp
33 Advisory Committee, in developing projects to be funded pursuant to Section
34 11910.

35 **Comment.** Section 11935 continues former Fish and Game Code Section 2764 without
36 substantive change.

37 **§ 11940. Recommendation of California Water Commission to Congress**

38 11940. The California Water Commission, in any recommendation it may make
39 to the Congress of the United States on funding for water projects, shall include

1 recommendations for studies, programs, and facilities necessary to correct fish and
2 wildlife problems caused, fully or partially, by federal water facilities and
3 operation, including, but not limited to, all of the following:

4 (a) The Red Bluff Dam.

5 (b) The Trinity and Lewiston Dams.

6 (c) The facilities necessary to protect wildlife areas in the Suisun Marsh and the
7 Sacramento-San Joaquin Delta from adverse water quality effects caused by the
8 federal Central Valley Project.

9 (d) The Kesterson Reservoir and the San Luis Drain.

10 **Comment.** Section 11940 continues former Fish and Game Code Section 2765 without
11 substantive change.

12 CHAPTER 4. HATCHERY AND INLAND FISHERIES FUND

13 § 12000. Creation of fund

14 12000. Notwithstanding Section 3600, 33 1/3 percent of all sport fishing license
15 fees collected pursuant to 12850, 13100, 13105, 13150, or 13250 shall be
16 deposited into the Hatchery and Inland Fisheries Fund, which is hereby established
17 in the State Treasury.

18 **Comment.** Section 12000 continues the first sentence of former Fish and Game Code Section
19 13007(a) without substantive change.

20 § 12005. Authorized purposes

21 12005. (a) Moneys in the Hatchery and Inland Fisheries Fund may be expended,
22 consistent with the Strategic Plan for Trout Management and Chapter 1
23 (commencing with Section 11700) and, upon appropriation by the Legislature, to
24 support programs of the department related to management, maintenance, and
25 capital improvement of California's fish hatcheries, the Heritage and Wild Trout
26 program, and enforcement activities related thereto, and to support other activities
27 eligible to be funded from revenue generated by sport fishing license fees.

28 (b) The department shall use sport fishing license fees collected and subject to
29 appropriation pursuant to subdivision (a) for the following purposes:

30 (1) For the department's attainment of a state hatchery production goal of 2.75
31 pounds of released trout per sport fishing license sold in the calendar year ending
32 two and one-half years earlier, based on the sales of the following types of sport
33 fishing licenses: resident; lifetime; nonresident year; nonresident, 10-day; 2-day;
34 1-day; and reduced fee. The predominant number of released fish shall be of
35 catchable size or larger. The department shall attain this goal in compliance with
36 Fish and Game Commission trout policies concerning catchable-sized trout
37 stocking, the Strategic Plan for Trout Management, and Chapter 1 (commencing
38 with Section 11700).

39 (2) To the Heritage and Wild Trout Program, at least two million dollars
40 (\$2,000,000), for the following purposes:

1 (A) At least seven new permanent positions for the Heritage and Wild Trout
2 Program.

3 (B) Permanent positions and seasonal aides in each region of the state as
4 necessary to contribute to the objectives of this section, the objectives of the
5 Strategic Plan for Trout Management pursuant to Section 11730, and other
6 activities necessary to the program.

7 (C) The development of trout management plans pursuant to Chapter 1
8 (commencing with Section 11700).

9 (D) The department may expend up to 25 percent of the funds made available to
10 the Heritage and Wild Trout Program for watershed restoration projects, resource
11 assessment, or scientific inquiry. The department may enter into contracts with
12 qualified entities including local governments, special districts, tribes, and
13 nonprofit organizations for the purposes of this subparagraph.

14 (3) For the development of the department's Strategic Plan for Trout
15 Management pursuant to Section 11730.

16 (4) The department shall ensure that the numbers of native California trout, as
17 defined in Section 420, produced are sufficient to equal or exceed 25 percent of
18 the numbers of trout produced by the state fish hatcheries to comply with
19 paragraph (1). The native trout produced in accordance with this paragraph shall
20 support department efforts to protect and restore cold water ecosystems, maintain
21 biological diversity, and provide diverse angling opportunities. Coastal rainbow
22 trout/steelhead produced for anadromous mitigation purposes shall be excluded
23 from contributing to the native trout production goals required by this paragraph.
24 Coastal rainbow trout/steelhead propagated for purposes other than anadromous
25 mitigation and released into their source watersheds may be counted toward the 25
26 percent native trout production goal. Native trout produced shall be naturally
27 indigenous stocks from their original source watersheds. The department may
28 release native trout produced into watersheds other than their original source
29 watershed only if the released trout will cause no harm to other native trout or
30 other biota in their original watersheds.

31 (5) The department may hire additional staff for state fish hatcheries, in order to
32 comply with this subdivision.

33 (c) The department may allocate any funds under this section, not necessary to
34 maintain the minimums specified in paragraphs (1) and (4) of subdivision (b), and
35 after the expenditure in paragraph (2) of subdivision (b), to the Fish and Game
36 Preservation Fund.

37 (d) The department may utilize federal funds to meet the funding formula
38 specified in subdivision (a) if those funds are otherwise legally available for this
39 purpose.

40 (e) A portion of the moneys subject to appropriation pursuant to subdivision (a)
41 may be used for the purpose of obtaining scientifically valid genetic
42 determinations of California native trout stocks, consistent with the department's
43 Strategic Plan for Trout Management.

(f) On an annual basis, the department shall invest in hatchery facility improvements and rehabilitation to ensure progress towards achievement of the hatchery fish production targets established pursuant to this section.

(g) Commencing January 1, 2015, the department may obtain hatchery-produced fish from any California-based hatchery if all of the following criteria are satisfied:

(1) The goal specified in subdivision (b) is unmet.

(2) The department, following an inspection, determines that the California hatchery is in compliance with operations, management, and monitoring standards that are as stringent as those in effect at state hatcheries, in order to minimize the risk of the spread of disease or invasive species into inland state waters and fisheries.

(3) The cost per fish or per pound of fish provided by the California hatchery shall not exceed the cost to the department of state hatchery fish calculated equivalently and including transportation costs.

Comment. Section 12005 continues the second sentence of former Fish and Game Code Section 13007(a), and subdivisions (b) through (g), without substantive change.

CHAPTER 5. EXPERIMENTAL FISHING PERMIT

§ 12050. Definitions

12050. For purposes of this chapter, the following terms have the following meanings:

(a) “Compensation fishing” means fishing conducted for the purpose of recovering costs associated with resource surveys and scientific studies that support the management of a fishery, or fishing that serves as an incentive for participation in those studies. Compensation fishing may include fishing before, during, or following those surveys or studies.

(b) “Conservation engineering” means the study of fish behavior and the development and testing of new gear technology and fishing techniques that promote efficient and sustainable harvest of target species or reduce collateral effects, such as bycatch and adverse effects on habitat, or both.

(c) “EFP” means an experimental fishing permit.

(d) “Exploratory fishing” means fishing to collect data or conduct other research, typically to provide information that could inform the potential opening of a new fishery or an area currently closed to fishing.

Comment. Section 12050 continues former Fish and Game Code Section 1022(h), without substantive change.

 **Note.** Proposed Section 12050 would continue Section 1022(h), which was added by 2018 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

1 **§ 12055. Issuance and conditions of experimental fishing permit**

2 12055. The commission may authorize, for research, educational, limited
3 testing, data collection, compensation fishing, conservation engineering, or
4 exploratory fishing, or any combination of these purposes, an EFP to be issued by
5 the department that authorizes commercial or recreational marine fishing activity
6 otherwise prohibited by this code or any regulation adopted pursuant to this code,
7 subject, at a minimum, to all of the following conditions:

8 (a) Activities conducted under the EFP shall be consistent with policies set forth
9 in Section 12100 and any applicable fishery management plan.

10 (b) An EFP is subject to those conditions the commission deems necessary to
11 ensure the protection of marine resources, and shall be revoked if the continued
12 use would have an adverse impact on any resource or allocation of a resource, or
13 other adverse impact to established fisheries or other marine living resources.

14 (c)(1) Except as provided in paragraph (2), activities conducted under the EFP
15 shall not involve engaging in bottom trawling in ocean waters of the state.

16 (2) Activities conducted under the EFP may involve engaging in bottom
17 trawling if the EFP is issued to a person who holds a permit issued pursuant to
18 Section 39950 or 51100 and the activities conducted under the EFP are limited to
19 locations where bottom trawling is authorized under the applicable permit.

20 (d) An EFP exempts a permittee only from the provisions of this code and
21 regulations adopted pursuant to this code specified in the EFP. All other applicable
22 laws and regulations shall remain in effect.

23 (e) Permits shall be issued pursuant to the process established in Section 12060.

24 **Comment.** Section 12055 continues former Fish and Game Code Section 1022(a), without
25 substantive change.

26  **Note.** Proposed Section 12055 would continue Section 1022(a), which was added by 2018
27 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
28 anticipation of its effect.

29 **§ 12060. Procedure**

30 12060. The commission shall establish by regulation an expeditious process for
31 department review, public notice and comment, commission approval, and prompt
32 department issuance of EFPs, that is consistent with Section 12165.

33 **Comment.** Section 12060 continues former Fish and Game Code Section 1022(b), without
34 substantive change.

35  **Note.** Proposed Section 12060 would continue Section 1022(b), which was added by 2018
36 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
37 anticipation of its effect.

38 **§ 12065. Period of validity**

39 12065. Unless otherwise specified by the commission, an EFP issued pursuant
40 to this section is valid for a period of one year. However, the department shall not
41 issue an EFP for the same purposes for more than four consecutive years.

1 **Comment.** Section 12065 continues former Fish and Game Code Section 1022(d), without
2 substantive change.

3 **Note.** Proposed Section 12065 would continue Section 1022(d), which was added by 2018
4 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
5 anticipation of its effect.

6 **§ 12070. Fee**

7 12070. The commission may charge a permit fee as necessary to fully recover,
8 but not exceed, all reasonable implementation and administrative costs of the
9 department and the commission relating to the EFP.

10 **Comment.** Section 12070 continues former Fish and Game Code Section 1022(g) without
11 substantive change.

12 **Note.** Proposed Section 12070 would continue Section 1022(g), which were added by 2018
13 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
14 anticipation of its effect.

15 **§ 12075. Reporting**

16 12075. (a) Upon completion of the activities authorized in an EFP, or
17 periodically under terms specified by the commission, a person fishing under an
18 EFP shall submit to the commission and the department a final report summarizing
19 the EFP research and findings, and any scientific reports or other publications
20 created as a result of the activity.

21 (b) The department shall post, and annually update, information regarding
22 approved EFP activities, including information on the fishery and region affected,
23 the experimental intent, and other relevant information on its Internet Web site.

24 (c) On or before January 1, 2025, and every five years thereafter, the department
25 shall complete and provide to the appropriate legislative committees a report
26 summarizing the approved EFPs and benefits of the EFP program to the
27 sustainability of California fisheries, efficiency of fishing effort, and reduction of
28 bycatch in California fisheries.

29 **Comment.** Subdivision (a) of Section 12075 continues former Fish and Game Code Section
30 1022(c) without substantive change.

31 Subdivisions (b) and (c) continue former Fish and Game Code Section 1022(e)-(f) without
32 substantive change.

33 **Note.** Proposed Section 12075 would continue Section 1022(c), (e)-(f), which were added by
34 2018 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

1 TITLE 3. CONSERVATION AND MANAGEMENT
2 OF MARINE LIVING RESOURCES

3 CHAPTER 1. GENERAL POLICIES

4 § 12100. Findings and declarations

5 12100. (a) The Legislature finds and declares that the Pacific Ocean and its rich
6 marine living resources are of great environmental, economic, aesthetic,
7 recreational, educational, scientific, nutritional, social, and historic importance to
8 the people of California.

9 (b) It is the policy of the state to ensure the conservation, sustainable use, and,
10 where feasible, restoration of California's marine living resources for the benefit
11 of all the citizens of the state. The objective of this policy shall be to accomplish
12 all of the following:

13 (1) Conserve the health and diversity of marine ecosystems and marine living
14 resources.

15 (2) Allow and encourage only those activities and uses of marine living
16 resources that are sustainable.

17 (3) Recognize the importance of the aesthetic, educational, scientific, and
18 recreational uses that do not involve the taking of California's marine living
19 resources.

20 (4) Recognize the importance to the economy and the culture of California of
21 sustainable sport and commercial fisheries and the development of commercial
22 aquaculture consistent with the marine living resource conservation policies of this
23 title.

24 (5) Support and promote scientific research on marine ecosystems and their
25 components to develop better information on which to base marine living resource
26 management decisions.

27 (6) Manage marine living resources on the basis of the best available scientific
28 information and other relevant information that the commission or department
29 possesses or receives.

30 (7) Involve all interested parties, including, but not limited to, individuals from
31 the sport and commercial fishing industries, aquaculture industries, coastal and
32 ocean tourism and recreation industries, marine conservation organizations, local
33 governments, marine scientists, and the public in marine living resource
34 management decisions.

35 (8) Promote the dissemination of accurate information concerning the condition
36 of, or management of, marine resources and fisheries by seeking out the best
37 available information and making it available to the public through the marine
38 resources management process.

39 (9) Coordinate and cooperate with adjacent states, as well as with Mexico and
40 Canada, and encourage regional approaches to management of activities and uses

1 that affect marine living resources. Particular attention shall be paid to coordinated
2 approaches to the management of shared fisheries.

3 **Comment.** Section 12100 continues former Fish and Game Code Section 7050 without
4 substantive change.

5 **§ 12105. Scope of regulations**

6 12105. (a) A regulation adopted pursuant to this title shall apply only to ocean
7 waters and bays. Notwithstanding any other provision of this title, nothing
8 contained in this title grants the department or any other agency of the state any
9 regulatory authority not in existence on January 1, 1999, in any river upstream of
10 the mouth of such river, in the Sacramento-San Joaquin Delta or in any other
11 estuary.

12 (b) The policies in this title shall apply only to fishery management plans and
13 regulations adopted by the commission on or after January 1, 1999. No power is
14 delegated to the commission or the department by this title to regulate fisheries
15 other than the nearshore fishery, the white sea bass fishery, emerging fisheries,
16 and fisheries for which the commission or department had regulatory authority
17 prior to January 1, 1999.

18 **Comment.** Section 12105 continues former Fish and Game Code Section 7051 without
19 substantive change.

20 **CHAPTER 2. MARINE FISHERIES GENERALLY**

21 **§ 12150. Declaration of policy**

22 12150. The Legislature finds and declares that it is the policy of the state that:

23 (a) California's marine sport and commercial fisheries, and the resources upon
24 which they depend, are important to the people of the state and, to the extent
25 practicable, shall be managed in accordance with the policies and other
26 requirements of this title in order to assure the long-term economic, recreational,
27 ecological, cultural, and social benefits of those fisheries and the marine habitats
28 on which they depend.

29 (b) Programs for the conservation and management of the marine fishery
30 resources of California shall be established and administered to prevent
31 overfishing, to rebuild depressed stocks, to ensure conservation, to facilitate long-
32 term protection and, where feasible, restoration of marine fishery habitats, and to
33 achieve the sustainable use of the state's fishery resources.

34 (c) Where a species is the object of sport fishing, a sufficient resource shall be
35 maintained to support a reasonable sport use, taking into consideration the
36 necessity of regulating individual sport fishery bag limits to the quantity that is
37 sufficient to provide a satisfying sport.

38 (d) The growth of commercial fisheries, including distant-water fisheries, shall
39 be encouraged.

1 **Comment.** Section 12150 continues former Fish and Game Code Section 7055 without
2 substantive change.

3 **§ 12155. Management**

4 12155. In order to achieve the primary fishery management goal of
5 sustainability, every sport and commercial marine fishery under the jurisdiction of
6 the state shall be managed under a system whose objectives include all of the
7 following:

8 (a) The fishery is conducted sustainably so that long-term health of the resource
9 is not sacrificed in favor of short-term benefits. In the case of a fishery managed
10 on the basis of maximum sustainable yield, management shall have optimum yield
11 as its objective.

12 (b) The health of marine fishery habitat is maintained and, to the extent feasible,
13 habitat is restored, and where appropriate, habitat is enhanced.

14 (c) Depressed fisheries are rebuilt to the highest sustainable yields consistent
15 with environmental and habitat conditions.

16 (d) The fishery limits bycatch to acceptable types and amounts, as determined
17 for each fishery.

18 (e) The fishery management system allows fishery participants to propose
19 methods to prevent or reduce excess effort in marine fisheries.

20 (f) Management of a species that is the target of both sport and commercial
21 fisheries or of a fishery that employs different gears is closely coordinated.

22 (g) Fishery management decisions are adaptive and are based on the best
23 available scientific information and other relevant information that the
24 commission or department possesses or receives, and the commission and
25 department have available to them essential fishery information on which to base
26 their decisions.

27 (h) The management decisionmaking process is open and seeks the advice and
28 assistance of interested parties so as to consider relevant information, including
29 local knowledge.

30 (i) The fishery management system observes the long-term interests of people
31 dependent on fishing for food, livelihood, or recreation.

32 (j) The adverse impacts of fishery management on small-scale fisheries, coastal
33 communities, and local economies are minimized.

34 (k) Collaborative and cooperative approaches to management, involving fishery
35 participants, marine scientists, and other interested parties are strongly
36 encouraged, and appropriate mechanisms are in place to resolve disputes such as
37 access, allocation, and gear conflicts.

38 (l) The management system is proactive and responds quickly to changing
39 environmental conditions and market or other socioeconomic factors and to the
40 concerns of fishery participants.

1 (m) The management system is periodically reviewed for effectiveness in
2 achieving sustainability goals and for fairness and reasonableness in its interaction
3 with people affected by management.

4 **Comment.** Section 12155 continues former Fish and Game Code Section 7056 without
5 substantive change.

6 **§ 12160. Commission regulation**

7 12160. Any fishery management regulation adopted by the commission shall, to
8 the extent practicable, conform to the policies of Sections 12150 and 12155.

9 **Comment.** Section 12160 continues former Fish and Game Code Section 7058 without
10 substantive change.

11 **§ 12165. Collaborative process**

12 12165. (a) The Legislature finds and declares all of the following:

13 (1) Successful marine life and fishery management is a collaborative process
14 that requires a high degree of ongoing communication and participation of all
15 those involved in the management process, particularly the commission, the
16 department, and those who represent the people and resources that will be most
17 affected by fishery management decisions, especially fishery participants and
18 other interested parties.

19 (2) In order to maximize the marine science expertise applied to the complex
20 issues of marine life and fishery management, the commission and the department
21 are encouraged to continue to, and to find creative new ways to, contract with or
22 otherwise effectively involve Sea Grant staff, marine scientists, economists,
23 collaborative factfinding process and dispute resolution specialists, and others with
24 the necessary expertise at colleges, universities, private institutions, and other
25 agencies.

26 (3) The benefits of the collaborative process required by this section apply to
27 most marine life and fishery management activities including, but not limited to,
28 the development and implementation of research plans, marine managed area
29 plans, fishery management plans, and plan amendments, and the preparation of
30 fishery status reports such as those required by Section 12250.

31 (4) Because California is a large state with a long coast, and because travel is
32 time consuming and costly, the involvement of interested parties shall be
33 facilitated, to the extent practicable, by conducting meetings and discussions in the
34 areas of the coast and in ports where those most affected are concentrated.

35 (b) In order to fulfill the intent of subdivision (a), the commission and the
36 department shall do all of the following:

37 (1) Periodically review marine life and fishery management operations with a
38 view to improving communication, collaboration, and dispute resolution, seeking
39 advice from interested parties as part of the review.

40 (2) Develop a process for the involvement of interested parties and for
41 factfinding and dispute resolution processes appropriate to each element in the

1 marine life and fishery management process. Models to consider include, but are
2 not limited to, the take reduction teams authorized under the Marine Mammal
3 Protection Act (16 U.S.C. Sec. 1361 et seq.) and the processes that led to
4 improved management in the California herring, sea urchin, prawn, angel shark,
5 and white seabass fisheries.

6 (3) Consider the appropriateness of various forms of fisheries co-management,
7 which involves close cooperation between the department and fishery participants,
8 when developing and implementing fishery management plans.

9 (4) When involving fishery participants in the management process, give
10 particular consideration to the gear used, involvement of sport or commercial
11 sectors or both sectors, and the areas of the coast where the fishery is conducted in
12 order to ensure adequate involvement.

13 **Comment.** Section 12165 continues former Fish and Game Code Section 7059 without
14 substantive change.

15 CHAPTER 3. FISHERIES SCIENCE

16 § 12200. Legislative findings and declarations

17 12200. (a) The Legislature finds and declares that for the purposes of sustainable
18 fishery management and this title, essential fishery information is necessary for
19 federally and state-managed marine fisheries important to the people of this state
20 to provide sustainable economic and recreational benefits to the people of
21 California. The Legislature further finds and declares that acquiring essential
22 fishery information can best be accomplished through the ongoing cooperation and
23 collaboration of participants in fisheries.

24 (b) The department, to the extent feasible, shall conduct and support research to
25 obtain essential fishery information for all marine fisheries managed by the state.

26 (c) The department, to the maximum extent practicable and consistent with
27 Section 12165, shall encourage the participation of fishermen in fisheries research
28 within a framework that ensures the objective collection and analysis of data, the
29 collaboration of fishermen in research design, and the cooperation of fishermen in
30 carrying out research.

31 (d) The department may apply for grants to conduct research and may enter into
32 contracts or issue competitive grants to public or private research institutions to
33 conduct research.

34 **Comment.** Section 12200 continues former Fish and Game Code Section 7060 without
35 substantive change.

36 § 12205. External peer review program

37 12205. (a) The department shall establish a program for external peer review of
38 the scientific basis of marine living resources management documents. The
39 department, in its discretion and unless otherwise required by this title, may
40 submit to peer review, documents that include, but are not limited to, fishery

1 management plans and plan amendments, marine resource and fishery research
2 plans.

3 (b) The department may enter into an agreement with one or more outside
4 entities that are significantly involved with researching and understanding marine
5 fisheries and are not advocacy organizations. These entities may include, but not
6 be limited to, the Sea Grant program of any state, the University of California, the
7 California State University, the Pacific States Marine Fisheries Commission, or
8 any other entity approved by the commission to select and administer peer review
9 panels, as needed. The peer review panels shall be composed of individuals with
10 technical expertise specific to the document to be reviewed. The entity with which
11 the department enters into an agreement for a peer review shall be responsible for
12 the scientific integrity of the peer review process. Each peer reviewer may be
13 compensated as needed to ensure competent peer review. Peer reviewers shall not
14 be employees or officers of the department or the commission and shall not have
15 participated in the development of the document to be reviewed.

16 (c) The external peer review entity, within the timeframe and budget agreed
17 upon by the department and the external scientific peer review entity, shall provide
18 the department with the written report of the peer review panel that contains an
19 evaluation of the scientific basis of the document. If the report finds that the
20 department has failed to demonstrate that a scientific portion of the document is
21 based on sound scientific knowledge, methods, and practices, the report shall state
22 that finding, and the reasons for the finding. The department may accept the
23 finding, in whole or in part, and may revise the scientific portions of the document
24 accordingly. If the department disagrees with any aspect of the finding of the
25 external scientific peer review, it shall explain, and include as part of the record,
26 its basis for arriving at such a determination in the analysis prepared for the
27 adoption of the final document, including the reasons why it has determined that
28 the scientific portions of the document are based on sound scientific knowledge,
29 methods, or practice. The department shall submit the external scientific peer
30 review report to the commission with any peer reviewed document that is to be
31 adopted or approved by the commission.

32 (d) The requirements of this section do not apply to any emergency regulation
33 adopted pursuant to subdivision (b) of Section 11346.1 of the Government Code.

34 (e) Nothing in this section shall be interpreted, in any way, to limit the authority
35 of the commission or department to adopt a plan or regulation.

36 **Comment.** Section 12205 continues former Fish and Game Code Section 7062 without
37 substantive change.

38 CHAPTER 4. COMMISSION AND DEPARTMENT

39 § 12250. Report to Commission

40 12250. (a) The director shall report annually in writing to the commission on the
41 status of sport and commercial marine fisheries managed by the state. The date of

1 the report shall be chosen by the commission with the advice of the department.
2 Each annual report shall cover at least one-fourth of the marine fisheries managed
3 by the state so that every fishery will be reported on at least once every four years.
4 The department shall, consistent with Section 12165, involve expertise from
5 outside the department in compiling information for the report, which may
6 include, but need not be limited to, Sea Grant staff, other marine scientists, fishery
7 participants, and other interested parties.

8 (b) For each fishery reported on in an annual report, the report shall include
9 information on landings, fishing effort, areas where the fishery occurs, and other
10 factors affecting the fishery as determined by the department and the commission.
11 Each restricted access program shall be reviewed at least every five years for
12 consistency with the policies of the commission on restricted access fisheries.

13 (c) Notwithstanding subdivision (a), the first annual report shall be presented to
14 the commission on or before September 1, 2001, and shall cover all the marine
15 fisheries managed by the state. To the extent that the requirements of this section
16 and Section 12325 are duplicative, the first annual report may be combined with
17 the plan required pursuant to Section 12325.

18 **Comment.** Section 12250 continues former Fish and Game Code Section 7065 without
19 substantive change.

20 **§ 12255. Additional report content**

21 12255. (a) The Legislature finds and declares that a number of human-caused
22 and natural factors can affect the health of marine fishery resources and result in
23 marine fisheries that do not meet the policies and other requirements of this title.

24 (b) To the extent feasible, the director's report to the commission pursuant to
25 Section 12250 shall identify any marine fishery that does not meet the
26 sustainability policies of this title. In the case of a fishery identified as being
27 depressed, the report shall indicate the causes of the depressed condition of the
28 fishery, describe steps being taken to rebuild the fishery, and, to the extent
29 practicable, recommend additional steps to rebuild the fishery.

30 (c) The director's report to the commission pursuant to Section 12250,
31 consistent with subdivision (m) of Section 12155, shall evaluate the management
32 system and may recommend modifications of that system to the commission.

33 **Comment.** Section 12255 continues former Fish and Game Code Section 7066 without
34 substantive change.

35 **CHAPTER 5. FISHERY MANAGEMENT PLANS – GENERAL POLICIES**

36 **§ 12300. Finding and declaration**

37 12300. The Legislature finds and declares that the critical need to conserve,
38 utilize, and manage the state's marine fish resources and to meet the policies and
39 other requirements stated in this title require that the state's fisheries be managed
40 by means of fishery management plans.

1 **Comment.** Section 12300 continues former Fish and Game Code Section 7070 without
2 substantive change.

3 **§ 12305. White seabass fishery management plans**

4 12305. (a) Any white seabass fishery management plan adopted by the
5 commission on or before January 1, 1999, shall remain in effect until amended
6 pursuant to this title.

7 (b) Notwithstanding paragraph (2) of subdivision (b) of Section 12325, any
8 white seabass fishery management plan adopted by the commission and in
9 existence on January 1, 1999, shall be amended to comply with this title on or
10 before January 1, 2002.

11 **Comment.** Section 12305 continues former Fish and Game Code Section 7071(a) without
12 substantive change.

13 **§ 12310. Effect of commission regulations**

14 12310. (a) In the case of any fishery for which the commission has management
15 authority, including white seabass, regulations that the commission adopts to
16 implement a fishery management plan or plan amendment for that fishery may
17 make inoperative, in regard to that fishery, any fishery management statute that
18 applies to that fishery, including, but not limited to, statutes that govern allowable
19 catch, restricted access programs, permit fees, and time, area, and methods of
20 taking.

21 (b) On and after January 1, 2000, the commission may adopt regulations as it
22 determines necessary, based on the advice and recommendations of the
23 department, and in a process consistent with Section 12165, to regulate all
24 emerging fisheries, consistent with Chapter 8 (commencing with Section 12600),
25 all fisheries for nearshore fish stocks, and all fisheries for white seabass.
26 Regulations adopted by the commission may include, but need not be limited to,
27 establishing time and area closures, requiring submittal of landing and permit
28 information, regulating fishing gear, permit fees, and establishing restricted access
29 fisheries.

30 **Comment.** Section 12310 continues former Fish and Game Code Section 7071(b) and (c)
31 without substantive change.

32 **§ 12315. Basis and use of plans**

33 12315. (a) Fishery management plans shall form the primary basis for managing
34 California's sport and commercial marine fisheries.

35 (b) Fishery management plans shall be based on the best scientific information
36 that is available, on other relevant information that the department possesses, or on
37 the scientific information or other relevant information that can be obtained
38 without substantially delaying the preparation of the plan.

39 (c) To the extent that conservation and management measures in a fishery
40 management plan either increase or restrict the overall harvest or catch in a

1 fishery, fishery management plans shall allocate those increases or restrictions
2 fairly among recreational and commercial sectors participating in the fishery.

3 **Comment.** Section 12315 continues former Fish and Game Code Section 7072(a)-(c) without
4 substantive change.

5 **§ 12320. Nearshore fishery**

6 12320. Consistent with Chapter 3 (commencing with Section 22600) of Title 15
7 of Part 6, the commission shall adopt a fishery management plan for the nearshore
8 fishery on or before January 1, 2002, if funds are appropriated for that purpose in
9 the annual Budget Act or pursuant to any other law.

10 **Comment.** Section 12320 continues former Fish and Game Code Section 7072(d) without
11 substantive change.

12 **§ 12325. Submission, content, and consideration of master plan**

13 12325. (a) On or before September 1, 2001, the department shall submit to the
14 commission for its approval a master plan that specifies the process and the
15 resources needed to prepare, adopt, and implement fishery management plans for
16 sport and commercial marine fisheries managed by the state. Consistent with
17 Section 12165, the master plan shall be prepared with the advice, assistance, and
18 involvement of participants in the various fisheries and their representatives,
19 marine conservationists, marine scientists, and other interested persons.

20 (b) The master plan shall include all of the following:

21 (1) A list identifying the fisheries managed by the state, with individual fisheries
22 assigned to fishery management plans as determined by the department according
23 to conservation and management needs and consistent with subdivision (f) of
24 Section 12155.

25 (2) A priority list for preparation of fishery management plans. Highest priority
26 shall be given to fisheries that the department determines have the greatest need
27 for changes in conservation and management measures in order to comply with the
28 policies and requirements set forth in this title. Fisheries for which the department
29 determines that current management complies with the policies and requirements
30 of this title shall be given the lowest priority.

31 (3) A description of the research, monitoring, and data collection activities that
32 the department conducts for marine fisheries and of any additional activities that
33 might be needed for the department to acquire essential fishery information, with
34 emphasis on the higher priority fisheries identified pursuant to paragraph (2).

35 (4) A process consistent with Section 12165 that ensures the opportunity for
36 meaningful involvement in the development of fishery management plans and
37 research plans by fishery participants and their representatives, marine scientists,
38 and other interested parties.

39 (5) A process for periodic review and amendment of the master plan.

40 (c) The commission shall adopt or reject the master plan or master plan
41 amendment, in whole or in part, after a public hearing. If the commission rejects a

1 part of the master plan or master plan amendment, the commission shall return that
2 part to the department for revision and resubmission pursuant to the revision and
3 resubmission procedures for fishery management plans as described in subdivision
4 (a) of Section 12400.

5 **Comment.** Section 12325 continues former Fish and Game Code Section 7073 without
6 substantive change.

7 **§ 12330. Interim protocols**

8 12330. (a) The department shall prepare interim fishery research protocols for at
9 least the three highest priority fisheries identified pursuant to paragraph (2) of
10 subdivision (b) of Section 12325. An interim fishery protocol shall be used by the
11 department until a fishery management plan is implemented for that fishery.

12 (b) Consistent with Section 12165, each protocol shall be prepared with the
13 advice, assistance, and involvement of participants in the various fisheries and
14 their representatives, marine conservationists, marine scientists, and other
15 interested persons.

16 (c) Interim protocols shall be submitted to peer review as described in Section
17 12205 unless the department, pursuant to subdivision (d), determines that peer
18 review of the interim protocol is not justified. For the purpose of peer review,
19 interim protocols may be combined in the following circumstances:

20 (1) For related fisheries.

21 (2) For two or more interim protocols that the commission determines will
22 require the same peer review expertise.

23 (d) The commission, with the advice of the department, shall adopt criteria to be
24 applied in determining whether an interim protocol may be exempted from peer
25 review.

26 **Comment.** Section 12330 continues former Fish and Game Code Section 7074 without
27 substantive change.

28 CHAPTER 6. FISHERY MANAGEMENT PLAN PREPARATION,
29 APPROVAL, AND REGULATIONS

30 **§ 12400. Preparation of plans and amendments**

31 12400. (a) The department shall prepare fishery management plans and plan
32 amendments, including any proposed regulations necessary to implement plans or
33 plan amendments, to be submitted to the commission for adoption or rejection.
34 Prior to submitting a plan or plan amendment, including any proposed regulations
35 necessary for implementation, to the commission, the department shall submit the
36 plan to peer review pursuant to Section 12205, unless the department determines
37 that peer review of the plan or plan amendment may be exempted pursuant to
38 subdivision (c). If the department makes that determination, it shall submit its
39 reasons for that determination to the commission with the plan. If the commission
40 rejects a plan or plan amendment, including proposed regulations necessary for

1 implementation, the commission shall return the plan or plan amendment to the
2 department for revision and resubmission together with a written statement of
3 reasons for the rejection. The department shall revise and resubmit the plan or plan
4 amendment to the commission within 90 days of the rejection. The revised plan or
5 plan amendment shall be subject to the review and adoption requirements of this
6 chapter.

