31 extending due west from Point Conception for halibut, white sea bass, sharks,
32 skates, or rays if at least 80% of the total number of fish possessed by persons
33 aboard the vessel are halibut, white sea bass, sharks, skates, and rays.

34 **Comment.** Subdivisions (a) and (b) of Section 18825 continue the part of former Fish and
35 Game Code Section 9029 applicable to former Fish and Game District 19 without substantive
36 change.

37 Subdivisions (c) and (d) restate the part of former Fish and Game Code Section 9027.5
38 applicable to former Fish and Game District 19 without substantive change.

39 **Note.** Proposed Section 18825(d) is intended to restate the part of existing Fish and Game
40 Code Section 9027.5(c) applicable to existing Fish and Game District 19 to clarify the meaning of
41 that provision, without changing its substantive meaning. The existing provision reads as follows:

42 (c) Subdivision (a) does not apply to persons who are fishing south of a line extending due
43 west from Point Conception and who are fishing for halibut, white sea bass, sharks, skates, or
44 rays. The exemption in this subdivision does not apply if all of the fish possessed by persons

aboard the vessel does not consist of at least 80 percent by number of halibut, white sea bass, sharks, skates, and rays.

The Commission invites comment on whether proposed Section 18825(d) correctly restates the part of existing Section 9027.5(c) applicable to existing Fish and Game District 19.

CHAPTER 3. SET LINES

§ 18900. Set line

18900. (a) A set line may be used in Districts 2570, 2575, 2590, 2615, 2620, and 2625.

(b) It is unlawful to use a set line with hooks more than 100 feet above the anchor or ocean bottom.

(c) A set line shall be marked at both ends with buoys displaying above their waterlines, in numerals at least 2 inches high, the owner's commercial fishing license identification number.

Comment. Subdivisions (a) and (b) of Section 18900 continue former Fish and Game Code Section 9026 without substantive change.

Subdivision (c) continues the part of former Fish and Game Code Section 8601.5(a) applicable to set lines without substantive change.

Note. Existing Fish and Game Code Section 8601.5(a) requires both a set *net* and a set *line* to be attached to a buoy displaying "the fisherman's" identification number. It is unclear whether this reference is intended to refer to the commercial fisherman who *owns* the net or line, or the commercial fisherman *fishing* with the net or line.

The Commission has suggested that, as much of the remainder of Section 8601.5 appears to relate to the responsibilities of the owner of a set net, this display requirement in Section 8601.5, at least with regard to a set *net*, is meant to refer to the owner of the net. (See Note following proposed Section 15605.) If this interpretation is correct, it would suggest that the display requirement relating to a set *line* also refers to the owner of the line, and proposed Section 18900(c) therefore tentatively incorporates that interpretation.

On the other hand, existing Section 9027, which governs the use of fishing lines in a specially described geographic area, expressly requires the identification number displayed on the buoy attached to a fishing line "the commercial fishing license identification number issued... to the permittee who is *using* the fishing line."

The Commission invites comment on whether the display requirement in existing Section 8601.5 relating to the use of a set *line* is intended to require the display of the commercial fishing license identification number of the *owner* of the line, or of the fisherman who is presently *fishing* with the line.

CHAPTER 4. TROLL LINES

Article 1. General Provisions

§ 18950. Use of troll line

18950. A troll line or handline having not more than two hooks (plugs excepted) may be used in any district.

1 **Comment.** Section 18950 continues the first part of former Fish and Game Code Section
2 9025.5(a) without substantive change.

3 Article 2. Special District Rules

4 **§ 19000. District 2570**

5 19000. In District 2570, a troll line with more than two hooks may be used.

6 **Comment.** Section 19000 continues the second part of former Fish and Game Code Section
7 9025.5(a) applicable to former Fish and Game District 6 without substantive change.

8 **§ 19005. District 2575**

9 19005. In District 2575, a troll line with more than two hooks may be used.

10 **Comment.** Section 19005 continues the second part of former Fish and Game Code Section
11 9025.5(a) applicable to former Fish and Game District 7 without substantive change.

12 **§ 19010. District 2590**

13 19010. (a) In District 2590, a troll line with more than two hooks may be used.

14 (b) In that part of the district in Tomales Bay, south of a line extending 252
15 degrees magnetic from the western tip of Toms Point to the opposite shore, the use
16 of troll lines or handlines is subject to the following restrictions:

17 (1) A commercial fisherman shall not use more than four troll lines or handlines
18 at any time with not more than two hooks attached to each line.

19 (2) When more than one commercial fisherman is aboard a vessel, not more than
20 six lines with a maximum of two hooks per line may be fished aboard that vessel.

21 **Comment.** Subdivision (a) of Section 19010 continues the second part of former Fish and
22 Game Code Section 9025.5(a) applicable to former Fish and Game District 10 without
23 substantive change.

24 Subdivision (b) continues the part of former Fish and Game Code Section 9025.5(c) applicable
25 to former Fish and Game District 10 without substantive change.

26 **§ 19015. District 2595**

27 19015. (a) In District 2595, a troll line with more than two hooks may be used
28 west of the Golden Gate Bridge.

29 (b) In that part of the district east of the Golden Gate Bridge, the use of troll
30 lines or handlines is subject to the following restrictions:

31 (1) A commercial fisherman shall not use more than four troll lines or handlines
32 at any time with not more than two hooks attached to each line.

33 (2) When more than one commercial fisherman is aboard a vessel, not more than
34 six lines with a maximum of two hooks per line may be fished aboard that vessel.

35 **Comment.** Subdivision (a) of Section 19015 continues the second part of former Fish and
36 Game Code Section 9025.5(a) applicable to former Fish and Game District 11 without
37 substantive change.

38 Subdivision (b) continues the part of former Fish and Game Code Section 9025.5(c) applicable
39 to former Fish and Game District 11 without substantive change.

1 **§ 19020. District 2600**

2 19020. In District 2600, notwithstanding Section 18950, the use of troll lines or
3 handlines is subject to the following restrictions:

4 (a) A commercial fisherman shall not use more than four troll lines or handlines
5 at any time with not more than two hooks attached to each line.

6 (b) When more than one commercial fisherman is aboard a vessel, not more than
7 six lines with a maximum of two hooks per line may be fished aboard that vessel.

8 **Comment.** Section 19020 continues the part of former Fish and Game Code Section 9025.5(c)
9 applicable to former Fish and Game District 12 without substantive change.

10 **§ 19025. District 2605**

11 19025. (a) In District 2605, notwithstanding Section 18950, the use of troll lines
12 or handlines is subject to the following restrictions:

13 (a) A commercial fisherman shall not use more than four troll lines or handlines
14 at any time with not more than two hooks attached to each line.

15 (b) When more than one commercial fisherman is aboard a vessel, not more than
16 six lines with a maximum of two hooks per line may be fished aboard that vessel.

17 **Comment.** Section 19025 continues the part of former Fish and Game Code Section 9025.5(c)
18 applicable to former Fish and Game District 13 without substantive change.

19 **§ 19030. District 2610**

20 19030. In District 2610, a troll line with more than two hooks may be used.

21 **Comment.** Section 19030 continues the second part of former Fish and Game Code Section
22 9025.5(a) applicable to former Fish and Game District 16 without substantive change.

23 **§ 19035. District 2615**

24 19035. In District 2615, a troll line with more than two hooks may be used.

25 **Comment.** Section 19035 continues the second part of former Fish and Game Code Section
26 9025.5(a) applicable to former Fish and Game District 17 without substantive change.

27 **§ 19040. District 2620**

28 19040. In District 2620, a troll line with more than two hooks may be used.

29 **Comment.** Section 19040 continues the second part of former Fish and Game Code Section
30 9025.5(a) applicable to former Fish and Game District 18 without substantive change.

31 **§ 19045. District 2625**

32 19045. In District 2625, a troll line with more than two hooks may be used.

33 **Comment.** Section 19045 continues the second part of former Fish and Game Code Section
34 9025.5(a) applicable to former Fish and Game District 19 without substantive change.

35 **§ 19050. District 2630**

36 19050. In District 2630, a troll line with more than two hooks may be used.

37 **Comment.** Section 19050 continues the second part of former Fish and Game Code Section
38 9025.5(a) applicable to former Fish and Game District 19A without substantive change.

1 TITLE 6. TRAPS

2 CHAPTER 1. GENERAL PROVISIONS

3 § 19150. “Definitions”

4 19150. For the purposes of this title, the following terms have the following
5 meanings:

6 (a) “Deeper nearshore species” means those finfish identified as deeper
7 nearshore species in regulations adopted by the commission pursuant to Section
8 22620.

9 (b) “General trap permit” means a valid permit to take fish for a commercial
10 purpose issued pursuant to Section 19205 that has not been suspended or revoked.

11 (c) “Nearshore species” means those finfish identified as such in regulations
12 adopted by the commission pursuant to Section 22620.

13 (d) “Popup” means a mechanism capable of releasing a submerged buoy at a
14 predetermined time.

15 **Comment.** Section 19150 continues former Fish and Game Code Section 9000.5(b)-(c) and
16 (e)-(f) without substantive change.

17 § 19200. Allowed use of traps

18 19200. (a) Except as expressly authorized in this title, no person shall use a trap
19 to take any finfish, mollusk, or crustacean in the waters of the state for commercial
20 purposes.

21 (b) Traps may be used to take finfish in ocean waters only as authorized by this
22 title.

23 **Comment.** Section 19200 continues former Fish and Game Code Section 9000(a) and (b)
24 specifically without substantive change.

25 § 19205. Required permit

26 19205. (a) Finfish, mollusks, or crustaceans shall not be taken by a person for a
27 commercial purpose in ocean waters with a trap, except under a valid general trap
28 permit issued to that person that has not been suspended or revoked.

29 (b) Any person who operates or assists in operating any trap to take a finfish,
30 mollusk or crustacean, other than a lobster or Dungeness crab as defined in or who
31 possesses or transports a finfish, mollusk or crustacean on any boat, barge, or
32 vessel when any trap is aboard, shall have a general trap permit issued to that
33 person that has not been revoked or suspended, while engaged in the activity.

34 (c) The fee for the general trap permit shall be thirty-five dollars (\$35).

35 (d) This section does not apply to the taking of lobster under Section 49700 or to
36 the taking of Dungeness crab under Section 47450.

37 **Comment.** Section 19205 continues former Fish and Game Code Section 9001 without
38 substantive change.

1 **§ 19210. Destruction device**

2 19210. (a) A trap shall have at least one destruction device that meets
3 specifications approved by the department.

4 (b) In order to minimize the adverse effects on living marine resources, the
5 specifications for destruction devices shall provide for a device that destructs
6 rapidly enough to facilitate escape of a substantial proportion of all species
7 confined in a trap that cannot be raised.

8 **Comment.** Section 19210 continues former Fish and Game Code Section 9003 without
9 substantive change.

10 **§ 19215. Required maintenance**

11 19215. A trap shall be raised, cleaned, serviced, and emptied at intervals not to
12 exceed 96 hours, weather conditions at sea permitting.

13 **Comment.** Section 19215 continues the first part of former Fish and Game Code Section 9004
14 without substantive change.

15 **§ 19220. Abandonment**

16 19220. No trap shall be abandoned in waters of the state.

17 **Comment.** Section 19220 continues the second part of former Fish and Game Code Section
18 9004 without substantive change.

19 **§ 19225. Marking**

20 19225. A trap or string of traps shall be marked with a buoy. The department
21 shall implement regulations by January 1, 2020, requiring standardized gear
22 marking for those fisheries in which the department determines it is appropriate.
23 As part of the regulations, the department shall establish a fee for each fishery
24 requiring standardized gear marking pursuant to this section and shall set and
25 adjust each fee in an amount to fully recover, but not exceed, all reasonable
26 administrative and implementation costs of the department relating to the
27 standardized gear marking requirement.

28 **Comment.** Section 19225 continues former Fish and Game Code Section 9005 without
29 substantive change.

30 **Notes.** (1) Proposed Section 19225 would continue Section 9005, which was amended by
31 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
32 anticipation of its effect.

33 (2) The second sentence of proposed Section 19225 uses the term “gear,” which could perhaps
34 be read broadly as including other kinds of gear besides traps. **The Commission invites**
35 **comment on whether that broader meaning was intended and, if so, whether the sentence**
36 **would be better located in a more generally applicable location.**

37 **§ 19230. Required marking of trap**

38 19230. Every trap used to take finfish or crustaceans shall be marked with a
39 buoy. Each buoy shall be marked to identify the operator as follows:

1 (a) For a trap used to take lobster the commercial fishing license identification
2 number followed by the letter “P.”

3 (b) For a trap used to take Dungeness crab or hagfish, the commercial fishing
4 license identification number only.

5 (c) For a trap used to take finfish other than sablefish or hagfish, the commercial
6 fishing license identification number followed by the letter “Z.”

7 (d) For a trap used to take sablefish, the commercial fishing license
8 identification number followed by the letter “B.”

9 **Comment.** Section 19230 continues former Fish and Game Code Section 9006 without
10 substantive change.

11 CHAPTER 2. DISTURBANCE OF TRAPS

12 § 19300. Disturbance of trap

13 19300. (a) Except as provided in Sections 19305 and 19310, it is unlawful to
14 willfully or recklessly disturb, move, or damage a trap that belongs to another
15 person and that is marked with a buoy identification number pursuant to Section
16 19230.

17 (b) Subdivision (a) does not apply to employees of the department while
18 engaged in the performance of official duties.

19 **Comment.** Subdivision (a) of Section 19300 continues former Fish and Game Code Section
20 9002(a) without substantive change.

21 Subdivision (b) continues former Fish and Game Code Section 9002(c) without substantive
22 change.

23 § 19305. Permit to pull or raise trap

24 19305. (a) A person, who has been issued a general trap permit under Section
25 19205 and has it in his or her possession, may pull or raise a trap marked with a
26 buoy, if the buoy is marked with a buoy identification number pursuant to
27 subdivision (b) of Section 19230.

28 (b) A person pulling or raising a trap marked with a buoy identification number
29 other than his or her own buoy identification number shall have written permission
30 in his or her possession from the other person who holds the buoy identification
31 number that is marked on the buoy.

32 **Comment.** Section 19305 continues former Fish and Game Code Section 9002(b) without
33 substantive change.

34 § 19310. Publicly employed safety personnel

35 19310. (a) Section 19300 does not apply to publicly employed safety personnel,
36 including, but not limited to, lifeguards, marine safety officers, harbor patrol
37 officers, and peace officers, who, in the performance of their official duties,
38 remove a trap, buoy, or line located in or near breaking surf or adjacent to a public
39 beach if they believe that the trap poses a public safety hazard.

1 (b) A person who removes a trap or an attachment to a trap pursuant to this
2 section that is identified by a buoy identification number is required to do the
3 following:

4 (1) Immediately return any marine life captured in the trap to the ocean.

5 (2) Make an attempt to contact the person whose permit or license number is
6 marked on the buoy, by personal contact, telephone, recorded message left on a
7 telephone answering machine, regular United States Postal Service, or by other
8 means, advising where the property is located.

9 (c) Employees of the department may disclose the name, address, and buoy
10 identification numbers of currently permitted or licensed persons to
11 representatives of public safety agencies described in this section, to assist in the
12 return of traps and attachments to their proper owners or operators.

13 (d) A person who removes a trap or an attachment to a trap pursuant to this
14 section shall have no responsibility to secure the trap or attachment against loss or
15 damage.

16 (e) If the person whose permit or license number is marked on the buoy does not
17 retrieve the trap within seven days of notification pursuant to this section, or if that
18 person cannot be identified within seven days after the trap has been removed, the
19 trap may be discarded.

20 (f) This section does not create a duty on the part of any state or local agency to
21 remove or move a trap, line, or buoy that does not create any liability pursuant to
22 Part 2 (commencing with Section 814) of Division 3.6 of Title 1 of the
23 Government Code.

24 **Comment.** Section 19310 continues former Fish and Game Code Section 9002(d) without
25 substantive change.

26 **§ 19315. Retrieval of commercial crab traps**

27 19315. (a) Notwithstanding Sections 19300, 19305, and 19310, the department,
28 in consultation with the Dungeness crab task force, shall establish a retrieval
29 program to provide for the retrieval of lost or abandoned commercial Dungeness
30 crab traps by June 30, 2019.

31 (b) The retrieval program developed pursuant to subdivision (a) shall be
32 consistent with all of the following:

33 (1) The department shall establish a retrieval permit that grants a person who
34 obtains a retrieval permit the authority to retrieve Dungeness crab traps located in
35 ocean waters belonging to another person without written permission from that
36 person during the closed season of the Dungeness crab commercial fishery, as
37 described in Section 47300. The department may establish any qualifications it
38 deems necessary for a person to obtain a retrieval permit. The department shall
39 require a permit fee in an amount necessary to fully recover, but not exceed, all
40 reasonable administrative and implementation costs to the department of the
41 retrieval program.

1 (2) Notwithstanding Chapter 4 (commencing with Section 2080) of Title 6 of
2 Part 4 of Division 3 of the Civil Code or any other law, any Dungeness crab trap
3 retrieved under the authority of a retrieval permit shall become the property of the
4 retrieval permitholder.

5 (3) The department shall require a retrieval permitholder to notify the former
6 trap owner of the retrieval of a Dungeness crab trap and shall offer to sell the trap
7 to the former owner for a reasonable recovery fee, as determined by the retrieval
8 permitholder, based on the cost of trap retrieval and storage of the trap. The
9 department shall impose per-trap fees on any former trap owner who refuses to
10 pay the recovery fee to the retrieval permitholder. The department shall set the rate
11 of these per-trap fees at a level sufficient to recover any costs to the department
12 from handling noncompliance with the gear retrieval program and to reimburse the
13 retrieval permitholder for the reasonable cost of trap retrieval, storage, and
14 disposal of crab traps belonging to a former owner who refuses to pay the recovery
15 fees for those traps and, upon appropriation by the Legislature, shall use the
16 proceeds of the per-trap fees for these purposes. The department shall annually
17 adjust the per-trap fees pursuant to Section 3755.

18 (4) Notwithstanding Section 22205, the department may release contact
19 information to a retrieval permitholder for purposes of the retrieval program under
20 terms and conditions as the department deems necessary to preserve the
21 confidentiality of the information released. Any release of information pursuant to
22 this section shall not constitute a waiver of any applicable exemptions from
23 disclosure under the California Public Records Act (Chapter 3.5 (commencing
24 with Section 6250) of Division 7 of Title 1 of the Government Code).

25 (5) The department may deny an application for renewal or transfer of a
26 Dungeness crab vessel permit until the applicant pays any fees imposed pursuant
27 to paragraph (3).

28 (6) The department shall submit the proposed retrieval program developed
29 pursuant to this section to the Dungeness crab task force for review, and shall not
30 implement the retrieval program until the task force has had 60 days or more to
31 review the proposed retrieval program and recommend any proposed changes. The
32 director may implement the retrieval program earlier than 60 days after it is
33 submitted to the Dungeness crab task force for review, if recommended by the task
34 force.

35 (c) This section shall become inoperative on April 1, 2029, and, as of January 1,
36 2030, is repealed, unless a later enacted statute, that becomes operative on or
37 before January 1, 2030, deletes or extends the dates on which it becomes
38 inoperative and is repealed.

39 **Comment.** Section 19315 continues former Fish and Game Code Section 9002.5 without
40 substantive change.

41  **Note.** Proposed Section 19315 would continue Section 9002.5, which was amended by 2018
42 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
43 anticipation of its effect.

CHAPTER 3. NUISANCE

§ 19400. Abatement of nuisance

19400. A trap used without a buoy, or with a buoy that is not marked pursuant to Section 19230, is a public nuisance and shall be removed from the waters of this state by any person authorized to enforce this code.

(b) Any trap used in violation of this code, or any regulations adopted pursuant thereto, is a public nuisance and, except as provided in Section 9007, shall be seized.

Comment. Subdivision (a) of Section 19400 continues former Fish and Game Code Section 9007 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 9008 without substantive change.

See also Section 4975-4988 (seizure).

CHAPTER 4. TRAPPING OF FINFISH

§ 19500. Criteria for use of trap

19500. Finfish, other than sablefish and hagfish, may be taken under a general trap permit if all of the following criteria are also met:

(a) Every person aboard the vessel a valid general trap permit that has not been suspended or revoked.

(b) If nearshore species are present, at least one person aboard the vessel possesses a valid nearshore fishery permit and a nearshore fishery trap endorsement that has not been suspended or revoked.

(c) If deeper nearshore species are present, at least one person aboard the vessel possesses a valid deeper nearshore species fishery permit that has not been suspended or revoked.

(d) During the period from one hour after sunset to one hour before sunrise, finfish traps that are left in the water shall be unbaited with the door secured open. If, for reasons beyond the control of the permittee, all trap doors cannot be secured open prior to one hour after sunset, the permittee shall immediately notify the department.

(e) Popups shall not be used on buoy lines attached to finfish traps, and shall not be possessed aboard a vessel when taking finfish under a general trap permit.

(f) Trap destruction devices used on finfish traps shall conform to the current regulatory requirements for those devices pursuant to Section 19210 and as adopted by the commission.

(g) No finfish traps shall be set within 750 feet of any pier, breakwall, or jetty in District 2570, 2575, 2615, 2620, 2625, 2630, 12635, 2640, 2645, or 2650.

(h) No more than 50 finfish traps may be used in waters of the state along the mainland shore.

(i) The mesh of any finfish trap used pursuant to this section shall measure not less than two inches by two inches.

(j) The following fish shall not be used as bait in finfish traps:

(1) Lobster.

(2) Crabs of the genus cancer, except rock crab, yellow crab, and red crab, as identified in Section 48650, which may be used as bait under the authority of a rock crab trap permit issued pursuant to Section 48650.

(3) Any other finfish or invertebrate to which a minimum size limit applies that is used or possessed in a condition so that its size cannot be determined.

Comment. Section 19500 continues former Fish and Game Code Section 9001.7(a)-(j) without substantive change.

Note. Existing Fish and Game Code Section 9001.7(g) (which would be continued by proposed Section 19500(g)) prohibits the setting of finfish traps in described areas in specified existing Fish and Game Districts, including District “20B.” The Commission has found no section in the existing code identifying that district, and proposed Section 19500 would therefore discontinue the reference to it.

The Commission invites comment on whether proposed Section 19500(g) properly continues the intended meaning of existing Section 9001.7(g).

§ 19505. Take of species generally

19505. Except as otherwise prohibited, any species may be taken in a finfish trap.

Comment. Section 19505 continues former Fish and Game Code Section 8403(c) without substantive change.

Note. Proposed Section 19505 is intended to restate existing Fish and Game Code Section 8403(c) to clarify the meaning of that provision, without changing its substantive effect. The existing provision (shown in *italics*) reads as follows:

8403. (a) To the extent not in conflict with Section 8607, marine species of fin fish which are classified as groundfish may be taken under the regulations of the commission.

(b) Marine species of fin fish, including, but not limited to, fin fish which are classified as groundfish, may be taken with fin fish traps, subject to Article 1 (commencing with Section 9000) of Chapter 4, under regulations of the commission. The regulations may limit the number of fin fish traps which any vessel may use, designate the areas in which the traps may be used, and prescribe other limitations on the use of fin fish traps.

(c) Any other species not otherwise prohibited may be taken in a fin fish trap.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 19510. Marine species

19510. (a) Except as otherwise provided in Section 19515, marine species of finfish, including, but not limited to, finfish that are classified as groundfish, may be taken with finfish traps, subject to other provisions of this code that govern finfish traps, under a general trap permit issued pursuant to Section 19205, and subject to regulations of the commission.

(b) The regulations may limit the number of finfish traps that any vessel may use, designate the areas in which the traps may be used, and prescribe other limitations on the use of finfish traps.

Comment. Subdivision (a) of Section 19510 combines and restates the first sentence of former Fish and Game Code Section 8403(b), and Section 9022(b) without substantive change.

Subdivision (b) continues the second sentence of former Fish and Game Code Section 8403(b) without substantive change.

Note. Proposed Section 19510(a) is intended to combine and restate the first sentence of existing Fish and Game Code Section 8403(b), and Section 9022(b), to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

8403.....

(b) Marine species of fin fish, including, but not limited to, fin fish which are classified as groundfish, may be taken with fin fish traps, subject to Article 1 (commencing with Section 9000) of Chapter 4, under regulations of the commission.

9022.....

(b) Except as otherwise provided in subdivision (a), all marine species of fin fish subject to Section 8403 may be taken with one or more fin fish traps as prescribed by the commission under a general trap permit issued pursuant to Section 9001.

The Commission invites comment on whether the combining and restatement of these two provisions would cause any substantive change in the meaning of either provision.

§ 19515. Special rules for Districts 2590, 2595 and 2600

19515. Notwithstanding Section 19200, traps used to take finfish may not be used in Districts 2590, 2595 and 2600, except for baitfish traps as provided in Sections 15105, 19605, and 19610.

Comment. Section 19515 continues former Fish and Game Code Section 9022(a) without substantive change.

CHAPTER 5. BAITFISH TRAPS

§ 19600. Baitfish traps

19600. A freshwater baitfish trap that is used as provided in Section 22125 is not subject to the provisions of this title.

Comment. Section 19600 continues former Fish and Game Code Section 9000(c) without substantive change.

§ 19605. Fish that may be taken

19605. Subject to Section 15105, California killifish (*Fundulus parvipinnis*), mudsuckers (*Gillichthys mirabilis*), yellowfin gobies (*Acanthogobius flavimanus*), shiner perch (*Cymatogaster aggregata*), and staghorn sculpin (*Leptocottus armatus*) may be taken with baitfish traps under a general trap permit issued pursuant to Section 19205.

Comment. Section 19605 continues former Fish and Game Code Section 9020(a) without substantive change.

1 **§ 19610. Trap size**

2 19610. A baitfish trap shall not exceed 12 inches in width, 12 inches in height,
3 and 36 inches in greatest length with entrance at small ends of funnels or fykes not
4 to exceed 2 inches in diameter.

5 **Comment.** Section 19610 continues former Fish and Game Code Section 9020(b) without
6 substantive change.

7 **TITLE 7. OTHER GEAR**

8 **CHAPTER 1. GENERAL PROVISIONS**

9 **§ 19800. Slurp guns**

10 19800. Slurp guns may be used to take fish for a commercial purpose in
11 Districts 2570, 2575, 2590, 2615, 2620, 2625, 2640, and 2645.

12 **Comment.** Section 19800 continues former Fish and Game Code Section 9052 without
13 substantive change.

14 **§ 19805. Miscellaneous tools**

15 19805. A spade, shovel, hoe, rake, or other appliance operated by hand may be
16 used to take mollusks, sand crabs, and shrimps in Districts 2505, 2515, 2525,
17 2535, 2540, 2545, 2550, 2555, 2565, 2570, 2575, 2580, 2585, 2590, 2595, 2600,
18 2605, 2610, 2615, 2620, 2625, 2630, 2640, 2645, and 2650, except as specified in
19 Section 46300, and except that freshwater clams shall not be taken by means of
20 such appliances on any levee or on the berm of any levee.

21 **Comment.** Section 19805 continues former Fish and Game Code Section 9050 without
22 substantive change.

23 **Note.** Existing Fish and Game Code Section 9050 (which would be continued by proposed
24 Section 19805) contains an exception from its general rule “as specified in Sections 7332 and
25 8303....” Existing Section 7332 would be continued in the proposed law by proposed Section
26 46300, but the “Section 8303” seemingly referenced in existing Section 9050, relating to means
27 permitted for taking abalone, was repealed by 1990 Cal. Stat. ch. 1288, and the Commission has
28 not located any provision in the existing code that continues the substance of that former
29 provision.

30 **The Commission invites comment on whether proposed Section 19805, continuing the**
31 **reference to existing Section 7332 but discontinuing the reference to “Section 8303,”**
32 **properly continues the intended meaning of existing Section 9050.**

33 **§ 19810. Spears, harpoons, bows, and arrows**

34 19810. Spears, harpoons, and bows and arrows may be used for taking all
35 varieties of skates, rays, and sharks, except soupfin sharks.

36 **Comment.** Section 19810 continues former Fish and Game Code Section 9051 without
37 substantive change.

CHAPTER 2. DEVELOPMENT OF ALTERNATIVE FISHING GEAR

§ 19900. Revocation or non-renewal of permit

19900. (a) Except as provided in subdivision (c), if an experimental permit that was issued pursuant to Chapter 5 (commencing with Section 12050) of Title 2 of Part 4 is not renewed, or is revoked or not renewed, pursuant to a judgment, decision of the commission, or legislative enactment, and the permittee has an outstanding loan with the State Coastal Conservancy under former Section 31125 of the Public Resources Code, as added by Chapter 910 of the Statutes of 1986, for the purchase of alternative fishing gear, the unpaid balance of the loan shall be excused from the date of revocation or nonrenewal of the permit, or from the date of any judgment, decision, or enactment that terminates the permit, if the permittee relinquishes the permit and returns the collateral fishing gear to the department, in which case the department shall take possession of the alternative fishing gear for the State Coastal Conservancy.

(b) Any alternative gear received by the department due to a revocation, nonrenewal, or termination of an experimental permit may be resold by the State Coastal Conservancy at fair market value to other experimental permit applicants or holders under this chapter. If the permittee chooses to keep the alternative gear and repay the loan, the rate of interest shall be reduced to 3 percent for the remaining balance of the loan.

(c) If the Legislature approves the permanent use or type of gear and the commercial fishing permit or the license for the permanent use or type of gear is revoked for a violation of the terms and conditions under which the fishery is conducted, the permittee shall be responsible for any remaining balance on any outstanding loan with the State Coastal Conservancy for the purchase of alternative fishing gear.

Comment. Section 19900 continues former Fish and Game Code Section 8614 without substantive change.

Note. Proposed Section 19900(a) would revise existing Section 8614 to replace a reference to Section 8606 (which was repealed by 2018 Cal. Stat. ch. 477) with a reference to “Chapter 5 (commencing with Section 12050) of Title 2 of Part 4.” That approach is based on similar changes made by 2018 Cal. Stat. ch. 477, §§ 5, 6, & 8. **The Commission invites comment on whether that revision is the proper way to conform to the repeal of Section 8606.**

§ 19910. Request to terminate permit

19910. (a) Within the first six months of operation pursuant to an experimental permit and after a reasonable and concerted effort to utilize a new type of commercial fishing gear, the permittee may request that the experimental permit be terminated, if it is economically infeasible to harvest the target species or if the alternative gear is impractical, inefficient, or ineffective within the fishery or regional area selected. The permittee shall submit copies of all landing receipts, a financial statement setting forth the expenses and any revenue generated by the

1 operation of the alternative fishing gear, and a brief summary from any observers,
2 monitors, and employees regarding the operation of the alternative fishing gear to
3 the department. The department shall review the permittee's submitted material.

4 (b) If the submitted material supports the claim that the new type of commercial
5 fishing gear utilized by the permittee was either inefficient, impractical, or
6 ineffective, or that it was not economically feasible for the permittee to harvest the
7 target species, the department shall terminate the experimental permit and submit
8 its findings to the State Coastal Conservancy. Upon receiving the department's
9 report, the State Coastal Conservancy may terminate the permittee's loan. If the
10 permittee returns the collateral fishing gear to the department, the State Coastal
11 Conservancy shall reimburse the permittee from the loan fund for the principal
12 amount of the loan repaid by the permittee. The department shall take possession
13 of the fishing gear for the State Coastal Conservancy, which may resell the gear as
14 set forth in Section 19900.

15 (c) If the information does not support the claim made by the permittee, the
16 department may still terminate the experimental permit. The State Coastal
17 Conservancy may terminate the remaining balance on the loan if the permittee
18 returns the collateral fishing gear to the department, but the State Coastal
19 Conservancy shall not reimburse the permittee for previous loan payments.

20 (d) After six months of operation pursuant to an experimental permit, any
21 request to terminate the permit for the reasons set forth in subdivision (a) shall
22 include, in addition to the information required by subdivision (a), an explanation
23 of the changed circumstances or reasons that cause the new type of gear to become
24 inefficient, impractical, or ineffective or economically infeasible to harvest the
25 target species after the initial six-month operating period. The department shall
26 review the request and make its recommendation to the State Coastal Conservancy
27 following the procedures set forth in subdivisions (b) and (c). If the department
28 terminates the experimental gear permit, the State Coastal Conservancy may
29 terminate the remaining balance on the loan if the permittee returns the collateral
30 fishing gear to the department, but it shall not reimburse the permittee for any loan
31 payments received. The department shall take possession of the alternative fishing
32 gear for the State Coastal Conservancy, which may resell the gear as set forth in
33 Section 19900.

34 **Comment.** Section 19910 continues former Fish and Game Code Section 8615 without
35 substantive change.

1 TITLE 8. COMMERCIAL TAKE OF FRESHWATER FISH

2 CHAPTER 1. GENERAL PROVISIONS [*RESERVED*]

3 CHAPTER 2. TAKE

4 § 20100. Allowed take

5 20100. (a) The following fresh-water fish may be taken for commercial purposes
6 pursuant to regulations adopted by the commission:

7 (a) Threadfin shad (*Dorosoma petenense*).

8 (b) Species of the following families:

9 (1) Carp or minnow (Cyprinidae).

10 (2) Cichlid (Cichlidae).

11 (3) Goby (Gobiidae).

12 (4) Killifish (Cyprinodontidae).

13 (5) Lamprey (Petromyzontidae).

14 (6) Livebearer (Poeciliidae).

15 (7) Mullet (Mudilidae).

16 (8) Sculpin (Cottidae).

17 (8) Silverside (Antherinidae).

18 (9) Smelt (Osmeridae).

19 (10) Stickleback (Casterosteidae).

20 (11) Sucker (Catostomidae).

21 (b) The commission may authorize the use of commercial fishing gear and
22 fishing methods to take any fish listed in this section, in those areas of the state
23 otherwise closed to that use pursuant to this code.

24 **Comment.** Subdivision (a) of Section 20100 continues former Fish and Game Code Section
25 8437 without substantive change.

26 Subdivision (b) continues former Fish and Game Code Section 8437.1 without substantive
27 change.

28 § 20105. Centrarchidae

29 20105. Except as provided in subdivision (b), fish of the family Centrarchidae
30 (Sacramento perch, crappie, black bass, and sunfish) shall not be taken or
31 possessed for a commercial purpose, sold, or purchased, other than fish that are
32 cultured pursuant to Part 1 (commencing with Section 23305) of Division 7.

33 (b) Notwithstanding subdivision (a), the commission shall adopt regulations
34 which authorize the importation and sale of dead fish of the family Centrarchidae
35 if the fish have been lawfully taken outside of California, they have been taken in
36 another state or foreign country that permits their sale, and they are brought into
37 California with a bill of lading or similar accountable documentation specifying
38 the origin of the fish.

1 **Comment.** Subdivision (a) of Section 20105 continues former Fish and Game Code Section
2 8436 without substantive change.

3 Subdivision (b) continues former Fish and Game Code Section 8436.5 without substantive
4 change.

5 TITLE 9. FISH-RELATED BUSINESSES

6 CHAPTER 1. GENERAL PROVISIONS

7 Article 1. Definitions

8 **§ 20150. Application**

9 20150. The definitions in this article govern the construction of this title.

10 **Comment.** Section 20150 continues the introductory clause of former Fish and Game Code
11 Section 8031(a) without substantive change.

12 **§ 20155. “Commercial fisherman”**

13 20155 “Commercial fisherman” means a person who has a valid, unrevoked
14 commercial fishing license issued pursuant to Section 14500.

15 **Comment.** Section 20155 continues former Fish and Game Code Section 8031(a)(4) without
16 substantive change.

17 **§ 20160. “Import”**

18 20160. “Import” means receiving or purchasing fish taken outside of this state
19 which are not landed in this state by a licensed commercial fisherman.

20 **Comment.** Section 20160 continues former Fish and Game Code Section 8031(a)(3) without
21 substantive change.

22 **§ 20165. “Process fish”**

23 20165. (a) “Process fish” means any activity for profit of preserving or
24 preparing fish for sale or delivery to other than the ultimate consumer, including,
25 but not limited to, cleaning, cutting, gutting, scaling, shucking, peeling, cooking,
26 curing, salting, canning, breeding, packaging, or packing fish. “Process fish” also
27 means the activity for profit of manufacturing fish scraps, fish meal, fish oil, or
28 fertilizer made from fish.

29 (b) “Process fish” does not include the cleaning, beheading, gutting, or chilling
30 of fish by a licensed commercial fisherman which is required to preserve the fish
31 while aboard a fishing vessel and which is to prevent deterioration, spoilage, or
32 waste of the fish before they are landed and delivered to a person licensed to
33 purchase or receive fish from a commercial fisherman.

34 **Comment.** Section 20165 continues former Fish and Game Code Section 8031(a)(1) without
35 substantive change.

1 **§ 20170. “Wholesale**

2 20170. “Wholesale” means the purchase of fish from persons licensed to
3 purchase or receive fish from a commercial fisherman, processors, importers, or
4 any other wholesaler for the purpose of resale to other than the ultimate consumer.

5 **Comment.** Section 20170 continues former Fish and Game Code Section 8031(a)(2) without
6 substantive change.

7 Article 2. Licensing Generally

8 **§ 20200. Activity requiring license**

9 20200. Any person who engages in any business for profit involving fish shall
10 be licensed pursuant to this article, except as follows:

11 (a) A commercial fisherman who sells fish only to persons who are licensed
12 under this article to purchase or receive fish from commercial fishermen and who
13 does not engage in any activity described in Section 20350, 20400, or 20550
14 unless licensed to engage in both activities.

15 (b) A person licensed pursuant to Section 22100 who only takes, transports, or
16 sells live freshwater fish for bait.

17 (c) A person who sells fish or aquaculture products only at retail to the ultimate
18 consumer if that person does not conduct any activities described in Section
19 20350, 20450, or 20550.

20 (d) Pursuant to Part 1 (commencing with Section 23300) of Division 7, a person
21 who deals only in products of aquaculture.

22 (e) A person who deals only with nonnative live products that are not utilized for
23 human consumption but that are utilized solely for pet industry or hobby purposes
24 and who does not engage in the activities described in Section 20600.

25 (f) A person who is employed by the fish receiver to unload fish or fish products
26 from a commercial fishing boat at a dock.

27 (g) A person who purchases, sells, takes, or receives live marine fish for use as
28 live bait, that are not brought ashore, and who does not engage in any activity
29 described in Section 20350, 20450, 20600, 20400, or 20550.

30 (h) A person who does not purchase or obtain fish, but who acts as an agent for
31 others while negotiating purchases, or sales of fish in return for a fee, commission,
32 or other compensation.

33 **Comment.** Section 20200 continues former Fish and Game Code Section 8030 without
34 substantive change.

35 **§ 20205. Types of licenses**

36 20205. (a) A multi-function commercial fish business license shall be issued that
37 authorizes any or all activities described in Section 20350, 20400, 20450, or
38 20550.

39 (b) Specialty licenses for part of, but not all, activities described in subdivision
40 (a) shall be issued in five classes, as follows:

(1) A fish importer's license, issued to any person who is engaged in the business of importing fish as provided in Section 20350.

(2) A fish processor's license, issued to any person engaged in the business of processing fish as provided in Section 20400.

(3) A fish receiver's license, issued to any person engaged in the business of receiving fish as provided in Section 20450.

(4) A fish wholesaler's license, issued to any person who is engaged in the business of wholesaling fish as provided in Section 20550.

(5) A marine aquaria receiver's license, issued to any person engaged in the business of receiving live marine species indigenous to California waters from a person required to be a licensed commercial fisherman for the purpose of wholesaling or retailing those species for pet industry or hobby purposes as provided in Section 20600.

Comment. Subdivision (a) of Section 20205 continues the first sentence of former Fish and Game Code Section 8032(a) without substantive change.

Subdivision (b) restates former Fish and Game Code Section 8032(b) without substantive change.

Note. Proposed Section 20205(a) would identify the "commercial fish business license" referenced in the first sentence of existing Fish and Game Code Section 8032(a) as a "multi-function commercial fish business license," using the nomenclature assigned to that license by the Department of Fish and Wildlife.

§ 20210. Conditions of license

20210. Unless otherwise specified, all of the following conditions apply to each commercial fish business license, permit, or other entitlement issued pursuant to this title:

(a) An application for a commercial fish business license, permit, or other entitlement shall be made on a form containing information as required by the department.

(b) A commercial fish business license shall be signed by the holder before use.

(c) A person who has had a commercial fish business license suspended or revoked shall not engage in that business activity, and shall not receive any other commercial fish business license, permit, or other entitlement that authorizes engaging in that business activity, while the suspension or revocation is in effect.

(d) A commercial fish business license, permit, or other entitlement is not transferable, unless otherwise expressly specified in this code.

(e) Any person who holds a commercial fish business license, permit, or other entitlement, who moves or acquires a new or additional plant, facility, or other place of business for profit involving fish, shall notify the department of the address within three months of commencing business activities at the address.

(f) Each plant, facility, or other place of business in which an activity occurs that is required to be licensed under this title shall have a copy of each required license on display and available for inspection at any time by the department.

(g) Any person required to be licensed pursuant to this title shall provide the department, at the time of application, with the business name, business address, and business telephone number for all locations doing business under the authority of the person's commercial fish business license, permit, or entitlement.

(h) Any person licensed pursuant to this title who is subject to landing fees as defined in Section 20950, and has failed to pay all landing fees and penalties pursuant to Section 21350, shall not be allowed to renew or obtain a commercial fish business license, permit, or entitlement, until payment is made in full to the department.

(i) Any person licensed pursuant to this title who is subject to landing fees as defined in Section 20950, and fails to submit landing receipts pursuant to Section 21150), may be subject to suspension or revocation of his or her commercial fish business license, permit, or entitlement.

Comment. Section 20210 continues former Fish and Game Code Section 8032.5(a), (b), and (d)-(i) without substantive change.

§ 20215. Term of license

20215. A license issued under this title is valid from January 1 to December 31, inclusive, or, if issued after the beginning of that term, for the remainder of that term.

Comment. Section 20215 continues former Fish and Game Code Section 8038 without substantive change.

§ 20220. License on premises of business

20220. Each plant, facility, or other place of business in which an activity occurs that is required to be licensed pursuant to this title shall have a copy of the required license on the premises.

Comment. Section 20220 continues the second sentence of former Fish and Game Code Section 8037(a) without substantive change.

Note. Proposed Section 20220 would continue the second sentence of existing Fish and Game Code Section 8037(a).

Section 8037(a) in its entirety reads as follows (with the second sentence italicized):

A person who engages in business involving fish which business activity would require more than one class of license under this article shall obtain either a commercial fish business license issued under subdivision (a) of Section 8032 or each of the specialty licenses which are required for the classes of activities engaged in. *Each plant, facility, or other place of business in which an activity occurs that is required to be licensed shall have a copy of the required license.*

The Commission invites comment on whether proposed Section 20220 correctly continues the intended application of the second sentence of existing Section 8037(a).

§ 20225. Possession and display of identification

20225. (a) At all times when engaged in any activity for which a commercial fishing license is required, or in any activity described in this title for which a commercial fish business license is required, the person engaged in that activity

1 shall have in his or her possession, or immediately available to the person, a valid
2 driver's license or identification card issued to him or her by the Department of
3 Motor Vehicles, or by the entity issuing driver's licenses from the person's state of
4 domicile.

5 (b) The driver's license or identification card shall be exhibited upon demand to
6 any person authorized by the department to enforce this code, or regulations
7 adopted pursuant to this code.

8 **Comment.** Section 20225 continues the part of former Fish and Game Code Section 7852.27
9 applicable to fishing business licenses without substantive change.

10 **Note.** Existing Fish and Game Code Section 7852.27 (which, as applicable to fish business
11 licenses would be continued by proposed Section 20225), in requiring a license to have in
12 possession at all times a valid driver's license or identification card, appears to limit "persons"
13 who may receive a fish business license to only natural persons. Given that existing Section 67
14 defines "person" as including a partnership, corporation, limited liability company, trust, or other
15 type of association, is it the intent of this provision to foreclose any of these listed entities from
16 being issued a fish business license in the name of the entity?

17 **The Commission invites comment on this issue.**

18 **§ 20230. Fee for multi-function fish business license**

19 20230. (a) The annual fee for a multi-function commercial fish business license
20 is one thousand three hundred seventy-three dollars (\$1,373).

21 (b) The commission shall adjust the amount of the fee specified in subdivision
22 (a), as necessary, to fully recover, but not exceed, all reasonable administrative
23 and implementation costs of the department and the commission relating to those
24 licenses.

25 (c) The fee specified in this section is applicable to the 2004 license year, and
26 shall be adjusted annually thereafter pursuant to Section 3755.

27 **Comment.** Subdivision (a) of Section 20230 continues the second sentence of former Fish and
28 Game Code Section 8032(a) without substantive change.

29 Subdivision (b) continues former Fish and Game Code Section 8032(c) without substantive
30 change.

31 Subdivision (c) continues the part of former Fish and Game Code Section 8039 applicable to
32 multi-function commercial fish business licenses without substantive change.

33 **§ 20235. Denial of application based on prior dishonored check**

34 20235. Notwithstanding any other provision of law, the department may deny
35 the issuance or renewal of any license, permit, or other authorization to conduct
36 business involving fish, that are issued pursuant to this part, or the renewal thereof,
37 if the applicant for that authorization or renewal has, within the preceding year,
38 issued to the department a check that was dishonored by the bank upon which the
39 check was drawn and the person has failed to reimburse the department for the
40 amount due plus a fee of thirty dollars (\$30) and any dishonored check charges
41 incurred by the department.

1 **Comment.** Section 20235 continues the part of former Fish and Game Code Section 7852.25
2 applicable to licenses and other entitlements related to fish businesses without substantive
3 change.

4 CHAPTER 2. SPECIALTY LICENSES

5 Article 1. General Provisions

6 **§ 20300. Licensing for persons engaged in multiple businesses**

7 20300. A person who engages in business involving fish which business
8 activity would require more than one class of license under this chapter shall
9 obtain either a multi-function commercial fish business license pursuant to
10 subdivision (a) of Section 20205, or shall obtain each specialty license required for
11 each activity engaged in, as provided in this chapter.

12 **Comment.** Section 20300 continues the first sentence of former Fish and Game Code Section
13 8037(a) without substantive change.

14 Article 2. Fish Importer

15 **§ 20350. Required license**

16 20350. Any person who purchases or receives fish that are taken outside of this
17 state and brought into this state by a person who is not a licensed commercial
18 fisherman, for the purpose of resale to other than the ultimate consumer, shall
19 obtain a fish importer's license.

20 **Comment.** Section 20350 continues the first sentence of former Fish and Game Code Section
21 8036(a) without substantive change.

22 **§ 20355. Fee**

23 20355. (a) The annual fee for a fish importer's license is five hundred forty-nine
24 dollars (\$549).

25 (b) The fee specified in this section is applicable to the 2004 license year, and
26 shall be adjusted annually thereafter pursuant to Section 3755.

27 **Comment.** Subdivision (a) of Section 20355 continues the second sentence of former Fish and
28 Game Code Section 8036(a) without substantive change.

29 Subdivision (b) continues the part of former Fish and Game Code Section 8039 applicable to
30 the fee for a fish importer's license, without substantive change.

31 Article 3. Fish Processor

32 **§ 20400. Required license**

33 20400. Any person who processes fish for profit shall obtain a fish processor's
34 license.

35 **Comment.** Section 20400 continues the first sentence of former Fish and Game Code Section
36 8034(a) without substantive change.

1 **§ 20405. Fee**

2 20405. (a) The annual fee for a fish processor's license is five hundred forty-
3 nine dollars (\$549).

4 (b) The fee specified in this section is applicable to the 2004 license year, and
5 shall be adjusted annually thereafter pursuant to Section 3755.

6 **Comment.** Subdivision (a) of Section 20405 continues the second sentence of former Fish and
7 Game Code Section 8034(a) without substantive change.

8 Subdivision (b) continues the part of former Fish and Game Code Section 8039 applicable to
9 the fee for a fish processor's license, without substantive change.

10 Article 4. Fish Receiver

11 **§ 20450. Required license**

12 20450. (a) Except as provided in subdivision (b), any person who purchases or
13 receives fish for commercial purposes from a fisherman who is required to be
14 licensed under Section 14500, or any person who removes fish from the point of
15 the first landing that the person has caught for his or her own processing or sale,
16 shall obtain a fish receiver's license.

17 (b) Subdivision (a) does not apply to the following persons:

18 (1) A person who holds a valid and unrevoked marine aquaria receiver license.

19 (2) A person who holds a valid and unrevoked fisherman's retail license.

20 (3) Transporting fish from the point of first landing to a fish receiver under a
21 transportation receipt completed pursuant to Chapter 4 (commencing with Section
22 21200) of Title 10.

23 **Comment.** Section 20450 combines and restates former Fish and Game Code Sections 8033(a)
24 and 8047(c)(4) without substantive change.

25 **Note.** Proposed Section 20450 is intended to combine and restate existing Fish and Game
26 Code Sections 8033(a) and 8047(c)(4) to clarify the meaning of those provisions, without
27 changing their substantive meaning. The existing provisions read as follows:

28 8033. (a) Except as provided in Section 8033.1 or 8033.5, or subdivision (c) of Section 8047,
29 any person who purchases or receives fish for commercial purposes from a fisherman who is
30 required to be licensed under Section 7850, or any person who removes fish from the point of the
31 first landing that the person has caught for his or her own processing or sale, shall obtain a fish
32 receiver's license.

33 8047. (c)(4) A person transporting fish from the point of first landing under a transportation
34 receipt is not required to be licensed to conduct the activities of a fish receiver as described in
35 Section 8033.

36 **The Commission invites comment on whether proposed Section 20450 accurately**
37 **continues the intended meaning of existing Sections 8033(a) and 8047(c)(4).**

38 **§ 20455. License fee**

39 20455. (a) The annual fee for a fish receiver's license is five hundred forty-nine
40 dollars (\$549).

(b) The fee specified in this section applies to the 2004 license year, and shall be adjusted annually thereafter pursuant to Section 3755.

Comment. Subdivision (a) of Section 20455 continues former Fish and Game Code Section 8033(b) without substantive change.

Subdivision (b) continues the part of former Fish and Game Code Section 8039 applicable to the fee for a fish receiver's license, without substantive change.

§ 20460. Cooperative association

20460. A cooperative association of fishers may be licensed as fish receivers.

Comment. Section 20460 continues former Fish and Game Code Section 8033(c) without substantive change.

Article 5. Fish Retailer

§ 20500. Required license

20500. Any commercial fisherman who sells fish for other than marine aquaria pet trade or research purposes that he or she has taken to the ultimate consumer of that fish shall obtain a fisherman's retail license.

Comment. Section 20500 continues the first sentence of former Fish and Game Code Section 8033.5(a) without substantive change.

§ 20505. Fee

20505. (a) The annual fee for a fish retailer's license is sixty-nine dollars (\$69).

(b) The fee specified in this section is applicable to the 2004 license year, and shall be adjusted annually thereafter pursuant to Section 3755.

Comment. Subdivision (a) of Section 20505 continues the second sentence of former Fish and Game Code Section 8033.5(a) without substantive change.

Subdivision (b) continues the part of former Fish and Game Code Section 8039 applicable to the fee for a fish retailer's license without substantive change.

Article 6. Fish Wholesaler

§ 20550. Required license

20550. (a) Except as provided in Section 20200, any person who, for the purpose of resale to other than the ultimate consumer, purchases or obtains fish from another person, who is required to be licensed as a fish receiver, fish processor, fish importer, or fish wholesaler under this title, shall obtain a fish wholesaler's license.

(b) This section does not apply to either of the following:

(1) Persons required to have a marine aquaria receiver's license pursuant to Section 20600.

(2) Persons licensed pursuant to Section 20350 who only purchase or obtain fish from outside this state.

1 **Comment.** Subdivision (a) of Section 20550 continues former Fish and Game Code Section
2 8035(a) without substantive change.

3 Subdivision (b) continues former Fish and Game Code Section 8035(c) without substantive
4 change.

5 **§ 20555. Fee**

6 20555. (a) The annual fee for a fish wholesaler's license is three hundred
7 seventy-one dollars (\$371).

8 (b) The fee specified in this section is applicable to the 2004 license year, and
9 shall be adjusted annually thereafter pursuant to Section 3755.

10 **Comment.** Subdivision (a) of Section 20555 continues former Fish and Game Code Section
11 8035(b) without substantive change.

12 Subdivision (b) continues the part of former Fish and Game Code Section 8039 applicable to
13 the fee for a fish wholesaler's license, without substantive change.

14 Article 7. Marine Aquaria Receiver

15 **§ 20600. Required license**

16 20600. Any person engaged in any of the following activities involving species
17 identified in Section 20710 shall obtain a nontransferable marine aquaria
18 receiver's license:

19 (a) A person who is required to have a marine aquaria collector's permit
20 pursuant to Section 20705 who sells live marine organisms indigenous to
21 California, that the person has taken, to the ultimate consumer.

22 (b) A person who purchases or receives live marine species indigenous to
23 California for commercial purposes from any of the following:

24 (1) A fisherman who is required to have a marine aquaria collector's permit
25 pursuant to Section 20705.

26 (2) A person who imports from neighboring states species that are also
27 indigenous to California waters.

28 **Comment.** Section 20600 continues former Fish and Game Code Section 8033.1(a) without
29 substantive change.

30 **§ 20605. License fee**

31 20605. (a) The annual fee for a marine aquaria receiver's license is one thousand
32 three hundred seventy-three dollars (\$1,373).

33 (b) The fee specified in this section is applicable to the 2004 license year, and
34 shall be adjusted annually thereafter pursuant to Section 3755.

35 **Comment.** Subdivision (a) of Section 20605 continues former Fish and Game Code Section
36 8033.2 without substantive change.

37 Subdivision (b) continues the part of former Fish and Game Code Section 8039 applicable to
38 the fee for a marine aquaria receiver's license, without substantive change.

1 **§ 20610. Source of indigenous organisms**

2 20610. A person required to be licensed as a marine aquaria receiver shall obtain
3 all live marine organisms indigenous to California waters only from fishermen,
4 aquaculturists, or importers who hold current and appropriate licenses or permits.

5 **Comment.** Section 20610 continues former Fish and Game Code Section 8033.1(b) without
6 substantive change.

7 **CHAPTER 3. MARINE AQUARIA PET TRADE**

8 **§ 20700. Definitions**

9 20700. The following definitions govern the construction of this chapter:

10 (a) “Marine aquaria pet trade” means any activities connected with collecting,
11 holding, selling, and displaying live aquatic marine life for pet, hobby, curio, or
12 display purposes. “Marine aquaria pet trade” does not include activities connected
13 with collecting, holding, selling, or displaying live aquatic marine life by, or for,
14 scientific institutions exempted from permits pursuant to subdivision (c) of Section
15 26710.

16 (b) “Drop net” means a small, circular net with weights attached along the
17 perimeter and a single float attached at the center. A drop net is not more than 48
18 inches in its greatest diameter.

19 **Comment.** Section 20700 continues former Fish and Game Code Section 8596 without
20 substantive change.

21 **§ 20705. Permit requirement**

22 20705. (a) It is unlawful for any person to take, possess aboard a boat, or land,
23 for a marine aquaria pet trade purpose, any live organism identified in Section
24 20710, unless that person has a valid marine aquaria collector’s permit that has not
25 been suspended or revoked. If the activity takes place on board or from a boat on
26 which more than one person is aboard, at least one person aboard the boat shall
27 have a valid marine aquaria collector permit.

28 **Comment.** Section 20705 continues former Fish and Game Code Section 8597(a) without
29 substantive change.

30 See also Section 5106 (enforcement).

31 **§ 20710. Permitted organisms**

32 20710. Except as provided in Section 20725, and unless otherwise prohibited in
33 this code, or regulations adopted pursuant to this code, specimens of the following
34 groups or species may be taken, possessed aboard a boat, or landed under a marine
35 aquaria collector’s permit:

36 (a) Marine plants:

37 (1) Chlorophyta.

38 (2) Phaeophyta.

39 (3) Rhodophyta.

40 (4) Spermatophyta, all species.

- (b) Invertebrates:
 - (1) Polychaeta—worms; all species.
 - (2) Crustacea—shrimp, crabs; all species, except the following:
 - (A) Dungeness crab—*Cancer magister*.
 - (B) Yellow crab—*Cancer anthonyi*.
 - (C) Red crab—*Cancer productus*.
 - (D) Sheep crab—*Loxorhynchus grandis*.
 - (E) Spot prawn—*Pandalus platyceros*.
 - (F) Ridgeback prawn—*Sicyonia ingentis*.
 - (G) Golden prawn—*Penaeus californiensis*.
 - (H) Sand crab—*Emerita analoga*.
 - (I) Redrock shrimp—*Lysmata californica*.
 - (J) Bay shrimp—*Crangon* sp. and *Palaemon macrodactylus*.
 - (K) Ghost shrimp—*Callinassa* sp.
 - (3) Asteroidea—Sea stars; all species.
 - (4) Ophiuroidea—Brittle stars; all species.
 - (5) Gastropoda—snails, limpets, sea slugs; all species, except Kellet’s whelk—*Kelletia kelleti*.
 - (6) Bivalvia—clams and mussels; all species.
 - (7) Polyplacophora—Chitons; all species.
 - (8) Cephalopoda—Octopuses and squids; all species, except two spot octopuses—*Octopus bimaculatus* and *Octopus maculoides*—and market squid—*Loligo opalescens*.
 - (9) Tunicata—Sea squirts; all species.
- (c) Vertebrates:
 - (1) Osteichthyes—Finfishes; all species, except the following:
 - (A) Rockfish—*Sebastes* sp. larger than six inches total length.
 - (B) Sheephead—*Semicossyphus pulcher* larger than six inches total length.
 - (C) Anchovy—*Engraulis mordax*.
 - (D) Sardine—*Sardinops sagax*.
 - (E) Pacific/chub —*Scomber japonicus*.
 - (F) Jack mackerel—*Trachurus symmetricus*.
 - (G) Queenfish—*Seriphus politus*.
 - (H) White Croaker—*Genyonemus lineatus*.
 - (I) Top smelt—*Atherinops affinis*.
 - (J) Grunion—*Leuresthes tenuis*.
 - (K) Shiner surf perch—*Cymatogaster aggregata*.
 - (L) Longjawed mudsucker—*Gillichthys mirabilis*.
 - (2) Chondrichthyes—sharks, rays, and skates; all species less than 18 inches total length, except that leopard shark (*Triakis semifasciata*) shall be 36 inches or larger in total length.

Comment. Section 20710 continues former Fish and Game Code Section 8597(b) without substantive change.

1 **§ 20715. Scope of permit**

2 20715. The holder of a permit issued pursuant to this title is not required to
3 obtain or possess a kelp harvester's license issued pursuant to Section 54030, a
4 tidal invertebrate permit issued pursuant to Section 45010, or a general trap permit
5 issued pursuant to Section 19205, when taking, possessing, or landing a live
6 organism for a marine aquaria pet trade purpose pursuant to subdivision (b),
7 subject to regulations governing the taking of tidal invertebrates. The commission
8 shall adopt regulations to implement this section, and, for that purpose, may
9 incorporate other regulations by reference.

10 **Comment.** Section 20715 continues former Fish and Game Code Section 8597(c) without
11 substantive change.

12 **§ 20720. Prohibited take or possession**

13 20720. (a) Notwithstanding Section 14260 or Section 20710, specimens of the
14 following groups or species shall not be taken, possessed aboard a boat, or landed
15 for a commercial purpose. Taking, possessing, or landing of any of the following
16 species in a commercial operation is prima facie evidence that it was taken,
17 possessed, or landed for a commercial purpose:

18 (1) Invertebrates:

19 (A) Phylum Porifera—all sponges.

20 (B) Genus *Pelagia* sp.—jellyfish.

21 (C) Coelenterata—corals, anemones; all species.

22 (D) Order Gorgonacea—all gorgonians.

23 (E) Order Pennatulacea—all species, except *Renilla kollikeri*.

24 (F) Feather-duster worm—*Eudistylia polymorpha*.

25 (G) Fiddler crab—*Uca crenulata*.

26 (H) Umbrella crab—*Cryptolithodes sitchensis*.

27 (I) Stalked or goose barnacles—*Pollicipes* sp.

28 (J) Giant acorn barnacle—*Balanus nubilus* or *B. aguilula*.

29 (K) Owl limpet—*Lottia gigantea*.

30 (L) Coffee bean shells—*Trivia* sp.

31 (M) Three-winged murex—*Pteropurpura trialata*.

32 (N) Vidler's simnia—*Simnia vidleri*.

33 (O) Queen tegula—*Tegula regina*.

34 (P) Opisthobranchia (including nudibranchs)—all subclass Opisthobranchia
35 species except:

36 (i) Sea hares—*Aplysia californica* and *Aplysia vaccaria*.

37 (ii) *Hermisenda crassicornis*.

38 (iii) Lion's mouth—*Melibe leonina*.

39 (iv) *Aeolidia papillosa*.

40 (v) Spanish shawl—*Flabellina iodinea*.

41 (2) Vertebrates:

42 (A) All shark and ray eggcases.

1 (B) Brown smoothhound sharks—*Mustelus hinlei*—that are less than 18 inches
2 in a whole condition or dressed with head and tail removed.

3 (C) Family Agonidae—all poachers.

4 (D) Wolf-eel—*Anarrhichthys ocellatus*.

5 (E) Juvenile sheephead—*Semicossyphus pulcher* (under six inches).

6 (F) Garibaldi—*Hypsypops rubicundus*.

7 (3) Live rocks.

8 (A) Rocks with living organisms attached, commonly called “live rocks,” shall
9 not be taken or possessed except as provided in subparagraph (C).

10 (B) Rocks shall not be broken to take marine aquaria species, and any rock
11 displaced to access any of those species shall be returned to its original position.

12 (C) Rocks cultured under the authority of an aquaculture registration may be
13 possessed.

14 (b) No organisms may be taken, possessed, or landed for a marine aquaria pet
15 trade purpose under the terms of a marine aquaria collector’s permit in any of the
16 following areas:

17 (1) On the north side of Santa Catalina Island from a line extending three
18 nautical miles 90 degrees true from Church Rock to a line extending three nautical
19 miles 270 degrees true from the extreme west end of the island.

20 (2) On the south or “back” side of Santa Catalina Island from a line extending
21 three nautical miles 90 degrees true from Church Rock to a line extending three
22 nautical miles 270 degrees true from the extreme west end of the island.

23 (3) A marine life refuge, marine reserve, ecological reserve, or state reserve.

24 **Comment.** Section 20720 continues former Fish and Game Code Section 8598 without
25 substantive change.

26 See also Section 5106 (enforcement).

27 **§ 20725. Methods of take**

28 20725. (a) Marine organisms identified in Section 20710 shall not be taken
29 except by the following methods:

30 (1) Hook and line.

31 (2) Drop net.

32 (3) Dip Net.

33 (4) Trap.

34 (5) Hand.

35 (6) Slurp gun.

36 (7) Spatula.

37 (b) Chemical anesthetics, poisons, or irritants shall not be used or possessed by
38 any person taking or possessing fish, plants, or other marine organisms for the
39 marine aquaria industry. For the purposes of this section, chemicals commonly
40 used aboard vessels for insect and rodent control may be possessed aboard a vessel
41 if no means of delivering those chemicals, including, but not limited to, squirt

bottles, that can be used to target those marine organisms, is possessed aboard the vessel.

(c) Appliances shall be used so that rocks or other mineral matter, aquatic plants, fish, or other aquatic life not listed in Section 20710 are not removed from the bottom or otherwise disturbed.

Comment. Section 20725 continues former Fish and Game Code Section 8598.2 without substantive change.

See also Section 5106 (enforcement).

§ 20730. Permit fee

20730. (a) The fee for a marine aquaria collector's permit shall be three hundred thirty dollars (\$330).

(b) A person engaged in taking, possessing, or landing marine species under a marine aquaria collector's permit shall not take, possess aboard a boat, or land any species under the authority of a scientific collector's permit issued pursuant to Section 9200, 38200, or 58630 on the same fishing trip.

(c) The commission shall adjust the amount of the fee specified in subdivision (a), as necessary, to fully recover, but not exceed, all reasonable administrative and implementation costs of the department and the commission relating to marine aquaria collector's permits.

Comment. Section 20730 continues former Fish and Game Code Section 8598.3(a) and (c) without substantive change.

§ 20735. Concurrent take or possession under scientific collector's permit

20735. A person engaged in taking, possessing, or landing marine species under a marine aquaria collector's permit shall not take, possess aboard a boat, or land any species under the authority of a scientific collector's permit issued pursuant to Section 9200, 38200, or 58630, on the same fishing trip.

Comment. Section 20735 continues former Fish and Game Code Section 8598.3(b) without substantive change.

§ 20740. Closure of fishery

20740. (a) Notwithstanding any other provision of this code, the director may close any portion of the fishery established under this chapter or any area in which that fishery is conducted, if, upon written finding, the director determines the action is necessary to protect any organisms listed in Section 20710, or the environment in which any of those organisms are located.

(b) The director shall reopen a fishery or any fishing areas previously closed pursuant to this section, if the director determines that the condition or conditions that necessitated the closure no longer exist.

Comment. Section 20740 continues former Fish and Game Code Section 8598.4 without substantive change.

1 TITLE 10. LANDING FEES AND RECEIPTS

2 CHAPTER 1. GENERAL PROVISIONS

3 § 20900. Definitions

4 20900. The following definitions govern the construction of this title:

5 (a) “Commercial fisherman” means a person who has a valid, unrevoked
6 commercial fishing license issued pursuant to Section 14500.

7 (b) “Landing fee” means a fee imposed on a fish receiver or processor, as
8 described in Section 20950.

9 **Comment.** Section 20900 continues former Fish and Game Code Section 8040 without
10 substantive change.

11 § 20905. Information from marine aquaria receivers

12 20905. The department may require any information from a marine aquaria
13 receiver that the department deems necessary to carry out this title.

14 **Comment.** Section 20905 continues former Fish and Game Code Section 8043.1(b) without
15 substantive change.

16 CHAPTER 2. LANDING FEE

17 § 20950. Persons required to pay fee

18 20950. (a) The following persons shall pay the landing fee determined pursuant
19 to Section 20955:

20 (1) A person who is required to be licensed as a fish receiver, and any person
21 who is licensed before January 1, 1987, as a wholesaler or a processor pursuant to
22 former Fish and Game Code Section 8040 and who receives fish from commercial
23 fishermen.

24 (2) A commercial fisherman who sells fish to a person who is not a licensed fish
25 receiver.

26 (b) The following people are exempt from the landing fee imposed under this
27 title:

28 (1) A person licensed pursuant to Section 22100 who only takes, transports, or
29 sells live freshwater fish for bait.

30 (2) A commercial fisherman who sells live freshwater fish for bait to person
31 described in paragraph (1).

32 (3) A person licensed pursuant to Section 20600 who takes, transports, or sells
33 live aquaria fish as described in Section 20600.

34 (4) A commercial fisherman who sells live aquaria fish.

35 (c) It is the intent of the Legislature that the license fee for live aquaria fish
36 described in Section 20600 shall be in lieu of a landing fee imposed under this
37 title.

Comment. Section 20950 restates existing Fish and Game Code Section 8041 without substantive change.

See also Section 5150 (enforcement).

Notes. (1) Proposed Section 20950 is intended to restate existing Fish and Game Code Section 8041 for clarity, without changing their substantive effect. The existing provision reads as follows:

8041. (a) The following persons shall pay the landing fee determined pursuant to Section 8042:

(1) Any person who is required to be licensed as a fish receiver, and any person who is licensed before January 1, 1987, as a wholesaler or a processor pursuant to former Section 8040 and who receives fish from commercial fishermen.

(2) Any commercial fisherman who sells fish to any person who is not a licensed fish receiver.

(b) Notwithstanding subdivision (a), a person licensed pursuant to Section 8460 who only takes, transports, or sells live freshwater fish for bait or a commercial fisherman who sells live freshwater fish for bait to such a licensed person, and a person licensed pursuant to Section 8033.1 who takes, transports, or sells live aquaria fish as described in Section 8597 or a commercial fisherman who sells live aquaria fish, are exempt from the landing fee imposed under this article. It is the intent of the Legislature that the license fee for live aquaria fish described in Section 8033.1 shall be in lieu of a landing fee imposed under this article.

(c) Notwithstanding subdivision (a), a person who purchases, sells, takes, or receives live marine fish for use as live bait as described in subdivision (g) of Section 8030 is exempt from the landing fee imposed under this article.

The Commission invites comment on whether that restatement would cause any change in meaning.

(2) As indicated above, existing Section 8041 includes among the persons obligated to pay the fee, in addition to fish receivers, person “licensed before January 1, 1987, as a wholesaler or a processor pursuant to former Section 8040 and who receives fish from commercial fishermen.

It is not clear whether such persons still exist in practice. If not, the reference could perhaps be deleted as obsolete.

The Commission invites comment on that issue.

§ 20955. Calculation of fee

20955. (a) The amount of the landing fee under this article shall be determined by multiplying the weight of fish delivered in this state by a commercial fisherman, in pounds, or fraction of pounds, by the rate per pound for the type of fish delivered set forth in the following table:

	Rate per pound
Lobster	\$ 0.1333
Spot prawn and abalone	\$ 0.1000
Salmon and swordfish, based only on the weight in the round	\$ 0.0333
Halibut, sea cucumber, white seabass, sheephead, and Dungeness crab	\$ 0.0333
Shortspine thornyhead, sablefish, lingcod, and prawns and shrimp (except spot prawn and pink shrimp)	\$ 0.0133
Angel, thresher, and bonito sharks, based only on the weight in the round	\$ 0.0097
All fish and invertebrates unless otherwise specified	\$ 0.0067

1	Sea urchin, pink shrimp, smelts, soles, turbot, longspine thornyhead,	
2	night smelt, and sanddabs	\$ 0.0047
3	Bonito, flounder, grenadiers, herring, and skates	\$ 0.0027
4	Market squid	\$ 0.0023
5	Anchovy, mackerel, sardines, and Pacific whiting	\$ 0.0010

6 (b) If the fee is imposed based upon weight in the round, and the fish is cleaned,
7 gutted, beheaded, or otherwise not in the round at the time of delivery, the fee
8 shall be adjusted by a conversion factor as determined by the department by
9 regulation.

10 **Comment.** Subdivision (a) of Section 20955 combines and continues the first sentence of
11 former Fish and Game Code Section 8042, and former Fish and Game Code Section 8051,
12 without substantive change.

13 Subdivision (b) continues the second sentence of former Fish and Game Code Section 8042
14 without substantive change.

15 **§ 20960. Remittance of fee**

16 20960. Persons subject to Section 21000 shall remit the landing fee imposed by
17 Section 20950.

18 **Comment.** Section 20960 continues the second sentence of former Fish and Game Code
19 Section 8047(b) without substantive change.

20 **CHAPTER 3. LANDING RECEIPTS**

21 **Article 1. Completion**

22 **§ 21000. Persons required to complete receipt**

23 21000. The following persons are required to make a true, legible, and complete
24 landing receipt, on a form and in a manner prescribed by the department:

25 (a) The fish receiver, if any.

26 (b) The marine aquaria receiver, if any.

27 (c) A commercial fisherman who sells or delivers fish that he or she has taken to
28 any person who is not required to be licensed under Title 9 (commencing with
29 Section 20150).

30 (d) A person required to be licensed under Title 9 (commencing with Section
31 20150) who takes his or her own fish.

32 **Comment.** Subdivision (a) of Section 21000 combines and restates the second clause of the
33 first sentence of former Fish and Game Code Section 8043(a) and the second sentence of former
34 Fish and Game Code Section 8047(a)(2) without substantive change.

35 Subdivision (b) continues former Fish and Game Code Section 8043.1(a) without substantive
36 change.

37 Subdivision (c) combines and restates the first clause of the first sentence of former Fish and
38 Game Code Section 8043(a), the third sentence of former Fish and Game Code Section
39 8047(a)(2), and the first sentence of former Fish and Game Code Section 8047(b), without
40 substantive change.

Subdivision (d) continues the first clause of the first sentence of former Fish and Game Code Section 8047(a)(1) without substantive change.

See also Section 5104 (enforcement).

Note. Proposed Section 21000(a) is intended to combine and restate the second clause of the first sentence of existing Fish and Game Code Section 8043(a), and the second sentence of existing Fish and Game Code Section 8047(a)(2) (shown in italics), to clarify the meaning of those provisions without changing their substantive effect. The existing provisions read as follows:

8043. (a) Every ... person who is required to be licensed under Article 7 (commencing with Section 8030) to conduct the activities of a fish receiver, as described in Section 8033, shall make a legible landing receipt record on a form to be furnished by the department....

8047. (a)(2) A person licensed under Section 8033.5 who sells his or her fish to a licensed receiver may use a transportation receipt to transport those fish only to that licensed receiver. *The receiver shall complete a landing receipt for those fish....*

The Commission invites comment on whether the restatement of these provisions in proposed Section 21000(a) would cause any substantive change in the meaning of any of the provisions.

(2) Proposed Section 21000(c) is intended to combine and restate the first clause of the first sentence of existing Fish and Game Code Section 8043(a), the third sentence of existing Fish and Game Code Section 8047(a)(2) (shown in italics), and the first sentence of existing Fish and Game Code Section 8047(b), to clarify the meaning of those provisions without changing their substantive effect. The existing provisions read as follows:

8043. (a) Every commercial fisherman who sells or delivers fish that he or she has taken to any person who is not licensed under Article 7 (commencing with Section 8030)... shall make a legible landing receipt record on a form to be furnished by the department....

8047. (a)(2) A person licensed under Section 8033.5 who sells his or her fish to a licensed receiver may use a transportation receipt to transport those fish only to that licensed receiver. The receiver shall complete a landing receipt for those fish. *A person who sells his or her fish to the ultimate consumer shall complete a landing receipt pursuant to Sections 8043 and 8043.2.*

8047. (b) Every commercial fisherman who sells fish taken from the waters of this state or brought into this state in fresh condition to persons not licensed to receive fish for commercial purposes pursuant to Article 7 (commencing with Section 8030) shall make a legible record in the form of the landing receipt required by Sections 8043 and 8043.1....

The Commission invites comment on whether the restatement of these provisions in proposed Section 21000(c) would cause any substantive change in the meaning of any of the provisions.

§ 21005. When receipt must be completed

21005. (a) A fish receiver or commercial fisherman who is required to complete a landing receipt shall do so at the time of the receipt, purchase, or transfer of the fish, whichever occurs first.

(b) A marine aquaria receiver who is required to complete a landing receipt shall do so at the time of the receipt of the organisms.

(c) A person required to be licensed under Title 9 (commencing with Section 20150) who takes his or her own fish or marine aquaria organisms shall complete a landing receipt at the time the fish or marine aquaria organisms are brought ashore.

Comment. Subdivision (a) of Section 21005 restates the second sentence of former Fish and Game Code Section 8043(a) without substantive change.

Subdivision (b) restates the first sentence of former Fish and Game Code Section 8043.1(c) without substantive change.

Subdivision (c) combines and restates the second sentence of former Fish and Game Code Section 8043.1(c) and the second clause of the first sentence of former Fish and Game Code Section 8047(a)(1) without substantive change.

Notes. (1) Proposed Section 21005(a) is intended to restate the second sentence of existing Fish and Game Code Section 8043(a), to clarify the meaning of that provision without changing its substantive effect. The existing provision (indicated in italics) reads as follows:

8043. (a) Every commercial fisherman who sells or delivers fish that he or she has taken to any person who is not licensed under Article 7 (commencing with Section 8030), and every person who is required to be licensed under Article 7 (commencing with Section 8030) to conduct the activities of a fish receiver, as described in Section 8033, shall make a legible landing receipt record on a form to be furnished by the department. *The landing receipt shall be completed at the time of the receipt, purchase, or transfer of fish, whichever occurs first.*

The Commission invites comment on whether the restatement of this provision in proposed Section 21005(a) would cause any substantive change in the meaning of the provision.

(2) Proposed Section 21005(b) is intended to restate the first sentence of existing Fish and Game Code Section 8043.1(c), to clarify the meaning of that provision without changing its substantive effect. The existing provision (indicated in italics) reads as follows:

8043.1. (a) A person required to be licensed as a marine aquaria receiver shall make a legible, true, and complete record of the landing receipts on a form and in a manner prescribed by the department.

....
(c) *The landing receipt form shall be completed at the time the organisms are received from the commercial fisherman. ...*

The Commission invites comment on whether the restatement of this provision in proposed Section 21005(b) would cause any substantive change in the meaning of the provision.

(3) Proposed Section 21005(c) is intended to combine and restate the second sentence of former Fish and Game Code Section 8043.1(c) and the second clause of the first sentence of existing Fish and Game Code Section 8047(a)(1) (shown in italics), to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

8043.1(c) ... A person required to be licensed as a marine aquaria receiver who takes his or her own organisms shall complete a marine aquaria landing receipt form at the time the organisms are brought ashore.

8047. (a)(1) A person licensed under Article 7 (commencing with Section 8030) who takes his or her own fish shall make a legible record in the form of the landing receipt as required by Sections 8043 and 8043.1 *at the time the fish are brought ashore.*

The Commission invites comment on whether the restatement of this provision in proposed Section 21005(c) would cause any substantive change in the meaning of the provision.

1 **§ 21010. Method of completion by commercial fisherman**

2 21010. A commercial fisherman who is required to complete a landing receipt
3 shall do so in either of the following ways:

4 (a) For each individual sale by that commercial fisherman, at the time of the
5 sale.

6 (b) For each day that the commercial fisherman is engaged in one or more sales
7 to the ultimate consumers, the commercial fisherman shall maintain an accurate
8 tally sheet of sales, which shall include complete header and signature box
9 information filled out prior to any sales, and the number of pounds, by species, of
10 fish sold. The total of the daily sales shall be recorded on the landing receipt at the
11 completion of sales for that day. A copy of the completed tally sheet shall be
12 attached to the corresponding landing receipt. The original completed tally sheet
13 shall be attached to the commercial fisherman's copy of the corresponding landing
14 receipt and maintained for a period of four years.

15 **Comment.** Section 21010 restates former Fish and Game Code Section 8043.2(a) without
16 substantive change.

17 **Note.** Proposed Section 21010 is intended to restate existing Fish and Game Code Section
18 8043.2(a) to clarify the meaning of that provision, without changing its substantive effect. The
19 existing provision reads as follows:

20 8043.2. (a) A commercial fisherman licensed pursuant to Section 8033.5 who sells fish from a
21 vessel directly to the ultimate consumer and who is required pursuant to Section 8043 to make a
22 landing receipt shall make a landing receipt in either of the following ways:

23 (1) For each individual sale by that fisherman at the time of the sale.

24 (2) For each day that the fisherman is engaged in one or more sales to the ultimate consumers,
25 the fisherman shall maintain an accurate tally sheet of sales, which shall include complete header
26 and signature box information filled out prior to any sales, and the number of pounds by species
27 of fish sold. The total of the daily sales shall be recorded at the completion of sales for that day on
28 a landing receipt. A copy of the completed tally sheet shall be attached to the corresponding
29 landing receipt. The original completed tally sheet shall be attached to the fisherman's copy of the
30 corresponding landing receipt and maintained for a period of four years.

31 **The Commission invites comment on whether the restatement of this provision in**
32 **proposed Section 21010 would cause any substantive change in the meaning of the**
33 **provision.**

34 **§ 21015. Advance notification to agent when specified fish landed**

35 21015. On delivery of sardines, anchovies, mackerel, squid, tuna, or bonito
36 intended to be processed or sold as fresh fish, the person who completes the
37 landing receipt, upon request of the authorized agent described in Section 21110,
38 shall notify that agent of the unloading and weighing of the fish, and shall permit
39 the agent to be present at all times during the weighing of the fish.

40 **Comment.** Section 21015 restates former Fish and Game Code Section 8046(b) without
41 substantive change.

42 **Note.** Proposed Section 21015 is intended to restate existing Fish and Game Code Section
43 8046(b) to clarify the meaning of that provision, without changing its substantive effect. The
44 existing provision reads as follows:

1 8046. (b) On delivery of sardines, anchovies, mackerel, squid, tuna, or bonito intended to be
2 processed or sold as fresh fish, the person licensed pursuant to Article 7 (commencing with
3 Section 8030) who filled out the landing receipt, upon request of the authorized agent described
4 in subdivision (c), shall notify the authorized agent of the unloading and weighing of the fish and
5 shall permit the authorized agent to be present at all times during the weighing of the fish.

6 **The Commission invites comment on whether the restatement of this provision in**
7 **proposed Section 21015 would cause any substantive change in the meaning of the**
8 **provision.**

9 **§ 21020. Content of receipt**

10 21020. A landing receipt shall show all of the following:

11 (a) The names of the species of landed fish as designated by the department, or
12 if not designated, the commonly used name of the species.

13 (b) The accurate weight of the species of fish received. Sablefish may be
14 reported in dressed weight, and if so reported, shall have the round weights
15 computed, for purposes of management quotas, by multiplying 1.6 times the
16 reported dressed weight.

17 (c) The commercial fisherman's name and commercial fishing license
18 identification number.

19 (d) The commercial boat registration number of the boat.

20 (e) The name of the recipient of the fish, and that person's identification
21 number, if applicable.

22 (f) The date of receipt.

23 (g) The price paid for the fish.

24 (h) The department origin block number where the fish were caught.

25 (i) The type of gear used.

26 (j) Any other information the department may require.

27 **Comment.** Section 21020 combines and restates former Fish and Game Code Sections 8043(b)
28 and 8045 without substantive change.

29  **Note.** Proposed Section 21020 is intended to combine and restate existing Fish and Game
30 Code Sections 8043(b) and 8045, to clarify the meaning of those provisions without changing
31 their substantive effect. The existing provisions read as follows:

32 8043. (b) The landing receipt shall show all of the following:

33 (1) The accurate weight of the species of fish received, as designated pursuant to Section 8045.
34 Sablefish may be reported in dressed weight, and if so reported, shall have the round weights
35 computed, for purposes of management quotas, by multiplying 1.6 times the reported dressed
36 weight.

37 (2) The name of the fisherman and the fisherman's identification number.

38 (3) The department registration number of the boat.

39 (4) The recipient's name and identification number, if applicable.

40 (5) The date of receipt.

41 (6) The price paid.

42 (7) The department origin block number where the fish were caught.

43 (8) The type of gear used.

44 (9) Any other information the department may prescribe.

8045. The names used in the landing receipt and transportation receipt made under Sections 8043 and 8047 for designating the species of fish dealt with shall be those in common usage unless otherwise designated by the department.

The Commission invites comment on whether the restatement of these two provisions in proposed Section 21020 would cause any substantive change in the meaning of either provision.

§ 21025. Additional requirements applicable to completion of landing receipts

21025. (a) The person that completes the landing receipt shall sign the receipt.

(b) The numbered landing receipts in each individual landing receipt book shall be completed sequentially.

(c) A voided fish landing receipt shall have the word “VOID” plainly and noticeably written on the face of the receipt, and shall be submitted to the department in the same manner as a completed fish landing receipt is submitted to the department.

Comment. Subdivision (a) of Section 21025 restates the third sentence of former Fish and Game Code Section 8047(b) without substantive change.

Subdivision (b) continues the first sentence of former Fish and Game Code Section 8043(c) without substantive change.

Subdivision (c) continues the second and third sentences of former Fish and Game Code Section 8043(c) without substantive change.

 **Note.** Proposed Section 21025(a) is intended to restate the third sentence of existing Fish and Game Code Section 8047(b) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

8047. (b)... The person taking, purchasing, or receiving the fish, whether or not licensed under Article 7 (commencing with Section 8030), shall sign the landing receipt.

The Commission invites comment on whether the restatement of this provision in proposed Section 21025(a) would cause any substantive change in the meaning of the provision.

Article 2. Retention and Delivery of Copies

§ 21100. When receipt completed by fish receiver or marine aquaria receiver

21100. (a) A fish receiver or marine aquaria receiver who completes a landing receipt shall retain a completed copy of the receipt for a period of four years, which shall be available for inspection at any time within that period by the department.

(b) The receiver shall also deliver a completed copy of the receipt to the commercial fisherman at the time of the purchase or receipt of the fish, which shall be retained by the commercial fisherman for a period of four years, and shall be available for inspection at any time during that period by the department.

Comment. Section 21100 restates the third, fourth, and fifth sentences of former Fish and Game Code Section 8046(a) without substantive change.

Note. Proposed Section 21100 is intended to restate the third, fourth, and fifth sentences of existing Fish and Game Code Section 8046(a) to clarify the meaning of those sentences, without changing their substantive effect. The existing sentences read as follows:

8046. (a).... A copy of the landing receipt shall be delivered to the commercial fisherman at the time of the purchase or receipt of the fish. That copy of the landing receipt shall be retained by the commercial fisherman for a period of four years and shall be available for inspection at any time during that period by the department. A copy of the landing receipt shall be kept by the person licensed pursuant to Article 7 (commencing with Section 8030) who filled out the landing receipt for a period of four years and shall be available for inspection at any time within that period by the department.

The Commission invites comment on whether the restatement of these sentences in proposed Section 21100 would cause any substantive change in the meaning of the provision.

§ 21105. When receipt completed by commercial fisherman

21105. (a) A commercial fisherman who completes a landing receipt shall retain a completed copy of the receipt for a period of four years, which shall be available for inspection at any time within that period by the department.

(b) The commercial fisherman shall also deliver a completed copy of the receipt to the person taking, purchasing, or receiving the fish, which shall be retained by that person until the fish are prepared for consumption or otherwise disposed of.

Comment. Subdivision (a) of Section 21105 combines and restates the third sentence of existing Fish and Game Code Section 8047(a)(1) and the fifth sentence of former Fish and Game Code Section 8047(b) without substantive change.

Subdivision (b) restates the sixth sentence of former Fish and Game Code Section 8047(b) without substantive change.

Note. Proposed Section 21105(a) is intended to combine and restate the third sentence of existing Fish and Game Code Section 8047(a)(1) and the fifth and sixth sentences of existing Fish and Game Code Section 8047(b) to clarify the meaning of those sentences, without changing their substantive effect. The existing sentences read as follows:

8047(a)(1).... A copy of the landing receipt shall be retained by [a person licensed under Article 7 (commencing with Section 8030) who takes his or her own fish] for a period of four years and shall be available for inspection at any time within that period by the department.

8047. (b).... A copy of the landing receipt shall be retained by the commercial fisherman for a period of four years and shall be available for inspection at any time within that period by the department. A copy of the landing receipt shall be retained by the person taking, purchasing, or receiving the fish until they are prepared for consumption or otherwise disposed of.

The Commission invites comment on whether the restatement of these sentences in proposed Section 21105 would cause any substantive change in the meaning of the provision.

§ 21110. Delivery of copy to agent

21110. Any person completing a landing receipt shall also deliver a completed copy of the receipt to any agent authorized in writing by the majority of the persons who participated in the taking of the fish, excluding the commercial fisherman receiving a copy of the receipt pursuant to Section 21100.

1 **Comment.** Section 21110 combines and restates former Fish and Game Code Section 8046(c),
2 the fourth sentence of former Fish and Game Code Section 8047(a)(1), and the 7th sentence of
3 former Fish and Game Code Section 8047(b) without substantive change.

4 **Note.** Proposed Section 21110 is intended to combine and restate existing Fish and Game
5 Code Section 8046(c), the fourth sentence of existing Fish and Game Code Section 8047(a)(1),
6 and the 7th sentence of existing Fish and Game Code Section 8047(b) (which are themselves
7 identical) to clarify the meaning of those sentences, without changing their substantive effect. All
8 three of those provisions read as follows:

9 A copy of the landing receipt shall be delivered to an agent authorized in writing by the
10 majority of the persons who participated in the taking of the fish, excluding the commercial
11 fisherman receiving the original copy.

12 **The Commission invites comment on whether the restatement of these sentences in**
13 **proposed Section 21110 would cause any substantive change in the meaning of the**
14 **provision.**

15 **§ 21115. Landing of groundfish**

21115. In addition to the requirements of Sections 21015, 21100, 21110, and
21150, any person landing groundfish subject to federal groundfish regulations
adopted pursuant to the Magnuson Fishery Conservation and Management Act (16
U.S.C. Sec. 1801 et seq.) shall keep a copy of the landing receipt on board the
fishing vessel throughout, and for 15 days following, each period for which
cumulative landings by individual vessels are limited.

22 **Comment.** Section 21115 continues former Fish and Game Code Section 8046.1 without
23 substantive change.

24 Article 3. Delivery to Department

25 **§ 21150. Delivery of landing receipt to department**

26 21150. (a) The original signed copy of a paper landing receipt shall be delivered
27 to the department by the person completing the receipt on or before the 16th or last
28 day of the month in which the fish were landed, whichever date occurs first after
29 the landing.

(b) Landing receipt records completed and submitted electronically shall be submitted to the department within three business days of the landing.

32 **Comment.** Subdivision (a) of Section 21150 combines and restates former Fish and Game
33 Code Section 8043.1(d), the first sentence of former Fish and Game Code Section 8046(a), and
34 the second sentence of former Fish and Game Code Section 8047(a)(1), without substantive
35 change.

Subdivision (b) continues the second sentence of former Fish and Game Code Section 8046(a) without substantive change.

38 **Note.** Proposed subdivision (a) of Section 21150 is intended to combine and restate former
39 Fish and Game Code Section 8043.1(d), the first sentence of existing Fish and Game Code
40 Section 8046(a), and the second sentence of existing Fish and Game Code Section 8047(a)(1),
41 and the fourth sentence of former Fish and Game Code Section 8047(b), to clarify the meaning of
42 those provisions, without changing their substantive effect. The existing provisions read as
43 follows:

8043.1. (d) The copies of the aquaria landing receipts shall be delivered to the department, as provided in Section 8046.

8046. (a) The original signed copy of the landing receipt made under Section 8043 or 8043.1 shall be delivered to the department on or before the 16th or last day of the month in which the fish were landed, whichever date occurs first after the landing.

8047. (a)(1).... The original signed copy of the landing receipt shall be delivered by [a person licensed under Article 7 (commencing with Section 8030) who takes his or her own fish] to the department, as provided in Section 8046.

8047. (b).... The original signed copy of the landing receipt shall be delivered by the commercial fisherman to the department, as provided in Section 8046.

The Commission invites comment on whether the restatement of these provisions in proposed Section 21150 would cause any substantive change in the meaning of the provisions.

(2) Proposed Section 21150 would continue part of the substance of Section 8046(a), which was parts of Sections 8043.1 and 8046, which were both amended by 2018 Cal. Stat. ch. 601. Although that bill will not operate until 2019, it is included here in anticipation of its operation.

§ 21155. Unused landing receipts

21155. A fish receiver who is no longer conducting business as a licensed receiver shall forward all unused landing receipts and landing receipt books to the department immediately upon terminating his or her business activity.

Comment. Section 21155 continues the fourth sentence of former Fish and Game Code Section 8043(c) without substantive change.

CHAPTER 4. TRANSPORTATION RECEIPTS

§ 21200. Issuance of transportation receipt book

21200. A transportation book receipt shall be issued to an individual commercial fisherman and is not transferable.

Comment. Section 21200 continues former Fish and Game Code Section 8047(c)(5) without substantive change.

§ 21205. Purpose

21205. A transportation receipt is required only for transit purposes.

Comment. Section 21205 continues former Fish and Game Code Section 8047(c)(3) without substantive change.

§ 21210. Persons required to complete

21210. (a) Every commercial fisherman or his or her designee, who transports, causes to be transported, or delivers to another person for transportation, any fish, except herring, taken from the waters of this state or brought into this state in fresh condition, shall fill out a transportation receipt according to the instructions and on forms provided by the department.

(b) A commercial fisherman who sells his or her fish to a fish receiver may use a transportation receipt to transport those fish only to that receiver.

Comment. Subdivision (a) of Section 21210 continues the first part of former Fish and Game Code Section 8047(c)(1) without substantive change.

Subdivision (b) restates the first sentence of former Fish and Game Code Section 8047(a)(2) without substantive change.

Note. Proposed Section 21210(b) is intended to restate the first sentence of existing Fish and Game Code Section 8047(a)(1) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

8047. (a)(1) A person licensed under Section 8033.5 who sells his or her fish to a licensed receiver may use a transportation receipt to transport those fish only to that licensed receiver. The receiver shall complete a landing receipt for those fish.

As a “person licensed under existing Section 8033.5” is a commercial fisherman who sells fish to an ultimate consumer (rather than a receiver), the Commission has interpreted that language as referring to commercial fishers generally.

The Commission invites comment on whether that interpretation is correct, and whether the restatement of this provision in proposed Section 21210(b) would cause any substantive change in the meaning of the provision.

§ 21215. Time of completion

21215. A transportation receipt shall be completed at the time fish are transferred from the fishing vessel to the shore.

Comment. Section 21215 combines and restates the fourth sentence of former Fish and Game Code Section 8047(a)(2) and the last part of former Fish and Game Code Section 8047(c)(1), without substantive change.

Note. Proposed Section 21215 is intended to combine and restate the fourth sentence of existing Fish and Game Code Section 8047(a)(2) and the last part of existing Fish and Game Code Section 8047(c)(1) to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

8047. (a)(2)..... Transportation receipts shall be completed at the time the fish are transferred from the fishing vessel.

8047. (c)(1).... Every commercial fisherman... shall fill out a transportation receipt... at the time the fish are brought ashore.

The Commission invites comment on whether the restatement of these provisions in proposed Section 14450 would cause any substantive change in the meaning of the provisions.

§ 21220. Method of completion

21220. The numbered transportation receipt forms in each individual transportation receipt book shall be completed sequentially.

Comment. Section 21220 continues the first sentence of former Fish and Game Code Section 8047(e) without substantive change.

§ 21225. Content

21225. The transportation receipt shall contain all of the following information:

(a) The name of each transported species of fish as designated by the department, or if not designated, the commonly used name of each species.

(b) The date and time of the receipt.

(c) The accurate weight of the species of fish being transported. Sablefish may be reported in dressed weight, and if so reported, shall have the round weights computed, for purposes of management quotas, by multiplying 1.6 times the reported dressed weight.

(d) The name and identification number of the commercial fisherman.

(e) The signature of the commercial fisherman authorizing transportation.

(f) The name of the person transporting the fish.

(g) The name of the fish business and fish business identification number.

(h) The corresponding landing receipt number issued by the fish business to the commercial fisherman.

(i) The department registration number of the vessel.

(j) The name of the vessel.

(k) The department origin block number where the fish were caught.

(l) The port of first landing.

(m) Any other information the department may prescribe.

Comment. Section 21225 combines and restates former Fish and Game Code Sections 8045 and 8047(d) without substantive change.

Note. Proposed Section 21225 is intended to combine and restate existing Fish and Game Code Sections 8045 and 8047(d), to clarify the meaning of those provisions without changing their substantive effect. The existing provisions read as follows:

8045. The names used in the landing receipt and transportation receipt made under Sections 8043 and 8047 for designating the species of fish dealt with shall be those in common usage unless otherwise designated by the department.

8047. (d) The transportation receipt shall contain all of the following information:

(1) The name of each species of fish, pursuant to Section 8045.

(2) The date and time of the receipt.

(3) The accurate weight of the species of fish being transported. Sablefish may be reported in dressed weight, and if so reported, shall have the round weights computed, for purposes of management quotas, by multiplying 1.6 times the reported dressed weight.

(4) The name and identification number of the fisherman. The signature of the fisherman authorizing transportation.

(5) The name of the person transporting the fish.

(6) The name of the fish business, the fish business identification number, and the corresponding landing receipt number issued by the fish business to the commercial fisherman.

(7) The department registration number of the vessel and the name of the vessel.

(8) The department origin block number where the fish were caught.

(9) The port of first landing.

(10) Any other information the department may prescribe.

The Commission invites comment on whether the restatement of these two provisions in proposed Section 21225 would cause any substantive change in the meaning of either provision.

1 **§ 21230. Retention and delivery of copies**

2 21230. (a) A copy of a completed transportation receipt shall be retained by the
3 commercial fisherman who filled it out for a period of four years, and shall be
4 available for inspection at any time within that period by the department.

5 (b) A copy of the transportation receipt shall be given to and retained by the
6 person transporting the fish until the fish are sold fresh, processed, or otherwise
7 disposed of.

8 **Comment.** Subdivision (a) of Section 21230 continues the second sentence of former Fish and
9 Game Code Section 8047(c)(2) without substantive change.

10 Subdivision (b) continues the third sentence of former Fish and Game Code Section 8047(c)(2)
11 without substantive change.

12 **§ 21235. Delivery to department**

13 21235. The original transportation receipt shall be signed and delivered by the
14 commercial fisherman to the department on or before the 16th day or the last day
15 of the month in which the fish were landed, whichever date occurs first after
16 landing.

17 **Comment.** Section 21235 restates the first sentence of former Fish and Game Code Section
18 8047(c)(2) without substantive change.

19 **Note.** Proposed Section 21235 is intended to restate the first sentence of existing Fish and
20 Game Code Section 8047(c)(2) to clarify the meaning of that provision, without changing its
21 substantive effect. The existing provision reads as follows:

22 8047. (c)(2) The original signed copy of the transportation receipt shall be delivered by the
23 commercial fisherman to the department on or before the 16th day or the last day of the month in
24 which the fish were landed, whichever date occurs first after landing.

25 **The Commission invites comment on whether the restatement of this provision in**
26 **proposed Section 21235 would cause any substantive change in the meaning of the**
27 **provision.**

28 **§ 21240. Void receipts**

29 21240. A voided fish transportation receipt shall have the word “VOID” plainly
30 and noticeably written on the face of the receipt, and shall be submitted to the
31 department in the same manner as a completed fish transportation receipt is
32 submitted to the department.

33 **Comment.** Section 21240 continues the second and third sentences of former Fish and Game
34 Code Section 8047(e) without substantive change.

35 **§ 21245. Unused receipts**

36 21245. A person who was previously but is no longer conducting business as a
37 commercial fisherman shall forward all unused transportation receipts and
38 transportation receipt books to the department immediately upon terminating his
39 or her business activity.

40 **Comment.** Section 21245 continues the fourth sentence of former Fish and Game Code
41 Section 8047(e) without substantive change.

Note. Proposed Section 21245 is intended to restate the existing sentence of former Fish and Game Code Section 8047(e) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

8047. (e) A commercial fisherman who is no longer conducting business as a licensed fisherman shall forward all unused transportation receipts and transportation receipt books to the department immediately upon terminating his or her business activity.

The Commission invites comment on whether the restatement of this provision in proposed Section 21245 would cause any substantive change in the meaning of the provision.

CHAPTER 5. ACCOUNTING RECORDS

§ 21300. Accounting records

21300. (a) In addition to the receipt required by Section 21000, accounting records containing the information specified in subdivision (b) shall be kept by all of the following persons:

(1) Any person required to be licensed under Title 9 (commencing with Section 20150).

(2) Any person who deals in fresh or frozen fish for profit.

(b) The accounting records shall contain all of the following:

(1) The name as designated by the department of each different species of fish sold, distributed, or taken, or if not designated, the commonly used name of each species.

(2) The number of pounds sold, distributed, or taken of each different species.

(3) The name of the person to whom the fish were sold or distributed.

(4) The name, address, and phone number of the seller or distributor.

(5) The date of sale.

(6) The price paid.

(7) The intended use of the fish.

(c) Accounting record information required by this section that is transmitted from any person identified in subdivision (a) to any business that deals in fish for profit shall be in the English language.

(d) The accounting records shall be maintained within the state by both buyer and seller for a period of three years. Upon request, the records shall be open for inspection during normal business hours by the department.

Comment. Section 21300 restates former Fish and Game Code Section 8050 without substantive change.

Note. Proposed Section 21300 is intended to restate existing Fish and Game Code Section 8050 to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

8050. (a) In addition to the receipt required in Section 8043, every person licensed under Article 7 (commencing with Section 8030), and any commercial fisherman who sells fish to persons who are not licensed under Article 7 (commencing with Section 8030), and any person

1 who deals in fresh or frozen fish for profit, shall keep accounting records in which all of the
2 following shall be recorded:

3 (1) The names of the different species.

4 (2) The number of pounds sold, distributed, or taken of each different species.

5 (3) The name of the person to whom the fish were sold or distributed.

6 (4) The name, address, and phone number of the seller or distributor.

7 (5) The date of sale.

8 (6) The price paid.

9 (7) The intended use.

10 (b) Accounting record information required by this section that is transmitted from any person
11 identified in subdivision (a) to any business that deals in fish for profit shall be in the English
12 language.

13 (c) The accounting records shall be maintained by both buyer and seller for a period of three
14 years and upon request, shall be open for inspection during normal business hours by the
15 department. The accounting records shall be maintained within the State of California.

16 (d) The names used for designating the species of fish shall be those in common usage unless
17 otherwise designated by the department.

18 **The Commission invites comment on whether the restatement of this provision in**
19 **proposed Section 21300 would cause any substantive change in the meaning of the**
20 **provision.**

21 CHAPTER 6. PAYMENT AND USE OF FEE

22 § 21350. Quarterly payment to department

23 21350. (a) Landing fees imposed by this title shall be paid quarterly to the
24 department, within 30 days after the close of each quarter.

25 (b) The department may adopt regulations specifying the procedures for
26 collecting landing fees not paid within 30 days after the close of the quarter for
27 which they are due. These procedures may include, but are not limited to, the
28 procedures prescribed for sales and use taxes provided in Chapter 5 (commencing
29 with Section 6451) and Chapter 6 (commencing with Section 6701) of Part 1 of
30 Division 2 of the Revenue and Taxation Code.

31 **Comment.** Section 21350 continues former Fish and Game Code Section 8053 without
32 substantive change.

33 § 21355. Use of landing fee

34 21355. Except as otherwise provided in this title, all moneys collected pursuant
35 to this title shall be paid to the department, and shall be expended for the patrol of
36 packing plants, inspection and regulation of the fishing industry, and conservation
37 work for the benefit of the commercial fishing industries.

38 **Comment.** Section 21355 continues former Fish and Game Code Section 8056 without
39 substantive change.

40 § 21360. Exceptions to use of landing fee

41 21360. Landing fees shall be used only for the administration of laws relating to
42 the commercial fishing industry, except as follows:

1 (a) Not less than 90 percent of the landing fee on herring taken for roe shall be
2 expended for research and management activities to maintain and enhance the
3 herring resources within the waters of the state.

4 (b) Not less than 90 percent of the landing fee on thresher shark or bonito
5 (mako) shark shall be expended for the study required by, and for the costs of
6 administering, Chapter 6 (commencing with Section 18300) of Title 4 of Part 6.

7 **Comment.** Section 21360 continues former Fish and Game Code Section 8052 without
8 substantive change.

9 **§ 21365. Overpayment of fee**

10 21365. (a) If the department determines that any fee or penalty has been paid
11 more than once or has been erroneously or illegally collected or computed, the
12 department shall set forth that fact in the records of the department. The excess
13 amount collected or paid shall be credited on any amounts then due and payable
14 from the person under this part, and the balance shall be refunded to the person, or
15 the person's successors, administrators, or executors.

16 (b) In the event of overpayment of any of the fees imposed by this title, the
17 feepayer may file a claim for refund or a claim for credit with the department. No
18 refund or credit shall be approved by the department unless the claim is filed with
19 the department within six months after the close of the calendar year in which the
20 overpayment was made.

21 (c) Every claim for refund or credit for overpayment of a landing fee shall be in
22 writing, and shall state the specific grounds upon which the claim is founded.

23 (d) Failure to file a claim for refund or credit within the time prescribed in this
24 title constitutes a waiver of any demand against the state on account of
25 overpayment of a landing fee.

26 (e) Within 30 days after disallowing any claim for refund or credit for
27 overpayment of a landing fee in whole or in part, the department shall serve notice
28 of its action on the claimant, either personally or by mail. If served by mail,
29 service shall be made pursuant to Section 1013 of the Code of Civil Procedure,
30 and shall be addressed to the licensee at the licensee's address as it appears in the
31 records of the department, but the service shall be deemed complete at the time of
32 the deposit of the notice in the mail without extension of time for any reason.

33 (f) Interest shall be paid upon any overpayment of landing fee at the rate of one-
34 half of 1 percent per month from the date of overpayment. The interest shall be
35 paid to the date the claim for refund or credit is approved by the department.

36 (g) If the department determines that any overpayment of a landing fee has been
37 made intentionally or by reason of carelessness, it shall not allow any interest on
38 that overpayment.

39 **Comment.** Subdivision (a) of Section 21365 continues former Fish and Game Code Section
40 8057 without substantive change.

41 Subdivision (b) continues former Fish and Game Code Section 8058 without substantive
42 change.

1 Subdivision (c) continues former Fish and Game Code Section 8059 without substantive
2 change.

3 Subdivision (d) continues former Fish and Game Code Section 8060 without substantive
4 change.

5 Subdivision (e) continues former Fish and Game Code Section 8061 without substantive
6 change.

7 Subdivision (f) continues former Fish and Game Code Section 8062 without substantive
8 change.

9 Subdivision (g) continues former Fish and Game Code Section 8063 without substantive
10 change.

11 **§ 21370. Legal process to prevent collection of fee**

12 21370. No injunction or writ of mandate or other legal or equitable process shall
13 issue in any suit, action, or proceeding in any court, against this state, or against
14 any officer of the state, to prevent or enjoin the collection under this title of any
15 landing fee.

16 **Comment.** Section 21370 continues former Fish and Game Code Section 8064 without
17 substantive change.

18 **§ 21375. Legal process to recover overpaid landing fee**

19 21375. (a) No suit or proceeding shall be maintained in any court for the
20 recovery of any amount of landing fee alleged to have been erroneously paid or
21 erroneously or illegally determined or collected, unless a claim for refund or credit
22 has been duly filed pursuant to Section 21365.

23 (b) Within 90 days after the mailing of the notice of the department's action
24 upon a claim filed pursuant to Section 21365, the claimant may bring an action
25 against the department on the grounds set forth in the claim, in a court of
26 competent jurisdiction in any city or city and county of this state in which the
27 Attorney General has an office, for the recovery of the whole or any part of the
28 amount with respect to which the claim has been disallowed. Failure to bring the
29 action within the time specified constitutes a waiver of any demand against the
30 state on account of alleged overpayments.

31 (c) If the department fails to mail notice of action on a claim for refund or credit
32 for overpayment of a landing fee within six months after the claim is filed, the
33 claimant may, before the mailing of notice by the department of its action on the
34 claim, consider the claim disallowed and bring an action against the department on
35 the grounds set forth in the claim for the recovery of the whole or any part of the
36 amount claimed as an overpayment.

37 (d) If judgment is rendered for the plaintiff, the amount of the judgment shall
38 first be credited on any landing fee due and payable from the plaintiff to the state
39 under this title. The balance of the judgment shall be refunded to the plaintiff.

40 (e) In any judgment, interest shall be allowed at the legal rate of interest on
41 unsatisfied judgments, as provided in Section 685.010 of the Code of Civil
42 Procedure, upon the amount found to have been illegally collected, from the date
43 of payment of the amount to the date of allowance of credit on account of the

1 judgment, or to a date to be determined by the department, preceding the date of
2 the refund warrant by not more than 30 days.

3 (f) A judgment shall not be rendered in favor of the plaintiff in any action
4 brought against the department to recover any amount paid, when the action is
5 brought by or in the name of an assignee of the person paying the amount or by
6 any person other than the person who paid the amount.

7 **Comment.** Subdivision (a) of Section 21375 continues former Fish and Game Code Section
8 8065 without substantive change.

9 Subdivision (b) continues former Fish and Game Code Section 8066 without substantive
10 change.

11 Subdivision (c) continues former Fish and Game Code Section 8067 without substantive
12 change.

13 Subdivision (d) continues former Fish and Game Code Section 8068 without substantive
14 change.

15 Subdivision (e) continues former Fish and Game Code Section 8069 without substantive
16 change.

17 Subdivision (f) continues former Fish and Game Code Section 8070 without substantive
18 change.

19 CHAPTER 7. MISCELLANEOUS PROVISIONS

20 § 21450. Weighmasters

21 21450. A commercial fisherman licensed pursuant to Section 20500 who sells
22 directly to the ultimate consumer, or a commercial fisherman who sells or delivers
23 fish that the fisherman has taken to any person who is not licensed under Title 9
24 (commencing with Section 20150) to conduct the activities of a fish receiver, shall
25 not be considered a weighmaster for purposes of Chapter 7 (commencing with
26 Section 12700) of Division 5 of the Business and Professions Code.

27 **Comment.** Section 21450 continues former Fish and Game Code Section 8043.2(b) without
28 substantive change.

29 § 21455. Requirement to make catch available for inspection and sampling

30 21455. A commercial fisherman selling his or her own catch to the ultimate
31 customer, upon request by an authorized agent or employee of the department,
32 shall immediately make available all fish in possession of the fisherman for
33 inspection and sampling by the agent or employee. Pursuant to Section 42110, the
34 fisherman shall relinquish the head from any sampled salmon with a missing
35 adipose fin.

36 **Comment.** Section 21455 restates former Fish and Game Code Section 8043.2(c) without
37 substantive change.

1 TITLE 11. FISH PROCESSING

2 CHAPTER 1. GENERAL PROVISIONS

3 § 21600. Definitions

4 21600. As used in this title:

5 (a) “Reduction plant” means any plant used in the reduction or conversion of
6 fish into fish flour, fishmeal, fish scrap, fertilizer, fish oil, or other fishery products
7 or byproducts.

8 (b) “Packer” means any person canning fish or preserving fish by the common
9 methods of drying, salting, pickling, smoking, cold packing, or vacuum packing.

10 (c) “Fish offal” means the head, viscera, or other parts of fish taken off in
11 preparing for canning, preserving, packing, and preparing for consumption in a
12 fresh state.

13 **Comment.** Section 21600 continues former Fish and Game Code Section 7700(a)-(c) without
14 substantive change.

15 § 21605. Commission regulation

16 21605. The commission may regulate and control fishing boats, barges, lighters
17 or tenders, receptacles or vehicles containing fish, commercial fishers, packers,
18 reduction plants, plants where fish products are manufactured, and dealers in fish
19 or fishery products, insofar as necessary to insure the taking and delivery of fish
20 and fishery products in a wholesome and sanitary condition to canning, packing or
21 preserving plants, or to any plant where fishery products are manufactured, or to
22 any fresh fish dealer, and to prevent deterioration and waste of fish.

23 **Comment.** Section 21605 continues former Fish and Game Code Section 7701 without
24 substantive change.

25 § 21610. Department inspection

26 21610. The department may enter and examine any canning, packing,
27 preserving, or reduction plant, or place of business where fish or other fishery
28 products are packed, preserved, manufactured, bought or sold, or board any
29 fishing boat, barge, lighter, tender, or vehicle or receptacle containing fish, and
30 ascertain the amount of fish received, or kind and amount of fishery products
31 packed or manufactured and the number and size of containers or cans for fishery
32 products purchased, received, used, or on hand and may examine any books and
33 records containing any account of fish caught, bought, canned, packed, stored or
34 sold.

35 **Comment.** Section 21610 continues former Fish and Game Code Section 7702 without
36 substantive change.

1 **§ 21615. Grading of fish by commission**

2 21615. The commission may establish grades for different varieties of fish or
3 fishery products, which shall be conformed to by all of the following persons or
4 entities:

5 (a) A person who takes or uses sardines for bait.

6 (b) A person who delivers fish or other fishery products to packers or to fresh
7 fish dealers.

8 (c) A packer of fish.

9 (d) A fish dealer.

10 (e) A manufacturer of fish products.

11 **Comment.** Section 21615 continues former Fish and Game Code Section 7703 without
12 substantive change.

13 **CHAPTER 2. REDUCTION PERMITS AND LICENSES**

14 **§ 21650. Authority of commission**

15 21650. The commission may grant a permit, subject to regulations it may adopt,
16 to take and use fish by a reduction or extraction process.

17 **Comment.** Section 21650 continues former Fish and Game Code Section 8075 without
18 substantive change.

19 **§ 21655. Required finding**

20 21655. No permit shall be issued except after a public hearing and a finding by
21 the commission that the granting of a permit would promote the economic
22 utilization of the fish resources of the state in the public interest. In making that
23 finding, the commission shall take into consideration the interest of the people of
24 the state in the utilization and conservation of the fish supply, and all economic
25 and other factors relating to that utilization and conservation, including the
26 efficient and economical operation of reduction plants.

27 **Comment.** Section 21655 continues former Fish and Game Code Section 8077 without
28 substantive change.

29 **§ 21660. Hearing**

30 21660. A hearing pursuant to this article shall be held within 30 days after
31 application for a permit, upon notice that the commission shall prescribe. The
32 commission may extend a hearing from time to time for a total period of not more
33 than 30 days.

34 **Comment.** Section 21660 continues former Fish and Game Code Section 8078 without
35 substantive change.

36 **§ 21665. Limit on number of permits**

37 21665. The commission shall, whenever necessary to prevent overexpansion,
38 insure the efficient and economical operation of reduction plants, or otherwise

1 carry out the provisions of this chapter, limit the total number of permits that are
2 granted.

3 **Comment.** Section 21665 continues former Fish and Game Code Section 8079 without
4 substantive change.

5 **§ 21670. License to dispose of dead or dying fish**

6 21670. Notwithstanding any other provision of this code or regulation adopted
7 pursuant to this code, the director or a representative appointed by the director,
8 may, without notice or a hearing, grant a license to a fish reduction plant to
9 dispose of dead or dying fish. The license may be immediately issued by the
10 director or the director's representative whenever that person determines, in that
11 person's discretion, that an emergency situation exists. The estimated tonnage to
12 be reduced shall be specified as a limit in the license.

13 **Comment.** Section 21670 continues former Fish and Game Code Section 8079.1 without
14 substantive change.

15 **§ 21675. No limit on court authority**

16 21675. Nothing in this chapter restricts the power of any court in any proceeding
17 relating to any matter arising out of the provisions of this article.

18 **Comment.** Section 21675 continues former Fish and Game Code Section 8080 without
19 substantive change.

20 **CHAPTER 3. VIOLATIONS**

21 **Article 1. Required Practices**

22 **§ 21750. Containers to allow viewing of fish and fish offal**

23 21750. All chutes or conveyors used to convey fish or fish offal to any
24 receptacle, and all receptacles containing fish or fish offal to be used for reduction
25 purposes, shall be so constructed and maintained that the fish or fish offal is at all
26 times open to view and inspection.

27 **Comment.** Section 21750 continues former Fish and Game Code Section 7705 without
28 substantive change.

29 **Article 2. Prohibitions**

30 **§ 21800. Affirmative authorization of fish reduction required**

31 21800. Except as permitted by this code, it is unlawful to use a fish, except fish
32 offal, in a reduction plant or by a reduction process.

33 **Comment.** Section 21800 continues former Fish and Game Code Section 7704(b) without
34 substantive change.

1 **§ 21805. Prohibited reduction**

2 21805. No reduction of fish is allowed that may tend to deplete a species, or
3 result in waste or deterioration of fish.

4 **Comment.** Section 21805 continues former Fish and Game Code Section 8076 without
5 substantive change.

6 **§ 21810. Unloading or weighing of specified fish**

7 21810. (a) No sardines, anchovies, mackerel, or squid intended for or used in
8 any cannery shall be unloaded from any vessel, except at a weighing or measuring
9 device approved by the Bureau of Weights and Measures.

10 (b) Those products shall be weighed by a public weighmaster licensed as an
11 individual under the laws of this state, and a receipt as to that weight shall be
12 immediately issued by the weighmaster to the commercial fisherman at the time of
13 receipt of the products.

14 (c) Copies of the receipt shall be handled in the manner provided in Chapter 3
15 (commencing with Section 21000) and Chapter 4 (commencing with Section
16 21200) of Title 10.

17 **Comment.** Section 21810 continues former Fish and Game Code Section 7702.1 without
18 substantive change.

19 Article 3. Enforcement

20 **§ 21850. Complaint alleging violation**

21 21850. (a) A written complaint may be made to the commission against any
22 person who violates any provision of this title, or any regulation adopted pursuant
23 to Section 14350 or any provision of this title, by any person having information
24 or knowledge of the violation. If the person charged in the complaint is found
25 guilty of the offense charged, the commission may suspend, for a period not to
26 exceed 90 days, any license issued by any state board or officer to that person to
27 take, buy, sell, can, or preserve fish or fishery products. No other license shall be
28 issued to that person during the period of suspension.

29 (b) The proceedings on a complaint shall be conducted at one of the
30 commission's regularly scheduled meetings.

31 **Comment.** Section 21850 restates former Fish and Game Code Section 7706 without
32 substantive change.

33 **Note.** Proposed Section 21850 is intended to restate existing Fish and Game Code Section
34 7706 to clarify the meaning of that provision, without changing its substantive effect. The
35 existing provision reads as follows:

36 7706. A written complaint may be made to the commission against any person who violates
37 Section 7700 to 7705, inclusive, 7707, 7708, 8075 to 8080, inclusive, or 8153, or any regulation
38 adopted thereunder, by any person having information or knowledge of the violation. If the
39 person charged is found guilty of the offense charged, the commission may suspend, for a period
40 not to exceed 90 days, any license issued by any state board or officer to that person to take, buy,
41 sell, can, or preserve fish or fishery products. No other license shall be issued to that person

during the period of suspension. The proceedings shall be conducted at one of the commission's regularly scheduled meetings.

The Commission invites comment on whether the restatement of this provision in proposed Section 21850 would cause any substantive change in the meaning of the provision.

§ 21855. Nuisance

21855. (a) Any reduction plant in which any fish is used in violation of any provision of this title, or in violation of any regulation of the commission, is a nuisance.

(b) Whenever the existence of a nuisance under subdivision (a) is shown to the satisfaction of the superior court of the county in which the reduction plant is situated, by complaint filed in the name of the people of the State of California, the court may issue a temporary injunction to abate and prevent the continuance or recurrence of the nuisance.

(c) If the existence of a nuisance is established in an action pursuant to subdivision (b), an order of abatement shall be entered as part of the judgment in the case, which shall direct the closing, for 12 months, of the building or place where the nuisance was maintained, and, during that time, the building or place shall be and remain in the custody of the court.

Comment. Section 21855 restates former Fish and Game Code Section 7707 without substantive change. Nothing in this section precludes the application of the general law governing statutory nuisances. See Penal Code § 370; Civ. Code §§ 3479-3508.2.

The reference to a "part" of a fish in former Fish and Game Code Section 7707 is superfluous, and has been deleted. See Section 95 (reference to animal generally includes part of animal).

Note. Proposed Section 21855 is intended to restate existing Fish and Game Code Section 7707 to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

7707. Any reduction plant in which any fish or any part thereof is used in violation of the provisions of Sections 7700 to 7706, inclusive, 7708, 8151, 8153 to 8157, inclusive, and 8075 to 8080, inclusive, of this code, or in violation of any regulation of the commission, is a nuisance. Whenever the existence of such nuisance is shown to the satisfaction of the superior court of the county in which the reduction plant is situated, by complaint filed in the name of the people of the State of California, the court may issue a temporary injunction to abate and prevent the continuance or recurrence of such nuisance. If the existence of a nuisance is established in such action, an order of abatement shall be entered as part of the judgment in the case, which order shall direct the closing, for 12 months, of the building or place where such nuisance was maintained, and, during such time, the building or place shall be and remain in the custody of the court.

Proposed Section 21855 would replace the cross-references in the first sentence of Section 7707 with a reference to all provisions in the title in which proposed Section 21855 would be included. That replacement is based on the Commission's belief that this title includes the continuation of all provisions cross-referenced in Section 7707, other than sections that have been repealed and not continued in substance in another provision.

The sections cross-referenced in Section 7707 that have been repealed read as follows:

8151. Sardines for use in a reduction plant, or by a packer, may be taken only in accordance with this article, and at the following times in the following places:

(a) In District 4,....

(b) Elsewhere in the State,....

8154. Any person engaged in canning sardines may take and use in a reduction plant 32 1/2 percent of the amount of sardines actually received at his canning plant during each calendar month.

8155. In determining the percentage of sardines that may be used for reduction purposes by a cannery, it shall be deemed that a ton of sardines suitable in size and condition for canning will produce 960 one-pound oval cans of sardines, or the equivalent if other size cans are used.

8156. A person engaged in preserving sardines by the common methods of drying, salting, smoking, or pickling may use in a reduction plant or by a reduction process such sardines, or fish delivered mixed with sardines, as are unfit for drying, salting, smoking, or pickling, which are not intentionally taken into the plant in a condition unfit for processing for human consumption.

8157. Fish which are mixed with sardines when delivered to the packer are the equivalent of sardines and shall be included within the percentage of the total amount of sardines received by the packer during the calendar month.

However, while the “Section 8154” set forth above that was in existence at the time Section 7707 was enacted was repealed in 1973, the Legislature enacted a new “Section 8154” in 1989, and *that* section remains an existing code section today. See 1988 Cal. Stat. ch. 858. That Section 8154 reads as follows:

8154. No person shall receive, possess, or sell sardines for any purpose except for that purpose specified on the fish receipt completed at the time of landing of those sardines pursuant to Section 8043.”

Nevertheless, nothing in the legislative history of this enactment or the text of this provision suggests the Legislature intended or contemplated that this provision would be a cross-reference in Section 7707, and proposed Section 21855 would also not include this provision as a cross-reference.

The Commission invites comment on whether the restatement of existing Section 7707 in proposed Section 15055 would cause any substantive change in the intended meaning of Section 7707.

TITLE 12. PASSENGER FISHING BOATS

§ 21900. Application of chapter

21900. This title applies only to a boat or vessel whose owner or his or her employee or other representative is with it when it is used for fishing.

Comment. Section 21900 continues the second sentence of former Fish and Game Code Section 7920 without substantive change.

§ 21905. Activity requiring license

21905. (a) The owner of any boat or vessel who, for profit, permits any person to take fish, shall procure a commercial passenger fishing boat license.

(b) A person operating a guide boat is not required to obtain a commercial passenger fishing boat license.

Comment. In combination with Section 275, Section 21905 continues the first and third sentences of former Fish and Game Code Section 7920 without substantive change.

1 **§ 21910. Commercial boat registration**

2 21910. An applicant for a commercial passenger fishing vessel license is
3 required to hold a commercial boat registration issued pursuant to Section 14755.

4 **Comment.** Section 21910 restates the second sentence of former Fish and Game Code Section
5 7921 without substantive change.

6 See also Section 4900 (suspension or revocation for specified violations).

7 **Note.** Proposed Section 21910 is intended to restate the second sentence of existing Fish and
8 Game Code Section 7921 to clarify the meaning of that provision, without changing its
9 substantive meaning. The existing provision reads as follows:

10 7921..... The commercial passenger fishing vessel license shall be issued to the holder of a
11 commercial boat registration issued pursuant to Section 7881.

12 **The Commission invites comment on whether proposed Section 21910 accurately**
13 **continues the intended meaning of the second sentence of existing Section 7921.**

14 **§ 21915. License fee**

15 21915. The base fee for a commercial passenger fishing boat license is two
16 hundred fifty dollars (\$250) in the 2004 license year, which shall be adjusted
17 annually thereafter pursuant to Section 3755.

18 **Comment.** Section 21915 continues the first sentence of former Fish and Game Code Section
19 7921 without substantive change.

20 **Note.** Existing Fish and Game Code Section 7921 (which would be continued by proposed
21 Sections 21910 and 21915) refer to both a “commercial passenger fishing *boat* license” and a
22 “commercial passenger fishing *vessel* license.”

23 **The Commission invites comment on whether and how this terminology should be**
24 **standardized.**

25 **§ 21920. Maintenance of records**

26 21920. The holder of a commercial passenger fishing boat license shall keep a
27 true record in the English language of all fish taken, and shall comply with all
28 regulations that the commission may adopt. The record and the information
29 contained in it shall be confidential, and the record shall not be a public record.

30 **Comment.** Section 21920 continues former Fish and Game Code Section 7923 without
31 substantive change.

32 **§ 21930. Fishing from commercial passenger fishing boat**

33 21930. The owner or operator of a boat or vessel licensed pursuant to Section
34 21905 shall not permit any person to fish from that boat or vessel unless that
35 person has, in his or her possession, a valid California sport fishing license and
36 any required stamp, report card, or validation issued pursuant to this code.

37 **Comment.** Section 21930 restates former Fish and Game Code Section 7147 without
38 substantive change.

1 **§ 21935. Ocean fishing**

2 21935. In addition to a valid California commercial passenger fishing boat
3 license issued pursuant to Section 21905, the owner of any boat or vessel who, for
4 profit, permits any person to fish from that boat or vessel, in ocean waters south of
5 a line extending due west from Point Arguello, shall have a valid commercial
6 fishing ocean enhancement validation issued for that vessel that has not been
7 suspended or revoked.

8 **Comment.** Section 21935 continues former Fish and Game Code Section 6596.1(b) without
9 substantive change.

10 **Note.** Under existing law, Section 6596.1(b) is governed by existing Section 6403, which
11 makes Section 6596.1(b) inapplicable to aquaculture business activities. The continuation of
12 Section 6596.1(b) in this location would make Section 6403 (proposed Section 25400)
13 inapplicable to Section 6596.1(b). Technically, this would make Section 6596.1(b) applicable to
14 aquaculture business activities. However, Section 6596.1(b) appears to have no application to
15 such activities. For that reason, the change described in this Note would seem to have no practical
16 effect.

17 **The Commission invites comment on whether this change would be a problem.**

18 **§ 21950. Possession limit for specified fish**

19 21950. No commercial fisherman, while on any barge or boat which for hire
20 carries any sport fisherman, may take or have in his or her possession in any one
21 day, more than the aggregate number of the following kinds of fish permitted in
22 the case of sport fishing: bluefin tuna, yellowfin tuna, skipjack, yellowtail, marlin,
23 broadbill swordfish, black seabass, albacore, barracuda, white seabass, bonito,
24 rock bass, kelp bass, California halibut, California corbina, yellowfin croaker, and
25 spotfin croaker.

26 **Comment.** Section 21950 continues former Fish and Game Code Section 8385 without
27 substantive change.

28 **TITLE 13. LIVE FRESHWATER FISH FOR BAIT**

29 **§ 22100. When license required**

30 22100. (a) Any person engaged for profit in the taking, transporting, or selling of
31 live fresh-water fish for bait shall first obtain from the department a live fresh-
32 water bait fish license to possess the fish for those purposes.

33 (b) A live freshwater bait fish license is not required for the raising, possession,
34 or sale of live freshwater fish for bait under authority of Part 1 (commencing with
35 Section 23300) of Division 7.

36 **Comment.** Subdivision (a) of Section 22100 continues the first paragraph of former Fish and
37 Game Code Section 8460 without substantive change.

38 Subdivision (b) continues the third paragraph of former Fish and Game Code Section 8460
39 without substantive change.

1 **§ 22105. Term of license**

2 22105. A live freshwater bait fish license shall be issued for a calendar year, or,
3 if issued after the beginning of the year, for the remainder of the year.

4 **Comment.** Section 22105 continues a part of the second paragraph of former Fish and Game
5 Code Section 8460 without substantive change.

6 **§ 22110. License fee**

7 22110. The annual fee for a live freshwater bait fish license is fifty-five dollars
8 (\$55).

9 **Comment.** Section 22110 continues former Fish and Game Code Section 8461 without
10 substantive change.

11 **§ 22120. Take only of permitted species**

12 22120. (a) A live freshwater bait fish license shall authorize the taking of only
13 golden shiners, fathead minnows, and any other species the department may
14 designate, under regulations adopted by the commission.

15 (b) The commission may prohibit in any part or all parts of the state the
16 possession alive of any species of fish that the commission considers a potential
17 threat to the fisheries of the state by reason of possible escape and establishment.

18 **Comment.** Section 22120 continues former Fish and Game Code Section 8462 without
19 substantive change.

20 **§ 22125. Restriction on gear used to take certain species**

21 22125. Traps not over 24 inches in greatest length nor more than 12 inches in
22 greatest depth or width, or seines of not over 1/2-inch mesh stretched measure and
23 not more than 4 x 30 feet in size, may be used for the taking of fish of the carp and
24 minnow family (family Cyprinidae), suckers (family Catostomidae), sculpins
25 (family Cottidae), or mosquito fish (genus Gambusia). Such traps may be used
26 only in lakes and impounded waters. Such seines may be used only in lakes,
27 impounded waters, and conduits.

28 (b) Fish taken as provided in this section may be sold only as bait.

29 (c) Fish other than those named in this section that may be taken in a trap or
30 seine described in this section shall be released and returned unharmed to the
31 water where taken.

32 **Comment.** Section 22125 continues former Fish and Game Code Section 8463 without
33 substantive change.

34 **§ 22130. Exemption**

35 22130. The provisions of this code on commercial fishing, packing, or
36 processing licenses, on reports by persons engaged in the commercial fish
37 industry, and on statements required by owners or operators of fishing boats, do
38 not apply to the taking, transporting, or selling of live fresh-water fish for bait.

39 **Comment.** Section 22130 continues the fourth paragraph of former Fish and Game Code
40 Section 8460 without substantive change.

1 **TITLE 14. COMMERCIAL FISHING REPORTS**

2 **§ 22200. Required record of fishing activities**

3 22200. The commission may require the owner and operator of a commercial
4 fishing vessel, the holder of a commercial fishing license or permit, and the owner
5 and licenseholder of a commercial passenger fishing boat to keep and submit a
6 complete and accurate record of fishing activities in a form prescribed by the
7 department.

8 **Comment.** Section 22200 continues former Fish and Game Code Section 8026(a) without
9 substantive change.

10 See also Sections 5170, 5172 (enforcement).

11 **§ 22205. Confidentiality of department records**

12 22205. (a) The receipts, reports, or other records filed with the department
13 pursuant to Title 1 (commencing with Section 14200), Title 2 (commencing with
14 Section 14500), Title 9 (commencing with Section 20150), Title 10 (commencing
15 with Section 20900), Title 11 (commencing with Section 21600), Title 12
16 (commencing with Section 21900), this title, Chapter 5 (commencing with Section
17 22800) of Title 15, Chapter 2 (commencing with Section 41350) of Title 2 of Part
18 17 of Division 10, Sections 42100 and 46150, and the information contained
19 therein, shall, except as otherwise provided in this section, be confidential, and the
20 records shall not be public records. Insofar as possible, the information contained
21 in the records shall be compiled or published as summaries, so as not to disclose
22 the individual record or business of any person.

23 (b) Notwithstanding any other provision of law, the department may release the
24 confidential information described in subdivision (a) to any federal agency
25 responsible for fishery management activities, provided the information is used
26 solely for the purposes of enforcing fishery management provisions and provided
27 the information will otherwise remain confidential. The department may also
28 release this information in accordance with Section 7315 or pursuant to a court
29 order, to a public or private postsecondary institution engaged in research under
30 the terms of a legally binding confidentiality agreement, or under other conditions
31 as the commission by regulation may provide.

32 (c) All forms, logs, books, covers, documents, electronic data, software, and
33 other records of any kind issued or otherwise supplied, directly or indirectly, by
34 the department, the purpose of which is to provide a means for reports, records, or
35 other information to be filed with the department pursuant to Title 1 (commencing
36 with Section 14200), Title 2 (commencing with Section 14500), Title 9
37 (commencing with Section 20150), Title 10 (commencing with Section 20900),
38 Title 11 (commencing with Section 21600), Title 12 (commencing with Section
39 21900), this title, Chapter 5 (commencing with Section 22800) of Title 15,
40 Chapter 2 (commencing with Section 41350) of Title 2 of Part 17 of Division 10,
41 Sections 42100 and 46150, continue to be the property of the department. Those

forms, logs, books, covers, documents, electronic data, software, other records, and any portion of any of those items remain the property of the department, whether used, unused, attached, or detached from their original binding, packaging, or other medium and shall be immediately surrendered upon demand to a peace officer of the department acting in his or her official capacity, without being altered in any manner.

Comment. Section 22205 continues former Fish and Game Code Section 8022 without substantive change.

§ 22210. Compilation of reports by department

22210. The department shall do all of the following:

(a) Gather and prepare data of the commercial fisheries, showing particularly the extent of the fisheries and the extent to which the various species abound.

(b) Make such investigations of the biology and the environment of the living marine resources as will aid in the collection and preparation of the statistical information necessary to determine the population dynamics of the species relative to their scientific management.

(c) Make such investigations as will disclose the optimum sustainable yield of the various marine resources.

(d) Determine what measures may be advisable to conserve any fishery, or to enlarge and assist any fishery, where that may be done without danger to the supply.

Comment. Section 22210 continues former Fish and Game Code Section 8010 without substantive change.

TITLE 15. COMMERCIAL FISHERIES

CHAPTER 1. MAGNUSON-STEVENSON FISHERY CONSERVATION AND MANAGEMENT ACT

Article 1. General Provisions

§ 22300. Defined terms

22300. As used in this title:

(a) “Act” means the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. Sec. 1801 et seq.).

(b) “Council” means the Pacific Fishery Management Council established pursuant to the act, or its successor agency.

(c) “Fishery” has the same meaning as defined in Section 1802(13) of Title 16 of the United States Code.

(d) “Joint committee” means the Joint Committee on Fisheries and Aquaculture created pursuant to Resolution Chapter 88 of the Statutes of 1981.

1 (e) “Optimum,” with respect to the yield from a fishery, has the same meaning
2 as defined in Section 1802(28) of Title 16 of the United States Code.

3 (f) “Secretary” means the federal Secretary of Commerce.

4 **Comment.** Section 22300 continues former Fish and Game Code Section 7650 without
5 substantive change.

6 **§ 22305. Declaration of legislative findings**

7 22305. The Legislature finds and declares:

8 (a) That the actions taken by the federal Pacific Fishery Management Council
9 have resulted in significant economic losses to California’s salmon and groundfish
10 fisheries, have caused significant waste of fish, and have failed to manage and
11 conserve fisheries for their optimum yield.

12 (b) That the California Salmon Fishery has been severely affected by regulations
13 imposed by the Pacific Fishery Management Council and the federal Department
14 of Commerce.

15 (c) That the membership of the Pacific Fishery Management Council has never
16 included a commercial salmon troll fisherman, and has at times lacked balance and
17 representation from major fisheries subject to the fishery management plans of the
18 council.

19 **Comment.** Section 22305 continues former Fish and Game Code Section 7654 without
20 substantive change.

21 **§ 22310. Declaration of policy**

22 22310. (a) It is the policy of the state that it be represented on the Pacific Fishery
23 Management Council by people who are knowledgeable about fisheries directly
24 subject to the fishery management plans of the council. Nominations and
25 appointments to the Pacific Fishery Management Council shall be a balanced
26 representation of interested parties, including, but not limited to, representatives
27 from the commercial salmon troll fishery, the groundfish fishery, the coastal
28 pelagic species fishery, the seafood processing industry, the commercial passenger
29 carrying fishing industry, nongovernmental environmental organizations, and
30 marine scientists.

31 (b) When the Governor nominates persons for any seat on the Pacific Fishery
32 Management Council, those individuals shall be knowledgeable of California’s
33 fishery resources and its fishing industry. Further, the nominations may be made
34 after consultation with fishery organizations and other interested parties, including
35 parties representing the public’s interest in the fishery resources and marine
36 environment.

37 **Comment.** Section 22310 continues former Fish and Game Code Section 7655 without
38 substantive change.

1 **§ 22315. Inapplicability of Administrative Procedure Act**

2 22315. Chapter 3.5 (commencing with Section 11340) of Division 3 of Title 2 of
3 the Government Code does not apply to this title.

4 **Comment.** Section 22315 continues former Fish and Game Code Section 7652(d) without
5 substantive change.

6 Article 2. Adoption of New Regulations

7 **§ 22400. Required public hearing**

8 22400. (a) Notwithstanding any other section of this title or any other law, the
9 director shall hold a public hearing or hearings in the area of the fishery under
10 consideration after a recommendation by the council to the secretary of a fishery
11 management plan or amendment of a fishery management plan pursuant to the act,
12 or after approval by the secretary of a fishery management plan or amendment of a
13 fishery management plan pursuant to the act.

14 (b) If the secretary approves a fishery management plan or amendment of a
15 fishery management plan that is substantially identical to a fishery management
16 plan or amendment of a fishery management plan that has been recommended by
17 the council, and the director has held a public hearing on the council's
18 recommended fishery management plan or amendment of a fishery management
19 plan, the director is not required to hold a second public hearing under this section
20 after the approval by the secretary.

21 (c) The hearing shall be held not less than four days after the recommendation
22 by the council to the secretary of a fishery management plan or amendment of a
23 fishery management plan, or after the approval by the secretary of a fishery
24 management plan or amendment of a fishery management plan. The director shall
25 arrange the time and place of the hearing, shall provide adequate public notice and
26 adequate notice to the appropriate standing policy committee of each house of the
27 Legislature and to the joint committee, and shall convene the hearing at the time
28 and place arranged.

29 (c) At the hearing or hearings, the director shall take evidence of the effects any
30 proposed regulation would have on the state's fishery resources, the commercial or
31 recreational fishing industry, and the state's ability to manage fishery resources in
32 waters of the state.

33 (d) After the hearings, the director shall submit a written report to the
34 Legislature that summarizes the reasons for the proposed regulation.

35 (e) The report to the Legislature shall be delivered or placed in the United States
36 Postal Service addressed to the Chairperson of the Joint Committee on Fisheries
37 and Aquaculture and to the chairperson of the appropriate policy committee of
38 each house of the Legislature.

39 **Comment.** Subdivisions (a) through (d) of Section 22400 continue former Fish and Game
40 Code Section 7652.1 without substantive change.

1 Subdivision (e) continues the part of former Fish and Game Code Section 7652.3(b) applicable
2 to former Fish and Game Code Section 7652.1 without substantive change.

3 **§ 22405. Adoption of regulations to conform state law**

4 22405. Upon the preparation by the council, and the recommendation by the
5 council to the secretary, of a fishery management plan or amendment of a fishery
6 management plan pursuant to the act, or upon the approval by the secretary of a
7 fishery management plan, or amendment of a fishery management plan, pursuant
8 to the act, the director may do any of the following to conform state law or
9 regulations of the commission to the fishery management plan, or amendment of a
10 fishery management plan, if the director finds that the action is necessary to
11 achieve optimum yield in California, and that it is necessary to avoid a substantial
12 and adverse effect on the plan by that state law or the regulations in order to
13 continue state jurisdiction pursuant to Section 1856 of the act:

14 (a) Adopt regulations that would make inoperative any statute or regulation of
15 the commission, including, but not limited to, statutes or regulations regulating
16 bag limits, methods of taking, and seasons for taking of fish for commercial
17 purposes.

18 Any regulation adopted by the director pursuant to this subdivision shall specify
19 the particular statute or regulation of the commission to be inoperative.

20 (b) Adopt regulations governing phases of the taking of fish for commercial
21 purposes that are not presently regulated by statute or regulation of the
22 commission.

23 (c) Adopt regulations governing phases of the taking of fish for commercial
24 purposes that are presently regulated by statute or regulation of the commission,
25 but only if the statutes or regulations are first made inoperative pursuant to
26 subdivision (a) for the effective period of the regulations adopted by the director
27 pursuant to this subdivision.

28 **Comment.** Section 22405 combines and continues former Fish and Game Code Section
29 7652(a)-(c) without substantive change.

30 **§ 22410. Hearing and report to Legislature prerequisite to adoption of regulation**

31 22410. The director shall not adopt any regulation pursuant to this chapter until
32 the director has held one or more hearings, and submitted a report to the
33 Legislature, pursuant to Section 22400.

34 **Comment.** Section 22410 continues the part of former Fish and Game Code Section 7652.3(a)
35 applicable to adoption of regulations under former Fish and Game Code Section 7652.1 without
36 substantive change.

37 **§ 22415. Report to Legislature of need to conform state law**

38 22415. Upon the adoption of any regulation pursuant to Section 22405, the
39 director shall report to the Legislature which statutes or regulations of the
40 commission need to be amended or repealed, and any regulations adopted by the
41 director that need to be enacted as statutes, to conform state law to any fishery

1 management plan, or amendment of a fishery management plan, that has been
2 approved by the secretary, to avoid any substantial and adverse effect on such plan
3 or amendment by that state law.

4 **Comment.** Section 22415 continues former Fish and Game Code Section 7653 without
5 substantive change.

6 Article 3. Repeal or Amendment of Regulations

7 § 22450. Amendment or repeal of regulation by director

8 22450. (a) The director may repeal or amend any regulation adopted pursuant to
9 Section 22405, or any other regulation, to conform the regulation to federal
10 regulations pursuant to the act, if the director finds that this action is necessary to
11 achieve optimum yield in California.

12 (b) Notwithstanding any other section of this title or any other law, the director
13 shall hold a public hearing or hearings in the area of the fishery under
14 consideration before the director repeals or amends any regulation pursuant to this
15 section. The director shall arrange the time and place of the hearing or hearings,
16 shall provide adequate public notice and adequate notice to the appropriate
17 standing policy committee of each house of the Legislature and to the joint
18 committee, and shall convene the hearing or hearings at the time and place
19 arranged.

20 (c) At the hearing or hearings, the director shall take evidence of the effects the
21 proposed repeal or amendment would have on the state's fishery resources, the
22 commercial or recreational fishing industry, and the state's ability to manage
23 fishery resources in waters of the state.

24 (d) After the hearing or hearings, the director shall submit a written report to the
25 Legislature that summarizes the reasons for the proposed repeal or amendment.

26 (e) The report to the Legislature shall be delivered or placed in the United States
27 Postal Service addressed to the Chairperson of the Joint Committee on Fisheries
28 and Aquaculture and to the chairperson of the appropriate policy committee of
29 each house of the Legislature.

30 **Comment.** Subdivisions (a) through (d) of Section 22450 continue former Fish and Game
31 Code Section 7652.2 without substantive change.

32 Subdivision (e) continues the part of former Fish and Game Code Section 7652.3(b) applicable
33 to former Fish and Game Code Section 7652.2 without substantive change.

34 § 22455. Hearing and report to Legislature prerequisite to amendment or repeal of 35 regulation

36 22455. The director shall not amend or repeal any regulation pursuant to this
37 chapter until the director has held one or more hearings, and submitted a report to
38 the Legislature, pursuant to Section 22450.

39 **Comment.** Section 22455 continues the part of former Fish and Game Code Section 7652.3(a)
40 applicable to amendment or repeal of regulations under former Fish and Game Code Section
41 7652.2 without substantive change.

CHAPTER 2. LIMITED ENTRY FISHERIES

§ 22500. Eligibility

22500. (a) Any commercial fisherman shall be eligible for inclusion during the initial year of a limited entry fishery established by statute that becomes operative after January 1, 1982, or by regulation that becomes operative after January 1, 1999, regardless of the prescribed conditions for entry into the fishery, if the commercial fisherman presents to the department satisfactory evidence that he or she has been licensed as a California commercial fisherman for at least 20 years and has participated in the fishery for at least one of those 20 years, with qualifying participation in the fishery to be determined by the commission based on landings or other appropriate criteria.

(b) Commercial fishers who have established eligibility to participate in a limited entry fishery under this section are subject to conditions of continuing eligibility established by statute or regulation if those fishers desire to maintain their eligibility.

Comment. Section 22500 continues former Fish and Game Code Section 8101 without substantive change.

§ 22505. Partnerships

22505. (a) The Legislature finds and declares that, in some limited entry fisheries, two or more partners may be operating with one of the partners holding the permit to participate in the fishery. The Legislature further finds and declares that undocumented, de facto, family partnerships are a longstanding custom in these fisheries. The Legislature further finds and declares that great hardship results when the permittee partner is no longer able to continue working and leaves the other partner without a permit to continue participating in the fishery.

(b) In any limited entry fishery in which permits are allocated to participants in the fishery, and where the death, incapacity, or retirement of a permittee from that fishery would deprive a working partner of the permittee of the ability to continue to derive a livelihood from that fishery, a permit shall be issued, upon application, to one remaining partner.

(c) A working partner for the purposes of this section shall be a spouse, child (including an adopted child), or sibling of the permittee, whose investment or equity need not be proven by documentation, or a person who can prove an investment or equity in the vessel or gear used in the fishery, and who would otherwise have been eligible for a permit and did not obtain one because he or she was working with or was a partner with the permittee.

(d) The working partner shall also provide substantial evidence of an actual physical working participation aboard the vessel supported by the submission of documents filed with the Franchise Tax Board and supported by trip settlement sheets or similar documents that demonstrate earnings from that participation. “Trip settlement sheet” for purposes of this subdivision means a document

1 prepared after a vessel has completed a fishing trip which displays the costs
2 incurred, revenues received, and profits paid out. Investment or equity alone does
3 not establish that the person is a working partner.

4 (e) Those existing working partners other than the family relationships specified
5 in subdivision (c) may, not later than February 1, 1984, declare and prove the
6 working partnership in a manner satisfactory to the department and request that the
7 department state the fact of the working partnership upon the permit. Thereafter, a
8 nonfamily working partnership shall be declared, proved, and noted upon any
9 limited entry permit at the first issuance of the permit.

10 (f) This article does not apply to permits to take herring for roe in California.

11 **Comment.** Section 22505 continues former Fish and Game Code Section 8102 without
12 substantive change.

13 **§ 22510. Accidental death of permittee**

14 22510. (a) The Legislature finds and declares as follows:

15 (1) The accidental death of a limited entry permittee results in great hardships on
16 the permittee's family.

17 (2) Under the law as it existed immediately prior to January 1, 1987, if a
18 member of the permittee's family has not been actively working in the fishery, the
19 limited entry permit could not be transferred to a member of the family, an action
20 which deprives the family of the opportunity to continue to derive a livelihood
21 from the fishery and which imposes greater hardships.

22 (3) When there is an accidental death of a limited entry permittee, a transition
23 period is necessary to allow a family member to join the fishery and to become
24 acclimated, knowledgeable, and experienced in the fishery.

25 (b) Notwithstanding Section 22505, the department shall transfer a permit for a
26 limited entry fishery, upon application, to a parent, spouse, child, or sibling of a
27 permittee whose death was the result of an accident that occurred after January 1,
28 1986.

29 (c) Application for the transfer of a permit pursuant to subdivision (b) shall be
30 made on or before January 1, 1987, or not more than one year after the death of
31 the permittee, whichever is later.

32 (d) The director may authorize another person, when requested by the new
33 permittee, to serve in the place of the new permittee and to engage in fishing
34 activities under the authority of the limited entry permit for not more than two
35 years from the date of the permit transfer.

36 (e) "Accidental death" means death resulting directly and solely from any of the
37 following:

38 (1) An accidental injury visible on the surface of the body or disclosed by an
39 autopsy, sustained solely by external, violent, and accidental means.

40 (2) A disease or infection resulting directly from an accidental injury and
41 beginning within 30 days after the date of the injury.

42 (3) An accidental drowning.

Comment. Section 22510 continues former Fish and Game Code Section 8103 without substantive change.

§ 22515. Transfer of permit of deceased permittee

22515. (a) Upon the death of a limited entry permittee, the permit shall vest in the permittee's estate or in the surviving community estate, and may be transferred by the executor, administrator, personal representative, or surviving spouse to a qualified pointholder pursuant to Section 40380 or to a partner qualified pursuant to Section 40375.

(b) The transfer shall be initiated by notice to the department, in writing, sent by certified mail, within one year of the date of death.

(c) If no transfer is initiated within one year of the date of death, the permit shall revert to the department for disposition pursuant to Section 40395 and shall be thereafter treated as a herring permit that has not been renewed.

(d) The department may, upon written application, grant an extension of time up to one additional year for the transfer to be initiated.

Comment. Section 22515 continues former Fish and Game Code Section 8104 without substantive change.

Note. Existing Fish and Game Code Section 8104 (which would be continued by proposed Section 22510) appears to apply to the permit of *any* deceased limited entry permittee, but provides for a transfer of that permit only to a person qualified to operate in a *herring* fishery.

The Commission invites comment on whether proposed Section 22510 was intended to apply upon the death of a herring fishery permittee, and should be revised and relocated in the proposed law accordingly.

CHAPTER 3. NEARSHORE FISHERIES MANAGEMENT ACT

§ 22600. Name

22600. This chapter shall be known and may be cited as the Nearshore Fisheries Management Act.

Comment. Section 22600 continues former Fish and Game Code Section 8585 without substantive change.

§ 22605. Legislative declaration

22605. The Legislature finds and declares that important commercial and recreational fisheries exist on numerous stocks of rockfish (genus *Sebastes*), California sheephead (genus *Semicossyphus*), kelp greenling (genus *Hexagrammos*), cabezon (genus *Scorpaenichthys*), and scorpionfish (genus *Scorpaena*), in the nearshore state waters extending from the shore to one nautical mile offshore the California coast, that there is increasing pressure being placed on these fish from recreational and commercial fisheries, that many of these fish species found in the nearshore waters are slow growing and long lived, and that, if depleted, many of these species may take decades to rebuild. The Legislature further finds and declares that, although extensive research has been conducted on

1 some of these species by state and federal governments, there are many gaps in the
2 information on these species and their habitats and that there is no program
3 currently adequate for the systematic research, conservation, and management of
4 nearshore fish stocks and the sustainable activity of recreational and commercial
5 nearshore fisheries. The Legislature further finds and declares that recreational
6 fishing in California generates funds pursuant to the Federal Aid in Sport Fish
7 Restoration Act (16 U.S.C. Secs. 777 to 777l, inclusive), with revenues used for,
8 among other things, research, conservation, and management of nearshore fish.
9 The Legislature further finds and declares that a program for research and
10 conservation of nearshore fish species and their habitats is needed, and that a
11 management program for the nearshore fisheries is necessary. The Legislature
12 further finds and declares that the commission should be granted additional
13 authority to regulate the commercial and recreational fisheries to assure the
14 sustainable populations of nearshore fish stocks. Lastly, the Legislature finds and
15 declares that, whenever feasible and practicable, it is the policy of the state to
16 assure sustainable commercial and recreational nearshore fisheries, to protect
17 recreational opportunities, and to assure long-term employment in commercial and
18 recreational fisheries.

19 **Comment.** Section 22605 continues former Fish and Game Code Section 8585.5 without
20 substantive change.