7 (b) The department may contract with qualified individuals or organizations to
8 assist in the preparation of fishery management plans or plan amendments.

9 (c) The commission, with the advice of the department and consistent with
10 Section 12165, shall adopt criteria to be applied in determining whether a plan or
11 plan amendment may be exempted from peer review.

12 (d) Fishery participants and their representatives, fishery scientists, or other
13 interested parties may propose plan provisions or plan amendments to the
14 department or commission. The commission shall review any proposal submitted
15 to the commission and may recommend to the department that the department
16 develop a fishery management plan or plan amendment to incorporate the
17 proposal.

18 **Comment.** Section 12400 continues former Fish and Game Code Section 7075 without
19 substantive change.

20 **§ 12405. Use of peer review panel**

21 12405. (a) To the extent practicable, and consistent with Section 12165, the
22 department shall seek advice and assistance in developing a fishery management
23 plan from participants in the affected fishery, marine scientists, and other
24 interested parties. The department shall also seek the advice and assistance of
25 other persons or entities that it deems appropriate, which may include, but is not
26 limited to, Sea Grant, the National Marine Fisheries Service, the Pacific States
27 Marine Fisheries Commission, the Pacific Fishery Management Council, and any
28 advisory committee of the department.

29 (b) In the case of a fishery management plan or a plan amendment that is
30 submitted to peer review, the department shall provide the peer review panel with
31 any written comments on the plan or plan amendment that the department has
32 received from fishery participants and other interested parties.

33 **Comment.** Section 12405 continues former Fish and Game Code Section 7076 without
34 substantive change.

35 **§ 12410. Availability for public review**

36 12410. A fishery management plan or plan amendment, or proposed regulations
37 necessary for implementation of a plan or plan amendment, developed by the
38 department shall be available to the public for review at least 30 days prior to a
39 hearing on the management plan or plan amendment by the commission. Persons
40 requesting to be notified of the availability of the plan shall be notified in
41 sufficient time to allow them to review and submit comments at or prior to a

1 hearing. Proposed plans and plan amendments and hearing schedules and agendas
2 shall be posted on the department's Internet website.

3 **Comment.** Section 12410 continues former Fish and Game Code Section 7077 without
4 substantive change.

5 **§ 12415. Public hearings**

6 12415. (a) The commission shall hold at least two public hearings on a fishery
7 management plan or plan amendment prior to the commission's adoption or
8 rejection of the plan.

9 (b) The plan or plan amendment shall be heard not later than 60 days following
10 receipt of the plan or plan amendment by the commission. The commission may
11 adopt the plan or plan amendment at the second public hearing, at the
12 commission's meeting following the second public hearing, or at any duly noticed
13 subsequent meeting, subject to subdivision (c).

14 (c) When scheduling the location of a hearing or meeting relating to a fishery
15 management plan or plan amendment, the commission shall consider factors,
16 including, among other factors, the area of the state, if any, where participants in
17 the fishery are concentrated.

18 **Comment.** Section 12415 continues former Fish and Game Code Section 7078(a)-(c) without
19 substantive change.

20 **§ 12420. Copy to Legislature**

21 12420. Notwithstanding Section 7550.5 of the Government Code, prior to the
22 adoption of a fishery management plan or plan amendment that would make
23 inoperative a statute, the commission shall provide a copy of the plan or plan
24 amendment to the Legislature for review by the Joint Committee on Fisheries and
25 Aquaculture or, if there is no such committee, to the appropriate policy committee
26 in each house of the Legislature.

27 **Comment.** Section 12420 continues former Fish and Game Code Section 7078(d) without
28 substantive change.

29 **§ 12425. Adoption of implementing regulations**

30 12425. (a) The commission shall adopt any regulations necessary to implement
31 a fishery plan or plan amendment no more than 60 days following adoption of the
32 plan or plan amendment. All implementing regulations adopted under this
33 subdivision shall be adopted as a regulation pursuant to the rulemaking provisions
34 of the Administrative Procedure Act, Chapter 3.5 (commencing with Section
35 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The
36 commission's adoption of regulations to implement a fishery management plan or
37 plan amendment shall not trigger an additional review process under the California
38 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
39 Public Resources Code).

(b) Regulations adopted by the commission to implement a plan or plan amendment shall specify any statute or regulation of the commission that is to become inoperative as to the particular fishery. The list shall designate each statute or regulation by individual section number, rather than by reference to articles or chapters.

Comment. Section 12425 continues former Fish and Game Code Section 7078(e) and (f) without substantive change.

CHAPTER 7. CONTENTS OF FISHERY MANAGEMENT PLANS

§ 12500. Summary of plan

12500. Consistent with subdivision (b) of Section 12315, each fishery management plan prepared by the department shall summarize readily available information about the fishery including, but not limited to, all of the following:

(a) The species of fish and their location, number of vessels and participants involved, fishing effort, historical landings in the sport and commercial sectors, and a history of conservation and management measures affecting the fishery.

(b) The natural history and population dynamics of the target species and the effects of changing oceanic conditions on the target species.

(c) The habitat for the fishery and known threats to the habitat.

(d) The ecosystem role of the target species and the relationship of the fishery to the ecosystem role of the target species.

(e) Economic and social factors related to the fishery.

Comment. Section 12500 continues former Fish and Game Code Section 7080 without substantive change.

§ 12505. Procedure for review and amendment

12505. Each fishery management plan prepared by the department shall include a procedure for review and amendment of the plan, as necessary.

Comment. Section 12505 continues former Fish and Game Code Section 7087(a) without substantive change.

§ 12510. Fishery research protocol

12510. Consistent with subdivision (b) of Section 12315, each fishery management plan or plan amendment prepared by the department shall include a fishery research protocol that does all of the following:

(a) Describe past and ongoing monitoring of the fishery.

(b) Identify essential fishery information for the fishery, including, but not limited to, age and growth, minimum size at maturity, spawning season, age structure of the population, and, if essential fishery information is lacking, identify the additional information needed and the resources and time necessary to acquire the information.

(c) Indicate the steps the department shall take to monitor the fishery and to obtain essential fishery information, including the data collection and research methodologies, on an ongoing basis.

Comment. Section 12510 continues former Fish and Game Code Section 7081 without substantive change.

§ 12515. Conservation and management measures

12515. Each fishery management plan or plan amendment prepared by the department shall contain the measures necessary and appropriate for the conservation and management of the fishery according to the policies and other requirements in this title. The measures may include, but are not limited to, all of the following:

(a) Limitations on the fishery based on area, time, amount of catch, species, size, sex, type or amount of gear, or other factors.

(b) Creation or modification of a restricted access fishery that contributes to a more orderly and sustainable fishery.

(c) A procedure to establish and to periodically review and revise a catch quota in any fishery for which there is a catch quota.

(d) Requirement for a personal, gear, or vessel permit and reasonable fees.

Comment. Section 12515 continues former Fish and Game Code Section 7082 without substantive change.

§ 12520. Incorporation of existing conservation and management measures

12520. (a) Each fishery management plan prepared by the department shall incorporate the existing conservation and management measures provided in this code that are determined by the department to result in a sustainable fishery.

(b) If additional conservation and management measures are included in the plan, the department shall, consistent with subdivision (b) of Section 12315, summarize anticipated effects of those measures on relevant fish populations and habitats, on fishery participants, and on coastal communities and businesses that rely on the fishery.

Comment. Section 12520 continues former Fish and Game Code Section 7083 without substantive change.

§ 12525. Minimizing adverse effects on habitat

12525. (a) Consistent with subdivision (b) of Section 12315, each fishery management plan or plan amendment prepared by the department for a fishery that the department has determined has adverse effects on marine fishery habitat shall include measures that, to the extent practicable, minimize adverse effects on habitat caused by fishing.

(b) Subdivision (a) does not apply to activities regulated by Title 1 (commencing with Section 54000) of Part 4 of Division 14.

Comment. Section 12525 continues former Fish and Game Code Section 7084 without substantive change.

1 **§ 12530. Bycatch information**

2 12530. Consistent with subdivision (b) of Section 12315, each fishery
3 management plan or plan amendment prepared by the department, in fisheries in
4 which bycatch occurs, shall include all of the following:

5 (a) Information on the amount and type of bycatch.

6 (b) Analysis of the amount and type of bycatch based on the following criteria:

7 (1) Legality of the bycatch under any relevant law.

8 (2) Degree of threat to the sustainability of the bycatch species.

9 (3) Impacts on fisheries that target the bycatch species.

10 (4) Ecosystem impacts.

11 (c) In the case of unacceptable amounts or types of bycatch, conservation and
12 management measures that, in the following priority, do the following:

13 (1) Minimize bycatch.

14 (2) Minimize mortality of discards that cannot be avoided.

15 **Comment.** Section 12530 continues former Fish and Game Code Section 7085 without
16 substantive change.

17 **§ 12535. Overfishing information**

18 12535. (a) Consistent with subdivision (b) of Section 12315, each fishery
19 management plan or plan amendment prepared by the department shall specify
20 criteria for identifying when the fishery is overfished.

21 (b) In the case of a fishery management plan for a fishery that has been
22 determined to be overfished or in which overfishing is occurring, the fishery
23 management plan shall contain measures to prevent, end, or otherwise
24 appropriately address overfishing and to rebuild the fishery.

25 (c) Any fishery management plan, plan amendment, or regulation prepared
26 pursuant to subdivision (b), shall do both of the following:

27 (1) Specify a time period for preventing or ending or otherwise appropriately
28 addressing overfishing and rebuilding the fishery that shall be as short as possible,
29 and shall not exceed 10 years except in cases where the biology of the population
30 of fish or other environmental conditions dictate otherwise.

31 (2) Allocate both overfishing restrictions and recovery benefits fairly and
32 equitably among sectors of the fishery.

33 **Comment.** Section 12535 continues former Fish and Game Code Section 7086 without
34 substantive change.

35 **§ 12540. Other required information**

36 12540. Each fishery management plan or plan amendment prepared by the
37 department shall include the following:

38 (a) A specification of the types of regulations that the department may adopt
39 without a plan amendment.

40 (b) A list of any statutes and regulations that shall become inoperative, as to the
41 particular fishery covered by the fishery management plan or plan amendment,

upon the commission's adoption of implementing regulations for that fishery management plan or plan amendment.

Comment. Subdivision (a) of Section 12540 continues former Fish and Game Code Section 7087(b) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7088 without substantive change.

CHAPTER 8. EMERGING FISHERIES

§ 12600. Legislative declaration and duty of commission

12600. The Legislature finds and declares that a proactive approach to management of emerging fisheries will foster a healthy marine environment and will benefit both commercial and sport fisheries and other marine-dependent activities. Therefore, the commission, based upon the advice and recommendations of the department, shall encourage, manage, and regulate emerging fisheries consistent with the policies of this title.

Comment. Section 12600 continues former Fish and Game Code Section 7090(a) without substantive change.

§ 12605. "Emerging fishery"

12605. For the purposes of this chapter, "emerging fishery," in regard to a marine fishery, means a fishery that meets both of the following requirements:

(a) A fishery that the director has determined is an emerging fishery, based on criteria that are approved by the commission and are related to a trend of increased landings or participants in the fishery and the degree of existing regulation of the fishery.

(b) A fishery that is not an established fishery.

Comment. Section 12605 continues former Fish and Game Code Section 7090(b)(1), and the first sentence of former Fish and Game Code Section 7090(b)(2), without substantive change.

 **Note.** Proposed Section 12605 would continue part of Section 7090(b), which was amended by 2018 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 12610. "Established fishery"

12610. "Established fishery," in regard to a marine fishery, means, prior to January 1, 1999, one or more of the following:

(a) A restricted access fishery has been established in this code or in regulations adopted by the commission.

(b) A fishery, for which a federal fishery management plan exists, and in which the catch is limited within a designated time period.

(c) A fishery for which a population estimate and catch quota is established annually.

(d) A fishery for which regulations for the fishery are considered at least biennially by the commission.

(e) A fishery for which this code or regulations adopted by the commission prescribes at least two management measures developed for the purpose of sustaining the fishery. Management measures include minimum or maximum size limits, seasons, time, gear, area restriction, and prohibition on sale or possession of fish.

Comment. Section 12610 continues the second sentence and subparagraphs (A)-(E) of former Fish and Game Code Section 7090(b)(2).

Note. Existing Fish and Game Code Section 7090(b)(2) (which would be continued by proposed Section 12610), provides that an “established fishery” means, “prior to January 1, 1999,” any of a list of described fisheries.

The Commission invites comment on whether this definition is now obsolete and should be discontinued, or alternatively continued without the date limitation.

§ 12615. Department monitoring requirement

12615. The department shall closely monitor landings and other factors it deems relevant in each emerging fishery and shall notify the commission of the existence of an emerging fishery.

Comment. Section 12615 continues former Fish and Game Code Section 7090(c) without substantive change.

§ 12620. Commission authority

12620. The commission, upon the recommendation of the department, may do either, or both, of the following:

(a) Adopt regulations that limit taking in the fishery by means that may include, but not be limited to, restricting landings, time, area, gear, or access. These regulations may remain in effect until a fishery management plan is adopted.

(b) Direct the department to prepare a fishery management plan for the fishery and regulations necessary to implement the plan.

Comment. Section 12620 continues former Fish and Game Code Section 7090(d) without substantive change.

§ 12625. Compliance with requirements for fishery management plan generally

12625. (a) A fishery management plan for an emerging fishery shall comply with the requirements for preparing and adopting fishery management plans contained in this title.

(b) In addition to those requirements, to allow for adequate evaluation of the fishery and the acquisition of essential fishery information, the fishery management plan shall provide an evaluation period, which shall not exceed three years unless extended by the commission.

(c) During the evaluation period, the plan shall do both of the following:

(1) In order to prevent excess fishing effort during the evaluation period, limit taking in the fishery by means that may include, but need not be limited to, restricting landings, time, area, gear, or access to a level that the department determines is necessary for evaluation of the fishery.

1 (2) Contain a research plan that includes objectives for evaluating the fishery, a
2 description of the methods and data collection techniques for evaluating the
3 fishery, and a timetable for completing the evaluation.

4 **Comment.** Section 12625 continues former Fish and Game Code Section 7090(e) without
5 substantive change.

6 **§ 12630. Fee**

7 12630. (a) The commission is authorized to impose a fee on an emerging
8 fishery in order to pay the costs of implementing this chapter.

9 (b) The fees may include, but need not be limited to, ocean fishing stamps and
10 permit fees.

11 (c) The fees may not be levied in excess of the necessary costs to implement and
12 administer this chapter.

13 (d) The commission may reduce fees annually if it determines that sufficient
14 revenues exist to cover costs incurred by the department in administering this
15 chapter.

16 (e) The commission and the department, with the advice of fishery participants
17 and other interested parties, shall consider alternative ways to fund the evaluation
18 of emerging fisheries.

19 **Comment.** Section 12630 continues former Fish and Game Code Section 7090(f) without
20 substantive change.

21 **§ 12635. Incorporation into fishery management plan**

22 12635. An emerging fishery is subject to this chapter unless the department
23 incorporates the fishery into a fishery management plan developed under Sections
24 12300 to 12540, inclusive.

25 **Comment.** Section 12635 continues former Fish and Game Code Section 7090(g) without
26 substantive change.

27 **§ 12640. Conflict of chapter with other sections**

28 12640. In the event that this chapter is found to conflict with Section 19900 or
29 19910, or Chapter 5 (commencing with Section 12050) of Title 2, this section
30 shall prevail.

31 **Comment.** Section 12640 continues former Fish and Game Code Section 7090(h) without
32 substantive change.

33  **Note.** Proposed Section 12640 would continue Section 7090(h), which was amended by 2018
34 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

1 in the case of a person diving from the shore, the license may be kept within 500
2 yards of the shore.

3 **Comment.** Section 12900 continues former Fish and Game Code Section 7145(a) without
4 substantive change. The referenced exception for persons under the age of 16 years is continued
5 by Section 13000.

6 See also Section 4862 (enforcement).

7 **§ 12905. Fishing with two rods**

8 12905. It is unlawful for any person to fish with two rods without first obtaining
9 a second-rod sport fishing validation, in addition to a valid California sport fishing
10 license validation, and having that validation affixed to his or her valid sport
11 fishing license. Any person who has a valid second-rod sport fishing validation
12 affixed to his or her valid sport fishing license may fish with two rods in inland
13 waters in any sport fishery in which the regulations of the commission provide for
14 the taking of fish by angling, except those waters in which only artificial lures or
15 barbless hooks may be used and the waters of the Smith River in Del Norte
16 County.

17 **Comment.** Section 12905 continue former Fish and Game Code Section 7149.45(a) without
18 substantive change.

19 See also Section 4860 (enforcement).

20 **§ 12910. Ocean sport fishing in specified waters**

21 12910. (a) In addition to a valid California sport fishing license and any other
22 applicable license stamp or validation issued pursuant to this code, a person sport
23 fishing in ocean waters south of a line extending due west from Point Arguello
24 shall have a valid sport fishing ocean enhancement validation permanently affixed
25 to his or her fishing license.

26 (b) A sport fishing license issued pursuant to paragraph (4) or (5) of subdivision
27 (a) of Section 13100 is exempt from this section

28 **Comment.** Section 12910 continues the first and third sentences of former Fish and Game
29 Code Section 6596.1(a) without substantive change.

30 See also Section 4864 (enforcement).

31 **Note.** Under existing law, the provisions of Section 6596.1(a) are governed by existing
32 Section 6403, which makes the provisions of Section 6596.1(a) inapplicable to aquaculture
33 business activities. The continuation of the first and third sentences of Section 6596.1(a) in this
34 location would make Section 6403 (proposed Section 25400) inapplicable to those provisions.
35 Technically, this would make those provisions applicable to aquaculture business activities.
36 However, the provisions appear to have no application to such activities. For that reason, the
37 change described in this Note would seem to have no practical effect.

38 **The Commission invites comment on whether this change would be a problem.**

Article 2. Colorado River

§ 12950. “Colorado River”

12950. As used in this article, “Colorado River” refers to the waters of the Colorado River, and adjacent waters other than canals, drains, or ditches used to transport water used for irrigation or domestic purposes.

Comment. Section 12950 is drawn from former Fish and Game Code Section 7180.1(a).

§ 12955. Fishing on Colorado River

(a) Any person taking fish or amphibia for purposes other than profit from or on a boat or other floating device on the waters of the Colorado River and on adjacent waters, except canals, drains, or ditches used to transport water used for irrigation or domestic purposes, shall have in his or her possession a valid sportfishing license issued by either the State of Arizona or State of California.

(b) In addition to either of the licenses, a person taking fish or amphibia as indicated shall have in his or her possession a Colorado River special use validation. If he or she is a person having in his or her possession a valid California sportfishing license, he or she shall have an Arizona special use validation to fish legally the waters described above. If he or she is a person having in his or her possession a valid Arizona sportfishing license, he or she shall have a California special use validation to fish legally the waters described above.

(c) A special use validation, when accompanied by the proper license, permits fishing in any portion of those waters, and permit fishermen to enter the waters from any point.

Comment. Section 12955 continues former Fish and Game Code Section 7180.1(a), (b), and the first sentence of subdivision (c), without substantive change.

See also Section 4860 (enforcement).

 **Note.** The Commission has been informed by the Department of Fish and Wildlife that the “Colorado River Special Use Validation” no longer exists. See Memorandum 2018-22, Exhibit comment 106. **The Commission invites comment on how existing Section 7180.1(b) (which would be continued by proposed Section 12955(b)) should be revised to reflect that fact. Should it be deleted entirely? Modified to remove the first sentence only?**

§ 12960. Colorado River shoreline fishing

12960. (a) A person fishing from the shore in the waters of the Colorado River located in Arizona or California shall have in his or her possession a valid sportfishing license issued by the state that has jurisdiction over that shore. That shoreline fishing does not require a Colorado River special use validation as long as the fisherman remains on the shore and does not embark on the water.

(b) Any person, however, having in his or her possession a valid Arizona sportfishing license and a California special use validation may fish from the shore in the waters of the Colorado River, or adjacent waters, except canals, drains, and ditches used to transport water used for irrigation or domestic purposes, located in California without a sport fishing license issued by the State of California.

1 **Comment.** Section 12960 continues subdivision (a) of former Fish and Game Code Section
2 7181.1 without substantive change.

3 **Note.** The Commission has been informed by the Department of Fish and Wildlife that the
4 “Colorado River Special Use Validation” no longer exists. See Memorandum 2018-22, Exhibit
5 comment 106. **The Commission invites comment on how existing Section 7181.1(a) (which**
6 **would be continued by proposed Section 12960) should be revised to reflect that fact.**
7 **Should it be deleted entirely? Modified to remove the second sentence only?**

8 **§ 12965. Effectiveness of article**

9 12965. This article shall become ineffective if Chapter 5 (commencing with
10 Section 13350) becomes ineffective pursuant to subdivision (a) of Section 13350.

11 **Comment.** Section 12965 continues the effect of former Fish and Game Code Section 7185 as
12 that provision applied to former Fish and Game Code Sections 7180.1 and 7181.1. See Section
13 13350(a).

14 CHAPTER 3. EXCEPTIONS

15 **§ 13000. Persons under the age of 16 years**

16 13000. Section 12900 does not apply to a person under the age of 16 years.

17 **Comment.** Section 13000 continues a part of former Fish and Game Code Section 7145(a)
18 without substantive change.

19 **§ 13005. Public pier, ocean waters, aquaculture facility**

20 13005. (a) A sport fishing license is not required to take fish by any legal means,
21 for any purpose other than profit, from a public pier, as defined by the
22 commission, in the ocean waters of the state, or while angling at an aquaculture
23 facility site that is registered pursuant to Section 235 of Title 14 of the California
24 Code of Regulations.

25 (b) For purposes of this section, “ocean waters” include, but are not limited to,
26 the open waters adjacent to the ocean and any island; the waters of any open or
27 enclosed bay contiguous to the ocean; the San Francisco and San Pablo Bays, with
28 any tidal bay belonging thereto; and any slough or estuary, if found between the
29 Golden Gate Bridge and the Benicia-Martinez Bridge.

30 **Comment.** Section 13005 continues former Fish and Game Code Section 7153 without
31 substantive change.

32 **§ 13010. Fishing on private property**

33 13010. (a) Section 12900 does not apply to sport fishing by an owner of
34 privately owned real property, or an invitee of an owner who does not provide the
35 owner compensation, from a lake or pond that is wholly enclosed by that owner’s
36 real property, that is located offstream, and that does not at any time derive water
37 from, or supply water to, any permanent or intermittent artificial or natural lake,
38 pond, stream, wash, canal, river, creek, waterway, aqueduct, or similar water

1 conveyance system of the state. Access and control of the real property shall be
2 under the direct authority of the owner, and not of another person or entity.

3 (b) This section does not, and shall not be construed to, authorize the
4 introduction, migration, stocking, or transfer of aquatic species, prohibited species,
5 or any other nonnative or exotic species, into waters of the state or waterways.

6 (c) This section does not supersede or otherwise affect any provision of law that
7 governs aquaculture, including, but not limited to, the operation of a trout farm, or
8 any activity that is an adjunct to or a feature of, or that is operated in conjunction
9 with, any other enterprise operated for a fee, including, but not limited to, a private
10 park or private recreation area.

11 **Comment.** Section 13010 continues former Fish and Game Code Section 7145(b) without
12 substantive change.

13 **§ 13020. Free sport fishing days**

14 13020. Notwithstanding Section 12900, the director may designate not more
15 than two days, which may or may not be consecutive, in each year as free
16 sportfishing days during which residents and nonresidents may, without having a
17 sportfishing license and without the payment of any fee, exercise the privileges of
18 a holder of a sportfishing license, subject to all of the limitations, restrictions,
19 conditions, laws, rules, and regulations applicable to the holder of a sportfishing
20 license.

21 **Comment.** Section 13020 continues former Fish and Game Code Section 7149.7 without
22 substantive change.

23 **CHAPTER 4. FEES**

24 **Article 1. Sport Fishing License**

25 **§ 13100. Sport fishing license**

26 13100. (a) The fee for a sport fishing license is as follows:

27 (1) For a resident, for a calendar year, or, if issued after the beginning of that
28 year, for the remainder of that year, a base fee of thirty-one dollars and twenty-five
29 cents (\$31.25).

30 (2) For a nonresident, for a calendar year, or, if issued after the beginning of that
31 year, for the remainder of that year, a base fee of eighty-four dollars (\$84).

32 (3) For a nonresident, for 10 consecutive days beginning on the date specified on
33 the license, the fee set forth in paragraph (1).

34 (4) For a resident or nonresident, for two consecutive designated calendar days,
35 one-half of the fee set forth in paragraph (1). Notwithstanding Section 2930, more
36 than one two-day license issued for different two-day periods may be issued to or
37 possessed by a person at one time.

38 (5) For a resident or nonresident, for one designated day, a base fee of ten
39 dollars (\$10).

(b) The base fees specified in this section are applicable commencing January 1, 2004, and shall be adjusted annually thereafter pursuant to Section 3755.

(c) The commission shall adjust the amount of the fees specified in subdivision (b), as necessary, to fully recover, but not exceed, all reasonable administrative and implementation costs of the department and the commission relating to those licenses.

Comment. Subdivision (a) of Section 13100 continues former Fish and Game Code Section 7149.05(a) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7149.05(d) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 7149.05(e) without substantive change.

Note. Existing Section 7149.05(a)(4) cross-refers to existing Section 1053 of the existing code, a section that was repealed by 2015 Cal. Stat. ch. 683. Section 1053 generally prohibited obtaining more than one paper license – a form of license that is now obsolete – of the same class, for the same license year, except under specified conditions. As a substantially similar prohibition applicable to electronic licenses appears in existing Section 1053.1, proposed Section 13100(a)(4) would cross-refer to the section of the proposed law that continues existing Section 1053.1.

The Commission seeks comment on whether that revision is appropriate.

§ 13105. Lifetime sport fishing license

13105. (a) In addition to Section 12850, the department shall issue a lifetime sport fishing license pursuant to this section.

(b) A lifetime sport fishing license authorizes sport fishing anywhere in this state in accordance with the law for the life of the person to whom issued, unless revoked for a violation of this code or regulations adopted pursuant to this code. A lifetime sport fishing license is valid for a one-year period from January 1 through December 31 and may be renewed annually, regardless of any lapse of the license, at no additional cost to the licensee. A lifetime sport fishing license is not transferable.

(c) A lifetime sport fishing license does not include any special tags, stamps, or fees, and may be issued only to a resident.

(d) The fee for a lifetime sport fishing license is as follows:

(1) For a person 62 years of age or over, a base fee of three hundred sixty-five dollars (\$365).

(2) For a person 40 years of age or over and less than 62 years of age, a base fee of five hundred forty dollars (\$540).

(3) For a person 10 years of age or over and less than 40 years of age, a base fee of six hundred dollars (\$600).

(4) For a person less than 10 years of age, a base fee of three hundred sixty-five dollars (\$365).

(e) Upon payment of a base fee of two hundred forty-five dollars (\$245), a person holding a lifetime sport fishing license shall be entitled annually to the privileges afforded to a person holding a second-rod validation issued pursuant to Section 12905, a sport fishing ocean enhancement validation issued pursuant to

1 Section 12910, one steelhead trout report restoration card issued pursuant to
2 Section 44000, and one salmon report card issued pursuant to regulations adopted
3 by the commission. Lifetime privileges issued pursuant to this subdivision are not
4 transferable.

5 (f) The base fees specified in this section are applicable commencing January 1,
6 2004, and shall be adjusted annually thereafter pursuant to Section 3755.

7 (g) Nothing in this section requires a person less than 16 years of age to obtain a
8 license to engage in sport fishing.

9 (h) Nothing in this section exempts a license applicant from meeting other
10 qualifications or requirements otherwise established by law for the privilege of
11 sport fishing.

12 **Comment.** Section 13105 continues former Fish and Game Code Section 7149.2 without
13 substantive change. References in subdivision (e) of former Fish and Game Code Section 7149.2
14 to a second-rod “stamp” and a sport fishing ocean enhancement “stamp” are discontinued as
15 obsolete. See 2015 Cal. Stat. ch. 683, §§ 19, 23 (repeal of former Fish and Game Code sections
16 providing for issuance of such stamps).

17 **§ 13110. Job Corps enrollee**

18 13110. For the purpose of obtaining a sport fishing license, enrollees in the Job
19 Corps, created by the Economic Opportunity Act of 1964 (Public Law 88-452),
20 shall be deemed to be residents of California.

21 **Comment.** Section 13110 continues former Fish and Game Code Section 7149.5 without
22 substantive change.

23 **Article 2. Reduced Fee Licenses**

24 **§ 13150. Reduced fee license**

25 13150. (a) Upon application to the department’s headquarters office in
26 Sacramento, the following persons shall be issued a reduced fee sport fishing
27 license:

28 (1) A disabled veteran having a 50 percent or greater service-connected
29 disability, upon presentation of proof of an honorable discharge from military
30 service and proof of the disability. Proof of the disability shall be by certification
31 from the United States Veterans Administration or by presentation of a license
32 issued pursuant to this paragraph in the preceding license year.

33 (2) A member of the military who is a “recovering service member” pursuant to
34 Section 1602(7) of the federal National Defense Authorization Act for Fiscal Year
35 2008 (Public Law 110-181). Proof of eligibility for a reduced fee sport fishing
36 license pursuant to this paragraph shall be by submission of a letter, online or in
37 hardcopy, to the department from that person’s commanding officer or from a
38 military medical doctor, stating that the person is a recovering service member.

39 (3) A resident over 65 years of age whose total monthly income from all
40 sources, including any old age assistance payments, does not exceed the amount in
41 effect on September 1 of each year contained in subdivision (c) of Section 12200

1 of the Welfare and Institutions Code, for single persons, or subdivision (d) of
2 Section 12200 of the Welfare and Institutions Code combined income for married
3 persons, as adjusted pursuant to that section. The amount in effect on September 1
4 of each year shall be the amount used to determine eligibility for a reduced fee
5 license during the following calendar year. Proof of eligibility for a reduced fee
6 sport fishing license pursuant to this paragraph shall be by a letter or other
7 document, as specified by the department, from a public agency.

8 (b) A person who has been convicted of any violation of this code is ineligible
9 for a license pursuant to this section.

10 (c) A person applying for a reduced fee sport fishing license shall submit
11 adequate documentation for the department to determine whether the applicant is
12 eligible for a reduced fee sport fishing license. The department shall not issue a
13 reduced fee sport fishing license to any person unless the department is satisfied
14 that the applicant has provided adequate documentation of eligibility for that
15 license.

16 (d) The fee for a license issued pursuant to this section shall be a base fee of
17 four dollars (\$4) applicable commencing January 1, 1996, and annually adjusted
18 thereafter pursuant to Section 3755.

19 (e) A license issued pursuant to this section is valid for a calendar year, or if
20 issued after the beginning of that year, for the remainder of that year.

21 **Comment.** Section 13150 continues former Fish and Game Code Section 7150 without
22 substantive change.

23 Article 3. Free Licenses

24 § 13200. Free license for individuals

25 13200. (a) Upon application to the department, the following persons shall be
26 issued a sport fishing license, free of any charge or fee:

27 (1) A blind person, upon presentation of proof of blindness. For purposes of this
28 paragraph, “blind person” means a person who in each eye has central visual
29 acuity of 20/200 or less with the aid of the best possible correcting lens, or central
30 visual acuity better than 20/200 if the widest diameter of the remaining visual field
31 is no greater than 20 degrees. Proof of blindness shall be by certification from a
32 qualified licensed optometrist or ophthalmologist, or by presentation of a license
33 issued pursuant to this paragraph in a previous license year.

34 (2) A person with a developmental disability, upon presentation of certification
35 of that disability from a qualified licensed physician, or from the director of a state
36 regional center for the developmentally disabled.

37 (3) A resident who is permanently unable to move from place to place without
38 the aid of a wheelchair, walker, forearm crutches, or a comparable mobility-related
39 device. Proof of the disability shall be by certification from a licensed physician or
40 surgeon, or by presentation of a license issued pursuant to this paragraph in a
41 license year after 1996.

(4) A resident Native American who, in the discretion of the department, is financially unable to pay the fee required for the license.

(b) A person who has been convicted of any violation of this code is ineligible for a license pursuant to this section.

(c) Sport fishing licenses issued pursuant to paragraphs (1), (2), and (3) of subdivision (a) are valid for five calendar years, or if issued after the beginning of the first year, for the remainder of the five calendar years.

(d) Sport fishing licenses issued pursuant to paragraph (4) of subdivision (a) are valid for a calendar year or, if issued after the beginning of that year, for the remainder of that year.

Comment. Section 13200 continues former Fish and Game Code Section 7151(a)-(c) without substantive change.