21 **§ 22610. Definitions**

22 22610. The following definitions govern the construction of this chapter:

23 (a) “Nearshore fish stocks” means any of the following: rockfish (genus
24 *Sebastes*) for which size limits are established under this article, California
25 sheephead (*Semicossyphus pulcher*), greenlings of the genus *Hexagrammos*,
26 cabezon (*Scorpaenichthys marmoratus*), scorpionfish (*Scorpaena guttata*), and
27 may include other species of finfish found primarily in rocky reef or kelp habitat
28 in nearshore waters.

29 (b) “Nearshore fisheries” means the commercial or recreational take or landing
30 of any species of nearshore finfish stocks.

31 (c) “Nearshore waters” means the ocean waters of the state extending from the
32 shore to one nautical mile from land, including one nautical mile around offshore
33 rocks and islands.

34 **Comment.** Section 22610 continues former Fish and Game Code Section 8586 without
35 substantive change.

36 **§ 22615. Funding**

37 22615. Funding to prepare the plan pursuant to Section 12320, and for any
38 planning and scoping meetings, shall be derived from moneys deposited in the
39 Fish and Game Preservation Fund pursuant to Section 22630 and other funds
40 appropriated for those purposes.

1 **Comment.** Section 22615 continues former Fish and Game Code Section 8589 without
2 substantive change.

3 **§ 22620. Adoption of regulations**

4 22620. (a) The commission may adopt regulations as it determines necessary,
5 based on the advice and recommendations of the department, to regulate nearshore
6 fish stocks and fisheries. Regulations adopted by the commission pursuant to this
7 section may include, but are not limited to, requiring submittal of landing and
8 permit information, including logbooks; establishing a restricted access program;
9 establishing permit fees; and establishing limitations on the fishery based on time,
10 area, type, and amount of gear, and amount of catch, species, and size of fish.

11 (b) Regulations adopted by the commission pursuant to this section may make
12 inoperative any fishery management statute relevant to the nearshore fishery. Any
13 regulation adopted by the commission pursuant to this subdivision shall specify
14 the particular statute to be made inoperative.

15 (c) The circumstances, restrictions, and requirements of Section 1025 do not
16 apply to regulations adopted pursuant to this section.

17 (d) Any regulations adopted pursuant to this section shall be adopted following
18 consultation with fishery participants and other interested persons consistent with
19 Section 12165.

20 **Comment.** Section 22620 continues former Fish and Game Code Section 8587.1 without
21 substantive change.

22 See also Section 5050 (enforcement).

23 **§ 22625. Costs of act**

24 22625. Funding to pay the costs of this chapter shall be made available from the
25 revenues deposited in the Fish and Game Preservation Fund pursuant to Sections
26 5050, 22630, and 22635, and other funds appropriated for these purposes.

27 **Comment.** Section 22625 continues former Fish and Game Code Section 8586.1 without
28 substantive change.

29 **§ 22630. Required permit**

30 22630. (a) Any person taking, possessing aboard a boat, or landing any species
31 of nearshore fish stock for a commercial purpose shall possess a valid nearshore
32 fishery permit issued to that person that has not been suspended or revoked, except
33 that when using a boat to take nearshore fish stocks at least one person aboard the
34 boat shall have a valid nearshore fishery permit.

35 (b) Nearshore fishing permits are revocable.

36 (c) The fee for a nearshore fishing permit is one hundred and twenty five dollars
37 (\$125).

38 **Comment.** Section 22630 continues former Fish and Game Code Section 8587 without
39 substantive change.

40 See also Section 5050 (enforcement).

1 **§ 22635. Use of permit fees**

2 22635. (a) Fees received by the department pursuant to Section 22630 shall be
3 deposited in the Fish and Game Preservation Fund, to be used by the department
4 to prepare, develop, and implement the nearshore fisheries management plan, and
5 for the following purposes:

6 (1) For research and management of nearshore fish stocks and nearshore habitat.
7 For the purposes of this section, “research” includes, but is not limited to,
8 investigation, experimentation, monitoring, and analysis, and “management”
9 means establishing and maintaining a sustainable utilization.

10 (2) For supplementary funding of allocations for the enforcement of statutes and
11 regulations applicable to nearshore fish stocks, including, but not limited to, the
12 acquisition of special equipment and the production and dissemination of printed
13 materials, such as pamphlets, booklets, and posters aimed at compliance with
14 nearshore fishing regulations.

15 (3) For the direction of volunteer groups assisting with nearshore fish stocks and
16 nearshore habitat management, for presentations of related matters at scientific
17 conferences and educational institutions, and for publication of related material.

18 (b) The department shall maintain internal accounts that ensure that the fees
19 received pursuant to Section 22630 are disbursed for the purposes stated in
20 subdivision (a).

21 (c) The commission shall require an annual accounting from the department on
22 the deposits into, and expenditures from, the Fish and Game Preservation Fund, as
23 related to the revenues generated pursuant to Section 22630. Notwithstanding
24 Section 7550.5 of the Government Code, a copy of the accounting shall be
25 provided to the Legislature for review by the Joint Committee on Fisheries and
26 Aquaculture, and if that committee is not in existence at the time, by the
27 appropriate policy committee in each house of the Legislature.

28 (d) Unencumbered fees collected pursuant to Section 22630 during any previous
29 calendar year shall remain in the fund and expended for the purposes of
30 subdivision (a). All interest and other earnings on the fees received pursuant to
31 Section 22630 shall be deposited in the fund and shall be used for the purposes of
32 subdivision (a).

33 **Comment.** Section 22635 continues former Fish and Game Code Section 8589.7 without
34 substantive change.

35 **CHAPTER 4. FAR OFFSHORE FISHERY**

36 **§ 22700. “Far offshore fishery”**

37 22700. “Far offshore fishery” means a fishery that lies beyond the outer
38 boundary of the outer boundary of the United States 200-mile exclusive economic
39 zone, as that term is defined by paragraph (11) of Section 1802 of Title 16 of the
40 United States Code.

1 **Comment.** Section 22700 continues former Fish and Game Code Section 8111 without
2 substantive change.

3 **§ 22705. Legislative declaration**

4 22705. (a) The Legislature finds and declares that dramatic changes have taken
5 place in the methods and geographic areas of effort by California-based
6 commercial fishers.

7 (b) The Legislature further finds and declares that because the conditions that
8 now exist could not be seen at the time of their inception, some existing
9 regulations are now unreasonably restrictive. In some cases, existing statutes and
10 regulations prohibit California fishers from participating in, or landing in
11 California the primary product or incidental product of, their effort in newly
12 developed far offshore fisheries. This situation is detrimental to the interests of the
13 fishers, fish processors, and consumers of California.

14 **Comment.** Section 22705 continues former Fish and Game Code Section 8110 without
15 substantive change.

16 **§ 22710. Landing of fish taken in far offshore fishery**

17 22710. Notwithstanding any other section of this code, fish taken in a far
18 offshore fishery, which may be lawfully imported, may be landed in this state by
19 persons operating a commercial fishing vessel registered pursuant to Article 1
20 (commencing with Section 14750) of Chapter 2 of Title 2, who took the fish in the
21 far offshore fishery.

22 **Comment.** Section 22710 continues former Fish and Game Code Section 8112 without
23 substantive change.

24 **§ 22715. Declaration of intended landing**

25 22715. (a) Prior to departure from any port in the United States for the purpose
26 of taking fish in a far offshore fishery, the operator of any vessel landing fish in
27 California that will be taken in the far offshore fishery shall file a declaration of
28 that intention with the department, on forms prescribed by the department.

29 (b) The declaration shall be valid when signed by the vessel operator and
30 completed with information prescribed by the department.

31 (c) Upon completion of the trip and within 12 hours of arrival at a port in this
32 state, the operator of the vessel shall complete and submit the return portion of the
33 declaration to the department.

34 (d) This section does not apply to a commercial fisherman who uses or
35 possesses only troll lines, or gear for angling for the taking or possession of
36 albacore only.

37 **Comment.** Section 22715 continues former Fish and Game Code Section 8113 without
38 substantive change.

39 **Note.** Existing Fish and Game Code Section 8113(d) uses the term “troll line,” but does not
40 appear to be governed by the definition of that term provided in Fish and Game Code Section

9025.5(b) (proposed Section 18715). **The Commission invites comment on whether that definition should apply.**

§ 22720. Prohibited fishing during declared trip

22720. It is unlawful for the operator of a vessel operating under authority of this article to fish in, or land fish from, any waters within the United States 200-mile exclusive economic zone, as that term is defined by paragraph (11) of Section 1802 of Title 16 of the United States Code, during any trip for which the operator filed a declaration with the department to fish in a far offshore fishery.

Comment. Section 22720 continues former Fish and Game Code Section 8114 without substantive change.

CHAPTER 5. RESTRICTION OR CLOSURE OF FISHERIES

§ 22800. Restriction on take based on unsustainable fishing

22800. (a) If the director determines, based on the best available scientific information, or other relevant information that the director possesses or receives, and on at least one public hearing in the area of a fishery, that taking of a species in the fishery is being conducted in a manner that is not sustainable, the director may order the closure of any waters or otherwise restrict the taking in waters of the state of that species.

(b) The department shall give notice of any hearing to be held pursuant to this section to the commission and its marine resources committee as far in advance of the hearing date as possible.

(c) Any closure or restriction order shall be adopted by emergency regulation in accordance with Chapter 3.5 (commencing with Section 11340) of Division 3 of Title 2 of the Government Code.

(d) The director shall bring to the attention of the commission within seven working days any regulation adopted pursuant to this section.

(e) Any regulation adopted shall be effective for only 30 days, unless the commission extends the closure or restriction under any authority it may have, or unless the director orders another closure or restriction, consistent with the requirements of subdivision (a).

(f) Nothing in this section restricts any existing jurisdiction of the department with regard to the regulation of fisheries on the high seas.

Comment. Subdivisions (a) through (e) of Section 22800 restate former Fish and Game Code Section 7710(a)-(c) without substantive change.

Subdivision (f) continues the part of the last paragraph of former Fish and Game Code Section 7710 applicable to that section without substantive change.

Notes. (1) Although existing Fish and Game Code Section 7710 authorizes the director, under specified circumstances, to order the closure of any waters or otherwise restrict the taking “under a fishing license” of certain species, it is unlikely the Legislature intended to limit that authorized restriction solely to *licensed* taking. Proposed Section 22800 (which would continue existing Section 7710) would authorize the director to restrict both licensed and unlicensed taking.

(2) Proposed Section 22800(a) is intended to restate the first sentence of existing Fish and Game Code Section 7710(a) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

7710. (a) If the director determines, based on the best available scientific information, or other relevant information that the director possesses or receives, and on at least one public hearing in the area of the fishery, that taking in a fishery is being conducted in a manner that is not sustainable, the director may order the closure of any waters or otherwise restrict the taking under a fishing license in state waters of that species.

The Commission invites comment on whether proposed Section 22800(a) accurately continues the intended meaning of the first sentence of existing Section 7710(a).

§ 22805. Removal of restriction

22805. (a) If, during the period that regulations adopted pursuant to Section 22800 are effective, the director determines, based on thorough and adequate scientific evidence and at least one public hearing in the area of the fishery, that any species or subspecies whose take was previously restricted has recovered, or additional evidence indicates that the species or subspecies is not in danger of irreparable injury, the director may remove the restriction on taking.

(b) Action to remove the restriction shall be by adoption of an emergency regulation in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(c) The director shall bring to the attention of the Legislature, within seven calendar days, any regulation adopted pursuant to this section.

(d) Nothing in this section restricts any existing jurisdiction of the department with regard to the regulation of fisheries on the high seas.

Comment. Subdivisions (a) through (c) of Section 22805 continue former Fish and Game Code Section 7710.5 without substantive change.

Subdivision (d) continues the part of the last paragraph of former Fish and Game Code Section 7710 applicable to former Fish and Game Code Section 7710.5 without substantive change.

§ 22810. Appeal of closure or restriction

22810. A closure or restriction under Section 22800, or the removal of a closure or restriction under Section 22805, may be appealed to the commission. The commission shall hear and decide the appeal within a time that is meaningful, taking into account the duration of the fishery and the economics of the fishery.

Comment. Section 22810 continues former Fish and Game Code Section 7710.1 without substantive change.

§ 22815. Development of alternative fisheries or alternative fishing gear

22815. Where a fishery is closed or restricted due to the need to protect a fishery resource, marine mammals, or sea birds, or due to a conflict with other fisheries or uses of the marine environment, it shall be the policy of the department and the commission, consistent with budgetary and personnel considerations, to assist and foster the development of alternative fisheries or alternative fishing gear for those commercial fishers affected by the restriction, closure, or resource loss, including,

1 but not limited to, the issuing of experimental fishing permits pursuant to Chapter
2 5 (commencing with Section 12050) of Title 2 of Part 4.

3 **Comment.** Section 22815 continues former Fish and Game Code Section 7712 without
4 substantive change.

5  **Note.** Proposed Section 22815 would continue Section 7712, which was amended by 2018
6 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
7 anticipation of its effect.

8 CHAPTER 6. COMMERCIAL FISHERIES CAPACITY REDUCTION
9 PROGRAM

10 **§ 22900. Federal groundfish buy-back program**

11 22900. It is the intent of the Legislature to enact legislation establishing a
12 comprehensive program to allow California groundfish fishers to participate in any
13 federally established buy-back program for the Pacific groundfish fishery.

14 **Comment.** Section 22900 continues former Fish and Game Code Section 7630 without
15 substantive change.

16 **§ 22905. Establishment of program**

17 22905. There is hereby established the Commercial Fisheries Capacity
18 Reduction Account in the Fish and Game Preservation Fund. Fees collected
19 pursuant to Section 16610 shall be deposited into the account. Money in the
20 account shall be used to repay the California fishers' share of any federal loans
21 used in the federal West Coast Groundfish Fishery Capacity Reduction Program
22 (Sec. 212, P.L. 107-206).

23 **Comment.** Section 22905 continues the first and second sentences of former Fish and Game
24 Code Section 8125 without substantive change.

25 **§ 22910. Capacity reduction fee**

26 22910. The commission shall establish a capacity reduction fee on the taking of
27 certain species of fish and shellfish, consistent with the West Coast Groundfish
28 Fishery Capacity Reduction Program. In establishing the fee, the commission shall
29 also consider the administrative cost associated with collecting these fees.

30 **Comment.** Section 22910 continues former Fish and Game Code Section 8126 without
31 substantive change.

32 **§ 22915. Regulation conforming state law with federal law**

33 22915. The commission may establish, by regulation, any additional program
34 elements necessary to conform state law to federal law, in order to allow
35 California groundfish fishers to fully participate in the federally established buy-
36 back program for the Pacific groundfish fishery.

37 **Comment.** Section 22915 continues the third sentence of former Fish and Game Code Section
38 8125 without substantive change.

1 TITLE 16. MISCELLANEOUS PROGRAMS

2 CHAPTER 1. INSURANCE POOLING

3 § 23100. Loss or damage to vessel or machinery

4 23100. (a) Any person engaged in the business of licensed commercial fishing
5 may enter into an arrangement with other authorized persons for the pooling of
6 funds to pay claims or losses arising out of loss or damage to a vessel or
7 machinery used in the business of commercial fishing and owned by a member of
8 the pool. A pool established pursuant to this section is not, and shall not be,
9 subject to the Insurance Code and is not a member of the California Insurance
10 Guarantee Association under Article 14.2 (commencing with Section 1063) of
11 Chapter 1 of Part 2 of Division 1 of the Insurance Code.

12 (b) The pool established pursuant to this section shall have initial pooled
13 resources of not less than two hundred fifty thousand dollars (\$250,000), and shall
14 operate under generally acceptable accounting principles.

15 (c) All participating persons in any pool established pursuant to this section shall
16 agree to pay premiums or make other mandatory financial contributions or
17 commitments necessary to ensure a financially sound risk pool.

18 (d) For the purpose of this section, “person engaged in the business of licensed
19 commercial fishing” and “authorized person” mean any natural person,
20 partnership, corporation, limited liability company, or other person or entity
21 engaged in the business of fishing for commercial purposes for which that person
22 or its agents or employees are required to be licensed.

23 **Comment.** Section 23100 continues former Fish and Game Code Section 7690 without
24 substantive change.

25 CHAPTER 2. EDUCATIONAL AND SCIENTIFIC PROGRAMS

26 § 23150. Take for educational or scientific purposes

27 23150. The commission may establish rules and regulations for the commercial
28 taking of fish for educational and scientific purposes.

29 **Comment.** Section 23150 continues former Fish and Game Code Section 7709 without
30 substantive change.

31 CHAPTER 3. MARKETING

32 § 23200. Collection of an assessment on behalf of marketing council or commission

33 23200. The director may enter into an agreement with the Secretary of Food and
34 Agriculture for the collection of an assessment on behalf of any marketing council
35 or commission for fish or seafood organized under the Food and Agricultural
36 Code. The agreement may authorize the department to collect the assessment in
37 conjunction with the collection of landing fees on those species for which the

1 marketing council or commission is organized. The department shall remit the
2 amount of the assessment collected to the Secretary of Food and Agriculture
3 according to the agreement after making the collection. Before remitting the
4 assessments, the department may deduct an administrative fee in an amount agreed
5 to with the Secretary of Food and Agriculture to pay the costs of collection and
6 remission of the assessments. The administrative fees shall be deposited in the
7 Fish and Game Preservation Fund.

8 **Comment.** Section 23200 continues former Fish and Game Code Section 1069 without
9 substantive change.

10 DIVISION 7. WILDLIFE PROPAGATION, DOMESTICATION, 11 POSSESSION, AND SALE

12 PART 1. AQUACULTURE

13 TITLE 1. GENERAL PROVISIONS

14 § 23300. Applicability of part

15 23300. Nothing in this part applies to authorized species of ornamental marine
16 or freshwater plants or animals that are not utilized for human consumption or bait
17 purposes and that are maintained in closed systems for personal, pet industry, or
18 hobby purposes.

19 **Comment.** Section 23300 continues former Fish and Game Code Section 15006 without
20 substantive change.

21 § 23305. Governing provisions

22 23305. The business of aquaculture is governed by this part, and is exempt from
23 Part 6 (commencing with Section 14200) of Division 6 and any other provision of
24 this code relating to commercial fishing, harvesting, processing, and marketing.

25 **Comment.** Section 23305 continues former Fish and Game Code Section 15000(a) without
26 substantive change.

27 TITLE 2. ADMINISTRATION

28 CHAPTER 1. AGENCY DUTIES AND POWERS

29 § 23350. Coordination of agencies

30 23350. (a) Except as provided in Sections 23355, 23800, 23810, and 23815, the
31 business of aquaculture processing, distribution, and marketing is administered by
32 the Secretary of Food and Agriculture.

33 (b) The director may enter into an agreement with the Secretary of Food and
34 Agriculture for the resolution of any conflict that arises under subdivision (a).

1 (c) Any costs incurred by the department in implementing Sections 23355,
2 23800, 23810, and 23815 shall be recovered pursuant to this part.

3 **Comment.** Section 23350 continues former Fish and Game Code Section 15000(b)-(d) without
4 substantive change.

5 **§ 23355. Commission regulation**

6 23355. (a) When necessary for the protection of native wildlife, the commission
7 may regulate the transportation, purchase, possession, and sale of specific
8 aquaculture products as provided for in this section.

9 (b) The commission may determine that aquaculture products shall be
10 accompanied by a document containing any of the following information:

11 (1) The name, address, and registration number of the aquaculture producer.

12 (2) The species.

13 (3) The weight, volume, or count within the container.

14 (4) The date of the shipment.

15 (5) The name and address of the intended receiver.

16 (c) The commission may require that certain aquaculture products shall be
17 additionally identified as being aquaculture produced, except for the following:

18 (1) Trout.

19 (2) Catfish.

20 (3) Kelp and aquatic plants.

21 (4) Frogs and amphibia.

22 (5) All bivalve mollusks (except little neck clams).

23 (6) All members of the family Centrarchidae.

24 (7) Crayfish.

25 (8) Sea urchins.

26 (9) Shrimp and fresh water prawns.

27 (10) Crab.

28 **Comment.** Section 23355 continues former Fish and Game Code Section 15005 without
29 substantive change.

30 **§ 23360. Preparation of environmental impact reports by department**

31 23360. (a) The department shall, in consultation with the Aquaculture
32 Development Committee, prepare programmatic environmental impact reports for
33 existing and potential commercial aquaculture operations in both coastal and
34 inland areas of the state if both of the following conditions are met:

35 (1) Funds are appropriated to the department for this purpose.

36 (2) Matching funds are provided by the aquaculture industry. For the purpose of
37 this section, “matching funds” include, but are not limited to, any funds expended
38 by the aquaculture industry before January 1, 2006, for the preparation of a
39 programmatic environmental impact report.

40 (b) If the final programmatic environmental impact report is prepared pursuant
41 to subdivision (a) for coastal marine finfish aquaculture projects and approved by

1 the commission under the California Environmental Quality Act set forth in
2 Division 13 (commencing with Section 21000) of the Public Resources Code, the
3 report shall provide a framework for managing marine finfish aquaculture in an
4 environmentally sustainable manner that, at a minimum, adequately considers all
5 of the following factors:

6 (1) Appropriate areas for siting marine finfish aquaculture operations to avoid
7 adverse impacts, and minimize any unavoidable impacts, on user groups, public
8 trust values, and the marine environment.

9 (2) The effects on sensitive ocean and coastal habitats.

10 (3) The effects on marine ecosystems, commercial and recreational fishing, and
11 other important ocean uses.

12 (4) The effects on other plant and animal species, especially species protected or
13 recovering under state and federal law.

14 (5) The effects of the use of chemical and biological products and pollutants and
15 nutrient wastes on human health and the marine environment.

16 (6) The effects of interactions with marine mammals and birds.

17 (7) The cumulative effects of a number of similar finfish aquaculture projects on
18 the ability of the marine environment to support ecologically significant flora and
19 fauna.

20 (8) The effects of feed, fish meal, and fish oil on marine ecosystems.

21 (9) The effects of escaped fish on wild fish stocks and the marine environment.

22 (10) The design of facilities and farming practices so as to avoid adverse
23 environmental impacts, and to minimize any unavoidable impacts.

24 **Comment.** Section 23360 continues former Fish and Game Code Section 15008 without
25 substantive change.

26 **§ 23365. Department aquaculture coordinator**

27 23365. There is within the department an aquaculture coordinator who shall
28 perform all of the following duties as part of the department's aquaculture
29 program:

30 (a) Promote understanding of aquaculture among public agencies and the
31 general public.

32 (b) Propose methods of reducing the negative impact of public regulation at all
33 levels of government on the aquaculture industry.

34 (c) Provide information on all aspects of regulatory compliance to the various
35 sectors of the aquaculture industry.

36 (d) Provide advice to the owner of a registered aquaculture facility on project
37 siting and facility design, as necessary, to comply with regulatory requirements.

38 (e) Coordinate with the Aquaculture Development Committee regarding the
39 duties described in subdivisions (a) to (d), inclusive.

40 **Comment.** Section 23365 continues former Fish and Game Code Section 15100 without
41 substantive change.

CHAPTER 2. FEES AND COSTS

§ 23500. Costs for requested inspections

23500. Aquaculturists operating under this part shall pay all costs incurred by the department when conducting any inspections of plants, animals, facilities, or culture areas required by this part, or by regulations adopted pursuant to this part, when requested by the aquaculturists.

Comment. Section 23500 continues former Fish and Game Code Section 15004(c) without substantive change.

§ 23505. Evaluation of fees by department

23505. (a) At least once every five years, the department shall analyze the fees and taxes authorized by this part to ensure that the amount of the appropriate fee or tax is sufficient to fully fund the aquaculture program.

(b) The department shall, as appropriate, recommend fee or tax changes to the Legislature or the commission.

Comment. Section 23505 continues former Fish and Game Code Section 15004(a) and (b) without substantive change.

TITLE 3. REGISTRATION

CHAPTER 1. GENERAL PROVISIONS

§ 23600. Registration requirement

23600. It is unlawful to conduct aquaculture operations or to culture approved species of aquatic plants and animals unless registered under this chapter.

Comment. Section 23600 continues the third sentence of former Fish and Game Code Section 15101(b) without substantive change.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15101, the first effective until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, § 3, 4. However, the provision that would be continued by proposed Section 23600 is the same in both versions. For that reason, only one version of Section 23600 is included in the proposed law.

§ 23605. Required information

23605. (a) The owner of each aquaculture facility shall register all of the following information with the department by March 1 of each year:

(1) The owner's name.

(2) The species grown.

(3) The location or locations of each operation or operations.

(b) The department may provide registration forms for this purpose.

(c) The annual registration of information required by subdivision (a) is not a project for purposes of the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

Comment. Subdivision (a) of Section 23605 continues former Fish and Game Code Section 15101(a) without substantive change.

Subdivision (b) continues the first part of the first sentence of former Fish and Game Code Section 15101(b) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 15101(c) without substantive change.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15101, the first operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, § 3, 4. However, the provisions that would be continued by proposed Section 23605 are the same in both versions. For that reason, only one version of Section 23605 is included in the proposed law.

§ 23610. Department review of registration

23610. The department may establish a procedure for the review of the information provided pursuant to Section 23605, to ensure that the operation will not be detrimental to native wildlife.

Comment. Section 23610 continues the second part of the first sentence of former Fish and Game Code Section 15101(b) without substantive change.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15101, the first operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, § 3, 4. However, the provision that would be continued by proposed Section 23610 is the same in both versions. For that reason, only one version of Section 23610 is included in the proposed law.

§ 23615. Denial of application based on prior dishonored check

23615. Notwithstanding any other provision of law, the department may deny the issuance or renewal of any licenses, permits, or other authorizations to take or possess fish for commercial purposes, or to conduct business involving fish, that are issued pursuant to this title if the applicant for that authorization or renewal has, within the preceding year, issued to the department a check that was dishonored by the bank upon which the check was drawn and the person has failed to reimburse the department for the amount due plus a fee of thirty dollars (\$30) and any dishonored check charges incurred by the department.

Comment. Section 23615 continues the part of former Fish and Game Code Section 7852.25 applicable to licenses and other entitlements related to aquaculture without substantive change.

Note. The substance of Section 7852.25 has been divided between proposed Sections 14555 (commercial fishing), 20235 (fish businesses), and 23615 (aquaculture). Should an equivalent provision be added to the law that governs commercial fishing vessel registrations (perhaps as proposed Section 14795)?

CHAPTER 2. FEES

§ 23700. Registration fee (effective until January 1, 2023)

23700. (a) The department shall impose a registration fee of eight hundred dollars (\$800) to recover the cost of reviewing new registrations.

(b) For renewing registrations, the department shall impose a registration fee of five hundred dollars (\$500).

(c) The registration fees specified in this section are applicable to the 2013 registration year, and shall be adjusted annually thereafter pursuant to Section 3755.

(d) This section shall remain in effect only until January 1, 2023, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2023, deletes or extends that date.

Comment. Subdivisions (a) through (c) of Section 23700 continue, without substantive change, a part of the first sentence, the second sentence, and the fourth sentence of former Fish and Game Code Section 15101(b), as amended by Section 3 of Chapter 521 of the Statutes of 2017.

Subdivision (d) continues former Fish and Game Code Section 15101(d) without substantive change.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15101, the first operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, § 3, 4. As the provisions that would be continued by proposed Section 23700 are substantively different in the two versions of Section 15101, the proposed law includes two versions of proposed Section 23700.

§ 23700. Registration fee (operative on January 1, 2023)

23700. (a) The department shall impose a registration fee of five hundred forty-nine dollars (\$549) to recover the cost of reviewing new registrations.

(b) For renewing registrations, the department shall impose a registration fee of two hundred seventy-five dollars (\$275).

(c) The registration fees specified in this section are applicable to the 2004 registration year, and shall be adjusted annually thereafter pursuant to Section 3755.

(d) This section shall become operative on January 1, 2023, at which time the registration fees specified in this section shall be adjusted pursuant to subdivision (c) as if this section had not been inoperative.

Comment. Subdivisions (a) through (c) of Section 23700 continue, without substantive change, a part of the first sentence, the second sentence, and the fourth sentence of former Fish and Game Code Section 15101(b), as amended by Section 4 of Chapter 521 of the Statutes of 2017.

Subdivision (d) continues former Fish and Game Code Section 15101(d) without substantive change.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15101, the first operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, § 3, 4. As the provisions that would be continued by proposed Section

23700 are different in the two versions of Section 15101, the proposed law includes two versions of proposed Section 23700.

§ 23705. Surcharge fee (effective until January 1, 2023)

23705. (a) In addition to the fees specified in Section 23700, a surcharge fee of six hundred (\$600) shall be paid at the time of registration by the owner of an aquaculture facility if the gross annual sales of aquaculture products of the facility during the prior calendar year exceed twenty-five thousand dollars (\$25,000).

(b) Any person who fails to pay the surcharge fee required in this section at the time of registration shall be assessed a delinquency penalty pursuant to Section 23710.

(c) The surcharge imposed pursuant to this section shall be applicable to the 2013 registration year and shall be adjusted annually thereafter pursuant to Section 3755.

(d) This section shall remain in effect only until January 1, 2023, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2023, deletes or extends that date.

Comment. Section 23705 continues, without substantive change, former Fish and Game Code Section 15103(a), (c)-(e), as amended by Section 5 of Chapter 521 of the Statutes of 2017.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15103, one operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, § 5, 6. As the provisions that would be continued by proposed Section 23705 are substantively different in the two versions of Section 15103, the proposed law includes two versions of proposed Section 23705.

§ 23705. Surcharge fee (operative January 1, 2023)

23705. (a) In addition to the fees specified in Section 23700, a surcharge fee of four hundred twelve dollars (\$412) shall be paid at the time of registration by the owner of an aquaculture facility if the gross annual sales of aquaculture products of the facility during the prior calendar year exceed twenty-five thousand dollars (\$25,000).

(b) Any person who fails to pay the surcharge fee required in this section at the time of registration shall be assessed a delinquency penalty pursuant to Section 23710.

(c) The surcharge imposed pursuant to this section shall be applicable to the 2004 registration year and shall be adjusted annually thereafter pursuant to Section 3755.

(d) This section shall become operative on January 1, 2023, at which time the surcharge fee specified in this section shall be adjusted pursuant to subdivision (c) as if this section had not been inoperative.

Comment. Section 23705 continues, without substantive change, former Fish and Game Code Section 15103(a), (c)-(e), as amended by Section 6 of Chapter 521 of the Statutes of 2017.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15103, one operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat.

ch. 521, § 5, 6. As the provisions that would be continued by proposed Section 23705 are substantively different in the two versions of Section 15103, the proposed law includes two versions of proposed Section 23705.

§ 23710. Delinquent fee payment (effective until January 1, 2023)

23710. (a) If any person engages in the business of aquaculture, as regulated under this division, without having paid the registration fee or surcharge fee within one calendar month of the commencement of business, or, for renewal of registration, on or before April 1 of the registration year, the fees are delinquent.

(b) A penalty shall be paid at the time of registration for any fees that are delinquent in the amount of one hundred fifty dollars (\$150).

(c) The penalty imposed pursuant to subdivision (b) shall be applicable to the 2013 registration year, and shall be adjusted thereafter pursuant to Section 3755.

(d) This section shall remain in effect only until January 1, 2023, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2023, deletes or extends that date.

Comment. Section 23710 continues, without substantive change, former Fish and Game Code Section 15104, as amended by Section 7 of Chapter 521 of the Statutes of 2017.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15104, one operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, §§ 7, 8. As the provisions that would be continued by proposed Section 23710 are substantively different in the two versions of Section 15104, the proposed law includes two versions of proposed Section 23710.

§ 23710. Delinquent fee payment (operative January 1, 2023)

23710. (a) If any person engages in the business of aquaculture, as regulated under this division, without having paid the registration fee or surcharge fee within one calendar month of the commencement of business, or, for renewal of registration, on or before April 1 of the registration year, the fees are delinquent.

(b) A penalty shall be paid at the time of registration for any fees that are delinquent in the amount of fifty dollars (\$50).

(c) The penalty imposed pursuant to subdivision (b) shall be applicable to the 2005 registration year, and shall be adjusted thereafter pursuant to Section 3755.

(d) This section shall become operative on January 1, 2023, at which time the penalty specified in this section shall be adjusted pursuant to subdivision (c) as if this section had not been inoperative.

Comment. Section 23710 continues, without substantive change, former Fish and Game Code Section 15104, as amended by Section 8 of Chapter 521 of the Statutes of 2017.

Note. The Fish and Game Code contains two versions of Fish and Game Code Section 15104, one operative until January 1, 2023, the second operative on January 1, 2023. See 2017 Cal. Stat. ch. 521, §§ 7, 8. As the provisions that would be continued by proposed Section 23710 are substantively different in the two versions of Section 15104, the proposed law includes two versions of proposed Section 23710.

1 **§ 23715. Expenditure of collected funds**

2 23715. (a) Notwithstanding Section 3600, 3605, or 3810, all moneys collected
3 by the department pursuant to this part shall be deposited in the Fish and Game
4 Preservation Fund, and shall be expended solely on the department's aquaculture
5 program pursuant to this part.

6 (b) Notwithstanding Section 3800, these moneys are available for appropriation
7 by the Legislature in the annual Budget Act for purposes of this part.

8 (c) The department shall maintain internal accountability necessary to ensure
9 that all restrictions on the expenditure of these funds are met, and shall provide an
10 accounting of the aquaculture program account balance and expenditures upon
11 request of the Aquaculture Development Committee, or the Joint Committee on
12 Fisheries and Aquaculture.

13 (d) Revenues pursuant to this chapter may be used only to pay the costs incurred
14 in the administration and enforcement of the department's aquaculture program.

15 (e) The department shall prepare and submit to the Legislature, on or before
16 February 1, 2022, a report regarding the aquaculture program undertaken using
17 revenues derived pursuant to that program, the benefits derived, and its
18 recommendations for revising the aquaculture program requirement, if any. The
19 report shall be submitted in compliance with Section 9795 of the Government
20 Code.

21 (f) The requirement for submitting a report under subdivision (e) is inoperative
22 on February 1, 2026, pursuant to Section 10231.5 of the Government Code.

23 **Comment.** Section 23715 continues former Fish and Game Code Section 15105 without
24 substantive change.

25 **§ 23720. Sales and production records**

26 23720. Each owner of a registered aquaculture facility shall maintain sales and
27 production records which shall be made available upon request of the department
28 to assist the department in the administration of Section 23365, and this title.

29 **Comment.** Section 23720 continues former Fish and Game Code Section 15103(b) without
30 substantive change.

31  **Note.** The Fish and Game Code contains two versions of Fish and Game Code Section
32 15103, the first operative until January 1, 2023, the second operative on January 1, 2023. See
33 2017 Cal. Stat. ch. 521, § 5, 6. However, the provision that would be continued by proposed
34 Section 23720 is the same in both versions. For that reason, only one version of Section 23720 is
35 included in the proposed law.

1 TITLE 4. AQUATIC ORGANISMS

2 § 23800. Regulation of placement of organisms

3 23800. (a) The commission may regulate the placing of aquatic plants and
4 animals in waters of the state.

5 (b) The commission may prohibit the placement of specific species of aquatic
6 plants or animals in designated waters of the state. The prohibition may not
7 include species that are found to be native, or that are stocked by the state in a
8 location where prohibition is contemplated.

9 **Comment.** Subdivision (a) of Section 23800 continues the first sentence of former Fish and
10 Game Code Section 15200 without substantive change.

11 Subdivision (b) continues former Fish and Game Code Section 15202 without substantive
12 change.

13 See also Section 5252 (enforcement).

14 § 23805. Operation detrimental to adjacent wildlife

15 23805. The department may prohibit an aquaculture operation or the culturing of
16 any species at any location where it is determined it would be detrimental to
17 adjacent native wildlife.

18 **Comment.** Section 23805 continues former Fish and Game Code Section 15102 without
19 substantive change.

20 § 23810. Permit required to place organisms

21 23810. (a) A permit is required to place fish on public or private land or water in
22 any watershed above an established public or private fish hatchery.

23 (b) The department shall deny the permit if there is evidence that water quality
24 or potential disease transfer will be adverse to the established hatchery.

25 **Comment.** Section 23810 continues former Fish and Game Code Section 15201 without
26 substantive change.

27 § 23815. Movement of fish between registered aquaculturists

28 23815. Movement of live fish between two registered aquaculturists who are
29 registered for those species does not require a permit.

30 **Comment.** Section 23815 continues the second sentence of former Fish and Game Code
31 Section 15200 without substantive change.

32 § 23820. Fee for use of public land and waters

33 23820. (a) The department may assess a fee on persons growing aquaculture
34 products on public lands and in public waters based on the price per pound of the
35 products sold. The fees, if imposed, shall be set at amounts necessary to defray the
36 costs of the commission and the department in administering this part. However,
37 the fees, if any, may not exceed the rates as provided in Section 20955.

38 (b) The price per pound shall be based on the whole product weight, or its
39 equivalent as taken by the lessee.

(c) The fee imposed by this section shall be paid monthly to the department within 30 days after the close of each month. If not paid within 60 days after the close of the month in which it is due, a 10 percent penalty shall be paid.

Comment. Section 23820 continues former Fish and Game Code Section 15003 without substantive change.

TITLE 5. ACQUISITION OF ORGANISMS

§ 23900. Sources for brood stock

23900. Aquatic plants or animals may be legally obtained for use as brood stock from any of the following sources:

(a) A holder of a commercial fishing license.

(b) A registered aquaculturist.

(c) The department.

(d) Imported sources authorized by Title 8 (commencing with Section 24700).

Comment. Section 23900 continues former Fish and Game Code Section 15300 without substantive change.

§ 23905. Collection of organisms by registered aquaculturist

23905. Aquatic plants and animals may be collected by a registered aquaculturist only with the written approval of the department. The department may specify the time, place, and manner of collection, and may collect a fee from the aquaculturist in an amount sufficient to cover the cost of processing the approval.

(b) Notwithstanding subdivision (a), the fee for collecting sturgeon or striped bass broodstock shall be five hundred dollars (\$500).

Comment. Subdivision (a) of Section 23905 continues former Fish and Game Code Section 15301(b) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 15301(c) without substantive change.

§ 23910. Sale of organisms by department

23910. (a) The department may sell wild aquatic plants or animals, except rare, endangered, or fully protected species, for aquaculture use, at a price approximating the administrative cost to the department for the collection or sale of the plants or animals. The commission shall set this price.

Comment. Section 23910 continues former Fish and Game Code Section 15301(a) without substantive change.

§ 23915. Ownership of progeny

23915. The cultured progeny of wild plants and animals lawfully obtained under Section 23900 are the exclusive property of that person who cultured them, or that person's successor in interest.

1 **Comment.** Section 23915 continues former Fish and Game Code Section 15001 without
2 substantive change.

3 TITLE 6. LEASING OF STATE WATER BOTTOMS

4 CHAPTER 1. GENERAL PROVISIONS

5 **§ 24000. Authority and procedure**

6 24000. (a) Except as prohibited by Chapter 2 (commencing with Section 24950)
7 of Title 10, the commission may lease state water bottoms, or the water column, to
8 any person for aquaculture, including, but not limited to, marine finfish
9 aquaculture.

10 (b) Upon appropriation of funds for that purpose, or if funds are otherwise
11 available, the commission shall adopt regulations governing the terms of the
12 leases, after consulting with affected stakeholders in a public process.

13 (c) No state leases shall be issued, unless the commission determines that the
14 lease is in the public interest in a public hearing conducted in a fair and transparent
15 manner, with notice and comment, in accordance with commission procedures.

16 (d) Leases issued, and regulations adopted, pursuant to this section, shall not be
17 construed to be fishery management plans.

18 **Comment.** Section 24000 continues former Fish and Game Code Section 15400(a) without
19 substantive change.

20 **§ 24005. Lease required for marine finfish aquaculture**

21 24005. A person shall not engage in marine finfish aquaculture in ocean waters
22 within the jurisdiction of the state without a lease from the commission pursuant to
23 Chapter 2 (commencing with Section 24950) of Title 10.

24 **Comment.** Section 24005 continues the first sentence of former Fish and Game Code Section
25 15400(b) without substantive change.

26 **§ 24010. Standards for leases and regulation**

27 24010. Leases and regulations adopted by the commission for marine finfish
28 aquaculture shall meet, but are not limited to, all of the following standards:

29 (a) The lease site is considered appropriate for marine finfish aquaculture in the
30 programmatic environmental impact report if prepared and approved by the
31 commission pursuant to Section 23360.

32 (b) A lease shall not unreasonably interfere with fishing or other uses or public
33 trust values, unreasonably disrupt wildlife and marine habitats, or unreasonably
34 harm the ability of the marine environment to support ecologically significant
35 flora and fauna.

36 (c) A lease shall not have significant adverse cumulative impacts.

37 (d) To reduce adverse effects on global ocean ecosystems, the use of fish meal
38 and fish oil shall be minimized. Where feasible, alternatives to fish meal and fish

1 oil, or fish meal and fish oil made from seafood harvesting byproducts, shall be
2 utilized, taking into account factors that include, but need not be limited to, the
3 nutritional needs of the fish being raised and the availability of alternative
4 ingredients.

5 (e) Lessees shall establish best management practices, approved by the
6 commission, for each lease site. Approved best management practices shall
7 include a regular monitoring, reporting, and site inspection program that requires
8 at least annual monitoring of lease sites to ensure that the operations are in
9 compliance with best management practices related to fish disease, escapement,
10 and environmental stewardship, and that operations are meeting the requirements
11 of this section.

12 (f) The commission may remove fish stocks, close facilities, or terminate the
13 lease if it finds that the lessee is not in compliance with best management
14 practices, that the lessee's activities have damaged or are damaging the marine
15 environment, or that the lessee is not in compliance with this section. The
16 commission shall take immediate remedial action to avoid or eliminate significant
17 damage, or the threat of significant damage, to the marine environment.

18 (g) Before issuance of the lease, the lessee shall provide baseline benthic habitat
19 and community assessments of the proposed lease site to the applicable regional
20 water quality control board or the State Water Resources Control Board, and shall
21 monitor the benthic habitat and community during the operation of the lease in a
22 manner determined by the regional board or the State Water Resources Control
23 Board.

24 (h) The regional board and the State Water Resources Control Board may
25 establish and impose reasonable permit fees to pay for the costs of administering
26 and conducting the assessment and monitoring program.

27 (i) Finfish numbers and density shall be limited to what can be safely raised
28 while protecting the marine environment, as specified by the terms of the lease,
29 subject to review and amendment by the commission.

30 (j) The use of all drugs, chemicals, and antibiotics, and amounts used and
31 applied, shall be minimized. All drugs, therapeutic substances, and antibiotics
32 shall be used and applied only as approved by the United States Food and Drug
33 Administration for marine finfish aquaculture. The lessee shall report that use and
34 application to the commission on a regular schedule, as determined by the
35 commission, but no less than annually, that shall be included in the terms of the
36 lease. The commission shall review those reports on a regular basis and at least
37 annually.

38 (k) The commission shall require all farmed fish to be marked, tagged, or
39 otherwise identified as belonging to the lessee in a manner determined appropriate
40 by the commission, unless the commission determines that identifying farmed fish
41 is unnecessary for protecting wild fish stocks, the marine environment, or other
42 ocean uses.

(l) All facilities and operations shall be designed to prevent the escape of farmed fish into the marine environment and to withstand severe weather conditions and marine accidents. The lessee shall maintain records on all escapes in a manner determined by the commission. In the event of more than de minimis escapement, the number of escaped fish and the circumstances surrounding the incident shall be reported immediately to the commission, and the lessee shall be responsible for damages to the marine environment caused by those escaped fish, as determined by the commission.

(m) The lessee shall, at a minimum, meet all applicable requirements imposed by the State Water Resources Control Board and the regional water quality control boards, and shall prevent discharges to the maximum extent possible. Monitoring and testing of water quality shall be required on a regular basis as deemed appropriate by the State Water Resources Control Board or the regional water quality control boards. All inspection and monitoring reports and other records, and all data on the discharge of chemical and biological pollutants shall be kept on file and available for public review.

Comment. Section 24010 continues the second sentence of former Fish and Game Code Section 15400(b) without substantive change.

§ 24015. Exemption from standards for specified restoration or enhancement plans

24015. If a restoration or enhancement plan is submitted to, and approved by, the commission, and that plan, among other things, provides for monitoring and protecting the benthic habitat, the prevention of pollution, and the prevention of adverse impacts on wild fish stocks from disease, parasites, and genetic alterations, Section 24010 shall not apply to any of the following:

(a) Artificial propagation, rearing, and stocking projects for the purpose of recovery, restoration, or enhancement of native fish stocks carried out under either of the following:

(1) A scientific collecting or research permit issued by the department.

(2) The California Ocean Resources Enhancement and Hatchery Program, as set forth in Title 4 (commencing with Section 25700) of Part 3, and Sections 12910, 14620, 21935, and subdivision (c) of Section 38875, for the enhancement of white sea bass.

(b) Nonprofit hatcheries and nonprofit artificial propagation projects operated by, or on behalf of, licensed commercial or sport fishers for the purpose of recovery, restoration, or enhancement of California's native marine fish populations, pursuant to Chapter 2 (commencing with Section 11800) of Title 2 of Part 4 of Division 6, and Section 25125.

Comment. Section 24015 continues former Fish and Game Code Section 15400(c) without substantive change.

1 **§ 24020. Disclaimer of application to other marine finfish aquaculture law or regulation**

2 24020. Nothing in this chapter shall be construed to limit or expand the
3 application of any other state law or regulation pertaining to marine finfish
4 aquaculture conducted within the ocean waters under the jurisdiction of this state.

5 **Comment.** Section 24020 continues former Fish and Game Code Section 15400(d) without
6 substantive change.

7 **CHAPTER 2. LEASE PROCEDURE**

8 **§ 24100. Application for lease**

9 24100. (a) A person wishing to lease a state water bottom shall make a written
10 application to the commission.

11 (b) The application shall contain all of the following information:

12 (1) A map showing the area to be leased, its general vicinity, and all ownership
13 and boundary lines in the vicinity.

14 (2) A description of the organisms to be grown and the culture techniques to be
15 used.

16 (3) An estimate of the acreage to be leased.

17 (4) A nonrefundable filing fee of five hundred dollars (\$500).

18 (c) Areas used by the public for digging clams shall not be leased. The
19 department shall designate those areas.

20 **Comment.** Subdivisions (a) and (b) of Section 24100 continue all but the last sentence of
21 former Fish and Game Code Section 15403 without substantive change.

22 Subdivision (c) continues former Fish and Game Code Section 15401 without substantive
23 change.

24 **§ 24105. Public notice of application**

25 24105. (a) If the commission finds that a state water bottom applied for is
26 available for lease, and that the lease would be in the public interest, the
27 commission shall publish a notice that the area is being considered for leasing.

28 (b) The commission shall also publish legal notices in a newspaper of general
29 circulation in each county where the water bottom or any part of the water bottom
30 is located, describing the area to be leased and the type of operation to be
31 conducted.

32 (c) The publication shall comply with Sections 6060 and 6066 of the
33 Government Code.

34 **Comment.** Section 24105 continues former Fish and Game Code Section 15404 without
35 substantive change.

36 **§ 24110. Notification to State Lands Commission**

37 24110. (a) The department shall notify the State Lands Commission of all
38 applications for water bottom leases.

39 (b) The department shall inform the State Lands Commission of all leases
40 executed, renewed, or assigned pursuant to this title, and shall furnish the State

1 Lands Commission with information concerning those leases that the State Lands
2 Commission may require.

3 **Comment.** Section 24110 continues former Fish and Game Code Section 15415 without
4 substantive change.

5 **§ 24115. Lease to new bidders**

6 24115. (a) Except as specified in subdivision (b), the commission shall award
7 state water bottom leases to the highest responsible bidder, if the bid meets or
8 exceeds the minimum annual rent established by the commission, which shall not
9 be less than two dollars (\$2) per acre, for all species cultivated, unless the acreage
10 applied for is 10 acres or less, in which case the minimum acceptable rent shall be
11 ten dollars (\$10) per acre.

12 (b) The commission may reject any or all bids for the lease of state water
13 bottoms if it deems the rejection to be in the public interest.

14 (c) Fees for marine finfish aquaculture leases shall, at a minimum, be sufficient
15 to pay for the costs of administering the marine finfish leasing program, and for
16 monitoring and enforcing the terms of the leases.

17 **Comment.** Subdivision (a) of Section 24115 continues the first sentence of former Fish and
18 Game Code Section 15406.5(a) without substantive change.

19 Subdivision (b) continues the third sentence of former Fish and Game Code Section 15406.5(a)
20 without substantive change.

21 Subdivision (c) continues former Fish and Game Code Section 15406.5(b) without substantive
22 change.

23 **CHAPTER 3. TERMS OF LEASE**

24 **§ 24200. Term of lease**

25 24200. (a) Except as specified in subdivision (b), no initial term of a state water
26 bottom lease shall exceed 25 years.

27 (b) The initial term of a state water bottom lease for marine finfish aquaculture
28 shall not exceed 10 years.

29 **Comment.** Section 24200 continues former Fish and Game Code Section 15405 without
30 substantive change.

31 **§ 24205. Rent increases by Legislature**

32 24205. All state water bottom leases shall be subject to the power of the
33 Legislature to increase or decrease the rents, fees, taxes, and other charges relating
34 to the lease, but no increase in rent shall be applicable to an existing lease until it
35 is renewed.

36 **Comment.** Section 24205 continues former Fish and Game Code Section 15410 without
37 substantive change.

1 **§ 24210. Renewal of lease**

2 24210. (a) Each state water bottom lease shall specify a period prior to
3 expiration when renewal of the lease may be requested by the lessee. If during that
4 period the lessee is still actively engaged in aquaculture, as determined by the
5 commission, the lessee shall have a prior right to renew the lease on terms agreed
6 upon between the commission and the lessee. If terms are not agreed upon, the
7 commission shall advertise for bids on the lease. If a request for renewal is not
8 made by the lessee, the commission shall advertise for bids on the lease. The
9 commission shall consider bids only from aquaculturists registered pursuant to
10 Chapter 1 (commencing with Section 23600) of Title 3.

11 (b) Notwithstanding subdivision (a), with respect to any lease of state water
12 bottoms in effect on January 1, 1983, the lessee shall have a prior right to renew
13 the lease. If the lessee does not renew the lease, the commission shall advertise for
14 bids on the lease. The commission shall consider bids only from aquaculturists
15 registered pursuant to Chapter 1 (commencing with Section 23600) of Title 3.

16 (c) Except as specified in subdivision (d), a lease may be renewed for additional
17 periods not to exceed 25 years each.

18 (d) A lease for marine finfish aquaculture may be renewed for additional periods
19 not to exceed five years each.

20 **Comment.** Section 24210 continues former Fish and Game Code Section 15406 without
21 substantive change.

22 **§ 24215. Periodic reports to commission**

23 24215. A water bottom lease may require periodic reports that the commission
24 deems necessary for the proper administration of the state's water bottoms.

25 **Comment.** Section 24215 continues former Fish and Game Code Section 15414 without
26 substantive change.

27 **§ 24220. Oyster leases**

28 24220. (a) The annual rent for any lease in effect on January 1, 1983, for the
29 cultivation of oysters, shall be one dollar (\$1) per acre, until the expiration of the
30 lease.

31 (b) In addition to the rent specified in subdivision (a), every person operating
32 under an oyster lease shall pay a privilege fee of four cents (\$0.04) per packed
33 gallon, or fraction of a gallon, of shucked oysters harvested by the lessee.

34 (c) If the oysters are marketed in the shell, the privilege fee shall be based on the
35 equivalent yield of shucked oyster meat. In determining the yield of oysters, it
36 shall be deemed that 100 oysters are equivalent to one packed gallon of shucked
37 oyster meat.

38 (d) The privilege fee imposed by this section is the exclusive privilege fee that
39 shall be imposed on lessees of state water bottoms for oyster cultivation,
40 notwithstanding subdivision (a) of Section 23820.

Comment. Subdivision (a) of Section 24220 continues the second sentence of former Fish and Game Code Section 15406.5(a) without substantive change.

Subdivisions (b) through (d) continue former Fish and Game Code Section 15406.7 without substantive change.

Note. The reference to a “privilege tax” in existing Section 15406.7 (which would be continued by proposed Section 24220(b)-(d)) has been revised to refer to a “privilege fee.”

The Commission invites comment on whether that revision is appropriate.

CHAPTER 4. RIGHTS AND RESPONSIBILITIES OF LESSEE

§ 24300. Payment of rent

24300. (a) The annual rent for a state water bottom lease shall be paid to the department within 30 days of the commencement of the lease and within 30 days of each anniversary of the commencement of the lease.

(b) The commission may establish penalty fees for late payment of rent due under a state water bottom lease.

(c) The commission may cancel a state water bottom lease if rent is not paid within 90 days of the commencement of the lease and within 90 days of each anniversary of the commencement of the lease.

Comment. Section 24300 continues former Fish and Game Code Section 15407 without substantive change.

§ 24305. Lessee responsibility for infringement

24305. A lessee of a state water bottom shall assume responsibility for any infringement on privately owned water bottoms, or water bottoms owned by, or under the jurisdiction of any city, county, or district.

Comment. Section 24305 continues the last sentence of former Fish and Game Code Section 15403 without substantive change.

§ 24310. Lessee rights to organisms

24310. A lessee of a state water bottom owns all lawfully cultivated organisms that are described in the application for the lease and produced in the area leased. The lessee has the exclusive right to cultivate and harvest the aquatic organisms in the area leased.

Comment. Section 24310 continues former Fish and Game Code Section 15402 without substantive change.

§ 24315. Accommodation of public activity in leased area

24315. (a) Lessees under a state water bottom lease may not unreasonably impede public access to waters of the state for purpose of fishing, navigation, commerce, or recreation.

(b) Notwithstanding subdivision (a), a lessee of a state water bottom may limit public access to the extent necessary to avoid damage to the leasehold, or to the aquatic life culture in the leasehold.

1 (c) The commission may prohibit any recreational activity in any aquaculture
2 area subject to a state water bottom lease, if it determines that the activity is
3 detrimental to the enhancement of the resource.

4 **Comment.** Section 24315 continues former Fish and Game Code Section 15411 without
5 substantive change.

6 **§ 24320. Termination of lease**

7 24320. (a) The commission shall adopt regulations governing the termination of
8 a state water bottom lease due to failure to pay rent, or improper use of the
9 leasehold.

10 (b) Upon termination of a state water bottom lease for any reason, all structures
11 shall be removed at the lessee's expense from the leasehold, and the area shall be
12 restored to its original condition. If the lessee fails to remove the structures, the
13 state may remove them and the lessee shall pay the removal costs incurred.

14 (c) The commission shall require financial assurances of each marine finfish
15 aquaculture lessee to ensure that restoration is performed to the satisfaction of the
16 commission. Financial assurances may take the form of surety bonds executed by
17 an admitted surety insurer, irrevocable letters of credit, trust funds, or other forms
18 of financial assurances specified by the commission, as it determines are available
19 and adequate to ensure the lease site is restored pursuant to this section.

20 (d) Marine finfish aquaculture lessees shall be responsible for any damages
21 caused by their operations, as determined by the commission, including, but not
22 limited to, reimbursement for any costs for natural resource damage assessment.

23 (e) Nothing in this section limits the state in pursuing additional remedies
24 authorized by law.

25 **Comment.** Subdivision (a) of Section 24320 continues former Fish and Game Code Section
26 15408 without substantive change.

27 Subdivisions (b) through (e) continue former Fish and Game Code Section 15409 without
28 substantive change.

29 **§ 24325. Assignment of lease**

30 24325. No water bottom lease may be assigned without the prior approval of the
31 commission. Application for approval of a lease assignment shall comply with all
32 of the requirements for an original lease.

33 **Comment.** Section 24325 continues former Fish and Game Code Section 15412 without
34 substantive change.

35 **CHAPTER 5. PROHIBITIONS**

36 **§ 24400. Protection of leased area**

37 24400. (a) No person may enter an area subject to a state water bottom lease in
38 which aquatic life is cultivated, or remove aquatic life from that area, without the
39 consent of the lessee, or willfully destroy the cultivated aquatic life or any markers
40 intended to designate the boundaries and limits of the leased area.

1 **Comment.** Section 24400 continues former Fish and Game Code Section 15413 without
2 substantive change.

3 TITLE 7. DISEASE CONTROL

4 CHAPTER 1. ADMINISTRATION

5 **§ 24500. Responsibilities for disease control**

6 24500. (a) Upon the recommendation of the department and after consultation
7 with the Aquaculture Disease Committee created pursuant to this title, the
8 commission shall compile a list of diseases and parasites, and the aquatic plants
9 and animals they are known to infect or parasitize.

10 (b) All government activities relating to aquaculture disease detection, control,
11 and eradication that do not affect human health and safety are the responsibility of
12 the department.

13 **Comment.** Section 24500 continues former Fish and Game Code Section 15500 without
14 substantive change.

15 **§ 24505. Inspection of areas by department**

16 24505. The department may enter, under an inspection warrant issued pursuant
17 to Title 5 (commencing with Section 1822.50) of Part 3 of the Code of Civil
18 Procedure, at any time, any car, warehouse, depot, ship, or growing area where
19 any aquatic plants or animals are held or stored, for the purpose of making an
20 examination to ascertain whether the aquatic plants or animals are infected,
21 diseased, or parasitized.

22 **Comment.** Section 24505 continues former Fish and Game Code Section 15501 without
23 substantive change.

24 **§ 24510. Aquaculture Disease Committee**

25 24510. (a) The director, in consultation with the Aquaculture Industry Advisory
26 Committee and the Interagency Committee for Aquaculture Development, shall
27 appoint an 11-member Aquaculture Disease Committee consisting of at least six
28 industry producers selected to represent geographic, specie, and other diverse
29 aspects of the industry; two to represent the department; one to represent the
30 Department of Food and Agriculture; an academic scientist who is an expert in
31 aquatic diseases; and one representative of the University of California
32 Cooperative Extension.

33 (b) Members of the committee shall serve without compensation, but shall be
34 paid their necessary expenses.

35 **Comment.** Section 24510 continues former Fish and Game Code Section 15502 without
36 substantive change.

1 **§ 24515. Recommendation of regulations**

2 24515. (a) The Aquaculture Disease Committee may recommend regulations to
3 the commission designed to safeguard wild and cultured organisms from the list of
4 harmful organisms compiled pursuant to Section 24500.

5 (b) Regulations recommended by the committee and adopted by the commission
6 may include all of the following:

7 (1) Routine monitoring procedures.

8 (2) Standardized diagnostic procedures.

9 (3) A requirement for the confirmation of the diagnosis by the state through at
10 least one other independent and qualified laboratory.

11 (4) Criteria for ordering quarantine, condemnation, or destruction.

12 (5) A stated maximum time period between diagnosis and destruction.

13 (6) Methods to be employed in animal destruction and facility cleanup.

14 (7) Procedures for determining fair and rapid compensation.

15 (8) Any other related procedures that the commission may determine are
16 necessary.

17 **Comment.** Subdivision (a) of Section 24515 continues former Fish and Game Code Section
18 15503 without substantive change.

19 Subdivision (b) continues former Fish and Game Code Section 15504 without substantive
20 change.

21 **§ 24520. Authorized action by director**

22 24520. If any disease or parasite listed pursuant to Section 24500 is found to
23 exist that the director, in consultation with the Aquaculture Disease Committee
24 and consistent with the regulations adopted pursuant to Section 24515, deems to
25 be detrimental to the aquaculture industry or to wild stocks of aquatic plants and
26 animals, the director may do any of the following:

27 (a) Establish the area to be quarantined and list the aquatic plants and animals
28 affected by it.

29 (b) Post notices describing, as nearly as possible, the boundaries of an area
30 within which specific disease or parasite infestations are found. Notices posted
31 pursuant to this subdivision shall be published once a week for four successive
32 weeks in a newspaper of general circulation in the county in which the infected
33 area is located. If there is no newspaper of general circulation in that county, then
34 the notice shall be published in a newspaper of general circulation published in an
35 adjoining county.

36 (c) Hold and impound diseased or parasitized plants and animals.

37 (d) Forbid, prevent, or restrict the movement of all plants and animals subject to
38 the disease or parasite from or into the area, or from place to place within it,
39 during the existence of the quarantine.

40 (e) Order the destruction and disposal of diseased or parasitized plants and
41 animals consistent with Section 24515.

42 **Comment.** Section 24520 continues former Fish and Game Code Section 15505 without
43 substantive change.

1 **§ 24525. Quarantine or destruction of other plants or animals infected with nonlisted**
2 **disease**

3 24525. Except for those diseases in the list compiled pursuant to Section 24500,
4 a plant or animal shall not be quarantined or destroyed, unless the director, in
5 consultation with the Aquaculture Disease Committee, finds that an outbreak of
6 aquatic disease among privately cultured plants or animals presents a threat to the
7 aquaculture industry or to fish life or plant life.

8 **Comment.** Section 24525 continues former Fish and Game Code Section 15506 without
9 substantive change.

10 **§ 24530. Coordination of action in government and private facilities**

11 24530. If the director, in consultation with the Aquaculture Disease Committee,
12 finds that a disease is present in a nearby government operated facility or in nearby
13 wild stocks, infected plants or animals in a private aquaculture facility shall not be
14 quarantined or destroyed unless similar action is taken with respect to the
15 government facility and wild stocks.

16 **Comment.** Section 24530 restates former Fish and Game Code Section 15507 without
17 substantive change.

18 **§ 24535. Investigation of reported disease or parasite**

19 24535. Reports of diseases and parasites compiled pursuant to Section 24500
20 shall be immediately forwarded by the director to the Aquaculture Disease
21 Committee, and shall be promptly investigated by the department.

22 **Comment.** Section 24535 continues former Fish and Game Code Section 15508 without
23 substantive change.

24 **§ 24540. Prevention of importation of diseased aquatic plant or animal**

25 24540. (a) If the director determines that a disease designated pursuant to
26 Section 24500 exists among domestic aquatic plants and animals, or that aquatic
27 plants and animals have been exposed, or may have been exposed, to the disease,
28 or to the vectors of the disease, in any other state or territory in the United States,
29 or in any foreign country, and the importation of aquatic plants or animals from
30 that state, territory, or foreign country may transmit, carry, or disseminate the
31 disease to domestic plants and animals within this state, the director shall notify
32 the commission.

33 (b) The commission, after consulting the State Department of Health Care
34 Services and the Department of Food and Agriculture, may issue a regulation
35 restricting or prohibiting the importation of the diseased or infected aquatic plants
36 or animals into this state from any other state, territory, or foreign country.

37 **Comment.** Section 24540 continues former Fish and Game Code Section 15510 without
38 substantive change.

39 See also Section 5254 (enforcement).

1 **§ 24545. Permit to move quarantined plant or animal**

2 24545. No person may move, or allow to be moved, any of the aquatic plants or
3 animals that are subject to a quarantine established pursuant to Section 24520
4 across the quarantine line that is established, unless the person has first obtained a
5 permit from the director authorizing the movement. The director may issue a
6 permit after inspection, if the aquatic plants, animals, premises, transportation
7 vehicles, and equipment that are subject to the quarantine established pursuant to
8 Section 24520 are properly cleaned and disinfected.

9 **Comment.** Section 24545 continues former Fish and Game Code Section 15509 without
10 substantive change.

11 See also Section 5256 (enforcement).

12 CHAPTER 2. CLAIMS

13 **§ 24600. Compensation to owner of destroyed plant or animal**

14 24600. (a) If aquatic plants or animals are destroyed pursuant to subdivision (e)
15 of Section 24520, and a claim is submitted pursuant to Section 24605, the owner
16 shall be promptly paid from the General Fund an amount equal to 75 percent of
17 the replacement value of the plants or animals, less the value determined by the
18 department of any replacement stock provided by the department under
19 subdivision (b). If the replacement value is not settled between the owner and the
20 department, the replacement value shall be determined by an appraiser appointed
21 by the director and an appraiser appointed by the owner. Appraiser's fees shall be
22 paid by the appointing party. Disputes between these two appraisers shall be
23 submitted to arbitration under the Commercial Arbitration Rules of the American
24 Arbitration Association.

25 (b) If the department provides replacement stock to an aquaculturist whose
26 plants or animals are destroyed pursuant to subdivision (e) of Section 24520, the
27 amount to be paid to the aquaculturist pursuant to this section shall be reduced by
28 the value of the replacement stock, as determined by the department.

29 (c) The result of the arbitration or the amount settled between the owner and the
30 department, reduced by the value determined by the department of any
31 replacement stock provided under subdivision (b), may be submitted as a claim by
32 the owner to the Department of General Services pursuant to Section 24605.

33 **Comment.** Section 24600 restates former Fish and Game Code Section 15512 without
34 substantive change.

35 **Note.** The first sentence of proposed Section 24600(a) is intended to restate the first sentence
36 of existing Fish and Game Code Section 15512(a), to clarify the meaning of that provision,
37 without changing its substantive meaning. The existing sentence reads as follows:

38 15512. (a) If aquatic plants or animals are destroyed pursuant to subdivision (e) of Section
39 15505, the owner shall be promptly paid from the General Fund an amount equal to 75 percent of
40 the replacement value of the plants or animals, less the value determined by the department of
41 any replacement stock provided by the department under subdivision (b) if the claim is submitted
42 pursuant to Section 15513.

1 **The Commission invites comment on whether the first sentence of proposed Section**
2 **24600(a) accurately continues the intended meaning of the first sentence of existing Section**
3 **15512(a).**

4 **§ 24605. Claims against the department**

5 24605. Claims against the department arising under this title may be submitted
6 pursuant to Section 905.2 of the Government Code.

7 **Comment.** Section 24605 continues former Fish and Game Code Section 15513 without
8 substantive change.

9 **§ 24610. Disallowing of claim**

10 24610. No claim arising under this title shall be paid where the director, in
11 consultation with the Aquaculture Disease Committee, finds that the claimant's
12 management practices were negligent or in violation of law, and that the
13 negligence or violation was the proximate cause of the disease or infection
14 prompting the order of destruction or finds that the claimant willfully violated any
15 provision of Section 24520.

16 **Comment.** Section 24610 continues former Fish and Game Code Section 15514 without
17 substantive change.

18 **§ 24615. Liability for disease eradication**

19 24615. (a) The owner of an aquaculture product who does not diligently pursue
20 the eradication of a disease from its facility when ordered to do so by the director
21 shall be responsible for paying to the director the full costs of the department for
22 all disease eradication efforts conducted by the department to eradicate the
23 disease.

24 (b) Payment of the costs under this section shall not excuse compliance with the
25 provisions of law, regulations of the commission, or orders of the director, nor be
26 a defense in any criminal or civil proceeding.

27 **Comment.** Section 24615 continues former Fish and Game Code Section 15516 without
28 substantive change.

29 **TITLE 8. IMPORTATION OF AQUATIC PLANTS**
30 **AND ANIMALS**

31 **§ 24700. Application of title**

32 24700. (a) Nothing in this title prohibits the importation of Atlantic salmon or
33 the roe of Atlantic salmon, or the continued possession of Atlantic salmon or the
34 roe of Atlantic salmon that were lawfully imported or possessed in the Smith
35 River watershed on or before February 22, 1988, under a written approval of the
36 department issued pursuant to Section 24705 or 24710.

(b) Nothing in this title applies to the importation or possession of dead Atlantic salmon or nonviable roe of Atlantic salmon imported for human consumption, if the importer has the appropriate licenses issued by the department.

Comment. Section 24700 continues former Fish and Game Code Section 15605 without substantive change.

§ 24705. Required approval by department

24705. No live aquatic plant or animal may be imported into this state by a registered aquaculturist without the prior written approval of the department, pursuant to the regulations adopted by the commission.

Comment. Section 24705 continues former Fish and Game Code Section 15600(a) without substantive change.

See also Section 5258 (enforcement).

§ 24710. Prohibited importation

24710. (a) Except as provided in subdivision (b), the department shall not approve a person's importation of, or renew a person's permit to import, any anadromous fish or roe from an anadromous fish listed in Section 26520, or the regulations adopted pursuant to Section 26520, into the Smith River watershed, unless that person had a permit or authorization approved before February 22, 1988.

(b) The department may issue or renew a permit for the importation of any anadromous fish or roe from an anadromous fish specifically for research purposes conducted at any university, college, governmental research agency, or other bona fide scientific institution, as determined by the department, engaging in scientific or public health research.

Comment. Section 24710 continues former Fish and Game Code Section 15600(b) without substantive change.

§ 24715. Application for importation

24715. A written application for the importation of a live aquatic plant or animal that is submitted in conformance with the procedural requirements established by the commission is deemed to be approved if it has not been denied within 60 days.

Comment. Section 24715 restates former Fish and Game Code Section 15601 without substantive change.

Note. Proposed Section 24715 is intended to restate existing Fish and Game Code Section 15601 to clarify the meaning of that provision, without changing its substantive meaning. The existing provision reads as follows:

15601. A written application for the importation submitted in conformance with the procedural requirements established by the commission is deemed to be approved where it has not been denied within 60 days.

The Commission invites comment on whether proposed Section 24715 accurately continues the intended substantive meaning of existing Section 15601.

1 **§ 24720. Application of California Environmental Quality Act**

2 24720. No facility constructed for the purpose of spawning, incubating, or
3 raising of anadromous fish listed in Section 26520 in the Smith River watershed is
4 exempt from any provision of the California Environmental Quality Act.

5 **Comment.** Section 24720 continues former Fish and Game Code Section 15604 without
6 substantive change.

7 **TITLE 9. AQUACULTURE DEVELOPMENT**
8 **COMMITTEE**

9 **§ 24800. Composition of committee**

10 24800. (a) The director shall appoint an Aquaculture Development Committee,
11 consisting of the following persons:

12 (1) At least 12 members representing all sectors of the fresh and salt water
13 aquaculture industry.

14 (2) One member representing the department, two members from and chosen by
15 the University of California, one with expertise in aquaculture science and one
16 with expertise in outreach to the fisheries community, and one member each from
17 and chosen by the Department of Food and Agriculture, the California Coastal
18 Commission, the State Lands Commission, the State Water Resources Control
19 Board, the State Department of Public Health, and the Joint Legislative Committee
20 on Fisheries and Aquaculture.

21 (b) The member of the committee appointed by the Joint Legislative Committee
22 on Fisheries and Aquaculture shall meet and, except as otherwise provided by the
23 California Constitution, advise the committee, to the extent that this advisory
24 participation is not incompatible with his or her position as a Member of the
25 Legislature.

26 **Comment.** Section 24800 continues former Fish and Game Code Section 15700 without
27 substantive change. See also Health & Safety Code §§ 20, 131052(6) (directing revision of
28 specified references in former Fish and Game Code to State Department of Health Services).

29 **Note.** The reference in existing Fish and Game Code Section 15700 to the State Department
30 of Health Services would be revised by proposed Section 24800 to instead refer to the State
31 Department of Public Health, pursuant to the directive of Health & Safety Code Sections 20 and
32 131052(6).

33 **The Commission invites comment on whether that revision is appropriate.**

34 **§ 24805. Term of membership**

35 24805. (a) The term of membership for members of the committee other than
36 representatives of public agencies shall be three years.

37 (b) The representatives of public agencies shall serve at the pleasure of the
38 agency that the member represents.

39 **Comment.** Section 24805 continues former Fish and Game Code Section 15701(a) without
40 substantive change.

1 **§ 24810. Compensation**

2 24810. Members of the committee shall serve without compensation.

3 **Comment.** Section 24810 continues former Fish and Game Code Section 15701(b) without
4 substantive change.

5 **§ 24815. Meetings**

6 24815. The committee shall meet on the call of the director, but not less than
7 twice each year.

8 **Comment.** Section 24815 continues former Fish and Game Code Section 15703 without
9 substantive change.

10 **§ 24820. Function of committee**

11 24820. (a) The committee shall be advisory to the director on all matters
12 pertaining to aquaculture and shall coordinate activities among public entities.

13 (b) The committee shall assist the director in developing and implementing a
14 state aquaculture plan, identify the opportunities for regulatory relief, assist in
15 development of research and development priorities, assist in the development of
16 criteria to assure that publicly financed pilot programs are compatible with
17 industry needs, and identify other opportunities for industrial development.

18 **Comment.** Section 24820 continues former Fish and Game Code Section 15702 without
19 substantive change.

20 **TITLE 10. PROHIBITIONS**

21 **CHAPTER 1. GENERAL PROVISIONS**

22 **§ 24900. Unlawful taking**

23 24900. Any person who takes an aquaculture product without lawful entitlement
24 is subject to prosecution for theft.

25 **Comment.** Section 24900 continues former Fish and Game Code Section 15002 without
26 substantive change.

27 **§ 24905. Prohibited fish cultural operations**

28 24905. Except under permit of the department, it is unlawful to carry on fish
29 cultural operations on any stream above a point where water is diverted for the use
30 and operation of a state fish hatchery.

31 **Comment.** Section 24905 continues former Fish and Game Code Section 5511 without
32 substantive change.

CHAPTER 2. EXOTIC OR TRANSGENIC SPECIES

§ 24950. Application of chapter

24950. (a) Nothing in this chapter applies to salmon or steelhead trout reared from native California stocks that are propagated and cultured for either of the following:

(1) Research conducted by, or on behalf of, the department.

(2) Release into ocean waters for the purpose of recovery, restoration, or enhancement of California's native salmon and steelhead trout populations pursuant to Chapter 2 (commencing with Section 11800) of Title 2 of Part 4 of Division 6, and Section 25125.

(b) Nothing in this chapter authorizes artificial propagation, rearing, or stocking of transgenic freshwater and marine fishes, invertebrates, crustaceans, or mollusks.

Comment. Subdivision (a) of Section 24950 continues the third sentence of former Fish and Game Code Section 15007(a) without substantive change.

Subdivision (b) continues the former Fish and Game Code Section 15007(b) without substantive change.

§ 24955. Definitions

24955. The following definitions govern the provisions of this chapter:

(a) "Exotic species" means a fish that is not native to California waters, and that does not currently exist as a viable population in a wild condition in the state.

(b) "Transgenic" has the meaning specified in Section 1.92 of Title 14 of the California Code of Regulations, as that section read on May 14, 2003.

Comment. Section 24955 continues former Fish and Game Code Section 15007(f) without substantive change.

§ 24960. Prohibitions

24960. (a) In the waters of the Pacific Ocean that are regulated by this state, it is unlawful to spawn, incubate, or cultivate any species of finfish belonging to the family Salmonidae, any transgenic fish species, or any exotic species of finfish.

(b) Except as authorized pursuant to Section 24965, it is unlawful to spawn, incubate, or cultivate any transgenic species of finfish belonging to the family Salmonidae in this state.

(c) Research or experimentation for the commercial production of transgenic salmonids is prohibited.

Comment. Subdivision (a) of Section 24960 continues the first sentence of former Fish and Game Code Section 15007(a) without substantive change.

Subdivision (b) continues the second sentence of former Fish and Game Code Section 15007(a) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 15007(c) without substantive change.

1 **§ 24965. Research pursuant to permit**

2 24965. (a) Medical or scientific research conducted on transgenic finfish species
3 by accredited California academic institutions or private entities for research only
4 and not for commercial production may be authorized pursuant to a permit issued
5 by the department pursuant to Section 671 of Title 14 of the California Code of
6 Regulations, as that section read on May 14, 2003.

7 (b) At a minimum, research activities conducted pursuant to this section shall be
8 conducted in a closed system that has eliminated the risk of escape of transgenic
9 finfish species and any potential disease they may transmit.

10 (c) A permit application applied for pursuant to this section shall include a
11 research plan specifying the objectives and goals of the proposed research.

12 (d) Nothing in this section shall be construed to require the disclosure of
13 proprietary information.

14 **Comment.** Section 24965 continues former Fish and Game Code Section 15007(d) without
15 substantive change.

16 **§ 24970. Notification of permit application**

17 24970. The department shall notify the Joint Committee on Fisheries and
18 Aquaculture and the commission upon receipt of a permit application applied for
19 pursuant to Section 24965, at least 30 days prior to the approval or disapproval of
20 the permit.

21 **Comment.** Section 24970 continues former Fish and Game Code Section 15007(e) without
22 substantive change.

23 **PART 2. FISH HATCHERIES**

24 **TITLE 1. FISH HATCHERIES GENERALLY**

25 **§ 25100. Fish hatcheries**

26 25100. The commission shall establish fish hatcheries for stocking the waters of
27 the state with fish. The department shall maintain and operate the hatcheries.

28 **Comment.** Section 25100 continues former Fish and Game Code Section 1120 without
29 substantive change.

30 **§ 25105. Liability arising from lease of real property**

31 25105. (a) Whenever the state leases real property from any county, city,
32 irrigation district, or other public agency in this state for the purpose of
33 establishing or maintaining a fish hatchery, the state may agree to indemnify and
34 hold the lessor harmless for uses authorized by that lease.

35 (b) Insurance may be purchased by the Department of General Services to
36 protect the state against loss or expense arising out of an agreement entered into
37 pursuant to subdivision (a).

1 **Comment.** Section 25105 continues former Fish and Game Code Section 1121 without
2 substantive change.

3 **§ 25110. Claim for damages**

4 25110. Any claim for damages arising against the state under Section 25105
5 shall be presented to the Department of General Services in accordance with
6 Section 905.2 of the Government Code, and if not covered by insurance provided
7 pursuant to Section 25105, the claim shall be payable only out of funds
8 appropriated by the Legislature for that purpose. If the state elects to insure its
9 liability under Section 25105, the Department of General Services may
10 automatically deny the claim.

11 **Comment.** Section 25110 continues former Fish and Game Code Section 1122 without
12 substantive change.

13 **§ 25115. Bird exclosures**

14 25115. Notwithstanding any other provision of law, department personnel may
15 construct or repair bird exclosures at state owned or operated fish hatcheries.
16 These activities shall not be subject to review by the Public Works Board. Nothing
17 in this section exempts the department from complying with any provision of law
18 governing services performed under contract by noncivil service employees.

19 **Comment.** Section 25115 continues former Fish and Game Code Section 1126 without
20 substantive change.

21 **§ 25120. County fish hatcheries**

22 25120. The boards of supervisors of the several counties may establish and
23 maintain fish hatcheries, and may purchase the spawn or ova of fish.

24 **Comment.** Section 25120 continues former Fish and Game Code Section 1150 without
25 substantive change.

26 **§ 25125. Nonprofit hatcheries**

27 25125. (a) The department shall encourage nonprofit hatcheries and nonprofit
28 artificial propagation operations, operated by, or on behalf of, licensed fishermen,
29 for the purpose of rebuilding or enhancing marine fish populations, including, but
30 not limited to, those for Dungeness crab, sea urchin, and California halibut,
31 consistent with the protection of these species in the wild, in order to provide
32 sustainable marine fish populations for harvest by commercial and recreational
33 fishermen.

34 (b) The department shall, to the extent funds and personnel are available,
35 cooperate with these nonprofit hatcheries and nonprofit artificial propagation
36 operations in determining the feasibility, siting, and establishment of those
37 activities and sharing technical information to ensure the protection of the marine
38 environment.

39 **Comment.** Section 25125 continues former Fish and Game Code Section 6903.5 without
40 substantive change.

1 **§ 25130. Mount Whitney Fish Hatchery**

2 25130. (a) Notwithstanding any other provision of law, the Director of General
3 Services, with the consent of the department, may lease to the Friends of the
4 Mount Whitney Fish Hatchery, at no cost, and subject to any other terms and
5 conditions that the director deems appropriate, for a term not to exceed 25 years
6 and with the possibility of renewal, the Mount Whitney Fish Hatchery, or any part
7 of the hatchery.

8 (b) Any part of the hatchery that is leased pursuant to subdivision (a) shall be
9 used for environmental education purposes and other related activities designed to
10 benefit the hatchery and the community.

11 (c) The lease shall require the Friends of the Mount Whitney Fish Hatchery to
12 permit reasonable public access to the hatchery, to obtain and maintain liability
13 insurance for the leased portion of the hatchery, and to maintain the leased portion
14 of the hatchery at all times. The lease shall provide that any work done on the
15 hatchery shall be performed in consultation with the State Office of Historic
16 Preservation. The lease shall also provide that the state, agents of the state, the
17 department, and agents of the department shall be held harmless from, and
18 indemnified against, any liability resulting from any act or omission of the Friends
19 of the Mount Whitney Fish Hatchery arising out of performance of the lease.

20 **Comment.** Section 25130 restates former Fish and Game Code Section 1122.5 without
21 substantive change.

22 **Note.** Proposed Section 25130 is intended to restate the part of existing Fish and Game Code
23 Section 1122.5 to improve its clarity, without changing its substantive effect. The existing
24 provision reads as follows:

25 1122.5. Notwithstanding any other provision of law, the Director of General Services, with the
26 consent of the department, may lease to the Friends of the Mount Whitney Hatchery, at no cost,
27 and subject to any other terms and conditions that the director deems appropriate, for a term not
28 to exceed 25 years, and with the possibility of renewal, the Mount Whitney Fish Hatchery
29 facilities, or any portion thereof, situated in the County of Inyo. The leased portion of the building
30 shall be used for environmental education purposes and other related activities designed to benefit
31 the hatchery and the community. The lease shall require the Friends of the Mount Whitney Fish
32 Hatchery to permit reasonable public access to the facility, to obtain and maintain liability
33 insurance for the leased portion of the facility, and to maintain the leased portion of the facility at
34 all times. The lease shall provide that any work done on the facility shall be performed in
35 consultation with the State Office of Historic Preservation. The lease shall also provide that the
36 state, agents of the state, the department, and agents of the department shall be held harmless
37 from, and indemnified against, any liability resulting from the acts or omissions of the Friends of
38 the Mount Whitney Fish Hatchery performed in the course of the lease agreement.

39 **The Commission invites comment on whether the restatement would cause any**
40 **substantive change in the meaning of the provision.**

41 **§ 25135. Transgenic species of salmonids**

42 25135. (a) The hatchery production and stocking of transgenic species of
43 salmonids is prohibited.

1 (b) As used in this section, “transgenic” has the same meaning as in Section 1.92
2 of Title 14 of the California Code of Regulations, as that section read on May 14,
3 2003.

4 **Comment.** Section 25135 continues former Fish and Game Code Section 1210 without
5 substantive change.

6 TITLE 2. ANADROMOUS FISH HATCHERIES

7 § 25200. Permit to operate hatchery

8 25200. The commission may issue a permit, subject to such restrictions and
9 regulations as the commission deems desirable, to a nonprofit organization to
10 construct and operate an anadromous fish hatchery.

11 **Comment.** Section 25200 continues former Fish and Game Code Section 1170 without
12 substantive change.

13 § 25205. Financial capability

14 25205. The commission shall not issue a permit unless it determines the
15 nonprofit organization has the financial capability to successfully construct and
16 operate the hatchery and will diligently and properly conduct the operation
17 authorized under the permit.

18 **Comment.** Section 25205 continues former Fish and Game Code Section 1171 without
19 substantive change.

20 § 25210. Restrictions

21 25210. No permit will be issued which may tend to deplete the natural runs of
22 anadromous fish, result in waste or deterioration of fish, or when the proposed
23 operation is located on a stream or river below a state or federal fish hatchery or
24 egg-taking station.

25 **Comment.** Section 25210 continues former Fish and Game Code Section 1172 without
26 substantive change.

27 § 25215. Fish property of state

28 25215. All fish handled under authority of this chapter during the time they are
29 in the hatchery or in the wild are the property of the state and when in the wild
30 may be taken under the authority of a sport or commercial fishing license as
31 otherwise authorized for wild fish.

32 **Comment.** Section 25215 continues former Fish and Game Code Section 1173 without
33 substantive change.

34 § 25220. Conditions of permit

35 25220. Any permit granted by the commission pursuant to this chapter shall
36 contain all of the following conditions:

(a) If after a hearing the commission finds that the operation described in the permit and conducted pursuant to this chapter is not in the best public interest, the commission may alter the conditions of the permit to mitigate the adverse effects, or may cause an orderly termination of the operation under the permit. An orderly termination shall not exceed a three-year period and shall culminate in the revocation of the permit in its entirety.

(b) If the commission finds that the operation has caused deterioration of the natural run of anadromous fish in the waters covered by the permit, it may require the permittee to return the fishery to the same condition as was prior to issuance of the permit. If the permittee fails to take appropriate action, the commission may direct the department to take the action, and the permittee shall bear any cost incurred by the department.

(c) Prior to release into waters of the state and at any other time deemed necessary by the department, the fish may be examined by the department to determine that they are not diseased or infected with any disease which, in the opinion of the department, may be detrimental to the state fishery resources.

Comment. Section 25220 continues former Fish and Game Code Section 1174 without substantive change.

§ 25225. Disclaimer of state liability

25225. The state shall assume no responsibility for the operation of a hatchery pursuant to this chapter and shall not be in any manner liable for its operation.

Comment. Section 25225 continues former Fish and Game Code Section 1175 without substantive change.

TITLE 3. COOPERATIVE SALMON AND STEELHEAD REARING FACILITIES

§ 25300. Department agreement

25300. (a) The department is authorized to enter into agreements with counties, nonprofit groups, private persons, individually or in combination, for the management and operation of rearing facilities for salmon and steelhead. All agreements shall be in accordance with the policies of the commission and the criteria of the department that govern the operation of those facilities under those agreements.

(b) The purpose for operating the facilities shall be to provide additional fishing resources and to augment natural runs.

Comment. Section 25300 continues former Fish and Game Code Section 1200 without substantive change.

§ 25305. Demonstration of financial ability

25305. (a) An applicant who wishes to enter into an agreement to operate a rearing facility shall demonstrate, to the satisfaction of the department prior to

1 executing the agreement, the applicant's financial ability to properly operate the
2 rearing facility.

3 (b) The department shall develop and specify the means for an applicant to make
4 such a demonstration.

5 **Comment.** Section 25305 continues former Fish and Game Code Section 1201 without
6 substantive change.

7 **§ 25310. Property of state**

8 25310. All fish handled or released under authority of this title are the property
9 of the state and may be taken only after their release into the wild and under the
10 authority of a sport or commercial fishing license.

11 **Comment.** Section 25310 continues the part of former Fish and Game Code Section 1202
12 without substantive change.

13 **§ 25315. Release determined by Commission**

14 25315. The release of fish reared in facilities pursuant to this title shall be made
15 in accordance with the policy of the commission.

16 **Comment.** Section 25315 continues former Fish and Game Code Section 1203 without
17 substantive change.

18 **§ 25320. Funding of agreements**

19 25320. (a) The department shall fund the agreements provided for in Section
20 25300 only on a matching basis with the persons or entities who enter into those
21 agreements. Funds appropriated for the purposes of this title shall not be used to
22 purchase equipment or for construction.

23 (b) The department shall be reimbursed from funds appropriated for the
24 purposes of this title for administrative costs, legal costs, and supervisorial costs
25 relating to the execution and supervision of agreements provided for in Section
26 25300 by the department.

27 **Comment.** Section 25320 continues former Fish and Game Code Section 1204 without
28 substantive change.

29 **§ 25325. Department to make fish available**

30 25325. The department shall, subject to the limitations of appropriate egg
31 sources and funding, make available fish of appropriate size and species to persons
32 or entities who enter into agreements pursuant to this title.

33 **Comment.** Section 25325 continues former Fish and Game Code Section 1205 without
34 substantive change.

35 **§ 25330. Location of release**

36 25330. Salmon and steelhead raised pursuant to this title shall be released in
37 streams, rivers, or waters north of Point Conception and upon release shall have
38 unimpeded access to the sea.

1 **Comment.** Section 25330 continues former Fish and Game Code Section 1206 without
2 substantive change.

3 PART 3. FISH PLANTING

4 TITLE 1. GENERAL PROVISIONS

5 **§ 25400. Application of part**

6 25400. This title, Title 3 (commencing with Section 25600), and Title 4
7 (commencing with Section 25700), do not apply to activities governed by Division
8 12 (commencing with Section 23300).

9 **Comment.** Section 25400 continues former Fish and Game Code Section 6403 as it applied to
10 former Fish and Game Code Sections 6400, 6401, 6402, and 6420 through 6424, inclusive,
11 subdivision (b) of Former Fish and Game Code Section 6425, former Fish and Game Code
12 Sections 6590 through 6595, inclusive, and former Fish and Game Code Sections 6597 through
13 6598, inclusive, without substantive change.

14 **§ 25405. Spawn and ova**

15 25405. The department may purchase and import spawn or ova of fish suitable
16 for food, and stock the waters of the state with that spawn or ova.

17 **Comment.** Section 25405 continues former Fish and Game Code Section 1123 without
18 substantive change.

19  **Note.** The continuation of this section in this title would subject it to existing Section 6403
20 (proposed Section 25400), making it inapplicable to aquaculture business activities. That
21 technical change would not seem to have any practical effect, because the public entity activities
22 described in this section do not appear to be aquaculture business activities.

23 **The Commission invites comment on whether the proposed placement of this section in**
24 **this title would cause any problems.**

25 **§ 25410. Permit to stock fish**

26 25410. Any person may, under the terms of a permit first obtained from the
27 department, under regulations the commission may adopt, purchase or receive live
28 fish from any registered aquaculturist, and may stock the fish in a stream or a lake.

29 **Comment.** Section 25410 continues former Fish and Game Code Section 6401 without
30 substantive change.

31 **§ 25415. Planting of fish**

32 25415. It is unlawful to place, plant, or cause to be placed or planted, in any of
33 the waters of the state, any live fish, any fresh or salt water animal, or any aquatic
34 plant, whether taken without or within the state, without first submitting it for
35 inspection to, and securing the written permission of, the department.

36 **Comment.** Section 25415 continues former Fish and Game Code Section 6400 without
37 substantive change.

38 See also Sections 5250, 5260 (enforcement).

1 **§ 25420. Fish cultural operations and scientific investigations**

2 25420. The Secretary of the Interior of the United States and the secretary's duly
3 authorized agents may conduct fish cultural operations and scientific
4 investigations in the waters of the state in a manner and at times as may be jointly
5 considered necessary and proper by the secretary and the secretary's agents, and
6 the commission.

7 **Comment.** Section 25420 continues former Fish and Game Code Section 1125 without
8 substantive change.

9  **Note.** The continuation of this section in this title would subject it to existing Section 6403
10 (proposed Section 25400), making it inapplicable to aquaculture business activities. That
11 technical change would not seem to have any practical effect, because the public entity activities
12 described in this section do not appear to be aquaculture business activities.

13 **The Commission invites comment on whether the proposed placement of this section in**
14 **this title would cause any problems.**

15 **TITLE 2. AQUATIC NUISANCE SPECIES**

16 **§ 25500. Damages**

17 25500. (a) A person who personally or through another violates Section 25415,
18 through the use of an aquatic nuisance species, is liable to the owner of any
19 privately or publicly owned property for any damages to that property caused by
20 the violation. A person who violates Section 25415 through the use of an aquatic
21 nuisance species shall also be liable for all monetary damages directly, indirectly,
22 and proximately caused thereby, including, but not limited to, damages to any
23 commercial fishery, sport fishery, or to the public communities which depend
24 upon those fisheries for a portion of their annual income. The Attorney General
25 may file a civil action on behalf of the fisheries or communities that are damaged
26 as a result of the violation. In addition, a private citizen who suffers damages as a
27 result of the violation may file a civil action against the violator.

28 (b) A person who allows an aquatic nuisance species to escape from his or her
29 property to the property of another, whether privately or publicly owned, is liable
30 to the owner of the intruded upon property for any damages caused by the species.

31 (c) This section shall not apply to the placement of any live fish, any fresh or
32 salt water animal, or any aquatic plant from the discharge or exchange of ballast
33 water from any vessel as defined by Section 21 of the Harbors and Navigation
34 Code.

35 (d) This section does not apply to the placement of an aquatic plant by a person
36 who was unaware that he or she was in possession of the plant. This exception
37 includes circumstances in which a plant becomes unknowingly and temporarily
38 attached or affixed to a boat, boat trailer, or boat motor.

39 **Comment.** Section 25500 continues former Fish and Game Code Section 12023(b)-(e) without
40 substantive change. See also Section 5260 (criminal penalty).

1 **§ 25505. Response costs**

2 25505. (a) In addition to Section 5260, a person who violates Section 25415
3 through the use of an aquatic nuisance species is liable for all public and private
4 response, treatment, and remediation efforts resulting from the violation. The cost
5 of these efforts shall constitute a debt of that person, and shall be collectible by the
6 federal, state, county, public agency, or private individual or individuals, incurring
7 those costs in the same manner as in the case of an obligation under a contract,
8 expressed or implied.

9 (b) Public agencies participating in a response to a violation of Section 25415
10 through the use of an aquatic nuisance species may designate one or more of the
11 participating agencies to bring an action to recover costs incurred by all of the
12 participating agencies.

13 (c) The costs relating to an accounting for a violation of Section 25415 through
14 the use of an aquatic nuisance species and the collection of any funds, including,
15 but not limited to, the administrative, legal, and public relations costs of operating
16 a response and remediation program may also be the subject of an action to
17 recover costs which are charged against the responsible person.

18 **Comment.** Section 25505 continues former Fish and Game Code Section 12024 without
19 substantive change.

20 **§ 25510. Reward**

21 25510. Any person whom the department determines has provided evidence or
22 information leading to the arrest and conviction of a person or persons found
23 guilty of violating Section 25415 through the use of an aquatic nuisance species, is
24 eligible to obtain a reward of up to fifty thousand dollars (\$50,000) pursuant to
25 Section 4300.

26 **Comment.** Section 25510 continues former Fish and Game Code Section 12026 without
27 substantive change.

28 **TITLE 3. ARTIFICIAL REEFS**

29 **§ 25600. Legislative findings and declaration**

30 25600. The Legislature finds and declares all of the following:

31 (a) Declines in various southern California marine species of fish have adversely
32 affected the sport and commercial fishing industry.

33 (b) Efforts to enhance these species through the placement of artificial reefs
34 need to be investigated.

35 (c) A program of artificial reef research and development, including reef design,
36 placement, and monitoring, is in the public interest and can best be accomplished
37 under the administration of the department with the cooperation and assistance of
38 the University of California, the California State University, other established,
39 appropriate academic institutions, and other organizations with demonstrated
40 expertise in the field.

(d) A state artificial reef research and construction program under the administration of the department is necessary to coordinate ongoing studies and construction of artificial reefs in waters of the state.

Comment. Section 25600 continues former Fish and Game Code Section 6420 without substantive change.

§ 25605. Definitions

25605. For purposes of this title, the following terms have the following meaning:

(a) “Artificial reef” means manmade or natural objects intentionally placed in selected areas of the marine environment to duplicate those conditions that induce production of fish and invertebrates on natural reefs and rough bottoms, and that stimulate the growth of kelp or other midwater plant life which creates natural habitat for those species.

(b) “Production” means increases in the biomass of a species or number of species.

(c) “Program” means the California Artificial Reef Program.

Comment. Section 25605 continues former Fish and Game Code Section 6421 without substantive change.

§ 25610. Department administration

25610. The department shall administer the California Artificial Reef Program.

Comment. Section 25610 continues former Fish and Game Code Section 6422 without substantive change.

§ 25615. Elements of program

25615. The program shall include all of the following:

(a) The placement of artificial reefs in state waters.

(b) A study of existing successful reefs and all new reefs placed by the program to determine the design criteria needed to construct artificial reefs capable of increasing fish and invertebrate production in waters of the state.

(c) A determination of the requirements for reef siting and placement.

Comment. Section 25615 continues former Fish and Game Code Section 6423 without substantive change.

§ 25620. Allocation

25620. (a) The amount allocated for the administration of the program in any fiscal year may not exceed the amount authorized by applicable state and federal policy guidelines.

(b) It is the intent of the Legislature that future sources of funding for the program may include, but are not limited to, the Fish and Game Preservation Fund, the California Environmental License Plate Fund, the Wildlife Restoration Fund, recreational bond act funds, federal grants-in-aid, county fish and game propagation funds, and private donations.

Comment. Subdivision (a) of Section 25620 continues former Fish and Game Code Section 6424 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 6425(b) without substantive change.

Note. Existing Fish and Game Code Section 6425(a), referring to the California Artificial Reef program, reads as follows:

(a) It is the intent of the Legislature that not more than five hundred thousand dollars (\$500,000) shall be allocated to the program for the 1985–86 fiscal year.

The Commission invites comment on whether this provision is now obsolete, and may be discontinued in the proposed law.

TITLE 4. OCEAN FISHERY RESEARCH

§ 25700. Legislative findings and declaration

25700. The Legislature finds and declares all of the following:

(a) Substantial declines in various species of desirable fish that are caught in southern California ocean waters have adversely affected recreational and commercial fishing and their related industries.

(b) Research and development of artificial propagation, rearing, and stocking techniques and equipment have been sufficiently developed. The purpose of this chapter is to determine if hatchery-released fish can artificially enhance certain stocks of various desirable species, through increased hatchery production of fish and increased monitoring of fisheries to assess the contribution of hatchery-released fish to that enhancement.

(c) Funding for research pertaining to enhancement and artificial propagation, rearing, and stocking are most appropriately borne by a special fund derived from user fees on recreational and commercial fishermen who stand to directly benefit from the resurgence of depressed marine fisheries.

(d) The department has continuing resource management, administrative, and policy review responsibility in marine resources issues.

(e) Volunteers from the recreational fishing community have developed and operated grow-out facilities with private funding. These volunteer activities greatly enhance the effectiveness of the program and are fully compatible with the overall program objectives.

(f) As white sea bass hatchery production is established, additional grow-out facilities will be required and coordination between these facilities will be necessary. The ocean resources enhancement advisory panel may encourage contracts to carry out coordination activities and recommend to the director that this coordination remain a high priority. Those coordination activities may be funded with fees collected by the department pursuant to this title.

(g) The use of federal matching funds, including sportfish restoration account funds, shall be a high priority for use to match state dollars for this program.

1 **Comment.** Section 25700 continues former Fish and Game Code Section 6590 without
2 substantive change.

3 **§ 25705. Definitions**

4 25705. For purposes of this title, “program” means the California Ocean
5 Resources Enhancement and Hatchery Program established by this title.

6 **Comment.** Section 25705 continues former Fish and Game Code Section 6591 without
7 substantive change.

8 **§ 25710. Purpose of program**

9 25710. There is hereby established in state government the California Ocean
10 Resources Enhancement and Hatchery Program, for the purpose of basic and
11 applied research on the artificial propagation, rearing, stocking, and distribution of
12 adversely affected marine fish species that are important to sport or commercial
13 fishing in the ocean waters off the coast of California south of a line extending due
14 west from Point Arguello.

15 **Comment.** Section 25710 continues former Fish and Game Code Section 6592 without
16 substantive change.

17 **§ 25715. Creation of advisory panel**

18 25715. (a) To assist the director in establishing policy and direction for the
19 research and enhancement programs to be supported from the Fish and Game
20 Preservation Fund, there is hereby created in the department an Ocean Resources
21 Enhancement Advisory Panel.

22 (b) The panel shall consist of the following members:

23 (1) One member representing the department.

24 (2) One member from the University of California, appointed by the president.

25 (c) One member from the California State University System, appointed by the
26 chancellor.

27 (4) Two members representing persons working in the southern California
28 commercial fishing industry, of which one shall be appointed by the director from
29 a list of at least three persons submitted by the California Gillnetters Association
30 and one shall be appointed by the director from a list of at least three persons
31 submitted by the California Fisheries and Seafood Institute.

32 (5) One member representing the southern California commercial passenger
33 fishing vessel industry, appointed by the director from a list of at least three
34 persons submitted by the Sportfishing Association of California.

35 (6) Three members representing persons who engage in southern California
36 ocean sport fishing, of which one shall be appointed by the director from a list of
37 at least three persons submitted by the United Anglers of California, one appointed
38 by the director from a list of at least three persons submitted by the National
39 Coalition for Marine Conservation, Pacific Region, and one appointed by the
40 director from a list of at least three persons submitted by California resident
41 members of the American Fishing Tackle Manufacturers Association.

1 (7) One member representing the California Aquaculture Association
2 established pursuant to Section 24800.

3 (c) No person shall serve on the panel if that person is receiving research
4 funding from the program.

5 **Comment.** Subdivision (a) of Section 25715 continues former Fish and Game Code Section
6 6594 without substantive change.

7 Subdivision (b) continues the second sentence of former Fish and Game Code Section 6593
8 without substantive change.

9 **§ 25720. Administration of program**

10 25720. The program is administered by the director, with the advice and
11 assistance of the advisory panel created in Section 25715. The director may
12 appoint, with the advice and consent of the advisory panel, a program manager to
13 assist in administering the program.

14 **Comment.** Section 25720 continues the first and third sentences of former Fish and Game
15 Code Section 6593 without substantive change.

16 **§ 25725. Use of funds**

17 25725. (a) All fees collected by the department pursuant to this title, Section
18 13255, 14620, and any interest earned on those fees, shall be deposited in the Fish
19 and Game Preservation Fund and shall be available, upon appropriation by the
20 Legislature, solely for purposes of the program. The department shall maintain the
21 internal accountability necessary to ensure that expenditures of these funds meet
22 the requirements and restrictions of the purposes of the program.

23 (b) An amount, not to exceed 15 percent of the total annual revenues deposited
24 in the fund pursuant to this title, may be appropriated for the administration of the
25 program, including any reasonable and necessary expenses incurred by members
26 of the Ocean Resources Enhancement Advisory Panel in the discharge of their
27 duties pursuant to this title.

28 (c) No part of the program may be financed pursuant to this title unless it has
29 been approved by both the director and a majority of the members of the Ocean
30 Resources Enhancement Advisory Panel.

31 **Comment.** Section 25725 continues former Fish and Game Code Section 6595 without
32 substantive change.

33 **§ 25730. Contracting with nonprofit organizations**

34 25730. The department may contract with private nonprofit organizations that,
35 prior to January 1, 1984, were conducting research related to the purposes of the
36 program, to conduct research projects pursuant to this title.

37 **Comment.** Section 25730 continues former Fish and Game Code Section 6597 without
38 substantive change.

1 **§ 25735. Participation by other entities**

2 25735. It is in the interest of the state to have broad participation in
3 enhancement programs. Therefore, this program shall be open to participation by
4 qualified academic institutions, as determined by the department, and nonprofit
5 organizations, commercial aquaculturists, and for profit enterprises.

6 **Comment.** Section 25735 continues former Fish and Game Code Section 6597.5 without
7 substantive change.

8 **§ 25740. Name of program location**

9 25740. Any place at which all or a significant part of the program is conducted
10 shall be named the “California Marine Hatchery Institute.”

11 **Comment.** Section 25740 continues former Fish and Game Code Section 6598 without
12 substantive change.

13 **TITLE 5. MISCELLANEOUS PROVISIONS**

14 **§ 25850. Youth camps**

15 25850. The department may plant fish in streams passing through, or in lakes on,
16 land on which is located a youth camp for underprivileged children.

17 **Comment.** Section 25850 continues former Fish and Game Code Section 6402 without
18 substantive change.

19  **Note.** Under existing law, Section 6402 is governed by existing Section 6403, which makes
20 Section 6402 inapplicable to aquaculture business activities. The continuation of Section 6402 in
21 this location would make Section 6403 (proposed Section 25400) inapplicable to Section 6402.
22 Technically, this would make Section 6402 applicable to aquaculture business activities.
23 However, the public entity activity described in Section 6402 does not appear to be an
24 aquaculture business activity. For that reason, the change described in this Note would seem to
25 have no practical effect.

26 **The Commission invites comment on whether this change would be a problem.**

27 **§ 25855. Urban fishing program**

28 25855. Notwithstanding Section 25100 or any other provision of law, all funds
29 allocated for fish purchases for the department’s urban fishing program shall be
30 used to purchase all fish and aquatic organisms by contract, pursuant to the
31 requirements of the Public Contract Code, from private registered aquaculture
32 facilities within the state unless the department determines one of the following
33 conditions exists:

34 (a) After reasonable notice, the private facilities are unable to provide the
35 specified fish or aquatic organism.

36 (b) The fish or aquatic organism is infected or diseased.

37 **Comment.** Section 25855 continues former Fish and Game Code Section 1123.5 without
38 substantive change.

PART 4. DOMESTICATION OF GAME ANIMALS

TITLE 1. GAME ANIMALS GENERALLY

§ 26000. License requirement

26000. Any person engaged in raising or importing, or who keeps in captivity, in this state domesticated game birds or domesticated game mammals which normally exist in the wild in this state shall procure a domesticated game breeder's license if the birds or mammals are kept more than 30 days after acquisition. No license is, however, required of any of the following:

- (a) Licensed pheasant clubs, except to the extent provided in Section 29365.
- (b) Licensed domesticated migratory game bird shooting areas as defined in Title 2 (commencing with Section 26200).
- (c) Keepers of hotels, restaurants, boardinghouses, or clubs serving the meat of those birds or mammals for actual consumption on the premises.
- (d) Retail meat dealers selling such meat to customers for actual consumption.
- (e) Public zoological gardens possessing those birds or mammals for exhibition purposes or for the purpose of disposing of the birds or mammals by sale, exchange, or donation to other public zoological gardens.

Comment. Section 26000 continues former Fish and Game Code Section 3200 without substantive change.

Note. Existing Fish and Game Code Section 3200(a) exempts from the section's licensing requirement "[l]icensed pheasant clubs, except to the extent provided in Section 3283." However, former Fish and Game Code Section 3283 was repealed by 1994 Cal. Stat. ch. 849, the digest of which indicated that the subject matter of Section 3283, and other deleted sections, would be instead governed by regulations adopted by the Fish and Game Commission. The same bill also added Fish and Game Code Section 3270(a) (which would be continued in the proposed law by proposed Section 29365), which provides:

3270. (a) In order to provide additional hunting by stocking domestically propagated game birds, and to permit the taking of game birds under conditions that will not conflict with the public interest, any person who owns or controls the hunting rights on a tract of land may apply to the department for a game bird club license authorizing the taking of game birds upon that land in accordance with the regulations of the commission for the administration, including the implementation and enforcement, of this section.

To express this legislative change, proposed Section 2600(a) would restate the exemption in that provision as "Licensed pheasant clubs, except to the extent provided in Section 29365."

The Commission invites comment on the appropriateness of the proposed restatement of this provision.

§ 26005. Sale of carcass

26005. No person shall sell the carcass of any domesticated game bird or domesticated game mammal without first obtaining a domesticated game breeder's license from the department. The department may issue that license upon terms and conditions as the commission may prescribe, and the commission may at any time revoke the license for sufficient cause.

1 **Comment.** Section 26005 continues former Fish and Game Code Section 3201 without
2 substantive change.

3 **§ 26010. Class 1 and class 2 licenses**

4 26010. There are classes of domesticated game breeder's licenses, designated
5 "class 1" and "class 2."

6 (a) A class 1 domesticated game breeder's license authorizes the licensee to
7 engage in all domesticated game breeding activities except that not more than 175
8 Chinese ringneck or Mongolian ringneck pheasants, or both, or hybrids thereof,
9 may be sold under a class 1 license.

10 (b) A class 2 domesticated game breeder's license is required in order to sell
11 more than 175 Chinese ringneck or Mongolian ringneck pheasants, or both, or
12 hybrids thereof, and entitles the licensee to all the rights and privileges of a class 1
13 license.

14 **Comment.** Section 26010 continues former Fish and Game Code Section 3202 without
15 substantive change.

16 **§ 26015. License fee**

17 26015. The department shall issue a class 1 domesticated game breeder's license
18 upon the payment of a base fee of eight dollars (\$8), as adjusted under Section
19 3755, and a class 2 domesticated game breeder's license upon the payment of a
20 base fee of forty dollars (\$40), as adjusted under Section 3755.

21 **Comment.** Section 26015 continues former Fish and Game Code Section 3203 without
22 substantive change.

23 **§ 26020. Term of license**

24 26020. A license issued under the provisions of this title is valid for a term of
25 one year from January 1, or if issued after the beginning of the term, for the
26 remainder of that term.

27 **Comment.** Section 26020 continues the first paragraph of former Fish and Game Code Section
28 3204 without substantive change.

29 **§ 26025. Display of license**

30 26025. A domesticated game breeder's license shall be conspicuously displayed
31 on the property where the birds or mammals are held in captivity.

32 **Comment.** Section 26025 continues the second paragraph of former Fish and Game Code
33 Section 3204 without substantive change.

34 **§ 26030. Carriers for hire**

35 26030. Carriers for hire may carry within the state live domesticated game birds
36 and live domesticated game mammals upon terms and conditions as the
37 commission may prescribe.

38 **Comment.** Section 26030 continues former Fish and Game Code Section 3205 without
39 substantive change.

1 **§ 26035. Tag requirement**

2 26035. (a) No domesticated game bird or domesticated game mammal shall be
3 transported or sold dead unless each quarter and each loin of the carcass of each
4 large mammal, the carcass of each bird, except as provided in Section 28505 for a
5 bird raised outside this state, and the carcass of each small mammal, is tagged with
6 a domesticated game breeder's tag or seal. The tag or seal shall not be removed
7 until such quarter, loin, or carcass is prepared for consumption.

8 (b) No tag so affixed shall be used again.

9 (c) No tag or seal shall be sold by the department to anyone other than a person
10 who is legally in possession of domesticated game.

11 **Comment.** Section 26035 continues former Fish and Game Code Section 3206 without
12 substantive change.

13 **§ 26040. Fee for tag**

14 26040. The department shall collect three cents (\$0.03) for each tag or seal.

15 **Comment.** Section 26040 continues former Fish and Game Code Section 3207 without
16 substantive change.

17 **§ 26045. Report to Department**

18 26045. (1) On or before January 31 of each year, every person to whom a
19 domesticated game breeder's license has been issued shall report the following to
20 the department on a form provided by the department:

21 (1) The total number of each species of birds and mammals killed, sold, or
22 shipped during the preceding year.

23 (2) The names of the persons to whom the birds or mammals were sold or
24 shipped.

25 (3) The name of the person in whose presence the birds or mammals were
26 tagged.

27 (4) A complete list of the game birds and mammals held in the person's
28 possession at the time the report is made.

29 (b) The report shall be verified by the affidavit of the licensee.

30 **Comment.** Section 26045 continues former Fish and Game Code Section 3208 without
31 substantive change.

32 **§ 26050. Poultry processing plants**

33 26050. (a) In lieu of the tag required by Section 26035, poultry processing plants
34 licensed pursuant to Chapter 4 (commencing with Section 18650) or Chapter 4.1
35 (commencing with Section 18940) of Part 3 of Division 9 of the Food and
36 Agricultural Code, which process domesticated game birds received from persons
37 licensed pursuant to this title, may package each individual carcass in a
38 nonreusable container clearly labeled on the outside with the species of bird and
39 the wording "Product of a Licensed California Domesticated Game Breeder."

1 (b) Each processor receiving domesticated game birds shall keep a complete
2 record of all birds received showing all of the following:

3 (1) The date received.

4 (2) The number and species of birds in each lot or shipment.

5 (3) The complete name, address, and domesticated game breeders' license
6 number of the person from whom the birds were received.

7 (4) The disposition of processed birds, the date of sale or shipment, the quantity
8 and species sold or shipped, and the person to whom the birds were sold or
9 shipped.

10 (c) The records shall be retained by the processor for one year following the date
11 of processing. These records shall be subject to inspection upon demand by any
12 officer of the department during hours the processing plant is in operation or open
13 for business.

14 (d) This section does not affect the requirements of Section 26035 governing
15 tagging domesticated game birds for transportation by those other than licensed
16 poultry processors.

17 **Comment.** Section 26050 continues former Fish and Game Code Section 3209 without
18 substantive change.

19 **§ 26055. Sale of meat by keeper of establishment**

20 26055. The keeper of a hotel, restaurant, boardinghouse, or club may sell
21 portions of a quarter or loin of a large mammal, or the carcass of a bird or mammal
22 raised or imported under a domesticated game breeder's license, to a patron for
23 actual consumption on the premises only, and no license for that purpose shall be
24 required of the keeper or club. All keepers of hotels, restaurants, boardinghouses,
25 or clubs who sell any a domesticated game bird or domesticated game mammal for
26 consumption to a patron shall be required to submit to the inspection of their
27 premises by the department and shall display for inspection any carcass or animal
28 parts held in storage for sale. That game shall be tagged under Section 26035.

29 **Comment.** Section 26055 continues former Fish and Game Code Section 3212 without
30 substantive change.

31 **§ 26060. Sale of meat by retail meat dealer**

32 26060. (a) A retail meat dealer may, without a license, sell portions of a quarter
33 or loin of a large mammal or the carcass of a bird or mammal raised or imported
34 under a domesticated game breeder's license to a customer for actual
35 consumption.

36 (b) Retail dealers shall submit their premises to inspection by the department,
37 and shall display at any authorized inspection any carcass or animal parts held by
38 them in storage. That game shall be tagged under Section 26035.

39 **Comment.** Section 26060 continues former Fish and Game Code Section 3213 without
40 substantive change.

1 **§ 26065. Confinement and escape**

2 26065. (a) Domesticated game breeders or other persons holding domesticated
3 game mammals in captivity shall confine the mammals in escape-proof cages or
4 enclosures.

5 (b) In the event any of the mammals escape from the cages or enclosures, the
6 owner shall immediately make every reasonable effort to recapture them.

7 (c) If the owner fails to recapture the escaped mammals, the department may
8 capture the mammals or remove them from the wild by whatever means may be
9 necessary if, in the opinion of the department, the mammals may conflict with
10 native species of birds or mammals or cause damage to public or private property.

11 (d) The owner shall reimburse the department for all costs incurred in capturing
12 or removing the mammals from the wild. The owner shall be responsible for any
13 damage the mammals may cause to public or private property.

14 (e) Any domesticated big game mammal may be marked with ear tags or other
15 suitable markings or tags, as may be specified by the commission, which shall
16 identify the owner of the mammals.

17 **Comment.** Section 26065 continues former Fish and Game Code Section 3214 without
18 substantive change.

19 **§ 26070. Killing of domesticated game animals**

20 26070. All domesticated game birds and domesticated game mammals,
21 excepting deer, sold under the provisions of this title, shall be killed by means
22 other than by shooting. This section does not apply to licensed pheasant clubs,
23 licensed domesticated migratory game bird shooting areas, or to the training or
24 practice of hunting dogs.

25 **Comment.** Section 26070 continues former Fish and Game Code Section 3216 without
26 substantive change.

27 **§ 26075. Evidence of domesticated status**

28 26075. The carcass of a game bird that shows that it has been killed by shooting
29 shall constitute prima facie evidence that it was not a domesticated game bird. The
30 fact that the bird has been tagged in accordance with Section 26035 of this code
31 shall not alter this presumption.

32 **Comment.** Section 26075 continues former Fish and Game Code Section 3217 without
33 substantive change.

34 **§ 26085. Domesticated reindeer**

35 26085. Domesticated reindeer may be imported into this state and sold only in
36 accordance with regulations that the commission may adopt.

37 **Comment.** Section 26085 continues former Fish and Game Code Section 3219 without
38 substantive change.

TITLE 2. MIGRATORY GAME BIRDS

§ 26200. Definition

26200. For purposes of this part, a “domesticated migratory game bird” is a migratory game bird held live in captivity at or after six weeks of age.

Comment. Section 26200 restates the second paragraph of former Fish and Game Code Section 3300 without substantive change.

Notes. (1) Proposed Section 26200 restates the second paragraph of existing Section 3300 to improve its clarity, and make clear that the definition in the provision is meant to apply throughout existing Sections 3300 through 3311, without changing the substantive effect of the provision. The existing provision reads as follows:

Any bird of a species included in the definition of migratory game birds, as defined in Section 3500, which has been held live in captivity is a “domesticated migratory game bird” for purposes of this section, except such a bird that has been released from captivity and any control before attaining six weeks of age.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

(2) The second paragraph of existing Section 3300 defines a “domesticated migratory game bird” for purposes of “this section.” However, the term “domesticated migratory game bird” is used elsewhere in the existing Fish and Game Code, with no corresponding definition. See existing Sections 3031, 3200, 3216, 3240.5.

Should this definition be made applicable to the code generally, and included with the general definitions in the first division of the proposed law?

§ 26205. License requirement

26205. It is unlawful to raise and release, or release, domesticated migratory game birds for shooting by a person paying for that privilege, without a revocable nontransferable license issued by the department pursuant to Section 26210.

Comment. Section 26205 restates the first sentence of the first paragraph of former Fish and Game Code Section 3300 without substantive change.

§ 26210. License to raise and release

26210. (a) A license to raise and release, or release, domesticated migratory game birds for shooting by persons who pay for that privilege may be issued annually by the department, and shall be valid from July 1 through the following June 30, upon payment of a base fee of eighty dollars (\$80), as adjusted under Section 3755.

(b) The application for the license shall show the size and location of the area to be licensed.

Comment. Subdivision (a) of Section 26210 continues the second sentence of the first paragraph of former Fish and Game Code Section 3300 without substantive change.

Subdivision (b) continues the first sentence of former Fish and Game Code Section 3301 without substantive change.

1 **§ 26215. Posting of area**

2 26215. A person licensed pursuant to Section 26210 shall post the boundaries of
3 the licensed area with signs, at intervals of not more than 500 feet, which shall
4 indicate that the area is licensed for the shooting of domesticated migratory game
5 birds. The dimensions of each sign shall be at least 12 by 18 inches.

6 **Comment.** Section 26215 continues the second and third sentences of former Fish and Game
7 Code Section 3301 without substantive change.

8 **§ 26220. Additional regulatory requirements**

9 26220. The commission may adopt additional regulations deemed necessary for
10 the releasing and shooting of domesticated migratory game birds and shall set the
11 season and areas where domesticated migratory game birds may be taken. If a
12 person licensed pursuant to Section 26210 violates any provision of this title or
13 any regulation adopted pursuant to this title, the commission may cancel or revoke
14 that license after providing the licensee notice and an opportunity to be heard by
15 the commission.

16 **Comment.** Section 26220 continues former Fish and Game Code Section 3302 without
17 substantive change.

18 **§ 26225. Care of birds**

19 26225. When domesticated migratory game birds are raised or held for release
20 by a person licensed pursuant to Section 26210, the licensee shall provide proper
21 and adequate care for the birds and shall raise and hold them only under sanitary
22 conditions. Conditions for proper care and raising shall be prescribed by the
23 commission.

24 **Comment.** Section 26225 continues the first and second sentences of former Fish and Game
25 Code Section 3303 without substantive change.

26 **§ 26230. Inspection of birds and facilities**

27 26230. A person licensed pursuant to Section 26210 shall provide for the
28 inspection of birds and facilities upon the request of the department.

29 **Comment.** Section 26230 continues the third sentence of former Fish and Game Code Section
30 3303 without substantive change.

31 **§ 26235. Condition of birds**

32 26235. A person licensed pursuant to Section 26210 may only release for
33 shooting domesticated migratory game birds that are at least 14 weeks of age,
34 capable of strong and sustained flight, fully feathered, and otherwise in condition
35 to survive in the wild. A licensee shall not release a domesticated migratory game
36 bird that is in any of the following conditions:

37 (a) Altered in any manner that would, in the opinion of the department, render
38 the bird incapable of normal sustained flight.

39 (b) Diseased.

40 (c) Shows evidence of malnutrition or injury.

1 **Comment.** Section 26235 restates former Fish and Game Code Section 3305 without
2 substantive change.

3 **Note.** Proposed Section 26235 is intended to restate existing Section 3305 to improve its
4 clarity, without changing its substantive effect. The existing provision reads as follows:

5 All domesticated migratory game birds at time of release for shooting shall be at least 14 weeks
6 of age, capable of strong and sustained flight, fully feathered, and otherwise in condition to
7 survive in the wild. Birds that are altered in any manner which would, in the opinion of the
8 department, render them incapable of normal sustained flight, or which are diseased, or show
9 evidence of malnutrition or injury, shall not be released.

10 **The Commission invites comment on whether the proposed restatement would cause any**
11 **substantive change in the meaning of the provision.**

12 **§ 26240. Blinds**

13 26240. (a) Shooting in an area licensed pursuant to Section 26210 shall be
14 confined to blinds, except for shooting necessary to recover a downed and injured
15 bird.

16 (b) No more than three shooters shall occupy or use each blind.

17 (c) Blinds shall be constructed to prevent the shooting of domestic migratory
18 game birds over water, and to insure maximum safety to occupants of adjoining
19 blinds.

20 (d) Blinds shall be situated so that the occupants of the blinds cannot see the
21 release site.

22 **Comment.** Section 26240 continues the first and second paragraphs of former Fish and Game
23 Code Section 3306 without substantive change.

24 **§ 26245. Shooting or taking near release point**

25 26245. (a) A person licensed pursuant to Section 26210 shall not permit any
26 shooting within 500 feet of a point where a domesticated migratory bird is
27 released.

28 (b) A domesticated migratory game bird shall not be taken within 500 feet of its
29 point of release.

30 **Comment.** Section 26245 continues the third paragraph of former Fish and Game Code
31 Section 3306 without substantive change.

32 **§ 26250. Birds injured or killed**

33 26250. (a) A person licensed pursuant to Section 26210 shall not permit an
34 injured bird to remain on a pond or feeding area, or knowingly permit an injured
35 bird to be used in any subsequent release.

36 (b) Any bird killed or injured by a shooter shall be retrieved without delay, and
37 any injured bird shall be humanely dispatched.

38 **Comment.** Subdivision (a) of Section 26250 continues the second sentence of the first
39 paragraph of former Fish and Game Code Section 3307 without substantive change.

40 Subdivision (b) continues the first sentence of the first paragraph of former Fish and Game
41 Code Section 3307 without substantive change.

1 **§ 26255. Retrieving dog**

2 26255. In order to prevent the loss of any dead or injured bird, a person licensed
3 pursuant to Section 26210 shall provide the use of a retrieving dog, without cost,
4 to all shooters, except that shooters may provide their own retrieving dogs. A
5 licensee shall not permit the shooting of any bird unless a retrieving dog is
6 immediately available for use by all shooters.

7 **Comment.** Section 26255 continues the second paragraph of former Fish and Game Code
8 Section 3307 without substantive change.

9 **§ 26260. Seal**

10 26260. (a) No dead domesticated migratory game bird shall be removed from an
11 area licensed pursuant to Section 26210 until a seal is securely attached to the
12 carcass.

13 (b). The seal shall remain attached to the carcass until the carcass is finally
14 prepared for consumption.

15 (c) Each seal shall be supplied by the department, at a fee set by the commission
16 that may not exceed five cents (\$0.05).

17 **Comment.** Section 26260 continues former Fish and Game Code Section 3309 without
18 substantive change.

19 **§ 26265. Inspection fee**

20 26265. A person licensed pursuant to Section 26210 shall pay the department an
21 inspection fee not to exceed five cents (\$0.05) for each domesticated migratory
22 game bird raised or used on the area licensed, to insure adherence to these
23 regulations.

24 **Comment.** Section 26265 continues former Fish and Game Code Section 3308 without
25 substantive change.

26 **§ 26270. Shooter required to have hunting license**

27 26270. It is unlawful to shoot a domesticated game bird in an area licensed
28 pursuant to Section 26210 without a valid hunting license as provided by Section
29 10210.

30 **Comment.** Section 26270 continues former Fish and Game Code Section 3310 without
31 substantive change.

32 **§ 26275. Federal requirements**

33 26275. A person releasing or shooting a domesticated migratory game bird shall
34 comply with all applicable federal laws and regulations relating to the releasing or
35 shooting of domesticated migratory game birds.

36 **Comment.** Section 26275 continues former Fish and Game Code Section 3311 without
37 substantive change.

38 **Note.** Existing Section 3311 appears designed as a reminder that federal laws and regulations
39 may also govern the releasing and shooting of domesticated migratory game birds. However, the
40 use of the word “licensee” in the provision is problematic, for two reasons.

First, it is not clear whether the “licensee” referred to is (1) a person issued a license to *raise and release, or release* domesticated migratory game birds for shooting by others pursuant to existing Section 3300, (2) a person issued the hunting license referred to in existing Section 3310 to *shoot* domesticated migratory game birds, or (3) both of the above. The ambiguity is enhanced by a reference in Section 3311 to federal laws and regulations relating to the “releasing *and* shooting” of domesticated migratory game birds.

Second, regardless of which “licensee” is contemplated, the implication that this provision is applicable only to those licensees is confusing. Absent an exemption in federal law, all persons releasing or shooting a domesticated migratory game bird, whether licensed or not, would be required to comply with whatever federal laws or regulations were “applicable” to that conduct.

To address both of these issues, the Commission has revised the provision so it applies to *any* person who either releases or shoots a domesticated migratory game bird.

The Commission invites comment on whether that revision is appropriate.

PART 5. PROPAGATION OF FUR-BEARING MAMMALS

§ 26400. Applicability of other code provisions

26400. The provisions of this code relating to the trapping of fur-bearing mammals, or to fur dealer license requirements, do not apply to, or prohibit the propagation of, fur-bearing mammals that are confined in accordance with regulations of the commission.

Comment. Section 26400 continues former Fish and Game Code Section 4010 without substantive change.

PART 6. IMPORTATION, TRANSPORTATION, AND POSSESSION

TITLE 1. GENERAL PROVISIONS

§ 26500. “Wild animal”

26500. As used in this part, “wild animal” means any animal of the class Aves (birds), class Mammalia (mammals), class Amphibia (frogs, toads, salamanders), class Osteichthyes (bony fishes), class Monorhina (lampreys), class Reptilia (reptiles), class Crustacea (crayfish), or class Gastropoda (slugs, snails), which is not normally domesticated in this state as determined by the commission.

Comment. Section 26500 continues former Fish and Game Code Section 2116 without substantive change.

§ 26505. “Enforcing officers”

26505. (a) As used in this part, “enforcing officers” means the department, the state plant quarantine officers, the local law enforcement agents, the county sheriffs, and the county agricultural commissioners.

(b) Enforcing officers are authorized and empowered to enforce the provisions of this part or any regulation implementing this part.

Comment. Section 26505 continues former Fish and Game Code Section 2117 without substantive change.

1 **§ 26510. Legislative findings and declarations**

2 26510. (a) The Legislature finds and declares that wild animals are being
3 captured for importation and resale in California; that some populations of wild
4 animals are being depleted; that many animals die in captivity or transit; that some
5 keepers of wild animals lack sufficient knowledge or facilities for the proper care
6 of wild animals; that some wild animals are a threat to the native wildlife or
7 agricultural interests of this state; and that some wild animals are a threat to public
8 health and safety.

9 (b) It is the intention of the Legislature that the importation, transportation, and
10 possession of wild animals shall be regulated to protect the health and welfare of
11 wild animals captured, imported, transported, or possessed, to reduce the depletion
12 of wildlife populations, to protect the native wildlife and agricultural interests of
13 this state against damage from the existence at large of certain wild animals, and
14 to protect the public health and safety in this state.

15 **Comment.** Section 26510 continues former Fish and Game Code Section 2116.5 without
16 substantive change.

17 **TITLE 2. RESTRICTIONS**

18 **CHAPTER 1. GENERAL PROVISIONS**

19 **§ 26600. Adoption of regulations relating to importation and possession**

20 26600. (a) The commission, in cooperation with the Department of Food and
21 Agriculture, shall adopt regulations governing both of the following:

22 (1) The entry, importation, possession, transportation, keeping, confinement, or
23 release of any and all wild animals that will be or that have been imported into this
24 state pursuant to this title.

25 (2) The possession of all other wild animals.

26 (b) The regulations shall be designed to prevent damage to the native wildlife or
27 agricultural interests of this state resulting from the existence at large of these wild
28 animals, and to provide for the welfare of wild animals and the safety of the
29 public.

30 (c) The regulations shall also include criteria for all of the following:

31 (1) The receiving, processing, and issuing of a permit and conducting
32 inspections.

33 (2) Contracting out inspection activities.

34 (3) Responding to public reports and complaints.

35 (4) The notification of the revocation, termination, or denial of permits, and
36 related appeals.

37 (5) The method by which the department determines that the breeding of wild
38 animals pursuant to a single event breeding permit for exhibitor or a breeding
39 permit is necessary and will not result in unneeded or uncared for animals, and the
40 means by which the criteria will be implemented and enforced.

1 (6) How a responding agency will respond to an escape of a wild animal. This
2 shall include, but not be limited to, the establishment of guidelines for the safe
3 recapture of the wild animal and procedures outlining when lethal force would be
4 used to recapture the wild animal.

5 (d) These regulations shall be developed and adopted by the commission on or
6 before January 1, 2007.

7 **Comment.** Section 26600 continues former Fish and Game Code Section 2120 without
8 substantive change.

9 **§ 26605. Designated exemption from permit requirement**

10 26605. The commission may designate wild animals that may be possessed
11 without a permit.

12 **Comment.** Section 26605 continues former Fish and Game Code Section 2118.5 without
13 substantive change.

14 **§ 26610. Commission to adopt regulations providing guidance to enforcing officers**

15 26610. The commission shall adopt regulations in cooperation with the State
16 Department of Food and Agriculture for the guidance of enforcing officers. The
17 regulations shall include a list of the wild animals for which permits that may be
18 issued under this part will be refused, and the disposition of wild animals illegally
19 imported into this state.

20 **Comment.** Section 26610 continues former Fish and Game Code Section 2122 without
21 substantive change.

22 **§ 26615. Department to publish list of prohibited animals**

23 26615. The department shall publish from time to time as changes arise, a list of
24 animals that may not be imported or transported into this state.

25 **Comment.** Section 26615 continues former Fish and Game Code Section 2119 without
26 substantive change.

27 **§ 26620. Department to furnish descriptive explanatory material**

28 26620. The department in cooperation with the State Department of Food and
29 Agriculture shall furnish descriptive and illustrative material concerning the wild
30 animals enumerated in or designated pursuant to Sections 26700 through 26730, as
31 well as explanatory material setting forth the reasons for designating those animals
32 as undesirable and a menace to native wildlife or to the agricultural interests of
33 this state for the information and guidance of the enforcing officers.

34 **Comment.** Section 26620 continues former Fish and Game Code Section 2123 without
35 substantive change.

CHAPTER 2. CLASSES OF RESTRICTED ANIMALS

§ 26700. Restricted birds

26700. It is unlawful to import, transport, possess, or release alive into this state, except under a revocable, nontransferable permit as provided in this part and the regulations pertaining to this part, any wild animal of the following species of the Class Aves (birds):

- (a) Family Cuculidae (cuckoos): All species.
- (b) Family Alaudidae (larks): Skylark, *Alauda arvensis*.
- (c) Family Corvidae (crows, jays, magpies): All species.
- (d) Family Turdidae (thrushes):
 - (1) European blackbird, *Turdus merula*.
 - (2) Missel (or mistle), thrush, *Turdus viscivorus*.
- (e) Family Sturnidae (starlings and mynas or mynahs): All species of the family, except hill myna (or hill mynah), and *Gracula religiosa* (sometimes referred to as *Eulabes religiosa*).
- (f) Family Ploceidae (weavers):
 - (1) Spanish sparrow, *Passer hispaniolensis*.
 - (2) Italian sparrow, *Passer italiae*.
 - (3) European tree sparrow, *Passer montanus*.
 - (4) Cape sparrow, *Passer capensis*.
 - (5) Madagascar weaver, *Foudia madagascariensis*.
 - (6) Baya weaver, *Ploceus baya*.
 - (7) Hawaiian rice bird, *Munia nitoria*.
 - (8) Red-billed quelea, *Quelea quelea*.
 - (9) Red-headed quelea, *Quelea erythrops*.
- (g) Family Fringillidae (sparrows, finches, buntings): Yellowhammer, *Emberiza citronella*.

Comment. Section 26700 continues former Fish and Game Code Section 2118(a) without substantive change.

§ 26705. Restricted mammals

26705. (a) It is unlawful to import, transport, possess, or release alive into this state, except under a revocable, nontransferable permit as provided in this part and the regulations pertaining to this part, any wild animal of the following species of the Class Mammalia (mammals):

- (1) Order Primates: All species except those in family Hominidae.
- (2) Order Edentata (sloths, anteaters, armadillos, etc.): All species.
- (3) Order Marsupialia (marsupials or pouched mammals): All species.
- (4) Order Insectivora (shrews, moles, hedgehogs, etc.): All species.
- (5) Order Dermoptera (gliding lemurs): All species.
- (6) Order Chiroptera (bats): All species.
- (7) Order Monotremata (spiny anteaters, platypuses): All species.

- 1 (8) Order Pholidota (pangolins, scaly anteaters): All species.
2 (9) Order Lagomorpha (pikas, rabbits, hares): All species, except domesticated
3 races of rabbits.
4 (10) Order Rodentia (rodents): All species, except the following species:
5 (A) Domesticated golden hamsters, also known as Syrian hamster, *Mesocricetus*
6 *auratus*.
7 (B) Domesticated races of rats or mice (white or albino; trained, dancing or
8 spinning, laboratory-reared).
9 (C) Domestic strains of guinea pig (*Cavia porcellus*).
10 (11) Order Carnivora (carnivores): All species, except domestic dogs (*Canis*
11 *familiaris*) and domestic cats (*Felis catus*).
12 (12) Order Tubulidentata (aardvarks): All species.
13 (13) Order Proboscidea (elephants): All species.
14 (14) Order Hyracoidea (hyraxes): All species.
15 (15) Order Sirenia (dugongs, manatees): All species.
16 (16) Order Perissodactyla (horses, zebras, tapirs, rhinoceroses, etc.): All species
17 except those of the family Equidae.
18 (17) Order Artiodactyla (swine, peccaries, camels, deer, elk, except elk (genus
19 *Cervus*) that are subject to Section 26865, moose, antelopes, cattle, goats, sheep,
20 etc.): All species except the following species:
21 (A) Domestic swine of the family Suidae.
22 (B) American bison.
23 (C) Anomestic cattle.
24 (D) Sheep and goats of the family Bovidae.
25 (E) Races of big-horned sheep (*Ovis canadensis*) now or formerly indigenous to
26 this state.
27 (b) Mammals of the orders Primates, Edentata, Dermoptera, Monotremata,
28 Pholidota, Tubulidentata, Proboscidea, Perissodactyla, Hyracoidea, Sirenia and
29 Carnivora are restricted for the welfare of the animals, except animals of the
30 families Viverridae and Mustelidae in the order Carnivora are restricted because
31 such animals are undesirable and a menace to native wildlife, the agricultural
32 interests of the state, or to the public health or safety.
33 **Comment.** Section 26705 continues former Fish and Game Code Section 2118(b) without
34 substantive change.

35 **§ 26710. Restricted amphibians**

36 26710. It is unlawful to import, transport, possess, or release alive into this state,
37 except under a revocable, nontransferable permit as provided in this part and the
38 regulations pertaining to this part, any wild animal of the following species of the
39 Class Amphibia (frogs, toads, salamanders):

- 40 (a) Family Bufonidae (toads).
41 (b) Giant toad or marine toad, *Bufo marinus*.

1 **Comment.** Section 26710 continues former Fish and Game Code Section 2118(c) without
2 substantive change.

3 **§ 26715. Restricted fish**

4 26715. It is unlawful to import, transport, possess, or release alive into this state,
5 except under a revocable, nontransferable permit as provided in this part and the
6 regulations pertaining to this part, any wild animal of the following species of fish:

7 (a) Class Monorhina (lampreys): All species.

8 (b) Class Osteichthyes (bony fishes):

9 (1) Family Serranidae (bass): White perch, *Morone* or *Roccus americana*.

10 (2) Family Clupeidae (herring): Gizzard shad, *Dorosoma cepedianum*.

11 (3) Family Sciaenidae (croakers): Freshwater sheepshead, *Aplodinotus*
12 *grunniens*.

13 (4) Family Characidae (characins):

14 (A) Banded tetra, *Astyanax fasciatus*.

15 (B) All species of piranhas.

16 (5) Family Lepisosteidae (gars): All species.

17 (6) Family Amiidae (bowfins): All species.

18 (c) Except as expressly authorized in this code, any live nonindigenous Atlantic
19 salmon or its roe, in the Smith River watershed.

20 **Comment.** Section 26715 continues former Fish and Game Code Section 2118(d)-(e) and (j)
21 without substantive change.

22 **§ 26720. Restricted reptiles**

23 26720. It is unlawful to import, transport, possess, or release alive into this state,
24 except under a revocable, nontransferable permit as provided in this part and the
25 regulations pertaining to this part, any wild animal of the following species of the
26 Class Reptilia (snakes, lizards, turtles, alligators): all species of the Family
27 Crocodilidae.

28 **Comment.** Section 26720 continues former Fish and Game Code Section 2118(f) without
29 substantive change.

30 **§ 26725. Restricted invertebrates**

31 26725. It is unlawful to import, transport, possess, or release alive into this state,
32 except under a revocable, nontransferable permit as provided in this part and the
33 regulations pertaining to this part, any wild animal of the following species of
34 invertebrates:

35 (a) Class Crustacea (crustaceans):

36 (1) Genus *Cambarus* (crayfishes): All species.

37 (2) Genus *Astacus* (crayfishes): All species.

38 (3) Genus *Astacopsis* (crayfishes): All species.

39 (b) Class Gastropoda (slugs, snails, clams):

40 (1) All species of slugs.

41 (2) All species of land snails.

1 **Comment.** Section 26725 continues the part of former Fish and Game Code Section 2118(g)-
2 (h) without substantive change.

3 **§ 26730. Animals restricted by designation**

4 26730. It is unlawful to import, transport, possess, or release alive into this state,
5 except under a revocable, nontransferable permit as provided in this part and the
6 regulations pertaining to this part, any wild animal of any class, order, family,
7 genus, and species that may be designated by the commission in cooperation with
8 the Department of Food and Agriculture, (1) when the class, order, family, genus,
9 or species is proven to be undesirable and a menace to native wildlife or the
10 agricultural interests of the state, or (2) to provide for the welfare of wild animals.

11 **Comment.** Section 26730 continues former Fish and Game Code Section 2118(i) without
12 substantive change.

13 **§ 26735. Addition or deletion of animals from restriction**

14 26735. Classes, families, genera, and species may be added to or deleted from
15 Sections 26555 through 26580, inclusive, from time to time, by commission
16 regulations in cooperation with the Department of Food and Agriculture.

17 **Comment.** Section 26735 continues former Fish and Game Code Section 2118(k) without
18 substantive change.

19 **CHAPTER 3. ADDITIONAL PROHIBITIONS**

20 **§ 26850. Prohibition relating to gain, amusement, or sport**

21 26850. (a) Except as otherwise authorized by this code or regulations adopted
22 pursuant to this code, including, but not limited to provisions that authorize raising
23 deer to produce venison for market, it is unlawful for any person to possess,
24 transport, import, export, propagate, purchase, sell, or transfer any live mammal
25 listed in Section 26705 for the purpose of maiming, injuring, or killing the
26 mammal for gain, amusement, or sport.

27 (b) Except as otherwise authorized by this code or regulations adopted pursuant
28 to this code, the buyer of a live mammal listed in Section 26705 shall not resell the
29 live mammal to another buyer who has the intent to maim, injure, or kill that
30 mammal for purpose of gain, amusement, or sport.

31 (c) This section does not apply to the meat, hide, or parts of a dead mammal.

32 **Comment.** Section 26850 continues former Fish and Game Code Section 2124 without
33 substantive change.

34 **§ 26855. Prohibited take**

35 26855. (a) Except as otherwise authorized by this code or regulations adopted
36 pursuant to this code, it is unlawful for any person to take any mammal listed in
37 Section 26705.

38 (b) This section does not prohibit the euthanasia of a mammal as appropriately
39 directed by a licensed veterinarian or animal health technician.

1 **Comment.** Section 26855 continues former Fish and Game Code Section 2126 without
2 substantive change.

3 **§ 26860. Prohibited release of wild animal**

4 26860. No person having possession or control over any wild animal under this
5 part shall intentionally free, or knowingly permit the escape, or release of that
6 animal, except in accordance with the regulations of the commission.

7 **Comment.** Section 26860 continues former Fish and Game Code Section 2121 without
8 substantive change.

9 **§ 26865. Elk**

10 26865. (a) Except as provided in this section or Section 1710, it is unlawful to
11 import any elk (genus *Cervus*) into this state.

12 (b) The department may import elk pursuant to Section 1710, if prior to such
13 importation, the department issues written findings justifying the need for and
14 explaining the purpose of the importation.

15 (c) Subdivision (a) shall not apply to zoos certified by the United States
16 Department of Agriculture.

17 (d) No part of any elk horn or antler shall be removed from any live elk for
18 commercial purposes.

19 **Comment.** Subdivisions (a) through (c) of Section 26865 continue former Fish and Game
20 Code Section 2118.2 without substantive change.

21 Subdivision (d) continues former Fish and Game Code Section 2118.3 without substantive
22 change.

23 See also Section 5280 (enforcement).

24 **§ 26870. Elephants**

25 26870. (a) Any person who houses, possesses, manages, or is in direct contact
26 with an elephant shall not do either of the following:

27 (1) Use a bullhook, ankus, baseball bat, axe handle, pitchfork, or other device
28 designed to inflict pain for the purpose of training or controlling the behavior of an
29 elephant.

30 (2) Authorize or allow an employee, agent, or contractor to use a bullhook,
31 ankus, baseball bat, axe handle, pitchfork, or other device designed to inflict pain
32 for the purpose of training or controlling the behavior of an elephant.

33 (b) Use prohibited by subdivision (a) includes brandishing, exhibiting, or
34 displaying the devices in the presence of an elephant.

35 (c) The provisions of this section are in addition to, and not in lieu of, any other
36 laws protecting animal welfare. This section shall not be construed to limit any
37 state law or rules protecting the welfare of animals or to prevent a local governing
38 body from adopting and enforcing its own animal welfare laws and regulations.

39 **Comment.** Section 26870 continues former Fish and Game Code Section 2128(a) & (c)
40 without substantive change.

41 See also Section 5282 (enforcement).

CHAPTER 4. LOCAL ENTITIES

§ 27020. Eligible local entity

27020. (a) The department may reimburse eligible local entities, pursuant to a memorandum of understanding entered into pursuant to this section, for costs incurred by the eligible local entities in the administration and enforcement of any provision concerning the possession of, handling of, care for, or holding facilities provided for, a wild animal listed in or designated pursuant to Sections 26700 through 26730, inclusive.

(b) The department may enter into memorandums of understanding with eligible local entities for the administration and enforcement of any provision concerning the possession of, handling of, care for, or holding facilities provided for, a wild animal listed in or designated pursuant to Sections 26700 through 26730, inclusive.

(c) The commission shall adopt regulations that establish specific criteria an eligible local entity shall meet in order to qualify as an eligible local entity.

(d) For the purposes of this division, “eligible local entity” means a county, local animal control officer, local humane society official, educational institution, or trained private individual that enters into a memorandum of understanding with the department pursuant to this section.

Comment. Section 27020 continues former Fish and Game Code Section 2127 without substantive change.

Note. Subdivisions (a) and (b) of existing Fish and Game Code Section 2127 refer to a wild animal “designated pursuant to” existing Fish and Game Code Section 2118. Several other sections in the chapter in which Sections 2118 and 2127 appear refer to wild animals “enumerated in or designated pursuant to” Section 2118. For consistency, the proposed law would revise all of those references, including the two references in proposed Section 27020(a) and (b), to read “listed in or designated pursuant to” the provisions that would continue Section 2118.

The Commission invites comment on whether this revision would substantively change the intended meaning of existing Section 2127(a) or (b).

TITLE 3. PERMITS

§ 27200. Issuance of permit

27200. (a) The department, in cooperation with the Department of Food and Agriculture, may, upon application, issue a written permit to import into, possess, or transport within this state any wild animal enumerated in, or designated pursuant to, Section 671 of Title 14 of the California Code of Regulations, upon a determination that the animal is not detrimental or that no damage or detriment can be caused to agriculture, native wildlife, the public health or safety, or the welfare of the animal, as a result of the importation, transportation, or possession.

(b) A permit may be issued to any person only upon application and payment of a nonrefundable application fee in an amount determined by the department

1 pursuant to subdivision (a) of Section 27215. Application forms shall be provided
2 by the department and shall be designed to ascertain the applicant's ability to
3 properly care for the wild animal or animals the applicant seeks to import,
4 transport, or possess. Proper care includes providing adequate food, shelter, and
5 veterinary care, and other requirements the commission may designate.

6 **Comment.** Section 27200 continues former Fish and Game Code Section 2150(a) without
7 substantive change.

8 See also Section 5208 (revocation of permit).

9 **§ 27205. Denial of permit**

10 27205. The commission or the department shall deny a permit under Section
11 27200 if it finds that an applicant is unable to meet the requirements for importing,
12 transporting, possessing, or confining any wild animal as established pursuant to
13 Section 26600.

14 **Comment.** Section 27205 continues former Fish and Game Code Section 2150(b), as it related
15 to denial of a permit, without substantive change.

16 **§ 27210. Special entities**

17 27210. (a) A zoo is exempt from any permit requirement pursuant to this title
18 except for animals whose importation, transportation, or possession is determined
19 by the department, in cooperation with the Department of Food and Agriculture, to
20 be detrimental or cause damage to agriculture, native wildlife, or the public health
21 or safety. For purposes of this section, "zoo" means any organization which is
22 accredited as meeting the standards and requirements of the American Zoo and
23 Aquarium Association (AZA). Any California organization which is not
24 accredited by the AZA may apply to the department for a waiver of specified
25 permit requirements of this title. The department may grant or deny the request for
26 a waiver for justified reasons. Foreign zoos outside this state are not subject to the
27 permit requirements of this title beyond those specific permit requirements
28 affecting California zoos or organizations with which they are collaborating. Any
29 organization may appeal the determination of the department to the commission.

30 (b) An exhibitor licensed by the United States Department of Agriculture or a
31 dealer who is so licensed who buys any animal specified in subdivision (a) from a
32 zoo within the state, may sell or transfer it only to a private individual who has a
33 permit issued pursuant to this section prior to the receipt of the animal or to a
34 public or private organization that has a permit issued pursuant to this section prior
35 to the receipt of the animal. The exhibitor or dealer who sells or transfers that
36 animal shall pay a fee pursuant to subdivision (a) of Section 27215 to the
37 department.

38 (c) Any university, college, governmental research agency, or other bona fide
39 scientific institution, as defined in regulations adopted by the commission,
40 engaging in scientific or public health research is exempt from any permit
41 requirement pursuant to this title except for animals whose importation,

1 transportation, or possession is determined by the department, in cooperation with
2 the Department of Food and Agriculture, to be detrimental or cause damage to
3 agriculture, native wildlife, or the public health or safety.

4 (d) Notwithstanding the provisions of this section, every zoo, university, college,
5 governmental research agency, or other bona fide scientific institution shall
6 comply with the requirements of Section 27275 for all animals the zoo, university,
7 college, governmental research agency, or other bona fide scientific institution
8 possesses that are enumerated in, or designated pursuant to, Section 671 of Title
9 14 of the California Code of Regulations.

10 **Comment.** Section 27210 continues former Fish and Game Code Section 2150(c)-(f) without
11 substantive change.

12 **§ 27215. Fees**

13 27215. (a) The department shall establish fees for permits, permit applications,
14 and facility inspections in amounts sufficient to cover the costs of administering,
15 implementing, and enforcing this part.

16 (b) Fees collected pursuant to this part for permits, permit applications, and
17 facility inspections shall be deposited in the Fish and Game Preservation Fund.
18 The department shall annually identify the amount collected for each type of
19 permit, permit application, or inspection for which a fee is collected.

20 **Comment.** Subdivision (a) of Section 27215 continues former Fish and Game Code Section
21 2150.2 without substantive change.

22 Subdivision (b) continues former Fish and Game Code Section 2150.1 without substantive
23 change.

24 **§ 27220. Advisory committee**

25 27220. (a) The director shall appoint a committee to advise the director on the
26 humane care and treatment of wild animals.

27 (b) The committee shall make recommendations to the director for the
28 establishment of standards of performance for administration and enforcement,
29 which shall include, but are not limited to, requiring that the eligible local entity
30 possess a knowledge of humane wild animal training methods.

31 (c) The committee shall make recommendations to the director as to the
32 frequency of inspections necessary for the enforcement and administration of any
33 provision concerning the possession of, handling of, care for, or holding facilities
34 provided for, a wild animal listed in or designated pursuant to Sections 26700
35 through 26730, inclusive.

36 (d) The committee shall advise and assist the director in entering into
37 memorandums of understanding with eligible local entities and in determining
38 whether the memorandums of understanding meet the requirements of this title.

39 **Comment.** Section 27220 continues former Fish and Game Code Section 2150.3 without
40 substantive change.

41 **Note.** Existing Fish and Game Code Section 2150.3(c) (which would be continued by
42 proposed Section 27020(c)) refers to a wild animal “designated pursuant to” existing Fish and

Game Code Section 2118. Several other sections in the chapter in which Sections 2118 and 2150.3 appear refer to wild animals “enumerated in or designated pursuant to” Section 2118. For consistency, the proposed law would revise all of those references, including the reference in proposed Section 27020(c), to read “listed in or designated pursuant to” the provisions that would continue Section 2118.

The Commission invites comment on whether this revision would substantively change the intended meaning of existing Section 2150.3(c).

§ 27225. Inspection of facilities

27225. (a) The department or an eligible local entity shall inspect the wild animal facilities, as determined by the director’s advisory committee, of each person holding a permit issued pursuant to Section 27200 authorizing the possession of a wild animal.

(b) In addition to the inspections specified in subdivision (a), the department or an eligible local entity, pursuant to the regulations of the commission, may inspect the facilities and care provided for the wild animal of any person holding a permit issued pursuant to Section 27200 for the purpose of determining whether the animal is being cared for in accordance with all applicable statutes and regulations. The department shall collect an inspection fee, in an amount determined by the department pursuant to subdivision (a) of Section 27215.

(c) No later than January 1, 2009, the department, in cooperation with the committee created pursuant to Section 27220, shall develop, implement, and enter into memorandums of understanding with eligible local entities if the department elects not to inspect every wild animal facility pursuant to subdivisions (a) and (b). Eligible local entities shall meet the criteria established in regulations adopted pursuant to Section 27265.

Comment. Section 27225 continues former Fish and Game Code Section 2150.4 without substantive change.

§ 27230. Permit for animal acquired prior to 1975

27230. Classes, orders, families, genera, and species which may not be imported, transported, possessed, or released alive in this state solely because of concern for the welfare of the animal may be possessed under permit when the owner can demonstrate that such animal was legally acquired and possessed in California before January 1, 1975. The department may require the owner of an animal which may be possessed under this section to mark or otherwise identify such animal and progeny, so as not to endanger the welfare of that animal, to the satisfaction of the department. The owner shall not transfer such animal or progeny to any other person without prior approval of the department.