§ 13205. Free group sport fishing license for persons with disabilities

13205. (a) Upon application to the department, the department may issue a group sport fishing license, free of any charge or fee, to a group of persons with mental or physical disabilities who are under the care of any of the following entities:

(1) A certified federal, state, county, city, or private licensed care center that is a community care facility as defined in subdivision (a) of Section 1502 of the Health and Safety Code.

(2) An organization exempt from taxation under Section 501(c)(3) of the federal Internal Revenue Code.

(3) A school or school district.

(b) The organization listed in subdivision (a) shall provide evidence that it is a legitimate private licensed care center, tax-exempt organization, school, or school district.

(c) The license shall be issued to the person in charge of the group and shall be in that person's possession when the group is fishing.

(d) The license shall identify the location and the date or dates for which fishing is authorized, and the maximum number of people that may be included in the group that will be fishing. The license holder shall notify the local department office before sport fishing and indicate where, when, and how long the group will be sport fishing.

(e) Employees of the entity listed in subdivision (a) are exempt from Section 12900 while assisting the group that that is sport fishing pursuant to the license.

Comment. Section 13205 restates former Fish and Game Code Section 7151(d) without substantive change.

Note. Proposed Section 13205 is intended to restate existing Section 7151(d) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

7151.....

(d) Upon application to the department, the department may issue, free of any charge or fee, a sport fishing license to groups of mentally or physically handicapped persons under the care of a certified federal, state, county, city, or private licensed care center that is a community care facility as defined in subdivision (a) of Section 1502 of the Health and Safety Code, to organizations exempt from taxation under Section 501(c)(3) of the federal Internal Revenue Code, or to schools or school districts. Any organization that applies for a group fishing license shall provide evidence that it is a legitimate private licensed care center, tax-exempt organization, school, or school district. The license shall be issued to the person in charge of the group and shall be in his or her possession when the group is fishing. Employees of private licensed care centers, tax-exempt organizations, schools, or school districts are exempt from Section 7145 only while assisting physically or mentally disabled persons fishing under the authority of a valid license issued pursuant to this section. The license shall include the location where the activity will take place, the date or dates of the activity, and the maximum number of people in the group. The licenseholder shall notify the local department office before fishing and indicate where, when, and how long the group will fish.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of existing Section 7151(d).

§ 13210. Free group sport fishing license for military personnel with injuries or disabilities

13210. (a) Upon application to the department, the department may issue, free of any charge or fee, a group sport fishing license to a nonprofit organization for day-fishing trips that provide recreational rehabilitation therapy for active duty members of the United States military who are currently receiving inpatient care in a military or Veterans Administration hospital and veterans with service-connected disabilities. To be eligible, the nonprofit organization shall be registered to do business in this state, or exempt from taxation under Section 501(c) of the federal Internal Revenue Code.

(b) The license shall be valid for the calendar year of issue or, if issued after the beginning of that year, for the remainder of that year.

(c) The license shall be issued to the person in charge of the group, and shall be in that person's possession when the group is fishing.

(d) The organization shall notify the local department office before sport fishing, and indicate where, when, and for how long the group will be sport fishing.

Comment. Section 13210 continues former Fish and Game Code Section 7151(e) without substantive change.

 **Note.** The Commission is unsure why this provision refers to "day-fishing trips." That language sounds like a limitation. Is it intended as one?

The Commission invites input on this point.

§ 13215. Funding for free licenses

13215. (a) On January 15 of each year, the department shall determine the number of free sport fishing licenses in effect during the preceding year.

(b) There shall be appropriated from the General Fund a sum equal to two dollars (\$2) per free sport fishing license issued pursuant to Section 13200 or 13205 during the preceding license year. That sum may be appropriated annually in the Budget Act for transfer to the Fish and Game Preservation Fund, and

appropriated in the Budget Act from the Fish and Game Preservation Fund to the department, for the purposes of provisions of this code that govern sport fishing.

Comment. Section 13215 continues former Fish and Game Code Section 7151(f) and (g) without substantive change.

Note. The last clause of existing Fish and Game Code Section 7151(g) (which would be continued by proposed Section 13215) reads “for the purposes of this part,” referring to Part 2 (commencing with Section 7100) of Division 6 of the existing code. As in the proposed law the provisions of that part appear in several different locations, proposed Section 13215 would revise that clause to read “for the purposes of provisions of this code that govern sport fishing.”

The Commission invites comment on whether that revision would cause any substantive change in the meaning of the provision.

Article 4. Validations

§ 13250. Second rod validation

13250. The fee for a second-rod sport fishing validation issued pursuant to Section 12905 is a base fee of seven dollars and fifty cents (\$7.50), applicable commencing January 1, 1995, and annually adjusted thereafter pursuant to Section 3755.

Comment. Section 13250 continues former Fish and Game Code Section 7149.45(b) without substantive change.

§ 13255. Sport fishing ocean enhancement validation

13255. (a) The fee for a sport fishing ocean enhancement validation issued pursuant to Section 12910 is a base fee of three dollars and fifty cents (\$3.50), applicable commencing January 1, 2004, and annually adjusted thereafter pursuant to Section 3755.

(b) The commission shall adjust the amount of the fees specified in subdivision (a), as necessary, to fully recover, but not exceed, all reasonable administrative and implementation costs of the department and the commission relating to those licenses.

Comment. Subdivision (a) of Section 13255 continues the second sentence of former Fish and Game Code Section 6596.1(a) (as applied to sport fishing ocean enhancement validation), and former Fish and Game Code Section 6596.1(f), without substantive change.

Subdivision (b) continues former Fish and Game Code Section 6596.1(g) (as applied to sport fishing ocean enhancement validation) without substantive change.

Note. Under existing law, the provisions of Section 6596.1 are governed by existing Section 6403, which makes the provisions of Section 6596.1 inapplicable to aquaculture business activities. The continuation of the second sentence of Section 6596.1(a), Section 6596.1(f), and Section 6596.1(g) in this location would make Section 6403 (proposed Section 25400) inapplicable to those provisions. Technically, this would make those provisions applicable to aquaculture business activities. However, the provisions appear to have no application to such activities. For that reason, the change described in this Note would seem to have no practical effect.

The Commission invites comment on whether this change would be a problem.

CHAPTER 5. RECIPROCAL LICENSING

§ 13350. Operation of chapter

13350. (a) This chapter shall remain effective so long as the commission finds and determines that under the laws of the State of Arizona, substantially similar Arizona licenses are authorized to be issued to licensees of this state, upon substantially the same terms and conditions as are provided for in this chapter, relating to the issuance of California licenses to licensees of the State of Arizona.

(b) If Arizona issues a resident sport fishing license for a term less than one year for the purpose of changing to a calendar year license from a fiscal year license, that license shall be deemed to be a license upon substantially the same terms and conditions as are provided for the issuance of California licenses to licensees of the State of Arizona, for the purposes of subdivision (a).

Comment. Subdivision (a) of Section 13350 continues former Fish and Game Code Section 7185 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7186.1(b) without substantive change.

§ 13355. Responsibilities of state commissions relating to licenses and special use stamps and validations

13355. (a) The Arizona Game and Fish Commission shall handle California sport fishing licenses and California special use validations and issue them through Arizona license dealers. Prior to August 31 of each year, that commission shall make an audit report and send a remittance for those sales to the department.

(b) The department shall handle Arizona special use validations and issue them through California license dealers. Prior to August 31 of each year, the department shall make an audit report and send a remittance for those sales to the Arizona Game and Fish Commission.

Comment. Section 13355 continues former Fish and Game Code Section 7183.1(a) and (b) without substantive change.

§ 13360. Terms of special use validations

13360. (a) An Arizona special use validation is valid from January 1 to December 31, inclusive, of each year, to coincide with the period for which a California sport fishing license is issued.

(b) A California special use validation is valid for one year, to coincide with the period for which an Arizona fishing license is issued.

Comment. Section 13360 continues former Fish and Game Code Section 7184.1(a) and (b) without substantive change.

1 **§ 13365. Conditional provisions relating to California licenses and special use validations**

2 13365. When the director determines from the Secretary of State that copies of
3 the law of the State of Arizona have been received by the Secretary of State that
4 provides for an Arizona resident sport fishing license valid for a period of less than
5 one year, a California special use validation valid for the same period as the
6 Arizona resident sport fishing license may be issued for a fee of one dollar (\$1).

7 **Comment.** Section 13365 continues former Fish and Game Code Section 7186.1(a) without
8 substantive change.

9 CHAPTER 6. ISSUANCE

10 **§ 13400. Compensation for license agent**

11 13400. California sport fishing license validations shall be issued by authorized
12 license agents in the same manner as sport fishing licenses, and no compensation
13 shall be paid to the authorized license agent for issuing a validation, except as
14 provided in Section 3350.

15 **Comment.** Section 13400 combines and continues former Fish and Game Code Section
16 7149.05(b) without substantive change.

17 **§ 13405. Colorado River special use validations**

18 13405. (a) Arizona Colorado River special use validations shall be issued by
19 California authorized license agents under the supervision of the department in the
20 same manner as sport fishing licenses are issued, and California sport fishing
21 licenses and California Colorado River special use validations shall be issued by
22 Arizona license dealers under the supervision of the Arizona Game and Fish
23 Commission.

(b) This section shall remain effective so long as the commission finds and determines that under the laws of the State of Arizona, substantially similar Arizona licenses are authorized to be issued to licensees of this state, upon substantially the same terms and conditions as are provided for in this chapter, relating to the issuance of California licenses to licensees of the State of Arizona.

29 **Comment.** Subdivision (a) of Section 13405 continues former Fish and Game Code Section
30 7182.1(a) without substantive change.

31 Subdivision (b) continues the effect of former Fish and Game Code Section 7185 as that
32 provision applied to former Fish and Game Code Section 7182.1. See Section 13350(a).

33 **Note.** The Commission has been informed by the Department of Fish and Wildlife that the
34 “Colorado River Special Use Validation” no longer exists. See Memorandum 2018-22, Exhibit
35 comment 106. **The Commission invites comment on how existing Section 7182.1(b) (which**
36 **would be continued by proposed Section 113405) should be revised to reflect that fact.**
37 **Should it be deleted entirely?**

TITLE 3. TAKE LIMITS

§ 13500. Bag limits

13500. It is unlawful for a person to possess more than one daily bag limit of any fish, amphibian, or reptile taken by sport fishing under a license issued pursuant to Title 2 (commencing with Section 12850), unless authorized by regulations adopted by the commission.

Comment. Section 13500 continues former Fish and Game Code Section 7120 without substantive change, except to add references to amphibians and reptiles.

Note. Proposed Section 13500 would revise existing Section 7120 to make the provision expressly applicable to amphibians and reptiles.

The Commission invites comment on the appropriateness of this revision.

TITLE 4. COMMERCE

§ 13600. Unauthorized purchase or sale

13600. Except as otherwise provided by this code or by regulation, it is unlawful to buy or sell a fish or amphibian that was taken in, brought into, or brought ashore from, any waters of the state.

Comment. Section 13600 continues the first paragraph of former Fish and Game Code Section 7121 without substantive change.

See also Sections 4930, 4932, 4934, 5102, 5108, 5802 (enforcement).

Note. The Commission invites comment on whether existing Section 7121 should be revised to apply to reptiles.

§ 13605. Disposition of fish or amphibians caught on sport fishing vessel

13605. (a) In any place of business where fish are bought, sold, or processed, it is unlawful to buy, sell, or possess a fish or amphibian that was taken by sport fishing on a boat, barge, or vessel.

(b) Subdivision (a) does not apply to possession for the purposes of canning or smoking pursuant to regulations adopted by the commission.

Comment. Section 13605 restates the second paragraph of former Fish and Game Code Section 7121 without substantive change.

See also Sections 4930, 4932, 4934, 5102, 5108, 5802 (enforcement).

Note. Proposed Section 13605 is intended to restate the second paragraph of existing Fish and Game Code Section 7121 to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

7121.....

It is unlawful to buy, sell, or possess in any place of business where fish are bought, sold, or processed, any fish or amphibia taken on any boat, barge, or vessel which carries sport fishermen, except those fish may be possessed in such a place only for the purposes of canning or smoking under regulations adopted by the commission.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

1 TITLE 5. PROCESSING AND WASTE

2 § 13700. Canning or smoking

3 13700. (a) Subject to Sections 13600 and 13605, fish lawfully taken under a
4 sport fishing license may be canned or smoked by a fish cannery or processor as a
5 service for a licensed sport fisherman.

6 (b) Any cannery or packing plant in which fish taken by lawful sport fishing are
7 canned shall emboss or imprint on the top of each can the words “not to be sold”
8 in letters of such size as to be clearly legible, and the embossment or imprint shall
9 remain affixed to the can.

10 (c) Any cannery or packing plant in which fish taken by lawful sport fishing are
11 smoked shall permanently imprint on each package the words “not to be sold” in
12 letters of such size as to be clearly legible, and the imprint shall remain visible on
13 the package.

14 (d) Fish that are canned or smoked under this section shall not be sold,
15 purchased, or offered for sale.

16 **Comment.** Section 13700 continues former Fish and Game Code Section 7230 without
17 substantive change.

18 § 13705. Fish offal

19 13705. (a) Notwithstanding Sections 13600 and 13605, any offal from a fish
20 taken under a sport fishing license which is delivered by the license holder to a
21 fish canner or fish processor may be processed, used, or sold by that fish canner or
22 fish processor.

23 (b) Nothing in this section authorizes a holder of a sport fishing license to sell,
24 or a fish canner or fish processor to purchase from a holder of a sport fishing
25 license, any fish taken under a sport fishing license.

26 **Comment.** Section 13705 continues former Fish and Game Code Section 7232 without
27 substantive change. A reference to a “portion” of a fish is deleted as superfluous. See Section 95
28 (reference to animal generally includes part of animal).

29 § 13710. Deterioration and waste

30 13710. The commission may adopt regulations to prevent deterioration and
31 waste of fish taken by sport fishing, and to regulate the disposal of the offal of that
32 fish.

33 **Comment.** Section 13710 continues former Fish and Game Code Section 5510 without
34 substantive change.

35 TITLE 6. SPORT FISHING REGULATIONS

36 § 13800. Conforming to federal regulations

37 13800. (a) The commission may establish by regulation an automatic process to
38 conform its sport fishing regulations to federal regulations.

1 (b) Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of
2 Title 2 of the Government Code does not apply to conforming actions
3 implemented pursuant to the automatic process specified in subdivision (a).

4 (c) The department shall provide public notice of a conforming action
5 implemented pursuant to this section.

6 **Comment.** Section 13800 continues former Fish and Game Code Section 7110 without
7 substantive change.

8 **§ 13805. Conforming of sport fishing regulations to federal regulations**

9 13805. (a) The department shall identify property it owns or manages that
10 includes areas for sport fishing accessible to persons with disabilities.

11 (b) Commencing with the booklet of sport fishing regulations published by the
12 commission in 1986, the availability of sport fishing areas, identified by the
13 department as accessible to persons with disabilities under subdivision (a), shall be
14 noted in the booklet of regulations, together with telephone numbers and
15 instructions for obtaining a list of those areas from regional department offices.

16 (c) Commencing with the booklet of sport fishing regulations published in 1987,
17 the booklet shall also contain any human health advisories relating to fish that are
18 formally issued by the State Department of Public Health, or summaries of those
19 human health advisories. The summaries shall be prepared in consultation with the
20 State Department of Public Health.

21 **Comment.** Section 13805 continues former Fish and Game Code Section 7115 without
22 substantive change.

23 **TITLE 7. SPECIAL PROGRAMS**

24 **CHAPTER 1. BAY-DELTA SPORT FISHING ENHANCEMENT STAMP**

25 **§ 13900. Deposit and use of funds**

26 13900. (a) Fees received by the department from the sale of the Bay-Delta Sport
27 Fishing Enhancement Stamp or validation shall be deposited in a separate account
28 in the Fish and Game Preservation Fund. The Bay-Delta Sport Fishing
29 Enhancement Stamp or validation shall not be required, and no fee shall be
30 collected, as of January 1, 2010.

31 (b) The department shall expend the funds in that account for the long-term,
32 sustainable benefit of the primary Bay-Delta sport fisheries, including, but not
33 limited to, striped bass, sturgeon, black bass, halibut, salmon, surf perch, steelhead
34 trout, and American shad. Funds shall be expended to benefit sport fish
35 populations, sport fishing opportunities, and anglers within the tidal waters of the
36 San Francisco Bay Delta and the main stem of the Sacramento and San Joaquin
37 Rivers, including major tributaries, below the most downstream dam, and
38 consistent with the requirements of the federal Endangered Species Act of 1973
39 (16 U.S.C. Sec. 1531 et seq.) and the California Endangered Species Act (Part 1

1 (commencing with Section 62000) of Division 17), the ecosystem restoration
2 component of the CALFED Programmatic Record of Decision dated August 28,
3 2000, and applicable commission policies.

4 (c) It is the intent of the Legislature that these funds be used to augment, not
5 replace, funding that would otherwise be allocated to Bay-Delta sport fisheries
6 from the sale of fishing licenses, the California Bay-Delta Authority, or other
7 federal, state, or local funding sources.

8 **Comment.** Section 13900 continues former Fish and Game Code Section 7361 without
9 substantive change.

10 **§ 13905. Advisory committee**

11 13905. (a) The director shall appoint a Bay-Delta Sport Fishing Enhancement
12 Stamp Fund Advisory Committee, consisting of nine members. The committee
13 members shall be selected from names of persons submitted by anglers and
14 associations representing Bay-Delta anglers of this state and shall serve at the
15 discretion of the director for terms of not more than four years. The director shall
16 appoint persons to the committee who possess experience in subjects with specific
17 value to the committee and shall attempt to balance the perspective of different
18 anglers.

19 (b) The advisory committee shall recommend to the department projects and
20 budgets for the expenditure of the funds from the account established in Section
21 13900. The department shall give full consideration to the committee's
22 recommendations.

23 (c) The department shall submit to the advisory committee and the Chief Clerk
24 of the Assembly and the Secretary of the Senate for distribution to the appropriate
25 fiscal and policy committees of the Legislature, at least annually, on or before
26 January 10 of each year, an accounting of funds derived from the Bay-Delta Sport
27 Fishing Enhancement Stamps and validations, including the funds generated and
28 expended and administrative expenditures, and the status of programs funded
29 pursuant to this article. In addition, the department shall report, at least annually,
30 to the committee on the status of projects undertaken with funds from that stamp
31 or validation, including reporting the department's reasoning in cases where
32 committee recommendations are not followed.

33 (d) The department shall post on its Internet Web site projects undertaken with
34 funds from the account established in Section 13900. At a minimum, the Internet
35 Web site shall list the project title, applicant, a brief description of the project, the
36 amount approved, and the project's status.

37 **Comment.** Section 13905 continues former Fish and Game Code Section 7363 without
38 substantive change.

1 **§ 13910. Grant program**

2 13910. (a) The department, in consultation with the advisory committee created
3 pursuant to Section 13905, shall develop a grant program to support activities
4 consistent with Section 13900.

5 (b) The department, in consultation with the advisory committee, shall develop
6 priority areas for funding under the grant program. The department shall give the
7 advisory committee an opportunity to review any draft public solicitation notice
8 before that notice is finalized and released to the public.

9 (c) The advisory committee shall assist the department in providing outreach to
10 encourage wide participation in the grant program.

11 (d) The department shall provide the advisory committee a copy of all grant
12 applications. The advisory committee shall have a minimum of 30 days to review
13 projects and provide recommendations to the department.

14 **Comment.** Section 13910 continues former Fish and Game Code Section 7362 without
15 substantive change.

16 **§ 13915. Additional responsibilities of department**

17 13915. (a) The department shall do all of the following:

18 (1) In consultation with the advisory committee, develop a spending plan that
19 focuses on identifying and funding viable projects and monitoring revenues to
20 assist the department in effectively expending available stamp revenues in a
21 manner consistent with the purposes described in Section 13900. The spending
22 plan shall be completed by January 31, 2010. Upon completion, a copy of the
23 spending plan shall be provided to the Legislature.

24 (2) Track and report the costs of projects funded pursuant to this article by doing
25 both of the following:

26 (A) Improve the tracking of individual project expenditures by assigning a
27 separate account to each project within the department's accounting system.

28 (B) Require a project manager to approve all expenditures directly related to the
29 manager's projects, periodically reconcile records for each project with accounting
30 records, and report expenditures to staff responsible for preparing advisory
31 committee reports.

32 (3) Reimburse the department's general fund appropriation for any lease
33 payment charged to the department's general fund appropriation on or before
34 January 1, 2010, that was eligible to be paid from the account established in
35 Section 13900.

36 (4) Ensure that employees of the department appropriately charge their time to
37 projects funded pursuant to this article by providing guidelines to employees
38 concerning when to charge activities to the account established in Section 13900.

39 (b) The department shall not charge payroll costs to the account established in
40 Section 13900 for employee activities that are not related to the implementation of
41 this article. The department shall determine whether any other expenditure has

1 been inappropriately charged to the account established in Section 13900 and shall
2 make all necessary accounting adjustments.

3 **Comment.** Section 13915 continues former Fish and Game Code Section 7364 without
4 substantive change.

5 See also Section 5102 (enforcement).

6 CHAPTER 2. JUNIOR FISHING RESERVE

7 § 13950. Districts 2510 and 2515

8 13950. (a) In that part of District 2510 comprising the waters of the Sawmill
9 Pond, and in that part of District 2515 comprising the waters of Francis Creek,
10 Rees Creek, and Williams Creek, it is unlawful for any person over the age of 14
11 to take any fish. Not more than five fish may be taken and possessed from those
12 waters during one day.

13 (b) It is the purpose of this section to create a junior fishing reserve for young
14 people so that they may practice the art of angling safely without interference
15 with, or being interfered with by, licensed sport fishermen and others during
16 lawful fishing seasons.

17 **Comment.** Section 13950 continues former Fish and Game Code Section 10925 without
18 substantive change.

19 PART 6. COMMERCIAL FISHING AND RELATED ACTIVITY

20 TITLE 1. GENERAL PROVISIONS

21 CHAPTER 1. DEFINITIONS

22 § 14200. “Stamp”

23 14200 For the purposes of this part, except where otherwise specified, “stamp”
24 includes an electronic validation of privileges issued to the licensee.

25 **Comment.** Section 14200 continues former Fish and Game Code Section 7700(d) without
26 substantive change, except that it is applicable to Sections 14610, 14760, 14770, and 16850.13.

27  **Note.** Proposed Section 14200 would apply to certain provisions that currently use the term
28 “stamp” without any governing definition (existing Fish and Game Code §§ 7852.1, 7852.2,
29 7857, 12003.5).

30 **The Commission invites comment on whether that application would cause any problems.**

31 § 14205. “Vessel owner”

32 14205. (a) For the purposes of this part, “vessel owner,” or a reference to an
33 owner of a vessel, means a person designated as the registered owner of a vessel,
34 on a certificate of documentation issued by the United States Coast Guard or on a
35 copy of the vessel registration issued by the vessel registration agency of the state
36 where the owner is a resident.

(b) For purposes of this section, the vessel registration agency in California is the Department of Motor Vehicles.

Comment. Section 14205 restates former Fish and Game Code Section 7601 without substantive change.

Note. The definition of “vessel owner” has been continued in two places, so that it will continue to have its existing scope of application. See also Section 37805.

CHAPTER 2. APPLICATION

§ 14250. Application of part

14250. (a) The provisions of this part apply to the taking and possession of fish for any commercial purpose.

(b) This part does not apply to activities governed by Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 14250 continues former Fish and Game Code Section 7600 without substantive change.

§ 14255. Application of other provisions

14255. Commercial fishing and related activity are also governed by Part 4 (commencing with Section 11500).

Comment. Section 14255 is new.

§ 14260. General authority for commercial take

14260. All fish, the taking of which is not otherwise restricted for commercial purposes, by state or federal law or any regulations adopted pursuant to those laws, may be taken at any time for commercial purposes.

Comment. Section 14260 continues former Fish and Game Code Section 8140 without substantive change.

CHAPTER 3. PROHIBITIONS

§ 14300. Prohibition against use of gear to take fish except as authorized

14300. It is unlawful to use or operate, or assist in using or operating, any net, trap, line, spear, or appliance, in taking fish, other than in connection with angling or as authorized by this code.

Comment. Section 14300 continues former Fish and Game Code Section 8603 without substantive change.

Note. As written, existing Section 8603 contains a blanket prohibition against the use of any type of net to take a fish, except in connection with angling, or “as provided in Chapter 3 or Chapter 4 of Part 3 of Division 6” of the existing code. The latter exception appears to be too narrow. There are other provisions of the code not located in either of those two chapters that authorize the use of nets to take fish in non-angling situations. See, e.g., existing Sections 8183(e) (bait net may be used to take anchovies), 8561(b) (drift gill net of specified size may be used to

1 take shark and swordfish). In proposed Section 14300, the exception was revised to include any
2 use of nets that is “authorized by this code.”

3 **The Commission invites comment on whether that proposed revision would cause any**
4 **problems.**

5 **§ 14305. Interference with use of fishing gear**

6 14305. (a) It is unlawful to willfully disturb or damage a net, trap, or other
7 apparatus that is being lawfully used to take fish in waters of this state.

8 (b) This section does not apply to a department employee engaged in the
9 performance of official duties.

10 **Comment.** Section 14305 continues former Fish and Game Code Section 8604 without
11 substantive change.

12 **§ 14310. Deterioration or waste**

13 14310. It is unlawful to cause or permit deterioration or waste of a fish taken in
14 the waters of this state, or brought into this state, or to take, receive, or agree to
15 receive more fish than can be used without deterioration, waste, or spoilage.

16 **Comment.** Section 14310 continues former Fish and Game Code Section 7704(a) without
17 substantive change.

18 **CHAPTER 4. REGULATION**

19 **§ 14350. Prohibition against use of gear to take fish except as authorized**

20 14350. The commission may make and enforce such regulations as may be
21 necessary or convenient for carrying out any power, authority, or jurisdiction
22 conferred under the following provisions:

23 (a) Section 14310.

24 (b) Section 21605.

25 (c) Section 21610.

26 (d) Section 21615.

27 (e) Section 21750.

28 (f) Section 21800.

29 (g) Section 21810.

30 (h) Section 21850.

31 (i) Section 21855.

32 (j) Section 22800.

33 (k) Section 22805.

34 (l) Section 22810.

35 (m) Section 22815.

36 (n) Section 23150.

37 (o) Section 42750.

38 **Comment.** Section 14350 continues former Fish and Game Code Section 7708 without
39 substantive change.

TITLE 2. COMMERCIAL FISHING

CHAPTER 1. LICENSE AND RELATED ENTITLEMENTS

Article 1. Requirements

§ 14500. Activity requiring license

14500. (a) Except for persons expressly exempted under this code, no person shall engage in any of the following activities without a commercial fishing license:

(1) Using, operating, or assisting in using or operating, any boat, aircraft, net, trap, line, or other device, to take a fish or amphibian, for a commercial purpose.

(2) Bringing, or contributing to bringing, a fish or amphibian ashore, for the purpose of selling the fish or amphibian in a fresh state.

(3) Materially contributing to the activities on board the commercial fishing vessel.

(b) Any person on board a commercial fishing vessel who is not required under subdivision (a) to hold a commercial fishing license shall register his or her presence on board the vessel in a log that is maintained by the owner or operator of the vessel pursuant to the requirements of the department.

(c) As used in subdivisions (a) and (b), the term “person” means a natural person 16 years of age or greater.

(d) This section does not apply to any of the following persons:

(1) The holder of a live freshwater bait fish license issued pursuant to Section 22100 when taking, transporting, or selling live freshwater fish for bait.

(2) A person employed by a fish receiver to unload fish or fish products, or load or unload food and supplies, on or from a commercial fishing boat at a dock.

Comment. Subdivision (a) of Section 14500 continues former Fish and Game Code Section 7850(a) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7850(b) without substantive change.

Subdivision (c) continues the first sentence of former Fish and Game Code Section 7850(c) without substantive change.

Paragraph (1) of subdivision (d) continues former Fish and Game Code Section 7850(d) without substantive change.

Paragraph (2) of subdivision (d) continues former Fish and Game Code Section 7850.5 without substantive change.

Note. Existing Fish and Game Code Section 7850(c) (which would be continued by proposed Section 14500(c)) provides that the “persons” to whom the section applies do not include “persons who are less than 16 years of age, a partnership, corporation, or association.” This language, if interpreted literally, would indicate that the section may apply to other business entities, such as a limited liability company or trust. See existing Fish and Game Code Section 67 (“person” means “any natural person or any partnership, corporation, limited liability company, trust, or other type of association.”)

This application appears inadvertent, as several other sections of the code relating to commercial fishing licenses make clear that the licensee must be a natural person. See, e.g., existing Sections 7851 (application for license must indicate applicant's sex, height, weight, and eye and hair color), 7852.27 (when engaging in licensed activity, licensee must also have in his or her possession a valid driver's license, identification card, or passport).

Proposed Section 14500 would revise existing Section 7850(c) to indicate that the term "person" as used in the section includes only natural persons.

The Commission invites comment on the appropriateness of that revision.

§ 14505. Possession and display of identification

14505. (a) At all times when engaged in any activity for which a commercial fishing license is required, the licensee shall have in his or her possession, or immediately available to the licensee, a valid driver's license or identification card issued to him or her by the Department of Motor Vehicles, or by the entity issuing driver's licenses from the licensee's state of domicile.

(b) A current passport may be used in lieu of a valid driver's license or identification card by a holder of a valid nonresident commercial fishing license issued pursuant to this chapter.

(c) The licensee's driver's license, identification card or, if applicable, passport shall be exhibited upon demand to any person authorized by the department to enforce this code, or regulations adopted pursuant to this code.

Comment. Section 14505 continues the part of former Fish and Game Code Section 7852.27 applicable to commercial fishing licenses without substantive change.

Article 2. Issuance

§ 14550. Additional application requirements for license

14550. (a) An applicant for a commercial fishing license must be at least 16 years of age on the date the license is issued.

(b) An application for a commercial fishing license shall state the applicant's sex, age, height, weight, the color of eyes and hair, and whether or not the applicant is a citizen of the United States.

(c) Nothing in this section affects any other provision of law relating to the employment of minors.

Comment. Subdivision (a) of Section 14550 continues a part of former Fish and Game Code Section 7852(a) and (b) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7851 without substantive change.

Subdivision (c) continues former Fish and Game Code Section 7852(e) without substantive change.

§ 14555. Denial of application based on prior dishonored check

14555. Notwithstanding any other provision of law, the department may deny the issuance or renewal of any license, permit, or other authorization to take or possess fish for commercial purposes, that are issued pursuant to this part, or the

1 renewal thereof, if the applicant for that authorization or renewal has, within the
2 preceding year, issued to the department a check that was dishonored by the bank
3 upon which the check was drawn and the person has failed to reimburse the
4 department for the amount due plus a fee of thirty dollars (\$30) and any
5 dishonored check charges incurred by the department.

6 **Comment.** Section 14555 continues the part of former Fish and Game Code Section 7852.25
7 applicable to licenses and other entitlements related to commercial fishing without substantive
8 change.

9 **§ 14560. Conditions of license or other entitlement**

10 14560. Unless otherwise specified, the following conditions apply to each
11 commercial fishing license, permit, or other entitlement issued to take, possess
12 aboard a boat, or land fish for commercial purposes issued by the department,
13 except licenses issued pursuant to Title 9 (commencing with Section 20150):

14 (a) The person to whom a commercial fishing permit or other entitlement is
15 issued shall have a valid commercial fishing license issued pursuant to this chapter
16 that is not revoked or suspended.

17 (b) The person to whom the commercial fishing license, permit, or other
18 entitlement is issued shall be present when fish are being taken, possessed aboard
19 a boat, or landed for commercial purposes. This subdivision does not apply to
20 commercial fishing vessel permits or licenses.

21 (c) The commercial fishing license, permit, or other entitlement shall be in the
22 licensee's, permittee's, or entitled person's possession, or immediately available to
23 the licensee, permittee, or entitled person at all times when engaged in any activity
24 for which the commercial fishing license, permit, or entitlement is required.

25 (d) Not more than one individual commercial fishing license, permit, or other
26 entitlement of a single type shall be issued to an individual person.

27 (e) Any landing of fish used to qualify for, or renew, a commercial fishing
28 license, permit, or other entitlement shall be reported on landing receipts delivered
29 to the department pursuant to Section 21150.

30 (f) In addition to any other requirements in Title 10 (commencing with Section
31 20900), the name of the person issued the commercial fishing license, permit, or
32 other entitlement authorizing the taking of the fish shall be included on the landing
33 receipt for that landing.

34 (g) An application for a commercial fishing license, permit, or other entitlement
35 shall be made on a form containing the information the department may require.
36 The commercial fishing license, permit, or other entitlement shall be signed by the
37 holder prior to use.

38 (h) Any person who has had a commercial fishing license, permit, or other
39 entitlement suspended or revoked shall not engage in that fishery, and shall not
40 obtain any other commercial fishing license, permit, or other entitlement that
41 authorizes engaging in that fishery, while the suspension or revocation is in effect.

1 (i) A commercial fishing license, permit, or other entitlement is not transferable
2 unless otherwise expressly specified in this code.