Comment. Section 27230 continues former Fish and Game Code Section 2150.5 without substantive change.

1 **§ 27235. Required content of permit application**

2 27235. A permit shall be issued only upon written application from the person
3 desiring to import or transport the species, enumerating all of the following:

4 (a) The approximate number and true scientific name of each species of wild
5 animal for which a permit is requested.

6 (b) The carrier and probable point of first arrival in this state of each shipment of
7 such species.

8 (c) The purpose for which they are to be imported or transported.

9 (d) The name and address of the consignee.

10 (e) The name and address of the consignor.

11 **Comment.** Section 27235 continues former Fish and Game Code Section 2151 without
12 substantive change.

13 **§ 27240. Content of permit**

14 27240. Each permit issued shall set forth all of the following:

15 (a) The number and true scientific name of the species of wild animal for which
16 the permit is granted.

17 (b) A statement of the manner and conditions under which the entry of such
18 species is permitted.

19 (c) A statement of the conditions under which the species shall be kept after
20 importation or during transportation.

21 **Comment.** Section 27240 continues former Fish and Game Code Section 2152 without
22 substantive change.

23 **§ 27245. Distribution of copies of permit**

24 27245. Whenever any permit is issued under the provisions of this title, one
25 copy shall be sent by the department to the State Department of Food and
26 Agriculture, one copy to the county agricultural commissioner or to the state plant
27 quarantine officer having jurisdiction at the place designated in the application as
28 the probable point of first arrival in the state of such species, and one copy shall
29 accompany each shipment of wild animals involved.

30 **Comment.** Section 27245 continues former Fish and Game Code Section 2153 without
31 substantive change.

32 **§ 27250. Progeny of imported or possessed animals**

33 27250. The provisions of this part and regulations adopted pursuant to this part
34 shall apply to the progeny of any wild animal imported or possessed under those
35 laws and regulations, except that no permit shall be required for the possession of
36 progeny if a permit has already been obtained by the owner for the parent animal,
37 and the progeny are kept at the same site.

38 **Comment.** Section 27250 continues former Fish and Game Code Section 2155 without
39 substantive change.

1 **§ 27255. Local ordinances**

2 27255. Neither the provisions of this part nor the regulations of the commission
3 shall prevent any city or county from enacting ordinances relating to the
4 possession or care of wild animals, provided those ordinances are more restrictive.

5 **Comment.** Section 27255 continues former Fish and Game Code Section 2156 without
6 substantive change.

7 **§ 27260. Required reporting of health and safety risk**

8 27260. Every person holding a permit issued pursuant to Section 27200 shall
9 uniquely identify each wild mammal that poses a risk to the health and safety of
10 the public and report this identification to the department to maintain in a registry.

11 **Comment.** Section 27260 continues former Fish and Game Code Section 2157(a) without
12 substantive change.

13 **§ 27265. Commission regulations relating to identification of health and safety risk**

14 27265. The commission shall adopt regulations that address the following:

15 (a) Identify the mammals that pose a risk to the health and safety of the public
16 and are subject to Section 27260. This identification shall include the following
17 species of mammals:

18 (1) Wild cats.

19 (2) Elephants.

20 (3) Nonhuman primates.

21 (4) Bears.

22 (5) Wolves.

23 (b) Acceptable forms of identification.

24 (c) How and when a permittee must notify the department of the unique
25 identifier required by Section 27260.

26 (d) These regulations shall be developed and adopted by the commission, on or
27 before January 1, 2007.

28 **Comment.** Section 27265 continues former Fish and Game Code Section 2157(b) and (d)
29 without substantive change.

30 **§ 27270. Department to establish registry**

31 27270. The department shall establish a registry listing the permit number, type,
32 expiration date, name and address of the permittee, and an inventory of each
33 mammal covered by the permit and the identification assigned or affixed to that
34 mammal pursuant to Section 27260.

35 **Comment.** Section 27270 continues former Fish and Game Code Section 2157(c) without
36 substantive change.

37 **§ 27275. Required reporting of escape or release**

38 27275. (a) Every person who holds a permit issued pursuant to Section 27200
39 shall immediately report by telephone the intentional or unintentional escape or
40 release of any wild animal covered by the permit, to the department and the

1 nearest enforcing officer of the city or county in which the wild animal was
2 released or escaped.

3 (b) The permitholder shall be liable for all expenses associated with efforts to
4 recapture the wild animal.

5 (c) For the purposes of this section, the exhibition of a wild animal on a movie
6 set, film set, television set, still photography set, or any other professional activity
7 allowable under a permit issued pursuant to Section 27200, does not constitute an
8 intentional or unintentional escape or release of the wild animal unless the person
9 exhibiting the wild animal has lost control of the wild animal.

10 **Comment.** Section 27275 continues former Fish and Game Code Section 2193(a) without
11 substantive change.

12 **§ 27280. Commission regulations relating to taking possession of permitted animal**

13 27280. (a) The commission shall promulgate regulations establishing the criteria
14 for permitholders to notify the department prior to taking possession of or
15 transferring an animal and upon the death of an animal.

16 (b) These regulations shall be developed and adopted by the commission on or
17 before January 1, 2007.

18 **Comment.** Section 27280 continues former Fish and Game Code Section 2193(b)-(c) without
19 substantive change.

20 **TITLE 4. INSPECTION OF ARRIVING ANIMAL**

21 **§ 27400. Special definition of “enforcing officer”**

22 27400. Notwithstanding Section 26505, for the purposes of this title, “enforcing
23 officer” means the enforcement personnel of the department, the state plant
24 quarantine officers, and county agricultural commissioners.

25 **Comment.** Section 27400 continues former Fish and Game Code Sections 2185(b), 2186(b),
26 and 2187(b) without substantive change.

27 **§ 27405. Notification of law enforcement of arriving wild animal**

28 27405. Any person who transports, receives, or imports into the state, or
29 transports within the state, any live wild animal listed in or designated pursuant to
30 Section 26700 through 26730, inclusive, shall hold that animal in confinement for
31 inspection, and immediately notify the nearest enforcing officer of the arrival of
32 that animal. If there is found in any shipment any animal of a species not specified
33 in the permit issued under this part, or more than the number of animals of any
34 species specified, those animals shall be disposed of as provided in subdivision (b)
35 of Section 27505.

36 **Comment.** Section 27405 continues former Fish and Game Code Section 2185(a) without
37 substantive change.

38 **Note.** The second sentence of existing Fish and Game Code Section 2185(a) (which would be
39 continued by proposed Section 27405) provides that if an enforcing officer finds in any shipment

of wild animals transported into this state any animal of a species not specified in a permit issued under this part, or more than the number of animals of any species specified, those animals shall be “refused admittance as provided in Section 2188 of this part.” However, former Fish and Game Code Section 2188 was repealed by 1989 Cal. Stat. ch. 431, a bill that also added to existing law Fish and Game Code Section 2189 (which would be continued by proposed Sections 27500, 27505, and 27510).

Proposed Section 27405 would revise the quoted language above to instead refer to and reflect the language of the section of the proposed law that would continue existing Fish and Game Code Section 2189(c), which refers to the “disposition” of a live nonnative wild animal that is possessed or transported within this state in violation of the chapter of existing law containing Section 2189, and which also contained Section 2188.

The Commission invites comment on the appropriateness of this revision.

§ 27410. Discovery of disease during inspection

27410. If during inspection upon arrival any wild animal is found to be diseased, or there is reason to suspect the presence of disease, or there is reason to suspect the presence of disease that is or may be detrimental to agriculture, to native wildlife, or to the public health or safety, the diseased animal, and if necessary, the entire shipment shall be destroyed by, or under the supervision of, the enforcing officer, unless no detriment can be caused by its detention in quarantine for a time and under conditions satisfactory to the enforcing officer for disinfection, treatment, or diagnosis, or no detriment can be caused by its return to its point of origin at the option and expense of the owner or possessor.

Comment. Section 27410 continues former Fish and Game Code Section 2186(a) without substantive change.

§ 27415. Periodic subsequent examination of animal

27415. (a) Whenever any wild animal is brought into this state under permit, as provided in this part, the enforcing officers may, from time to time, examine the conditions under which that species is kept, and report to the department any suspicion or knowledge of any disease or violations of the conditions of the permit or of the regulations promulgated under this part.

(b) The enforcing officer may order the transfer of the animal to new owners or the correction of the conditions under which the species is being kept if not in conformance with the terms of the permit, at the expense of the owner or possessor. If neither transfer or improvement of conditions is accomplished, the officer may order destruction of the animal.

Comment. Section 27415 continues former Fish and Game Code Section 2187(a) without substantive change.

TITLE 5. NONNATIVE WILD ANIMALS

§ 27500. “Nonnative wild animal”

27500. (a) As used in this title, “nonnative wild animal” means any nonnative animal species, or hybrid thereof, that is not normally domesticated pursuant to

1 this code or regulations adopted pursuant to this code, and that is not designated as
2 a furbearing, game, nongame, threatened, or endangered animal.

3 **Comment.** Section 27500 continues former Fish and Game Code Section 2189(a) without
4 substantive change.

5 **§ 27505. Prohibitions**

6 27505. (a) No person shall import into this state any live nonnative wild animal
7 except pursuant to this part, or regulations adopted pursuant to this part.

8 (b) Any live nonnative wild animal that is possessed or transported within this
9 state in violation of this part or regulations adopted pursuant to this part shall be
10 disposed of in accordance with regulations adopted pursuant to Section 26610, at
11 the expense of the owner or possessor. The owner or possessor shall pay the costs
12 associated with the seizure, care, holding, transfer, and destruction of the animal.

13 **Comment.** Section 27505 continues former Fish and Game Code Section 2189(b)-(c) without
14 substantive change.

15 **§ 27510. Animals found at large**

16 27510. (a) Any live, nonnative wild animal found at large within this state shall
17 be either summarily destroyed or, if captured, shall be confined for not less than
18 72 hours following notification of the local humane society. Any local, state, or
19 federal governmental agency that has public safety responsibilities is authorized to
20 implement this subdivision.

21 (b) If, during the 72-hour holding period, any person claims ownership of the
22 animal, that person shall only be allowed to dispose of the animal pursuant to
23 subdivision (c).

24 (c) After the 72-hour holding period, if the animal is unclaimed, it shall be
25 disposed of in accordance with regulations adopted pursuant to Section 26610,
26 unless the animal is listed as a threatened or endangered species by either state or
27 federal regulation. Notwithstanding subdivision (c), if the animal is listed as a
28 threatened or endangered species in either state or federal regulation, the
29 department shall be notified of the animal's location and the department shall be
30 responsible for proper disposition.

31 **Comment.** Section 27510 continues former Fish and Game Code Section 2189(d)-(f) without
32 substantive change.

33 **TITLE 6. MAMMALS USED FOR HIRE**

34 **§ 27600. "Mammal"**

35 27600. For purposes of this title, "mammal" means any wild animal of the class
36 Mammalia as specified in Section 26705 or as specified in a regulation adopted
37 pursuant to Title 2, which affects commerce.

38 **Comment.** Section 27600 continues former Fish and Game Code Section 2200 without
39 substantive change.

1 **§ 27605. Animal Trust Fund**

2 27605. The Animal Trust Fund is hereby established in the State Treasury. Upon
3 appropriation by the Legislature, the money in the fund is available to the
4 department for the administration of this title and to make grants pursuant to
5 Section 27615. The department may use not more than 5 percent of the money in
6 the fund for the costs of administering this title.

7 **Comment.** Section 27605 continues former Fish and Game Code Section 2201 without
8 substantive change.

9 **§ 27610. Grants and donations**

10 27610. The department may seek grants and accept donations from private and
11 public organizations and agencies for the purposes of this chapter for deposit in
12 the Animal Trust Fund.

13 **Comment.** Section 27610 continues former Fish and Game Code Section 2202 without
14 substantive change.

15 **§ 27615. Regulations relating to grant program**

16 27615. (a) The director, with the advice of the committee established pursuant to
17 Section 27220, shall adopt regulations to establish and administer a grant program,
18 including eligibility criteria, by which persons or governmental agencies who
19 operate facilities to care and shelter mammals may apply for grants for
20 maintenance, operations, and capital improvements. The program shall include
21 provisions for emergency grants with an expedited review process.

22 (b) Each member of the committee who is eligible to receive per diem and
23 mileage shall be allowed per diem and mileage in accordance with the rules of the
24 Department of Human Resources for attending any meeting of the committee
25 involving this title.

26 **Comment.** Section 27615 continues former Fish and Game Code Section 2203 without
27 substantive change.

28 **TITLE 7. MISCELLANEOUS PROVISIONS**

29 **§ 27700. Prohibited release of wild animal**

30 27700. It is unlawful for any person who keeps in confinement, with or without
31 a permit, any wild animal of a species listed in or designated pursuant to Sections
32 26700 through 26730, inclusive, to liberate, ship, or transport the animal except in
33 accordance with the conditions of a permit first obtained from the department.

34 **Comment.** Section 27700 continues former Fish and Game Code Section 2190 without
35 substantive change.

36 **§ 27705. Civil action to recover costs**

37 27705. When a wild animal enumerated in or designated pursuant to Section 671
38 of Title 14 of the California Code of Regulations is properly confiscated by the

department, the new custodian with whom the animal is placed by the department may bring a civil action to recover the reasonable costs incurred by the custodian for any necessary relocation of the animal to a new facility, any actual and necessary costs to construct new caging to house the animal, and any actual and necessary costs to return the animal to a healthy state, to the extent that the department or new custodian has not already collected the costs pursuant to Section 27015. The prior owner or possessor from whom the animal was confiscated shall be liable for these costs only if the conditions that led to the animal's confiscation were the result of acts or omissions of the prior owner or possessor.

Comment. Section 27705 continues former Fish and Game Code Section 2195 without substantive change.

§ 27710. Regulations relating to caging standards

27710. Notwithstanding Part 2.5 (commencing with Section 18900) of Division 13 of the Health and Safety Code, Section 11356 of the Government Code, or any other provision of law, regulations of the commission relating to the construction, fixtures, and other minimum caging standards adopted by the commission for the confinement of live wild animals pursuant to this part are not building standards subject to the approval of the State Building Standards Commission.

Comment. Section 27710 continues former Fish and Game Code Section 2192 without substantive change.

**PART 7. IMPORTATION AND TRANSPORTATION OF LIVE PLANTS
AND ANIMALS**

TITLE 1. BIRDS

§ 28000. Prohibition against transport of specified live birds

28000. Except as otherwise provided, it is unlawful for any common carrier to transport any live protected nongame bird or any live resident or migratory game bird for which there is no open season.

Comment. Section 28000 continues former Fish and Game Code Section 2225 without substantive change.

TITLE 2. AQUATIC PLANTS AND ANIMALS

§ 28100. Potentially diseased plants or animals

28100. It is unlawful for any person to receive, bring, or cause to be brought into this state, for the purpose of propagation, any fish, reptile, amphibian, or aquatic plant from any place wherein any infected, diseased, or parasitized fish, reptile, amphibian, or aquatic plants are known to exist.

1 **Comment.** Section 28100 continues former Fish and Game Code Section 2270 without
2 substantive change.

3 See also Section 5262 (enforcement).

4 **§ 28105. Aquaculture exception**

5 28105. Section 28100 does not apply to the importation of live aquatic plants or
6 animals for aquaculture purposes by a registered aquaculturist if the importation
7 has been approved by the department pursuant to Sections 24705 and 24710.

8 **Comment.** Section 28105 continues former Fish and Game Code Section 2270.5 without
9 substantive change.

10 **§ 28110. Approval from department required for importation**

11 28110. (a) No live aquatic plant or animal may be imported into this state
12 without the prior written approval of the department pursuant to regulations
13 adopted by the commission.

14 (b) A written application for the importation, submitted in conformance with the
15 procedural requirements established by the commission, is deemed approved
16 where it has not been denied within 60 days.

17 (c) This section does not apply to the following plants or animals unless the
18 plants or animals are or may be placed in waters of the state:

19 (1) Mollusks.

20 (2) Crustaceans.

21 (3) Ornamental marine or freshwater plants and animals that are not utilized for
22 human consumption or bait purposes and are maintained in closed systems for
23 personal, pet industry, or hobby purposes.

24 (d) The section does not apply to any live aquatic plant or animal imported by a
25 registered aquaculturist.

26 **Comment.** Section 28110 continues former Fish and Game Code Section 2271 without
27 substantive change.

28 See also Section 5264 (enforcement).

29 **§ 28115. Packaging**

30 28115. Each package containing any live aquatic plant or animal shall bear, in a
31 conspicuous place, a tag on which shall be stated the name and address of the
32 consignor, the name and address of the consignee, and the exact contents of the
33 package.

34 **Comment.** Section 28115 continues former Fish and Game Code Section 2272 without
35 substantive change.

PART 8. AQUATIC INVASIVE SPECIES

TITLE 1. GENERAL PROVISIONS [RESERVED]

TITLE 2. CAULERPA ALGAE

§ 28250. Prohibition

28250. (a) No person shall sell, possess, import, transport, transfer, release alive in the state, or give away without consideration the salt water algae of the *Caulerpa* species: *taxifolia*, *cupressoides*, *mexicana*, *sertularioides*, *floridana*, *ashmeadii*, *racemosa*, *verticillata*, and *scapelliformis*.

(b) Notwithstanding subdivision (a), a person may possess, for bona fide scientific research, as determined by the department, upon authorization by the department, the salt water algae of the *Caulerpa* species: *taxifolia*, *cupressoides*, *mexicana*, *sertularioides*, *floridana*, *ashmeadii*, *racemosa*, *verticillata*, and *scapelliformis*.

Comment. Section 28250 continues former Fish and Game Code Section 2300(a)-(b) without substantive change.

See also Section 5266 (enforcement).

PART 9. IMPORTATION AND TRANSPORTATION OF DEAD ANIMALS

TITLE 1. DEAD WILD ANIMALS

§ 28400. Application of title

28400. (a) This title applies to all dead wild birds, mammals, fish, reptiles, and amphibians. This chapter also applies to live mollusks and crustaceans that are transported for purposes other than placement in the waters of this state.

(b) This chapter does not apply to animals imported for purposes of aquaculture under Part 1 (commencing with Section 23300).

Comment. Section 28400 continues former Fish and Game Code Section 2345 without substantive change.

§ 28405. Transportation of more than bag limit

28405. (a) It is unlawful for a common carrier or his or her agent to transport for, or to receive for transportation from, any one person, during any interval of time, more than the bag limit of birds, mammals, fish, reptiles, or amphibians that may legally be taken and possessed by that person during that interval.

(b) It is unlawful for any person to offer for transportation by common carrier during any interval of time more than the bag limit of birds, mammals, fish,

1 reptiles, or amphibians that may legally be taken and possessed by that person
2 during that interval.

3 **Comment.** Subdivision (a) of Section 28405 continues former Fish and Game Code Section
4 2346 without substantive change.

5 Subdivision (b) continues former Fish and Game Code Section 2347 without substantive
6 change.

7 **§ 28410. Marking on packaging containing animal**

8 28410. (a) The outside of a package offered to or received by a common carrier
9 or the carrier's agent for transportation, or transported by a common carrier or
10 agent, that contains a bird, mammal, fish, reptile, or amphibian, shall clearly and
11 conspicuously indicate the following:

12 (1) The name and address of the shipper.

13 (2) The name and address of the consignee.

14 (3) The number and kind of bird, mammal, fish, reptile, and amphibian
15 contained in the package.

16 (b) Licensed commercial fishermen and licensed commercial fish dealers are
17 subject to all of the provisions of this section, except that commercial shipments of
18 fish may be indicated by total net weight of each species instead of by numbers.

19 **Comment.** Section 28410 continues former Fish and Game Code Section 2348 without
20 substantive change.

21 **§ 28415. Parcel post generally prohibited**

22 28415. No bird, mammal, fish, reptile, or amphibian, except smoked, cured, or
23 dried fish other than trout, may be shipped by parcel post.

24 **Comment.** Section 28415 continues former Fish and Game Code Section 2349 without
25 substantive change.

26 **§ 28420. Transport of specified birds**

27 28420. Except as permitted by this code, it is unlawful for any common carrier
28 to transport any protected nongame bird, or to transport any resident or migratory
29 game bird for which there is no open season.

30 **Comment.** Section 28420 continues former Fish and Game Code Section 2352 without
31 substantive change.

32 **§ 28425. Requirements for importation or possession**

33 28425. (a) Birds, mammals, fish, reptiles, or amphibians shall not be imported or
34 possessed in this state unless all of the following requirements are met:

35 (1) The animals were legally taken and legally possessed outside of this state.

36 (2) This code and regulations adopted pursuant thereto do not expressly prohibit
37 their possession in this state.

38 (3) A declaration is submitted to the department or a designated state or federal
39 agency at or immediately before the time of entry, in the form and manner
40 prescribed by the department.

(b) Birds, mammals, fish, reptiles, or amphibians legally taken and legally possessed outside of this state may be imported into this state and possessed without a declaration if the shipment is handled by a common carrier under a bill of lading or as supplies carried into this state by common carriers for use as food for the passengers.

(c) The commission and the department shall not modify this section by any regulation that would prohibit the importation of lawfully killed migratory game birds taken in any other state or country and transported into this state pursuant to the migratory bird regulations adopted annually by the Secretary of the Interior.

Comment. Section 28425 continues former Fish and Game Code Section 2353 without substantive change.

TITLE 2. DEAD DOMESTICATED BIRDS AND MAMMALS

§ 28500. Transport by common carrier

28500. (a) A common carrier may transport the carcass of a dead domesticated game bird or mammal tagged with a domesticated game breeder's tag as provided in Title 1 (commencing with Section 26000) of Part 4.

(b) A tag or label shall be affixed to every package containing a carcass transported pursuant to subdivision (a), which shall state all of the following:

(1) The name of the person to whom the game breeder's license was issued.

(2) The name of the person who killed the game bird or mammal.

(3) The name of the person to whom the game bird or mammal is consigned.

(4) The name of the person who tagged the game bird or mammal.

(5) The number of carcasses or parts of carcasses contained in the package.

(6) That the game birds or mammals were killed and tagged in accordance with the provisions of Title 1 (commencing with Section 26000) of Part 4.

Comment. Section 28500 continues former Fish and Game Code Section 2400 without substantive change.

§ 28505. Domesticated game birds raised outside state

28505. (a) Notwithstanding the provisions of Section 26035, the carcasses or parts of domesticated game birds that have been raised outside of this state may be imported into this state, and transported, sold, or possessed in this state.

(b) A common carrier may receive and transport carcasses or parts of game birds described in subdivision (a) at any time. A label shall be affixed to every package containing those carcasses or parts with the following plainly written or printed on the label:

(1) The names and addresses of the consignor and consignee.

(2) The number and kinds of carcasses or parts.

(3) A statement that the contents are carcasses or parts of domesticated game birds raised outside this State.

1 **Comment.** Section 28505 continues former Fish and Game Code Section 2401 without
2 substantive change.

3 References to “parts” of domesticated game birds in this section is superfluous. See Section 95
4 (reference to animal generally includes part of animal). Those references are retained solely for
5 clarity, and are not intended to affect the meaning of any other provision of this code that includes
6 or omits a reference to a “part” of an animal.

7 PART 10. PROHIBITED SALE AND POSSESSION FOR SALE

8 TITLE 1. POSSESSION IN EATING 9 ESTABLISHMENT

10 § 28600. Prohibition

11 28600. (a) Except as otherwise provided in this section, it is unlawful to possess
12 a bird, mammal, fish, amphibian, or reptile, that may not be legally sold, in a
13 restaurant or other eating establishment.

14 (b) This section does not apply to any of the following:

15 (1) A person who lawfully took or otherwise legally possessed the bird,
16 mammal, fish, or amphibian.

17 (2) A person preparing the bird, mammal, fish, amphibian, or reptile for
18 consumption by the person who lawfully took or possessed it, or by that person
19 and others, if the person who took or possessed it is present on the premises.

20 (3) A bird, mammal, fish, amphibian, or reptile tagged with a signed statement
21 of the person who took the bird, mammal, fish, amphibian, or reptile, stating that
22 person’s name and address, the date taken, and the total number and kind taken.

23 **Comment.** Section 28600 continues former Fish and Game Code Section 2015 without
24 substantive change.

25 TITLE 2. IVORY AND RHINOCEROS HORNS

26 § 28650. Definitions

27 28650. For the purposes of this part, the following terms have the following
28 meanings:

29 (a) “Bona fide educational or scientific institution” means an institution that
30 establishes through documentation either of the following:

31 (1) Educational or scientific tax exemption, from the federal Internal Revenue
32 Service or the institution’s national, state, or local tax authority.

33 (2) Accreditation as an educational or scientific institution, from a qualified
34 national, regional, state, or local authority for the institution’s location.

35 (b) “Ivory” means a tooth or tusk from a species of elephant, hippopotamus,
36 mammoth, mastodon, walrus, warthog, whale, or narwhal, or a piece thereof,
37 whether raw ivory or worked ivory, and includes a product containing, or
38 advertised as containing, ivory.

1 (c) “Rhinoceros horn” means the horn, or a piece thereof, or a derivative such as
2 powder, of a species of rhinoceros, and includes a product containing, or
3 advertised as containing, a rhinoceros horn.

4 (d) “Sale” or “sell” means selling, trading, bartering for monetary or
5 nonmonetary consideration, giving away in conjunction with a commercial
6 transaction, or giving away at a location where a commercial transaction occurred
7 at least once during the same or the previous calendar year.

8 (e) “Total value” means either the fair market value or the actual price paid for
9 ivory or rhinoceros horn, whichever is greater.

10 **Comment.** Section 28650 continues former Fish and Game Code Section 2022(a) without
11 substantive change.

12 **§ 28655. Prohibition**

13 28655. (a) Except as provided in subdivision (b), it is unlawful to purchase, sell,
14 offer for sale, possess with intent to sell, or import with intent to sell ivory or
15 rhinoceros horn.

16 (b) The prohibitions set forth in subdivision (a) do not apply to any of the
17 following:

18 (1) An employee or agent of the federal or state government undertaking a law
19 enforcement activity pursuant to federal or state law, or a mandatory duty required
20 by federal law.

21 (2) An activity that is authorized by an exemption or permit under federal law or
22 that is otherwise expressly authorized under federal law.

23 (3) Ivory or rhinoceros horn that is part of a musical instrument, including, but
24 not limited to, a string or wind instrument or piano, and that is less than 20 percent
25 by volume of the instrument, if the owner or seller provides historical
26 documentation demonstrating provenance and showing the item was manufactured
27 no later than 1975.

28 (4) Ivory or rhinoceros horn that is part of a bona fide antique and that is less
29 than five percent by volume of the antique, if the antique status is established by
30 the owner or seller of the antique with historical documentation demonstrating
31 provenance and showing the antique to be not less than 100 years old.

32 (5) The purchase, sale, offer for sale, possession with intent to sell, or
33 importation with intent to sell ivory or rhinoceros horn for educational or scientific
34 purposes by a bona fide educational or scientific institution if both of the
35 following criteria are satisfied:

36 (A) The purchase, sale, offer for sale, possession with intent to sell, or import
37 with intent to sell the ivory or rhinoceros horn is not prohibited by federal law.

38 (B) The ivory or rhinoceros horn was legally acquired before January 1, 1991,
39 and was not subsequently transferred from one person to another for financial gain
40 or profit after July 1, 2016.

41 **Comment.** Section 28655 continues former Fish and Game Code Section 2022(b) and (c)
42 without substantive change.

1 See also Sections 5300-5308 (enforcement).

2 **§ 28660. Prima facie evidence**

3 28660. Possession of ivory or rhinoceros horn in a retail or wholesale outlet
4 commonly used for the buying or selling of similar items is prima facie evidence
5 of possession with intent to sell. This evidence does not preclude a finding of
6 intent to sell based on any other evidence that may serve to establish that intent
7 independently or in conjunction with this evidence.

8 **Comment.** Section 28660 continues former Fish and Game Code Section 2022(d) without
9 substantive change.

10 **TITLE 3. SALE OR PURCHASE OF BIRD OR**
11 **MAMMAL FOUND IN WILD**

12 **§ 28750. Prohibition**

13 28750. (a) Except as otherwise provided in this section, Section 10830, Section
14 34410, another provision of this code, or a regulation adopted pursuant to this
15 code, it is unlawful to sell or purchase a bird or mammal found in the wild in
16 California.

17 (b) Products or handicraft items made from furbearing mammals and nongame
18 mammals lawfully taken under the authority of a trapping license may be
19 purchased or sold at any time.

20 (c) Shed antlers, or antlers taken from domestically reared animals that have
21 been manufactured into products or handicraft items, or that have been cut into
22 blocks or units that are to be handcrafted or manufactured into those articles, may
23 be purchased or sold at any time. However, complete antlers, whole heads with
24 antlers, antlers that are mounted for display, or antlers in velvet, may not be sold
25 or purchased at any time, except as authorized by Section 10830.

26 (d) Notwithstanding Section 28910, inedible parts of domestically raised game
27 birds may be sold or purchased at any time.

28 (e) A person who illegally takes a bird or mammal for profit or for personal gain
29 by engaging in an activity authorized by this section is subject to civil liability
30 pursuant to Section 4482.

31 **Comment.** Section 28750 continues former Fish and Game Code Section 3039 without
32 substantive change.

DIVISION 8. BIRDS

PART 1. GENERAL PROVISIONS

§ 28900. Governance by other provisions

28900. Animals governed by this division are also governed by other provisions of this code, including but not limited to Divisions 6 (commencing with Section 8000) and 7 (commencing with Section 23300).

Comment. Section 28900 is new. It is added for drafting convenience.

§ 28905. Bird nest or eggs

28905. It is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as provided by this code or any regulation adopted pursuant to this code.

Comment. Section 28905 continues former Fish and Game Code Section 3503 without substantive change.

See also Section 5310 (enforcement).

§ 28910. Sale or purchase of game or nongame bird

28910. Subject to the provisions of this code permitting the sale of domestically raised game birds, it is unlawful to sell or purchase a game bird or nongame bird.

Comment. Section 28910 continues former Fish and Game Code Section 3504 without substantive change.

§ 28915. Control of birds unduly preying on other animals

28915. The department may take any individual bird, or birds of any species, that, in its opinion, are unduly preying upon any species of bird, mammal, reptile, amphibian, or fish.

Comment. Section 28915 continues former Fish and Game Code Section 3803 without substantive change.

PART 2. DISEASE CONTROL

TITLE 1. GENERAL PROVISIONS [RESERVED]

TITLE 2. AVIAN INFLUENZA WILDLIFE
SURVEILLANCE ACT

§ 29050. Name of act

29050. This title shall be known, and may be cited, as the Avian Influenza Wildlife Surveillance Act.

1 **Comment.** Section 29050 continues former Fish and Game Code Section 3860 without
2 substantive change.

3 **§ 29055. Findings and declarations**

4 29055. The Legislature finds and declares all of the following:

5 (a) Avian influenza and other emerging diseases of wildlife are a serious threat
6 to the people of California.

7 (b) California is home to large populations of migratory birds and other wildlife
8 species.

9 (c) California is a central part of the Pacific Flyway, and a seasonal home to
10 species of birds that migrate to and from Asia, Central America, South America,
11 and other regions.

12 (d) Surveillance of wild birds and animals across the state is a key element
13 among efforts to prevent avian influenza and other emerging wildlife diseases
14 from harming the people and the natural resources of the state.

15 (e) In the interest of public health, the state shall support a surveillance program
16 for avian influenza in wild bird and animal populations.

17 **Comment.** Section 29055 continues former Fish and Game Code Section 3861 without
18 substantive change.

19 **§ 29060. Consultation among agencies to develop plan**

20 29060. The Natural Resources Agency, in consultation with the department, the
21 Department of Food and Agriculture, the State Department of Public Health, the
22 Office of Emergency Services, and the University of California, shall develop and
23 implement a plan for the surveillance, monitoring, sampling, diagnostic testing,
24 and reporting of avian influenza in wild birds and animals in the state. The Natural
25 Resources Agency shall consult with the United States Fish and Wildlife Service
26 and the United States Department of Food and Agriculture in developing the plan.

27 **Comment.** Section 29060 continues former Fish and Game Code Section 3862 without
28 substantive change.

29 **§ 29065. Avian Influenza Working Group**

30 29065. (a) The Secretary of the Natural Resources Agency shall formally
31 establish the Avian Influenza Working Group to assist in the development of the
32 plan described in Section 29060. The Avian Influenza Working Group shall
33 utilize, as guidance for early detection, the national protocol that has been
34 developed to guide states in developing state-specific plans, known as the Early
35 Detection System for Asian H5N1 Highly Pathogenic Avian Influenza in Wild
36 Migratory Birds. The Avian Influenza Working Group shall also continue,
37 enhance, and facilitate the work already begun by the department, other state
38 departments, and the University of California, to coordinate communication of
39 information and response plans for highly pathogenic avian influenza in wild
40 birds.

(b) The Avian Influenza Working Group shall be composed of all of the following members:

(1) The Secretary of the Natural Resources Agency, or a designee.

(2) The director, or a designee.

(3) The Secretary of Food and Agriculture, or a designee.

(4) The State Public Health Officer, or a designee.

(5) The Director of Emergency Services, or a designee.

(6) One representative appointed by the Regents of the University of California.

(7) Two representatives from a qualified research organization or other qualified nongovernmental organization appointed by the Secretary of the Natural Resources Agency.

(c) The director shall chair the Avian Influenza Working Group.

(d) A majority of the Avian Influenza Working Group shall constitute a quorum for the transaction of business.

(e) The duties of the Avian Influenza Working Group shall include all of the following:

(1) Developing strategies for the detection of, and response to, the avian influenza virus in wild birds in California.

(2) Fostering communication among state and federal agencies regarding the avian influenza surveillance program.

(3) Developing strategies for public outreach and education.

(f) The Avian Influenza Working Group may consult with other public and nonprofit groups potentially affected by avian influenza in wild birds.

Comment. Section 29065 continues former Fish and Game Code Section 3863 without substantive change.

PART 3. CLASSES OF BIRDS

TITLE 1. MIGRATORY BIRDS

§ 29200. Taking

29200. Migratory game birds may be taken in conformity with federal laws and regulations and the regulations of the commission adopted pursuant to this title.

Comment. Section 29200 restates the first paragraph of former Fish and Game Code Section 356 without substantive change.

Note. Proposed Section 29200 is intended to restate the first paragraph of existing Section 356, to clarify its meaning without changing its substantive effect. The existing provision reads as follows:

Migratory game birds may be taken in conformity with the federal laws and regulations and the regulations of the commission as provided in Section 355.

The cross-reference to regulations of the Commission “as provided in Section 355” has been updated to refer to Commission regulations adopted pursuant to the title in which Section 355

appears. This would include regulations adopted pursuant to the second paragraph of existing Section 356 (proposed Section 29215), which also governs the take of migratory game birds.

The Commission invites comment on whether this revision is appropriate.

§ 29205. License to permit feeding

29205. (a) In order to aid in relieving widespread waterfowl depredation of agricultural crops, the department may issue licenses under regulations which the commission may adopt to permit the feeding of migratory game birds.

(b) The commission may prescribe an annual fee for the license.

Comment. Section 29205 continues former Fish and Game Code Section 3806 without substantive change.

§ 29210. Commission regulations relating to Migratory Bird Treaty Act

29210. (a) The commission may annually adopt regulations pertaining to migratory birds to conform with or to further restrict the rules and regulations prescribed pursuant to the Migratory Bird Treaty Act.

(b) Regulations adopted pursuant to this section are not subject to Sections 11343.4, 11346.1, 11346.4, and 11346.8 of the Government Code.

Comment. Section 29210 continues the first and second paragraphs of former Fish and Game Code Section 355 without substantive change.

§ 29215. Commission regulation in the absence of federal regulation

29215. In the event no regulations are prescribed by the proper federal agency, the commission may determine and fix the area or areas, the seasons and hours, the species, the bag and possession limits, and the total number that may be taken during any open season for the taking of migratory game birds, under such rules and regulations as the commission may adopt. Such rules and regulations as the Commission may adopt shall have the same effect as if enacted by the Legislature.

Comment. Section 29215 continues the second paragraph of former Fish and Game Code Section 356 without substantive change.

Notes. (1) The meaning of “such rules and regulations” in the last sentence of this section is unclear. Does it include only those regulations adopted pursuant to existing Section 356? Or does it also include regulations adopted pursuant to existing Section 355?

The Commission invites comment on the issue.

(2) Once the meaning of “such rules and regulations” is clarified, the reference to “rules” will be deleted as redundant. The Commission sees no authority for it to adopt “rules” that are not “regulations.” See also Gov’t Code § 11340.5 (barring “rules” that are not properly promulgated regulations). The Commission will also delete the word “such” and replace it with suitable alternatives.

(3) The intended effect of the last sentence of existing Section 356 is also unclear. Is the provision intended to delegate lawmaking power to the Fish and Game Commission, pursuant to Article 4, Section 20 of the California Constitution? That provision states that “The Legislature may delegate to the commission such powers relating to the protection and propagation of fish and game as the Legislature sees fit.” Given the unusual nature of this provision in Section 356, and its possible validation by the California Constitution, the Commission is reluctant to disturb the statutory language (except perhaps to clarify its scope).

1 **Nonetheless, comment on the meaning and effect of the provision would be helpful.**

2 **§ 29220. Effective date of regulation**

3 29220. Every regulation of the commission adopted pursuant to this title shall
4 become effective upon filing unless otherwise specified in the regulation.

5 **Comment.** Section 29220 continues the third paragraph of former Fish and Game Code
6 Section 355 without substantive change.

7  **Note.** The requirement that every regulation of the Commission adopted pursuant to the
8 article containing existing Section 355 be filed with the Secretary of State is deleted as
9 superfluous. See existing Government Code Section 11343.

10 **§ 29225. President as ex officio member of Migratory Bird Conservation Commission**

11 29225. The president of the commission may be a member ex officio of the
12 Migratory Bird Conservation Commission created by the act of Congress known
13 as the “Migratory Bird Conservation Act.”

14 **Comment.** Section 29225 continues former Fish and Game Code Section 357 without
15 substantive change.

16 **TITLE 2. GAME BIRDS**

17 **CHAPTER 1. GENERAL PROVISIONS**

18 **§ 29350. Use of mammal**

19 29350. It is unlawful to use any mammal (except a dog) or an imitation of a
20 mammal as a blind in approaching or taking a game bird.

21 **Comment.** Section 29350 continues former Fish and Game Code Section 3502 without
22 substantive change.

23  **Note.** The provision above appears to govern the use of an animal (or imitation animal) as a
24 “blind” for taking game birds. The Commission is familiar with hunting blinds that are used to
25 conceal hunters and their dogs from their prey, but has not found information discussing using an
26 animal *as* a blind. Is the meaning of this usage understood in the hunting community, or is the
27 provision worded in a confusing way?

28 **The Commission invites comment on the issue.**

29 **§ 29355. Use of vehicle**

30 29355. It is unlawful to use a powerboat, motor vehicle, or airplane to drive a
31 game bird toward another person, with the intent that the other person take the
32 bird.

33 **Comment.** Section 29355 continues former Fish and Game Code Section 3501 without
34 substantive change.

1 **§ 29360. Use of dog during closed season**

2 29360. It is unlawful to break, train, hold field trials with, or practice dogs on
3 any wild game bird or domesticated game bird during the closed season for that
4 bird, except as authorized by the commission.

5 **Comment.** Section 29360 continues former Fish and Game Code Section 3508 without
6 substantive change.

7 **Note.** The terms “wild game bird” and “domesticated game bird” are not defined in the
8 existing Fish and Game Code.

9 **Do these two terms together comprise the entire universe of game birds, such that the**
10 **language of proposed Section 29360 could be made applicable to any “game bird”?**

11 **§ 29365. Game bird club license**

12 29365. In order to provide additional hunting by stocking domestically
13 propagated game birds, and to permit the taking of game birds under conditions
14 that will not conflict with the public interest, any person who owns or controls the
15 hunting rights on a tract of land may apply to the department for a game bird club
16 license authorizing the taking of game birds upon that land in accordance with the
17 regulations of the commission for the administration, including the
18 implementation and enforcement, of this section.

19 **Comment.** Section 29365 continues former Fish and Game Code Section 3270(a) without
20 substantive change.

21 **Note.** Existing Section 3270(b), identifying the operative date of the section as July 1, 1995,
22 is deleted as obsolete.

23 **§ 29370. Waste**

24 29370. No person shall through carelessness or neglect allow any game bird that
25 is in the person’s possession, or any portion of the flesh of a game bird usually
26 eaten by humans, to go needlessly to waste.

27 **Comment.** Section 29370 restates the part of the first sentence of former Fish and Game Code
28 Section 4304 applicable to game birds without substantive change.

29 See also Section 5450 (enforcement).

30 **Note.** Proposed Section 29370 is intended to restate the part of the first sentence of existing
31 Section 4304 applicable to game birds, to clarify the meaning of that provision without changing
32 its substantive effect. The existing provision reads as follows:

33 [N]or shall any person at any time leave through carelessness or neglect any game mammal or
34 game bird which is in his possession, or any portion of the flesh thereof usually eaten by humans,
35 to go needlessly to waste.

36 **The Commission invites comment on whether the proposed restatement would cause any**
37 **substantive change in the meaning of these provisions.**

38 **§ 29375. Transport out of state**

39 29375. It is unlawful to transport or carry a game bird out of this state, except by
40 the holder of a nonresident hunting license or under a written permit issued by the
41 department.

1 **Comment.** Section 29375 continues the part of former Fish and Game Code Section 2350
2 applicable to game birds without substantive change.

3 CHAPTER 2. UPLAND GAME BIRDS

4 **§ 29500. Taking**

5 29500. It is unlawful for any person, except a person licensed pursuant to
6 paragraph (2) of subdivision (a) of Section 10210, to take any upland game bird
7 species without first procuring an upland game bird hunting validation, as
8 provided in Section 28505, and having the validation permanently affixed to his or
9 her valid hunting license.

10 **Comment.** Section 29500 continues former Fish and Game Code Section 3682.1(a) without
11 substantive change.

12 **§ 29505. Upland game bird validation**

13 29505. An upland game bird hunting validation may be obtained from the
14 department or a licensed agent authorized pursuant to Section 3200 for a fee of six
15 dollars and twenty-five cents (\$6.25), adjusted pursuant to Section 3755.

16 **Comment.** Section 29505 continues former Fish and Game Code Section 3682.1(b) without
17 substantive change.

18 **§ 29510. Collectible upland game bird stamp**

19 29510. (a) Upon full implementation of the Automated License Data System,
20 the department shall continue to prepare, or have prepared, upland game bird
21 stamps depicting upland game birds.

22 (b) Any person who obtains an upland game bird hunting validation pursuant to
23 Section 28505 is entitled, upon request, to receive an upland game bird stamp at
24 no additional charge.

25 (c) Any person may purchase an upland game bird stamp for a fee of six dollars
26 and twenty-five cents (\$6.25), as adjusted pursuant to Section 3755.

27 (d) Possession of an upland game bird stamp obtained pursuant to this section
28 does not entitle the holder to take any upland game bird species.

29 **Comment.** Section 29510 continues former Fish and Game Code Section 3682.2 without
30 substantive change.

31 **§ 29515. Upland Game Bird Account**

32 29515. (a) The Upland Game Bird Account is hereby established within the Fish
33 and Game Preservation Fund.

34 (b) All funds derived from the sale of upland game bird hunting validations and
35 upland game bird stamps shall be deposited in the Upland Game Bird Account to
36 permit separate accountability for the receipt and expenditure of these funds.

37 (c) The department shall maintain the internal accountability necessary to ensure
38 compliance with the collection, deposit, and expenditure of funds specified in this
39 section.

1 (d) Funds deposited in the Upland Game Bird Account shall be available for
2 expenditure upon appropriation by the Legislature to the department.

3 (e) The department shall post budget information and a brief description on its
4 Internet Web site for all projects funded from the Upland Game Bird Account.

5 **Comment.** Subdivision (a) of Section 29515 continues former Fish and Game Code Section
6 3684(a) without substantive change.

7 Subdivision (b) continues former Fish and Game Code Section 3684(b) without substantive
8 change.

9 Subdivision (c) continues former Fish and Game Code Section 3684(g) without substantive
10 change.

11 Subdivision (d) continues the first sentence of former Fish and Game Code Section 3684(c)
12 without substantive change.

13 Subdivision (e) continues the second sentence of former Fish and Game Code Section 3684(e)
14 without substantive change.

15 **§ 29520. Use of funds**

16 29520. (a) Funds deposited in the Upland Game Bird Account shall be expended
17 solely for the purpose of acquiring land, completing projects and implementing
18 programs to benefit upland game bird species, and expanding public hunting
19 opportunities and related public outreach, including, but not limited to, enhancing
20 upland game bird habitat.

21 (b) Notwithstanding subdivision (a), the department may also use funds from the
22 Upland Game Bird Account to pay for administrative and enforcement costs of the
23 programs and activities described in this section. The amount allocated from the
24 account for administrative costs shall be limited to the reasonable costs associated
25 with administration of the programs and activities described in this section.

26 (c) Projects authorized pursuant to this section are governed by Section 54555.

27 **Comment.** Subdivision (a) of Section 29520 continues the second sentence of former Fish and
28 Game Code Section 3684(c) without substantive change.

29 Subdivision (b) continues the fourth and fifth sentences of former Fish and Game Code Section
30 3684(c) without substantive change.

31 Subdivision (c) continues the first sentence of former Fish and Game Code Section 3686
32 without substantive change.

33 **§ 29525. Acquired land**

34 29525. Any land acquired with funds from the Upland Game Bird Account shall
35 be acquired in fee title or protected with a conservation easement and, to the extent
36 possible, be open or provide access to the public for upland game bird hunting.

37 **Comment.** Section 29525 continues the third sentence of former Fish and Game Code Section
38 3684(c) without substantive change.

39 **§ 29530. Involvement with nonprofit organization**

40 29530. (a) The department may make a grant to, reimburse, or enter into a
41 contract or other agreement as defined in subdivision (a) of Section 56205 with, a
42 nonprofit organization for the use of the funds from the Upland Game Bird

1 Account to carry out the purposes of Section 29515, 29520, 29525, 29535, or
2 29540, including related habitat conservation projects.

3 (b) With the approval of the entity in control of property affected by a project,
4 the department may make grants to, or enter into contracts with, nonprofit
5 organizations for the accomplishment of those projects, or the department may
6 reimburse the controlling entity for its costs of accomplishing the project.

7 **Comment.** Subdivision (a) of Section 29530 continues former Fish and Game Code Section
8 3684(d) without substantive change.

9 Subdivision (b) continues the second sentence of former Fish and Game Code Section 3686
10 without substantive change.

11 **§ 29540. Review by advisory committee**

12 29540. An advisory committee, as determined by the department, that includes
13 interested nonprofit organizations that have goals and objectives directly related to
14 the management and conservation of game bird species and primarily represent the
15 interests of persons licensed pursuant to Section 10210 shall review and provide
16 comments to the department on all proposed projects funded from the Upland
17 Game Bird Account to help ensure that the requirements of this section have been
18 met.

19 **Comment.** Section 29540 continues the first sentence of former Fish and Game Code Section
20 3684(e) without substantive change.

21 **§ 29545. Non-applicability of other statutory requirements**

22 29545. Upland game bird projects authorized pursuant to Section 29520 or
23 29530 are not subject to Part 2 (commencing with Section 10100) of Division 2 of
24 the Public Contract Code or Article 6 (commencing with Section 999) of Chapter
25 6 of Division 4 of the Military and Veterans Code.

26 **Comment.** Section 29545 continues former Fish and Game Code Section 3684(f) without
27 substantive change.

28 **CHAPTER 3. RESIDENT GAME BIRDS**

29 **§ 29650. Regulations**

30 29650. The commission may adopt regulations it deems necessary to govern the
31 inspection of resident game birds imported into this state.

32 **Comment.** Section 29650 continues the second paragraph of former Fish and Game Code
33 Section 3516 without substantive change.

34 **CHAPTER 4. EXOTIC NONRESIDENT GAME BIRDS**

35 **§ 29700. Regulations**

36 29700. The commission may adopt regulations it deems necessary to govern the
37 release, taking, and possession of exotic nonresident game birds.

Comment. Section 29700 continues the first paragraph of former Fish and Game Code Section 3516 without substantive change.

§ 29705. Release

29705. An exotic nonresident game bird may be released in this state only on prior approval of the commission.

Comment. Section 29705 continues former Fish and Game Code Section 3515 without substantive change.

TITLE 3. NONGAME BIRDS

CHAPTER 1. GENERAL PROVISIONS [RESERVED]

CHAPTER 2. TAKING AND POSSESSION

§ 29850. Taking nongame bird

29850. It is unlawful to take any nongame bird except as provided in this code or in accordance with regulations of the commission or, when relating to mining operations, a mitigation plan approved by the department pursuant to Title 2 (commencing with Section 71500) of Part 5 of Division 17.

Comment. Section 29850 continues the second sentence of former Fish and Game Code Section 3800(a) without substantive change.

See also Section 5340 (enforcement).

 **Note.** The law governing mining mitigation plans has been relocated. A cross-reference to that law has been added to proposed Section 29850.

§ 29855. Taking or possession of migratory nongame bird

29855. It is unlawful to take or possess any migratory nongame bird as designated in the Migratory Bird Treaty Act, except as provided by rules and regulations adopted by the Secretary of the Interior under provisions of that act.

Comment. Section 29855 continues former Fish and Game Code Section 3513 without substantive change.

See also Section 5342 (enforcement).

§ 29860. Taking of nongame birds injuring crops or property

29860. (a) Nongame birds not covered by the Migratory Bird Treaty Act that are found to be injuring growing crops or property may be taken by any of the following:

(1) The owner or tenant of the premises where the crops or property are located.

(2) Officers or employees of the Department of Food and Agriculture or federal or county officers or employees when acting in their official capacities pursuant to the provisions of the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(b) Landowners and tenants taking birds in accordance with this section are exempt from Section 9500.

Comment. Section 29860 continues former Fish and Game Code Section 3801.5 without substantive change.

CHAPTER 3. NONGAME BIRD PARTS

§ 30000. Possession of parts of nongame bird

30000. Except as otherwise provided in this code or regulations adopted pursuant to this code, it is unlawful to possess the carcass, skin, or other part of any nongame bird.

Comment. Section 30000 continues the first sentence of former Fish and Game Code Section 3801.6(a) without substantive change.

See also Section 5344 (enforcement).

§ 30005. Exception for possession of parts of nongame bird by Native American

30005. It shall be an affirmative defense to a violation of Section 30000 if the possessor of feathers, carcass, skin, or part of a nongame bird legally acquired the feathers, carcass, skin, or part, possesses them for a tribal, cultural, or spiritual purpose, and satisfies either of the following criteria:

(a) The possessor is an enrolled member of a federally recognized Native American tribe or nonfederally recognized California Native American tribe listed on the California Tribal Consultation List maintained by the Native American Heritage Commission and has, in that person's immediate possession, valid tribal identification or other irrefutable proof of current enrollment.

(b) The possessor has a certificate of degree of Indian blood issued by the United States Bureau of Indian Affairs in that person's immediate possession.

Comment. Section 30005 continues former Fish and Game Code Section 3801.6(b)(1) without substantive change.

§ 30010. Salvaging of nongame birds

30010. A Native American satisfying the criteria that would constitute an affirmative defense under Section 30005 may salvage a dead nongame bird, if all of the following conditions are satisfied:

(a) The person does not possess, nor is in the company of any person who possesses, a firearm, BB device as defined in Section 16250 of the Penal Code, trap, snare, net archery equipment, device capable of discharging a projectile, or any apparatus designed to take a bird.

(b) The person was not involved in nor present at the take of the nongame bird to be salvaged, and had not received related information originating from any person present at the time of the take of the nongame bird.

(c) The nongame bird salvaged had not been struck with any thrown or discharged projectile, or trapped, netted, caught, or snared.

1 **Comment.** Subdivision (a) of Section 30010 restates the second, third, and fourth sentences of
2 former Fish and Game Code Section 3801.6(b)(2) without substantive change.

3 **Note.** Proposed Section 30010(a) is intended to restate the second, third, and fourth sentences
4 of existing Section 3801.6(b)(2) to improve their clarity, without changing their substantive
5 effect. The existing sentences read as follows:

6 Native Americans meeting the affirmative defense requirements may salvage dead nongame
7 birds so long as the person salvaging these birds does not possess, nor is in the company of any
8 person who possesses, a firearm, BB device as defined in Section 16250 of the Penal Code, trap,
9 snare, net archery equipment, device capable of discharging a projectile, or any apparatus
10 designed to take birds. Salvaging shall not take place by any person involved in the take of the
11 nongame bird to be salvaged, any person present at the time of the take, or by any person who
12 received related information originating from any person present at the time of the take of the
13 nongame bird. Salvaging pursuant to this subdivision shall not take place if a bird has been struck
14 with any thrown or discharged projectile, trapped, netted, caught, or snared.

15 **The Commission invites comment on whether the proposed restatement would cause any**
16 **substantive change in the meaning of these sentences.**

17 **§ 30015. Sale of parts of nongame bird**

18 30015. Nothing in this chapter allows any person to sell the feathers, carcass,
19 skin, or other part of a nongame bird.

20 **Comment.** Section 30015 continues the first sentence of former Fish and Game Code Section
21 3801.6(b)(2) without substantive change.

22 **TITLE 4. BIRDS OF PREY**

23 **§ 30100. Falconry registration and licensing**

24 30100. (a) The commission may adopt regulations for the possession or training,
25 and the capture, importation, exportation, or intrastate transfer, of any bird in the
26 orders Falconiformes and Strigiformes (birds-of-prey) used in the practice of
27 falconry and may authorize the issuance and provide for the revocation of licenses
28 and permits to persons for the practice of falconry.

29 (b) It is unlawful to capture, possess, or train any bird in the orders
30 Falconiformes and Strigiformes (birds-of-prey) in the practice of falconry without
31 procuring a falconry license.

32 **Comment.** Section 30100 continues former Fish and Game Code Section 395 without
33 substantive change.

34 **§ 30105. Falconry license**

35 30105. (a) The falconry license shall be valid for a license year beginning on
36 July 1, and ending on the last day of June of the next succeeding calendar year. If
37 issued after July 1 of any year, a falconry license is valid for the remainder of that
38 license year.

39 (b) For the license years beginning on or after March 1, 1987, the fee for a
40 falconry license is a base fee of thirty dollars (\$30) as adjusted under Section
41 3755.

(c) The base year for determining the inflationary index applied to the fee established by subdivision (b) shall be the 1984–85 fiscal year.

Comment. Subdivisions (a) and (b) of Section 30105 continue former Fish and Game Code Section 396 without substantive change.

Subdivision (c) continues the first clause of former Fish and Game Code Section 398 without substantive change. The second clause of former Fish and Game Code Section 398, which applied to a code section repealed in 2007, is obsolete and is not continued.

§ 30110. Taking or possession

30110. It is unlawful to take, possess, or destroy a bird in the order Falconiformes or Strigiformes (birds-of-prey), or to take, possess, or destroy a nest or egg of a bird in either of those orders, except as provided by this code or any regulation adopted pursuant to this code.

Comment. Section 30110 continues former Fish and Game Code Section 3503.5 without substantive change.

See also Section 5350 (enforcement).

§ 30115. Cooperative contracts with the United States Fish and Wildlife Service

30115. The department may enter into cooperative contracts with the United States Fish and Wildlife Service in the Department of the Interior for the purpose of controlling or eradicating any predatory bird, and may expend any money made available to the department for that purpose.

Comment. Section 30115 restates former Fish and Game Code Section 3802 without substantive change.

Note. Proposed Section 30115 is intended to restate existing Fish and Game Code Section 3802 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

3802. The department may enter into cooperative contracts with the United States Fish and Wildlife Service in the Department of the Interior in relation to the control or eradication of predatory birds, and for that purpose may expend any money made available to the department for expenditure for the control or eradication of predatory birds.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provisions.

TITLE 5. FULLY PROTECTED BIRDS

§ 30200. Take or possession prohibited

30200. Except as provided in Article 1 (commencing with Section 63300) of Chapter 4 of Title 3 of Part 1 of Division 17, Section 64605, or this title:

(a) A fully protected bird may not be taken or possessed at any time.

(b) No provision of this code or any other law shall be construed to authorize the issuance of a permit or license to take a fully protected bird, and no issued permit or license shall be construed to authorize the taking of a fully protected bird.

Comment. Section 30200 continues the first two sentences of former Fish and Game Code Section 3511(a)(1) without substantive change.

See also Section 5320 (enforcement).

§ 30205. Department research

30205. (a) The department may authorize the taking of a fully protected bird for necessary scientific research, including efforts to recover fully protected, threatened, or endangered species, and may authorize the live capture and relocation of a fully protected bird pursuant to a permit for the protection of livestock.

(b) Before authorizing the take of a fully protected bird, the department shall make an effort to notify all affected and interested parties to solicit information and comments on the proposed authorization.

(c) The notice shall be published in the California Regulatory Notice Register and shall be delivered to each person who has given the department written notice of that person's interest in fully protected species and provided the department either an e-mail or postal address.

(d) Affected and interested parties shall have 30 days after the notice is published in the California Regulatory Notice Register to provide any relevant information and comments on the proposed authorization.

(e) As used in this subdivision, "scientific research" does not include an action taken as part of specified mitigation for a project, as defined in Section 21065 of the Public Resources Code.

Comment. Section 30205 continues the third through the sixth sentences of former Fish and Game Code Section 3511(a)(1), and former Fish and Game Code Section 3511(a)(2), without substantive change.

Note. The term "project" is defined, for purposes of the entire Fish and Game Code, by existing Section 711.2(a), as having "the same meaning as defined in Section 21065 of the Public Resources Code." In the proposed law, that definitional provision will be added to the list of generally applicable definitional provisions in Division 1 (but has not as yet been assigned a section number).

The Commission invites comment on whether or not that generally applicable definitional provision should be cross-referenced in proposed Section 30205.

§ 30210. Possession of legally imported fully protected birds

30210. A legally imported fully protected bird may be possessed under a permit issued by the department.

Comment. Section 30210 continues former Fish and Game Code Section 3511(a)(3) without substantive change.

PART 4. SPECIFIC TYPES OF BIRDS

1 TITLE 1. BIRD OF PARADISE

2 § 30300. Prohibited take, sale, or purchase

3 30300. It is unlawful to take, sell, or purchase a bird of paradise.

4 **Comment.** Section 30300 continues the part of former Fish and Game Code Section 3505
5 applicable to birds of paradise without substantive change.

6 TITLE 2. CONDORS

7 CHAPTER 1. GENERAL PROVISIONS

8 § 30350. Fully protected bird

9 30350. For the purposes of this code, a California condor is a fully protected
10 bird.

11 **Comment.** Section 30350 continues former Fish and Game Code Section 3511(b)(5) without
12 substantive change.

13 § 30355. Provisions not exclusive

14 30355. The provisions of this title are not intended to be exclusive. Other
15 provisions that govern condor include, but are not limited to, the following
16 provisions:

17 (a) Section 10000.

18 (b) Section 10005.

19 (c) Section 10010.

20 (d) Section 10015.

21 (e) Section 10020.

22 (f) Section 10025.

23 (g) Section 10030.

24 (h) Section 55725.

25 **Comment.** Section 30355 is new. It is added for drafting convenience.

26 CHAPTER 2. CONSERVATION

27 Article 1. California Condor Preservation Project

28 § 30360. California condor preservation project

29 30360. The department may carry out a California condor preservation project
30 which has the following objectives:

31 (a) Habitat protection, consistent with the department's existing legal authority.

32 (b) Field research, including mortality studies.

33 (c) Captive breeding program.

34 (d) Condor release program.

1 **Comment.** Section 30360 continues former Fish and Game Code Section 3850 without
2 substantive change.

3 **§ 30365. Joint planning with federal authorities**

4 30365. The department, jointly with the federal-state condor recovery team
5 established pursuant to the federal Endangered Species Act shall develop a plan to
6 respond to the objectives in Section 30360. Based on the plan, the department
7 shall develop specific activities, studies, and programs to be administered by the
8 department in the areas of habitat protection and field research. The department
9 may contract for all or some of these activities, studies, and programs.

10 **Comment.** Section 30365 continues former Fish and Game Code Section 3851 without
11 substantive change.

12 **§ 30370. Breeding program**

13 30370. The department shall provide funds to the Zoological Society of San
14 Diego and to the Los Angeles Zoo for a condor breeding program on the grounds
15 of each zoo.

16 **Comment.** Section 30370 continues former Fish and Game Code Section 3852 without
17 substantive change.

18 **§ 30375. Release program**

19 30375. In addition to the programs in Section 30370, a condor release program
20 administered by the department and the United States Fish and Wildlife Service
21 may be contracted to the Zoological Society of San Diego and the Los Angeles
22 Zoo.

23 **Comment.** Section 30375 continues former Fish and Game Code Section 3853 without
24 substantive change.

25 **§ 30380. Use of funds for administrative costs**

26 30380. Not more than 10 percent of the funds provided to the zoos under this
27 article may be used for administrative costs of the program.

28 **Comment.** Section 30380 continues former Fish and Game Code Section 3854 without
29 substantive change.

30 **§ 30385. Monitoring of programs**

31 30385. Both the breeding program and the release program, if authorized by the
32 department, shall meet criteria established by the department and shall be
33 monitored by the department. The zoos shall submit biannual reports to the
34 department that describe progress made in the breeding program and the release
35 program.

36 **Comment.** Section 30385 continues former Fish and Game Code Section 3855 without
37 substantive change.

1 **§ 30390. Report to Legislature**

2 30390. The department shall include copies of the biannual reports from the
3 zoos in the annual report to the Legislature on the status of listed species required
4 in Section 62525.

5 **Comment.** Section 30390 continues former Fish and Game Code Section 3856 without
6 substantive change.

7 **§ 30395. Department to seek funding**

8 30395. To the extent possible, the department shall seek private sector funding
9 and any federal funds that may be available to augment state funds for the
10 purposes of this article.

11 **Comment.** Section 30395 continues former Fish and Game Code Section 3857 without
12 substantive change.

13 Article 2. Northern California Condor Restoration Program

14 **30425. Take**

15 30425. (a) For purposes of this section, the term “Northern California Condor
16 Restoration Program” means the California condor restoration program in northern
17 California associated with the California Condor Recovery Plan published by the
18 United States Fish and Wildlife Service in April 1996, or a subsequent revision of
19 that plan.

20 (b) Notwithstanding Title 5 (commencing with Section 30200) of Part 3, if the
21 take of California condors under the Northern California Condor Restoration
22 Program is exempt from further authorization or approval under Part 1
23 (commencing with Section 62000) of Division 17 pursuant to Section 63550 or
24 63555, and the director finds the enhancement of survival permit described in
25 subdivision (a) of Section 63550 or federal regulations described in paragraph (1)
26 of subdivision (b) of Section 63555, as applicable, to be consistent with the
27 objectives and plans developed pursuant to this chapter, the take or possession of
28 California condors under the Northern California Condor Restoration Program
29 shall also be exempt from the prohibitions in Title 5 (commencing with Section
30 30200) of Part 3.

31 **Comment.** Section 30425 continues former Fish and Game Code Section 3858 without
32 substantive change.

33  **Note.** Proposed Section 30425 would continue Section 3858, which was amended by 2018
34 Cal. Stat. ch. 586. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

TITLE 3. DUCKS AND GEESE

§ 30500. Classification

30500. For the purposes of this code, ducks and geese are migratory birds and game birds.

Comment. Section 30500 continues former Fish and Game Code Section 3500(b)(1) without substantive change.

§ 30505. Required validation

30505. It is unlawful for any person, except a person licensed pursuant to paragraph (2) of subdivision (a) of Section 10210, to take a duck or goose without obtaining and possessing at the time of taking a state duck hunting validation as provided in Section 30515.

Comment. Section 30505 continues former Fish and Game Code Section 3700.1(a) without substantive change.

See also Sections 4704, 5464 (enforcement).

Note. Existing Section 3700.1 applies to the taking of “any migratory game bird, except jacksnipe, coots, gallinules, western mourning doves, white-winged doves, and band-tailed pigeons.” The only “migratory game birds” that are not listed in Section 3700.1 are ducks and geese. See existing Section 3500(b). In the interest of clarity, the reference has been simplified accordingly. **The Commission invites comment on whether that change would cause any problems.**

§ 30510. Taking in District 2580 or 2585

30510. (a) In Districts 2580 and 2585, it is unlawful to take a duck or a goose below the incoming or outgoing tidewater’s edge, or from any blind, boat, floating device, island, islet, or exposed tidal flat.

(b) Subdivision (a) does not apply on Saturdays, Sundays, Wednesdays, holidays, and the opening and closing days during the prescribed open season.

(c) Notwithstanding subdivision (a), the use of boats is permitted to retrieve crippled or dead birds.

Comment. Section 30510 restates former Fish and Game Code Section 3681 without substantive change.

Note. Proposed Section 30510 is intended to restate existing Section 3681 to improve its clarity, without changing its substantive effect. The existing section reads as follows:

3681. In Districts 8 and 9, it is unlawful to take ducks or geese in any manner below the incoming or outgoing tidewater’s edge or from any blind, boat, floating device, island, islet, or exposed tidal flat except on Saturdays, Sundays, Wednesdays, holidays and the opening and closing days during the prescribed open season except that the use of boats is permitted to retrieve crippled or dead birds.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

1 **§ 30515. State duck hunting validation**

2 30515. A state duck hunting validation shall be sold for a fee of ten dollars (\$10)
3 by the department and by license agents, who are authorized by the department
4 pursuant to Section 3200, in the same manner as hunting licenses.

5 **Comment.** Section 30515 continues former Fish and Game Code Section 3700.1(b) without
6 substantive change.

7 **§ 30520. Collectible state duck stamp**

8 30520. (a) Upon full implementation of the Automated License Data System,
9 the department shall continue to prepare, or have prepared, state duck stamps
10 depicting migratory waterfowl.

11 (b) Any person who obtains a duck hunting validation pursuant to Section 30515
12 is entitled, upon request, to receive a state duck stamp, open edition, at no
13 additional charge.

14 (c) Any person may purchase a state duck stamp, open edition, for a fee of ten
15 dollars (\$10).

16 (d) A state duck stamp, Governor's edition, may be printed and sold on a bid
17 basis, beginning at a minimum bid, as determined by the department or its
18 representative.

19 (e) The commission shall determine the form of the state duck stamp.

20 (f) Possession of a state duck stamp obtained pursuant to this section does not
21 entitle the holder to take a duck or goose.

22 **Comment.** Section 30520 continues former Fish and Game Code Section 3700.2(a)-(f) without
23 substantive change.

24 **§ 30525. Promotional material**

25 30525. (a) The department may prepare and sell artwork, posters, and other
26 promotional materials related to the sale of duck stamps or waterfowl hunting and
27 conservation.

28 (b) The department may permit individual artists to sell a limited number of
29 prints of duck stamp related artwork or posters.

30 **Comment.** Subdivision (a) of Section 30525 continues former Fish and Game Code Section
31 3700.2(g) without substantive change.

32 Subdivision (b) continues the first sentence of former Fish and Game Code Section 3702.5
33 without substantive change.

34  **Note.** The second sentence of existing Section 3702.5, identifying the operative date of that
35 section as July 1, 1993, is deleted as obsolete.

36 **§ 30530. State Duck Stamp Account**

37 30530. (a) All funds derived from the sale of state duck hunting validations,
38 state duck stamps, and related items authorized by subdivision (a) of Section
39 30525 shall be deposited in the State Duck Stamp Account in the Fish and Game
40 Preservation Fund to permit separate accountability for the receipt and expenditure
41 of these funds.

(b) An amount not to exceed 6 percent of the amount annually deposited in the account may be used for administrative overhead related to the use of those funds and for implementation of the federal Migratory Bird Harvest Program.

Comment. Section 30530 continues former Fish and Game Code Section 3701 without substantive change.

Note. A reference to “subdivision (e) of Section 3700” in existing Section 3701 has not been continued. Section 3700 does not exist. **The Commission invites comment on whether some other provision should be referenced in place of the reference to Section 3700(e).**

§ 30535. Allocation of funds in State Duck Stamp Account

30535. (a) Two dollars and twenty-five cents (\$2.25) of the amount collected by the department for each state duck stamp sold shall be allocated by the commission for the purposes of the North American Waterfowl Management Plan in those areas of Canada from which come substantial numbers of waterfowl migrating to, or through, California. These funds shall be matched with federal or private funds available for that purpose.

(b) The available balance of the funds shall be used for any project authorized pursuant to Section 30540 in California. However, any lands acquired in California with those funds shall be open to waterfowl hunting as a public shooting ground or wildlife management area.

Comment. Section 30535 continues the first paragraph of former Fish and Game Code Section 3704 without substantive change.

Note. The second paragraph of existing Section 3704 (which establishes the operative date of the section) appears to be obsolete. It has not been continued.

§ 30540. Use of funds

30540. Funds deposited in the State Duck Stamp Account shall be used for projects or endowments approved by the commission for the purpose of protecting, preserving, restoring, enhancing, and developing migratory waterfowl breeding and wintering habitat, evaluating habitat projects, and conducting waterfowl resource assessments and other waterfowl related research. Subject to Section 30535, the department may make grants or enter into contracts with nonprofit organizations for the use of these funds when it finds that the contracts are necessary for carrying out the purposes of this article.

Comment. Section 30540 continues former Fish and Game Code Section 3702 without substantive change.

§ 30560. Project prerequisites

30560. (a) Before the commission may consider any project that proposes the use of funds from the State Duck Stamp Account, the department shall analyze the project and provide the commission with recommendations as to the project’s feasibility and need.

(b) Before allocating funds to any project to be undertaken outside the state, or outside the United States, the commission shall secure evidence that the project is acceptable to the government agency having jurisdiction over the lands and waters affected by the project.

Comment. Subdivision (a) of Section 30560 continues former Fish and Game Code Section 3703 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 3705 without substantive change.

§ 30565. Advisory committee

30565. An advisory committee, as determined by the department, that includes interested nonprofit organizations that have goals and objectives directly related to the management and conservation of waterfowl species and primarily represent the interests of persons licensed pursuant to Section 10210 shall review and provide comments to the department on all proposed projects funded from the State Duck Stamp Account to help ensure that the requirements of Sections 30535 and 30540, and subdivision (a) of 30560 have been met.

Comment. Section 30565 continues former Fish and Game Code Section 3702.1 without substantive change.

§ 30570. Exemptions

30570. Waterfowl projects authorized pursuant to Section 30540 or 56700 are not subject to Part 2 (commencing with Section 10100) of Division 2 of the Public Contract Code or Article 6 (commencing with Section 999) of Chapter 6 of Division 4 of the Military and Veterans Code.

Comment. Section 30570 continues the first sentence of the first paragraph of former Fish and Game Code Section 3704.5 without substantive change.

§ 30575. Contracts, grants, and reimbursement of controlling entity

30575. With the approval of the entity in control of property affected by a project, the department may make grants to, or enter into contracts with, nonprofit organizations for the accomplishment of those projects, or the department may reimburse the controlling entity for its costs of accomplishing the project.

Comment. Section 30570 continues the second sentence of the first paragraph of former Fish and Game Code Section 3704.5 without substantive change.

 **Note.** The second paragraph of existing Section 3704.5 (which establishes the operative date of the section) appears to be obsolete. It has not been continued.

TITLE 4. EGRET

§ 30700. Prohibited take, sale, or purchase

30700. It is unlawful to take, sell, or purchase an egret.

Comment. Section 30700 continues the part of former Fish and Game Code Section 3505 applicable to egrets without substantive change.

1 TITLE 5. GOURA

2 § 30750. Prohibited take, sale, or purchase

3 30750. It is unlawful to take, sell, or purchase a goura.

4 **Comment.** Section 30750 continues the part of former Fish and Game Code Section 3505
5 applicable to gouras without substantive change.

6 TITLE 6. NUMIDI

7 § 30800. Prohibited take, sale, or purchase

8 30800. It is unlawful to take, sell, or purchase a numidi.

9 **Comment.** Section 30800 continues the part of former Fish and Game Code Section 3505
10 applicable to numidi without substantive change.

11 TITLE 7. OSPREY

12 § 30850. Prohibited take, sale, or purchase

13 30850. It is unlawful to take, sell, or purchase an osprey.

14 **Comment.** Section 30850 continues the part of former Fish and Game Code Section 3505
15 applicable to ospreys without substantive change.

16 TITLE 8. PHEASANT

17 § 30900. Classification

18 30900. For the purposes of this code, a ring-necked pheasant, and varieties
19 thereof, are both resident game birds and upland game birds.

20 **Comment.** Section 30900 combines and continues former Fish and Game Code Sections
21 3500(a)(10) and 3683(a)(11) without substantive change.

22 § 30905. Provisions not exclusive

23 30905. The provisions of this title are not intended to be exclusive. Other
24 provisions that govern pheasants include, but are not limited to, the following
25 provisions:

26 (a) Section 325.

27 (b) Section 545.

28 (c) Section 10210.

29 (d) Section 26000.

30 (e) Section 26010.

31 (f) Section 26070.

32 **Comment.** Section 30905 is new. It is added for drafting convenience.

1 **§ 30910. Prohibited take**

2 30910. (a) It is unlawful to take a pheasant within 300 yards of a vehicle from
3 which pheasants are being released into an area for hunting, while the pheasants
4 are being released.

5 (b) It is unlawful to possess a pheasant carcass in a condition that the sex or
6 species of the pheasant cannot be easily determined, while in the field or forest or
7 while upon any highway, train, car, boat, or other conveyance when returning
8 from any hunting trip with gun or other hunting equipment.

9 **Comment.** Subdivision (a) of Section 30910 continues former Fish and Game Code Section
10 3010 without substantive change.

11 Subdivision (b) continues former Fish and Game Code Section 3660 without substantive
12 change.

13 **TITLE 9. PIGEON**

14 **§ 31000. Classification**

15 31000. For the purposes of this code, a band-tailed pigeon is both a migratory
16 game bird and an upland game bird.

17 **Comment.** Section 31000 combines and continues former Fish and Game Code Sections
18 3500(b)(6) and 3683(b)(4), without substantive change.

19 **§ 31005. Provisions not exclusive**

20 31005. The provisions of this title are not intended to be exclusive. Other
21 provisions that govern pigeons include, but are not limited to, Section 410.

22 **Comment.** Section 31005 is new. It is added for drafting convenience.

23 **TITLE 10. SPARROW AND STARLING**

24 **§ 31050. Authorized take or possession**

25 31050. (a) Except as provided in Section 9590 and this section, the following
26 nongame birds may be taken or possessed at any time:

27 (1) English sparrow (*Passer domesticus*).

28 (2) Starling (*Sturnus vulgaris*).

29 (b) Notwithstanding Section 9500 or any other provision of this code or
30 regulation adopted pursuant to this code requiring the possession of a hunting
31 license, a landowner or lessee, or an agent of either in immediate possession of
32 written authority from the landowner or lessee, shall not be required to obtain a
33 hunting license or a depredation permit to take a nongame bird listed in
34 subdivision (a) on land owned or leased by the landowner or lessee.

35 (c) All other persons taking a nongame bird listed in subdivision (a) shall be
36 licensed pursuant to Section 9500.

37 **Comment.** Section 31050 restates former Fish and Game Code Section 3801 without
38 substantive change.

Notes: (1) Proposed Section 31050 is intended to restate existing Section 3801 to improve its clarity, without changing its substantive effect. The existing section reads as follows:

3801. Notwithstanding Section 3007 or any other provision of this code or regulations made pursuant thereto requiring the possession of a hunting license, a landowner or lessee or agent of either in immediate possession of written authority from the landowner or lessee, shall not be required to obtain a hunting license or a depredation permit to take the following nongame birds on land owned or leased by the landowner or lessee. Hunters otherwise taking the following nongame birds shall be licensed pursuant to Section 3007. The following nongame birds taken in compliance with this section may be taken and possessed by any person at any time, except as provided in Section 3000:

- (a) English sparrows (*Passer domesticus*).
- (b) Starlings (*Sturnus vulgaris*).

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 3801 was amended in 2007 to add most of the above language relating to licensure. 2007 Cal. Stat. ch. 285. Previously, the section had read:

3801. Unless otherwise provided by the regulations of the commission the following nongame birds may be taken and possessed by any person at any time, except as provided in Section 3000:

- (a) English sparrows (*Passer domesticus*).
- (b) Starlings (*Sturnus vulgaris*).

The 2007 amendment to the section deleted the language authorizing the Commission to regulate the taking of sparrows and starlings. That deletion may have had an inadvertent effect, by removing statutory authority for existing Commission regulations that govern the *manner* in which sparrows and starlings may be taken. See 14 CFR 472(a); 14 CFR 475.

The Commission invites comment on whether the introductory clause of proposed Section 31050(a) should be revised to read: “Except as provided in Section 9590 and this section, the following nongame birds may be taken or possessed at any time, subject to any regulation adopted by the Commission that governs the manner of that taking:”

TITLE 11. WILD TURKEY

§ 31100. Classification

31100. For the purposes of this code, a wild turkey of the order Galliformes is both a resident game bird and an upland game bird.

Comment. Section 31100 continues former Fish and Game Code Sections 3500(a)(11) and 3683(a)(12) without substantive change.

§ 31110. Depredation permit for wild turkeys

31110. (a) An owner or tenant of land or property that is being damaged or destroyed, or is in danger of being damaged or destroyed, by wild turkey, may apply to the department for a permit to kill the wild turkey causing or threatening the damage or destruction.

(b) The department, upon satisfactory evidence of actual or immediately threatened damage or destruction of land or property, shall issue a revocable permit for the taking and disposition of the responsible wild turkey, under

1 regulations adopted by the commission. The permit shall include a statement of
2 the penalties that may be imposed for a violation of the permit conditions.

3 (c) Wild turkey taken under a permit issued pursuant to subdivision (b) shall not
4 be sold or shipped from the premises on which they are taken, except pursuant to
5 instructions from the department.

6 (d) No poison of any type may be used to take any wild turkey pursuant to this
7 section.

8 (e) It is unlawful for any person to violate the terms of any permit issued
9 pursuant to this section.

10 **Comment.** Section 31110 restates the part of former Fish and Game Code Section 4181(a)
11 applicable to wild turkeys without substantive change.

12 **Note.** Proposed Section 31110 is intended to restate the part of existing Fish and Game Code
13 Section 4181 applicable to wild turkeys to clarify the meaning of that language, without changing
14 its substantive effect. Existing Section 4181 reads as follows:

15 4181. (a) Except as provided in Section 4181.1, any owner or tenant of land or property that is
16 being damaged or destroyed or is in danger of being damaged or destroyed by elk, bear, beaver,
17 wild pig, wild turkeys, or gray squirrels, may apply to the department for a permit to kill the
18 animals. Subject to the limitations in subdivisions (b) and (d), the department, upon satisfactory
19 evidence of the damage or destruction, actual or immediately threatened, shall issue a revocable
20 permit for the taking and disposition of the animals under regulations adopted by the commission.
21 The permit shall include a statement of the penalties that may be imposed for a violation of the
22 permit conditions. Animals so taken shall not be sold or shipped from the premises on which they
23 are taken except under instructions from the department. No iron-jawed or steel-jawed or any
24 type of metal-jawed trap shall be used to take any bear pursuant to this section. No poison of any
25 type may be used to take any gray squirrel or wild turkey pursuant to this section. The department
26 shall designate the type of trap to be used to ensure the most humane method is used to trap gray
27 squirrels. The department may require trapped squirrels to be released in parks or other
28 nonagricultural areas. It is unlawful for any person to violate the terms of any permit issued under
29 this section.

30 (b)....

31 The references in existing Section 4181 to existing Section 4181.1 and to subdivisions (b) and (d)
32 of Section 4181 have not been continued in proposed Section 31110, as those provisions do not
33 apply to turkeys.

34 **The Commission invites comment on whether the restatement would cause any**
35 **substantive change in the meaning of the provision.**

36 **§ 31115. Access by licensed hunters for depredator control of wild turkeys**

37 31115. (a) If a landowner or tenant applies for a permit under Section 31110 to
38 take wild turkey, the department shall inform the applicant about available options
39 for allowing access by licensed hunters, including, but not limited to, access
40 authorized pursuant to Title 7 (commencing with Section 56200) of Part 2 of
41 Division 15 to control wild turkey.

42 (b) The commission, in lieu of a permit described in Section 31110, and with the
43 consent of, or upon the request of, the landowner or tenant, may pursuant to
44 appropriate regulation authorize the issuance of permits to persons holding valid
45 hunting licenses to take wild turkey in sufficient numbers to stop the damage or

1 threatened damage. Before issuing permits to licensed hunters, the department
2 shall investigate and determine the number of permits necessary, the territory
3 involved, the dates of the proposed hunt, the manner of issuing the permits, and
4 the fee for the permit.

5 **Comment.** Section 31115 restates the part of former Fish and Game Code Section 4188
6 applicable to wild turkey without substantive change.

7 **NS Note.** Proposed Section 31015 is intended to restate the part of existing Fish and Game Code
8 Section 4188 applicable to wild turkeys to improve its clarity, without changing its substantive
9 effect. The existing provision reads as follows:

10 4188. (a) If a landowner or tenant applies for a permit under Section 4181 for wild pigs or wild
11 turkeys, or under Section 4181.5 for deer, the department shall notify the landowner or tenant
12 about available options for allowing access by licensed hunters, including, but not limited to,
13 access authorized pursuant to Article 3 (commencing with Section 1570) of Chapter 5 of Division
14 2 to control wild pigs, wild turkeys, and deer.

15 (b) The commission, in lieu of a permit as described in subdivision (a), and with the consent of,
16 or upon the request of, the landowner or tenant, under appropriate regulations, may authorize the
17 issuance of permits to persons holding valid hunting licenses to take wild pigs, wild turkeys, or
18 deer in sufficient numbers to stop the damage or threatened damage. Before issuing permits to
19 licensed hunters, the department shall investigate and determine the number of permits necessary,
20 the territory involved, the dates of the proposed hunt, the manner of issuing the permits, and the
21 fee for the permit.

22 **The Commission invites comment on whether the restatement would cause any**
23 **substantive change in the meaning of the provision.**

24 DIVISION 9. MAMMALS

25 PART 1. GENERAL PROVISIONS

26 TITLE 1. APPLICATION OF OTHER PROVISIONS

27 § 31400. Governance by other provisions

28 31400. Animals governed by this division are also governed by other provisions
29 of this code, including but not limited to Divisions 6 (commencing with Section
30 8000) and 7 (commencing with Section 23300).

31 **Comment.** Section 31400 is new. It is added for drafting convenience.

32 TITLE 2. DOGS PURSUING OR INJURING MAMMALS

33 CHAPTER 1. GENERAL PROVISIONS

34 § 31500. Definitions

35 31500. For the purposes of this title:

36 (a) “Pursue” means pursue, run, or chase.

(b) “Bear” means any black bear (*Ursus americanus*) found in the wild in this state.

Comment. Section 31500 restates former Fish and Game Code Sections 3032(a)(1), 3960(a), 3960.2(a) (as applied to bear), 3960.4(a), and 3960.6(a) without substantive change.

Notes. (1) Proposed Section 31500 is intended to merge and restate existing Fish and Game Code Sections 3032(a)(1), 3960(a), 3960.2(a), 3960.4(a), and 3960.6(a) to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

3032. (a) As used in this section:

(1) “Bear” and “pursue” have the same meanings as defined in Section 3960.

(2) “Bear” means any black bear (*Ursus americanus*) found in the wild in this state.

...

3960. (a) As used in this section:

(1) “Pursue” means pursue, run, or chase.

(2) “Bear” means any black bear (*Ursus americanus*) found in the wild in this state.

3960.2. (a) As used in this section, the terms “bear” and “pursue” have the same meanings as defined in Section 3960.

3960.4. (a) As used in this section, the terms “bear” and “pursue” have the same meanings as defined in Section 3960.

3960.6. (a) As used in this section, the terms “bear” and “pursue” have the same meanings as defined in Section 3960.

The Commission invites comment on whether the proposed restatement would cause any substantive change in the meaning of any of the provisions.

(2) In the existing Fish and Game Code, the two definitions in proposed Section 31500 are limited in their applicability to the sections in this proposed title. Nevertheless, that limitation may either have been unintentional, or has been overlooked in the enactment of other provisions making use of either of the two terms.

The Commission invites comment on whether either of the definitions in proposed Section 31400 should be generalized to apply to the entire code, and relocated in the proposed law among other code-wide definitions.

§ 31505. Hound tag program

31505. (a) As used in this section, “hound” means a dog used to pursue mammals.

(b) The commission may establish a hound tag program.

(c) If a hound tag program is established, the commission may require all of the following:

(1) That each hound be issued a license tag bearing a unique identifying number that is to be worn at all times by the hound while pursuing mammals.

(2) That all relevant local and state laws pertaining to dogs are being followed while the hound is being used to pursue mammals.

(3) That each hound be microchipped with an implanted transponder that has a unique identification code.

(4) That the owner maintain documentation showing that the hound is current on all required vaccinations and treatments for the prevention of rabies and any other disease specified by the department.

(5) That the owner report, within 24 hours of its last sighting, any hound that is lost during hunting, pursuing, or tracking activities.

(6) That the hound's tag identification number be recorded on the hunting tag of any animal taken using the services of the hound.

(d) If a hound tag program is established, the commission may adjust the amount of the fees for the hound tag as necessary, to fully recover, but not exceed, all reasonable administrative and implementation costs of the department and the commission relating to the program.

Comment. Section 31505 continues former Fish and Game Code Section 3032(a)(2)-(d) without substantive change.

§ 31510. Use of dog to pursue specified mammals

31510. (a) It is unlawful to permit or allow any dog to pursue any of the following mammals, under the specified conditions:

(1) A big game mammal, during the closed season for that mammal.

(2) A fully protected, rare, or endangered mammal, at any time.

(3) A bear or bobcat, at any time.

(4) A mammal in a game refuge or ecological reserve, if hunting within that refuge or ecological reserve is unlawful.

(b) This section does not apply to the use of dogs to pursue bears or bobcats by federal, state, or local law enforcement officers, or their agents or employees, while carrying out official duties as required by law.

Comment. Subdivision (a) of Section 31510 continues former Fish and Game Code Section 3960(b) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 3960(c)(3) without substantive change.

Notes. (1) Existing Fish and Game Code Section 3960(b) declares it unlawful to either "permit" or "allow" a dog to engage in the conduct described in the provision.

The Commission invites comment on whether one of these two terms, which in this context appear to be synonymous, can be deleted without substantively changing the meaning of the provision.

(2) The existing Fish and Game Code contains no definition of the term "big game mammal," which appears in Section 3960(b) as well as several other sections of the code. See existing Sections 3004.5(j)(2), 3214, 3960.

The term "big game" is also used in several sections of the existing code, without definition. See existing Sections 3953, 12013.3, and 12013.5. However, one code section, Section 3004.5(a)(1), refers to the term "as defined in the department's mammal hunting regulations."

Those regulations provide that "'Big game' means the following: deer (genus *Odocoileus*), elk (genus *Cervus*), pronghorn antelope (genus *Antilocarpa*), wild pig (feral pigs, European wild pigs and their hybrids (genus *Sus*), black bear (genus *Ursus*), and Nelson bighorn sheep (subspecies *Ovis canadensis nelsoni*) in the areas described in subsection 4902(b) of the Fish and Game Code." 14 CCR § 350.

The Commission invites comment on whether a definition of the term "big game mammal" should be added to the proposed law. Such a definition could either reiterate the

existing regulation's substantive content or could instead incorporate the regulation by reference (which would preserve the possibility of the department revising the content if necessary).

CHAPTER 2. UNCONTROLLED DOGS

§ 31550. Capture or dispatch by department

31550. (a) The department may take any of the following actions:

(1) Capture any dog not under the reasonable control of its owner or handler, when that uncontrolled dog is pursuing, in violation of Section 31510, any of the following mammals:

(A) A big game mammal.

(B) A bear or bobcat.

(C) A fully protected, rare, or endangered mammal.

(2) Capture or dispatch any dog inflicting injury or immediately threatening to inflict injury to any of the following mammals, under the specified conditions:

(A) A big game mammal, during the closed season on that mammal.

(B) A bear or bobcat, at any time.

(C) A fully protected, rare, or endangered mammal, at any time.

(D) A mammal in a game refuge or ecological reserve, if hunting within that refuge or ecological reserve is unlawful.

(b) No criminal or civil liability shall accrue to any department employee as a result of enforcement of this section.

(c) If a dog captured or dispatched pursuant to this section has identification, its owner shall be notified by the department within 72 hours after the capture or dispatch.

Comment. Section 31550 continues former Fish and Game Code Section 3960(c)(1), (2), and (4) without substantive change.

Notes. (1) Proposed Section 31550 is intended to restate existing Fish and Game Code Section 3960(c)(1), (2), and (4) to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

(c)(1) The department may take any of the following actions:

(A) Capture any dog not under the reasonable control of its owner or handler, when that uncontrolled dog is pursuing, in violation of this section, any big game mammal, any bear or bobcat, or any fully protected, rare, or endangered mammal.

(B) Capture or dispatch any dog inflicting injury or immediately threatening to inflict injury to any big game mammal during the closed season on that mammal, and the department may capture or dispatch any dog inflicting injury or immediately threatening to inflict injury on any bear or bobcat at any time, or any fully protected, rare, or endangered mammal at any time.

(C) Capture or dispatch any dog inflicting injury or immediately threatening to inflict injury to any mammal in a game refuge or ecological reserve if hunting within that refuge or ecological reserve is unlawful.

(2) No criminal or civil liability shall accrue to any department employee as a result of enforcement of this section.

....

(4) Owners of dogs with identification, that have been captured or dispatched, shall be notified within 72 hours after capture or dispatch.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Fish and Game Section 3960(b) (which would be continued by proposed Section 31510(a)) prohibits permitting or allowing a dog to pursue four described categories of mammals under specified conditions:

- (a) A big game mammal, during the closed season for that mammal,
- (b) A fully protected, rare, or endangered mammal, at any time,
- (c) A bear or bobcat, at any time, or
- (d) A mammal in a game refuge or ecological reserve, if hunting within that refuge or ecological reserve is unlawful.

Existing Section 3960(c)(1)(A) (which would be continued by proposed Section 31550(a)(1)) authorizes the Department of Fish and Wildlife to capture any uncontrolled dog that is *pursuing* a mammal listed in the first three categories above, but not the fourth (mammals in game refuges and ecological preserves where hunting is not permitted).

Should the fourth category be included?

§ 31555. Seizure or dispatch generally

31555. (a) Whenever an employee of the department is not present to carry out the provisions of Section 31550 with respect to any dog inflicting injury or immediately threatening to inflict injury to any deer, elk, or prong-horned antelope during the closed season for those mammals, any property owner, lessee, person holding a permit for the purpose of grazing livestock, or that person's employee, may seize or dispatch the dog, if the dog is found on that person's land or premises without the permission of the person who is in immediate possession of the land.

(b) Notwithstanding subdivision (a), if a dog described in subdivision (a) bears any readily visible identification tag or license tag required by Section 30951 of the Food and Agricultural Code, the dog may be dispatched under this section only if the dog has, and its owner has been notified that the dog has, previously threatened any of these species.

(c) No action, civil or criminal, shall be maintained based on a dog lawfully seized or dispatched pursuant to this section.

(d) If a dog seized or dispatched under this section bears the identification tag or license tag required by Section 30951 of the Food and Agricultural Code, its owner shall be notified within 72 hours of the seizure or dispatch.

Comment. Section 31555 restates former Fish and Game Code Section 3961 without substantive change.

Notes. (1) Proposed Section 31555 is intended to restate existing Fish and Game Code Section 3961 to improve its clarity, without changing its substantive effect. The existing section read as follows:

3961. Whenever an employee of the department is not present to carry out the provisions of Section 3960 with respect to any dog inflicting injury or immediately threatening to inflict injury to any deer, elk, or prong-horned antelope during the closed season for these mammals, any property owner, lessee, person holding a permit for the purpose of grazing livestock, or his or her employee, may seize or dispatch the dog if it is found on his or her land or premises without the

permission of the person who is in immediate possession of the land. If the dog has on it any readily visible identification tag or license tag as prescribed by Section 30951 of the Food and Agricultural Code, and the dog is found in the act of immediately threatening to injure deer, elk, or prong-horned antelope, the dog may only be dispatched under this section if the dog has, and the owner has been notified that the dog has, previously threatened any of these species.

No action, civil or criminal, shall be maintained for a dog lawfully seized or dispatched pursuant to this article.

The owner of a dog shall be notified within 72 hours of the seizure or dispatching of that dog under this section if it had the identification tag or license tag which is required pursuant to Section 30951 of the Food and Agricultural Code.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) The second paragraph of existing Fish and Game Section 3961 provides:

No action, civil or criminal, shall be maintained for a dog lawfully seized or dispatched pursuant to this article.

However, the reference to “article” in this provision is erroneous. Section 3961 is not and never has been contained in an article. In proposed Section 31555, the cross-reference is revised to refer to “this section.” This would parallel language in a related provision, existing Section 3960.

The Commission invites comment on whether that revision is appropriate.

TITLE 3. DEPREDATOR CONTROL

§ 31600. Department take of depredator

31600. The department may take any mammal that it determines is unduly preying on any bird, mammal, or fish.

Comment. Section 31600 continues the second paragraph of former Fish and Game Code Section 4153 without substantive change.

§ 31605. Immature mammals in den

31605. (a) It is unlawful to do either of the following to an immature depredator mammal while it is in its den:

(1) Use a snare, hook, or barbed wire to remove the mammal.

(2) Use fire to kill the mammal.

(b) Nothing in this section shall prohibit the use of fire-ignited gas cartridges or other products registered or permitted under the Federal Insecticide, Rodenticide, and Fungicide Act (7 U.S.C. 136 et seq.).

Comment. Subdivision (a) of Section 31605 restates the first paragraph of former Fish and Game Code Section 4180.1 without substantive change.

Subdivision (b) continues the second paragraph of former Fish and Game Code Section 4180.1 without substantive change.

Notes. (1) Proposed Section 31605 is intended to restate the first paragraph of existing Fish and Game Code Section 4180.1 to clarify the meaning of that sentence, without changing its substantive effect. The existing sentence reads as follows:

It is unlawful to use snares, hooks, or barbed wire to remove from the den, or fire to kill in the den, any immature depredator mammal.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) The Commission invites comment on the meaning of the term “depredator mammal” as used in Section 4180.1.

§ 31610. Identification of depredator

31610. The department shall tag, brand, or otherwise identify in a persistent and distinctive manner any large depredatory mammal relocated by, or relocated with the approval of, the department for game management purposes.

Comment. Section 31610 continues former Fish and Game Code Section 4190 without substantive change.

 **Notes.** (1) Existing Fish and Game Code Section 4190 refers to a “large” depredatory mammal.

The Commission invites comment on whether more precise or descriptive language might be substituted for the word “large” to provide better notice of the scope of the section’s prohibition.

(2) The Commission invites comment on the meaning of the term “depredatory mammal” as used in Section 4190.

PART 2. DISEASE CONTROL

§ 31700. Disease outbreak

31700. (a) Fur-bearing mammals, game mammals, and nongame mammals, when involved in dangerous disease outbreaks, may be taken by duly constituted officials of any of the following:

(1) The United States Department of Agriculture.

(2) The United States Department of the Interior.

(3) The United States Department of Health and Human Services.

(4) The California Department of Food and Agriculture.

(5) The California Department of Public Health.

(6) The department.

(b) A county official may take fur-bearing mammals, game mammals, and nongame mammals pursuant to this section with the prior approval of and in a manner approved by the director or the director’s designee.

Comment. Section 31700 continues former Fish and Game Code Section 4011 without substantive change.

PART 3. CLASSES OF MAMMALS

TITLE 1. GAME MAMMALS

CHAPTER 1. GENERAL PROVISIONS

§ 31800. Waste of game mammal

31800. (a) Except as provided in subdivision (b), no person shall through carelessness or neglect allow any game mammal that is in that person's possession, or any portion of the game mammal's flesh that is usually eaten by humans, to be needlessly wasted.

(b) The prohibition in subdivision (a) does not apply to game mammals taken pursuant to Section 35215, 35610, 35710, or 36010.

Comment. Section 31800 restates the part of the first sentence of former Fish and Game Code Section 4304 applicable to game mammals, and the second sentence of Section 4304, without substantive change.

Notes. (1) Proposed Section 31800 restates part of the first sentence of existing Fish and Game Code Section 4304 applicable to game mammals, and the second sentence of that section, to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

4304. [N]or shall any person at any time leave through carelessness or neglect any game mammal ... which is in his possession, or any portion of the flesh thereof usually eaten by humans, to go needlessly to waste. The provisions of this section shall not apply to game mammals taken under the authority of Sections 4152 and 4183 of this code.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 4183, which is cross-referenced in existing Section 4304, was repealed in 1984. 1984 Cal. Stat. ch. 1365. The repealed section related to taking bears that kill livestock.

The Commission invites comment on whether a reference to a different code section should be substituted for the reference to Section 4183.

§ 31805. Report on reduced-price tags

31805. (a) The department shall prepare a report to the Legislature no later than July 1, 2024, on the effects of the reduced-price tags issued pursuant to Sections 32950, 33300, 34850, and 35900 on rates of participation by junior hunters, the Big Game Management Account, and the Fish and Game Preservation Fund. The department shall collect relevant, sufficient, and appropriate data to evaluate the reduced-price tag program in the report, and make recommendations on improving the cost-effectiveness of those tags.

(b) The report required to be submitted pursuant to subdivision (a) shall be submitted in compliance with Section 9795 of the Government Code.

(c) Pursuant to Section 10231.5 of the Government Code, this section is repealed on July 1, 2028.

1 **Comment.** Section 31805 continues former Fish and Game Code Section 3034 without
2 substantive change.

3 **Note.** Proposed Section 31805 incorporates Section 3034, which was added by 2018 Cal.
4 Stat. ch. 295, § 7. Although that bill will not take effect until 2019, it is included here in
5 anticipation of its effect.

6 CHAPTER 2. BIG GAME MANAGEMENT ACCOUNT

7 **§ 31900. Account established**

8 31900. The Big Game Management Account is hereby established within the
9 Fish and Game Preservation Fund.

10 **Comment.** Section 31900 continues former Fish and Game Code Section 3953(a) without
11 substantive change.

12 **§ 31905. Use of funds**

13 31905. (a) Funds deposited in the Big Game Management Account shall be
14 available for expenditure upon appropriation by the Legislature to the department.
15 These funds shall be expended solely for the purposes set forth in this chapter,
16 Sections 34955, 34960, 35810, and 35815, subdivisions (b) and (c) of Section
17 35825, Sections 35900, 35915, and 37300, and Chapter 6 (commencing with
18 Section 34500) of Title 6 of Part 4 of Division 9, including acquiring land,
19 completing projects, and implementing programs to benefit antelope, elk, deer,
20 wild pigs, bear, and sheep, and expanding public hunting opportunities and related
21 public outreach.

22 (b) Any land acquired with funds from the Big Game Management Account
23 shall be acquired in fee title or protected with a conservation easement and, to the
24 extent possible, be open or provide access to the public for antelope, elk, deer,
25 wild pig, bear, or sheep hunting.

26 (c) The department may also use funds from the Big Game Management
27 Account to pay for administrative and enforcement costs of the programs and
28 activities described in this section. The amount allocated from the account for
29 administrative costs shall be limited to the reasonable costs associated with
30 administration of the programs and activities described in this section.

31 **Comment.** Section 31905 continues former Fish and Game Code Section 3953(c) without
32 substantive change.

33 **§ 31910. Non-profit organizations**

34 31910. The department may make grants to, reimburse, or enter into contracts or
35 other agreements, as defined in subdivision (a) of Section 56205, with nonprofit
36 organizations for the use of the funds from the Big Game Management Account to
37 carry out the purposes of this section, including related habitat conservation
38 projects.

39 **Comment.** Section 31910 continues former Fish and Game Code Section 3953(d) without
40 substantive change.

1 **§ 31915. Advisory committee**

2 31915. An advisory committee, as determined by the department, that includes
3 interested nonprofit organizations that have goals and objectives directly related to
4 the management and conservation of big game species and primarily represent the
5 interests of persons licensed pursuant to Section 10210, shall review and provide
6 comments to the department on all proposed projects funded from the Big Game
7 Management Account, to help ensure that the requirements of this chapter have
8 been met.

9 **Comment.** Section 31915 continues the first sentence of former Fish and Game Code Section
10 3953(e) without substantive change.

11 **§ 31920. Online information**

12 31920. The department shall post, on an Internet website, budget information
13 and a brief description for all projects funded from the Big Game Management
14 Account.

15 **Comment.** Section 31920 continues the second sentence of former Fish and Game Code
16 Section 3953(e) without substantive change.

17 **§ 31925. Exemptions**

18 31925. Big game projects authorized pursuant to this section are not subject to
19 Part 2 (commencing with Section 10100) of Division 2 of the Public Contract
20 Code or Article 6 (commencing with Section 999) of Chapter 6 of Division 4 of
21 the Military and Veterans Code.

22 **Comment.** Section 31925 continues former Fish and Game Code Section 3953(f) without
23 substantive change.

24 **§ 31930. Accountability**

25 31930. The department shall maintain the internal accountability necessary to
26 ensure compliance with the collection, deposit, and expenditure of funds specified
27 in this section.

28 **Comment.** Section 31930 continues former Fish and Game Code Section 3953(g) without
29 substantive change.

30 **§ 31935. Transfer of funds from other accounts**

31 31935. The Augmented Deer Tags Account, Bighorn Sheep Permit Account,
32 and Wild Pig Account, within the Fish and Game Preservation Fund, shall be
33 consolidated and any remaining funds in these accounts transferred to the Big
34 Game Management Account, consistent with Sections 32950, 33305, 34240,
35 34865, 35825, and 37220. The department, after consultation with the Department
36 of Finance and the Legislative Analyst's Office, shall provide recommendations to
37 the Legislature for consolidation of additional dedicated accounts within the Fish
38 and Game Preservation Fund if, in the determination of the department,
39 consolidation would serve to reduce administrative costs to the department and

1 enhance its ability to meet current needs, while still preserving the generally stated
2 purpose of the dedicated accounts.

3 **Comment.** Section 31935 continues former Fish and Game Code Section 13205 without
4 substantive change.

5 TITLE 2. FUR-BEARING MAMMALS

6 § 32150. Allowed methods of taking

7 32150. (a) A fur-bearing mammal may be taken only with a trap, firearm, bow
8 and arrow, dog, or poison.

9 (b) It is unlawful to use poison to take fur-bearing mammals without a permit
10 from the department. The department may issue the permit upon a written
11 application indicating the kind of poison desired to be used and the time and place
12 of use.

13 **Comment.** Subdivision (a) of Section 32150 continues former Fish and Game Code Section
14 4002 without substantive change.

15 Subdivision (b) continues former Fish and Game Code Section 4003 without substantive
16 change.

17 See also Section 4806 (enforcement).

18 § 32155. Take and possession

19 32155. (a) Except as provided by Section 11200, fur-bearing mammals that are
20 injuring property may be taken at any time and in any manner not prohibited by
21 this code or regulations adopted pursuant to this code.

22 (b) Raw fur removed from a fur-bearing mammal that is taken pursuant to
23 subdivision (a) shall not be sold.

24 (c) A trap used to take a fur-bearing mammal pursuant to subdivision (a) shall be
25 inspected, and any animal found in a trap shall be removed, at least once daily.
26 The inspection and removal shall be done by the person who sets the trap, the
27 owner of the land where the trap is set, or an agent of either.

28 **Comment.** Section 32155 continues former Fish and Game Code Section 4180 without
29 substantive change.

30 TITLE 3. NONGAME MAMMALS

31 CHAPTER 1. GENERAL PROVISIONS

32 § 32300. Take or possession

33 32300. A nongame mammal may not be taken or possessed except as provided
34 in this code or in accordance with regulations adopted by the commission.

35 **Comment.** Section 32300 continues the second sentence of former Fish and Game Code
36 Section 4150 without substantive change.

37 See also Section 4806 (enforcement).

§ 32305. Protection of property

32305. (a) Except as provided in paragraph (6) of subdivision (b) of Section 11200, a nongame mammal that is found to be injuring growing crops or other property may be taken by the following persons at any time or in any manner not prohibited by this code or regulations adopted pursuant to this code:

(1) The owner or tenant of the premises.

(2) An employee or agent of the owner or tenant of the premises, who is in immediate possession of written permission from the owner or tenant to take a nongame mammal described in this subdivision.

(3) An officer or employee of the Department of Food and Agriculture.

(4) A federal, county, or city officer or employee acting in official capacity pursuant to provisions of the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(b) A person that takes a nongame mammal pursuant to this section is exempt from Section 9500, except when providing trapping services for a fee.

(c) Raw fur from a nongame mammal taken pursuant to this section shall not be sold.

Comment. Section 32305 restates the part of former Fish and Game Code Section 4152 applicable to nongame mammals without substantive change.

See also Section 11000 (inspection and removal of animals from traps).

Notes. (1) Proposed Section 32305 is intended to restate the part of existing Fish and Game Code Section 4152 applicable to nongame mammals to clarify the meaning of that language, without changing its substantive effect. Existing Section 4152 reads as follows:

4152. (a) Except as provided in Section 4005, nongame mammals and black-tailed jackrabbits, muskrats, subspecies of red fox that are not the native Sierra Nevada red fox (*Vulpes vulpes necator*), and red fox squirrels that are found to be injuring growing crops or other property may be taken at any time or in any manner in accordance with this code and regulations adopted pursuant to this code by the owner or tenant of the premises or employees and agents in immediate possession of written permission from the owner or tenant thereof. They may also be taken by officers or employees of the Department of Food and Agriculture or by federal, county, or city officers or employees when acting in their official capacities pursuant to the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code. Persons taking mammals in accordance with this section are exempt from Section 3007, except when providing trapping services for a fee. Raw furs, as defined in Section 4005, that are taken under this section, shall not be sold.

(b) Traps used pursuant to this section shall be inspected and all animals in the traps shall be removed at least once daily. The inspection and removal shall be done by the person who sets the trap or the owner of the land where the trap is set or an agent of either.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 4152 refers to employees and agents in “immediate possession” of written permission from the owner or tenant of premises where depredators are injuring property.

The Commission invites comment on whether or how the term “immediate possession” differs from “possession,” and whether the more familiar term “possession” could be substituted without substantively changing the meaning of the provision.

1 **§ 32310. Agreements relating to control of harmful nongame mammals**

2 32310. (a) The department may enter into cooperative agreements with any
3 agency of the state or the United States for the purpose of controlling harmful
4 nongame mammals.

5 (b) The department may enter into cooperative contracts with the United States
6 Fish and Wildlife Service in the Department of the Interior for the purpose of
7 controlling or eradicating any nongame mammal, and may expend any money
8 made available to the department for that purpose.

9 **Comment.** Subdivision (a) of Section 32310 continues the first paragraph of former Fish and
10 Game Code Section 4153 without substantive change.

11 Subdivision (b) restates former Fish and Game Code Section 4154 without substantive change.

12 **Note.** Proposed Section 32310(b) restates existing Fish and Game Code Section 4154 to
13 improve its clarity, without changing its substantive effect. The existing provision reads as
14 follows:

15 4154. The department may enter into cooperative contracts with the United States Fish and
16 Wildlife Service in the Department of the Interior in relation to the control of nongame mammals
17 and for that purpose may expend any money made available to the department for expenditure for
18 control or eradication of nongame mammals.

19 **The Commission invites comment on whether the proposed restatement would cause any**
20 **substantive change in the meaning of the provision.**

21 CHAPTER 2. MARINE MAMMALS

22 **§ 32500. Taking**

23 32500. (a) It is unlawful to take any marine mammal except in accordance with
24 provisions of the Marine Mammal Protection Act of 1972 (Chapter 31
25 (commencing with Section 1361) of Title 16 of the United States Code) or
26 provisions of Title 50 of the Code of Federal Regulations, or pursuant to
27 subdivision (b) of this section.

28 (b) If federal laws or regulations permit the state to assume jurisdiction over
29 marine mammals, the commission may adopt regulations governing marine
30 mammals and the taking of marine mammals.

31 (c) For purposes of this section, “marine mammals” means sea otters, whales,
32 dolphins, porpoises, seals, and sea lions.

33 **Comment.** Section 32500 continues former Fish and Game Code Section 4500 without
34 substantive change.

35 See also Section 5520 (enforcement).

36 TITLE 4. FULLY PROTECTED MAMMALS

37 **§ 32700. Take generally prohibited**

38 32700. (a) Except as provided in this part, Article 1 (commencing with Section
39 63300) of Chapter 4 of Title 3 of Part 1 of Division 17 or Section 64605, a fully
40 protected mammal may not be taken or possessed at any time.

(b) No provision of this code or any other law shall be construed to authorize the issuance of a permit or license to take any fully protected mammal, and no issued permit or license shall have any force or effect for that purpose.

Comment. Subdivisions (a) and (b) of Section 32700 continue the first two sentences of former Fish and Game Code Section 4700(a)(1) without substantive change.

See also Section 5400 (enforcement).

Note. Existing Fish and Game Code Section 4700(a)(1) provides that “Except as provided in Section 2081.7 or 2835, fully protected mammals or parts thereof may not be taken or possessed at any time.” However, Section 4700 itself (which would be continued by the provisions in this proposed title) provides exceptions to that prohibition.

In addition, existing Section 4902 (which would be continued by proposed Sections 35900) provides for limited sport hunting of a category of bighorn sheep (mature Nelson bighorn rams), which are generally classified by existing Section 4700(b)(2) as fully protected mammals.

Proposed Section 32700 would therefore restate the list of provisions containing exceptions to the prohibition against the take or possession of fully protected mammals to include the provisions of this part.

The Commission invites comment on whether that restatement would substantively change the meaning of existing Section 4700(a)(1).

§ 32705. Take for scientific purposes

32705. (a) The department may authorize the taking of a fully protected mammal for necessary scientific research, including efforts to recover fully protected, threatened, or endangered species, subject to the following:

(1) Before authorizing the take of a fully protected mammal, the department shall make an effort to notify all affected and interested parties to solicit information and comments on the proposed authorization.

(2) The notification shall be published in the California Regulatory Notice Register, and be made available to each person who has notified the department, in writing, of that person’s interest in fully protected species and has provided an email address, if available, or postal address to the department.

(3) Affected and interested parties shall have 30 days after notification is published in the California Regulatory Notice Register to provide relevant information and comments on the proposed authorization.

(b) As used in this section, “scientific research” does not include an action taken as part of specified mitigation for a project, as defined in Section 21065 of the Public Resources Code.

Comment. Section 32705 continues the third through sixth sentences of former Fish and Game Code Section 4700(a)(1), and Section 4700(a)(2), without substantive change.

§ 32710. Imported animal

32710. A legally imported fully protected mammal may be possessed under a permit issued by the department.

Comment. Section 32710 continues former Fish and Game Code Section 4700(a)(3) without substantive change.

PART 4. SPECIFIC TYPES OF MAMMALS

TITLE 1. ANTELOPE

CHAPTER 1. GENERAL PROVISIONS

§ 32900. Classification

32900. For the purposes of this code, a prong-horned antelope (genus *Antilocapra*) is a game mammal.

Comment. Section 32900 continues the part of former Fish and Game Code Section 3950(a) applicable to antelope without substantive change.

§ 32905. Provisions not exclusive

32905. The provisions of this title are not intended to be exclusive. Other provisions that govern antelope include, but are not limited to, the following provisions:

(a) Section 31555.

(b) Section 4570.

Comment. Section 32905 is new. It is added for drafting convenience.

CHAPTER 2. TAGS

§ 32950. Issuance of tags (operative until July 1, 2025)

32950. (a) The commission may determine and fix the area or areas, the seasons and hours, the bag and possession limit, and the sex and total number of pronghorn antelope (*Antilocapra americana*) that may be taken under regulations that the commission may adopt from time to time. Only a person possessing a valid hunting license may obtain a tag for the taking of pronghorn antelope.

(b) The department may issue a pronghorn antelope tag upon payment of a fee. The fee for a pronghorn antelope tag for a resident of the state, except for a pronghorn antelope tag issued to a resident junior hunter, shall be fifty-five dollars (\$55), as adjusted under Section 3755. The fee for a pronghorn antelope tag for a resident junior hunter shall be twenty dollars (\$20), as adjusted under Section 3755. On or before July 1, 2007, the commission shall, by regulation, fix the fee for a nonresident of the state at not less than a fee of three hundred fifty dollars (\$350), as adjusted under Section 3755. The fees shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended, in addition to moneys budgeted for salaries of persons in the department as set forth in Section 31900.

(c) The commission shall direct the department to annually authorize not less than one pronghorn antelope tag or more than 1 percent of the total number of tags available for the purpose of raising funds for programs and projects to benefit

1 pronghorn antelope. These tags may be sold at auction to residents or nonresidents
2 of the state or by another method and are not subject to the fee limitation
3 prescribed in subdivision (b). All revenues from sales pursuant to this subdivision
4 shall be deposited in the Big Game Management Account established in Section
5 31900 and, upon appropriation by the Legislature, shall be expended as set forth in
6 that section.

7 (d) The commission shall direct the department to annually authorize one
8 pronghorn antelope tag of the total number of tags available for issuance to
9 nonresidents of the state.

10 (e) This section shall become inoperative on July 1, 2025, and, as of January 1,
11 2026, is repealed.

12 **Comment.** Section 32950 continues former Fish and Game Code Section 331, as amended by
13 2018 Cal. Stat. ch. 295, § 1, without substantive change.

14 **Note.** This version of proposed Section 32950 would continue Section 331, as amended by
15 2018 Cal. Stat. ch. 295, § 1. Although that bill will not take effect until 2019, it is included here in
16 anticipation of its effect.

17 **§ 32950. Issuance of tags (operative July 1, 2025)**

18 32950. (a) The commission may determine and fix the area or areas, the seasons
19 and hours, the bag and possession limit, and the sex and total number of pronghorn
20 antelope (*Antilocapra americana*) that may be taken under regulations that the
21 commission may adopt from time to time. Only a person possessing a valid
22 hunting license, who has not received a pronghorn antelope tag under these
23 provisions during a period of time specified by the commission, may obtain a tag
24 for the taking of pronghorn antelope.

25 (b) The department may issue a pronghorn antelope tag upon payment of a fee.
26 The fee for a pronghorn antelope tag shall be fifty-five dollars (\$55) for a resident
27 of the state, as adjusted under Section 3755. On or before July 1, 2007, the
28 commission shall, by regulation, fix the fee for a nonresident of the state at not
29 less than a fee of three hundred fifty dollars (\$350), as adjusted under Section
30 3755. The fees shall be deposited in the Big Game Management Account
31 established in Section 3953 and, upon appropriation by the Legislature, shall be
32 expended, in addition to moneys budgeted for salaries of persons in the
33 department as set forth in Section 3953.

34 (c) The commission shall direct the department to annually authorize not less
35 than one pronghorn antelope tag or more than 1 percent of the total number of tags
36 available for the purpose of raising funds for programs and projects to benefit
37 pronghorn antelope. These tags may be sold at auction to residents or nonresidents
38 of the state or by another method and are not subject to the fee limitation
39 prescribed in subdivision (b). All revenues from sales pursuant to this subdivision
40 shall be deposited in the Big Game Management Account established in Section
41 3953 and, upon appropriation by the Legislature, shall be expended as set forth in
42 that section.

(d) The commission shall direct the department to annually authorize one pronghorn antelope tag of the total number of tags available for issuance to nonresidents of the state.

(e) This section shall become operative on July 1, 2025.

Comment. Section 32950 continues former Fish and Game Code Section 331, as added by 2018 Cal. Stat. ch. 295, § 2, without substantive change.

Note. This version of proposed Section 32950 would continue Section 331, as added by 2018 Cal. Stat. ch. 295, § 2. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 32960. Deposit of fees

32960. Except as provided in Section 32965, all revenues from the sale of antelope tags, including any fundraising tags, shall be deposited in the Big Game Management Account established in Section 31900 to permit separate accountability for the receipt and expenditure of these funds.

Comment. Section 32960 continues the part of the first sentence of former Fish and Game Code Section 3953(b) applicable to antelope without substantive change.

§ 32965. Sale of tag by nonprofit organization

32965. (a) A nonprofit organization designated by the department to assist in the sale of antelope fundraising tags that are sold on behalf of the department for the purpose of raising funds for specified programs and projects pursuant to subdivision (a) of Section 32950 is authorized to retain 5 percent of the amount of the sale price of the tag as a reasonable vendor fee.

(b) Within 30 days of the date of the sale, the selling nonprofit organization shall send the department 95 percent of the total auction sale price of the tag, with an itemized receipt showing the sale price and the 5-percent reduction retained by the nonprofit organization as a vendor's fee.

Comment. Subdivision (a) of Section 32965 continues the part of former Fish and Game Code Section 709 applicable to antelope without substantive change.

Subdivision (b) continues the part of the second sentence of former Fish and Game Code Section 3953(b) applicable to antelope without substantive change.

TITLE 2. BEAR

CHAPTER 1. GENERAL PROVISIONS

§ 33100. Classification

33100. For the purposes of this code, a black bear, brown bear, and cinnamon bear (genus *Euarctos*) are game mammals.

Comment. Section 33100 continues the part of former Fish and Game Code Section 3950(a) applicable to black, brown, and cinnamon bears, without substantive change.

1 **§ 33105. Provisions not exclusive**

2 33105. The provisions of this title are not intended to be exclusive. Other
3 provisions that govern bear include, but are not limited to, Section 26765.

4 **Comment.** Section 33105 is new. It is added for drafting convenience.

5 **§ 33110. Bear taken out of state**

6 33110. The provisions of this title relating to the possession of bear also apply to
7 bear taken outside this state and transported into this state.

8 **Comment.** Section 33110 continues former Fish and Game Code Section 4760 without
9 substantive change.

10 CHAPTER 2. TAKE GENERALLY

11 **§ 33200. Metal-jawed trap prohibited**

12 33200. No person, including an employee of the state, federal or a county
13 government, shall take a bear using an iron-jawed, steel-jawed or other type of
14 metal-jawed trap, and no provision of this code or any other law shall be construed
15 to authorize, or to permit the authorizing of, the use of an iron-jawed, steel-jawed
16 or other type of metal-jawed trap, to take a bear.

17 **Comment.** Section 33200 continues former Fish and Game Code Section 3011 without
18 substantive change.

19 **§ 33205. Tag required**

20 33205. It is unlawful to take any bear with a firearm, trap, or bow and arrow,
21 without first procuring a tag authorizing the taking of that bear in accordance with
22 this chapter, but no iron or steel-jawed or any type of metal-jawed trap shall be
23 used to take any bear.

24 **Comment.** Section 33205 continues former Fish and Game Code Section 4750 without
25 substantive change.

26 See also Sections 4704, 4860, 5464 (enforcement).

27 **§ 33210. Use of tag**

28 33210. (a) The person to whom a bear tag has been issued shall carry the tag
29 while hunting bear. Upon the killing of any bear, that person shall immediately fill
30 out the tag completely, legibly, and permanently, and cut out or punch out and
31 completely remove notches or punch holes for the month and the date of the kill.
32 One part of the tag shall be immediately attached to the ear of the bear and kept
33 attached during the open season and for 15 days thereafter. The holder of the bear
34 tag shall immediately, upon harvesting a bear, notify the department in a manner
35 specified by the commission.

36 (b) Except as otherwise provided by this code or regulations adopted pursuant to
37 this code, it is unlawful to possess any untagged bear.

38 **Comment.** Section 33210 continues former Fish and Game Code Section 4753 without
39 substantive change.

Note. The Commission invites comment on whether a more common term could be substituted for the word “harvesting” as used in existing Fish and Game Code Section 4753.

§ 33215. Countersigning

33215. Any person legally killing a bear in this state shall have the tag for that bear countersigned by a commissioner, a person employed by the department, a person designated for that purpose by the commission, a notary public, a postmaster, a peace officer, or an officer authorized to administer oaths, before transporting the bear, except to transport the bear to the nearest person authorized by this section to countersign the tag on the route from where the bear is taken to that person.

Comment. Section 33215 restates former Fish and Game Code Section 4755 without substantive change.

Note. Proposed Section 33215 is intended to restate existing Fish and Game Code Section 4755 to improve its clarity, without changing its substantive effect. The existing provisions read as follows:

4755. Any person legally killing a bear in this state shall have the tag countersigned by a fish and game commissioner, a person employed in the department, a person designated for this purpose by the commission, or by a notary public, postmaster, postmistress, peace officer or by an officer authorized to administer oaths, before transporting that bear except for the purpose of taking it to the nearest officer authorized to countersign the tag, on the route being followed from the point where the bear is taken.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 33220. Retention of skin and head

33220. Any person taking a bear must retain possession of the skin of the bear, and the portion of the bear’s head that includes both ears, during the open season for that bear and for 15 days thereafter, and must produce the skin and that portion of the head upon the demand of any officer authorized to enforce the provisions of this code.

Comment. Section 33220 restates former Fish and Game Code Section 4757 without substantive change.

Note. Proposed Section 33220 is intended to restate existing Fish and Game Code Section 4757 to improve its clarity, without changing its substantive effect. The existing provisions read as follows:

4757. Any person taking any bear must retain in his possession during the open season thereon, and for 15 days thereafter, the skin and portion of the head bearing the ears, and must produce the skin and portion of the head upon the demand of any officer authorized to enforce the provisions of this code.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

1 **§ 33225. Killing bear held in captivity**

2 33225. Except as authorized under a domesticated game breeder's license, a
3 bear kept in captivity may be killed only with the approval of the department, and
4 pursuant to any regulation that the commission may adopt. The carcass of a bear
5 kept in captivity may not be sold, and shall be disposed of as directed by the
6 department.

7 **Comment.** Section 33225 continues the part of former Fish and Game Code Section 3006
8 applicable to bears without substantive change.

9 CHAPTER 3. TAGS

10 **§ 33300. Issuance of tag (operative until July 1, 2025)**

11 33300. (a) Any resident of this state, 18 years of age or older, who possesses a
12 valid hunting license, may procure the number of bear tags corresponding to the
13 number of bear that may legally be taken by one person during the current license
14 year, upon payment of a base fee of fifteen dollars (\$15), as adjusted under Section
15 3755, for each bear tag.

16 (b) Any resident of this state, who possesses a valid junior hunting license and is
17 at least 12 years of age, may procure the number of bear tags corresponding to the
18 number of bear that may legally be taken by one person during the current license
19 year, upon payment of a base fee of twenty dollars (\$20), as adjusted under
20 Section 3755, for each bear tag.

21 (c) Any nonresident of this state, 12 years of age or older, who possesses a valid
22 California hunting license, may procure the number of bear tags corresponding to
23 the number of bear that may be legally taken by one person during the current
24 license year upon payment of the base fee of one hundred five dollars (\$105), as
25 adjusted under Section 3755, for each bear tag.

26 (d) Fee revenues collected pursuant to this section shall be deposited in the Big
27 Game Management Account established in Section 31900 and, upon appropriation
28 by the Legislature, shall be expended as set forth in that section.

29 (e) This section shall become inoperative on July 1, 2025, and, as of January 1,
30 2026, is repealed.

31 **Comment.** Section 33300 continues former Fish and Game Code Section 4751, as amended by
32 2018 Cal. Stat. ch. 295, § 8, without substantive change.

33  **Note.** This version of proposed Section 33300 would continue Section 4751, as amended by
34 2018 Cal. Stat. ch. 295, § 8. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

36 **§ 33300. Issuance of tag (operative on July 1, 2025)**

37 33300. (a) Any resident of this state, 12 years of age or older, who possesses a
38 valid hunting license, may procure the number of bear tags corresponding to the
39 number of bear that may legally be taken by one person during the current license
40 year, upon payment of a base fee of fifteen dollars (\$15), as adjusted under Section

3755, for each bear tag. Fee revenues collected pursuant to this subdivision shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

(b) Any nonresident of this state, 12 years of age or older, who possesses a valid California hunting license, may procure the number of bear tags corresponding to the number of bear that may be legally taken by one person during the current license year upon payment of the base fee of one hundred five dollars (\$105), as adjusted under Section 31900, for each bear tag. Fee revenues collected pursuant to this subdivision shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

(c) This section shall become operative on July 1, 2025.

Comment. Section 33300 continues former Fish and Game Code Section 4751, as added by 2018 Cal. Stat. ch. 295, § 9, without substantive change.

Note. This version of proposed Section 33300 would continue Section 4751, as added by 2018 Cal. Stat. ch. 295, § 9. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 33305. Deposit of fees

33305. All revenues from the sale of bear tags, including any fundraising tags, shall be deposited in the Big Game Management Account established in Section 31900 to permit separate accountability for the receipt and expenditure of these funds.

Comment. Section 33305 continues the part of the first sentence of former Fish and Game Code Section 3953(b) applicable to bears without substantive change.

§ 33310. Time period when tags are valid

33310. Bear tags are valid only during that portion of the current hunting license year in which a bear may be taken or possessed in any district.

Comment. Section 33310 continues former Fish and Game Code Section 4752 without substantive change.

CHAPTER 4. POPULATION MANAGEMENT

§ 33400. Seasons

33400. (a) When adopting regulations pursuant to any authority otherwise vested in the commission by this code, the commission shall annually determine whether to continue, repeal, or amend regulations establishing hunting seasons for black bears. The determination shall include a review of factors that impact the health and viability of the black bear population.

(b) Prior to adopting a regulation authorizing a special hunting season for black bears for the purpose of curtailing property damage in any specified area, the

commission shall comply with Title 4 (commencing with Section 10500) of Part 2 of Division 6.

Comment. Subdivision (a) of Section 33400 continues former Fish and Game Code Section 302 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 303 without substantive change.

CHAPTER 5. USE OF PARTS

§ 33450. Personal use of bear parts

33450. (a) The skin, hide, teeth, claws, or other parts of any bear lawfully taken and possessed for the period provided in Section 33220 may be tanned or otherwise used for personal use only.

(b) Notwithstanding the provisions of Section 33220, the skin, hide, teeth, claws, or other parts of any bear lawfully taken may be donated at any time to a veterans' organization or veterans' service committee for use by veterans for rehabilitation purposes. If the donation occurs during the retention period specified in Section 33220, the donor shall obtain a receipt and retain it for the donation for the duration of that period.

Comment. Subdivision (a) of Section 33450 continues the first sentence of former Fish and Game Code Section 4759 without substantive change.

Subdivision (b) restates the second and third sentences of former Fish and Game Code Section 4759 without substantive change.

Note. Subdivision (b) of proposed Section 33450 is intended to restate the second and third sentences of existing Fish and Game Code Section 4759 to improve its clarity, without changing its substantive effect. The existing provisions read as follows:

Notwithstanding the provisions of Section 4757, the skin, hide, teeth, claws, or other parts of any bear lawfully taken may be donated any time to veterans' organizations or veterans' service committees for use by veterans for rehabilitation purposes. The donor shall obtain a receipt which shall be retained during the period stipulated by Section 4757.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of those sentences.

§ 33455. Commercial use of bear parts

33455. (a) Subject to the provisions of this code permitting the sale of domestically raised game mammals, it is unlawful to sell or purchase, or possess for sale, the meat, skin, hide, teeth, claws, or other parts of any bear in this state.

(b) For the purposes of subdivision (a), possession of more than one bear gall bladder is prima facie evidence that the bear gall bladders are possessed for sale.

(c) Nothing in this section prohibits a sale authorized pursuant to Section 10830.

Comment. Section 33455 continues former Fish and Game Code Section 4758 without substantive change.

See also Sections 4704, 5462, 5464 (enforcement).

CHAPTER 6. TAKE TO PROTECT PROPERTY

§ 33500. Take to protect property

33500. The following provisions do not apply to the taking of bear that is authorized to protect livestock, land, or property from damage or threatened damage from bear:

- (a) Section 33110.
- (b) Section 33210.
- (c) Section 33215.
- (d) Section 33220.
- (e) Section 33300.
- (f) Section 33310.
- (g) Section 33450.
- (h) Section 33455.
- (i) Section 33500.

Comment. Section 33500 continues former Fish and Game Code Section 4763 without substantive change.

§ 33505. Protection of livestock or crops

33505. (a) As used in this section, the terms “bear” and “pursue” have the same meanings as defined in Section 31500.

(b) Notwithstanding Section 31510, dogs that are guarding or protecting livestock or crops on property owned, leased, or rented by the owner of the dogs may be used to pursue a bear, if the dogs are maintained with, and remain in reasonable proximity to, the livestock or crops being guarded or protected.

Comment. Section 33505 continues the part of former Fish and Game Code Section 3960.6 applicable to bears without substantive change.

§ 33510. Bear killing livestock

33510. (a) A bear encountered in the act of inflicting injury to, molesting, or killing, livestock may be taken immediately by the owner of the livestock or the owner’s employee, subject to subdivision (e) and the following requirements:

(1) The taking shall be reported to the department no later than the next working day.

(2) The carcass of any bear taken is made available to the department.

(b) The department shall make a record of each report made pursuant to subdivision (a), and may have an employee of the department investigate the taking, or cause the taking to be investigated. Upon completion of an investigation, the investigator may, upon a finding that the requirements of this section have been met with respect to a bear taken under subdivision (a), issue a written statement to the person taking the bear, confirming that the requirements of this section have been met.

1 (c) Notwithstanding Section 33500, any part of a bear lawfully possessed
2 pursuant to this section is subject to Section 33455.

3 (d) Nothing in this section prohibits a federal, state, or county trapper from
4 killing or trapping a bear that is killing or molesting livestock.

5 **Comment.** Subdivision (a) of Section 33510 continues former Fish and Game Code Section
6 4181.1(a) without substantive change.

7 Subdivision (b) continues the part of former Fish and Game Code Section 4181.1(c) applicable
8 to bear without substantive change.

9 Subdivision (c) continues former Fish and Game Code Section 4181.1(d) without substantive
10 change.

11 Subdivision (d) continues former Fish and Game Code Section 4181.1(e) without substantive
12 change.

13 **§ 33515. Use of dogs**

14 33515. (a) As used in this section, the terms “bear” and “pursue” have the same
15 meanings as defined in Section 31500.

16 (b) Notwithstanding Section 31510, not more than three dogs may be used to
17 pursue a bear pursuant to a depredation permit issued by the department, if all of
18 the following conditions are met:

19 (1) The applicant demonstrates, in writing, that nonlethal and avoidance
20 measures were undertaken prior to requesting the depredation permit.

21 (2) The applicant demonstrates, in writing, the specific need for the use of dogs
22 in carrying out the depredation permit.

23 (3) The depredation permit authorizing the use of dogs is valid for the take of
24 one bear.

25 (4) The depredation permit authorizing the use of dogs is valid for a period not
26 to exceed 20 consecutive days.

27 (5) The depredation permit specifies the name and address of any dog handler
28 who will be utilized in the pursuit or taking.

29 (6) The dog handler has the depredation permit in his or her possession at all
30 times during the pursuit or taking.

31 (7) The dog handler does not pursue a bear more than one mile off the property
32 on which the depredation activity occurred.

33 (c) After any taking of a bear, the applicant is required to submit the skull to the
34 department as described in the department’s Black Bear Management Plan. No
35 part of any bear taken pursuant to a depredation permit may be sold, purchased, or
36 possessed for sale, as described in Section 33455.

37 (d) No holder of a depredation permit may solicit or receive compensation from
38 any person in exchange for carrying out the terms of the permit. For the purpose of
39 this subdivision, “compensation” means remuneration paid in money, property, or
40 anything else of value.

41 (e) The holder of a depredation permit, within 30 days of its issuance, shall
42 report to the department detailing the use of the permit and the results of any

pursuits, including information about bear pursued and whether the bear was or was not harmed, but not killed.

Comment. Section 33515 continues the part of former Fish and Game Code Section 3960.2 applicable to bears without substantive change.

Note. Existing Fish and Game Code Section 3960.2 and a number of other existing code sections refer to the issuance by the department of a “depredation permit.” However, there appear to be no sections in the existing code that either authorize the Department to issue such permits, or specify any process relating to the issuance of such permit.

The Commission invites comment on whether a provision should be added to the proposed law providing general authorization for the issuance of such permits.

§ 33520. Depredation permit

33520. (a) Except as provided in Section 33510, an owner or tenant of land or property that is being damaged or destroyed, or is in danger of being damaged or destroyed, by bear, may apply to the department for a permit to kill the bear causing or threatening the damage or destruction.

(b) Subject to the limitations in subdivision (e), the department, upon satisfactory evidence of actual or immediately threatened damage or destruction of land or property, shall issue a revocable permit for the taking and disposition of the responsible bear, under regulations adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions.

(c) Bear taken under a permit issued pursuant to subdivision (b) shall not be sold or shipped from the premises on which they are taken, except pursuant to instructions from the department.

(d) No iron-jawed, steel-jawed, or any other type of metal-jawed trap shall be used to take any bear pursuant to this section.

(e) The permit issued for taking bear pursuant to subdivision (a) shall contain the following facts:

(1) Why the issuance of the permit was necessary.

(2) What efforts were made to prevent the actual or immediately threatened damage or destruction without killing the bear or bears.

(3) What corrective actions should be implemented to prevent reoccurrence of the damage or destruction.

(f) It is unlawful for any person to violate the terms of any permit issued pursuant to this section.

Comment. Subdivisions (a) through (d) and (f) of Section 33520 restate the part of former Fish and Game Code Section 4181(a) applicable to bear without substantive change.

Subdivision (e) continues former Fish and Game Code Section 4181(b) without substantive change.

Note. Proposed Section 33520(a)-(d) and (f) are intended to restate the part of existing Fish and Game Code Section 4181(a) applicable to bear to clarify the meaning of that language, without changing its substantive effect. Existing Section 4181 reads as follows:

4181. (a) Except as provided in Section 4181.1, any owner or tenant of land or property that is being damaged or destroyed or is in danger of being damaged or destroyed by elk, bear, beaver, wild pig, wild turkeys, or gray squirrels, may apply to the department for a permit to kill the animals. Subject to the limitations in subdivisions (b) and (d), the department, upon satisfactory evidence of the damage or destruction, actual or immediately threatened, shall issue a revocable permit for the taking and disposition of the animals under regulations adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions. Animals so taken shall not be sold or shipped from the premises on which they are taken except under instructions from the department. No iron-jawed or steel-jawed or any type of metal-jawed trap shall be used to take any bear pursuant to this section. No poison of any type may be used to take any gray squirrel or wild turkey pursuant to this section. The department shall designate the type of trap to be used to ensure the most humane method is used to trap gray squirrels. The department may require trapped squirrels to be released in parks or other nonagricultural areas. It is unlawful for any person to violate the terms of any permit issued under this section.

(b) The permit issued for taking bears pursuant to subdivision (a) shall contain the following facts:

- (1) Why the issuance of the permit was necessary.
- (2) What efforts were made to solve the problem without killing the bears.
- (3) What corrective actions should be implemented to prevent reoccurrence.
- (c)...
- (d)...

The reference in existing Section 4181 to subdivision (d) of Section 4181 has not been continued in proposed Section 33520, as that provision does not apply to bears.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

CHAPTER 7. TAKE FOR SCIENTIFIC PURPOSES

§ 33600. Scientific research

33600. (a) As used in this section, the terms “bear” and “pursue” have the same meanings as defined in Section 31500.

(b) Notwithstanding Section 31510, the department may authorize qualified individuals, educational institutions, governmental agencies, or nongovernmental organizations to use dogs to pursue bears for the purpose of scientific research, provided that the research project is designed to do all of the following:

- (1) Contribute to knowledge of natural wildlife ecosystems.
- (2) Follow best practices and minimize disruptions in the lives and movements of bears and other wildlife, as well as impacts to the habitat while maintaining the applicant’s objectives.
- (3) Directly or indirectly support the sustainability and survival of bear populations and healthy ecosystems.
- (4) Exclude the intentional injury or killing of any bear.
- (5) Exclude the intentional relocation of any bear other than to areas suitable to them in the state. Any relocation shall comply with the requirements of Section 31610.

(c) Any research project authorized pursuant to subdivision (b) shall be undertaken pursuant to a memorandum of understanding between the department and the authorized research entity that addresses all of the following:

(1) Trapping and anesthetizing of the animals pursued, collection of diagnostic samples, attaching or surgically implanting monitoring or recognition devices or markings, and providing veterinary care or euthanasia, as required, for the health, safety, and humane treatment of the animals.

(2) Qualifications of onsite field supervisors necessary for carrying out authorized research procedures.

(3) Immediate reporting of any incidental mortality or injury to a bear as a result of authorized research activities. Reports of any incidental mortality or injury to a bear shall be made available to the public upon request.

(4) Filing of annual and final progress reports of research involving pursuit by dogs. Annual and final progress reports shall be made available to the public upon request.

(d) The department shall provide notice to the public of any bear research project authorized pursuant to subdivision (b) at least 30 days prior to its initiation, and, upon request, shall make available to the public copies of the memorandum of understanding between the department and the authorized research entity required pursuant to subdivision (c).

Comment. Section 33600 continues the part of former Fish and Game Code Section 3960.4 applicable to bears without substantive change.

Note. Existing Fish and Game Code Section 3960.4 authorizes the Department to use dogs to pursue bears *or* bobcats for scientific research, provided the research project meets certain conditions. Among those conditions are safeguards that generally protect against harm to any “bear *or* bobcat.” See Section 3960.4(b)(3), (4), (5) (which would be continued by proposed Section 33600(b)(3), (4), (5)).

Proposed Section 33600 would continue the provisions of Section 3960.4 that relate only to the pursuit and protection of bears, and all references to bobcats have therefore been deleted from the proposed section. (The provisions of Section 3960.4 that relate to the pursuit and protection of bobcats are continued elsewhere.)

The Commission invites comment on whether any of the deletions of the references to bobcats in this section would cause any substantive change in the meaning of any provision in Section 3960.4.

CHAPTER 8. MISCELLANEOUS PROVISIONS

§ 33650. Bears within San Bernardino and Riverside counties

33650. In any district or part of a district located within either San Bernardino or Riverside counties, a bear may be taken at any time with traps, if all of the following conditions are satisfied:

(a) The traps are set inside a good and substantial fence, as defined by Section 17121 of the Food and Agricultural Code.

(b) The fence surrounds one or more beehives.

(c) No part of the fence is at a distance greater than 50 yards from a beehive.

(d) A conspicuous sign is posted and maintained at each entrance to the enclosed premises, warning of the presence of the traps.

(e) No iron-jawed, steel-jawed, or any other type of metal-jawed trap is used.

Comment. Section 33650 continues former Fish and Game Code Section 4185 without substantive change.

TITLE 3. BEAVER

§ 33700. Fur-bearing mammal

33700. For the purposes of this code, a beaver is a fur-bearing mammal.

Comment. Section 33700 continues the part of former Fish and Game Code Section 4000 applicable to beavers without substantive change.

§ 33705. Provisions not exclusive

33705. The provisions of this title are not intended to be exclusive. Other provisions that govern beaver include, but are not limited to, Section 11010.

Comment. Section 33705 is new. It is added for drafting convenience.

§ 33710. Depredation permit

33710. (a) An owner or tenant of land or property that is being damaged or destroyed, or is in danger of being damaged or destroyed, by beaver, may apply to the department for a permit to kill the beaver causing or threatening the damage or destruction.

(b) The department, upon satisfactory evidence of actual or immediately threatened damage or destruction of land or property, shall issue a revocable permit for the taking and disposition of the responsible beaver, under regulations adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions.

(c) Beaver taken under a permit issued pursuant to subdivision (b) shall not be sold or shipped from the premises on which they are taken, except pursuant to instructions from the department.

(d) It is unlawful for any person to violate the terms of any permit issued pursuant to this section.

Comment. Section 33710 restates the part of former Fish and Game Code Section 4181(a) applicable to beaver without substantive change.

Note. Proposed Section 33710 is intended to restate the part of existing Fish and Game Code Section 4181(a) applicable to beaver to clarify the meaning of that language, without changing its substantive effect. Existing Section 4181 reads as follows:

4181. (a) Except as provided in Section 4181.1, any owner or tenant of land or property that is being damaged or destroyed or is in danger of being damaged or destroyed by elk, bear, beaver, wild pig, wild turkeys, or gray squirrels, may apply to the department for a permit to kill the animals. Subject to the limitations in subdivisions (b) and (d), the department, upon satisfactory evidence of the damage or destruction, actual or immediately threatened, shall issue a revocable permit for the taking and disposition of the animals under regulations adopted by the commission.

The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions. Animals so taken shall not be sold or shipped from the premises on which they are taken except under instructions from the department. No iron-jawed or steel-jawed or any type of metal-jawed trap shall be used to take any bear pursuant to this section. No poison of any type may be used to take any gray squirrel or wild turkey pursuant to this section. The department shall designate the type of trap to be used to ensure the most humane method is used to trap gray squirrels. The department may require trapped squirrels to be released in parks or other nonagricultural areas. It is unlawful for any person to violate the terms of any permit issued under this section.

The references in existing Section 4181 to existing Section 4181.1 and to subdivisions (b) and (d) of Section 4181 have not been continued in proposed Section 31110, as those provisions do not apply to beavers.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

TITLE 4. BOBCAT

CHAPTER 1. GENERAL PROVISIONS

§ 33750. Provisions not exclusive

33750. The provisions of this title are not intended to be exclusive. Other provisions that govern bobcats include, but are not limited to, the following provisions:

(a) Section 31510.

(b) Section 31550.

Comment. Section 33750 is new. It is added for drafting convenience.

§ 33755. Definition of “pursue”

33755. As used in this title, the term “pursue” has the same meaning as defined in Section 31500.

Comment. Section 33755 continues the parts of former Fish and Game Code Sections 3960.2, 3960.4, and 3960.6 applicable to the word “pursue” without substantive change.

CHAPTER 2. TAKE GENERALLY

§ 33800. Trapping on private land

33800. (a) Notwithstanding Section 9580 or any other provision of this code, on and after January 1, 2014, it shall be unlawful to trap a bobcat, or attempt to do so, on private land not belonging to the trapper without the express written consent of the owner of that property.

(b) The placing or possession of a trap or the possession of a bobcat on land is prima facie evidence of a violation of this section.

Comment. Section 33800 continues former Fish and Game Code Section 4155(d) without substantive change.

1 **§ 33805. Joshua Tree National Park**

2 33805. Commencing January 1, 2014, it shall be unlawful to trap a bobcat, or
3 attempt to do so, or to sell or export a bobcat taken in the area surrounding Joshua
4 Tree National Park, defined as follows: East and South of State Highway 62 from
5 the intersection of Interstate 10 to the intersection of State Highway 177; West of
6 State Highway 177 from the intersection of State Highway 62 to the intersection
7 with Interstate 10; North of Interstate 10 from State Highway 177 to State
8 Highway 62.

9 **Comment.** Section 33805 continues former Fish and Game Code Section 4155(a) without
10 substantive change.

11 **§ 33810. Parks, preserves, and conservancies**

12 33810. (a) Through the commission's next regularly scheduled mammal
13 hunting and trapping rulemaking process occurring after January 1, 2014, the
14 commission shall amend its regulations to prohibit the trapping of bobcats
15 adjacent to the boundaries of each national or state park and national monument or
16 wildlife refuge in which bobcat trapping is prohibited.

17 (b) Commencing January 1, 2016, the commission shall consider whether to
18 prohibit bobcat trapping within, and adjacent to, preserves, state conservancies,
19 and any additional public or private conservation areas identified to the
20 commission by the public as warranting protection. The commission, as necessary,
21 shall amend its regulations through its next subsequently scheduled mammal
22 hunting and trapping rulemaking process to prohibit bobcat trapping in any area
23 determined by the commission to warrant protection.

24 (c) The commission shall delineate the boundaries of an area in which bobcat
25 trapping is prohibited pursuant to subdivisions (a) or (b) using readily identifiable
26 features, such as highways or other major roads, such as those delineated for
27 Joshua Tree National Park in Section 33805.

28 (d) The prohibition on the trapping of bobcats in the areas designated pursuant
29 to Section 33805 and this section shall not apply to any of the following:

30 (1) The taking of a bobcat by an employee of the department acting in an official
31 capacity.

32 (2) The taking of a bobcat in accordance with the conditions of a scientific,
33 educational, or propagation permit pursuant to Section 9200 by the holder of that
34 permit.

35 (3) The lawful taking of a bobcat found to be injuring crops or other property,
36 pursuant to Section 32305, another provision of this code, or a regulation adopted
37 pursuant to this code.

38 **Comment.** Section 33810 continues former Fish and Game Code Section 4155(b)-(c) without
39 substantive change.

1 **§ 33815. Trapping fees**

2 33815. Consistent with the requirements of subdivision (b) of Section 11215,
3 the commission shall set trapping license fees and associated fees, including, but
4 not limited to, shipping tags required pursuant to Section 479 of Chapter 6 of
5 Subdivision 2 of Division 1 of Title 14 of the California Code of Regulations, for
6 the 2014–15 season, and any subsequent seasons in which bobcat trapping is
7 allowed, at the levels necessary to fully recover all reasonable administrative and
8 implementation costs of the department and the commission associated with the
9 trapping of bobcats in the state, including, but not limited to, enforcement costs.

10 **Comment.** Section 33815 continues former Fish and Game Code Section 4155(e) without
11 substantive change.

12 **§ 33820. Effect of chapter**

13 33820. This chapter does not limit the ability of the department or the
14 commission to impose additional requirements, restrictions, or prohibitions related
15 to the taking of bobcats, including a complete prohibition on the trapping of
16 bobcats pursuant to this code.

17 **Comment.** Section 33820 continues former Fish and Game Code Section 4155(f) without
18 substantive change.

19 **CHAPTER 3. PURSUIT TO PROTECT PROPERTY**

20 **§ 33900. Pursuit to protect livestock or crops**

21 33900. Notwithstanding Section 31510, dogs that are guarding or protecting
22 livestock or crops on property owned, leased, or rented by the owner of the dogs
23 may be used to pursue a bobcat, if the dogs are maintained with, and remain in
24 reasonable proximity to, the livestock or crops being guarded or protected.

25 **Comment.** Section 33900 continues the part of former Fish and Game Code Section 3960.6(b)
26 applicable to bobcats without substantive change.

27 **§ 33905. Depredation permit**

28 33905. (a) Notwithstanding Section 31510, three or fewer dogs may be used to
29 pursue a bobcat pursuant to a depredation permit issued by the department, if all of
30 the following conditions are met:

31 (1) The applicant demonstrates, in writing, that nonlethal and avoidance
32 measures were undertaken prior to requesting the depredation permit.

33 (2) The applicant demonstrates, in writing, the specific need for the use of dogs
34 in carrying out the depredation permit.

35 (3) The depredation permit authorizing the use of dogs is valid for the take of
36 one bobcat.

37 (4) The depredation permit authorizing the use of dogs is valid for a period not
38 to exceed 20 consecutive days.

1 (5) The depredation permit specifies the name and address of any dog handler
2 who will be utilized in the pursuit or taking.

3 (6) The dog handler has the depredation permit in his or her possession at all
4 times during the pursuit or taking.

5 (7) The dog handler does not pursue a bobcat more than one mile off the
6 property on which the depredation activity occurred.

7 (b) No holder of a depredation permit may solicit or receive compensation from
8 any person in exchange for carrying out the terms of the permit. For the purpose of
9 this subdivision, “compensation” means remuneration paid in money, property, or
10 anything else of value.

11 (c) The holder of a depredation permit, within 30 days of its issuance, shall
12 report to the department detailing the use of the permit and the results of any
13 pursuits, including information about bobcat pursued and whether the bobcat was
14 or was not harmed, but not killed.

15 **Comment.** Section 33905 continues the part of former Fish and Game Code Section 3960.2
16 applicable to bobcats without substantive change.

17 CHAPTER 4. PURSUIT FOR SCIENTIFIC PURPOSES

18 § 33950. Pursuit in furtherance of scientific research

19 33950. (a) Notwithstanding Section 31510, the department may authorize
20 qualified individuals, educational institutions, governmental agencies, or
21 nongovernmental organizations to use dogs to pursue bobcats for the purpose of
22 scientific research, provided that the research project is designed to do all of the
23 following:

24 (1) Contribute to knowledge of natural wildlife ecosystems.

25 (2) Follow best practices and minimize disruptions in the lives and movements
26 of bobcats and other wildlife, as well as impacts to the habitat while maintaining
27 the applicant’s objectives.

28 (3) Directly or indirectly support the sustainability and survival of bobcat
29 populations and healthy ecosystems.

30 (4) Exclude the intentional injury or killing of any bobcat.

31 (5) Exclude the intentional relocation of any bobcat other than to areas suitable
32 to them in the state. Any relocation shall comply with the requirements of Section
33 31610.

34 (b) Any research project authorized pursuant to subdivision (a) shall be
35 undertaken pursuant to a memorandum of understanding between the department
36 and the authorized research entity that addresses all of the following:

37 (1) Trapping and anesthetizing of the animals pursued, collection of diagnostic
38 samples, attaching or surgically implanting monitoring or recognition devices or
39 markings, and providing veterinary care or euthanasia, as required, for the health,
40 safety, and humane treatment of the animals.

(2) Qualifications of onsite field supervisors necessary for carrying out authorized research procedures.

(3) Immediate reporting of any incidental mortality or injury to a bobcat as a result of authorized research activities. Reports of any incidental mortality or injury to a bobcat shall be made available to the public upon request.

(4) Filing of annual and final progress reports of research involving pursuit by dogs. Annual and final progress reports shall be made available to the public upon request.

(c) The department shall provide notice to the public of any bobcat research project authorized pursuant to subdivision (a) at least 30 days prior to its initiation, and, upon request, shall make available to the public copies of the memorandum of understanding between the department and the authorized research entity required pursuant to subdivision (b).

Comment. Section 33950 continues the part of former Fish and Game Code Section 3960.4(b)-(d) applicable to bobcats without substantive change.

Note. Existing Fish and Game Code Section 3960.4 authorizes the Department to use dogs to pursue bears *or* bobcats for scientific research, provided the research project meets certain conditions. Among those conditions are safeguards that generally protect against harm to any “bear *or* bobcat.” See Section 3960.4(b)(3), (4), (5) (which would be continued by proposed Section 33950(a)(3), (4), and (5)).

Proposed Section 33950 would continue the provisions of Section 3960.4 that relate only to the pursuit and protection of bobcats, and all references to bears have therefore been deleted from the proposed section. (The provisions of Section 3960.4 that relate to the pursuit and protection of bears are continued elsewhere.)

The Commission invites comment on whether any of the deletions of the references to bears in this section would cause any substantive change in the meaning of any provision in Section 3960.4.

TITLE 5. BURRO

§ 34050. Provisions not exclusive

34050. The provisions of this title are not intended to be exclusive. Other provisions that govern burros include, but are not limited to, the following provisions:

(a) Section 400.

(b) Section 35815.

Comment. Section 34050 is new. It is added for drafting convenience.

§ 34055. Prohibitions

34055. (a) It is unlawful to kill, wound, capture, or have in possession any undomesticated burro, except as provided in Section 53074.5 of the Government Code.

(b) As used in this section, “undomesticated burro” means a wild burro or a burro that has not been tamed or domesticated for a period of three years after its

1 capture. The fact that a burro was killed, wounded, or captured on publicly owned
2 land, or on land owned by a person other than the person who killed, wounded, or
3 captured the burro is prima facie evidence that the burro was an undomesticated
4 burro at the time it was killed, wounded, or captured.

5 (c) Neither the commission nor any other department or agency has any power
6 to modify the provisions of this section by any order, rule, or regulation.

7 **Comment.** Section 34055 continues former Fish and Game Code Section 4600 without
8 substantive change.

9 See also Section 5540 (enforcement).

10 **§ 34060. Burro sanctuary**

11 34060. The following is a burro sanctuary: All that area within the following
12 boundaries:

13 Beginning at the point at which the northern boundary line of Death Valley
14 National Monument intersects with the easterly boundary line of the State of
15 California;

16 Thence westerly along the northern boundary line of Death Valley National
17 Monument to the point of intersection with the line common to R. 40 and 41 E.,
18 Mount Diablo Meridian, being the NE. corner of Sec. 24, T. 10 S., R. 40 E., M. D.
19 B. & M.;

20 Thence northerly along the line common to R. 40 and 41 E., M. D. M., to the
21 point of intersection with the line common to T. 9 and 10 S., Mount Diablo Base,
22 being the NE. corner of Sec. 1, T. 10 S., R. 40 E., M. D. B. & M.;

23 Thence westerly along the line common to T. 9 and 10 S., M.D.B., and the
24 prolongation thereof, to the point of intersection with the most easterly boundary
25 line of the Inyo National Forest, as such boundary exists on the effective date of
26 this act, being the NW. corner of Sec. 6, T. 10 S., R. 37 E., M. D. B. & M.;

27 Thence southerly and easterly along the most easterly boundary line of the Inyo
28 National Forest to the most easterly southeast corner of said national forest;

29 Thence in a direct line in a generally southeasterly direction to the point at
30 which the center line of State Highway Route 127 (No. 190) intersects with the
31 line common to R. 41 and 42 E., M. D. M.;

32 Thence southerly along the line common to R. 41 and 42 E., M. D. M., to the
33 point of intersection with the line common to T. 20 and 21 S., M. D. B., being the
34 SW. corner of Sec. 31, T. 20 S., R. 42 E., M. D. B. & M.;

35 Thence westerly one-half mile, more or less, along the line common to T. 20 and
36 21 S., M. D. B., to the point of intersection with the line common to R. 41 and 42
37 E., M. D. M., being the NW. corner of Sec. 6, T. 21 S., R. 42 E., M. D. B. & M.;

38 Thence southerly along the line common to R. 41 and 42 E., M. D. M., to the
39 point of intersection with the boundary line between Inyo and San Bernardino
40 Counties;

41 Thence easterly along said county boundary line to the point of intersection with
42 the easterly boundary line of the State of California;

1 Thence northwesterly along said easterly boundary line of the State to the point
2 of beginning.

3 **Comment.** Section 34060 continues former Fish and Game Code Section 10930 without
4 substantive change.

5 **§ 34065. Prohibited conduct in burro sanctuary**

6 34065. (a) Except as otherwise provided in Chapter 5 (commencing with Section
7 4600) of Part 3, Division 4 of this code it is unlawful to take, possess, harm,
8 molest, harass, or in any manner interfere with any burro that is in a burro
9 sanctuary described in Section 34060.

10 (b) The provisions of this section, other than those relating to the taking and
11 possession of burros, do not apply to persons while lawfully on lands included
12 within the sanctuary and engaged in the business of raising cattle.

13 **Comment.** Section 34065 continues the first sentence of subdivision (a) and subdivision (b) of
14 former Fish and Game Code Section 10931 without substantive change.

15 See also Section 5542 (enforcement).

16 **TITLE 6. DEER**

17 **CHAPTER 1. GENERAL PROVISIONS**

18 **§ 34100. Game mammal**

19 34100. For the purposes of this code, a deer (genus *Odocoileus*) is a game
20 mammal.

21 **Comment.** Section 34100 continues the part of former Fish and Game Code Section 3950(a)
22 applicable to deer without substantive change.

23 **§ 34105. Provisions not exclusive**

24 34105. The provisions of this title are not intended to be exclusive. Other
25 provisions that govern deer include, but are not limited to, the following
26 provisions:

27 (a) Section 1000.

28 (b) Section 4570.

29 (c) Section 10500.

30 (d) Section 10700.

31 (e) Section 26550.

32 (f) Section 26070.

33 (g) Section 31555.

34 (h) Section 34535.

35 (i) Section 55725.

36 (j) Section 56585.

37 (k) Section 56590.

38 (l) Section 56595.

1 **Comment.** Section 34105 is new. It is added for drafting convenience.

2 **§ 34110. Retention of deer head**

3 34110. Any person taking a deer must retain possession of that portion of the
4 deer's head that in adult males normally bears the antlers, during the open season
5 for that deer and for 15 days thereafter, and must produce that portion of the head
6 upon the demand of any officer authorized to enforce the provisions of this code.

7 **Comment.** Section 34110 restates former Fish and Game Code Section 4302 without
8 substantive change.

9  **Note.** Proposed Section 34110 is intended to restate existing Fish and Game Code Section
10 4302 to clarify the meaning of that provision, without changing its substantive effect. The
11 existing provision reads as follows:

12 Any person taking any deer shall retain in his possession during the open season thereon, and
13 for 15 days thereafter, that portion of the head which in adult males normally bears the antlers,
14 and shall produce the designated portion of the head upon the demand of any officer authorized to
15 enforce the provisions of this code.

16 **The Commission invites comment on whether the restatement would cause any**
17 **substantive change in the meaning of either section.**

18 **§ 34115. Killing deer held in captivity**

19 34115. Except as authorized under a domesticated game breeder's license, a
20 deer kept in captivity may be killed only with the approval of the department, and
21 pursuant to any regulation that the commission may adopt. The carcass of a deer
22 kept in captivity may not be sold, and shall be disposed of as directed by the
23 department.

24 **Comment.** Section 34115 continues the part of former Fish and Game Code Section 3006
25 applicable to deer without substantive change.

26 **§ 34120. Transport out of state**

27 34120. It is unlawful to transport or carry a deer out of this state, except by the
28 holder of a nonresident hunting license or under a written permit issued by the
29 department.

30 **Comment.** Section 34120 continues the part of former Fish and Game Code Section 2350
31 applicable to deer without substantive change.

32 **§ 34125. Transport into state**

33 34125. Deer may be transported into this state only when in accordance with the
34 law of the state in which the deer was taken, and when in accordance with the law
35 of this state and the regulations of the commission adopted pursuant to the law of
36 this state.

37 **Comment.** Section 34125 continues former Fish and Game Code Section 2355 without
38 substantive change.

CHAPTER 2. TAGS

§ 34200. Required tag or permit

34200. It is unlawful to take a deer without first obtaining a deer tag or permit authorizing the taking of that deer.

Comment. Section 34200 continues former Fish and Game Code Section 4330 without substantive change.

See also Sections 4704, 5450, 5464 (enforcement).

§ 34205. Tagging of deer

34205. (a) A person issued a deer tag shall carry the tag while hunting deer.

(b) A person that kills a deer shall immediately fill out a deer tag issued to that person completely, legibly, and permanently, and cut out or punch out and completely remove notches or punch holes for the month and date of the kill. The deer tag shall then be immediately attached to the antlers of antlered deer or to the ear of any other deer, and shall be kept attached during the open season and for 15 days thereafter.

(c) A person that harvests a deer shall immediately notify the department of the harvesting, in a manner specified by the commission.

(d) Except as otherwise provided by this code or regulation adopted pursuant to this code, it is unlawful to possess any untagged deer.

Comment. Section 34205 continues former Fish and Game Code Section 4336 without substantive change.

Note. The Commission invites comment on whether a more common term could be substituted for the word “harvesting” as used in existing Fish and Game Code Section 4336.

§ 34210. Countersigning

34210. Any person legally killing a deer in this state shall have the tag for that deer countersigned by a person employed by the department, a person designated for that purpose by the commission, a notary public, a postmaster, a peace officer, or an officer authorized to administer oaths, before transporting the deer, except to transport the deer to the nearest person authorized to countersign the tag, on the route from where the deer is taken to that person.

Comment. Section 34210 restates former Fish and Game Code Section 4341 without substantive change.

Note. Proposed Section 34210 is intended to restate existing Fish and Game Code Section 4341 to improve its clarity, without changing its substantive effect. The existing provisions read as follows:

4341. Any person legally killing a deer in this state shall have the tag countersigned by a person employed in the department, a person designated for this purpose by the commission, or by a notary public, postmaster, postmistress, peace officer, or an officer authorized to administer oaths, before transporting such deer, except for the purpose of taking it to the nearest person authorized to countersign the tag, on the route being followed from the point where the deer is taken.

1 **The Commission invites comment on whether the restatement would cause any**
2 **substantive change in the meaning of the provision.**

3 **§ 34215. Issuance of tags**

4 34215. (a) The commission shall annually direct the department to authorize,
5 pursuant to Section 2945, the sale of not more than 10 deer tags for the purpose of
6 raising funds for programs and projects as set forth in Sections 31905 and 31910.
7 All revenue from the sale of tags pursuant to this section shall be deposited in the
8 Big Game Management Account established in Section 31900.

9 (b) Tags issued pursuant to subdivision (a) may be sold to residents or
10 nonresidents of the state at auction or by any other method, and are not limited to
11 the fees prescribed by Section 33225.

12 (c) Funds received pursuant to this section shall augment, not supplant, any
13 other funds appropriated to the department for the preservation, restoration,
14 utilization, and management of deer. All revenue derived from the sale of tags
15 issued pursuant to subdivision (a) shall be remitted to the department by the seller.

16 **Comment.** Section 34215 continues former Fish and Game Code Section 4334 without
17 substantive change.

18 **§ 34220. Design and makeup of tag**

19 34220. The commission may determine the design and makeup of the deer tag
20 and prescribe the procedures for issuance and use.

21 **Comment.** Section 34220 continues former Fish and Game Code Section 4331 without
22 substantive change.

23 **§ 34225. Fee**

24 34225. (a) Any person 12 years of age or over, who possesses a valid hunting
25 license, may obtain one tag for the taking of one deer by one person during the
26 current license year, upon payment of a fee as follows:

27 (1) For a resident of this state, a base fee of ten dollars (\$10) for the license year
28 beginning July 1, 1986, adjusted under Section 3755 for subsequent license years.

29 (2) For a nonresident of this state, a base fee of one hundred dollars (\$100) for
30 the license year beginning July 1, 1986, adjusted under Section 3755 for
31 subsequent license years.

32 (b) If provided in regulations adopted by the commission under Section 1000,
33 any person 12 years of age or over who possesses a deer tag for the current license
34 season may procure one additional deer tag for the taking of one additional deer
35 during the current license season, upon payment of a fee as follows:

36 (1) For a resident of this state, a base fee of twelve dollars and fifty cents
37 (\$12.50) for the license year beginning July 1, 1986, adjusted under Section 3755
38 for subsequent license years.

(2) For a nonresident of this state, a base fee of one hundred dollars (\$100) for the license year beginning July 1, 1986, adjusted under Section 3755 for subsequent license years.

Comment. Section 34225 restates former Fish and Game Code Section 4332(a)-(d) without substantive change.

Note. Proposed Section 34225 is intended to restate existing Fish and Game Code Section 4332(a)-(d) to clarify the meaning of that language, without changing its substantive effect. The existing provisions read as follows:

4332. (a) Any resident of this state, 12 years of age or over, who possesses a valid hunting license, may procure one tag for the taking of one deer by one person during the current license year, upon payment of the base fee of ten dollars (\$10) for the license year beginning July 1, 1986, and the base fee as adjusted under Section 713 for subsequent license years.

(b) Any nonresident of this state, 12 years of age or over, who possesses a valid hunting license, may procure one tag for the taking of one deer by one person during the current license year, upon payment of the base fee of one hundred dollars (\$100) for the license year beginning July 1, 1986, and the base fee as adjusted under Section 713 for subsequent license years.

(c) If provided in regulations adopted by the commission under Section 200, any resident of this state, 12 years of age or over, who possesses a deer tag may procure one additional deer tag for the taking of one additional deer during the current license season, upon payment of the base fee of twelve dollars and fifty cents (\$12.50) for the license years beginning July 1, 1986, and the base fee as adjusted under Section 713 for subsequent license years.

(d) If provided in regulations adopted by the commission under Section 200, any nonresident of this state, 12 years of age or over, who possesses a deer tag may procure one additional deer tag for the taking of one additional deer during the current license season, upon payment of the base fee of one hundred dollars (\$100) for the license year beginning July 1, 1986, and the base fee as adjusted under Section 713 for subsequent license years.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 34230. Duration of tag

34230. A deer tag is valid only during that portion of the current hunting license year in which deer may be taken or possessed in any area.

Comment. Section 34230 continues former Fish and Game Code Section 4333 without substantive change.

§ 34240. Deposit of fees

34240. Except as provided in Section 34245, all revenues from the sale of deer tags, including any fundraising tags, shall be deposited in the Big Game Management Account established in Section 31900 to permit separate accountability for the receipt and expenditure of these funds.

Comment. Section 34240 continues the part of the first sentence of former Fish and Game Code Section 3953(b) applicable to deer without substantive change.

Note. This provision appears to render existing Section 4332(e) superfluous, and that provision would not be continued in the proposed law. Existing Section 4332, which relates to the sale of deer tags, would generally be continued by proposed Section 34240. Existing Section 4332(e) reads as follows:

4332. (e) All revenues pursuant to this section shall be deposited in the Big Game Management Account established in Section 3953 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

The Commission invites comment on whether the discontinuation of existing Section 4332(e) in the proposed law is appropriate.

§ 34245. Sale of tag by nonprofit organization

34245. (a) A nonprofit organization designated by the department to assist in the sale of deer fundraising tags that are sold on behalf of the department for the purpose of raising funds for specified programs and projects, pursuant to subdivision (a) of Section 34215 is authorized to retain 5 percent of the amount of the sale price of the tag as a reasonable vendor fee.

(b) Within 30 days of the date of the sale, the selling nonprofit organization shall send the department 95 percent of the total auction sale price of the tag, with an itemized receipt showing the sale price and the 5-percent reduction retained by the nonprofit organization as a vendor's fee.

Comment. Subdivision (a) of Section 34245 continues the part of former Fish and Game Code Section 709 applicable to deer without substantive change.

Subdivision (b) continues the part of the second sentence of former Fish and Game Code Section 3953(b) applicable to deer without substantive change.

CHAPTER 3. BOW HUNTING

§ 34350. Archery season

34350. (a) In every area in which deer may lawfully be taken during the general open season, there shall be an archery season for the taking of deer with bow and arrow. The commission shall prescribe the season for each area, but with a minimum interval of three days immediately preceding the regular open season on deer in that area.

(b) Except as provided in subdivision (c), a person taking or attempting to take deer during the archery season shall neither carry nor have under the person's immediate control any kind of firearm.

(c) A peace officer listed in Chapter 4.5 (commencing with Section 830) of Title 3 of Part 2 of the Penal Code, whether active or honorably retired, may carry a firearm capable of being concealed on the person while engaged in the taking of deer with bow and arrow in accordance with subdivision (a), but shall not take or attempt to take deer with the firearm.

Comment. Section 34350 continues former Fish and Game Code Section 4370 without substantive change.

§ 34355. Taking with bow and arrow

34355. The provisions of this code relating to deer shall be applicable to the taking of deer with a bow and arrow.

Comment. Section 34355 continues former Fish and Game Code Section 4371 without substantive change.

CHAPTER 4. USE OF PARTS

§ 34400. Commercial use of deer meat

34400. (a) As used in this section, “deer” includes any animal of the family Cervidae.

(b) Except as otherwise provided in this section, it is unlawful to sell, purchase, or transport for the purpose of sale any deer meat in this state, whether fresh, smoked, canned, or preserved by any means.

(c) The prohibition in subdivision (a) does not apply to the following:

(1) Conduct authorized by provisions of this code permitting the sale of domestically raised game mammals.

(2) Fallow deer meat processed by a slaughterer in accordance with Chapter 4 (commencing with Section 18650) of, and Chapter 4.1 (commencing with Section 18940) of, Part 3 of Division 9 of the Food and Agricultural Code.

(3) Deer meat imported into this state from a foreign country for the purpose of preparing and selling for human consumption a product commonly known and properly labeled as venison jerky, deer jerky, venison salami, or deer salami.

Comment. Subdivision (a) of Section 34400 continues former Fish and Game Code Section 4301(b) without substantive change.

Subdivisions (b) and (c) restate the first sentence of former Fish and Game Code Section 4301(a) without substantive change.

Notes. (1) Subdivisions (b)-(c) of proposed Section 34400 are intended to restate the first sentence of existing Fish and Game Code Sections 4301(a) to clarify the meaning of that sentence, without changing its substantive effect. The existing sentence reads as follows:

Subject to the provisions of this code permitting the sale of domestically raised game mammals, it is unlawful to sell or purchase, or transport for the purpose of sale, any deer meat in this state whether fresh, smoked, canned, or preserved by any means, except fallow deer meat processed by a slaughterer in accordance with Chapter 4 (commencing with Section 18650) of, and Chapter 4.1 (commencing with Section 18940) of, Part 3 of Division 9 of the Food and Agricultural Code, and except that deer meat may be imported into this state from a foreign country for the purpose of processing (manufacturing) and selling a product commonly known as venison or deer jerky or venison or deer salami, properly labeled as such, for human consumption.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of either section.

(2) Existing Fish and Game Code Section 4301(b) (which would be continued by proposed Section 34400(a)) provides a definition of the term “deer” as used in existing Section 4301. However, the term “deer” appears in many other sections of the existing Fish and Game Code, with no corresponding definition. See, e.g., existing Sections 450-460, 4302-4304. The inclusion of a definition of the term applicable only to one section of the code creates an inference that the term is intended to have some slightly different meaning in all other sections.

The Commission invites comment on whether the definition of “deer” in Section 4301 should be made applicable to the code generally, and included with the general definitions in the first division of the proposed law.

1 **§ 34405. Importation of deer meat**

2 34405. (a) As used in this section, “deer” includes any animal of the family
3 Cervidae.

4 (b) All deer meat imported into this state shall meet all of the sanitary and
5 inspection requirements for wholesomeness, except an antemortem inspection, but
6 including a postmortem inspection, as required for other meat imported for human
7 consumption.

8 (c) Imported deer meat shall be in an identifiable condition and accompanied by
9 a bill of lading, showing the name of the consignor, the consignee, and the weight
10 of the deer meat shipped. A copy of the bill of lading shall be delivered to the
11 nearest office of the department either prior to, or not later than, two days from the
12 date of receipt of the deer meat.

13 (d) No deer meat imported into this state may leave the premises of the original
14 consignee unless one of the following occurs:

15 (1) Written permission to take the meat from the premises is received from the
16 department.

17 (2) The meat is processed into the form of the product commonly known as
18 jerky or salami.

19 **Comment.** Subdivision (a) of Section 34405 continues former Fish and Game Code Section
20 4301(b) without substantive change.

21 Subdivisions (b)-(d) continue the second through fifth sentences of former Fish and Game
22 Code Section 4301(a) without substantive change.

23 **§ 34410. Use of skin or hide of deer**

24 34410. (a) The skin or hide of any deer lawfully taken may be sold, purchased,
25 tanned, or manufactured into articles for sale.

26 (b) Skins or hides of deer lawfully taken may be donated at any time to veterans’
27 organizations or veterans’ service committees for use by veterans for rehabilitation
28 purposes.

29 **Comment.** Section 34410 continues former Fish and Game Code Section 4303 without
30 substantive change.

31 **§ 34415. Needless waste of deer**

32 34415. (a) Except as provided in subdivision (b), no person shall do any of the
33 following:

34 (1) Take a deer and separate from its carcass only the head, hide, antlers, or
35 horns.

36 (2) Allow a deer in that person’s possession, or any portion of the deer’s flesh
37 that is usually eaten by humans, to be needlessly wasted through carelessness or
38 neglect.

39 (b) The prohibitions in subdivision (a) do not apply to a deer taken pursuant to
40 Section 32305.

41 **Comment.** Section 34415 restates the part of former Fish and Game Code Section 4304
42 applicable to deer without substantive change.

1 **Notes.** (1) Proposed Section 34415 is intended to restate the part of existing Fish and Game
2 Code Section 4304 applicable to deer to improve its clarity, without changing its substantive
3 effect. The existing section reads as follows:

4 4304. No person shall at any time capture or destroy any deer and detach or remove from the
5 carcass only the head, hide, antlers, or horns; nor shall any person at any time leave through
6 carelessness or neglect any game mammal or game bird which is in his possession, or any portion
7 of the flesh thereof usually eaten by humans, to go needlessly to waste. The provisions of this
8 section shall not apply to game mammals taken under the authority of Sections 4152 and 4183 of
9 this code.

10 **The Commission invites comment on whether the restatement would cause any**
11 **substantive change in the meaning of the provision.**

12 (2) Existing Fish and Game Code Section 4183, which is cross-referenced in existing Section
13 4304, was repealed in 1984. 1984 Cal. Stat. ch. 1365. The repealed section related to taking bears
14 that kill livestock.

15 (3) The first clause of existing Section 4304 (which would be continued by proposed Section
16 34415(a)(1)) appears inconsistent with existing Sections 4302 (which would be continued by
17 proposed Section 34110) and 4303 (which would be continued by proposed Section 34410), as
18 the two latter sections both clearly contemplate separating parts of a deer from its body.

19 **The Commission invites comment on this issue.**

20 CHAPTER 5. GAME REFUGES

21 § 34450. Opening of game refuge for taking of deer

22 34450. Before the commission opens any game refuge for the taking of deer, a
23 public hearing shall be held at which at least one member of the commission shall
24 be in attendance and such officers and employees of the department as are deemed
25 necessary or are requested by interested parties, notice of which has been
26 published at least once and at least 30 days prior to the hearing in a newspaper of
27 general circulation which is printed and published in the county, or one of the
28 counties, in which the area lies. If there is no newspaper of general circulation in
29 any such county, the notice shall be published in such newspaper of general
30 circulation as the commission determines will be most likely to give notice to the
31 inhabitants of the area and such determination by the commission shall be final
32 and conclusive.

33 **Comment.** Section 34450 continues former Fish and Game Code Section 10501 without
34 substantive change.

35 CHAPTER 6. POPULATION MANAGEMENT

36 § 34500. Declaration of legislative policy

37 34500. It is hereby declared to be the policy of the Legislature to encourage the
38 conservation, restoration, maintenance, and utilization of California's wild deer
39 populations. Such conservation shall be in accordance with the principles of
40 conservation of wildlife resources set forth in Section 54505 and in accordance

1 with the objectives and elements stated in “A Plan for California Deer,” State of
2 California, Department of Fish and Game (1976).”

3 **Comment.** Section 34500 continues former Fish and Game Code Section 450 without
4 substantive change.

5 **§ 34505. Deer herd management units**

6 34505. The department shall designate deer herd management units and
7 designate a manager for each unit. A unit may encompass a single deer herd or a
8 group of deer herds having similar management and habitat requirements and
9 characteristics. The boundaries of units need not follow county boundary lines,
10 unless it is appropriate that they do so.

11 **Comment.** Section 34505 continues former Fish and Game Code Section 452 without
12 substantive change.

13 **§ 34510. Management unit plans**

14 34510. (a) The department shall develop plans for deer herd management units.
15 The objectives of the plans shall be the restoration and maintenance of healthy
16 deer herds in the wild, and the provision of high quality and diversified use of deer
17 in California.

18 (b) The management plans shall contain the following program elements:

19 (1) Document existing information on deer herd management units and
20 programs, to obtain information that may be needed.

21 (2) Develop programs to maintain and increase the quality of deer habitat
22 statewide that emphasize cooperative action between the department and the
23 appropriate land management entities, both public and private. Emphasis shall be
24 directed towards identifying critical deer habitat areas and the maintenance and
25 management of such areas.

26 (3) Develop programs to reduce natural mortalities where reduction may be
27 critical to meeting deer herd plan objectives.

28 (4) Develop programs to decrease the illegal taking of deer through modern law
29 enforcement methods, supported by public and private cooperative efforts.

30 (5) Develop diversified recreational use programs, including both hunting and
31 non-hunting uses, consistent with basic individual deer herd management unit
32 capabilities.

33 (c) Deer herd management unit plans shall be reviewed annually and shall be the
34 basis for department recommendations to the commission pursuant to Sections
35 34515, 34520, and 34530.

36 **Comment.** Subdivision (a) of Section 34510 continues former Fish and Game Code Section
37 453 without substantive change.

38 Subdivision (b) continues former Fish and Game Code Section 454 without substantive
39 change.

40 Subdivision (c) continues former Fish and Game Code Section 455 without substantive change.

1 **§ 34515. Biennial report to Legislature and Commission**

2 34515. (a) The department shall biennially report to the Legislature and to the
3 commission on the progress being made toward restoration and maintenance of
4 California's deer herds.

5 (b) The report shall include all of the following:

6 (1) A description of ongoing program activities relating to deer habitat,
7 particularly those addressing problems identifying and preserving critical deer
8 habitat areas.

9 (2) A statement of the amount of revenue derived from the sale of deer tags
10 during the two previous fiscal years.

11 (3) A list of expenditures during the two previous fiscal years.

12 (4) A list of proposed expenditures in the current fiscal year.

13 (5) A report of general benefits that have accrued to deer resources as a result of
14 programs developed pursuant to Section 34510.

15 **Comment.** Subdivision (a) of Section 34515 continues the first sentence of former Fish and
16 Game Code Section 456 without substantive change. The second sentence of the section is
17 discontinued as obsolete.

18 Subdivision (b) restates the third sentence of former Fish and Game Code Section 456 without
19 substantive change.

20 **Notes.** (1) The Department of Fish and Wildlife has suggested that the report required by this
21 section should be repealed as obsolete. The Commission invites comment on that suggestion.

22 (2) Subdivision (b) of proposed Section 34515 is intended to restate the third sentence of
23 Section 456 to improve its clarity, without changing its substantive effect. The existing provision
24 reads as follows:

25 The report shall include program activities regarding deer habitat, particularly addressing
26 problems dealing with identification and preservation of critical deer habitat areas; the amount of
27 revenue derived from the sale of deer tags during the two previous fiscal years; a list of
28 expenditures during the two previous fiscal years and proposed expenditures during the current
29 fiscal year; and a report of general benefits accrued to the deer resources as a result of the
30 program.

31 **The Commission invites comment on whether the restatement would cause any**
32 **substantive change in the meaning of that provision.**

33 **§ 34520. Annual recommendations by department**

34 34520. (a) Not later than December 15 of each year, the department shall
35 determine its proposed recommendations to the commission relating to the
36 management of deer, including its recommendations as to whether any antlerless
37 deer hunts should be ordered.

38 (b) The recommendations shall include all of the following:

39 (1) The number, if any, of antlerless deer that should be taken in particular deer
40 management units.

41 (2) Proposed dates for any recommended taking.

42 (3) The number of permits proposed for each management unit.

43 (4) Whether the permits should be either-sex permits.

1 **Comment.** Section 34520 restates former Fish and Game Code Section 457 without
2 substantive change.

3 **Note.** Proposed Section 34520 is intended to restate existing Fish and Game Code Section
4 457 to improve its clarity, without changing its substantive effect. The existing provision reads as
5 follows:

6 The department shall determine prior to December 15 of each year its proposed
7 recommendations to the commission, including its recommendations as to whether any antlerless
8 deer hunts should be ordered. The recommendations of the department shall include the number,
9 if any, of antlerless deer that should be taken in units, whether the permits should be either-sex
10 permits, the proposed dates for each such taking, and the number of permits proposed for each
11 unit.

12 **The Commission invites comment on whether the restatement would cause any**
13 **substantive change in the meaning of that provision.**

14 **§ 34525. Affected counties**

15 34525. (a) Not later than December 15 of each year, the department shall
16 provide notice of its proposed recommendations under Section 34520 to the board
17 of supervisors of each county affected by a recommendation, by certified mail.

18 (b) Not later than the February 1 next following the department's notice, the
19 board of supervisors of any affected county may elect to hold a public hearing on
20 the department's proposed recommendations. The director or the director's
21 representative shall attend all hearings held pursuant to this subdivision.

22 (c) Not later than the February 1 next following the department's notice, the
23 board of supervisors of any affected county that has held a public hearing pursuant
24 to subdivision (b) may by resolution object to the proposed recommendations of
25 the department, or may by resolution determine that the proposed
26 recommendations should be modified and state the necessary modifications. A
27 resolution objecting to or stating necessary modifications of the proposed
28 recommendations shall be based on testimony and information presented at a
29 hearing conducted pursuant to subdivision (b), or presented to the board of
30 supervisors at its meeting to consider the resolution.

31 (d) The board of supervisors of any affected county may, by resolution, elect not
32 to exercise the rights conferred by this section.

33 (e) The department shall not recommend to the commission, and the commission
34 shall not authorize, the taking of antlerless deer in an affected county, if the board
35 of supervisors of that county submits a resolution pursuant to subdivision (c)
36 objecting to that taking.

37 (f) If a board of supervisors of an affected county submits a resolution
38 determining that a department's proposed recommendation relating to the taking
39 of antlerless deer should be modified for that county, the department and the
40 commission shall do one of the following:

41 (1) The department shall modify its recommendations and the commission shall
42 modify its orders to incorporate the modifications determined to be necessary by
43 the county board of supervisors.

(2) The department shall not recommend, and the commission shall not authorize, the taking of antlerless deer in that county.

(f) This section applies only to the counties of, and to those districts or parts of districts in, Siskiyou, Modoc, Trinity, Shasta, Lassen, Plumas, Sierra, Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, El Dorado, Glenn, Humboldt, Imperial, Inyo, Lake, Madera, Mariposa, Mendocino, Merced, Mono, Monterey, Napa, Nevada, Orange, Placer, Riverside, San Luis Obispo, Santa Barbara, Santa Clara, Tehama, Tuolumne, Yolo, and Yuba Counties.

Comment. Section 34525 combines and restates former Fish and Game Code Sections 458 and 459 without substantive change.

Note. Proposed Section 10030 is intended to combine and restate existing Fish and Game Code Sections 458 and 459 to clarify the meaning of those sections, without changing their substantive effect. The existing sections read as follows:

458. The department not later than December 15 shall notify, by certified mail, the board of supervisors of each county affected of the details of its recommendations under Section 457.

The board of supervisors of any affected county may elect to hold a public hearing on the proposed recommendations of the department. Any such hearing shall be held prior to February 1. The director or his or her representative shall attend the hearing.

The board of supervisors of any county to which this section is applicable may, by resolution, elect not to exercise the rights conferred by this section.

This section applies only to the counties of, and to those districts or parts of districts in, Siskiyou, Modoc, Trinity, Shasta, Lassen, Plumas, Sierra, Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, El Dorado, Glenn, Humboldt, Imperial, Inyo, Lake, Madera, Mariposa, Mendocino, Merced, Mono, Monterey, Napa, Nevada, Orange, Placer, Riverside, San Luis Obispo, Santa Barbara, Santa Clara, Tehama, Tuolumne, Yolo, and Yuba Counties.

459. The board of supervisors of any county specified in Section 458 which has held a public hearing pursuant to Section 458 may, not later than February 1, by resolution, object to the proposed recommendations of the department or may, by resolution, determine that the proposed recommendation should be modified, setting forth the necessary modifications.

A resolution objecting to, or setting forth modifications of, the proposed recommendations shall be based upon the testimony and information presented at the hearing or presented to the board of supervisors at its meeting to consider the resolution.

The department shall not recommend to the commission, and the commission shall not authorize, the taking of antlerless deer in a county specified in Section 458 if it has received from the board of supervisors of that county a resolution objecting to that taking. If a board of supervisors of a county has submitted a resolution determining that the department's proposed recommendations on the taking of antlerless deer should be modified for that county, the department shall either so modify its recommendations and the commission shall so modify its orders or the department shall not recommend, and the commission shall not authorize, the taking of antlerless deer in that county.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of either section.

(2) Existing Fish and Game Code Section 459 does not address the manner, timing, or recipient of a resolution described in the section that must be "submitted" by a county's board of supervisors, or "received" by an undesignated entity.

The Commission invites comment on whether these matters should be clarified in the proposed law.

1 **§ 34530. Department recommendations relating to deer hunting**

2 34530. (a) Prior to each meeting of the commission at which the commission
3 considers the regulation of deer and takes action pursuant to paragraph (1) of
4 subdivision (a) of Section 1105, the department shall recommend to the
5 commission the deer herd management units to be placed under a general deer
6 hunting season.

7 (b) At the same time, the department shall do all of the following:

8 (1) Recommend, subject to the provisions of Section 34525, whether any
9 antlerless deer should be taken, and if so in which deer herd management units.

10 (2) If in the judgment of the department there are deer herd management units in
11 which hunting pressure would adversely affect the deer herd, impair the hunting
12 experience, or endanger the public safety, recommend those deer herd
13 management units where hunter numbers should be restricted, and those which
14 should be removed from the general deer hunting season designation.

15 (3) Inform the commission of the condition of each deer herd management unit.

16 (4) Submit its recommendations determined in accordance with the provisions of
17 Section 34525.

18 (5) Recommend the establishment of any hunter-restricted quota units, if
19 needed, and the number of the quota and manner in which the quota permits
20 should be issued.

21 (d) Upon receipt of the recommendations and information required by this
22 section, the commission shall make that material and its determinations regarding
23 proposed regulations known to the public.

24 (e) As used in this section, “general deer hunting season” means the annual
25 season for the area in question as is set by the commission under its general
26 regulatory powers, or set by statute, for the taking of male deer.

27 **Comment.** Subdivisions (a) through (d) of Section 34530 restate former Fish and Game Code
28 Section 460 without substantive change.

29 Subdivision (e) continues former Fish and Game Code Section 451 without substantive change.

30 **Notes.** (1) Proposed Section 34530(a)-(d) is intended to restate existing Fish and Game Code
31 Section 460 to improve its clarity, without changing its substantive effect. The existing section
32 reads as follows:

33 460. Prior to each meeting of the commission at which the commission considers the regulation
34 of deer and takes action pursuant to paragraph (1) of subdivision (a) of Section 255, the
35 department shall recommend to the commission those deer herd units to be placed under a general
36 deer hunting season. At the same time, the department shall recommend to the commission,
37 subject to the provisions of Sections 458 and 459, whether any antlerless deer should be taken
38 and in what deer herd units antlerless deer are to be taken. If in the judgment of the department
39 there are deer herd units in which hunting pressure would adversely affect the deer herd, impair
40 the hunting experience, or endanger the public safety, the department shall also recommend to the
41 commission those deer herd units where hunter numbers should be restricted and which should be
42 removed from the general deer hunting season designation. The department shall inform the
43 commission of the condition of each deer herd unit. Upon receipt of the recommendations and
44 information required in this section, the commission shall make that material known to the public
45 and its determinations regarding proposed regulations. The recommendations of the department

shall, in accordance with the provisions of Sections 458 and 459, include the number, if any, of antlerless deer that should be taken in deer herd units, whether the permits should be either-sex permits, the proposed dates for the taking, and the number of permits proposed for each deer herd unit. At the same time, the department shall recommend the establishment of any hunter-restricted quota units, if needed, and the number of the quota and manner in which the quota permits should be issued.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of existing Section 460.

(2) Although existing Section 451 (which would be continued by proposed Section 34530(e)) defines the term “general deer hunting season” as used in the chapter in which Section 451 appears, the term is only used in one section of that chapter, existing Section 460 (which would be continued by proposed Section 10035(a)-(d)). In proposed Section 34530(e), the reference to “chapter” is therefore revised to refer to this “section.”

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of existing Section 451.

§ 34535. Feeding of deer

34535. (a) The department shall provide for the feeding of deer wherever the director finds that natural forage is unavailable therefor due to excessive snow. The times, extent, and manner of such feeding shall be prescribed by the director. In carrying out the provisions of this section neither the department nor the director shall be bound by any policy determination or regulation of the commission, it being the purpose of this section to commit to the independent discretion of the director all matters within the purview of this section.

(b) No deer shall be fed pursuant to this section upon any privately owned land without the consent of the owner or person in lawful possession of such land.

Comment. Section 34535 continues former Fish and Game Code Section 1503 without substantive change.

CHAPTER 7. TAKE TO PROTECT PROPERTY

§ 34600. Permit to take deer

34600. (a) Any owner or tenant of land or property that is being damaged or destroyed or is in immediate danger of being damaged or destroyed by deer may apply to the department for a permit to kill those deer. The department, upon satisfactory evidence of actual or immediately threatened damage or destruction shall, pursuant to regulations adopted by the commission, issue a revocable permit for the taking and disposition of the responsible deer, for a designated period not to exceed 60 days.

(b) The regulations of the commission shall provide for the types of weapons that may be used to kill deer pursuant to subdivision (a), and shall also provide for the following:

(1) The weapons provided for shall be those that will ensure humane killing.

(2) The regulations shall provide for the use of a sufficient variety of weapons to permit the designation of particular types to be used in any particular locality commensurate with the need to protect persons and property.

(3) Firearms using .22-caliber rimfire cartridges may be used only when authorized by the director or his designee.

(4) No pistols shall be used.

(5) Rifle ammunition used shall have expanding bullets.

(6) Shotgun ammunition shall have only single slugs, or, if authorized by the department, 0 or 00 buckshot.

(c) The caliber and type of weapon to be used by each permittee shall be specified in each permit by the officer issuing the permit, who shall take into consideration the location of the area, the necessity for clean kills, the safety factor, local firearms ordinances, and other factors that apply.

(d) At the time a permit is issued pursuant to subdivision (a), the department shall issue tags similar to those provided for in Section 34220. The permittee shall carry the tags while hunting the deer for which the permit was issued, and upon killing any deer, shall immediately do all of the following:

(1) Fill out both parts of the tag, and clearly punch out the date of the kill.

(2) Immediately attach one part of the completed tag to the antlers of antlered deer, or to the ear of any other deer, and keep that part of the tag attached to the deer until 10 days after the permit has expired.

(3) Obtain a countersignature on the other part of the tag pursuant to Section 34210.

(4) Send the countersigned part of the tag to the department.

(e) A permit issued pursuant to this section may be renewed only after a finding by the department that further damage has occurred or will occur, unless that permit is renewed. A person seeking renewal of a permit pursuant to this subdivision shall do all of the following:

(1) Account for all tags previously issued with all prior permits.

(2) If any previously issued tags are unused, show either of the following:

(A) That any deer previously killed pursuant to a previously issued permit could not reasonably have been tagged.

(B) Why the offending deer were not killed within the time allotted for that killing, and why the killing would be accomplished under a new time period.

Comment. Section 34600 restates former Fish and Game Code Section 4181.5 without substantive change.

Note. Proposed Section 34600 is intended to restate existing Fish and Game Code Section 4181.5 to clarify the meaning of that section, without changing its substantive effect. The existing section reads as follows:

4181.5. (a) Any owner or tenant of land or property that is being damaged or destroyed or is in immediate danger of being damaged or destroyed by deer may apply to the department for a permit to kill those deer. The department, upon satisfactory evidence of that damage or destruction, actual or immediately threatened, shall issue a revocable permit for the taking and

disposition of those deer for a designated period not to exceed 60 days under regulations promulgated by the commission.

(b) The regulations of the commission shall include provisions concerning the type of weapons to be used to kill the deer. The weapons shall be those as will ensure humane killing, but the regulations of the commission shall provide for the use of a sufficient variety of weapons to permit the designation of particular types to be used in any particular locality commensurate with the need to protect persons and property. Firearms using .22-caliber rimfire cartridges may be used only when authorized by the director or his designee. No pistols shall be used. The caliber and type of weapon to be used by each permittee shall be specified in each permit by the issuing officer who shall take into consideration the location of the area, the necessity for clean kills, the safety factor, local firearms ordinances, and other factors that apply. Rifle ammunition used shall have expanding bullets; shotgun ammunition shall have only single slugs, or, if authorized by the department, 0 or 00 buckshot.

(c) The department shall issue tags similar to those provided for in Section 4331 at the same time the permit is issued. A permittee under this section shall carry the tags while hunting deer, and upon the killing of any deer, shall immediately fill out both parts of the tag and punch out clearly the date of the kill. One part of the tag shall be immediately attached to the antlers of antlered deer or to the ear of any other deer and kept attached until 10 days after the permit has expired. The other part of the tag shall be immediately sent to the department after it has been countersigned by any person authorized by Section 4341.

(d) A permit issued pursuant to this section may be renewed only after a finding by the department that further damage has occurred or will occur unless that permit is renewed. A person seeking renewal of the permit shall account for all prior tags issued at the time he or she received any prior permits, and if any tags are unused, he or she shall show either that any deer killed could not reasonably be tagged or why the killing was not accomplished within the allotted time and why that killing would be accomplished under a new time period.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of either section.

§ 34605. Access by licensed hunters for depredator control

34605. (a) If a landowner or tenant applies for a permit under Section 34600 to take deer, the department shall inform the applicant about available options for allowing access by licensed hunters, including, but not limited to, access authorized pursuant to Title 7 (commencing with Section 56200) of Part 2 of Division 15 to control deer.

(b) The commission, in lieu of a permit described in Section 34600, and with the consent of, or upon the request of, the landowner or tenant, may pursuant to appropriate regulation authorize the issuance of permits to persons holding valid hunting licenses to take deer in sufficient numbers to stop the damage or threatened damage. Before issuing permits to licensed hunters, the department shall investigate and determine the number of permits necessary, the territory involved, the dates of the proposed hunt, the manner of issuing the permits, and the fee for the permit.

Comment. Section 34605 restates the part of former Fish and Game Code Section 4188 applicable to deer without substantive change.

Note. Proposed Section 34605 is intended to restate the part of existing Fish and Game Code Section 4188 applicable to deer to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

1 4188. (a) If a landowner or tenant applies for a permit under Section 4181 for wild pigs or wild
2 turkeys, or under Section 4181.5 for deer, the department shall notify the landowner or tenant
3 about available options for allowing access by licensed hunters, including, but not limited to,
4 access authorized pursuant to Article 3 (commencing with Section 1570) of Chapter 5 of Division
5 2 to control wild pigs, wild turkeys, and deer.

6 (b) The commission, in lieu of a permit as described in subdivision (a), and with the consent of,
7 or upon the request of, the landowner or tenant, under appropriate regulations, may authorize the
8 issuance of permits to persons holding valid hunting licenses to take wild pigs, wild turkeys, or
9 deer in sufficient numbers to stop the damage or threatened damage. Before issuing permits to
10 licensed hunters, the department shall investigate and determine the number of permits necessary,
11 the territory involved, the dates of the proposed hunt, the manner of issuing the permits, and the
12 fee for the permit.

13 **The Commission invites comment on whether the restatement would cause any**
14 **substantive change in the meaning of the provision.**

15 TITLE 7. ELK

16 CHAPTER 1. GENERAL PROVISIONS

17 § 34800. Game mammal

18 34800. For the purposes of this code, an elk (genus *Cervus*) is a game mammal.

19 **Comment.** Section 34800 continues the part of former Fish and Game Code Section 3950(a)
20 applicable to elk without substantive change.

21 § 34805. Provisions not exclusive

22 34805. The provisions of this title are not intended to be exclusive. Other
23 provisions that govern elk include, but are not limited to, the following provisions:

24 (a) Section 4570.

25 (b) Section 10700.

26 (c) Section 31555.

27 **Comment.** Section 34805 is new. It is added for drafting convenience.

28 § 34810. Killing elk held in captivity

29 34810. Except as authorized under a domesticated game breeder's license, an
30 elk kept in captivity may be killed only with the approval of the department, and
31 pursuant to any regulation that the commission may adopt. The carcass of an elk
32 kept in captivity may not be sold, and shall be disposed of as directed by the
33 department.

34 **Comment.** Section 34810 continues the part of former Fish and Game Code Section 3006
35 applicable to elk without substantive change.

CHAPTER 2. TAGS

§ 34850. Issuance of tags (operative until 7/1/2025)

34850. (a) The commission may determine and fix the area or areas, the seasons and hours, the bag and possession limit, and the number of elk that may be taken under rules and regulations that the commission may adopt from time to time. The commission may authorize the taking of tule elk if the average of the department's statewide tule elk population estimates exceeds 2,000 animals, or the Legislature determines, pursuant to the reports required by Section 34960, that suitable areas cannot be found in the state to accommodate that population in a healthy condition.

(b) Only a person possessing a valid hunting license may obtain a tag for the taking of elk.

(c) The department may issue an elk tag upon payment of a fee. The fee for an elk tag for a resident of the state, except for an elk tag issued to a resident junior hunter, shall be one hundred sixty-five dollars (\$165), as adjusted under Section 3755. The fee for an elk tag for a resident junior hunter shall be twenty dollars (\$20), as adjusted under Section 3755. On or before July 1, 2007, the commission shall, by regulation, fix the fee for a nonresident of the state at not less than one thousand fifty dollars (\$1,050), as adjusted under Section 3755. The fees shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended, in addition to moneys budgeted for salaries of the department as set forth in Section 31900.

(d) The commission shall annually direct the department to authorize not more than three elk tags for the purpose of raising funds for programs and projects to benefit elk. These tags may be sold at auction to residents or nonresidents of the state or by another method and are not subject to the fee limitation prescribed in subdivision (c). All revenues from sales pursuant to this subdivision shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

(e) The commission shall direct the department to annually authorize one elk tag of the total number of tags available for issuance to nonresidents of the state.

(f) This section shall become inoperative on July 1, 2025, and, as of January 1, 2026, is repealed.

Comment. Section 34850 continues former Fish and Game Code Section 332, as amended by 2018 Cal. Stat. ch. 295, § 3, without substantive change.

Note. This version of proposed Section 34850 would continue Section 332, as amended by 2018 Cal. Stat. ch. 295, § 3. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

1 **§ 34850. Issuance of tags (operative on 7/1/2025)**

2 (a) The commission may determine and fix the area or areas, the seasons and
3 hours, the bag and possession limit, and the number of elk that may be taken under
4 rules and regulations that the commission may adopt from time to time. The
5 commission may authorize the taking of tule elk if the average of the department's
6 statewide tule elk population estimates exceeds 2,000 animals, or the Legislature
7 determines, pursuant to the reports required by Section 34960, that suitable areas
8 cannot be found in the state to accommodate that population in a healthy
9 condition.

10 (b) Only a person possessing a valid hunting license may obtain a tag for the
11 taking of elk.

12 (c) The department may issue an elk tag upon payment of a fee. The fee for an
13 elk tag shall be one hundred sixty-five dollars (\$165) for a resident of the state, as
14 adjusted under Section 3755. On or before July 1, 2007, the commission shall, by
15 regulation, fix the fee for a nonresident of the state at not less than one thousand
16 fifty dollars (\$1,050), as adjusted under Section 3755. The fees shall be deposited
17 in the Big Game Management Account established in Section 31900 and, upon
18 appropriation by the Legislature, shall be expended, in addition to moneys
19 budgeted for salaries of the department as set forth in Section 31900.

20 (d) The commission shall annually direct the department to authorize not more
21 than three elk tags for the purpose of raising funds for programs and projects to
22 benefit elk. These tags may be sold at auction to residents or nonresidents of the
23 state or by another method and are not subject to the fee limitation prescribed in
24 subdivision (c). All revenues from sales pursuant to this subdivision shall be
25 deposited in the Big Game Management Account established in Section 31900
26 and, upon appropriation by the Legislature, shall be expended as set forth in that
27 section.

28 (e) The commission shall direct the department to annually authorize one elk tag
29 of the total number of tags available for issuance to nonresidents of the state.

30 (f) This section shall become operative on July 1, 2025.

31 **Comment.** Section 34850 continues former Fish and Game Code Section 332, as added by
32 2018 Cal. Stat. ch. 295, § 4, without substantive change.

33 **Note.** This version of proposed Section 34850 would continue Section 332, as added by 2018
34 Cal. Stat. ch. 295, § 4. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

36 **34865. Deposit of fees**

37 34865. Except as provided in Section 34870, all revenues from the sale of elk
38 tags, including any fundraising tags, shall be deposited in the Big Game
39 Management Account established in Section 31900 to permit separate
40 accountability for the receipt and expenditure of these funds.

41 **Comment.** Section 34865 continues the part of the first sentence of former Fish and Game
42 Code Section 3953(b) applicable to elk without substantive change.

Note. The Commission invites comment on whether Section 3953(b) can be deleted as redundant. Compare proposed Section 34850(c) and (d).

§ 34870. Sale of tag by nonprofit organization

34870. (a) A nonprofit organization designated by the department to assist in the sale of elk fundraising tags that are sold on behalf of the department for the purpose of raising funds for specified programs and projects, pursuant to subdivision (d) of Section 34850 is authorized to retain 5 percent of the amount of the sale price of the tag as a reasonable vendor fee.

(b) Within 30 days of the date of the sale, the selling nonprofit organization shall send the department 95 percent of the total auction sale price of the tag, with an itemized receipt showing the sale price and the 5-percent reduction retained by the nonprofit organization as a vendor's fee.

Comment. Subdivision (a) of Section 34870 continues the part of former Fish and Game Code Section 709 applicable to elk without substantive change.

Subdivision (b) continues the part of the second sentence of former Fish and Game Code Section 3953(b) applicable to elk without substantive change.

CHAPTER 3. POPULATION MANAGEMENT

§ 34955. Tule elk management plan

34955. The department shall develop a statewide elk management plan, consistent with the state's wildlife policy as set forth in Section 54505. The statewide elk management plan shall emphasize maintaining sufficient elk populations in perpetuity, while considering all of the following:

(a) Characteristics and geographic range of each elk subspecies within the state, including Roosevelt elk, Rocky Mountain elk, and tule elk.

(b) Habitat conditions and trends within the state.

(c) Major factors affecting elk within the state, including, but not limited to, conflicts with other land uses.

(d) Management activities necessary to achieve the goals of the plan and to alleviate property damage.

(e) Identification of high priority areas for elk management.

(f) Methods for determining population viability and the minimum population level needed to sustain local herds.

(g) Description of the necessary contents for individual herd management plans prepared for high priority areas.

Comment. Section 34955 continues former Fish and Game Code Section 3952 without substantive change.

§ 34960. Relocation

34960. (a) When relocating tule elk, the department shall relocate the elk in areas suitable to them in the state, and shall cooperate to the maximum extent possible with federal and local agencies and private property owners in relocating

1 tule elk in suitable areas under their jurisdiction or ownership. When property or
2 environmental damage occurs, emphasis shall be placed on managing each tule elk
3 herd at a biologically sound level through the use of relocation, regulated hunting,
4 or other appropriate methods, individually or in combination, as determined by the
5 department in accordance with the statewide elk management plan developed
6 pursuant to Section 34955, after consulting with local landowners.

7 (b) The number of tule elk in the Owens Valley shall not be permitted to
8 increase beyond 490, or any greater number hereafter determined by the
9 department to be the Owens Valley's holding capacity in accordance with game
10 management principles.

11 **Comment.** Section 34960 continues former Fish and Game Code Section 3951 without
12 substantive change.

13 CHAPTER 4. TAKE TO PROTECT PROPERTY

14 § 35000. Depredation permit

15 35000. (a) An owner or tenant of land or property that is being damaged or
16 destroyed, or is in danger of being damaged or destroyed, by elk, may apply to the
17 department for a permit to kill the elk causing or threatening the damage or
18 destruction.

19 (b) Subject to the limitations in subdivision (d), the department, upon
20 satisfactory evidence of actual or immediately threatened damage or destruction of
21 land or property, shall issue a revocable permit for the taking and disposition of
22 the responsible elk, under regulations adopted by the commission. The permit
23 shall include a statement of the penalties that may be imposed for a violation of
24 the permit conditions.

25 (c) Elk taken under a permit issued pursuant to subdivision (b) shall not be sold
26 or shipped from the premises on which they are taken, except pursuant to
27 instructions from the department.

28 (d) Prior to issuing a depredation permit pursuant to subdivision (a), the
29 department shall do all of the following:

30 (1) Verify the actual or immediately threatened damage or destruction.

31 (2) Provide a written summary of corrective measures necessary to immediately
32 alleviate the problem.

33 (3) Determine the viability of the local herd, and determine the minimum
34 population level needed to maintain the herd.

35 (4) Ensure the permit will not reduce the local herd below the minimum.

36 (5) Work with affected landowners to develop measures to achieve long-term
37 resolution, while maintaining viability of the herd.

38 (e) After completing the statewide elk management plan pursuant to Section
39 34955, the department shall use the information and methods contained in the plan
40 to meet the requirements of paragraphs (3), (4), and (5) of subdivision (d).

(f) It is unlawful for any person to violate the terms of any permit issued pursuant to this section.

Comment. Subdivisions (a) through (c) and (f) of Section 35000 restate the part of former Fish and Game Code Section 4181(a) applicable to elk without substantive change.

Subdivisions (d) and (e) continue former Fish and Game Code Section 4181(d) without substantive change.

Note. Proposed Section 35000(a)-(c) and (f) are intended to restate the part of existing Fish and Game Code Section 4181(a) applicable to elk to clarify the meaning of that language, without changing its substantive effect. Existing Section 4181 reads as follows:

4181. (a) Except as provided in Section 4181.1, any owner or tenant of land or property that is being damaged or destroyed or is in danger of being damaged or destroyed by elk, bear, beaver, wild pig, wild turkeys, or gray squirrels, may apply to the department for a permit to kill the animals. Subject to the limitations in subdivisions (b) and (d), the department, upon satisfactory evidence of the damage or destruction, actual or immediately threatened, shall issue a revocable permit for the taking and disposition of the animals under regulations adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions. Animals so taken shall not be sold or shipped from the premises on which they are taken except under instructions from the department. No iron-jawed or steel-jawed or any type of metal-jawed trap shall be used to take any bear pursuant to this section. No poison of any type may be used to take any gray squirrel or wild turkey pursuant to this section. The department shall designate the type of trap to be used to ensure the most humane method is used to trap gray squirrels. The department may require trapped squirrels to be released in parks or other nonagricultural areas. It is unlawful for any person to violate the terms of any permit issued under this section.

(b) ...

(c)...

(d) With respect to elk, the following procedures shall apply:

(1) Prior to issuing a depredation permit pursuant to subdivision (a), the department shall do all of the following:

(A) Verify the actual or immediately threatened damage or destruction.

(B) Provide a written summary of corrective measures necessary to immediately alleviate the problem.

(C) Determine the viability of the local herd, and determine the minimum population level needed to maintain the herd.

(D) Ensure the permit will not reduce the local herd below the minimum.

(E) Work with affected landowners to develop measures to achieve long-term resolution, while maintaining viability of the herd.

(2) After completing the statewide elk management plan pursuant to Section 3952, the department shall use the information and methods contained in the plan to meet the requirements of subparagraphs (C), (D), and (E) of paragraph (1).

The references in existing Section 4181 to existing Section 4181.1 and to subdivision (b) of Section 4181 have not been continued in proposed Section 35000, as those provisions do not apply to elk.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

TITLE 8. FOXES

§ 35200. Classification

35200. For the purposes of this code, a gray fox, red fox, and kit fox are fur-bearing mammals.

Comment. Section 35200 continues the part of former Fish and Game Code Section 4000 applicable to gray foxes, red foxes, and kit foxes, without substantive change.

§ 35205. Provisions not exclusive

35205. The provisions of this title are not intended to be exclusive. Other provisions that govern foxes include, but are not limited to, Section 55725.

Comment. Section 35205 is new. It is added for drafting convenience.

§ 35210. Take for profit

35210. It is unlawful to take a red fox for a profitmaking purpose.

Comment. Section 35210 continues former Fish and Game Code Section 4012 without substantive change.

See also Section 4806 (enforcement).

§ 35215. Protection of property

35215. (a) Except as provided in Section 11200, a subspecies of red fox that is not the native Sierra Nevada red fox (*Vulpes vulpes necator*) and that is found to be injuring growing crops or other property may be taken by the following persons at any time or in any manner not prohibited by this code or regulations adopted pursuant to this code:

(1) The owner or tenant of the premises.

(2) An employee or agent of the owner or tenant of the premises, who is in immediate possession of written permission from the owner or tenant to take a fox described in this subdivision.

(3) An officer or employee of the Department of Food and Agriculture.

(4) A federal, county, or city officer or employee acting in official capacity pursuant to provisions of the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(b) A person that takes a red fox pursuant to this section is exempt from Section 9500, except when providing trapping services for a fee.

(c) Raw fur from a red fox taken pursuant to this section shall not be sold.

Comment. Section 35215 restates the part of former Fish and Game Code Section 4152 applicable to certain subspecies of red foxes without substantive change.

See also Section 11000 (inspection and removal of animals from traps).

Notes. (1) Proposed Section 35215 is intended to restate the part of existing Fish and Game Code Section 4152 applicable to certain subspecies of red foxes to clarify the meaning of that language, without changing its substantive effect. Existing Section 4152 reads as follows:

4152. (a) Except as provided in Section 4005, nongame mammals and black-tailed jackrabbits, muskrats, subspecies of red fox that are not the native Sierra Nevada red fox (*Vulpes vulpes necator*), and red fox squirrels that are found to be injuring growing crops or other property may be taken at any time or in any manner in accordance with this code and regulations adopted pursuant to this code by the owner or tenant of the premises or employees and agents in immediate possession of written permission from the owner or tenant thereof. They may also be taken by officers or employees of the Department of Food and Agriculture or by federal, county, or city officers or employees when acting in their official capacities pursuant to the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code. Persons taking mammals in accordance with this section are exempt from Section 3007, except when providing trapping services for a fee. Raw furs, as defined in Section 4005, that are taken under this section, shall not be sold.

(b) Traps used pursuant to this section shall be inspected and all animals in the traps shall be removed at least once daily. The inspection and removal shall be done by the person who sets the trap or the owner of the land where the trap is set or an agent of either.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 4152 refers to employees and agents in “immediate possession” of written permission from the owner or tenant of premises where depredators are injuring property.

The Commission invites comment on whether or how the term “immediate possession” differs from “possession,” and whether the more familiar term “possession” could be substituted without substantively changing the meaning of the provision.

TITLE 9. MOUNTAIN LION

 **Note.** Existing Fish and Game Code Sections 3950.1, 4800-4801, and 4802-4809 (which would be continued in this title) and in proposed Section 5402, were added in 1990 pursuant to an initiative statute, Proposition 117. The Commission believes that the nonsubstantive continuation of those provision in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

CHAPTER 1. GENERAL PROVISIONS

§ 35305. Provisions not exclusive

35305. The provisions of this title are not intended to be exclusive. Other provisions that govern mountain lions include, but are not limited to, the following provisions:

(a) Section 55800.

(b) Section 55830.

Comment. Section 35305 is new. It is added for drafting convenience.

§ 35310. Rulemaking limitation

35310. Section 1025 does not apply to this title. Neither the commission nor the department shall adopt any regulation that conflicts with or supersedes a provision of this title.

Comment. Section 35310 continues former Fish and Game Code Section 4800(d) without substantive change.

§ 35315. “Agent”

35315. As used in this title, “agent” means the agent or employee of the owner of the damaged or destroyed property, any county or city predator control officer, any employee of the Animal Damage Control Section of the United States Department of Agriculture, any departmental personnel, or any authorized or permitted houndsman registered with the department as possessing the requisite experience and having no prior conviction of any provision of this code or regulation adopted pursuant to this code. A plea of nolo contendere is a conviction for purposes of this section.

Comment. Section 35315 continues former Fish and Game Code Section 4808 without substantive change.

Note. Existing Fish and Game Code Section 3950.1 (which would be continued by proposed Section 375(b) and (c)) was added to the existing code in 1990 by an initiative statute, Proposition 117. The Commission believes that the nonsubstantive continuation of that provision in proposed Section 375 would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

CHAPTER 2. SPECIAL PROTECTIONS

§ 35350. Prohibitions on take and possession

35350. (a) The mountain lion (genus Puma) is a specially protected mammal under the laws of this state.

(b)(1) It is unlawful to take, injure, possess, transport, import, or sell a mountain lion or a product of a mountain lion, except as specifically provided in this title or in Part 6 (commencing with Section 26500) of Division 7.

(2) This title does not prohibit the sale or possession of a mountain lion or a product of a mountain lion, when the owner can demonstrate that the mountain lion, or product of a mountain lion, was in the person’s possession on June 6, 1990.

(3) This title does not prohibit the possession of a mountain lion carcass or a product of a mountain lion carcass, if all of the following requirements are met:

(A) The carcass or carcass product is prepared or being prepared for display, exhibition, or storage, for a bona fide scientific or educational purpose, at a nonprofit museum or government-owned facility generally open to the public or at an educational institution, including a public or private postsecondary institution.

(B) The mountain lion was taken in California consistent with the requirements of this title and any other applicable law.

(C) The department has authorized the possession of the carcass or carcass product for the purposes of this paragraph.

Comment. Section 35350 continues former Fish and Game Code Section 4800(a)-(b) without substantive change.

See also Section 5402 (enforcement).

CHAPTER 3. PUBLIC SAFETY AND PROTECTION OF PROPERTY

§ 35400. Removal by department

35400. The department may remove or take any mountain lion, or authorize an appropriate local agency with public safety responsibility to remove or take any mountain lion, that is perceived to be an imminent threat to public health or safety or that is perceived by the department to be an imminent threat to the survival of any threatened, endangered, candidate, or fully protected sheep species.

Comment. Section 35400 continues former Fish and Game Code Section 4801 without substantive change.

§ 35405. Permit to protect property

35405. Any person, or the employee or agent of a person, whose livestock or other property is being or has been injured, damaged, or destroyed by a mountain lion may report that fact to the department and request a permit to take the mountain lion.

Comment. Section 35405 continues former Fish and Game Code Section 4802 without substantive change.

§ 35410. Confirmation of depredation

35410. Upon receipt of a report pursuant to Section 35405, the department, or any animal damage control officer specifically authorized by the department to carry out this responsibility, shall immediately take the action necessary to confirm that there has been depredation by a mountain lion as reported. The confirmation process shall be completed as quickly as possible, but in no event more than 48 hours after receiving the report. If satisfied that there has been depredation by a mountain lion as reported, the department shall promptly issue a permit to take the depredating mountain lion.

Comment. Section 35410 continues former Fish and Game Code Section 4803 without substantive change.

§ 35415. Permit conditions

35415. In order to ensure that only the depredating mountain lion will be taken, the department shall issue the permit pursuant to Section 35410 with the following conditions attached:

(a) The permit shall expire 10 days after issuance.

(b) The permit shall authorize the holder to begin pursuit not more than one mile from the depredation site.

(c) The permit shall limit the pursuit of the depredating mountain lion to within a 10-mile radius from the location of the reported damage or destruction.

Comment. Section 35415 continues former Fish and Game Code Section 4804 without substantive change.

1 **§ 35420. Expedited permit**

2 35420. Whenever immediate authorization will materially assist in the pursuit of
3 the particular mountain lion believed to be responsible for the depredation
4 reported pursuant to Section 35405, the department or the animal damage control
5 officer may orally authorize the pursuit and taking of the depredating mountain
6 lion, and the department shall issue a written permit for the period previously
7 authorized as soon as practicable after the oral authorization.

8 **Comment.** Section 35420 continues former Fish and Game Code Section 4805 without
9 substantive change.

10 **§ 35425. Report to department**

11 35425. (a) Any person issued a permit pursuant to Section 35410 or 35420 shall
12 report the capturing, injuring, or killing of any mountain lion to an office of the
13 department by telephone within 24 hours, or, if telephoning is not practicable,
14 shall submit a report in writing within five days after the capturing, injuring, or
15 killing of the mountain lion.

16 (b) At the time of making the report of the capturing, injuring, or killing, the
17 holder of the permit shall make arrangements to turn over the mountain lion or the
18 entire carcass of the mountain lion that has been recovered to a representative of
19 the department, and shall do so in a timely manner.

20 **Comment.** Section 35425 continues former Fish and Game Code Section 4806 without
21 substantive change.

22 **§ 35430. Immediate taking of encountered depredator**

23 35430. (a) Any mountain lion that is encountered while in the act of pursuing,
24 inflicting injury to, or killing livestock, or domestic animals, may be taken
25 immediately by the owner of the property or the owner's employee or agent. The
26 taking shall be reported within 72 hours to the department. The department shall
27 investigate the depredation, and, if the mountain lion was captured, injured, or
28 killed, the mountain lion or the entire carcass of the mountain lion that has been
29 recovered shall be turned over to the department.

30 (b) Upon satisfactorily completing the investigation and receiving the mountain
31 lion or the carcass, if recovered, the department shall issue a permit confirming
32 that the requirements of this section have been met with respect to the particular
33 mountain lion taken under these circumstances.

34 (c) The department shall undertake a complete necropsy on any returned
35 mountain lion carcass and report the findings to the commission. The commission
36 shall compile the reported findings and prepare an annual written report that shall
37 be submitted to the Legislature not later than the January 15 next following the
38 year in which the mountain lion was taken.

39 **Comment.** Section 35430 continues former Fish and Game Code Section 4807 without
40 substantive change.

1 **§ 35435. Method of taking**

2 35435. A mountain lion authorized to be taken pursuant to this title shall be
3 taken by the most effective means available to take the mountain lion causing the
4 damage or destruction, except that no mountain lion shall be taken by means of
5 poison, leg-hold or metal-jawed traps, and snares.

6 **Comment.** Section 35435 continues former Fish and Game Code Section 4809 without
7 substantive change.

8 **§ 35440. Use of nonlethal procedures**

9 35440. (a) Unless authorized in this title, nonlethal procedures shall be used
10 when removing or taking any mountain lion that has not been designated as an
11 imminent threat to public health or safety.

12 (b) For purposes of this title, “imminent threat to public health or safety” means
13 a situation where a mountain lion exhibits one or more aggressive behaviors
14 directed toward a person that is not reasonably believed to be due to the presence
15 of responders.

16 (c) For purposes of this title, “nonlethal procedures” means procedures that may
17 include, but are not limited to, capturing, pursuing, anesthetizing, temporarily
18 possessing, temporarily injuring, marking, attaching to or surgically implanting
19 monitoring or recognition devices, providing veterinary care, transporting, hazing,
20 rehabilitating, releasing, or taking no action.

21 (d) The department may, as the department determines is necessary to protect
22 mountain lions or the public, authorize qualified individuals, educational
23 institutions, governmental agencies, or nongovernmental organizations to
24 implement nonlethal procedures on a mountain lion in accordance with
25 subdivision (a).

26 **Comment.** Section 35440 continues former Fish and Game Code Section 4801.5 without
27 substantive change.”

28 **CHAPTER 4. TAKE FOR SCIENTIFIC PURPOSES**

29 **§ 35500. Research**

30 35500. (a) As used in this section:

31 (1) “Authorized research project” means a research project involving mountain
32 lions subject to a Scientific Collecting Permit issued in accordance with this
33 section.

34 (2) “Permitholder” means a person to whom the department has issued a
35 Scientific Collecting Permit in accordance with this section.

36 (3) “Scientific Collecting Permit” or “permit” means a permit issued pursuant to
37 Section 9200 for a research project involving mountain lions in accordance with
38 this section.

39 (b) The department may authorize qualified individuals, educational institutions,
40 governmental agencies, or nongovernmental organizations to conduct scientific

1 research involving mountain lions pursuant to a Scientific Collecting Permit as
2 provided in Section 9200.

3 (c) The department may authorize a permitholder to pursue, capture, temporarily
4 possess, temporarily injure, mark, surgically implant a monitoring or recognition
5 devices in or attach such a device to, provide veterinary care to, and transport, a
6 mountain lion or a product of a mountain lion.

7 (d) In addition to the requirements in Section 9200, an authorized research
8 project shall be designed to do the following:

9 (1) Contribute to the knowledge of natural wildlife ecosystems.

10 (2) Minimize disruptions in the lives and movements of mountain lions and
11 other wildlife, as well as impacts to mountain lion or other wildlife habitat, while
12 maintaining the permitholder's research objectives.

13 (3) Directly or indirectly support the sustainability and survival of mountain lion
14 populations and healthy ecosystems.

15 (4) Prevent the permanent injury or killing of a mountain lion.

16 (e) An authorized research project shall be governed by the Scientific Collecting
17 Permit. The permit shall include, at a minimum, proposed research methods and
18 recordkeeping procedures that address the following:

19 (1) The capture of, anesthetization of, collection of diagnostic samples from, and
20 transport of, mountain lions or product of a mountain lion or a product of a
21 mountain lion.

22 (2) Attaching monitoring or recognition devices to, surgically implanting
23 those devices in, or marking, animals affect by the research project.

24 (3) Providing veterinary care as required for the health, safety, and humane
25 treatment of animals affected by the research project.

26 (4) The recording of the adverse effects of authorized research procedures on
27 mountain lions and other wildlife.

28 (5) The qualifications of onsite personnel necessary for carrying out authorized
29 research procedures. A permit applicant shall submit verifiable documentation
30 demonstrating that at least one onsite staff person has at least one year of
31 experience in proposed research methods that involve activities described in
32 subdivision (c).

33 (6) Annual and final reports to the department.

34 (f) The department shall notify the public at least 30 days prior to the issuance of
35 a permit, and, upon request, shall make available to the public copies of the permit
36 and annual and final reports.

37 (g) The department shall handle mortality or permanent injury to a mountain
38 lion as a result of research authorized pursuant to this section in a manner
39 consistent with the reporting and processing requirements imposed in Section
40 35430.

41 **Comment.** Section 35500 continues former Fish and Game Code Section 4810 without
42 substantive change.

TITLE 10. MUSKRAT

§ 35600. Fur-bearing mammal

35600. For the purposes of this code, a muskrat is a fur-bearing mammal.

Comment. Section 35600 continues the part of former Fish and Game Code Section 4000 applicable to muskrats without substantive change.

§ 35605. Provisions not exclusive

35605. The provisions of this title are not intended to be exclusive. Other provisions that govern muskrat include, but are not limited to, the following provisions:

(a) Section 11010.

(b) Section 37460.

Comment. Section 35605 is new. It is added for drafting convenience.

§ 35610. Protection of property

35610. (a) Except as provided in Section 11200, a muskrat that is found to be injuring growing crops or other property may be taken by the following persons at any time or in any manner not prohibited by this code or regulations adopted pursuant to this code:

(1) The owner or tenant of the premises.

(2) An employee or agent of the owner or tenant of the premises, who is in immediate possession of written permission from the owner or tenant to take muskrat described in this subdivision.

(3) An officer or employee of the Department of Food and Agriculture.

(4) A federal, county, or city officer or employee acting in official capacity pursuant to provisions of the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(b) A person that takes a muskrat pursuant to this section is exempt from Section 9500, except when providing trapping services for a fee.

(c) Raw fur from a muskrat taken pursuant to this section shall not be sold.

Comment. Section 35610 restates the part of former Fish and Game Code Section 4152 applicable to muskrats without substantive change.

See also Section 11000 (inspection and removal of animals from traps).

Notes. (1) Proposed Section 35610 is intended to restate the part of existing Fish and Game Code Section 4152 applicable to muskrats to clarify the meaning of that language, without changing its substantive effect. Existing Section 4152 reads as follows:

4152. (a) Except as provided in Section 4005, nongame mammals and black-tailed jackrabbits, muskrats, subspecies of red fox that are not the native Sierra Nevada red fox (*Vulpes vulpes necator*), and red fox squirrels that are found to be injuring growing crops or other property may be taken at any time or in any manner in accordance with this code and regulations adopted pursuant to this code by the owner or tenant of the premises or employees and agents in immediate possession of written permission from the owner or tenant thereof. They may also be

taken by officers or employees of the Department of Food and Agriculture or by federal, county, or city officers or employees when acting in their official capacities pursuant to the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code. Persons taking mammals in accordance with this section are exempt from Section 3007, except when providing trapping services for a fee. Raw furs, as defined in Section 4005, that are taken under this section, shall not be sold.

(b) Traps used pursuant to this section shall be inspected and all animals in the traps shall be removed at least once daily. The inspection and removal shall be done by the person who sets the trap or the owner of the land where the trap is set or an agent of either.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 4152 refers to employees and agents in “immediate possession” of written permission from the owner or tenant of premises where depredators are injuring property.

The Commission invites comment on whether or how the term “immediate possession” differs from “possession,” and whether the more familiar term “possession” could be substituted without substantively changing the meaning of the provision.

§ 35615. Importation or transportation of live muskrat

35615. (a) It is unlawful to import or transport any live muskrat (genus *Ondatra*) into, or possess any live muskrat in, California except under permit issued by the department pursuant to Section 26520, or as otherwise provided by law.

(b) A county agricultural commissioner, fish and game deputy, or state plant quarantine officer may enter upon lands or waters west of the crest of the Cascade-Sierra Nevada mountain system, and west and south of the Tehachapi, Liebre, San Gabriel, San Bernardino, San Jacinto, Cuyamaca, and connected mountains south to the international boundary, or in any watershed tributary to, or draining into, the Pacific Ocean to remove or destroy the muskrats.

Comment. Section 35615 continues former Fish and Game Code Section 2250 without substantive change.

TITLE 11. RABBIT AND HARE

§ 35700. Classification

35700. For the purposes of this code, a jackrabbit and varying hares (genus *Lepus*), a cottontail, brush rabbit, and a pigmy rabbit (genus *Sylvilagus*), are game mammals.

Comment. Section 35700 continues the part of former Fish and Game Code Section 3950(a) applicable to jackrabbits and varying hares, cottontails, brush rabbits, and pigmy rabbits, without substantive change.

§ 35705. Protection of crops

35705. (a) Notwithstanding any provision of this code to the contrary, an owner or tenant of land, or any person authorized in writing by that owner or tenant, may take cottontail or brush rabbits during any time of the year when damage to crops or forage is being experienced on that land.

(b) Any person transporting a rabbit taken pursuant to subdivision (a) from the land where the rabbit was taken, other than the owner or tenant of that land, shall have in possession written authority from the owner or tenant of the land.

(c) Rabbits taken pursuant to this section shall not be sold.

Comment. Section 35705 continues former Fish and Game Code Section 4186 without substantive change.

§ 35710. Taking of jackrabbit injuring property

35710. (a) Except as provided in Section 11200, a black-tailed jackrabbit that is found to be injuring growing crops or other property may be taken by the following persons at any time or in any manner not prohibited by this code or regulations adopted pursuant to this code:

(1) The owner or tenant of the premises.

(2) An employee or agent of the owner or tenant of the premises, who is in immediate possession of written permission from the owner or tenant to take a black-tailed jackrabbit described in this subdivision.

(3) An officer or employee of the Department of Food and Agriculture.

(4) A federal, county, or city officer or employee acting in official capacity pursuant to provisions of the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(b) A person that takes a black-tailed jackrabbit pursuant to this section is exempt from Section 9500, except when providing trapping services for a fee.

(c) Raw fur from a black-tailed jackrabbit taken pursuant to this section shall not be sold.

Comment. Section 35710 restates the part of former Fish and Game Code Section 4152 applicable to black-tailed jackrabbits without substantive change.

See also Section 11000 (inspection and removal of animals from traps).

Notes. (1) Proposed Section 35710 is intended to restate the part of existing Fish and Game Code Section 4152 applicable to black-tailed jackrabbits to clarify the meaning of that language, without changing its substantive effect. Existing Section 4152 reads as follows:

4152. (a) Except as provided in Section 4005, nongame mammals and black-tailed jackrabbits, muskrats, subspecies of red fox that are not the native Sierra Nevada red fox (*Vulpes vulpes necator*), and red fox squirrels that are found to be injuring growing crops or other property may be taken at any time or in any manner in accordance with this code and regulations adopted pursuant to this code by the owner or tenant of the premises or employees and agents in immediate possession of written permission from the owner or tenant thereof. They may also be taken by officers or employees of the Department of Food and Agriculture or by federal, county, or city officers or employees when acting in their official capacities pursuant to the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code. Persons taking mammals in accordance with this section are exempt from Section 3007, except when providing trapping services for a fee. Raw furs, as defined in Section 4005, that are taken under this section, shall not be sold.

(b) Traps used pursuant to this section shall be inspected and all animals in the traps shall be removed at least once daily. The inspection and removal shall be done by the person who sets the trap or the owner of the land where the trap is set or an agent of either.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 4152 refers to employees and agents in “immediate possession” of written permission from the owner or tenant of premises where depredators are injuring property.

The Commission invites comment on whether or how the term “immediate possession” differs from “possession,” and whether the more familiar term “possession” could be substituted without substantively changing the meaning of the provision.

TITLE 12. SEA OTTER

§ 35750. Classification

35750. For the purposes of this code:

(a) A sea otter is a marine mammal.

(b) A Southern sea otter (*Enhydra lutris nereis*) is a fully protected mammal.

Comment. Subdivision (a) of Section 35750 continues the part of former Fish and Game Code Section 4500(c) applicable to sea otters without substantive change.

Subdivision (b) continues former Fish and Game Code Section 4700(b)(8) without substantive change.

§ 35755. Regulation of cat litter

35755. (a) The Legislature finds and declares that several types of nonpoint source pollution are harmful to sea otters, and that scientific studies point to links between cat feces, the pathogen T-gondii, and sea otter mortality. The Legislature further finds and declares that efforts to reduce the flushing of cat litter and cat feces are steps toward better water quality in the sea otters’ natural habitat.

(b) Any cat litter offered for sale in this state shall contain one of the following statements:

(1) “Encouraging your cat to use an indoor litter box, or properly disposing of outdoor cat feces, is beneficial to overall water quality. Please do not flush cat litter in toilets or dispose of it outdoors in gutters or storm drains.”

(2) A general statement that encourages the disposal of cat feces in trash and discourages flushing cat feces in toilets or disposing of them in drains.

Comment. Section 35755 continues former Fish and Game Code Section 4501 without substantive change.

1 TITLE 13. SHEEP

2 CHAPTER 1. GENERAL PROVISIONS

3 § 35800. Classification

4 35800. For the purposes of this code, except as provided by subdivision (b) of
5 Section 35900, a Bighorn sheep (*Ovis canadensis*) is a fully protected mammal.

6 **Comment.** Section 35800 continues former Fish and Game Code Section 4700(b)(2) without
7 substantive change.

8 § 35805. Provisions not exclusive

9 35805. The provisions of this title are not intended to be exclusive. Other
10 provisions that govern sheep include, but are not limited to, the following
11 provisions:

12 (a) Paragraph (5) of subdivision (a) of Section 460.

13 (b) Section 35400.

14 (c) Section 55725.

15 (d) Section 60855.

16 **Comment.** Section 35805 is new. It is added for drafting convenience.

17 § 35810. Legislative declaration of policy

18 35810. The Legislature declares that bighorn sheep are an important wildlife
19 resource of the state to be managed and maintained at sound biological levels.
20 Therefore, it is hereby declared to be the policy of the state to encourage the
21 preservation, restoration, utilization, and management of California's bighorn
22 sheep population. The management shall be in accordance with the policy set forth
23 in Section 54505.

24 **Comment.** Section 35810 continues former Fish and Game Code Section 4900 without
25 substantive change.

26 § 35815. Development of plans for population management

27 35815. The department shall determine the status and the trend of bighorn sheep
28 populations by management units. A plan shall be developed for each of the
29 management units. The plan for each management unit shall include all of the
30 following:

31 (a) Data on the numbers, age, sex ratios, and distribution of bighorn sheep
32 within the management unit.

33 (b) A survey of range conditions and a report on the competition that may exist
34 as a result of human, livestock, wild burro, or any other mammal encroachment.

35 (c) An assessment of the need to relocate or reestablish bighorn populations.

36 (d) A statement on the prevalence of disease or parasites within the population.

37 (e) Recommendations for achieving the policy objective of Section 35810.

1 **Comment.** Section 35815 continues former Fish and Game Code Section 4901 without
2 substantive change.

3 **§ 35820. Sale of tag by nonprofit organization**

4 35820. (a) A nonprofit organization designated by the department to assist in the
5 sale of bighorn sheep fundraising tags that are sold on behalf of the department for
6 the purpose of raising funds for specified programs and projects, pursuant to
7 subdivision (d) of Section 35900, is authorized to retain 5 percent of the amount of
8 the sale price of the tag as a reasonable vendor fee.

9 (b) Within 30 days of the date of the sale, the selling nonprofit organization shall
10 send the department 95 percent of the total auction sale price of the tag, with an
11 itemized receipt showing the sale price and the 5-percent reduction retained by the
12 nonprofit organization as a vendor's fee.

13 **Comment.** Subdivision (a) of Section 35820 continues the part of former Fish and Game Code
14 Section 709 applicable to bighorn sheep without substantive change.

15 Subdivision (b) continues the part of the second sentence of former Fish and Game Code
16 Section 3953(b) applicable to sheep without substantive change.

17 **§ 35825. Deposit of fees**

18 35825. Except as provided in subdivision (a) of Section 35820, all revenues
19 from the sale of sheep tags, including any fundraising tags, shall be deposited in
20 the Big Game Management Account established in Section 31900 to permit
21 separate accountability for the receipt and expenditure of these funds.

22 **Comment.** Section 35825 continues the part of the first sentence of former Fish and Game
23 Code Section 3953(b) applicable to sheep without substantive change.

24 **CHAPTER 2. NELSON BIGHORN SHEEP**

25 **§ 35900. Issuance of tags (operative until 7/1/25)**

26 35900. (a) The commission may adopt all regulations necessary to provide for
27 biologically sound management of Nelson bighorn sheep (subspecies *Ovis*
28 *canadensis nelsoni*).

29 (b) (1) After the plans developed by the department pursuant to Section 35815
30 for the management units have been submitted, the commission may authorize
31 sport hunting of mature Nelson bighorn rams. Before authorizing the sport
32 hunting, the commission shall take into account the Nelson bighorn sheep
33 population statewide, including the population in the management units designated
34 for hunting.

35 (2) Notwithstanding Section 1025, the commission shall not, however, adopt
36 regulations authorizing the sport hunting in a single year of more than 15 percent
37 of the mature Nelson bighorn rams in a single management unit, based on the
38 department's annual estimate of the population in each management unit.

39 (c) The fee for a bighorn ram tag for a resident of the state, except for a bighorn
40 ram tag issued to a resident junior hunter, to take a Nelson bighorn ram shall be

four hundred dollars (\$400), as adjusted pursuant to Section 3755. The fee for a bighorn ram tag for a resident junior hunter to take a Nelson bighorn ram shall be twenty dollars (\$20), as adjusted under Section 3755. On or before July 1, 2015, the commission shall, by regulation, fix the fee for a nonresident of the state at not less than one thousand five hundred dollars (\$1,500), which shall be adjusted annually pursuant to Section 3755. Fee revenues shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

(d) The commission shall annually direct the department to authorize not more than three of the tags available for issuance that year to take Nelson bighorn rams for the purpose of raising funds for programs and projects to benefit Nelson bighorn sheep. These tags may be sold to residents or nonresidents of the State of California at auction or by another method and shall not be subject to the fee limitation prescribed in subdivision (c). Commencing with tags sold for the 1993 hunting season, if more than one tag is authorized, the department shall designate a nonprofit organization organized pursuant to the laws of this state, or the California chapter of a nonprofit organization organized pursuant to the laws of another state, as the seller of not less than one of these tags. The number of tags authorized for the purpose of raising funds pursuant to this subdivision, if more than one, shall not exceed 15 percent of the total number of tags authorized pursuant to subdivision (b). All revenue from the sale of tags pursuant to this subdivision shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

(e) No tag issued pursuant to this section shall be valid unless and until the licensee has successfully completed a prehunt hunter familiarization and orientation and has demonstrated to the department that he or she is familiar with the requisite equipment for participating in the hunting of Nelson bighorn rams, as determined by the commission. The orientation shall be conducted by the department at convenient locations and times preceding each season, as determined by the commission.

(f) This section shall become inoperative on July 1, 2025, and, as of January 1, 2026, is repealed.

Comment. Section 35900 continues former Fish and Game Code Section 4902, as amended by 2018 Cal. Stat. ch. 295, § 10, without substantive change.

Note. This version of proposed Section 35900 would continue Section 4902, as amended by 2018 Cal. Stat. ch. 295, § 10. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 35900. Issuance of tags (operative on 7/1/25)

35900. (a) The commission may adopt all regulations necessary to provide for biologically sound management of Nelson bighorn sheep (subspecies *Ovis canadensis nelsoni*).

1 (b) (1) After the plans developed by the department pursuant to Section 4901 for
2 the management units have been submitted, the commission may authorize sport
3 hunting of mature Nelson bighorn rams. Before authorizing the sport hunting, the
4 commission shall take into account the Nelson bighorn sheep population
5 statewide, including the population in the management units designated for
6 hunting.

7 (2) Notwithstanding Section 219, the commission shall not, however, adopt
8 regulations authorizing the sport hunting in a single year of more than 15 percent
9 of the mature Nelson bighorn rams in a single management unit, based on the
10 department's annual estimate of the population in each management unit.

11 (c) The fee for a bighorn ram tag to take a Nelson bighorn ram shall be four
12 hundred dollars (\$400) for a resident of the state, which shall be adjusted annually
13 pursuant to Section 713. On or before July 1, 2015, the commission shall, by
14 regulation, fix the fee for a nonresident of the state at not less than one thousand
15 five hundred dollars (\$1,500), which shall be adjusted annually pursuant to
16 Section 713. Fee revenues shall be deposited in the Big Game Management
17 Account established in Section 3953 and, upon appropriation by the Legislature,
18 shall be expended as set forth in that section.

19 (d) The commission shall annually direct the department to authorize not more
20 than three of the tags available for issuance that year to take Nelson bighorn rams
21 for the purpose of raising funds for programs and projects to benefit Nelson
22 bighorn sheep. These tags may be sold to residents or nonresidents of the State of
23 California at auction or by another method and shall not be subject to the fee
24 limitation prescribed in subdivision (c). Commencing with tags sold for the 1993
25 hunting season, if more than one tag is authorized, the department shall designate
26 a nonprofit organization organized pursuant to the laws of this state, or the
27 California chapter of a nonprofit organization organized pursuant to the laws of
28 another state, as the seller of not less than one of these tags. The number of tags
29 authorized for the purpose of raising funds pursuant to this subdivision, if more
30 than one, shall not exceed 15 percent of the total number of tags authorized
31 pursuant to subdivision (b). All revenue from the sale of tags pursuant to this
32 subdivision shall be deposited in the Big Game Management Account established
33 in Section 3953 and, upon appropriation by the Legislature, shall be expended as
34 set forth in that section.

35 (e) No tag issued pursuant to this section shall be valid unless and until the
36 licensee has successfully completed a prehunt hunter familiarization and
37 orientation and has demonstrated to the department that he or she is familiar with
38 the requisite equipment for participating in the hunting of Nelson bighorn rams, as
39 determined by the commission. The orientation shall be conducted by the
40 department at convenient locations and times preceding each season, as
41 determined by the commission.

42 (f) This section shall become operative on July 1, 2025.

Comment. Section 35900 continues former Fish and Game Code Section 4902, as added by 2018 Cal. Stat. ch. 295, § 11, without substantive change.

Note. This version of proposed Section 35900 would continue Section 4902, as added by 2018 Cal. Stat. ch. 295, § 11. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 35915. Use of revenue

35915. (a) Revenue from the fees authorized by this chapter shall be deposited in the Big Game Management Account established in Section 31900 and, upon appropriation by the Legislature, shall be expended as set forth in that section.

(b) Administrative overhead shall be limited to the reasonable costs associated with the direct administration of the program.

(c) These funds shall be used to augment, and not to replace, moneys appropriated from existing funds available to the department for the preservation, restoration, utilization, and management of bighorn sheep. The department shall maintain internal accountability necessary to ensure that all restrictions on the expenditure of these funds are met.

Comment. Section 35915 continues former Fish and Game Code Section 4903 without substantive change.

TITLE 14. SQUIRREL

§ 36000. Classification

36000. For the purposes of this code, a tree squirrel (genus *Sciurus* and *Tamiasciurus*) is a game mammal.

Comment. Section 36000 continues the part of former Fish and Game Code Section 3950(a) applicable to tree squirrels without substantive change.

§ 36005. Provisions not exclusive

36005. The provisions of this part are not intended to be exclusive. Other provisions that govern squirrels include, but are not limited to, Section 37460.

Comment. Section 36005 is new. It is added for drafting convenience.

§ 36010. Protection of property

36010. (a) Except as provided in Section 11200, a red fox squirrel that is found to be injuring growing crops or other property may be taken by the following persons at any time or in any manner not prohibited by this code or regulations adopted pursuant to this code:

(1) The owner or tenant of the premises.

(2) An employee or agent of the owner or tenant of the premises, who is in immediate possession of written permission from the owner or tenant to take a squirrel described in this subdivision.

(3) An officer or employee of the Department of Food and Agriculture.

(4) A federal, county, or city officer or employee acting in official capacity pursuant to provisions of the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code.

(b) A person that takes a red fox squirrel pursuant to this section is exempt from Section 9500, except when providing trapping services for a fee.

(c) Raw fur from a red fox squirrel taken pursuant to this section shall not be sold.

Comment. Section 36010 restates the part of former Fish and Game Code Section 4152 applicable to red fox squirrels without substantive change.

See also Section 11000 (inspection and removal of animals from traps).

Notes. (1) Proposed Section 36010 is intended to restate the part of existing Fish and Game Code Section 4152 applicable to red fox squirrels to clarify the meaning of that language, without changing its substantive effect. Existing Section 4152 reads as follows:

4152. (a) Except as provided in Section 4005, nongame mammals and black-tailed jackrabbits, muskrats, subspecies of red fox that are not the native Sierra Nevada red fox (*Vulpes vulpes necator*), and red fox squirrels that are found to be injuring growing crops or other property may be taken at any time or in any manner in accordance with this code and regulations adopted pursuant to this code by the owner or tenant of the premises or employees and agents in immediate possession of written permission from the owner or tenant thereof. They may also be taken by officers or employees of the Department of Food and Agriculture or by federal, county, or city officers or employees when acting in their official capacities pursuant to the Food and Agricultural Code pertaining to pests, or pursuant to Article 6 (commencing with Section 6021) of Chapter 9 of Part 1 of Division 4 of the Food and Agricultural Code. Persons taking mammals in accordance with this section are exempt from Section 3007, except when providing trapping services for a fee. Raw furs, as defined in Section 4005, that are taken under this section, shall not be sold.

(b) Traps used pursuant to this section shall be inspected and all animals in the traps shall be removed at least once daily. The inspection and removal shall be done by the person who sets the trap or the owner of the land where the trap is set or an agent of either.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

(2) Existing Section 4152 refers to employees and agents in “immediate possession” of written permission from the owner or tenant of premises where depredators are injuring property.

The Commission invites comment on whether or how the term “immediate possession” differs from “possession,” and whether the more familiar term “possession” could be substituted without substantively changing the meaning of the provision.

§ 36015. Depredation permit

36015. (a) An owner or tenant of land or property that is being damaged or destroyed, or is in danger of being damaged or destroyed, by gray squirrels, may apply to the department for a permit to kill the squirrels causing or threatening the damage or destruction.

(b) The department, upon satisfactory evidence of actual or immediately threatened damage or destruction of land or property, shall issue a revocable permit for the taking and disposition of the responsible squirrels, under regulations

adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions.

(c) Gray squirrels taken under a permit issued pursuant to subdivision (b) shall not be sold or shipped from the premises on which they are taken, except pursuant to instructions from the department.

(d) No poison of any type may be used to take any gray squirrel pursuant to this section.

(e) The department shall designate the type of trap to be used to trap gray squirrels, ensuring that the designated trap is the most humane method available. The department may require trapped squirrels to be released in parks or other nonagricultural areas.

(f) It is unlawful for any person to violate the terms of any permit issued pursuant to this section.

Comment. Section 36015 restates the part of former Fish and Game Code Section 4181(a) applicable to gray squirrels without substantive change.

Note. Proposed Section 36015 is intended to restate the part of existing Fish and Game Code Section 4181(a) applicable to gray squirrels to clarify the meaning of that language, without changing its substantive effect. Existing Section 4181 reads as follows:

4181. (a) Except as provided in Section 4181.1, any owner or tenant of land or property that is being damaged or destroyed or is in danger of being damaged or destroyed by elk, bear, beaver, wild pig, wild turkeys, or gray squirrels, may apply to the department for a permit to kill the animals. Subject to the limitations in subdivisions (b) and (d), the department, upon satisfactory evidence of the damage or destruction, actual or immediately threatened, shall issue a revocable permit for the taking and disposition of the animals under regulations adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions. Animals so taken shall not be sold or shipped from the premises on which they are taken except under instructions from the department. No iron-jawed or steel-jawed or any type of metal-jawed trap shall be used to take any bear pursuant to this section. No poison of any type may be used to take any gray squirrel or wild turkey pursuant to this section. The department shall designate the type of trap to be used to ensure the most humane method is used to trap gray squirrels. The department may require trapped squirrels to be released in parks or other nonagricultural areas. It is unlawful for any person to violate the terms of any permit issued under this section.

(b)

The references in existing Section 4181 to existing Section 4181.1 and to subdivisions (b) and (d) of Section 4181 have not been continued in proposed Section 36015, as those provisions do not apply to squirrels.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

TITLE 15. WHALE

CHAPTER 1. WHALES GENERALLY

§ 37000. Classification

37000. For the purposes of this code:

1 (a) A whale is a marine mammal.

2 (b) A Pacific right whale (*Eubalaena sieboldi*) is a fully protected mammal.

3 **Comment.** Subdivision (a) of Section 37000 continues the part of former Fish and Game Code
4 Section 4500(c) applicable to whales without substantive change.

5 Subdivision (b) continues former Fish and Game Code Section 4700(b)(6) without substantive
6 change.

7 **§ 37005. Provisions not exclusive**

8 37005. The provisions of this part are not intended to be exclusive. Other
9 provisions that govern whales include, but are not limited to, the following
10 provisions:

11 (a) Section 430.

12 (b) Section 16905.

13 (c) Section 28650.

14 (d) Section 32500.

15 **Comment.** Section 37005 is new. It is added for drafting convenience.

16 **CHAPTER 2. ORCA**

17 **§ 37050. California Orca Protection Act**

18 37050. This section shall be known, and may be cited, as the California Orca
19 Protection Act.

20 (a) It is unlawful for any person to do any of the following:

21 (1) (A) Except as provided in subparagraph (B) and subdivision (c), hold in
22 captivity an orca, whether wild-caught or captive-bred, for any purpose, including,
23 but not limited to, display, performance, or entertainment purposes.

24 (B) An orca located in the state on January 1, 2017, may continue to be held in
25 captivity for its current purpose and after June 1, 2017, may continue to be used
26 for educational presentations.

27 (2) Breed or impregnate any orca held in captivity in the state.

28 (3) Export, collect, or import the semen, other gametes, or embryos of an orca
29 held in captivity for the purpose of artificial insemination.

30 (4) Export, transport, move, or sell an orca located in the state to another state or
31 country unless otherwise authorized by federal law or if the transfer is to another
32 facility within North America that meets standards comparable to those provided
33 under the Animal Welfare Act (7 U.S.C. Sec. 2131 and following).

34 (b) This section does not apply to an orca that is held by a bona fide educational
35 or scientific institution for rehabilitation after a rescue or stranding or for research
36 purposes. However, the department shall be notified immediately upon the rescue
37 or acquisition of any orca, and an orca that is held for rehabilitation or research
38 purposes shall be returned to the wild whenever possible. If return to the wild is
39 not possible, the orca may be used for educational presentations, but shall not be
40 used for breeding, performance, or entertainment purposes.

(c) As used in this section, the following terms are defined as follows:

(1) “Educational presentation” means a live, scheduled orca display in the presence of spectators that includes natural behaviors, enrichment, exercise activities, and a live narration and video content that provides science-based education to the public about orcas.

(2) “Orca” means a killer whale (*Orcinus orca*).

(3) “Bona fide educational or scientific institution” means an institution that establishes through documentation any of the following:

(A) Educational or scientific tax exemption from the Internal Revenue Service or the institution’s national, state, or local tax authority.

(B) Accreditation as an educational or scientific institution from a qualified national, regional, state, or local authority for the institution’s location.

(C) Accreditation by a nationally or internationally recognized zoological or aquarium accreditation organization.

(d) The provisions of this section and Section 5522 are severable. If any provision of this section or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

Comment. Section 37050 continues former Fish and Game Code Section 4502.5(a), (c)-(e) without substantive change.

See also Section 5522 (enforcement).

TITLE 16. WILD PIG

CHAPTER 1. GENERAL PROVISIONS

§ 37100. Game mammal

37100. For the purposes of this code, a wild pig, including a feral pig and a European wild boar (genus *Sus*), is a game mammal.

Comment. Section 37100 continues the part of former Fish and Game Code Section 3950(a) applicable to wild pigs without substantive change.

§ 37105. “Wild pigs”

37105. For purposes of this title, “wild pig” means free-roaming pigs not distinguished by branding, ear marking, or other permanent identification methods.

Comment. Section 37105 continues former Fish and Game Code Section 4650 without substantive change, except that the definition is made applicable to the provisions that continue former Fish and Game Code Sections 4181, 4181.1, 4181.2, and 4188.

Note. Existing Section 4650 provides a definition of the term “wild pigs,” but limits the application of the definition to the provisions in the chapter of the existing code in which Section 4650 appears. (Those provisions are continued in Chapters 1 through 4 of this title.)

However, the term “wild pig” is used in several other provisions of the existing code, without definition. Among those provisions are existing Sections 4181, 4181.1, 4181.2, and 4188 (which

would be continued by the proposed provisions in Chapter 5 of this title), all relating to the taking of wild pigs that are damaging or injuring property. The Commission believes it would be minor substantive improvement to extend the application of the definition of the term “wild pig” to those provisions, and has therefore proposed a revision of this provision to achieve that objective.

The Commission invites comment on this revision. The Commission also invites comment on whether the definition of “wild pig” in this provision should be generalized to apply throughout the proposed law, and relocated with the other generally applicable definitional provisions in the proposed law.

§ 37110. Provisions not exclusive

37110. The provisions of this part are not intended to be exclusive. Other provisions that govern wild pigs include, but are not limited to, the following provisions:

(a) Section 4570.

(b) Section 59315

Comment. Section 37110 is new. It is added for drafting convenience.

CHAPTER 2. TAKE GENERALLY

§ 37150. Tag requirement

37150. It is unlawful to take any wild pig, except as provided in Section 37360, without first obtaining a tag authorizing the taking of that wild pig in accordance with this title.

Comment. Section 37150 continues former Fish and Game Code Section 4652, without substantive change.

§ 37155. Tagging of wild pig

37155. (a) The holder of a wild pig tag shall keep the tag in his or her possession while hunting wild pig.

(b) Before the taking of any wild pig, the holder of a wild pig tag, except for wild pig tags issued through the Automated License Data System, shall legibly write or otherwise affix the holder’s hunting license number to the wild pig tag.

(c) Upon the killing of any wild pig, the date of the kill shall be clearly marked by the holder of the tag on both parts of the tag. Before transporting the pig, a tag shall be attached to the carcass by the holder of the tag. The holder of the wild pig tag shall immediately, upon harvesting a pig, notify the department in a manner specified by the commission.

Comment. Section 37155 continues former Fish and Game Code Section 4657 without substantive change.

CHAPTER 3. TAGS

§ 37200. Design and issuance of wild pig tag

37200. The department may determine the design and type of information to be included on the wild pig tag and prescribe the procedures for the issuance and use of the tag.

Comment. Section 37200 continues former Fish and Game Code Section 4653 without substantive change.

§ 37205. Obtaining tag

37205. (a) To obtain a wild pig tag, a person must be 12 years of age or older, and possess either a valid hunting license, or if a nonresident, a valid California nonresident hunting license.

(b) A person authorized to obtain a wild pig tag may obtain the number of wild pig tags corresponding to the number of wild pigs that may legally be taken by one person during the license year, upon payment of the fee required by Section 37215.

Comment. Section 37205 restates the part of former Fish and Game Code Section 4654 that relates to prerequisites for obtaining a wild pig tag, without substantive change.

Note. Proposed Section 37205 is intended to restate the part of existing Fish and Game Code Section 4654 that relates to prerequisites for obtaining a wild pig tag, to clarify the meaning of that language, without changing its substantive effect. The remainder of Section 4654, relating to fees for wild pig tags, would be continued by proposed Section 37215.

Section 4654 reads as follows:

4654. (a) Any resident of this state, 12 years of age or older, who possesses a valid hunting license, may procure the number of wild pig tags corresponding to the number of wild pigs that may legally be taken by one person during the license year upon payment of a base fee of fifteen dollars (\$15), for each wild pig tag.

(b) Any nonresident, 12 years of age or older, who possesses a valid California nonresident hunting license, may procure the number of wild pig tags corresponding to the number of wild pigs that may legally be taken by one person during the license year upon payment of a base fee of fifty dollars (\$50), for each wild pig tag.

(c) The base fees specified in this section are applicable to the 2004 license year, and shall be adjusted annually thereafter pursuant to Section 713.

The Commission invites comment on whether the restatement of the part of Section 4654 continued in proposed Section 37205 would cause any substantive change in the meaning of the provision.

§ 37210. Period of validity of tag

37210. Wild pig tags are valid only during that portion of the current hunting license year in which wild pigs may be taken or possessed in any area of the state.

Comment. Section 37210 continues former Fish and Game Code Section 4655 without substantive change.

1 **§ 37215. Fees for wild pig tag**

2 37215. The fee for a wild pig tag shall be as follows:

3 (a) For a resident of the state, a base fee of fifteen dollars (\$15) per tag, adjusted
4 under Section 3755.

5 (b) For a nonresident, a base fee of fifty dollars (\$50) per tag, adjusted under
6 Section 3755.

7 **Comment.** Section 37215 restates the part of former Fish and Game Code Section 4654 that
8 relates to prerequisites for obtaining a wild pig tag, without substantive change.

9 **Note.** Subdivision (a) of proposed Section 37215 is intended to restate the part of existing
10 Fish and Game Code Section 4654 that relates to fees for wild pig tags, to clarify the meaning of
11 that language, without changing its substantive effect. The remainder of Section 4654, relating to
12 prerequisites for obtaining a wild pig tag, would be continued by proposed Section 37205.

13 Section 4654 reads as follows:

14 4654. (a) Any resident of this state, 12 years of age or older, who possesses a valid hunting
15 license, may procure the number of wild pig tags corresponding to the number of wild pigs that
16 may legally be taken by one person during the license year upon payment of a base fee of fifteen
17 dollars (\$15), for each wild pig tag.

18 (b) Any nonresident, 12 years of age or older, who possesses a valid California nonresident
19 hunting license, may procure the number of wild pig tags corresponding to the number of wild
20 pigs that may legally be taken by one person during the license year upon payment of a base fee
21 of fifty dollars (\$50), for each wild pig tag.

22 (c) The base fees specified in this section are applicable to the 2004 license year, and shall be
23 adjusted annually thereafter pursuant to Section 713.

24 **The Commission invites comment on whether the restatement of the part of Section 4654**
25 **continued in subdivision (a) of proposed Section 37215 would cause any substantive change**
26 **in the meaning of the provision.**

27 **§ 37220. Deposit of fees**

28 37220. All revenues from the sale of wild pig tags, including any fundraising
29 tags, shall be deposited in the Big Game Management Account established in
30 Section 31900 to permit separate accountability for the receipt and expenditure of
31 these funds.

32 **Comment.** Section 37220 continues the part of the first sentence of former Fish and Game
33 Code Section 3953(b) applicable to wild pigs without substantive change.

34 **Note.** This proposed section together with proposed Sections 31905 and 31930 appear to
35 render the existing Section 4656 superfluous, and that section would not be continued in the
36 proposed law. Existing Section 4656 reads as follows:

37 4656. Revenues received pursuant to this chapter shall be deposited in the Big Game
38 Management Account established in Section 3953. These funds shall be available for expenditure
39 by the department as set forth in Section 3953. The department shall maintain all internal
40 accounting measures necessary to ensure that all restrictions on these funds are met.

41 **The Commission invites comment on whether the discontinuation of existing Section 4656**
42 **in the proposed law is appropriate.**

CHAPTER 4. POPULATION MANAGEMENT

§ 37300. Management plan

37300. (a) The department shall prepare a plan for the management of wild pigs. Under the plan, the status and trend of wild pig populations shall be determined and management units shall be designated within the state. The plan may establish pig management zones to address regional needs and opportunities. In preparing the plan, the department shall consider available, existing information and literature relative to wild pigs.

(b) The plan may include all of the following:

(1) The distribution and abundance of wild pigs, including feral pigs and European wild boars (genus *Sus*).

(2) A survey of range conditions.

(3) Recommendations for investigations and utilization of wild pigs.

(4) Encouraging mitigation of depredation by sport hunting pursuant to this title.

(5) Live trapping and relocation of wild pigs to areas suitable and accessible to mitigation of depredation, with the consent of the landowner and after prior consultation with adjacent landowners who, in the department's opinion may be impacted, pursuant to this title.

Comment. Section 37300 continues former Fish and Game Code Section 4651 without substantive change.

Note. The intended meaning of the words “pursuant to this chapter” at the end of existing Fish and Game Code Section 4651(a)(5) (which would be continued by the words “pursuant to this title” at the end of proposed Section 37300(b)(5)) is unclear, as there are no provisions in that referenced chapter of the existing code that relate to the trapping or relocation of wild pigs.

The Commission invites comment on this issue.

CHAPTER 5. TAKE TO PROTECT PROPERTY

§ 37350. “Damage”

37350. (a) For the purposes of this chapter, “damage” caused by a wild pig means loss or harm resulting from injury to person or property.

(b) The department shall develop statewide guidelines to aid in determining the damage caused by wild pigs. The guidelines shall consider various uses of the land impacted by pigs.

Comment. Section 37350 continues former Fish and Game Code Section 4181.2 without substantive change.

§ 37355. Protection of property

37355. (a) Notwithstanding Section 37150, a wild pig encountered in the act of inflicting injury to, molesting, pursuing, worrying, or killing livestock, or damaging or destroying, or threatening to immediately damage or destroy, land or other property, including, but not limited to, rare, threatened, or endangered native

1 plants, wildlife, or aquatic species, may be taken immediately by any of the
2 following persons:

3 (1) The owner of the livestock, land, or property.

4 (2) The owner's agent or employee.

5 (3) An agent or employee of any federal, state, county, or city entity when acting
6 in official capacity.

7 (b) The person taking the wild pig shall report the taking no later than the next
8 working day to the department and shall make the carcass available to the
9 department.

10 (c) Unless otherwise directed by the department and notwithstanding Section
11 37155, a person taking a wild pig pursuant to this section, or to whom the carcass
12 of a wild pig taken pursuant to this section is transferred pursuant to subdivision
13 (e), may possess the carcass of the wild pig, or may transfer the carcass to another
14 person or entity, if the transfer is made for no compensation. A person who
15 arranges a transfer pursuant to this subdivision shall be deemed to be in
16 compliance with Section 31800.

17 (d) A violation of this section is punishable pursuant to subdivision (b) of
18 Section 4400. It is the intent of the Legislature that nothing in this section shall be
19 interpreted to authorize a person to take wild pig pursuant to this section in
20 violation of a state statute or regulation, or a local zoning or other ordinance that is
21 adopted pursuant to other provisions of law and that restricts the discharge of a
22 firearm.

23 (e) The department shall make a record of each report made pursuant to
24 subdivision (b), and may have an employee of the department investigate the
25 taking or cause the taking to be investigated. The person taking a wild pig shall
26 provide information as deemed necessary by the department. Upon completion of
27 an investigation, the investigator may, upon a finding that the requirements of this
28 section have been met with respect to a wild pig taken under subdivision (a), issue
29 a written statement to the person taking the wild pig, confirming that the
30 requirements of this section have been met.

31 (f) The department shall provide a person who reports taking wild pigs pursuant
32 to subdivision (b) with written information that sets forth available options for
33 wild pig control, including, but not limited to, depredation permits, allowing
34 periodic access to licensed hunters, and holding special hunts authorized pursuant
35 to Section 37365. The department may maintain and make available to these
36 persons lists of licensed hunters interested in wild pig hunting, and lists of
37 nonprofit organizations available to take possession of the carcasses of
38 depredating wild pigs.

39 **Comment.** Subdivisions (a) through (d) of Section 37355 continue former Fish and Game
40 Code Section 4181.1(b) without substantive change.

41 Subdivision (e) continues the part of former Fish and Game Code Section 4181.1(c) applicable
42 to wild pigs without substantive change.

43 Subdivision (f) continues the part of former Fish and Game Code Section 4181(c) applicable to
44 former Fish and Game Code Section 4181.1(b) without substantive change.

Note. A sentence within existing Fish and Game Code Section 4181.1(b) (which would be continued by the first sentence of proposed Section 37355(d)) indicates that a violation of Section 4181.1(b) “is punishable pursuant to Section 12000.” However, existing Section 12000 does not specify any punishment that would otherwise apply to a violation of Section 4181.1, nor does it specify a default punishment for a violation of the code.

The Commission believes it likely the section intended to be referenced was existing Section 12002, which in subdivision (a) does provide a default punishment for an unspecified code violation. Proposed Section 37355(d) would revise the reference to refer to the provision of the proposed law that would continue existing Section 12002(a).

The Commission invites comment on this revision.

§ 37360. Depredation permit

37360. (a) Except as provided in Section 37355, an owner or tenant of land or property that is being damaged or destroyed, or is in danger of being damaged or destroyed, by wild pig, may apply to the department for a permit to kill the wild pig causing or threatening the damage or destruction.

(b) The department, upon satisfactory evidence of actual or immediately threatened damage or destruction of land or property, shall issue a revocable permit for the taking and disposition of the responsible wild pig, under regulations adopted by the commission. The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions.

(c) Wild pig taken under a permit issued pursuant to subdivision (b) shall not be sold or shipped from the premises on which they are taken, except pursuant to instructions from the department.

(d) The department shall provide an applicant for a depredation permit with written information that sets forth available options for wild pig control, including, but not limited to, depredation permits, allowing periodic access to licensed hunters, and holding special hunts authorized pursuant to Section 37365. The department may maintain and make available to these persons lists of licensed hunters interested in wild pig hunting, and lists of nonprofit organizations available to take possession of the carcasses of depredating wild pigs.

(e) It is unlawful for any person to violate the terms of any permit issued pursuant to this section.

Comment. Subdivisions (a) through (c) and (e) of Section 37360 restate the part of former Fish and Game Code Section 4181(a) applicable to wild pigs without substantive change.

Subdivision (d) continues the part of former Fish and Game Code Section 4181(c) applicable to former Fish and Game Code Section 4181(a) without substantive change.

Note. Proposed Section 37360(a)-(c) and (e) are intended to restate the part of existing Fish and Game Code Section 4181(a) applicable to wild pig to clarify the meaning of that language, without changing its substantive effect. Existing Section 4181 reads as follows:

4181. (a) Except as provided in Section 4181.1, any owner or tenant of land or property that is being damaged or destroyed or is in danger of being damaged or destroyed by elk, bear, beaver, wild pig, wild turkeys, or gray squirrels, may apply to the department for a permit to kill the animals. Subject to the limitations in subdivisions (b) and (d), the department, upon satisfactory evidence of the damage or destruction, actual or immediately threatened, shall issue a revocable permit for the taking and disposition of the animals under regulations adopted by the commission.

The permit shall include a statement of the penalties that may be imposed for a violation of the permit conditions. Animals so taken shall not be sold or shipped from the premises on which they are taken except under instructions from the department. No iron-jawed or steel-jawed or any type of metal-jawed trap shall be used to take any bear pursuant to this section. No poison of any type may be used to take any gray squirrel or wild turkey pursuant to this section. The department shall designate the type of trap to be used to ensure the most humane method is used to trap gray squirrels. The department may require trapped squirrels to be released in parks or other nonagricultural areas. It is unlawful for any person to violate the terms of any permit issued under this section.

(b)....

The references in existing Section 4181 to subdivisions (b) and (d) of Section 4181 have not been continued in proposed Section 37360, as those provisions do not apply to wild pigs.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 37365. Access by licensed hunters

37365. (a) If a landowner or tenant applies for a permit under Section 37360 to take wild pigs, the department shall inform the applicant about available options for allowing access by licensed hunters, including, but not limited to, access authorized pursuant to Title 7 (commencing with Section 56200) of Part 2 of Division 15 to control wild pigs.

(b) The commission, in lieu of a permit described in subdivision (a), and with the consent of, or upon the request of, the landowner or tenant, may pursuant to appropriate regulation authorize the issuance of permits to persons holding valid hunting licenses to take wild pigs in sufficient numbers to stop the damage or threatened damage. Before issuing permits to licensed hunters, the department shall investigate and determine the number of permits necessary, the territory involved, the dates of the proposed hunt, the manner of issuing the permits, and the fee for the permit.

Comment. Section 37365 restates the part of former Fish and Game Code Section 4188 applicable to wild pigs without substantive change.

Note. Proposed Section 37365 is intended to restate the part of existing Fish and Game Code Section 4188 applicable to wild pigs to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

4188. (a) If a landowner or tenant applies for a permit under Section 4181 for wild pigs or wild turkeys, or under Section 4181.5 for deer, the department shall notify the landowner or tenant about available options for allowing access by licensed hunters, including, but not limited to, access authorized pursuant to Article 3 (commencing with Section 1570) of Chapter 5 of Division 2 to control wild pigs, wild turkeys, and deer.

(b) The commission, in lieu of a permit as described in subdivision (a), and with the consent of, or upon the request of, the landowner or tenant, under appropriate regulations, may authorize the issuance of permits to persons holding valid hunting licenses to take wild pigs, wild turkeys, or deer in sufficient numbers to stop the damage or threatened damage. Before issuing permits to licensed hunters, the department shall investigate and determine the number of permits necessary, the territory involved, the dates of the proposed hunt, the manner of issuing the permits, and the fee for the permit.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

TITLE 17. WILD RODENT

§ 37450. Classification

37450. For the purposes of this code:

(a) A tree squirrel (genus *Sciurus* and *Tamiasciurus*) is a game mammal.

(b) A Morro Bay kangaroo rat (*Dipodomys heermanni morroensis*) is a fully protected mammal.

(c) A salt-marsh harvest mouse (*Reithrodontomys raviventris*) is a fully protected mammal.

Comment. Subdivision (a) of Section 37450 continues the part of former Fish and Game Code Section 3950(a) applicable to tree squirrels without substantive change.

Subdivision (b) continues former Fish and Game Code Section 4700(b)(1) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 4700(b)(7) without substantive change.

§ 37455. Prohibitions

37455. (a) It is unlawful to knowingly capture for sale, transport for sale or sell a wild rodent, except as provided in Section 1700, 1705, 1710, 1745, 9200, or 9210.

(b) As used in this section, “wild rodent” means a wild ground squirrel, chipmunk, rat, mouse, or any other member of the order Rodentia native to California, except muskrat or beaver.

Comment. Subdivision (a) of Section 37455 continues former Fish and Game Code Section 2576 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 2575 without substantive change.

Note. Existing Fish and Game Code Section 2576 (which would be continued by proposed Section 37455) reads as follows:

2576. It is unlawful to knowingly capture for sale, transport for sale or sell wild rodents, except as provided in Article 1.5 (commencing with Section 1000) of Chapter 3 of Division 2.

There is no longer any “Article 1.5” in Chapter 3 of Division 2 of the existing code. At the time Section 2576 was enacted in 1971, there did exist an Article 1.5 in the indicated chapter and division, which contained many of the sections that are now in Article 1 (commencing with Section 1000) of Chapter 3 of Division 2 of the existing code. However, since 1971, new sections have been added to that article, and some of the sections that were in that article in 1971 have since been amended.

Proposed Section 37455 would replace the cross-reference to the now non-existent “Article 1.5” with the sections contained in that former article that appear to have any relevance to the substance of existing Section 2576.

The Commission invites comment on whether the cross-reference in proposed Section 37455 specifying the exceptions to the proposed section should be revised in any way.

1 **§ 37460. Trapping**

2 37460. Except for fully protected mammals or species that are listed pursuant to
3 Part 1 (commencing with Section 62000) of Division 17, nothing in this code or a
4 regulation adopted pursuant to this code shall prevent or prohibit a person from
5 trapping any of the following animals:

6 (a) Gopher.

7 (b) House mouse.

8 (c) Mole.

9 (d) Rat.

10 (e) Vole.

11 **Comment.** Section 37460 continues former Fish and Game Code Section 4005(f) without
12 substantive change.

13 **DIVISION 10. FISH**

14 **PART 1. GENERAL PROVISIONS**

15 **§ 37800. Governance by other provisions**

16 37800. Animals governed by this division are also governed by other provisions
17 of this code, including but not limited to Divisions 6 (commencing with Section
18 8000) and 7 (commencing with Section 23300).

19 **Comment.** Section 37800 is new. It is added for drafting convenience.

20 **§ 37805. Scope of commercial provisions**

21 37805. The provisions of this division that are expressly identified as
22 commercial provisions apply to the taking and possession of fish for any
23 commercial purpose. Those commercial provisions do not apply to activities
24 governed by Part 1 (commencing with Section 23300) of Division 7.

25 **Comment.** Section 37805 continues the part of former Fish and Game Code Section 7600
26 applicable to the provisions of this division without substantive change.

27 **§ 37810. “Vessel owner”**

28 37810. (a) For the purposes of this division, “vessel owner,” or a reference to an
29 owner of a vessel, means a person designated as the registered owner of a vessel,
30 on a certificate of documentation issued by the United States Coast Guard or on a
31 copy of the vessel registration issued by the vessel registration agency of the state
32 where the owner is a resident.

33 (b) For purposes of this section, the vessel registration agency in California is
34 the Department of Motor Vehicles.

35 **Comment.** Section 37810 restates former Fish and Game Code Section 7601 without
36 substantive change.

 **Note.** The definition of “vessel owner” has been continued in two places, so that it will continue to have its existing scope of application. See also Section 14205.

PART 2. DISEASE CONTROL

§ 37950. Application of title

37950. (a) This title applies to all fish, including, but not limited to, fish being imported or transported.

(b) This chapter does not apply to activities governed by Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 37950 continues the part of former Fish and Game Code Section 6300 applicable to fish without substantive change.

§ 37955. Authorized entry by department

37955. The department may enter at any time any vehicle, container, warehouse, depot, ship, or growing area where any fish are held, transported, or stored, for the purpose of making a regulatory inspection to ascertain whether those fish are infected, diseased, or parasitized, or to determine if aquaculture products are being or have been legally imported, transported, or possessed.

Comment. Section 37955 continues the part of former Fish and Game Code Section 6301 applicable to fish without substantive change.

§ 37960. Public nuisance

37960. Except as otherwise provided in Part 1 (commencing with Section 23300) of Division 7, all fish found to be infected, diseased, or parasitized are a public nuisance and shall be summarily destroyed by the department.

Comment. Section 37960 continues the part of former Fish and Game Code Section 6302 applicable to fish without substantive change.

§ 37965. Conditional destruction

37965. All fish that the department determines are merely deleterious to fish, amphibians, aquatic plants, or aquatic animal life, shall be destroyed by the department, unless the owner or person in charge of the fish ships them out of the state within a period of time to be specified by the department.

Comment. Section 37965 continues the part of former Fish and Game Code Section 6303 applicable to fish without substantive change.

§ 37970. Posting of notices

37970. (a) If the department finds any infected, diseased, or parasitized fish within this state, the department shall post notices describing, as nearly as possible, the boundaries of the area within which the fish are found, and shall state the period during which the taking, carrying, and transportation of the fish from the area shall be unlawful.

1 (b) The fact of posting the notices shall be published once a week for four
2 successive weeks in some newspaper of general circulation in the county in which
3 the infected area is situated, and, if there is no newspaper of general circulation in
4 that county, then in a newspaper of general circulation published in an adjoining
5 county.

6 **Comment.** Section 37970 continues the part of former Fish and Game Code Section 6304
7 applicable to fish without substantive change.

8 **§ 37975. Prohibited transportation within state**

9 37975. It is unlawful to carry or cause to be carried from one point in this state
10 which has been posted according to the provisions of this article, to any other
11 point in this state, any infected, diseased, or parasitized fish.

12 **Comment.** Section 37975 continues the part of former Fish and Game Code Section 6305
13 applicable to fish without substantive change.

14 **§ 37980. Expense of examination**

15 37980. (a) Except as provided in subdivision (b), the expense of any
16 examination of any fish made necessary by the provisions of this code shall be
17 borne by the owner of the fish, or the person or persons importing the fish into this
18 state.

19 (b) The department may assume that expense in the case of fish imported to
20 provide fishing under the authority of a sport fishing license in the public waters of
21 this state.

22 **Comment.** Section 37980 continues the part of former Fish and Game Code Section 6306
23 applicable to fish without substantive change.

24 **PART 3. CLASSES OF FISH**

25 **TITLE 1. FULLY PROTECTED FISH**

26 **§ 38200. Prohibition on take and possession**

27 38200. (a) Except as provided in this section or Section 63300, 63450, 63475,
28 63955, or 64605, a fully protected fish shall not be taken or possessed at any time.

29 (b) No provision of this code or any other law shall be construed to authorize the
30 issuance of a permit or license to take a fully protected fish, and no permit or
31 license previously issued shall have force or effect for that purpose. However, the
32 department may authorize the taking of a fully protected fish for necessary
33 scientific research, including efforts to recover fully protected, threatened, or
34 endangered species.

35 (c) Before authorizing the take of a fully protected fish, the department shall
36 make an effort to notify all affected and interested parties to solicit information
37 and comments on the proposed authorization. The notification shall be published
38 in the California Regulatory Notice Register and be made available to each person

who has notified the department, in writing, of his or her interest in fully protected species and who has provided an email address, if available, or postal address to the department. Affected and interested parties shall have 30 days after notification is published in the California Regulatory Notice Register to provide relevant information and comments on the proposed authorization.

(d) A legally imported fully protected fish may be possessed under a permit issued by the department.

(e) As used in this section, “scientific research” does not include an action taken as part of specified mitigation for a project, as defined in Section 21065 of the Public Resources Code.

Comment. Section 38200 continues former Fish and Game Code Section 5515(a) without substantive change.

See also Sections 4570, 5600 (enforcement).

 **Note.** Proposed Section 38200 would continue Section 5515(a), which was amended by 2018 Cal. Stat. ch. 586. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

TITLE 2. GROUND FISH

CHAPTER 1. GENERAL PROVISIONS [*RESERVED*]

CHAPTER 2. COMMERCIAL PROVISIONS

§ 38350. Application of title

38350. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 38350 is new. It is added for drafting convenience.

§ 38355. Federal groundfish regulations

38355. It is unlawful for any person possessing or operating any type of net, trap, or line that is subject to federal groundfish regulations adopted pursuant to the Magnuson Fishery Conservation and Management Act (16 U.S.C., Sec. 1801 et seq.) to possess or land any load of fish in violation of those federal groundfish regulations.

Comment. Section 38355 continues former Fish and Game Code Section 8607 without substantive change.

§ 38360. Marine species of finfish

38360. To the extent not in conflict with Section 38355, marine species of finfish that are classified as groundfish may be taken under the regulations of the commission.

Comment. Section 38360 continues former Fish and Game Code Section 8403(a) without substantive change.

1 **§ 38365. Retention of landing receipt**

2 38365. In addition to the requirements of Sections 21015, 21100, 21110, and
3 21150, any person landing groundfish subject to federal groundfish regulations
4 adopted pursuant to the Magnuson Fishery Conservation and Management Act (16
5 U.S.C. Sec. 1801 et seq.) shall keep a copy of the landing receipt on board the
6 fishing vessel throughout, and for 15 days following, each period for which
7 cumulative landings by individual vessels are limited.

8 **Comment.** Section 38365 continues former Fish and Game Code Section 8046.1 without
9 substantive change.

10 **PART 4. ANCHOVIES**

11 **TITLE 1. ANCHOVIES GENERALLY**

12 **§ 38450. Provisions not exclusive**

13 38450. The provisions of this part are not intended to be exclusive. Other
14 provisions that may govern anchovies include, but are not limited to, the following
15 provisions:

16 (a) Section 15915.

17 (b) Section 16475.

18 (c) Section 20710.

19 (d) Section 21015.

20 (e) Section 21810.

21 **Comment.** Section 38450 is new. It is added for drafting convenience.

22 **TITLE 2. COMMERCIAL PROVISIONS**

23 **CHAPTER 1. PRELIMINARY PROVISIONS**

24 **§ 38500. Application of title**

25 38500. For purposes of Section 37805, the provisions in this title are commercial
26 provisions.

27 **Comment.** Section 38500 is new. It is added for drafting convenience.

28 **CHAPTER 2. MANAGEMENT OF RESOURCE**

29 **§ 38550. Policy declaration**

30 38550. (a) It is the policy of the State of California that the anchovy resource
31 shall be managed in a manner that insures the continued abundance of the species.
32 To that end, the department shall conduct, or have others conduct, annual anchovy
33 egg-larvae surveys or any other annual surveys, research, and analyses necessary
34 to insure that an accurate biomass estimate is made.

1 (b) This section shall become operative, and activities shall be carried out
2 pursuant to this section, only in the event and to the extent that funding is made
3 available for those activities by the federal government.

4 **Comment.** Section 38550 continues former Fish and Game Code Section 8190 without
5 substantive change.

6 **§ 38555. Area south of Point Mugu**

7 38555. (a) In any district or part of a district lying south of a line drawn east and
8 west through Point Mugu, anchovies may be taken in any quantity for bait or for
9 human consumption in a fresh state, or, by contract with the department, for
10 hatchery food, not to exceed 500 tons per year.

11 (b) Anchovies taken south of the line described in subdivision (a), in waters not
12 less than three nautical miles from the nearest point of land on the mainland shore,
13 and anchovies taken north of that line in any waters, may be possessed,
14 transported, sold, or otherwise dealt with in any district or part of a district south
15 of that.

16 (c) The operator of any boat engaged in taking anchovies in waters south of the
17 line described in subdivision (a) shall at all times while operating the boat identify
18 it by displaying on an exposed part of the superstructure, amidships on each side
19 and on top of the house visible from the air, the Department of Fish and Wildlife
20 registration number of the boat, in 14-inch black numerals on white background.

21 **Comment.** Subdivision (a) of Section 38555 continues former Fish and Game Code Section
22 8180 without substantive change.

23 Subdivision (b) continues former Fish and Game Code Section 8181 without substantive
24 change.

25 Subdivision (c) continues former Fish and Game Code Section 8182 without substantive
26 change.

27 See also Section 5650 (enforcement).

28 **§ 38560. Humboldt Bay**

29 38560. (a) No anchovies may be taken for any purpose in Humboldt Bay, except
30 under the following conditions:

31 (1) Anchovies may be taken between May 1 and December 1.

32 (2) Not more than 60 tons of anchovies may be taken between May 1 and
33 December 1 of each year.

34 (3) Only bait nets, as defined in Section 15900, shall be used to take anchovy.

35 (4) Any game fish caught incidentally in bait nets shall be released by use of a
36 hand scoop net or by dipping the cork line.

37 (b) An accurate record of all fishing operations shall be kept and is subject to
38 inspection by the department.

39 (c) The commission may adopt regulations it determines are necessary to protect
40 anchovy in Humboldt Bay, including, if applicable and based on credible science,
41 a regulation that changes the permitted take amount established pursuant to
42 paragraph (2) of subdivision (a).

1 **Comment.** Section 38560 continues former Fish and Game Code Section 8183 without
2 substantive change.

3 See also Section 5650 (enforcement).

4 **Note.** Proposed Section 38560 would continue Section 8183, which was amended by 2018
5 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
6 anticipation of its effect.

7 PART 5. BARRACUDA

8 TITLE 1. BARRACUDA GENERALLY

9 **§ 38700. Provisions not exclusive**

10 38700. The provisions of this part are not intended to be exclusive. Other
11 provisions that may govern barracuda include, but are not limited to, the following
12 provisions:

13 (a) Section 21950.

14 (b) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

15 **Comment.** Section 38700 is new. It is added for drafting convenience.

16 **§ 38705. Delivery of barracuda taken from waters off coast of Mexico**

17 38705. (a) Barracuda taken in waters lying south of the maritime boundary line
18 between the United States and Mexico, with that maritime boundary line
19 including, but not limited to, the federal Exclusive Economic Zone boundary, may
20 be delivered to California ports aboard boats, including boats carrying purse seine
21 or round haul nets, in accordance with those regulations as the commission may
22 make governing the inspection and marking of those fish imported into this state.
23 The cost of that inspection and marking shall be paid by the importer.

24 (b) Barracuda taken in Mexico shall not be imported, unless legally taken and
25 legally possessed, and a declaration is submitted to the department pursuant to
26 Section 28425.

27 **Comment.** Section 38705 continues the part of former Fish and Game Code Section 2362
28 applicable to barracuda without substantive change.

29 TITLE 2. COMMERCIAL PROVISIONS

30 **§ 38750. Application of title**

31 38750. For purposes of Section 37805, the provisions in this title are commercial
32 provisions.

33 **Comment.** Section 38750 is new. It is added for drafting convenience.

1 **§ 38755. Size restrictions**

2 38755. (a) Barracuda shall be measured from the tip of the lower jaw to the end
3 of the longer lobe of the tail.

4 (b) Barracuda measuring equal to or greater than 28 inches in length may be
5 taken with hook and line at any time.

6 (c) Barracuda measuring less than 28 inches in length may not be sold or
7 purchased, except that not more than five barracuda per day of any length may be
8 possessed by a commercial fisherman for noncommercial use, if taken incidentally
9 while engaged in commercial fishing.

10 **Comment.** Subdivision (a) of Section 38755 continues the part of former Fish and Game Code
11 Section 8386 applicable to barracuda without substantive change.

12 Subdivision (b) continues the part of former Fish and Game Code Section 8382 applicable to
13 barracuda without substantive change.

14 Subdivision (c) continues the part of former Fish and Game Code Section 8384 applicable to
15 barracuda without substantive change.

16 **§ 38760. Use of purse seines or round haul nets**

17 38760. (a) It is unlawful to use any purse seine or round haul net to take a
18 barracuda.

19 (b) It is unlawful to possess a barracuda, except those taken south of the
20 international boundary between the United States and Mexico, and imported into
21 the state under regulations of the commission as provided in Section 38705, on
22 any boat carrying or using any purse seine or round haul net, including, but not
23 limited to, a bait net as described in Section 15900.

24 (c) Notwithstanding subdivision (b), the department may issue permits to hook
25 and line commercial fishermen to possess a bona fide bait net on their vessels for
26 the purpose of taking bait for their own use only.

27 **Comment.** Section 38760 continues the parts of former Fish and Game Code Section 8623(a),
28 (b), and (e) applicable to barracuda without substantive change.

29 **Note.** The portion of existing Fish and Game Code Section 8623(a) and (b) that applies to
30 barracuda would be continued by proposed Section 38760(a) and (b).

31 Existing Section 8623 also includes a disclaimer in subdivision (e) that, by its terms, applies to
32 all provisions of that section (“Notwithstanding the provisions of this section...”)

33 However, despite the broad wording of this disclaimer, the Commission’s analysis suggests
34 that the substantive portion of subdivision (e) logically applies only to subdivision (b). Proposed
35 Section 38760(c) would state that specific application expressly.

36 **The Commission invites comment on whether that expressly stated application would**
37 **cause any problems.**

PART 6. BASS

TITLE 1. BASS GENERALLY

CHAPTER 1. PRELIMINARY PROVISIONS

§ 38800. Provisions not exclusive

38800. The provisions of this part are not intended to be exclusive. Other provisions that may govern bass include, but are not limited to, the following provisions:

(a) Section 12105.

(b) Section 12165.

(c) Section 12305.

(d) Section 12310.

(e) Section 13900.

(f) Section 14875.

(g) Section 15540.

(h) Section 18040.

(i) Section 18045.

(j) Section 18050.

(k) Section 18365.

(l) Section 18815.

(m) Section 18820.

(n) Section 18825.

(o) Section 21950.

(p) Section 20105.

(q) Section 23905

(r) Section 24000

(s) Section 25700.

(t) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

Comment. Section 38800 is new. It is added for drafting convenience.

CHAPTER 2. SPECIFIC TYPES OF BASS

§ 38850. Black bass

38850. Black bass lawfully taken may be carried or transported into and possessed in an area where the season is closed.

Comment. Section 38850 continues the part of former Fish and Game Code Section 2360 applicable to black bass without substantive change.

1 **§ 38855. Giant seabass**

2 38855. Giant seabass (*Stereolepis gigas*) may not be taken under a sport fishing
3 license except by hook and line when engaged in the taking of other fish. This
4 section, and any regulation adopted by the commission relating to this section,
5 shall supersede Section 28425.

6 **Comment.** Section 38855 continues former Fish and Game Code Section 7350 without
7 substantive change.

8 **§ 38860. Spotted bass**

9 38860. Spotted bass lawfully taken may be carried or transported into and
10 possessed in an area where the season is closed.

11 **Comment.** Section 38860 continues the part of former Fish and Game Code Section 2360
12 applicable to spotted bass without substantive change.

13 **§ 38865. Striped bass**

14 38865. (a) Except as provided in subdivision (b), striped bass may be
15 transported or carried out of or into this state only as follows:

16 (1) A resident of California, or the holder of a valid nonresident California sport
17 fishing license, lawfully taking striped bass from the Colorado River or from the
18 Arizona shore of that river, may transport or carry the fish taken into California.

19 (2) A resident of Arizona, or the holder of a valid nonresident Arizona sport
20 fishing license, lawfully taking striped bass from the Colorado River or from the
21 California shore of that river, may transport or carry the fish taken into Arizona.

22 (b) Striped bass legally taken in another state that permits the sale of that fish
23 may be imported into this state under regulations of the commission. Before the
24 commission adopts any regulation pursuant to this section, a public hearing shall
25 be held in the San Francisco or Sacramento area.

26 **Comment.** Subdivision (a) of Section 38865 restates former Fish and Game Code Section
27 2359 without substantive change.

28 Subdivision (b) continues the part of former Fish and Game Code Section 2363 applicable to
29 striped bass without substantive change.

30 **Note.** Proposed Section 38865(a) is intended to restate existing Fish and Game Code Section
31 2359 to clarify the meaning of that provision, without changing its substantive effect. The
32 existing provision reads as follows:

33 Except as provided in Section 2363, no striped bass may be transported or carried out of or into
34 this state, except striped bass taken from the Colorado River by sportfishing licensees to the
35 extent and in the manner following:

36 (a) A resident of California, or the holder of a valid nonresident California sportfishing license,
37 lawfully taking such fish on the waters or from the Arizona shore of the river may transport or
38 carry such fish into California.

39 (b) A resident of Arizona, or the holder of a valid nonresident Arizona sportfishing license,
40 lawfully taking such fish on the waters or from the California shore of the river may transport or
41 carry such fish into Arizona.

42 **The Commission invites comment on whether the restatement would cause any**
43 **substantive change in the meaning of existing Section 2359.**

1 **§ 38870. White bass**

2 38870. In addition to Section 25415, it is unlawful to transport or possess any
3 live white bass (*Marone chrysops*), whether taken within or without the state,
4 unless it is first submitted for inspection to, and written permission is obtained
5 from, the department.

6 (b) This section does not apply to activities governed by Part 1 (commencing
7 with Section 23300) of Division 7.

8 **Comment.** Subdivision (a) of Section 38870 continues former Fish and Game Code Section
9 6400.5 without substantive change.

 Subdivision (b) continues former Fish and Game Code Section 6403 as it applied to former
Fish and Game Code Section 6400.5 without substantive change.

10 **§ 38875. White sea bass**

11 38875. (a) White sea bass taken in waters lying south of the maritime boundary
12 line between the United States and Mexico, with that maritime boundary line
13 including, but not limited to, the federal Exclusive Economic Zone boundary, may
14 be delivered to California ports aboard boats, including boats carrying purse seine
15 or round haul nets, in accordance with those regulations as the commission may
16 make governing the inspection and marking of those fish imported into this state.
17 The cost of that inspection and marking shall be paid by the importer.

18 (b) White sea bass taken in Mexico shall not be imported unless legally taken
19 and legally possessed, and a declaration is submitted to the department pursuant to
20 Section 28425.

21 (c) Any person who takes, possesses aboard a boat, or lands any white sea bass
22 for a commercial purpose, in ocean waters south of a line extending due west from
23 Point Arguello, shall have a valid commercial fishing ocean enhancement
24 validation issued to that person that has not been suspended or revoked.

25 **Comment.** Subdivisions (a) and (b) of Section 38875 continues the part of former Fish and
26 Game Code Section 2362 applicable to white sea bass without substantive change.

27 Subdivision (c) continues former Fish and Game Code Section 6596.1(c) without substantive
28 change.

29 **Note.** Under existing law, Section 6596.1(c) (proposed Section 38875(c)) is governed by
30 existing Section 6403, which makes Section 6596.1(c) inapplicable to aquaculture business
31 activities. The continuation of Section 6596.1(c) in this location would make Section 6403
32 (proposed Section 25400) inapplicable to Section 6596.1(c). Technically, this would make
33 Section 6596.1(c) applicable to aquaculture business activities. However, Section 6596.1(c)
34 appears to have no application to such activities. For that reason, the change described in this
35 Note would seem to have no practical effect.

36 **The Commission invites comment on whether this change would be a problem.**

37 CHAPTER 3. BLACK BASS CONSERVATION AND MANAGEMENT ACT OF 1980

38 **§ 38900. Name of act**

39 38900. This chapter shall be known as the Black Bass Conservation and
40 Management Act of 1980.

1 **Comment.** Section 38900 continues former Fish and Game Code Section 1740 without
2 substantive change.

3 **§ 38905. Declaration of preservation**

4 38905. The Legislature hereby finds and declares that it is the policy of the state
5 to preserve and enhance black bass resources and to manage black bass
6 populations to provide satisfactory recreational opportunities to the public.

7 **Comment.** Section 38905 continues former Fish and Game Code Section 1741 without
8 substantive change.

9 **§ 38910. Declaration relating to funding**

10 38910. The Legislature further finds and declares that the black bass
11 management program components specified in this chapter are a continuation of
12 the department's existing warmwater fisheries program, and, as such, shall be
13 funded from existing department budgetary resources.

14 **Comment.** Section 38910 continues former Fish and Game Code Section 1742 without
15 substantive change.

16 **§ 38915. Components of management program**

17 38915. (a) The department's black bass management program shall include, but
18 not be limited to, the following components:

19 (1) The department shall determine the angler harvest of black bass populations
20 and shall recommend to the commission the changes in angling regulations for
21 black bass that would be necessary to prevent or correct overharvest.

22 (2) The department shall consider recommending to the commission catch and
23 release regulations for black bass, including minimum or maximum size
24 restrictions and management for trophy-sized black bass in some waters.

25 (3) The department shall consider the suitability of the many different species,
26 subspecies, and strains of black bass when management programs are formulated.

27 (4) The department shall improve shoreline habitat for black bass in waters
28 where insufficient habitat exists and shall encourage reservoir operating agencies
29 to carry out shoreline habitat improvement projects.

30 (b) For the purposes of this section, "black bass" means fishes of the
31 Centrarchidae family.

32 **Comment.** Section 38915 continues former Fish and Game Code Section 1743 without
33 substantive change.

1 TITLE 2. COMMERCIAL PROVISIONS

2 CHAPTER 1. PRELIMINARY PROVISIONS

3 § 38950. Application of title

4 38950. For purposes of Section 37805, the provisions in this title are commercial
5 provisions.

6 **Comment.** Section 38950 is new. It is added for drafting convenience.

7 CHAPTER 2. STRIPED BASS

8 § 39000. Take with purse or round haul net

9 39000. Striped bass may not be taken with a purse or round haul net.

10 **Comment.** Section 39000 continues the part of former Fish and Game Code Section 8756
11 applicable to striped bass without substantive change.

12 § 39005. Required return to water

13 39005. (a) Any striped bass that is taken in any type of net shall, regardless of its
14 condition, be immediately freed and removed from the net by the fisherman, and
15 immediately returned to the water without further harm.

16 (b) A commercial fisherman shall not have any striped bass, whether dead or
17 alive, in his or her possession, at any time when conducting netting operations or
18 when going to or from those operations, except when releasing a striped bass from
19 a net.

20 (c) The return of striped bass to the water pursuant to this section is not
21 deterioration, waste, or spoilage of fish for purposes of Section 14310.

22 **Comment.** Section 39005 continues the part of former Fish and Game Code Section 8370
23 applicable to striped bass without substantive change.

24 § 39010. Possession, offer for sale, sale, or purchase

25 39010. Striped bass may be possessed, offered for sale, sold, or purchased, only
26 under the following conditions:

27 (a) If the striped bass is taken or possessed by, and is the cultured progeny of, an
28 aquaculturist registered under Section 23605, the striped bass may be possessed,
29 offered for sale, sold, or purchased subject to regulations of the commission.

30 (b) If the striped bass is taken legally in another state that permits its sale, and
31 lawfully imported under Section 38865, the striped bass may be possessed, offered
32 for sale, sold, or purchased.

33 **Comment.** Section 39010 continues former Fish and Game Code Section 8371(a) and (b)
34 without substantive change.

CHAPTER 3. WHITE SEA BASS

§ 39050. Undersized white sea bass

39050. It is unlawful to take, possess, sell, or purchase any white sea bass less than 28 inches in length, measured from the tip of the lower jaw to the end of the longer lobe of the tail.

Comment. Section 39050 continues former Fish and Game Code Section 8383.5 without substantive change.

§ 39055. Use of purse seines or round haul nets

39055. (a) It is unlawful to use any purse seine or round haul net to take a white sea bass.

(b) It is unlawful to possess a white sea bass, except those taken south of the international boundary between the United States and Mexico, and imported into the state under regulations of the commission as provided in Section 38875, on any boat carrying or using any purse seine or round haul net, including, but not limited to, a bait net as described in Section 15900.

(c) Notwithstanding subdivision (b), the department may issue permits to hook and line commercial fishermen to possess a bona fide bait net on their vessels for the purpose of taking bait for their own use only.

Comment. Section 39055 continues the parts of former Fish and Game Code Section 8623(a), (b), and (e) applicable to white sea bass without substantive change.

Note. The portion of existing Fish and Game Code Section 8623(a) and (b) that applies to white sea bass would be continued by proposed Section 39060(a) and (b).

Existing Section 8623 also includes a disclaimer in subdivision (e) that, by its terms, applies to all provisions of that section (“Notwithstanding the provisions of this section...”)

However, despite the broad wording of this disclaimer, the Commission’s analysis suggests that the substantive portion of subdivision (e) logically applies only to subdivision (b). Proposed Section 39055(c) would state that specific application expressly.

The Commission invites comment on whether that expressly stated application would cause any problems.

CHAPTER 4. OTHER BASS

§ 39100. Giant seabass

39100. (a) Giant seabass (*Stereolepis gigas*) may not be taken for any purpose, except that not more than one fish per vessel may be possessed or sold if taken incidentally in commercial fishing operations by gill or trammel net. Any fish so taken shall not be transferred to any other vessel.

(b) The restrictions specified in this section shall not apply to 1,000 pounds of giant seabass per trip taken in waters lying south of the International Boundary Line between the United States and Mexico extended westerly into the Pacific Ocean. Fish taken under this provision, however, shall be limited to a maximum aggregate of 3,000 pounds per vessel in any calendar year. A current fishing

1 permit issued by the Mexican government constitutes valid evidence that the giant
2 seabass were taken south of the international boundary.

3 **Comment.** Section 39100 continues former Fish and Game Code Section 8380 without
4 substantive change.

5 **§ 39105. Kelp bass, sand bass, or spotted bass**

6 39105. (a) Kelp bass, sand bass, and spotted bass, all of the genus *Paralabrax*,
7 shall not be sold or purchased, or possessed in any place where fish are purchased,
8 possessed for sale, or sold, or where food is offered or processed for sale, or in any
9 truck, vessel, or other conveyance operated by or for a place so selling or
10 possessing fish, except that those fish may be imported into this state pursuant to
11 Section 38850, 38860, 38865, or 38875, or Part 9 (commencing with Section
12 28400) of Division 7, and may be sold under regulations as the commission may
13 adopt.

14 (b) It is unlawful to take, possess, or sell any fish specified in this section that is
15 less than 10 1/2 inches in length.

16 **Comment.** Section 39105 continues former Fish and Game Code Section 8372 without
17 substantive change.

18 See also Section 5102 (enforcement).

19 **PART 7. CARP**

20 **TITLE 1. CARP GENERALLY**

21 **CHAPTER 1. PRELIMINARY PROVISIONS**

22 **§ 39150. Application of title**

23 39150. The provisions of this title do not apply to activities governed by Part 1
24 (commencing with Section 23300) of Division 7.

25 **Comment.** Section 39150 continues former Fish and Game Code Section 6403 as it applied to
26 former Fish and Game Code Sections 6440 through 6460, inclusive, without substantive change.

27 **§ 39155. Provisions not exclusive**

28 39155. The provisions of this part are not intended to be exclusive. Other
29 provisions that govern carp include, but are not limited to, the following
30 provisions:

31 (a) Section 17025.

32 (b) Section 15525.

33 (c) Section 15535.

34 (d) Section 20100.

35 (e) Section 22125.

36 **Comment.** Section 39155 is new. It is added for drafting convenience.

CHAPTER 2. GRASS CARP

§ 39200. Preexisting grass carp programs

39200. Nothing in this chapter shall be construed as restricting grass carp programs approved by the department on or before June 1, 1995.

Comment. Section 39200 continues former Fish and Game Code Section 6456 without substantive change.

§ 39205. Legislative declaration

39205. The Legislature finds and declares that triploid grass carp have the potential to control aquatic nuisance plants in non-public waters allowing for reduced chemical control but that the threat that grass carp pose to aquatic habitat may outweigh its benefits. It is the intent of this section to allow the department to use its management authority to provide for the long-term health of the ecosystem in the state, including the aquatic ecosystem, and, in that context, manage grass carp either through control of movement, eradication of populations, acquisition of habitat, and any other action that the department finds will maintain the biological diversity and the long term, overall health of the state's environment. The department shall undertake the management of grass carp in a manner that is consistent with provisions of this code, and, for the purposes of this section the department shall define management as handling, controlling, destroying, or moving species. The Legislature does not intend for this section to provide a right for the use of triploid grass carp if the department finds that use of the species poses an unacceptable risk to the state's existing ecosystem.

Comment. Section 39205 continues former Fish and Game Code Section 6440 without substantive change.

§ 39210. Department regulations

39210. The department shall adopt regulations that provide for the control of aquatic plant pests using artificially introduced triploid grass carp under a permit issued by the department. The regulations shall do all of the following:

(a) Restrict triploid grass carp introductions to those triploid grass carp that have been rendered sterile immediately after the eggs have been fertilized.

(b) Require individual fish to be checked to ensure that a third, triploid, set of chromosomes has been retained, preventing further reproduction by that individual fish.

(c) Limit aquatic plant pest control programs using triploid grass carp to the use of sterile triploid grass carp with documented certification of triploidy to ensure sterility.

(d) Require the identification by tagging of individual fish as the property of each owner.

(e) Require the posting of notices at stocked bodies of water declaring the penalties for removing triploid grass carp.

1 (f) Limit the permits for the use of triploid grass carp in waters on golf courses
2 located in residential areas to those waters that are determined by the department
3 to be secure from the removal of triploid grass carp to unauthorized waters.

4 (g) Provide for management of the triploid grass carp populations in a manner
5 consistent with the provisions of this code where the department finds that such
6 actions will benefit the long-term health of the state's biodiversity as a whole.

7 (h) Until January 1, 1999, the regulations shall not authorize the issuance of
8 permits for the use of triploid grass carp in waters located within condominium
9 areas of any residential area for which a permit may not be issued pursuant to
10 subdivision (f), except at three locations within the area authorized pursuant to this
11 subdivision. The three locations shall be selected by the department in consultation
12 with the Imperial Irrigation District. The limitation to three locations is necessary
13 to enable monitoring of human-induced movement of triploid grass carp to
14 unauthorized waters, and to permit the evaluation of the impact of the experiment.

15 **Comment.** Section 39210 continues former Fish and Game Code Section 6450 without
16 substantive change.

17 **§ 39215. Certification by providers**

18 39215. All providers of triploid grass carp for use under this chapter shall
19 provide certification acceptable to the department of triploidy and disease-free
20 conditions for all fish introduced.

21 **Comment.** Section 39215 continues former Fish and Game Code Section 6451 without
22 substantive change.

23 **§ 39220. Information required for permit**

24 39220. Prior to receiving a permit from the department to use triploid grass carp,
25 the potential user shall provide to the department all information required by the
26 department, including, but not limited to, information relating to the following
27 matters:

28 (a) The type of waterway to be stocked.

29 (b) The absence of a connection between the site and adjacent fresh water
30 systems.

31 (c) All aquatic plant management problems, including, but not limited to,
32 problems relating to the following matters:

33 (1) The acres of aquatic plants, by species, at the peak of growing season.

34 (2) The desired vegetation quantity or coverage.

35 (3) The number and size of triploid grass carp recommended.