3 (j) Every commercial fishing license, permit, stamp, or other entitlement issued
4 pursuant to this part, except commercial fish business licenses issued pursuant to
5 Title 9 (commencing with Section 20150), is valid from April 1 to March 31 of the
6 next following calendar year or, if issued after the beginning of that term, for the
7 remainder thereof.

8 (k) A person who holds a commercial fishing license, permit, registration, or
9 other entitlement, who moves or acquires a new address shall notify the
10 department of the old and new addresses within three months of acquiring the new
11 address.

12 **Comment.** Section 14560 continues the part of former Fish and Game Code Section 7857(a),
13 (c)-(k), and (m) applicable to commercial fishing without substantive change.

14 **§ 14565. Additional conditions for limited entry fishery permit**

15 14565. In addition to the conditions specified in Sections 14560, 4870, 14760,
16 14850, 14855, and 14865, the following conditions apply to a permit, other than a
17 permit issued pursuant to Section 40350, to take, possess aboard a boat, or land
18 fish for commercial purposes in a limited entry fishery, as defined in Section 395:

19 (a) The permit shall be renewed annually.

20 (b) Except as otherwise provided by law, an appeal of a denial of renewal
21 application, or for a waiver of a landing requirement, shall be reviewed and
22 decided by the department.

23 (c) The appeal shall be received by the department or, if mailed, postmarked, on
24 or before March 31 following the permit year in which the appellant last held a
25 valid permit for that fishery.

26 (d) The decision of the department may be appealed to the commission.

27 **Comment.** Section 14565 continues former Fish and Game Code Section 7858 without
28 substantive change.

29 **Article 3. Fees**

30 **§ 14600. Fee**

31 14600. (a) The fee for a commercial fishing license is as follows:

32 (1) For a resident, a base fee of ninety-five dollars (\$95).

33 (2) For a nonresident, a base fee of two hundred eighty-five dollars (\$285).

34 (b) The base fees specified in this section are applicable to the 2004 license year,
35 and shall be adjusted annually thereafter pursuant to Section 3755.

36 (c) The commission shall adjust the amount of the fees specified in subdivision
37 (b), as necessary, to fully recover, but not exceed, all reasonable administrative
38 and implementation costs of the department and the commission relating to those
39 licenses.

1 **Comment.** Section 14600 continues former Fish and Game Code Section 7852(a)-(d) without
2 substantive change.

3 **Note.** Proposed Section 14600(a) is intended to restate existing Fish and Game Code Section
4 7852(a)-(b) to clarify the meaning of those provisions, without changing their substantive effect.
5 The existing provisions read as follows:

6 7852. (a) The department shall issue a commercial fishing license to any resident who is 16
7 years of age or older, upon payment of a base fee of ninety-five dollars (\$95) for each resident
8 vessel crewmember or resident vessel operator.

9 (b) The department shall issue a commercial fishing license to any nonresident who is 16 years
10 of age or older, upon payment of a base fee of two hundred eighty-five dollars (\$285) for a
11 nonresident vessel crewmember or nonresident vessel operator.

12 **The Commission invites comment on whether the restatement of existing Section 7852(a)-**
13 **(b) in proposed Section 14600(a) would substantively change the intended meaning of the**
14 **existing provisions.**

15 **§ 14605. Late fee for renewal after deadline**

16 14605. Notwithstanding any other provision of law, a commercial fishing
17 license, stamp, permit, or other entitlement for which there is a renewal deadline
18 shall not be renewed after that deadline, except as follows:

19 (a) In addition to the base fee for the entitlement, the department shall assess a
20 late fee for any renewal application that is received after the deadline, according to
21 the following schedule:

22 (1) One to 30 days after the deadline, a fee of one hundred twenty-five dollars
23 (\$125).

24 (2) Thirty-one to 60 days after the deadline, a fee of two hundred fifty dollars
25 (\$250).

26 (3) Sixty-one days or more after the deadline, a fee of five hundred dollars
27 (\$500).

28 (b) The department shall not waive the applicable late fee. The late fees
29 specified in subdivision (a) are applicable to the 2008 license year, and shall be
30 adjusted annually thereafter pursuant to Section 3755.

31 (c) The department shall deny any application for renewal received after March
32 31 of the permit year following the year in which the applicant last held a valid
33 permit for that fishery.

34 (d) An applicant who is denied renewal of a late application by the department
35 may submit a written appeal of the denial to the commission, within 60 days of the
36 date of the department's denial. The commission, upon consideration of the
37 appeal, may grant the renewal. If the commission grants the renewal, it shall assess
38 the applicable late fee pursuant to subdivision (a).

39 **Comment.** Section 14605 continues former Fish and Game Code Section 7852.2 without
40 substantive change.

1 **§ 14610. Refund of fee based on death**

2 14610. (a) The department may refund the fee paid for a commercial fishing
3 license or stamp, or a commercial fishing permit to the estate of the deceased
4 holder of the license, stamp, or permit, if proof is provided by the estate that the
5 death of the holder occurred prior to the opening of the season for which the
6 license, stamp, or permit, was valid.

7 (b) The department may deduct from the refund an amount equal to the cost of
8 issuing the refund, not to exceed twenty-five dollars (\$25).

9 **Comment.** Section 14610 continues the part of former Fish and Game Code Section 7852.1
10 applicable to commercial fishing licenses and other entitlements without substantive change.

11 **§ 14615. Payment of fee by another**

12 14615. Any person, partnership, corporation, limited liability company, or
13 association may pay the fee for a commercial fishing entitlement issued to any
14 person.

15 **Comment.** Section 14615 generalizes the second sentence of former Fish and Game Code
16 Section 7850(c).

17 **Note.** Existing Fish and Game Section 7850(c) provides that business entities can pay for a
18 commercial fishing license for any person. This makes sense, as it allows businesses to pay for
19 licenses for their employees. The Commission sees no policy reason why this provision should
20 not be extended to other commercial fishing entitlements, as employees might also be required to
21 obtain those entitlements. Proposed Section 14615 has therefore been generalized to apply to all
22 commercial fishing entitlements.

23 **The Commission invites comment on this minor substantive change.**

24 **§ 14620. Commercial fishing ocean enhancement validation**

25 14620. (a) The base fee for a commercial fishing ocean enhancement validation
26 is thirty-five dollars (\$35). That base fee is applicable to the 2004 license year, and
27 shall be adjusted annually thereafter pursuant to Section 3755.

28 (b) The commission shall adjust the amount of the fee specified in subdivision
29 (a), as necessary, to fully recover, but not exceed, all reasonable administrative
30 and implementation costs of the department and the commission relating to the
31 validation.

32 **Comment.** Subdivision (a) of Section 14620 continues former Fish and Game Code Section
33 6596.1(d) and (f) (as applied to commercial fishing ocean enhancement validation) without
34 substantive change.

35 Subdivision (b) continues former Fish and Game Code Section 6596.1(g) (as applied to
36 commercial fishing ocean enhancement validation) without substantive change.

37 **Note.** Under existing law, the provisions of Section 6596.1 are governed by existing Section
38 6403, which makes the provisions of Section 6596.1 inapplicable to aquaculture business
39 activities. The continuation of Section 6596.1(d), (f), and (g) in this location would make Section
40 6403 (proposed Section 25400) inapplicable to those provisions. Technically, this would make
41 those provisions applicable to aquaculture business activities. However, the provisions appear to
42 have no application to such activities. For that reason, the change described in this Note would
43 seem to have no practical effect.

44 **The Commission invites comment on whether this change would be a problem.**

Article 4. Transfer

§ 14650. Deferral while enforcement pending

14650. An application to transfer any permit or other entitlement to take fish for commercial purposes shall be deferred if the current holder of the permit or other entitlement is awaiting final resolution of any pending criminal, civil, or administrative action that could affect the status of the permit or other entitlement.

Comment. Section 14650 continues former Fish and Game Code Section 7857(n) without substantive change.

Note. Proposed Section 14650 would continue Section 7857(n), which was added by 2018 Cal. Stat. ch. 189. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

CHAPTER 2. COMMERCIAL FISHING VESSELS

Article 1. Boat Registrations and Other Vessel Permits

§ 14750. Application of article

14750. This article does not apply to a person required to be licensed as a guide pursuant to Section 8805.

Comment. Section 14750 continues former Fish and Game Code Section 7881(e) without substantive change.

§ 14755. Activity requiring registration

14755. Every person who owns or operates a vessel in public waters in connection with fishing operations for profit in this state, or to bring fish into this state, or who, for profit, permits persons to fish from the vessel, shall submit an application for commercial boat registration on forms provided by the department, and shall be issued a registration number.

Comment. Section 14755 continues former Fish and Game Code Section 7881(a) without substantive change.

§ 14760. Term

14760. A commercial boat registration or other entitlement issued pursuant to this part authorizing the use of a vessel, is valid from April 1 to March 31 of the next following calendar year or, if issued after the beginning of that term, for the remainder of that term.

Comment. Section 14760 continues the part of former Fish and Game Code Section 7857(k) applicable to commercial boat registrations and related entitlements without substantive change.

§ 14765. Fee for registration

14765. (a) The fee for a commercial boat registration is as follows:

1 (1) For a resident owner or operator of a vessel, a base fee of two hundred fifty
2 dollars (\$250).

3 (2) For a nonresident owner or operator of a vessel, a base fee of seven hundred
4 fifty dollars (\$750).

5 (b) The base fees specified in subdivision (a) are applicable to the 2004 license
6 year, and shall be adjusted annually thereafter pursuant to Section 3755.

7 (c) The commission shall adjust the amount of the fees specified in subdivision
8 (b), as necessary, to fully recover, but not exceed, all reasonable administrative
9 and implementation costs of the department and the commission relating to those
10 licenses.

11 **Comment.** Subdivision (a) of Section 14765 continues the first sentences of former Fish and
12 Game Code Section 7881(b) and (c) without substantive change.

13 Subdivision (b) continues former Fish and Game Code Section 7881(f) without substantive
14 change.

15 Subdivision (c) continues former Fish and Game Code Section 7881(g) without substantive
16 change.

17 **§ 14770. Refund of fee based on death**

18 14770. (a) The department may refund the fee paid for a commercial boat
19 registration to the estate of the deceased holder of the registration, if proof is
20 provided by the estate that the death of the holder occurred prior to the opening of
21 the season for which the registration was valid.

22 (b) The department may deduct from the refund an amount equal to the cost of
23 issuing the refund, not to exceed twenty-five dollars (\$25).

24 **Comment.** Section 14770 continues the part of former Fish and Game Code Section 7852.1
25 applicable to commercial boat registrations without substantive change.

26 **§ 14775. Posting of registration on vessel**

27 14775. A commercial boat registration shall be carried aboard the vessel at all
28 times, and shall be posted in a conspicuous place.

29 **Comment.** Section 14775 continues the second sentences of former Fish and Game Code
30 Section 7881(b) and (c) without substantive change.

31 **§ 14780. Issuance of registration number**

32 14780. A person issued a commercial boat registration shall also be issued a
33 registration number.

34 **Comment.** Section 14780 continues a part of former Fish and Game Code Section 7881(a)
35 without substantive change.

36 **§ 14785. Display of registration number**

37 14785. (a) A person who owns or operates a vessel used in connection with
38 fishing operations for profit who has been issued a commercial boat registration
39 pursuant to this article shall display, for the purpose of identification, registration
40 number on the vessel in a manner designated by the department shall display on

1 the vessel, for the purpose of identification, the vessel's registration number, in a
2 manner specified by the department.

3 (b) The method of displaying the registration number on the vessel shall be
4 determined by the department after consultation with the Department of Boating
5 and Waterways, taking into consideration the responsibilities and duties of the
6 Department of Boating and Waterways as prescribed in the Harbors and
7 Navigation Code.

8 (c) The registration number is not transferable, and shall be a permanent fixture
9 on the vessel for which it is issued.

10 **Comment.** Section 14785 continues former Fish and Game Code Section 7880 without
11 substantive change.

12 **§ 14790. Report of lost, destroyed, or sold vessel**

13 14790. If a registered vessel is lost, destroyed, or sold, the owner of the vessel
14 shall immediately report the loss, destruction, or sale to the department.

15 **Comment.** Section 14790 continues former Fish and Game Code Section 7881(d) without
16 substantive change.

17 **Article 2. Obligations and Prohibitions**

18 **§ 14850. Change of address**

19 14850. A person who moves or acquires a new address after being issued a
20 commercial boat registration or other entitlement authorizing the use of a vessel
21 shall notify the department of the old and new addresses within three months of
22 moving or acquiring the new address.

23 **Comment.** Section 14850 continues the part of former Fish and Game Code Section 7857(m)
24 applicable to commercial boat registrations and related entitlements without substantive change.

25 **§ 14855. Additional application requirement for permit or other entitlement**

26 14855. A person who applies for a commercial fishing vessel permit or other
27 entitlement authorizing the use of a vessel for commercial fishing other than a
28 commercial boat registration shall also hold a valid commercial boat registration
29 for that vessel issued pursuant to Section 14755 that has not been suspended or
30 revoked.

31 **Comment.** Section 14855 continues former Fish and Game Code Section 7857(l) without
32 substantive change.

33 **§ 14860. Required insurance**

34 14860. An owner of a vessel on which a person who is at least 16 but less than
35 18 years of age, and required to be licensed under Section 14550, is working, shall
36 obtain, and maintain in full force and effect at all times that a person is working on
37 or about the vessel, a policy of insurance that provides indemnification for
38 accident or injury to that person.

1 **Comment.** Section 14860 restates former Fish and Game Code Section 7852.4 without
2 substantive change.

3 **Note.** Proposed Section 14860 is intended to restate existing Fish and Game Code Section
4 7852.4 to clarify the meaning of that provision, without changing its substantive effect. The
5 existing provision reads as follows:

6 7852.4. The owner of a vessel upon which a person who is at least 16, but less than 18, years of
7 age, and who is licensed under Section 7852 is working shall obtain, and maintain in full force
8 and effect at all times that a person is working on or about the vessel, a policy of insurance that
9 provides indemnification to the person licensed under Section 7852 in case of accident or injury
10 while working on or about the vessel.

11 **The Commission invites comment on whether this restatement of existing Fish and Game**
12 **Code Section 7852.4 would substantively change the intended meaning of the existing**
13 **provision.**

14 **§ 14865. Prohibition against multiple entitlements of same type**

15 14865. Not more than one commercial vessel fishing license, permit, or other
16 entitlement of a single type shall be issued for a single vessel.

17 **Comment.** Section 14865 continues the part of former Fish and Game Code Section 7857(e)
18 applicable to commercial fishing vessels without substantive change.

19 **§ 14870. Preparation of fish on commercial fishing vessel for human consumption**

20 14870. Notwithstanding any other provision of this code governing commercial
21 fishing, except as provided in Section 14875, Section 14880, or when prohibited
22 by federal law, fish may be prepared for human consumption aboard a commercial
23 fishing vessel only under the following conditions:

24 (a) The fish was taken in compliance with all existing commercial fishing laws
25 and regulations and is of a species and size that can be lawfully taken under
26 sportfishing regulations in the area where taken.

27 (b) The fish was taken incidental to normal commercial fishing operations.

28 (c) The fish is kept separated from other fish, and stored with other foodstuff for
29 consumption by the crew and passengers aboard the vessel.

30 (d) The fish is not bought, sold, offered for sale, transferred to another person,
31 landed, brought ashore, or used for a purpose other than consumption by the crew
32 and passengers.

33 (e) The fish is maintained in a condition that its species can be determined, and
34 if a size or weight limitation applies, its size or weight can be determined, until the
35 fish is prepared for immediate consumption.

36 (f) If the fish is filleted, a patch of skin is retained on each fillet as prescribed by
37 the commission in its sportfishing regulations, until the fish is prepared for
38 immediate consumption.

39 (g) Fillets from fish possessed under sportfishing regulations shall be of the
40 minimum length prescribed by commission sportfishing regulations.

(h) The quantity of fish prepared shall not exceed the aggregate sportfishing bag limit for that fish applicable to the total number of crew members and passengers on board the vessel.

Comment. Subdivisions (a) through (g) of Section 14870 continue former Fish and Game Code Section 7856(a)-(d) without substantive change.

Subdivision (h) restates former Fish and Game Code Section 7856(e) without substantive change.

Note. Proposed Section 14870(h) is intended to restate existing Fish and Game Code Section 7856(e) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

A fish that may be possessed under sportfishing regulations shall not be possessed in excess of the sport bag limit for each crew member and passenger on board the vessel.

The Commission invites comment on whether this restatement of existing Fish and Game Code Section 7856(e) would substantively change the intended meaning of the existing provision.

§ 14875. Possession of specified fish on board commercial fishing vessel

14875. (a) Notwithstanding Section 14870, kelp bass, sand bass, spotted bass, yellowfin croaker, spotfin croaker, California corbina, and marlin, shall not be possessed aboard a commercial fishing vessel while that vessel is on a commercial fishing trip.

(b) Lobster, salmon, or abalone shall not be possessed aboard a commercial fishing vessel while that vessel is on a commercial fishing trip for preparation for human consumption pursuant to this section unless that lobster, salmon, or abalone is taken and possessed in compliance with all applicable laws pertaining to commercial fishing methods of take, licenses, permits, and size limits.

(c) Sturgeon or striped bass shall not be possessed aboard a commercial fishing vessel.

Comment. Section 14875 continues the first three sentences of former Fish and Game Code Section 7856(f) without substantive change.

§ 14880. Take or possession pursuant to sportfishing license

14880. No person shall take or possess any fish pursuant to a sportfishing license while on a commercial fishing vessel engaged in a commercial fishing activity, including going to or from an area where fish are taken for a commercial purpose.

Comment. Section 14880 continues the fourth sentence of former Fish and Game Code Section 7856(f) without substantive change.

Article 3. Fuel Conservation Assistance Program

§ 15000. Purpose of program

15000. The California Energy Extension Service of the Office of Planning and Research shall implement a revolving loan fund program to assist low-income

1 fishing fleet operators reduce their energy costs and conserve fuel by providing
2 low-interest loans to those operators.

3 **Comment.** Section 15000 continues former Fish and Game Code Section 9100 without
4 substantive change.

5 **§ 15005. Report to Legislature**

6 15005. Commencing January 1, 1994, and thereafter biennially, the California
7 Energy Extension Service of the Office of Planning and Research shall report to
8 the Legislature on the status of the loan program, including the number and the
9 amounts of loans made, the amount of loans repaid, and a comparison of the ethnic
10 background of the loan recipients with the ethnic background of the low-income
11 fishing fleet operators.

12 **Comment.** Section 15005 continues former Fish and Game Code Section 9101 without
13 substantive change.

14 **CHAPTER 3. AIRCRAFT**

15 **§ 15050. Required registration**

16 15050. A person who owns or operates an aircraft used in connection with
17 commercial fishing operations in this state shall obtain a commercial aircraft
18 registration for that aircraft from the department.

19 **Comment.** Section 15050 continues the first sentence of former Fish and Game Code Section
20 7892 without substantive change.

21 **§ 15055. Requirement that registration be carried onboard**

22 15055. A commercial aircraft registration issued pursuant to Section 15050 shall
23 be carried aboard the aircraft at all times when the aircraft is used in connection
24 with commercial fishing operations.

25 **Comment.** Section 15055 continues the second sentence of former Fish and Game Code
26 Section 7892 without substantive change.

27 **§ 15060. Fee for registration**

28 15060. The fee for a commercial aircraft registration shall be two hundred
29 dollars (\$200).

30 **Comment.** Section 15060 continues the third sentence of former Fish and Game Code Section
31 7892 without substantive change.

32  **Note.** Unlike many license fee provisions in the existing Fish and Game Code, the fee
33 provision in existing Section 7892 does not expressly provide for annual adjustment pursuant to
34 existing Section 713.

35 **Is this adjustment nevertheless understood to be applicable to this fee?**

CHAPTER 4. GEOGRAPHIC RESTRICTIONS

Article 1. Take

§ 15100. Take in Tomales Bay

15100. (a) It is unlawful to take fish for a commercial purpose in that portion of Tomales Bay in District 2590 between a line drawn from the most northern tip of Tomales Point northeast, 47° magnetic, to the opposite shore in the vicinity of Dillon Beach, and a line drawn west from the western tip of Tom's Point, 252° magnetic, to the opposite eastern shore of Tomales Point.

(b) This section does not apply to the taking of oysters by persons licensed under Article 4 (commencing with Section 6480), Chapter 5, Part 1, Division 6, from their allotted areas.

Comment. Section 15100 restates former Fish and Game Code Section 8398 without substantive change.

Note. The statutory article referenced in the second paragraph of existing Fish and Game Code Section 8398 (which would be continued by proposed Section 15100(b)) was repealed in 1971, and was not clearly continued elsewhere in the code. See 1971 Cal. Stat. ch. 347. The cultivation of oysters is now more generally regulated under the aquaculture provisions of the existing code, and pursuant to oyster leases. See existing Fish and Game Code Sections 15406.5, 15406.7.

The Commission invites comment on how to properly continue this aspect of existing Section 8398.

§ 15105. Take only in baitfish traps

15105. (a) California killifish (*Fundulus parvipinnis*), mudsuckers (*Gillichthys mirabilis*), and yellowfin gobies (*Acanthogobius flavimanus*) may only be taken for a commercial purpose with baitfish traps in the tidewaters of Districts 2545, 2550, 2555, 2565, 2610, 2615, and 2650, in the tidewaters of District 2590 south of the City and County of San Francisco, in the Salton Sea, and in Imperial and Riverside Counties.

(b) Shiner perch (*Cymatogaster aggregata*), staghorn sculpin (*Leptocottus armatus*), mudsuckers (*Gillichthys mirabilis*), and yellowfin gobies (*Acanthogobius flavimanus*) may only be taken for a commercial purpose with baitfish traps in Districts 2595, 2600, and 2605, and in the tidewaters of Districts 2525 and 2535.

(c) Any unauthorized species taken incidentally in a baitfish trap in a district listed in subdivision (a) or (b) shall be immediately released.

(d) Baitfish traps, as described in Section 19610, may be used subject to Title 6 (commencing with Section 19150) of Part 6 of Division 6.

Comment. Section 15105 continues former Fish and Game Code Section 8400 without substantive change.

Note. Proposed Section 15100(d) is intended to restate existing Fish and Game Code Section 8400(d) without changing its substantive effect. Section 8400(d) reads as follows:

Baitfish traps, as described in Section 9020, may be used subject to Article 1 (commencing with Section 9000) of Chapter 4.

The Commission invites comment on whether restatement of Section 8400(d) would substantively change its intended meaning.

Article 2. Sale or Purchase

§ 15150. Sale or purchase of fish in District 2670 or Smith River

15150. (a) It is unlawful to sell or purchase any fresh, canned, or cured fish taken in District 2670, or in the waters of the Smith River.

(b) Nothing in this article applies to trout grown pursuant to Part 1 (commencing with Section 23300) of Division 7.

Comment. Subdivision (a) of Section 15150 continues former Fish and Game Code Section 8434 without substantive change.

Subdivision (b) continues the part of former Fish and Game Code Section 8433 applicable to former Fish and Game Code Section 8434 without substantive change.

Article 3. Out-of-State Delivery of Fish

§ 15200. Permit to deliver fish out of state

15200. (a) Section 1110 as added to the former Fish and Game code by the initiative measure adopted at the General Election of November 8, 1938, is set forth in subdivision (b).

(b) The law relating to the subject of control of fishing in state waters when delivery is to points beyond state waters was adopted as an initiative measure at the General Election of November 8, 1938. The reference to Section 845 in the last sentence is to Sections 4975, 4980, 4986, and subdivision (a) of Section 15400. The initiative measure reads as follows:

1110—No person shall use or operate or assist in using or operating in this State or the waters thereof, any boat or vessel used in connection with fishing operations, irrespective of its home port or port of registration, which delivers or by which there is delivered to any place other than within this State any fish, mollusks or crustaceans which are caught in, or taken aboard said boat or vessel from, the waters of the Pacific Ocean within this State, or on the high seas, or elsewhere, unless a permit authorizing the same shall have been issued by the Fish and Game Commission.

Where it appears to the commission that such permit will not tend to prevent, impede or obstruct the operation, enforcement, or administration of this code or any provision thereof, and will not tend to result in fish, mollusks or crustaceans in the waters of this State being taken or used otherwise than is authorized by this code, the commission may issue revocable permits under such rules and regulations and upon such terms and conditions as it may prescribe to deliver fish, mollusks or crustaceans by the use of such boat or vessel outside of this State,

provided that nothing herein shall authorize the transportation or carrying out of this State or any district thereof, of any fish, mollusks or crustaceans where the same is prohibited by law, and no permit shall be issued which may tend to deplete any species of fish, mollusk or crustacean, or result in waste thereof. Any person who uses or operates or assists in using or operating any boat or vessel in violation of the provisions of this section is guilty of a misdemeanor and such boat or vessel and the net, gear or other equipment of said boat or vessel is a public nuisance and shall be forfeited. It is the duty of every person authorized to make an arrest for the violation of any of the provisions of this code, to seize and keep such boat, vessel, net, gear or other equipment and to report such seizure to the commission. The commission shall thereupon commence, in the superior court of the county or city and county in which or nearest to which the seizure is made, proceedings for forfeiture of the seized property for its use in violation of this section, and such proceeding shall be had in the manner and according to the procedure provided by Section 845 of this code for the forfeiture of nets.

Comment. Subdivision (a) of Section 15200 continues former Fish and Game Code Sections 1110 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7891 without substantive change.

Note. Former Fish and Game Code Section 1110 was added in 1938 by an initiative statute, Proposition 5. That provision was continued as Fish and Game Code Section 7891 when the code was recodified in 1957. See 1957 Cal. Stat. ch. 456. In that legislation, Section 1110 was amended to serve as a cross-reference to Section 7891. The Commission believes that the nonsubstantive continuation of those provisions in proposed Section 15200 would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

TITLE 3. NETS GENERALLY

CHAPTER 1. GENERAL PROVISIONS

§ 15300. Length of meshes

15300. The length of the meshes of a net shall be determined by taking at least four meshes and measuring them inside the knots or, in the case of knotless nets, inside the points at which the meshes are joined while they are simultaneously drawn closely together.

Comment. Section 15300 continues former Fish and Game Code Section 8602 without substantive change.

§ 15305. Use near pier, wharf, jetty, breakwater, or dock

15305. Notwithstanding Sections 15500, 15510, 15915, and 18210, the commission may, after a public hearing, when it determines that it is in the best interests of the state's marine resources and fisheries, adopt regulations, authorizing the use of nets not less than 75 feet from any private pier, wharf, jetty,

breakwater, or dock, and restricting the use of the nets within 750 feet of any public pier. However, nothing in this section authorizes the commission to adopt regulations which would extend beyond the maximum of 750 feet the area in which the use of nets is prohibited, as specified in Sections 15500, 15510, 15915, and 18210, or which would prohibit the use of any nets within 75 feet of any private pier, wharf, jetty, breakwater, or dock if that use of the net is permitted by law.

Comment. Section 15305 continues former Fish and Game Code Section 8608 without substantive change.

§ 15310. Recovery of isolated fish

15310. The department or any person authorized by it may use any net or other appliance in any district for the purpose of recovering fish from overflowed areas or landlocked sloughs or ponds where they have been left isolated by receding streams or floodwaters.

Comment. Section 15310 continues former Fish and Game Code Section 8605 without substantive change.

CHAPTER 2. PUBLIC NUISANCE

§ 15400. Seizure

15400. Any net or trap used for taking fish in violation of the provisions of this code is a public nuisance. It is the duty of every person authorized to make an arrest for such a violation to seize and keep the net and report the seizure to the department.

Comment. Section 15400 continues the first paragraph of former Fish and Game Code Section 8630 without substantive change.

See also Sections 4975-4988 (seizure).

Note. Existing Section 8630 initially refers to a “net or trap,” but then only refers to a trap. The rules for when a trap must be seized as a nuisance are provided in existing Sections 9007 and 9008. The reference to a trap in Section 8630 may have been erroneous. **The Commission invites comment on whether the reference to a trap should be deleted from proposed Section 15400(a).**

CHAPTER 3. SPECIAL RULES FOR IDENTIFIED WATERS

Comment. The provisions appearing in this chapter and in Chapter 3 (commencing with Section 17000) of Title 4 together continue the provisions of former Article 4 (commencing with Section 8660) of Chapter 3 of Part 3 of Division 6 of the Fish and Game Code, which are governed by Section 4(b) of Article X B of the California Constitution.

§ 15500. Districts 2625 and 2630

15500. Nothing in this chapter or in Chapter 3 (commencing with Section 17000) of Title 4 authorizing the use of nets in District 2625 or 2630 shall authorize the use of any net within 750 feet of any pier, wharf, jetty, or

1 breakwater, except that dip nets may be used subject to the provisions of Chapter 9
2 (commencing with Section 16400) of Title 4.

3 **Comment.** Section 15500 continues former Fish and Game Code Section 8660.

4 Section 15500 is governed by Section 16865, a section that codifies and implements Section 4
5 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible
6 impairment of constitutional requirements, former Section 8660 has been continued without
7 change, except to update cross-references to reflect renumbering required by the enactment of this
8 code.

9 When enacting the bill that added this section, the Legislature did not evaluate the relationship
10 of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

11 **§ 15505. Districts 2630 and 2640**

12 15505. Vessels may carry nets across Districts 2630 and 2640 to open water
13 outside those districts. Vessels carrying nets may enter harbors in Districts 2630
14 and 2640 only in cases of distress or emergency.

15 **Comment.** Section 15505 continues former Fish and Game Code Section 8661.

16 Section 15505 is governed by Section 16865, a section that codifies and implements Section 4
17 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible
18 impairment of constitutional requirements, former Section 8661 has been continued without
19 change, except to update cross-references to reflect renumbering required by the enactment of this
20 code.

21 When enacting the bill that added this section, the Legislature did not evaluate the relationship
22 of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

23 **§ 15510. District 2685**

24 15510. In District 2685, a net may not be used within 750 feet of any pier or
25 dock, except for bait nets described in Section 235 used to capture live bait and
26 lobster traps authorized for use pursuant to Sections 49700, 49705, and 49710.

27 **Comment.** Section 15510 continues former Fish and Game Code Section 8665.

28 Section 15510 is governed by Section 16865, a section that codifies and implements Section 4
29 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible
30 impairment of constitutional requirements, former Section 8665 has been continued without
31 change, except to update cross-references to reflect renumbering required by the enactment of this
32 code.

33 When enacting the bill that added this section, the Legislature did not evaluate the relationship
34 of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

35 **§ 15515. Area upstream from Antioch area**

36 15515. No gill net, trammel net, or fyke net may be possessed on a boat in the
37 waters of any district lying upstream from a line drawn between Antioch Point and
38 the westerly tip of Kimball Island and from a line drawn from Point Sacramento
39 across the stream and touching the most easterly point on Montezuma Island.

40 **Comment.** Section 15515 continues former Fish and Game Code Section 8663.

41 Section 15515 is governed by Section 16865, a section that codifies and implements Section 4
42 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible
43 impairment of constitutional requirements, former Section 8663 has been continued without
44 change.

When enacting the bill that added this section, the Legislature did not evaluate the relationship of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

§ 15520. Area in or near Klamath, Smith, Eel, Mad, Van Dusen, or Mattole Rivers

15520. Except in Districts 2570 and 2575, any net found in, or within 500 feet of the Klamath, Smith, Eel, Mad, Van Dusen, or Mattole Rivers, or their tributaries, is prima facie evidence that the owner or person in possession of the net is or has been using it unlawfully.

The provisions of this section do not apply to trawl or drag nets being transported.

Comment. Section 15520 continues former Fish and Game Code Section 8664.

Section 15520 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible impairment of constitutional requirements, former Section 8664 has been continued without change, except to update cross-references to reflect renumbering required by the enactment of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

§ 15525. Take of mullet or carp in Salton Sea and New and Alamo Rivers

15525. No fish other than mullet or carp, and no mullet less than 14 inches in length may be taken or possessed by a licensed commercial fisherman while fishing in the Salton Sea or the New and Alamo Rivers.

Comment. Section 15525 continues former Fish and Game Code Section 8667.

Section 15525 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible impairment of constitutional requirements, former Section 8667 has been continued without change.

When enacting the bill that added this section, the Legislature did not evaluate the relationship of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

Note. Existing Section 8667 (which would be continued by proposed Section 15525) appears in the existing code in an article entitled “Nets Generally in Particular Districts.” As a result, proposed Section 15525 has been located, along with the continuations of the other provisions in that existing article, in a Title entitled “Nets Generally.”

However, Section 8667 may apply to take by means other than the use of net, and the placement of proposed Section 15525 in a title referring only to nets could create confusion, or prevent some readers from being aware of the provision.

The Commission invites comment on whether the proposed location of proposed Section 15525 is problematic.

§ 15530. Salton Sea and New and Alamo Rivers

15530. No commercial fishing under Section 17025, 15525, or 15535, shall be carried on within the boundaries of any state or federal game refuge.

Comment. Section 15530 continues former Fish and Game Code Section 8668.