36 (4) All sensitive plant or animal species within the waterway to be stocked.

37 (5) Connected waterways.

38 **Comment.** Section 39220 continues former Fish and Game Code Section 6452 without
39 substantive change.

1 **§ 39225. Permit conditions**

2 39225. The department shall impose conditions in the permit to use triploid
3 grass carp under this chapter that it finds necessary to prevent escape of the
4 triploid grass carp from the targeted area. The conditions shall include, but are not
5 limited to, the following:

6 (a) No permit shall be issued for the use of triploid grass carp in waters with an
7 open fresh water connection to other waters of the state.

8 (b) Any waters in which triploid grass carp are used under this chapter shall be
9 under the control of the permittee. In addition, barriers to fish movement
10 acceptable to the department shall be in place before introduction of triploid grass
11 carp under this chapter. Movement of triploid grass carp to areas outside the
12 control of the permittee is prohibited.

13 (c) Any waters in which triploid grass carp are used under this chapter shall have
14 sufficient dissolved oxygen and suitable vegetation for consumption to sustain the
15 introduced triploid grass carp, as determined by the department.

16 (d) Except within closed basins, including the Salton Sea, no permit shall be
17 issued for the use of triploid grass carp within the 100-year flood plain.

18 (e) It is unlawful to introduce triploid grass carp into any area, or to transfer
19 triploid grass carp from one site to another, without a permit from the department.

20 **Comment.** Section 39225 continues former Fish and Game Code Section 6455(a)-(d) and part
21 of (e), without substantive change.

22 See also Section 5670 (enforcement).

23 **§ 39230. Permit and inspection fees**

24 39230. The department shall establish permit and inspection fees sufficient to
25 recover, but not exceed, the initial and ongoing costs of the program under this
26 chapter.

27 **Comment.** Section 39230 continues former Fish and Game Code Section 6454 without
28 substantive change.

29 **§ 39235. Report by permittee**

30 39235. (a) On or before March 1 of each year following the first year after
31 triploid grass carp introduction, the permittee shall provide to the department all of
32 the information required by the department, including, but not limited to, the
33 following:

34 (1) The number and size of triploid grass carp recommended for the waterway
35 stocked.

36 (2) The number and size of triploid grass carp stocked in the waterway.

37 (3) The acres of aquatic plants, by species, at the peak of the growing season in
38 the year prior to introduction of triploid grass carp in the waterway stocked.

39 (4) The acres of aquatic plants, by species, at the peak of the current year
40 growing season.

(b) The annual report shall be submitted until five years after the use of triploid grass carp to control aquatic plant pests is terminated, unless evidence acceptable to the department is provided that all triploid grass carp have been removed from the waterway.

Comment. Section 39235 continues former Fish and Game Code Section 6453 without substantive change.

§ 39240. Consultation with Department of Food and Agriculture

39240. Because of its experience and continuing involvement with hydrilla control programs, the implementation of Sections 25910 and 25930 shall be carried out in consultation with the Department of Food and Agriculture.

Comment. Section 39240 continues former Fish and Game Code Section 6457 without substantive change.

§ 39245. Suspension of permit issuance process

39245. (a) The department may suspend the permit issuance process authorized by this chapter, if it obtains documented and verifiable evidence of escapements of triploid grass carp permitted under this chapter into unauthorized waters, the unauthorized use of grass carp, or threats to fish and wildlife and their habitats as the result of this program, and the director makes a written finding to that effect.

(b) If the situation is local, the suspension may be limited to the area whose waters, habitat, and fish and wildlife resources are threatened.

(c) The suspension shall last until the director makes a written finding that the threat has been abated.

Comment. Section 39245 continues former Fish and Game Code Section 6460 without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

§ 39300. Application of title

39300. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 39300 is new. It is added for drafting convenience.

§ 39305. Use of traps

39305. Traps may be used throughout the year to take carp in any district, subject to the following restrictions:

(a) Traps shall not exceed six feet in greatest dimension.

(b) Traps shall be made of cotton or nylon twine.

(c) Meshes shall not be less than three and one-half inches in length, except that fyke and bait bags may be any size mesh.

(d) Traps shall have only a single vertical fyke opening at the top of the trap.

(e) Traps shall be baited only with grain or grain products.

(f) Fish other than carp taken in traps pursuant to this section shall be immediately returned to the water.

Comment. Section 39305 continues former Fish and Game Code Section 9023 without substantive change.

See also Section 4900 (enforcement).

PART 8. CATFISH

TITLE 1. CATFISH GENERALLY [*RESERVED*]

TITLE 2. COMMERCIAL PROVISIONS

§ 39400. Application of title

39400. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 39400 is new. It is added for drafting convenience.

§ 39405. Provisions not exclusive

39405. The provisions of this part are not intended to be exclusive. Other provisions that govern catfish include, but are not limited to, Section 23355.

Comment. Section 39405 is new. It is added for drafting convenience.

§ 39410. Prohibited sale

39410. No catfish may be sold, except catfish imported from outside the state or catfish grown pursuant to Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 39410 continues former Fish and Game Code Section 8435 without substantive change.

PART 9. CROAKER

TITLE 1. CROAKER GENERALLY

§ 39500. Provisions not exclusive

39500. The provisions of this part are not intended to be exclusive. Other provisions that govern croaker include, but are not limited to, the following provisions:

(a) Section 14870.

(b) Section 15915.

(c) Section 16805.

(d) Section 21950.

(e) Section 20710.

1 (f) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

2 **Comment.** Section 39500 is new. It is added for drafting convenience.

3 TITLE 2. COMMERCIAL PROVISIONS

4 § 39550. Application of title

5 39550. For purposes of Section 37805, the provisions in this title are commercial
6 provisions.

7 **Comment.** Section 39550 is new. It is added for drafting convenience.

8 § 39555. Yellowfin croaker, spotfin croaker, or California corbina

9 39555. Yellowfin croaker, spotfin croaker, and California corbina shall not be
10 sold or purchased, or possessed in any place where fish are purchased, possessed
11 for sale, or sold, or where food is offered for sale, or in any truck or other
12 conveyance operated by or for a place selling or possessing fish.

13 **Comment.** Section 39555 continues former Fish and Game Code Section 8373 without
14 substantive change.

15 See also Sections 4900, 5102 (enforcement).

16 PART 10. GRUNION

17 TITLE 1. GRUNION GENERALLY

18 § 39600. Provisions not exclusive

19 39600. The provisions of this part are not intended to be exclusive. Other
20 provisions that govern grunion include, but are not limited to Section 20710.

21 **Comment.** Section 39600 is new. It is added for drafting convenience.

22 TITLE 2. COMMERCIAL PROVISIONS

23 § 39650. Application of title

24 39650. For purposes of Section 37805, the provisions in this title are commercial
25 provisions.

26 **Comment.** Section 39650 is new. It is added for drafting convenience.

27 § 39655. Season

28 39655. It is unlawful to take grunion (*Leuresthes tenuis*) between March 31 and
29 June 1.

30 **Comment.** Section 39655 continues former Fish and Game Code Section 8381 without
31 substantive change.

32 See also Section 4900 (enforcement).

PART 11. HAGFISH

TITLE 1. HAGFISH GENERALLY

§ 39700. Provisions not exclusive

39700. The provisions of this part are not intended to be exclusive. Other provisions that govern hagfish include, but are not limited to the following provisions:

(a) Section 19230.

(b) Section 19500.

Comment. Section 39700 is new. It is added for drafting convenience.

TITLE 2. COMMERCIAL PROVISIONS

§ 39750. Application of title

39750. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 39750 is new. It is added for drafting convenience.

§ 39755. Definitions

39755. For the purposes of this title, the following terms have the following meanings:

(a) “Bucket trap” means a plastic bucket of five gallons or less in capacity.

(b) “General trap permit” means a valid permit to take fish for a commercial purpose issued pursuant to Section 19205 that has not been suspended or revoked.

(c) “Korean trap” means a molded plastic cylinder that does not exceed 6 inches in diameter and does not exceed 24 inches in length.

(d) “Popup” means a mechanism capable of releasing a submerged buoy at a predetermined time.

Comment. Section 39755 continues former Fish and Game Code Section 9000.5(a), (c), (d), and (f) without substantive change.

§ 39760. Take

39760. Hagfish may be taken under a general trap permit, if all of the following criteria are met:

(a) Korean traps and bucket traps may be used to take only hagfish under this article.

(b) No more than a total of 500 Korean traps or a total of 200 bucket traps may be possessed aboard a vessel or in the water or combination thereof.

(c) No permittee may possess both Korean traps or bucket traps and other types of traps aboard a vessel at the same time. When Korean traps or bucket traps are

1 being used or possessed aboard a vessel, no species of finfish other than hagfish
2 shall be taken, possessed aboard, or sold for commercial purposes.

3 (d) Popups shall not be used on buoy lines attached to Korean traps or bucket
4 traps, and shall not be possessed by a commercial fisherman aboard a vessel when
5 taking hagfish.

6 **Comment.** Section 39760 continues former Fish and Game Code Section 9001.6 without
7 substantive change.

8 See also Section 4900 (enforcement).

9 PART 12. HALIBUT

10 TITLE 1. HALIBUT GENERALLY

11 § 39800. Provisions not exclusive

12 39800. The provisions of this part are not intended to be exclusive. Other
13 provisions that govern halibut include, but are not limited to the following
14 provisions:

15 (a) Section 13900.

16 (b) Section 16805.

17 (c) Section 16110.

18 (d) Section 18505.

19 (e) Section 18510.

20 (f) Section 18800.

21 (g) Section 18805.

22 (h) Section 18810.

23 (i) Section 18815.

24 (j) Section 18820.

25 (k) Section 18825.

26 (l) Section 21950.

27 (m) Section 25125.

28 (n) Section 50520.

29 (o) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

30 **Comment.** Section 39800 is new. It is added for drafting convenience.

31 § 39805. Conformity with other law

32 39805. The commission may prohibit the taking or possessing of Pacific halibut
33 (Hippoglossus) in the same manner as the taking or possessing of Pacific halibut is
34 prohibited by federal law or by rules or regulations adopted by the International
35 Pacific Halibut Commission, notwithstanding any other provision of this code.

36 **Comment.** Section 39805 continues former Fish and Game Code Section 316 without
37 substantive change.

1 TITLE 2. COMMERCIAL PROVISIONS

2 CHAPTER 1. PRELIMINARY PROVISIONS

3 § 39850. Application of title

4 39850. For purposes of Section 37805, the provisions in this title are commercial
5 provisions.

6 **Comment.** Section 39850 is new. It is added for drafting convenience.

7 CHAPTER 2. TAKE, POSSESSION, OR SALE

8 Article 1. General Provisions

9 § 39900. Season

10 39900. California halibut (*Paralichthys californicus*) may be taken at any time.

11 **Comment.** Section 39900 continues former Fish and Game Code Section 8391 without
12 substantive change.

13 § 39905. Size restrictions

14 39905. (a) No California halibut may be taken, possessed, or sold that measures
15 less than 22 inches in total length.

16 (b) For purposes of subdivision (a), total length means the shortest distance
17 between the tip of the jaw or snout, whichever extends farthest while the mouth is
18 closed, and the tip of the longest lobe of the tail, measured while the halibut is
19 lying flat in natural repose, without resort to any force other than the swinging or
20 fanning of the tail.

21 **Comment.** Section 39905 continues former Fish and Game Code Section 8392 without
22 substantive change.

23 See also Section 5680 (enforcement).

24 Article 2. Halibut Bottom Trawl Permit

25 § 39950. Permit requirement

26 39950. Any vessel using bottom trawl gear in state-managed halibut fisheries, as
27 described in subdivision (a) of Section 16110, shall possess a valid California
28 halibut bottom trawl vessel permit that has not been suspended or revoked and that
29 is issued by the department authorizing the use of trawl gear by that vessel for the
30 take of California halibut.

31 **Comment.** Section 39950 continues former Fish and Game Code Section 8494(a) without
32 substantive change.

33 See also Section 5680 (enforcement).

1 **Note.** Proposed Section 39950 would continue Section 8494(a), which was amended by 2018
2 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
3 anticipation of its effect.

4 **§ 39955. Issuance**

5 39955. A California halibut bottom trawl vessel permit shall be issued annually,
6 commencing with the 2006 permit year and an applicant shall have been issued a
7 California halibut bottom trawl vessel permit in the immediately preceding permit
8 year.

9 **Comment.** Section 39955 continues former Fish and Game Code Section 8494(b) without
10 substantive change.

11 See also Section 5680 (enforcement).

12 **Notes.** (1) Proposed Section 39955 would continue Section 8494(b), which was amended by
13 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
14 anticipation of its effect.

15 (2) The meaning of “and an applicant shall have been issued a California halibut bottom trawl
16 vessel permit in the immediately preceding permit year” is not clear. Is the intention to limit the
17 issuance of permits to persons who held a permit in the preceding year? **The Commission invites**
18 **comment on the meaning of the provision.**

19 **§ 39960. Transfers generally**

20 39960. Permits issued pursuant to this article may be transferred only if at least
21 one of the following occur:

22 (a) The commission adopts a restricted access program for the fishery that is
23 consistent with the commission’s policies regarding restricted access to
24 commercial fisheries.

25 (b) The transfer is approved pursuant to Section 39965.

26 **Comment.** Section 39960 continues former Fish and Game Code Section 8494(c)(1) and part
27 of (c)(2) without substantive change.

28 See also Section 5680 (enforcement).

29 **Note.** Proposed Section 39960 would continue Section 8494(c)(1) and part of (c)(2), which
30 were amended by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is
31 included here in anticipation of its effect.

32 **§ 39965. Permitted transfers**

33 39965. (a) Prior to the implementation of a halibut trawl restricted access
34 program, the department may consider requests from a vessel permitholder or his
35 or her conservator or estate representative, as applicable, to transfer a vessel
36 permit to a vessel consistent with the requirements of subdivision (b) or (c). The
37 department may request information that it determines is reasonably necessary
38 from the permitholder or his or her conservator or heirs or estate for the purpose of
39 verifying statements in the request prior to authorizing the transfer of the permit.

1 (b) The department may approve the transfer of a California halibut bottom
2 trawl vessel permit to a replacement vessel if all of the following requirements are
3 met:

4 (1) In the form of a notarized application, the permitholder submits to the
5 department a request for the transfer of a California halibut bottom trawl vessel
6 permit to another vessel owned by the permitholder.

7 (2) The permitholder provides a current United States Coast Guard certificate of
8 documentation or vessel marine survey to the department for the permitted vessel
9 and replacement vessel.

10 (3) Based on the information provided pursuant to paragraph (2), the department
11 determines that the replacement vessel is equal to or less than the capacity of the
12 permitted vessel.

13 (4) The department determines the California halibut bottom trawl vessel permit
14 for the permitted vessel is valid and has not been suspended or revoked.

15 (5) If applicable, the department receives written confirmation from the
16 replacement vessel's owner or authorized agent, or mortgager, of the vessel's
17 participation in the transfer of the California halibut bottom trawl vessel permit.

18 (6) The replacement vessel is registered with the department pursuant to Section
19 14755 at the time the application is submitted pursuant to paragraph (1).

20 (c) The department may approve the transfer of a California halibut bottom trawl
21 vessel permit to another person if all of the following requirements are met:

22 (1) In the form of a notarized application, the permitholder or his or her
23 conservator or estate submits to the department a request to transfer a California
24 halibut bottom trawl vessel permit to another person.

25 (2) If the permitholder's estate submits a request pursuant to paragraph (1), the
26 estate submits the notarized application to the department within one year of the
27 death of the permitholder as listed on the death certificate.

28 (3) A current United States Coast Guard certificate of documentation or vessel
29 marine survey is provided to the department for the permitted vessel and vessel to
30 be used by the proposed transferee.

31 (4) Based on the information provided pursuant to paragraph (3), the department
32 determines that the vessel to be used by the proposed transferee is equal to or less
33 than the capacity of the permitted vessel.

34 (5) The proposed transferee meets both of the following requirements:

35 (A) The person has a valid commercial fishing license issued pursuant to Section
36 14500 that has not been suspended or revoked.

37 (B) The person is the owner of a commercial fishing vessel that is registered
38 with the department pursuant to Section 14755 and that registration has not been
39 suspended or revoked.

40 (6) The permit for the permitted vessel is current, and the permitholder or his or
41 her conservator or estate submitting the application is responsible for any renewal
42 of the permit that becomes due during the application processing period.

(7) Under penalty of perjury, the permitholder or his or her conservator or estate signs the application for transfer and certifies that the information included is true to the best of his or her information and belief.

(d) Any applicant who is denied transfer pursuant to this section may appeal the denial in writing describing the basis for the appeal to the commission within 60 days from the date of the department's decision.

Comment. Section 39965 continues part of former Fish and Game Code Section 8494(c)(2) without substantive change.

Note. Proposed Section 39965 would continue part of Section 8494(c)(2), which was amended by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 39970. Permit fees

39970. The commission shall establish California halibut bottom trawl vessel permit fees based on the recommendations of the department and utilizing the guidelines outlined in subdivision (b) of Section 3465 to cover the costs of administering this section. Prior to the adoption of a restricted access program pursuant to Section 39960, fees may not exceed one thousand dollars (\$1,000) per permit.

Comment. Section 39970 continues former Fish and Game Code Section 8494(d) without substantive change.

Note. Proposed Section 39970 would continue Section 8494(d), which was amended by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 39975. Application of federal permit

39975 Individuals holding a federal groundfish trawl permit may retain and land up to 150 pounds of California halibut per trip without a California halibut trawl permit in accordance with federal and state regulations, including, but not limited to, regulations developed under a halibut fishery management plan.

Comment. Section 39975 continues former Fish and Game Code Section 8494(e) without substantive change.

Note. Proposed Section 39975 would continue Section 8494(e), which was amended by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 39980. Commission regulation

39980. The commission may adopt regulations to implement this article.

Comment. Section 39980 continues former Fish and Game Code Section 8494(g) without substantive change.

§ 39985. Inoperative date of article

39985. This article shall become inoperative upon the adoption by the commission of a halibut fishery management plan in accordance with the requirements of Title 3 (commencing with Section 12100) of Part 4 of Division 6.

Comment. Section 39985 continues former Fish and Game Code Section 8494(f) without substantive change.

Article 3. Halibut Trawl Grounds

§ 40100. California halibut trawl grounds

40100. (a) The following areas are designated as the California halibut trawl grounds:

(1) The ocean waters lying between one and three nautical miles from the mainland shore lying south and east of a line running due west (270° true) from Point Arguello and north and west of a line running due south (180° true) from Point Mugu.

(2) The ocean waters of Monterey Bay delineated by straight lines connecting the following points in the following order and excluding federal waters as defined by the order entered by the United States Supreme Court in the case of *United States of America v. State of California*, 135 S.Ct. 563 (2014):

Latitude	Longitude
36° 54.146' N	122° 4.244' W
36° 52.910' N	122° 4.225' W
36° 52.024' N	122° 2.117' W
36° 51.680' N	121° 59.321' W
36° 52.230' N	121° 57.810' W
36° 48.974' N	121° 52.474' W
36° 49.835' N	121° 51.840' W
36° 54.250' N	121° 54.883' W
36° 54.287' N	121° 58.062' W
36° 53.956' N	122° 2.117' W

(3) The ocean waters offshore of Port San Luis lying between one and three nautical miles from the mainland shore, as described by an area circumscribed by a line connecting the following points in clockwise order, with the line connecting the last two points approximately parallel to the lines connecting the preceding points:

Latitude	Longitude
35° 08' N	120° 46' W
35° 08' N	120° 40.1' W
35° 06.6' N	120° 39.2' W
35° 02.2' N	120° 39.3' W

1	34° 57' N	120° 40.7' W
2	34° 57' N	120° 43.5' W
3	35° 06.4' N	120° 46' W

(b) Notwithstanding subdivision (a), the use of trawl gear for the take of fish is prohibited in the following areas of the California halibut trawl grounds:

(1) Around Point Arguello. The area from a line extending from Point Arguello true west (270°) and out three miles, to a line extending from Rocky Point true south (180°) and out three miles.

(2) Around Point Conception. From a point on land approximately one-half mile north of Point Conception at latitude 34° 27.5' extending seaward true west (270°) from one to three miles, to a point on land approximately one-half mile east of Point Conception at longitude 120° 27.5' extending seaward true south (180°) from one to three miles.

(3) In the Hueneme Canyon in that portion demarked by the IMO Vessel Traffic safety zone on NOAA/NOS Chart 18725 and from one mile to the three mile limit of state waters.

(4) In Mugu Canyon, from Laguna Point, a line extending true south (180°) and out three miles, to Point Mugu, a line extending true south (180°) and from one to three miles.

(c) (1) Notwithstanding subdivision (a), commencing April 1, 2008, the following areas in the California halibut trawl grounds shall be closed to trawling, unless the commission finds that a bottom trawl fishery for halibut minimizes bycatch, is likely not damaging sea floor habitat, is not adversely affecting ecosystem health, and is not impeding reasonable restoration of kelp, coral, or other biogenic habitats:

(A) The ocean waters lying between one and three nautical miles from the mainland shore from a point east of a line extending seaward true south (180°) from a point on land approximately one-half mile east of Point Conception at longitude 120° 27.5' to a line extending due south from Gaviota.

(B) The ocean waters lying between one and two nautical miles from the mainland shore lying east of a line extending due south from Santa Barbara Point (180°) and west of a line extending due south from Pitas Point (180°).

(C) Except as provided in subdivision (b), the ocean waters lying between one and three nautical miles from the mainland shore lying south and east of a line running due west (270° true) from Point Arguello to a line extending seaward true south (180°) from a point on land approximately 1/2 mile east of Point Conception at longitude 120° 27.5', and from the western border of the IMO Vessel Traffic safety zone on NOAA/NOS Chart 18725 in Hueneme Canyon running south and east to a line running due south (180° true) from Point Mugu.

(2) In making the finding described in paragraph (1), the commission shall pay special attention to areas where kelp and other biogenic habitats existed and where

1 restoring those habitats is reasonably feasible, and to hard bottom areas and other
2 substrate that may be particularly sensitive to bottom trawl impacts.

3 (d) Notwithstanding subdivision (a), the areas of the halibut trawl grounds
4 identified in paragraphs (2) and (3) of subdivision (a) shall remain closed to
5 trawling until the commission determines that trawling in those areas is consistent
6 with the provisions of this section. At the commission's discretion, a
7 determination pursuant to this subdivision may be made through the review
8 required pursuant to subdivision (e).

9 (e) Commencing January 1, 2008, the commission shall review information
10 every three years from the federal groundfish observer program and other
11 available research and monitoring information it determines relevant, and shall
12 close any areas in the California halibut trawl grounds where it finds that the use
13 of trawl gear does not minimize bycatch, is likely damaging sea floor habitat, is
14 adversely affecting ecosystem health, or impedes reasonable restoration of kelp,
15 coral, or other biogenic habitats. The commission shall pay special attention to
16 areas where kelp and other biogenic habitats existed and where restoring those
17 habitats is reasonably feasible, and to hard bottom areas and other substrate that
18 may be particularly sensitive to bottom trawl impacts in making that finding.

19 (f) Notwithstanding any other law, the commission shall determine the size,
20 weight, and configuration of all parts of the trawl gear, including, but not limited
21 to, net, mesh, doors, appurtenances, and towing equipment as it determines is
22 necessary to ensure trawl gear is used in a sustainable manner within the
23 California halibut trawl grounds.

24 **Comment.** Section 40100 continues former Fish and Game Code Section 8495 without
25 substantive change.

26  **Note.** Proposed Section 40100 would continue Section 8495, which was amended by 2018
27 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
28 anticipation of its effect.

29 **§ 40115. Other requirements**

30 40115. (a) Unless otherwise specified by the commission pursuant to
31 subdivision (b), within the California halibut trawl grounds the following
32 requirements shall apply to the use of trawl nets:

33 (1) Open season and hours of operation shall be as follows:

34 (A) Open season shall be June 16 to March 14, inclusive.

35 (B) In the designated halibut trawl grounds within Monterey Bay and offshore of
36 Port San Luis, trawl fishing gear may only be deployed to capture fish between
37 sunrise and sunset.

38 (2) California halibut shall only be taken pursuant to Section 39905.

39 (3) Not more than 500 pounds of fish other than California halibut may be
40 possessed, except that any amount of sea cucumbers may be possessed by a person
41 who holds a valid sea cucumber permit and who meets any conditions adopted by
42 the commission pursuant to Section 50520, and any amount of sharks, skates, or

rays for which the take or possession of that species is not otherwise prohibited by this code may be taken or possessed.

(4) It is unlawful to operate a trawl net in a way that damages or destroys other types of fishing gear that is buoyed or otherwise visibly marked.

(5) Sections 16250, 16270, 16275, 16280, 16285, 16290, 16295, 16300, 16305 and 16310 do not apply to trawl nets when used or possessed on California halibut trawl grounds.

(6) Trawl nets described in Section 16355 shall only be used within the halibut trawl grounds.

(7) Single bags and cod-ends or double bags and cod-ends may be used within the halibut trawl grounds and may be possessed while a vessel is in transit directly to the halibut trawl grounds or returning directly to port. Double bags shall be hung and tied to each rib line so that the knots of each layer coincide, knot for knot, for the full length of the double layers. The double mesh section shall not measure over 25 meshes or 12 feet in length, whichever is greater. The individual meshes in the double section shall measure not less than seven and one-half inches in length.

(8) No net, whose cod-end meshes are less than prescribed in this section, may be possessed on any vessel that is operating under the authority of this section.

(b) The commission may reduce the length of the open season or hours of operation, or either of those, specified in paragraph (1) of subdivision (a). The commission may also modify any of the requirements of paragraphs (2) to (8), inclusive, of subdivision (a) to make those requirements more restrictive.

Comment. Section 40115 continues former Fish and Game Code Section 8496 without substantive change.

See also Section 5680 (enforcement).

Note. Proposed Section 40115 would continue Section 8496, which was amended by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 40120. Season for take

40120. (a) If the director determines that the California halibut resource, or existing fishing operations, within the California halibut trawl grounds designated in Section 40100, are in danger of irreparable injury, the director may order the closure of part or all of the area to trawl net fishing, or may further restrict the nets that may be used in part or all of the area. Any closure or restriction order shall be adopted by emergency regulation, in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(b) The department shall bring any regulation adopted pursuant to this section to the attention of the Legislature within 30 calendar days after commencement of the next succeeding regular session of the Legislature.

Comment. Section 40120 continues former Fish and Game Code Section 8497 without substantive change.

1 **§ 40125. Incidental take or possession of halibut**

2 40125. When fishing for shrimp or prawns under a permit issued pursuant to
3 Section 51100, no Pacific halibut and not more than 150 pounds of California
4 halibut shall be possessed or landed.

5 **Comment.** Section 40125 continues the second sentence of former Fish and Game Code
6 Section 8842(c) without substantive change.

7 See also Section 5680 (enforcement).

8 **PART 13. HERRING**

9 **TITLE 1. HERRING GENERALLY**

10 **§ 40250. Provisions not exclusive**

11 40250. The provisions of this part are not intended to be exclusive. Other
12 provisions that govern herring include, but are not limited to, the following
13 provisions:

14 (a) Section 12165.

15 (b) Section 18065.

16 (c) Section 21210.

17 (d) Section 21360.

18 (e) Section 22505.

19 (f) Section 22515.

20 (g) Section 40500.

21 (h) Section 40505.

22 (i) Section 40510.

23 (j) Section 40515.

24 (k) Section 58630.

25 **Comment.** Section 40250 is new. It is added for drafting convenience.

26 **TITLE 2. COMMERCIAL PROVISIONS**

27 **CHAPTER 1. PRELIMINARY PROVISIONS**

28 **§ 40300. Application of title**

29 40300. For purposes of Section 37805, the provisions in this title are commercial
30 provisions.

31 **Comment.** Section 40300 is new. It is added for drafting convenience.

CHAPTER 2. PERMIT

§ 40350. Permit required for take

40350. (a) Herring may be taken for a commercial purpose only under a permit, subject to regulations adopted by the commission.

(b) It is unlawful to take herring for roe on a vessel unless the operator holds a herring permit issued by the department pursuant to commission regulations.

Comment. Subdivision (a) of Section 40350 continues the first sentence of former Fish and Game Code Section 8550 without substantive change.

Subdivision (b) continues the first sentence of former Fish and Game Code Section 8552(a) without substantive change.

See also Section 5690 (enforcement).

§ 40355. Limit on number of permits issued

40355. The commission may, whenever necessary to prevent overutilization, to ensure efficient and economic operation of the fishery, or to otherwise carry out this chapter, limit the total number of permits that are issued and the amount of herring that may be taken under the permits. In limiting the total number of permits, the commission shall take into consideration any restriction of the fishing area and the safety of others who, for purposes other than fishing, use the waters from which herring are taken.

Comment. Section 40355 continues the second and third sentences of former Fish and Game Code Section 8550 without substantive change.

§ 40360. Fee for permit

40360. (a) A herring net permit granting the privilege to take herring with nets for commercial purposes shall be issued to licensed commercial fishermen, subject to regulations adopted pursuant to Sections 40350 and 40355, as follows:

(1) To any resident of this state to use gill nets, upon payment of a fee of two hundred sixty-five dollars (\$265).

(2) To any nonresident to use gill nets, upon payment of a fee of one thousand dollars (\$1,000).

(b) The commission shall not require a permit for a person to be a crewmember on a vessel taking herring pursuant to this chapter.

Comment. Section 40360 continues former Fish and Game Code Section 8550.5 without substantive change.

§ 40365. Permit requirements

40365. (a) No person may be issued more than one herring permit, and the department shall not issue a herring permit to more than one person except as provided in Section 40375.

(b) Herring permits shall only be issued to and shall be held only by a natural person.

1 (c) Herring permits shall not be used as any form of security for any purpose,
2 including, but not limited to, financial or performance obligations.

3 (d) The permittee shall be on board the vessel at all times during herring fishing
4 operations, subject only to exceptions provided for in this code and regulations
5 adopted pursuant to this code.

6 **Comment.** Section 40365 continues former Fish and Game Code Section 8552(b)-(e) without
7 substantive change.

8 **§ 40370. Herring fishery experience points**

9 40370. (a) For purposes of this chapter, the experience points for a person
10 engaged in the herring roe fishery shall be based on the number of years holding a
11 commercial fishing license and the number of years having served as a
12 crewmember in the herring roe fishery, and determined by the sum of both of the
13 following:

14 (1) One point for each year in the previous 12 years (prior to the current license
15 year) that the person has held a commercial fishing license issued pursuant to
16 Section 14550, not to exceed a maximum of 10 points.

17 (2) Five points for one year of service as a paid crewmember in the herring roe
18 fishery, as determined pursuant to Section 40440, three points for a second year of
19 service as a paid crewmember, and two points for a third year as a paid
20 crewmember, beginning with the 1978–79 herring fishing season, not to exceed a
21 maximum of 10 points.

22 (b) The department shall maintain a list of all individuals possessing 20
23 experience points, and additional lists of all those persons holding two points or
24 more, grouped by number of points. The list shall be maintained annually and
25 shall be available from the department to all pointholders and to all herring
26 permittees. All pointholders are responsible for providing the department with
27 their current address and for verifying points credited to them by the department.

28 (c) A herring permittee may use the department's list and rely upon that list in
29 making offers for transfer of his or her permit until the date of the annual
30 distribution of the new list. On and after the date of the annual revision of the list,
31 the permittee shall use the new list.

32 (d) The point provisions in this section are for purposes of sale of a permit, or
33 transfer to a partner of a co-owned permit.

34 **Comment.** Section 40370 continues former Fish and Game Code Section 8552.8 without
35 substantive change.

36 **§ 40375. Issuance of single permit to two individuals**

37 40375. (a) Notwithstanding Section 40365, a herring permit may be issued to
38 two individuals if one of the following criteria is met:

39 (1) The individuals are married to each other, or are registered domestic
40 partners, and file with the department a certified copy of their certificate of

1 marriage or registered domestic partner certificate, and a declaration under penalty
2 of perjury, or a court order, stating that the permit is community property.

3 (2) The individuals meet both of the following requirements:

4 (A) They are both engaged in the herring roe fishery, either by fishing aboard
5 the vessel, or by personally participating in the management, administration, and
6 operation of the partnership's herring fishing business.

7 (B) The individuals are partners in a partnership, in which each holds 50 percent
8 ownership in a herring fishery operation, including a vessel or equipment, and that
9 partnership is demonstrated by any two of the following:

10 (i) A copy of a federal partnership tax return.

11 (ii) A written partnership agreement.

12 (iii) Joint ownership of a fishing vessel used in the herring fishery as
13 demonstrated on federal vessel license documents.

14 (b) For purposes of this section, a herring permit does not constitute a herring
15 fishing operation.

16 (c) A herring permit may be transferred to one of the partners, to be held
17 thereafter in that partner's name, only if that partner has not less than 10 herring
18 fishery experience points computed pursuant to paragraph (2) of subdivision (a) of
19 Section 40370 and there has been a death or retirement of the other partner, a
20 dissolution of partnership, or the partnership is dissolved by a dissolution of
21 marriage or registered domestic partnership, or a decree of legal separation.

22 (d) A transfer under this section shall be authorized only if proof that the
23 partnership has existed for three or more consecutive years is furnished to the
24 department, or a certified copy of a certificate of marriage or registered domestic
25 partnership is on file with the department, and the permit is community property as
26 provided in subdivision (a).

27 (e) The transferor of a permit shall not, by reason of the transfer, become
28 ineligible to participate further in the herring fishery or to purchase another permit.

29 (f) Notwithstanding subdivision (b), in the event of the death of one of the
30 partners holding a herring permit pursuant to this section, where the partnership
31 existed for longer than six months but less than three years, and the surviving
32 partner does not have the minimum points pursuant to subdivision (c) to qualify
33 for a permit transfer, the permit may be transferred on an interim basis for a period
34 of not more than 10 years to the surviving partner, if an application is submitted to
35 the department within one year of the deceased partner's death and the surviving
36 partner participates in the fishery for the purpose of achieving the minimum
37 number of herring fishery experience points to be eligible for a permit transfer
38 pursuant to Section 40380. The interim permit shall enable the surviving partner to
39 participate in the herring fishery. At the end of the interim permit period, the
40 surviving partner, upon application to the department, may be issued the permit if
41 he or she has participated in the fishery and gained the minimum number of
42 herring fishery experience points for a permit.

Comment. Section 40375 combines and continues the second sentence of former Fish and Game Code Section 8552(a), and former Fish and Game Code Section 8552.6, without substantive change. See Family Code Section 297.5(a) (registered domestic partners have same rights, protections, and benefits under law as are granted to spouses).

§ 40380. Transfer of permit generally

40380. Notwithstanding Section 3050, a herring permit may be transferred from a herring permittee to a nonpermittee who has 20 or more herring fishery experience points, if the following conditions are satisfied:

(a) The permittee shall mail, by certified or registered mail, to the department and to every individual listed on the department's list of herring fishery participants with maximum 20 or more herring fishery experience points, a notice of intention to transfer the permittee's herring permit, which shall provide all of the following information:

(1) The gear type to be used under the herring permit.

(2) The name, address, and telephone number of the permittee and proposed transferee.

(3) The amount of consideration, if any, sought by the transferor.

(b) Sixty days after mailing the notice, the transferor may transfer the permit to any person having 20 or more herring fishery experience points without any further notice, if the transfer occurs within six months of the date the original notice was given. Transfers after that six-month period shall require another 60-day notice of intention to be given.

(c) A true copy of the notice of intention to transfer a permit shall be filed with the department by the transferor under penalty of perjury and shall be available for public review.

(d) No person may hold more than one herring permit.

Comment. Section 40380 combines and continues the second sentence of former Fish and Game Code Section 8552(a), and former Fish and Game Code Section 8552.2, without substantive change.

Note. Existing Fish and Game Code Section 8552.8 (which would be continued by proposed Section 40370) appears to indicate that the maximum number of herring fishery experience points that may be awarded is 20. However, existing Section 8552.2 (which would be continued by proposed Section 40380) refers several times to persons having 20 "or more" experience points.

The Commission invites comment that would clarify this issue.

§ 40385. Regulations relating to transfer of permits

40385. The commission may, in consultation with representatives of the commercial herring roe fishery, and after holding at least one public hearing, adopt regulations intended to facilitate the transfer of herring permits, including, but not limited to, regulations that would do the following:

(a) Allow an individual to own a single permit for each of the different herring gillnet platoons in San Francisco Bay.

(b) Eliminate the herring fishery experience point system for qualifying for a herring permit.

(c) Allow a herring permit to be passed from a parent to child, or between spouses.

Comment. Section 40385 continues former Fish and Game Code Section 8552.3 without substantive change.

§ 40390. Transfer fee

40390. (a) The department shall reissue a herring permit which has been transferred pursuant to Section 40375 or 40380 upon payment of a transfer fee of five thousand dollars (\$5,000) by the transferee of the permit.

(b) Transfer fees shall be deposited in the Fish and Game Preservation Fund, and shall be expended for research and management activities to maintain and enhance herring resources pursuant to subdivision (a) of Section 21360.

Comment. Section 40390 continues former Fish and Game Code Section 8552.7 without substantive change.

§ 40395. Drawing for expired permits

40395. Herring permits that are revoked or not renewed may be offered by the department to persons having 20 or more herring fishery experience points, in a drawing held on the first Friday of August of each year.

Comment. Section 40395 continues former Fish and Game Code Section 8552.4 without substantive change.

Note. Existing Fish and Game Code Section 8552.8 (which would be continued by proposed Section 40370) appears to indicate that the maximum number of herring fishery experience points that may be awarded is 20. However, existing Sections 8552.4 (which would be continued by proposed Section 40395) refers to persons having “20 or more” experience points.

The Commission invites comment that would clarify this issue.

§ 40400. Adjustment of fees

40400. The commission, in consultation with the department and representatives of the commercial roe herring fishery, and after holding at least one public hearing, may adjust any fee related to a herring permit, including the fee for the issuance of or transfer of a herring permit, to a level that will not discourage the transfer of permits or limit entry into the fishery, and that will ensure sufficient funds to cover reasonable department costs associated with the management of the fishery, including research and enforcement costs.

Comment. Section 40400 continues former Fish and Game Code Section 8552.1 without substantive change.

§ 40405. Temporary substitution of crewmember

40405. The commission, in adopting regulations for the commercial herring fishery, shall adopt one or more regulations providing that if a permittee is ill or injured, a crewmember aboard the vessel operated by the permittee may be

1 temporarily substituted as the permittee. The commission may require that proof
2 of the illness or injury be substantiated to the satisfaction of the department.

3 **Comment.** Section 40405 continues former Fish and Game Code Section 8554 without
4 substantive change.

5 **§ 40410. Periodic review of regulations and policies**

6 40410. The director shall periodically meet and confer with representatives of
7 the commercial herring roe fishery to review regulations and policies of the
8 commission and the department concerning that fishery, and to receive
9 recommendations on the regulation and management of that fishery. In particular,
10 those representatives and their legal counsel may recommend to the department,
11 for recommendation to the commission for adoption by the commission as
12 regulations, requirements for the payment of civil damages that may be imposed in
13 lieu of revoking or suspending a permit issued pursuant to this chapter, or for
14 violations of regulations adopted by the commission pertaining to the herring roe
15 fishery.

16 **Comment.** Section 40410 continues former Fish and Game Code Section 8555 without
17 substantive change.

18 **§ 40415. Regulation relating to use of gill nets**

19 40415. Notwithstanding any other provision of law, the commission shall
20 determine, by regulation, if drift or set gill nets may be used to take herring for a
21 commercial purpose. The commission may also determine, by regulation, the size
22 of the meshes of the material used to make those gill nets.

23 **Comment.** Section 40415 continues former Fish and Game Code Section 8556 without
24 substantive change.

25 **§ 40420. Determination relating to use of round haul nets in Districts 2600 and 2605**

26 40420. Notwithstanding any other provision of law, the commission shall
27 determine, by regulation, if round haul nets may be used to take herring in
28 Districts 2600 and 2605, and the conditions under which those nets may be used.

29 **Comment.** Section 40420 continues former Fish and Game Code Section 8557 without
30 substantive change.

31  **Note.** Existing Fish and Game Code Section 8557 (which would be continued by proposed
32 Section 40420), in contrast with preceding Section 8556 (which would be continued by proposed
33 Section 26915), requires the Fish and Game Commission to “determine” whether round haul nets
34 may be used to take herring in specified districts, but does not require that determination to be
35 made “by regulation.” The Commission believes the omission from Section 8557 was
36 inadvertent, and proposed Section 40420 would conform the language of the two sections by
37 expressing referencing a determination “by regulation.”

38 **The Commission invites comment on that revision.**

39 **§ 40425. Herring research and management account**

40 40425. (a) There is established within the Fish and Game Preservation Fund a
41 herring research and management account.

(b) The funds in the account shall be expended for the purpose of supporting, in consultation with the herring industry pursuant to Section 40410, department evaluations of and research on herring populations in San Francisco Bay, evaluations and research that may be required for Tomales Bay, Humboldt Bay, and Crescent City, and for assisting in enforcement of herring regulations.

(c) The evaluations and research shall be for the following purposes:

(1) Determining the annual herring spawning biomass.

(2) Determining the condition of the herring resource, which may include its habitat.

(3) Assisting the commission and the department in the adoption of regulations to ensure a sustainable herring roe fishery.

(d) An amount, not to exceed 15 percent of the total funds in the account, may be used for educational purposes regarding herring, herring habitat, and the herring roe fishery.

(e) The funds in the account shall consist of the funds deposited pursuant to Section 40435, and the funds derived from herring landing fees allocated pursuant to subdivision (a) of Section 21360.

(f) The department shall maintain internal accountability necessary to ensure that all restrictions on the expenditure of the funds in the account are met.

Comment. Section 40425 continues former Fish and Game Code Section 8558 without substantive change.

§ 40430. San Francisco Bay herring stamp

40430. (a) No person shall purchase or renew any permit to take herring for a commercial purpose in San Francisco Bay, without first obtaining an annual herring stamp from the department.

(b) The fee for the annual herring stamp shall be one hundred dollars (\$100).

Comment. Section 40430 continues the first two sentences of former Fish and Game Code Section 8558.1(a) without substantive change.

§ 40435. Funds to be deposited in herring research and management account

40435. The following funds shall be deposited into the herring research and management account established pursuant to Section 40425:

(a) The amount of the difference between fees for nonresident and resident herring net permits, collected pursuant to Section 40360.

(b) Fees for San Francisco Bay herring permit transfers, collected pursuant to Section 40390.

(c) Fees for San Francisco Bay herring stamps, collected pursuant to Section 40425.

(d) One-half of all royalties collected by the department from the roe-on-kelp fishery, pursuant to paragraph (2) of subdivision (f) of Section 164 of Title 14 of the California Code of Regulations.

1 **Comment.** Subdivisions (a) and (b) of Section 40435 continue former Fish and Game Code
2 Section 8558.2 without substantive change.

3 Subdivision (c) continues the third sentence of former Fish and Game Code Section 8558.1(a)
4 without substantive change.

5 Subdivision (d) continues former Fish and Game Code Section 8558.3 without substantive
6 change.

7 **§ 40440. Proof of crewmember experience**

8 40440. The commission, in determining experience requirements for new
9 entrants into the herring fishery after January 1, 1987, shall require that any person
10 seeking a permit to operate a vessel to take herring and claiming crew experience
11 demonstrate, to the satisfaction of the department, proof of payment as a
12 crewmember in the herring fishery, based on tax records, or copies of canceled
13 checks offered and accepted as payment for service on a crew in the California
14 herring roe fishery.

15 **Comment.** Section 40440 continues former Fish and Game Code Section 8559 without
16 substantive change.

17 **§ 40455. Commission regulation**

18 40455. The commission may make and enforce regulations necessary or
19 convenient for carrying out any power, authority, or jurisdiction conferred under
20 this chapter.

21 **Comment.** Section 40455 continues former Fish and Game Code Section 8553 without
22 substantive change.

23 See also Section 5690 (enforcement).

24 CHAPTER 3. TAKE OF HERRING EGGS

25 **§ 40500. Permit to take herring eggs**

26 40500. Herring eggs may only be taken for a commercial purpose under a
27 revocable, nontransferable permit subject to regulations that the commission shall
28 adopt.

29 **Comment.** Section 40500 continues the first sentence of former Fish and Game Code Section
30 8389(a) without substantive change.

31 **§ 40505. Payment of royalty**

32 40505. In addition to the license fees provided for in this code, every person
33 taking herring eggs shall pay a royalty, as the commission may prescribe, of not
34 less than fifty dollars (\$50) per ton of herring eggs taken.

35 **Comment.** Section 40505 continues the second sentence of former Fish and Game Code
36 Section 8389(a) without substantive change.

37 **§ 40510. Permit limitations**

38 40510. (a) Whenever necessary to prevent overutilization, to ensure efficient and
39 economic operation of the fishery, or to otherwise carry out this chapter, the

commission may limit the number of permits that are issued, and the amount of herring eggs taken under those permits.

(b) In limiting the number of permits, the commission shall take into consideration any restriction of the fishing area, and the safety of others who, for purposes other than fishing, use the waters from which herring eggs are taken.

Comment. Subdivision (a) of Section 40510 continues former Fish and Game Code Section 8389(b) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 8389(c) without substantive change.

Note. Existing Fish and Game Code Section 8389(b) (which would be continued by proposed Section 40510(a)) provides that the Fish and Game Commission may place limits on herring egg permits, among other reasons, in order to “carry out this article.” However, the article in which Section 8389 appears, Article 9 (commencing with Section 8370) of Chapter 2 of Part 3 of Division 6 of the existing code, contains provisions governing the take of many different saltwater and anadromous fish, and Section 8389 is the only provision in that article relating to herring eggs.

Proposed Section 40510(a), in continuing Section 8389(b), would replace the reference to “this article” with a reference to only the provisions in the proposed law that continue existing Section 8389. Because Section 8389 would be divided into the four sections in a chapter of the proposed law continuing Section 8389(b), the reference has been changed to “this chapter.”

The Commission invites comment on the appropriateness of that revision.

§ 40515. Exception for incidental take of aquatic plants

40515. Every person operating under a permit issued pursuant to Section 40500 is excepted from the provisions of Title 1 (commencing with Section 54000) of Part 4 of Division 14, for aquatic plants taken incidental to the harvest of herring eggs.

Comment. Section 40515 continues former Fish and Game Code Section 8389(d) without substantive change.

PART 14. MACKEREL

TITLE 1. MACKEREL GENERALLY

§ 40550. Provisions not exclusive

40550. The provisions of this part are not intended to be exclusive. Other provisions that govern mackerel include, but are not limited to, the following provisions:

(a) Section 15915.

(b) Section 20710.

(c) Section 21015.

(d) Section 21810.

(e) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

Comment. Section 40550 is new. It is added for drafting convenience.

1 TITLE 2. COMMERCIAL PROVISIONS

2 § 40600. Application of title

3 40600. For purposes of Section 37805, the provisions in this title are commercial
4 provisions.

5 **Comment.** Section 40600 is new. It is added for drafting convenience.

6 § 40605. Authorized take

7 40605. Pacific mackerel may be taken under a revocable nontransferable permit
8 issued by the department to boat owners or operators under conditions prescribed
9 by the department.

10 **Comment.** Section 40605 continues former Fish and Game Code Section 8412 without
11 substantive change.

12 § 40610. Federal fishery regulations

13 40610. The department shall manage the Pacific mackerel resource in
14 conformance with the federal fishery regulations as recommended by the Pacific
15 Fishery Management Council and as adopted by the Secretary of Commerce.

16 **Comment.** Section 40610 continues former Fish and Game Code Section 8411 without
17 substantive change.

18 PART 15. MARLIN

19 TITLE 1. MARLIN GENERALLY

20 § 40700. Provisions not exclusive

21 40700. The provisions of this part are not intended to be exclusive. Other
22 provisions that govern marlin include, but are not limited to, the following
23 provisions:

24 (a) Section 14875.

25 (b) Section 18030.

26 (c) Section 18395.

27 (d) Section 18800.

28 (e) Section 18805.

29 (f) Section 18810.

30 (g) Section 18815.

31 (h) Section 18820.

32 (i) Section 18825.

33 (j) Section 21950.

34 **Comment.** Section 40700 is new. It is added for drafting convenience.

1 **§ 40705. Transport of marlin meat out of state**

2 40705. Marlin meat may not be transported out of this state.

3 **Comment.** Section 40705 continues former Fish and Game Code Section 2354 without
4 substantive change.

5 **§ 40710. Department monitoring of take**

6 40710. (a) The department shall develop a voluntary participation program for
7 the use of departmental observers on board vessels to monitor the taking of marlin
8 by persons engaged in sport fishing.

9 (b) The department shall, in accordance with Section 2205, procure insurance
10 against the liability of the owners or operators of vessels boarded by observers in
11 the event of injury to or death of any observer in the course and scope of
12 employment as an observer.

13 **Comment.** Section 40710 continues former Fish and Game Code Section 7123 without
14 substantive change.

15 **TITLE 2. COMMERCIAL PROVISIONS**

16 **§ 40750. Application of title**

17 40750. For purposes of Section 37805, the provisions in this title are commercial
18 provisions.

19 **Comment.** Section 40750 is new. It is added for drafting convenience.

20 **§ 40755. Marlin meat**

21 40755. Except where Section 40760 has been complied with, marlin meat,
22 whether fresh, smoked, canned, or preserved by any means, shall not be bought or
23 sold, or possessed or transported for the purpose of sale.

24 **Comment.** Section 40755 continues former Fish and Game Code Section 8393(a) without
25 substantive change.

26 **§ 40760. Importation for producing fish cakes**

27 40760. (a) Notwithstanding the provisions of section 27205, black marlin
28 (Makaira Indica) may be imported into this state for the purpose of processing
29 (manufacturing) a product commonly known as fish cakes for human
30 consumption.

31 (b) All black marlin (Makaira Indica) imported into this state must be in an
32 identifiable condition, and must be accompanied by a bill of lading, showing the
33 name of the consignor, the consignee, and the weight or number of fish shipped. A
34 copy of the bill of lading must be delivered to the nearest office of the department
35 either prior to or no later than two days after receipt of the fish.

36 (c) No black marlin (Makaira Indica) imported into California may leave the
37 premises of the original consignee unless written permission is received from the

1 department, or unless processed into the form of the product commonly known as
2 fish cakes.

3 **Comment.** Section 40760 continues former Fish and Game Code Section 8393(b) without
4 substantive change.

5 PART 16. SABLEFISH

6 TITLE 1. SABLEFISH GENERALLY

7 § 40850. Provisions not exclusive

8 40850. The provisions of this part are not intended to be exclusive. Other
9 provisions that govern sablefish include, but are not limited to, the following
10 provisions:

11 (a) Section 19230.

12 (b) Section 19500.

13 (c) Section 21020.

14 (d) Section 21225.

15 **Comment.** Section 40850 is new. It is added for drafting convenience.

16 TITLE 2. COMMERCIAL PROVISIONS

17 § 40900. Application of title

18 40900. For purposes of Section 37805, the provisions in this title are commercial
19 provisions.

20 **Comment.** Section 40900 is new. It is added for drafting convenience.

21 § 40905. Required permit

22 40905. Sablefish may be taken under a general trap permit issued pursuant to
23 Section 19205 in ocean waters between a line extending due west true from Point
24 Arguello in Santa Barbara County and the United States-Mexico international
25 boundary line, if all of the following criteria are also met:

26 (a) The trap shall be six feet or less in its greatest dimension.

27 (b) The mesh of any trap used for sablefish pursuant to this section shall
28 measure not less than two inches by two inches.

29 (c) The traps may be used only in waters 200 fathoms or deeper.

30 (d) No permittee may possess a sablefish trap and any other commercial fishing
31 gear aboard a vessel at the same time, except that spot prawn traps may be
32 possessed during spot prawn trap open fishing periods as established by the
33 commission, if the permittee has a valid spot prawn trap vessel permit that has not
34 been suspended or revoked.

35 **Comment.** Section 40905 continues former Fish and Game Code Section 9001.8 without
36 substantive change. A reference to Section 19205 was added to continue the application of the

1 definition of “general trap permit” that applied to former Fish and Game Code Section 9001.8.
2 See former Fish and Game Code Section 9000.5(c).

3 PART 17. SALMON

4 TITLE 1. SALMON GENERALLY

5 CHAPTER 1. PRELIMINARY PROVISIONS

6 § 40950. Provisions not exclusive

7 40950. The provisions of this part are not intended to be exclusive. Other
8 provisions that govern salmon include, but are not limited to, the following
9 provisions:

10 (a) Section 1725.

11 (b) Section 9105.

12 (c) Section 11905.

13 (d) Section 13105.

14 (e) Section 13900.

15 (f) Section 14875.

16 (g) Section 15540.

17 (h) Section 18040.

18 (i) Section 18045.

19 (j) Section 18050.

20 (k) Section 18085.

21 (l) Section 18095.

22 (m) Section 18210.

23 (n) Section 18805.

24 (o) Section 21455.

25 (p) Section 22305.

26 (q) Section 22310.

27 (r) Section 24700.

28 (s) Section 24950.

29 (t) Section 7650.

30 (u) Section 63360.

31 (v) Section 66350.

32 (w) Section 66355.

33 (x) Section 69500.

34 **Comment.** Section 40950 is new. It is added for drafting convenience.

35 § 40955. Legislative determination

36 40955. (a) The Legislature finds and declares all of the following:

(1) The commercial fishing industry of the North Coast has been greatly affected by decisions made by federal and state agencies concerning the health of the salmon resource and the consequent shortening or closing of the season, further impacting the already economically depressed region.

(2) Sportfishing on the North Coast, a staple of the tourism industry of the region, could be substantially affected by the limitations of the salmon seasons.

(3) The method of determining salmon escapement counts on only the Klamath River is inadequate for determining the overall health of the salmon resource in northern California waters and consequent decisions regarding the commercial, sport, and Indian salmon fisheries in those waters because it does not take into consideration the escapement figures on the Eel River and the Smith River.

(b) The department shall use present assessment methods to assess the salmon escapement count on the Eel River and the Smith River, as well as the Klamath River, systems, employing out-of-work fishermen, where possible, to do the counts with department personnel in supervisory capacities. Those figures shall be used by the commission and the department in all reports, recommendations, and decisions concerning the establishment of the commercial and sportfishing seasons in the waters of the state and in all recommendations to the Pacific Fishery Management Council or other regulatory agencies. This program shall be a priority for funding under the Fisheries Restoration Act of 1985 (Chapter 3 (commencing with Section 11900) of Title 2 of Part 4 of Division 6).

(c) The department shall install sonar fish counting devices on the Klamath River system as a three-year test program to determine the accuracy of the devices, and shall make recommendations to the Legislature by January 1, 1990, as to their accuracy and whether they should be installed on other river systems. Present assessment methods shall continue on the Klamath River system during the test period as a control mechanism.

Comment. Section 40955 continues former Fish and Game Code Section 1000.6 without substantive change.

CHAPTER 2. TAKE OR POSSESSION

§ 41000. Salmon spawning areas

41000. The commission may designate salmon spawning areas. It is unlawful to take salmon in any such spawning area, or within 250 feet of any salmon spawning station.

Comment. Section 41000 continues former Fish and Game Code Section 310 without substantive change.

§ 41005. Hook other than in mouth

41005. (a) It is unlawful, in inland waters, to kill or retain in possession any chinook, coho, or kokanee salmon that has not taken the bait or lure in its mouth.

(b) Any chinook, coho, or kokanee salmon hooked in inland waters other than in its mouth shall be released unharmed.

Comment. Section 41005 restates the part of former Fish and Game Code Section 5514 applicable to salmon without substantive change.

Note. Proposed Section 41005 is intended to restate the part of existing Fish and Game Code Section 5514 applicable to salmon to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

5514. (a) It is unlawful to kill or retain in possession any chinook, coho, or kokanee salmon or any steelhead that has not taken the bait or lure in its mouth, in inland waters.

(b) Any chinook, coho, or kokanee salmon or any steelhead hooked other than in its mouth in inland waters shall be released unharmed.

In the existing section, the placement of the phrase “in inland waters” creates possible ambiguity as to whether the section is meant to apply generally to persons fishing in inland waters, or to specified salmon that were not hooked in their mouths while in inland waters. The Commission believes the former interpretation was intended, and proposed Section 41005 would make that interpretation express.

The Commission invites comment on whether the restatement of Section 5514 would cause any substantive change in its meaning.

§ 41010. Conformity with federal law

41010. The commission may prohibit the taking or possessing of salmon in the same manner as the taking or possessing of salmon is prohibited by federal law or by rules or regulations adopted by the United States Secretary of Commerce, notwithstanding any other provision of this code.

Comment. Section 41010 continues former Fish and Game Code Section 316.5 without substantive change.

Note. Existing Section 316.5 provides that the Fish and Game Commission may prohibit the taking or possessing of salmon “in the same manner” as prohibited by federal law.

Should this provision be revised to make clear that the Commission’s authority to regulate the take or possession of salmon is not limited to take or possession that is regulated by federal law?

CHAPTER 3. IMPORTATION

§ 41050. Importation of undersized salmon

41050. (a) It is unlawful to import into this state for commercial purposes any salmon of smaller size than can be legally taken under regulations of either the Pacific Fishery Management Council or the state of landing.

(b) Subdivision (a) does not apply to domestically reared salmon, defined by commission regulations to include salmon that have returned to a hatchery or licensed artificial collection facility, if imported under regulations established by the commission.

Comment. Section 41050 continues former Fish and Game Code Section 2361 without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 41300. Application of title

41300. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 41300 is new. It is added for drafting convenience.

§ 41305. Definitions

41305. The following definitions govern the construction of this title:

(a) “Agent” means the person designated in writing by the owner as the owner’s representative.

(b) “Appeal” means a request for reconsideration of an action of the review board, the department, or the commission, pursuant to this title.

(c) “Change of ownership” means the transfer of ownership of a permitted vessel to a new owner.

(d) “Commercial salmon vessel permit” means an annual permit issued by the department to an owner of a commercial fishing vessel for use of that vessel to take salmon for commercial purposes and shall not be considered personal property.

(e) “Fishing potential” means the capability and capacity for harvesting salmon of a particular commercial fishing vessel. “Fishing potential” includes, but is not limited to, a rating based upon factors such as size, seaworthiness, propulsion system, hold size, and hull design.

(f) “Permit” means a commercial salmon vessel permit as defined in subdivision (d).

(g) “Permitted vessel” means a commercial fishing vessel for which a permit is currently valid.

(h) “Replacement vessel” means a commercial fishing vessel for the use of which a permit is proposed to be transferred pursuant to this title.

(i) “Review board” means the commercial salmon fishing review board created pursuant to Section 41900.

(j) “Transfer” means the issuance of a permit for use of a replacement vessel.

Comment. Section 41305 generalizes former Fish and Game Code Section 8231 without substantive change.

Note. Existing Fish and Game Code Section 8231 provides the definitions set forth in proposed Section 41305, but only for purposes of the article in which Section 8231 appears (Article 4.5 (commencing with Section 8230) of Chapter 2 of Part 3 of Division 6). Proposed Section 41305 would generalize the definitions in existing Section 8231 so that they apply to all commercial salmon fishing provisions in this proposed title.

The Commission invites comment on whether that generalization would be problematic.

1 CHAPTER 2. COMMERCIAL SALMON TROLLERS ENHANCEMENT AND
2 RESTORATION PROGRAM

3 **§ 41350. Declaration of legislative intent**

4 41350. (a) It is the intent of the Legislature that the department use the moneys
5 from the sale of commercial fishing salmon stamps allocated pursuant to
6 subdivision (b) of Section 41360, and the matching share contributed by the
7 department, to raise approximately two million chinook salmon annually to
8 yearling size, to contribute to the replenishing of California's salmon resource. In
9 no case shall moneys from the General Fund be used to match the salmon stamp
10 revenues expended for this program.

11 (b) It is the further intent of the Legislature that the salmon stamp fee authorized
12 in subdivision (b) of Section 41360 shall generate revenues equal to one-half the
13 amount necessary to raise this number of salmon to yearling size.

14 **Comment.** Section 41350 continues former Fish and Game Code Section 7861.3 without
15 substantive change.

16 **§ 41355. Commercial fishing salmon stamp requirement**

17 41355. (a) Except as provided in subdivision (f) or (g), no person who is 18
18 years of age or more and less than 70 years of age, on or before April 1 of the
19 current license year, shall take salmon for a commercial purpose or be on board a
20 vessel on which salmon are taken for a commercial purpose while salmon are
21 being taken or transported, unless that person has a commercial fishing salmon
22 stamp issued pursuant to this section affixed to his or her commercial fishing
23 license.

24 (b) Except as provided in subdivision (f) or (g), the operator of a vessel on
25 which salmon are taken for a commercial purpose shall not permit a person on
26 board that vessel while salmon are being taken or transported, unless that person
27 was less than 18 years of age or 70 years of age or more on April 1 of the current
28 license year or that person has a commercial fishing salmon stamp affixed to the
29 person's commercial fishing license.

30 (c) Except as provided in this subdivision, the department shall issue a
31 commercial fishing salmon stamp, upon application and payment of the fee of
32 eighty-five dollars (\$85). For any commercial salmon season preceded by a
33 commercial salmon season in which the commercial troll salmon landings in this
34 state equal or exceed 3,000,000 pounds dressed weight, as determined by the
35 department, the fee shall be increased by twelve dollars and fifty cents (\$12.50)
36 for every 250,000 pounds over 3,000,000 pounds of dressed weight landings,
37 except that the total fees as adjusted shall not exceed two hundred sixty dollars
38 (\$260).

39 (d) A commercial fishing salmon stamp is valid during the commercial salmon
40 season of the year in which it was issued.

1 (e) Upon application and payment of an additional fee equal to that prescribed in
2 subdivision (c), the department may issue an additional commercial fishing
3 salmon stamp for a crewmember to the owner or operator of a vessel who holds a
4 commercial fishing salmon stamp.

5 (f) Notwithstanding subdivision (a), one crewmember of a vessel for which a
6 commercial fishing salmon stamp is issued pursuant to subdivision (e) may be
7 aboard that vessel and take salmon for a commercial purpose as a crewmember on
8 that vessel without obtaining a commercial fishing salmon stamp, under the
9 following conditions:

10 (1) The crewmember is designated by name and commercial fishing license
11 number on a form furnished by the department before salmon are taken on the
12 vessel when that crewmember is aboard.

13 (2) The crewmember has a valid commercial fishing license issued under
14 Section 14500.

15 (3) The commercial fishing salmon stamp for the crewmember is affixed to the
16 form prescribed in paragraph (1) on which the vessel registration number of the
17 vessel is entered, and on which the crewmember who is exempted by this
18 subdivision is designated by the last entered name and commercial fishing license
19 number.

20 (g) Persons who are exempt from the license requirements, or who are not
21 required to be licensed, pursuant to Section 14500, are exempt from the
22 requirements of this section.

23 **Comment.** Section 41355 continues former Fish and Game Code Section 7860 without
24 substantive change.

25 **§ 41360. Use of fees from commercial fishing salmon stamps**

26 41360. (a) After deducting the administrative costs for issuing commercial
27 fishing salmon stamps, the department shall deposit the fees received pursuant to
28 Section 41355 in the Commercial Salmon Stamp Dedicated Subaccount, which is
29 hereby established in the Fish and Game Preservation Fund. The money in the
30 subaccount shall be available to the department, upon appropriation by the
31 Legislature, for new or expanded salmon restoration and enhancement programs in
32 the state that will serve to increase ocean salmon landings. No money in this
33 subaccount shall be used in lieu of other funds appropriated for salmon restoration
34 and enhancement programs authorized by law on or before January 1, 1988.

35 (b) Thirty dollars (\$30) of the fees collected for each commercial fishing salmon
36 stamp issued shall be allocated by the department to be used for raising chinook
37 salmon to a yearling size, at which size they shall be released into state waters.
38 The amount of salmon stamp revenues expended for this purpose in any fiscal year
39 shall not exceed the amount expended by the department for the same purpose
40 during the same period from other funds. The calculation of the amount expended
41 by the department for this purpose shall not include expenditures made by the
42 department for which reimbursements are received from state or federal agencies,

1 public utilities, or private entities for raising chinook salmon to yearling size as
2 part of a fish mitigation program instituted to compensate for the adverse effect of
3 a dam on natural salmon production. If the department expends no funds other
4 than moneys collected from the sale of commercial fishing salmon stamps or
5 moneys for which reimbursements are received as part of an anadromous fish
6 mitigation program for the raising of chinook salmon to yearling size within the
7 period of a fiscal year, the fees prescribed in Section 41355 shall be reduced by an
8 amount equivalent to that portion of the commercial fishing salmon stamp
9 program, as specified in this subdivision.

10 (c) If the salmon stamps issued pursuant to Section 41355 raise more money for
11 the purpose of subdivision (b) than is necessary to match the funds expended by
12 the department during any fiscal year from other funds, then the excess salmon
13 stamp revenue allocated pursuant to subdivision (b) shall be carried over into the
14 following fiscal year.

15 (d) The department shall post on its Internet Web site an accounting of the
16 projects undertaken with funds from the Commercial Salmon Stamp Dedicated
17 Subaccount, and the costs incurred to administer the program. At a minimum, the
18 Internet Web site shall list the project title, the applicant, a brief description of the
19 project, the amount approved, and the status of the project.

20 (e) Any moneys that were in the Commercial Salmon Stamp Account as of
21 March 14, 2013, and that were retained in the Fish and Game Preservation Fund,
22 shall be transferred to the Commercial Salmon Stamp Dedicated Subaccount.

23 (f) Not more than 15 percent of the funds expended pursuant to this section may
24 be used to pay the costs incurred in the administration of the program.

25 **Comment.** Subdivisions (a) through (e) of Section 41360 continue former Fish and Game
26 Code Section 7861 without substantive change.

27 Subdivision (f) continues former Fish and Game Code Section 7861.1 without substantive
28 change.

29 **§ 41365. Source of other funds for program**

30 41365. (a) Notwithstanding any other law, the department may receive on behalf
31 of the Commercial Salmon Trollers Enhancement and Restoration Program, for
32 deposit in the Commercial Salmon Stamp Dedicated Subaccount in the Fish and
33 Game Preservation Fund established pursuant to Section 41360, funds from
34 sources in addition to funds derived from the sale of commercial fishing salmon
35 stamps, including, but not limited to, grants from the federal government, grants
36 from private foundations, money disbursed from court settlements, and donations
37 and bequeaths from individuals.

38 (b) The additional nonfederal funds shall not be deposited in the Commercial
39 Salmon Stamp Dedicated Subaccount unless the person or entity providing the
40 funds specifically designates in writing, prior to or at the time of transmittal of the
41 funds to the department, that the funds are intended solely for deposit to that
42 subaccount.

(c) Funds received by the department that are not designated at the time of receipt as being intended solely for deposit to the Commercial Salmon Stamp Dedicated Subaccount shall be deposited in the Fish and Game Preservation Fund.

Comment. Section 41365 continues former Fish and Game Code Section 7861.2 without substantive change.

§ 41370. Allocation of funds

41370. In consultation with the Commercial Salmon Trollers Advisory Committee, the department may allocate funds from the Commercial Salmon Stamp Dedicated Subaccount in the Fish and Game Preservation Fund for the following purposes:

(a) For restoration projects to assist in the recovery of salmon stocks listed as threatened or endangered under Part 1 (commencing with Section 62000) of Division 17, or the federal Endangered Species Act (16 U.S.C. Sec. 1531 et seq.).

(b) As matching funds for federal salmon restoration moneys.

Comment. Section 41370 continues former Fish and Game Code Section 7861.5 without substantive change.

§ 41375. Funding priority

41375. A priority for funding shall be given to programs and projects restoring, enhancing, and protecting salmon streams with funds appropriated pursuant to subparagraph (A) of paragraph (1) of subdivision (e) of Section 5907 of the Public Resources Code, which employ fishermen who are unemployed or underemployed as a result of commercial fishing restrictions within and immediately adjacent to the Klamath Management Zone imposed by federal laws or regulations.

Comment. Section 41375 continues former Fish and Game Code Section 7861.4 without substantive change.

§ 41380. Advisory Committee

41380. (a) A Commercial Salmon Trollers Advisory Committee shall be established consisting of six members selected by the director, as follows:

(1) One member shall be chosen from the personnel of the department.

(2) Four persons shall be selected, with alternates, from a list submitted by a fishermen's organization deemed to represent the commercial salmon fishermen of California.

(3) One member shall be selected, with an alternate, from lists submitted by individual commercial passenger fishing boat operators or by organizations deemed to represent the commercial passenger fishing boat operators of California.

(b) The term of appointment to the committee shall be for two years.

(c) Necessary and proper expenses, if any, and per diem shall be paid committee members from the special account created pursuant to subdivision (a) of Section

1 41360. The rate of per diem shall be the same as the rate established pursuant to
2 Section 8902 of the Government Code.

3 (d) The committee shall recommend programs and a budget from the special
4 account to the department.

5 **Comment.** Section 41380 continues former Fish and Game Code Section 7862 without
6 substantive change.

7 **§ 41385. Creation of artwork or related material for sale**

8 41385. (a) The Commercial Salmon Trollers Advisory Committee may also
9 recommend to the director that a nonprofit organization or the California Salmon
10 Council be authorized to create or contract to create salmon or salmon fishing
11 artwork and other materials based on that artwork, including, but not limited to, a
12 stamp, and offer those items for sale to the public during 2003 and thereafter, for
13 the purpose of augmenting funding for the Commercial Salmon Trollers
14 Enhancement and Restoration Program established under this chapter.

15 (b) The committee may not recommend a nonprofit organization or the
16 California Salmon Council as authorized under subdivision (a), unless all of the
17 following conditions are met:

18 (1) The proposed creation and sale of the artwork is pursuant to a written
19 business plan presented to the committee.

20 (2) The committee determines that a reasonable share of the sales of any stamp
21 will be remitted to the department for deposit into the Commercial Salmon Stamp
22 Dedicated Subaccount established in the Fish and Game Preservation Fund under
23 Section 41360.

24 (3) The committee determines that the creation and sale of the artwork will act
25 to increase public awareness and support for the salmon stamp program and the
26 restoration of salmon and their habitats in the state.

27 (4) Any other conditions deemed necessary by the committee for determining
28 whether to recommend approval to the director have been met.

29 (c) The director, upon receiving the recommendation of the committee, and
30 upon finding that there will be no new costs to the department, may authorize the
31 recommended entity to create or contract to create salmon or salmon fishing
32 artwork and other materials based on that artwork, including, but not limited to, a
33 stamp, and offer those items for sale to the public, for the purpose described in
34 subdivision (a).

35 (d) No person or entity, including, but not limited to, any nonprofit organization,
36 may use the name of the Commercial Salmon Stamp, the Commercial Salmon
37 Trollers Advisory Committee, or the Commercial Salmon Trollers Enhancement
38 and Restoration Program for the sale of artwork and other materials, unless that
39 person or entity has been approved by the director under this section for that
40 purpose. The approval of the director under this section shall be for one year, after
41 which the approval may be renewed for an additional year, upon recommendation
42 of the committee.

(e) No artwork sold in the form of a stamp under this section conveys to the purchaser any entitlement to engage in the commercial salmon fishery.

(f) Proceeds from the sales of artwork and other materials sold under this section, after deduction of all reasonable costs borne by the nonprofit organization or California Salmon Council for creation of the artwork and conducting the sales, shall be deposited in the Commercial Salmon Stamp Dedicated Subaccount.

Comment. Section 41385 continues former Fish and Game Code Section 7862.5 without substantive change.

§ 41390. Inoperative date of chapter

41390. This chapter shall remain in effect only until January 1, 2029, and as of that date is repealed, unless a later enacted statute that is enacted before January 1, 2029, deletes or extends that date.

Comment. Section 41390 continues former Fish and Game Code Section 7863 without substantive change.

 **Note.** Proposed Section 41390 would continue Section 7863, which was amended by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

CHAPTER 3. PERMISSIONS AND PROHIBITIONS

§ 41450. Authorized take

41450. (a) Except as modified by the director pursuant to Section 22405, salmon may be taken under authority of a commercial fishing license and a commercial fishing salmon stamp only in Districts 2570, 2575, 2590, 2595, 2610, 2615, 2620, and 2625.

(b) All species of salmon, except silver salmon, may be taken only between April 15 and September 30. Silver salmon may be taken only between May 15 and September 30.

(c) No king salmon may be possessed that is less than 26 inches in length and no silver salmon may be possessed that is less than 22 inches. The length of salmon is to be measured from the tip of the snout to the extreme tip of the tail without resorting to any force other than swinging or fanning the tail.

(d) Salmon may be taken for commercial purposes only by hook and line, and there is no bag limit.

Comment. Section 41450 continues former Fish and Game Code Section 8210.2 without substantive change.

See also Section 5710 (enforcement).

§ 41455. Possession, sale, offer for sale, or purchase

41455. Salmon may be possessed, sold, offered for sale, or purchased only under one of the following conditions:

(a) If taken legally in another state that permits the sale of salmon, and lawfully imported consistent with Section 41050.

(b) If taken in compliance with this chapter.

Comment. Section 41455 combines and restates former Fish and Game Code Section 8217, and the part of Section 8371(c)-(d) applicable to salmon, without substantive change.

See also Section 5710 (enforcement).

Note. Proposed Section 41455 is intended to combine and restate existing Fish and Game Code Section 8217, and the part of Section 8371(c)-(d) applicable to salmon, to clarify the meaning of those provisions without changing their substantive effect. The existing provisions read as follows:

8217. Salmon may be sold subject to the exceptions and restrictions contained in this article.

8371. Striped bass and salmon may be sold or offered for sale only under the following conditions:

(a) If the striped bass is taken or possessed by, and is the cultured progeny of, an aquaculturist who is registered under Section 15101, that striped bass may be sold or purchased subject to regulations of the commission.

(b) If the striped bass is taken legally in another state that permits the sale of that fish and if the fish is lawfully imported under Section 2363, the striped bass may be possessed, sold, or purchased.

(c) If the salmon is taken legally in another state that permits the sale of salmon, and is lawfully imported consistent with Section 2361, the salmon may be possessed, sold, or purchased.

(d) If the salmon is taken in accordance with Article 4 (commencing with Section 8210.2), the salmon may be possessed, sold, or purchased.

The Commission invites comment on whether the proposed combining and restatement would cause any substantive change in the meaning of the provisions.

§ 41460. Sale during period when take unlawful

41460. During the period when salmon may not be taken for commercial purposes in a district, salmon may be sold in that district only under the regulations of the commission.

Comment. Section 41460 continues former Fish and Game Code Section 8213 without substantive change.

See also Section 5710 (enforcement).

§ 41465. Take at mouth of Humboldt Bay

41465. It is unlawful to take salmon for commercial purposes at the mouth of Humboldt Bay in those portions of Districts 2570 and 2575 within three nautical miles north and south of a line drawn due west for three nautical miles from the center of the mouth of that bay.

Comment. Section 41465 continues former Fish and Game Code Section 8214 without substantive change.

See also Section 5710 (enforcement).

§ 41470. Sale, possession, or transport of silver salmon in specified districts

41470. Silver salmon may not be sold or possessed in, or transported through, District 2570, 2575, 2590, 2595, 2610, 2615, or 2620, during the time when the taking of silver salmon for commercial purposes is unlawful in those districts.

1 **Comment.** Section 41470 continues former Fish and Game Code Section 8215 without
2 substantive change.

3 See also Section 5710 (enforcement).

4 **§ 41475. Undersized salmon**

5 41475. It is unlawful to gaff, club, otherwise injure, or possess any king or silver
6 salmon under the legal size.

7 **Comment.** Section 41475 continues former Fish and Game Code Section 8218 without
8 substantive change.

9 See also Section 5710 (enforcement).

10 **§ 41480. Take for commercial purpose in District 2570 or 2575**

11 41480. Salmon may not be taken for commercial purposes in District 2570 at the
12 mouths of the Smith and Klamath Rivers within three nautical miles north and
13 south of a line drawn due west for three nautical miles from the center of the
14 mouth of each of those streams, or during the months of August and September in
15 District 2575 at the mouth of the Eel River within two nautical miles north and
16 south of a line drawn due west for two nautical miles from the center of the mouth
17 of that stream.

18 **Comment.** Section 41480 continues former Fish and Game Code Section 8219 without
19 substantive change.

20 See also Section 5710 (enforcement).

21 **§ 41485. Take with purse or round haul net**

22 41485. Salmon may not be taken with a purse or round haul net.

23 **Comment.** Section 41485 continues the part of former Fish and Game Code Section 8756
24 applicable to salmon without substantive change.

25 See also Section 5710 (enforcement).

26 **§ 41490. Use of trawl net**

27 41490. (a) Except as provided in subdivision (b), it is unlawful for any person to
28 possess salmon on board, or to land salmon from, a vessel on which exists any
29 type of trawl net.

30 (b) Salmon taken incidentally with other species with a trawl net may be
31 possessed and landed if authorized to be taken incidentally pursuant to Section
32 663.10 of Part 663 of Title 50 of the Code of Federal Regulations, pursuant to a
33 permit issued by the department under Chapter 5 (commencing with Section
34 12050) of Title 2 of Part 4 of Division 6, or pursuant to both.

35 **Comment.** Section 41490 continues former Fish and Game Code Section 8834.1 without
36 substantive change.

37 See also Section 5710 (enforcement).

38  **Note.** Proposed Section 41490 would continue Section 8834.1, which was amended by 2018
39 Cal. Stat. ch. 477. Although that bill will not take effect until 2019, it is included here in
40 anticipation of its effect.

1 **§ 41495. Required return to water if caught in net**

2 41495. (a) Any salmon that is taken in any type of net shall, regardless of its
3 condition, be immediately freed and removed from the net by the fisherman, and
4 immediately returned to the water without further harm.

5 (b) A commercial fisherman shall not have any salmon, whether dead or alive,
6 in his or her possession, at any time when conducting netting operations or when
7 going to or from those operations, except when releasing a salmon from a net.

8 (c) The return of salmon to the water pursuant to this section is not deterioration,
9 waste, or spoilage of fish for purposes of Section 14310.

10 **Comment.** Section 41495 continues the part of former Fish and Game Code Section 8370
11 applicable to salmon without substantive change.

12 CHAPTER 4. HIGH SEAS INTERCEPTION OF SALMON

13 **§ 41600. Definitions**

14 41600. The definitions in this section govern the construction of this chapter:

15 (a) “Environmental purpose” means the intent to prevent or minimize adverse
16 ecological effects to water quality.

17 (b) “High seas interception” means the unauthorized taking of salmon for
18 commercial purposes outside the United States 200-mile fishery conservation
19 zone.

20 (c) “Humanitarian purpose” means the intent to provide medical services for a
21 sick or injured person, or to prevent the loss of human life.

22 (d) “Process” means affecting the condition or location of salmon, including
23 preparation, packaging, storage, refrigeration, or transportation.

24 (e) “Unauthorized” means contrary to a statute or regulation of the United States
25 or this state or to a treaty or international fishery agreement, or in violation of a
26 foreign law.

27 (f) “Written instrument” means hand written or printed matter, including
28 vessels’ logs and papers, bills of lading and sale, documents relating to processing,
29 shipping, and customs, and information stamped on or affixed to cans, crates,
30 containers, freight, or other means of storage or packaging.

31 **Comment.** Section 41600 continues former Fish and Game Code Section 8120 without
32 substantive change.

33 **§ 41605. Prohibited acts generally**

34 41605. It is unlawful for any person to do any of the following:

35 (a) Buy, sell, trade, process, or possess salmon, or attempt to buy, sell, trade,
36 process, or possess salmon, with the knowledge that the salmon has been, or will
37 be, obtained by high seas interception.

38 (b) Knowingly provide financing, premises, equipment, supplies, services,
39 power, or fuel used to buy, sell, trade, process, or possess salmon that has been, or
40 will be, obtained by high seas interception.

1 (c) Act as a broker or middleman, or otherwise act on behalf of another person,
2 to arrange for or negotiate, or attempt to arrange for or negotiate, the purchase,
3 sale, trade, processing, or possession of salmon, with the knowledge that the
4 salmon has been, or will be, obtained by high seas interception.

5 (d) Create, circulate, or possess any written instrument related to salmon with
6 the knowledge that the written instrument conveys misleading or untrue
7 information about the ownership, possession, processing, origin, destination, route
8 of shipping, type, or condition of salmon, or the time, place, and manner of the
9 taking of the salmon.

10 **Comment.** Subdivisions (a) through (c) of Section 41605 continue former Fish and Game
11 Code Section 8121 without substantive change.

12 Subdivision (d) continues former Fish and Game Code Section 8122 without substantive
13 change.

14 **§ 41610. Prohibited acts on vessel known to contain unlawfully obtained salmon**

15 41610. (a) It is unlawful for a person who knows that a vessel contains salmon
16 obtained by high seas interception, or that the owner or operator of the vessel
17 intends to engage in the high seas interception of salmon, to do any of the
18 following:

19 (1) Move persons, cargo, or other property to or from the vessel.

20 (2) Service or repair the vessel or its equipment.

21 (3) Provide the vessel with power, supplies, equipment, or fuel.

22 (4) Provide the vessel with information, other than weather reports, capable of
23 aiding the high seas interception of salmon or frustrating or avoiding detection,
24 including communicating the movements, intentions, or activities of state or
25 federal law enforcement officials or other fishing vessels.

26 (5) Permit the vessel to dock or anchor, or to remain docked or anchored, if that
27 person is responsible for the operation of the facility, harbor, or anchorage.

28 (b) This section does not prohibit any person from performing any act or acts set
29 forth in subdivision (a) if that person reasonably believes that the act or acts were
30 necessary for humanitarian or environmental purposes or to prevent a significant
31 loss of property, if that person provides immediate notice, by the quickest
32 available means, to the United States Coast Guard, the department, or any law
33 enforcement agency, as to the type of assistance provided and the circumstances
34 involved.

35 **Comment.** Section 41610 continues former Fish and Game Code Section 8123 without
36 substantive change.

CHAPTER 5. COMMERCIAL SALMON VESSEL PERMITS

Article 1. General Provisions

§ 41650. Legislative declaration

41650. (a) The Legislature finds and declares that commercial salmon fishing is in the public interest and that the preservation of commercial salmon fishing directly affects the health and welfare of the public. The Legislature further finds and declares that, due to past declines in salmon stocks, the increase in the quality and value of salmon on the market, the number and types of vessels being used, the commensurate salmon fishing potential of the commercial salmon fishing fleet, and the demand for entry into the commercial salmon fishery, it is necessary and proper to limit the persons who are eligible to take salmon for commercial purposes and to regulate the amount of salmon that may be taken by restricting the number and salmon fishing potential of the vessels in the commercial salmon fishing fleet in order to preserve and rebuild the salmon resource, to protect commercial salmon fishing, and thereby to protect the health and welfare of the public.

(b) The Legislature further finds and declares the following:

(1) The salmon resource declined in 1983 and 1984 as a result of the most severe warm water El Nino current of this century, which caused major disruptions and hardship in the commercial salmon fishery. Habitat destruction in the rivers of California has also depleted the salmon stocks which are bred and reared in those rivers.

(2) The Pacific Fishery Management Council has imposed season closures on the taking of salmon since 1982, including a total prohibition on commercial taking of salmon in 1985 along portions of the northern California coast to protect the king salmon stock from the Klamath River. In 1987, a five-year agreement was signed which allocates the king salmon stock from the Klamath River between ocean commercial and recreational users and in-river Indian and recreational users. This agreement may result in further closures.

(3) Nearly 30 percent of the commercial salmon fishing vessels which were permitted to take salmon for commercial purposes in California did not record landings of salmon in the 1986 and 1987 commercial salmon seasons.

(4) There are more than enough commercial salmon fishing vessels for which commercial salmon fishing permits have been issued to harvest the less than 10 million pounds of salmon that are currently available annually. With the present fleet makeup between large vessels and small vessels and between full-time and part-time fishermen, it is estimated that the present resource capacity may accommodate a fleet of not more than 2,500 permitted vessels. Therefore, no new permits should be issued until the time that the fleet size falls below 2,500 permitted vessels. Adequate provision for entry of new persons or vessels to the

1 commercial salmon fishery is afforded by transfers of vessels for which permits
2 have been issued and renewed and by transfers of those existing permits to vessels
3 of the same or less salmon fishing potential.

4 **Comment.** Section 41650 continues former Fish and Game Code Section 8230 without
5 substantive change.

6 **§ 41655. Severability of provisions**

7 41655. If any provision of this chapter, or the application of those provisions, to
8 any person or circumstance, is held invalid, that invalidity shall not affect other
9 provisions or applications of the chapter that can be given effect without the
10 invalid provision or application, and to this end the provisions of those chapters
11 are severable.

12 **Comment.** Section 41655 continues former Fish and Game Code Section 8248 without
13 substantive change.

14 **§ 41660. Regulation and administrative procedures**

15 41660. (a) The commission and the department may make and enforce
16 regulations that may be necessary or convenient for carrying out any power,
17 authority, or jurisdiction delegated to it under this chapter.

18 (b) The department, in cooperation with the commercial salmon fishing review
19 board, shall establish and implement administrative procedures for the
20 administration of this chapter.

21 **Comment.** Subdivision (a) of Section 41660 continues former Fish and Game Code Section
22 8246.8 without substantive change.

23 Subdivision (b) continues former Fish and Game Code Section 8239.2 without substantive
24 change.

25 **§ 41665. Commercial take or possession on vessel**

26 41665. It is unlawful to take or possess salmon for a commercial purpose on a
27 vessel unless all of the following conditions are met:

28 (a) The vessel is registered with the department pursuant to Section 14755, and
29 the owner of the vessel has a valid commercial salmon vessel permit for the use of
30 that vessel.

31 (b) The permit for the use of the vessel is affixed to the vessel adjacent to the
32 department registration number unless otherwise authorized by the department.

33 (c) The permit affixed to the vessel is visible at all times.

34 **Comment.** Section 41665 continues former Fish and Game Code Section 8232 without
35 substantive change.

36 **§ 41670. Take for sport purposes**

37 41670. (a) Except as provided in this section, it is unlawful to take salmon for
38 sport purposes on a permitted vessel.

39 (b) Subdivision (a) does not prohibit taking salmon for sport purposes under a
40 sportfishing or a sport ocean fishing license, which is issued pursuant to Title 2

1 (commencing with Section 12850) of Part 5 of Division 6, on a vessel licensed as
2 a commercial passenger fishing boat pursuant to Section 21905 and engaged in
3 that business on any day when salmon are not being taken for commercial
4 purposes on that vessel.

5 (c) Subdivision (a) does not prohibit taking salmon for sport purposes under a
6 sportfishing or a sport ocean fishing license, which is issued pursuant to Title 2
7 (commencing with Section 12850) of Part 5 of Division 6, on a permitted vessel in
8 the Klamath Management Zone, as designated by the federal Pacific Fisheries
9 Management Council, when the commercial salmon season is closed and more
10 than 24 hours after the time when salmon taken during the commercial salmon
11 season are required to be landed.

12 (d) The use of a vessel pursuant to subdivision (c) shall be considered as being
13 engaged or employed exclusively in the taking and possession of fish or other
14 living resource of the sea for commercial purposes for purposes of subdivision (a)
15 of Section 227 of the Revenue and Taxation Code.

16 **Comment.** Section 41670 continues former Fish and Game Code Section 8232.5 without
17 substantive change.

18 **§ 41675. Conditions for issuance of any permit**

19 41675. The department shall not issue a permit under this chapter unless one of
20 the following first occurs:

21 (a) The applicant presents to the department a commercial fishing salmon stamp
22 issued to the owner or an agent of the owner. No commercial fishing salmon
23 stamp shall be presented or accepted by the department to authorize issuance of a
24 permit under this section for more than one vessel.

25 (b) The applicant obtains a commercial fishing salmon stamp and pays the fees
26 for the stamp.

27 (c) On or before April 1 of the current license year, the owner is 70 years of age.

28 **Comment.** Section 41675 continues former Fish and Game Code Section 8234(a) without
29 substantive change.

30 **§ 41680. Inapplicability of limited fishery eligibility provision**

31 41680. Section 22500 does not apply to this chapter.

32 **Comment.** Section 41680 continues former Fish and Game Code Section 8233.9 without
33 substantive change.

34 **§ 41685. Allowable number of permitted vessels**

35 41685. (a) If the department determines that the number of permitted vessels is
36 less than 2,500, the department shall determine, after consultation with the review
37 board, the number and vessel classification for which any new, original permits
38 may be issued to bring the total number of permitted vessels to no more than
39 2,500.

1 (b) New, original permits to be issued shall be authorized by vessel
2 classifications established under subdivision (a) of Section 41745.

3 Comment. Section 41685 continues former Fish and Game Code Section 8243 without
4 substantive change.

5 **§ 41690. New entry permit**

6 41690. A person seeking to gain entry into the commercial salmon fishery may
7 obtain a permit under either of the following conditions:

8 (a) By legally obtaining the ownership of a permitted vessel and notifying the
9 department of the change of ownership of the permitted vessel.

10 (b) By applying to obtain a new, original permit issued by the department
11 pursuant to Sections 41695 and 41700.

12 **Comment.** Section 41690 continues former Fish and Game Code Section 8242 without
13 substantive change.

14 **§ 41695. Application for new entry permit**

15 41695. (a) An applicant may apply for a new, original permit as an individual, a
16 joint venture, or a corporation. The applicant may submit only one application
17 annually. The application shall be made on a form provided by the department.

18 (b) An applicant for a new, original permit under this section shall submit a
19 completed application as directed by the department. The completed application,
20 and the application fees prescribed in subdivision (c), shall be delivered or
21 postmarked on or before February 1 in order to be considered for permits for the
22 subsequent permit year.

23 (c) The applicant shall submit with the application a nonrefundable application
24 fee determined by the department in an amount sufficient to pay the costs of
25 administering the issuance of new, original permits by the department, which shall
26 be not less than thirty-five dollars (\$35).

27 (d) The department, after consultation with the review board, shall determine the
28 fishing potential of the vessel for use of which the new, original permit is to be
29 issued and otherwise determine if the applicant is eligible to be issued a permit
30 under this chapter.

31 **Comment.** Section 41695 continues former Fish and Game Code Section 8244 without
32 substantive change.

33 **§ 41700. Drawing for new entry permits**

34 41700. (a) The department shall conduct a drawing from the applicants
35 determined to be eligible for new, original permits pursuant to Section 41695 on
36 the first Friday in March of each year that new, original permits are authorized to
37 be issued pursuant to Section 41685.

38 (b) The department shall issue a permit to each of those applicants who are
39 drawn upon payment of the fees prescribed in subdivision (c) for the permit and,
40 except as provided in subdivision (e), submittal of sufficient information to

1 establish that the applicant is the owner of a vessel within the vessel classification
2 designated in the application.

3 (c) The amount of the fees for a permit issued under this section are the same as
4 the amount of the fees for renewal of a permit for the subsequent license year
5 beginning on April 1 which are established pursuant to subdivision (b) of Section
6 41725. A successful applicant shall pay the fees for the permit on or before March
7 31. The department shall deposit the fees to the fund pursuant to Section 3600.

8 (d) Except as provided in subdivision (e), a successful applicant shall submit
9 proof of ownership of the vessel to be used under the permit within 90 days of the
10 drawing.

11 (e) A successful applicant may request one extension of no more than 90 days to
12 obtain a vessel as designated in the application. The department, after consultation
13 with the review board, may grant that extension.

14 (f) If any successful applicant does not establish that he or she is the owner of a
15 vessel as designated in the application and affix the new permit on that vessel or
16 on another vessel with the same or less fishing potential, as determined by the
17 department after consultation with the board, within 90 days or by the end of a 90
18 day extension granted by the department, the new permit is null and void.

19 (g) The department or the review board is not liable for any risk of failure by the
20 applicant to obtain a vessel which is designated in an application or to complete
21 the process for determination of the fishing potential of another vessel, or for
22 failure by the applicant to obtain that other vessel, in the time prescribed in this
23 section.

24 **Comment.** Section 41700 continues former Fish and Game Code Section 8245 without
25 substantive change.

26 **§ 41705. Review of new entry provisions**

27 41705. The review board shall review the effectiveness of new entry provisions
28 every three years beginning three years following the first permit drawing and
29 make recommendations to the department for any changes it finds to be needed in
30 the new entry system.

31 **Comment.** Section 41705 continues former Fish and Game Code Section 8245.5 without
32 substantive change.

33 **§ 41710. Issuance of new entry permit**

34 41710. Except as otherwise provided in this chapter, the department shall issue a
35 permit to the owner of a commercial salmon fishing vessel that is registered with
36 the department pursuant to Section 14755 for the new entry of that vessel into the
37 commercial salmon fishery, if that owner is authorized to be issued a permit for
38 the use of that new entry vessel pursuant to subdivision (b) of Section 41700.

39 **Comment.** Section 41710 continues former Fish and Game Code Section 8233.8 without
40 substantive change.

1 **§ 41715. Renewal required prior to expiration**

2 41715. Except as otherwise provided in this chapter, a permit shall be renewed
3 prior to expiration.

4 **Comment.** Section 41715 continues the first sentence of former Fish and Game Code Section
5 8233 without substantive change.

6 **§ 41720. Department to send renewal notice and application**

7 41720. (a) The department shall send a written notice of renewal and a permit
8 renewal application to the owner of each currently permitted vessel at the most
9 recent address of that owner in the records of the department. The notice shall be
10 sent by first-class mail before March 1. The department shall mail a copy of the
11 notice for renewal to all associations and groups known to the department to be
12 representing commercial salmon fishermen. The department shall also provide
13 blank permit renewal applications at appropriate offices of the department.

14 (b) The notice shall include all of the following:

15 (1) Instructions on how to apply for renewal of a permit.

16 (2) Information on the provisions of subdivisions (c) and (e) of Section 41725.

17 (c) Failure to receive the notice under this section does not exempt or excuse the
18 owner from the requirement of annual renewal of the permit on or before the
19 permit expiration date.

20 **Comment.** Section 41720 continues former Fish and Game Code Section 8236 without
21 substantive change.

22 **§ 41725. Renewal of permit**

23 41725. (a) The owner of a permitted vessel, or that owner's agent, may apply for
24 renewal of the permit annually on or before April 30, upon payment of the fees
25 established under subdivision (b), without penalty. Upon receipt of the application
26 and fees, the department shall issue the permit for use of the permitted vessel in
27 the subsequent permit year only to the owner of the permitted vessel.

28 (b) The department shall fix the annual fee for the renewal of the permit in an
29 amount it determines to be necessary to pay the reasonable costs of implementing
30 and administering this chapter.

31 (c) If an owner to whom a permit has been issued, or that owner's agent, applies
32 for renewal of the permit, the application for renewal shall be received or, if
33 mailed, postmarked, on or before April 30. An application received or, if mailed,
34 postmarked, after April 30 shall be assessed a late fee subject to Section 14605.
35 The department shall issue the permit for use of the permitted vessel in the
36 subsequent permit year.

37 (d) The department shall suspend a late fee otherwise due under subdivision (c)
38 and shall issue a permit for use of the permitted vessel in the subsequent permit
39 year if the department is unable to accept applications for renewal of permits by
40 March 1.

(e) Except as provided in subdivision (c), the department shall not renew a permit for which the application for renewal is not received, or, if mailed, is received or postmarked after expiration of the permit.

Comment. Section 41725 continues former Fish and Game Code Section 8235 without substantive change.

§ 41730. Issuance of permit after renewal

41730. Except as otherwise provided in this chapter, the department shall issue a permit, upon application and payment of the renewal fees pursuant to Section 41725, that is valid for the subsequent permit year, to the owner of a permitted vessel that is registered with the department pursuant to Section 14755.

Comment. Section 41730 continues former Fish and Game Code Section 8233.3 without substantive change.

§ 41735. Change of ownership of vessel

41735. (a) Except as otherwise provided in this chapter, the department shall change the designation of the holder of a permit to the new owner of a permitted vessel upon receipt of a notice of change of ownership of the permitted vessel, whether the change of ownership is by contract, by operation of law, or otherwise.

(b) The permit shall not be transferred to any other vessel, except by the issuance of a permit for use of the replacement vessel pursuant to subdivision (c) subdivision (b) of Section 41660, and Sections 41740, 41750, 41755, and 41765.

(c) The owner of the permitted vessel may seek to retire the permitted vessel from the commercial salmon fishery and apply for transfer of the permit, to be issued pursuant to subdivision (j) of Section 41740, for use of a replacement vessel.

(d) A permit changed pursuant to this section is valid for the permit year during which it is issued.

(e) Upon change of the designation of the holder of the permit, all rights, privileges, and obligations of a permit holder, including rights of renewal, are transferred to the new owner of the permitted vessel.

Comment. Section 41735 combines and restates former Fish and Game Code Sections 8233.5 and 8237 without substantive change.

Note. Proposed Section 41735 is intended to combine and restate existing Fish and Game Code Sections 8233.5 and 8237 to improve their clarity, without changing their substantive effect. The existing provisions read as follows:

8233.5. Except as otherwise provided in this article, the department shall change the designation of the holder of a permit, and with it shall go all rights, privileges, and obligations of a permit holder, including rights of renewal, upon receipt of a notice of change of ownership to a new owner of a permitted vessel upon change of ownership in the permitted vessel. A permit changed pursuant to this section is valid for the permit year during which it is issued.

8237. (a) The department shall change the designation of the holder of a permit to the new owner of a permitted vessel upon change of ownership of the permitted vessel, whether the change of ownership is by contract, by operation of law, or otherwise.

(b) The permit shall not be transferred to any other vessel, except by the issuance of a permit for use of the replacement vessel pursuant to subdivision (c) and Sections 8239 to 8241, inclusive.

(c) The owner of the permitted vessel may seek to retire the permitted vessel from the commercial salmon fishery and apply for transfer of the permit, to be issued pursuant to Section 8241, for use of a replacement vessel.

The Commission invites comment on whether the proposed combining and restatement would cause any substantive change in the meaning of the provisions.

§ 41740. Replacement vessel permit

41740. A transfer may be approved and a permit issued for use of a replacement vessel pursuant to subdivision (j) of Section 41740 under all of the following conditions:

(a) The vessel owner submits a written request for the transfer to the department on a form provided by the department and pays a nonrefundable transfer fee of two hundred dollars (\$200).

(b) The permit for the permitted vessel is current, and the owner of the permitted vessel makes assurances in the application that any renewal of the permit which becomes due during the application processing period will be made.

(c) The owner of the permitted vessel submits evidence with the application sufficient to establish that he or she is the owner of the permitted vessel at the time of the application for the transfer.

(d) The vessel owner submits evidence with the application sufficient, in the judgment of the review board and the department, to establish that the replacement vessel has the same fishing potential as, or less fishing potential than, the permitted vessel.

(e) Under penalty of perjury, the vessel owner signs the application for transfer and certifies that the included information is true to the best of his or her information and belief.

(f) The same transfer has not been requested within the previous 12 months or the same transfer has not previously been denied and that denial is final, unless the application or supporting information are different than that contained in the previous application, as determined by the department and after consultation with the review board.

(g) The permittee has 50 percent or greater ownership interest in the permitted vessel and in the replacement vessel. For purposes of this subdivision and subdivision (h), “permittee” means an individual designated as the owner of the permitted vessel.

(h) Except as provided in subdivisions (a) through (c) of Section 41755, or paragraph (5) of subdivision (a) of Section 41780, the permittee has maintained a 50 percent or greater ownership interest in the permitted vessel for not less than 18 months prior to the date of the transfer and the permit for use of the permitted vessel has been maintained for that vessel and has not been previously transferred less than 18 months prior to the date of the transfer.

(i) The permittee has written authority from the legal owner, if other than the permittee or mortgager, if any, to transfer the vessel permit from the permitted vessel.

(j) The department determines, after consultation with the review board, the following:

(1) The replacement vessel has the same fishing potential as, or less fishing potential than, the permitted vessel. The review board and the department shall consider the type of fishery the vessel was previously used in and the vessel's highest and best use by a prudent operator, and the review board shall make written findings on those facts.

(2) The replacement vessel's fishing potential will not substantially increase fishing capacity over that which resulted from the operation of the permitted vessel.

(3) The applicant owns the replacement vessel.

(4) The conditions in this chapter are satisfied.

Comment. Subdivisions (a) through (i) of Section 41740 continue former Fish and Game Code Section 8239 without substantive change.

Subdivision (j) continues former Fish and Game Code Section 8241 without substantive change.

§ 41745. Fishing potential classification system for replacement vessels

41745. (a) The department, in consultation with the review board, shall establish and adopt, in the manner prescribed in former Fish and Game Code Section 8238.3, a vessel classification system to determine the fishing potential of replacement vessels for applications for transferred permits to be issued pursuant to subdivision (j) of Section 41740, including consideration of how the vessel from which the permit is sought to be transferred was used, the vessel's highest and best use by a prudent operator, and the fishing potential of prospective vessels for applications for new, original permits.

(b) The vessel classification system shall be used by the department in consultation with the review board for issuance of new original vessel permits pursuant to Section 41685 and as a guideline for the review board in making its recommendations to the department on vessel permit transfers.

Comment. Subdivision (a) of Section 41745 continues former Fish and Game Code Section 8238 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 8238.1 without substantive change.

 **Note.** Existing Fish and Game Code Section 8238 requires the Department of Fish and Wildlife, on or before January 1, 1991, to establish and adopt a specified vessel classification system "in the manner prescribed in Section 8238.3." However, Section 8238.3 was repealed by its own terms in 1988, operative January 1, 1992. See 1988 Cal. Stat. ch. 1164

The Commission invites comment on how this part of Section 8238 should be continued in proposed Section 41745.

1 **§ 41750. Request for review of vessel before submission of transfer application**

2 41750. Notwithstanding subdivisions (a) through (i) of Section 41740,
3 subdivisions (a) through (c) of Section 41755, or subdivision (b) of Section 41660,
4 any person may request the review board to determine the fishing potential of any
5 permitted vessel or any replacement vessel before a transfer application for a
6 permit for use of a replacement vessel is submitted to the department. The person
7 making a request under this subdivision is not required to be the owner of either
8 vessel. A determination under this subdivision is not binding on the review board
9 or the department and is only advisory.

10 **Comment.** Section 41750 continues former Fish and Game Code Section 8239.9 without
11 substantive change.

12 **§ 41755. Transfer application based on lost, stolen, or destroyed vessel**

13 41755. (a) Unless otherwise prohibited, the department shall accept a transfer
14 application within one year after the date that a permitted vessel was lost, stolen,
15 or destroyed, notwithstanding any inability to physically examine the permitted
16 vessel to determine its salmon fishing potential. Only the permittee at the time of
17 the loss, theft, or destruction of the vessel may apply for the transfer of the vessel
18 permit. Proof that a vessel is lost, stolen, or destroyed shall be in the form of a
19 copy of the report filed with the United States Coast Guard or any other law
20 enforcement agency or fire department investigating the loss.

21 (b) The owner, or the owner's agent, may request an extension of the time to
22 complete a transfer under subdivision (a) if the application for extension is
23 submitted before the end of the time to submit an application under subdivision
24 (a), or before the end of any previous extensions granted under this subdivision,
25 whichever date is later.

26 (c) The department, after consultation with the review board and for good cause
27 shown, including, but not limited to, inability to find a replacement vessel or
28 pending litigation, may grant an extension of the time to complete a transfer under
29 subdivision (a) for a period of six months. The department may grant further
30 extensions under this subdivision, not to exceed a total time period of five years
31 after the date the permitted vessel was lost, stolen, or destroyed if the permit fees
32 are paid annually as required in paragraph (2) of subdivision (b) of former Fish
33 and Game Code Section 8239, as amended by Chapter 1703 of the Statutes of
34 1990, and paragraph (3) of subdivision (d) of Section 41755.

35 (d) Notwithstanding any other provision of this section, the department shall not
36 issue a permit for use of a replacement vessel if any of the following
37 circumstances exist:

38 (1) The permitted vessel was reported as lost, stolen, or destroyed by fraudulent
39 means, or for fraudulent purposes.

40 (2) The permit application contains or is accompanied with fraudulent or
41 willfully misleading information.

(3) The permit for the permitted vessel expires and is not renewed. Except as provided in Section 41725, an owner of a permitted vessel shall renew the permit before the expiration date even if that owner has a transfer application pending.

(e) The department may refuse to issue a permit for use of a replacement vessel, or issue a permit to a new owner of a permitted vessel, on any grounds for which a permit may be suspended or revoked.

Comment. Subdivisions (a) through (c) of Section 41755 continue former Fish and Game Code Section 8239.1 without substantive change.

Subdivisions (d) and (e) continue former Fish and Game Code Section 8240 without substantive change.

 **Note.** Existing Fish and Game Code Section 8239.1(b)(2) (which would be continued by proposed Section 41755(c)) refers to permit fees being paid annually “as required in paragraph (2) of subdivision (b) of Section 8239.” However, that paragraph was in a version of Section 8239 that was repealed by its own terms, operative January 1, 1992, in 1990. See 1990 Cal. Stat. ch. 1703.

The Commission invites comment on how this part of Section 8239.1 should be continued in proposed Section 41755.

§ 41760. Issuance of replacement vessel permit

41760. Except as otherwise provided in this chapter, the department shall issue a permit, upon payment of the transfer fees pursuant to subdivision (a) of Section 41740 and surrender to the department of the permit for the use of the permitted vessel, to the owner of a replacement vessel that is registered with the department pursuant to Section 14755, if the transfer has been approved pursuant to subdivision (j) of Section 41740.

Comment. Section 41760 continues former Fish and Game Code Section 8233.4 without substantive change.

§ 41765. Term of permit for replacement vehicle

41765. A permit issued for the use of a replacement vessel under subdivision (j) of Section 41740 is valid for the balance of the permit year for which the permit for the use of the permitted vessel was originally issued or last renewed, and the permit issued under this section authorizes the use of the replacement vessel only for that period.

Comment. Section 41765 continues former Fish and Game Code Section 8239.6 without substantive change.

§ 41775. Appeal of denial or permit transfer

41775. A person who has been denied a permit transfer may appeal the denial to the commission by submitting the appeal in writing to the commission within 60 days of the decision.

Comment. Section 41775 continues former Fish and Game Code Section 8246.6, as it pertained to transfer, without substantive change.

1 **§ 41780. Reversal of denial of permit renewal or transfer**

2 41780. (a) The commission shall order a permit renewed or order the approval
3 of a permit transfer only if it finds one of the following grounds:

4 (1) The permittee failed to submit an application and pay the fees for renewal on
5 or before April 30 pursuant to Section 41725 and the failure to renew a permit
6 until after the expiration date was due to death, physical illness, mental incapacity,
7 or being called to active military duty, and the person was not reasonably able to
8 have an agent renew the permit.

9 (2) A lienholder of a permitted vessel, if the vessel is the property of the
10 lienholder as a result of foreclosure, surrender, or litigation, can show loss due to
11 the nonrenewal of a permit by the permittee, and the nonrenewal occurred without
12 the knowledge of the lienholder.

13 (3) The denial of the permit transfer was arbitrary or capricious.

14 (4) The denial of the permit transfer was pursuant to subdivision (g) or (h) of
15 Section 41740 and the applicant can show that the 18-month requirement cannot
16 be met due to death, physical illness, mental incapacity, or being called to active
17 military duty.

18 (b) Each appeal shall be heard and considered separately on its own merits.

19 **Comment.** Section 41780 continues former Fish and Game Code Section 8246.7, as it
20 pertained to renewal or transfer, without substantive change.

21 **§ 41795. Display of permit expiration date**

22 41795. Each permit issued by the department shall display the expiration date on
23 the face of the permit.

24 **Comment.** Section 41795 continues the second sentence of former Fish and Game Code
25 Section 8233 without substantive change.

26 **§ 41800. Commercial fishing salmon stamp**

27 41800. The first commercial fishing salmon stamp issued to an owner, or to that
28 owner's agent, shall be affixed to the commercial fishing license of that owner or
29 agent. Any additional commercial fishing salmon stamps issued to the owner or
30 the owner's agent pursuant to subdivision (a) of Section 41675 for purposes of
31 obtaining permits for use of additional commercial salmon fishing vessels shall be
32 affixed to each additional vessel's registration issued pursuant to Section 14755.

33 **Comment.** Section 41800 continues former Fish and Game Code Section 8234(b) without
34 substantive change.

35 Article 2. Commercial Salmon Fishing Review Board

36 **§ 41900. Creation of board**

37 41900. There is in the department a commercial salmon fishing review board,
38 which consists of five voting members appointed by the director.

1 **Comment.** Section 41900 continues the first sentence of former Fish and Game Code Section
2 8247 without substantive change.

3 🔍 **Note.** Existing Section 8247.3, a transitional provision, is deleted as obsolete. **The**
4 **Commission invites public comment on whether that deletion would be problematic.**

5 **§ 41905. Legislative declaration**

6 41905. The Legislature declares that individuals appointed as members of the
7 review board shall be chosen from the commercial salmon fishing industry in
8 order to represent and further the interest of the industry and commercial salmon
9 fishing vessel owners, and this representation serves the general public interest.

10 **Comment.** Section 41905 continues former Fish and Game Code Section 8247.5(a) without
11 substantive change.

12 **§ 41910. Adoption of regulations by director**

13 41910. The director may adopt standards and criteria by regulation that shall be
14 applied by the review board in carrying out its activities under this chapter.

15 **Comment.** Section 41910 continues former Fish and Game Code Section 8247.7 without
16 substantive change.

17 **§ 41915. Composition of board**

18 41915. (a) Three of the voting members of the review board shall be owners of
19 permitted vessels appointed by the director from lists submitted by associations or
20 groups representing commercial salmon fishing vessel owners.

21 (b) Two of the voting members of the review board shall be owners of permitted
22 vessels appointed by the director from lists submitted by individual commercial
23 salmon fishing vessel owners.

24 (c) Any voting member of the review board may appoint an alternate member to
25 represent him or her at any meeting of the review board. The director may, within
26 60 days of the appointment, refuse an alternate member. The alternate shall serve
27 at the pleasure of the member who appointed him or her and shall have all the
28 powers and duties of a member of the commercial salmon fishing review board,
29 except that the alternate shall only participate and vote in meetings in the absence
30 of the member who appointed him or her.

31 **Comment.** Section 41915 continues former Fish and Game Code Section 8247.1 without
32 substantive change.

33 **§ 41920. Exemption of board members**

34 41920. Each member of the review board is exempt from Section 87100 of the
35 Government Code, unless the result of his or her actions taken as board members
36 has a material financial effect on him or her distinguishable from its effect on
37 other members of the commercial salmon fishing industry generally.

38 **Comment.** Section 41920 former Fish and Game Code Section 8247.5(b) without substantive
39 change.

1 **§ 41925. Member terms**

2 41925. The terms of the members of the review board shall be for staggered four
3 year terms.

4 **Comment.** Section 41925 continues the first sentence of former Fish and Game Code Section
5 8247.2 without substantive change.

6 **§ 41930. Removal of board member**

7 41930. The director may remove a member of the review board for cause.

8 **Comment.** Section 41930 continues the third sentence of former Fish and Game Code Section
9 8247 without substantive change.

10 **§ 41935. Member compensation**

11 41935. (a) Necessary and proper expenses shall be paid to review board
12 members.

13 (b) Each member, or any alternate member participating on behalf of a regular
14 member in that member's absence, shall receive one hundred dollars (\$100) per
15 day, for each day of attendance and participation in meetings of the review board.

16 **Comment.** Section 41935 continues the second and third sentences of former Fish and Game
17 Code Section 8247.2 without substantive change.

18 **§ 41940. Meeting attendance by director or designee**

19 41940. The director or a designee of the director shall attend meetings of the
20 review board as a nonvoting member.

21 **Comment.** Section 41940 continues the second sentence of former Fish and Game Code
22 Section 8247 without substantive change.

23 **§ 41945. Function of board**

24 41945. (a) The review board shall function as an advisory body to the
25 department regarding implementation of the provisions of this chapter.

26 (b) The review board shall act by a majority vote of the members present and
27 voting. The review board shall not act unless there is a quorum of the voting
28 members, including alternate members in the absence of their appointing
29 members, and the director or his or her designee if present.

30 **Comment.** Section 41945 continues former Fish and Game Code Section 8247.4 without
31 substantive change.

32 **§ 41950. Duties of review board**

33 41950. The review board shall do all of the following:

34 (a) Consider and make recommendations to the department on requests for
35 permit transfers.

36 (b) Recommend to the department, the number and classification of new vessel
37 permits to be issued annually, if any, pursuant to Section 41685.

38 (c) Consult with and advise the commission as required by Sections 4910, 4916,
39 and 41790.

(d) Consult with the department and advise on the establishment of the vessel classification system pursuant to subdivision (a) of Section 41745.

Comment. Section 41950 continues former Fish and Game Code Section 8247.8 without substantive change.

§ 41955. Obligation of board members

41955. Members and alternate members of the review board shall act in the best interest of the state, the department, and the commercial salmon fishing industry. As members of the review board, no member or alternate member shall take any action, because of his or her position, that results in a direct material effect on any of them, distinguishable from its effect on other members of the commercial salmon fishing industry.

Comment. Section 41955 continues former Fish and Game Code Section 8247.6 without substantive change.

CHAPTER 6. SALMON MANAGEMENT

§ 42050. Department consultation

42050. (a) The department shall consult with the advisory committee and representatives of every user group known to the department on the progress being made in the development of the annual and long-term salmon management plans.

(b) For purposes of this section, “advisory committee” means the Advisory Committee on Salmon and Steelhead Trout, established pursuant to Resolution Chapter 141 of the Statutes of 1983, except that there shall be two additional members appointed by the Joint Committee on Fisheries and Aquaculture after consultation with the Director of Fish and Game and the Fish and Game Commission.

Comment. Subdivision (a) of Section 42050 continues former Fish and Game Code Section 7662 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 7660 without substantive change.

CHAPTER 7. MISCELLANEOUS PROVISIONS

§ 42100. Take from commercial passenger fishing boat

42100. (a) If a commercial passenger fishing boat is used to take salmon or has salmon aboard, in ocean waters north of Point Arguello, there shall be on board that vessel a total number of commercial fishing salmon stamps sufficient to have at least one for the operator and one for each crewmember required by United States Coast Guard regulations, excepting an operator or a crewmember who is exempt from the commercial fishing salmon stamp requirement of subdivision (b) of Section 41355. The commercial fishing salmon stamps shall be affixed to either the commercial fishing licenses of the operator and the crewmembers or, pursuant to subdivision (b), to the commercial passenger fishing license. No person shall

operate, or cause to be operated, a commercial passenger fishing boat in violation of this subdivision. Vessels permitted as commercial salmon fishing vessels pursuant to Section 41675 are exempt from the requirements of this subdivision.

(b) Notwithstanding Section 2930, the department may issue to the owner or operator of a vessel licensed pursuant to this chapter, upon application and payment of the fees prescribed in subdivision (c) of Section 41355, one commercial fishing salmon stamp for the operator and not more than one additional commercial salmon stamp for each crewmember required by the United States Coast Guard regulations. The commercial fishing salmon stamps issued under this subdivision shall be affixed to the vessel's commercial passenger fishing boat license issued pursuant to this chapter.

Comment. Section 42100 continues former Fish and Game Code Section 7925 without substantive change.

Notes. (1) Existing Fish and Game Code Section 7925(a) (which would be continued by proposed Section 42100(a)) requires there to be on board a described vessel commercial fishing salmon stamps sufficient for the operator and each crewmember, excepting an operator or a crewmember who is exempt from the similar requirement stated in "subdivision (b) of Section 7860." However, the reference to "subdivision (b) of Section 7860" is ambiguous, as that subdivision cross-references other subdivisions in Section 7860 that also contain exemptions from the commercial fishing salmon stamp requirement:

(b) Except as provided in subdivision (f) or (g), the operator of a vessel on which salmon are taken for commercial purposes shall not permit a person on board that vessel while salmon are being taken or transported unless that person was less than 18 years of age or 70 years of age or more on April 1 of the current license year or that person has a commercial fishing salmon stamp affixed to the person's commercial fishing license.

....

(f) Notwithstanding subdivision (a), one crewmember of a vessel for which a commercial fishing salmon stamp is issued pursuant to subdivision (e) may be aboard that vessel and take salmon for commercial purposes as a crewmember on that vessel without obtaining a commercial fishing salmon stamp under the following conditions:

(1) The crewmember is designated by name and commercial fishing license number on a form furnished by the department before salmon are taken on the vessel when that crewmember is aboard.

(2) The crewmember has a valid commercial fishing license issued under Section 7850.

(3) The commercial fishing salmon stamp for the crewmember is affixed to the form prescribed in paragraph (1) on which the vessel registration number of the vessel is entered and on which the crewmember who is exempted by this subdivision is designated by the last entered name and commercial fishing license number.

(g) Persons who are exempt from the license requirements, or who are not required to be licensed, pursuant to Section 7850, are exempt from the requirements of this section.

The Commission reads the exemption in existing Section 7925(a) as intended to apply to all persons exempted from the stamp requirement under any subdivision of Section 7860, and proposed Section 42100(a) would therefore revise the exemption in existing Section 7925(a) to refer to operators and crewmembers exempted from the commercial fishing salmon stamp requirement of "Section 7860."

The Commission invites comment on whether this revision changes the intended meaning of existing Section 7925.

(2) Existing Section 7149.05(a)(4) cross-refers to existing Section 1053 of the existing code, a section that was repealed by 2015 Cal. Stat. ch. 683. Section 1053 generally prohibited obtaining

1 more than one paper hunting license – a form of license that is now obsolete – for the same
2 license year, except under specified conditions. As a substantially similar prohibition applicable
3 to electronic hunting licenses appears in existing Section 1053.1, proposed Section 42100 cross-
4 refers to the section of the proposed law that continues existing Section 1053.1.

5 **The Commission seeks comment on whether that revision is appropriate.**

6 **§ 42110. Missing adipose fin**

7 42110. (a) Notwithstanding any measurement requirements under this code, and
8 to implement the department's salmon tagging program, any person in possession
9 of a salmon with a missing adipose fin, the small, fleshy fin on the back of the fish
10 between the back fin and the tail, upon request by an authorized agent or employee
11 of the department, shall immediately relinquish the head of the salmon to the state,
12 at no charge, for recovery of any coded-wire tag. The head may be removed by the
13 fish owner or, if removed by the official department representative, the head shall
14 be removed in a manner to minimize loss of salmon flesh and the salmon shall
15 immediately be returned to the rightful owner.

16 (b) It is unlawful to intentionally conceal, cull, or release into the waters, a
17 salmon with a missing adipose fin that is otherwise legal to possess.

18 **Comment.** Section 42110 continues former Fish and Game Code Section 8226 without
19 substantive change.

20 **PART 18. SARDINES**

21 **TITLE 1. SARDINES GENERALLY**

22 **§ 42200. Provisions not exclusive**

23 42200. The provisions of this part are not intended to be exclusive. Other
24 provisions that govern sardines include, but are not limited to, the following
25 provisions:

26 (a) Section 15915.

27 (b) Section 16475.

28 (c) Section 20710.

29 (d) Section 21015.

30 (e) Section 21615.

31 (f) Section 21810.

32 (g) Section 58630.

33 **Comment.** Section 42200 is new. It is added for drafting convenience.

1 TITLE 2. COMMERCIAL PROVISIONS

2 CHAPTER 1. GENERAL PROVISIONS

3 § 42250. Application of title

4 42250. For purposes of Section 37805, the provisions in this title are commercial
5 provisions.

6 **Comment.** Section 42250 is new. It is added for drafting convenience.

7 § 42255. Declaration of legislative intent

8 42255. It is the intent of the Legislature that the sardine resource be managed
9 with the objective of maximizing the sustained harvest.

10 **Comment.** Section 42255 continues the first sentence of former Fish and Game Code Section
11 8150.7 without substantive change.

12 § 42260. Conformity with federal fishery regulations

13 42260. The department shall manage the sardine resource in conformance with
14 the federal fishery regulations as recommended by the Pacific Fishery
15 Management Council and as adopted by the Secretary of Commerce.

16 **Comment.** Section 42260 continues the second sentence of former Fish and Game Code
17 Section 8150.7 without substantive change.

18 § 42265. Take or possession

19 42265. (a) Sardines may not be taken or possessed on any boat, barge, or vessel
20 except pursuant to Sections 42255 and 42560.

21 (b) This section does not prohibit the possession or use of sardines imported into
22 this state under a bill of lading identifying the country of origin.

23 (c) Imported sardines may be used for dead bait under regulations adopted by
24 the commission.

25 **Comment.** Section 42265 continues former Fish and Game Code Section 8150.5 without
26 substantive change.

27 See also Section 5720 (enforcement).

28 CHAPTER 2. MISCELLANEOUS PROVISIONS

29 § 42350. Compliance with use stated on landing receipt

30 42350. No person shall receive, possess, or sell sardines for any purpose except
31 for that purpose specified on the fish receipt completed at the time of landing of
32 those sardines pursuant to Section 21005.

33 **Comment.** Section 42350 continues former Fish and Game Code Section 8154 without
34 substantive change.

35 See also Section 4900 (enforcement).

PART 19. SHAD

TITLE 1. SHAD GENERALLY

§ 42450. Provisions not exclusive

42450. The provisions of this part are not intended to be exclusive. Other provisions that govern shad include, but are not limited to, the following provisions:

(a) Section 13900.

(b) Section 20100.

(c) Section 15540.

Comment. Section 42450 is new. It is added for drafting convenience.

§ 42455. Importation of shad

42455. (a) Shad legally taken in another state that permits the sale of that fish may be imported into this state under regulations of the commission.

(b) Before the commission adopts any regulation pursuant to this section, a public hearing shall be held in the San Francisco or Sacramento area.

Comment. Section 42455 continues the part of former Fish and Game Code Section 2363 applicable to shad without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

§ 42500. Application of title

42500. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 42500 is new. It is added for drafting convenience.

§ 42505. Take with purse or round haul net

42505. Shad may not be taken with a purse or round haul net.

Comment. Section 42505 continues the part of former Fish and Game Code Section 8756 applicable to shad without substantive change.

PART 20. SHARKS

TITLE 1. SHARKS GENERALLY

§ 42600. Provisions not exclusive

42600. The provisions of this part are not intended to be exclusive. Other provisions that govern sharks include, but are not limited to, the following provisions:

(a) Section 12165.

- 1 (b) Section 17005.
2 (c) Section 18815.
3 (d) Section 18820.
4 (e) Section 18825.
5 (f) Chapter 6 (commencing with Section 18300) of Title 4 of Part 6 of Division
6 6.
7 (g) Section 19810.
8 (h) Section 20710.
9 (i) Section 20720.
10 (j) Section 21360.
11 (k) Section 40115.
12 (l) Section 43655.
13 **Comment.** Section 42600 is new. It is added for drafting convenience.

14 **§ 42605. Take generally**

- 15 42605. It is unlawful to take any white shark (*Carcharodon carcharias*), except
16 under permits issued pursuant to Section 9200 for scientific or educational
17 purposes.
18 **Comment.** Section 42605 continues former Fish and Game Code Section 5517 without
19 substantive change.

20 **§ 42610. Shark fins**

- 21 42610. (a) As used in this section, “shark fin” means the raw, dried, or otherwise
22 processed detached fin, or the raw, dried, or otherwise processed detached tail, of
23 an elasmobranch.
24 (b) Except as otherwise provided in this section, it shall be unlawful for any
25 person to possess, sell, offer for sale, trade, or distribute a shark fin.
26 (c) Any person who holds a license or permit pursuant to Section 9200 may
27 possess a shark fin or fins consistent with that license or permit.
28 (d) Any person who holds a license or permit issued by the department to take or
29 land sharks for recreational or commercial purposes may possess a shark fin or
30 fins consistent with that license or permit.
31 (e) Any person who holds a license or permit issued by the department to take or
32 land sharks for recreational or commercial purposes may possess, including for
33 purposes of consumption or taxidermy, or may donate to a person licensed or
34 permitted pursuant to Section 9200, a shark fin or fins consistent with that license
35 or permit.
36 (f) Nothing in this section prohibits the sale or possession of a shark carcass,
37 skin, or fin for taxidermy purposes pursuant to Section 10830.
38 **Comment.** Subdivisions (a) through (d) of Section 42610 continue former Fish and Game
39 Code Section 2021 without substantive change. Subdivision (e) of former Fish and Game Code
40 Section 2021 is obsolete and is not continued.

Subdivisions (e) and (f) continue former Fish and Game Code Section 2021.5(a) without substantive change. Subdivision (a)(2) of former Fish and Game Code Section 2021.5 is obsolete and is not continued.

§ 42615. Report by Ocean Protection Council

42615. (a) The Ocean Protection Council shall submit an annual report to the Legislature that lists any shark species that have been independently certified to meet internationally accepted standards for sustainable seafood, as defined in Section 35550 of the Public Resources Code, and adopted by the Ocean Protection Council pursuant to Section 35617 of the Public Resources Code, including chain of custody standards.

(b) The report required by subdivision (a) shall be submitted in compliance with Section 9795 of the Government Code.

Comment. Section 42615 continues former Fish and Game Code Section 2021.5(b) without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 42700. Application of title

42700. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 42700 is new. It is added for drafting convenience.

CHAPTER 2. SHARK PARTS

§ 42750. Shark fin or tail

42750. (a) Except as permitted by this code or by regulation of the commission, it is unlawful to sell, purchase, deliver for a commercial purpose, or possess on a commercial fishing vessel registered pursuant to Section 14755, a shark fin or tail or part of a shark fin or tail that has been removed from the carcass.

(b) A thresher shark fin or tail that has been removed from the carcass and whose original shape remains unaltered may be possessed on a registered commercial fishing vessel, if the carcass corresponding to the fin or tail is also possessed.

Comment. Section 42750 continues former Fish and Game Code Section 7704(c) without substantive change.

CHAPTER 3. ANGEL SHARKS

§ 42800. Measurement

42800. (a) Angel shark total length shall be measured from the anterior end of the head to the tip of the tail while the fish is lying in a position of natural repose.

(b) Angel shark alternate length shall be measured from the point where the leading edge of the first dorsal fin meets the back to the tip of the tail.

(c) When measuring total length or alternate length, the tip of the tail may be laid flat against the surface of the measuring device.

(d) Angel sharks may be constrained from lateral movement during measurement by restraining devices approved by the department.

Comment. Section 42800 continues former Fish and Game Code Section 8388(b) without substantive change.

§ 42805. Size restrictions

42805. (a) No female angel shark measuring less than 42 inches in total length or 15 1/4 inches in alternate length, and no male angel shark measuring less than 40 inches in total length or 14 1/2 inches in alternate length, may be possessed, sold, or purchased.

(b) Notwithstanding subdivision (a), ten percent of the angel sharks in any load may measure not more than 1/2 inch less than the minimum sizes specified in this section.

Comment. Section 42805 continues former Fish and Game Code Section 8388(a) without substantive change.

§ 42810. Take in gill or trammel net

42810. (a) An angel shark taken in a gill or trammel net shall be landed (brought ashore) with at least one intact pelvic fin and the tail fin attached.

(b) An angel shark taken in a gill or trammel net shall not be transferred to or from another vessel, except that an angel shark may be transferred to or from a vessel with a department observer on board. An observer shall observe and make a written record of that transfer.

Comment. Subdivision (a) of Section 42810 continues former Fish and Game Code Section 8388(c) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 8388(d) without substantive change.

CHAPTER 4. BASKING SHARKS

§ 42850. Regulation

42850. (a) The commission may adopt regulations to manage basking sharks.

(b) A basking shark may not be taken commercially, unless the commission adopts regulations for that activity and the taking is in accordance with those regulations.

1 **Comment.** Section 42850 continues former Fish and Game Code Section 8599.4 without
2 substantive change.

3 CHAPTER 5. LEOPARD SHARKS

4 **§ 42900. Groundfish**

5 42900. For the purposes of this code, a leopard shark is a groundfish.

6 **Comment.** Section 42900 is new. It is added for drafting convenience.

7  **Note.** Based on Commission research, it appears that a sablefish is a groundfish. See 14
8 C.C.R. § 1.91(a)(5).

9 **The Commission invites comment on whether that classification is correct.**

10 **§ 42905. Take**

11 42905. (a) A person shall not take, possess, sell, or purchase, for a commercial
12 purpose, any leopard shark less than 36 inches in total length.

13 (b) Notwithstanding subdivision (a), a leopard shark less than 36 inches in total
14 length possessed by a person for aquarium display on or before January 1, 1994,
15 may be retained by that person, if a letter declaring that the shark was legally
16 obtained prior to January 1, 1994, is provided to the Sacramento office of the
17 department, on or before January 1, 1995.

18 **Comment.** Section 42905 continues former Fish and Game Code Section 8388.5 without
19 substantive change.

20 See also Section 4900 (enforcement).

21 CHAPTER 6. WHITE SHARKS

22 **§ 42950. Take for commercial purpose**

23 42950. (a) It is unlawful to take any white shark (*Carcharodon carcharias*) for a
24 commercial purpose, except under a permit issued pursuant to Section 9200 for
25 scientific or educational purposes, or pursuant to subdivision (b) for scientific or
26 live display purposes.

27 (b) Notwithstanding subdivision (a), a white shark may be taken incidentally in
28 a commercial fishing operation using set gill nets, drift gill nets, or roundhaul nets.
29 White shark taken pursuant to this subdivision shall not have the pelvic fin severed
30 from the carcass, until after the white shark is brought ashore. White shark taken
31 pursuant to this subdivision, if landed alive, may be sold for scientific or live
32 display purposes.

33 (c) Any white shark killed or injured by any person in self-defense may not be
34 landed.

35 **Comment.** Section 42950 continues former Fish and Game Code Section 8599 without
36 substantive change.

1 **§ 42955. Collection of data**

2 42955. The department shall cooperate, to the extent that it determines feasible,
3 with appropriate scientific institutions, to facilitate data collection on white sharks
4 taken incidentally by commercial fishing operations.

5 **Comment.** Section 42955 continues former Fish and Game Code Section 8599.3 without
6 substantive change.

7 **PART 21. STURGEON**

8 **TITLE 1. STURGEON GENERALLY**

9 **CHAPTER 1. PRELIMINARY PROVISIONS**

10 **§ 43100. Provisions not exclusive**

11 43100. The provisions of this part are not intended to be exclusive. Other
12 provisions that govern sturgeon include, but are not limited to, the following
13 provisions:

14 (a) Section 13900.

15 (b) Section 14875.

16 (c) Section 15540

17 (d) Section 23905.

18 (e) Section 7650.

19 **Comment.** Section 43100 is new. It is added for drafting convenience.

20 **CHAPTER 2. TAKE, POSSESSION, OR SALE**

21 **§ 43150. Take or possession**

22 43150. (a) It is unlawful to take or possess for a commercial purpose, buy or
23 sell, or offer to buy or sell, a whole sturgeon, or part of a sturgeon, including, but
24 not limited to, its eggs, except as follows:

25 (1) A sturgeon, part of a sturgeon, or sturgeon eggs, taken or possessed by, and
26 the cultured progeny of, an aquaculturist who is registered under Section 23605,
27 may be bought or sold subject to regulations of the commission.

28 (2) A sturgeon, part of a sturgeon, or sturgeon eggs, taken commercially in
29 another state that permits the sale of sturgeon, and lawfully imported under
30 Section 43200, may be possessed, bought, or sold.

31 (3) Sturgeon, or part of a sturgeon, taken pursuant to a sport fishing license,
32 which is processed in accordance with Section 13700.

33 (b) For purposes of this section, it is prima facie evidence that a sturgeon or part
34 of a sturgeon is possessed for a commercial purpose, if the possession is of more
35 than two times the sport bag limit.

Comment. Section 43150 continues former Fish and Game Code Section 7370 without substantive change.

See also Sections 4570, 5102, 5730 (enforcement).

CHAPTER 3. IMPORTATION

§ 43200. Importation of sturgeon

43200. (a) Sturgeon legally taken in another state that permits the sale of that fish may be imported into this state under regulations of the commission.

(b) Before the commission adopts any regulation pursuant to this section, a public hearing shall be held in the San Francisco or Sacramento area.

Comment. Section 43200 continues the part of former Fish and Game Code Section 2363 applicable to sturgeon without substantive change.

CHAPTER 4. STURGEON EGG PROCESSING

§ 43250. Required license

43250. (a) Every person engaged in the business of canning, curing, preserving, packing, or otherwise processing, or dealing at wholesale in, the eggs of sturgeon for human consumption, shall obtain a sturgeon egg processing license from the department for that purpose. The license required by this title is in addition to any other license, permit, or other authorization required by this code or by any other provision of law.

(b) Possession of a sturgeon egg processing license issued pursuant to this title authorizes the licensee to can, cure, preserve, pack, or otherwise process, or deal at wholesale in, the eggs of sturgeon if, and only if, the eggs are lawfully taken or lawfully possessed pursuant to Section 13700 or 43150.

Comment. Section 43250 continues former Fish and Game Code Section 10000 without substantive change.

See also Section 5732 (enforcement).

 **Note.** Existing Fish and Game Code Section 10000(b) (which would be continued by proposed Section 43250(b)) authorizes specified conduct relating to sturgeon eggs “if, and only if, the eggs are lawfully taken or lawfully possessed pursuant to Section 7230 or 8371.” However, in 2007 language in existing Fish and Game Code Section 8371 relating to the taking or possession of “sturgeon, or parts thereof,” was deleted from that section, and added to existing Fish and Game Code Section 7370. See 2007 Cal. Stat. ch. 328. Proposed Section 43250 would therefore revise the cross-reference in existing Section 10000 to “Section 8371” to refer to the section in the proposed law that would continue existing Section 7370.

The Commission invites comment on how proposed Section 43250 should continue the reference to existing Fish and Game Code Section 8371 in existing Section 10000.

§ 43255. License fee

43255. A sturgeon egg processing license shall be issued and delivered upon application and the payment to the department of a base fee of one hundred dollars

1 (\$100), adjusted under Section 3755. The license shall be valid for a period of 12
2 months from the date of issuance.

3 **Comment.** Section 43255 continues the first sentence of former Fish and Game Code Section
4 10001 without substantive change.

5 **§ 43260. License term**

6 43260. A sturgeon egg processing license shall be issued and delivered upon
7 application and the payment to the department of a base fee of one hundred dollars
8 (\$100), as adjusted under Section 3755. The license shall be valid for a period of
9 12 months from the date of issuance.

10 **Comment.** Section 43260 continues the second sentence of former Fish and Game Code
11 Section 10001 without substantive change.

12 **§ 43265. Required documentation**

13 43265. Every person licensed pursuant to this chapter shall make a true and
14 legible record of each transaction involving the eggs of sturgeon. This
15 documentation shall show all of the following:

- 16 (a) The weight of the eggs received.
- 17 (b) The name and address of the person from whom the eggs were received.
- 18 (c) If the eggs were obtained from a sturgeon that was artificially propagated by
19 a person other than the licensee, the name and address of that person.
- 20 (d) If the eggs were obtained from a sturgeon that was not taken by the licensee,
21 the name and address of the person from whom the licensee obtained the sturgeon
22 from which the eggs were obtained.
- 23 (e) The date of receipt.
- 24 (f) If imported into this state, the place where the sturgeon were taken.
- 25 (g) Whether the eggs are to be processed by the recipient or sold by him or her
26 to another for processing, and, if the eggs are to be sold for processing by another,
27 the name and address of that person.
- 28 (h) Any other information that the department may require and specify on any
29 form provided.

30 **Comment.** Section 43265 restates former Fish and Game Code Section 10002 without
31 substantive change.

Note. Proposed Section 43265(b)-(d) is intended to restate existing Fish and Game Code Section 10002(b) to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

10002. Every person licensed pursuant to this division shall make a true and legible record of each transaction involving the eggs of sturgeon. This documentation shall show all of the following:

....

(b) The name and address of the person from whom the eggs were received, and, if different, the name and address of the person who artificially propagated the sturgeon from which the eggs were obtained or the name and address of the person from whom the sturgeon were received from which the eggs were obtained.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 43270. Retention and inspection of documentation

43270. (a) The documentation required by Section 43265 shall be kept by the person or business holding the sturgeon egg processing license for a period of two years from the date of receipt of eggs, and shall be available for inspection during normal business hours by the department.

(b) Any information received or requested by the department shall be confidential, and the records shall not be public records, except that the information contained in the records may be compiled and published as summaries in a manner that will not disclose the individual record or business of any person.

Comment. Subdivision (a) of Section 43270 continues former Fish and Game Code Section 10003 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 10004 without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

§ 43350. Application of title

43350. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 43350 is new. It is added for drafting convenience.

§ 43355. Required return to water if caught in net

43355. (a) Any sturgeon that is taken in any type of net shall, regardless of its condition, be immediately freed and removed from the net by the fisherman, and immediately returned to the water without further harm.

(b) A commercial fisherman shall not have any sturgeon, whether dead or alive, in his or her possession, at any time when conducting netting operations or when going to or from those operations, except when releasing a sturgeon from a net.

(c) The return of sturgeon to the water pursuant to this section is not deterioration, waste, or spoilage of fish for purposes of Section 14310.

1 **Comment.** Section 43355 continues the part of former Fish and Game Code Section 8370
2 applicable to sturgeon without substantive change.
3 See also Section 4900 (enforcement).

4 PART 22. SURFPERCH

5 TITLE 1. SURFPERCH GENERALLY

6 **§ 43500. Provisions not exclusive**

7 43500. The provisions of this part are not intended to be exclusive. Other
8 provisions that govern surfperch include, but are not limited to, the following
9 provisions:

10 (a) Title 6 (commencing with Section 59830) of Part 1 of Division 16.

11 **Comment.** Section 43500 is new. It is added for drafting convenience.

12 TITLE 2. COMMERCIAL PROVISIONS

13 **§ 43550. Application of title**

14 43550. For purposes of Section 37805, the provisions in this title are commercial
15 provisions.

16 **Comment.** Section 43550 is new. It is added for drafting convenience.

17 **§ 43555. Take**

18 43555. (a) Upon the recommendation of the director regarding management
19 measures for surfperch of the family Embiotocidae, the commission may adopt
20 regulations to manage the commercial surfperch resource and fisheries consistent
21 with Title 3 (commencing with Section 12100) of Part 4 of Division 4, including,
22 but not limited to, adoption of changes to the prohibitions imposed under
23 subdivision (b).

24 (b) Except as may be authorized under subdivision (a), surfperch of the family
25 Embiotocidae may be taken only between July 16 and April 30, except shiner
26 surfperch (*Cymatogaster aggregata*), which may be taken, sold, or purchased at
27 any time. Surfperch may be sold or purchased only between July 16 and May 10,
28 except as may be authorized under subdivision (a). South of a line drawn east and
29 west through Point Arguello, barred surfperch, redbtail surfperch, and calico
30 surfperch may not be taken for a commercial purpose, except as may be authorized
31 under subdivision (a). Surfperch of these three species that have been taken north
32 of the line during the open season and shipped south of the line may be sold or
33 purchased under regulations that the commission may adopt.

34 **Comment.** Section 43555 continues former Fish and Game Code Section 8395 without
35 substantive change.

36 See also Section 4900 (enforcement).

PART 23. SWORDFISH

TITLE 1. SWORDFISH GENERALLY

§ 43600. Provisions not exclusive

43600. The provisions of this part are not intended to be exclusive. Other provisions that govern swordfish include, but are not limited to, the following provisions:

(a) Section 18030.

(b) Chapter 6 (commencing with Section 18300) of Title 4 of Part 6 of Division 6.

(c) Chapter 2 (commencing with Section 18800) of Title 5 of Part 6 of Division 6.

(d) Section 21950.

Comment. Section 43600 is new. It is added for drafting convenience.

TITLE 2. COMMERCIAL PROVISIONS

§ 43650. Application of title

43650. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 43650 is new. It is added for drafting convenience.

§ 43655. Permit requirement

43655. (a) A swordfish shall not be taken, possessed aboard a boat, or landed by a person, for commercial purposes, except under a valid swordfish permit. If more than one person is aboard the boat, at least one person shall have a swordfish permit issued to that person that has not been revoked or suspended, subject to regulations adopted by the commission.

(b) The fee for a permit issued pursuant to subdivision (a) is three hundred thirty dollars (\$330). This permit fee does not apply to the holder of a valid drift gill net shark and swordfish permit required under Chapter 6 (commencing with Section 18300) of Title 4 of Part 6 of Division 6 or to any person who participates in the permit transition program established by the department pursuant to Section 18400.

Comment. Subdivision (a) Section 43655 continues former Fish and Game Code Section 8394 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 8394.5 without substantive change.

See also Sections 4900, 5104 (enforcement).

Notes. (1) In existing Section 8394, the meaning of “subject to regulations adopted by the commission” is not entirely clear. **The Commission invites comment on the meaning of that language.**

(2) Proposed Section 43655(b) would continue Section 8394.5, which was amended by 2018 Cal. Stat. ch. 844. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

PART 24. TROUT

TITLE 1. TROUT GENERALLY

CHAPTER 1. PRELIMINARY PROVISIONS

§ 43800. Provisions not exclusive

43800. The provisions of this part are not intended to be exclusive. Other provisions that govern trout include, but are not limited to, the following provisions:

- (a) Section 420.
- (b) Section 7650.
- (c) Section 13010.
- (d) Section 21950.
- (e) Section 23355.
- (f) Section 28415.
- (g) Section 43805.
- (h) Section 55725.
- (i) Section 55830.

Comment. Section 43800 is new. It is added for drafting convenience.

§ 43805. Legislative declaration

43805. (a) The Legislature finds and declares all of the following:

(1) California has the greatest biodiversity of native trout species of any state in the nation. Trout can be found in more than 18,000 miles of California's cooler streams. California's trout are the principal sport fish in 3,581 cold-water lakes and reservoirs.

(2) Self-sustaining native trout populations in "Heritage Trout Waters" that retain and promote genetic trout diversity and overall sustainable watershed and ecosystem environmental health are state policy.

(b) Funding for "Heritage Trout Waters" is a priority for the Hatchery and Inland Fisheries Fund.

(c) The commission may designate "Heritage Trout Waters" to recognize the beauty, diversity, historical significance, and special values of California's native trout. The commission's designation shall meet both of the following criteria:

(1) Only waters supporting populations that best exemplify indigenous strains of native trout within their historic drainages may qualify for designation.

(2) Only waters providing anglers with an opportunity to catch native trout consistent with the conservation of the native trout may qualify for designation.

(3) Any stocking of heritage trout waters shall meet the criteria established by Chapter 1 (commencing with Section 11700) of Title 2 of Part 4 of Division 6.

Comment. Section 43805 continues former Fish and Game Code Section 7260 without substantive change.

CHAPTER 2. SHIPMENT OF TROUT

§ 43850. Transport of trout

43850. (a) It is unlawful at any time to offer for shipment, ship, or receive for shipment, or transport from this state any trout taken in the waters of this state, except as provided in subdivision (b).

(b) The following persons may personally transport from this state not more than one daily bag limit of trout:

(1) The holder of a nonresident sport fishing license.

(2) A person on active military duty with the armed forces of the United States who possesses a valid angling license.

(3) A person on active military duty with an auxiliary branch of the armed forces of the United States who possesses a valid angling license.

Comment. Section 43850 restates former Fish and Game Code Section 2356 without substantive change.

Note. Proposed Section 43850 is intended to restate existing Fish and Game Code Section 2356 to clarify the meaning of that provision, without changing its substantive effect. The existing provision reads as follows:

2356. It is unlawful at any time to offer for shipment, ship, or receive for shipment, or transport from this state any trout taken in the waters of this state, except that the holder of a nonresident angling license, or any person on active military duty with the armed forces of the United States or on active military duty with an auxiliary branch thereof who possesses a valid angling license, may personally transport from this state not more than one daily bag limit of trout.

The Commission invites comment on whether the restatement would cause any substantive change in the meaning of the provision.

§ 43855. Shipment of trout into area where season closed

43855. It is unlawful to ship trout into an area where the season is closed, unless the shipment is accompanied by a written statement containing the name and address of, and signed by, the person taking the trout, and countersigned, for the purpose of identification, by the agent of the carrier to whom the trout are offered for shipment.

Comment. Section 43855 continues former Fish and Game Code Section 2358 without substantive change.

CHAPTER 3. STEELHEAD TROUT

Article 1. General Provisions

§ 43900. Provisions not exclusive

43900. This chapter includes some but not all provisions of this code that govern steelhead trout. Other provisions that govern steelhead trout include, but are not limited to, the following provisions:

(a) Section 9105.

(b) Chapter 3 (commencing with Section 11900) of Title 2 of Part 4 of Division 6.

(c) Section 13105.

(d) Section 13900.

(e) Section 15440.

(f) Section 24950.

Comment. Section 43900 is new. It is added for drafting convenience.

Article 2. Take

§ 43950. Hook other than in mouth

43950. (a) It is unlawful, in inland waters, to kill or retain in possession any steelhead that has not taken the bait or lure in its mouth.

(b) Any steelhead hooked in inland waters other than in its mouth shall be released unharmed.

Comment. Section 43950 continues the part of former Fish and Game Code Section 5514 applicable to steelhead trout without substantive change.

 **Note.** See discussion of the proposed revision of this section following proposed Section 41005.

Article 3. Report-Restoration Card

§ 44000. Required trout fishing report-restoration card

44000. (a) In addition to a valid California sport fishing license and any applicable sport license issued pursuant to this code, a person taking steelhead trout in inland waters shall have in his or her possession a valid nontransferable steelhead trout fishing report-restoration card issued by the department. The cardholder shall record certain fishing information on the card as designated by the department. The month, day, and location fished shall be recorded before the cardholder begins fishing for the day and when the cardholder moves to another location listed on the back of the report-restoration card. The cardholder shall immediately record catch information upon keeping a steelhead trout and immediately record catch information regarding released steelhead trout whenever

1 the cardholder finishes fishing for the day, or moves to another location listed on
2 the back of the report-restoration card. The cardholder shall return the card to the
3 department on a schedule or date established by the department.

4 (b) The base fee for the card shall be five dollars (\$5) for the 2004 license year,
5 which may be adjusted annually thereafter pursuant to Section 3755. The funds
6 received by the department from the sale of the card shall be deposited in the Fish
7 and Game Preservation Fund, and shall be available for expenditure upon
8 appropriation by the Legislature. The department shall maintain the internal
9 accountability necessary to ensure that all restrictions and requirements pertaining
10 to the expenditure of these funds are met.

11 (c) The commission shall adopt regulations necessary to implement this section.
12 These regulations shall include, but not be limited to, procedures necessary to
13 obtain appropriate steelhead trout resources management information, a
14 requirement that the card contain a statement explaining potential uses of the funds
15 received as authorized by Section 44005, and a requirement that the cards be
16 returned to the department.

17 **Comment.** Section 44000 continues former Fish and Game Code Section 7380 without
18 substantive change.

19 **§ 44005. Use of revenue**

20 44005. (a) Revenue received pursuant to Section 44000 may be expended, upon
21 appropriation by the Legislature, only to monitor, restore, or enhance steelhead
22 trout resources consistent with Sections 11810 and 11815, and to administer the
23 fishing report-restoration card program. The department shall submit all proposed
24 expenditures, including proposed expenditures for administrative purposes, to the
25 Advisory Committee on Salmon and Steelhead Trout for review and comment
26 before submitting a request for inclusion of the appropriation in the annual Budget
27 Bill. The committee may recommend revisions in any proposed expenditure to the
28 Legislature and the commission.

29 (b) The department shall report to the Legislature on or before July 1, 2021,
30 regarding the steelhead trout fishing report-restoration card program's projects
31 undertaken using revenues derived pursuant to that program, the benefits derived,
32 and its recommendations for revising the fishing report-restoration card
33 requirement, if any. The report submitted pursuant to this subdivision shall be
34 submitted in compliance with Section 9795 of the Government Code.

35 **Comment.** Section 44005 continues former Fish and Game Code Section 7381 without
36 substantive change.

37 **§ 44010. Inoperative date of article**

38 44010. This article shall become inoperative on July 1, 2022, and, as of January
39 1, 2023, is repealed, unless a later enacted statute that is enacted before January 1,
40 2023, deletes or extends the dates on which it becomes inoperative and is repealed.

1 **Comment.** Section 44010 continues former Fish and Game Code Section 7382 without
2 substantive change.

3 TITLE 2. COMMERCIAL PROVISIONS

4 CHAPTER 1. TROUT GENERALLY

5 **§ 44100. Application of title**

6 44100. For purposes of Section 37805, the provisions in this title are commercial
7 provisions.

8 **Comment.** Section 44100 is new. It is added for drafting convenience.

9 **§ 44105. Sale or purchase**

10 44105. (a) Except as otherwise provided in this title, it is unlawful to sell or
11 purchase any species of trout.

12 (b) Subdivision (a) does not apply to trout grown pursuant to Part 1
13 (commencing with Section 23300) of Division 7.

14 **Comment.** Subdivision (a) of Section 44105 continues former Fish and Game Code Section
15 8430 without substantive change.

16 Subdivision (b) continues former Fish and Game Code Section 8433 without substantive
17 change.

18 CHAPTER 2. STEELHEAD AND DOLLY VARDEN TROUT

19 **§ 44200. Taken from out of state**

20 44200. (a) Dolly Varden or steelhead trout taken outside the state may be
21 possessed and sold within the state after inspection and tagging in accordance with
22 regulations adopted by the commission.

23 (b) The inspection and tagging shall be paid for by the person submitting the
24 trout for inspection and tagging.

25 (c) Notwithstanding subdivision (a), steelhead trout taken outside the state may
26 not be sold or possessed in District 2515 in excess of the daily bag limit on
27 steelhead trout for that district.

28 (d) This section does not apply to trout grown pursuant to Part 1 (commencing
29 with Section 23300) of Division 7.

30 **Comment.** Subdivisions (a) and (b) of Section 44200 continues former Fish and Game Code
31 Section 8431 without substantive change.

32 Subdivision (c) continues former Fish and Game Code Section 8432 without substantive
33 change.

34 Subdivision (d) continues former Fish and Game Code Section 8433 without substantive
35 change.

36 **§ 44205. Take with purse or round haul net**

37 44205. Steelhead may not be taken with a purse or round haul net.

1 **Comment.** Section 44205 continues the part of former Fish and Game Code Section 8756
2 applicable to steelhead without substantive change.
3 See also Section 4900 (enforcement).