Section 15530 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible impairment of constitutional requirements, former Section 8668 has been continued without

change, except to update cross-references to reflect renumbering required by the enactment of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

Note. Existing Section 8668 (which would be continued by proposed Section 15530) appears in the existing code in an article entitled “Nets Generally in Particular Districts.” As a result, proposed Section 15530 has been located, along with the continuations of the other provisions in that existing article, in a Title entitled “Nets Generally.”

However, Section 8668 appears to have a significantly broader application than to the use of nets, and the placement of proposed Section 15530 in a title referring only to nets could create confusion, or prevent some readers from being aware of the provision.

The Commission invites comment on whether the proposed location of proposed Section 15530 is problematic.

§ 15535. Possession of certain gear near Salton Sea and New and Alamo Rivers

15535. It is unlawful to possess gill nets, seines, or other devices capable of being used to take mullet or carp for commercial purposes, within 500 yards of the Salton Sea and those portions of the New and Alamo Rivers designated as commercial fishing waters lying in District 2655, except during such open season as may be prescribed by the commission.

Comment. Section 15535 continues former Fish and Game Code Section 8669.

Section 15535 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible impairment of constitutional requirements, former Section 8669 has been continued without change, except to update cross-references to reflect renumbering required by the enactment of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship of this section to Section 16865 or Article X B of the California Constitution. See Section 16800.

Note. Existing Section 8669 (which would be continued by proposed Section 15535) appears in the existing code in an article entitled “Nets Generally in Particular Districts.” As a result, proposed Section 15535 has been located, along with the continuations of the other provisions in that existing article, in a Title entitled “Nets Generally.”

However, Section 8669 appears to have a broader application than to the use of nets, and the placement of proposed Section 15535 in a title referring only to nets could create confusion, or prevent some readers from being aware of the provision.

The Commission invites comment on whether the proposed location of proposed Section 15535 is problematic.

§ 15540. Waters upstream from Carquinez Bridge

15540. It is unlawful for any person to use, operate, or assist in using or operating any net to take salmon, steelhead, striped bass, sturgeon, or shad for commercial purposes in any of the tidal waters lying upstream from the Carquinez Bridge, or to possess on any boat in these waters any net the use of which is illegal in such waters.

Comment. Subdivision (a) of Section 15540 continues former Fish and Game Code Section 8670.

Subdivision (a) is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1. To avoid any possible

1 impairment of constitutional requirements, former Section 8670 has been continued in the
2 subdivision without change.

3 When enacting the bill that added this section, the Legislature did not evaluate the relationship
4 of any provision of this section to Section 16865, or to Article X B of the California Constitution.
5 See Section 16800.

6 See also Section 4950 (enforcement).

7 CHAPTER 4. SET NETS

8 Article 1. General Provisions

9 § 15600. “Set net”

10 15600. (a) “Set net” means either of the following:

11 (1) A net used to take fish that is anchored to the bottom on each end and is not
12 free to drift with the tide or current.

13 (2) A net placed so that it will catch or impound fish within a bight, bay, or
14 estuary, or against the shore upon the receding of the tide.

15 (b) Notwithstanding subdivision (a), the following nets are not set nets:

16 (1) A fyke net.

17 (2) A shrimp net.

18 (3) A crab net.

19 **Comment.** Section 15600 generalizes the part of former Fish and Game Code Section 8601
20 applicable to set nets.

21 See also Section 5000 (enforcement).

22 § 15605. Markings

23 15605. (a) A set net shall be marked at both ends with buoys displaying above
24 their waterlines, in numerals at least 2 inches high, the commercial fishing license
25 identification number of the owner of the net.

26 (b) Each piece or panel of a set net shall be marked along the corkline of the net,
27 in a manner determined by the department to adequately identify the net, with the
28 commercial fishing license identification number of the owner of the net. The
29 distance between the markings shall not exceed 45 fathoms.

30 **Comment.** Subdivision (a) of Section 15605 continues the part of former Fish and Game Code
31 Section 8601.5(a) applicable to set nets without substantive change.

32 Subdivision (b) continues the first two sentences of former Fish and Game Code Section
33 8601.5(b) without substantive change.

34 **Notes.** (1) Existing Fish and Game Code Sections 8601.5(a) (and (b) both reference “the
35 fisherman’s identification number.” Existing Fish and Game Code Section 9029(c) provides that,
36 for purposes of Section 8601.5, “fisherman’s identification number” means the number of the
37 person’s commercial fishing license issued pursuant to Section 7850.” Proposed Section 15605
38 would incorporate that clarification.

39 (2) Is the “fisherman” in the phrase “fisherman’s identification number” intended to be the
40 commercial fisherman who *owns* the net, or the commercial fisherman *fishing* with the net?
41 Because much of the remainder of Section 8601.5 appears to focus substantially on the
42 responsibility of the owner of the net, the Commission reads these provisions as intended to

1 identify the owner of the net, rather than the user, and proposed Section 15605(a) and (b) would
2 expressly reflect that interpretation.

3 **The Commission invites comment on the appropriateness of this revision.**

4 **§ 15610. Breaking strength of footrope**

5 15610. The footrope (leadline) of any set net shall have a breaking strength of at
6 least 50 pounds less than the combined breaking strength of the headrope and
7 corkline.

8 **Comment.** Section 15610 continues former Fish and Game Code Section 8601.6(a) without
9 substantive change.

10 **§ 15615. Lost net**

11 15615. (a) If a person is unable to recover a set net or portion of a set net, the
12 person shall contact one of the department offices located in the cities of Belmont,
13 Monterey, Los Alamitos, or San Diego, not later than 72 hours after returning to
14 port following the loss, and shall report all of the following information:

15 (1) The date and time when the net was lost.

16 (2) The location, including depth, where the net was lost.

17 (3) A description of the lost net, including the mesh size, length, height, and
18 target species, and whether anchors remain attached to the net.

19 (4) The name and commercial fishing license identification number of the owner
20 of the net.

21 (5) The name and commercial fishing license identification number of the
22 person fishing with the net, if different from the owner of the net.

23 (6) The name and commercial boat registration number of the vessel from which
24 the lost net was being fished.

25 (b) If the lost or abandoned net is recovered by the department or persons
26 designated by the department, the commission may require the owner of the lost or
27 abandoned net to pay for all recovery costs.

28 **Comment.** Subdivision (a) of Section 15615 continues former Fish and Game Code Section
29 8601.5(c) without substantive change.

30 Subdivision (b) continues the third sentence of former Fish and Game Code Section 8601.5(b)
31 without substantive change.

32 See also Section 5000 (enforcement).

33  **Note.** Existing Fish and Game Code Section 8601.5(c)(4) and (5) both reference a
34 “fisherman’s identification number.” Based on a reference in Section 8601.5(c)(6) to what is
35 described as a “California Fish and Game number” of an identified *vessel*, the Commission reads
36 the reference to an identification number in Sections 8601.5(c)(4) and (5) as referring to a
37 commercial fishing license identification number.

38 **The Commission invites comment on whether that interpretation is correct.**

CHAPTER 5. ROUND HAUL NETS

Article 1. General Provisions

§ 15650. “Round haul net”

15650. As used in this chapter, “round haul net” means a circle seine, and includes a purse seine, ring net, half ring net, and lampara net.

Comment. Section 15650 generalizes former Fish and Game Code Section 8750.

Article 2. Special District Rules

§ 15700. District 2505

15700. In District 2505, a round haul net shall not be possessed on a boat.

Comment. Section 15700 continues the part of former Fish and Game Code Section 8751 applicable to former Fish and Game District 1 without substantive change.

§ 15705. District 2525

15705. In District 2525, a round haul net shall not be possessed on a boat, except in the part of the district lying within Marin County.

Comment. Section 15705 continues the part of former Fish and Game Code Section 8751 applicable to former Fish and Game District 2 without substantive change.

§ 15710. District 2540

15710. In District 2540, a round haul net shall not be possessed on a boat, except within the boundaries of Moss Landing Harbor District.

Comment. Section 15710 continues the part of former Fish and Game Code Section 8751 applicable to former Fish and Game District 3 without substantive change.

§ 15715. District 2570

15715. In District 2570, purse nets and round haul nets may be used.

Comment. Section 15715 continues the part of former Fish and Game Code Section 8752 applicable to former Fish and Game District 6 without substantive change.

Note. It is the Commission’s understanding that a purse net is one type of round haul net.

If this is correct, can the separate reference to purse nets in proposed Section 15715 and similarly worded provisions that follow be deleted as superfluous?

§ 15720. District 2575

15720. In District 2575, purse nets and round haul nets may be used.

Comment. Section 15720 continues the part of former Fish and Game Code Section 8752 applicable to former Fish and Game District 7 without substantive change.

§ 15725. District 2580

15725. In District 2580, purse nets and round haul nets may be used.

1 **Comment.** Section 15725 continues the part of former Fish and Game Code Section 8752
2 applicable to former Fish and Game District 8 without substantive change.

3 **§ 15730. District 2585**

4 15730. In District 2585, purse nets and round haul nets may be used.

5 **Comment.** Section 15730 continues the part of former Fish and Game Code Section 8752
6 applicable to former Fish and Game District 9 without substantive change.

7 **§ 15735. District 2590**

8 15735. In District 2590, purse nets and round haul nets may be used.

9 **Comment.** Section 15735 continues the part of former Fish and Game Code Section 8752
10 applicable to former Fish and Game District 10 without substantive change.

11 **§ 15740. District 2595**

12 15740. In District 2595, purse nets and round haul nets may be used.

13 **Comment.** Section 15740 continues the part of former Fish and Game Code Section 8752
14 applicable to former Fish and Game District 11 without substantive change.

15 **§ 15745. District 2610**

16 15745. In District 2610, purse nets and round haul nets may be used.

17 **Comment.** Section 15745 continues the part of former Fish and Game Code Section 8754
18 applicable to former Fish and Game District 16 without substantive change.

19 **§ 15750. District 2615**

20 15750. In District 2615, purse nets and round haul nets may be used.

21 **Comment.** Section 15750 continues the part of former Fish and Game Code Section 8754
22 applicable to former Fish and Game District 17 without substantive change.

23 **§ 15755. District 2620**

24 15755. In District 2620, purse nets and round haul nets may be used.

25 **Comment.** Section 15755 continues the part of former Fish and Game Code Sections 8754
26 applicable to former Fish and Game District 18 without substantive change.

27 **§ 15760. District 2625**

28 15760. (a) In District 2625, purse nets and round haul nets may be used, except
29 as otherwise provided in this section.

30 (b) Purse seines or ring nets may not be used in that portion of the district lying
31 within three miles offshore from the line of the high-water mark along the coast of
32 Orange County from sunrise Saturday to sunset Sunday from May 1 to September
33 10, inclusive.

34 (c) Purse seine or ring nets may not be used from May 1 to September 10,
35 inclusive, in the following portions of the district:

36 (1) Within a two-mile radius of Dana Point.

37 (2) Within a two-mile radius of San Mateo Point.

(3) Within two miles offshore from the line of the high-water mark along that portion of the coast of Orange County lying between the northernmost bank of the mouth of the Santa Ana River and a point on that coast six miles south therefrom.

(d) Subdivisions (b) and (c) do not apply to the use of a round haul net to take fish for use or sale as live bait. It is unlawful to buy, sell, or possess any dead fish taken under the authority of this subdivision, in any place of business where fish are bought, sold, or processed.

Comment. Section 15760(a)-(c) continues the part of former Fish and Game Code Section 8754 applicable to former Fish and Game District 19 without substantive change.

Subdivision (d) continues the part of former Fish and Game Code Section 8757 applicable to former Fish and Game District 19 without substantive change.

Note. Proposed Section 15760(a)-(d) is intended to combine and restate the parts of existing Fish and Game Code Sections 8754 and 8757 that apply to existing Fish and Game District 19, to clarify the meaning of those provisions without changing their substantive effect. The existing provisions read as follows:

8754. In Districts 16, 17, 18, and 19, purse and round haul nets may be used, except that purse seines or ring nets may not be used in that portion of District 19 lying within three miles offshore from the line of the high-water mark along the coast of Orange County from sunrise Saturday to sunset Sunday from May 1 to September 10, inclusive.

Purse seine or ring nets may not be used from May 1 to September 10, inclusive, in the following portions of District 19:

(a) Within a two-mile radius of Dana Point.

(b) Within a two-mile radius of San Mateo Point.

(c) Within two miles offshore from the line of the high-water mark along that portion of the coast of Orange County lying between the northernmost bank of the mouth of the Santa Ana River and a point on that coast six miles south therefrom.

8757. Notwithstanding Section 8661, and in addition to Sections 8754, 8755, and 8780, round haul nets may be used to take fish in those portions of Districts 19 and 20 that are closed to the use of round haul nets by Sections 8754 and 8755 and in Districts 19A and 19B, but only for use or sale of those fish for live bait and subject to the following restrictions:

(a) In Districts 19A and 19B, round haul nets may not be used within 750 feet of any public pier.

(b) It is unlawful to buy, sell, or possess in any place of business where fish are bought, sold, or processed, any dead fish taken under the authority of this section.

The Commission invites comment on whether the combination and restatement of the parts of existing Fish and Game Code Sections 8754 and 8757 applicable to existing Fish and Game District 19 in proposed Section 15760 would substantively change the intended meaning of the existing provisions.

§ 15765. District 2630

15765. In District 2630, notwithstanding Section 15505, a round haul net may be used to take fish for use or sale as live bait, subject to the following restrictions:

(a) The net shall not be used within 750 feet of any public pier.

(b) It is unlawful to buy, sell, or possess any dead fish taken under the authority of this section, in any place of business where fish are bought, sold, or processed.

Comment. Section 15765 continues the part of former Fish and Game Code Section 8757 applicable to former Fish and Game District 19A without substantive change.

§ 15770. District 2635

15770. In District 2635, a round haul net may be used to take fish for use or sale as live bait, subject to the following restrictions:

(a) The net shall not be used within 750 feet of any public pier.

(b) It is unlawful to buy, sell, or possess any dead fish taken under the authority of this section, in any place of business where fish are bought, sold, or processed.

Comment. Section 15770 continues the part of former Fish and Game Code Section 8757 applicable to former Fish and Game District 19B without substantive change.

§ 15775. District 2640

15775. (a) In District 2640, purse nets and round haul nets may be used, except at the following times in the following locations:

(1) From sunrise Saturday to sunset Sunday, in the area from a line extending three nautical miles east magnetically from the extreme easterly end of Santa Catalina Island southwesterly and northerly, to a line extending three nautical miles southwest magnetically from the most southerly promontory of China Point.

(2) At any time during the period from June 1 to September 10, in the area from a line extending three nautical miles east magnetically from the extreme easterly end of Santa Catalina Island southerly, to a line extending three nautical miles southeasterly magnetically from the United States government light on the southeasterly end of Santa Catalina Island.

(b) Subdivision (a) shall not be construed as restricting the right to use the waters described in that subdivision for anchorage of vessels at any time.

(c) In addition to subdivision (a), and notwithstanding Section 15505, a round haul net may be used to take fish in the district for use or sale as live bait. It is unlawful to buy, sell, or possess any dead fish taken under the authority of this section, in any place of business where fish are bought, sold, or processed.

Comment. Subdivisions (a) and (b) of Section 15775 continue the part of former Fish and Game Code Section 8755 applicable to former Fish and Game District 20 without substantive change.

Subdivision (c) continues the part of former Fish and Game Code Section 8757 applicable to former Fish and Game District 20 without substantive change.

Note. There appears to be some text missing from existing Fish and Game Code Section 8755. The existing section reads as follows:

In Districts 20A and 21, purse and round haul nets may be used.

(a) Purse and round haul nets may be used, except: (1) from sunrise Saturday to sunset Sunday, in that portion of District 20 from a line extending three nautical miles east magnetically from the extreme easterly end of Santa Catalina Island southwesterly and northerly to a line extending three nautical miles southwest magnetically from the most southerly promontory of China Point and (2) at any time during the period commencing on June 1st and ending on September 10 in each year, in that portion of District 20 from a line extending three nautical miles east magnetically from the extreme easterly end of Santa Catalina Island southerly to a line extending

three nautical miles southeasterly magnetically from the United States government light on the southeasterly end of Santa Catalina Island.

(b) Subdivision (a) shall not be construed as restricting the right to use the waters therein specified for anchorage of vessels at any time.

Based on the construction of the section, the Commission surmises that the beginning of subdivision (a) of this section was meant to read “(a) Purse and round haul nets may be used *in District 20*, except:...” Proposed Section 15775 is based on this understanding.

The Commission invites comment on whether proposed Section 15775 properly states the intended application of existing Section 8755 to existing Fish and Game District 20.

§ 15780. District 2645

15780. In District 2645, purse nets and round haul nets may be used.

Comment. Section 15780 continues the part of former Fish and Game Code Sections 8755 applicable to former Fish and Game District 20A without substantive change.

§ 15785. District 2650

15785. In District 2650, purse nets and round haul nets may be used.

Comment. Section 15785 continues the part of former Fish and Game Code Sections 8755 applicable to former Fish and Game District 21 without substantive change.

CHAPTER 6. BAIT NETS

§ 15900. “Bait net”

15900. As used in this chapter, “bait net” means a lampara net or round haul type net, the mesh of which is constructed of twine not exceeding Standard No. 9 medium cotton seine twine, or synthetic twine of equivalent size or strength. Notwithstanding Sections 15760 through 15775, inclusive, except for drum seines and other round haul nets authorized under a permit issued by the department pursuant to this chapter, the nets may not have rings along the lead line or any method of pursing the bottom of the net.

Comment. Section 15900 continues the first sentence of former Fish and Game Code Section 8780(a) without substantive change.

§ 15902. Authority of commission

15902. The commission may, upon the recommendation of the department, adopt regulations governing the use of bait nets.

Comment. Section 15902 continues former Fish and Game Code Section 8780.1 without substantive change.

§ 15910. Districts allowing use of bait nets

15910. (a) A bait net may be used to take fish for bait in Districts 2570, 2575, 2580, 2585, 2590, 2595, 2600, 2605, 2610, 2615, 2620, 2625, 2630, 2635, 2645, 2650, 2680, and 2685.

Comment. Section 15910 continues former Fish and Game Code Section 8780(b) without substantive change.

1 **§ 15915. District 2630**

2 15915. (a) In District 2630, a bait net may be used only to take anchovies,
3 queenfish, white croakers, sardines, mackerel, squid, and smelt, for live bait
4 purposes only. A bait net may not be used within 750 feet of Seal Beach Pier or
5 Belmont Pier.

6 (b) No other species of fish may be taken on any boat carrying a bait net in
7 District 2630, except that loads or lots of fish may contain not more than 18
8 percent, by weight of the fish, of other bait fish species taken incidentally to other
9 fishing operations and that are mixed with other fish in the load or lot.

10 **Comment.** Section 15915 continues former Fish and Game Code Section 8780(c) and (d)
11 without substantive change.

12 **Note.** There exists some ambiguity in existing Fish and Game Code Section 8780 relating to
13 the allowed use of bait nets in existing Fish and Game District 19A. Subdivision (b) of the
14 section, as applicable to District 19A, reads as follows:

15 (b) Bait nets may be used to take fish for bait in Districts... 19A.....

16 However, subdivision (c) of the same section reads:

17 (c) In District 19A, bait nets may be used only to take anchovies, queenfish, white croakers,
18 sardines, mackerel, squid, and smelt for live bait purposes only. Bait nets may not be used within
19 750 feet of Seal Beach Pier or Belmont Pier.

20 Based on the construction of the section, the Commission reads subdivision (c) as a limitation
21 on subdivision (b), effectively rendering subdivision (b) superfluous as relates to District 19A.
22 Proposed Section 15915 is based on this understanding.

23 **The Commission invites comment on whether proposed Section 15915 properly states the**
24 **intended application of existing Section 8780 to existing Fish and Game District 19A.**

25 CHAPTER 7. BEACH NETS

26 Article 1. General Provisions

27 **§ 16000. “Beach net”**

28 16000. As used in this chapter, “beach net” means a net hauled from the water to
29 the beach or shore, and includes a beach seine and a haul seine.

30 **Comment.** Section 16000 continues former Fish and Game Code Section 8800 without
31 substantive change.

32 Article 2. Special District Rules

33 **§ 16010. Possession on boat prohibited**

34 16010. In Districts 2505, 2525, 2540, and 2605, a beach net shall not be
35 possessed on a boat.

36 **Comment.** Section 16010 continues former Fish and Game Code Sections 8801 and 8805
37 without substantive change.

1 **§ 16015. Permitted use**

2 16015. In Districts 2580, 2585, and 2595, a beach net may be used.

3 **Comment.** Section 16015 continues former Fish and Game Code Sections 8802 and 8804
4 without substantive change.

5 **§ 16020. Prohibition**

6 16020. In District 2620, a beach net shall not be used.

7 **Comment.** Section 16020 continues former Fish and Game Code Section 8806 without
8 substantive change.

9 **§ 16025. District 2590**

10 16025. (a) In District 2590, a beach net may be used if its meshes are at least 1
11 1/2 inches in length.

12 (b) In that portion of District 2590 lying south of Point Lobos, a beach net may
13 be used to take surf smelt only if it is over 20 feet in length and has meshes at least
14 seven-eighths of an inch in length.

15 **Comment.** Section 16025 continues former Fish and Game Code Section 8803 without
16 substantive change.

17 **§ 16030. District 2625**

18 16030. In District 2625, a beach net, the meshes of which are at least 1 1/2
19 inches in length, may be used to take smelt between September 1 and January 31.

20 **Comment.** Section 16030 continues former Fish and Game Code Section 8807 without
21 substantive change.

22 CHAPTER 8. TRAWL NETS

23 Article 1. General Provisions

24 **§ 16100. Legislative declaration**

25 16100. (a) The Legislature finds and declares that the use of nearshore trawl nets
26 was authorized through the experimental gear permit process and the alternative
27 gear development program as a potential alternative to the use of gill and trammel
28 nets in areas where the use of that gear type has been prohibited.

29 (b) The Legislature, in considering the needs of user groups, requires the use of
30 nearshore trawl nets to be phased out effective January 1, 1993.

31 **Comment.** Section 16100 continues former Fish and Game Code Section 8606.1 without
32 substantive change.

33  **Note.** The Commission invites comment on whether existing Fish and Game Code
34 Section 8606.1 is obsolete and can be discontinued.

1 **§ 16105. Conformity with federal regulations**

2 16105. (a) Except as otherwise provided in this article, the use of a trawl net
3 shall conform to federal groundfish regulations adopted pursuant to the Magnuson
4 Fishery Conservation and Management Act (16 U.S.C. Sec. 1801 et seq.).

5 (b) A commercial bottom trawl vessel issued a state permit is subject to the
6 requirements and policies of the federal groundfish observer program (50 C.F.R.
7 660.360).

8 **Comment.** Subdivision (a) of Section 16105 continues the second sentence of former Fish and
9 Game Code Section 8830 without substantive change.

10 Subdivision (b) continues former Fish and Game Code Section 8841(d) without substantive
11 change.

12 **§ 16110. Commission and department authority**

13 16110. (a) The commission is hereby granted authority over all state-managed
14 bottom trawl fisheries not managed under a federal fishery management plan
15 pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (16
16 U.S.C. Sec. 1801 et seq.), or a state fishery management plan pursuant to Title 3
17 (commencing with Section 12100) of Part 4, to ensure that resources are
18 sustainably managed, to protect the health of ecosystems, and to provide for an
19 orderly transition to sustainable gear types in situations where bottom trawling
20 may not be compatible with these goals.

21 (b) The commission is hereby granted authority to manage all of the following
22 fisheries in a manner that is consistent with this section and Title 3 (commencing
23 with Section 12100) of Part 4:

24 (1) California halibut.

25 (2) Sea cucumber.

26 (3) Ridge-back, spot, and golden prawn.

27 (4) Pink shrimp.

28 (c) The commission is also granted authority over other types of gear targeting
29 the same species as the bottom trawl fisheries referenced in subdivision (a) to
30 manage in a manner that is consistent with the requirements of Title 3
31 (commencing with Section 12100) of Part 4.

32 (d) The commission may only authorize additional fishing areas for bottom
33 trawls after it determines, based on the best available scientific information, that
34 bottom trawling in those areas is sustainable, does not harm bottom habitat, and
35 does not unreasonably conflict with other users.

36 (e) The commission shall facilitate the conversion of bottom trawlers to gear that
37 is more sustainable if the commission determines that conversion will not
38 contribute to overcapacity or overfishing. The commission may participate in, and
39 encourage programs that support, conversion to low-impact gear or capacity
40 reduction by trawl fleets. The department may not issue new permits to bottom
41 trawlers to replace those retired through a conversion program.

(f) As soon as practicable, but not later than May 1, 2005, the commission and the department shall submit to the Pacific Fishery Management Council and the National Marine Fisheries Service a request for federal management measures for the pink shrimp fishery that the commission and the department determine are needed to reduce bycatch or protect habitat, to account for uncertainty, or to otherwise ensure consistency with federal groundfish management.

(g) This section does not apply to the use of trawl nets pursuant to a scientific research permit.

Comment. Section 16110 continues former Fish and Game Code Section 8841(a)-(c), (e), and (j)-(k) without substantive change. In combination with Sections 16160(b), 16165(b), 16170(b), and 51010(c), Section 16110 also continues former Fish and Game Code Section 8841(i) without substantive change.

Note. The Commission invites comment on whether existing Section 8841(k) (which would be continued by proposed Section 16110(f)) is obsolete.

§ 16115. “Trawl net”

16115. For the purposes of this chapter, “trawl net” means a cone or funnel-shaped net that is towed or drawn through the water by a fishing vessel, and includes any gear appurtenant to the net.

Comment. Section 16115 continues the first sentence of former Fish and Game Code Section 8830 without substantive change.

Article 2. Prohibitions

§ 16150. Mesh size

16150. It is unlawful for a person to use a trawl net with meshes that are less than 4 1/2 inches in length, except as provided in this article or as provided by federal groundfish regulations adopted pursuant to the Magnuson Fishery Conservation and Management Act (16 U.S.C., Sec. 1801 et seq.).

Comment. Section 16150 continues former Fish and Game Code Section 8831 without substantive change.

§ 16155. Bag or cod-end

16155. It is unlawful to use or possess a trawl net that includes a bag or cod-end, or modification of a bag or cod-end, except a bag or cod-end of a single layer of webbing or as otherwise authorized by Section 40115 or by the commission.

Comment. Section 16155 continues former Fish and Game Code Section 8837 without substantive change.

§ 16160. Prohibited roller gear

16160. (a) It is unlawful to use roller gear more than eight inches in diameter.

(b) This section does not apply to the use of a trawl net pursuant to a scientific research permit.

Comment. Subdivision (a) of Section 16160 continues former Fish and Game Code Section 8841(f) without substantive change.

In combination with Sections 16110(g), 16165(b), 16170(b), and 51010(c), subdivision (b) of Section 16160 continues former Fish and Game Code Section 8841(i) without substantive change.

Note. Existing Fish and Game Code Section 8841(f) (which would be continued by proposed Section 16160(a)) is one provision in a much longer section that generally relates to bottom trawling. However, the provision itself provides no context for its prohibition, and on its face could be given broader application than intended.

The Commission invites comment on whether the provision should be revised to prohibit use of roller gear in connection with a trawl net.

§ 16165. Bottom trawling in ocean waters

16165. (a) Except as provided in Sections 40100, 40105, and 40110, or in Sections 40125, 51100, 51105, 51110, and 51115, it is unlawful to engage in bottom trawling in ocean waters of the state.

(b) This section does not apply to the use of a trawl net pursuant to a scientific research permit.

Comment. Subdivision (a) of Section 16165 continues former Fish and Game Code Section 8841(h) without substantive change.

In combination with Sections 16110(g), 16160(b), 16170(b), and 51010(c), subdivision (b) of Section 16165 continues former Fish and Game Code Section 8841(i) without substantive change.

§ 16170. Required permit for vessel

16170. (a) No vessel may utilize bottom trawling gear without a state or federal permit.

(b) This section does not apply to the use of trawl nets pursuant to a scientific research permit.

Comment. Subdivision (a) of Section 16170 continues former Fish and Game Code Section 8841(l) without substantive change.

In combination with Sections 16110(g), 16060(b), 16165(b), and 51010(c), subdivision (b) of Section 16170 continues former Fish and Game Code Section 8841(i) without substantive change.

§ 16175. Chafing gear

16175. (a) Chafing gear may be used or possessed, but shall not be connected directly to the terminal or closed end of the cod-end.

(b) Except for chafing gear prescribed under federal groundfish regulations adopted pursuant to the Magnuson Fishery Conservation and Management Act (16 U.S.C., Sec. 1801 et seq.), all chafing gear shall have a minimum mesh size of six inches, unless only the bottom one-half, or underside, of the cod-end is covered by chafing gear, which may be of any size mesh.

Comment. Section 16175 continues former Fish and Game Code Section 8840 without substantive change.

Article 3. Special District Rules

§ 16250. District 2550

16250. In District 2550, a trawl net or dragnet shall not be possessed, except under regulations that the commission shall adopt.

Comment. Section 16250 continues the part of former Fish and Game Code Section 8833 applicable to former Fish and Game District 4 without substantive change.

§ 16255. District 2570

16255. In District 2570, a trawl net may be used in waters not less than three nautical miles from the nearest point of land on the mainland shore.

Comment. Section 16255 continues the part of former Fish and Game Code Section 8835 applicable to former Fish and Game District 6 without substantive change.

§ 16260. District 2575

16260. In District 2575, a trawl net may be used in waters not less than three nautical miles from the nearest point of land on the mainland shore.

Comment. Section 16260 continues the part of former Fish and Game Code Section 8835 applicable to former Fish and Game District 7 without substantive change.

§ 16265. District 2590

16265. In District 2590, a trawl net may be used in waters not less than three nautical miles from the nearest point of land on the mainland shore.

Comment. Section 16265 continues the part of former Fish and Game Code Section 8835 applicable to former Fish and Game District 10 without substantive change.

§ 16270. District 2615

16270. In District 2615, a trawl net may be used in waters not less than three nautical miles from the nearest point of land on the mainland shore, including those parts of Monterey Bay, Estero Bay, and San Luis Obispo Bay that lie within that district.

Comment. Section 16270 continues the part of former Fish and Game Code Section 8836 applicable to former Fish and Game District 17 without substantive change.

§ 16275. District 2620

16275. In District 2620, a trawl net may be used in waters not less than three nautical miles from the nearest point of land on the mainland shore, including those parts of Monterey Bay, Estero Bay, and San Luis Obispo Bay that lie within that district.

Comment. Section 16275 continues the part of former Fish and Game Code Section 8836 applicable to former Fish and Game District 18 without substantive change.

1 **§ 16280. District 2625**

2 16280. In District 2625, a trawl net or dragnet shall not be possessed, except
3 under regulations that the commission shall adopt.

4 **Comment.** Section 16280 continues the part of former Fish and Game Code Section 8833
5 applicable to former Fish and Game District 19 without substantive change.

6 **§ 16285. District 2630**

7 16285. In District 2630, a trawl net or dragnet shall not be possessed, except
8 under regulations that the commission shall adopt.

9 **Comment.** Section 16285 continues the part of former Fish and Game Code Section 8833
10 applicable to former Fish and Game District 19A without substantive change.

11 **§ 16290. District 2635**

12 16290. In District 2635, a trawl net or dragnet may be possessed under
13 regulations that the commission shall adopt.

14 **Comment.** Section 16290 continues the part of former Fish and Game Code Section 8833
15 applicable to former Fish and Game District 19B without substantive change.

16 **§ 16295. District 2640**

17 16295. In District 2640, a trawl net or dragnet shall not be possessed.

18 **Comment.** Section 16295 continues the part of former Fish and Game Code Section 8833
19 applicable to former Fish and Game District 20 without substantive change.

20 **§ 16300. District 2645**

21 16300. In District 2645, a trawl net or dragnet shall not be possessed.

22 **Comment.** Section 16300 continues the part of former Fish and Game Code Section 8833
23 applicable to former Fish and Game District 20A without substantive change.

24 **§ 16305. District 2650**

25 16305. In District 2650, a trawl net or dragnet shall not be possessed, except
26 under regulations that the commission shall adopt.

27 **Comment.** Section 16305 continues the part of former Fish and Game Code Section 8833
28 applicable to former Fish and Game District 21 without substantive change.

29 **§ 16310. District 2685**

30 16310. In District 2685, a trawl net may be used in waters not less than three
31 nautical miles from the nearest point of land on the mainland shore, including
32 those parts of Monterey Bay, Estero Bay, and San Luis Obispo Bay that lie within
33 that district.

34 **Comment.** Section 16310 continues the part of former Fish and Game Code Section 8836
35 applicable to former Fish and Game District 118.5 without substantive change.

Article 4. Special Rules for Identified Waters

§ 16350. Golden Gate Bridge area

16350. A trawl net may be used in marine and brackish waters inside of the Golden Gate Bridge to take shrimp, oriental gobies, longjaw mudsuckers, plainfin midshipmen, and staghorn sculpin, only in accordance with regulations that the commission may adopt.

Comment. Section 16350 continues the part of former Fish and Game Code Section 8832 applicable to trawl nets without substantive change.