4 PART 25. TUNA

5 TITLE 1. TUNA GENERALLY

6 CHAPTER 1. PRELIMINARY PROVISIONS

7 § 44300. Provisions not exclusive

8 44300. The provisions of this part are not intended to be exclusive. Other
9 provisions that govern tuna include, but are not limited to, the following
10 provisions:

11 (a) Section 21015.

12 (b) Section 21950.

13 **Comment.** Section 44300 is new. It is added for drafting convenience.

14 CHAPTER 2. TAKE OR POSSESSION

15 § 44350. Conformity with federal law

16 44350. The commission may prohibit the taking or possessing of tuna in the
17 same manner as taking or possessing tuna is prohibited by federal law or by rules
18 or regulations adopted pursuant to the Tuna Conventions Act of 1950, as amended
19 by Public Law 87-814 of the 87th Congress, notwithstanding any other provision
20 of this code.

21 **Comment.** Section 44350 continues former Fish and Game Code Section 313 without
22 substantive change.

23 TITLE 2. COMMERCIAL PROVISIONS

24 CHAPTER 1. PRELIMINARY PROVISIONS

25 § 44400. Application of title

26 44400. For purposes of Section 37805, the provisions in this title are commercial
27 provisions.

28 **Comment.** Section 44400 is new. It is added for drafting convenience.

29 CHAPTER 2. SPECIFIC TYPES OF TUNA

30 § 44450. Albacore

31 44450. Albacore may be taken at any time.

1 **Comment.** Section 44450 continues former Fish and Game Code Section 8376 without
2 substantive change.

3 **§ 44455. Bluefin tuna**

4 44455. (a) Bluefin tuna may be taken at any time.

5 (b) No bluefin tuna weighing less than 7 1/2 pounds may be sold, purchased, or
6 processed.

7 **Comment.** Subdivision (a) of Section 44455 continues the part of former Fish and Game Code
8 Section 8374 applicable to bluefin tuna without substantive change.

9 Subdivision (b) continues former Fish and Game Code Section 8375 without substantive
10 change.

11 **§ 44460. Pacific bonito**

12 44460. (a) Pacific bonito shall be measured from the tip of the lower jaw to the
13 center of the fork of the tail fin.

14 (b) Pacific bonito less than 24 inches fork length or five pounds in weight shall
15 not be taken or possessed on any vessel at any time for any commercial purpose,
16 except as follows:

17 (1) A load of bonito taken on a vessel by the use of round haul nets may contain
18 18 percent or less by number of bonito smaller than the minimum size.

19 (2) A load of fish taken on a vessel by the use of gill nets or trammel nets may
20 contain 1,000 pounds or less of bonito smaller than the minimum size per trip.

21 (3) Pacific bonito smaller than the minimum size that are incidentally taken may
22 be used for any purpose.

23 **Comment.** Subdivision (a) of Section 44460 continues former Fish and Game Code Section
24 8377.5 without substantive change.

25 Subdivision (b) continues former Fish and Game Code Section 8377 without substantive
26 change.

27 **§ 44465. Skipjack**

28 44465. Skipjack may be taken at any time.

29 **Comment.** Section 44465 continues former Fish and Game Code Section 8378 without
30 substantive change.

31 **§ 44470. Yellowfin tuna**

32 44470. Yellowfin tuna may be taken at any time.

33 **Comment.** Section 44470 continues the part of former Fish and Game Code Section 8374
34 applicable to yellowfin tuna without substantive change.

PART 26. YELLOWTAIL

TITLE 1. YELLOWTAIL GENERALLY

CHAPTER 1. PRELIMINARY PROVISIONS

§ 44600. Provisions not exclusive

44600. The provisions of this part are not intended to be exclusive. Other provisions that govern yellowtail include, but are not limited to, the following provisions:

(a) Section 21950.

(b) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

Comment. Section 44600 is new. It is added for drafting convenience.

CHAPTER 2. IMPORTATION

§ 44650. Delivery of yellowtail taken from waters off coast of Mexico

44650. (a) Yellowtail taken in waters lying south of the maritime boundary line between the United States and Mexico, with that maritime boundary line including, but not limited to, the federal Exclusive Economic Zone boundary, may be delivered to California ports aboard boats, including boats carrying purse seine or round haul nets, in accordance with those regulations as the commission may make governing the inspection and marking of those fish imported into this state. The cost of that inspection and marking shall be paid by the importer.

(b) Yellowtail taken in Mexico shall not be imported, unless legally taken and legally possessed, and a declaration is submitted to the department pursuant to Section 28425.

Comment. Section 44650 continues the part of former Fish and Game Code Section 2362 applicable to yellowtail without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

§ 44750. Application of title

44750. For purposes of Section 37805, the provisions in this title are commercial provisions.

Comment. Section 44750 is new. It is added for drafting convenience.

§ 44755. Size restrictions

44755. (a) Yellowtail shall be measured from the tip of the lower jaw to the end of the longer lobe of the tail.

(b) Yellowtail measuring equal to or greater than 28 inches in length may be taken with hook and line at any time.

(c) Yellowtail measuring less than 28 inches in length may not be sold or purchased, except that not more than five yellowtail per day of any length may be possessed by the holder of a commercial fishing license for noncommercial use, if taken incidentally in commercial fishing.

Comment. Subdivision (a) of Section 44755 continues the part of former Fish and Game Code Section 8386 applicable to yellowtail without substantive change.

Subdivision (b) continues the part of former Fish and Game Code Section 8382 applicable to yellowtail without substantive change.

Subdivision (c) continues the part of former Fish and Game Code Section 8384 applicable to yellowtail without substantive change.

§ 44760. Possession restrictions

44760. From May 1 to August 31, inclusive, all of the following are unlawful:

(a) Possession by one person on a boat, barge, or other vessel of more than 500 pounds of yellowtail.

(b) Possession by two or more persons on a boat, barge, or other vessel a combined weight of more than 500 pounds of yellowtail per person.

(c) Possession by five or more persons on a boat, barge, or other vessel a combined weight of more than 2,500 pounds of yellowtail.

Comment. Section 44760 continues former Fish and Game Code Section 8387 without substantive change.

§ 44765. Use of purse seines or round haul nets

44765. (a) It is unlawful to use any purse seine or round haul net to take a yellowtail.

(b) It is unlawful to possess a yellowtail, except those taken south of the international boundary between the United States and Mexico, and imported into the state under regulations of the commission as provided in Section 44650, on any boat carrying or using any purse seine or round haul net, including, but not limited to, a bait net as described in Section 15900.

(c) Notwithstanding subdivision (b), the department may issue permits to hook and line commercial fishermen to possess a bona fide bait net on their vessels for the purpose of taking bait for their own use only.

Comment. Section 44765 continues the parts of former Fish and Game Code Section 8623(a), (b), and (e) applicable to yellowtail without substantive change.

Note. The portion of existing Fish and Game Code Section 8623(a) and (b) that applies to yellowtail would be continued by proposed Section 44765(a) and (b).

Existing Section 8623 also includes a disclaimer in subdivision (e) that, by its terms, applies to all provisions of that section (“Notwithstanding the provisions of this section...”)

However, despite the broad wording of this disclaimer, the Commission’s analysis suggests that the substantive portion of subdivision (e) logically applies only to subdivision (b). Proposed Section 30465(c) would state that specific application expressly.

The Commission invites comment on whether that expressly stated application would cause any problems.

DIVISION 11. INVERTEBRATES

PART 1. GENERAL PROVISIONS

§ 45000. Governance by other provisions

45000. Animals governed by this division are also governed by other provisions of this code, including but not limited to Divisions 6 (commencing with Section 8000) and 7 (commencing with Section 23300).

Comment. Section 45000 is new. It is added for drafting convenience. It makes clear that this division does not contain the only provisions of the code governing invertebrates, and that invertebrates governed by this division may also be governed by other law. For example, as the definition of “fish” includes invertebrates, invertebrates may also be governed by other provisions of the code that apply by their terms to “fish.” See Sections 200, 335.

§ 45005. Scope of commercial provisions

45005. The provisions of this division that are expressly identified as commercial provisions apply to the taking and possession of invertebrates for any commercial purpose. Those commercial provisions do not apply to activities governed by Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 45005 continues the part of former Fish and Game Code Section 7600 applicable to the provisions of this division without substantive change.

§ 45010. Take or possession in tidal area

45010. (a) Except as otherwise expressly permitted in this code, an invertebrate may not be taken, possessed aboard a boat, or landed for a commercial purpose by any person in any tide pool or tidal area, including tide flats or other areas between the high tidemark and 1,000 feet beyond the low tidemark, unless a valid tidal invertebrate permit has been issued to that person that has not been suspended or revoked.

(b) The taking, possessing, or landing of an invertebrate pursuant to this section shall be subject to regulations adopted by the commission.

Comment. Section 45010 continues former Fish and Game Code Section 8500 without substantive change.

PART 2. DISEASE CONTROL *[RESERVED]*

PART 3. CLASSES OF INVERTEBRATES

TITLE 1. CRUSTACEANS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 45250. Use as bait

45250. A crustacean may be used for bait, or released in the same waters from which it was taken.

Comment. Section 45250 continues the part of former Fish and Game Code Section 5505 applicable to crustaceans without substantive change.

CHAPTER 2. COMMERCIAL PROVISIONS

§ 45300. Application of title

45300. For purposes of Section 45005, the provisions in this chapter are commercial provisions.

Comment. Section 45300 is new. It is added for drafting convenience.

§ 45305. Take with powered equipment

45305. (a) Powered equipment of such design as may be prescribed by the commission may be used to take crustaceans under a revocable permit issued by the department and under regulations adopted by the commission.

(b) Taking of crabs or lobster under this section is subject to Title 2 (commencing with Section 46800) of Part 6, and Title 2 (commencing with Section 49450) of Part 9.

Comment. Section 45305 continues the part of former Fish and Game Code Section 9053 applicable to crustaceans without substantive change.

Notes. (1) Existing Fish and Game Code Section 9053(b) (which would be continued by proposed Section 45305(b)) provides in part that taking of lobster or crabs under that section is “subject to Article 5 (commencing with Section 8250)....” In the proposed law, all the provisions contained in that article have been continued in Title 2 (commencing with Section 49450) of Part 9. However, that proposed title contains two provisions relevant to the subject matter of Section 9053(b) that are *not* in the “Article 5” referenced in existing Section 9053(b) – existing Section 9001.7(k), and existing Section 9010(c)-(e).

The Commission invites comment on whether the additional inclusion of those two provisions in the cross-reference in proposed Section 45305(b) would cause any problems.

(2) Existing Section 9053(b) also provides that the taking authorized under that section is “subject to Article 6 (commencing with Section 8275).” In the proposed law, all provisions contained in that article have been continued in Title 2 (commencing with Section 46800) of Part 6. However, that proposed title contains several additional provisions relevant to the subject

matter of Section 9053(b) that are *not* in the “Article 6” referenced in existing Section 9053(b): Sections 8834, 8834.5, 9011, and 9012.

The Commission invites comment on whether the additional inclusion of these provisions in the cross-reference in proposed Section 45305(b) would cause any problems.

TITLE 2. MOLLUSKS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 45400. Use as bait

45400. A mollusk may be used for bait, or released in the same waters from which it was taken.

Comment. Section 45400 continues the part of former Fish and Game Code Section 5505 applicable to mollusks without substantive change.

§ 45405. Take with powered equipment

45405. Powered equipment of such design as may be prescribed by the commission may be used to take mollusks under a revocable permit issued by the department and under regulations adopted by the commission.

Comment. Section 45405 continues the part of former Fish and Game Code Section 9053 applicable to mollusks without substantive change.

CHAPTER 2. MOLLUSK PURIFICATION

§ 45450. Specified districts

45450. Notwithstanding Sections 19805, 45505, 45510, and 46410, native and nonnative mollusks may be taken in Districts 2600 and 2605 and moved to other areas to be purified for human consumption under rules and regulations that may be established by the commission. The regulations may include, but are not limited to, bag limits, methods of harvest, and provisions for public use. Mollusks taken under this section shall not be used for human consumption unless such use is approved by the State Department of Public Health.

Comment. Section 45450 continues former Fish and Game Code Section 5700 without substantive change. See also Health & Safety Code §§ 20, 131052(6) (directing revision of specified references in former Fish and Game Code to State Department of Health Services).

Note. The reference in existing Fish and Game Code Section 5700 to the State Department of Health Services would be revised by proposed Section 45450 to instead refer to the State Department of Public Health, pursuant to the directive of Health & Safety Code Sections 20 and 131052(6).

The Commission invites comment on whether that revision is appropriate.

§ 45455. Sanitary surveys

45455. The State Department of Public Health may make sanitary surveys of mollusk-growing areas or may use sanitary surveys of mollusk-growing areas

made by qualified state or county agencies, and based on such information may classify such areas for purposes of harvesting and moving mollusks that are to be purified for human consumption in accordance with Section 45450. The State Department of Public Health shall adopt rules and regulations as are necessary to implement this section.

Comment. Section 45455 continues former Fish and Game Code Section 5701 without substantive change. See also Health & Safety Code §§ 20, 131052(6) (directing revision of specified references in former Fish and Game Code to State Department of Health Services).

Note. The reference in existing Fish and Game Code Section 5701 to the State Department of Health Services would be revised by proposed Section 45455 to instead refer to the State Department of Public Health, pursuant to the directive of Health & Safety Code Sections 20 and 131052(6).

The Commission invites comment on whether that revision is appropriate.

§ 45460. Certification of water quality

45460. If examinations are conducted by the State Department of Public Health pursuant to this chapter for purposes of certifying the quality of shellfish-growing waters, certification of water quality shall be commenced within 30 days and completed within six months of the filing of an application by an aquaculturist.

Comment. Section 45460 continues former Fish and Game Code Section 5701.5 without substantive change. See also Health & Safety Code §§ 20, 131052(6) (directing revision of specified references in former Fish and Game Code to State Department of Health Services).

Note. The reference in existing Fish and Game Code Section 5701.5 to the State Department of Health Services would be revised by proposed Section 45460 to instead refer to the State Department of Public Health, pursuant to the directive of Health & Safety Code Sections 20 and 131052(6).

The Commission invites comment on whether that revision is appropriate.

§ 45465. Royalty

45465. Any person who moves any native mollusks taken under regulations of the commission from Districts 2600 and 2605, for purposes of purification for human consumption, shall pay a royalty, as the commission may prescribe, of not less than two cents (\$0.02) per pound of mollusks so taken.

Comment. Section 45465 continues former Fish and Game Code Section 5702 without substantive change.

CHAPTER 3. SHELLFISH

§ 45500. Authority of State Department of Public Health

45500. (a) The State Department of Public Health may do any of the following:

- (1) Examine any area from which shellfish may be taken.
- (2) Determine whether the area is subject to sewage contamination.
- (3) Determine whether the taking of shellfish from the area does or may constitute a menace to the lives or health of human beings.

(b) If an examination is conducted pursuant to this chapter for purposes of certifying the quality of shellfish-growing waters, certification of water quality shall be commenced within 30 days, and completed within three months of the filing of an application by an aquaculturist.

Comment. Subdivision (a) of Section 45500 combines and continues former Fish and Game Code Sections 5669 and 5671 without substantive change. See also Health & Safety Code §§ 20, 131052(6) (directing revision of specified references in former Fish and Game Code to State Department of Health Services).

Subdivision (b) continues former Fish and Game Code Section 5675 without substantive change.

Notes. (1) The reference in existing Fish and Game Code Section 5671 to the State Department of Health Services would be revised by proposed Section 45500 to instead refer to the State Department of Public Health, pursuant to the directive of Health & Safety Code Sections 20 and 131052(6).

The Commission invites comment on whether that revision is appropriate.

(2) Existing Fish and Game Code Section 5675 (which would be continued by proposed Section 45500(b)) requires a specified examination to be completed “within three months of the filing of an application by an aquaculturist.” However, neither the section nor the article in which it appears provides any detail about this application.

The Commission invites comment on the intended meaning of this reference in existing Section 5675.

§ 45505. Prohibited take

45505. It is unlawful to take shellfish used or intended to be used for human consumption from any area from which it has been determined, as provided in this chapter, that the taking of shellfish does or may constitute a menace to the lives or health of human beings.

Comment. Section 45505 combines and continues former Fish and Game Code Section 5670 and the second paragraph of former Fish and Game Code Section 5672 without substantive change.

§ 45510. Notice of contamination

45510. (a) If the State Department of Public Health determines that an area from which any shellfish may be taken is or may be subject to sewage contamination, and that the taking of shellfish from that area does or may constitute a menace to the lives or health of human beings, that agency shall ascertain as accurately as it can the bounds of the contamination, and shall post notices on or in the area describing its bounds and prohibiting the taking of shellfish from the area.

(b) The taking of shellfish from the area is unlawful after the completion of the publication of the notices as prescribed in this article.

(c) The fact of posting the notices shall be published once a week for four successive weeks in a newspaper of general circulation published in the county in which the contaminated area is located. If no newspaper of general circulation is published in the county, the fact of the posting shall be published once a week for four successive weeks in a newspaper of general circulation published in an adjoining county.

Comment. Subdivision (a) of Section 45510 continues the first paragraph of former Fish and Game Code Section 5672 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 5673 without substantive change.

§ 45515. Enforcement

45515. The State Department of Public Health shall enforce the provisions of this chapter, and for that purpose the inspectors and employees of that agency may at any time enter public or private property where shellfish may be located.

Comment. Section 45515 continues former Fish and Game Code Section 5674 without substantive change. See also Health & Safety Code §§ 20, 131052(6) (directing revision of specified references in former Fish and Game Code to State Department of Health Services).

Note. The reference in existing Fish and Game Code Section 5674 to the State Department of Health Services would be revised by proposed Section 45515 to instead refer to the State Department of Public Health, pursuant to the directive of Health & Safety Code Sections 20 and 131052(6).

The Commission invites comment on whether that revision is appropriate.

CHAPTER 2. COMMERCIAL PROVISIONS [RESERVED]

PART 4. ABALONE

TITLE 1. ABALONE GENERALLY

CHAPTER 1. PRELIMINARY PROVISIONS

§ 45650. Mollusk

45650. For the purposes of Title 2 (commencing with Section 45400) of Part 3, an abalone is a mollusk.

Comment. Section 45650 is new. It is added for drafting convenience.

§ 45655. Provisions not exclusive

45655. The provisions of this part are not intended to be exclusive. Other provisions that govern abalone include, but are not limited to, the following provisions:

(a) Section 14875.

(b) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

Comment. Section 45655 is new. It is added for drafting convenience.

CHAPTER 2. TAKE

§ 45700. Take from ocean waters

45700. (a) A person shall not take abalone from ocean waters unless he or she first obtains, in addition to a valid California sport fishing license and any

1 applicable license validation or issued pursuant to this code, an abalone report
2 card, and maintains that report card in his or her possession while taking abalone.

3 (b) The department or an authorized license agent shall issue an abalone report
4 card upon payment of a fee of fifteen dollars (\$15) in the 2004 license year, which
5 shall be adjusted annually thereafter pursuant to Section 3755.

6 (c) The commission shall adjust the amount of the fees specified in subdivision
7 (b) as necessary, to fully recover, but not exceed, all reasonable administrative and
8 implementation costs of the department and the commission relating to those
9 licenses.

10 **Comment.** Section 45700 continues former Fish and Game Code Section 7149.8 without
11 substantive change.

12 See also Section 5800 (enforcement).

13 CHAPTER 3. IMPORTATION

14 § 45750. Requirements

15 45750. (a) Abalone or abalone meat legally taken outside this state may be
16 imported into this state when accompanied by a United States customhouse entry
17 certificate showing the place of origin, and a certificate or clearance from the
18 responsible governmental agency to the effect that the shipment was made in
19 compliance with the laws and regulations of the place or country of origin.

20 (b) Abalone and abalone meat described in subdivision (a) may be possessed in
21 this state, and shipped or transported out of the state, but all containers of that
22 abalone or abalone meat shall be marked with the abalone's place or country of
23 origin.

24 **Comment.** Section 45750 continues former Fish and Game Code Section 2371 without
25 substantive change.

26 CHAPTER 4. GEOGRAPHIC RESTRICTIONS

27 § 45800. Moratorium on take, possession, or landing

28 45800. (a) A moratorium is imposed on the taking, possessing, or landing of
29 abalone (genus *Haliotis*) for commercial or recreational purposes in ocean waters
30 of the state south of a line drawn due west magnetic from the center of the mouth
31 of the San Francisco Bay, including all islands offshore the mainland of
32 California, including, but not limited to, the Farallon Islands and the Southern
33 California Channel Islands.

34 (b) It is unlawful to take, possess, or land abalone for commercial or recreational
35 purposes in those ocean waters while the moratorium described in subdivision (a)
36 is in effect.

37 **Comment.** Section 45800 continues former Fish and Game Code Section 5521 without
38 substantive change.

39 See also Sections 4900, 5802, 5804 (enforcement).

1 **§ 45805. Commercial restriction on take**

2 45805. (a) In addition to the moratorium imposed by Section 45800, and
3 notwithstanding any other provision of law, it is unlawful to take abalone for
4 commercial purposes in District 2570, District 2575, District 2590 north of Point
5 Lobos, District 2610, District 2615, District 2630, or District 2640 between
6 Southeast Rock and the extreme westerly end of Santa Catalina Island.

7 (b) For a person who is required to obtain a license pursuant to Section 12900,
8 the possession of more than 12 individual abalone or abalone in excess of the
9 annual bag limit is prima facie evidence that the person possesses the abalone for
10 commercial purposes.

11 **Comment.** Section 45805 continues former Fish and Game Code Section 5521.5 without
12 substantive change.

13 See also Sections 4900, 5802, 5804 (enforcement).

14 **§ 45810. Collection as broodstock by aquaculturist**

15 45810. Notwithstanding Sections 45800 and 45805, a registered aquaculturist
16 may collect abalone for broodstock, in accordance with subdivision (a) of Section
17 23905.

18 **Comment.** Section 45810 continues former Fish and Game Code Section 5521.6 without
19 substantive change.

20 CHAPTER 5. RECREATIONAL ABALONE MANAGEMENT PROGRAM

21 **§ 45950. “Program”**

22 45950. For the purposes of this chapter, the following terms have the following
23 meanings:

24 (a) “Program” means the Recreational Abalone Management Program.

25 (b) “Research” includes, but is not limited to, investigation, experimentation,
26 monitoring, and analysis.

27 (c) “Management” means establishing and maintaining an optimal sustainable
28 utilization.

29 **Comment.** Subdivision (a) of Section 45950 continues the third sentence of former Fish and
30 Game Code Section 7149.9(a) without substantive change.

31 Subdivisions (b) and (c) continue the second sentence of former Fish and Game Code Section
32 7149.9(a)(1) without substantive change.

33 **§ 45955. Use of fees**

34 45955. (a) Fees received by the department pursuant to Section 45700 shall be
35 deposited in the Abalone Restoration and Preservation Account within the Fish
36 and Game Preservation Fund, which is hereby created. Notwithstanding Section
37 13340 of the Government Code, the moneys in the account are continuously
38 appropriated, without regard to fiscal year, to the department to be used only for
39 the Recreational Abalone Management Program.

(b) At least 15 percent of the funds deposited in the account shall be used for program activities south of San Francisco. To the extent possible, participants in the management activities of the program in that area shall be former commercial abalone divers.

(c) The department shall maintain internal accounts that ensure that the fees received pursuant to Section 45700 are disbursed for the purposes of subdivision (a). Not more than 20 percent of the fees received pursuant to Section 45700 shall be used for administration by the department.

(d) Unencumbered fees collected pursuant to Section 45700 during any previous calendar year may be expended for the purposes of subdivisions (a) and (b). All interest and other earnings on the fees received pursuant to Section 45700 shall be deposited in the account and shall be used for the purposes of subdivisions (a) and (b).

Comment. Subdivision (a) of Section 45955 continues the first two sentences of former Fish and Game Code Section 7149.9(a) without substantive change.

Subdivisions (b) through (d) continue former Fish and Game Code Section 7149.9(b)-(d) without substantive change.

§ 45960. Program elements

45960. The program shall include the following elements:

(a) Research and management of abalone and abalone habitat.

(b) Supplementary funding of allocations for the enforcement of statutes and regulations applicable to abalone, including, but not limited to, the acquisition of special equipment and the production and dissemination of printed materials, such as pamphlets, booklets, and posters, aimed at compliance with recreational abalone regulations.

(c) Direction for volunteer groups relating to abalone and abalone habitat management, presentations of abalone related matters at scientific conferences and educational institutions, and publication of abalone related material.

Comment. Section 45960 continues the first sentence of former Fish and Game Code Section 7149.9(a)(1), and former Fish and Game Code Section 7149.9(a)(2) and (3), without substantive change.

CHAPTER 6. ABALONE RECOVERY AND MANAGEMENT PLAN

§ 46000. Declaration of legislative intent

46000. It is the intent of the Legislature that the commission undertake management of abalone in a manner consistent with the abalone recovery and management plan submitted pursuant to Section 46005.

Comment. Section 46000 continues former Fish and Game Code Section 5520 without substantive change.

1 **§ 46005. Elements of plan**

2 46005. (a) On or before January 1, 2003, the department shall submit to the
3 commission a comprehensive abalone recovery and management plan. The plan
4 shall contain all of the following:

5 (1) An explanation of the scientific knowledge regarding the biology, habitat
6 requirements, and threats to abalone.

7 (2) A summary of the interim and long-term recovery goals, including a range of
8 alternative interim and long-term conservation and management goals and
9 activities. The department shall report why it prefers the recommended activities.

10 (3) Alternatives for allocating harvest between sport and commercial divers if
11 the allocation of the abalone harvest is warranted.

12 (4) An estimate of the time and costs required to meet the interim and long-term
13 recovery goals for the species, including available or anticipated funding sources,
14 and an initial projection of the time and costs associated with meeting the final
15 recovery goals. An implementation schedule shall also be included.

16 (5) An estimate of the time necessary to meet the interim recovery goals and
17 triggers for review and amendment of strategy.

18 (6) A description of objective measurable criteria by which to determine
19 whether the goals and objectives of the recovery strategy are being met and
20 procedures for recognition of successful recovery. These criteria and procedures
21 shall include, but not be limited to, the following:

22 (A) Specified abundance and size frequency distribution criteria for former
23 abalone beds within suitable habitat not dominated by sea otters.

24 (B) Size frequency distributions exhibiting multiple size classes as necessary to
25 ensure continued recruitment into fishable stock.

26 (C) The reproductive importance to the entire ecosystem of those areas proposed
27 for reopening to harvest and the potential impact of each reopening on the
28 recovery of abalone population in adjacent areas.

29 (b) Where appropriate, the recovery and management plan may include the
30 following:

31 (1) A network of no-take abalone reserves.

32 (2) A total allowable catch, reflecting the long-term yield each species is capable
33 of sustaining, using the best available science and bearing in mind the ecological
34 importance of the species and the variability of marine ecosystems.

35 (3) A permanent reduction in harvest.

36 **Comment.** Section 46005 continues former Fish and Game Code Section 5522(a) and (b)
37 without substantive change.

38 **§ 46010. Funding of plan**

39 46010. Funding to prepare the recovery and management plan described in
40 Section 46005 and any planning and scoping meetings shall be derived from the
41 fees collected for the abalone report card.

1 **Comment.** Section 46010 continues former Fish and Game Code Section 5522(c) without
2 substantive change.

3 **Note.** Existing Fish and Game Code Section 5522(c) (which would be continued by
4 proposed Section 46010) refers to an “abalone stamp.” Proposed Section 46010 would instead
5 refer to an “abalone report card,” as it is the Commission’s understanding that the commercial
6 take of abalone now requires a report card, rather than a stamp.

7 **The Commission invites comment on whether proposed Section 46010 should be so**
8 **revised, or should be revised to refer to an “abalone stamp or report card.”**

9 **§ 46015. Action following adoption of plan**

10 46015. (a) On or before January 1, 2008, and following the adoption of the
11 recovery and management plan by the commission, the department may apply to
12 the commission to reopen sport or commercial fishing in all or any portion of the
13 waters described in Section 45800.

14 (b) If the commission makes a finding that the resource can support additional
15 harvest activities and that these activities are consistent with the abalone recovery
16 plan, all or a portion of the waters described in Section 45800 may be reopened
17 and management measures prescribed and implemented, as appropriate.

18 (c) The commission may close or, where appropriate, may establish no-take
19 marine refuges in any area opened pursuant to this section if it makes a finding
20 that this action is necessary to comply with the abalone management plan.

21 **Comment.** Section 46015 continues former Fish and Game Code Section 5522(d) without
22 substantive change.

23 **§ 46020. Priority for previous commercial permittees**

24 46020. If the commission determines that commercial fishing is an appropriate
25 management measure, priority for participation in the fishery shall be given to
26 those persons who held a commercial abalone permit during the 1996–97 permit
27 year.

28 **Comment.** Section 46020 continues former Fish and Game Code Section 5522(e) without
29 substantive change.

30 **CHAPTER 7. RECREATIONAL ABALONE ADVISORY COMMITTEE**

31 **§ 46050. Committee requirements**

32 46050. (a) The director shall appoint a Recreational Abalone Advisory
33 Committee, consisting of nine members who shall serve without compensation.
34 The members of the committee shall be selected as follows:

35 (1) Six members who are not officers or employees of the department. The six
36 members shall be residents of California, and meet the following requirements:

37 (A) Two members shall reside north of the southern boundary line of Marin
38 County and a line extending due east from the easternmost point of Marin County
39 located in San Pablo Bay. The two members shall be selected from nominations
40 submitted by the Northern California Shellfish Assessment Program or by

1 individuals or organizations that actively participate in the recreational abalone
2 fishery, except that not more than one of the members selected shall be an active
3 or former commercial abalone diver or involved in commercial seafood processing
4 or marketing.

5 (B) Two members shall reside south of the southern boundary line of Marin
6 County and a line extending due east from the easternmost point of Marin County
7 located in San Pablo Bay, and north of the boundary between Santa Barbara and
8 San Luis Obispo Counties and a line extending due east from the easternmost
9 point in that boundary line. The two members shall be selected from nominations
10 submitted by the Central California Council of Divers, the Southern California
11 Shellfish Assessment Program, the Northern California Shellfish Assessment
12 Program, or by individuals or organizations that actively participate in the
13 recreational abalone fishery, except that not more than one of the members
14 selected shall be an active or former commercial abalone diver or involved in
15 commercial seafood processing or marketing.

16 (C) Two members shall reside south of the boundary between Santa Barbara and
17 San Luis Obispo Counties and a line extending due east from the easternmost
18 point in that boundary line. The two members shall be selected from nominations
19 submitted by the Greater Los Angeles Council of Divers, the San Diego Council
20 of Divers, the Channel Islands Council of Divers, the Southern California
21 Shellfish Assessment Program, or by individuals or organizations that actively
22 participate in the recreational abalone fishery, except that not more than one of the
23 members selected shall be an active or former commercial abalone diver or
24 involved in commercial seafood processing or marketing.

25 (2) One member shall represent the department in enforcement activities and
26 shall be selected from personnel in the Wildlife Protection Division.

27 (3) Two members shall be marine scientists who are or have been involved in
28 abalone research at universities, state universities, or in state or federal programs.
29 Not more than one of the persons shall be an officer or employee of the
30 department.

31 (b) No member shall be involved in or profit from the culture for sale
32 (commercial aquaculture) of abalone.

33 (c) The advisory committee shall meet at least once each calendar year to review
34 proposals, and recommend projects and budgets to the director for the expenditure
35 of fees received pursuant to Section 45700. The committee may review progress
36 reports and the results of projects funded under this section, and make
37 recommendations to the director regarding abalone resource management.

38 **Comment.** Section 46050 continues former Fish and Game Code Section 7400 without
39 substantive change.

1 TITLE 2. COMMERCIAL PROVISIONS

2 CHAPTER 1. PRELIMINARY PROVISIONS

3 § 46100. Application of title

4 46100. For purposes of Section 45005, the provisions in this title are commercial
5 provisions.

6 **Comment.** Section 46100 is new. It is added for drafting convenience.

7 CHAPTER 2. ABALONE RESOURCES RESTORATION AND
8 ENHANCEMENT PROGRAM

9 § 46150. Funding of program

10 46150. (a) Any landing fee collected pursuant to former Fish and Game Code
11 Section 8051.3 shall be deposited in the Fish and Game Preservation Fund, and
12 shall be used only for the Abalone Resources Restoration and Enhancement
13 Program.

14 (b) The department shall maintain internal accounts necessary to ensure that the
15 funds are disbursed for the purposes in this section.

16 (c) The department may use for administration no more of the landing fee
17 collected pursuant to former Fish and Game Code Section 8051.3 than an amount
18 equal to the regularly approved department indirect overhead rate.

19 (d) Any interest on the revenues from the landing fee collected pursuant to
20 former Fish and Game Code Section 8051.3 shall be deposited in the fund, and
21 used for the purposes in this subdivision.

22 **Comment.** Section 46150 continues former Fish and Game Code Section 8051.4(a) without
23 substantive change.

24 PART 5. CLAMS

25 TITLE 1. CLAMS GENERALLY

26 CHAPTER 1. PRELIMINARY PROVISIONS

27 § 46200. Mollusk

28 46200. For the purposes of Title 2 (commencing with Section 45400) of Part 3, a
29 clam is a mollusk.

30 **Comment.** Section 46200 is new. It is added for drafting convenience.

1 **§ 46205. Provisions not exclusive**

2 46205. The provisions of this part are not intended to be exclusive. Other
3 provisions that govern clams include, but are not limited to, the following
4 provisions:

5 (a) Section 19805.

6 (b) Section 20710.

7 (c) Section 23355.

8 (d) Section 24100.

9 (c) Section 60325.

10 **Comment.** Section 46205 is new. It is added for drafting convenience.

11 CHAPTER 2. PISMO CLAMS

12 **§ 46250. Possession**

13 46250. No pismo clam not in the shell may be possessed, except when it is being
14 prepared for immediate consumption.

15 **Comment.** Section 46250 continues former Fish and Game Code Section 7290 without
16 substantive change.

17 **§ 46255. Shipping**

18 46255. No pismo clam taken in this state may be shipped.

19 **Comment.** Section 46255 continues former Fish and Game Code Section 2368 without
20 substantive change.

21 **§ 46260. Importing**

22 46260. (a) Pismo clams taken outside this state may be imported into this state
23 when accompanied by a United States customhouse entry certificate showing their
24 place of origin, and a certificate or clearance from the responsible governmental
25 agency to the effect that such shipment was made in compliance with the laws and
26 regulations of the place or country of origin.

27 (b) Pismo clams authorized for importation pursuant to subdivision (a) may be
28 canned and shipped outside this state.

29 (c) The commission may adopt regulations governing the inspection and
30 marking of pismo clams imported into this state. The cost of such inspection and
31 marking shall be paid by the importer of the pismo clams.

32 **Comment.** Section 46260 continues former Fish and Game Code Section 2369 without
33 substantive change.

34 CHAPTER 3. MISCELLANEOUS PROVISIONS

35 **§ 46300. Digging instruments**

36 46300. No instrument capable of being used to dig clams may be possessed
37 between one-half hour after sunset and one-half hour before sunrise, on any beach

1 of this state, except tools and implements used in the work of cleaning, repairing,
2 or maintaining a beach, when possessed by a person authorized by appropriate
3 authority to perform that work.

4 **Comment.** Section 46300 continues former Fish and Game Code Section 7332 without
5 substantive change.

6 TITLE 2. COMMERCIAL PROVISIONS

7 CHAPTER 1. PRELIMINARY PROVISIONS

8 § 46350. Application of title

9 46350. For purposes of Section 45005, the provisions in this title are commercial
10 provisions.

11 **Comment.** Section 46350 is new. It is added for drafting convenience.

12 CHAPTER 2. TAKE

13 § 46400. When take permitted

14 46400. Except as otherwise provided in this chapter, in Districts 2580, 2585, and
15 2615, clams may be taken between September 1 and April 30, and in other
16 districts clams may be taken at any time.

17 **Comment.** Section 46400 continues former Fish and Game Code Section 8340 without
18 substantive change.

19 § 46405. Commission regulation of take of freshwater claims for commercial purpose

20 46405. Notwithstanding paragraph (2) of subdivision (b) of Section 1000, the
21 commission shall regulate the taking of freshwater clams for commercial
22 purposes.

23 **Comment.** Section 46405 continues former Fish and Game Code Section 8475 without
24 substantive change.

25  **Note.** Existing Fish and Game Code Section 8475 (which would be continued by proposed
26 Section 46405), is located in an article of the existing code entitled “Fresh-water Fish for Bait.”

27 **The Commission invites comment on whether this section is intended to apply only to**
28 **taking of freshwater clams for use as bait.**

29 § 46410. Littlenecks, chiones and hard-shell cockles

30 46410. (a) All species of clams commonly known as littlenecks, chiones and
31 hard-shell cockles, including thin-shelled littleneck, common littleneck, Japanese
32 littleneck, rough-sided littleneck, smooth chione, wavy chione, and banded chione,
33 may be taken at any time, except in the waters of Marin County, where they may
34 be taken only between September 1 and March 31.

1 (b) Notwithstanding subdivision (a), a clam listed in subdivision (a) that
2 measures less than one and one-half inches in greatest diameter may not be taken,
3 possessed, transported, or sold at any time.

4 (c) The bag limit on clams listed in subdivision (a) is 50 per day, in the
5 aggregate. Not more than one daily bag limit of clams listed in subdivision (a)
6 may be possessed by any person during one day.

7 (d) Notwithstanding any other provision of this section, a clam listed in
8 subdivision (a), when legally taken outside the state and brought within the state
9 pursuant to this code, may be possessed, transported, and sold without restrictions,
10 except that any shipment of clams listed in subdivision (a) into this state shall be
11 accompanied by a bill of lading, or invoice, showing the species, total number or
12 weight, and the origin of the clams.

13 **Comment.** Section 46410 continues former Fish and Game Code Section 8341 without
14 substantive change.

15 **§ 46415. Northern razor clams**

16 46415. Northern razor clams (*Siliqua patula*) may not be sold, except that
17 Northern razor clams taken outside the state and brought within the state may be
18 possessed, transported, and sold, without restriction.

19 **Comment.** Section 46415 continues former Fish and Game Code Section 8343 without
20 substantive change.

21 **§ 46420. Pismo clams**

22 46420. It is unlawful for any person to sell or purchase a pismo clam taken in
23 this state.

24 **Comment.** Section 46420 continues former Fish and Game Code Section 8346 without
25 substantive change.

26 **§ 46425. Washington clams and gappers**

27 46425. (a) In Districts 2515, 2580, and 2585, the bag limit on Washington clams
28 and gappers, sometimes known as bigneck clams, is 25 in the aggregate. In all other
29 districts the bag limit is 10 Washington clams and 10 gappers.

30 (b) No more than the daily bag limit may be possessed by any person during one
31 day, except that a market or restaurant, where clams are sold to the public, may
32 possess any number of Washington clams and gappers legally taken.

33 (c) In Districts 2580 and 2585, the holder of a commercial fishing license who
34 has in his possession a current daily written order for clams issued by a fish dealer
35 or restaurant may possess any number of Washington clams and gappers legally
36 taken, up to but not exceeding the number specified in the order.

37 **Comment.** Section 46425 continues former Fish and Game Code Section 8342 without
38 substantive change.

PART 6. CRAB

TITLE 1. CRAB GENERALLY

CHAPTER 1. PRELIMINARY PROVISIONS

§ 46500. Crustacean

46500. For the purposes of Title 2 (commencing with Section 45400) of Part 3, a crab is a crustacean.

Comment. Section 46500 is new. It is added for drafting convenience.

§ 46505. Provisions not exclusive

46505. The provisions of this part are not intended to be exclusive. Other provisions that govern crab include, but are not limited to, the following provisions:

- (a) Section 16555.
- (b) Section 19205.
- (c) Section 19500.
- (d) Section 19805.
- (e) Section 20710.
- (f) Section 20720.
- (g) Section 47005.
- (h) Section 47450.

Comment. Section 46505 is new. It is added for drafting convenience.

CHAPTER 2. IMPORTATION

§ 46550. Importation of crab meat

46550. Crab meat from outside the state may be imported into the state under regulations of the commission.

Comment. Section 46550 continues former Fish and Game Code Section 2364 without substantive change.

TITLE 2. COMMERCIAL PROVISIONS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 46800. Application of title

46800. For purposes of Section 45005, the provisions in this title are commercial provisions.

Comment. Section 46800 is new. It is added for drafting convenience.

1 **§ 46855. Definitions**

2 46855. Unless the provision or context otherwise requires, the definitions in this
3 section govern the construction of this title.

4 (a) “Dungeness crab” or “market crab” means crab of the species *Cancer*
5 *magister*.

6 (b) “Reconstruction” means major work on the hull of a vessel to make that
7 vessel operable in the California crab fishery if that work may reasonably be
8 expected to be of a duration that will preclude operation of that vessel in the crab
9 fishery for the length of the crab season or longer.

10 (c) “Rock crab” means any crab of the genus *Cancer* other than Dungeness crab
11 and includes rock crab (*Cancer antennarius*), red crab (*Cancer productus*), and
12 yellow crab (*Cancer anthonyi*).

13 (d) “Under construction” means having plans and materials and proceeding with
14 work toward the completion of an operational Dungeness crab fishing vessel.

15 **Comment.** Section 46855 continues former Fish and Game Code Section 8275 without
16 substantive change.

17 **CHAPTER 2. TAKE AND POSSESSION**

18 **§ 47000. Use of trawl or drag net**

19 47000. It is unlawful to take or possess more than 500 pounds of crabs on any
20 boat on which any type of trawl or drag net is carried or operated.

21 **Comment.** Section 47000 continues former Fish and Game Code Section 8834 without
22 substantive change.

23 **§ 47005. Concurrent take for commercial and sport purposes**

24 47005. No vessel may be used to take and land crab for both commercial and
25 sport purposes in the same day.

26 **Comment.** Section 47005 continues former Fish and Game Code Section 9012(a) without
27 substantive change.

28 **§ 47010. Restrictions on eligibility to take crab**

29 47010. (a) Eligibility to take crab in waters of the state and offshore for
30 commercial purposes may be subject to restrictions, including, but not limited to,
31 restrictions on the number of traps utilized by that person, if either of the
32 following occurs:

33 (1) A person holds a California Dungeness crab permit with California landings
34 of less than 5,000 pounds between November 15, 2003, and July 15, 2008,
35 inclusive, as reported in California landings receipts.

36 (2) A person has purchased a Dungeness crab permit on or after July 15, 2008,
37 from a permitholder whose California landings were less than 5,000 pounds
38 between November 15, 2003, and July 15, 2008, inclusive, as reported in
39 California landings receipts.

(b) This section shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute that becomes operative on or before January 1, 2030, deletes or extends the date on which this section becomes inoperative or is repealed.

Comment. Subdivision (a) of Section 47010 continues former Fish and Game Code Section 8276.4(i) without substantive change.

Subdivision (b) continues the part of former Fish and Game Code Section 8276.4(j) as it applied to former Fish and Game Code Section 8276.4(i) without substantive change.

Note. Proposed Section 47060(b) would continue Section 8276(j) (as it applied to 8276.4(i)), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47015. Crab meat and frozen crab

47015. Crab meat and frozen crab taken during the open season may be possessed, transported, and sold at any time, subject to the regulations of the commission. The cost of inspection and marking, under the regulations of the commission, shall be paid by the owner or seller of the crab or crab meat.

Comment. Section 47015 continues former Fish and Game Code Section 8281 without substantive change.

CHAPTER 3. DUNGENESS CRAB

Article 1. General Provisions

§ 47050. Provisions not exclusive

47050. The provisions of this part are not intended to be exclusive. Other provisions that govern Dungeness crab include, but are not limited to, the following provisions:

(a) Section 19205.

(b) Section 19230.

(c) Section 25125.

(d) Section 20720.

(e) Section 47450.

Comment. Section 47050 is new. It is added for drafting convenience.

§ 47055. Prohibited sale of take from specified waters

47055. It is unlawful to sell any Dungeness crab taken in any of the following waters:

(a) The Eel River and its tributaries, between the Pacific Ocean and the west line of Sec. 35, T. 3 N., R. 1 W., H. B. & M.

(b) The Pacific Ocean, within a radius of one mile from the mouth of the Eel River.

(c) Humboldt Bay, including the entrance of that bay, and the Pacific Ocean within a radius of one mile from the extreme western point of the north jetty at the

entrance of the bay, and for a radius of one mile from the extreme western point of the south jetty at the entrance of the bay.

(d) Trinidad Bay, the body of water within the area enclosed by a line running southeasterly from the westernmost point of Trinidad Head to the mouth of Luftenholtz Creek.

(e) Bodega Lagoon.

Comment. Section 47055 continues former Fish and Game Code Section 8279 without substantive change.

§ 47060. Take in Crescent City Harbor area

47060. Except as provided in Section 47305 or Article 4 (commencing with Section 47350), Dungeness crab may not be taken for commercial purposes in any district, or part of a district, lying within the portions of Crescent City Harbor between the south sand barrier and the breakwater.

Comment. Section 47060 continues former Fish and Game Code Section 8276(c) without substantive change.

 **Note.** Proposed Section 47060 would continue Section 8276(c), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47065. Use of trawl or drag net south of Point Reyes

47065. It is unlawful for any person on a vessel on which any type of trawl or drag net is carried or operated to take or possess Dungeness crab, or to transfer Dungeness crab to another vessel, south of a line extending due west, true, from Point Reyes.

Comment. Section 47065 continues former Fish and Game Code Section 8834.5 without substantive change.

§ 47070. Size and sex restrictions

47070. (a) Except as otherwise provided, it is unlawful to take, possess, buy, or sell a male Dungeness crab of less than six and one-quarter (6 1/4) inches in breadth, or a female Dungeness crab of any breadth.

(b) In any load or lot of Dungeness crabs, one percent or less in number may be less than six and one-quarter (6 1/4) inches and equal to or greater than five and three-quarters (5 3/4) inches in breadth.

(c) The breadth of a Dungeness crab shall be measured by the shortest distance through the body from edge of shell to edge of shell directly from front of points (lateral spines).

Comment. Section 47070 continues former Fish and Game Code Section 8278 without substantive change.

 **Note.** Existing Fish and Game Code Section 8278 (which would be continued by proposed Section 47070) generally prohibits the take, possession, purchase, or sale, of undersized male Dungeness crabs, or female Dungeness crabs of any size, “except that not more than 1 percent in number of any load or lot of Dungeness crabs may be less than six and one-quarter (6 1/4) inches in breadth but not less than five and three-quarters (5 3/4) inches in breadth.”

Is this exception intended to include female Dungeness crabs of the specified breadth?

Article 2. Geographic Restrictions

§ 47150. Delayed opening season in District 2570, 2575, 2580, or 2585

47150. (a) If there is any delay ordered by the director pursuant to Article 4 (commencing with Section 47350) in the opening of the Dungeness crab fishery in District 2570, 2575, 2580, or 2585, a vessel shall not take or land crab within District 2570, 2575, 2580, and 2585 during any closure.

(b) If there is any delay in the opening of the Dungeness crab season pursuant to Article 4 (commencing with Section 47350), the opening date in District 2570, 2575, 2580, and 2585 shall be preceded by a 64-hour gear setting period, as ordered by the director.

(c) This section shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2030, deletes or extends the dates on which it becomes inoperative and is repealed.

Comment. Section 47150 continues former Fish and Game Code Section 8276.3 without substantive change.

Notes. (1) Read literally, Section 8276.3 prohibits the take of crab in *all* of the listed districts if *any* of those districts is closed. **The Commission invites comment on whether that is the intended meaning.**

(2) Proposed Section 47150 would continue Section 8276.3, which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47155. Ocean waters

47155. (a) A person shall not take, possess onboard, or land Dungeness crab for commercial purposes from a vessel in ocean waters for 30 days after the opening of those waters for the commercial Dungeness crab fishing season, if both of the following events have occurred:

(1) The opening of the season has been delayed in those waters.

(2) The same vessel was used to take, possess onboard, or land Dungeness crab for commercial purposes, from ocean waters outside of the delayed waters, before the opening of the delayed waters for the season.

(b) For purposes of this section, a delay in the opening of ocean waters for the commercial Dungeness crab fishing season has occurred in either of the following circumstances:

(1) The opening of those waters for the season has been delayed pursuant to Section 11500 or Article 4 (commencing with Section 47350).

(2) The opening of those waters for the season has been delayed in Oregon or Washington due to the tri-state quality testing program or by a closure to prevent a risk to human health.

(c) This section shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2030, deletes or extends the dates on which it becomes inoperative and is repealed.

Comment. Subdivisions (a) and (b) of Section 47155 continue former Fish and Game Code Section 8279.1(a)-(b) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 8279.1(d) without substantive change.

See also Section 5834 (enforcement).

Note. Proposed Section 47155 would continue Section 8279.1(a), (b), and (d), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

Article 3. Seasons Generally

§ 47300. Seasons

47300. Except as provided in Section 47305 or Article 4 (commencing with Section 47350):

(a) Dungeness crab may be taken for commercial purposes in District 2570, 2575, 2580, or 2585 only between December 1 and July 15.

(b) Dungeness crab may be taken for commercial purposes in all other districts only between November 15 and June 30.

(c) All Dungeness crab traps shall be removed from state waters by 11:59 p.m. on the last day of the applicable Dungeness crab season.

Comment. Section 47300 continues former Fish and Game Code Section 8276(a), (b) and (d) without substantive change.

Note. Proposed Section 47300 would continue Section 8276(a), (b), and (d), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47305. Extension of season

47305. (a) The director may extend the Dungeness crab season in any district or part of a district, as provided in this section.

(b) Before extending a Dungeness crab season, the director shall consider written findings of the department regarding the state of the Dungeness crab resource in the district, or part of a district, which consider, but are not limited to, population and maturity. The director may extend the season only if the written findings do not conclude that the extension will damage the Dungeness crab resource.

(c) The director shall not extend the Dungeness crab season past August 31 in a district, or part thereof, north of the southern boundary of Mendocino County or past July 31 in a district, or part of a district, south of Mendocino County. The director shall order closure of the season at any time during the extension period if the director determines that further fishing will damage the Dungeness crab resource.

1 **Comment.** Section 47305 continues former Fish and Game Code Section 8277 without
2 substantive change.

3 Article 4. Delayed Opening Seasons

4 **§ 47350. Authority of director to order delay**

5 47350. In District 2570, 2575, 2580, or 2585, the director may order a delay in
6 the opening of the Dungeness crab fishery beyond December 1 in any year. The
7 delay in opening shall not be delayed beyond January 15 of any year.

8 **Comment.** Section 47350 continues former Fish and Game Code Section 8276.2(a) without
9 substantive change.

10 **§ 47355. Authority of director to order quality testing**

11 47355. On or about November 1 of each year, the director may authorize one or
12 more operators of commercial fishing vessels to take and land a limited number of
13 Dungeness crab, for the purpose of quality testing pursuant to a testing program
14 conducted by, or on behalf of, the Pacific States Marine Fisheries Commission, or
15 by an entity approved by the department.

16 **Comment.** Section 47355 continues former Fish and Game Code Section 8276.2(b)(1) without
17 substantive change.

18 **§ 47360. Testing guidelines**

19 47360. For purposes of the testing program, the department shall develop
20 guidelines after consulting with representatives of the California Dungeness crab
21 industry, which shall include California delegates to the Tri-State Dungeness Crab
22 Commission, members of the California Dungeness Crab Task Force, or both. The
23 guidelines shall include the following:

24 (a) Suggested guidelines for the management of the funds received from, but not
25 limited to, the sale of the crab meat pursuant to Section 47370, including the
26 suggested guideline that funds in excess of the program costs may be donated for
27 charitable purposes.

28 (b) Guidelines for the testing program.

29 (c) Guidelines that establish measures to track crab caught for purposes of the
30 testing program, including, but not limited to, the guideline that all crab caught
31 and sold for the testing program shall be canned.

32 **Comment.** Section 47360 continues former Fish and Game Code Section 8276.2(b)(2)(B)
33 without substantive change.

34 **§ 47365. Delay in season opening in District 2570, 2575, 2580, or 2585 based on testing**

35 47365. (a) The entity authorized to conduct the approved testing program may
36 test, or cause to be tested, crabs taken for quality and soft shells pursuant to the
37 approved testing program.

(b) The director shall order the opening of the Dungeness crab season in Districts 6, 7, 8, and 9 on December 1 if the quality tests authorized in Section 47355 indicate the Dungeness crabs are not soft-shelled or low quality.

(c) If the tests are conducted on or about November 1 and result in a finding that Dungeness crabs are soft-shelled or low quality, the director shall authorize a second test to be conducted on or about November 15 pursuant to the approved testing program.

(d) If the second test results in a finding that Dungeness crabs are soft-shelled or low quality, the director may order the season opening delayed for a period of 15 days and may authorize a third test to be conducted on or about December 1.

(e) If the third test results in a finding that Dungeness crabs remain soft-shelled or of low quality, the director may order the season opening delayed for a period of an additional 15 days and authorize a fourth test to be conducted.

(4) This procedure may continue to be followed, except that tests shall not be conducted after January 15 for that season, and the season opening shall not be delayed by the director later than January 15.

Comment. Section 47365 continues former Fish and Game Code Section 8276.2(c), without substantive change.

 **Note.** Proposed Section 47365 would continue Section 8276.2(c), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47370. Sale of crab meat extracted for testing

47370. (a) The meat extracted from Dungeness crab tested pursuant to Section 47355 may be sold by the entity approved by the department to conduct the testing, and revenues from that sale may be used for purposes of managing the testing program.

(b) Revenues shall be deposited in an account managed and overseen by the Pacific States Marine Fisheries Commission.

Comment. Section 47370 continues former Fish and Game Code Section 8276.2(b)(2)(A) without substantive change.

§ 47375. Inoperative date of article

47375. This article shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute that becomes operative on or before January 1, 2030, deletes or extends the date on which this article becomes inoperative or is repealed.

Comment. Section 47375 continues former Fish and Game Code Section 8276.2(d) without substantive change.

 **Note.** Proposed Section 47375 would continue Section 8276.2(d), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

Article 5. Use of Traps Generally

§ 47450. Use of traps

47450. (a) Subject to Title 6 (commencing with Section 19200) of Part 6 of Division 6, and the provisions of this title, Dungeness crab may be taken with Dungeness crab traps.

(b) A Dungeness crab trap may have any number of openings of any size. However, every Dungeness crab trap shall have at least two rigid circular openings of not less than 4 1/4 inches, inside diameter, on the top or side of the trap. If both of the openings are located on the side of the trap, at least one of the openings shall be located so that at least one-half of the opening is in the upper half of the trap.

(c) In District 2570, 2575, 2580, or 2585, no trap shall be used to take Dungeness crab if that trap is attached to another trap or other traps by a common line.

Comment. Subdivision (a) of Section 47450 combines and continues the first sentence of former Fish and Game Code Section 8284(a) and former Fish and Game Code Section 9011(a)(1) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 9011(a)(2) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 9012(b) without substantive change.

Note. The first sentence of existing Fish and Game Code Section 8284(a) (which would be continued by proposed Section 47450(a)) provides that crab traps may be used to take Dungeness crab for commercial purposes, “[s]ubject to” the article in the existing law in which Section 8284 appears. In the proposed law, all provisions contained in that article have been continued in the title containing proposed Section 47450(a). However, that proposed title contains several additional provisions relevant to the subject matter of Section 8284 that are *not* in the “Article 6” referenced in that section: Sections 8834, 8834.5, 9011, and 9012.

The Commission invites comment on whether the additional inclusion of these provisions in the cross-reference in proposed Section 47450(a) would cause any problems.

§ 47455. Setting and baiting of traps

47455. (a) Except as provided in subdivision (b), crab traps may be set and baited 18 hours in advance of the opening date of the Dungeness crab season, if no other attempt is made to take or possess Dungeness crab.

(b) Crab traps may be set and baited 64 hours prior to the opening date of the Dungeness crab season in District 2570, 2575, 2580, or 2585. Crab traps may be set and baited in advance of that opening date in those districts, if no other attempt is made to take or possess Dungeness crab in those districts.

Comment. Section 47455 continues former Fish and Game Code Section 8283 without substantive change.

(b) Subject to the provisions of this title, rock crab may be taken incidentally with a Dungeness crab trap used pursuant to Section 47450 to take Dungeness crab, provided that the incidental taking occurs only during the season when it is lawful to take both species. A rock crab taken incidentally with a Dungeness crab trap in non-compliance with this subdivision shall be immediately returned to the waters from which it was taken.

Subdivision (b) continues former Fish and Game Code Section 9011(a)(3) without substantive change.

The Commission invites comment on whether the additional inclusion of these provisions in the cross-reference in proposed Section 47460(b) would cause any problems.

47465. On or before January 1, 2013, the department shall report to the appropriate policy and fiscal committees of the Legislature the impacts, if any, of the changes made to former Fish and Game Code Section 911 by Chapter 478 of the Statutes of 2009. The report shall include information about citations issued pursuant to that section relating to both rock crab and Dungeness crab for the years 2010 to 2012, inclusive.

Note. The Commission invites comment on whether existing Fish and Game Code Section 9011(c) (which would be continued by proposed Section 47465) is obsolete, and need not be continued in the proposed law.

47600. For purposes of this article, “council” means the Ocean Protection Council established pursuant to Section 35600 of the Public Resources Code.

– 782 –

1 **§ 47605. Legislative declaration**

2 47605. (a) It is the intent of the Legislature that the department, the council, and
3 the Dungeness crab task force work with the Pacific States Marine Fisheries
4 Commission and the Tri-State Dungeness Crab Commission to resolve any issues
5 pertaining to moving the fair start line south to the border of California and
6 Mexico.

7 (b) For purposes of this section, the resolution of issues pertaining to the fair
8 start line shall be limited to assessing the positive and negative implications of
9 including District 2590 in the tri-state agreement, including working with the Tri-
10 State Dungeness Crab Commission to amend Oregon and Washington laws to
11 include District 2590 in the regular season fair start clause, and discussion of
12 providing different rules for District 2590 with regard to preseason quality testing.

13 **Comment.** Section 47605 continues former Fish and Game Code Section 8276.5(g) without
14 substantive change.

15 **§ 47610. Adoption of program**

16 47610. In consultation with the Dungeness crab task force, or its appointed
17 representatives, the director shall adopt a program, by March 31, 2013, for
18 Dungeness crab trap limits for all California permits.

19 **Comment.** Section 47610 continues the first sentence of former Fish and Game Code Section
20 8276.5(a) without substantive change.

21 See also Section 5836 (enforcement).

22 **§ 47615. Program requirements**

23 47615. Unless the director finds that there is consensus in the Dungeness crab
24 industry that modifications to the following requirements are more desirable, with
25 evidence of consensus, including, but not limited to, the record of the Dungeness
26 crab task force, the program shall include all of the requirements of this article.

27 **Comment.** Section 47615 continues the second sentence of former Fish and Game Code
28 Section 8276.5(a) without substantive change.

29 **§ 47620. Tier requirements**

30 47620. (a) The program shall contain seven tiers of Dungeness crab trap limits
31 based on California landings receipts under California permits between November
32 15, 2003, and July 15, 2008, as follows:

33 (a) The 55 California permits with the highest California landings shall receive a
34 maximum allocation of 500 trap tags.

35 (2) The 55 California permits with the next highest California landings to those
36 in paragraph (1) shall receive a maximum allocation of 450 trap tags.

37 (3) The 55 California permits with the next highest California landings to those
38 in paragraph (2) shall receive a maximum allocation of 400 trap tags.

39 (4) The 55 California permits with the next highest California landings to those
40 in paragraph (3) shall receive a maximum allocation of 350 trap tags.

(5) The 55 California permits with the next highest California landings to those in paragraph (4) shall receive a maximum allocation of 300 trap tags.

(6) The remaining California permits with the next highest California landings to those in paragraph (5), which are not described in paragraph (1) or (2) of subdivision (a) of Section 47010 shall receive a maximum allocation of 250 trap tags.

(7) The California permits described in paragraph (1) or (2) of subdivision (a) of Section 47010 shall receive a maximum allocation of 175 tags. The tags in this tier shall not be transferable for the first two years of the program.

(b) Notwithstanding subdivision (a), the director shall not remove a permitholder from a tier described in that subdivision if, after an allocation is made pursuant to that subdivision, an appeal pursuant to Section 47650 places a permitholder in a tier different than the original allocation.

Comment. Section 47620 continues former Fish and Game Code Section 8276.5(a)(1)-(2) without substantive change.

Notes. (1) The Commission invites comment on whether the second sentence of proposed Section 47620(a)(7) should be repealed as obsolete.

(2) Proposed Section 47620 would continue Section 8276.5(a)(1), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47625. Program participant requirements

47625. Participants in the program shall meet all of the following requirements:

(a) Unless a participant receives a waiver pursuant to Section 47630, pay a biennial fee for each trap tag issued pursuant to this article to pay the pro rata share of costs of the program, including, but not limited to, informing permitholders of the program, collecting fees, acquiring and sending trap tags to permitholders, paying for a portion of enforcement costs, and monitoring the results of the program. The fee shall not exceed five dollars (\$5) per trap, per two-year period. All of the trap tags allocated to each permit pursuant to this article shall be purchased by the permitholder or the permit shall be void.

(b) Purchase a biennial crab trap limit permit of not more than one thousand dollars (\$1,000) per two-year period to pay for the department's reasonable regulatory costs.

(c) Not lease a crab trap tag.

(d) Transfer a tag only as part of a transaction to purchase a California permitted crab vessel.

(e) A Dungeness crab trap that is fished shall contain a trap tag that is fastened to the main buoy, and an additional tag provided by the permitholder attached to the trap. The department shall mandate the information that is required to appear on both buoy and trap tags.

Comment. Section 47625 continues former Fish and Game Code Section 8276.5(a)(3) without substantive change.

1 **§ 47630. Fee waiver for military service**

2 47630. (a) The department shall issue a participant a waiver from the biennial
3 fee for each trap tag described in subdivision (a) of Section 47625 if the
4 participant is unable to fish due to mandatory military service and the participant
5 submits a request for a waiver to the department at the same time that the
6 participant renews the permit issued pursuant to subdivision (b) of Section 47625.

7 (b) A participant who receives a waiver pursuant to this section shall not apply
8 to the department to fish for Dungeness crab during the first year of the waiver,
9 but may apply to fish for Dungeness crab during the second year of the waiver if
10 the participant pays the full cost of the biennial fee for each trap tag.

11 (c) The department shall not limit the number of times a participant may request
12 a waiver.

13 **Comment.** Section 47630 continues former Fish and Game Code Section 8276.5(a)(4) without
14 substantive change.

15 **§ 47635. Transit with valid out-of-state tags**

16 47635. Notwithstanding subdivision (e) of Section 47625, a vessel may transit
17 state waters with Dungeness crab traps that are not tagged pursuant to subdivision
18 (e) of Section 47625 if the traps contain either a valid Oregon or Washington trap
19 tag, no crab species are onboard the vessel, and the traps are not deployed in state
20 waters.

21 **Comment.** Section 47635 continues former Fish and Game Code Section 8276.5(a)(5) without
22 substantive change.

23 **§ 47640. Department accounting**

24 47640. The department shall annually provide an accounting of all costs
25 associated with the crab trap limit program. The department shall use excess funds
26 collected to reduce the cost of the crab trap limit permit fee or tag fee in
27 subsequent years of the program.

28 **Comment.** Section 47640 continues former Fish and Game Code Section 8276.5(a)(6) without
29 substantive change.

30 **§ 47645. Lost tags**

31 47645. Permitholders may replace lost tags by application to the department,
32 and payment of a fee not to exceed the reasonable costs incurred by the
33 department, which may be waived or reduced by the department in the case of
34 catastrophic loss of tags.

35 **Comment.** Section 47645 continues former Fish and Game Code Section 8276.5(a)(7) without
36 substantive change.

37 **§ 47650. Appeal of trap tag allocation**

38 47650. Any Dungeness crab permitholder may submit to the director an appeal
39 of a trap tag allocation received pursuant to this section, by March 31, 2014, on a
40 permit-by-permit basis for the purpose of revising upward or downward any trap

tag allocation. Any appeal to revise upward a trap tag allocation shall be based on evidence that a permit's California landings during the period between November 15, 2003, and July 15, 2008, inclusive, were reduced as a result of unusual circumstances and that these circumstances constitute an unfair hardship, taking into account the overall California landings history as indicated by landing receipts associated with the permit. The director shall initiate the appeal process within 12 months of receiving an appeal request. The appeal shall be heard and decided by an administrative law judge of the Office of Administrative Hearings, whose decision shall constitute the final administrative decision. Any Dungeness crab permit holder requesting an appeal to revise upward the permit holder's trap tag allocation shall pay all expenses, including a nonrefundable filing fee, as determined by the department, to pay for the department's reasonable costs associated with the appeal process described in this section.

Comment. Section 47650 continues former Fish and Game Code Section 8276.5(a)(8) without substantive change. An obsolete reference to "subparagraph (B)" was not continued.

Notes. (1) Existing Fish and Game Code Section 8276.5(a)(8) provides for an appeal of an allocation made by March 31, 2014. **The Commission invites Comment on whether that provision can be repealed as obsolete. If so, should proposed Section 47620(b) also be deleted?**

(2) Proposed Section 47650 would continue Section 8276.5(a)(8), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47655. Submission of proposed program to task force

47655. (a) For the purposes of this article, a proposed recommendation that receives an affirmative vote of at least 15 of the non-ex officio members of the Dungeness crab task force may be transmitted to the director or the Legislature as a recommendation, shall be considered to be the consensus of the task force, and shall be considered to be evidence of consensus in the Dungeness crab industry. Any proposed recommendation that does not receive a vote sufficient to authorize transmittal to the director or Legislature as a recommendation shall be evidence of a lack of consensus by the Dungeness crab task force, and shall be considered to be evidence of a lack of consensus in the crab industry.

(b) The director may modify the program adopted pursuant to Section 47610, if consistent with the requirements of this article, after consultation with the Dungeness crab task force or its representatives and after the task force has had 60 days or more to review the proposed modifications and recommend any proposed changes. The director may implement the modifications earlier than 60 days after it is sent to the Dungeness crab task force for review, if recommended by the task force.

Comment. Section 47655 continues former Fish and Game Code Section 8276.5(c)-(d) without substantive change.

Note. Proposed Section 47665 would continue Section 8276.5(d), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

1 **§ 47660. Dungeness Crab Account**

2 47660. (a) The Dungeness Crab Account is hereby established in the Fish and
3 Game Preservation Fund and the fees collected pursuant to this article shall be
4 deposited in that account. The money in the account shall be used as follows:

5 (1) By the department, upon appropriation by the Legislature, for administering
6 and enforcing the program.

7 (2) In each fiscal year through the 2029 fiscal year, upon appropriation by the
8 Legislature, of the amount remaining in the account after an allocation pursuant to
9 paragraph (1), the sum of one hundred fifty thousand dollars (\$150,000), if
10 available, shall be allocated to the council to support the administration and
11 facilitation of the Dungeness crab task force.

12 (b) For purposes of meeting the necessary expenses of initial organization and
13 operation of the program until fees may be collected, or other funding sources may
14 be received, the department may borrow money as needed for these expenses from
15 the council. The borrowed money shall be repaid within one year from the fees
16 collected or other funding sources received. The council shall give high priority to
17 providing funds or services to the department, in addition to loans, to assist in the
18 development of the program, including, but not limited to, the costs of convening
19 the Dungeness crab task force, environmental review, and the department's costs
20 of attending meetings with task force members.

21 **Comment.** Section 47660 continues former Fish and Game Code Section 8276.5(e)-(f) without
22 substantive change.

23 **Note.** Proposed Section 47660(a) would continue Section 8276.5(e), which was amended by
24 2018 Cal. Stat. ch. 663 as an urgency measure.

25 **§ 47665. Inoperative date of article**

26 47665. This article shall become inoperative on April 1, 2029, and, as of January
27 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or
28 before January 1, 2030, deletes or extends the dates on which it becomes
29 inoperative and is repealed.

30 **Comment.** Section 47665 continues former Fish and Game Code Section 8276.5(i) without
31 substantive change.

32 **Note.** Proposed Section 47665 would continue Section 8276.5(i), which was amended by
33 2018 Cal. Stat. ch. 663 as an urgency measure.

34 **Article 7. Dungeness Crab Task Force**

35 **§ 47800. Task force**

36 47800. (a) The Ocean Protection Council shall make a grant, upon appropriation
37 of funding by the Legislature, for the development and administration of a
38 Dungeness crab task force.

39 (b) The membership of the Dungeness crab task force shall be comprised of all
40 of the following:

(1) Two nonvoting members representing the department, appointed by the department.

(2) One nonvoting representative of University of California Sea Grant, appointed by University of California Sea Grant.

(3) Seven members appointed by the Chair of the Ocean Protection Council following a public solicitation for nominations, as follows:

(A) One voting and one nonvoting member representing sport fishing interests.

(B) Two voting members representing crab processing interests.

(C) One voting member representing commercial passenger fishing vessel interests.

(D) Two nonvoting members representing nongovernmental organization interests.

(4) Seventeen voting members representing commercial fishery interests, elected by licensed persons possessing valid Dungeness crab permits in their respective ports and production levels, as follows:

(A) Three members from Crescent City.

(B) One member from Trinidad.

(C) Two members from Eureka.

(D) Two members from Fort Bragg.

(E) Two members from Bodega Bay.

(F) Two members from San Francisco.

(G) Two members from Half Moon Bay.

(H) Two members from ports south of Half Moon Bay.

(I) One member who has a valid California nonresident crab permit.

Comment. Section 47800 continues former Fish and Game Code Section 8276.4(a) without substantive change.

 **Note.** Proposed Section 47800 would continue Section 8276.4(a), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47805. Election of representatives

47805. (a) (1) Elected members in each port shall represent the following production levels:

(A) For ports with one elected member, the member shall represent both the upper and lower production levels.

(B) For ports with two elected members, one member shall represent the upper production level and one member shall represent the lower production level.

(C) For ports with three elected members, one member shall represent the upper production level, one member shall represent the lower production level, and one member shall represent both the upper and lower production levels.

(2) Upper and lower production levels shall be determined in relation to the average landing, during the five-year period before the beginning of an election cycle, of valid crab permitholders who landed a minimum of 25,000 pounds of crab during that period.

(b) Elections shall be held every three years in each port, on a staggered basis across ports, in coordination with the department or the Ocean Protection Council and with support from an administrative team of the Dungeness crab task force. In an election year, all elected members in a port shall be subject to reelection. There shall be no limit on the number of terms that may be served by any person.

Comment. Section 47805 continues former Fish and Game Code Section 8276.4(b)-(c) without substantive change.

Note. Proposed Section 47805 would continue Section 8276.4(b) and (c), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47810. Alternates

47810. (a) Each member appointed pursuant to paragraph (1), (2), or (3) of subdivision (b) of Section 47800 shall select an alternate to serve and, if applicable, vote in the member's place in case of the member's absence from, or disqualification from participating in, a meeting of the task force. If the position of a member appointed pursuant to one of those paragraphs becomes vacant, the alternate member shall serve until the position is filled as required pursuant to that paragraph.

(b) Each elected member shall select an alternate in the same port and production level to serve and vote in the member's place in case of the member's absence from, or disqualification from participating in, a meeting of the task force. If the position of the member becomes vacant, the alternate shall serve and vote in the member's place until the next election is held in the port pursuant to subdivision (b) of Section 47805.

Comment. Section 47810 continues former Fish and Game Code Section 8276.4(d) without substantive change.

Note. Proposed Section 47810 would continue Section 8276.4(d), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47815. Responsibilities of task force

47815. The Dungeness crab task force shall do all of the following:

(a) Review and evaluate the commercial Dungeness crab management measures described in Article 6 (commencing with Section 47600), and make recommendations to the Joint Committee on Fisheries and Aquaculture, the department, and the commission, no later than January 15, 2022, and by January 15 of every third year thereafter through 2028.

(b) Make recommendations by the dates specified in subdivision (a) on all of the following: the need for a permanent Dungeness crab advisory committee, the economic impact of the program described in Article 6 (commencing with Section 47600) on permitholders of different tiers and the economies of different ports, the cost of the program to the department, including enforcement costs, the viability of a buyout program for the permitholders described in paragraph (7) of subdivision

(a) of Section 47620, refining commercial Dungeness crab management, and the need for statutory changes to accomplish task force objectives.

(c) In considering commercial Dungeness crab management options, prioritize the review of pot limit restriction options, current and future commercial fishery effort, season modifications, essential fishery information needs, and short- and long-term objectives for improved management.

Comment. Section 47815 continues former Fish and Game Code Section 8276.4(e) without substantive change.

Note. Proposed Section 47815 would continue Section 8276.4(e), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47820. Subcommittees

47820. (a) The task force may establish subcommittees of specific user groups from the task force membership to focus on issues specific to commercial harvest or crab processing.

(b) The subcommittees shall report their recommendations, if any, to the task force.

Comment. Section 47820 continues former Fish and Game Code Section 8276.4(f) without substantive change.

Note. Proposed Section 47820 would continue Section 8276.4(f), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47825. Grant

47825. The Ocean Protection Council may include in a grant funding to cover department staffing costs, as well as travel costs for task force participants specified in paragraph (1) of subdivision (b) of Section 47800.

Comment. Section 47825 continues former Fish and Game Code Section 8276.4(g) without substantive change.

Note. Proposed Section 47825 would continue Section 8276.4(g), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47830. Task force recommendations

47830. Except as otherwise provided in Article 6 (commencing with Section 47600), a recommendation shall be forwarded to the Joint Committee on Fisheries and Aquaculture, the department, and the commission upon an affirmative vote of at least two-thirds of the task force members.

Comment. Section 47830 continues former Fish and Game Code Section 8276.4(h) without substantive change.

§ 47835. Inoperative date of article

47835. This article shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or

1 before January 1, 2030, deletes or extends the dates on which it becomes
2 inoperative and is repealed.

3 **Comment.** Section 47835 continues former Fish and Game Code Section 8276.4(j) without
4 substantive change.

5 **Note.** Proposed Section 47835 would continue Section 8276.4(j), which was amended by
6 2018 Cal. Stat. ch. 663 as an urgency measure.

7 Article 8. Entanglement Risk Assessment and Mitigation

8 § 47850. Definitions

9 47850. For purposes of this article, the following definitions shall apply:

10 (a) "California Dungeness Crab Fishing Gear Working Group" means the
11 California Dungeness Crab Fishing Gear Working Group established by the
12 department, in partnership with the Ocean Protection Council and the National
13 Marine Fisheries Service, on September 21, 2015, and as defined by its most
14 recent charter as it may be amended from time to time.

15 (b) "Risk assessment and mitigation program" means the program developed by
16 the California Dungeness Crab Fishing Gear Working Group, as that program may
17 be amended from time to time until the regulations are adopted pursuant to
18 subdivision (b), to identify and assess elevated levels of entanglement risk and
19 determine the need for management options to reduce the risk of entanglement.

20 **Comment.** Section 47850 continues former Fish and Game Code Section 8276.1(a) without
21 substantive change.

22 **Note.** Proposed Section 47850 would continue Section 8276.1(a), which was added by 2018
23 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in
24 anticipation of its effect.

25 § 47855. Regulations

26 47855. (a) On or before November 1, 2020, the department, in consultation with
27 the California Dungeness Crab Fishing Gear Working Group and other
28 stakeholders, shall adopt regulations establishing criteria and protocols to evaluate
29 and respond to the potential risk of marine life entanglement. The regulations shall
30 include, but are not limited to, the risk assessment and mitigation program. Upon
31 the effective date of the regulations, the director may restrict the take of
32 Dungeness crab pursuant to the protocols and criteria.

33 (b) If the department has not developed the regulations pursuant to subdivision
34 (a) by November 1, 2020, the power of the director to exercise the authority
35 described in Section 47860 shall become inoperative on November 1, 2020.

36 **Comment.** Subdivision (a) of Section 47855 continues former Fish and Game Code Section
37 8276.1(b) without substantive change.

38 Subdivision (b) continues former Fish and Game Code Section 8276.1(e) without substantive
39 change.

Note. Proposed Section 47855 would continue Section 8276.1(b) and (e), which were added by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 47860. Mitigation

47860. (a) Until the regulations adopted pursuant to Section 47860 become effective or until November 1, 2020, whichever is sooner, if the director, in consultation with the California Dungeness Crab Fishing Gear Working Group, determines that the California Dungeness crab fishery is being conducted in a manner that poses a significant risk of marine life entanglement, the director may restrict the take of Dungeness crab in those areas where that risk has been determined to exist, including through time or area closures, or both.

(b) The authority of the director provided pursuant to subdivision (a) shall be temporary and shall expire upon the effective date of the regulations described in subdivision (a) of Section 47855 or upon the expiration of that authority pursuant to subdivision (b) of Section 47855, whichever is soonest.

(c) The director shall evaluate the following factors to determine if there is a significant risk of marine life entanglement and the appropriate management response:

(1) The conditions inherent to the fishery, such as safety of life at sea, weather, vessel operations, and other related issues.

(2) The duration of any delays in the normal start of the fishery.

(3) Indications of anomalous ocean or forage conditions, or both, in the current season.

(4) The known location of marine life of concern.

(5) The known location and intensity of fishing effort.

(6) The number of confirmed marine life entanglements documented in advance of or during the current fishing season.

(7) The existence and prevalence of factors that may result in significant risk of marine life entanglement.

(8) The likelihood of exceeding the potential biological removal level of a marine life species.

(9) The socioeconomic impacts of any management response to fishery stakeholders.

(d) (1) After making a preliminary determination pursuant to subdivision (a) that a significant risk of entanglement exists, the director shall provide 48 hours' notice to the California Dungeness Crab Fishing Gear Working Group and other stakeholders before taking any action to close the fishery or otherwise restrict the take of Dungeness crab.

(2) The notice shall provide the information supporting the director's determination of a significant risk of entanglement as well as the anticipated management response.

(3) The director shall consider any recommendations or new information provided by the California Dungeness Crab Fishing Gear Working Group or any member of the public within the 48-hour notice period in advance of enacting any management measures pursuant to this subdivision.

(e) Any time or area closures, or both, implemented pursuant to this section shall, while providing for adequate reduction of risk to marine life, be minimized in duration and extent.

(f) The director shall expeditiously lift any restriction in waters pursuant to this section if the director determines, in consultation with the California Dungeness Crab Fishing Gear Working Group, that the significant risk of entanglement in those waters has abated.

(g) Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code does not apply to actions taken pursuant to this section.

Comment. Section 47860 continues former Fish and Game Code Section 8276.1(c) without substantive change.

Note. Proposed Section 47850 would continue Section 8276.1(c), which was added by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 47865. Prohibition

47865. It shall be unlawful to take or possess Dungeness crab from any waters closed, or otherwise violate any restriction on take imposed, pursuant to this article.

Comment. Section 47865 continues former Fish and Game Code Section 8276.1(d) without substantive change.

Note. Proposed Section 47865 would continue Section 8276.1(d), which was added by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 47870. Sunset

47870. This article shall remain in effect only until January 1, 2024, and as of that date is repealed.

Comment. Section 47870 continues former Fish and Game Code Section 8276.1(f) without substantive change.

Note. Proposed Section 47870 would continue Section 8276.1(f), which was added by 2018 Cal. Stat. ch. 985. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

CHAPTER 4. DUNGENESS CRAB VESSEL PERMITS

Article 1. General Provisions

§ 47900. Permit requirement

47900. A person shall not use a vessel to take, possess, or land Dungeness crab for commercial purposes using Dungeness crab traps authorized pursuant to Section 47450, unless the owner of that vessel has a Dungeness crab vessel permit for that vessel that has not been suspended or revoked.

Comment. Section 47900 continues former Fish and Game Code Section 8280.1(a) without substantive change.

See also Sections 5820, 5832 (enforcement).

Note. Proposed Section 47900 would continue Section 8280.1(a), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 47905. Fees for permit

47905. The department shall charge a fee for each Dungeness crab vessel permit of two hundred dollars (\$200) for a resident of California, and four hundred dollars (\$400) for a nonresident of California, for the reasonable regulatory costs of the department.

Comment. Section 47905 continues former Fish and Game Code Section 8280.6(a) without substantive change.

§ 47910. Inoperative date of article

47910. This article shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2030, deletes or extends the dates on which it becomes inoperative and is repealed.

Comment. Section 47910 combines and continues former Fish and Game Code Sections 8280.1(e) and 8280.6(d), without substantive change.

Note. Proposed Section 47910 would continue Sections 8280.1(e) and 8280.6(d), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

Article 2. Issuance

§ 48100. No new permits

48100. A person shall not be issued a new, original Dungeness crab vessel permit. A Dungeness crab vessel permit may be issued only pursuant to a renewal or transfer of an existing permit as provided in Section 48110 or Article 4 (commencing with Section 48310).

Comment. Section 48100 continues former Fish and Game Code Sections 8280.1(b) without substantive change.

Note. Proposed Section 48100 would continue Section 8280.1(b), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 48105. Death of permittee

48105. A permit issued pursuant to paragraph (3) of subdivision (b) of former Fish and Game Code Section 8280.1, as that section read on August 1, 2018, or any prior version of that paragraph, shall become immediately null and void upon the death of the permittee.

Comment. Section 48105 continues former Fish and Game Code Sections 8280.1(c) without substantive change.

Note. Proposed Section 48105 would continue Section 8280.1(c), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 48110. Eligibility

48110. (a) The owner of a Dungeness crab vessel, for purposes of this section, may include a person with a bona fide contract for the purchase of a vessel who otherwise meets all other qualifications for a Dungeness crab vessel permit. If a contract is found to be fraudulent or written or entered into for the purposes of circumventing qualification criteria for the issuance of a permit, the applicant shall be permanently ineligible for a Dungeness crab vessel permit.

(b) A Dungeness crab vessel permit shall be issued only to the person owning the vessel at the time of application for that permit. A person shall not be issued more than one permit for each vessel owned by that person and qualifying for a permit pursuant to this title.

(c) A Dungeness crab vessel permit shall be issued only to the owner of a vessel taking crab by traps. A permit shall not be issued to the owner of a vessel using trawl or other nets unless the owner of that vessel qualifies for a permit pursuant to paragraph (1) of subdivision (b) of former Fish and Game Code Section 8280.1, as that section read on August 1, 2018, or any prior version of that paragraph. A trawl or other net vessel authorized under this code to take Dungeness crab incidental to the taking of fish in trawl or other nets shall not be required to possess a Dungeness crab vessel permit.

(d) Dungeness crab vessel permits shall not be combined or otherwise aggregated for the purpose of replacing smaller vessels in the fishery with a larger vessel, and a permit shall not be divided or otherwise separated for the purpose of replacing a vessel in the fishery with two or more smaller vessels.

(e) Applications for renewal of all Dungeness crab vessel permits shall be received by the department, or, if mailed, postmarked, by April 30 of each year. In order for a vessel to retain eligibility, a permit shall be obtained each year subsequent to the initial permit year and the vessel shall be registered pursuant to Section 14755. The vessel owner shall have a valid commercial fishing license issued to that person pursuant to Section 14500 that has not been suspended or

1 revoked. Minimum landings of Dungeness crab shall not be required annually to
2 be eligible for a Dungeness crab vessel permit.

3 **Comment.** Section 48110 continues former Fish and Game Code Section 8280.2(a)-(e)
4 without substantive change.

5  **Note.** Proposed Section 48110 would continue Section 8280.2(a)-(e), which were amended
6 by 2018 Cal. Stat. ch. 663 as an urgency measure.

7 **§ 48115. Inoperative date of article**

8 48115. This article shall become inoperative on April 1, 2029, and, as of January
9 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or
10 before January 1, 2030, deletes or extends the dates on which it becomes
11 inoperative and is repealed.

12 **Comment.** Section 48115 continues former Fish and Game Code Sections 8280.1(e) and
13 8280.2(f) without substantive change.

14  **Note.** Proposed Section 48110 would continue Sections 8280.1(e) and 8280.2(f), which were
15 amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

16 **Article 3. Transfer Generally**

17 **§ 48300. Application for transfer**

18 48300. A vessel owner shall sign an application for transfer, and certify that the
19 information included in the application is true to the best of his or her information
20 and belief.

21 **Comment.** Section 48300 continues former Fish and Game Code Section 8280.6(c) without
22 substantive change.

23 **§ 48305. Fees for transfer**

24 48305. The department shall charge a nonrefundable fee of two hundred dollars
25 (\$200) for each transfer of a permit authorized pursuant to this chapter, for the
26 reasonable regulatory costs of the department.

27 **Comment.** Section 48305 continues former Fish and Game Code Section 8280.6(b) without
28 substantive change.

29 **Article 4. Specific Rules Governing Transfer**

30 **§ 48310. Restriction on transfer**

31 48310. Notwithstanding Chapter 2 (commencing with Section 22500) of Title
32 15 of Part 6 of Division 6, and except as provided in this article, a Dungeness crab
33 vessel permit shall not be transferred.

34 **Comment.** Section 48310 continues former Fish and Game Code Section 8280.3(b) without
35 substantive change.

§ 48315. Transfer to purchaser of vessel

48315. The owner of a vessel to whom a Dungeness crab vessel permit has been issued shall transfer the permit for the use of that vessel upon the sale of the vessel by the permitholder to the person purchasing the vessel, except that the permit shall not be transferred if the vessel is more than five feet longer in length overall, as determined by a licensed marine surveyor, than the baseline length on the permit. Thereafter, upon notice to the department, the person purchasing the vessel may use the vessel for the taking and landing of Dungeness crab for any and all of the unexpired portion of the permit year, and that person is eligible for a permit pursuant to this title for the use of that vessel in subsequent years. The person purchasing the vessel shall not transfer the permit for use of that vessel in the Dungeness crab fishery to another replacement vessel during the same permit year.

Comment. Section 48315 continues former Fish and Game Code Section 8280.3(c) without substantive change.

Note. Proposed Section 48315 would continue Sections 8280.3(c), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 48320. Transfer to replacement vessel

48320. The owner of a vessel to whom the Dungeness crab vessel permit has been issued may transfer the permit to a replacement vessel of equivalent capacity, except as specified in this title. Thereafter, upon notice to the department and payment of the transfer fee specified in Section 48305, the replacement vessel may be used for the taking and landing of Dungeness crab for any and all of the unexpired portion of the permit year and that person is eligible for a permit pursuant to this title for the use of that replacement vessel in subsequent years.

Comment. Section 48320 continues former Fish and Game Code Section 8280.3(d) without substantive change.

Note. Proposed Section 48320 would continue Sections 8280.3(d), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 48325. Transfer to replacement vessel in specified circumstances

48325. The department may authorize the owner of a permitted vessel to transfer the permit to a replacement vessel that was owned by that person on or before April 1, 1996, that does not fish with trawl nets that is greater than five feet longer in length overall than the baseline length on the permit, if all of the following conditions are satisfied:

(a) A vessel of a larger size is essential to the owner for participation in another fishery other than a trawl net fishery.

(b) The owner held a permit on or before January 1, 1995, for the fishery for which a larger vessel is needed and has participated in that fishery.

(c) The permit for the vessel from which the permit is to be transferred qualified pursuant to paragraph (1) of subdivision (b) of former Fish and Game Code

1 Section 8280.1, as that section read on August 1, 2018, or any prior version of that
2 paragraph.

3 (d) The vessel to which the permit is to be transferred does not exceed 20 feet
4 longer in length overall than the baseline length on the permit and the vessel to
5 which the permit is to be transferred does not exceed 60 feet in length overall.

6 **Comment.** Section 48325 continues former Fish and Game Code Section 8280.3(f) without
7 substantive change.

8 **Note.** Proposed Section 48325 would continue Sections 8280.3(f), which was amended by
9 2018 Cal. Stat. ch. 663 as an urgency measure.

10 **§ 48330. Transfer to vessel of greater capacity owned by permit holder**

11 48330 The owner of a permitted vessel may transfer the permit to a vessel of
12 greater capacity that was owned by that person on or before November 15, 1995,
13 not to exceed 10 feet longer in length overall than the baseline length on the
14 permit or to a vessel of greater capacity purchased after November 15, 1995, not to
15 exceed five feet longer in length overall than the baseline length on the permit.

16 **Comment.** Section 48330 continues former Fish and Game Code Section 8280.3(e) without
17 substantive change.

18 **Note.** Proposed Section 48315 would continue Sections 8280.3(e), which was amended by
19 2018 Cal. Stat. ch. 663 as an urgency measure.

20 **§ 48335. Restriction on transfer to larger vessel**

21 48335. A transfer of a permit to a larger vessel shall not be allowed more than
22 one time. If a permit is transferred to a larger vessel, any Dungeness crab vessel
23 permit for that permit year or any subsequent permit years for that larger vessel
24 shall not be transferred to another larger vessel. The department shall not
25 thereafter issue a Dungeness crab vessel permit for the use of the original vessel
26 from which the permit was transferred, except that the original vessel may be used
27 to take or land Dungeness crab after that transfer if its use is authorized pursuant
28 to another Dungeness crab vessel permit subsequently transferred to that vessel
29 pursuant to Section 48320, 48325, or 48330.

30 **Comment.** Section 48335 continues former Fish and Game Code Section 8280.3(g) without
31 substantive change.

32 **Note.** Proposed Section 48315 would continue Sections 8280.3(g), which was amended by
33 2018 Cal. Stat. ch. 663 as an urgency measure.

34 **§ 48340. Transfer where permitted vessel damaged, lost, or destroyed**

35 48340. (a) Upon the written approval of the department, the owner of a vessel to
36 whom the Dungeness crab vessel permit has been issued, which has California
37 Dungeness crab landings made with trap gear documented on department landing
38 receipts and which has had California Dungeness crab landings amounting to not
39 less than 5,000 pounds cumulative for the past two Dungeness crab seasons, may
40 temporarily transfer the permit to a replacement vessel for which use in the

1 Dungeness crab fishery is not permitted pursuant to this title that is of equivalent
2 size and capacity of the originally permitted vessel, no greater than 10 feet longer
3 in length overall than the vessel from which the permit is transferred, for a period
4 of not more than six months during the current permit year if the vessel for which
5 the permit was issued is seriously damaged, suffers major mechanical breakdown,
6 or is lost or destroyed, as determined by the department, upon approval of the
7 director. The owner of the vessel shall submit proof that the department may
8 reasonably require to establish the existence of the conditions of this subdivision.
9 Only the permittee at the time of the loss, theft, damage, breakdown, or
10 destruction of the vessel may apply for the transfer of the vessel permit. Proof of
11 loss or destruction shall be documented by submission of a copy of the report filed
12 with the United States Coast Guard or any other law enforcement or fire agency
13 that investigated the loss. In the case of mechanical breakdown, the request shall
14 include an estimate of the costs to repair the vessel from a marine surveyor or boat
15 repair yard. The department shall not issue a permit for a replacement vessel
16 pursuant to this subdivision if the permitted vessel was reported lost, stolen,
17 mechanically broken down, destroyed, or damaged for fraudulent purposes. Upon
18 approval by the director, the owner of a vessel granted a six-month temporary
19 transfer under this section may be granted an additional six-month extension of the
20 temporary transfer.

21 (b) Notwithstanding subdivision (e) of Section 48110, in the event of loss or
22 destruction of a vessel for which a Dungeness crab vessel permit was issued, or
23 serious damage that renders the vessel inoperable, and upon written approval of
24 the department, the owner of the vessel to whom the permit was issued may retain
25 the permit and may transfer the permit to another vessel of equivalent size and
26 capacity of the vessel that was lost or damaged during the period of two years after
27 the loss or damage of the vessel for which the permit was originally issued. The
28 owner of the lost or damaged vessel shall submit proof that the department may
29 reasonably require to establish the loss or damage of the vessel. Only the permittee
30 at the time of the loss, theft, damage, or destruction of the vessel may apply for the
31 transfer of the vessel permit. Proof of loss or destruction shall be documented by
32 submission of a copy of the report filed with the United States Coast Guard or any
33 other law enforcement or fire agency that investigated the loss. In the case of
34 mechanical breakdown, the request shall include an estimate of the costs to repair
35 the vessel from a marine surveyor or boat repair yard. The department shall not
36 issue a permit for a replacement vessel pursuant to this subdivision if the lost or
37 damaged vessel was reported lost, stolen, destroyed, mechanically broken down,
38 or damaged for fraudulent purposes. The department shall only transfer a permit
39 pursuant to this subdivision if the lost or damaged vessel has a current permit and
40 the owner of the lost or damaged vessel makes assurances in the application that
41 any renewal of the permit that becomes due during the application processing
42 period will be made. If the permit is not permanently transferred to another vessel

1 owned by the person to whom the vessel permit was originally issued within two
2 years of the loss or damage, the permit shall become void by operation of law.

3 **Comment.** Section 48340 continues former Fish and Game Code Section 8280.3(h) without
4 substantive change.

5  **Note.** Proposed Section 48315 would continue Sections 8280.3(h), which was amended by
6 2018 Cal. Stat. ch. 663 as an urgency measure.

7 **§ 48345. Transfer to new vessel**

8 48345. Upon written approval of the department, the owner of a vessel to whom
9 the Dungeness crab vessel permit has been issued may retain that permit upon the
10 sale of that permitted vessel for the purpose of transferring the permit to another
11 vessel to be purchased by that individual within one year of the time of sale of the
12 vessel for which the permit was originally issued if the requirements of this
13 section are satisfied, including the payment of transfer fees. If the permit is not
14 transferred to a new vessel owned by the person to whom the vessel permit was
15 originally issued within one year of the sale of the vessel for which it was
16 originally issued, or if the person does not retain ownership of the new vessel to
17 which the permit is transferred for a period of not less than one year, the permit
18 shall become void by operation of law.

19 **Comment.** Section 48345 continues former Fish and Game Code Section 8280.3(i) without
20 substantive change.

21 **§ 48350. Transfer on death of permitholder**

22 48350. In the event of the death or incapacity of a permitholder, the permit shall
23 be transferred, upon application, to the heirs or assigns, or to the working partner,
24 of the permitholder, together with the transfer of the vessel for which the permit
25 was issued, and the new owner may continue to operate the vessel under the
26 permit, renew the permit, or transfer the permit upon sale of the vessel pursuant to
27 subdivision (b). The estate of the holder of a transferable Dungeness crab vessel
28 permit may renew that permit as provided for in statute if needed to keep it valid.
29 The estate of the decedent may transfer that permit pursuant to these regulations
30 no later than two years from the date of death of the permitholder as listed on the
31 death certificate.

32 **Comment.** Section 48350 continues former Fish and Game Code Section 8280.3(j) without
33 substantive change.

34 **§ 48355. Length of vessel**

35 48355. (a) For purposes of this article, the term “length overall” means the
36 horizontal distance between the forward-most and after-most points on the hull of
37 a vessel. The length overall of a vessel does not include attachments fixed to the
38 stern and bow.

39 (b) For purposes of this article, the baseline length on a Dungeness crab vessel
40 permit shall be equal to the length overall of the vessel for which the permit was

originally issued, as originally documented on the permit, unless updated pursuant to subdivisions (c) and (d).

(c) If, on or before March 31, 2020, the owner of a vessel to whom a Dungeness crab vessel permit has been issued submits to the department a survey reflecting a current length overall of the vessel that is greater than the length overall described in subdivision (b), the baseline length on the permit shall be equal to that current length overall.

(d) A survey submitted pursuant to subdivision (c) shall be conducted by a licensed marine surveyor.

Comment. Section 48355 continues former Fish and Game Code Section 8280.3(a), (k) without substantive change.

Note. Proposed Section 48315 would continue Section 8280.3(a) and (k), which were amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 48360. Inoperative date

48360. This article shall become inoperative on April 1, 2029, and, as of January 1, 2030, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2030, deletes or extends the dates on which it becomes inoperative and is repealed.

Comment. Section 48360 continues former Fish and Game Code Sections 8280.3(l) and 8280.6(d) without substantive change.

Note. Proposed Section 48315 would continue Sections 8280.3(l), which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

Article 5. Miscellaneous Provisions

§ 48500. Legislative declaration

48500. (a) The Legislature finds and declares that the Dungeness crab fishery is important to the state because it provides a valuable food product, employment for those persons engaged in the fishery, and economic benefits to the coastal communities of the state.

(b) The Legislature further finds that, in order to protect the Dungeness crab fishery, it is necessary to limit the number of vessels participating in that fishery to take Dungeness crab and it may be necessary to limit the quantity and capacity of the fishing gear used on each vessel to take Dungeness crab.

(c) The Legislature further finds and declares that to limit the number of vessels in the Dungeness crab fishery, it is necessary to require that the owner of each vessel participating in the fishery obtain and possess a permit for that vessel and that the initial issuance of permits shall be limited to those persons owning vessels qualifying under former Fish and Game Code Section 8280.1, as that section read on August 1, 2018, or any prior version of that section.

Comment. Section 48500 continues former Fish and Game Code Section 8280 without substantive change.

Note. Proposed Section 48500 would continue Section 8280, which was amended by 2018 Cal. Stat. ch. 663 as an urgency measure.

§ 48505. Location where permits valid

48505. Dungeness crab vessel permits are valid only in waters of the state and in the Pacific Ocean in federal waters south of the border with Oregon.

Comment. Section 48505 continues former Fish and Game Code Section 8280.9 without substantive change.

§ 48510. Assistance of unpermitted vessel

48510. (a) Notwithstanding Section 47900, the owner of a vessel, who has a Dungeness crab vessel permit for that vessel that has not been suspended or revoked, may contract for the use of a vessel that is registered pursuant to Section 14755 and for which a Dungeness crab vessel permit has not been issued, for the purpose of assisting the crew of the permitted vessel in the deployment of Dungeness crab traps.

(b) An unpermitted vessel used for the purpose of assisting in the deployment of Dungeness crab traps pursuant to this section shall not have on board any Dungeness crab, or equipment for the retrieval of Dungeness crab traps.

Comment. Section 48510 continues former Fish and Game Code Section 8280.7 without substantive change.

CHAPTER 5. ROCK CRAB

§ 48650. Rock crab season

48650. (a) Subject to Title 6 (commencing with Section 19200) of Part 6 of Division 6, Sections 47005 and 47460, this chapter, and subject to the regulation of the commission authorized under subdivision (c), rock crab may be taken in traps in any waters of the state at any time, except in Districts 2585, 2630, 2635, and 2650 and those portions of District 2640 lying on the north and east sides of Santa Catalina Island north of Southeast Rock. Rock crab (*Cancer antennarius*), red crab (*Cancer productus*), or yellow crab (*Cancer anthonyi*), which is less than 4 1/4 inches, measured in a straight line through the body, from edge of shell to edge of shell at the widest part, shall not be taken, possessed, bought, or sold.

(b) Any person taking rock crab shall carry a measuring device and shall measure any rock crab immediately upon removal from the trap. If the person determines that the rock crab is undersize, the person shall return it to the water immediately.

(c) Upon the recommendation of the director regarding rock crab fishery management measures, and following a public hearing on the matter, the commission may adopt regulations to manage the rock crab resource consistent with Title 3 (commencing with Section 12100) of Part 4 of Division 6.

Comment. Section 48650 continues former Fish and Game Code Section 8282 without substantive change.

1 **§ 48655. Take of rock crab**

2 48655. (a) Subject to the provisions of this title, rock crab, as defined in Section
3 46855, may be taken with rock crab traps.

4 (b) A rock crab trap may have any number of openings of any size. However, a
5 rock crab trap constructed of wire mesh with an inside mesh measurement of not
6 less than 1 7/8 inches by 3 7/8 inches, with the 3 7/8 inch measurement parallel to
7 the floor, shall have at least one rigid circular opening of not less than 3 1/4
8 inches, inside diameter, located on any outside wall of the rearmost chamber of the
9 crab trap and shall be located so that at least one-half of the opening is in the upper
10 half of the trap. Rock crab traps constructed of other material shall have at least
11 two rigid circular openings of not less than 3 1/4 inches, inside diameter, on the
12 top or side of the rearmost chamber of the trap. If both of the openings are located
13 on the side of the trap, at least one of the openings shall be located so that at least
14 one-half of the opening is in the upper half of the trap. No rigid circular opening,
15 as required, shall extend more than 1/2 inch beyond the plane of the wall side or
16 top of the trap in which it is located, and it shall be clearly accessible to any crab
17 which may be in the trap.

18 (c) Subject to the provisions of this title, Dungeness crab may be taken
19 incidentally with a rock crab trap used pursuant to this subdivision to take rock
20 crab, provided that the incidental taking occurs only during the season when it is
21 lawful to take both species. A Dungeness crab, taken incidentally with a rock crab
22 trap, which does not comply with the provisions of this title shall be immediately
23 returned to the waters from which it was taken.

24 (d) A person shall not possess any lobster aboard a vessel while the vessel is
25 being used pursuant to this subdivision to take rock crab.

26 **Comment.** Section 48655 continues former Fish and Game Code Section 9011(b) without
27 substantive change.

28 **Note.** Existing Fish and Game Code Section 9011(b) (which would be continued by proposed
29 Section 48655) contains several cross-references to “Article 6 (commencing with Section 8275)
30 of Chapter 2.” In the proposed law, all provisions contained in that article have been continued in
31 the title containing proposed Section 48655. However, that proposed title contains several
32 additional provisions relevant to the subject matter of Section 9011(b) that are *not* in the “Article
33 6” referenced in that section: Sections 8834, 9011(a), and 9012.

34 **The Commission invites comment on whether the additional inclusion of these provisions**
35 **in the cross-reference in proposed Section 48655 would cause any problems.**

36 **§ 48660. Incidental take**

37 48660. (a) Except as provided in Section 47450, 48655, or subdivision (b), any
38 species other than rock crab taken incidentally in a crab trap being used to take
39 rock crab shall be immediately released back to the water.

40 (b) The following species may be taken incidentally in crab traps being used to
41 take rock crab, under a permit issued pursuant to Section 19205, in District 2625
42 or 2685:

43 (1) Kellet’s whelk.

- 1 (2) Octopus.
2 (3) Crabs other than of the genus *Cancer*, except as provided in Section 47450 or
3 48655.

4 **Comment.** Section 48660 continues former Fish and Game Code Section 8284(b) and (c)
5 without substantive change.

6 **PART 7. CRAYFISH**

7 **TITLE 1. CRAYFISH GENERALLY**

8 **§ 48950. Crustacean**

9 48950. For the purposes of Title 2 (commencing with Section 45400) of Part 3, a
10 crayfish is a crustacean.

11 **Comment.** Section 48950 is new. It is added for drafting convenience.

12 **§ 48955. Provisions not exclusive**

13 48955. The provisions of this part are not intended to be exclusive. Other
14 provisions that govern crayfish include, but are not limited to, the following
15 provisions:

16 (a) Section 23355.

17 (b) Section 26500.

18 **Comment.** Section 48955 is new. It is added for drafting convenience.

19 **TITLE 2. COMMERCIAL PROVISIONS**

20 **§ 49000. Application of title**

21 49000. For purposes of Section 45005, the provisions in this title are commercial
22 provisions.

23 **Comment.** Section 49000 is new. It is added for drafting convenience.

24 **§ 49005. Take**

25 49005. The taking of crayfish shall be subject to regulations adopted by the
26 commission.

27 **Comment.** Section 49005 continues former Fish and Game Code Section 8490 without
28 substantive change.

29 **§ 49010. Use of traps**

30 49010. (a) Crayfish traps may be used at any time, in any district, to take
31 crayfish only.

32 (b) Traps shall not exceed three feet in greatest dimension.

33 (c) Any other species taken with crayfish traps shall be returned to the water
34 immediately.

(d) The commission may prohibit the use of crayfish traps that will injure fish, or that will entrap unnecessarily large numbers of fish other than crayfish.

Comment. Section 49010 continues former Fish and Game Code Section 9024 without substantive change.

See also Section 4900 (enforcement).

§ 49015. Take in Lake Tahoe

49015. (a) Any allowance for the commercial taking of crayfish in Lake Tahoe or in the Lake Tahoe Basin shall be for the primary purpose of population reduction and control of the signal crayfish, an invasive species. The commercial taking of crayfish may be allowed only to the extent that it is consistent with state goals for management of invasive species and other environmental standards, including an environmental analysis conducted by the Tahoe Regional Planning Agency or another appropriate lead agency for each proposed individual harvest operation.

(b) The commission shall ensure that, with respect to the taking of crayfish for commercial purposes in Lake Tahoe or in the Lake Tahoe Basin, the commission's regulations are consistent with the Lake Tahoe Region Aquatic Invasive Species Management Plan, as amended.

Comment. Section 49015 continues former Fish and Game Code Section 8491 without substantive change.

§ 49020. Overfishing in Sacramento-San Joaquin Delta

49020. The department shall take the steps it determines are necessary to prevent overfishing of crayfish in the Sacramento-San Joaquin Delta. Those steps may include, but are not limited to, submitting to the Legislature proposed legislation to place limitations on the commercial crayfishing in that area.

Comment. Section 49020 continues former Fish and Game Code Section 8492 without substantive change.

PART 8. KRILL

TITLE 1. KRILL GENERALLY

§ 49150. Crustacean

49150. For the purposes of Title 2 (commencing with Section 45400) of Part 3, krill are crustaceans.

Comment. Section 49150 is new. It is added for drafting convenience.

 **Note.** Based on Commission research, it appears that krill are crustaceans. **The Commission invites comment on whether that is correct.**

1 **TITLE 2. COMMERCIAL PROVISIONS**

2 **§ 49200. Application of title**

3 49200. For purposes of Section 45005, the provisions in this title are commercial
4 provisions.

5 **Comment.** Section 49200 is new. It is added for drafting convenience.

6 **§ 49205. Take**

7 49205. (a) It is unlawful to take or land krill of any species of euphausiid for any
8 purpose, except scientific research pursuant to regulations adopted by the
9 commission.

10 (b) This section applies to krill taken in the waters of the state and up to 200
11 miles offshore, as long as federal law does not regulate the taking of krill.

12 **Comment.** Section 49205 continues former Fish and Game Code Section 8510 without
13 substantive change.

14 **PART 9. LOBSTER**

15 **TITLE 1. LOBSTER GENERALLY**

16 **§ 49300. Crustacean**

17 49300. For the purposes of Title 2 (commencing with Section 45400) of Part 3, a
18 lobster is a crustacean.

19 **Comment.** Section 49300 is new. It is added for drafting convenience.

20 **§ 49305. Provisions not exclusive**

21 49305. The provisions of this part are not intended to be exclusive. Other
22 provisions that govern lobster include, but are not limited to, the following
23 provisions:

24 (a) Section 14875.

25 (b) Section 15510.

26 (c) Section 19205.

27 (d) Section 19500.

28 (e) Section 19230.

29 (f) Title 6 (commencing with Section 59600) of Part 1 of Division 16.

30 **Comment.** Section 49305 is new. It is added for drafting convenience.

31 **§ 49310. Take of spiny lobster**

32 49310. Spiny lobster may not be taken under a sport fishing license, except by
33 use of a hoop net or by hand.

34 **Comment.** Section 49310 continues former Fish and Game Code Section 7256 without
35 substantive change.

1 **§ 49315. Importing of spiny lobster**

2 49315. (a) Spiny lobsters may be imported into California until the twenty-sixth
3 day after the close of the California season.

4 (b) Lobsters imported into California and lobsters legally taken in California
5 during the open season prescribed in this code may be possessed and sold during
6 the closed season, subject to the regulations of the commission.

7 (c) The cost of inspection and marking, under the regulations of the commission,
8 shall be paid by the importer or owner of the lobsters.

9 **Comment.** Section 49315 continues former Fish and Game Code Section 2365 without
10 substantive change.

11 **TITLE 2. COMMERCIAL PROVISIONS**

12 **CHAPTER 1. PRELIMINARY PROVISIONS**

13 **§ 49450. Application of title**

14 49450. For purposes of Section 45005, the provisions in this title are commercial
15 provisions.

16 **Comment.** Section 49450 is new. It is added for drafting convenience.

17 **CHAPTER 2. PERMIT**

18 **§ 49500. Required permit**

19 49500. (a) Lobsters shall not be taken for a commercial purpose except under a
20 valid lobster permit issued to that person that has not been suspended or revoked,
21 and subject to regulations adopted by the commission.

22 (b) Every person who takes, assists in taking, possesses, or transports a lobster
23 for a commercial purpose while on any boat, barge, or vessel, or who uses or
24 operates or assists in using or operating any boat, net, trap, line, or other appliance
25 to take a lobster for a commercial purpose, shall have a valid lobster permit.

26 (c) The permit fee for a lobster permit is two hundred sixty-five dollars (\$265).

27 (d) The fee for a lobster crewmember permit is one hundred twenty-five dollars
28 (\$125).

29 (e) For the purposes of this section, possession of more than three times the
30 sport bag limit of lobster is prima facie evidence that the lobster in possession was
31 taken for a commercial purpose.

32 **Comment.** Section 49500 continues former Fish and Game Code Section 8254 without
33 substantive change.

34 See also Sections 4570, 5850 (enforcement).

1 **§ 49505. Display of permit number**

2 49505. The permit number of the person owning or in command of any boat
3 used to take lobster shall be visibly displayed on both sides of the boat, in 10-inch
4 black numbers, one inch wide, on a white background.

5 **Comment.** Section 49505 continues former Fish and Game Code Section 8257 without
6 substantive change.

7 **§ 49510. Limit on number of permits issued**

8 49510. Whenever it is necessary to prevent overutilization or to ensure efficient
9 and economic operation of the fishery, the commission may limit the number of
10 permits that may be issued pursuant to Section 49500. As it determines
11 appropriate to protect the resource, the commission may limit the number of
12 permits on a statewide basis or within selected geographical areas.

13 **Comment.** Section 49510 continues former Fish and Game Code Section 8259 without
14 substantive change.

15 CHAPTER 3. TAKE

16 **§ 49600. Season for take**

49600. (a) Spiny lobster may be taken only between the first Wednesday in
October and the first Wednesday after March 15.

(b) Lobster traps may be set and baited 24 hours in advance of the opening date of the lobster season if no other attempt is made to take or possess the lobsters.

21 **Comment.** Section 49600 continues former Fish and Game Code Section 8251 without
22 substantive change.

23 See also Section 5852 (enforcement).

24 **§ 49605. Size limitation**

49605. (a) No spiny lobster less than three and one-quarter inches in length measured in a straight line from the rear edge of the eye socket to the rear edge of the body shell, both points to be on the midline of the back, may be taken, possessed, purchased, or sold.

(b) Every person taking spiny lobster shall carry a measuring device, and shall measure any lobster immediately on removal from a trap. Any removed lobster that is found to be undersized shall be returned to the water immediately.

32 **Comment.** Section 49605 continues former Fish and Game Code Section 8252 without
33 substantive change.

See also Section 5852 (enforcement).

35 **§ 49610. Possession or landing on vessel**

49610. Lobster may be possessed aboard or landed from any vessel on which
finfish are present, if every person aboard the vessel has a valid lobster permit that
has not been suspended or revoked, and complies with Title 6 (commencing with

Section 19200) of Part 6 of Division 6, and Title 2 (commencing with Section 49450) of Part 9, and the regulations adopted pursuant to any of those provisions.

Comment. Section 49610 continues former Fish and Game Code Section 9001.7(k) without substantive change.

Note. Existing Fish and Game Code Section 9001.7(k) (which would be continued by proposed Section 49610), authorizes the possession of lobster aboard or landed from any vessel on which finfish are also present, in part if every person aboard the vessel complies with “Article 5 of Chapter 2 of the Fish and Game Code.”

Although there is more than one “Article 5” within a “Chapter 2” in the existing code, the Commission assumes the reference was intended to be to Article 5 (commencing with Section 8250) of Chapter 2 of Part 3 of Division 6 (governing lobster), and the cross-reference in proposed Section 49610 has been revised accordingly.

§ 49615. Filing of criminal complaint

49615. No complaint shall be filed in a court charging a commercial lobster permitholder with a violation of Section 49600 or 49605 unless evidence supporting the charge has been reviewed by the appropriate county or city prosecuting agency, and a criminal complaint has been issued by that agency.

Comment. Section 49615 continues the seventh sentence of former Fish and Game Code Section 8254.7 without substantive change.

CHAPTER 4. LOBSTER TRAPS

§ 49700. Use of trap

49700. Subject to Title 6 (commencing with Section 19200) of Part 6 of Division 6, and Title 2 (commencing with Section 49450) of Part 9, a lobster trap, as described in Section 49705, may be used to take lobster under a lobster permit issued pursuant to Section 49500.

Comment. Section 49700 combines and restates former Fish and Game Code Sections 8250.5(a) and 9010(a) without substantive change.

Note. Proposed Section 49700 is intended to combine and restate existing Fish and Game Code Sections 8250.5(a) and 9010(a) to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

8250.5. (a) Subject to this article and Article 1 (commencing with Section 9000) of Chapter 4, a lobster trap, as described in Section 9010, may be used to take lobster for commercial purposes under a lobster permit issued pursuant to Section 8254.

9010. (a) Subject to Article 5 (commencing with Section 8250) of Chapter 2, spiny lobster may be taken with lobster traps under a lobster permit issued pursuant to Section 8254.

The Commission invites comment on whether the combining and restatement of these two provisions would cause any substantive change in the meaning of either.

§ 49705. Construction of trap

49705. (a) A wire lobster trap shall be built of rectangular wire mesh, with inside mesh measurement not less than 1 1/2 inches by 3 1/2 inches, the 3 1/2-inch measurement to be parallel to the floor of the trap. A wire lobster trap shall be

fitted with at least one rigid rectangular escape gap with an inside vertical measurement not less than 2 3/8 inches at all points, and an inside horizontal measurement of not less than 11 1/2 inches at all points. The horizontal sides of the escape gap shall be located parallel to, and the escape gap shall be located within 2 3/8 inches of, the floor on any outside wall of the rearmost chamber of the lobster trap. The escape gap shall be clearly accessible to the lobsters.

(b) Notwithstanding subdivision (a), wire may be used to hold the escape gap in place that reduces the inside vertical or horizontal measurement of the escape gap specified in subdivision (a), but only if all of the following requirements are met:

(1) The overall diameter of the wire, including any coating on the wire, shall measure less than 0.176 inches in diameter (the diameter of 7 SWG gauge wire using the Standard Wire Gauge (SWG) standard of measurement).

(2) A maximum of one wire wrap shall be located on each vertical side of the escape gap.

(3) A maximum of two wire wraps shall be located on the bottom horizontal side of the escape gap.

(4) Wire shall not be used on the top horizontal side of the escape gap.

(5) Each wire shall be tightly wrapped against the inside surface of the escape gap and shall not pass over the inside surface more than once. As used in this paragraph, “tightly wrapped” means no space exists at any point between the wire and the inside surface of the escape gap.

(c) A lobster trap constructed of lath or other material shall have an opening to allow a means of escape along the full length of one side of the rearmost chamber. The escape opening shall be of a spacing of not less than 2 3/8 inches, and the spacing shall be located parallel to, and within 2 3/8 inches of, the floor of the lobster trap.

Comment. Section 49705 continues former Fish and Game Code Section 9010(c)-(e) without substantive change.

§ 49710. Locations where traps may be used

49710. (a) Lobster traps may be used to take spiny lobster in Districts 2620, 2625, 2645, and those portions of District 2640 lying on the southerly side of Santa Catalina Island between Southeast Rock and China Point.

(b) Notwithstanding subdivision (a), or Sections 15500 and 15510, lobster traps may not be used within 75 feet of any private pier, wharf, jetty, breakwater, or dock.

Comment. Subdivision (a) of Section 49710 continues former Fish and Game Code Section 8258 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 9010(b) without substantive change.

Note. Existing Fish and Game Code Section 9010(b) (which would be continued by proposed Section 49710(b)), although not expressly referencing existing Fish and Game Code Section 8258 (which would be continued by proposed Section 49710(a)), appears to specify a blanket restriction on where lobster traps may otherwise be used to take lobster. Proposed Section

49710(b) would therefore make express that the authorization to use lobster traps provided by existing Section 9010(b) is subject to the restriction in existing Section 8258.

The Commission invites comment on whether proposed Section 49710 accurately reconciles the intended interrelationship between existing Sections 8258 and 9010(b).

§ 49715. Incidental take of other species

49715. The following species may be taken incidentally in lobster traps being fished under the authority of a lobster permit issued pursuant to Section 49500, and any other species taken incidentally shall be immediately released back to the water:

(a) Crab, other than Dungeness crab.

(b) Kellet's whelk.

(c) Octopus.

Comment. Section 49715 continues former Fish and Game Code Section 8250.5(b) without substantive change.

CHAPTER 5. OTHER PROHIBITIONS

§ 49750. Prohibition on sale of lobsters taken while skin diving

49750. Spiny lobsters taken by a person engaged in the activity commonly known as skin diving, or by a person using self-contained underwater breathing apparatus, shall not be sold.

Comment. Section 49750 continues former Fish and Game Code Section 8250.5(c) without substantive change.

§ 49755. Preserving

49755. (a) It is unlawful to pickle, can, or otherwise preserve a spiny lobster.

(b) Notwithstanding subdivision (a), a spiny lobster may be preserved by freezing.

(c) A spiny lobster may be cooked for consumption in the fresh state.

Comment. Section 49755 continues former Fish and Game Code Section 8253 without substantive change.

PART 10. MONARCH BUTTERFLIES

TITLE 1. MONARCH BUTTERFLIES
GENERALLY

§ 49825. Provisions not exclusive

49825. The provisions of this part are not intended to be exclusive. Other provisions that govern Monarch Butterflies include, but are not limited to, the following provisions:

1 (a) Chapter 4 (commencing with Section 55000) of Title 1 of Part 2 of Division
2 15.

3 **Comment.** Section 49825 is new.

4 TITLE 2. CONSERVATION

5 § 49850. Conservation Authority

6 49850. (a) The department may take feasible actions to conserve monarch
7 butterflies and the unique habitats they depend upon for successful migration.
8 These actions may include, but are not limited to, habitat restoration on
9 department lands, education programs, and voluntary agreements with private
10 landowners.

11 (b) The department may partner with federal agencies, nonprofit organizations,
12 academic programs, private landowners, and other entities that undertake actions
13 to conserve monarch butterflies and aid their successful migration, including the
14 Monarch Joint Venture.

15 (c) When undertaking actions to conserve monarch butterflies and their habitats
16 pursuant to this section, the department shall use the best available science and
17 consider, as appropriate and feasible, all of the following:

18 (1) Restoring or revegetating monarch caterpillar habitat using regionally or
19 locally appropriate native milkweed species.

20 (2) Restoring or revegetating adult monarch butterfly habitat using regionally or
21 locally appropriate native nectar plant species.

22 (3) Controlling nonnative weed species that threaten native milkweed species,
23 and controlling pests and disease, using current best management practices
24 consistent with integrated pest management principles that pose low risk to
25 monarch butterflies and their habitat.

26 (4) Incorporating diverse tree species, structures, and arrangements when
27 restoring or establishing winter habitat sites to match monarch butterfly
28 preferences for temperature, light, moisture, wind, and other microclimate
29 characteristics.

30 (5) Increasing the number of partnerships and making the most of partnerships
31 to use residential and institutional landscaped areas, agricultural noncropped lands,
32 transportation corridors, and conservation easements to create, restore, or enhance
33 monarch butterfly habitat.

34 (d) The fact that a project applicant or landowner does not enter into a voluntary
35 agreement to protect monarch butterflies shall not be grounds for denying a permit
36 or agreement or requiring additional mitigation beyond what would be required to
37 mitigate project impacts under other applicable laws, including, but not limited to,
38 the California Environmental Quality Act (Division 13 (commencing with Section
39 21000) of the Public Resources Code).

40 **Comment.** Section 49850 continues former Fish and Game Code Section 1021 without
41 substantive change.

PART 11. MUSSELS

TITLE 1. MUSSELS GENERALLY

§ 49900. Mollusk

49900. For the purposes of Title 2 (commencing with Section 45400) of Part 3, a mussel is a mollusk.

Comment. Section 49900 is new. It is added for drafting convenience.

§ 49905. Provisions not exclusive

49905. The provisions of this part are not intended to be exclusive. Other provisions that govern mussels include, but are not limited to, Section 20710.

Comment. Section 49905 is new. It is added for drafting convenience.

TITLE 2. DREISSENID MUSSELS

CHAPTER 1. MANAGEMENT BY DEPARTMENT

§ 49950. General prohibition

49950. Except as authorized by the department, a person shall not possess, import, ship, or transport in the state, or place, plant, or cause to be placed or planted in any water within the state, dreissenid mussels.

Comment. Section 49950 continues former Fish and Game Code Section 2301(a)(1) without substantive change.

See also Section 5860 (enforcement).

§ 49955. Report of discovery by any entity

49955. Any entity that discovers dreissenid mussels within this state shall immediately report the discovery to the department.

Comment. Section 49955 continues former Fish and Game Code Section 2301(e) without substantive change.

§ 49960. Authority of department to inspect

49960. The director or his or her designee may do all of the following:

(a) Conduct inspections of conveyances, including vehicles, boats and other watercraft, containers, and trailers, that may carry or contain adult or larval dreissenid mussels.

(b) Temporarily stop conveyances that may carry or contain adult or larval dreissenid mussels on any roadway or waterway, in order to conduct inspections.

(c) Order that areas in a conveyance that contain water be drained, dried, or decontaminated pursuant to procedures approved by the department. An action undertaken pursuant to this subdivision involving the use of chemicals other than

1 salt or hot water to decontaminate a conveyance or a facility is subject to Division
2 13 (commencing with Section 21000) of the Public Resources Code.

3 (d) Impound or quarantine conveyances in locations designated by the
4 department for up to five days or the period of time necessary to ensure that
5 dreissenid mussels can no longer live on or in the conveyance.

6 (e) Conduct inspections of waters of the state and facilities located within waters
7 of the state that may contain dreissenid mussels. If dreissenid mussels are detected
8 or may be present, the director or his or her designee may order the affected waters
9 or facilities closed to conveyances or otherwise restrict access to the affected
10 waters or facilities, and shall order that conveyances removed from, or introduced
11 to, the affected waters or facilities be inspected, quarantined, or disinfected in a
12 manner and for a duration necessary to detect and prevent the spread of dreissenid
13 mussels within the state.

14 **Comment.** Section 49960 combines and continues former Fish and Game Code Section
15 2301(a)(2)(A) through (D)(i), and (c)(2), without substantive change.

16 **§ 49965. Restricted access to designated areas**

17 49965. (a) For the purpose of implementing subdivision (e) of Section 49660,
18 the director or his or her designee shall order the closure or quarantine of, or
19 restrict access to, these waters, areas, or facilities in a manner and duration
20 necessary to detect and prevent the spread of dreissenid mussels within the state.

21 (b) No closure, quarantine, or restriction shall be authorized by the director or
22 his or her designee without the concurrence of the Secretary of the Natural
23 Resources Agency.

24 (c) If a closure lasts longer than seven days, the department shall update the
25 operator of the affected facility every 10 days on efforts to address the dreissenid
26 infestation. The department shall provide these updates in writing and also post
27 these updates on the department's Internet Web site in an easily accessible
28 manner.

29 (d) The department shall develop procedures to ensure proper notification of
30 affected local and federal agencies, and, as appropriate, the Department of Water
31 Resources, the Department of Parks and Recreation, and the State Lands
32 Commission in the event of a decision to close, quarantine, or restrict a facility
33 pursuant to this paragraph. These procedures shall include the reasons for the
34 closure, quarantine, or restriction, and methods for providing updated information
35 to those affected. These procedures shall also include protocols for the posting of
36 the notifications on the department's Internet Web site required by subdivision (c).

37 (e) When deciding the scope, duration, level, and type of restrictions, and
38 specific location of a closure or quarantine, the director shall consult with the
39 agency, entity, owner, or operator with jurisdiction, control, or management
40 responsibility over the marina, boat launch facility, or other facility, in order to
41 focus the closure or quarantine to specific areas and facilities so as to avoid or
42 minimize disruption of economic or recreational activity in the vicinity.

1 **Comment.** Section 49965 continues former Fish and Game Code Section 2301(a)(2)(D)(ii)-
2 (iv) without substantive change.

3 **§ 49970. Involvement of other agencies**

4 49970. (a) Upon a determination by the director that it would further the
5 purposes of this section, other state agencies, including, but not limited to, the
6 Department of Parks and Recreation, the Department of Water Resources, the
7 Department of Food and Agriculture, and the State Lands Commission, may
8 exercise the authority granted to the department in Sections 49660 and 49665.

9 (b) A determination made pursuant to paragraph (1) shall be in writing and shall
10 remain in effect until withdrawn, in writing, by the director.

11 **Comment.** Section 49970 continues former Fish and Game Code Section 2301(b) without
12 substantive change.

13 **§ 49975. Inapplicability of division of Public Resources Code**

14 49975. Except as provided in subdivision (c) of Section 49660, Division 13
15 (commencing with Section 21000) of the Public Resources Code does not apply to
16 the implementation of this section.

17 **Comment.** Section 49975 continues former Fish and Game Code Section 2301(c)(1) without
18 substantive change.

19 **§ 49980. Water supply agency cooperation**

20 49980. (a) A public or private agency that operates a water supply system shall
21 cooperate with the department to implement measures to avoid infestation by
22 dreissenid mussels, and to control or eradicate any infestation that may occur in a
23 water supply system.

24 (b) If dreissenid mussels are detected, the operator of the water supply system,
25 in cooperation with the department, shall prepare and implement a plan to control
26 or eradicate dreissenid mussels within the system. The approved plan shall contain
27 the following minimum elements:

28 (1) Methods for delineation of infestation, including both adult mussels and
29 veligers.

30 (2) Methods for control or eradication of adult mussels and decontamination of
31 water containing larval mussels.

32 (3) A systematic monitoring program to determine any changes in conditions.

33 (4) A requirement that the operator of the water supply system permit
34 inspections by the department, as well as cooperate with the department, to update
35 or revise control or eradication measures in the approved plan to address scientific
36 advances in the methods of controlling or eradicating mussels and veligers.

37 (c) If the operator of water delivery and storage facilities for public water supply
38 purposes has prepared, initiated, and is in compliance with all the elements of an
39 approved plan to control or eradicate dreissenid mussels in accordance with
40 subdivision (b), the requirements of Sections 49660 and 49665 do not apply to the
41 operation of those water delivery and storage facilities, and the operator is not

1 subject to any civil or criminal liability for the introduction of dreissenid mussel
2 species as a result of those operations.

3 (d) The department may require the operator of a facility to update its plan, and
4 if the plan is not updated or revised as described in paragraph (4) of subdivision
5 (b), Sections 49660 and 49665 shall apply to the operation of the water delivery
6 and storage facilities covered by the plan until the operator updates or revises the
7 plan and initiates and complies with all of the elements of the updated or revised
8 plan.

9 **Comment.** Section 49980 continues former Fish and Game Code Section 2301(d) without
10 substantive change.

11 **§ 49985. Department authority to adopt regulations**

12 49985. The department may adopt regulations to carry out this chapter and
13 Section 5860.

14 **Comment.** Section 49985 continues former Fish and Game Code Section 2301(g) without
15 substantive change.

16 **§ 49990. Immunity from liability**

17 49990. Pursuant to Section 818.4 of the Government Code, the department and
18 any other state agency exercising authority under this section shall not be liable
19 with regard to any determination or authorization made pursuant to this chapter.

20 **Comment.** Section 49990 continues former Fish and Game Code Section 2301(h) without
21 substantive change.

22 **§ 50000. Inoperative date**

23 50000. This chapter shall remain in effect only until January 1, 2020, and as of
24 that date is repealed, unless a later enacted statute, that is enacted before January
25 1, 2020, deletes or extends that date.

26 **Comment.** Section 50000 continues former Fish and Game Code Section 2301(i) without
27 substantive change.

28 **CHAPTER 2. RESERVOIR OWNERS OR MANAGERS**

29 **§ 50100. Inapplicability of chapter**

30 50100. This chapter does not apply to a reservoir in which nonnative dreissenid
31 mussels have been detected.

32 **Comment.** Section 50100 continues former Fish and Game Code Section 2302(g) without
33 substantive change.

34 **§ 50105. Duties where water activities are permitted**

35 50105. Any person, or federal, state, or local agency, district, or authority that
36 owns or manages a reservoir, as defined in Section 6004.5 of the Water Code,
37 where recreational, boating, or fishing activities are permitted, except a privately
38 owned reservoir that is not open to the public, shall do both of the following:

1 (a) Assess the vulnerability of the reservoir for the introduction of nonnative
2 dreissenid mussel species.

3 (b) Develop and implement a program designed to prevent the introduction of
4 nonnative dreissenid mussel species, which shall include, at a minimum, all of the
5 following:

6 (1) Public education.

7 (2) Monitoring.

8 (3) Management of those recreational, boating, or fishing activities that are
9 permitted.

10 **Comment.** Section 50105 continues former Fish and Game Code Section 2302(a)-(b) without
11 substantive change.

12 **§ 50110. Duties where water activities are not permitted**

13 50110. Any person, or federal, state, or local agency, district, or authority, that
14 owns or manages a reservoir as defined in Section 6004.5 of the Water Code
15 where recreational, boating, or fishing activities of any kind are not permitted,
16 except a privately owned reservoir that is not open to the public, shall, based on its
17 available resources and staffing, include visual monitoring for the presence of
18 mussels as part of its routine field activities.

19 **Comment.** Section 50110 continues former Fish and Game Code Section 2302(c) without
20 substantive change.

21 **§ 50115. Duties where reservoir not open to public**

22 50115. Any entity that owns or manages a reservoir as defined in Section 6004.5
23 of the Water Code, except a privately owned reservoir, that is not open to the
24 public for recreational, boating, or fishing activities, may refuse the planting of
25 fish in that reservoir by the department, unless the department can demonstrate
26 that the fish are not known to be infected with nonnative dreissenid mussels.

27 **Comment.** Section 50115 continues former Fish and Game Code Section 2302(d) without
28 substantive change.

29 **§ 50120. Applicability of chapter to governmental entities**

30 50120. Except as specifically set forth in this chapter, this chapter applies both
31 to reservoirs that are owned or managed by governmental entities, and reservoirs
32 that are owned or managed by private persons or entities.

33 **Comment.** Section 50120 continues former Fish and Game Code Section 2302(e) without
34 substantive change.

35 **§ 50125. Adoption of regulations by department**

36 50125. To the extent that sufficient funds and personnel are available to do so,
37 the department may adopt regulations establishing procedures to implement this
38 section and Section 5862, and to enforce this chapter.

39 **Comment.** Section 50125 continues the third sentence of former Fish and Game Code Section
40 2302(f) without substantive change.

1 See also Section 5862 (enforcement).

2 **TITLE 3. COMMERCIAL PROVISIONS**

3 **§ 50250. Application of title**

4 50250. For purposes of Section 45005, the provisions in this title are commercial
5 provisions.

6 **Comment.** Section 50250 is new. It is added for drafting convenience.

7 **§ 50255. Take**

8 50255. Mussels (*Mytilus californianus*) may be taken only in accordance with
9 regulations that the commission may adopt.

10 **Comment.** Section 50255 continues former Fish and Game Code Section 8344 without
11 substantive change.

12 **PART 12. SCALLOPS**

13 **TITLE 1. SCALLOPS GENERALLY**

14 **§ 50350. Mollusk**

15 50350. For the purposes of Title 2 (commencing with Section 45400) of Part 3, a
16 scallop is a mollusk.

17 **Comment.** Section 50350 is new. It is added for drafting convenience.

18 **TITLE 2. COMMERCIAL PROVISIONS**

19 **§ 50400. Application of title**

20 50400. For purposes of Section 45005, the provisions in this title are commercial
21 provisions.

22 **Comment.** Section 50400 is new. It is added for drafting convenience.

23 **§ 50405. Sale or purchase**

24 50405. It is unlawful for a person to sell or purchase rock scallops (*Hinnites*
25 *multirugosus*) or scallops (*Pecten circularis*), except that scallops cultivated
26 pursuant to Part 1 (commencing with Section 23300) of Division 7 may be sold or
27 purchased subject to regulations of the commission.

28 **Comment.** Section 50405 continues former Fish and Game Code Section 8345 without
29 substantive change.

PART 13. SEA CUCUMBERS

TITLE 1. SEA CUCUMBERS GENERALLY

§ 50450. Provisions not exclusive

50450. The provisions of this part are not intended to be exclusive. Other provisions that govern sea cucumbers include, but are not limited to, the following provisions:

(a) Section 16110.

(b) Section 40115.

Comment. Section 50450 is new. It is added for drafting convenience.

TITLE 2. COMMERCIAL PROVISIONS

§ 50500. Application of title

50500. For purposes of Section 45005, the provisions in this title are commercial provisions.

Comment. Section 50500 is new. It is added for drafting convenience.

§ 50505. Take, possession, or landing

50505. (a) A sea cucumber shall not be taken, possessed aboard a boat, or landed by a person, for a commercial purpose, except under a valid sea cucumber permit issued to that person that has not been suspended or revoked.

(b) When taking a sea cucumber by diving, every diver shall have a sea cucumber diving permit issued to that person that has not been suspended or revoked.

(c) When a sea cucumber is taken by means other than diving, at least one person aboard the boat shall have a valid sea cucumber trawl permit issued to that person that has not been suspended or revoked.

Comment. Section 50505 continues former Fish and Game Code Section 8405 without substantive change.

§ 50510. Permit

50510. (a) An applicant for a sea cucumber permit shall specify by gear type, either trawl or dive, the method by which the applicant intends to take sea cucumbers. The gear type of a sea cucumber permit, either trawl or dive, shall not be transferable.

(b) The fee for a sea cucumber permit shall be two hundred fifty dollars (\$250).

(c) Each permittee shall complete and submit an accurate record of all sea cucumber fishing activities on forms provided by the department.

(d) In order to renew a sea cucumber permit for any permit year, an applicant shall have been issued a sea cucumber permit in the immediately preceding permit

1 year. Applications for renewal of a sea cucumber permit shall be received by the
2 department or, postmarked if mailed, by April 30 of the permit year.

3 **Comment.** Section 50510 continues former Fish and Game Code Section 8405.1 without
4 substantive change.

5 **§ 50515. Transfer of permit**

6 50515. (a) A valid sea cucumber permit may be transferred by the permittee if
7 the permittee has previously held a valid sea cucumber permit for any four permit
8 years and landed at least 100 pounds of sea cucumbers in each of those permit
9 years, as documented by landing receipts with the name of the permittee shown on
10 the receipts.

11 (b) A valid sea cucumber permit that has not been suspended or revoked may be
12 transferred only to a person who has a valid commercial fishing license issued
13 pursuant to Section 14550 that has not been suspended or revoked. A sea
14 cucumber permit shall not be transferred to a person who has had a sea cucumber
15 permit suspended or revoked, while the suspension or revocation is in effect.

16 (c) An application for transfer of a permit shall be in the form of a notarized
17 letter, and shall be submitted to the department, with reasonable proof that the
18 department may require to establish the qualifications of the permitholder and the
19 transferee, accompanied by payment to the department of a nonrefundable transfer
20 fee of two hundred dollars (\$200).

21 (d) The transfer shall take effect on the date notice of approval of the application
22 is given to the transferee by the department.

23 (e) The transferred sea cucumber permit shall be valid for the remainder of the
24 permit year, and may be renewed in subsequent years.

25 (f) A sea cucumber trawl permit may be transferred to a qualified person as
26 provided in subdivisions (b) and (c) to take sea cucumbers by diving or by use of
27 trawl nets. A sea cucumber dive permit may be transferred to a qualified person as
28 provided in subdivisions (b) and (c) only to take sea cucumbers by diving. The
29 transferee shall specify the gear type, either trawl or dive, that the transferee
30 intends to use to take sea cucumbers. The gear type of the sea cucumber permit,
31 either trawl or dive, shall not be transferable.

32 (g) Upon the death of a sea cucumber permitholder, the deceased person's sea
33 cucumber dive or trawl permit may be transferred by his or her heirs, assignees, or
34 estate to a qualified person as provided in subdivision (b), upon payment of the fee
35 described in subdivision (c), and in accordance with subdivisions (a) and (f). The
36 estate of the decedent may transfer the permit pursuant to this title no later than
37 two years from the date of death of the permitholder, as listed on the death
38 certificate.

39 (h) For purposes of a transfer under subdivision (g), the heirs, assignees, or
40 estate shall renew the permit as specified in Section 50510 to keep the permit valid
41 until transferred.

1 **Comment.** Section 50515 continues former Fish and Game Code Section 8405.2 without
2 substantive change.

3 **§ 50520. Commission regulation**

4 50520. (a) The commission, upon recommendation of the department or upon its
5 own motion and in consultation with the sea cucumber fishing industry, may adopt
6 regulations, including provisions governing seasons, gear restrictions, hours of
7 operation, and any other measures that it determines may reasonably be necessary
8 to protect the sea cucumber resource and to assure a sustainable sea cucumber
9 fishery or to enhance enforcement activities.

10 (b) The number of sea cucumber permits issued for the April 1, 1997, to March
11 31, 1998, inclusive, permit year shall constitute the maximum number of permits
12 available for all subsequent permit years for the sea cucumber fishery. The
13 department may establish by regulation a method, if necessary, to reissue any sea
14 cucumber permit not renewed or transferred. The permit type of a sea cucumber
15 permit, either trawl or dive, that is reissued shall not be transferable.

16 (c) The department, using existing funds, may determine the actual costs to the
17 department of enforcing this chapter. The commission, upon recommendation of
18 the department, may adjust the fee for the issuance or transfer of a permit to an
19 amount not to exceed three hundred fifty dollars (\$350), to reflect the actual cost
20 of enforcing this chapter.

21 **Comment.** Section 50520 continues former Fish and Game Code Section 8405.3(a)-(b), & (d)
22 without substantive change.

23 **§ 50525. Inoperative date of chapter**

24 50525. This chapter shall become inoperative on April 1, 2020, and, as of
25 January 1, 2021, is repealed, unless a later enacted statute that is enacted before
26 January 1, 2021, deletes or extends the date on which this chapter becomes
27 inoperative or is repealed.

28 **Comment.** Section 50525 continues former Fish and Game Code Section 8405.4 without
29 substantive change.

30 **PART 14. SEA URCHINS**

31 **TITLE 1. SEA URCHINS GENERALLY**

32 **§ 50650. Provisions not exclusive**

33 50650. The provisions of this part are not intended to be exclusive. Other
34 provisions that govern sea urchins include, but are not limited to, the following
35 provisions:

36 (a) Section 12165.

37 (b) Section 25125.

38 **Comment.** Section 50650 is new. It is added for drafting convenience.

1 **§ 50655. Department grant**

2 50655. (a) Commencing November 1, 1991, the director shall make a grant in
3 installments to a nonprofit organization of sea urchin divers in an amount not to
4 exceed four hundred thousand dollars (\$400,000), for the organization to
5 accomplish the following purposes:

6 (1) To establish a communications network among sea urchin divers, through a
7 newsletter and such other means as are deemed necessary and appropriate by the
8 organization, providing divers with information on policies, procedures, statutes,
9 and regulations affecting the sea urchin fishery, meeting announcements, and for
10 other information the department reasonably requests to be transmitted to sea
11 urchin divers.

12 (2) To establish an education program on the conservation and utilization of sea
13 urchins.

14 (3) To convene statewide conferences for members of the industry to meet for
15 purposes of strengthening the industry and benefiting industry goals.

16 (b) The grant shall be paid, upon submission and approval of an annual budget,
17 in quarterly installments, in amounts deemed appropriate by the department, upon
18 the submission to the department of progress reports which demonstrate the
19 continued achievements of the organization toward the intended goals.

20 (c) Prior to making the grant, the director shall verify from the nonprofit
21 organization's bylaws that it is established for, among other purposes, the
22 protection, conservation, enhancement, and promotion of the sea urchin fishery,
23 and that its membership, including its board of directors, is composed solely of
24 licensed commercial sea urchin divers.

25 (d) The grant shall be funded from revenues received pursuant to former
26 subdivision (b) of Section 8051.1, as that subdivision read on December 31, 1995.
27 If the department determines that the revenue received from former subdivision
28 (b) of Section 8051.1, as that subdivision read on December 31, 1995, is not
29 sufficient to fund the amount of the grant, including departmental overhead
30 charges which shall be recovered from the revenues received pursuant to that
31 former subdivision (b) of Section 8051.1, the department shall reduce the amount
32 of the grant accordingly. The revenue received pursuant to that former subdivision
33 (b) of Section 8051.1 shall remain available for funding of the grant program
34 pursuant to this subdivision until that revenue is fully encumbered, or the
35 authorized amount of the grant program is expended, whichever event is later.

36 (e) The revenue received pursuant to former subdivision (b) of Section 8051.1 as
37 it read on December 31, 1995, shall first be used to reimburse the department for
38 departmental overhead charges incurred in administering the grant.

39 **Comment.** Section 50655 continues former Fish and Game Code Section 1068 without
40 substantive change.

41 **Note.** Existing Section 1068 (which would be continued by proposed Section 50655) requires
42 the director of the Department of Fish and Wildlife to make a specified grant, with the grant

1 funded from revenue received pursuant to former Fish and Game Code Section 8051.1(b). Former
2 Section 8051.1 became inoperative in 2001, and was repealed in 2002.

3 **The Commission invites comment on whether, based on the elimination of the specified**
4 **funding provision in 2001, Section 1068 is now obsolete and need not be continued in the**
5 **proposed law.**

6 TITLE 2. COMMERCIAL PROVISIONS

7 § 50700. Application of title

8 50700. For purposes of Section 45005, the provisions in this title are commercial
9 provisions.

10 **Comment.** Section 50700 is new. It is added for drafting convenience.

11 § 50705. Permit required

12 50705. (a) Sea urchins shall not be taken for a commercial purpose except under
13 a valid sea urchin diving permit issued to that person that has not been suspended
14 or revoked, subject to regulations adopted by the commission.

15 (b) The fee for a sea urchin diving permit is three hundred thirty dollars (\$330).

16 (c) The commission may, whenever necessary to prevent overutilization, or to
17 ensure efficient and economic operation of the fishery, limit the number of permits
18 that may be issued.

19 (d) The commission, as it determines appropriate to protect the resource, may
20 limit the number of permits, either on a statewide basis or within selected
21 geographical areas.

22 **Comment.** Subdivision (a) of Section 50705 continues the first sentence of former Fish and
23 Game Code Section 9054 without substantive change.

24 Subdivision (b) continues former Fish and Game Code Section 9055 without substantive
25 change.

26 Subdivision (c) continues the third sentence of former Fish and Game Code Section 9054
27 without substantive change.

28 Subdivision (d) continues the fourth sentence of former Fish and Game Code Section 9054
29 without substantive change.

30 § 50710. Allowed appliances

31 50710. Rakes, airlifts, or other handheld appliances may be used to take sea
32 urchins.

33 **Comment.** Section 50710 continues the second sentence of former Fish and Game Code
34 Section 9054 without substantive change.

PART 15. SHRIMP AND PRAWNS

TITLE 1. SHRIMP AND PRAWNS GENERALLY

§ 50850. Crustacean

50850. For the purposes of Title 2 (commencing with Section 45400) of Part 3, shrimp and prawns are crustaceans.

Comment. Section 50850 is new. It is added for drafting convenience.

§ 50855. Provisions not exclusive

50855. The provisions of this part are not intended to be exclusive. Other provisions that govern shrimp or prawns include, but are not limited to, the following provisions:

- (a) Section 12165.
- (b) Section 16110.
- (c) Section 19805.
- (d) Section 20710.
- (e) Section 23355.

Comment. Section 50855 is new. It is added for drafting convenience.

TITLE 2. COMMERCIAL PROVISIONS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 50950. Application of title

50950. For purposes of Section 45005, the provisions in this title are commercial provisions.

Comment. Section 50950 is new. It is added for drafting convenience.

§ 50955. “Shrimp” or “prawns”

50955. For the purposes of this title, “shrimp” or “prawns,” or both, include all of the following species:

- (1) Spot prawn (*Pandalus platyceros*).
- (2) Ridgeback prawn (*Sicyonia ingentis*).
- (3) Coonstrip prawn (*Pandalus danae*).
- (4) Pacific ocean shrimp (*Pandalus jordani*).
- (5) Bay shrimp (*Crangon franciscorum* and *Crango* sp.).
- (6) Red rock shrimp (*Lysemata californica*).

Comment. Section 50955 continues former Fish and Game Code Section 8590 without substantive change.

1 CHAPTER 2. TAKE

2 Article 1. General Provisions

3 **§ 51000. Take generally allowed**

4 51000. Except as provided in this chapter, prawns or shrimp may be taken in any
5 waters of the state.

6 **Comment.** Section 51000 continues former Fish and Game Code Section 8593 without
7 substantive change.

8 **§ 51005. Take for commercial purpose**

9 51005. Prawns or shrimp may be taken for a commercial purpose under the
10 regulations of the commission.

11 **Comment.** Section 51005 continues former Fish and Game Code Section 8591 without
12 substantive change.

13 **§ 51010. Required bycatch reduction device**

14 51010. (a) Commencing April 1, 2006, it is unlawful to fish commercially for
15 prawns or pink shrimp, unless an approved bycatch reduction device is used with
16 each net.

17 (b) On or before April 1, 2006, the commission shall approve one or more
18 bycatch reduction devices for use in the bottom trawl fishery. For purposes of this
19 subdivision, a rigid grate fish excluder device is the approved type of bycatch
20 reduction device unless the commission, the Pacific Marine Fishery Management
21 Council, or the National Marine Fisheries Service determines that a different type
22 of fish excluder device has an equal or greater effectiveness at reducing bycatch. If
23 the commission does not approve a bycatch reduction device prior to April 1,
24 2006, then a device that is approved by the Pacific Marine Fishery Management
25 Council or the National Marine Fisheries Service shall be deemed approved by the
26 commission.

27 (c) This section does not apply to the use of trawl nets pursuant to a scientific
28 research permit.

29 **Comment.** Subdivisions (a) and (b) of Section 51010 continue former Fish and Game Code
30 Section 8841(g) without substantive change.

31 In combination with Sections 16110(g), 16160(b), 16165(b), and 16170(b), subdivision (c) of
32 Section 51010 continues former Fish and Game Code Section 8841(i) without substantive
33 change.

34 See also Section 4900 (enforcement).

35 **§ 51015. Use of traps**

36 51015. (a) Except as otherwise provided in this chapter, prawns or shrimp may
37 be taken with a prawn trap or shrimp trap under a general trap permit issued
38 pursuant to Section 19205.

(b) Prawns or shrimp may be taken for a commercial purpose in either a prawn trap or a shrimp trap, subject to Title 6 (commencing with Section 19200) of Part 4 of Division 6.

(c) A prawn trap or a shrimp trap shall be six feet or less in its greatest dimension. Every opening from the exterior to the interior of a prawn trap or a shrimp trap shall be five inches or less in any dimension.

(d) No other species shall be taken in a prawn trap or a shrimp trap. Any other species taken incidentally with a prawn trap or a shrimp trap shall be immediately released.

Comment. Subdivision (a) of Section 51015 continues former Fish and Game Code Section 9015(a) without substantive change.

Subdivision (b) continues the second part of former Fish and Game Code Section 8595(a) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 9015(b) without substantive change.

Subdivision (d) continues former Fish and Game Code Section 8595(b) without substantive change.

See also Section 4900 (enforcement).

Article 2. Geographic Restrictions

§ 51050. Take south of Point Concepcion

51050. From Point Concepcion south to the Mexican border, shrimp may be taken with prawn or shrimp traps only in waters 50 fathoms or greater in depth.

Comment. Section 51050 continues former Fish and Game Code Section 8594 without substantive change.

Article 3. Use of Trawl Nets

§ 51100. Permit

51100. Subject to Chapter 8 (commencing with Section 16100) of Title 3 of Part 6 of Division 6, and Section 51010, prawns or shrimp may be taken for a commercial purpose with a trawl net of a design prescribed by the commission, pursuant to a permit issued by the department and under regulations adopted by the commission.

(b) Section 16150, and Article 3 (commencing with Section 16250) of Chapter 8 of Title 3 of Part 6 of Division 6 do not apply to trawl nets used or possessed under a permit issued pursuant to this section.

Comment. Subdivision (a) of Section 51100 combines and restates the first part of former Fish and Game Code Section 8595(a) and the first paragraph of former Fish and Game Code Section 8842(a) without substantive change.

Subdivision (b) continues the second paragraph of former Fish and Game Code Section 8842(a) without substantive change.

Note. Proposed Section 51100(a) is intended to combine and restate the first part of former Fish and Game Code Section 8595(a) and the first paragraph of former Fish and Game Code

Section 8842(a) to clarify the meaning of those provisions, without changing their substantive effect. The existing provisions read as follows:

8595. (a) Prawns or shrimp may be taken for commercial purposes with a trawl net, subject to Article 10 (commencing with Section 8830) of Chapter 3,....

8842. (a) Trawl nets of a design prescribed by the commission may be used or possessed to take shrimps or prawns under a permit issued by the department under regulations adopted by the commission.

The Commission invites comment on whether the combining and restatement of these two provisions would cause any substantive change in the meaning of either.

§ 51105. Geographic restrictions

51105. (a) Trawling for prawns or shrimp shall be authorized only in those waters of Districts 2570, 2575, 2590, 2615, 2620, and 2625 that lie not less than three nautical miles from the nearest point of land on the mainland shore, and all offshore islands and the boundary line of District 2630.

(b) The commission shall permit the taking of pink shrimp not less than two nautical miles from shore in waters that lie between a line extending due west from False Cape and a line extending due west from Point Reyes from the nearest point of land on the mainland shore, if the commission finds that, upon review of information from the federal groundfish observer program and other available research and monitoring information that it determines relevant, the use of trawl gear minimizes bycatch, will not damage seafloor habitat, will not adversely affect ecosystem health, and will not impede reasonable restoration of kelp, coral, or other biogenic habitats. The commission shall pay special attention to areas where kelp and other biogenic habitats existed and where restoring those habitats is feasible, and to hard bottom areas and other substrate that may be particularly sensitive to bottom trawl impacts in making that finding.

Comment. Subdivision (a) of Section 51105 continues former Fish and Game Code Section 8842(b) without substantive change. A stated exception to the provision, expressly expiring on January 1, 2008, is discontinued.

Subdivision (b) continues former Fish and Game Code Section 8842(d) without substantive change.

§ 51110. Incidental take while fishing for pink shrimp

51110. When fishing for pink shrimp (*Pandalus jordani*) under a permit issued pursuant to Section 51100, it is unlawful to possess in excess of 1,500 pounds of incidentally taken fish per calendar day of a fishing trip, except Pacific whiting, shortbelly rockfish, and arrowtooth flounder, which may be taken in any amount not in excess of federal regulations.

Comment. Section 51110 continues the first sentence of former Fish and Game Code Section 8842(c) without substantive change.

Comment. Section 51400 continues former Fish and Game Code Section 8399 without substantive change.

§ 51405. Unlawful activities in District 2590

51405. (a) In District 2590, it is unlawful to engage in the following activities:

(1) Attract squid by a light displayed from any vessel, except a vessel deploying nets for the take, possession, and landing of squid or from the seine skiff of the vessel deploying nets for the take, possession, and landing of squid.

(2) Attract squid by a light displayed from any vessel whose primary purpose is not the deployment, or assisting in the deployment, of nets for the take, possession, and landing of squid.

(3) To encircle any vessel, other than by the seine skiff of a vessel deploying nets for the take, possession, and landing of squid, while that vessel is engaged in the taking of squid.

(b) For purposes of this section, “seine skiff” means a vessel that meets all of the following requirements:

(1) It is not licensed by the federal government or registered by the Department of Motor Vehicles.

(2) It is used to assist a larger federally-licensed or state-registered fishing vessel by assisting in the deployment and retrieval of nets and the landing of fish.

(3) It travels with that larger fishing vessel at all times.

(4) It is used solely at the direction of the operator of the larger fishing vessel.

(5) It is owned by the owner of the larger fishing vessel.

Comment. Section 51405 continues former Fish and Game Code Section 8399.1 without substantive change.

Note. The Commission notes the following ambiguities in the language of existing Section 8399.1(a):

(1) Under Section 8399.1(a)(1), may light be displayed to attract squid from the *seine skiff* of a vessel deploying squid nets? If so, does the seine skiff have to itself be concurrently deploying nets?

(2) In Section 8399.1(a)(3), which “vessel” is the object of the reference “while that vessel is engaged in the taking of squid” at the end of the provision – the vessel deploying squid nets with a seine skiff, or the vessel that is being encircled?

The Commission invites comment on these questions.

CHAPTER 3. MARKET SQUID

§ 51450. Legislative declaration

51450. (a) The Legislature finds and declares that the fishery for market squid (*Loligo opalescens*) is the state’s largest fishery by volume, generating millions of dollars of income to the state annually from domestic and foreign sales. In addition to supporting an important commercial fishery, the market squid resource is important to the recreational fishery and is forage for other fish taken for commercial and recreational purposes, as well as for marine mammals, birds, and

1 other marine life. The growing international market for squid and declining squid
2 production from other parts of the world has resulted in an increased demand for
3 California market squid, which, in turn, has led to newer, larger, and more
4 efficient vessels entering the fishery and increased processing capacity.

5 (b) The Legislature finds that the lack of research on market squid and the lack
6 of annual at-sea surveys to determine the status of the resource, combined with the
7 increased demand for, and fishing effort on, market squid could result in
8 overfishing of the resource, damaging the resource, and financially harming those
9 persons engaged in the taking, landing, processing, and sale of market squid.

10 (c) The Legislature further finds that some individuals, vessels, and processing
11 plants engaged in the market squid fishery have no other viable alternative
12 fisheries available to them and that a decline or a loss of the market squid resource
13 would cause economic devastation to the individuals or corporations engaged in
14 the market squid fishery.

15 (d) The Legislature declares that to prevent excessive fishing effort in the market
16 squid fishery and to develop a plan for the sustainable harvest of market squid, it is
17 necessary to adopt and implement a fishery management plan for the California
18 market squid fishery that sustains both the squid population and the marine life
19 that depends on squid.

20 (e) The Legislature finds that a sustainable California market squid fishery can
21 best be ensured through ongoing oversight and management of the fishery by the
22 commission. With regard to the market squid fishery, the Legislature urges that
23 any limited entry component of a fishery management plan, if necessary, should
24 be adopted for the primary purpose of protecting the resource and not simply for
25 the purpose of diminishing or advancing the economic interests of any particular
26 individual or group.

27 **Comment.** Section 51450 continues former Fish and Game Code Section 8420 without
28 substantive change.

29 **§ 51455. Purchase of squid from vessel**

30 51455. (a) No person shall purchase squid from a vessel or vessels unless that
31 person holds a license issued pursuant to subdivision (a) of Section 20205 or
32 pursuant to Section 20450, employs a certified weighmaster, and the facilities
33 operated by the person are located on a permanent, fixed location.

34 (b) Notwithstanding any other provision of law, this section shall not apply to
35 the transfer at sea of squid for live bait in an amount less than 200 pounds in a
36 calendar day.

37 **Comment.** Section 51455 continues former Fish and Game Code Section 8424 without
38 substantive change.

39 **§ 51460. Adoption of fishery management plan and regulations**

40 51460. The commission, after consideration of the report and recommendations
41 prepared by the department pursuant to subdivision (c) of former Section 8426,

1 and, after public hearings, shall adopt a market squid fishery management plan and
2 regulations to protect the squid resource and manage the squid fishery at a level
3 that sustains healthy squid populations, taking into account the level of fishing
4 effort and ecological factors, including, but not limited to, the species' role in the
5 marine ecosystem and oceanic conditions. The management plan shall be
6 consistent with the requirements of Title 3 (commencing with Section 12100) of
7 Part 4 of Division 6. Development of the plan shall be coordinated with the federal
8 Coastal Pelagic Species Fishery Management Plan.

9 **Comment.** Section 51460 continues former Fish and Game Code Section 8425(a) without
10 substantive change.

11 **§ 51465. Management of fishery**

12 51465. The commission shall manage the squid fishery in accordance with the
13 requirements of Title 3 (commencing with Section 12100) of Part 4 of Division 6.

14 **Comment.** Section 51465 continues former Fish and Game Code Section 8425(b) without
15 substantive change.

16 **§ 51470. Permit fee**

17 51470. (a) The fee for a commercial market squid vessel permit and for a
18 commercial squid light boat owner's permit shall be established annually by the
19 commission.

20 (b) The total amount of fees collected pursuant to this section, including any
21 revenue derived from any other appropriate source, as determined and allocated by
22 the commission, shall not exceed the department's and the commission's costs for
23 managing the market squid fishery pursuant to Sections 51460 and 51465.

24 (c) The fees collected pursuant to this chapter shall be used only for the
25 management of the market squid fishery pursuant to Sections 51460 and 51465.

26 **Comment.** Section 51470 continues former Fish and Game Code Section 8428 without
27 substantive change.

28 See also Section 5880 (enforcement).

29 **§ 51475. Statements relating to permit**

30 51475. Any statement made to the department, orally or in writing, relating to a
31 permit issued under this chapter, shall be made under penalty of perjury.

32 **Comment.** Section 51475 continues the first sentence of former Fish and Game Code Section
33 8429 without substantive change.

34 **§ 51485. No limit on authority of director or commission**

35 51485. Notwithstanding any other provision of law, nothing in this chapter shall
36 prohibit or otherwise limit the authority of the director or the commission under
37 any other law.

38 **Comment.** Section 51485 continues former Fish and Game Code Section 8429.5 without
39 substantive change.

DIVISION 12. AMPHIBIANS

PART 1. GENERAL PROVISIONS

§ 51900. Governance by other provisions

51900. Animals governed by this division are also governed by other provisions of this code, including but not limited to Divisions 6 (commencing with Section 8000) and 7 (commencing with Section 23300).

Comment. Section 51900 is new. It is added for drafting convenience.

§ 51905. Use as bait

51905. An amphibian may be used for bait, or released in the same waters from which it was taken.

Comment. Section 51905 continues the part of former Fish and Game Code Section 5505 applicable to amphibians without substantive change.

PART 2. DISEASE CONTROL

§ 52000. Application of title

52000. (a) This part applies to all amphibians, including, but not limited to, amphibians being imported or transported.

(b) This part does not apply to activities governed by Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 52000 continues the part of former Fish and Game Code Section 6300 applicable to amphibians without substantive change.

§ 52005. Authorized entry by department

52005. The department may enter at any time any vehicle, container, warehouse, depot, ship, or growing area where any amphibians are held, transported, or stored, for the purpose of making a regulatory inspection to ascertain whether those amphibians are infected, diseased, or parasitized, or to determine if aquaculture products are being or have been legally imported, transported, or possessed.

Comment. Section 52005 continues the part of former Fish and Game Code Section 6301 applicable to amphibians without substantive change.

§ 52010. Public nuisance

52010. Except as otherwise provided in Part 1 (commencing with Section 23300) of Division 7, all amphibians found to be infected, diseased, or parasitized are a public nuisance and shall be summarily destroyed by the department.

Comment. Section 52010 continues the part of former Fish and Game Code Section 6302 applicable to amphibians without substantive change.

1 **§ 52015. Conditional destruction**

2 52015. All amphibians that the department determines are merely deleterious to
3 fish amphibians, aquatic plants, or aquatic animal life, shall be destroyed by the
4 department, unless the owner or person in charge of the amphibians ships them out
5 of the state within a period of time to be specified by the department.

6 **Comment.** Section 52015 continues the part of former Fish and Game Code Section 6303
7 applicable to amphibians without substantive change.

8 **§ 52020. Posting of notices**

9 52020. (a) If the department finds any infected, diseased, or parasitized
10 amphibians within this state, the department shall post notices describing, as
11 nearly as possible, the boundaries of the area within which the amphibians are
12 found, and shall state the period during which the taking, carrying, and
13 transportation of the amphibians from the area shall be unlawful.

14 (b) The fact of posting the notices shall be published once a week for four
15 successive weeks in some newspaper of general circulation in the county in which
16 the infected area is situated, and, if there is no newspaper of general circulation in
17 that county, then in a newspaper of general circulation published in an adjoining
18 county.

19 **Comment.** Section 52020 continues the part of former Fish and Game Code Section 6304
20 applicable to amphibians without substantive change.

21 **§ 52025. Prohibited transportation within state**

22 52025. It is unlawful to carry or cause to be carried from one point in this state
23 which has been posted according to the provisions of this article, to any other
24 point in this state, any infected, diseased, or parasitized amphibian.

25 **Comment.** Section 52025 continues the part of former Fish and Game Code Section 6305
26 applicable to amphibians without substantive change.

27 **§ 52030. Expense of examination**

28 52030. The expense of any examination of any amphibian made necessary by
29 the provisions of this code shall be borne by the owner of the amphibian, or the
30 person or persons importing the amphibian into this state.

31 **Comment.** Section 52030 continues the part of former Fish and Game Code Section 6306
32 applicable to amphibians without substantive change.

33 **PART 3. CLASSES OF AMPHIBIANS**

34 **TITLE 1. FULLY PROTECTED AMPHIBIANS**

35 **§ 52200. Prohibition on take and possession**

36 52200. (a) Except as provided in this section, Section 63500 or 64605, or
37 Article 1 (commencing with Section 63300) of Chapter 4 of Title 3 of Part 1 of

1 Division 17, a fully protected amphibian may not be taken or possessed at any
2 time.

3 (b) No provision of this code or any other law shall be construed to authorize the
4 issuance of a permit or license to take a fully protected amphibian, and no permit
5 or license previously issued shall have any force or effect for that purpose.
6 However, the department may authorize the taking of a fully protected amphibian
7 for necessary scientific research, including efforts to recover fully protected,
8 threatened, or endangered species.

9 (c) Before authorizing the take of a fully protected amphibian, the department
10 shall make an effort to notify all affected and interested parties to solicit
11 information and comments on the proposed authorization. The notification shall be
12 published in the California Regulatory Notice Register and be made available to
13 each person who has notified the department, in writing, of his or her interest in
14 fully protected species and who has provided an email address, if available, or
15 postal address to the department. Affected and interested parties shall have 30
16 days after notification is published in the California Regulatory Notice Register to
17 provide relevant information and comments on the proposed authorization.

18 (d) A legally imported fully protected amphibian may be possessed under a
19 permit issued by the department.

20 (e) As used in this section, “scientific research” does not include an action taken
21 as part of specified mitigation for a project, as defined in Section 21065 of the
22 Public Resources Code.

23 **Comment.** Section 52200 continues the part of former Fish and Game Code Section 5050(a)
24 applicable to amphibians without substantive change.

25 See also Section 5900 (enforcement).

26  **Note.** Proposed Section 52200 would continue Section 5050(a), as it applies to amphibians.
27 That provision was amended by 2018 Cal. Stat. ch. 224 as an urgency measure.

28 TITLE 2. NATIVE AMPHIBIANS

29 § 52300. “Native amphibian”

30 52300. “Native amphibian” as used in this title means a salamander, toad, or any
31 other member of the class amphibia native to California.

32 **Comment.** Section 52300 continues former Fish and Game Code Section 6895 without
33 substantive change.

34 § 52305. Commission to establish rules

35 52305. Except as otherwise provided in this title and Part 4 (commencing with
36 Section 52400), the commission shall establish rules for the commercial take, sale,
37 transport, export, or import of native amphibians.

38 **Comment.** Section 52305 continues former Fish and Game Code Section 6896 without
39 substantive change.

PART 4. SPECIFIC TYPES OF AMPHIBIANS

TITLE 1. FROGS

CHAPTER 1. PRELIMINARY PROVISIONS

§ 52400. “Frog”

52400. As used in this title, “frog” means all species of frog.

Comment. Section 52400 continues former Fish and Game Code Section 6850 without substantive change.

§ 52405. Provisions not exclusive

52405. The provisions of this title are not intended to be exclusive. Other provisions that govern frogs include, but are not limited to, the following provisions:

(a) Section 8115.

(b) Section 23355.

Comment. Section 52405 is new. It is added for drafting convenience.

CHAPTER 2. TAKE OR POSSESSION

§ 52450. General prohibition on take or possession

52450. (a) Except as otherwise provided in this code or in regulations adopted by the commission, it is unlawful to take or possess any frog for a commercial purpose.

(b) This chapter does not apply to frogs grown pursuant to Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 52450 continues former Fish and Game Code Section 6851 without substantive change.

§ 52455. Prohibited take by firearm

52455. It is unlawful to take frogs by the use of firearms of any caliber or type.

Comment. Section 52455 continues former Fish and Game Code Section 6854 without substantive change.

§ 52460. Lawful possession limited to authorized number of frogs

52460. Any person who conducts a place of business where frogs are sold to the public for food, or who takes or possesses frogs for sale to or for use by educational or scientific institutions for scientific purposes, may possess at the place of business only the number of frogs that have been legally obtained pursuant to this code or regulations adopted by the commission.

Comment. Section 52460 continues former Fish and Game Code Section 6852 without substantive change.

1 **§ 52465. Disposal permit**

2 52465. The department may issue a permit to take and dispose of frogs under
3 any limitations the commission may prescribe, when in the judgment of the
4 department, frogs are polluting the water supply in any area, or otherwise
5 constitute a nuisance.

6 **Comment.** Section 52465 continues former Fish and Game Code Section 6855 without
7 substantive change.

8 CHAPTER 3. FROG JUMPING CONTESTS

9 **§ 52500. “Frog-jumping contest”**

10 52500. As used in this chapter, “frog-jumping contest” means a contest
11 generally and popularly known as a frog-jumping contest, which is open to the
12 public and is advertised or announced in a newspaper.

13 **Comment.** Section 52500 continues former Fish and Game Code Section 6880 without
14 substantive change.

15 **§ 52505. Applicability of chapter**

16 52505. The provisions of this chapter apply only to a frog that satisfies all the
17 following requirements:

18 (a) The frog is taken by a means and in a manner that normally would not
19 seriously injure the frog.

20 (b) The frog is to be used in a frog-jumping contest.

21 (c) The frog is kept in a manner that will reasonably preserve its life.

22 **Comment.** Section 52505 combines and restates the first sentence of former Fish and Game
23 Code Section 6881, Section 6882, and Section 6884, without substantive change.

24  **Note.** Proposed Section 52505 is intended to combine and restate the first sentence of former
25 Fish and Game Code Section 6881, Section 6882, and Section 6884, to clarify the meaning of
26 those provisions without changing their substantive effect. The existing provisions read as
27 follows:

28 6881. Frogs to be used in frog-jumping contests shall be governed by this article only.

29 6882. If the means used for taking such frogs can, as normally used, seriously injure the frog, it
30 shall be conclusively presumed the taking is not for the purposes of a frog-jumping contest.

31 6884. A frog which is not kept in a manner which is reasonable to preserve its life is not within
32 the coverage of this article.

33 **The Commission invites comment on whether the proposed combination and restatement**
34 **of these provisions would cause any substantive change in their meaning.**

35 **§ 52510. Exemption from other law**

36 52510. A frog that is governed by this chapter may be taken at any time, without
37 a license or permit.

38 **Comment.** Section 52510 continues the second sentence of former Fish and Game Code
39 Section 6881 without substantive change.

1 **§ 52515. Disposition of dead frog**

2 52515. A person may possess any number of live frogs to use in frog-jumping
3 contests, but if a frog possessed for that purpose dies or is killed, it must be
4 destroyed as soon as possible, and may not be eaten or otherwise used for any
5 purpose.

6 **Comment.** Section 52515 continues former Fish and Game Code Section 6883 without
7 substantive change.

8 **§ 52520. No modification of provision by commission**

9 52520. The commission has no power to modify a provision of this chapter by
10 any order, rule, or regulation.

11 **Comment.** Section 52520 continues former Fish and Game Code Section 6885 without
12 substantive change.

13 DIVISION 13. REPTILES

14 PART 1. GENERAL PROVISIONS

15 **§ 52800. Governance by other provisions**

16 52800. Animals governed by this division are also governed by other provisions
17 of this code, including but not limited to Divisions 6 (commencing with Section
18 8000) and 7 (commencing with Section 23300).

19 **Comment.** Section 52800 is new. It is added for drafting convenience.

20 PART 2. DISEASE CONTROL *[RESERVED]*

21 PART 3. CLASSES OF REPTILES

22 TITLE 1. FULLY PROTECTED REPTILES

23 **§ 53000. Prohibition on take and possession**

24 53000. (a) Except as provided in this section, Article 1 (commencing with
25 Section 63300) of Chapter 4 of Title 3 of Part 1 of Division 17, Section 63475, or
26 Section 64605, a fully protected reptile may not be taken or possessed at any time.

27 (b) No provision of this code or any other law shall be construed to authorize the
28 issuance of a permit or license to take a fully protected reptile, and no permit or
29 license previously issued shall have any force or effect for that purpose. However,
30 the department may authorize the taking of a fully protected reptile for necessary
31 scientific research, including efforts to recover fully protected, threatened, or
32 endangered species.

(c) Before authorizing the take of a fully protected reptile, the department shall make an effort to notify all affected and interested parties to solicit information and comments on the proposed authorization. The notification shall be published in the California Regulatory Notice Register and be made available to each person who has notified the department, in writing, of his or her interest in fully protected species and who has provided an email address, if available, or postal address to the department. Affected and interested parties shall have 30 days after notification is published in the California Regulatory Notice Register to provide relevant information and comments on the proposed authorization.

(d) A legally imported fully protected reptile may be possessed under a permit issued by the department.

(e) As used in this section, “scientific research” does not include an action taken as part of specified mitigation for a project, as defined in Section 21065 of the Public Resources Code.

Comment. Section 53000 continues the part of former Fish and Game Code Section 5050(a) applicable to reptiles without substantive change.

See also Section 5950 (enforcement).

 **Note.** Proposed Section 53000 would continue Section 5050(a), as it applies to reptiles. That provision was amended by 2018 Cal. Stat. ch. 224 as an urgency measure.

TITLE 2. NATIVE REPTILES

§ 53100. “Native reptiles”

53100. For purposes of this title, “native reptiles” means snakes, lizards, turtles, or any other members of the class reptilia native to California.

Comment. Section 53100 continues former Fish and Game Code Section 5060 without substantive change.

§ 53105. Commission to establish rules and regulations

53105. The commission shall establish rules and regulations for the commercial take, sale, transport, export, or import of native reptiles.

Comment. Section 53105 continues former Fish and Game Code Section 5061 without substantive change.

1 PART 4. SPECIFIC TYPES OF REPTILES

2 TITLE 1. ALLIGATORS AND RELATED
3 ANIMALS

4 § 53200. Use or sale of meat or hides

5 53200. Notwithstanding any other provision of law, no permit shall be issued or
6 renewed for the operation of a farm for alligators or any species of the family
7 crocodilidae, if the animals are kept for the use and sale of the meat or hides.

8 **Comment.** Section 53200 continues former Fish and Game Code Section 5062 without
9 substantive change.

10 TITLE 2. RATTLESNAKES

11 § 53250. Take

12 53250. Notwithstanding Section 12900, a sport fishing license is not required for
13 a resident to take a rattlesnake (genus *Crotalus* or *Sistrurus*).

14 **Comment.** Section 53250 continues former Fish and Game Code Section 7149.3 without
15 substantive change.

16 TITLE 3. TORTOISES AND TURTLES

17 § 53300. Provisions not exclusive

18 53300. The provisions of this title are not intended to be exclusive. Other
19 provisions that govern tortoises include, but are not limited to, Section 55725.

20 **Comment.** Section 53300 is new. It is added for drafting convenience.

21 § 53305. General prohibitions

22 53305. It is unlawful to sell, purchase, harm, take, possess, transport, or shoot a
23 projectile at, a tortoise (*Gopherus*). This section does not apply to the taking of a
24 tortoise when authorized by the department.

25 **Comment.** Section 53305 continues former Fish and Game Code Section 5000 without
26 substantive change.

27 § 53310. Possession by institutions

28 53310. The department may issue permits, subject to any terms and conditions
29 prescribed by the commission, authorizing the possession of a tortoise (*Gopherus*),
30 or product of a tortoise, by an educational or scientific institution or a public
31 zoological garden.

32 **Comment.** Section 53310 continues former Fish and Game Code Section 5002 without
33 substantive change.

1 **§ 53315. Tortoises acquired before 1973**

2 53315. (a) The provisions of Section 53305 do not prohibit the possession of any
3 tortoise (Gopherus) whose owner can demonstrate that the tortoise was legally
4 acquired and possessed before January 1, 1973.

5 (b) The owner of a tortoise whose possession is authorized by this section shall
6 mark or otherwise identify the tortoise to the satisfaction of the department, and
7 shall not transfer the tortoise to any other person without prior approval of the
8 department.

9 **Comment.** Section 53315 continues former Fish and Game Code Section 5001 without
10 substantive change.

11 **DIVISION 14. PLANTS**

12 **PART 1. GENERAL PROVISIONS**

13 **§ 53500. Governance by other provisions**

14 53500. Plants governed by this division are also governed by other provisions of
15 this code, including but not limited to Division 7 (commencing with Section
16 23300).

17 **Comment.** Section 53500 is new. It makes clear that this division does not contain the only
18 provisions of the code governing plants, and that plants governed by this division are also
19 governed by other law.

20 **PART 2. DISEASE CONTROL**

21 **TITLE 1. AQUATIC PLANTS**

22 **§ 53600. Application of title**

23 53600. This title does not apply to activities governed by Part 1 (commencing
24 with Section 23300) of Division 7.

25 **Comment.** Section 53600 continues the part of former Fish and Game Code Section 6300
26 applicable to plants without substantive change.

27 **§ 53605. Inspection**

28 53605. The department may enter at any time any vehicle, container, warehouse,
29 depot, ship, or growing area where any aquatic plants are held, transported, or
30 stored, for the purpose of making a regulatory inspection to ascertain whether
31 those aquatic plants are infected, diseased, or parasitized, or to determine if
32 aquaculture products are being or have been legally imported, transported, or
33 possessed.

34 **Comment.** Section 53605 continues the part of former Fish and Game Code Section 6301
35 applicable to plants, without substantive change.

1 **§ 53610. Public nuisance**

2 53610. Except as otherwise provided in Part 1 (commencing with Section
3 23300) of Division 7, all aquatic plants found to be infected, diseased, or
4 parasitized are a public nuisance and shall be summarily destroyed by the
5 department.

6 **Comment.** Section 53610 continues the part of former Fish and Game Code Section 6302
7 applicable to plants, without substantive change.

8 **§ 53615. Deleterious plants**

9 53615. All aquatic plants that the department determines are merely deleterious
10 to fish, amphibia, aquatic plants, or aquatic animal life, shall be destroyed by the
11 department, unless the owner or person in charge of the aquatic plants ships them
12 out of the State within a period of time to be specified by the department.

13 **Comment.** Section 53615 continues the part of former Fish and Game Code Section 6303
14 applicable to plants, without substantive change.

15 **§ 53620. Notices**

16 53620. (a) If the department finds any infected, diseased, or parasitized aquatic
17 plants within this state, the department shall post notices describing, as nearly as
18 possible, the boundaries of the area within which the aquatic plants are found, and
19 shall state the period during which the taking, carrying, and transportation of the
20 aquatic plants from the area shall be unlawful.

21 (b) The fact of posting the notices shall be published once a week for four
22 successive weeks in some newspaper of general circulation in the county in which
23 the infected area is situated, and, if there is no newspaper of general circulation in
24 that county, then in a newspaper of general circulation published in an adjoining
25 county.

26 **Comment.** Section 53620 continues the part of former Fish and Game Code Section 6304
27 applicable to plants, without substantive change.

28 **§ 53625. Transportation within state**

29 53625. It is unlawful to carry or cause to be carried from one point in this state
30 which has been posted according to the provisions of this title, to any other point
31 in this state, any infected, diseased, or parasitized aquatic plant.

32 **Comment.** Section 53625 continues the part of former Fish and Game Code Section 6305
33 applicable to plants, without substantive change.

34 **§ 53630. Expense of examination**

35 53630. The expense of any examination made necessary by the provisions of
36 this code, shall be borne by the owner of the aquatic plants, or the person or
37 persons importing them into this state.

38 **Comment.** Section 53630 continues the part of former Fish and Game Code Section 6306
39 applicable to plants, without substantive change.

PART 3. CLASSES OF PLANTS

TITLE 1. NATIVE PLANT PROTECTION ACT

§ 53800. Legislative intent

53800. (a) The intent of the Legislature and the purpose of this title is to preserve, protect, and enhance endangered or rare native plants of this state.

(b) The Legislature finds that many species and subspecies of native plants are endangered because their habitats are threatened with destruction, drastic modification, or severe curtailment, or because of commercial exploitation or by other means, or because of disease or other factors.

Comment. Section 53800 continues former Fish and Game Code Section 1900 without substantive change.

§ 53803. “Native plant”

53803. As used in this title, “native plant” means a plant growing in a wild uncultivated state, which is normally found native to the plantlife of this state.

Comment. Section 53803 continues the second sentence of former Fish and Game Code Section 1901 without substantive change.

 **Note.** Proposed Section 53803 would continue the existing limited application of the definition of “native plant.” There are other provisions of the Fish and Game Code that currently use the term “native plant” without definition (Sections 1580, 1755, 1756, 1760-1763, 1771, 1801, 1925, 2781, 4180, 10667, and 13014).

The Commission invites comment on whether applying the application of the definition should be broadened to include some or all of those provisions.

§ 53805. Criteria

53805. (a) The department shall establish criteria for determining if a species, subspecies, or variety of native plant is endangered or rare.

(b) A species, subspecies, or variety is endangered when its prospects of survival and reproduction are in immediate jeopardy from one or more causes.

(c) A species, subspecies, or variety is rare when, although not presently threatened with extinction, it is in such small numbers throughout its range that it may become endangered if its present environment worsens.

Comment. Section 53805 continues former Fish and Game Code Section 1901 without substantive change, except that the second sentence of former Section 1901 is continued in Section 53803 (“native plant” defined).

§ 53810. Designation

53810. The commission may, after public hearing, designate endangered and rare native plants.

Comment. Section 53810 continues the first sentence of former Fish and Game Code Section 1904 without substantive change.

1 **§ 53815. Notice to affected land owner**

2 53815. To the extent that the location of endangered or rare native plants is
3 known, the department shall notify the owners of affected land that an endangered
4 or rare native plant is growing on that land and shall provide any information
5 about the protection of the plants that may be appropriate.

6 **Comment.** Section 53815 continues the second sentence of former Fish and Game Code
7 Section 1904 without substantive change.

8 **§ 53820. Prohibited activities**

9 53820. No person shall import into this state, or take, possess, or sell within this
10 state, except as incident to the possession or sale of the real property on which the
11 plant is growing, any native plant, or any part or product thereof, that the
12 commission determines to be an endangered native plant or rare native plant,
13 except as otherwise provided in this title.

14 **Comment.** Section 53820 continues former Fish and Game Code Section 1908 without
15 substantive change.

16 **§ 53825. Regulation**

17 53825. (a) The commission may adopt regulations governing the taking,
18 possession, propagation, transportation, exportation, importation, or sale of any
19 endangered or rare native plants. The regulations may include, but shall not be
20 limited to, requirements for persons who perform any of the foregoing activities to
21 maintain written records and to obtain permits that may be issued by the
22 department.

23 (b) Persons engaged in the production, storage, sale, delivery, or transportation
24 of nursery stock pursuant to the provisions of Part 3 (commencing with Section
25 6701) of Division 4 of the Food and Agricultural Code shall not be required to
26 obtain a permit pursuant to this chapter unless those activities involve the
27 collection of rare or endangered plants or parts or products thereof, growing in a
28 wild, uncultivated state.

29 (c) Persons who purchase nursery grown stock shall not be required to obtain a
30 permit pursuant to this title.

31 **Comment.** Section 53825 continues former Fish and Game Code Section 1907 without
32 substantive change.

33 **§ 53830. Enforcement authority**

34 53830. (a) When any power or authority is given by any provision of this title to
35 any person, it may be exercised by any deputy, inspector, or agent duly authorized
36 by that person.

37 (b) Any person in whom the enforcement of any provision of this title is vested
38 has the power of a peace officer as to the enforcement of this title. This
39 subdivision applies to any state or federal agencies, the State of Nevada, the State

1 of Oregon, or the State of Arizona, with which cooperative agreements have been
2 made by the department to enforce any provisions of this title.

3 **Comment.** Section 53830 restates former Fish and Game Code Section 1909 without
4 substantive change.

5 **Note.** Proposed Section 53830(b) would restate the second sentence of existing Section
6 6656 to improve its clarity, without changing its substantive effect. The existing provision reads
7 as follows:

8 Any person in whom the enforcement of any provision of this chapter is vested has the power
9 of a peace officer as to such enforcement, which shall include state and federal agencies, and the
10 State of Nevada, State of Oregon, or State of Arizona with which cooperative agreements have
11 been made by the department to enforce any provisions of this chapter.

12 **The Commission invites comment on whether that restatement would cause any**
13 **problems.**

14 **§ 53835. Arrest**

15 53835. A peace officer or an employee or agent of the department may, in the
16 enforcement of this title, make arrests without warrant for a violation of this title
17 that the officer, employee, or agent may witness, and may confiscate plants or
18 parts of plants when unlawfully taken, transported, possessed, sold, or otherwise,
19 in violation of this title.

20 **Comment.** Section 53835 continues the first sentence of former Fish and Game Code Section
21 1910 without substantive change.

22 **§ 53840. Application of Penal Code Section 384a**

23 53840. The provisions of this title are in addition to the provisions of Section
24 384a of the Penal Code.

25 **Comment.** Section 53840 continues the second sentence of former Fish and Game Code
26 Section 1910 without substantive change.

27 **§ 53845. State agency programs**

28 53845. All state departments and agencies shall, in consultation with the
29 department, utilize their authority in furtherance of the purposes of this title by
30 carrying out programs for the conservation of endangered or rare native plants.
31 Those programs include, but are not limited to, the identification, delineation, and
32 protection of habitat critical to the continued survival of endangered or rare native
33 plants.

34 **Comment.** Section 53845 continues former Fish and Game Code Section 1911 without
35 substantive change.

36 **§ 53850. Department activities**

37 53850. (a) The department may undertake botanical research and field
38 investigations and may collect and diffuse any statistics and information that
39 pertain to the conservation, protection, and perpetuation of native plants.

(b) Nothing in this code or any other law shall prohibit the department from taking, for scientific or propagation purposes, any species of native plants. The department may import, propagate, and distribute native plants.

Comment. Subdivision (a) of Section 53850 continues former Fish and Game Code Section 1905 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 1906 without substantive change.

§ 53855. Exemptions

53855. (a) The provisions of this title shall not be applicable to emergency work necessary to protect life or property. However, the person or agency performing the emergency work shall notify the department within 14 days of the commencement of the work.

(b) The provisions of this title are not intended and shall not be construed as authorizing any public agency to mandate, prescribe, or otherwise regulate agricultural operations or management practices, including the clearing of land for agricultural practices or fire control measures.

(c) Notwithstanding the provisions of Section 53845, timber operations in accordance with a timber harvesting plan submitted pursuant to the provisions of the Z'berg-Nejedly Forest Practice Act of 1973 (commencing with Section 4511 of the Public Resources Code), or required mining assessment work pursuant to federal or state mining laws, or the removal of endangered or rare native plants from a canal, lateral ditch, building site, or road, or other right-of-way by the owner of the land or the owner's agent, or the performance by a public agency or a publicly or privately owned public utility of its obligation to provide service to the public, shall not be restricted by this title because of the presence of rare or endangered plants, except as provided in subdivision (d).

(d) Notwithstanding the provisions of subdivisions (b) and (c), where the owner of land has been notified by the department pursuant to Section 53815 that a rare or endangered native plant is growing on the owner's land, the owner shall notify the department at least 10 days in advance of changing the land use to allow for salvage of the plant. The failure by the department to salvage the plant within 10 days of notification shall entitle the owner of the land to proceed without regard to this title. Submission of a timber harvesting plan pursuant to the Z'berg-Nejedly Forest Practice Act of 1973 (commencing with Section 4511 of the Public Resources Code) shall constitute notice under this section. Converting from one type of agricultural use, as defined in Section 51201 of the Government Code, to another type of agricultural use shall not constitute a change in land use.

Comment. Subdivision (a) of Section 53855 continues former Fish and Game Code Section 1912 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 1913(a) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 1913(b) without substantive change.

1 Subdivision (d) continues former Fish and Game Code Section 1913(c) without substantive
2 change.

3 **Note.** Existing Section 1913(c) refers to landowner notice given pursuant to Section 1903.5.
4 That section does not exist. In proposed Section 53855(d), the reference has been revised to refer
5 to proposed Section 53815, which continues the second sentence of existing Section 1904. That
6 provision requires notice to landowners when rare or endangered native plants are found on their
7 land.

8 **The Commission invites comment on whether that is the correct resolution of the**
9 **erroneous cross-reference.**

10 TITLE 2. CALIFORNIA DESERT 11 NATIVE PLANTS

12 § 53900. Department enforcement of Act

13 53900. The department shall enforce the provisions of the California Desert
14 Native Plants Act, Division 23 (commencing with Section 80001) of the Food and
15 Agricultural Code, except that permits, tags, seals, and wood receipts shall be
16 issued pursuant to Chapter 4 (commencing with Section 80101) of Division 23 of
17 the Food and Agricultural Code, by the county agricultural commissioner or the
18 sheriff.

19 **Comment.** Section 53900 continues the first sentence of former Fish and Game Code Section
20 1925 without substantive change.

21 § 53905. Cooperation with Department of Food and Agriculture

22 53905. In carrying out the provisions of this title, the department shall cooperate
23 fully with the Department of Food and Agriculture.

24 **Comment.** Section 53905 continues former Fish and Game Code Section 1926 without
25 substantive change.

26 § 53910. Effect of Act on department activities

27 53910. Nothing in the California Desert Native Plants Act, or any other law,
28 prohibits the department from taking, for scientific or propagation purposes, any
29 species of native plants. The department may import, propagate, and distribute
30 native plants, and the California Desert Native Plants Act does not apply to those
31 activities.

32 **Comment.** Section 53910 continues the second and third sentences of former Fish and Game
33 Code Section 1925 without substantive change.

PART 4. SPECIFIC TYPES OF PLANTS

TITLE 1. KELP AND OTHER AQUATIC PLANTS

CHAPTER 1. GENERAL PROVISIONS

§ 54000. Provisions not exclusive

54000. The provisions of this title are not intended to be exclusive. Other provisions may govern kelp and other aquatic plants.

Comment. Section 54000 is new.

§ 54005. Commission rulemaking

54005. The commission may make any regulations that may be necessary to insure the proper harvesting of kelp and other aquatic plants.

Comment. Section 54005 continues former Fish and Game Code Section 6653 without substantive change.

§ 54010. Application of title

54010. This title does not apply to aquatic plants grown on private land or on state water bottoms leased pursuant to Part 1 (commencing with Section 23300) of Division 7.

Comment. Section 54010 continues former Fish and Game Code Section 6651(c) without substantive change.

CHAPTER 2. COMMERCIAL PROVISIONS

Article 1. Kelp Harvest License

§ 54025. License requirement

54025. Every person engaged in harvesting kelp or other aquatic plants for profit in the waters of this state shall have a license for that purpose.

Comment. Section 54025 continues former Fish and Game Code Section 6650 without substantive change.

§ 54030. Issuance of license

54030. (a) A license granting the privilege to harvest kelp or other aquatic plants shall be issued upon application and the payment of a fee of one hundred dollars (\$100) to the department. The license shall be valid from January 1 to December 31, inclusive, or, if issued after the beginning of that term, for the remainder of that term.

(b) The commission shall adjust the amount of the fees specified in subdivision (a), as necessary, to fully recover, but not exceed, all reasonable administrative

1 and implementation costs of the department and the commission relating to those
2 licenses.

3 **Comment.** Section 54030 continues former Fish and Game Code Section 6651(a)-(b) without
4 substantive change.

5 **§ 54040. Scientific and educational permits**

6 54040. The commission may, subject to any regulations that it deems proper,
7 grant permits to any department of the United States Government or to any
8 scientific or any educational institution, to harvest kelp at any time for scientific or
9 experimental purposes without the payment of the kelp license or royalty imposed
10 by this title.

11 **Comment.** Section 54040 continues former Fish and Game Code Section 6657 without
12 substantive change.

13  **Note.** Existing Section 6657 refers to a “privilege tax imposed by this chapter.” There is no
14 other provision of the chapter that uses the term “privilege tax.” It seems likely that the term is
15 meant to refer to the “royalties” imposed by existing Section 6680 (proposed Section 54050).
16 That would be consistent with the use of the term “privilege tax” to refer to weight-based fees
17 imposed on a commercial fisherman when landing fish. See existing Section 8040(b). To avoid
18 any confusion, proposed Section 54040 would replace the term “privilege tax” with “royalty.”

19 **The Commission invites comment on whether that substitution would cause any**
20 **problems.**

21 **Article 2. Kelp Harvest Royalties**

22 **§ 54050. Royalty**

23 54050. (a) In addition to the license fee provided for in this chapter, every
24 person harvesting kelp or other aquatic plants shall pay a royalty, as the
25 commission may prescribe, of not less than five cents (\$0.05) per ton of wet kelp
26 or wet aquatic plants harvested.

27 (b) Any revenues derived from those royalties shall not be available for
28 expenditures until appropriated.

29 **Comment.** Section 54050 continues former Fish and Game Code Section 6680 without
30 substantive change.

31 **§ 54055. Weight records**

32 54055. (a) Every person engaged in harvesting kelp shall determine the weight
33 of all wet kelp, immediately after it is delivered to the licensee’s place of business
34 or elsewhere. The weight shall be entered in a book to be kept by the licensee. The
35 book shall be open at all times to the inspection of the department.

36 (b) The weight shall be determined by any method approved by the department,
37 including the displacement method.

38 (c) Every person engaged in harvesting kelp shall, on or before 10 days after
39 each month of the term of the license, deliver to the department a statement of the
40 weight of all wet kelp harvested during the preceding month.

Comment. Section 54055 restates former Fish and Game Code Section 6652 without substantive change.

Notes. (1) Proposed Section 54055(a)-(b) would restate the first paragraph of existing Section 6652 to improve its clarity, without changing its substantive effect. The restated paragraph reads as follows:

Every person engaged in harvesting kelp shall determine the weight by any method, including the displacement method, approved by the department of all wet kelp immediately after it is delivered to the licensee's place of business or elsewhere, and the weight shall be entered in a book to be kept by the licensee. The book shall be open at all times to the inspection of the department.

The Commission invites comment on whether that restatement would cause any substantive change in the meaning of the provision.

(2) The second paragraph of existing Section 6652 requires that a commercial kelp harvester "render a statement" each month, without specifying where the statement must be "rendered." A Fish and Game Commission regulation addresses that point, requiring that a kelp landing record be "delivered to the department." 14 Cal. Code Regs. § 165(b)(3)(G). In the interests of clarity, proposed Section 54055(c) would codify that element of the regulation, replacing "render" with "deliver to the department."

The Commission invites comment on whether that revision would cause any problems.

Article 3. Kelp Bed Leases

§ 54075. Description and regulation of kelp beds

54075. The commission shall describe the kelp beds of the state and adopt regulations for the leasing of the beds.

Comment. Section 54075 continues the second sentence of former Fish and Game Code Section 6700 without substantive change.

§ 54080. Exclusive lease of kelp bed

54080. The commission may lease to any person the exclusive privilege to harvest kelp in any designated kelp bed, or part thereof, if the commission determines that the lease is in the public interest.

Comment. Section 54080 continues the first sentence of former Fish and Game Code Section 6700 without substantive change.

§ 54085. Application

54085. A person wishing to lease the exclusive privilege to harvest kelp shall submit a written application to the commission. The application shall include all of the following, and any other information that the commission may prescribe:

(a) The number of the kelp bed or beds to be leased.

(b) The designated number of square miles in each bed.

Comment. Section 54085 continues former Fish and Game Code Section 6701 without substantive change.

1 **§ 54090. Deposit**

2 54090. A deposit of not less than forty dollars (\$40) for each square mile, or
3 fraction thereof, of the total area of the kelp bed or beds which are designated in
4 the application shall be submitted with the application. The deposit shall be
5 refunded to the person making the application unless a lease is executed.

6 **Comment.** Section 54090 continues former Fish and Game Code Section 6701.5 without
7 substantive change.

8 **§ 54095. Commission action on application**

9 54095. (a) If the commission finds that the kelp beds included in the application
10 are available for lease and that the lease would be in the public interest, the
11 commission shall publish a notice that the area is being considered for leasing.

12 (b) The commission shall have legal notices published in a newspaper of general
13 circulation in each county where the kelp bed, or any part thereof, is located,
14 describing the area to be leased and the type of operation to be conducted. Except
15 as provided in this subdivision, the publication shall be made pursuant to Section
16 6066 of the Government Code.

17 (c) If the commission receives more than one application for the lease of a kelp
18 bed or beds, it shall advertise for bids on the area being considered for leasing.
19 The commission shall award the lease of that area to the highest qualified bidder.

20 **Comment.** Section 54095 continues former Fish and Game Code Section 6702 without
21 substantive change.

22 **§ 54100. Terms of lease**

23 54100. (a) The initial term of a lease for the exclusive privilege of harvesting
24 kelp shall not exceed 20 years.

25 (b) No lessee shall have an exclusive lease, excluding subleases, to an area in
26 excess of 25 square miles or 50 percent of the total area of the kelp resource as
27 shown on the maps of the resource prepared by the commission, whichever is
28 greater.

29 **Comment.** Section 54100 continues former Fish and Game Code Section 6703 without
30 substantive change.

31 **§ 54105. Renewal**

32 54105. (a) Each kelp bed lease entered into or renewed, on and after January 1,
33 1985, shall specify a period prior to expiration when renewal of the lease may be
34 requested by the lessee. If the commission determines that the lessee has complied
35 with the terms of the lease, the lessee shall have a prior right to renew the lease on
36 terms agreed upon between the commission and the lessee.

37 (b) If terms for a renewal of the lease are not agreed upon, or the commission
38 determines that the lessee has not complied with the terms of the lease, the
39 commission shall advertise for bids on the individual kelp beds comprising the
40 lease.

(c) If a request for renewal is not made during the specified period by the lessee, the commission shall advertise for bids on the individual kelp beds comprising the lease.

(d) The duration of the term of any renewal of a lease shall not exceed 20 years.

Comment. Section 54105 continues former Fish and Game Code Section 6704 without substantive change.

Note. Given that the maximum term of a kelp bed lease is 20 years, the Commission invites comment on whether the reference, in existing Section 6704, to a lease “entered into or renewed, on and after January 1, 1985” is obsolete. **Could the quoted phrase be deleted without substantive effect?**

§ 54110. Renewal of leases in effect on specified dates

54110. (a) Notwithstanding Section 54105, with respect to any kelp bed lease in effect on January 1, 1983, the lessee shall have a prior right to renew the lease on terms agreed upon between the commission and the lessee.

(b) If the lessee does not renew the lease, or if terms are not agreed upon, the commission shall advertise for bids on the individual kelp beds comprising the lease.

(c) The term of any renewal of a lease shall not exceed 20 years.

(d) Any lease in effect on January 1, 1985, may be performed pursuant to its terms, notwithstanding this article, but any renewal of that lease is subject to this article.

Comment. Section 54110 continues former Fish and Game Code Section 6705 without substantive change.

Note. Existing Section 6705 provides special rules for kelp bed leases that were in effect in 1983 and 1985. Considering that kelp bed leases are limited to 20-year terms, it is not clear that any such leases continue to exist. On the other hand, if renewal is considered to be an *extension* of a lease, rather than *replacement* of a lease, it is possible that leases in effect in 1983 and 1985 still exist.

The Commission invites comment on whether Section 6705 is obsolete or continues to serve a purpose.

§ 54115. Renegotiated terms

54115. Notwithstanding Sections 54100 and 54105, at any time during the term of a lease, the commission and the lessee may negotiate and enter into a new lease on terms agreed upon between the two parties, if the commission determines that a new lease would be in the best interest of the state. The initial term of the new lease shall not exceed 20 years.

Comment. Section 54115 continues former Fish and Game Code Section 6706 without substantive change.

§ 54120. Royalty payment

54120. Each lease entered into, or renewed, on or after January 1, 1985, shall require, in addition to the license fee required by this chapter, a payment by the

lessee or any sublessee of not less than the minimum royalty established under Article 2 (commencing with Section 54050), for all kelp harvested from the lease area, and shall provide for an annual advance payment of not less than forty dollars (\$40) per square mile per year for the kelp bed leased, to be credited against the amount payable by the lessee, or sublessee, as the case may be, for each ton of kelp harvested during the ensuing year. The lease shall, in addition, include provisions for forfeiture of the lease if the annual payment is not made in advance.

Comment. Section 54120 continues former Fish and Game Code Section 6707 without substantive change.

Note. Given that the maximum term of a kelp bed lease is 20 years, the Commission invites comment on whether the reference, in existing Section 6707, to a lease “entered into or renewed, on and after January 1, 1985” is obsolete.

Could the quoted phrase be deleted without substantive effect?

§ 54125. Assignment

54125. (a) A lease may not be assigned, in whole or in part, by the lessee, either voluntarily or by operation of law, and no subleases or other rights may be granted thereunder by the lessee without the prior approval of the commission, subject to the conditions that the commission prescribes.

(b) The lease shall be forfeited in the event of a violation of this section.

(c) Each lease shall contain a statement of the contents of this section.

Comment. Section 54125 continues former Fish and Game Code Section 6708 without substantive change.

§ 54130. DGS approval

54130. A lease, or any renewal thereof, shall be submitted to, and approved by, the Department of General Services.

Comment. Section 54130 continues former Fish and Game Code Section 6709 without substantive change.

§ 54135. Official record of lease

54135. When an exclusive privilege to harvest kelp has been granted by lease by the commission, the commission shall furnish a true copy thereof to the department. The department shall file a notice for record in the recorder’s office of the county in which the kelp bed or beds, or part thereof, are located, setting forth the name of the person having the privilege, the description of the kelp bed or beds, or part thereof, and the time for which the privilege has been granted. The notice required to be filed for record under this section may be a copy of the executed lease.

Comment. Section 54135 continues former Fish and Game Code Section 6710 without substantive change.

1 **§ 54140. State Lands Commission**

2 54140. The department shall inform the State Lands Commission of all kelp bed
3 leases executed pursuant to this title, and shall furnish the State Lands
4 Commission with the information concerning these leases that it may require.

5 **Comment.** Section 54140 continues former Fish and Game Code Section 6711 without
6 substantive change.

7 Article 4. Closure of Kelp Beds

8 **§ 54175. Notice of proposed closure**

9 54175. If, at any time, the commission finds that the harvesting of kelp will tend
10 to destroy or impair any kelp bed or beds, or parts thereof, or tend to impair or
11 destroy the supply of any food for fish, the department shall serve on every person
12 licensed to harvest kelp a written notice that the kelp bed or beds, or parts thereof,
13 shall be closed to the harvesting of kelp for a period not to exceed one year.

14 **Comment.** Section 54175 continues former Fish and Game Code Section 6654 without
15 substantive change.

16 **§ 54180. Hearing**

17 54180. (a) Within 10 days after the service of a notice pursuant to Section
18 54175, the person upon whom notice is served may demand a hearing upon the
19 necessity for the closing of the kelp bed or beds, or parts thereof.

20 (b) Upon a demand for a hearing, the commission shall fix a time and place for
21 the taking of evidence upon the necessity for the closing, which time shall be not
22 less than 10 days nor more than 30 days from the date of the demand.

23 (c) The department shall serve written notice of the time and place of the hearing
24 upon the person demanding the hearing, at least 10 days before the day set for the
25 hearing.

26 (d) If no demand is made for a hearing within the time prescribed, the kelp bed
27 or beds, or parts thereof, shall remain closed to the harvesting of kelp for the time
28 specified in the order.

29 **Comment.** Section 54180 continues former Fish and Game Code Section 6655 without
30 substantive change.

31 CHAPTER 3. NONCOMMERCIAL USE OF KELP

32 **§ 54200. Commission regulation**

33 54200. The commission may regulate the taking, collecting, harvesting,
34 gathering, or possession of kelp for purposes other than profit.

35 **Comment.** Section 54200 continues former Fish and Game Code Section 6750 without
36 substantive change.

1 **§ 54205. Governance by other provisions**

2 54205. The provisions of Chapter 1 (commencing with Section 54000) and
3 Chapter 2 (commencing with Section 54025) of this chapter do not apply to the
4 taking, collecting, harvesting, gathering, or possession of kelp under this article.

5 **Comment.** Section 54205 continues former Fish and Game Code Section 6751 without
6 substantive change.

7 CHAPTER 4. AGAR-BEARING MARINE PLANTS

8 Article 1. General Provisions

9 **§ 54300. Provisions not exclusive**

10 54300. The provisions of this title are not intended to be exclusive. Other
11 provisions that may govern agar-bearing marine plants include, but are not limited
12 to, Section 54005.

13 **Comment.** Section 54300 is new.

14 **§ 54305. Application of title**

15 54305. This title does not apply to aquatic plants grown on private land or on
16 state water bottoms leased pursuant to Part 1 (commencing with Section 23300) of
17 Division 7.

18 **Comment.** Section 54305 continues former Fish and Game Code Section 6651(c) without
19 substantive change.

20 Article 2. Drying

21 **§ 54325. Permit requirement**

22 54325. No person shall dry agar-bearing marine plants for profit unless the
23 person has a permit issued under this chapter.

24 **Comment.** Section 54325 continues former Fish and Game Code Section 6653.5(b) without
25 substantive change.

26 **§ 54330. Permit issuance**

27 54330. The department may issue permits for the drying of agar-bearing marine
28 plants subject to the regulations the commission may prescribe to provide for
29 proper utilization of that resource.

30 **Comment.** Section 54330 continues former Fish and Game Code Section 6653.5(a) without
31 substantive change.

32 DIVISION 15. HABITAT CONSERVATION AND ENHANCEMENT

33 PART 1. GENERAL PROVISIONS

1 TITLE 1. CONSERVATION OF WILDLIFE
2 RESOURCES

3 § 54500. “Wildlife” defined

4 54500. As used in this title “wildlife” means birds, mammals, and reptiles not
5 raised in captivity.

6 **Comment.** Section 54500 continues former Fish and Game Code Section 1800 without
7 substantive change.

8 § 54505. Policy

9 54505. It is hereby declared to be the policy of the state to encourage the
10 preservation, conservation, and maintenance of wildlife resources under the
11 jurisdiction and influence of the state. This policy shall include the following
12 objectives:

13 (a) To maintain sufficient populations of all species of wildlife and the habitat
14 necessary to achieve the objectives stated in subdivisions (b), (c), and (d).

15 (b) To provide for the beneficial use and enjoyment of wildlife by all citizens of
16 the state.

17 (c) To perpetuate all species of wildlife for their intrinsic and ecological values,
18 as well as for their direct benefits to all persons.

19 (d) To provide for aesthetic, educational, and nonappropriative uses of the
20 various wildlife species.

21 (e) To maintain diversified recreational uses of wildlife, including the sport of
22 hunting, as proper uses of certain designated species of wildlife, subject to
23 regulations consistent with the maintenance of healthy, viable wildlife resources,
24 the public safety, and a quality outdoor experience.

25 (f) To provide for economic contributions to the citizens of the state, through the
26 recognition that wildlife is a renewable resource of the land by which economic
27 return can accrue to the citizens of the state, individually and collectively, through
28 regulated management. That management shall be consistent with the maintenance
29 of healthy and thriving wildlife resources and the public ownership status of the
30 wildlife resources.

31 (g) To alleviate economic losses or public health or safety problems caused by
32 wildlife to the people of the state either individually or collectively. That
33 resolution shall be in a manner designed to bring the problem within tolerable
34 limits consistent with economic and public health considerations and the
35 objectives stated in subdivisions (a), (b), and (c).

36 (h) It is not intended that this policy shall provide any power to regulate natural
37 resources or commercial or other activities connected therewith, except as
38 specifically provided by the Legislature.

39 **Comment.** Section 54505 continues former Fish and Game Code Section 1801 without
40 substantive change.

1 **§ 54510. Department jurisdiction**

2 54510. The department has jurisdiction over the conservation, protection, and
3 management of fish, wildlife, native plants, and habitat necessary for biologically
4 sustainable populations of those species. The department, as trustee for fish and
5 wildlife resources, shall consult with lead and responsible agencies and shall
6 provide, as available, the requisite biological expertise to review and comment
7 upon environmental documents and impacts arising from project activities, as
8 those terms are used in the California Environmental Protection Act (Division 13
9 (commencing with Section 21000) of the Public Resources Code).

10 **Comment.** Section 54510 continues former Fish and Game Code Section 1802 without
11 substantive change.

12 **TITLE 2. CONSERVATION OF AQUATIC**
13 **RESOURCES**

14 **§ 54525. Policy**

15 54525. It is hereby declared to be the policy of the state to encourage the
16 conservation, maintenance, and utilization of the living resources of the ocean and
17 other waters under the jurisdiction and influence of the state for the benefit of all
18 the citizens of the state and to promote the development of local fisheries and
19 distant-water fisheries based in California in harmony with international law
20 respecting fishing and the conservation of the living resources of the oceans and
21 other waters under the jurisdiction and influence of the state. This policy shall
22 include all of the following objectives:

23 (a) The maintenance of sufficient populations of all species of aquatic organisms
24 to insure their continued existence.

25 (b) The recognition of the importance of the aesthetic, educational, scientific,
26 and nonextractive recreational uses of the living resources of the California
27 Current.

28 (c) The maintenance of a sufficient resource to support a reasonable sport use,
29 where a species is the object of sport fishing, taking into consideration the
30 necessity of regulating individual sport fishery bag limits to the quantity that is
31 sufficient to provide a satisfying sport.

32 (d) The growth of local commercial fisheries, consistent with aesthetic,
33 educational, scientific, and recreational uses of living resources, the utilization of
34 unused resources, taking into consideration the necessity of regulating the catch
35 within the limits of maximum sustainable yields, and the development of distant-
36 water and overseas fishery enterprises.

37 (e) The management, on a basis of adequate scientific information promptly
38 promulgated for public scrutiny, of the fisheries under the state's jurisdiction, and
39 the participation in the management of other fisheries in which California
40 fishermen are engaged, with the objective of maximizing the sustained harvest.

1 (f) The development of commercial aquaculture.

2 **Comment.** Section 54525 continues former Fish and Game Code Section 1700 without
3 substantive change.

4 TITLE 3. DEPARTMENT AUTHORITY

5 § 54550. Habitat improvement

6 54550. (a) The department may expend any funds that may be necessary for the
7 improvement of property, including nonnavigable lakes and streams, riparian
8 zones, and upland, in order to restore, rehabilitate, and improve fish and wildlife
9 habitat. The improvement activities may include, but are not limited to, the
10 removal of barriers to migration of fish and wildlife and the improvement of
11 hatching, feeding, resting, and breeding places for wildlife.

12 (b) The department may undertake the services and habitat improvement work
13 on private, public, and public trust lands without the state acquiring an interest in
14 the property.

15 **Comment.** Section 54550 continues former Fish and Game Code Section 1501 without
16 substantive change.

17 § 54555. Contracts for habitat improvement

18 54555. (a) The department may enter into contracts for fish and wildlife habitat
19 preservation, restoration, and enhancement with public and private entities
20 whenever the department finds that the contracts will assist in meeting the
21 department's duty to preserve, protect, and restore fish and wildlife.

22 (b) The department may grant funds for fish and wildlife habitat preservation,
23 restoration, and enhancement to public agencies, Indian tribes, and nonprofit
24 entities whenever the department finds that the grants will assist it in meeting its
25 duty to preserve, protect, and restore fish and wildlife.

26 (c) Contracts authorized under this section are contracts for services and are
27 governed by Article 4 (commencing with Section 10335) of Chapter 2 of Part 2 of
28 Division 2 of the Public Contract Code. No work under this section is public work
29 or a public improvement, and is not subject to Chapter 1 (commencing with
30 Section 1720) of Part 7 of Division 2 of the Labor Code.

31 (d) This section does not apply to contracts for any of the following:

32 (1) Construction of office, storage, garage, or maintenance buildings.

33 (2) Drilling wells and installation of pumping equipment.

34 (3) Construction of permanent hatchery facilities, including raceways, water
35 systems, and bird enclosures.

36 (4) Construction of permanent surfaced roadways and bridges.

37 (5) Any project requiring engineered design or certification by a registered
38 engineer.

39 (6) Any contract, except contracts with public agencies, nonprofit organizations,
40 or Indian tribes that exceed fifty thousand dollars (\$50,000) in cost, excluding the

1 cost for gravel, for fish and wildlife habitat preservation, restoration, and
2 enhancement for any one of the following:

3 (A) Fish screens, weirs, and ladders.

4 (B) Drainage or other watershed improvements.

5 (C) Gravel and rock removal or placement.

6 (D) Irrigation and water distribution systems.

7 (E) Earthwork and grading.

8 (F) Fencing.

9 (G) Planting trees or other habitat vegetation.

10 (H) Construction of temporary storage buildings.

11 **Comment.** Section 54555 continues former Fish and Game Code Section 1501.5 without
12 substantive change.

13 TITLE 4. SIGNIFICANT NATURAL AREAS

14 § 54570. Findings and declarations

15 54570. The Legislature finds and declares that:

16 (a) Areas containing diverse ecological and geological characteristics are vital to
17 the continual health and well-being of the state's natural resources and of its
18 citizens.

19 (b) Many habitats and ecosystems that constitute the state's natural diversity are
20 in danger of being lost.

21 (c) Connectivity between wildlife habitats is important to the long-term viability
22 of the state's biodiversity.

23 (d) Preserving and connecting high-quality habitat for wildlife can create habitat
24 strongholds.

25 (e) Increasingly fragmented habitats threaten the state's wildlife species.

26 (f) There is an opportunity to provide incentive for private landowners to
27 maintain and perpetuate significant local natural areas in their natural state.

28 (g) Efforts to preserve natural areas have been fragmented between federal,
29 state, local, and private sectors.

30 (h) Analysis of the state's habitat connectivity benefits from the consideration of
31 all relevant data, including information from private and public landowners.

32 (i) The department's existing mapping activities and products should be
33 developed and sustained.

34 (j) The importance of wildlife corridors to assist in adapting to climate change
35 has been recognized by such groups as the Western Governors' Association,
36 which unanimously approved a policy to protect wildlife migration corridors and
37 crucial wildlife habitat in 2007. Individual local, state, and federal agencies have
38 also adopted policies aimed at protecting wildlife corridors and habitat
39 connectivity, in order to protect ecosystem health and biodiversity and to improve
40 the resiliency of wildlife and their habitats to climate change. However, these

efforts could be enhanced through establishment of a statewide policy to protect important wildlife corridors and habitat linkages where feasible and practicable.

Comment. Section 54570 continues former Fish and Game Code Section 1930 without substantive change.

§ 54575. Definitions

54575. For the purposes of Sections 54580 and 54600, the following terms have the following meanings:

(1) “Habitat stronghold” means high-quality habitat that supports wildlife in being more resilient to increasing pressures on species due to climate change and land development.

(2) “Wildlife corridor” means a habitat linkage that joins two or more areas of wildlife habitat, allowing for fish passage or the movement of wildlife from one area to another.

Comment. Section 54575 continues former Fish and Game Code Section 1930.5(f) without substantive change.

Note. Proposed Section 54575 continues the existing application of the definitions of “habitat stronghold” and “wildlife corridor” provided in Fish and Game Code Section 1930.5(f). Those terms are also used in other provisions of this title that are *not* governed by the definitions (proposed Sections 54570, 54585, 54595). **The Commission invites comment on whether the definitions should be generalized to apply to the entire title.**

§ 54580. Identification of wildlife corridors

54580. (a) Contingent upon funding being provided by the Wildlife Conservation Board from moneys available pursuant to Section 75055 of the Public Resources Code, or from other appropriate bond funds, upon appropriation by the Legislature, the department shall investigate, study, and identify those areas in the state that are most essential as wildlife corridors and habitat linkages, as well as the impacts to those wildlife corridors from climate change, and shall prioritize vegetative data development in these areas.

(b) It is the intent of the Legislature that the Wildlife Conservation Board use various funds to work with the department to complete a statewide analysis of wildlife corridors and connectivity to support conservation planning and climate change adaptation activities.

Comment. Section 54580 continues former Fish and Game Code Section 1930.5(a)-(b) without substantive change.

§ 54585. Significant Natural Areas Program

54585. There is hereby established the Significant Natural Areas Program, which shall be administered by the department. The department, in administering this program, shall do all of the following:

(a) Obtain access to the most recent information with respect to natural resources. In order to accomplish this, the department shall maintain, expand, and keep current a data management system, designated the California Natural

Diversity Data Base, designed to document information on these resources. That data shall be made available to interested parties on request.

(b) Develop and maintain a spatial data system that identifies those areas in the state that are most essential for maintaining habitat connectivity, including wildlife corridors and habitat linkages. This data should include information essential for evaluating the needs of wildlife species that require habitat connectivity for their long-term conservation, including distribution and movement patterns.

(c) As appropriate, develop and maintain the database by incorporating mapping products and data developed by other state agencies.

(d) Make all of the data sets, and associated analytical products, available to the public and other government entities.

(e) Ensure cost sharing by all who use the data management system and develop an appropriate schedule of compensation to be paid by individuals using the data management system, not to exceed the actual costs for use of the data management system.

(f) Ensure recognition of the state's most significant natural areas, including those affected by climate change. The department shall, after consultation with federal, state, and local agencies, education institutions, civic and public interest organizations, private organizations, landowners, and other private individuals, identify by means of periodic reports those natural areas deemed to be most significant.

(g) Seek the maintenance and perpetuation of the state's most significant natural areas for present and future generations in the most feasible manner. The department shall consider alternative approaches for that maintenance, including alternatives to fee acquisition such as incentives, leasing, and dedication.

(h) Reduce unnecessary duplication of effort. The department shall provide coordinating services to federal, state, local, and private interests wishing to aid in the maintenance and perpetuation of significant natural areas.

(i) Actively pursue grants and cost-sharing opportunities with local, state, or federal agencies, or private entities that use the data sets and benefit from their creation and maintenance.

Comment. Section 54585 continues former Fish and Game Code Section 1932 without substantive change.

Note. Existing Section 1932(b) incorporates the definition of "wildlife" provided in Section 89.5. That language is not continued here, because the Commission is proposing to generalize Section 89.5 so that its definition of "wildlife" applies to the entire code.

§ 54590. Vegetation mapping standard

54590. (a) The department shall undertake the development of a vegetation mapping standard for the state.

(b) The development of a state vegetation mapping standard by the department shall be done in consultation with interested stakeholders, including, but not limited to, government agencies, nongovernmental conservation organizations,

landowners, agriculture, recreation, scientific entities, and industry. Components of the standard shall include the following:

(1) A published classification system for all natural and seminatural vegetation communities present in California with sufficient detail to meet the analytical needs of government and nongovernment entities. The classification shall be consistent with national standards adopted by the Federal Geographic Data Committee.

(2) Methods for field data collection, image interpretation, and digital map production and attribution.

(3) Manuals, training materials, tools, and database structures for use by parties interested in performing vegetation mapping according to the standard.

(4) Documented methods for performing postproject accuracy assessments to quantify the validity of the work. Private and public landowners shall be given reasonable opportunity to review, and comment on the accuracy of, the data collected on their lands.

(5) Mechanisms for integrating new map products that meet the standard into a cohesive database with the intent of eventually completing statewide coverage.

(c) The department shall submit a report to the budget committee of each house of the Legislature no later than January 10, 2008, providing its mapping standard and advising how the department will ensure that its standard will be updated to reflect changing technology and serve as the state's center of expertise on vegetation mapping.

(d) The department may adopt regulations to implement this section.

Comment. Section 54590 continues former Fish and Game Code Section 1940 without substantive change.

§ 54595. Cooperation with public and private entities

54595. (a) The Legislature further finds and declares that it is the policy of this state to encourage the cooperation of federal, state, local, and private sectors, including private organizations and individuals, in efforts to maintain the state's most significant natural areas.

(b) In carrying out its responsibilities pursuant to this title, the department shall solicit and utilize all relevant results of existing studies and information from local government, state, and federal agencies, academic institutions, nonprofit organizations, certified environmental documents, private and public landowners, and agricultural and rangeland information developed by the Department of Conservation and agriculture associations.

(c) The department shall seek input from representatives of other state agencies, local government, federal agencies, nongovernmental conservation organizations, landowners, agriculture, recreation, scientific entities, and industry in determining essential wildlife corridors and habitat linkages.

(d) Private and public landowners shall be given a reasonable opportunity to review and comment on the wildlife characteristics of their land if it is identified

1 pursuant to this title. The department shall utilize all relevant information when
2 developing data sets and associated analytical products pursuant to this title.

3 **Comment.** Subdivision (a) of Section 54595 continues former Fish and Game Code Section
4 1931 without substantive change.

5 Subdivisions (b)-(d) continue former Fish and Game Code Section 1932.5(a)-(b) without
6 substantive change.

7 **§ 54600. Voluntary protections**

8 54600. (a) It is the policy of the state to promote the voluntary protection of
9 wildlife corridors and habitat strongholds in order to enhance the resiliency of
10 wildlife and their habitats to climate change, protect biodiversity, and allow for the
11 migration and movement of species by providing connectivity between habitat
12 lands. In order to further these goals, it is the policy of the state to encourage,
13 wherever feasible and practicable, voluntary steps to protect the functioning of
14 wildlife corridors through various means, as applicable and to the extent feasible
15 and practicable, those means may include, but are not limited to:

16 (1) Acquisition or protection of wildlife corridors as open space through
17 conservation easements.

18 (2) Installing of wildlife-friendly or directional fencing.

19 (3) Siting of mitigation and conservation banks in areas that provide habitat
20 connectivity for affected fish and wildlife resources.

21 (4) Provision of roadway undercrossings, overpasses, oversized culverts, or
22 bridges to allow for fish passage and the movement of wildlife between habitat
23 areas.

24 (b) The fact that a project applicant does not take voluntary steps to protect the
25 functioning of a wildlife corridor prior to initiating the application process for a
26 project shall not be grounds for denying a permit or requiring additional mitigation
27 beyond what would be required to mitigate project impacts under other applicable
28 laws, including, but not limited to, the California Endangered Species Act
29 (Chapter 1.5 (commencing with Section 2050) of Division 3) and the California
30 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
31 Public Resources Code).

32 (c) The Legislature finds and declares that there are a number of existing efforts,
33 including, but not limited to, efforts involving working landscapes, that are already
34 working to achieve the policy described in subdivisions (a) and (b).

35 (d) Subdivisions (a) and (b) shall not be construed to create new regulatory
36 requirements or modify the requirements of paragraphs (2) and (5) of subdivision
37 (d) of Section 64580 or the California Environmental Quality Act (Division 13
38 (commencing with Section 21000) of the Public Resources Code).

39 **Comment.** Section 54600 continues former Fish and Game Code Section 1930.5(c)-(e)
40 without substantive change.

1 **§ 54605. Disclaimers**

2 54605. (a) This title does not require, mandate, or authorize, under state or
3 federal law, any state or local planning, zoning, or other land use action or
4 decision.

5 (b) This title does not alter any legal rights and privileges, under state or federal
6 law, of ownership or use of privately or publicly owned property.

7 (c) The Legislature finds and declares that the data sets and associated analytical
8 products required pursuant to this title are for inventory and planning purposes and
9 may not be suitable to support regulatory actions without additional specificity or
10 information.

11 (d) No authority or responsibility provided for in this title shall, of itself, change
12 or prevent the change of the use of any area identified pursuant to the Significant
13 Natural Areas Program.

14 **Comment.** Subdivisions (a) through (c) of Section 54605 continue former Fish and Game
15 Code Section 1932.5(c)-(e) without substantive change.

16 Subdivision (d) continues former Fish and Game Code Section 1933 without substantive
17 change.

18 **PART 2. HABITAT CONSERVATION AND ENHANCEMENT**
19 **PROGRAMS**

20 **TITLE 1. WILDLIFE CONSERVATION LAW**
21 **OF 1947**

22 **CHAPTER 1. GENERAL PROVISIONS**

23 **§ 54700. Short title**

24 54700. This title is known and may be cited as the Wildlife Conservation Law of
25 1947.

26 **Comment.** Section 54700 continues former Fish and Game Code Section 1300 without
27 substantive change.

28 **§ 54705. Definitions**

29 54705. For the purposes of this title, “board” means the Wildlife Conservation
30 Board.

31 **Comment.** Section 54705 is new. It is comparable to former Fish and Game Code Sections
32 1320 and 1361(a).

33 **§ 54710. Policy**

34 54710. The preservation, protection and restoration of wildlife within the state is
35 an inseparable part of providing adequate recreation for our people in the interest
36 of public welfare; and it is the policy of the state to acquire and restore to the
37 highest possible level, and maintain in a state of high productivity, those areas that

1 can be most successfully used to sustain wildlife and which will provide adequate
2 and suitable recreation. To carry out these purposes, a single and coordinated
3 program for the acquisition of lands and facilities suitable for recreational
4 purposes, and adaptable for conservation, propagation, and utilization of the fish
5 and game resources of the state, is established.

6 **Comment.** Section 54710 continues former Fish and Game Code Section 1301 without
7 substantive change.

8 CHAPTER 2. WILDLIFE CONSERVATION BOARD

9 Article 1. Administration

10 § 54750. Establishment and composition of board

11 54750. (a) There is in the department the Wildlife Conservation Board.

12 (b) The board consists of the president of the commission, the director, the
13 Director of Finance, and four public members appointed pursuant to subdivisions
14 (b) through (e), inclusive.

15 (c) The Speaker of the Assembly and the Senate Committee on Rules shall each
16 appoint a public member to serve on the board and the Governor shall appoint two
17 public members to serve on the board.

18 (d) The public members shall each serve a term of four years. If a vacancy
19 occurs during the term of a public member, the appointing authority shall appoint
20 a person to fill the vacancy for a term of four years.

21 (e) Each public member shall have demonstrated interest and expertise in land
22 acquisition for conservation purposes, including, but not limited to, any of the
23 following:

24 (1) Experience with activities that benefit disadvantaged communities identified
25 pursuant to Section 39711 of the Health and Safety Code.

26 (2) Experience with a land conservation nonprofit organization, a public agency
27 focused on land conservation, or public land management.

28 (3) Experience as a professional with expertise in one or more functions of the
29 board, including conservation easements or other interests in real estate designed
30 to further the mission of the board.

31 **Comment.** Section 54750 continues former Fish and Game Code Section 1320 without
32 substantive change.

33 § 54755. Board chair

34 54755. The board's chair shall be elected by the members of the board.

35 **Comment.** Section 54755 continues former Fish and Game Code Section 1321 without
36 substantive change.

1 **§ 54760. Travel expenses**

2 54760. The members of the board shall receive their actual and necessary
3 traveling expenses, which shall be paid from the Wildlife Restoration Fund.

4 **Comment.** Section 54760 continues former Fish and Game Code Section 1322 without
5 substantive change.

6 **§ 54765. Participation of legislators**

7 54765. Three Members of the Senate, appointed by the Committee on Rules
8 thereof, and three Members of the Assembly, appointed by the Speaker thereof,
9 shall meet with the board and participate in its activities to the extent that
10 participation is not incompatible with their respective positions as Members of the
11 Legislature.

12 **Comment.** Section 54765 continues former Fish and Game Code Section 1323 without
13 substantive change.

14 **§ 54770. Interim investigating committee**

15 54770. For the purposes of this title, the Members of the Legislature shall
16 constitute an interim investigating committee on the subject of this title and as
17 such shall have the powers and duties imposed upon an interim investigating
18 committee by the Joint Rules of the Senate and the Assembly.

19 **Comment.** Section 54770 continues former Fish and Game Code Section 1324 without
20 substantive change.

21 Article 2. Powers and Purposes

22 **§ 54800. Studies**

23 54800. (a) The board shall investigate, study, and determine what areas within
24 the state are most essential and suitable for wildlife production and preservation,
25 and will provide suitable recreation.

26 (b) The board shall ascertain and determine what lands within the state are
27 suitable for game propagation, game refuges, bird refuges, waterfowl refuges,
28 game farms, fish hatcheries, game management areas, and what streams and lakes
29 are suitable for, or can be made suitable for, fishing and hunting.

30 (c) In determining which areas are suitable for fishing and hunting, the board, in
31 consultation with the department, shall take into consideration areas of the state
32 where public access and opportunity for fishing and hunting are most needed.

33 (d) The board shall ascertain what lands are suitable for providing cover for the
34 propagation and rearing in a wild state of waterfowl, shore birds, and upland birds,
35 and the possibilities of acquiring easements on those lands to provide that cover.

36 **Comment.** Subdivisions (a) through (c) of Section 54800 continue former Fish and Game
37 Code Section 1345 without substantive change.

38 Subdivision (d) continues former Fish and Game Code Section 1346 without substantive
39 change.

1 **§ 54805. Determination**

2 54805. As a result of its studies, the board shall determine what areas, lands, or
3 rights in lands or waters should be acquired by the state in order to effectuate a
4 coordinated and balanced program resulting in the maximum restoration of
5 wildlife in the state and in the maximum recreational advantages to the people of
6 the state.

7 **Comment.** Section 54805 continues former Fish and Game Code Section 1347 without
8 substantive change.

9 **§ 54810. Consideration of greenhouse gas emissions**

10 54810. The board, when it prioritizes the use of available funds for proposed
11 acquisitions, with regard to the priority of a proposal to acquire forestland, may
12 consider and take into account the potential of that proposed acquisition to
13 beneficially reduce or sequester greenhouse gas emissions. The board may use
14 policies, protocols, or other relevant information developed by the California
15 Climate Action Registry as a basis for determining a project's potential to reduce
16 or sequester greenhouse gas emissions.

17 **Comment.** Section 54810 continues former Fish and Game Code Section 1356 without
18 substantive change.

19 **§ 54815. Acquisition of property rights**

20 54815. (a)(1) The board shall authorize the acquisition of real property, rights in
21 real property, water, or water rights as may be necessary to carry out the purposes
22 of this title.

23 (2) The board may authorize acquisition by the department, but the department
24 shall not acquire any property pursuant to this subdivision by eminent domain
25 proceedings except that property as may be necessary to provide access roads or
26 rights-of-way to areas to be used for fishing the coastal waters of the Pacific
27 Ocean, and then only if the board of supervisors of the affected county has agreed
28 by resolution to those proceedings for each parcel of land, and has further agreed
29 by resolution to maintain the road or right-of-way.

30 (3) The board may authorize acquisition by the State Public Works Board,
31 which may effect acquisitions pursuant to the Property Acquisition Law, Part 11
32 (commencing with Section 15850) of Division 3 of Title 2 of the Government
33 Code.

34 (b) For the purposes of this title and Title 12 (commencing with Section 57700),
35 the board may authorize the acquisition of interests in real property and water
36 rights by means of gifts, purchases, leases, easements, the transfer or exchange of
37 property for other property of like value, transfers of development rights or credits,
38 and purchases of development rights, conservation easements, and other interests.

39 (c) To further implement this title and Title 12 (commencing with Section
40 57700), the board may authorize the department to do any of the following:

1 (1) Accept federal grants and receive gifts, donations, subventions, rents,
2 royalties, and other financial support from public or private sources. Proceeds
3 received from any of these sources shall be deposited in the Wildlife Restoration
4 Fund.

5 (2) Notwithstanding any other provision of law, lease, sell, exchange, or
6 otherwise transfer any real property, interest in real property, or option acquired by
7 or held under the jurisdiction of the board or the department. Except as provided in
8 Section 54870, proceeds from transactions entered into pursuant to this paragraph
9 shall be deposited in the Wildlife Restoration Fund.

10 (3) Lease degraded potential wildlife habitat real property to nonprofit
11 organizations, local governmental agencies, or state and federal agencies if the
12 lessee agrees to restore the real property to its highest possible wildlife habitat
13 value and maintain the real property at that highest possible wildlife habitat value.
14 If feasible, during the period of lease, the board may require that the real property
15 be open to the public for compatible recreational opportunities. Proceeds from any
16 lease or rental and interest thereon shall be deposited in the Wildlife Restoration
17 Fund.

18 (4) Acquire former wildlife habitat real property, including riparian habitat real
19 property, restore and sell the real property, or any interest therein, to private
20 owners, local governmental agencies, or state departments and agencies, or
21 exchange the property for other real property, if a written and recorded agreement
22 is first secured to keep and maintain the real property as wildlife habitat in
23 perpetuity. The agreement shall contain a reversion if the real property sold or
24 exchanged is not maintained as wildlife habitat. The agreement containing the
25 reversion shall be set forth in any conveyance transferring any real property,
26 interest in real property, or option subject to this section. Proceeds from the sales
27 shall be deposited in the Wildlife Restoration Fund.

28 **Comment.** Section 54815 continues former Fish and Game Code Section 1348 without
29 substantive change.

30 **§ 54820. Acquisition of property for public access**

31 54820. The board may authorize the acquisition of any lands or rights in land
32 that may be necessary for the purpose of furnishing public access to lands or
33 waters open to the public for fishing, hunting and shooting. The board may
34 authorize that acquisition by the department.

35 **Comment.** Section 54820 continues former Fish and Game Code Section 1354 without
36 substantive change.

37 **§ 54825. Notice of intent to acquire property**

38 54825. Before the board authorizes the purchase of any land, or any interest
39 therein, the board shall notify all owners of record of adjacent parcels of land of
40 the intent of the board to purchase the land. The notice to the adjacent owners of

1 land and the public notice shall include an explanation of the proposed use of the
2 land by the department.

3 **Comment.** Section 54825 continues former Fish and Game Code Section 1348.1 without
4 substantive change.

5 **§ 54830. Purchase price of acquired property**

6 54830. When the board acquires real property, other than by eminent domain,
7 the purchase price for the real property shall not exceed the fair market value of
8 the property, as defined in Section 1263.320 of the Code of Civil Procedure. The
9 fair market value shall be set forth in an appraisal that is (a) prepared by a licensed
10 real estate appraiser, and (b) approved by the Department of General Services.

11 **Comment.** Section 54830 continues former Fish and Game Code Section 1348.2 without
12 substantive change.

13 **§ 54835. Condemnation of wildlife conservation easement**

14 54835. (a) No governmental entity may condemn any wildlife conservation
15 easement acquired by a state agency, except as provided in subdivision (b). As
16 used in this section, the following terms have the following meanings:

17 (1) “Public use” as used in Article 6 (commencing with Section 1240.510) and
18 Article 7 (commencing with Section 1240.610) of Chapter 3 of Title 7 of Part 3 of
19 the Code of Civil Procedure means privately owned lands managed for habitat in
20 public trust.

21 (2) “Wildlife conservation easement” means a recorded conservation easement,
22 as defined in Section 815.1 of the Civil Code, that exists or will exist for at least
23 10 years and that is acquired and held by a state agency and administered
24 primarily for the benefit of wildlife.

25 (b) Prior to the initiation by a governmental entity of condemnation proceedings
26 against a wildlife conservation easement acquired by a state agency, the
27 governmental entity shall give notice to the holder of the easement, provide an
28 opportunity for the holder of the easement to consult with the governmental
29 agency, provide the holder of the easement the opportunity to state its objections
30 to the condemnation, and provide a response to the objections. Article 6
31 (commencing with Section 1240.510) and Article 7 (commencing with Section
32 1240.610) of Chapter 3 of Title 7 of Part 3 of the Code of Civil Procedure shall
33 apply to condemnation proceedings initiated by a governmental entity against a
34 wildlife conservation easement acquired by a state agency. In those proceedings,
35 the condemning governmental entity shall be required to prove by clear and
36 convincing evidence that its proposed use satisfies the requirements of Article 6
37 (commencing with Section 1240.510) or Article 7 (commencing with Section
38 1240.610) of Chapter 3 of Title 7 of Part 3 of the Code of Civil Procedure.

39 **Comment.** Section 54835 continues former Fish and Game Code Section 1348.3(a)(1), (a)(3),
40 and (b) without substantive change.

Note. Existing Section 1348.3(a)(2) incorporates the definition of “wildlife” provided in Section 89.5. That provision is not continued here, because the Commission is proposing to generalize Section 89.5 so that its definition of “wildlife” applies to the entire code.

§ 54840. Farm lands

54840. No farm lands may be acquired under the provisions of this title by proceedings in eminent domain except by specific authorization of the Legislature, notwithstanding any provision of Section 54815. Nothing in this section shall apply to any proceedings to acquire farm lands when the owner thereof has consented to, or requested the institution of, the proceedings.

Comment. Section 54840 continues former Fish and Game Code Section 1349 without substantive change.

§ 54845. Receipt of grants, gifts, donations, and other financial support

54845. The department, when authorized by the board, may apply for and accept federal grants, and receive gifts, donations, and other financial support from public or private sources to be used for fish and wildlife habitat enhancement, including riparian habitat restoration projects on real property or waters for which the state obtains an interest. Funds received from any of those sources shall be deposited in the Wildlife Restoration Fund.

Comment. Section 54845 continues former Fish and Game Code Section 1350(b) without substantive change.

§ 54850. Award of grant or loan

54850. (a) The board may award grants or loans to nonprofit organizations, local governmental agencies, federal agencies, and state agencies for the purposes of fish and wildlife habitat restoration, enhancement, management, protection and improvement of riparian resources, and for development of compatible public access facilities in the same manner and subject to the same terms and conditions as prescribed in Section 31116 of the Public Resources Code.

(b) Proceeds from repayment of any loans and the interest thereon shall be deposited in the Wildlife Restoration Fund.

Comment. Section 54850 continues former Fish and Game Code Section 1350(c) without substantive change.

§ 54855. Construction of facilities

54855. (a) The department shall, when authorized by the board, construct in accordance with law any facilities that are suitable for the purpose for which the real property or rights in real property or water, or water rights were acquired. Each completed project shall be managed and maintained by the department.

(b) The department, with the approval of the board, may enter into agreements with any other department or agency of this state, any local agency, or nonprofit organization, to provide for the construction, management, or maintenance of the facilities authorized by the board, and the other department or agency of this state,

1 local agency, or nonprofit organization, and each of them may construct, manage,
2 or maintain those facilities pursuant to the agreement.

3 (c) Work performed by a local agency or nonprofit organization under those
4 agreements is exempt from Chapter 3 (commencing with Section 14250), of Part 5
5 of Division 3 of Title 2 of the Government Code. However, nothing in this section,
6 Section 54845, or Section 54850 shall be construed to exempt any work from Part
7 7 (commencing with Section 1720) of Division 2 of the Labor Code.

8 **Comment.** Section 54855 continues former Fish and Game Code Section 1350(a) without
9 substantive change.

10 **Note:** Existing Section 1350(a) includes a reference to “Chapter 3 (commencing with Section
11 14250), of Part 5 of Division 3 of Title 2 of the Government Code.” The specified chapter does
12 not commence with Section 14250. It commences with Section 14200. The subject of that chapter
13 is state employee telecommuting, which seems inapt. **The Commission invites comment on**
14 **how to correct the apparently erroneous cross-reference.**

15 **§ 54860. Purchase of equipment**

16 54860. The board may purchase any boats, aircraft, or equipment that it deems
17 necessary for the use of the department for the improvement and protection of
18 marine fisheries.

19 **Comment.** Section 54860 continues former Fish and Game Code Section 1353 without
20 substantive change.

21 **§ 54865. Public access to recreational areas**

22 54865. Each recreational area shall be so managed and controlled that the public
23 shall have access to and use of the area for all recreational purposes.

24 **Comment.** Section 54865 continues former Fish and Game Code Section 1351 without
25 substantive change.

26 **§ 54870. Proceeds from sale or disposition of fish hatchery**

27 54870. The net proceeds of the sale or other disposition of real property used as
28 a fish hatchery that has been acquired by or is under the jurisdiction of the board
29 or the department, either in easement or in fee, shall be deposited in the Wildlife
30 Restoration Fund or the Fish and Game Preservation Fund, as determined by the
31 board, and shall be available for acquisition, enhancement, restoration, or
32 construction projects for the benefit of wildlife.

33 **Comment.** Section 54870 continues former Fish and Game Code Section 1355 without
34 substantive change.

35 **§ 54875. Wildlife Restoration Fund**

36 54875. (a) The money in the Wildlife Restoration Fund, as provided for by
37 Section 19632 of the Business and Professions Code, is available for expenditure
38 under any provision of this title.

39 (b) All federal moneys made available for projects authorized by the board shall
40 be deposited in the Wildlife Restoration Fund. Any unexpended balances of the

1 federal moneys remaining on or after June 30, 1979, in any other fund shall be
2 transferred to the Wildlife Restoration Fund.

3 (c) Any moneys received in the Wildlife Restoration Fund from leases
4 authorized pursuant to paragraph (2) or (3) of subdivision (c) of Section 54815
5 shall be expended, upon appropriation, by the department for the purposes of
6 managing, maintaining, restoring, or operating lands owned and managed by the
7 department.

8 **Comment.** Section 54875 continues former Fish and Game Code Section 1352 without
9 substantive change.

10  **Note.** Existing Section 1352(b) provides:

11 “All federal moneys made available for projects authorized by the board shall be deposited in the
12 Wildlife Restoration Fund. Any unexpended balances of the federal moneys remaining on or after
13 June 30, 1979, in any other fund shall be transferred to the Wildlife Restoration Fund.”

14 The second sentence of that subdivision required action in 1979. **The Commission invites**
15 **comment on whether it can be repealed as obsolete.**

16 **§ 54880. San Francisco Baylands Restoration Program**

17 54880. (a) The San Francisco Baylands Restoration Program Account is hereby
18 established within the Wildlife Restoration Fund, as provided for by Section
19 19632 of the Business and Professions Code, for the purpose of acquiring and
20 restoring wetlands and lands that may be enhanced to support wetlands in the San
21 Francisco Bay area in order to achieve the objectives of the Baylands Ecosystem
22 Habitat Goals Report (Goals Report).

23 (b) Funds in the account may be expended by the board to acquire any lands
24 identified in the Goals Report that are available for acquisition subject to the
25 following conditions:

26 (1) The purchase price shall not exceed the fair market value of the property, as
27 determined by an appraisal conducted pursuant to Section 54830. The appraisal
28 shall also consider and describe all the specific requirements and restrictions of
29 relevant state and federal laws, including, but not limited to, the McAteer-Petris
30 Act (Title 7.2 (commencing with Section 66600) of the Government Code),
31 related to the property value and development potential of lands considered for
32 acquisition in the shoreline band of the San Francisco Bay area.

33 (2) The board has determined any of the following:

34 (A) Funds are available to implement the recommendations and objectives of the
35 Goals Report for a significant portion of the property to be acquired by the board.

36 (B) Sufficient funding and authority exists for the long-term maintenance of all
37 levees and dikes and all other land-use management requirements necessary to
38 avoid environmental degradation for the property proposed to be acquired by the
39 board.

40 (C) The property to be acquired by the board has no unique long-term
41 maintenance requirements or has no land-use management requirements necessary
42 to avoid environmental degradation.

1 (3) If the board determines to acquire all or a portion of the Cargill property, a
2 matching federal appropriation for the acquisition of the Cargill property shall be
3 deposited into an account solely for the acquisition of the Cargill property or a
4 portion thereof.

5 (4) The board has consulted with the State Coastal Conservancy and determined
6 that the proposed acquisition is consistent with most of the goals of the San
7 Francisco Bay Area Conservancy Program, as described in Section 31162 of the
8 Public Resources Code.

9 (5) The acquisition of the property will not result in any liability to the state for
10 the cleanup of hazardous materials.

11 (c) “Cargill property,” for purposes of this section, means all property owned by
12 the Cargill Salt Division that Cargill proposes to sell to the state and federal
13 governments.

14 **Comment.** Section 54880 continues former Fish and Game Code Section 1352.5 without
15 substantive change.

16 **§ 54885. Cooperation with federal agencies**

17 54885. The board may act either independently or may cooperate with the
18 United States Fish and Wildlife Service, Department of Interior, or any other
19 federal agency in determining any of the questions referred to in this title, or in the
20 acquisition and construction of any of the projects mentioned in this title.

21 **Comment.** Section 54885 continues former Fish and Game Code Section 1375 without
22 substantive change.

23 **CHAPTER 3. OAK WOODLANDS CONSERVATION ACT**

24 **Article 1. General Provisions**

25 **§ 54900. Short title**

26 54900. This chapter shall be known, and may be cited, as the Oak Woodlands
27 Conservation Act.

28 **Comment.** Section 54900 continues former Fish and Game Code Section 1360 without
29 substantive change.

30 **§ 54905. Definitions**

31 54905. For purposes of this chapter, the following terms have the following
32 meanings:

33 (a) “Conservation easement” means a conservation easement, as defined in
34 Section 815.1 of the Civil Code.

35 (b) “Fund” means the Oak Woodlands Conservation Fund.

36 (c) “Land improvement” means restoration or enhancement of biologically
37 functional oak woodlands habitat.

(d) “Local government entity” means any city, county, city and county, district, or other local government entity, if the entity is otherwise authorized to acquire and hold title to real property.

(e) “Nonprofit organization” means a tax-exempt nonprofit organization that meets the requirements of subdivision (a) of Section 815.3 of the Civil Code.

(f) “Oak” means any species in the genus *Quercus*.

(g) “Oak woodlands” means an oak stand with a greater than 10 percent canopy cover or that may have historically supported greater than 10 percent canopy cover.

(h) “Oak woodlands management plan” means a plan that provides protection for oak woodlands over time and compensates private landowners for conserving oak woodlands.

(i) “Special oak woodlands habitat elements” means multi- and single-layered canopy, riparian zones, cavity trees, snags, and downed woody debris.

Comment. Section 54905 continues former Fish and Game Code Section 1361(b)-(j) without substantive change. See Section 54705 (“board” defined for purposes of chapter).

§ 54910. Legislative intent

54910. It is the intent of the Legislature that this chapter accomplish all of the following:

(a) Support and encourage voluntary, long-term private stewardship and conservation of California’s oak woodlands by offering landowners financial incentives to protect and promote biologically functional oak woodlands over time.

(b) Provide incentives to protect and encourage farming and ranching operations that are operated in a manner that protects and promotes healthy oak woodlands.

(c) Provide incentives for the protection of oak trees providing superior wildlife values on private lands.

(d) Encourage local land use planning that is consistent with the preservation of oak woodlands, particularly special oak woodlands habitat elements.

(e) Provide guidelines for spending the funds allocated for oak woodlands pursuant to the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Act of 2000 (the Villaraigosa-Keeley Act (Chapter 1.692 (commencing with Section 5096.300) of Division 5 of the Public Resources Code)).

(f) Establish a fund for oak woodlands conservation, to which future appropriations for oak woodlands protection may be made, and specify grant making guidelines.

Comment. Section 54910 continues former Fish and Game Code Section 1362 without substantive change.

1 **§ 54915. Authority to affect local policy or land use decisionmaking**

2 54915. Nothing in this chapter grants any new authority to the board or any
3 other agency, office, or department to affect local policy or land use
4 decisionmaking.

5 **Comment.** Section 54915 continues former Fish and Game Code Section 1372 without
6 substantive change.

7 Article 2. Oak Woodlands Conservation Fund

8 **§ 54925. Fund established**

9 54925. The Oak Woodlands Conservation Fund is hereby created in the State
10 Treasury. The fund shall be administered by the board. Moneys in the fund may be
11 expended, upon appropriation by the Legislature, for the purposes of this chapter.

12 **Comment.** Section 54925 continues former Fish and Game Code Section 1363(a) without
13 substantive change.

14 **§ 54930. Deposits**

15 54930. Money may be deposited into the Oak Woodlands Conservation Fund
16 from gifts, donations, funds appropriated by the Legislature for the purposes of
17 this chapter, or from federal grants or loans or other sources, and shall be used for
18 the purpose of implementing this chapter, including administrative costs. Funds
19 from the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal
20 Protection Bond Act of 2000 (the Villaraigosa-Keeley Act (Chapter 1.692
21 (commencing with Section 5096.300) of Division 5 of the Public Resources
22 Code)), but not including funds dedicated as matching funds for the federal Forest
23 Legacy Program, shall be deposited in the fund.

24 **Comment.** Section 54930 continues former Fish and Game Code Section 1363(b) without
25 substantive change.

26 **§ 54935. Minimum deposit requirement**

27 54935. No money may be expended from the fund to adopt guidelines or to
28 administer the fund until at least one million dollars (\$1,000,000) is deposited in
29 the fund.

30 **Comment.** Section 54935 continues former Fish and Game Code Section 1370 without
31 substantive change.

32 **§ 54940. Use of funds**

33 54940. (a) The purposes for which moneys in the fund may be used include all
34 of the following:

35 (1) Grants for the purchase of oak woodlands conservation easements. Any
36 entity authorized to hold a conservation easement under Section 815.3 of the Civil
37 Code may hold a conservation easement pursuant to this chapter. The holder of the

1 conservation easement shall ensure, on an annual basis, that the conservation
2 easement conditions have been met for that year.

3 (2) Grants for land improvement.

4 (3) Cost-sharing incentive payments to private landowners who enter into long-
5 term conservation agreements. An agreement shall include management practices
6 that benefit oak woodlands and promote the economic sustainability of farming
7 and ranching operations.

8 (4) Public education and outreach by local government entities, park and open-
9 space districts, resource conservation districts, and nonprofit organizations. The
10 public education and outreach shall identify and communicate the social,
11 economic, agricultural, and biological benefits of strategies to conserve oak
12 woodlands habitat values, including watershed protection benefits that reduce soil
13 erosion, increase streamflows, and increase water retention and sustainable
14 agricultural operations.

15 (5) Assistance to local government entities, park and open-space districts,
16 resource conservation districts, and nonprofit organizations for the development
17 and implementation of oak conservation elements in local general plans.

18 (6) Technical assistance consistent with the purpose of preserving oak
19 woodlands.

20 (b) Not more than 20 percent of all grants made by the board pursuant to this
21 chapter may be used for the purposes described in paragraphs (4), (5), and (6) of
22 subdivision (a). Not less than 80 percent of funds available for grants pursuant to
23 this chapter shall be expended for the purposes described in paragraphs (1), (2),
24 and (3) of subdivision (a).

25 (c) Moneys in the fund shall be available to local government entities, park and
26 open-space districts, resource conservation districts, private landowners, and
27 nonprofit organizations for the purposes set forth in subdivision (a).

28 **Comment.** Subdivisions (a) and (b) of Section 54940 continue former Fish and Game Code
29 Section 1363(d)-(e) without substantive change.

30 Subdivision (c) continues former Fish and Game Code Section 1364 without substantive
31 change.

32 **§ 54945. California Forest Legacy Program**

33 54945. To the extent consistent with the Safe Neighborhood Parks, Clean Water,
34 Clean Air, and Coastal Protection Bond Act of 2000 (the Villaraigosa-Keeley Act
35 (Chapter 1.692 (commencing with Section 5096.300) of Division 5 of the Public
36 Resources Code)), the board may use money designated for the preservation and
37 restoration of oak woodlands in the Oak Woodlands Conservation Fund for
38 projects in conjunction with the California Forest Legacy Program (Division 10.5
39 (commencing with Sec. 12200) of the Public Resources Code)), but only for the
40 purposes specified in this chapter and only if the following requirements are met:

41 (a) The Department of Forestry and Fire Protection shall make an initial
42 recommendation to the board.

(b) The board may deny any initial recommendation to the Department of Forestry and Fire Protection. Subsequently, if the department alters an initial proposal, in a manner that the board determines to be significant, the board may withdraw its initial approval of the recommendation at any time during the process.

Comment. Section 54945 continues former Fish and Game Code Section 1363(c) without substantive change.

§ 54950. Memorandum of understanding with Department of Forestry and Fire Protection

54950. On or before April 1, 2002, the board and the Department of Forestry and Fire Protection shall develop a memorandum of understanding regarding the protection of oak woodlands that does all of the following:

(a) If necessary, creates a specific process for working together to use money from the fund in conjunction with the California Forest Legacy Program Act of 2000 (Division 10.5 (commencing with Section 12200) of the Public Resources Code).

(b) Lists elements a county or city shall include in its oak woodlands management plan. Items included in the plan shall assist a county or a city to specify conservation priorities and prevent oak woodlands habitat fragmentation while minimizing the cost and administrative burden associated with developing the plan. The elements may include any or all of the following:

(1) Tree inventory mapping.

(2) Oak canopy retention standards.

(3) Oak habitat mitigation measures.

(4) A procedure to monitor the effectiveness of the plan and to modify the plan as necessary.

(c) Designates an online repository for oak woodlands management plans that will be easily accessible to the public and any other state agency involved in oak woodlands conservation efforts.

(d) Discusses the relationship between oak woodlands conservation efforts under this chapter and efforts by other state agencies to protect oak woodlands, including efforts to combat sudden oak death, and outlines a plan, as necessary, for coordinating with these agencies.

Comment. Section 54950 continues former Fish and Game Code Section 1367 without substantive change.

§ 54955. Expenditure pursuant to Public Resources Code Section 5096.350(a)(4)

54955. Notwithstanding any other provision of law, this chapter governs the expenditure of funds for the preservation of oak woodlands pursuant to paragraph (4) of subdivision (a) of Section 5096.350 of the Public Resources Code.

Comment. Section 54955 continues former Fish and Game Code Section 1363(f) without substantive change.

1 **§ 54960. Grant criteria**

2 54960. The board shall develop and adopt guidelines and criteria for awarding
3 grants that achieve the greatest lasting conservation of oak woodlands. The board
4 shall develop these guidelines in consultation with the Department of Forestry and
5 Fire Protection, the Department of Food and Agriculture, the University of
6 California's Integrated Hardwood Range Management Program, conservation
7 groups, and farming and ranching associations. As it applies to the award of grants
8 for the implementation of this chapter, the board criteria shall specify that
9 easement acquisitions that are the most cost-effective in comparison to the actual
10 resource value of the easement shall be given priority.

11 **Comment.** Section 54960 continues former Fish and Game Code Section 1365 without
12 substantive change.

13 **§ 54965. Qualification for grant**

14 54965. (a) To qualify for a grant pursuant to this chapter, the county or city in
15 which the grant money would be spent shall prepare, or demonstrate that it has
16 already prepared, an oak woodlands management plan that includes a description
17 of all native oak species located within the county's or city's jurisdiction.

18 (b) To qualify for a grant pursuant to this chapter, the board shall certify that any
19 proposed easement was not, and is not, required to satisfy a condition imposed
20 upon the landowner by any lease, permit, license, certificate, or other entitlement
21 for use issued by one or more public agencies, including, but not limited to, the
22 mitigation of significant effects on the environment of a project pursuant to an
23 approved environmental impact report or to mitigate a negative declaration
24 required pursuant to the California Environmental Quality Act (Division 13
25 (commencing with Section 21000)) of the Public Resources Code.

26 (c) To qualify for a grant under this chapter, the applicant shall demonstrate that
27 its proposal provides protection of oak woodlands that is more protective than the
28 applicable provisions of law in existence on the date of the proposal.

29 (d) A county or city may develop an oak woodlands management plan. A
30 nonprofit corporation, park and open-space district, resource conservation district,
31 or other local government entity may apply to the board for funds to develop an
32 oak woodlands management plan for a county or city, but the county or city shall
33 maintain ultimate authority to approve the oak woodlands management plan.

34 (e) The process for developing an initial oak woodlands management plan, and
35 the adoption of significant amendments to a plan, as determined by the county or
36 city, are subject to the Ralph M. Brown Act (Chapter 9 (commencing with Section
37 54950) of Part 1 of Division 2 of Title 5 of the Government Code).

38 (f) A proposal by a local government entity, nonprofit corporation, park and
39 open-space district, private landowner, or resource conservation district for a grant
40 to be expended for the purposes of this chapter shall be certified by the county or
41 city as being consistent with the oak woodlands management plan of the county or
42 city. If the land covered by the proposal is in the jurisdiction of more than one

1 county or city, each county or city shall certify that the proposal is consistent with
2 the oak woodlands management plan of each county or city.

3 (g) If two or more entities seek grant funding from the board pursuant to this
4 chapter for the same jurisdiction, the county or city shall designate which entity
5 shall lead the efforts to manage oak woodlands habitat in the area.

6 **Comment.** Section 54965 continues former Fish and Game Code Section 1366 without
7 substantive change.

8 **§ 54970. Use of eminent domain**

9 54970. The board may not approve a grant to a local government entity, park
10 and open-space district, resource conservation district, or nonprofit organization if
11 the entity requesting the grant has acquired, or proposes to acquire, an oak
12 woodlands conservation easement through the use of eminent domain, unless the
13 owner of the affected lands requests the owner to do so.

14 **Comment.** Section 54970 continues former Fish and Game Code Section 1368 without
15 substantive change.

16 **§ 54975. Use of grant funds by city or county planning department**

17 54975. (a) A city or county planning department may utilize a grant awarded for
18 the purposes of this chapter to consult with a citizen advisory committee and
19 appropriate natural resource specialists in order to report publicly to the city
20 council or the board of supervisors on the status of the city's or county's oak
21 woodlands.

22 (b) Each city or county planning department that receives a grant for the
23 purposes of this chapter shall report to the city council or to the board of
24 supervisors of the county, as appropriate, on the use of those grant funds within
25 one year from the date the grant is received.

26 **Comment.** Section 54975 continues former Fish and Game Code Section 1369 without
27 substantive change.

28 **CHAPTER 4. MONARCH BUTTERFLY AND POLLINATOR RESCUE**
29 **PROGRAM**

30 **55000. Program established**

31 55000. (a) The Monarch Butterfly and Pollinator Rescue Program is hereby
32 established and shall be administered by the Wildlife Conservation Board.

33 (b) The purpose of the program is to recover and sustain populations of monarch
34 butterflies and other pollinators.

35 (c) To achieve the purposes of the program, the Wildlife Conservation Board
36 may do all of the following:

37 (1) Provide grants for the restoration or enhancement of California prairie and
38 other appropriate breeding habitat for monarch butterflies and pollinators on
39 private and public lands.

1 (2) Provide grants for the restoration or enhancement of overwintering monarch
2 butterfly habitat on private and public lands.

3 (3) Provide technical assistance to grant recipients, including farmers and
4 ranchers, regarding restoration and enhancement of breeding, overwintering, and
5 other appropriate monarch butterfly habitat.

6 (4) Award grants pursuant to this title.

7 (5) Provide grants for seasonal or temporary habitat improvements.

8 (6) Provide block grants in which suballocations are made by the grant recipient,
9 with the approval of the Wildlife Conservation Board.

10 (d) Eligible recipients for grants under the program include private landowners,
11 nonprofit organizations, resource conservation districts, or public agencies.

12 **Comment.** Section 55000 continues former Fish and Game Code Section 1374(a)-(d) without
13 substantive change.

14  **Note.** Proposed Section 55000 would continue Section 1374(a)-(d), which were added by
15 2018 Cal. Stat. ch. 760. Although that bill will not take effect until 2019, it is included here in
16 anticipation of its effect.

17 **55005. Guidelines**

18 55005 (a) Before disbursing a grant pursuant to this chapter, the Wildlife
19 Conservation Board shall develop and adopt project selection and evaluation
20 guidelines. The guidelines shall include monitoring and reporting requirements to
21 help assess grant outcomes.

22 (b) The Wildlife Conservation Board shall coordinate with the Department of
23 Food and Agriculture in developing program guidelines.

24 **Comment.** Section 55005 continues former Fish and Game Code Section 1374(e) without
25 substantive change.

26  **Note.** Proposed Section 55005 would continue Section 1374(e), which was added by 2018
27 Cal. Stat. ch. 760. Although that bill will not take effect until 2019, it is included here in
28 anticipation of its effect.

29 **55010. Monarch Butterfly and Pollinator Rescue Fund Account**

30 55010. (a) The Monarch Butterfly and Pollinator Rescue Fund Account is
31 hereby created in the State Treasury. The account shall be administered by the
32 Wildlife Conservation Board. Moneys in the account may be expended, upon
33 appropriation by the Legislature, for the purposes of this article.

34 (b) Moneys may be deposited into the account from gifts, donations, funds
35 appropriated by the Legislature for the purposes of this chapter, or from federal
36 grants or other sources, and shall be used for the purpose of implementing this
37 chapter, including administrative costs.

38 **Comment.** Section 55010 continues former Fish and Game Code Section 1374.1 without
39 substantive change.

Note. Proposed Section 55010 would continue Section 1374.1, which was added by 2018 Cal. Stat. ch. 760. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

TITLE 2. HABITAT RESTORATION AND ENHANCEMENT ACT

CHAPTER 1. GENERAL PROVISIONS

§ 55100. Short title

55100. This title shall be known, and may be cited, as the Habitat Restoration and Enhancement Act.

Comment. Section 55100 continues former Fish and Game Code Section 1650 without substantive change.

§ 55105. Definitions

55105. As used in this title:

(a) “Fish passage guidelines” means those guidelines specified in the department’s California Salmonid Stream Habitat Restoration Manual and the National Marine Fisheries Service, Southwest Region, Guidelines for Salmonid Passage at Stream Crossings, and subsequent amendments or updates to either document.

(b) “Habitat restoration or enhancement project” means a project with the primary purpose of improving fish and wildlife habitat. A habitat restoration or enhancement project shall meet the eligibility requirements for the State Water Resources Control Board’s Order for Clean Water Act Section 401 General Water Quality Certification for Small Habitat Restoration Projects, or its current equivalent at the time the project proponent submits a written request pursuant to Article 1 (commencing with Section 55200) or Article 3 (commencing with Section 55300) of Chapter 3. The order or current equivalent may include programmatic waivers or waste discharge requirements for small habitat restoration projects.

(c) “Project proponent” means a person, public agency, or nonprofit organization seeking to implement a habitat restoration or enhancement project.

(d) “Species recovery plan” means a guidance document prepared by a government agency that identifies recovery actions, based upon the best scientific and commercial data available, necessary for the protection and recovery of listed species.

Comment. Section 55105 continues former Fish and Game Code Section 1651 without substantive change.

1 **§ 55110. Effect of title**

2 55110. This title shall not be construed as expanding the scope of projects
3 requiring a permit, agreement, license, or other approval issued by the department.

4 **Comment.** Section 55110 continues former Fish and Game Code Section 1654(b) without
5 substantive change.

6 **§ 55115. Report**

7 55115. (a) The department shall submit a report on the implementation of this
8 title to the Legislature no later than December 31, 2020, which shall include, but
9 not be limited to, the number, type, and geographical distribution of approved
10 projects, funding adequacy, and recommendations for changes and improvements
11 in the program.

12 (b) A report to be submitted pursuant to subdivision (a) shall be submitted in
13 compliance with Section 9795 of the Government Code.

14 **Comment.** Section 55115 continues former Fish and Game Code Section 1656 without
15 substantive change.

16 **§ 55120. Sunset**

17 55120. This title shall remain in effect only until January 1, 2022, and as of that
18 date is repealed, unless a later enacted statute, that is enacted before January 1,
19 2022, deletes or extends that date.

20 **Comment.** Section 55120 continues former Fish and Game Code Section 1657 without
21 substantive change.

22 **CHAPTER 2. HABITAT RESTORATION AND ENHANCEMENT ACCOUNT**

23 **§ 55150. Creation**

24 55150. The Habitat Restoration and Enhancement Account is hereby created in
25 the Fish and Game Preservation Fund.

26 **Comment.** Section 55150 continues former Fish and Game Code Section 1655(a) without
27 substantive change.

28 **§ 55155. Receipt of funds**

29 55155. The department may enter into an agreement to accept funds from any
30 public agency, person, business entity, or organization to achieve the purposes of
31 this title. The department shall deposit any funds so received in the account. The
32 funds received shall supplement existing resources for department administration
33 and permitting of projects and programs included in this title.

34 **Comment.** Section 55155 continues former Fish and Game Code Section 1655(b) without
35 substantive change.

1 **§ 55160. Availability**

2 55160. Moneys in the account shall be available to the department, upon
3 appropriation by the Legislature, for the purposes of administering and
4 implementing this title.

5 **Comment.** Section 55160 continues former Fish and Game Code Section 1655(d) without
6 substantive change.

7 **CHAPTER 3. PROJECT APPROVAL**

8 **Article 1. Project Not Certified by Water Board**

9 **§ 55200. Request to approve project**

10 55200. A project proponent may submit a written request to approve a habitat
11 restoration or enhancement project to the director pursuant to this article if the
12 project has not received certification pursuant to the State Water Resources
13 Control Board's Order for Clean Water Act Section 401 General Water Quality
14 Certification for Small Habitat Restoration Projects, or its current equivalent at the
15 time the project proponent submits the written request.

16 **Comment.** Section 55200 continues the first sentence of former Fish and Game Code Section
17 1652(a) without substantive change.

18 **§ 55205. Content of request**

19 55205. A written request to approve a habitat restoration or enhancement project
20 pursuant to this article shall contain all of the following:

21 (a) The name, address, title, organization, telephone number, and email address
22 of the natural person or persons who will be the main point of contact for the
23 project proponent.

24 (b) A full description of the habitat restoration or enhancement project that
25 includes the designs and techniques to be used for the project, restoration or
26 enhancement methods, an estimate of temporary restoration- or enhancement-
27 related disturbance, project schedule, anticipated activities, and how the project is
28 expected to result in a net benefit to any affected habitat and species, consistent
29 with subdivision (d) of Section 55215.

30 (c) An assessment of the project area that provides a description of the existing
31 flora and fauna and the potential presence of sensitive species or habitat. The
32 assessment shall include preproject photographs of the project area that include a
33 descriptive title, date taken, the photographic monitoring point, and photographic
34 orientation.

35 (d) A geographic description of the project site including maps, land ownership
36 information, and other relevant location information.

37 (e) A description of the environmental protection measures incorporated into the
38 project design, so that no potentially significant adverse effects on the
39 environment, as defined in Section 15382 of Title 14 of the California Code of

1 Regulations, are likely to occur with application of the specified environmental
2 protection measures. Environmental protection measures may include, but are not
3 limited to, appropriate seasonal work limitations, measures to avoid and minimize
4 impacts to water quality and potentially present species protected by state and
5 federal law, and the use of qualified professionals for standard preconstruction
6 surveys where protected species are potentially present.

7 (f) Substantial evidence to support a conclusion that the project meets the
8 requirements set forth in this article. Substantial evidence shall include references
9 to relevant design criteria and environmental protection measures found in the
10 documents specified in subdivision (d) of Section 55215.

11 (g) A certifying statement that the project will comply with the California
12 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
13 Public Resources Code), which may include, but not be limited to, the
14 requirements of Section 15333 of Title 14 of the California Code of Regulations.

15 **Comment.** Section 55205 continues former Fish and Game Code Section 1652(b) without
16 substantive change.

17 **§ 55210. Application fee**

18 55210. The department shall assess an application fee for a project submitted to
19 the department pursuant to this article consistent with the fees adopted by the
20 department pursuant to Title 3 (commencing with Section 69700) of Part 4 of
21 Division 17, but the application fee shall not exceed the reasonable administrative
22 and implementation costs of the department relating to the project.

23 **Comment.** Section 55210 continues former Fish and Game Code Section 1655(c), as it relates
24 to this article, without substantive change.

25 **§ 55215. Approval**

26 55215. Notwithstanding any other law, within 60 days after receiving a written
27 request to approve a habitat restoration or enhancement project, the director shall
28 approve a habitat restoration or enhancement project if the director determines that
29 the written request includes all of the required information set forth in Section
30 55205, and the project meets all of the following requirements:

31 (a) The project purpose is voluntary habitat restoration and the project is not
32 required as mitigation.

33 (b) The project is not part of a regulatory permit for a nonhabitat restoration or
34 enhancement construction activity, a regulatory settlement, a regulatory
35 enforcement action, or a court order.

36 (c) The project meets the eligibility requirements of the State Water Resources
37 Control Board's Order for Clean Water Act Section 401 General Water Quality
38 Certification for Small Habitat Restoration Projects, or its current equivalent at the
39 time the project proponent submits the written request, but has not received
40 certification pursuant to that order or its equivalent.

1 (d) The project is consistent with, or identified in, sources that describe best
2 available restoration and enhancement methodologies, including one or more of
3 the following:

4 (1) Federal- and state-listed species recovery plans or published protection
5 measures, or previously approved department agreements and permits issued for
6 voluntary habitat restoration or enhancement projects.

7 (2) Department and National Marine Fisheries Service fish screening criteria or
8 fish passage guidelines.

9 (3) The department's California Salmonid Stream Habitat Restoration Manual.

10 (4) Guidance documents and practice manuals that describe best available
11 habitat restoration or enhancement methodologies that are utilized or approved by
12 the department.

13 (e) The project will not result in cumulative adverse environmental impacts that
14 are significant when viewed in connection with the effects of past, current, or
15 probable future projects.

16 **Comment.** Section 55215 continues former Fish and Game Code Section 1652(c) without
17 substantive change.

18 **§ 55220. Denial**

19 55220. If the director determines that the written request does not contain all of
20 the information required by Section 55205, or fails to meet the requirements set
21 forth in Section 55215, or both, the director shall deny the written request and
22 inform the project proponent of the reason or reasons for the denial.

23 **Comment.** Section 55220 continues former Fish and Game Code Section 1652(d) without
24 substantive change.

25 **§ 55225. Notice of completion**

26 55225. The project proponent shall submit a notice of completion to the
27 department no later than 30 days after the project approved pursuant to this article
28 is completed. The notice of completion shall demonstrate that the project has been
29 carried out in accordance with the project's description. The notice of completion
30 shall include a map of the project location, including the final boundaries of the
31 restoration area or areas and postproject photographs. Each photograph shall
32 include a descriptive title, date taken, photographic monitoring point, and
33 photographic orientation.

34 **Comment.** Section 55225 continues former Fish and Game Code Section 1652(e) without
35 substantive change.

36 **§ 55230. Monitoring report**

37 55230. The project proponent shall submit a monitoring report describing
38 whether the restoration project is meeting each of the restoration goals stated in
39 the project application. Each report shall include photographs with a descriptive
40 title, date taken, photographic monitoring point, and photographic orientation. The

1 monitoring reports for Section 401 Water Quality Certification or waste discharge
2 requirements of the State Water Resources Control Board or a regional water
3 quality control board, or for department or federal voluntary habitat restoration
4 programs, including, but not limited to, the Fisheries Restoration Grant Program,
5 may be submitted in lieu of this requirement.

6 **Comment.** Section 55230 continues former Fish and Game Code Section 1652(f) without
7 substantive change.

8 Article 2. Project Certified by Water Board

9 § 55300. Request to approve project

10 55300. A project proponent may submit a written request to approve a habitat
11 restoration or enhancement project to the director pursuant to this article if the
12 project has received certification pursuant to the State Water Resources Control
13 Board's Order for Clean Water Act Section 401 General Water Quality
14 Certification for Small Habitat Restoration Projects, or its current equivalent at the
15 time the project proponent submits the written request.

16 **Comment.** Section 55300 continues former Fish and Game Code Section 1653(a) without
17 substantive change.

18 § 55305. Content of request

19 55305. A written request to approve a habitat restoration or enhancement project
20 pursuant to this article shall include all of the following:

21 (a) Notice that the project proponent has received a notice of applicability that
22 indicates that the project is authorized pursuant to the State Water Resources
23 Control Board's Order for Clean Water Act Section 401 General Water Quality
24 Certification for Small Habitat Restoration Projects, or its equivalent at the time
25 the project proponent submits the written request.

26 (b) A copy of the notice of applicability.

27 (c) A copy of the notice of intent provided to the State Water Resources Control
28 Board or a regional water quality control board.

29 (d) A description of species protection measures incorporated into the project
30 design, but not already included in the notice of intent, to avoid and minimize
31 impacts to potentially present species protected by state and federal law, such as
32 appropriate seasonal work limitations and the use of qualified professionals for
33 standard preconstruction surveys where protected species are potentially present.

34 (e) The fees required pursuant to Section 55310.

35 **Comment.** Section 55305 continues former Fish and Game Code Section 1653(b) without
36 substantive change.

37 § 55310. Application fee

38 55310. The department shall assess an application fee for a project submitted to
39 the department pursuant to this article consistent with the fees adopted by the

1 department pursuant to Title 3 (commencing with Section 69700) of Part 4 of
2 Division 17, but the application fee shall not exceed the reasonable administrative
3 and implementation costs of the department relating to the project.

4 **Comment.** Section 55310 continues former Fish and Game Code Section 1655(c), as it relates
5 to this article, without substantive change.

6 **§ 55315. Publication of notice**

7 55315. Upon receipt of the notice specified in subdivision (a) of Section 55305,
8 the director shall immediately have published in the General Public Interest
9 Section of the California Regulatory Notice Register the receipt of that notice.

10 **Comment.** Section 55315 continues former Fish and Game Code Section 1653(c) without
11 substantive change.

12 **§ 55320. Determination of completeness**

13 55320. (a) Within 30 days after the director has received the notice of
14 applicability described in Section 55305, the director shall determine whether the
15 written request accompanying the notice of applicability is complete.

16 (b) If the director determines within that 30-day period, based upon substantial
17 evidence, that the written request is not complete, then the project may be
18 authorized under Article 1 (commencing with Section 55200).

19 (c) The director shall immediately publish the determination pursuant to
20 subdivision (a) in the General Public Interest Section of the California Regulatory
21 Notice Register.

22 **Comment.** Section 55320 continues former Fish and Game Code Section 1653(d)-(f) without
23 substantive change.

24 **§ 55325. Reporting requirements**

25 55325. The project proponent shall submit the monitoring plan, monitoring
26 report, and notice of completion to the department as required by the State Water
27 Resources Control Board's Order for Clean Water Act Section 401 General Water
28 Quality Certification for Small Habitat Restoration Projects, or its current
29 equivalent at the time the project proponent submits the written request. The order
30 or its current equivalent may include programmatic waivers or waste discharge
31 requirements for small scale restoration projects.

32 **Comment.** Section 55325 continues former Fish and Game Code Section 1653(g) without
33 substantive change.

34 **Article 3. Approval and Suspension**

35 **§ 55350. Director's approval**

36 55350. The director's approval of a habitat restoration or enhancement project
37 pursuant to Article 1 (commencing with Section 55200) or Article 2 (commencing
38 with Section 55300) shall be in lieu of any other permit, agreement, license, or

1 other approval issued by the department, including, but not limited to, those issued
2 pursuant to Title 1 (commencing with Section 53800) of Part 3 of Division 14, and
3 Part 1 (commencing with Section 62000) of Division 17, and Title 3 (commencing
4 with Section 69700) of Part 4 of Division 17.

5 **Comment.** Section 55350 continues former Fish and Game Code Section 1654(a) without
6 substantive change.

7 **§ 55355. Notice of suspension**

8 55355. (a) If the director determines at any time that a project is no longer
9 consistent with Section 55215 or Section 55305, as applicable, due to a material
10 change between the project as submitted and the project being implemented or a
11 change in the environmental circumstances in the area of implementation, the
12 director shall notify the project proponent in writing and project implementation
13 shall be suspended.

14 (b) Written notice from the director shall be delivered in person, by certified
15 mail, or by electronic communication to the project proponent and shall specify
16 the reasons why approval of the project was suspended. The approval for a project
17 shall not be revoked pursuant to this article unless it has first been suspended
18 pursuant to this article.

19 **Comment.** Section 55355 continues former Fish and Game Code Section 1654(c)(1) without
20 substantive change.

21 **§ 55360. Objection**

22 55360. Within 30 days of receipt of a notice of suspension, the project
23 proponent may file an objection with the director. Any objection shall be in
24 writing and state the reasons why the project proponent objects to the suspension.
25 The project proponent may provide additional environmental protection measures,
26 design modifications, or other evidence that the project is consistent with Section
27 55215 or Section 55305, as applicable, and request that the notice of suspension be
28 lifted and approval granted.

29 **Comment.** Section 55360 continues former Fish and Game Code Section 1654(c)(2) without
30 substantive change.

31 **§ 55365. Final decision**

32 55365. The director shall revoke approval or lift the suspension of project
33 approval within 30 days after receiving the project proponent's objection pursuant
34 to Section 55360.

35 **Comment.** Section 55365 continues former Fish and Game Code Section 1654(c)(3) without
36 substantive change.

37 **§ 55370. Liability**

38 55370. Pursuant to Section 818.4 of the Government Code, the department and
39 any other state agency exercising authority under this article shall not be liable
40 with regard to any determination or authorization made pursuant to this article.

Comment. Section 55370 continues former Fish and Game Code Section 1654(d) without substantive change.

TITLE 3. FISH AND WILDLIFE HABITAT ENHANCEMENT ACT OF 1984

Note. The Fish and Wildlife Habitat Enhancement Act (existing Sections 2600-2651) was added by Proposition 19 (1984). The Commission has generally adopted a very deferential approach to the recodification of provisions added by initiative. Consistent with that approach, the Commission has made very minimal changes to the language of this part, mostly relating to section numbering. The Commission believes that the nonsubstantive continuation of that act in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

CHAPTER 1. GENERAL PROVISIONS

§ 55500. Short title

55500. This title shall be known and may be cited as the Fish and Wildlife Habitat Enhancement Act of 1984.

Comment. Section 55500 continues former Fish and Game Code Section 2600 without substantive change.

§ 55505. Declaration of purpose

55505. (a) The fundamental requirement for healthy, vigorous populations of fish and wildlife is habitat. Without adequate habitat, efforts to conserve and manage fish and wildlife resources will have limited success.

(b) Assuring adequate habitat, with the resulting increase in the abundance of fish and wildlife, confers substantial benefits on the people of California through the opportunities afforded for the use, enjoyment, and appreciation of fish and wildlife resources, the perpetuation of species of fish and wildlife for their intrinsic and ecological values, and the enhancement of economic activities based on these resources.

(c) Accordingly, the purpose of this title is to provide the financial means to correct the most severe deficiencies in fish and wildlife habitat currently found in California through a program of acquisition, enhancement, and development of habitat areas that are most in need of proper conservation and management.

Comment. Section 55505 continues former Fish and Game Code Section 2601 without substantive change.

§ 55510. Definitions

55510. As used in this title, the following terms have the following meanings:

(a) “Acquisition” means the acquisition of any interest in real property.

(b) “Coastal zone” means the coastal zone as defined and mapped pursuant to Section 30103 of the Public Resources Code.

1 (c) “Local public agency” means a city, county, city and county, regional park or
2 open-space district, recreation and park district, resource conservation district,
3 association of governments, or joint powers agency whose jurisdiction is wholly or
4 partially within the coastal zone or in the San Francisco Bay region.

5 **Comment.** Section 55510 continues former Fish and Game Code Section 2602 without
6 substantive change.

7 CHAPTER 2. HABITAT ENHANCEMENT PROGRAM

8 § 55525. Appropriation of funds

9 55525. All money deposited in the Fish and Wildlife Habitat Enhancement Fund
10 shall be available for appropriation by the Legislature for the following purposes:

11 (a) Forty million dollars (\$40,000,000) for expenditure by the Wildlife
12 Conservation Board pursuant to the Wildlife Conservation Law of 1947 for the
13 acquisition, enhancement, or development, or any combination thereof, of lands
14 located outside the coastal zone for the preservation of resources and the
15 management of wildlife and fisheries, in accordance with the following schedule:

16 (1) Thirty million dollars (\$30,000,000) for the acquisition, enhancement, or
17 development, or any combination thereof, of lands for habitat for wildfowl and
18 other wildlife benefitted by a marsh or aquatic environment.

19 (2) Ten million dollars (\$10,000,000) for the restoration of waterways for the
20 management of fisheries and the enhancement or development, or both, of habitat
21 for other wildlife.

22 (b) Five million dollars (\$5,000,000) for expenditure by the Wildlife
23 Conservation Board pursuant to the Wildlife Conservation Law of 1947 for the
24 acquisition, enhancement, or development, or any combination thereof, of lands
25 for habitat for rare, endangered, and fully protected species.

26 (c) Thirty million dollars (\$30,000,000) for expenditure by the State Coastal
27 Conservancy for the acquisition, enhancement, or development, or any
28 combination thereof, of marshlands and associated and adjacent lands and the
29 development of associated facilities and for grants to local public agencies for
30 those purposes, in accordance with the following schedule:

31 (1) Twenty million dollars (\$20,000,000) for grants by the conservancy to local
32 public agencies in the coastal zone and in the San Francisco Bay region for the
33 acquisition, enhancement, or development, or any combination thereof, of
34 marshlands and adjacent lands for habitat for wildlife benefitted by a marsh or
35 aquatic environment and the improvement of drainage into wetlands to control or
36 retard erosion and sedimentation, and biologically and hydrologically associated
37 upland habitat areas. Of the amount made available pursuant to this paragraph, not
38 less than five million dollars (\$5,000,000) shall be available for grants for projects
39 in the San Francisco Bay region.

40 (2) Ten million dollars (\$10,000,000) for expenditure by the conservancy for the
41 purposes authorized in this subdivision.

(d) Ten million dollars (\$10,000,000) for expenditure by the Wildlife Conservation Board pursuant to the Wildlife Conservation Law of 1947 for the acquisition, enhancement, or development, or any combination thereof, inside the coastal zone of marshlands and adjacent lands for habitat for wildlife benefitted by a marsh or aquatic environment.

Comment. Section 55525 continues former Fish and Game Code Section 2620 without substantive change.

§ 55530. Administrative costs of Wildlife Conservation Board

55530. An annual amount, not to exceed one hundred thousand dollars (\$100,000), may be appropriated from the funds available pursuant to subdivisions (a) and (d) of Section 55525 in the 1984–85 through 1989–90 fiscal years, in a particular amount to be determined in each annual appropriation, to the Wildlife Conservation Board for expenditure for costs incurred by the board in administering this title, as provided in this section. The board shall augment, as needed, any amount appropriated pursuant to this title with an appropriation from any other funds available to it. This title is not intended, nor shall it be construed, to authorize the Wildlife Conservation Board or the department to establish any additional personnel positions.

Comment. Section 55530 continues former Fish and Game Code Section 2621 without substantive change.

§ 55535. Administrative costs of State Coastal Conservancy

55535. An annual amount, not to exceed two hundred fifty thousand dollars (\$250,000), may be appropriated from the funds available pursuant to subdivision (c) of Section 55525 in the 1984–85 through 1989–90 fiscal years, in a particular amount to be determined in each annual appropriation, to the State Coastal Conservancy for expenditure for costs incurred by the conservancy in administering this title.

Comment. Section 55535 continues former Fish and Game Code Section 2622 without substantive change.

§ 55540. Limitations

55540. (a) None of the funds appropriated pursuant to this title may be encumbered for any purpose described in Section 54860.

(b) Notwithstanding Sections 31105 and 31106 of the Public Resources Code, the State Coastal Conservancy and the State Public Works Board may not make any acquisition pursuant to the power of eminent domain with any funds appropriated pursuant to this title.

Comment. Section 55540 continues former Fish and Game Code Section 2623 without substantive change.

1 **§ 55545. Use of funds for specified lands**

2 55545. Funds available pursuant to subdivision (b) of Section 55525 may be
3 encumbered only for lands constituting habitat that is subject to destruction,
4 drastic modification, or severe curtailment of habitat values.

5 **Comment.** Section 55545 continues former Fish and Game Code Section 2624 without
6 substantive change.

7 **§ 55550. Limitations on acquisition of title**

8 55550. No acquisition shall be undertaken with funds appropriated pursuant to
9 Section 55525 and no grant of funds appropriated pursuant to subdivision (c) of
10 Section 55525 shall be encumbered until all practical alternatives to direct
11 purchase of the full fee title have been considered. The Wildlife Conservation
12 Board and the State Coastal Conservancy shall establish a procedure to assure
13 consideration of alternatives to direct purchase. These alternatives shall include,
14 but not be limited to, the following:

15 (a) Opportunities for obtaining the land through exchanges of other publicly
16 held lands.

17 (b) Tax considerations that may pertain to the contemplated transaction.

18 (c) Utilization of transfers of densities and density bonuses and other available
19 land use controls.

20 (d) Purchase of less than full fee title.

21 **Comment.** Section 55550 continues former Fish and Game Code Section 2625 without
22 substantive change.

23 **§ 55555. Further limitations on use of funds**

24 55555. (a) All restoration projects that involve the expenditure of funds
25 available pursuant to subdivision (c) of Section 55525 shall be reviewed in
26 accordance with Section 31208, 31208.5, 31258, or 31258.5 of the Public
27 Resources Code, as applicable.

28 (b) Funds available pursuant to subdivision (d) of Section 55525 shall be
29 encumbered in accordance with priorities of the California Coastal Commission.

30 (c) Of the total amount available pursuant to subdivision (d) of Section 55525,
31 not more than four million dollars (\$4,000,000) may be encumbered for any single
32 acquisition project.

33 **Comment.** Section 55555 continues former Fish and Game Code Section 2626 without
34 substantive change.

35 **§ 55560. Additional limitations on use of funds**

36 55560. (a) Funds granted pursuant to subdivision (c) of Section 55525 for any
37 purpose, other than acquisition, shall not be encumbered by the recipient until the
38 conservancy has entered into an agreement sufficient to protect the public interest
39 in any improvements constructed pursuant to this title with the entity that exercises
40 legal control of the real property on which the improvement is constructed.

(b) The conservancy shall not disburse any grant until the applicant, or any other appropriate managing or operating entity, has entered into an agreement with the conservancy or its designee, or both, sufficient to assure that the property acquired, enhanced, or developed, and any improvements thereon, shall be managed and operated for the purpose for which the grant was requested. No use of the property that is incompatible with that purpose shall ever be permitted.

(c) The minimum amount for which an application for an individual project may be made is fifteen thousand dollars (\$15,000).

(d) Every application for a grant shall comply with the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(e) Notwithstanding Sections 31207 and 31257 of the Public Resources Code, funds granted pursuant to subdivision (c) of Section 55525 may be encumbered only for the acquisition, enhancement, or development, or any combination thereof, and the costs incurred by the recipient in planning, preparation of construction documents, fiscal management and accounting, and supervision of construction in connection with the project for which the grant was made. All expenditures made by a recipient of a grant shall be subject to being audited.

(f) Funds granted pursuant to subdivision (c) of Section 55525 shall be available for encumbrance by the recipient for a period of three years after the date when the grant became effective.

Comment. Section 55560 continues former Fish and Game Code Section 2627 without substantive change.

CHAPTER 3. FISCAL PROVISIONS

§ 55600. Issuance of bonds

55600. Bonds in the total amount of eighty-five million dollars (\$85,000,000), or so much thereof as is necessary, may be issued and sold to provide a fund to be used for carrying out the purposes expressed in this title and to be used to reimburse the General Obligation Bond Expense Revolving Fund pursuant to Section 16724.5 of the Government Code. The bonds shall, when sold, be and constitute a valid and binding obligation of the State of California, and the full faith and credit of the State of California is hereby pledged for the punctual payment of both principal and interest on the bonds as the principal and interest become due and payable.

Comment. Section 55600 continues former Fish and Game Code Section 2640 without substantive change.

§ 55605. Collection of revenue to pay principle and interest on bonds

55605. There shall be collected each year and in the same manner and at the same time as other state revenue is collected, in addition to the ordinary revenues of the state, the sum that is required to pay the principal and interest on the bonds

1 maturing each year, and it is hereby made the duty of all officers charged by law
2 with any duty in regard to the collection of the revenue to do and perform each and
3 every act that shall be necessary to collect that additional sum.

4 **Comment.** Section 55605 continues former Fish and Game Code Section 2641 without
5 substantive change.

6 **§ 55610. Appropriation from General Fund**

7 55610. There is hereby appropriated from the General Fund in the State
8 Treasury for the purpose of this title, an amount equal to the following:

9 (a) The sum, annually, that is necessary to pay the principal and interest on
10 bonds issued and sold pursuant to the provisions of this title, as principal and
11 interest become due and payable.

12 (b) The sum that is necessary to carry out the provisions of Section 55620,
13 which sum is appropriated without regard to fiscal years.

14 **Comment.** Section 55610 continues former Fish and Game Code Section 2642 without
15 substantive change.

16 **§ 55615. Fish and Wildlife Habitat Enhancement Fund**

17 55615. The proceeds of bonds issued and sold pursuant to this title shall be
18 deposited in the Fish and Wildlife Habitat Enhancement Fund, which is hereby
19 created. The money in the fund may be expended only for the purposes specified
20 in this title and only pursuant to appropriation by the Legislature in the manner
21 prescribed in this title.

22 **Comment.** Section 55615 continues former Fish and Game Code Section 2643 without
23 substantive change.

24 **§ 55620. Loan from General Fund**

25 55620. For the purposes of carrying out the provisions of this chapter, the
26 Director of Finance may, pursuant to appropriate authority in each annual Budget
27 Act, authorize the withdrawal from the General Fund of an amount or amounts not
28 to exceed the amount of the unsold bonds that have been authorized to be sold for
29 the purpose of carrying out this title. Any amounts withdrawn shall be deposited in
30 the fund. Any moneys made available under this section shall be returned to the
31 General Fund from moneys received from the sale of bonds for the purpose of
32 carrying out the provisions of this title. The withdrawals from the General Fund
33 shall be returned to the General Fund with interest at the rate that would otherwise
34 have been earned by those sums in the Pooled Money Investment Fund.

35 **Comment.** Section 55620 continues former Fish and Game Code Section 2644 without
36 substantive change.

37 **§ 55625. Special treatment of specified bond proceeds**

38 55625. Notwithstanding any other provision of this bond act, or of the State
39 General Obligation Bond Law (Chapter 4 (commencing with Section 16720) of
40 Part 3 of Division 4 of Title 2 of the Government Code), if the Treasurer sells

1 bonds pursuant to this bond act that include a bond counsel opinion to the effect
2 that the interest on the bonds is excluded from gross income for federal tax
3 purposes under designated conditions, the Treasurer may maintain separate
4 accounts for the bond proceeds invested and the investment earnings on those
5 proceeds, and may use or direct the use of those proceeds or earnings to pay any
6 rebate, penalty, or other payment required under federal law, or take any other
7 action with respect to the investment and use of those bond proceeds, as may be
8 required or desirable under federal law in order to maintain the tax-exempt status
9 of those bonds and to obtain any other advantage under federal law on behalf of
10 the funds of this state.

11 **Comment.** Section 55625 continues former Fish and Game Code Section 2644.5 without
12 substantive change.

13 **§ 55630. Budget bill**

14 55630. (a) All proposed appropriations for the program shall be included in a
15 section in the Budget Bill for the 1984–85 fiscal year and each succeeding fiscal
16 year for consideration by the Legislature and shall bear the caption “Fish and
17 Wildlife Habitat Enhancement Program.” The section shall contain separate items
18 for each project, each class of projects, or each element of the program for which
19 an appropriation is made.

20 (b) All appropriations shall be subject to all limitations enacted in the Budget
21 Act and to all fiscal procedures prescribed by law with respect to the expenditure
22 of state funds unless expressly exempted from those laws by a statute enacted by
23 the Legislature. The section in the Budget Act shall contain proposed
24 appropriations only for the program elements and classes of projects contemplated
25 by this title, and no funds derived from the bonds authorized by this title may be
26 expended pursuant to an appropriation not contained in that section of the Budget
27 Act.

28 **Comment.** Section 55630 continues former Fish and Game Code Section 2645 without
29 substantive change.

30 **§ 55635. State General Obligation Bond Law**

31 55635. The bonds authorized by this title shall be prepared, executed, issued,
32 sold, paid, and redeemed as provided in the State General Obligation Bond Law
33 (Chapter 4 (commencing with Section 16720) of Part 3, Division 4, Title 2 of the
34 Government Code), and all of the provisions of that law are applicable to the
35 bonds and to this title and are hereby incorporated in this title as though set forth
36 in full herein.

37 **Comment.** Section 55635 continues former Fish and Game Code Section 2646 without
38 substantive change.

1 **§ 55640. Wildlife Habitat Enhancement Program Finance Committee**

2 55640. Solely for the purpose of authorizing the issuance and sale, pursuant to
3 the State General Obligation Bond Law (Chapter 4 (commencing with Section
4 16720) of Part 1 of Division 4 of Title 2 of the Government Code), of the bonds
5 authorized by this title, the Wildlife Habitat Enhancement Program Finance
6 Committee is hereby created. The committee consists of the Controller, the
7 Director of Finance, and the Treasurer. For purposes of this title, this committee is
8 “the committee” as that term is used in the State General Obligation Bond Law,
9 and the Treasurer shall serve as chair of the committee.

10 **Comment.** Section 55640 continues former Fish and Game Code Section 2647 without
11 substantive change.

12 **§ 55645. Deposit of premiums and accrued interest**

13 55645. All money deposited in the fund that is derived from premium and
14 accrued interest on bonds sold shall be reserved in the fund and shall be available
15 for transfer to the General Fund as a credit to expenditures for bond interest.

16 **Comment.** Section 55645 continues former Fish and Game Code Section 2648 without
17 substantive change.

18 **§ 55650. Budget appropriation**

19 55650. Commencing with the Budget Bill for the 1995-96 fiscal year, the
20 balance remaining in the fund may be appropriated by the Legislature for
21 expenditure, without regard to the maximum amounts allocated to each element of
22 the program, for any or all elements of the program specified in Section 55525, or
23 any class or classes of projects within those elements that the Legislature deems to
24 be of the highest priority.

25 **Comment.** Section 55650 continues former Fish and Game Code Section 2649 without
26 substantive change.

27 **§ 55655. Proceeds of bonds not proceeds of taxes**

28 55655. The Legislature hereby finds and declares that, inasmuch as the proceeds
29 from the sale of bonds authorized by this title are not “proceeds of taxes” as that
30 term is used in Article XIII B of the California Constitution, the disbursement of
31 these proceeds is not subject to the limitations imposed by that article.

32 **Comment.** Section 55655 continues former Fish and Game Code Section 2650 without
33 substantive change.

34 **§ 55660. Severability**

35 55660. If any provision of this title or the application thereof to any person or
36 circumstances is held invalid, that invalidity shall not affect other provisions or
37 applications of the title that can be given effect without the invalid provision or
38 application, and to this end, the provisions of this title are severable.

39 **Comment.** Section 55660 continues former Fish and Game Code Section 2651 without
40 substantive change.

1 TITLE 4. WILDLIFE AND NATURAL AREAS
2 CONSERVATION PROGRAM

3  **Note.** The Wildlife and Natural Areas Conservation Program (existing Sections 2700-2729)
4 was added by Proposition 70 (1988). The Commission has generally adopted a very deferential
5 approach to the recodification of provisions added by initiative. Consistent with that approach,
6 the Commission has made very minimal changes to the language of this part, mostly relating to
7 section numbering. The Commission believes that the nonsubstantive continuation of that act in
8 the proposed law would not be an impermissible amendment. See discussion of initiative statutes
9 *supra* at notes 20-22 and associated text.

10 CHAPTER 1. GENERAL PROVISIONS

11 § 55700. Short title

12 55700. This title shall be known and may be cited as the Wildlife and Natural
13 Areas Conservation Act.

14 **Comment.** Section 55700 continues former Fish and Game Code Section 2700 without
15 substantive change.

16 § 55705. Declaration of purpose

17 55705. (a) The fundamental requirement for healthy, vigorous populations of
18 fish and wildlife is habitat. Without adequate habitat, efforts to conserve and
19 manage fish and wildlife resources will have limited success. Further, California
20 contains the greatest diversity of wildlife and plant species of virtually any state in
21 the nation. This rich natural heritage enables Californians to enjoy a great variety
22 of recreational, aesthetic, ecological, and other uses and benefits of these
23 biological resources. The public interest is served only by ensuring that these
24 resources are preserved, protected, and propagated for this and future generations.

25 (b) Many of California's wildlife, fish, and plant species and biological
26 communities are found nowhere else on earth. Without adequate protection and
27 management, rare native species and communities could easily become extinct. In
28 that event, the benefits they provide to the people of California, whether presently
29 realized or which remain to be discovered, will be lost forever, and California will
30 be significantly poorer as a result.

31 (c) The people of California have vested in the department the principal
32 responsibility for protecting, conserving, and perpetuating native fish, plants, and
33 wildlife, including endangered species and game animals, for their aesthetic,
34 intrinsic, ecological, educational, and economic values. To help accomplish this
35 goal, the people of California have further established a significant natural areas
36 program and a natural diversity database in the department, which is charged with
37 maintaining and perpetuating California's most significant natural areas for
38 present and future generations. To ensure the perpetuation of areas containing
39 uncommon elements of natural diversity and to ensure the continued abundance of

1 habitat for more common species, especially examples of those that are presently
2 threatened with destruction, the purchase of land is often necessary.

3 (d) Accordingly, the purpose of this title is to provide the Wildlife Conservation
4 Board and the department the financial means to correct the most severe
5 deficiencies in wildlife habitat and in the statewide system of areas designated for
6 the preservation of California's natural diversity through a program of acquisition,
7 enhancement, restoration, and protection of areas that are most in need of proper
8 conservation.

9 **Comment.** Section 55705 continues former Fish and Game Code Section 2701 without
10 substantive change.

11 **§ 55710. Definitions**

12 55710. As used in this title, the following terms have the following meanings:

13 (a) "Acquisition" means the acquiring of any interest in real property.

14 (b) "Fund" means the Wildlife and Natural Areas Conservation Fund created
15 pursuant to Section 55725.

16 (c) "Highly rare" means a worldwide rarity in which any species or natural
17 community occurs in 50 or fewer locations, irrespective of whether the species or
18 any species in the community is listed as threatened or endangered or was
19 previously listed as rare.

20 (d) "Natural community" means a distinct, identifiable, and recurring
21 association of plants and animals that are ecologically interrelated.

22 (e) "Species" means the fundamental biological unit of plant and animal
23 classification that comprises a subdivision of a genus, but for the purposes of this
24 title, "species" also includes the unit of a subspecies.

25 **Comment.** Section 55710 continues former Fish and Game Code Section 2702 without
26 substantive change.

27 **CHAPTER 2. HABITAT CONSERVATION PROGRAM**

28 **§ 55725. Deposits**

29 55725. Moneys available for the purposes of this title pursuant to Chapter 4
30 (commencing with Section 5930) of Division 5.8 of the Public Resources Code
31 shall be deposited in the Wildlife and Natural Areas Conservation Fund, which is
32 hereby created. Money deposited in the fund shall be available for appropriation
33 by the Legislature to the Wildlife Conservation Board, for expenditure pursuant to
34 the Wildlife Conservation Law of 1947, for the following programs:

35 (a) Forty-one million dollars (\$41,000,000) for the preservation of highly rare
36 examples of the state's natural diversity through the acquisition, enhancement,
37 restoration, or protection, or a combination thereof, of lands supporting
38 California's unique, fragile, threatened, or endangered plants, animals, and natural
39 communities.

(b) Six million dollars (\$6,000,000) for the acquisition, enhancement, restoration, or protection, or a combination thereof, of critical habitat areas for fish, game mammals, and game birds, including, but not limited to, the following types:

- (1) Winter deer ranges.
- (2) Wild trout or steelhead nursery and spawning areas.
- (3) Significant routes of migration for wildlife.
- (4) Breeding, nesting, and forage areas for sage grouse and other upland game birds.

For purposes of this subdivision, “enhancement” includes the construction or development of facilities for furnishing public access to lands or waters open to the public for fishing, hunting, or shooting.

(c) Three million dollars (\$3,000,000) for the acquisition, enhancement, restoration, or protection, or any combination thereof, of lands providing habitat for threatened, endangered, or fully protected species, such as the bald eagle, San Joaquin kit fox, desert tortoise, bighorn sheep, peregrine falcon, and California condor.

Comment. Section 55725 continues former Fish and Game Code Section 2720 without substantive change.

§ 55730. Expenditures

55730. Funds available pursuant to subdivision (a) of Section 55725 shall be expended to acquire, enhance, restore, or protect lands in California on which any of the following naturally exists:

(a) A unique species or natural community, whose existence at a single location in California is the only known occurrence in the world of that particular species or natural community.

(b) A species that occurs in only 20 or fewer locations in the world, at least one of which is in California.

(c) A natural community that occurs in only 50 or fewer locations in the world, at least one of which is in California.

(d) An assemblage of three or more highly rare species or natural communities, or any combination thereof, of which at least one of the species or natural communities is found only in 20 or fewer locations in the world.

Comment. Section 55730 continues former Fish and Game Code Section 2721 without substantive change.

§ 55735. Priorities

55735. (a) Whenever the application of the criteria specified in Section 55730 results in the identification of two or more parcels of land that are essentially indistinguishable as to their quality, preference shall be given to the parcel on which exists the species that is more threatened or more endangered.

(b) Whenever the application of the criteria specified in Section 55730 results in the identification of two or more parcels of land that are essentially indistinguishable as to their quality and the degree of threat to, or endangerment of, the species existing on them, preference shall be given to the parcel on which exists the best example of the species. As used in this subdivision, “best example” means the parcel of land and the wildlife inhabiting it that, in balancing all the factors present, represents, as determined by the board, the stronger combination of all of the following: the better condition, higher quality, easier defensibility, greater likelihood of long-term viability, and the lesser costs to be incurred by the department in operating and maintaining the parcel.

Comment. Section 55735 continues former Fish and Game Code Section 2722 without substantive change.

§ 55740. Limitations on use of funds

55740. (a) Of the total amount available pursuant to subdivision (a) of Section 55725, not more than five million dollars (\$5,000,000) may be encumbered for any single acquisition project. In enacting this limitation, the people of California recognize that there are a number of important projects meeting the criteria of this title but whose acquisition cost would most likely exceed this limitation. Therefore, in these instances any acquisition cost in excess of this limitation may be met by a donation by the owner, donations of funds from private sources, or other funds from state or nonstate sources.

(b) The qualification for or allocation of a grant or grants to a local agency under Section 55725 shall not preclude eligibility for an additional allocation of grant funds to the same local agency pursuant to Section 55725 of this code or Section 5907 of the Public Resources Code.

Comment. Section 55740 continues former Fish and Game Code Section 2723 without substantive change.

§ 55745. Priorities

55745. (a) In choosing among two or more parcels of land to be acquired, enhanced, restored, or protected with funds available pursuant to subdivision (b) or (c) of Section 55725, preference shall be given to acquiring, enhancing, restoring, or protecting the parcel that will result in the least cost to the department for operating and maintaining the land.

(b) Funds available pursuant to subdivisions (b) and (c) of Section 55725 may be encumbered only for lands that constitute habitat that is subject to destruction, drastic modification, or significant curtailment of habitat values.

Comment. Section 55745 continues former Fish and Game Code Section 2724 without substantive change.

1 **§ 55750. Limitation on use of funds**

2 55750. No funds available pursuant to this title shall be encumbered for any
3 lands that, due to their degraded character, will not sustain plants or wildlife or
4 will not afford protection to a natural community on a long-term basis.

5 **Comment.** Section 55750 continues former Fish and Game Code Section 2725 without
6 substantive change.

7 **§ 55755. Further limitation on use of funds**

8 55755. With respect to any lands that may be acquired, enhanced, restored, or
9 protected with funds under this title and that could also be eligible for funds under
10 Title 3 (commencing with Section 55500), funds under this title shall not be
11 encumbered for those lands until it is determined by the Wildlife Conservation
12 Board that funds are not likely to be available for those lands under Title 3
13 (commencing with Section 55500).

14 **Comment.** Section 55755 continues former Fish and Game Code Section 2726 without
15 substantive change.

16 **§ 55760. Additional limitation on use of funds**

17 55760. No funds available for appropriation under this title may be encumbered
18 for any purpose described in Section 54860.

19 **Comment.** Section 55760 continues former Fish and Game Code Section 2727 without
20 substantive change.

21 **§ 55765. Administrative costs of Wildlife Conservation Board**

22 55765. An annual amount, not to exceed three hundred fifty thousand dollars
23 (\$350,000) may be appropriated from the fund in the 1988–89 through 1998–99
24 fiscal years, in an amount to be determined in each annual appropriation, to the
25 Wildlife Conservation Board for expenditure for costs incurred by the board and
26 the department in administering this title, including, but not limited to,
27 preacquisition studies, planning, appraisals, surveys, and closing costs. The
28 Wildlife Conservation Board and the department may augment, as needed, any
29 amount thus appropriated with any funds appropriated to it from any other source.

30 **Comment.** Section 55765 continues former Fish and Game Code Section 2728 without
31 substantive change.