§ 16355. Small cod-end mesh in specified area

16355. It is unlawful to use any trawl net with cod-end mesh less than 7 1/2 inches in length and with a cod-end less than 29 meshes long and a circumference of not less than 47 meshes in waters lying between one and three nautical miles from the mainland shore between a line running due west (270° true) from Point Arguello and a line running due south (180° true) from Point Mugu.

Comment. Section 16355 continues former Fish and Game Code Section 8843 without substantive change.

CHAPTER 9. DIP NETS

Article 1. General Provisions

§ 16400. Permitted except where specifically restricted

16400. Dip nets may be used subject to the restrictions in this chapter.

Comment. Section 16400 continues the introductory clause of former Fish and Game Code Section 8870 applicable to general use of dip nets without substantive change.

Article 2. Special District Rules

§ 16450. District 2505

16450. In District 2505, a dip net shall not be baited, and may not measure more than six feet in greatest breadth.

Comment. Section 16450 continues the part of former Fish and Game Code Section 8870(a) applicable to former Fish and Game District 1 without substantive change.

§ 16455. District 2515

16455. In District 2515, a dip net shall not be baited, and may not measure more than six feet in greatest breadth.

Comment. Section 16455 continues the part of former Fish and Game Code Section 8870(a) applicable to former Fish and Game District 1 1/2 without substantive change.

1 **§ 16460. District 2525**

2 16460. In District 2525, a dip net shall not be baited, and may not measure more
3 than six feet in greatest breadth.

4 **Comment.** Section 16460 continues the part of former Fish and Game Code Section 8870(a)
5 applicable to former Fish and Game District 2 without substantive change.

6 **§ 16465. District 2540**

7 16465. In District 2540, a dip net shall not be baited, and may not measure more
8 than six feet in greatest breadth.

9 **Comment.** Section 16465 continues the part of former Fish and Game Code Section 8870(a)
10 applicable to former Fish and Game District 3 without substantive change.

11 **§ 16470. District 2550**

12 16470. In District 2550, a dip net shall not be baited, and may not measure more
13 than six feet in greatest breadth.

14 **Comment.** Section 16470 continues the part of former Fish and Game Code Section 8870(a)
15 applicable to former Fish and Game District 4 without substantive change.

16 **§ 16475. District 2625**

17 16475. (a) In District 2625, a hand-held dip net 30 feet or less in greatest breadth
18 may be used, except as provided in subdivision (b).

19 (b) A dip net shall not be used in the district within 750 feet of any pier, wharf,
20 jetty, or breakwater, except to take smelt, or to take anchovies, squids, or sardines
21 for bait.

22 **Comment.** Section 16475 continues former Fish and Game Code Section 8870(b) without
23 substantive change.

24 **§ 16480. District 2640**

25 16480. In District 2640, a hand-held dip net 30 feet or less in greatest breadth
26 may be used.

27 **Comment.** Section 16480 continues former Fish and Game Code Section 8870(c) without
28 substantive change.

29 CHAPTER 10. BAITED HOOP NETS

30 Article 1. General Provisions [Reserved]

31 Article 2. Special District Rules

32 **§ 16550. District 2620**

33 16550. A baited hoop net of three foot or less in diameter may be used in that
34 part of District 2620 lying south of a line running east and west through Arguello,
35 to take rock crabs, red crabs, and yellow crabs only.

Comment. Section 16550 continues the part of former Fish and Game Code Section 8890 applicable to former Fish and Game District 18 without substantive change.

§ 16555. District 2625

16555. A baited hoop net of three foot or less in diameter may be used in District 2625 to take rock crabs, red crabs, and yellow crabs only.

Comment. Section 16555 continues the part of former Fish and Game Code Section 8890 applicable to former Fish and Game District 19 without substantive change.

CHAPTER 11. CHINESE SHRIMP NETS

Article 1. General Provisions [Reserved]

Article 2. Special Rules for Identified Waters

§ 16650. Golden Gate Bridge area

16650. A Chinese shrimp net may be used in marine and brackish waters inside of the Golden Gate Bridge to take shrimp, oriental gobies, longjaw mudsuckers, plainfin midshipmen, and staghorn sculpin, only in accordance with regulations that the commission may adopt.

Comment. Section 16650 continues the part of former Fish and Game Code Section 8832 applicable to Chinese shrimp nets without substantive change.

TITLE 4. GILL NETS AND TRAMMEL NETS

 **Note.** The use of gill nets and trammel nets in the state of California is governed by Article X B of the California Constitution, which was added to the Constitution by initiative on November 6, 1990.

CHAPTER 1. GENERAL PROVISIONS

§ 16800. Statement of intent

16800. In enacting the bill that added this title, the Legislature did not evaluate the relationship between this title, Chapter 3 (commencing with Section 15500) of Title 3, and Article X B of the California Constitution.

Comment. Section 16800 is new.

§ 16805. Legislative declarations

16805. The Legislature finds and declares that:

(a) The central California nearshore gill and trammel net fisheries for California halibut (*Paralichthys californicus*) and white croaker (*Genyonemus lineatus*) and the use of gill nets in these fisheries are expanding at a rapid rate.

(b) The incidental take of certain species of seabirds and marine mammals in set gill and trammel nets could be increasing to a level which may be adversely impacting the viability of the populations of nontarget species.

Comment. Section 16805 continues former Fish and Game Code Section 8609 without substantive change.

CHAPTER 2. MARINE RESOURCES PROTECTION ACT OF 1990

§ 16850.1. Statement of codification and implementation

16850.1. The Marine Resources Protection Act of 1990 (Art. X B, Cal. Const.) was adopted as an initiative constitutional amendment at the November 6, 1990, general election. This chapter codifies and implements that initiative constitutional amendment.

Comment. Section 16850.1 continues former Fish and Game Code Section 8610.1 without substantive change.

§ 16850.2. Meaning of references

16850.2. (a) “District” for the purposes of this chapter and of Article X B of the California Constitution means a fish and game district as defined in this code on January 1, 1990.

(b) Except as specifically provided in this chapter, all references to sections, articles, chapters, parts, and divisions of this code are to those statutes in effect on January 1, 1990.

(c) “Ocean waters” means the waters of the Pacific Ocean regulated by the state.

(d) “Zone” means the Marine Resources Protection Zone established pursuant to this chapter. The zone consists of the following:

(1) In waters less than 70 fathoms or within one mile, whichever is less, around the Channel Islands consisting of the Islands of San Miguel, Santa Rosa, Santa Cruz, Anacapa, San Nicolaus, Santa Barbara, Santa Catalina, and San Clemente.

(2) The area within three nautical miles offshore of the mainland coast, and the area within three nautical miles off any manmade breakwater, between a line extending due west from Point Arguello and a line extending due west from the Mexican border.

(3) In waters less than 35 fathoms between a line running 180 degrees true from Point Fermin and a line running 270 degrees true from the south jetty of Newport Harbor.

Comment. Section 16850.2 continues former Fish and Game Code Section 8610.2.

Former Section 8610.2 was enacted to codify and implement Section 2 of Article X B of the California Constitution. See former Section 8610.1 (continued without change in Section 16850.1). To avoid any possible impairment of constitutional requirements, former Section 8610.2 has been continued in this section without change.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

1 **§ 16850.3. Prohibited use of gill or trammel net to take rockfish**

2 16850.3. (a) From January 1, 1991, to December 31, 1993, inclusive, gill nets or
3 trammel nets may only be used in the zone pursuant to a nontransferable permit
4 issued by the department pursuant to Section 16850.5.

5 (b) On and after January 1, 1994, gill nets and trammel nets shall not be used in
6 the zone.

7 **Comment.** Section 16850.3 continues former Fish and Game Code Section 8610.3.

8 Former Section 8610.3 was enacted to codify and implement Section 3 of Article X B of the
9 California Constitution. See former Section 8610.1 (continued without change in Section
10 16850.1). To avoid any possible impairment of constitutional requirements, former Section
11 8610.3 has been continued in this section without change, except to update a cross-reference to
12 reflect renumbering required by the recodification of this code.

13 When enacting the bill that added this section, the Legislature did not evaluate the relationship
14 between this section and Article X B of the California Constitution. See Section 16800.

15 **§ 16850.4. Authorized use of gill nets and trammel nets**

16 16850.4. (a) Notwithstanding any other provision of law, gill nets and trammel
17 nets may not be used to take any species of rockfish.

18 (b) In ocean waters north of Point Arguello on and after November 7, 1990, the
19 use of gill nets and trammel nets shall be regulated by the provisions of Chapter 3
20 (commencing with Section 17000), Chapter 4 (commencing with Section 18000),
21 and Chapter 5 (commencing with Section 18200), of this title, and Chapter 3
22 (commencing with Section 15500) of Title 3, or any regulation or order issued
23 pursuant to those provisions, in effect on January 1, 1990, except that as to
24 Sections 18000, 18005, 18015, and 18020, and subdivisions (a) to (f), inclusive, of
25 Section 18010, or any regulation or order issued pursuant to these sections, the
26 provisions in effect on January 1, 1989, shall control where not in conflict with
27 other provisions of this chapter, and shall be applicable to all ocean waters.
28 Notwithstanding the provisions of this section, the Legislature shall not be
29 precluded from imposing more restrictions on the use or possession of gill nets or
30 trammel nets. The director shall not authorize the use of gill nets or trammel nets
31 in any area where the use is not permitted even if the director makes specified
32 findings.

33 **Comment.** Section 16850.4 continues former Fish and Game Code Section 8610.4.

34 Former Section 8610.4 was enacted to codify and implement Section 4 of Article X B of the
35 California Constitution. See former Section 8610.1 (continued without change in Section
36 16850.1). To avoid any possible impairment of constitutional requirements, former Section
37 8610.4 has been continued in this section without change, except to update cross-references to
38 reflect renumbering required by the recodification of this code.

39 When enacting the bill that added this section, the Legislature did not evaluate the relationship
40 between this section and Article X B of the California Constitution. See Section 16800.

41 **§ 16850.5. Permit process during transitional period**

42 16850.5. The department shall issue a permit to use a gill net or trammel net in
43 the zone for the period specified in subdivision (a) of Section 16850.3 to any
44 applicant who meets both of the following requirements:

- 1 (a) Has a commercial fishing license issued pursuant to Section 14500.
 2 (b) Has a permit issued pursuant to Section 18005 and is presently the owner or
 3 operator of a vessel equipped with a gill net or trammel net.

4 **Comment.** Section 16850.5 continues former Fish and Game Code Section 8610.5.
 5 Former Section 8610.5 was enacted to codify and implement Section 5 of Article X B of the
 6 California Constitution. See former Section 8610.1 (continued without change in Section
 7 16850.1). To avoid any possible impairment of constitutional requirements, former Section
 8 8610.5 has been continued in this section without change, except to update cross-references to
 9 reflect renumbering required by the recodification of this code.

10 When enacting the bill that added this section, the Legislature did not evaluate the relationship
 11 between this section and Article X B of the California Constitution. See Section 16800.

12 **§ 16850.6. Fees for permit during transitional period**

13 16850.6. The department shall charge the following fees for permits issued
 14 pursuant to Section 16850.5 pursuant to the following schedule:

15	Calendar Year	Fee
16	1991	\$250
17	1992	\$500
18	1993	\$1,000

19 **Comment.** Section 16850.6 continues former Fish and Game Code Section 8610.6.
 20 Former Section 8610.6 was enacted to codify and implement Section 6 of Article X B of the
 21 California Constitution. See former Section 8610.1 (continued without change in Section
 22 16850.1). To avoid any possible impairment of constitutional requirements, former Section
 23 8610.6 has been continued in this section without change, except to update a cross-reference to
 24 reflect renumbering required by the recodification of this code.

25 When enacting the bill that added this section, the Legislature did not evaluate the relationship
 26 between this section and Article X B of the California Constitution. See Section 16800.

27 **§ 16850.9. Use of funds in Marine Resources Protection Account**

28 16850.9. Any funds remaining in the Marine Resources Protection Account in
 29 the Fish and Game Preservation Fund on or after January 1, 1995, shall, with the
 30 approval of the commission, be used to provide grants to colleges, universities,
 31 and other bona fide scientific research groups to fund marine resource related
 32 scientific research within the ecological reserves established by Section 16900. An
 33 amount, not to exceed 15 percent of the total funds remaining in that account on or
 34 after January 1, 1995, may be expended for the administration of this section.

35 **Comment.** Section 16850.9 continues former Fish and Game Code Section 8610.9.
 36 Former Section 8610.9 was enacted to codify and implement Section 9 of Article X B of the
 37 California Constitution. See former Section 8610.1 (continued without change in Section
 38 16850.1). To avoid any possible impairment of constitutional requirements, former Section
 39 8610.9 has been continued in this section without change, except to update a cross-reference to
 40 reflect renumbering required by the recodification of this code.

41 When enacting the bill that added this section, the Legislature did not evaluate the relationship
 42 between this section and Article X B of the California Constitution. See Section 16800.

1 **§ 16850.11. Unlawful take**

2 16850.11. It is unlawful for any person to take, possess, receive, transport,
3 purchase, sell, barter, or process any fish obtained in violation of this chapter.

4 **Comment.** Section 16850.11 continues former Fish and Game Code Section 8610.11.

5 Former Section 8610.11 was enacted to codify and implement Section 11 of Article X B of the
6 California Constitution. See former Section 8610.1 (continued without change in Section
7 16850.1). To avoid any possible impairment of constitutional requirements, former Section
8 8610.11 has been continued in this section without change.

9 When enacting the bill that added this section, the Legislature did not evaluate the relationship
10 between this section and Article X B of the California Constitution. See Section 16800.

11 **§ 16850.12. Department monitoring of take**

12 16850.12. To increase the state's scientific and biological information on the
13 ocean fisheries of this state, the department shall establish a program whereby it
14 can monitor and evaluate the daily landings of fish by commercial fishermen who
15 are permitted under this chapter to take these fish. The cost of implementing this
16 monitoring program shall be borne by the commercial fishing industry.

17 **Comment.** Section 16850.12 continues former Fish and Game Code Section 8610.12.

18 Former Section 8610.12 was enacted to codify and implement Section 12 of Article X B of the
19 California Constitution. See former Section 8610.1 (continued without change in Section
20 16850.1). To avoid any possible impairment of constitutional requirements, former Section
21 8610.12 has been continued in this section without change.

22 When enacting the bill that added this section, the Legislature did not evaluate the relationship
23 between this section and Article X B of the California Constitution. See Section 16800.

24 **§ 16850.13. Use of gill nets and trammel nets**

25 16850.13. The penalty for a violation of Section 16850.3 or 16850.4 is as
26 specified in subdivisions (b) and (c).

27 (b) The penalty for a first violation of Section 16850.3 or 16850.4 is a fine of not
28 less than one thousand dollars (\$1,000) and not more than five thousand dollars
29 (\$5,000) and a mandatory suspension of any license, permit, or stamp to take,
30 receive, transport, purchase, sell, barter, or process fish for commercial purposes
31 for six months. The penalty for a second or subsequent violation of Section
32 16850.3 or 16850.4 is a fine of not less than two thousand five hundred dollars
33 (\$2,500) and not more than ten thousand dollars (\$10,000) and a mandatory
34 suspension of any license, permit, or stamp to take, receive, transport, purchase,
35 sell, barter, or process fish for commercial purposes for one year.

36 (c) If a person convicted of a violation of Section 16850.3 or 16850.4, is granted
37 probation, the court shall impose as a term or condition of probation, in addition to
38 any other term or condition of probation, a requirement that the person pay at least
39 the minimum fine prescribed in this section.

40 **Comment.** Subdivision (a) of Section 16850.13 continues former Fish and Game Code Section
41 8610.13 without substantive change.

42 Subdivisions (b) and (c) continue former Fish and Game Code Section 12003.5 without
43 substantive change.

1 Former Section 8610.13 was enacted to codify and implement Section 13 of Article X B of the
2 California Constitution. See former Section 8610.1 (continued without change in Section
3 16850.1). Former Section 12003.5 substantially duplicated the provisions of former Section
4 8610.13. To avoid any possible impairment of constitutional requirements, former Section
5 8610.13 has been continued in this section without change, except to update cross-references to
6 reflect renumbering required by the recodification of this code.

7 When enacting the bill that added this section, the Legislature did not evaluate the relationship
8 between this section and Article X B of the California Constitution. See Section 16800.

9 **§ 16850.14. Ecological reserves**

10 16850.14. (a) Prior to January 1, 1994, the commission shall establish four new
11 ecological reserves in ocean waters along the mainland coast. Each ecological
12 reserve shall have a surface area of at least two square miles. The commission
13 shall restrict the use of these ecological reserves to scientific research relating to
14 the management and enhancement of marine resources, including, but not limited
15 to, scientific research as it relates to sportfishing and commercial fishing.

16 Recreational uses, including, but not limited to, hiking, walking, viewing,
17 swimming, diving, surfing, and transient boating are not in conflict with this
18 section.

19 (b) Prior to establishing the four ecological reserves, the commission shall
20 conduct a public hearing at each of the recommended sites or at the nearest
21 practicable location.

22 (c) On and after January 1, 2002, the four ecological reserves established
23 pursuant to subdivision (a) shall be called state marine reserves, unless otherwise
24 reclassified pursuant to Section 60500, and shall become part of the state system
25 of marine managed areas.

26 (d) Recreational uses, including, but not limited to, hiking, walking, viewing,
27 swimming, diving, surfing, and transient boating are not in conflict with this
28 section.

29 **Comment.** Section 16850.14 continues former Fish and Game Code Section 8610.14.

30 Former Section 8610.14 was enacted to codify and implement Section 14 of Article X B of the
31 California Constitution. See former Section 8610.1 (continued without change in Section
32 16850.1). To avoid any possible impairment of constitutional requirements, former Section
33 8610.14 has been continued in this section without change, except to update a cross-reference to
34 reflect renumbering required by the recodification of this code.

35 When enacting the bill that added this section, the Legislature did not evaluate the relationship
36 between this section and Article X B of the California Constitution. See Section 16800.

37 **§ 16850.15. Closures to protect wildlife**

38 16850.15. This chapter does not preempt or supersede any other closures to
39 protect any other wildlife, including sea otters, whales, and shorebirds.

40 **Comment.** Section 16850.15 continues former Fish and Game Code Section 8610.15.

41 Former Section 8610.15 was enacted to codify and implement Section 15 of Article X B of the
42 California Constitution. See former Section 8610.1 (continued without change in Section
43 16850.1). To avoid any possible impairment of constitutional requirements, former Section
44 8610.15 has been continued in this section without change, except to update a cross-reference to
45 reflect renumbering required by the recodification of this code.

1 When enacting the bill that added this section, the Legislature did not evaluate the relationship
2 between this section and Article X B of the California Constitution. See Section 16800.

3 **§ 16850.16. Severability of provisions of chapter**

4 16850.16. If any provision of this chapter or the application thereof to any
5 person or circumstances is held invalid, that invalidity shall not affect other
6 provisions or applications of this chapter which can be given effect without the
7 invalid provision or application, and to this end the provisions of this chapter are
8 severable.

9 **Comment.** Section 16850.16 continues former Fish and Game Code Section 8610.16.

10 Former Section 8610.16 was enacted to codify and implement Section 16 of Article X B of the
11 California Constitution. See former Section 8610.1 (continued without change in Section
12 16850.1). To avoid any possible impairment of constitutional requirements, former Section
13 8610.16 has been continued in this section without change, except to update a cross-reference to
14 reflect renumbering required by the recodification of this code.

15 When enacting the bill that added this section, the Legislature did not evaluate the relationship
16 between this section and Article X B of the California Constitution. See Section 16800.

17 **CHAPTER 3. USE OF GILL NETS IN PARTICULAR DISTRICTS**

18 **Comment.** The provisions appearing in this chapter and in Chapter 3 (commencing with
19 Section 15500) of Title 3 together continue the provisions of former Article 4 (commencing with
20 Section 8660) of Chapter 3 of Part 3 of Division 6 of the Fish and Game Code, which are
21 governed by Section 4(b) of Article X B of the California Constitution.

22 **§ 17000. Additional rules for Districts 2590, 2615 and 2620**

23 17000. (a) Notwithstanding Sections 18085 and 18210, gill nets and trammel
24 nets shall not be used in those portions of District 2615 between a line extending
25 220° magnetic from the mouth of Waddell Creek in Santa Cruz County and a line
26 extending 252° magnetic from Yankee Point, Carmel Highlands, in Monterey
27 County in waters 30 fathoms or less in depth at mean lower low water.

28 (b) Notwithstanding Sections 18085 and 18210, gill nets and trammel nets shall
29 not be used in that portion of District 2620 north of a line extending due west from
30 Point Sal in Santa Barbara County in waters 30 fathoms or less in depth at mean
31 lower low water.

32 (c) Notwithstanding Sections 18085 and 18210, any person using gill nets or
33 trammel nets in those portions of Districts 2615 and 2620 from a line extending
34 220° magnetic from the mouth of Waddell Creek in Santa Cruz County to a line
35 extending due west from Point Sal in Santa Barbara County in waters between 30
36 fathoms and 40 fathoms in depth at mean lower low water shall comply with all of
37 the following requirements in order to ensure adequate monitoring of fishing effort
38 to protect marine mammals:

39 (1) Prior to the use, the person shall notify the department that gill nets or
40 trammel nets will be set in the area.

41 (2) The person shall give adequate notification, as determined by the
42 department, to the department at its office in Monterey or Morro Bay at least 24

1 hours prior to each fishing trip to ensure full compliance and cooperation with the
2 monitoring program. The department may require that an authorized monitor be on
3 board the vessel. The department shall determine whether on board, at sea, or
4 shoreside monitoring is appropriate. If the authorized monitor is not on board the
5 fishing vessel, the fishing vessel operator and the authorized monitor shall make
6 every effort to remain in radio contact if the radio equipment is made available to
7 the monitor.

8 (3) To ensure the effectiveness of the monitoring program, gill nets and trammel
9 nets may be set or pulled only between one-half hour after sunrise and one-half
10 hour before sunset.

11 (4) A permit may be revoked and canceled pursuant to Section 18005 for failure
12 to comply with the department's notification and monitoring requirements.

13 (d) If the director determines that the use of gill or trammel nets is having an
14 adverse impact on any population of any species of seabird, marine mammal, or
15 fish, the director shall issue an order prohibiting or restricting the use, method of
16 use, size, or materials used in the construction of either or both types of those nets
17 in all or any part of District 2590 or 2615, or in all or any part of District 2620
18 north of a line extending due west from Point Conception in Santa Barbara County
19 for a specified period. The order shall take effect no later than 48 hours after its
20 issuance. The director shall hold a properly noticed public hearing in a place
21 convenient to the affected area within one week of the effective date of the order
22 to describe the action taken and shall take testimony as to the effect of the order
23 and determine whether any modification of the order is necessary.

24 (e) For purposes of this section, "adverse impact" means either of the following:

25 (1) The danger of irreparable injury to, or mortality in, any population of any
26 species of seabird, marine mammal, or fish which is occurring at a rate that
27 threatens the viability of the population as a direct result of the use of gill nets or
28 trammel nets.

29 (2) The impairment of the recovery of a species listed as an endangered species
30 or threatened species pursuant to the federal Endangered Species Act (16 U.S.C.
31 Sec. 1531 et seq.) or the California Endangered Species Act (Part 1 (commencing
32 with Section 62000) of Division 17) or a species of seabird, marine mammal, or
33 fish designated as fully protected under this code, as a direct result of the use of
34 gill nets or trammel nets.

35 (f) This section does not apply to any gill net with meshes 3 1/2 inches or less in
36 length in any portion of District 2590 between Yankee Point in Monterey County
37 and Point Sal in Santa Barbara County.

38 (g) The Legislature finds and declares that this section, which continues former
39 Fish and Game Code Section 8664.5 as amended by Chapter 884 of the Statutes of
40 1990, and as amended by the act that amended former Fish and Game Code
41 Section 8664.5 during the 1992 portion of the 1991–92 Regular Session, is more
42 restrictive on the use and possession of gill nets and trammel nets than the version
43 of former Fish and Game Code Section 8664.5 in effect on January 1, 1990, and

1 therefore complies with former Section 8610.4, and Section 4 of Article X B of the
2 California Constitution.

3 **Comment.** Section 17000 continues former Fish and Game Code Section 8664.5.

4 Section 17000 is governed by Section 16865, a section that codifies and implements Section 4
5 of Article X B of the California Constitution. See Section 16850.1.

6 To avoid any possible impairment of constitutional requirements, former Section 8664.5 has
7 been continued in this section without change, except to update cross-references to reflect
8 renumbering required by the recodification of this code.

9 When enacting the bill that added this section, the Legislature did not evaluate the relationship
10 between this section and Article X B of the California Constitution. See Section 16800.

11 **§ 17005. “Impacted fisherman”**

12 17005. “Impacted fisherman” for purposes of Section 17000 and former Fish
13 and Game Code Section 8664.65, means any person who, from January 1, 1986, to
14 December 31, 1990, inclusive, landed a minimum of 1,000 pounds of fish, other
15 than shark or rockfish, in each of at least three calendar years during that period
16 with set gill and trammel nets and landed the fish at ports within areas subject to
17 gill and trammel net closures pursuant to Section 17000. Landings shall be
18 verified by the fisherman’s submittal of landing receipts as provided in Section
19 21000.

20 **Comment.** Section 17005 continues former Fish and Game Code Section 8664.67.

21 Section 17005 is governed by Section 16865, a section that codifies and implements Section 4
22 of Article X B of the California Constitution. See Section 16850.1.

23 To avoid any possible impairment of constitutional requirements, former Section 8664.67 has
24 been continued in this section without change, except to update cross-references to reflect
25 renumbering required by the recodification of this code.

26 When enacting the bill that added this section, the Legislature did not evaluate the relationship
27 between this section and Article X B of the California Constitution. See Section 16800.

28 **§ 17010. Order by department**

29 17010. The initial period of effectiveness of an order issued pursuant to
30 subdivision (c) of Section 17000 shall not exceed 120 days. After a further public
31 hearing, the director may, on the basis of a report prepared by the department on
32 the condition of the local population of any species of seabird, marine mammal, or
33 fish, extend the order for a further specified period or reissue the order for a
34 further specified period.

35 **Comment.** Section 17010 continues former Fish and Game Code Section 8664.7.

36 Section 17010 is governed by Section 16865, a section that codifies and implements Section 4
37 of Article X B of the California Constitution. See Section 16850.1.

38 To avoid any possible impairment of constitutional requirements, former Section 8664.7 has
39 been continued in this section without change, except to update a cross-reference to reflect
40 renumbering required by the recodification of this code.

41 When enacting the bill that added this section, the Legislature did not evaluate the relationship
42 between this section and Article X B of the California Constitution. See Section 16800.

1 **§ 17015. Additional rules for specified northern California ocean waters**

2 17015. (a) Notwithstanding Sections 18035, 18060, 18095, and 18210, and
3 except as provided in subdivisions (c) and (d), set or drift gill or trammel nets shall
4 not be used in ocean waters between a line extending 245° magnetic from the most
5 westerly point of the west point of the Point Reyes headlands in Marin County and
6 the westerly extension of the California-Oregon boundary.

7 (b)(1) Notwithstanding Sections 17000, 18060, 18095, and 18210, set or drift
8 gill or trammel nets shall not be used in waters which are 40 fathoms or less in
9 depth at mean lower low water between a line extending 245° magnetic from the
10 most westerly point of the west point of the Point Reyes headlands in Marin
11 County and a line extending 225° magnetic from Pillar Point at Half Moon Bay in
12 San Mateo County.

13 (2) Notwithstanding Sections 17000, 18060, 18095, and 18210, set or drift gill
14 or trammel nets shall not be used in ocean waters which are 60 fathoms or less in
15 depth at mean lower low water between a line extending 225° magnetic from
16 Pillar Point at Half Moon Bay in San Mateo County to a line extending 220°
17 magnetic from the mouth of Waddell Creek in Santa Cruz County.

18 (c) Subdivisions (a) and (b) do not apply to the use of drift gill nets operated
19 under a permit issued by the department in that part of Arcata Bay in Humboldt
20 County lying northeast of the Samoa Bridge during the period from April 1 to
21 September 30, inclusive. The department may issue not more than six permits
22 pursuant to this subdivision. Each permit shall specify the amount and type of gear
23 which may be used under the permit.

24 (d) Subdivisions (a) and (b) do not apply to the use of set gill nets used pursuant
25 to Chapter 2 (commencing with Section 40350) of Title 2 of Part 13 of Division
26 10 or regulations adopted pursuant to that chapter or to the use of drift gill nets
27 with a mesh size of 14 inches or more.

28 (e)(1) Notwithstanding subdivision (b) and Sections 18060, 18095, and 18210,
29 gill or trammel nets shall not be used within three nautical miles of the Farallon
30 Islands in San Francisco County, and within three nautical miles of Noonday Rock
31 buoy located approximately 3 1/2 miles 276° magnetic from North Farallon Island.

32 (2) If the director determines that the use of set or drift gill or trammel nets is
33 having an adverse impact on any population of any species of sea bird, marine
34 mammal, or fish, the director shall issue an order prohibiting the use of those nets
35 between three nautical miles and five nautical miles of the Farallon Islands and
36 Noonday Rock buoy or any portion of that area. The order shall take effect not
37 later than 48 hours after its issuance. The director shall hold a properly noticed
38 public hearing in a place convenient to the affected area within one week of the
39 effective date of the order to describe the action taken and shall take testimony as
40 to the effect of the order and determine whether any modification of the order is
41 necessary. Gill and trammel nets used to take fish in District 2590 shall be marked
42 at each end with a buoy displaying above its waterline in Arabic numerals at least
43 two inches high, the fisherman's identification number issued by the department

under Section 14550. Nets shall be marked at both ends and at least every 250 fathoms between the ends with flags of the same color and at least 144 square inches in size, acceptable to the department.

(f) The Legislature finds and declares that this section, which continues former Fish and Game Code Section 8664.8 as amended by Chapter 1633 of the Statutes of 1990, is more restrictive on the use and possession of gill nets and trammel nets than the version of former Fish and Game Code Section 8664.8 in effect on January 1, 1990, and therefore complies with former Section 8610.4, and Section 4 of Article X B of the California Constitution.

Comment. Section 17015 continues former Fish and Game Code Section 8664.8.

Section 17015 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8664.8 has been continued in this section without change, except to update cross-references to reflect renumbering required by the recodification of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

§ 17020. Ocean area south of Point Conception

17020. During the period from December 15 to May 15, inclusive, set gill nets and trammel nets with mesh eight inches or greater and less than 12 inches used in ocean waters 25 fathoms or less in depth between a line extending due west magnetic from Point Conception and the westerly extension of the boundary line between the Republic of Mexico and the United States shall be constructed with breakaway and anchoring features, as follows:

(a) The corkline and any other line which may extend across the top of the net shall have a combined breaking strength not to exceed 2,400 pounds.

(b) A breakaway device shall be used along the corkline (headrope) and along the leadline (footrope) at regular intervals of 45 fathoms or less.

(c) Each breakaway or disconnect device shall be constructed as described in either of the following:

(1) Of nylon twine, or an equivalent material, with a breaking strength of 200 pounds or less, using not more than eight complete circular (360) wraps of the twine to connect the ends of each corkline and leadline interval, which allows each breakaway or disconnect device a breaking strength of not more than 1,600 pounds.

(2) As the department may otherwise authorize.

(d) Anchors used to secure each end of the net to the ocean bottom shall weigh not less than 35 pounds each, and shall be attached to the net by a ground rope and bridle with combined length of not less than 15 fathoms from the anchor to the net.

Comment. Section 17020 continues former Fish and Game Code Section 8664.13.

Section 17020 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8664.13 has been continued in this section without change.

1 When enacting the bill that added this section, the Legislature did not evaluate the relationship
2 between this section and Article X B of the California Constitution. See Section 16800.

3 **§ 17025. Salton Sea and New and Alamo Rivers**

4 17025. The department may issue a revocable permit to take with set gill nets or
5 seines, mullet or carp in the waters of the Salton Sea and in those portions of the
6 New and Alamo Rivers upstream one mile from their mouths as marked by the
7 department, under commercial license, subject to such restrictions as the
8 commission deems advisable.

9 **Comment.** Section 17025 continues former Fish and Game Code Section 8666.

10 Section 17025 is governed by Section 16865, a section that codifies and implements Section 4
11 of Article X B of the California Constitution. See Section 16850.1.

12 To avoid any possible impairment of constitutional requirements, former Section 8666 has
13 been continued in this section without change.

14 When enacting the bill that added this section, the Legislature did not evaluate the relationship
15 between this section and Article X B of the California Constitution. See Section 16800.

16 **CHAPTER 4. GILL AND TRAMMEL NETS**

17 **Comment.** The provisions appearing in this chapter continue the provisions of former Article 5
18 (commencing with Section 8680) of Chapter 3 of Part 3 of Division 6 of the Fish and Game
19 Code, which are governed by Section 4(b) of Article X B of the California Constitution.

20 **§ 18000. Legislative declaration**

21 18000. (a) The Legislature finds and declares that it is in the best interest of the
22 people of the state, the commercial fishing industry, and California's marine
23 resources that fishermen who use gill nets or trammel nets be experienced in the
24 use of those nets.

25 (b) In accordance with Section 4 of Article X B of the California Constitution,
26 this section contains the provisions of former Fish and Game Code Section 8680
27 in effect on January 1, 1990.

28 **Comment.** Section 18000 continues former Fish and Game Code Section 8680.

29 Section 18000 is governed by Section 16865, a section that codifies and implements Section 4
30 of Article X B of the California Constitution. See Section 16850.1.

31 To avoid any possible impairment of constitutional requirements, former Section 8680 has
32 been continued in this section without change.

33 When enacting the bill that added this section, the Legislature did not evaluate the relationship
34 between this section and Article X B of the California Constitution. See Section 16800.

35 **§ 18005. Required permit**

36 18005. (a) Gill nets or trammel nets shall not be used for commercial purposes
37 except under a revocable, nontransferable permit issued by the department. Each
38 permittee shall keep an accurate record of his or her fishing operations in a
39 logbook furnished by the department. The commission may suspend, revoke, or
40 cancel a permit, license, and commercial fishing privileges pursuant to Section
41 4870. A permit may be revoked and canceled for a period not to exceed one year
42 from the date of revocation.

1 (b) In accordance with Section 4 of Article X B of the California Constitution,
2 this section contains the provisions of former Fish and Game Code Section 8681
3 in effect on January 1, 1989.

4 **Comment.** Section 18005 continues former Fish and Game Code Section 8681.

5 Section 18005 is governed by Section 16865, a section that codifies and implements Section 4
6 of Article X B of the California Constitution. See Section 16850.1.

7 To avoid any possible impairment of constitutional requirements, former Section 8681 has
8 been continued in this section without change, except to update a cross-reference to reflect
9 renumbering required by the recodification of this code.

10 When enacting the bill that added this section, the Legislature did not evaluate the relationship
11 between this section and Article X B of the California Constitution. See Section 16800.

12 **§ 18010. Grandfathered and transferred permits**

13 18010. (a) The department shall issue no new gill net or trammel net permits
14 under Section 18005. However, the department may renew an existing, valid
15 permit issued under Section 18005, under regulations adopted pursuant to Section
16 18020 and upon payment of the fee prescribed under Section 18025.

17 (b) Notwithstanding subdivision (a) or Section 18005, any person who has an
18 existing, valid permit issued pursuant to Section 18005, and presents to the
19 department satisfactory evidence that he or she has taken and landed fish for
20 commercial purposes in at least 15 of the preceding 20 years, may transfer that
21 permit to any person otherwise qualified under the regulations adopted pursuant to
22 Section 18020 upon payment of the fee prescribed under Section 18025.

23 (c) The fee collected by the department for the transfer of a gill and trammel net
24 permit issued pursuant to Section 18020 shall not exceed the cost of the permit fee
25 as prescribed under Section 18025.

26 (d) For purposes of subdivision (b), the death of the holder of the permit is a
27 disability which authorizes transfer of the permit by that person's estate to a
28 qualified fisherman pursuant to Section 18020. For purposes of a transfer under
29 this subdivision, the estate shall renew the permit, as specified in Section 18005, if
30 the permittee did not renew the permit before his or her death. The application for
31 transfer by that person's estate shall be received by the department, including the
32 name, address, and telephone number of the qualified fisherman to whom the
33 permit will be transferred, within one year of the date of death of the permitholder.
34 If no transfer is initiated within one year of the date of death of the permitholder,
35 the permit shall revert to the department for disposition pursuant to Section 18005.

36 (e) Any active participant who becomes disabled in such a manner that he or she
37 can no longer earn a livelihood from commercial fishing may transfer his or her
38 permit as provided under this section.

39 (f) The Legislature finds and declares that this section, which continues former
40 Section 8681.5 as amended by Chapter 94 of the Statutes of 1992, is more
41 restrictive on the use and possession of gill nets and trammel nets than the version
42 of former Section 8681.5 in effect on January 1, 1989, and therefore complies with
43 former Section 8610.4, and Section 4 of Article X B of the California Constitution.

1 **Comment.** Section 18010 continues former Fish and Game Code Section 8681.5.

2 Section 18010 is governed by Section 16865, a section that codifies and implements Section 4
3 of Article X B of the California Constitution. See Section 16850.1.

4 To avoid any possible impairment of constitutional requirements, former Section 8681.5 has
5 been continued in this section without change, except to update cross-references to reflect
6 renumbering required by the recodification of this code.

7 When enacting the bill that added this section, the Legislature did not evaluate the relationship
8 between this section and Article X B of the California Constitution. See Section 16800.

9 **§ 18015. Appeal of permit denial**

10 18015. (a) Notwithstanding Section 18010, any person who possessed a valid
11 permit issued pursuant to Section 18005 and who was denied renewal of that
12 permit may appeal to the commission where evidence can be presented that illness
13 or the loss of a vessel resulted in the person not meeting the qualifications for
14 renewal or reissuance of that permit.

15 (b) The appeal shall be filed with the commission within 60 days of a denial of
16 the renewal of a permit.

17 (c) If the commission determines that a permit is to be issued to a prior permittee
18 under this section, a permit shall be made available to that person upon payment of
19 required fees.

20 (d) In accordance with Section 4 of Article X B of the California Constitution,
21 this section contains the provisions of former Fish and Game Code Section 8681.7
22 in effect on January 1, 1989.

23 **Comment.** Section 18015 continues former Fish and Game Code Section 8681.7.

24 Section 18015 is governed by Section 16865, a section that codifies and implements Section 4
25 of Article X B of the California Constitution. See Section 16850.1.

26 To avoid any possible impairment of constitutional requirements, former Section 8681.7 has
27 been continued in this section without change, except to update cross-references to reflect
28 renumbering required by the recodification of this code.

29 When enacting the bill that added this section, the Legislature did not evaluate the relationship
30 between this section and Article X B of the California Constitution. See Section 16800.

31 **§ 18020. Regulations**

32 18020. (a) The commission shall establish regulations for the issuance of gill net
33 and trammel net permits as necessary to establish an orderly gill net and trammel
34 net fishery. In promulgating regulations, the commission shall consider
35 recommendations of the gill net and trammel net advisory committee created
36 pursuant to subdivision (b). The regulations shall include, but are not limited to, a
37 requirement that persons being granted a permit have had previous experience as a
38 crewmember of a vessel using gill nets or trammel nets or have successfully
39 passed a proficiency test administered by the department, under such regulations
40 as the commission shall prescribe.

41 (b) The director shall establish an advisory committee, consisting of fishermen
42 experienced in the use of gill nets and trammel nets, to advise the department in
43 developing regulations to be proposed to the commission governing the use of gill
44 nets and trammel nets.

(c) In accordance with Section 4 of Article X B of the California Constitution, this section contains the provisions of former Fish and Game Code Section 8682 in effect on January 1, 1989.

Comment. Section 18020 continues former Fish and Game Code Section 8682.

Section 18020 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8682 has been continued in this section without change.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

§ 18025. Permit fee

18025. (a) The fee for a permit issued pursuant to Section 18005 is three hundred thirty dollars (\$330).

Comment. Section 18025 continues former Fish and Game Code Section 8683.

Section 18025 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8683 has been continued in this section without change, except to update a cross-reference to reflect renumbering required by the recodification of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

§ 18030. Incidental catch of swordfish or marlin

18030. No incidental catch of swordfish or marlin is authorized by this chapter. Any swordfish or marlin caught incidentally by a gill or trammel net permittee operating under a permit issued pursuant to Section 18005 shall be delivered to the department.

A permit issued pursuant to Section 18005 shall be revoked for conviction of a violation of this section.

Comment. Section 18030 continues former Fish and Game Code Section 8684.

Section 18030 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8684 has been continued in this section without change, except to update cross-references to reflect renumbering required by the recodification of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

§ 18035. Districts 2505, 2525, and 2540

18035. In Districts 2505, 2525, and 2540, gill nets and trammel nets may not be possessed on any boat.

Comment. Section 18035 continues former Fish and Game Code Section 8685.

Section 18035 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8685 has been continued in this section without change, except to update cross-references to reflect renumbering required by the recodification of this code.

1 When enacting the bill that added this section, the Legislature did not evaluate the relationship
2 between this section and Article X B of the California Constitution. See Section 16800.

3 **§ 18040. Take of salmon, steelhead, or striped bass**

4 18040. Notwithstanding any other provision of law, gill nets may not be used to
5 take salmon, steelhead, or striped bass.

6 **Comment.** Section 18040 continues former Fish and Game Code Section 8685.5.

7 Section 18040 is governed by Section 16865, a section that codifies and implements Section 4
8 of Article X B of the California Constitution. See Section 16850.1.

9 To avoid any possible impairment of constitutional requirements, former Section 8685.5 has
10 been continued in this section without change.

11 When enacting the bill that added this section, the Legislature did not evaluate the relationship
12 between this section and Article X B of the California Constitution. See Section 16800.

13 See also Sections 4460, 4492 (enforcement).

14 **§ 18045. Sale or possession for sale of salmon, steelhead, or striped bass**

15 18045. It is unlawful to sell or possess for sale any salmon, steelhead, or striped
16 bass which were taken in California waters by the use of a gill net.

17 **Comment.** Section 18045 continues former Fish and Game Code Section 8685.6.

18 Section 18045 is governed by Section 16865, a section that codifies and implements Section 4
19 of Article X B of the California Constitution. See Section 16850.1.

20 To avoid any possible impairment of constitutional requirements, former Section 8685.6 has
21 been continued in this section without change.

22 When enacting the bill that added this section, the Legislature did not evaluate the relationship
23 between this section and Article X B of the California Constitution. See Section 16800.

24 See also Sections 4460, 4492 (enforcement).

25 **§ 18050. Purchase of salmon, steelhead, or striped bass**

26 18050. It is unlawful for any person to knowingly purchase any salmon,
27 steelhead, or striped bass which were taken in California waters by the use of a gill
28 net.

29 For the purpose of this section, “person” includes a broker who purchases
30 salmon, steelhead, or striped bass which were unlawfully taken by gill net for the
31 purpose of reselling those fish.

32 **Comment.** Section 18050 continues former Fish and Game Code Section 8685.7.

33 Section 18050 is governed by Section 16865, a section that codifies and implements Section 4
34 of Article X B of the California Constitution. See Section 16850.1.

35 To avoid any possible impairment of constitutional requirements, former Section 8685.7 has
36 been continued in this section without change.

37 When enacting the bill that added this section, the Legislature did not evaluate the relationship
38 between this section and Article X B of the California Constitution. See Section 16800.

39 See also Sections 4460, 4492 (enforcement).

40 **§ 18055. Districts 2515, 2535, and 2675**

41 18055. In Districts 2515, 2535, and 2675, it is unlawful to possess any gill or
42 trammel net with meshes over 1 3/4 inches in length, except under regulations
43 which may be prescribed by the commission.

1 **Comment.** Section 18055 continues former Fish and Game Code Section 8686.

2 Section 18055 is governed by Section 16865, a section that codifies and implements Section 4
3 of Article X B of the California Constitution. See Section 16850.1.

4 To avoid any possible impairment of constitutional requirements, former Section 8686 has
5 been continued in this section without change, except to update cross-references to reflect
6 renumbering required by the recodification of this code.

7 When enacting the bill that added this section, the Legislature did not evaluate the relationship
8 between this section and Article X B of the California Constitution. See Section 16800.

9 **§ 18060. Districts 2570, 2575, 2580, 2585, and 2590**

10 18060. Except as otherwise provided in this code, drift gill nets may be used in
11 Districts 2570, 2575, 2580, 2585, and 2590.

12 **Comment.** Section 18060 continues former Fish and Game Code Section 8687.

13 Section 18060 is governed by Section 16865, a section that codifies and implements Section 4
14 of Article X B of the California Constitution. See Section 16850.1.

15 To avoid any possible impairment of constitutional requirements, former Section 8687 has
16 been continued in this section without change, except to update cross-references to reflect
17 renumbering required by the recodification of this code.

18 When enacting the bill that added this section, the Legislature did not evaluate the relationship
19 between this section and Article X B of the California Constitution. See Section 16800.

20 **§ 18065. Districts 2595, 2600, and 2605**

21 18065. In Districts 2595, 2600, and 2605, gill nets may be used to take only
22 herring, subject to Chapter 2 (commencing with Section 40350) of Title 2 of Part
23 13 of Division 10. No gill net may be possessed on any boat in Districts 2595,
24 2600, and 2605, except by persons possessing a valid permit aboard boats
25 specifically authorized to take herring during the open seasons established by the
26 commission.

27 **Comment.** Section 18065 continues former Fish and Game Code Section 8688.

28 Section 18065 is governed by Section 16865, a section that codifies and implements Section 4
29 of Article X B of the California Constitution. See Section 16850.1.

30 To avoid any possible impairment of constitutional requirements, former Section 8688 has
31 been continued in this section without change, except to update cross-references to reflect
32 renumbering required by the recodification of this code.

33 When enacting the bill that added this section, the Legislature did not evaluate the relationship
34 between this section and Article X B of the California Constitution. See Section 16800.

35 See also Sections 4460, 4492 (enforcement).

36 **§ 18070. Point Reyes ocean area**

37 18070. Set gill nets and trammel nets with mesh smaller than 4 1/8 inches shall
38 not be used or possessed on any boat taking rockfish or lingcod in ocean waters
39 between a line extending 245° magnetic from the most westerly point of the Point
40 Reyes headlands and a line extending 250° magnetic from the Pigeon Point
41 Lighthouse.

42 **Comment.** Section 18070 continues former Fish and Game Code Section 8691.

43 Section 18070 is governed by Section 16865, a section that codifies and implements Section 4
44 of Article X B of the California Constitution. See Section 16850.1.

1 To avoid any possible impairment of constitutional requirements, former Section 8691 has
2 been continued in this section without change.

3 When enacting the bill that added this section, the Legislature did not evaluate the relationship
4 between this section and Article X B of the California Constitution. See Section 16800.

5 **§ 18075. Monterey County ocean area**

6 18075. Notwithstanding Section 18085, it is unlawful to use gill nets to take
7 rockfish or lingcod in the following waters:

8 (a) Between a line running 240° magnetic from Santa Cruz Point and a line
9 running 240° magnetic from Point Sur lighthouse in Monterey County in waters
10 100 fathoms or less in depth.

11 (b) Between a line running 240° magnetic from Point Sur lighthouse and a line
12 running 240° magnetic from Pfeiffer Point in Monterey County in waters 75
13 fathoms or less in depth.

14 **Comment.** Section 18075 continues former Fish and Game Code Section 8692.

15 Section 18075 is governed by Section 16865, a section that codifies and implements Section 4
16 of Article X B of the California Constitution. See Section 16850.1.

17 To avoid any possible impairment of constitutional requirements, former Section 8692 has
18 been continued in this section without change, except to update a cross-reference to reflect
19 renumbering required by the recodification of this code.

20 When enacting the bill that added this section, the Legislature did not evaluate the relationship
21 between this section and Article X B of the California Constitution. See Section 16800.

22 **§ 18080. Permissible net length**

23 18080. (a) Not more than 1,250 fathoms (7,500 feet) of gill net or trammel net
24 shall be fished in combination each day from any vessel for lingcod in ocean
25 waters.

26 (b) The Legislature finds and declares that this section, which continues former
27 Fish and Game Code Section 8692.5 as amended at the 1991–92 Regular Session
28 of the Legislature, is more restrictive on the use and possession of gill nets and
29 trammel nets than the provisions in effect on January 1, 1990, and therefore
30 complies with former Section 8610.4, and Section 4 of Article X B of the
31 California Constitution.

32 **Comment.** Section 18080 continues former Fish and Game Code Section 8692.5.

33 Section 18080 is governed by Section 16865, a section that codifies and implements Section 4
34 of Article X B of the California Constitution. See Section 16850.1.

35 To avoid any possible impairment of constitutional requirements, former Section 8692.5 has
36 been continued in this section without change, except to update a cross-reference to reflect
37 renumbering required by the recodification of this code.

38 When enacting the bill that added this section, the Legislature did not evaluate the relationship
39 between this section and Article X B of the California Constitution. See Section 16800.

40 **§ 18085. Districts 2615, 2620, 2625, and 2645**

41 18085. (a) Except as otherwise provided in this code, drift gill nets and set gill
42 nets may be used in Districts 2615, 2620, 2625, and 2645, except for the taking of
43 salmon.

(b) Rockfish and lingcod may be taken with drift gill nets and set gill nets in Districts 2615, 2620, 2625, and 2645, subject to the following restrictions:

(1) Rockfish and lingcod shall not be taken between a line running due west magnetic from the lighthouse at Point Piedras Blancas and a line running due west magnetic from Point Sal in water less than 40 fathoms.

(2) Rockfish and lingcod shall not be taken between a line running 250° magnetic from the Pigeon Point Lighthouse and a line running 240° magnetic from Point Santa Cruz, inside 40 fathoms, by means of drift gill nets or set gill nets which have mesh smaller than 5 1/2 inches.

(3) Drift gill nets and set gill nets shall not be used nor shall they be possessed on any boat taking rockfish and lingcod with mesh smaller than 4 1/8 inches when used in Districts 2615 and 2620 north of Point Buchon, or with mesh smaller than 4 1/8 inches when used in District 2620 south of Point Buchon or in District 2625. Drift gill nets and set gill nets used or possessed on any boat taking rockfish and lingcod in District 2615, 2620, or 2625, shall not be constructed of twine larger than number 6 nylon, except that the bottom 15 meshes may be constructed of heavier twine.

(4) In District 2620 south of Point Sal and in District 2625, drift gill nets and set gill nets shall not be used to take rockfish and lingcod with the mesh of the net in waters less than 70 fathoms in depth, except that those nets shall not be used in waters less than 100 fathoms in depth at the Sixty Mile Bank.

(5) Loads or lots of fish taken in the areas described in paragraphs 1 to 4, inclusive, may contain 200 pounds or less of rockfish and lingcod in combination, but in no instance more than 100 pounds of rockfish.

(6) Gill nets shall not be used to take rockfish in District 2645.

Comment. Section 18085 continues former Fish and Game Code Section 8693.

Section 18085 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8693 has been continued in this section without change, except to update cross-references to reflect renumbering required by the recodification of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

§ 18090. District 2630

18090. In District 2630, gill nets may not be used, nor may they be possessed on any boat.

Comment. Section 18090 continues former Fish and Game Code Section 8694.

Section 18090 is governed by Section 16865, a section that codifies and implements Section 4 of Article X B of the California Constitution. See Section 16850.1.

To avoid any possible impairment of constitutional requirements, former Section 8694 has been continued in this section without change, except to update a cross-reference to reflect renumbering required by the recodification of this code.

When enacting the bill that added this section, the Legislature did not evaluate the relationship between this section and Article X B of the California Constitution. See Section 16800.

1 **§ 18095. South of Point Reyes headlands**

2 18095. Except as otherwise provided, set gill nets may be used south of a line
3 extending 245° magnetic from the western point of the Point Reyes headlands in
4 Marin County except for the taking of salmon.

5 **Comment.** Section 18095 continues former Fish and Game Code Section 8696.

6 Section 18095 is governed by Section 16865, a section that codifies and implements Section 4
7 of Article X B of the California Constitution. See Section 16850.1.

8 To avoid any possible impairment of constitutional requirements, former Section 8696 has
9 been continued in this section without change.

10 When enacting the bill that added this section, the Legislature did not evaluate the relationship
11 between this section and Article X B of the California Constitution. See Section 16800.

12 **§ 18100. Conversion of gill net to trammel net**

13 18100. Any line used on a gill net which shall tend to cause the webbing of such
14 gill net to bag or hang slack shall cause such net to lose its identity as a gill net and
15 become a trammel net.

16 **Comment.** Section 18100 continues former Fish and Game Code Section 8700.

17 Section 18100 is governed by Section 16865, a section that codifies and implements Section 4
18 of Article X B of the California Constitution. See Section 16850.1.

19 To avoid any possible impairment of constitutional requirements, former Section 8700 has
20 been continued in this section without change.

21 When enacting the bill that added this section, the Legislature did not evaluate the relationship
22 between this section and Article X B of the California Constitution. See Section 16800.

23 **CHAPTER 5. TRAMMEL NETS**

24 **Comment.** The provisions appearing in this chapter continue the provisions of former Article 6
25 (commencing with Section 8720) of Chapter 3 of Part 3 of Division 6 of the Fish and Game
26 Code, which are governed by Section 4(b) of Article X B of the California Constitution.

27 **§ 18200. “Trammel net”**

28 18200. “Trammel net” includes entangling nets constructed of more than one
29 wall of webbing.

30 **Comment.** Section 18200 continues former Fish and Game Code Section 8720.

31 Section 18200 is governed by Section 16865, a section that codifies and implements Section 4
32 of Article X B of the California Constitution. See Section 16850.1.

33 To avoid any possible impairment of constitutional requirements, former Section 8720 has
34 been continued in this section without change.

35 When enacting the bill that added this section, the Legislature did not evaluate the relationship
36 between this section and Article X B of the California Constitution. See Section 16800.

37 **§ 18205. Districts 2505, 2525, and 2540**

38 18205. In Districts 2505, 2525, and 2540, trammel nets may not be possessed on
39 any boat.

40 **Comment.** Section 18205 continues former Fish and Game Code Section 8721.

41 Section 18205 is governed by Section 16865, a section that codifies and implements Section 4
42 of Article X B of the California Constitution. See Section 16850.1.

1 To avoid any possible impairment of constitutional requirements, former Section 8721 has
2 been continued in this section without change, except to update cross-references to reflect
3 renumbering required by the recodification of this code.

4 When enacting the bill that added this section, the Legislature did not evaluate the relationship
5 between this section and Article X B of the California Constitution. See Section 16800.

6 **§ 18210. Districts 2590, 2615, 2620, and 2625**

7 18210. (a) Except as otherwise provided, in Districts 2590, 2615, 2620, and
8 2625, drift and set trammel nets may be used if the meshes are at least 81/2 inches
9 in length, except that these nets may not be used in District 2620 within 750 feet
10 of any pier or jetty, nor may they be used for the taking of salmon.

11 (b) This section shall become operative on August 15, 1989.

12 **Comment.** Section 18210 continues former Fish and Game Code Section 8724.

13 Section 18210 is governed by Section 16865, a section that codifies and implements Section 4
14 of Article X B of the California Constitution. See Section 16850.1.

15 To avoid any possible impairment of constitutional requirements, former Section 8724 has
16 been continued in this section without change, except to update cross-references to reflect
17 renumbering required by the recodification of this code.

18 When enacting the bill that added this section, the Legislature did not evaluate the relationship
19 between this section and Article X B of the California Constitution. See Section 16800.

20 **§ 18215. District 2630**

21 18215. In District 2630, trammel nets may not be used, nor may they be
22 possessed on any boat.

23 **Comment.** Section 18215 continues former Fish and Game Code Section 8725.

24 Section 18215 is governed by Section 16865, a section that codifies and implements Section 4
25 of Article X B of the California Constitution. See Section 16850.1.

26 To avoid any possible impairment of constitutional requirements, former Section 8725 has
27 been continued in this section without change, except to update a cross-reference to reflect
28 renumbering required by the recodification of this code.

29 When enacting the bill that added this section, the Legislature did not evaluate the relationship
30 between this section and Article X B of the California Constitution. See Section 16800.

31 **CHAPTER 6. TAKE OF SHARK AND SWORDFISH**

32 **§ 18300. Required permit**

33 18300. (a) Notwithstanding subdivision (a) of Section 43655, shark and
34 swordfish shall not be taken for commercial purposes with drift gill nets except
35 under a valid drift gill net shark and swordfish permit issued to that person that has
36 not been suspended or revoked and is issued to at least one person aboard the boat.

37 (b) A drift gill net shark and swordfish permit shall not be required for the
38 taking of sharks with drift gill nets with a mesh size smaller than eight inches in
39 stretched mesh and twine size no. 18 or the equivalent of this twine size or
40 smaller.

41 (c) Notwithstanding Section 22505 or any other law, a permit issued pursuant to
42 this section shall be surrendered or revoked as of January 31 of the fourth year

following the department's notification to the Legislature pursuant to paragraph (2) of subdivision (b) of Section 18400.

Comment. Section 18300 continues former Fish and Game Code Section 8561 without substantive change.

See also Sections 5104 (enforcement), 5700 (marlin).

Note. Proposed Section 18300 would continue Section 8561, which was amended by 2018 Cal. Stat. ch. 844. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 18305. Transfer of permit (operative until March 31, 2019)

18305. (a) Notwithstanding Section 22505, a permit issued pursuant to Section 18300 may be transferred by the permittee only if one of the following conditions is met:

(1) The permittee has held the permit for three or more years.

(2) The permittee is permanently injured or suffers a serious illness that will result in a hardship, as determined in a written finding by the director, to the permittee or his or her family if the permit may not otherwise be transferred or upon dissolution of a marriage where the permit is held to be community property.

(3) The permittee has died and his or her surviving spouse, heirs, or estate seeks to transfer the permit within six months of the death of the permittee or, with the written approval of the director, within the length of time that it may reasonably take to effect the transfer.

(b) A permit may be transferred only to a person who holds a valid general gill net permit issued to that person pursuant to Section 18005 that has not been suspended or revoked.

(c) The transfer of a permit shall only become effective upon notice from the department. An application for transfer shall be submitted to the department with such reasonable proof as the department may require to establish the qualification of the person the permit is to be transferred to, the payment to the department of a transfer fee of one thousand five hundred dollars (\$1,500), and a written disclosure, filed under penalty of perjury, of the terms of the transfer.

(d) Any restrictions on participation that were required in a permit transferred pursuant to Section 22505 before January 1, 1990, are of no further force or effect.

(e) This section shall become inoperative on March 31, 2019, and, as of January 1, 2020, is repealed.

Comment. Section 18305 continues former Fish and Game Code Section 8561.5, as amended by 2018 Cal. Stat. ch. 844, § 4, without substantive change.

Note. Proposed Section 18305 would continue Section 8561.5, which was amended by 2018 Cal. Stat. ch. 844, § 4. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

1 **§ 18305. Transfer of permit (operative on March 31, 2019)**

2 18305. (a) Notwithstanding Section 22505 or any other law, a permit issued
3 pursuant to Section 18300 may not be transferred.

4 (b) This section shall become operative on March 31, 2019.

5 **Comment.** Section 18305 continues former Fish and Game Code Section 8561.5, as added by
6 2018 Cal. Stat. ch. 844, § 5, without substantive change.

7  **Note.** Proposed Section 18305 would continue Section 8561.5, which was added by 2018
8 Cal. Stat. ch. 844, § 5. Although that bill will not take effect until 2019, it is included here in
9 anticipation of its effect.

10 **§ 18310. Application**

11 18310. Applications delivered to a department office after April 30, or if mailed,
12 postmarked after April 30, shall not be accepted unless approved by the
13 commission pursuant to Section 18340.

14 **Comment.** Section 18310 continues former Fish and Game Code Section 8562 without
15 substantive change.

16 **§ 18315. Possession and use of permit**

17 18315. (a) Except as provided in subdivision (b), the permittee shall be aboard
18 the vessel and shall be in possession of a valid drift gill net shark and swordfish
19 permit when engaged in operations authorized by the permit.

20 (b) A permittee may have any person serve in his or her place on the permittee's
21 vessel and engage in fishing under his or her drift gill net shark and swordfish
22 permit for not more than 15 calendar days in any one year, except that a longer
23 period may be allowed in the event of serious illness. A permittee shall notify the
24 department's Long Beach office of a substitution of 15 days or less per calendar
25 year, by certified letter or telegram at least 24 hours prior to the commencement of
26 the trip. Written authorization for a substitution of greater than 15 days shall be
27 obtained from the director and shall be given only on the director's finding that the
28 permittee will not be available to engage in the activity due to serious illness,
29 supported by medical evidence. An application for a substitution of greater than 15
30 days shall be made to the Department of Fish and Game, Headquarters Office,
31 Sacramento, and shall contain such information as the director may require. Any
32 denial of the substitution may be appealed to the commission.

33 **Comment.** Section 18315 continues former Fish and Game Code Section 8563 without
34 substantive change.

35 **§ 18320. Specification of vessel**

36 18320. When the permittee applies for a drift gill net shark and swordfish
37 permit, the permittee shall specify the vessel he or she will use in operations
38 authorized by the permit. Transfer to another vessel shall be authorized by the
39 department upon receipt of a written request from the permittee, accompanied by a
40 transfer fee of one hundred thirty dollars (\$130), as follows:

1 (a) One transfer requested between February 1 and April 30 shall be made by the
2 department upon request and payment of the fee.

3 (b) Any transfer, except as provided in subdivision (a), shall be authorized by
4 the department only after receipt of proof of a compelling reason, which shall be
5 submitted with the request for transfer, such as the sinking of the vessel specified
6 for use in operations authorized by the permit.

7 **Comment.** Section 18320 continues former Fish and Game Code Section 8564 without
8 substantive change.

9 **§ 18325. Fee**

10 18325. The fee for a drift gill net shark and swordfish permit shall be three
11 hundred thirty dollars (\$330).

12 **Comment.** Section 18325 continues former Fish and Game Code Section 8567 without
13 substantive change.

14 **§ 18330. Eligibility for permit**

15 18330. Drift gill net shark and swordfish permits shall be issued to any prior
16 permittee who possesses a valid drift gill net shark and swordfish permit issued
17 pursuant to this section, but only if the permittee meets both of the following
18 requirements:

19 (a) Possesses a valid permit for the use of gill nets authorized pursuant to
20 Section 18005.

21 (b) Possessed a valid drift gill net shark and swordfish permit during the
22 preceding season and that permit was not subsequently revoked.

23 **Comment.** Section 18330 continues former Fish and Game Code Section 8568 without
24 substantive change.

25 **§ 18335. Minimum landing requirement**

26 18335. Any person holding a valid drift gill net shark and swordfish permit on
27 or after January 1, 2000, who did not make, on or after January 1, 2000, the
28 minimum landings required under subdivision (c) of Section 18330, is eligible for
29 that permit when that person meets all other qualifications for the permit.

30 **Comment.** Section 18335 continues former Fish and Game Code Section 8568.5 without
31 substantive change.

32 **§ 18340. Conditions for late application**

33 18340. The commission may establish conditions for the issuance of a permit if
34 the person's drift gill net shark and swordfish permit was revoked during a
35 preceding season or if the person possessed a valid permit during the preceding
36 season but did not apply for renewal of his or her permit on or before April 30.
37 The applicant for a permit under this section may appeal to the director for the
38 issuance of the permit under those conditions.

39 **Comment.** Section 18340 continues former Fish and Game Code Section 8569 without
40 substantive change.

1 **§ 18345. Allowed locations and conditions for use of net**

2 18345. Drift gill nets may be used to take shark and swordfish under the permit
3 provided in this chapter, subject to Section 16860 and all of the following
4 restrictions:

5 (a) From June 1 to November 15, inclusive, shark or swordfish gill nets shall not
6 be in the water from two hours after sunrise to two hours before sunset east of a
7 line described as follows:

8 From a point beginning at Las Pitas Point to San Pedro Point on Santa Cruz
9 Island, thence to Gull Island Light, thence to the northeast extremity of San
10 Nicolas Island, thence along the high water mark on the west side of San Nicolas
11 Island to the southeast extremity of San Nicolas Island, thence to the northwest
12 extremity of San Clemente Island, thence along the high water mark on the west
13 side of San Clemente Island to the southeast extremity of San Clemente Island,
14 thence along a line running 150° true from the southeast extremity of San
15 Clemente Island to the westerly extension of the boundary line between the
16 Republic of Mexico and San Diego County.

17 (b)(1) The total maximum length of a shark or swordfish gill net on the net reel
18 on a vessel, on the deck of the vessel, and in the water at any time shall not exceed
19 6,000 feet in float line length. The float line length shall be determined by
20 measuring the float line, as tied, of all the net panels, combined with any other
21 netted lines. The existence of holes, tears, or gaps in the net shall have no bearing
22 on the measurement of the float line. The float line of any net panels with holes,
23 tears, or gaps shall be included in the total float line measurement.

24 (2) Any shark or swordfish gill net on the reel shall have the float lines of the
25 adjacent panels tied together, the lead lines of the adjacent panels tied together,
26 and the web of the adjacent panels laced together. No quick disconnect device may
27 be used unless the total maximum length of all shark and swordfish gill nets,
28 including all spare gill nets or net panels on the vessel and all gill nets or net
29 panels on the net reels on the vessel, on the deck of the vessel, stored aboard the
30 vessel, and in the water, does not exceed 6,000 feet in float line length as
31 determined under paragraph (1).

32 (3) Spare shark or swordfish gill net aboard the vessel shall not exceed 250
33 fathoms (1,500 feet) in total length, and the spare net shall be in separated panels
34 not to exceed 100 fathoms (600 feet) in float line length for each panel, with the
35 float lines and leadlines attached to each panel separately gathered and tied, and
36 the spare net panels stowed in lockers, wells, or other storage space.

37 (4) If a torn panel is replaced in a working shark or swordfish gill net, the torn
38 panel shall be removed from the working net before the replacement panel is
39 attached to the working net.

40 (c) Any end of a shark or swordfish gill net not attached to the permittee's vessel
41 shall be marked by a pole with a radar reflector. The reflector shall be at least six
42 feet above the surface of the ocean and not less than 10 inches in any dimension
43 except thickness. The permittee's permit number shall be permanently affixed to at

1 least one buoy or float that is attached to the radar reflector staff. The permit
2 number shall be at least one and one-half inches in height and all markings shall
3 be at least one-quarter inch in width.

4 (d) For the purposes of this chapter, “shark or swordfish gill net” means a drift
5 gill net of 14-inch or greater mesh size.

6 **Comment.** Section 18345 continues former Fish and Game Code Section 8573 without
7 substantive change.

8 **§ 18350. Mesh size**

9 18350. (a) Drift gill nets with mesh size less than 14 inches in stretched mesh
10 shall not be used to take shark and swordfish by permittees operating under a drift
11 gill net shark and swordfish permit, and the permittee shall not have aboard the
12 vessel or in the water a drift gill net with mesh size less than 14 inches and more
13 than 8 inches in stretched mesh.

14 (b) No permittee shall deploy a drift gill net of less than 14-inch mesh size at the
15 time that the permittee has a shark or swordfish gill net deployed.

16 **Comment.** Section 18350 continues former Fish and Game Code Section 8574 without
17 substantive change.

18 **§ 18355. Seasonal prohibitions**

19 18355. Drift gill nets used to take shark and swordfish under the permit provided
20 in this chapter shall not be used under the following circumstances:

21 (a) From May 1 through July 31, within six nautical miles westerly, northerly,
22 and easterly of the shoreline of San Miguel Island between a line extending six
23 nautical miles west magnetically from Point Bennett and a line extending six
24 nautical miles east magnetically from Cardwell Point and within six nautical miles
25 westerly, northerly, and easterly of the shoreline of Santa Rosa Island between a
26 line extending six nautical miles west magnetically from Sandy Point and a line
27 extending six nautical miles east magnetically from Skunk Point.

28 (b) From May 1 through July 31, within 10 nautical miles westerly, southerly,
29 and easterly of the shoreline of San Miguel Island between a line extending 10
30 nautical miles west magnetically from Point Bennett and a line extending 10
31 nautical miles east magnetically from Cardwell Point and within 10 nautical miles
32 westerly, southerly, and easterly of the shoreline of Santa Rosa Island between a
33 line extending 10 nautical miles west magnetically from Sandy Point and a line
34 extending 10 nautical miles east magnetically from Skunk Point.

35 (c) From May 1 through July 31, within a radius of 10 nautical miles of the west
36 end of San Nicolas Island.

37 (d) From August 15 through September 30, in ocean waters bounded as follows:
38 beginning at Dana Point, Orange County, in a direct line to Church Rock, Catalina
39 Island; thence in a direct line to Point La Jolla, San Diego County; and thence
40 northwesterly along the mainland shore to Dana Point.

1 (e) From August 15 through September 30, in ocean waters within six nautical
2 miles of the coastline on the northerly and easterly side of San Clemente Island,
3 lying between a line extending six nautical miles west magnetically from the
4 extreme northerly end of San Clemente Island to a line extending six nautical
5 miles east magnetically from Pyramid Head.

6 (f) From December 15 through January 31, in ocean waters within 25 nautical
7 miles of the mainland coastline.

8 **Comment.** Section 18355 continues former Fish and Game Code Section 8575 without
9 substantive change.

10 **§ 18360. Prohibited areas**

11 18360. Drift gill nets used to take shark and swordfish under the permit provided
12 in this chapter shall not be used in the following areas:

13 (a) Within 12 nautical miles from the nearest point on the mainland shore north
14 of a line extending due west from Point Arguello.

15 (b) East of a line running from Point Reyes to Noonday Rock to the westernmost
16 point of Southeast Farallon Island to Pillar Point.

17 **Comment.** Section 18360 continues former Fish and Game Code Section 8575.5 without
18 substantive change.

19 **§ 18365. Additional prohibitions**

20 18365. (a) Drift gill nets shall not be used to take shark or swordfish from
21 February 1 to April 30, inclusive.

22 (b) Drift gill nets shall not be used to take shark or swordfish in ocean waters
23 within 75 nautical miles from the mainland coastline between the westerly
24 extension of the California-Oregon boundary line and the westerly extension of
25 the United States-Republic of Mexico boundary line from May 1 to August 14,
26 inclusive.

27 (c) Subdivisions (a) and (b) apply to any drift gill net used pursuant to a permit
28 issued under Section 18005 or 18300, except that drift gill nets with a mesh size
29 smaller than eight inches in stretched mesh and twine size number 18, or the
30 equivalent of this twine size, or smaller, used pursuant to a permit issued under
31 Section 18005, may be used to take species of sharks other than thresher shark,
32 shortfin mako shark, and white shark during the periods specified in subdivisions
33 (a) and (b). However, during the periods of time specified in subdivisions (a) and
34 (b), not more than two thresher sharks and two shortfin mako sharks may be
35 possessed and sold if taken incidentally in drift gill nets while fishing for
36 barracuda or white seabass and if at least 10 barracuda or five white seabass are
37 possessed and landed at the same time as the incidentally taken thresher or shortfin
38 mako shark. No thresher shark or shortfin mako shark taken pursuant to this
39 subdivision shall be transferred to another vessel before landing the fish. Any
40 vessel possessing thresher or shortfin mako sharks pursuant to this section shall
41 not have any gill or trammel net aboard that is constructed with a mesh size

1 greater than eight inches in stretched mesh and twine size greater than number 18,
2 or the equivalent of a twine size greater than number 18.

3 (d) Notwithstanding the closure from May 1 to August 14, inclusive, provided
4 by subdivision (b), a permittee may land swordfish or thresher shark taken in
5 ocean waters more than 75 nautical miles from the mainland coastline in that
6 period if, for each landing during that closed period, the permittee signs a written
7 declaration under penalty of perjury that the fish landed were taken more than 75
8 nautical miles from the mainland coastline. The declaration shall be completed and
9 signed before arrival at any port in this state. Within 72 hours of the time of
10 arrival, the permittee shall deliver the declaration to the department.

11 (e) From August 15 of the year of issue to January 31, inclusive, of the
12 following year, swordfish may be taken under a permit issued pursuant to this
13 chapter.

14 **Comment.** Section 18365 continues former Fish and Game Code Section 8576(a)-(d), (f)
15 without substantive change.

16 See also Section 4964 (enforcement).

17 **§ 18370. Take of thresher shark**

18 18370. Thresher shark taken with drift gill nets shall not have the pelvic fin
19 severed from the carcass until after the shark is brought ashore.

20 **Comment.** Section 18370 continues former Fish and Game Code Section 8576.5 without
21 substantive change.

22 **§ 18375. Closure of fishery by director**

23 18375. Notwithstanding subdivision (a) of Section 43655, the director may close
24 the drift gill net shark and swordfish fishery, the swordfish harpoon fishery, or any
25 area where either or both fisheries are conducted, if, after a public hearing, the
26 director determines the action is necessary to protect the swordfish or thresher
27 shark and bonito (mako) shark resources.

28 The director shall reopen a fishery or any fishing areas previously closed
29 pursuant to this section if the director determines that the conditions which
30 necessitated the closure no longer exist.

31 **Comment.** Section 18375 continues former Fish and Game Code Section 8577 without
32 substantive change.

33 **§ 18380. Surrender of permit**

34 18380. (a) A permittee shall be subject to the provisions of this chapter
35 whenever the permittee is using a drift gill net, unless the permittee has
36 surrendered his or her permit to the department.

37 (b) A permittee may surrender his or her permit by notifying the department of
38 his or her intentions by submitting a notarized form provided by the department
39 and by sending or delivering his or her permit to a department office as prescribed
40 on the form.

1 **Comment.** Section 18380 continues former Fish and Game Code Section 8579 without
2 substantive change.

3 **Note.** Proposed Section 18380 would continue Section 8579, which was amended by 2018
4 Cal. Stat. ch. 844. Although that bill will not take effect until 2019, it is included here in
5 anticipation of its effect.

6 **§ 18385. Sale of swordfish**

7 18385. It is unlawful for any permittee to sell swordfish taken by him or her to
8 other than the licensees described in Chapter 2 (commencing with Section 20300)
9 of Title 9.

10 **Comment.** Section 18385 continues former Fish and Game Code Section 8580 without
11 substantive change.

12 **§ 18395. Legislative intent regarding marlin**

13 18395. (a) The Legislature finds and declares that the intent of this this chapter
14 is not to permit or encourage the taking of marlin for commercial purposes.

15 (b) In the event a marlin is taken incidentally in a drift gill net, the permittee
16 shall notify the department immediately that the fish is on the boat. No marlin may
17 be removed from the boat except for delivery to the department.

18 **Comment.** Subdivision (a) of Section 18395 continues former Fish and Game Code Section
19 8582(a) without substantive change.

20 Subdivision (b) continues the second and third sentences of former Fish and Game Code
21 Section 8582(b) without substantive change.

22 **§ 18400. Transitional program**

23 18400 (a) By March 31, 2020, the department shall establish a program to
24 transition the holders of drift gill net permits issued pursuant to Section 18300 out
25 of the drift gill net fishery that includes the following conditions:

26 (1) A permittee who chooses to participate in the transition program shall
27 indicate his or her intention to the department to participate by submitting a
28 notarized form provided by the department on or before January 1, 2020.

29 (2) A permittee who has landed swordfish or thresher shark with a shark or
30 swordfish gill net or with a federal deep set buoy gear exempted fishing permit
31 between April 1, 2012, and March 31, 2018, inclusive, and who voluntarily
32 surrenders his or her drift gill net permit issued pursuant to Section 18300 and
33 shark or swordfish gill net or nets shall receive, to the extent that funds for the
34 transition program are available, the following amounts:

35 (A) Ten thousand dollars (\$10,000) to surrender the permit.

36 (B) One hundred thousand dollars (\$100,000) to surrender the net or nets.

37 (3) A permittee who has not landed swordfish or thresher shark on or after April
38 1, 2012, and who voluntarily surrenders his or her drift gill net permit issued
39 pursuant to Section 18300 and shark or swordfish gill net or nets shall receive, to
40 the extent that funds for the transition program are available, ten thousand dollars
41 (\$10,000).

(4) The department shall inform a permittee who submits a notarized form pursuant to paragraph (1) whether the permittee meets the requirements of paragraph (2) or (3) and the department shall submit this information to the fiscal agent.

(5) Any permittee who participates in the transition program by surrendering his or her permit pursuant to paragraph (2) or (3) shall be prohibited from obtaining a new California drift gill net shark and swordfish permit, shall agree not to fish under a federal drift gill net permit, shall agree not to transfer or renew a federal drift gill net permit, and shall surrender his or her shark or swordfish gill net or nets to an entity approved by the department for the purpose of destroying the nets.

(b) (1) The department shall enter into an agreement with a fiscal agent for the fiscal agent to receive state and nonstate funds made available for purposes of the transition program, to put those funds in an escrow account, and, upon the receipt of adequate funds, to pay the applicable amount described in subdivision (a) to a participating permittee. As part of the agreement, the department shall require the fiscal agent to notify the department within 10 days of the receipt of one million dollars (\$1,000,000) from nonstate sources for purposes of transitioning permittees out of the drift gill net fishery. If the department enters into an agreement with a fiscal agent that is a state entity pursuant to this subdivision, notwithstanding Section 13340 of the Government Code, any funds received from nonstate sources are continuously appropriated to that state entity for purposes of the transition program without regard to fiscal years.

(2) The department shall notify the Legislature pursuant to Section 9795 of the Government Code within 10 days of the date that the fiscal agent receives one million dollars (\$1,000,000) from nonstate sources for purposes of the transition program and secures one million dollars (\$1,000,000) through an agreement with the Ocean Protection Council pursuant to Section 35651 of the Public Resources Code.

(3) For purposes of this section, “fiscal agent” includes any of the following:

(A) The Department of Finance.

(B) The Pacific States Marine Fisheries Commission.

(C) The Controller.

(D) Any appropriate state or federal agency.

Comment. Section 18400 continues former Fish and Game Code Section 8583 without substantive change.

 **Note.** Proposed Section 18400 would continue Section 8583, which was added by 2018 Cal. Stat. ch. 844. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 18405. Disclaimer

18405. This chapter does not create or recognize a property right in fish expected to be caught using a permit issued pursuant to Section 18300.

Comment. Section 18405 continues former Fish and Game Code Section 8583.5 without substantive change.

Note. Proposed Section 18405 would continue Section 8583.5, which was added by 2018 Cal. Stat. ch. 844. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

CHAPTER 7. TAKE OF OTHER FISH

§ 18500. Yellowtail, barracuda, and white sea bass

18500. (a) It is unlawful to use any purse seine or round haul net to take yellowtail, barracuda, or white sea bass.

(b) It is unlawful to possess any yellowtail, barracuda, or white sea bass, except those taken south of the international boundary between the United States and Mexico, and imported into the state under regulations of the commission as provided in Section 38705, subdivision (a) or (b) of Section 38875, or Section 44650, on any boat carrying or using any purse seine or round haul net, including, but not limited to, a bait net as described in Section 15900.

(c) Gill nets with meshes of a minimum length of 3 1/2 inches may be used to take yellowtail and barracuda.

(d) Gill nets with meshes of a minimum length of six inches may be used to take white sea bass; however, during the period from June 16 to March 14, inclusive, not more than 20 percent by number of a load of fish may be white seabass 28 inches or more in total length, up to a maximum of 10 white seabass per load, if taken in gill nets or trammel nets with meshes from 3 1/2 to 6 inches in length.

(e) Notwithstanding the provisions of this section, the department may issue permits to hook and line commercial fishermen to possess a bona fide bait net on their vessels for the purpose of taking bait for their own use only.

Comment. Section 18500 continues former Fish and Game Code Section 8623(c) and (d) without substantive change.

§ 18505. California halibut generally

18505. (a) Except as otherwise provided in this code, set gill nets and trammel nets with mesh size of not less than 8 1/2 inches may be used to take California halibut.

(b) Except as provided in subdivision (c), not more than 1,500 fathoms (9,000 feet) of gill net or trammel net shall be fished in combination each day for California halibut from any vessel in ocean waters.

(c) Not more than 1,000 fathoms (6,000 feet) of gill net or trammel net shall be fished in combination each day for California halibut from any vessel in ocean waters between a line extending due west magnetic from Point Arguello in Santa Barbara County and a line extending 172° magnetic from Rincon Point in Santa Barbara County to San Pedro Point at the east end of Santa Cruz Island in Santa

Barbara County, then extending southwesterly 188° magnetic from San Pedro Point on Santa Cruz Island.

Comment. Section 18505 continues former Fish and Game Code Section 8625(a)-(c) without substantive change.

 **Note.** Existing Fish and Game Code Section 8625(d), identifying the operative date of the section as August 15, 1989, is deleted as obsolete.

§ 18510. Special rules for California halibut

18510. (a) Notwithstanding Section 18505, and where consistent with the determination made pursuant to subdivisions (b) and (c), the director may reduce the minimum mesh size permitted for gill and trammel nets used to take California halibut from 8 1/2 inches to not less than 8 inches in any or all areas south of a line extending 240° magnetic from the boundary line between the Counties of Los Angeles and Ventura.

(b) If, on or before October 1, 1990, the department determines that commercial landings of California halibut taken south of the line extending 240° magnetic from the boundary line between the Counties of Los Angeles and Ventura in the period between September 1, 1989, and August 31, 1990, decline by 10 percent or more compared with landings of California halibut taken in this area during the period between September 1, 1988, and August 31, 1989, the department shall assess the impact of the 8 1/2 inch minimum mesh size restriction on the California halibut fishery in the area described in subdivision (a). The assessment shall include, but is not limited to, an analysis of landing data, including landings of California halibut in Los Angeles, Orange, and San Diego Counties, the age and size composition of the catch, and the department's monitoring at sea of the gill and trammel net fishery.

(c) If the department determines that the 8 1/2 inch minimum mesh size, established pursuant to Section 18505 has directly resulted in a decline of 10 percent or more in landings of California halibut south of the line extending 240° magnetic from the boundary between the Counties of Los Angeles and Ventura, the director shall hold a public hearing in the area affected to make findings and take public testimony prior to taking any action pursuant to subdivision (a).

Comment. Section 18510 continues former Fish and Game Code Section 8626(a)-(c) without substantive change.

 **Note.** Existing Fish and Game Code Section 8626(d), identifying the operative date of the section as August 15, 1989, is deleted as obsolete.

TITLE 5. FISHING LINES

CHAPTER 1. GENERAL PROVISIONS

§ 18700. Legislative declaration

18700. The Legislature finds and declares that it is in the best interest of the people of the state and California's marine resources and fisheries that the use of commercial hook and line fishing gear be regulated in a manner that assures the orderly development of the fisheries, maintenance of viable resources, and sustainable and satisfying commercial and recreational harvests.

Comment. Section 18700 continues former Fish and Game Code Section 9025.1 without substantive change.

§ 18705. Permitted length

18705. Notwithstanding Section 14300 and Chapter 4 (commencing with Section 18950), it is unlawful to use a fishing line, including, but not limited to, a troll line or handline, that is more than 900 feet in length, except when used as a set line pursuant to subdivisions (a) and (b) of Section 18900 or when used as part of deep-set buoy gear authorized under federal law.

Comment. Section 18705 continues former Fish and Game Code Section 9028 without substantive change.

Note. Proposed Section 18705 would continue Section 9028, which was amended by 2018 Cal. Stat. ch. 844. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 18710. "Set line"

18710. As used in this title, "set line" means a line used to take fish that is anchored to the bottom on each end and is not free to drift with the tide or current.

Comment. Section 18710 combines and continues the parts of former Fish and Game Code Sections 8601 and 9029.5 that apply to set lines, without substantive change, except that the application of the provision is broadened to include Sections 18705 and 18900.

Note. Proposed Section 18710 would broaden the definition of "set line" slightly, so that it applies to proposed Section 18705 and 18900. **The Commission invites comment on whether that change would cause any problems.**

§ 18715. "Troll line"

18715. "Troll line" means a line with one or more hooks towed by a vessel underway and making way.

Comment. Section 18715 continues former Fish and Game Code Section 9025.5(b) without substantive change.

1 **§ 18720. “Vertical fishing line”**

2 18720. “Vertical fishing line” means a fishing line that is anchored to the ocean
3 bottom at one end and attached at the other end on the surface to a fishing vessel
4 or a buoy.

5 **Comment.** Section 18720 continues part of the second sentence of former Fish and Game
6 Code Section 9029 without substantive change.

7 CHAPTER 2. SPECIAL DISTRICT RULES

8 **§ 18800. District 2570**

9 18800. (a) In District 2570, notwithstanding Section 18705, a fishing line that is
10 anchored to the ocean bottom at one end and attached at the surface to a fishing
11 vessel or a buoy may be used, except under any of the following circumstances:

12 (1) To take shortfin mako (bonito) sharks, thresher sharks, swordfish, or marlin.

13 (2) If the fishing line exceeds 3,000 feet in length, from the anchor to the surface
14 vessel or buoy.

15 (3) If any hooks are attached to the upper one-third of the line.

16 (b) A buoy attached to the surface end of a fishing line used pursuant to
17 subdivision (a) shall display above its waterline, in numerals at least two inches
18 high, the fisherman’s commercial fishing license identification number.

19 (c) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or
20 Section 18705, in waters of the district within one mile of the mainland shore, the
21 following additional restrictions apply:

22 (1) It is unlawful to use more than 150 hooks on a vessel to take a fish for
23 commercial purposes when using fishing lines authorized pursuant to this title.

24 (2) Not more than 15 hooks shall be attached to any one fishing line, and no
25 fishing line shall be attached to another fishing line, while those lines are being
26 used for commercial fishing pursuant to this title, except that a single troll line
27 with not more than 30 hooks may be used to take California halibut.

28 (3) Each fishing line used pursuant to this title that is not attached to a fishing
29 vessel shall be buoyed, and the commercial fishing license identification number
30 issued to the permittee who is using the fishing line shall be marked on and visible
31 on the upper one-half of each buoy, in numbers at least two inches high.

32 **Comment.** Subdivisions (a) and (b) of Section 18800 continue the part of former Fish and
33 Game Code Section 9029 applicable to former Fish and Game District 6 without substantive
34 change.

35 Subdivision (c) continues the part of former Fish and Game Code Section 9027 applicable to
36 former Fish and Game District 6 without substantive change.

37 **Note.** Existing Fish and Game Code Section 9029(c) (which would be continued in part by
38 proposed Section 18800(c)) requires a fishing line used in specified Fish and Game districts to be
39 attached to a buoy displaying “the fisherman’s” identification number. Although the section
40 further provides that the term “fisherman’s identification number” refers to the number of “the
41 person’s” commercial fishing license issued pursuant to Section 7850, it remains unclear whether
42 this reference is intended to refer to the *owner of* the line, or the person *fishing* with the line.

This same issue is presented by several other sections of the existing Fish and Game Code, but it is possible that context in these sections dictates different conclusions. For example, this same reference to the display on a buoy of the “fisherman’s” identification number is part of the general regulation of set nets in existing Section 8601.5, where the context of that section seems to suggest the required marking should be that of the *owner* of the net. (See Note following proposed Section 15605.) On the other hand, existing Section 9027, another section that governs the use of fishing lines in a specially described geographic area, expressly requires the identification number displayed on the buoy attached to a fishing line “the commercial fishing license identification number issued... to the permittee who is *using* the fishing line.”

The Commission invites comment on whether existing Section 9029(c) is intended to require the display of the commercial fishing license identification number of the *owner* of the fishing line, or of the fisherman who is presently *fishing* with the line.

§ 18805. District 2575

18805. (a) In District 2575, notwithstanding Section 18705, a fishing line that is anchored to the ocean bottom at one end and attached at the surface to a fishing vessel or a buoy may be used, except under any of the following circumstances:

(1) To take shortfin mako (bonito) sharks, thresher sharks, swordfish, or marlin.

(2) If the fishing line exceeds 3,000 feet in length, from the anchor to the surface vessel or buoy.

(3) If any hooks are attached to the upper one-third of the line.

(b) A buoy attached to the surface end of a fishing line used pursuant to subdivision (a) shall display above its waterline, in numerals at least two inches high, the fisherman’s commercial fishing license identification number.

(c) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or Section 18705, in waters of the district within one mile of the mainland shore excluding ocean waters between a line extending 203 degrees magnetic from Gitchell Creek and a line extending 252 degrees magnetic from False Cape in Humboldt County, the following additional restrictions apply:

(1) It is unlawful to use more than 150 hooks on a vessel to take a fish for commercial purposes when using fishing lines authorized pursuant to this title.

(2) Not more than 15 hooks shall be attached to any one fishing line, and no fishing line shall be attached to another fishing line, while those lines are being used for commercial fishing pursuant to this title, except that a single troll line with not more than 30 hooks may be used to take California halibut.

(3) Each fishing line used pursuant to this title that is not attached to a fishing vessel shall be buoyed, and the commercial fishing license identification number issued to the permittee who is using the fishing line shall be marked on and visible on the upper one-half of each buoy, in numbers at least two inches high.

(d) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or Section 19005, in waters of the district within one mile of the mainland shore, it is unlawful to use a set line, vertical fishing line, or troll line to take any fish other than salmon or California halibut for a commercial purpose, from sunset on Friday to sunset on the following Sunday, or from sunset of the day before a state recognized legal holiday until sunset on that holiday.

1 **Comment.** Subdivisions (a) and (b) of Section 18805 continue the part of former Fish and
2 Game Code Section 9029 applicable to former Fish and Game District 7 without substantive
3 change.

4 Subdivision (c) continues the part of former Fish and Game Code Section 9027 applicable to
5 former Fish and Game District 7 without substantive change.

6 Subdivision (d) continues the parts of the first and third sentences of former Fish and Game
7 Code Section 9029.5 applicable to former Fish and Game District 7 without substantive change.

8 **§ 18810. District 2590**

9 18810. (a) In District 2590, notwithstanding Section 18705, a fishing line that is
10 anchored to the ocean bottom at one end and attached at the surface to a fishing
11 vessel or a buoy may be used, except under any of the following circumstances:

12 (1) To take shortfin mako (bonito) sharks, thresher sharks, swordfish, or marlin.

13 (2) If the fishing line exceeds 3,000 feet in length, from the anchor to the surface
14 vessel or buoy.

15 (3) If any hooks are attached to the upper one-third of the line.

16 (b) A buoy attached to the surface end of a fishing line used pursuant to
17 subdivision (a) shall display above its waterline, in numerals at least two inches
18 high, the fisherman's commercial fishing license identification number.

19 (c) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or
20 Section 18705, in waters of the district within one mile of the mainland shore
21 excluding ocean waters between a line extending 245 degrees magnetic from the
22 most westerly point of the west point of the Point Reyes headlands in Marin
23 County and a line extending due west magnetic from Point Bolinas in Marin
24 County, the following additional restrictions apply:

25 (1) It is unlawful to use more than 150 hooks on a vessel to take a fish for
26 commercial purposes when using fishing lines authorized pursuant to this title.

27 (2) Not more than 15 hooks shall be attached to any one fishing line, and no
28 fishing line shall be attached to another fishing line, while those lines are being
29 used for commercial fishing pursuant to this title, except that a single troll line
30 with not more than 30 hooks may be used to take California halibut.

31 (3) Each fishing line used pursuant to this title that is not attached to a fishing
32 vessel shall be buoyed, and the commercial fishing license identification number
33 issued to the permittee who is using the fishing line shall be marked on and visible
34 on the upper one-half of each buoy, in numbers at least two inches high.

35 (d) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or
36 Section 19010, in waters of the district within one mile of the mainland shore, it is
37 unlawful to use a set line, vertical fishing line, or troll line to take any fish other
38 than salmon or California halibut for a commercial purpose, from sunset on Friday
39 to sunset on the following Sunday, or from sunset of the day before a state
40 recognized legal holiday until sunset on that holiday.

41 **Comment.** Subdivisions (a) and (b) of Section 18810 continue the part of former Fish and
42 Game Code Section 9029 applicable to former Fish and Game District 10 without substantive
43 change.

Subdivision (c) continues the part of former Fish and Game Code Section 9027 applicable to former Fish and Game District 10 without substantive change.

Subdivision (d) continues the parts of the first and third sentences of former Fish and Game Code Section 9029.5 applicable to former Fish and Game District 10 without substantive change.

§ 18815. District 2615

18815. (a) In District 2615, notwithstanding Section 18705, a fishing line that is anchored to the ocean bottom at one end and attached at the surface to a fishing vessel or a buoy may be used, except under any of the following circumstances:

(1) To take shortfin mako (bonito) sharks, thresher sharks, swordfish, or marlin.

(2) If the fishing line exceeds 3,000 feet in length, from the anchor to the surface vessel or buoy.

(3) If any hooks are attached to the upper one-third of the line.

(b) A buoy attached to the surface end of a fishing line used pursuant to subdivision (a) shall display above its waterline, in numerals at least two inches high, the fisherman's commercial fishing license identification number.

(c) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or Section 18705, in waters of the district within one mile of the mainland shore, the following additional restrictions apply:

(1) It is unlawful to use more than 150 hooks on a vessel to take fish for commercial purposes when using a fishing line authorized pursuant to this title.

(2) Not more than 15 hooks shall be attached to any one fishing line, and no fishing line shall be attached to another fishing line, while those lines are being used for commercial fishing pursuant to this title.

(3) Each fishing line used pursuant to this title that is not attached to a fishing vessel shall be buoyed, and the commercial fishing license identification number issued to the permittee who is using the fishing line shall be marked on, and visible on the upper one-half of each buoy, in numbers not less than two inches in height.

(d) Subdivision (c) does not apply to persons who are fishing south of a line extending due west from Point Conception for halibut, white sea bass, sharks, skates, or rays if at least 80% of the total number of fish possessed by persons aboard the vessel are halibut, white sea bass, sharks, skates, and rays.

Comment. Subdivisions (a) and (b) of Section 18815 continue the part of former Fish and Game Code Section 9029 applicable to former Fish and Game District 17 without substantive change.

Subdivisions (c) and (d) restate the part of former Fish and Game Code Section 9027.5 applicable to former Fish and Game District 17 without substantive change.

Note. Proposed Section 18815(d) is intended to restate the part of existing Fish and Game Code Section 9027.5(c) applicable to existing Fish and Game District 17 to clarify the meaning of that provision, without changing its substantive meaning. The existing provision reads as follows:

(c) Subdivision (a) does not apply to persons who are fishing south of a line extending due west from Point Conception and who are fishing for halibut, white sea bass, sharks, skates, or rays. The exemption in this subdivision does not apply if all of the fish possessed by persons

1 aboard the vessel does not consist of at least 80 percent by number of halibut, white sea bass,
2 sharks, skates, and rays.

3 **The Commission invites comment on whether proposed Section 18815(d) correctly**
4 **restates the part of existing Section 9027.5(c) applicable to existing Fish and Game District**
5 **17.**

6 **§ 18820. District 2620**

7 18820. (a) In District 2620, notwithstanding Section 18705, a fishing line that is
8 anchored to the ocean bottom at one end and attached at the surface to a fishing
9 vessel or a buoy may be used, except under any of the following circumstances:

10 (1) To take shortfin mako (bonito) sharks, thresher sharks, swordfish, or marlin.

11 (2) If the fishing line exceeds 3,000 feet in length, from the anchor to the surface
12 vessel or buoy.

13 (3) If any hooks are attached to the upper one-third of the line.

14 (b) A buoy attached to the surface end of a fishing line used pursuant to
15 subdivision (a) shall display above its waterline, in numerals at least two inches
16 high, the fisherman's commercial fishing license identification number.

17 (c) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or
18 Section 18705, in waters of the district within one mile of the mainland shore, the
19 following additional restrictions apply:

20 (1) It is unlawful to use more than 150 hooks on a vessel to take fish for
21 commercial purposes when using a fishing line authorized pursuant to this title.

22 (2) Not more than 15 hooks shall be attached to any one fishing line, and no
23 fishing line shall be attached to another fishing line, while those lines are being
24 used for commercial fishing pursuant to this title.

25 (3) Each fishing line used pursuant to this title that is not attached to a fishing
26 vessel shall be buoyed, and the commercial fishing license identification number
27 issued to the permittee who is using the fishing line shall be marked on, and
28 visible on the upper one-half of each buoy, in numbers not less than two inches in
29 height.

30 (d) Subdivision (d) does not apply to persons who are fishing south of a line
31 extending due west from Point Conception for halibut, white sea bass, sharks,
32 skates, or rays if at least 80% of the total number of fish possessed by persons
33 aboard the vessel are halibut, white sea bass, sharks, skates, and rays.

34 **Comment.** Subdivisions (a) and (b) of Section 18820 continues the part of former Fish and
35 Game Code Section 9029 applicable to former Fish and Game District 18 without substantive
36 change.

37 Subdivisions (c) and (d) restate the part of former Fish and Game Code Section 9027.5
38 applicable to former Fish and Game District 18 without substantive change.

39 **Note.** Proposed Section 18820(d) is intended to restate the part of existing Fish and Game
40 Code Section 9027.5(c) applicable to existing Fish and Game District 18 to clarify the meaning of
41 that provision, without changing its substantive meaning. The existing provision reads as follows:

42 (c) Subdivision (a) does not apply to persons who are fishing south of a line extending due
43 west from Point Conception and who are fishing for halibut, white sea bass, sharks, skates, or
44 rays. The exemption in this subdivision does not apply if all of the fish possessed by persons

1 aboard the vessel does not consist of at least 80 percent by number of halibut, white sea bass,
2 sharks, skates, and rays.

3 **The Commission invites comment on whether proposed Section 18820(d) correctly**
4 **restates the part of existing Section 9027.5(c) applicable to existing Fish and Game District**
5 **18.**

6 **§ 18825. District 2625**

7 18825. (a) In District 2625, notwithstanding Section 18705, a fishing line that is
8 anchored to the ocean bottom at one end and attached at the surface to a fishing
9 vessel or a buoy may be used, except under any of the following circumstances:

10 (1) To take shortfin mako (bonito) sharks, thresher sharks, swordfish, or marlin.

11 (2) If the fishing line exceeds 3,000 feet in length, from the anchor to the surface
12 vessel or buoy.

13 (3) If any hooks are attached to the upper one-third of the line.

14 (b) A buoy attached to the surface end of a fishing line used pursuant to
15 subdivision (a) shall display above its waterline, in numerals at least two inches
16 high, the fisherman's commercial fishing license identification number.

17 (c) Notwithstanding subdivision (a), subdivision (a) or (b) of Section 18900, or
18 Section 18705, in waters of the district within one mile of the mainland shore, the
19 following additional restrictions apply:

20 (1), It is unlawful to use more than 150 hooks on a vessel to take fish for
21 commercial purposes when using a fishing line authorized pursuant to this title.

22 (2) Not more than 15 hooks shall be attached to any one fishing line, and no
23 fishing line shall be attached to another fishing line, while those lines are being
24 used for commercial fishing pursuant to this title.

25 (3) Each fishing line used pursuant to this title that is not attached to a fishing
26 vessel shall be buoyed, and the commercial fishing license identification number
27 issued to the permittee who is using the fishing line shall be marked on, and
28 visible on the upper one-half of each buoy, in numbers not less than two inches in
29 height.

30 (d) Subdivision (c) does not apply to persons who are fishing south of a line