32 **§ 55770. Staffing**

33 55770. (a) For the purpose of administering this title, the Wildlife Conservation
34 Board and the department shall augment its existing staff, whenever possible, by
35 contracting for those services necessary for the administration of this title. Any
36 contract shall, however, be entered into only pursuant to Sections 19130 to 19132,
37 inclusive, of the Government Code and shall be only for the minimum period
38 necessary for completion of the particular project or projects for which the
39 contract was entered into.

(b) Due to the limited duration of the program authorized by this title, in the event some services cannot be provided by contract, any personnel directly hired by the Wildlife Conservation Board for the administration of this title shall be hired, to the extent permitted by Article 2 (commencing with Section 19080) of Chapter 5 of Part 2 of Division 5 of Title 2 of the Government Code, as limited-term appointments.

Comment. Section 55770 continues former Fish and Game Code Section 2729 without substantive change.

TITLE 5. CALIFORNIA WILDLIFE PROTECTION ACT OF 1990

Note. The California Wildlife Protection Act of 1990 (existing Sections 2780-2799.6) was added by Proposition 117 (1990). The Commission has generally adopted a very deferential approach to the recodification of provisions added by initiative. Consistent with that approach, the Commission has made very minimal changes to the language of this part, mostly relating to section numbering.

The Commission believes that the nonsubstantive continuation of those provisions in the proposed law would not be an impermissible amendment. See discussion of initiative statutes *supra* at notes 20-22 and associated text.

CHAPTER 1. GENERAL PROVISIONS

§ 55800. Findings and declarations

55800. The people of California find and declare all of the following:

(a) Protection, enhancement, and restoration of wildlife habitat and fisheries are vital to maintaining the quality of life in California. As the state's human population increases, there is an urgent need to protect the rapidly disappearing wildlife habitats that support California's unique and varied wildlife resources.

(b) Much of the state's most important deer winter ranges have been destroyed in the last 20 years.

(c) Critical winter ranges of migratory deer in the Sierra Nevada and Cascade mountain ranges are increasingly subject to incompatible land uses. In some counties, over 80 percent of the critical winter ranges fall on these lands. The potential for incompatible land uses on these lands is a major threat to the survival of many migratory deer herds.

(d) Deer, mountain lion, and other wildlife habitat within the Sierra Nevada, Cascade, Coast Range (including the Santa Lucia Mountains in Monterey County along the Central Coast), Siskiyou and Klamath Mountains; and the Santa Susana, Simi Hills, Santa Monica, San Gabriel, San Bernardino, San Jacinto, Santa Ana and other mountains and foothill areas within southern California, is disappearing rapidly. Small and often isolated wildlife populations are forced to depend upon these shrinking habitat areas within the heavily urbanizing areas of this state.

1 Corridors of natural habitat must be preserved to maintain the genetic integrity of
2 California's wildlife.

3 (e) This title shall be implemented in the most expeditious manner. All state
4 officials shall implement this title to the fullest extent of their authority in order to
5 preserve, maintain, and enhance California's diverse wildlife heritage and the
6 habitats upon which it depends.

7 **Comment.** Section 55800 continues former Fish and Game Code Section 2780 without
8 substantive change.

9 **§ 55805. Further findings and declarations**

10 55805. (a) The people of California find and declare that wildlife and fisheries
11 conservation is in the public interest and that it is necessary to keep certain lands
12 in open space and natural condition to protect significant environmental values of
13 wildlife and native plant habitat, riparian and wetland areas, native oak woodlands,
14 and other open-space lands, and to provide opportunities for the people of
15 California to appreciate and visit natural environments and enjoy California's
16 unique and varied fish and wildlife resources.

17 (b) It is the intent of the people, in enacting this title, that additional funds are
18 needed to protect fish, wildlife, and native plant resources and that the Legislature
19 should provide those funds through bond acts and other appropriate sources.

20 **Comment.** Section 55805 continues former Fish and Game Code Section 2781 without
21 substantive change.

22 **CHAPTER 2. CALIFORNIA WILDLIFE PROTECTION**

23 **§ 55825. Definitions**

24 55825. The following definitions govern the construction of this title:

25 (a) "Acquisition" includes but is not limited to, gifts, purchases, leases,
26 easements, the exercise of eminent domain if expressly authorized, the transfer or
27 exchange of property for other property of like value, transfers of development
28 rights or credits, and purchases of development rights and other interests.

29 (b) "Board" means the Wildlife Conservation Board.

30 (c) "Fund" means the Habitat Conservation Fund created by Section 55830.

31 (d) "Local agency" means a city, county, city and county, or a district as defined
32 in subdivision (b) of Section 5902 of the Public Resources Code.

33 (e) "Riparian habitat" means lands that contain habitat that grows close to and
34 which depends upon soil moisture from a nearby freshwater source.

35 (f) "Southern California" means the Counties of Imperial, Los Angeles, Orange,
36 Riverside, San Bernardino, San Diego, Santa Barbara, and Ventura.

37 (g) "Wetlands" means lands that may be covered periodically or permanently
38 with shallow water and that include saltwater marshes, freshwater marshes, open
39 or closed brackish water marshes, swamps, mudflats, fens, and vernal pools.

Comment. Section 55825 continues former Fish and Game Code Section 2785 without substantive change.

§ 55830. Habitat Conservation Fund

55830. Except as otherwise expressly provided in paragraph (3) of subdivision (a) of Section 55835, the money in the Habitat Conservation Fund, which is hereby created, shall be used for the following purposes:

(a) The acquisition of habitat, including native oak woodlands, necessary to protect deer and mountain lions.

(b) The acquisition of habitat to protect rare, endangered, threatened, or fully protected species.

(c) The acquisition of habitat to further implement the Habitat Conservation Program pursuant to Chapter 2 (commencing with Section 55725) of Title 4, excepting Section 55735 and subdivision (a) of Section 55740, and Sections 55745 and 55770.

(d) The acquisition, enhancement, or restoration of wetlands.

(e) The acquisition, restoration, or enhancement of aquatic habitat for spawning and rearing of anadromous salmonids and trout resources.

(f) The acquisition, restoration, or enhancement of riparian habitat.

Comment. Section 55830 continues former Fish and Game Code Section 2786 without substantive change.

Note. Existing Section 2786(c) contains an erroneous cross-reference to “Article 2 (commencing with Section 2721).” The reference is erroneous in two ways: (1) The referenced article begins with Section 2720, not Section 2721. (2) The reference is incomplete. It should continue with the words “of Chapter 7.5.” Proposed Section 55830 would correct those errors. **The Commission invites comment on whether those corrections would cause any problems.**

§ 55835. Continuous appropriations

55835. Notwithstanding Section 13340 of the Government Code, the money in the fund is continuously appropriated, without regard to fiscal years, as follows:

(a) To the Department of Parks and Recreation, four million five hundred thousand dollars (\$4,500,000) annually for allocation as follows:

(1) One million five hundred thousand dollars (\$1,500,000) for projects that are located in the Santa Lucia Mountain Range in Monterey County for expenditure by the Department of Parks and Recreation and for grants to the Monterey Peninsula Regional Park District.

(2) One million dollars (\$1,000,000) for acquisitions in, and adjacent to, units of the state park system.

(3) Two million dollars (\$2,000,000) for 50 percent matching grants to local agencies for projects meeting the purposes specified in Section 55830 and, additionally, for the acquisition of wildlife corridors and urban trails, nature interpretation programs, and other programs that bring urban residents into park and wildlife areas. The grants made pursuant to this subdivision are subject to the

1 conditions of subdivision (d) of Section 5910, and Sections 5917 and 5919, of the
2 Public Resources Code, as nearly as may be practicable.

3 (b) To the State Coastal Conservancy, four million dollars (\$4,000,000)
4 annually.

5 (c) To the Santa Monica Mountains Conservancy, five million dollars
6 (\$5,000,000) annually for the next 10 fiscal years, commencing with the 1990–91
7 fiscal year. The money shall be used for the purposes specified in Section 55830
8 for wildlife habitat, and for related open-space projects, within the Santa Monica
9 Mountains Zone, the Rim of the Valley Corridor, and the Santa Clarita
10 Woodlands. Of the total amount appropriated pursuant to this subdivision, not less
11 than a total of ten million dollars (\$10,000,000) shall be spent within the Santa
12 Susana Mountains and the Simi Hills, and not less than a total of ten million
13 dollars (\$10,000,000) shall be spent within the Santa Clarita Woodlands. These
14 funds shall be expended in accordance with Division 23 (commencing with
15 Section 33000) of the Public Resources Code during the operative period of this
16 section as specified in subdivision (f) and in Section 55885. The Legislature may,
17 by statute, extend the period for expenditure of the funds provided by this
18 paragraph.

19 (d) To the California Tahoe Conservancy, five hundred thousand dollars
20 (\$500,000) annually.

21 (e) To the board, the balance of the fund.

22 (f) This section shall become operative on July 1, 1990, and, as of July 1, 2020,
23 is repealed, unless a later enacted statute, which becomes effective on or before
24 July 1, 2020, deletes or extends that date.

25 **Comment.** Section 55835 continues former Fish and Game Code Section 2787 without
26 substantive change.

27 **§ 55840. Continuous appropriations (contingent operation)**

28 55840. (a) Notwithstanding Section 13340 of the Government Code, the money
29 in the fund is continuously appropriated, without regard to fiscal years, to the
30 board.

31 (b) This section shall become operative only if, and on the date that, Section
32 55835 is repealed.

33 **Comment.** Section 55840 continues former Fish and Game Code Section 2788 without
34 substantive change.

35 **§ 55845. Priorities**

36 55845. In areas where habitats are or may become isolated or fragmented,
37 preference shall be given by the agencies expending money from the fund to
38 projects that will serve as corridors linking otherwise separated habitat so that the
39 genetic integrity of wildlife populations will be maintained.

40 **Comment.** Section 55845 continues former Fish and Game Code Section 2789 without
41 substantive change.

1 **§ 55850. Expenditure reporting**

2 55850. Each agency receiving money from the fund pursuant to Section 55835
3 shall report to the board on or before July 1 of each year the amount of money that
4 was expended and the purposes for which the money was expended. The board
5 shall prescribe the information in the agencies reports that it determines is
6 necessary to carry out the requirements of Section 55855.

7 **Comment.** Section 55850 continues former Fish and Game Code Section 2790 without
8 substantive change.

9 **§ 55855. Expenditure conditions**

10 55855. The board shall expend the money appropriated to it from the fund
11 subject to the following conditions:

12 (a) Not more than one and one-half (1½) percent shall be expended for
13 administration of this title.

14 (b) The board shall, to the extent practicable, expend the money in a manner and
15 for projects so that, within each 24-month period, approximately one-third of the
16 total expenditures of the money in the fund, including, until July 1, 2020, the
17 expenditures by the agencies receiving money from the fund pursuant to
18 subdivisions (a) to (d), inclusive, of Section 55835, are expended for the purposes
19 specified in subdivision (a) of Section 55830 and approximately two-thirds of the
20 total expenditures of the money in the fund, including, until July 1, 2020, the
21 expenditures by the agencies receiving money from the fund pursuant to
22 subdivisions (a) to (d), inclusive, of Section 55835, are expended for the purposes
23 specified in subdivisions (b) and (c) of Section 55830.

24 (c) Notwithstanding the requirement for acquisition in subdivisions (a), (b), and
25 (c) of Section 55830, the board shall, to the extent practicable, expend the money
26 in the fund in a manner and for projects so that, within each 24-month period,
27 approximately six million dollars (\$6,000,000) of the money, including, until July
28 1, 2020, the expenditures by the agencies receiving money from the fund pursuant
29 to subdivisions (a) to (d), inclusive, of Section 55835, are expended for the
30 purposes specified in subdivision (d) of Section 55830.

31 (d) Notwithstanding the requirement for acquisition in subdivisions (a), (b), and
32 (c) of Section 55830, the board shall, to the extent practicable, expend the money
33 in the fund in a manner and for projects so that, within each 24-month period,
34 approximately six million dollars (\$6,000,000) of the money, including, until July
35 1, 2020, the expenditures by the agencies receiving money from the fund pursuant
36 to subdivisions (a) to (d), inclusive, of Section 55835, are expended for the
37 purposes specified in subdivision (e) and (f) of Section 55830.

38 (e) To the extent practicable, the board shall expend the money appropriated to it
39 from the fund in a manner and for projects so that, within each 24-month period,
40 approximately one-half of the total expenditures of the money in the fund,
41 including, until July 1, 2020, the expenditures by the agencies receiving money
42 from the fund pursuant to subdivisions (a) to (d), inclusive, of Section 55835, are

1 expended in northern California and approximately one-half in southern
2 California.

3 (f) Subject to the other requirements of this section, the board may allocate not
4 more than two million dollars (\$2,000,000) annually for the purposes of this title
5 to one or more state agencies created by the Legislature or the people that are
6 authorized by other provisions of law to expend funds for the purposes of this title.

7 **Comment.** Section 55855 continues former Fish and Game Code Section 2791 without
8 substantive change.

9 **§ 55860. Inability to make specified expenditures**

10 55860. If any agency designated in Section 55835 ceases to exist, or is otherwise
11 unable to expend the funds appropriated by Section 55835 to that agency for the
12 period specified, the board or its successor agency shall expend the same funds for
13 the same purpose.

14 **Comment.** Section 55860 continues former Fish and Game Code Section 2792 without
15 substantive change.

16 **§ 55865. Use of conservation corps**

17 55865. The board and any other state or local agency that expends any funds
18 appropriated from the fund on environmental enhancement, restoration, or
19 improvement projects shall utilize the services of the California Conservation
20 Corps and local community conservation corps to the extent practicable.

21 **Comment.** Section 55865 continues former Fish and Game Code Section 2793 without
22 substantive change.

23 **§ 55870. Management plan**

24 55870. In implementing this title, the state or local agency that manages lands
25 acquired with funds appropriated from the fund shall prepare, with full public
26 participation, a management plan for lands that have been acquired, which plan
27 shall reasonably reduce possible conflicts with neighboring land use and
28 landowners, including agriculturists. The plans shall comply with the California
29 Environmental Quality Act (Division 21 (commencing with Section 21000) of the
30 Public Resources Code).

31 **Comment.** Section 55870 continues former Fish and Game Code Section 2794 without
32 substantive change.

33 **§ 55875. Unallocated Account in the Cigarette and Tobacco Products Surtax Fund**

34 55875. (a) The Controller shall annually transfer 10 percent of the funds in the
35 Unallocated Account in the Cigarette and Tobacco Products Surtax Fund to the
36 Habitat Conservation Fund.

37 (b) No additional allocation of funds from that account shall be made by the
38 Legislature for purposes of this title or for any other natural resource or
39 environmental protection program.

1 **Comment.** Section 55875 continues former Fish and Game Code Section 2795 without
2 substantive change.

3 **§ 55880. Fund transfers**

4 55880. (a) The Controller shall annually transfer the sum of thirty million
5 dollars (\$30,000,000) from the General Fund to the Habitat Conservation Fund,
6 less any amount transferred to the Habitat Conservation Fund from, but not limited
7 to, the following accounts and funds:

8 (1) The Public Resources Account in the Cigarette and Tobacco Products Surtax
9 Fund to the extent authorized by the Tobacco Tax and Health Protection Act of
10 1988.

11 (2) The Unallocated Account in the Cigarette and Tobacco Products Surtax
12 Fund pursuant to subdivision (a) of Section 55875.

13 (3) The California Environmental License Plate Fund.

14 (4) The Endangered and Rare Fish, Wildlife, and Plant Species Conservation
15 and Enhancement Account in the Fish and Game Preservation Fund.

16 (5) Any other non-General Fund accounts and funds created by the Legislature
17 or the people for purposes that are consistent with the purposes of this act.

18 (6) Any bond funds that are authorized by the people after July 1, 1990, which
19 may be used for purposes that are identical to the purposes specified in Section
20 55830.

21 (7) The Wildlife Restoration Fund.

22 (b) Except for transfers from the Endangered and Rare Fish, Wildlife, and Plant
23 Species Conservation and Enhancement Account, transfers from the Fish and
24 Game Preservation Fund are not transfers for purposes of subdivision (a) and shall
25 not be made to the fund. Transfers of federal, local, or privately donated funds or
26 transfers from the State Coastal Conservancy Fund pursuant to Section 31011 of
27 the Public Resources Code to the fund are not transfers for purposes of subdivision
28 (a).

29 (c) This section does not limit the amount of funds that may be transferred to the
30 fund or that may be expended for fish and wildlife habitat protection either from
31 the fund or from any other sources.

32 (d) This section shall become operative on July 1, 1990, shall become
33 inoperative on June 30, 2020, and, as of January 1, 2021, is repealed, unless a later
34 enacted statute, which becomes effective before January 1, 2021, deletes or
35 extends the dates on which it becomes inoperative and is repealed.

36 **Comment.** Section 55880 continues former Fish and Game Code Section 2796 without
37 substantive change.

38 **§ 55885. Effect of specified provisions**

39 55885. (a) The people find it necessary to acquire, restore, and improve the
40 rapidly disappearing wildlife habitat of southern California in the quickest and
41 most efficient manner possible using existing governmental resources. Therefore,

notwithstanding Section 33216 of the Public Resources Code, Division 23 (commencing with Section 33000) of the Public Resources Code shall continue in effect for the period that funds may be expended pursuant to subdivision (c) of Section 55835.

This subdivision shall not become operative if, prior to June 6, 1990, Section 33216 of the Public Resources Code has been amended to extend the operative effect of that Division 23 to at least July 1, 1995.

(b) If subdivision (a) of this section does not become operative, the controller shall increase the annual transfer of funds pursuant to subdivision (c) of Section 55835 on a pro rata basis so that the total amount available to the Santa Monica Mountains Conservancy for purposes of this title pursuant to that subdivision (c) is fifty million dollars (\$50,000,000). Nothing in this section precludes the Legislature from extending the time for expenditure of funds pursuant to subdivision (c) of Section 55835.

Comment. Section 55885 continues former Fish and Game Code Section 2797 without substantive change.

Note. The second paragraph of existing Section 2797(a) establishes an operation contingency based on whether “prior to June 6, 1990, Section 33216 of the Public Resources Code has been amended to extend the operative effect of that Division 23 to at least July 1, 1995.” That contingency appears to have been satisfied. In 1990, Section 33216 was amended to extend the specified sunset date to July 1, 1995. See 1990 Cal. Stat. ch. 216, § 95. Despite the apparent obsolescence of the operation contingency provision, it has been continued in proposed Section 55885. This avoids any possibility of deleting substantive language that was added by citizen initiative. Section 2797(b) also appears to be obsolete, but is retained for the same reason. **The Commission invites comment on whether this approach would cause any problems.**

§ 55890. Land acquisition law

55890. Acquisitions of real property made pursuant to this title shall be done in compliance with the land acquisition law as existing or as hereafter amended and as it applies to the agencies designated in Section 55835, and in compliance with subdivision (a) of Section 5929 of the Public Resources Code.

Comment. Section 55890 continues former Fish and Game Code Section 2798 without substantive change.

§ 55895. Application of CEQA

55895. Every expenditure made pursuant to this title shall comply with the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

Comment. Section 55895 continues former Fish and Game Code Section 2799 without substantive change.

§ 55900. Public access to acquired lands

55900. Reasonable public access to lands acquired in fee with funds made available pursuant to this title shall be provided except when that access may interfere with habitat protection.

1 **Comment.** Section 55900 continues former Fish and Game Code Section 2799.5 without
2 substantive change.

3 **§ 55905. Reappropriation of transferred funds**

4 55905. Only those amounts of money that are transferred to the fund from the
5 General Fund pursuant to Section 55880 may be reappropriated for purposes of
6 this title by a two-thirds vote of the Legislature.

7 **Comment.** Section 55905 continues former Fish and Game Code Section 2799.6 without
8 substantive change.

9 **TITLE 6. NATIVE SPECIES CONSERVATION**
10 **AND ENHANCEMENT**

11 **CHAPTER 1. GENERAL PROVISIONS**

12 **§ 56000. Short title**

13 56000. This title shall be known and may be cited as the Native Species
14 Conservation and Enhancement Act.

15 **Comment.** Section 56000 continues former Fish and Game Code Section 1750 without
16 substantive change.

17 **§ 56005. Findings and declarations**

18 56005. The Legislature finds and declares all of the following:

19 (a) That it is the policy of this state:

20 (1) To maintain sufficient populations of all species of wildlife and native plants
21 and the habitat necessary to insure their continued existence at the optimum levels
22 possible to insure the policies stated in paragraphs (2), (3), and (4).

23 (2) To provide for the beneficial use and enjoyment of wildlife and native plants
24 by all citizens of the state.

25 (3) To perpetuate native plants and all species of wildlife for their intrinsic and
26 ecological values, as well as for their direct benefits to humans.

27 (4) To provide for aesthetic, educational, and nonappropriative uses of the
28 various wildlife and native plant species.

29 (b) That the conservation and enhancement of wildlife species that are not the
30 object of hunting and native plant species is in the general public interest and it is
31 appropriate that the cost of programs to achieve that conservation and
32 enhancement, including the biological and botanical research necessary thereto,
33 and the diffusion of the information resulting therefrom to the public, be borne to
34 the extent necessary by general public funds.

35 **Comment.** Section 56005 continues former Fish and Game Code Section 1755 without
36 substantive change.

1 **§ 56010. General policy**

2 56010. (a) The policy set forth in this title is in the public interest without regard
3 to the economic value or the lack of economic value of wildlife or native plants.

4 (b) It is the policy of the state to require the recreational users of the state's
5 wildlife resources to support the management of lands managed by the department
6 and the management of wildlife consistent with Section 3465.

7 **Comment.** Section 56010 continues former Fish and Game Code Section 1756 without
8 substantive change.

9 CHAPTER 2. WILDLIFE AREAS

10 **§ 56025. Comment by licensed hunters**

11 56025. (a) The department shall annually provide an opportunity for licensed
12 hunters to comment and make recommendations on the public hunting programs,
13 including anticipated habitat conditions in the hunting areas on Type A and Type
14 B Wildlife Areas, as defined under the commission's regulations, through public
15 meetings or other public outreach.

16 (b) In complying with this section, the department may hold regional meetings
17 on its hunting programs for several different wildlife areas.

18 **Comment.** Section 56025 continues former Fish and Game Code Section 1758 without
19 substantive change.

20 **§ 56030. Areas requiring wildlife area pass or license**

21 56030. (a) The director shall designate those particular areas of land managed by
22 the department at which possession of a valid annual wildlife pass or day use pass
23 shall be required.

24 (b) No designation shall be effective until a management plan for the area has
25 been presented at a public meeting and the plan has been approved by the director.

26 (c) No person shall enter the designated area unless that person possesses an
27 annual wildlife area pass or a day use pass issued pursuant to Section 56080, a
28 valid hunting license issued pursuant to Section 10210, a valid trapping license
29 issued pursuant to Section 11215, or a valid sport fishing license issued pursuant
30 to Section 13100, 13150, or Sections 13200 through 13215, inclusive, or that
31 person is a member of a tour by an organized youth or school group that has been
32 issued a day use pass.

33 (d) Notwithstanding subdivision (b), possession of a license or pass shall not be
34 required of any person who:

35 (1) Is passing through the area on a public right-of-way.

36 (2) Possesses authorization by the commission or the department to conduct
37 scientific or educational research.

38 (3) Is discharging duties in the course of employment, as specified by the
39 department.

1 (4) Possesses written authorization from the department to enter the area for a
2 specific purpose.

3 **Comment.** Section 56030 continues former Fish and Game Code Section 1764 without
4 substantive change.

5 See also Section 6050 (enforcement).

6 CHAPTER 3. NATIVE SPECIES CONSERVATION AND ENHANCEMENT
7 ACCOUNT

8 **§ 56050. Creation of account**

9 56050. The department shall maintain within the Fish and Game Preservation
10 Fund a Native Species Conservation and Enhancement Account, which is hereby
11 created, to permit separate accountability for the receipt and expenditure of
12 moneys derived through donation from persons or organizations for the support of
13 nongame and native plant species conservation and enhancement programs.

14 **Comment.** Section 56050 continues former Fish and Game Code Section 1760 without
15 substantive change.

16 **§ 56055. Deposit of funds**

17 56055. Whenever the department receives funds from persons or organizations
18 for the support of nongame and native plant species conservation and
19 enhancement programs, those funds shall be deposited in the Fish and Game
20 Preservation Fund and credited to the Native Species Conservation and
21 Enhancement Account.

22 **Comment.** Section 56055 continues former Fish and Game Code Section 1761 without
23 substantive change.

24 **§ 56060. Donor appreciation**

25 56060. (a) The department shall provide each person or organization making a
26 contribution of five dollars (\$5) or more for the support of nongame and native
27 plant species conservation and enhancement programs a suitably prepared
28 certificate, decal, medallion, or other object of public appreciation signifying the
29 interest of the person or organization in the conservation and enhancement of
30 native plant and wildlife species.

31 (b) The commission shall approve the form, nature, and content of any
32 certificate, decal, medallion or other object proposed for use by the department
33 pursuant to this section.

34 **Comment.** Section 56060 continues former Fish and Game Code Section 1762 without
35 substantive change.

36 **§ 56065. Encouraging donations**

37 56065. (a) The department may take all appropriate measures to encourage
38 donations by individuals, organizations, and public agencies to the Native Species
39 Conservation and Enhancement Account, including, but not limited to, public

1 information concerning the status of native plant and wildlife species threatened
2 by the activities of man.

3 (b) The cost to the department to carry out the provisions of this section may be
4 charged to the Native Species Conservation and Enhancement Account.

5 **Comment.** Section 56065 continues former Fish and Game Code Section 1763 without
6 substantive change.

7 **§ 56070. Deposit of fee revenue**

8 56070. (a) The revenues from fees and sales under this chapter and Section 3210
9 shall be deposited in the Native Species Conservation and Enhancement Account
10 in the Fish and Game Preservation Fund, and shall be available for appropriation
11 for expenditure in the 1988–89 and subsequent fiscal years in the following order
12 of priority:

13 (1) Repayment of any loan to the account from the Fish and Game Preservation
14 Fund. The amounts repaid annually shall be prorated to complete the repayment
15 with interest on or before July 1, 1993. Interest shall be calculated at the rate
16 earned by the Surplus Money Investment Fund from the date funds for the loan
17 were advanced to the date of repayment.

18 (2) The costs of ongoing wildlife management programs incurred at any lands
19 managed by the department alone or cooperatively with other governmental
20 agencies, irrespective of their designation pursuant to Section 56030, that are not
21 adequately funded under Section 58000 or 58010.

22 (3) The costs of natural history education and recreational programs and
23 improvements at areas designated pursuant to Section 56030.

24 (4) Augmentation of wildlife management programs and acquisition of
25 additional lands at areas designated pursuant to Section 56030.

26 (b) Revenues from fees and sales under this chapter and Section 3210 shall be
27 used to augment and not to replace money appropriated from existing funds
28 available to the department for the purposes specified in subdivision (a).

29 **Comment.** Section 56070 continues former Fish and Game Code Section 1767.5 without
30 substantive change.

31 **§ 56075. Legislative finding and declaration**

32 56075. The Legislature finds and declares that the revenues from fees and sales
33 under this chapter are related to the protection and propagation of fish and game
34 within the meaning of Section 9 of Article XVI of the California Constitution.

35 **Comment.** Section 56075 continues former Fish and Game Code Section 1768 without
36 substantive change.

37 **§ 56080. Wildlife area pass**

38 56080. (a) The department may issue an annual wildlife area pass or a day use
39 pass that authorizes the bearer to enter and use facilities and programs on the

1 department managed lands subject to Section 56030 for the period of a calendar
2 year or, if issued after the beginning of the year, for the remainder thereof.

3 (b) The fee for the annual wildlife area pass is ten dollars (\$10). The fee for the
4 day use pass is two dollars (\$2).

5 (c) The fees shall be adjusted in the calendar years following 1989 in accordance
6 with Section 3755.

7 (d) The following persons are exempt from the payment of fees under this
8 section for an annual wildlife area pass or a day use pass:

9 (1) A person under the age of 16 years.

10 (2) A tour by an organized youth or school group.

11 (e) Any person eligible for a reduced fee or free sportfishing license pursuant to
12 Section 13150 or Sections 13200 through 13215, inclusive, shall be issued an
13 annual wildlife area pass upon application therefor and under the same conditions
14 and for the same fee as provided in those sections.

15 (f) There shall be appropriated in the annual Budget Act from the General Fund,
16 for transfer to the Native Species Conservation and Enhancement Account, a sum
17 equal to two dollars (\$2) for each free annual wildlife area pass issued pursuant to
18 subdivision (e) during the preceding calendar year.

19 **Comment.** Section 56080 continues former Fish and Game Code Section 1765 without
20 substantive change.

21 **§ 56085. Native species stamp**

22 56085. The department may also offer for sale a native species stamp,
23 promotional materials, and nature study aids. The fee for a native species stamp is
24 seven dollars and fifty cents (\$7.50), as adjusted in the calendar years following
25 1989 in accordance with Section 3755.

26 **Comment.** Section 56085 continues former Fish and Game Code Section 1766 without
27 substantive change.

28 **§ 56090. Promotional activity**

29 56090. (a) The department may take all appropriate measures to encourage
30 persons to obtain annual wildlife area passes and day use passes issued pursuant to
31 Section 56080, and to promote the sale of native species stamps, promotional
32 materials, and nature study aids to provide revenue for the support of the
33 department.

34 (b) The measures may include, but are not limited to, the dissemination of public
35 information concerning the status of wildlife, fish, and plant species, conservation
36 activities of the department, and programs and facilities provided by the
37 department for the enjoyment of the lands managed by the department.

38 **Comment.** Section 56090 continues former Fish and Game Code Section 1769 without
39 substantive change.

CHAPTER 4. ENDANGERED AND RARE FISH, WILDLIFE, AND PLANT
SPECIES CONSERVATION AND ENHANCEMENT ACCOUNT

§ 56100. Creation of account

56100. The department shall maintain within the Fish and Game Preservation Fund an Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account which is hereby created.

Comment. Section 56100 continues former Fish and Game Code Section 1770 without substantive change.

§ 56105. Deposit of funds

56105. (a) Whenever the department receives funds from the Treasurer under Article 7 (commencing with Section 18520) of Chapter 17 of Part 10 of Division 2 of the Revenue and Taxation Code for the support of this chapter, the funds shall be deposited in the Fish and Game Preservation Fund and credited to the Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account.

(b) These funds are for the support of programs for endangered and rare animals and native plant species as determined by the commission, related conservation and enhancement programs, and programs for those species that may be candidates for determination as endangered or rare under the criteria developed by the commission.

(c) The administrative overhead assessment on that portion of funds deposited in the Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account expended through contracts shall not exceed 15 percent.

Comment. Section 56105 continues former Fish and Game Code Section 1771 without substantive change.

Note. Existing Section 1771 refers to “Article 7 (commencing with Section 18520) of Chapter 17 of Part 10 of Division 2.” There is no such article, chapter, or section. **The Commission invites comment on how to correct this erroneous cross-reference.**

§ 56110. Encouraging donations

56110. (a) The department may take all appropriate measures to encourage donations to this account through the tax return checkoff system provided for in Article 7 (commencing with Section 18520) of Chapter 17 of Part 10 of Division 2 of the Revenue and Taxation Code.

(b) The department may also disseminate information to the public concerning the status of endangered and rare species. The cost to the department to carry out the provisions of this section may be charged to this account.

Comment. Section 56110 continues former Fish and Game Code Section 1772 without substantive change.

Note. Existing Section 1772 refers to “Article 7 (commencing with Section 18520) of Chapter 17 of Part 10 of Division 2.” There is no such article, chapter, or section. **The Commission invites comment on how to correct this erroneous cross-reference.**

CHAPTER 5. NATIVE CALIFORNIA WILDLIFE REHABILITATION

VOLUNTARY TAX CONTRIBUTION FUND

§ 56150. Maintenance of fund

56150. The department shall maintain the Native California Wildlife Rehabilitation Voluntary Tax Contribution Fund established pursuant to Section 18749.1 of the Revenue and Taxation Code.

Comment. Section 56150 continues former Fish and Game Code Section 1773 without substantive change.

§ 56155. Competitive grant program

56155. (a) The funds deposited in the Native California Wildlife Rehabilitation Voluntary Tax Contribution Fund pursuant to Article 5.2 (commencing with Section 18749) of Chapter 3 of Part 10.2 of Division 2 of the Revenue and Taxation Code are for the support of a competitive grant program to be established by the department for the purposes of the recovery and rehabilitation of injured, sick, or orphaned wildlife, and conservation education.

(b) A maximum of 5 percent of the funds allocated to the department may be used to defray the administrative expenses associated with administering the Native California Wildlife Rehabilitation Voluntary Tax Contribution Fund.

Comment. Section 56155 continues former Fish and Game Code Section 1773.1 without substantive change.

§ 56160. Grant requirements

56160. To be eligible for grant funding from the competitive grant program established pursuant to Section 56155, an applicant shall meet all of the following criteria:

(a) The applicant shall provide proof that it is a nonprofit organization that operates a wildlife rehabilitation facility permitted pursuant to Section 679 of Title 14 of the California Code of Regulations.

(b) The applicant shall be in compliance with all conditions of its Wildlife Rehabilitation Memorandum of Understanding.

(c) The applicant shall maintain active participation in the wildlife rehabilitation medical database.

Comment. Section 56160 continues former Fish and Game Code Section 1773.2 without substantive change.

1 TITLE 7. SHARED HABITAT ALLIANCE FOR
2 RECREATIONAL ENHANCEMENT PROGRAM

3 CHAPTER 1. GENERAL PROVISIONS

4 § 56200. Legislative intent

5 56200. (a) In establishing the Shared Habitat Alliance for Recreational
6 Enhancement (“SHARE”) program, it is the intent of the Legislature to encourage
7 private landowners to voluntarily make their land available to the public for
8 wildlife-dependent recreational activities.

9 (b) The Legislature further encourages private landowners to use any funds
10 received from the SHARE program for wildlife conservation purposes on their
11 property.

12 (c) The SHARE program shall be a collaborative effort by all participants to
13 facilitate wildlife-dependent recreational activities on private land at minimal
14 expense to the state.

15 (d) The Legislature declares that interested nongovernmental organizations are
16 the key to developing, planning, and implementing the SHARE program.

17 **Comment.** Section 56200 continues former Fish and Game Code Section 1570 without
18 substantive change.

19 § 56205. Definitions

20 56205. For purposes of this title, the following definitions apply:

21 (a) “Agreement” includes, but is not limited to, a contract, license, easement,
22 memorandum of understanding, or lease.

23 (b) “Partnership” means a collaborative effort involving financial or in-kind
24 contributions by nongovernmental organizations, the department, and other
25 interested parties working in concert to achieve the goals of the program.

26 (c) “Private landowner” means an owner of any possessory interest in real
27 property that is suitable for use for wildlife-dependent recreational activities.

28 (d) “Program” means the SHARE program established under this title.

29 (e) “Wildlife-dependent recreational activities” means hunting, fishing, wildlife
30 observation, conservation education, and related outdoor activities through means
31 that are consistent with applicable law.

32 **Comment.** Section 56205 continues former Fish and Game Code Section 1571 without
33 substantive change.

34 CHAPTER 2. PROGRAM ADMINISTRATION

35 § 56225. Program established

36 56225. There is hereby established the Shared Habitat Alliance for Recreational
37 Enhancement (SHARE) program.

1 **Comment.** Section 56225 continues the first sentence of former Fish and Game Code Section
2 1572(a) without substantive change.

3 **§ 56230. Implementation**

4 56230. The department, in partnership with nonprofit conservation groups and
5 other interested nongovernmental organizations that seek to increase and enhance
6 wildlife-dependent recreational opportunities, shall work cooperatively to
7 implement the program in order to facilitate public access to private lands in a
8 voluntary and incentive-based manner.

9 **Comment.** Section 56230 continues the second sentence of former Fish and Game Code
10 Section 1572(a) without substantive change.

11 **§ 56235. Priorities**

12 56235. In determining which lands may be included in the program, the
13 department shall give priority to those lands with the greatest wildlife habitat
14 value. To the extent possible, the department shall also include in the program
15 private lands that permit multiple wildlife-dependent recreational activities, in
16 order to take into consideration the participation of the general public in the
17 program.

18 **Comment.** Section 56235 continues former Fish and Game Code Section 1573(g) without
19 substantive change.

20 **§ 56240. Grants and agreements**

21 56240. The department may make grants to, or enter into agreements with,
22 nonprofit organizations, governmental entities, or any other entities for the use of
23 the funds described in Section 56255 when the department finds that the
24 agreements are necessary for carrying out the purposes of this title.

25 **Comment.** Section 56240 continues former Fish and Game Code Section 1572(d) without
26 substantive change.

27 **§ 56245. Landowner agreements**

28 56245. (a) The department may enter into a voluntary agreement with a private
29 landowner, including an agreement under which the private landowner is
30 compensated by the department for public use of the land, to provide public access
31 for wildlife-dependent recreational activities. Any financial compensation offered
32 to a private landowner pursuant to this subdivision shall not exceed thirty dollars
33 (\$30) per acre, or fifty dollars (\$50) per public participant per day, and shall be
34 commensurate with the quality of the wildlife-dependent recreational opportunities
35 that are to be provided on the property.

36 (b) The department also may enter into a voluntary agreement with a private
37 landowner to facilitate access to adjacent public lands or waters, upon approval of
38 the governmental entity that holds title to the land. This title does not authorize a
39 private landowner to exclude persons not participating in the SHARE program
40 from using public land for wildlife-dependent recreational activities.

1 (c) The department may enter into a voluntary agreement with a governmental
2 entity to provide wildlife-dependent recreational opportunities to the public on
3 public lands or waters.

4 **Comment.** Section 56245 continues former Fish and Game Code Section 1573(a) without
5 substantive change.

6 **§ 56250. Limitations on agreements**

7 56250. An agreement executed pursuant to the program shall not authorize the
8 take of nongame species by public participants in the program. An agreement may
9 not authorize a private landowner to transfer a hunting or fishing license, stamp, or
10 tag to another person, unless otherwise authorized by law.

11 **Comment.** Section 56250 continues former Fish and Game Code Section 1573(f) without
12 substantive change.

13 **§ 56255. Modification or cancellation of agreement**

14 56255. Either the department or a private landowner may, in writing, modify or
15 cancel an agreement executed under the program, at any time. Upon cancellation
16 or modification of the agreement by either party, the other party shall be
17 reimbursed for any lost revenues or expenses incurred pursuant to the terms of the
18 original agreement.

19 **Comment.** Section 56255 continues former Fish and Game Code Section 1573(c) without
20 substantive change.

21 **§ 56260. Landowner protections and remedies**

22 56260. In addition to any other protection or remedy under law, the protections
23 and remedies afforded to an owner of an estate or any other interest in real
24 property under Section 846 of the Civil Code shall apply to a private landowner,
25 nonprofit organization, or other entity participating in the program.

26 **Comment.** Section 56260 continues former Fish and Game Code Section 1573(d) without
27 substantive change.

28 **§ 56265. Waiver of liability**

29 56265. The department shall require every person who wants to use land that is
30 subject to an agreement pursuant to Section 56245, prior to using that land, to sign
31 a waiver that releases the department or any private group, nonprofit organization,
32 governmental entity, or other organization involved in administering the program,
33 and the private landowner, from liability for any injury or damage that arises from,
34 or is connected with that person's use of the land. Upon request, the department
35 shall provide a copy of the waiver to any of the parties to the waiver.

36 **Comment.** Section 56265 continues former Fish and Game Code Section 1573(e) without
37 substantive change.

1 **§ 56270. Regulations**

2 56270. The department shall adopt regulations for the management and control
3 of wildlife-dependent recreational activities on land that is subject to the program.

4 **Comment.** Section 56270 continues the first sentence of former Fish and Game Code Section
5 1572(b) without substantive change.

6 **§ 56275. Enforcement of regulations**

7 56275. The department shall enforce all applicable regulations established by
8 the commission or the department on property that is subject to an agreement
9 executed under the program.

10 **Comment.** Section 56275 continues former Fish and Game Code Section 1574(b) without
11 substantive change.

12 See also Section 6054 (enforcement).

13 **§ 56280. Personal information of landowner**

14 56280. Notwithstanding any other provision of law, the department shall keep
15 confidential and not release to the public any personal identifying information
16 received from a private landowner participating in the program, unless the director
17 determines that release of that information is necessary for the administration of
18 the program.

19 **Comment.** Section 56280 continues former Fish and Game Code Section 1573(b) without
20 substantive change.

21 **§ 56285. Annual reports**

22 56285. The department shall report to the commission annually on the status of
23 the program and maintain data on the types of wildlife-dependent recreational
24 activities preferred by landowners and participants in the program.

25 **Comment.** Section 56285 continues the second sentence of former Fish and Game Code
26 Section 1572(b) without substantive change.

27 **§ 56290. Application of other law**

28 56290. The program is not subject to Part 2 (commencing with Section 10100)
29 of Division 2 of the Public Contract Code, or Article 6 (commencing with Section
30 999) of Chapter 6 of Division 4 of the Military and Veterans Code.

31 **Comment.** Section 56290 continues former Fish and Game Code Section 1572(e) without
32 substantive change.

33 CHAPTER 3. FINANCES

34 **§ 56325. SHARE Account established**

35 56325. The SHARE Account is hereby established in the Fish and Game
36 Preservation Fund. Money deposited in the account from the sources cited in this
37 chapter shall only be used for the purposes set forth in this title.

1 **Comment.** Section 56325 continues former Fish and Game Code Section 1572(c)(1) without
2 substantive change.

3 **§ 56330. Funding**

4 56330. Consistent with existing law, the department may establish and impose
5 user fees, use existing hunting and fishing license stamp or tag fees from the Fish
6 and Game Preservation Fund, or apply for grants, federal funds, or other
7 contributions from other sources to fund the program. General Fund moneys shall
8 not be used for the program.

9 **Comment.** Section 56330 continues former Fish and Game Code Section 1572(c)(2) without
10 substantive change.

11 **§ 56335. Deposit and expenditure**

12 56335. (a) All funding generated pursuant to Section 56330 from grants, federal
13 funds, or other sources, where the person or entity providing the funds specifically
14 designates in writing prior to the time of transmittal of the funds to the department
15 that the funds are intended solely for the purposes of the program, and any user
16 fees assessed by the department specifically for the program, shall be deposited in
17 the SHARE Account in the Fish and Game Preservation Fund.

18 (b) The moneys in the SHARE account, upon appropriation by the Legislature,
19 shall be available for expenditure by the department solely for programs and
20 projects to benefit the program and for the direct costs and administrative
21 overhead incurred solely in carrying out the department's program activities.

22 (c) Funds may also be used for wildlife conservation purposes on lands subject
23 to an agreement under the program.

24 (d) Administrative overhead shall be limited to the reasonable costs associated
25 with the direct administration of the program.

26 (e) The department shall maintain internal accountability necessary to ensure
27 that all restrictions on the expenditure of these funds are met.

28 **Comment.** Section 56335 continues former Fish and Game Code Section 1572(c)(3) without
29 substantive change.

30 **§ 56340. Reimbursement of other persons and entities**

31 56340. The department may reimburse a nonprofit organization, a private
32 landowner, or other entity for its costs related to the implementation of the
33 program.

34 **Comment.** Section 56340 continues former Fish and Game Code Section 1572(f) without
35 substantive change.

1 TITLE 8. ENHANCEMENT AND MANAGEMENT
2 OF FISH AND WILDLIFE AND THEIR HABITAT
3 ON PRIVATE LANDS

4 CHAPTER 1. GENERAL PROVISIONS

5 **§ 56500. Policy**

6 56500. It is the policy of the state actively to ensure the improvement of wildlife
7 habitat on private land in order to encourage the propagation, utilization, and
8 conservation of fish and wildlife resources on those lands now and for the future in
9 cooperation with private landowners. The commission and the department may
10 develop a private wildlife habitat enhancement and management program for the
11 implementation of this title.

12 **Comment.** Section 56500 continues former Fish and Game Code Section 3400 without
13 substantive change.

14 CHAPTER 2. ESTABLISHMENT AND REGULATION

15 **§ 56525. License to operate wildlife habitat enhancement and management area**

16 56525. The commission may authorize the department to issue revocable,
17 nontransferable licenses for the operation of wildlife habitat enhancement and
18 management areas on any private lands it determines are suitable for habitat
19 enhancement, management, utilization, propagation, and conservation of fish and
20 wildlife resources of those lands.

21 **Comment.** Section 56525 continues the first sentence of former Fish and Game Code Section
22 3401(a) without substantive change.

23 See also Section 6052 (revocation for violation of code or regulation).

24 **§ 56530. License application**

25 56530. (a) A license for a wildlife habitat enhancement and management area
26 may be issued to any landholder or combination of landholders upon approval by
27 the commission of an application submitted by the landholder. As used in this title,
28 “landholder” means any person who owns, leases, or has a possessory interest in
29 land.

30 (b) Each license application shall be accompanied by a nonrefundable fee in an
31 amount established by the commission which, in conjunction with the fees
32 collected pursuant to Section 56585, is calculated to meet the department’s actual
33 costs in administering all aspects of the habitat enhancement and management
34 program. The application shall be accompanied by a wildlife habitat enhancement
35 and management plan and any other information about the proposed wildlife
36 habitat enhancement and management area that may be required by the
37 commission.

(c) An application for a license may be submitted by any number of landholders if all parcels to be included in the wildlife habitat enhancement and management area are contiguous and, in combination, are of a size suitable for the management of the species included in the wildlife habitat enhancement and management plan. The landholders shall designate one landholder who shall represent them in all dealings with the commission and the department. The designated landholder shall be responsible for the operation of the wildlife habitat enhancement and management area.

(d) A landholder who does not own the fee to the land may apply for a license pursuant to this title only if the owner signs the application.

Comment. Section 56530 continues former Fish and Game Code Section 3402 without substantive change.

§ 56535. Plan and license

56535. (a) Upon approval of the wildlife habitat enhancement and management plan, the department shall issue a license, which shall be valid for five calendar years, authorizing the taking of those species of fish, game birds, and game mammals designated in the wildlife habitat enhancement and management plan, pursuant to the plan and regulations of the commission for the operation of the wildlife habitat enhancement and management area.

(b) Regulations adopted pursuant to this section may supersede any provision of this code designated by number in the regulation, but shall do so only to the extent specifically provided in the regulation.

Comment. Section 56535 continues former Fish and Game Code Section 3406(a) without substantive change.

 **Note.** Existing Section 3406(a) refers to “regulations adopted pursuant to this section.” That reference to “this section” has been preserved in proposed Section 56535, even though Section 56535 would not continue the entirety of Section 3406. This appears to be appropriate, because subdivision (a) of Section 3406 is the only part of that section that seems to authorize rulemaking. **The Commission invites comment on whether the scope of the reference proposed in Section 56535 would cause any problems.**

§ 56545. Boundary posting

56545. The commission shall require the landowners of a wildlife habitat enhancement and management area to post all or part of its boundaries with public land. The commission may require the owners of a wildlife habitat enhancement and management area to post all or part of its boundaries with private land.

Comment. Section 56545 continues former Fish and Game Code Section 3403 without substantive change.

§ 56550. Review and reporting

56550. (a) The activities conducted pursuant to each wildlife habitat enhancement and management plan shall be reviewed annually by the department and reviewed by the commission at a public hearing.

1 (b) Each licensee shall annually submit information to the department about past
2 activities and the activities intended to be conducted in the succeeding year. Any
3 change to the wildlife habitat enhancement and management plan or the
4 regulations applicable to the wildlife habitat enhancement and management area
5 shall be proposed to the commission by the department or the licensee at the
6 license review hearing.

7 **Comment.** Section 56550 continues former Fish and Game Code Section 3406(c) without
8 substantive change.

9 **§ 56555. Regulations**

10 56555. The commission may adopt regulations necessary for the administration
11 of this title.

12 **Comment.** Section 56555 continues former Fish and Game Code Section 3404(a) without
13 substantive change.

14 **§ 56560. Application of other license and fee requirements**

15 56560. (a) Any landholder who has paid the fee required by this title, has a valid
16 license issued pursuant to this title, and who is conducting activities pursuant to an
17 approved wildlife habitat enhancement and management plan that could be
18 licensed or permitted pursuant to another provision of this code shall be exempt
19 from any requirement to obtain that other license or permit or to pay any other fee.

20 (b) This section shall not be construed to exempt anyone from any requirement
21 pertaining to hunting and sport fishing licenses and stamps.

22 **Comment.** Section 56560 continues former Fish and Game Code Section 3408 without
23 substantive change.

24 **CHAPTER 3. EFFECT**

25 **§ 56575. Public access**

26 56575. Any private lands affected by a habitat enhancement and management
27 plan licensed pursuant to this title shall not be available for use by the general
28 public without the consent of the landholders.

29 **Comment.** Section 56575 continues the second sentence of former Fish and Game Code
30 Section 3401(a) without substantive change.

31 **§ 56580. Public access roads**

32 56580. No public access road shall be closed to the public under this title as a
33 result of licensing a wildlife habitat enhancement and management area or
34 implementing the wildlife habitat enhancement and management plan.

35 **Comment.** Section 56580 continues the third sentence of former Fish and Game Code Section
36 3401(a) without substantive change.

1 **§ 56585. Animal taken in area**

2 56585. (a) The commission may require that any fish, bird, or mammal taken in
3 a wildlife habitat enhancement and management area licensed pursuant to this title
4 be marked for identification with a distinctive tag or seal issued by the department
5 prior to being removed from the area. A deer tag shall be countersigned by a
6 person who is authorized to countersign deer tags pursuant to Section 372 of Title
7 14 of the California Code of Regulations.

8 (b) Any fish, bird, or mammal so identified may be possessed and transported at
9 any time during the period for which the tag or seal is valid.

10 (c) The fees for tags and seals shall be established by the commission in
11 amounts which, in conjunction with fees collected pursuant to Section 56530, are
12 calculated to meet the actual costs incurred by the department in administering all
13 aspects of the habitat enhancement and management program.

14 **Comment.** Section 56585 continues former Fish and Game Code Section 3407 without
15 substantive change.

16  **Note.** Existing Section 3407 refers to “Section 372 of Title 14 of the California Code of
17 Regulations.” There is no such regulation. **The Commission invites comment on how to correct**
18 **this erroneous reference.**

19 **§ 56590. Take of deer**

20 56590. During the first year of operation of a wildlife habitat enhancement and
21 management area under a wildlife habitat enhancement and management plan and,
22 thereafter, until the operator demonstrates habitat enhancement in the area
23 acceptable to the department, no person shall take, and the plan shall not authorize
24 the taking, of deer except during the general open season and consistent with the
25 bag and possession limits for the fish and game district or the zone in which the
26 wildlife habitat enhancement and management area is located.

27 **Comment.** Section 56590 continues former Fish and Game Code Section 3406(b) without
28 substantive change.

29 **§ 56595. Hunting during the rut**

30 56595. The commission shall authorize hunting during the rut only in a wildlife
31 habitat enhancement and management area when that hunting is consistent with
32 the management plans prepared for that area or herd and does not result in an
33 overall negative effect on the deer herd population in that area.

34 **Comment.** Section 56595 continues former Fish and Game Code Section 3401(b) without
35 substantive change.

1 TITLE 9. THE CALIFORNIA WATERFOWL
2 HABITAT PROGRAM

3 § 56700. Contract for conservation of waterfowl and habitat

4 56700. (a) Subject to appropriation pursuant to Section 56740, the director may
5 enter into contracts with nonpublic entities that are owners of record, or with
6 lessees, who have the owners of record execute the contract, of land determined by
7 the director to be important for the conservation of waterfowl.

8 (b) The contract shall enforceably restrict the use of the land for the
9 conservation of waterfowl and their habitat consistent with Section 8 of Article
10 XIII of the California Constitution.

11 **Comment.** Section 56700 continues former Fish and Game Code Section 3460(a) without
12 substantive change.

13 § 56705. Contract term and contents

14 56705. Each contract shall be for an initial term of 10 years and shall include all
15 of the following:

16 (a) The designation of the owner of record and any lessee, and the legal
17 description and the assessor's parcel number of the land subject to the contract.

18 (b) An agreement by the owner and any lessee to restore, enhance, and protect
19 the waterfowl habitat character of the described land and to carry out a waterfowl
20 habitat management plan developed with the department.

21 (c) Specification of the amount and date in each year that the payment is to be
22 made by the department to the owner or lessee, which shall be calculated at the
23 rate or rates that the director determines to be fair and reasonable in consideration
24 of the obligations undertaken by the owner or lessee.

25 (d) A requirement that the owner or lessee do either of the following:

26 (1) Refund to the state all payments received under the contract plus interest at
27 the legal rate, as specified in Section 3289 of the Civil Code, upon the owner's or
28 lessee's violation of the contract, or any extension thereof, if the director
29 determines that the violation warrants termination of the contract and the director
30 terminates the contract.

31 (2) Make refunds or accept payment adjustments that the director determines are
32 appropriate, not to exceed the total amount paid by the state to the owner or lessee
33 in the preceding calendar year plus interest at the legal rate, as specified in Section
34 3289 of the Civil Code, if the director determines that the violation by the owner
35 or lessee does not warrant termination of the contract.

36 (e) A requirement that the department reduce the amount of any payment to the
37 owner or lessee under subdivision (c) by an amount equal to the portion of any
38 payment under the Federal Water Bank Program (16 U.S.C. Sec. 1301 et seq.) that
39 the department determines to be in compensation for the same obligation
40 undertaken by the owner under the water bank program.

(f) A requirement that the department monitor compliance with the management plan or contract with the United States Soil Conservation Service or other appropriate agency, entity, or person to monitor compliance with the management plan, and that the owner or lessee allows access for the monitoring.

(g) Any additional provisions that the director determines are desirable to effectuate the purposes of the program or to facilitate its administration.

Comment. Section 56705 continues former Fish and Game Code Section 3461 without substantive change.

§ 56710. Recordation of contract

56710. (a) Not later than 20 days after the director has entered into a contract pursuant to this division, a copy of the contract particularly describing the subject habitat as required by subdivision (a) of Section 56705 shall be recorded by the department in the office of the county recorder in each county in which any portion of the areas subject to the contract is located. The contract shall be indexed by the recorder in the grantor-grantee index to the name of the owner of record as grantor and to the department as grantee.

(b) Notwithstanding Section 27383 of the Government Code, the department shall pay the fees for recording and indexing the contract, and the department shall deduct the amount paid from the amounts due to the owner under the contract.

Comment. Section 56710 continues former Fish and Game Code Section 3462 without substantive change.

Note. Existing Section 3462 refers to any contract entered into by the director pursuant to “this division.” The division that contains Section 3462 addresses a broad range of subjects relating to “Birds and Mammals.” Because of the breadth of that reference, the Commission wonders if it is erroneously overbroad. In addition to the contracts authorized under the California Waterfowl Habitat Program, the following provisions of the division authorize contracting: Sections 3684, 3686, 3702, 3704.5, 3802, 3851, 3853, 3953, 4154. **The Commission invites comment on whether Section 3462 should apply to all of those sections, this title only, or some other combination of sections?**

§ 56715. Renewal of contract

56715. (a) The contract shall be automatically renewed in the same manner as contracts are renewed and extended, or noticed for nonrenewal, under the Williamson Act (Chapter 7 (commencing with Section 51200) of Division 1 of Title 5 of the Government Code).

(b) Upon the request of the owner or lessee, the director shall reexamine the payment rate for the contract at five-year intervals, considering the then current management costs and, with the concurrence of the owner or lessee, make any needed adjustments in rates for the remainder of the contract term.

Comment. Section 56715 continues former Fish and Game Code Section 3464 without substantive change.

1 **§ 56720. Modification of terms**

2 56720. The director and the owner or lessee may mutually agree to modify the
3 terms and conditions of a contract under this division as the director may
4 determine to be desirable to carry out the purposes of, or to facilitate
5 administration of, the program.

6 **Comment.** Section 56720 continues former Fish and Game Code Section 3466 without
7 substantive change.

8 **Note.** Existing Section 3466 refers to any contract entered into by the director pursuant to
9 “this division.” The division that contains Section 3466 addresses a broad range of subjects
10 relating to “Birds and Mammals.” Because of the breadth of that reference, the Commission
11 wonders if it is erroneously overbroad. In addition to the contracts authorized under the California
12 Waterfowl Habitat Program, the following provisions of the division authorize contracting:
13 Sections 3684, 3686, 3702, 3704.5, 3802, 3851, 3853, 3953, 4154. **The Commission invites**
14 **comment on whether Section 3462 should apply to all of those sections, this title only, or**
15 **some other combination of sections?**

16 **§ 56725. Change in ownership**

17 56725. (a) If during the contract period the owner or lessee is divested of the use
18 of the waterfowl habitat subject to the contract, the owner or lessee shall notify the
19 department concurrent with that divestment. Any unearned payment shall
20 immediately be refunded by the owner or lessee to the department.

21 (b) If the owner or lessee divests himself or herself of the use of the area subject
22 to a contract by sale or otherwise, the person succeeding to that use is subject to all
23 of the terms and conditions of the contract.

24 **Comment.** Section 56725 continues former Fish and Game Code Section 3465 without
25 substantive change.

26 **§ 56730. Priorities**

27 56730. The director shall give priority to contracts that have the greatest
28 potential for restoring, enhancing, and protecting high quality waterfowl habitat,
29 especially that which is subject to destruction, drastic modification, or significant
30 curtailment of habitat values.

31 **Comment.** Section 56730 continues former Fish and Game Code Section 3460(b) without
32 substantive change.

33 **§ 56735. Application of Public Contract Code**

34 56735. Contracts entered into pursuant to Section 56700 are not subject to Part 2
35 (commencing with Section 10100) of Division 2 of the Public Contract Code.

36 **Comment.** Section 56735 continues former Fish and Game Code Section 3460(c) without
37 substantive change.

38 **§ 56740. California Waterfowl Habitat Preservation Account**

39 56740. (a) The California Waterfowl Habitat Preservation Account is hereby
40 created in the Fish and Game Preservation Fund, and the money in the account
41 shall be transferred to the Surplus Money Investment Fund for investment

1 pursuant to Article 4 (commencing with Section 16470) of Chapter 3 of Division 4
2 of Title 2 of the Government Code.

3 (b) The proceeds of the investment deposited in the account shall be available,
4 upon appropriation by the Legislature, for expenditure pursuant to this title.

5 (c) Not more than 7 percent of the money appropriated from the account for
6 expenditure in any fiscal year shall be expended in that fiscal year for
7 administrative costs of the department.

8 **Comment.** Section 56740 continues former Fish and Game Code Section 3467 without
9 substantive change.

10 TITLE 10. SALTON SEA RESTORATION

11 CHAPTER 1. GENERAL PROVISIONS

12 § 56800. Short title

13 56800. (a) This title shall be known and may be cited as the Salton Sea
14 Restoration Act.

15 (b) The state's comprehensive management plan for the Salton Sea, established
16 pursuant to the Governor's directive of May 2015, shall be known, and may be
17 cited, as the John J. Benoit Salton Sea Restoration Plan.

18 **Comment.** Section 56800 continues former Fish and Game Code Section 2930 without
19 substantive change.

20 § 56805. Legislative intent

21 56805. It is the intent of the Legislature that the State of California undertake the
22 restoration of the Salton Sea ecosystem and the permanent protection of the
23 wildlife dependent on that ecosystem.

24 **Comment.** Section 56805 continues former Fish and Game Code Section 2931(a) without
25 substantive change.

26 § 56810. Findings and declarations

27 56810. The Legislature finds and declares all of the following:

28 (a) The Salton Sea is California's largest inland water body with beneficial uses
29 that include fisheries and wildlife habitat and preservation of endangered species,
30 and is a repository for agricultural drainage.

31 (b) The Salton Sea ecosystem is a critical link on the international Pacific
32 Flyway and supports over 400 species of birds.

33 (c) The Salton Sea is threatened by increasing salinity and reduced inflows.
34 Mitigation water inflows ordered by the State Water Resources Control Board in
35 2002 will expire at the end of 2017. Combined, these changes increasingly
36 threaten the unparalleled wildlife resources at the sea, as well as air quality in the
37 region.

1 (d) In cooperation with local governments, nonprofit organizations, private
2 businesses, and the public, the State of California can help protect wildlife habitats
3 and endangered species, improve water and air quality, and enhance recreational
4 opportunities in the region.

5 (e) The State of California and the United States Department of the Interior
6 committed through a memorandum of understanding signed on August 31, 2016,
7 to protect the ecological values of the Salton Sea and to prevent dust emissions
8 from at least 25,000 acres of lakebed exposed by reduced agricultural inflows
9 resulting from the implementation of the Quantification Settlement Agreement.

10 (f) In restoring the Salton Sea, it is the intent of the Legislature to do all of the
11 following:

12 (1) Protect and provide long-term conservation of fish and wildlife that are
13 dependent on the Salton Sea ecosystem.

14 (2) Restore the long-term stable aquatic and shoreline habitat for fish and
15 wildlife that depend on the Salton Sea.

16 (3) Mitigate air quality impacts from restoration projects using the best available
17 technology or best available control measures, as determined by the South Coast
18 Air Quality Management District and the Imperial County Air Pollution Control
19 District.

20 (4) Protect water quality.

21 (5) Maintain the Salton Sea as a vital link along the Pacific Flyway.

22 (6) Preserve local tribal heritage and cultural values associated with the Salton
23 Sea.

24 (7) Minimize noxious odors and other water and air quality problems.

25 (8) Coordinate with local, state, and federal agencies that are responsible for air
26 quality, endangered species, and other environmental mitigation implementation
27 requirements of the Quantification Settlement Agreement.

28 (9) Enhance economic development opportunities that will provide sustainable
29 financial improvements benefiting the local environment and the economic quality
30 of life for communities around the Salton Sea.

31 **Comment.** Section 56810 continues former Fish and Game Code Section 2940 without
32 substantive change.

33 **§ 56815. Definitions**

34 56815. Unless the context requires otherwise, the definitions set forth in this
35 section govern the construction of this title.

36 (a) “Agency” means the Natural Resources Agency.

37 (b) “Habitat mosaics” means two or more proximate habitat types, such as
38 saltwater shoreline abutting riverine deltas and irrigated farmland.

39 (c) “Quantification Settlement Agreement” has the same meaning as defined in
40 subdivision (a) of Section 1 of Chapter 617 of the Statutes of 2002.

41 (d) “Salton Sea Authority” or “authority” means the joint powers authority
42 comprised of the County of Imperial, the County of Riverside, the Imperial

Irrigation District, the Coachella Valley Water District, and the Torres Martinez Desert Cahuilla Indian Tribe.

(e) “Secretary” means the Secretary of the Natural Resources Agency.

(f) “Vector management” means services that eliminate or reduce the risk of illness caused by any organism transporting a pathogen.

Comment. Section 56815 generalizes former Fish and Game Code Section 2941 without substantive change.

Note. Existing Section 2941 applies, by its terms, to Article 2 (commencing with Section 2940) of Chapter 13 of Division 3 of the Fish and Game Code. Proposed Section 56815 would generalize the provision slightly, so that it also applies to Article 1 of Chapter 13. **The Commission invites comment on whether that change would cause any problems.**

§ 56820. Effect of article

56820. (a) Nothing in this title interferes with or prevents the exercise of authority by a public agency to carry out its programs, projects, or responsibilities.

(b) Nothing in this title affects requirements imposed under any other provision of law.

Comment. Section 56820 generalizes former Fish and Game Code Section 2945 without substantive change.

Note. Existing Section 2945 applies, by its terms, to Article 2 (commencing with Section 2940) of Chapter 13 of Division 3 of the Fish and Game Code. Proposed Section 56820 would generalize the provision slightly, so that it also applies to Article 1 of Chapter 13. **The Commission invites comment on whether that change would cause any problems.**

§ 56825. Quantification Settlement Agreement

56825. Nothing in this title shall alter any state responsibility under the Quantification Settlement Agreement or the state’s authority to carry out any responsibility under the Quantification Settlement Agreement.

Comment. Section 56825 generalizes former Fish and Game Code Section 2942(a)(2) without substantive change.

Note. Existing Section 2942 applies, by its terms, to Article 2 (commencing with Section 2940) of Chapter 13 of Division 3 of the Fish and Game Code. Proposed Section 56825 would generalize the provision slightly, so that it also applies to Article 1 of Chapter 13. **The Commission invites comment on whether that change would cause any problems.**

CHAPTER 2. FINANCES

§ 56850. Creation and use of Salton Sea Restoration Fund

56850. (a) There is hereby established the Salton Sea Restoration Fund, which shall be administered by the director.

(b) Money deposited in the fund shall be expended, upon appropriation by the Legislature, for the following purposes:

(1) Environmental and engineering studies related to the restoration of the Salton Sea and the protection of fish and wildlife dependent on the sea.

(2) Implementation of conservation measures necessary to protect the fish and wildlife species dependent on the Salton Sea, including adaptive management measurements pursuant to Article 1 (commencing with Section 63300) of Chapter 4 of Title 3 of Division 17. These conservation measures shall be limited to the Salton Sea and lower Colorado River ecosystems, including the Colorado River Delta.

(3) Implementation of the preferred Salton Sea restoration alternative.

(4) Administrative, technical, and public outreach costs related to the development and selection of the preferred Salton Sea restoration alternative.

Comment. Section 56850 continues former Fish and Game Code Section 2932 without substantive change.

§ 56855. Funds appropriated pursuant to Water Code § 79565

56855. Of the funds appropriated pursuant to Section 79565 of the Water Code, not less than eight million five hundred thousand dollars (\$8,500,000) shall be made available for transfer or direct expenditure for acquisition, grants, or other activities that directly restore the Salton Sea and its transboundary watersheds, consistent with Section 56850.

Comment. Section 56855 continues former Fish and Game Code Section 2932.2 without substantive change.

§ 56860. Deposited funds

56860. (a) Any moneys made available by paragraph (3) of subdivision (b) of Section 75050 of the Public Resources Code and deposited in the Salton Sea Restoration Fund shall be expended, upon appropriation by the Legislature in the annual Budget Act, for a restoration project at the Salton Sea that is consistent with subdivision (b) of Section 56900.

(b)(1) The activities and expenditures authorized by this section shall be limited to funding those activities identified in the Resources Agency report entitled “Salton Sea Ecosystem Restoration Program Preferred Alternative Report and Funding Plan,” and dated May 2007, for completion in the first five years of implementation identified in the report as “Period I.”

(2) The activities specified for completion in Period I include, but are not limited to, a demonstration project, early start habitat, and additional biological, inflow, sediment quality, water quality, and air quality investigations.

(3) For purposes of carrying out these activities and expending the funds made available, the Resources Agency shall act as the lead agency and work cooperatively with designated staff from the Department of Water Resources, the State Air Resources Board, the State Water Resources Control Board, and the department.

(4) The Resources Agency shall remain the lead agency for implementation, in partnership with one or more of its departments, unless and until legislation is

1 enacted on or after January 1, 2009, establishing a new governance structure for
2 restoration of the Salton Sea.

3 (c) This section is not legislative approval or denial of the preferred alternative
4 identified in the Secretary of the Resources Agency's recommendations contained
5 in the "Salton Sea Ecosystem Restoration Program Preferred Alternative Report
6 and Funding Plan," dated May 2007 and submitted to the Legislature.

7 **Comment.** Section 56860 continues former Fish and Game Code Section 2932.3 without
8 substantive change.

9 **§ 56865. Limitation on use of funds**

10 56865. Moneys deposited in the fund created pursuant to Section 56850 shall
11 not be expended for mitigation except for mitigation undertaken by the State of
12 California.

13 **Comment.** Section 56865 continues former Fish and Game Code Section 2932.5 without
14 substantive change.

15 **CHAPTER 3. SALTON SEA RESTORATION**

16 **§ 56900. Preferred alternative**

17 56900. (a) The restoration of the Salton Sea ecosystem shall be based on the
18 preferred alternative developed as a result of the restoration study and alternative
19 selection process described in Article 1 (commencing with Section 63300) of
20 Chapter 4 of Title 3 of Division 17 and using the funds made available in
21 accordance with that section to be deposited in the Salton Sea Restoration Fund
22 and other funds made available by the Legislature and the federal government.

23 (b) The preferred alternative shall provide the maximum feasible attainment of
24 the following objectives:

25 (1) Restoration of long-term stable aquatic and shoreline habitat for the historic
26 levels and diversity of fish and wildlife that depend on the Salton Sea.

27 (2) Elimination of air quality impacts from the restoration projects.

28 (3) Protection of water quality.

29 **Comment.** Section 56900 continues former Fish and Game Code Section 2931(b)-(c) without
30 substantive change.

31 **§ 56905. Salton Sea Species Conservation Habitat Project**

32 56905. The department and the Department of Water Resources shall do all of
33 the following for the Salton Sea Species Conservation Habitat Project:

34 (a) Immediately make available relevant information relating to the factors that
35 influence the cost and size of the alternatives discussed in the environmental
36 impact report or environmental impact statement for the species habitat
37 conservation program.

38 (b) Release all available detail on a final project design immediately, or upon
39 final determination of a least environmentally damaging preferred alternative by

1 the United States Army Corps of Engineers. Details of a final project design shall
2 include location, configuration, size, and cost.

3 (c) Immediately make available project evaluation protocols that include the
4 following principles of adaptive management:

5 (1) Goals and objectives of the project.

6 (2) The project design and an operations plan.

7 (3) A monitoring plan that will include metrics that identify benefits to the
8 species.

9 (4) A performance evaluation based on species population identified through
10 monitoring.

11 (5) A decisionmaking framework to evaluate project performance and guide
12 operations and management changes.

13 **Comment.** Section 56905 continues former Fish and Game Code Section 2942(a)(3)(B)
14 without substantive change.

15 **§ 56910. Secretary responsibilities**

16 56910. The secretary, in consultation and coordination with the authority, shall
17 lead the Salton Sea restoration efforts that shall include all of the following:

18 (a) Early start habitat demonstration projects.

19 (b) Biological investigations relating to the restoration of the Salton Sea.

20 (c) Investigations of water quality, sedimentation, and inflows relating to the
21 restoration of the Salton Sea.

22 (d) Air quality investigations, in consultation and coordination with local and
23 regional air quality agencies, relating to the restoration of the Salton Sea.

24 (e) Geotechnical investigations relating to the restoration of the Salton Sea.

25 (f) Financial assistance grant programs to support restoration activities of local
26 stakeholders.

27 **Comment.** Section 56910 continues former Fish and Game Code Section 2942(a)(1) without
28 substantive change.

29 **§ 56915. Department of Water Resources restoration efforts**

30 56915. To the extent that funding is appropriated to the department for Salton
31 Sea restoration activities, the Department of Water Resources, in coordination and
32 under agreement with the department, may undertake restoration efforts identified
33 in Sections 56905 and 56910.

34 **Comment.** Section 56915 continues former Fish and Game Code Section 2942(a)(3)(A)
35 without substantive change.

36 **§ 56920. Department of Water Resources contracts**

37 56920. The Department of Water Resources may contract with water suppliers
38 to purchase and sell water made available pursuant to Section 1745.02 of the
39 Water Code to achieve the goals of this title.

40 **Comment.** Section 56920 continues former Fish and Game Code Section 2933 without
41 substantive change.

1 **§ 56925. Department of Water Resources design-build procurement authority**

2 56925. Notwithstanding any other law, the Department of Water Resources is
3 authorized to use design-build procurement authority for projects constructed at
4 the Salton Sea in accordance with Article 6 (commencing with Section 10187) of
5 Chapter 1 of Part 2 of Division 2 of the Public Contract Code.

6 **Comment.** Section 56925 continues former Fish and Game Code Section 2942(c) without
7 substantive change.

8 **§ 56930. Feasibility study**

9 56930. The authority may lead a feasibility study, in coordination and under
10 contract with the secretary, to do the following:

11 (a) Investigate access and utility agreements that may contribute to the future
12 funding of restoration activities at the Salton Sea.

13 (b) Analyze all feasible funding sources for restoration program components and
14 activities.

15 (c) Analyze economic development opportunities, including, but not limited to,
16 renewable energy, biofuels, mineral development, and algae production for the
17 purposes of identifying new revenue sources for the Salton Sea restoration efforts.

18 (d) Identify state procurement and royalty sharing opportunities.

19 (e) Review existing long-term plans for restoration of the Salton Sea and
20 recommend to the secretary changes to existing restoration plans. In any review
21 pursuant to this subparagraph, the authority shall consider the impacts of the
22 restoration plan on air quality, fish and wildlife habitat, water quality, and the
23 technical and financial feasibility of the restoration plan and shall consider the
24 impacts on other agencies responsible for air quality, endangered species, and
25 other environmental mitigation requirements for implementation of the
26 Quantification Settlement Agreement.

27 **Comment.** Section 56930 continues former Fish and Game Code Section 2942(b)(1) without
28 substantive change.

29 **§ 56935. Local, publicly derived input**

30 56935. For the purposes of considering local, publicly derived input concerning
31 habitat objectives and actions, types and levels of public access, and integration of
32 air quality management and habitat restoration, the secretary shall seek input from
33 the authority with regard to the following components of restoration of the Salton
34 Sea:

35 (a) Design opportunities and constraints, including the integration of the habitat,
36 public access, and air quality management objectives.

37 (b) Public access and recreational components.

38 (c) Opportunities for economic development.

39 (d) Habitat mosaics and location.

40 (e) Vector management and predator control.

(f) Feasible financial resources to fund all recommended restoration program components.

Comment. Section 56935 continues former Fish and Game Code Section 2943 without substantive change.

§ 56940. Delay prohibited

56940. No evaluation, study, review, or other activity pursuant to this chapter shall delay the planning and implementation of ongoing and planned restoration or mitigation projects, including, but not limited to, the Salton Sea Species Conservation Habitat Project or other measures pursuant to existing state and federal programs and agreements.

Comment. Section 56940 continues former Fish and Game Code Section 2942(b)(2) without substantive change.

§ 56945. Salton Sea ecosystem

56945. For the purpose of the restoration plan, the Salton Sea ecosystem shall include, but is not limited to, the Salton Sea, the agricultural lands surrounding the Salton Sea, and the tributaries and drains within the Imperial and Coachella Valleys that deliver water to the Salton Sea.

Comment. Section 56945 continues former Fish and Game Code Section 2931(d) without substantive change.

§ 56950. Facilities

56950. (a) The construction of facilities to separate fresh water from highly saline water for the purposes of implementing restoration activities pursuant to this title shall not be subject to review, approval, inspection, or any fees associated with implementing Division 3 (commencing with Section 6000) of the Water Code.

(b) No barrier in the Salton Sea within or below the minus 220 foot contour based on the North American Vertical Datum of 1988 shall be considered a dam.

Comment. Section 56950 continues former Fish and Game Code Section 2931.5 without substantive change.

**TITLE 11. INLAND WETLANDS
CONSERVATION PROGRAM**

CHAPTER 1. DEFINITIONS

§ 57000. Application

57000. Unless the context otherwise requires, the definitions in this chapter govern the construction of this title.

Comment. Section 57000 continues former Fish and Game Code Section 1400 without substantive change.

1 **§ 57005. “Fund”**

2 57005. “Fund” means the Inland Wetlands Conservation Fund, created in the
3 Wildlife Restoration Fund by Section 57635.

4 **Comment.** Section 57005 continues former Fish and Game Code Section 1401 without
5 substantive change.

6 **§ 57510. “Board”**

7 57510. “Board” means the Wildlife Conservation Board created by Section
8 54750.

9 **Comment.** Section 57510 continues former Fish and Game Code Section 1402 without
10 substantive change.

11 **§ 57515. “Inland area”**

12 57515. “Inland areas” means the entire area of California except lands under the
13 jurisdiction of the State Coastal Conservancy, lands within the Santa Monica
14 Mountains Zone, as defined in Section 33105 of the Public Resources Code, and
15 lands under the jurisdiction of the California Tahoe Conservancy Agency in the
16 Lake Tahoe region, as defined in Section 66905.5 of the Government Code.

17 **Comment.** Section 57515 continues former Fish and Game Code Section 1403 without
18 substantive change.

19 **§ 57520. “Program”**

20 57520. “Program” means the Inland Wetlands Conservation Program, as
21 provided in this title.

22 **Comment.** Section 57520 continues former Fish and Game Code Section 1404 without
23 substantive change.

24 **§ 57525. “Nonprofit organization”**

25 57525. “Nonprofit organization” means an organization described in subsection
26 (c) of Section 501 of the Internal Revenue Code of the United States (26 U.S.C.
27 501(c)).

28 **Comment.** Section 57525 continues former Fish and Game Code Section 1405 without
29 substantive change.

30 **CHAPTER 2. THE INLAND WETLANDS CONSERVATION PROGRAM**

31 **§ 57550. Creation**

32 57550. The Inland Wetlands Conservation Program is hereby created in the
33 board.

34 **Comment.** Section 57550 continues former Fish and Game Code Section 1410 without
35 substantive change.

36 **§ 57555. Administration**

37 57555. The board shall administer the program.

1 **Comment.** Section 57555 continues the second sentence of former Fish and Game Code
2 Section 1411(a) without substantive change.

3 **§ 57560. Purpose and goal of program**

4 57560. The purpose and goal of the program is to carry out the programs of the
5 Central Valley Habitat Joint Venture.

6 **Comment.** Section 57560 continues former Fish and Game Code Section 1411(c) without
7 substantive change.

8 **§ 57565. Acquisition of interest in land**

9 57565. The board may acquire or accept the gift or dedication of fee title,
10 easements, leases, development rights, or other interests in lands in inland areas
11 necessary to carry out the purposes of this title.

12 **Comment.** Section 57565 continues former Fish and Game Code Section 1413 without
13 substantive change.

14 **§ 57570. Federal surplus land sales**

15 57570. The board shall coordinate its activities in the program with federal
16 surplus land sales in inland areas.

17 **Comment.** Section 57570 continues former Fish and Game Code Section 1414 without
18 substantive change.

19 **§ 57575. Land transactions**

20 57575. (a) Notwithstanding any other provision of law, the board may lease,
21 rent, sell, exchange, or otherwise transfer any land, interest in land, or option
22 acquired pursuant to this title for the purposes of carrying out the program.

23 (b) The proceeds from any lease, rental, sale, exchange, or transfer of land, or
24 any interest therein, or option thereon, shall be deposited in the fund.

25 **Comment.** Section 57575 continues former Fish and Game Code Section 1415 without
26 substantive change.

27 **§ 57580. Grants and loans**

28 57580. (a) The board may make grants or loans to nonprofit organizations, local
29 governmental agencies, and state departments and agencies for the purpose of
30 wetland and associated upland habitat acquisition, restoration, or enhancement in
31 the same manner and subject to the same provisions as prescribed in Section
32 31116 of the Public Resources Code.

33 (b) Proceeds from repayment of any loans and the interest thereon shall be
34 deposited in the fund.

35 **Comment.** Section 57580 continues former Fish and Game Code Section 1416 without
36 substantive change.

1 **§ 57585. Lease of nonwetlands habitat for restoration**

2 57585. (a) The board may lease nonwetlands habitat in need of restoration to
3 nonprofit organizations, local governmental agencies, and state departments and
4 agencies under agreements in which the lessee agrees to restore the wetlands to
5 their highest possible wetland value and maintain the wetlands at that highest
6 possible wetland value.

7 (b) Proceeds from any lease or rental and interest thereon shall be deposited in
8 the fund.

9 **Comment.** Section 57585 continues former Fish and Game Code Section 1417 without
10 substantive change.

11 **§ 57590. Sale of restored habitat**

12 57590. (a) The board may acquire former wetlands and associated upland
13 habitat, restore those areas, and sell the lands, or any interest therein, to private
14 owners, local governmental agencies, and state departments and agencies or
15 exchange them for other land, if an agreement is secured to keep and maintain the
16 lands as wetlands in perpetuity.

17 (b) The agreement shall contain a reversion if the lands sold or exchanged are
18 not maintained as wetlands.

19 (c) The agreement containing the reversion shall be set forth in any conveyance
20 transferring any land, interest in land, or option subject to this section.

21 (d) Proceeds from the sales or exchanges shall be deposited in the fund.

22 **Comment.** Section 57590 continues former Fish and Game Code Section 1418 without
23 substantive change.

24 **§ 57595. Grant and loan preferences**

25 57595. (a) In reviewing any grant or loan application, preference shall be given
26 to projects on wetlands that have a secure source of water or are adjacent to
27 existing wetlands that are protected by public ownership or conservation
28 easements, or both.

29 (b) The board shall give preference to wintering habitat in the central valley.

30 **Comment.** Section 57595 continues former Fish and Game Code Section 1420 without
31 substantive change.

32 **§ 57600. Wetland creation preferences**

33 57600. When creating new wetlands, the board shall give preference to lands
34 most suitable for this purpose due to elevations, existence of levees, proximity to
35 existing wetlands that are protected, and potential sources of water. These
36 potential sources of water are limited to all of the following:

37 (a) Water rights that are attached to the land to be restored including
38 groundwater associated with the property.

39 (b) Water willingly made available for a wetlands conservation project through
40 water conservation.

- 1 (c) Recycled water.
- 2 (d) Undeveloped water supplies of the state.
- 3 (e) Water marketed for wetlands purposes by a willing seller.
- 4 (f) Water otherwise made available for wetlands purposes by private, nonprofit,
- 5 local, and regional entities.

6 **Comment.** Section 57600 continues former Fish and Game Code Section 1421 without
7 substantive change.

8 **§ 57605. Report**

9 57605. On or before January 1, 1992, and every third year thereafter, the board
10 shall prepare and submit a report to the Governor and the Legislature on activities
11 of the board under this title and other activities relating to wetland acquisition by
12 the board. The report shall include, but is not limited to, the following:

13 (a) The status of wetland acquisition, restoration, and enhancement projects in
14 inland areas.

15 (b) The net increase of wetland habitat as a result of projects of the board,
16 including the activities carried out pursuant to the program.

17 **Comment.** Section 57605 continues former Fish and Game Code Section 1422 without
18 substantive change.

19 **CHAPTER 3. FINANCES**

20 **§ 57625. Inland Wetlands Conservation Fund created**

21 57625. The Inland Wetlands Conservation Fund is hereby created in the Wildlife
22 Restoration Fund.

23 **Comment.** Section 57625 continues the first sentence of former Fish and Game Code Section
24 1430 without substantive change.

25 **§ 57630. Deposits**

26 57630. The board shall deposit in the fund all allocations made pursuant to
27 subdivision (f) of Section 55855.

28 **Comment.** Section 57630 continues the first sentence of former Fish and Game Code Section
29 1431 without substantive change.

30 **§ 57635. Use of funds**

31 57635. The money in the Inland Wetlands Conservation Fund shall be solely
32 used to carry out the Inland Wetlands Conservation Program, including the
33 administrative costs of the program.

34 **Comment.** Section 57635 continues the second sentence of former Fish and Game Code
35 Section 1430 without substantive change.

36 **§ 57640. Continuous appropriation**

37 57640. Notwithstanding Section 13340 of the Government Code, the money in
38 the fund is continuously appropriated to the board to carry out this title.

1 **Comment.** Section 57640 continues the second sentence of former Fish and Game Code
2 Section 1431 without substantive change.

3 **§ 57645. Funding**

4 57645. (a) The Inland Wetlands Conservation Program is the program
5 designated for use of the funds allocated pursuant to subdivision (f) of Section
6 55855, as enacted by the California Wildlife Protection Act of 1990.

7 (b) The board is the agency designated for receipt of the funds allocated
8 pursuant to subdivision (f) of Section 55855, as enacted by the California Wildlife
9 Protection Act of 1990.

10 **Comment.** Subdivision (a) of Section 57645 continues the first sentence of former Fish and
11 Game Code Section 1411(a) without substantive change.

12 Subdivision (b) continues former Fish and Game Code Section 1411(b).

13 **§ 57650. Acceptance of financial support**

14 57650. The board may apply for and accept federal grants and receive gifts,
15 donations, subventions, rent, royalties, and other financial support from public and
16 private sources for the purposes of the program.

17 **Comment.** Section 57650 continues former Fish and Game Code Section 1412 without
18 substantive change.

19 **§ 57655. Surplus funds**

20 57655. Any funds remaining after an eligible acquisition, restoration, or
21 enhancement of any project under Chapter 2 (commencing with Section 57550)
22 shall be returned to the board and shall be deposited in the fund.

23 **Comment.** Section 57655 continues former Fish and Game Code Section 1419 without
24 substantive change.

25 **TITLE 12. CALIFORNIA RIPARIAN HABITAT**
26 **CONSERVATION PROGRAM**

27 **CHAPTER 1. GENERAL PROVISIONS**

28 **§ 57700. Short title**

29 57700. This title shall be known and may be cited as the California Riparian
30 Habitat Conservation Act.

31 **Comment.** Section 57700 continues former Fish and Game Code Section 1385 without
32 substantive change.

33 **§ 57705. Findings and declarations**

34 57705. The Legislature finds and declares all of the following:

35 (a) California's rivers, wetlands, and waterways, and the fisheries and wildlife
36 habitat they provide, are valuable and finite resources that benefit the people of the

1 state and are threatened with deterioration or degeneration that may endanger the
2 natural beauty and productivity of these valuable resources.

3 (b) The public interest requires the coordinated protection of rivers and riparian
4 resources in order to maintain an equilibrium between the natural endowment of,
5 and manmade alterations to, California's river environment, and in order to
6 preserve the scenic beauty of these natural resources and the recreational and
7 economic benefits they provide.

8 (c) By virtue of the special conditions and circumstances of the natural ecology,
9 the increasing human populations and needs in the state, and the numerous
10 governmental agencies with an interest in coordinating activities that affect rivers
11 and riparian habitat resources, there is a need for a coordinated state rivers and
12 riparian habitat protection program.

13 **Comment.** Section 57705 continues former Fish and Game Code Section 1386 without
14 substantive change.

15 **§ 57710. Primary concern**

16 57710. The preservation and enhancement of riparian habitat shall be a primary
17 concern of the board and the department, and of all state agencies whose activities
18 impact riparian habitat, including the Department of Conservation, the Department
19 of Parks and Recreation, the Department of Water Resources, the Department of
20 Forestry and Fire Protection, the State Coastal Conservancy, the California
21 Conservation Corps, the California Tahoe Conservancy, the Santa Monica
22 Mountains Conservancy, the California Coastal Commission, the San Francisco
23 Bay Conservation and Development Commission, and the State Lands
24 Commission.

25 **Comment.** Section 57710 continues former Fish and Game Code Section 1389 without
26 substantive change.

27 **CHAPTER 2. ADMINISTRATION**

28 **§ 57725. California Riparian Habitat Conservation Program**

29 57725. (a) The board shall establish and administer, through the department, the
30 California Riparian Habitat Conservation Program pursuant to this title and Title 1
31 (commencing with Section 54700).

32 (b) The purpose and goal of the program is to protect, preserve, and restore
33 riparian habitats throughout the state by the acquisition of interests and rights in
34 real property and waters to the extent deemed necessary to carry out the purposes
35 of the program.

36 **Comment.** Section 57725 continues former Fish and Game Code Section 1387 without
37 substantive change.

1 **§ 57730. Activities**

2 57730. The board, pursuant to this title, shall approve projects to acquire,
3 preserve, restore, and enhance riparian habitat throughout the state, and coordinate
4 its activities undertaken pursuant to this program with other resources protection
5 activities of the board and other state agencies.

6 **Comment.** Section 57730 continues former Fish and Game Code Section 1388 without
7 substantive change.

8 **§ 57735. Department authority**

9 57735. In order to accomplish the objectives of this title, the board may
10 authorize the department to do all of the following:

11 (a) Acquire interests in real property and water rights through gift, purchase,
12 lease, easement, and transfer or exchange of easements, development rights or
13 credits, and other interests in real property.

14 (b) Coordinate its activities under the program with any governmental program
15 for surplus real property sales in the state.

16 (c) Award grants and loans to local public agencies, state agencies, federal
17 agencies, and nonprofit organizations for the purposes of this program.

18 (d) For the purposes of this title, “nonprofit organization” means any private,
19 nonprofit organization that qualifies for exempt status under Section 501(c)(3) of
20 the United States Internal Revenue Code of 1986, and has among its principal
21 charitable purposes the preservation of real property for scientific, historic,
22 educational, recreational, scenic or open-space values, the protection of the natural
23 environment, or the preservation and enhancement of fisheries and wildlife or their
24 habitat.

25 (e) Exercise any authority and comply with requirements contained in Sections
26 54815 and 54845 through 54855, inclusive, as appropriate, to preserve and
27 enhance riparian habitat for purposes of this title.

28 **Comment.** Section 57735 continues former Fish and Game Code Section 1390 without
29 substantive change.

30 **§ 57740. Grants**

31 57740. Grants to nonprofit organizations pursuant to Section 57735 for the
32 acquisition of real property or interests therein shall be subject to all of the
33 following conditions:

34 (a) The purchase price of any interest in real property acquired by the nonprofit
35 organization may not exceed fair market value as established by an appraisal
36 approved by the board.

37 (b) The board approves the terms under which the interest in real property is
38 acquired.

39 (c) The interest in real property acquired pursuant to a grant from the board may
40 not be used as security for any debt to be incurred by the nonprofit organization
41 unless the board approves the transaction.

1 (d) The transfer of real property acquired pursuant to a grant shall be subject to
2 the approval of the board and the execution of an agreement between the board
3 and the transferee sufficient to protect the interest of the State of California.

4 (e) The state shall have a right of entry and power of termination in and over all
5 interests in real property acquired with state funds, which may be exercised if any
6 essential term or condition of the grant is violated.

7 (f) If the existence of the nonprofit organization is terminated for any reason,
8 title to all interest in real property acquired with state funds shall immediately vest
9 in the state. However, prior to that termination, upon approval of the board,
10 another public agency or nonprofit organization may receive title to all or a
11 portion of that interest in real property by recording its acceptance of title in
12 writing. Any deed or other instrument of conveyance whereby real property is
13 being acquired by a nonprofit organization pursuant to this section shall be
14 recorded and shall set forth the executory interest or right of entry on the part of
15 the state.

16 **Comment.** Section 57740 continues former Fish and Game Code Section 1391 without
17 substantive change.

18 TITLE 13. ADOPT A LAKE

19 § 57775. Findings and declarations

20 57775. (a) The Legislature finds and declares that the fish of this state are a
21 vital, renewable resource that provides recreation, outdoor experiences, and food
22 for many of this state's citizens. Therefore, it is in the state's best interests to
23 promote volunteer private rehabilitation and improvement of fisheries, fish habitat,
24 and resources.

25 (b) The Legislature declares it is the policy of this state to encourage
26 cooperation by local, regional, state, and federal governmental agencies with
27 jurisdiction over inland waters with private groups and associations in order to do
28 fish habitat and restoration work. This policy shall be pursued through the
29 implementation of a program known as the "Adopt a Lake Program."

30 **Comment.** Section 57775 continues former Fish and Game Code Section 2003.5 without
31 substantive change.

32 § 57780. Implementation

33 57780. The department may implement the "Adopt a Lake Program" to facilitate
34 private groups' and associations' undertaking volunteer efforts to rehabilitate and
35 improve fisheries, fish habitat, and resources. In implementing this program, the
36 department shall prepare and periodically update a plan for the volunteer efforts to
37 be undertaken. The plan shall be prepared cooperatively by the department, the
38 private group or association, and the public agency with jurisdiction over the
39 inland water to be affected by the plan. The plan shall be consistent with the

management plan and management objectives of the department and the public agency with jurisdiction over the inland water.

Comment. Section 57780 continues former Fish and Game Code Section 2003.6 without substantive change.

TITLE 14. CALIFORNIA WINTER RICE HABITAT INCENTIVE PROGRAM

§ 57790. Definitions

57790. For purposes of this title, “productive agricultural rice lands that are winter-flooded” means a field that has been farmed to rice at least two of the last three growing seasons and is intentionally maintained in a flooded state for at least 70 days between October 15 and March 15, inclusive, of the following year.

Comment. Section 57790 continues former Fish and Game Code Section 3469(f) without substantive change.

Note. Proposed Section 57790 would continue Section 3469(f), which was added by 2018 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57795. Establishment of program

57795. There is established the California Winter Rice Habitat Incentive Program subject to the requirements of this title.

Comment. Section 57795 continues former Fish and Game Code Section 3469(a) without substantive change.

Note. Proposed Section 57795 would continue Section 3469(a), which was added by 2018 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57800. Contracts

57800. (a) Subject to appropriation for purposes of this title, the director may enter into contracts with nonpublic entities that are owners of record, or with lessees who have the owners of record execute the contract, of productive agricultural rice lands that are winter-flooded and that are determined by the director to be important for the conservation of waterfowl. The contract shall enforceably restrict the use of the land for the conservation of waterfowl and their habitat in a manner that allows for the use of the land for rice farming consistent with Section 8 of Article XIII of the California Constitution.

(b) The director shall give priority to contracts that have the greatest potential for restoring, enhancing, and protecting high-quality waterfowl habitat, especially that subject to destruction, drastic modification, or significant curtailment of habitat values. The director may give priority to contracts that provide additional environmental cobenefits, including cobenefits to species such as fish or snakes.

1 **Comment.** Section 57800 continues former Fish and Game Code Section 3469(b)-(c) without
2 substantive change.

3 **Note.** Proposed Section 57800 would continue Section 3469(b)-(c), which was added by
4 2018 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in
5 anticipation of its effect.

6 **§ 57805. Land near military runway or international airport**

7 57805. (a) Before entering into a contract pursuant to this title, if the land
8 proposed to be subject to the contract is located within five miles of a runway on a
9 military base or international airport, the director shall consult with the applicable
10 branch of the United States military or the operator of the international airport, as
11 applicable.

12 (b) The department shall develop guidance and protocols regarding consultation
13 conducted pursuant to subdivision (a) that addresses, at a minimum, notification,
14 participation, and a procedure to request the director to reconsider a decision to
15 enter into a contract pursuant to this title.

16 **Comment.** Section 57805 continues former Fish and Game Code Section 3469(d) without
17 substantive change.

18 **Note.** Proposed Section 57805 would continue Section 3469(d), which was added by 2018
19 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in
20 anticipation of its effect.

21 **§ 57810. Application of Public Contract Code**

22 57810. Contracts entered into pursuant to this title are not subject to Part 2
23 (commencing with Section 10100) of Division 2 of the Public Contract Code.

24 **Comment.** Section 57810 continues former Fish and Game Code Section 3469(e) without
25 substantive change.

26 **Note.** Proposed Section 57810 would continue Section 3469(e), which was added by 2018
27 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in
28 anticipation of its effect.

29 **§ 57820. Term and content of contract**

30 57820. Each contract shall be for an initial term of three years and shall include
31 the following:

32 (a) The designation of the owner of record and any lessee, and the legal
33 description and the assessor's parcel number of the land subject to the contract.

34 (b) An agreement by the owner and any lessee to restore, enhance, and protect
35 the waterfowl habitat character of the described land.

36 (c) Specification of the amount and date in each year that the payment is to be
37 made by the department to the owner or lessee, which shall be calculated at the
38 rate or rates that the director determines to be fair and reasonable in consideration
39 of the obligations undertaken by the owner or lessee.

40 (d) A requirement that the owner or lessee do either of the following:

(1) Refund to the state all payments received under the contract plus interest at the legal rate, as specified in Section 3289 of the Civil Code, upon the owner's or lessee's violation of the contract, or any extension thereof, if the director determines that the violation warrants termination of the contract and the director terminates the contract.

(2) Make refunds or accept payment adjustments that the director determines are appropriate, not to exceed the total amount paid by the state to the owner or lessee in the preceding calendar year plus interest at the legal rate, as specified in Section 3289 of the Civil Code, if the director determines that the violation by the owner or lessee does not warrant termination of the contract.

(e) A requirement that the department reduce the amount of any payment to the owner or lessee under subdivision (c) by an amount equal to the portion of any payment under the federal Water Bank Program (16 U.S.C. Sec. 1301 et seq.) that the department determines to be in compensation for the same obligation undertaken by the owner under the water bank program.

(f) In addition to subdivision (e), a requirement that the department reduce the amount of any payment to the owner or lessee under subdivision (c) by an amount equal to the portion of any payment that the department determines to be in compensation for the same obligation undertaken by the owner under any other governmental program.

(g) An authorization for the department to monitor compliance with the contract with the federal Natural Resources Conservation Service, a county agricultural commissioner, or other appropriate agency, entity, or person to monitor compliance with the contract, and a requirement that the owner or lessee allow access for the monitoring.

(h) Any additional provisions that the director determines are desirable to effectuate the purposes of the program or to facilitate its administration.

Comment. Section 57820 continues former Fish and Game Code Section 3469.2 without substantive change.

 **Note.** Proposed Section 57820 would continue Section 3469.2, which was added by 2018 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

57825. Loss of property use

57825. If during the contract period the owner or lessee is divested of the use of the waterfowl habitat subject to the contract, the owner or lessee shall notify the department concurrent with that divestment. Any unearned payment shall immediately be refunded by the owner or lessee to the department.

Comment. Section 57825 continues former Fish and Game Code Section 3469.4 without substantive change.

 **Note.** Proposed Section 57825 would continue Section 3469.4, which was added by 2018 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

1 **§ 57830. Modification of contract**

2 57830. The director and the owner or lessee may mutually agree to modify the
3 terms and conditions of a contract under this title as the director may determine to
4 be desirable to carry out the purposes of, or to facilitate administration of, the
5 program.

6 **Comment.** Section 57830 continues former Fish and Game Code Section 3469.6 without
7 substantive change.

8 **Note.** Proposed Section 57830 would continue Section 3469.6, which was added by 2018
9 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in
10 anticipation of its effect.

11 **§ 57835. California Winter Rice Habitat Incentive Program Account**

12 57835. (a) The California Winter Rice Habitat Incentive Program Account is
13 hereby created in the Fish and Game Preservation Fund.

14 (b) Funds deposited in the California Winter Rice Habitat Incentive Program
15 Account shall be made available for expenditure, upon appropriation by the
16 Legislature, to the department. These funds shall be expended solely for the
17 purposes set forth in this title.

18 (c) An amount that equals not more than 5 percent of the funds allocated for this
19 program may be used to pay the administrative costs of the program and up to 10
20 percent of funds allocated may be used for planning and monitoring necessary to
21 ensure the success of the program.

22 **Comment.** Section 57835 continues former Fish and Game Code Section 3469.8 without
23 substantive change.

24 **Note.** Proposed Section 57835 would continue Section 3469.8, which was added by 2018
25 Cal. Stat. ch. 649. Although that bill will not take effect until 2019, it is included here in
26 anticipation of its effect.

27 **TITLE 15. NESTING BIRD HABITAT**
28 **INCENTIVE PROGRAM**

29 **§ 57850. Definition**

30 57850. As used in this title, “program” means the Nesting Bird Habitat Incentive
31 Program.

32 **Comment.** Section 57850 is new. It is added for drafting convenience.

33 **§ 57855. Establishment of program**

34 57855. (a) The department shall establish the Nesting Bird Habitat Incentive
35 Program, which may include direct payments or other incentives, to encourage
36 landowners to voluntarily cultivate or retain upland cover crops or other upland
37 vegetation on idled lands to provide waterfowl, upland game bird, and other
38 wildlife habitat cover, including, but not limited to, for the purposes described in
39 Section 1018 of the Water Code.

(b) The program may also include agricultural lands not subject to water transfers or lands fallowed for any other legal purpose.

(c) Landowners who take voluntary action to cultivate or retain irrigated or nonirrigated cover crops, natural vegetation, or other wildlife habitat on lands fallowed pursuant to the goals of the Sustainable Groundwater Management Act (Part 2.74 (commencing with Section 10720) of Division 6 of the Water Code) shall also be eligible to participate in the program described in subdivision (a).

Comment. Subdivision (a) of Section 57855 continues former Fish and Game Code Section 3480(a) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 3480(e) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 3480(g) without substantive change.

Note. Proposed Section 57855 would continue Section 3480(a), (e) & (g), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57860. Purpose of program

57860. The program is established for waterfowl and other game bird breeding purposes and shall not be used to provide waterfowl wintering habitat, including managed wetland habitat, as defined in paragraph (1) of subdivision (a) of Section 60685.

Comment. Section 57860 continues former Fish and Game Code Section 3480(h) without substantive change.

Note. Proposed Section 57860 would continue Section 3480(h), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57865. Requirements

57865. This title shall be implemented only if either of the following occur:

(1) The Water Supply and Water Quality Act of 2018 (Division 38 (commencing with Section 86000) of the Water Code) is approved by the voters at the November 6, 2018, statewide general election.

(2) A sufficient amount of federal grants or other funds are secured, as determined by the department, for the purposes of this title.

Comment. Section 57865 continues former Fish and Game Code Section 3580(i) without substantive change.

Note. Proposed Section 57865 would continue Section 3480(i), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57870. Program guidelines and criteria

57870. The department may develop guidelines and criteria for the program established under subdivision (a) of Section 57855 as it deems appropriate, but

shall ensure that it is flexible enough to meet landowner needs. The program shall do all of the following:

(a) Prohibit a landowner who participates in the program and has committed to leaving the established upland cover crops or other upland vegetation in place after April 1 from engaging in practices such as disking, spraying of herbicides, mowing, chipping, or rolling any vegetation on those idled lands until after July 1, or as late as possible each year, to address waterfowl nesting, upland game bird habitat, and other wildlife needs.

(b) Give priority to contracts with landowners that do both of the following:

(1) Include lands adjacent to, or in proximity to, waterfowl brood habitat, including, but not limited to, areas flooded during the spring or summer for the cultivation of rice.

(2) Establish upland nesting cover over multiple years.

(c) Be consistent with waterfowl habitat breeding goals and objectives of the Central Valley Joint Venture Implementation Plan as it may be amended.

(d) Allow for one year or multiyear contracts with landowners.

(e) Allow for the rotation of fallowed fields to different areas of a landowner's property on an annual basis.

(f) Prohibit, in connection with the approval of a transfer, a landowner who participates in the program from diverting or using any water under any basis of right to irrigate land idled in order to provide water for transfer, unless the transfer is approved by the State Water Resources Control Board pursuant to Part 2 (commencing with Section 1200) of Division 2 of the Water Code, or by the Department of Water Resources pursuant to Article 4 (commencing with Section 1810) of Chapter 11 of Part 2 of Division 2 of the Water Code, and the irrigation of the idled land is expressly authorized under that approval.

(h) Allow for activities undertaken or requested by mosquito control agencies to address mosquito production.

Comment. Section 57870 continues former Fish and Game Code Section 3480(b) without substantive change.

Note. Proposed Section 57870 would continue Section 3480(b), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57875. Funding

57875. The program may be supported with state or federal grants, state bond moneys, and private grants and donations. Funds may also be used as a state match for related federal conservation programs that provide waterfowl and upland game bird breeding habitat benefits.

Comment. Section 57875 continues former Fish and Game Code Section 3480(c) without substantive change.

Note. Proposed Section 57875 would continue Section 3480(c), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57880. Relation to California Waterfowl Habitat Program

57880. The department may utilize the assistance of the California Waterfowl Habitat Program in implementing the Nesting Bird Habitat Incentive Program, including, but not limited to, establishing program priorities, contract requirements, and monitoring and compliance activities. Nonprofit conservation organizations may also assist in the implementation and delivery of the program to the extent that the department deems appropriate.

Comment. Section 57880 continues former Fish and Game Code Section 3480(d) without substantive change.

Note. Proposed Section 57880 would continue Section 3480(d), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 57885. Consultation with other entities

57885. The department may consult with the Wildlife Conservation Board, the United States Fish and Wildlife Service, the Natural Resources Conservation Service, and nonprofit waterfowl and upland game bird organizations before implementing this section to determine the optimal ways to increase and enhance waterfowl and upland game bird breeding habitat on idled lands.

Comment. Section 57885 continues former Fish and Game Code Section 3480(f) without substantive change.

Note. Proposed Section 57885 would continue Section 3480(f), which was added by 2018 Cal. Stat. ch. 588. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

PART 3. FINANCES

**TITLE 1. FEDERAL AID IN WILDLIFE
RESTORATION ACT**

§ 58000. Expenditures

58000. The expenditure of all federal grant moneys made available to the state pursuant to the Federal Aid in Wildlife Restoration Act (16 U.S.C. Sec. 669 et seq.) shall be consistent with that act.

Comment. Section 58000 continues former Fish and Game Code Section 711.1(a) without substantive change.

1 **§ 58005. Application for grant money**

2 58005. In applying for federal grant moneys available pursuant to the Federal
3 Aid in Wildlife Restoration Act, the department shall give priority to projects that
4 fulfill one or more of the following purposes:

5 (a) Management of the department's wildlife areas or other lands open to the
6 public for hunting and other public priority uses listed in subdivision (b) of
7 Section 2015.

8 (b) Conservation of, or scientific research concerning, wildlife or wildlife
9 habitat.

10 (c) Support of the department's hunting-related programs, including hunter
11 education, public access, and target shooting.

12 **Comment.** Section 58005 continues former Fish and Game Code Section 711.1(b) without
13 substantive change.

14 **§ 58010. Description of funded projects and programs**

15 58010. The department shall post a brief description of projects or programs
16 funded by moneys received pursuant to the Federal Aid in Wildlife Restoration
17 Act on its Internet Web site. The description shall include information about the
18 budget of each project or program.

19 **Comment.** Section 58010 continues former Fish and Game Code Section 711.1(c) without
20 substantive change.

21 **§ 58015. Consultation with advisory committees**

22 58015. The department shall consult with any of the advisory committees
23 established pursuant to Sections 29540, 30565, and 31915 regarding all projects
24 funded by the Federal Aid in Wildlife Restoration Act that are relevant to the
25 committee or committees.

26 **Comment.** Section 58015 continues former Fish and Game Code Section 711.1(d) without
27 substantive change.

28  **Note.** Existing Section 711.1(d) refers to “advisory committees established pursuant to
29 Sections 3684, 3702.1, and 3953.” Proposed Section 58015 would narrow that reference to refer
30 only to the parts of those sections that authorize the establishment of advisory committees. **The**
31 **Commission invites Comment on whether that revision would cause any problems.**

32 **TITLE 2. FISH AND GAME MITIGATION AND**
33 **PROTECTION ACCOUNTS**

34 **§ 58050. Establishment of Accounts**

35 58050. There are hereby established, initially in the Special Deposit Fund,
36 continued in existence by Section 16370 of the Government Code, both of the
37 following accounts:

38 (a) The Fish and Game Mitigation and Protection Endowment Principal
39 Account. The department shall deposit in this account the endowment funds

1 received by the department pursuant to an agreement described in Section 58055
2 and all earnings generated thereon. The earnings shall be available to the
3 department, upon appropriation by the Legislature, to fund long-term
4 management, enhancement, monitoring, and enforcement activities on habitat
5 lands in a manner consistent with the terms of the underlying agreement.

6 (b) The Fish and Game Mitigation and Protection Expendable Funds Account.
7 The department shall deposit in this account moneys received pursuant to an
8 agreement described in Section 58055 that are not endowment funds and that are
9 designated for expenditure for the purposes described in subdivision (b) of that
10 section. Notwithstanding Section 13340 of the Government Code, the moneys in
11 the account established by this subdivision are hereby continuously appropriated
12 to the department for expenditure without regard to fiscal year, for the purposes
13 described in this title.

14 **Comment.** Section 58050 continues former Fish and Game Code Section 13014(a) without
15 substantive change.

16 **§ 58055. Deposits**

17 58055. (a) The department may deposit moneys into the accounts established
18 pursuant to Section 58050 that it receives pursuant to any of the following, if those
19 moneys are received for the purposes described in subdivision (b):

20 (1) Agreements or permits pursuant to the Natural Communities Conservation
21 Planning Act (Title 2 (commencing with Section 64500) of Part 2 of Division 17).

22 (2) Conservation bank agreements.

23 (3) Habitat conservation implementation agreements.

24 (4) Incidental take permits.

25 (5) Legal or other written settlements.

26 (6) Mitigation agreements.

27 (7) Streambed or lakebed alteration agreements.

28 (8) Trust agreements.

29 (b) The department may deposit the moneys received pursuant to an agreement
30 described in subdivision (a) in an account established by this title only if it
31 receives those moneys for at least one of the following purposes:

32 (1) Mitigating the adverse biological impacts of a specific project, activity, spill,
33 or release.

34 (2) Protecting, conserving, restoring, enhancing, managing, and maintaining
35 fish, wildlife, native plants, or their habitats.

36 **Comment.** Section 58055 continues former Fish and Game Code Section 13014(b) without
37 substantive change.

38 **§ 58060. Transfer to another account**

39 58060. (a) While the Fish and Game Mitigation and Protection Endowment
40 Principal Account and the Fish and Game Mitigation and Protection Expendable
41 Funds Account are initially established in the Special Deposit Fund within the

1 Pooled Money Investment Account, the Treasurer's office shall, at the
2 department's request, transfer these funds from the Pooled Money Investment
3 Account to another account within the State Treasury system to increase earnings
4 over time while providing adequate liquidity. If either or both of these accounts
5 are transferred from the Pooled Money Investment Account, assets in the
6 transferred account or accounts may be held and invested in any of the
7 investments identified in Section 16430 of the Government Code, except that the
8 maturity date of commercial paper may exceed the limits set forth in Section
9 16430 of the Government Code. These investments shall be made as determined
10 and directed by the department.

11 (b) To develop and maintain the investment strategy for these accounts, the
12 department may retain investment advisers deemed acceptable to the Treasurer.

13 **Comment.** Section 58060 continues former Fish and Game Code Section 13014(c)-(d) without
14 substantive change.

15 TITLE 3. HABITAT MAINTENANCE 16 ASSESSMENT DISTRICTS

17 § 58075. Short title

18 58075. This title shall be known and may be cited as the Habitat Maintenance
19 Funding Act.

20 **Comment.** Section 58075 continues former Fish and Game Code Section 2900 without
21 substantive change.

22 § 58080. Assessment districts

23 58080. (a) A local agency may establish an assessment district pursuant to
24 Article 3.1 (commencing with Section 50060) of Chapter 1 of Part 1 of Division 1
25 of Title 5 of the Government Code for the improvement or maintenance of natural
26 habitat, in a manner consistent with the policies and procedures of this code.
27 Funds generated pursuant to this title may not be allocated to implement a plan
28 without the approval of the owner of the land to be improved.

29 (b) A local agency may provide for the long-term maintenance of natural habitat
30 pursuant to Section 50060.5 of the Government Code only pursuant to a plan for
31 the conservation of natural habitat approved by the department.

32 **Comment.** Section 58080 continues former Fish and Game Code Section 2901 without
33 substantive change.

34 DIVISION 16. PROTECTED AND MANAGED AREAS

35 PART 1. REFUGES

TITLE 1. REFUGES GENERALLY

§ 58500. Commission regulation of refuges

58500. The commission may:

(a) Authorize the department to issue, under any restrictions it deems best, permits that authorize the person named therein to carry, use, and possess, within a refuge, firearms, traps, or other contrivances for taking birds, mammals, fish, amphibians, or reptiles.

(b) Except as provided in subdivision (c) of Section 59865, Sections 59705 and 59715, and subdivisions (a) and (b) of Section 59865, authorize the department to issue permits that authorize the person named therein to take birds, mammals, fish, amphibians, or reptiles within a refuge.

(c) Adopt regulations not in conflict with any law for the protection of birds, mammals, fish, amphibians, reptiles, or marine life within a refuge.

Comment. Section 58500 continues former Fish and Game Code Section 10502(b)-(d) without substantive change.

§ 58505. Commission powers

58505. For the purposes of propagating, feeding, and protecting birds, mammals, fish, amphibians, and reptiles, the commission may do all of the following:

(a) Accept, on behalf of the state, donations of an interest in land within a refuge.

(b) Accept, on behalf of the state, from a person owning and in possession of patented land, other than land covered and uncovered by the ordinary daily tide of the Pacific Ocean, the right to preserve and protect all birds, mammals, fish, amphibians, and reptiles on the patented land.

(c) Accept, on behalf of the state, donations of birds, mammals, fish, amphibians, and reptiles, and of money given or appropriated. Those donations shall be used for the purposes for which they are accepted, and, as nearly as may be, for any purpose indicated by the donor.

Comment. Section 58505 continues former Fish and Game Code Section 10503(a)-(c) without substantive change.

 **Note.** Existing Section 10503(b) and (c) are not expressly limited to refuge-related activities. Should they be? Or are those provisions best understood as expressing general powers of the commission?

§ 58515. Enforcement

58515. The department and the district attorney, sheriff, and all peace officers of the county in which any refuge or part thereof is situated, shall enforce all of the provisions of this code relating to the refuge, and institute and assist in prosecutions for violations thereof.

1 **Comment.** Section 58515 continues former Fish and Game Code Section 10508 without
2 substantive change.

3 **§ 58520. Take in refuge**

4 58520. No specification of an open season in any area authorizes the taking of a
5 bird, mammal, fish, amphibian, or reptile from a refuge within that area from
6 which the taking is prohibited by this code.

7 **Comment.** Section 58520 continues former Fish and Game Code Section 10510 without
8 substantive change.

9 **§ 58525. Application of provisions governing Fish and Wildlife District**

10 58525. Except as they may conflict with refuge provisions, the provisions of this
11 code relating to a particular fish and wildlife district shall apply to each refuge
12 lying wholly, or in major part, within the boundaries of the district.

13 **Comment.** Section 58525 continues former Fish and Game Code Section 10511 without
14 substantive change.

15 **§ 58530. Flight restrictions**

16 58530. (a) It is unlawful to fly any aircraft, including any airplane or helicopter,
17 less than 3,000 feet above water or land over the Sespe Condor Sanctuary, and less
18 than 1,000 feet above water or land over the Año Nuevo State Reserve, the
19 Farallon Islands Game Refuge, the Point Lobos State Reserve, the California Sea
20 Otter Game Refuge, and Anacapa, San Miguel, Santa Barbara, and San Nicolas
21 Islands, except for rescue operations, in case of any emergency, or for scientific or
22 filmmaking purposes under a permit issued by the department after a review of
23 potential biological impacts.

24 (b) This section does not apply to the landing of any aircraft, including any
25 airplane or helicopter, on Anacapa, San Miguel, Santa Barbara, San Nicolas, and
26 Farallon Islands for administrative or operational purposes of the National Park
27 Service, the United States Navy, or the United States Coast Guard.

28 **Comment.** Section 58530 continues former Fish and Game Code Section 10501.5 without
29 substantive change.

30 **TITLE 2. FISH REFUGES**

31 **CHAPTER 1. FISH REFUGES GENERALLY**

32 **§ 58550. Prohibitions**

33 58550. Except under a permit or specific authorization, it is unlawful to take or
34 possess a fish or amphibian in a fish refuge, or to use or have in possession in that
35 refuge a contrivance designed to be used for catching fish.

36 **Comment.** Section 58550 continues the part of former Fish and Game Code Section 10500(c)
37 without substantive change.

38 See also Section 6102 (enforcement).

1 **§ 58555. Commission control of fish**

2 58555. The commission may exercise control over all fish in a fish refuge.

3 **Comment.** Section 58555 continues the part of former Fish and Game Code Section 10502(a)
4 that applies to a fish refuge, without substantive change.

5 CHAPTER 2. SPECIFIC FISH REFUGES

6 Article 1. General Provisions

7 **§ 58600. Described areas**

8 58600. The areas described in this chapter are fish and game refuges.

9 **Comment.** Section 58600 is new. It is comparable to former Fish and Game Code Section
10 10770.

11 Article 2. Pacific Grove Marine Gardens Fish Refuge

12 **§ 58625. Description**

13 58625. The following constitutes the Pacific Grove Marine Gardens Fish
14 Refuge:

15 All that area within the following boundaries as they existed April 1, 1963, not
16 within the Hopkins Marine Life Refuge: Beginning at the point of intersection of
17 the southeasterly corporate limit line of the City of Pacific Grove prolonged, and
18 the line of mean high tide of the Bay of Monterey; thence northwesterly along said
19 line of mean high tide to Point Pinos and continuing around said point in a
20 westerly direction and continuing southwesterly along said line of mean high tide
21 to the intersection with the southwesterly corporate limit line prolonged of said
22 city; thence N. 70° 45' 00" W. along said southwesterly corporate limit line
23 prolongated to a point in the Pacific Ocean where the depth of water in said ocean
24 is sixty (60) feet measured from the level of mean low tide; thence northwesterly
25 along the line in said ocean which line is at a constant depth of sixty (60) feet
26 measured from the level of mean low tide to Point Pinos and continuing around
27 said point in an easterly direction and continuing southeasterly along the line in
28 said bay which line is at a constant depth of sixty (60) feet measured from the
29 level of mean low tide, to the intersection with the southeasterly corporate limit
30 line of said city prolonged; thence S. 58° 57' 45" W. along said southeasterly
31 corporate limit line prolonged, to the point of beginning.

32 **Comment.** Section 58625 continues former Fish and Game Code Section 10801 without
33 substantive change.

34 **§ 58630. Take of fish within refuge**

35 58630. (a) In the Pacific Grove Marine Gardens Fish Refuge, fish, other than
36 mollusks and crustaceans, may be taken under the authority of a sport fishing
37 license as authorized by this code.

(b) Notwithstanding any other provision of this section, holders of scientific collectors' permits issued by the commission, or students working under their direction, may take marine life for scientific purposes in this refuge.

(c) In this refuge, sardines, mackerel, anchovies, squid and herring may be taken by ring net, lampara net or bait net as authorized by this code.

Comment. Section 58630 continues former Fish and Game Code Section 10660 without substantive change.

TITLE 3. GAME REFUGES

CHAPTER 1. GAME REFUGES GENERALLY

§ 58700. Prohibitions

58700. Except under a permit or specific authorization, it is unlawful to do any of the following:

(a) To take or possess a bird or mammal in a game refuge.

(b) To use or have in possession in a game refuge, a firearm, BB device as defined in Section 16250 of the Penal Code, crossbow, bow and arrow, or a trap or other contrivance designed to be, or capable of being, used to take birds or mammals, or to discharge a firearm or BB device or to release an arrow or crossbow bolt into a game refuge.

Comment. Section 58700 continues former Fish and Game Code Section 10500(a)-(b) without substantive change.

See also Section 6102 (enforcement).

§ 58705. Take from navigable waters

58705. Nothing in this title shall be construed as prohibiting or preventing a person from taking a bird, mammal, fish, amphibian, or reptile from or on navigable water in a game refuge.

Comment. Section 58705 continues former Fish and Game Code Section 10513 without substantive change.

§ 58710. Commission control of mammals and birds

58710. The commission may exercise control over all mammals and birds in a game refuge.

Comment. Section 58710 continues the part of former Fish and Game Code Section 10502(a) that applies to a game refuge without substantive change.

§ 58715. Acquisition of land for game refuge

58715. (a) For the purposes of propagating, feeding, and protecting birds, mammals, fish, amphibians, and reptiles, the commission may acquire, by purchase, lease, rental, or otherwise, and occupy, develop, maintain, use, and

1 administer land, or land and nonmarine water, or land and nonmarine water rights,
2 suitable for state game farms or game refuges.

3 (b) Any property acquired for game refuges shall be acquired in the name of the
4 state, and shall, at all times, be subject to any regulations that may be prescribed
5 from time to time by the commission for the occupation, use, operation,
6 protection, and administration of game refuges.

7 (c) The department shall do all things necessary to secure a valid title in the state
8 to property acquired for a game refuge, but no payment shall be made for the
9 property until the title is satisfactory to the Attorney General and is vested in the
10 state. The acquisition of the property by the state is not prohibited by reason of
11 rights of way, easements, or reservations, which, from their nature, in the opinion
12 of the department, will in no manner interfere with the use of the property for the
13 purpose for which it is acquired.

14 **Comment.** Subdivision (a) of Section 58715 continues former Fish and Game Code Section
15 10503(d) without substantive change.

16 Subdivision (b) continues former Fish and Game Code Section 10504 without substantive
17 change.

18 Subdivision (c) continues former Fish and Game Code Section 10505 without substantive
19 change.

20 **§ 58720. Possession of weapon in game refuge**

21 58720. (a) Nothing in this code prohibits the possession of firearms, BB devices
22 as defined in Section 16250 of the Penal Code, crossbows and bolts, or bows and
23 arrows by persons when traveling through a game refuge when the firearms are
24 taken apart or encased and unloaded and the bows are unstrung or stored
25 separately from any arrow or bolt.

26 (b) When the traveling is done on a route other than a public highway or other
27 public thoroughfare or right of way, notice shall be given to the department at least
28 24 hours before that traveling. The notice shall give the name and address of the
29 person intending to travel through the refuge, the name of the refuge, the
30 approximate route, and the approximate time when that person intends to travel
31 through the refuge.

32 **Comment.** Section 58720 continues former Fish and Game Code Section 10506 without
33 substantive change.

34 **§ 58725. Possession of bird or mammal in game refuge**

35 58725. It is lawful for a person who has given the notice provided for in Section
36 58720 to transport a bird or mammal through a game refuge, if lawfully taken
37 outside the refuge, and if the bird or mammal is carried openly and during the time
38 between one hour before sunrise and one hour after sunset.

39 **Comment.** Section 58725 continues former Fish and Game Code Section 10507 without
40 substantive change.

1 **§ 58730. Posted notices**

2 58730. The department shall cause to be prepared suitable notices to be posted
3 under its direction on each game refuge, containing a warning to all persons to
4 refrain for the period named therein from violations of the provisions of this title
5 relating to game refuges.

6 **Comment.** Section 58730 continues former Fish and Game Code Section 10512 without
7 substantive change.

8 **§ 58735. Management and control**

9 58735. All game refuges shall, for all purposes of protecting birds, mammals,
10 fish, amphibians, or reptiles thereon, be under the control and management of the
11 department, and the officers and employees of the department, all game wardens,
12 and law enforcement officers may at all times enter in and upon game refuges in
13 the performance of their duties.

14 **Comment.** Section 58735 continues former Fish and Game Code Section 10514 without
15 substantive change.

16 **§ 58740. Education and outreach**

17 58740. (a) The department shall undertake appropriate education and outreach
18 regarding the current location of existing game refuges, agency contacts for
19 statutory notices in Sections 58720 and 58725, and the potential closure of all state
20 game refuges, except the California Sea Otter Game Refuge and the Farallon
21 Islands Game Refuge. The department shall provide an opportunity for public
22 comment concerning the potential elimination of game refuges. The department
23 shall provide information about game refuge boundaries, including, but not limited
24 to, maps available both on the department's Internet Web site and in hardcopy
25 format. The department shall also provide Internet Web site contact information
26 for the public to contact the department in accordance with state law. The
27 department may conduct regional workshops as it determines to be necessary to
28 provide public information about the proposed elimination of game refuges.

29 (b) The department, on or before January 1, 2011, shall prepare and submit to
30 the Legislature a description of the public education and outreach effort
31 undertaken pursuant to subdivision (a), and a summary of any information
32 provided by the public that is relevant to the potential closure of all state game
33 refuges except the California Sea Otter Game Refuge and the Farallon Islands
34 Game Refuge.

35 **Comment.** Section 58740 continues former Fish and Game Code Section 10844 without
36 substantive change.

37  **Note.** Existing Section 10844 requires the submission of a report by January 1, 2011. **Can**
38 **that provision be discontinued as obsolete?**

CHAPTER 2. SPECIFIC GAME REFUGES

Article 1. General Provisions

§ 58800. Described areas

58800. (a) The areas described in this chapter are game refuges.

(b) An existing reference to a “Fish and Game District” that is a game refuge shall be construed to refer to the “Game Refuge” that continues the former district.

Comment. Subdivision (a) of Section 58800 continues former Fish and Game Code Section 10820 without substantive change.

Subdivision (b) is new.

Notes. (1) In existing law, most of the described game refuges are referred to as “Fish and Game Districts.” That is the same term that is used to name the districts that subdivide the state for the purposes of administration and special regulation. See existing Sections 11000-11039. This dual use of the term “Fish and Game Districts” is potentially confusing.

To complicate matters further, the term “fish and game refuge” is specially defined as being both a fish refuge and a game refuge. Use of the term “*Fish and Game District*” to refer only to game refuges is another potential source of confusion.

To avoid this confusion, this draft does not use the term “Fish and Game District” to refer to the game refuges described below. Instead, they are referred to as “Game Refuges.”

That change should be unproblematic. The Commission found only one statute and no regulations that use the term “Fish and Game District” to refer to game refuges. See existing Section 10662. That section can easily be revised to use the naming convention established in this draft.

As a final check against confusion, proposed Section 58800(b) expressly provides that an existing reference to a “Fish and Game District” that constitutes a game refuge should be construed as a reference to the “Game Refuge” that continues the referenced **district**.

The Commission invites comment on whether any of the changes noted above would be problematic.

(2) If it would be beneficial to give the game refuges descriptive names, rather than the bare alphanumeric designators that they currently have, now would be a convenient time to do so. **The Commission invites comment on that point.**

Article 2. Game Refuge 1C

§ 58825. Description

58825. The following constitutes Game Refuge 1C: All that area within the County of Modoc within the following boundaries:

Beginning at the boundary of the Modoc National Forest on the east side of Sec. 28, T. 42 N., R. 14 E., where Parker Creek crosses the national forest boundary and following thence Parker Creek and the South Fork of Parker Creek to the summit of the Warner Mountains; thence southerly along the summit of the Warner Mountains to the headwaters of Mill Creek; thence following course of Mill Creek to Mill Creek Ranger Station and Mill Creek stock corrals in approximately Sec. 15, T. 40 N., R. 15 E. (unsurveyed); thence along road from Mill Creek Ranger Station and stock corrals running north of Cantrell’s sawmill to

1 Bowman Ranch, thence along same road to the Modoc National Forest boundary
2 on the center line of Sec. 33, T. 41 N., R. 14 E.; thence north along said national
3 forest boundary to Parker Creek, the point of beginning.

4 **Comment.** Section 58825 continues former Fish and Game Code Section 10821 without
5 substantive change. The refuge described in this section was formerly known as “Fish and Game
6 District 1C.”

7 Article 3. Game Refuge 1F

8 § 58850. Description

9 58850. The following constitutes Game Refuge 1F: All that area within the
10 County of Lassen within the following boundaries:

11 Beginning at the fork of the Puls Camp Road and the Poison Lake-Harvey
12 Valley Road near the quarter section corner between Secs. 33 and 34, T. 33 N., R.
13 8 E.; thence northerly following the westerly side of said road by Dixie Springs
14 and Puls Camp in Sec. 33, T. 34 N., R. 8 E., to Shroder Lake in Sec. 19, T. 34 N.,
15 R. 8 E.; thence southwesterly about one mile to the junction of said Puls Camp
16 Road and the Little Valley Road in Sec. 24, T. 34 N., R. 7 E.; thence northwesterly
17 following the southerly side of said Little Valley Road to its junction with the
18 Blacks Lake Road; thence westerly following the southerly side of said Blacks
19 Lake Road to the Eldridge place in Sec. 13, T. 34 N., R. 6 E.; thence southerly
20 following the easterly side of said road to Jelly Camp in Sec. 25, T. 34 N., R. 6 E.;
21 thence southeasterly following the easterly side of the Susanville-Pittville Road to
22 junction of the Poison Lake-Harvey Valley Road; thence easterly following the
23 northerly side of said Poison Lake-Harvey Valley Road to the point of beginning.

24 **Comment.** Section 58850 continues former Fish and Game Code Section 10822 without
25 substantive change. The refuge described in this section was formerly known as “Fish and Game
26 District 1F.”

27 Article 4. Game Refuge 1G

28 § 58875. Description

29 58875. The following constitutes Game Refuge 1G: All that area within the
30 County of Tehama within the following boundaries:

31 Beginning at a point where Deer Creek crosses the west township line of T. 25
32 N., R. 2 E.; thence north along said township line and along the west township line
33 of T. 26 N., R. 2 E. to its intersection with Boatgunwale Creek; thence down
34 Boatgunwale Creek to Mill Creek; thence up Mill Creek to the Ponderosa Truck
35 Trail; thence following the Ponderosa Truck Trail to its intersection with South
36 Antelope Creek; thence up South Antelope Creek to mouth of the North Fork of
37 South Antelope Creek; thence up the North Fork to its source; thence following
38 Manzanita Cut Trail to the South Fork of Rock Gulch Creek; thence down Rock
39 Gulch Creek to its intersection with the Old Butte Meadows-Round Valley Trail;

1 thence following the Old Butte Meadows-Round Valley Trail to its intersection
2 with the Deer Creek Highway, thence down the Deer Creek Highway to its
3 westerly crossing of Deer Creek, thence down Deer Creek to point of beginning.

4 **Comment.** Section 58875 continues former Fish and Game Code Section 10823 without
5 substantive change. The refuge described in this section was formerly known as “Fish and Game
6 District 1G.”

7 Article 5. Game Refuge 1H

8 **§ 58900. Description**

58900. The following constitutes Game Refuge 1H: All that area within the
County of Plumas within the following boundaries:

Beginning at a point on the Western Pacific Railway known as Quincy Junction; thence following northerly the westerly side of the Old Road to Taylorsville, thence westerly along the southerly side of the County Road 207 to its intersection with the Western Pacific Railway from Crescent Mills to Keddie; thence southwesterly and southerly along these tracks to Keddie; thence southerly and southeasterly along main Western Pacific tracks from Keddie to Quincy Junction to the point of beginning.

18 **Comment.** Section 58900 continues former Fish and Game Code Section 10824 without
19 substantive change. The refuge described in this section was formerly known as “Fish and Game
20 District 1H.”

21 Article 6. Game Refuge 1I

22 **§ 58925. Description**

58925. The following constitutes Game Refuge 1I: All that area within the
County of Placer within the following boundaries:

Beginning at a point in Sec. 17, T. 14 N., R. 14 E., M.D.M., where the French House-Big Meadows Road intersects the South Fork of Long Canyon Creek; thence following southwesterly along said road to its intersection with the French Meadows-Georgetown Road near the section line between Secs. 22 and 23, T. 14 N., R. 13 E., thence southwesterly along the French Meadows-Georgetown Road where it intersects an unnamed tributary to the North Fork of Long Canyon Creek near the section line between Secs. 22 and 27, T. 14 N., R. 13 E.; thence northwesterly along said tributary to French House Site (near the center of Sec. 22, T. 14 N., R. 13 E.); thence northwesterly along the French House-Red Star Mine Jeep Road in Secs. 22 and 15, T. 14 N., R. 13 E., to its intersection with the Middle Fork of the American River, in Sec. 15, T. 14 N., R. 13 E.; thence northeasterly along the Middle Fork of the American River, to its intersection with the southern boundary of Sec. 35, T. 15 N., R. 13 E., thence due north on a line through the center of Sec. 35 to an intersection with the summit of Red Star Ridge in Sec. 26, T. 15 N., R. 13 E. (this being the divide between Duncan Creek and the

1 Middle Fork of the American River); thence northeasterly following the summit of
2 Red Star Ridge to a point in Sec. 4, T. 15 N., R. 14 E. where said ridge intersects
3 the main Foresthill Divide between the North Fork of the American River and the
4 Middle Fork of the American River; thence easterly along the summit of said
5 divide to Needle Peak; thence southerly following the summit of the divide to Mt.
6 Mildred; thence southwesterly following the summit of the divide between Gray
7 Horse Creek and the Middle Fork of the American River to its intersection with
8 the Big Meadows-Gray Horse Valley Trail (near the middle of Sec. 5, T. 14 N., R.
9 14 E.); thence following said trail to the South Fork of Long Canyon Creek (near
10 the middle of Sec. 9, T. 14 N., R. 14 E.); thence southwesterly down the South
11 Fork Long Canyon Creek to the point of beginning.

12 **Comment.** Section 58925 continues former Fish and Game Code Section 10825 without
13 substantive change. The refuge described in this section was formerly known as “Fish and Game
14 District 1I.”

15 Article 7. Game Refuge 1J

16 § 58950. Description

17 58950. The following constitutes Game Refuge 1J: All that area within the
18 County of Amador within the following boundaries:

19 Beginning at a point between Secs. 13 and 18, T. 8 N., R. 14 and 15 E., where
20 the Carson Pass Highway (State Sign Route 88) enters Sec. 18, T. 8 N., R. 15 E.;
21 thence northeasterly along the south side of State Highway 88 right of way to the
22 Bear River Road in Section 12, T. 8 N., R. 15 E.; thence southeasterly along the
23 westerly side of said road to the junction of the Ham’s Spring and Cole Creek
24 Roads in Section 20, T. 8 N., R. 16 E.; thence southeasterly along the westerly
25 side of the Cole Creek Road to its termination at the P. G. & E. penstock in
26 Section 33, T. 8 N., R. 16 E.; thence southerly along the westerly side of said
27 penstock to its intersection with the Mokelumne River; thence down the north
28 bank of the Mokelumne River in a southwesterly direction to the intersection of
29 range line between T. 7 N., R. 14 and 15 E.; thence north along range line between
30 T. 8 N., R. 14 and 15 E., to the intersection of State Sign Route 88 to the place of
31 beginning.

32 **Comment.** Section 58950 continues former Fish and Game Code Section 10826 without
33 substantive change. The refuge described in this section was formerly known as “Fish and Game
34 District 1J.”

35 Article 8. Game Refuge 1N

36 § 58975. Description

37 58975. The following constitutes Game Refuge 1N: All that area within the
38 Counties of Siskiyou and Modoc within the following boundaries:

1 Beginning at the junction of the Lava Ranger Station Road and the Egg Lake-
2 Quaking Asp Road, thence following westerly and northerly the northerly and
3 easterly side of said Lava Ranger Station Road to its junction with the Medicine
4 Lake-Quaking Asp Road near the northwest corner of Sec. 18, T. 42 N., R. 5 E.,
5 thence easterly and southerly following the southerly and westerly side of the
6 Medicine Lake-Quaking Asp-Egg Lake Road to the point of beginning.

7 **Comment.** Section 58975 continues former Fish and Game Code Section 10827 without
8 substantive change. The refuge described in this section was formerly known as “Fish and Game
9 District 1N.”

10 Article 9. Game Refuge 1P

11 § 59000. Description

12 59000. The following constitutes Game Refuge 1P: All that area within the
13 County of Plumas, within the following boundaries:

14 Beginning at the junction of the Milford-Beckwourth Road and the Last Chance-
15 Doyle Road, thence following the easterly side of said Milford-Beckwourth Road
16 to its junction with the Dixie Valley-Frenchman’s Cove Road; thence following
17 the easterly side of the Dixie Valley-Frenchman’s Cove Road to its junction with
18 the Little Last Chance Road; thence following the westerly side of the Little Last
19 Chance Road to its junction with the Last Chance-Doyle Road; thence following
20 the westerly side of the Last Chance-Doyle Road to the place of beginning.

21 **Comment.** Section 59000 continues former Fish and Game Code Section 10828 without
22 substantive change. The refuge described in this section was formerly known as “Fish and Game
23 District 1P.”

24 Article 10. Game Refuge 1R

25 § 59025. Description

26 59025. The following constitutes Game Refuge 1R: All that area within the
27 County of Tuolumne within the following boundaries:

28 Beginning at the junction of the North Fork of the Stanislaus River and the
29 Middle Fork of the Stanislaus River; thence easterly following the northerly bank
30 of said Middle Fork of the Stanislaus River to the mouth of the Shu-fly Creek,
31 approximately in Sec. 9, T. 5 N., R. 18 E.; thence northerly following the westerly
32 bank of said creek to its junction with Whit’s Basin Creek; thence westerly
33 following the southerly and westerly bank of said Whit’s Basin Creek to its
34 junction with the Sands Meadow Trail in Sec. 36, T. 6 N., R. 17 E.; thence
35 northwesterly following said Sands Meadow Trail to its junction with the
36 Government Truck Trail in Sec. 23, T. 6 N., R. 17 E.; thence westerly following
37 said Truck Trail to Liberty Hill; thence following said Government Truck Trail
38 westerly and southerly to its junction with the Boards Crossing-Beaver Creek
39 Camp Road; thence northerly following said Boards Crossing-Beaver Creek Camp

1 Road to Boards Crossing on the North Fork of the Stanislaus River; thence
2 downstream following the easterly bank of said North Fork of the Stanislaus River
3 to the point of beginning.

4 **Comment.** Section 59025 continues former Fish and Game Code Section 10829 without
5 substantive change. The refuge described in this section was formerly known as “Fish and Game
6 District 1R.”

7 Article 11. Game Refuge 1S

8 § 59050. Description

9 59050. The following constitutes Game Refuge 1S: All that area lying within the
10 County of Lassen within the following boundaries:

11 Beginning at the old Haydenhill Post Office in the approximate center of Sec.
12 36, T. 37 N., R. 9 E.; thence following westerly along the old Juniper Road
13 through Windmill Flat to the junction of the Summit Spring Road near Meyers
14 Spring; thence south through Lost Valley along the Lost Valley-Dixie Valley
15 Road to the junction of the Dixie Valley-Grasshopper Road; thence east to the
16 junction of the old Haydenhill-Slate Creek Road located approximately in Sec. 24,
17 T. 35 N., R. 9 E.; thence north along the Haydenhill-Slate Creek Road to the place
18 of beginning.

19 **Comment.** Section 59050 continues former Fish and Game Code Section 10830 without
20 substantive change. The refuge described in this section was formerly known as “Fish and Game
21 District 1S.”

22 Article 12. Game Refuge 1V

23 § 59075. Description

24 59075. The following constitutes Game Refuge 1V: all that area within the
25 County of Plumas within the following boundaries:

26 Beginning at the intersection of U. S. Alternate 40 Highway and U. S. Forest
27 Service Road 24N12; thence following northerly the easterly side of U. S. Forest
28 Service Road 24N12 to its intersection with U. S. Forest Service Road 24N10;
29 thence easterly following the southerly side of U. S. Forest Service Road 24N10 to
30 its intersection with U. S. Forest Service Road 24N07 (Relocated); thence easterly
31 following the southerly side of U. S. Forest Service Road 24N07 (Relocated) to its
32 intersection with U. S. Forest Service Road 25N08; thence southerly on the
33 westerly side of U. S. Forest Service Road 25N08 to its intersection with U. S.
34 Alternate 40 Highway; thence westerly along the northerly side of U. S. Alternate
35 40 Highway to the point of beginning.

36 **Comment.** Section 59075 continues former Fish and Game Code Section 10831 without
37 substantive change. The refuge described in this section was formerly known as “Fish and Game
38 District 1V.”

Article 13. Game Refuge 2A

§ 59100. Description

59100. The following constitutes Game Refuge 2A: All that area within the Counties of Mendocino, Lake, and Glenn within the following boundaries:

Beginning at the summit of Hull Mountain in Mendocino County, in the southwest corner of Sec. 2, T. 19 N., R. 10 W.; thence in a northeasterly direction down Hull Creek (sometimes known as Red Rock Creek) to its junction with Sand Creek; thence southeasterly down Sand Creek to its junction with Corbin Creek, thence in an easterly direction up Corbin Creek to Sec. 36, T. 20 N., R. 8 W.; thence in a southerly direction up a ravine to the Pacific Crest Road (24N02) on the summit of the Coast Range Mountains in Sec. 12, T. 19 N., R. 8 W.; thence southwesterly along the Pacific Crest Road (24N02) to Low Gap, where the Bloody Rock trail crosses the summit in Sec. 27, T. 19 N., R. 8 W.; thence in a westerly direction down the Bloody Rock trail and Cold Creek to South Eel River in Sec. 26, T. 19 N., R. 9 W.; thence down the river to the mouth of a ravine in the SE $\frac{1}{4}$ of Sec. 27, T. 19 N., R. 9 W.; thence in a northwesterly direction up the ravine through Secs. 27 and 28 to the summit of Boardman Ridge; thence in a northwesterly direction up Boardman Ridge to the summit of Hull Mountain to the point of beginning.

Comment. Section 59100 continues former Fish and Game Code Section 10832 without substantive change. The refuge described in this section was formerly known as “Fish and Game District 2A.”

Article 14. Game Refuge 3F

§ 59125. Description

59125. The following constitutes Game Refuge 3F: All that area within the County of Contra Costa described as follows:

All of Secs. 29, 30, 31 and 32, T. 1 N., R. 1 E.; all of Secs. 5, 6, 7 and 8, T. 1 S., R. 1 E.; all of Secs. 25, 26, 35 and 36 of T. 1 N., R. 1 W.; all of Secs. 1, 2, 11 and 12 of T. 1 S., R. 1 W.

Comment. Section 59125 continues former Fish and Game Code Section 10835 without substantive change. The refuge described in this section was formerly known as “Fish and Game District 3F.”

Article 15. Game Refuge 3G

§ 59150. Description

59150. The following constitutes Game Refuge 3G:

All those lands of the Leland Stanford Junior University within the Counties of San Mateo and Santa Clara, and consisting of lots numbers 1 to 33, inclusive; that portion of lots 35 and 42 lying outside of the town limits of the town of Mayfield;

lots 36, 43, 46 to 75, inclusive; 80 to 86, inclusive; 89 to 98, inclusive, as shown on the map entitled “map of the lands of the Leland Stanford Junior University at or near the site of the university in the Counties of Santa Clara and San Mateo, by A. T. and F. A. Herrmann of Herrmann Bros.,” dated November, 1908, recorded in the Office of the County Recorder of the County of Santa Clara.

Comment. Section 59150 continues former Fish and Game Code Section 10836 without substantive change. The refuge described in this section was formerly known as “Fish and Game District 3G.”

Article 16. Game Refuge 4D

§ 59175. Description

59175. The following constitutes Game Refuge 4D: All that area within the County of Riverside described as follows:

Beginning at the intersection of State Highway 74 and Highway 111 in Section 20, T. 5 S., R. 6 E., S.B.B. & M.;

Thence northwesterly on State Highway 111 to its intersection with the south bank of the Palm Canyon wash and the east boundary of Section 25, T. 4 S., R. 4 E., S.B.B. & M.;

Thence southwesterly and southerly along east bank of Palm Canyon wash through said Section 25, Sections 36 and 35, T. 4 S., R. 4 E., S.B.B. & M. and Sections 2, 11, 14, 23, 25 and 36, T. 5 S., R. 4 E., S.B.B. & M.;

Thence continuing along the east bank of said Palm Canyon wash through Sections 1, 12, 13, T. 6 S., R. 4 E., and continuing through Sections 18, 19, 30 and 31, T. 6 S., R. 5 E., to a point of intersection with Omstott Creek;

Thence along the north bank Omstott Creek through Section 31, T. 6 S., R. 5 E., and continuing through Sections 5, 4, 9, 10, T. 7 S., R. 5 E., to the north line of said State Highway 74;

Thence easterly along north line of said Highway 74 to a point of intersection with the north line Section 12, T. 7 S., R. 5 E.;

Thence east along north line of said Section 12 to the northeast corner of said Section 12;

Thence south along the easterly boundary of Sections 12, 13, 24, 25 and 36, T. 7 S., R. 5 E.; and the easterly boundary of Section 1, T. 8 S., R. 5 E., to the point of intersection with the southwesterly corner of Section 31, T. 7 S., R. 6 E.;

Thence east and along the southerly boundary of said Section 31 and Sections 32, 33, 34 and 35, to the southeast corner of Section 36, T. 7 S., R. 6 E.;

Thence north along the easterly boundary of Sections 36, 25, 24, 13 and 12 to the northeast corner of Section 1, T. 7 S., R. 6 E.;

Thence west along the north line of said Section 1 to the southeast corner of Section 36, T. 6 S., R. 6 E.;

Thence north along the east line of said Section 36, Sections 25, 24 and 13 to the southwest corner of Section 7, T. 6 S., R. 7 E.;

1 Thence east along the south line of said Section 7 to the southeast corner
2 thereof;

3 Thence north along the east line of said Section 7 and Section 6 of said T. 6 S.,
4 R. 7 E., to the northeast corner of said Section 6;

5 Thence west along the north line of said Section 6 of said T. 6 S., R. 7 E. to
6 Marshall Street;

7 Thence north along Marshall Street and on the $\frac{1}{4}$ Section line of Sections 31 and
8 30, T. 5 S., R. 7 E. to Highway 111;

9 Thence westerly along Highway 111 to the point of beginning.

10 **Comment.** Section 59175 continues former Fish and Game Code Section 10837 without
11 substantive change. The refuge described in this section was formerly known as “Fish and Game
12 District 4D.”

13 **§ 59180. Firearm prohibition**

14 59180. (a) Notwithstanding any other provision in this code, it shall be unlawful
15 for any person to fire a firearm, but it shall not be unlawful to possess a firearm in
16 the following areas: All of T. 5 S., R. 5 E., except Sections 1, 2, 11, 12, and 13, of
17 Game Refuge 4D.

18 (b) In Game Refuge 4D the lawful occupant of privately owned lands or the
19 employees of those occupants may possess firearms without a permit.

20 **Comment.** Subdivision (a) of Section 59180 continues former Fish and Game Code Section
21 10662 without substantive change.

22 Subdivision (b) continues former Fish and Game Code Section 10663 without substantive
23 change.

24 **Article 17. Game Refuge 4G**

25 **§ 59200. Description**

26 59200. The following constitutes Game Refuge 4G:

27 Beginning at the northeast corner of T. 4 S., R. 3 E., S. B. B. & M.;

28 Thence on section lines, west one mile, north one mile, west two miles, north
29 one mile and west three miles to the northwest corner of Sec. 30, T. 3. S., R. 3 E.,
30 S. B. B. & M.;

31 Thence south on the range line between R. 2 and 3 E., about $7\frac{3}{4}$ miles to the
32 crest of the divide forming the northwesterly boundary of Strawberry Creek
33 watershed;

34 Thence southwesterly along said divide to a point on the northerly boundary of
35 Sec. 28 in T. 5 S., R. 2 E., S. B. B. & M.;

36 Thence southwesterly in a straight line to the junction of Strawberry Creek and
37 the south fork of the San Jacinto River;

38 Thence southeasterly and northeasterly along the crest of the divide between the
39 waters of Dry Creek, a tributary of Strawberry Creek, and the waters of the south
40 fork of the San Jacinto River and its tributaries to the northeasterly side of the
41 right of way of the Pines to Palms Highway;

1 Thence southeasterly along the said northeasterly side of the right of way of the
2 Pines to Palms Highway to the right bank of Hurkey Creek;

3 Thence northerly along the right bank of Hurkey Creek through Secs. 9 and 4 in
4 T. 6 S., R. 3 E., and through Secs. 33, 28, 21, the southeast quarter of Sec. 16, the
5 west one-half of Sec. 15, the east half of Sec. 10 and the northwest quarter of Sec.
6 11 to the crest of the divide between the waters of Hurkey Creek and Murray
7 Canyon;

8 Thence southeasterly along the crest of the divide between the waters flowing
9 west into the San Jacinto River and the waters flowing east into Coachella Valley
10 to a point on the south boundary of Sec. 24 in T. 5 S., R. 3 E., S. B. B. & M.;

11 Thence east on said south line of Sec. 24 to the southeast corner thereof. Thence
12 north on the range line to the point of beginning.

13 **Comment.** Section 59200 continues former Fish and Game Code Section 10838 without
14 substantive change. The refuge described in this section was formerly known as “Fish and Game
15 District 4G.”

16 Article 18. California Sea Otter Game Refuge

17 § 59225. Description

18 59225. The California Sea Otter Game Refuge consists of and includes the
19 following:

20 All that portion of Monterey and San Luis Obispo Counties between Carmel
21 River on the north and Santa Rosa Creek on the south, lying west of the Monterey-
22 Cambria Pines Highway, also known as California Highway No. 1.

23 **Comment.** Section 59225 continues former Fish and Game Code Section 10840 without
24 substantive change.

25 § 59230. Privately owned land

26 59230. In the California Sea Otter Game Refuge, the lawful occupant of
27 privately owned land, or the employees of a lawful occupant, may possess
28 firearms and traps and may take on the privately owned land any nonprotected
29 bird or mammal, and no permit is required for that taking.

30 **Comment.** Section 59230 continues former Fish and Game Code Section 10659 without
31 substantive change.

32 Article 19. Farallon Islands Game Refuge

33 § 59250. Description

34 59250. The following constitutes the Farallon Islands Game Refuge: the
35 Southeast Farallons, including Maintop Island, Middle Farallon, the North
36 Farallons, Noonday Rock, and the waters lying around each island within one
37 nautical mile from the coastline of each island.

Comment. Section 59250 continues the first paragraph of former Fish and Game Code Section 10843 without substantive change.

§ 59255. Regulated activity

59255. (a) Section 58705 shall have no application in the Farrallon Islands Game Refuge. Fishermen, however, may not take any seal or sea lion while in this refuge, notwithstanding the provisions of Section 32500.

(b) Notwithstanding the provisions of Section 58700, persons on commercial vessels may possess unloaded firearms when traveling through the navigable waters of this refuge.

Comment. Section 59255 continues the second paragraph of former Fish and Game Code Section 10843 without substantive change.

Note. Existing Section 10843 refers to Section 4500.5, a provision that was repealed in 1975. See 1975 Cal. stat. ch. 786. That apparently obsolete reference is not continued in proposed Section 59255. **The Commission invites comment on whether that revision would cause any problem.**

Article 20. Johnsville Game Refuge

§ 59275. Description

59275. The following constitutes the Johnsville Game Refuge: All that area within the County of Plumas within the following boundaries:

Beginning at the North $\frac{1}{4}$ corner of Section 24, T. 22 N., R. 11 E., M. D. M.; thence North 89° 39' 25" East 334.93 feet; thence South 0° 08' 47" East 418.08 feet; thence South 89° 48' 44" West 167.37 feet; thence South 0° 09' 33" East 668.15 feet; thence South 89° 59' 48" West 496.21 feet; thence South 0° 09' 15" East 83.34 feet; thence South 89° 58' 24" West 164.51 feet; thence South 0° 08' 41" East 83.31 feet; thence South 89° 59' 14" West 82.26 feet; thence South 0° 08' 24" East 83.29 feet; thence North 89° 59' 55" West 82.26 feet; thence South 0° 03' 55" East 83.09 feet; thence North 89° 51' 34" West 82.43 feet; thence South 0° 03' 58" East 83.05 feet; thence North 89° 50' 14" West 82.42 feet; thence South 0° 03' 30" East 331.95 feet; thence North 89° 46' 07" West 329.53 feet; thence North 0° 03' 37" West 331.59 feet; thence South 89° 49' 39" East 164.68 feet; thence North 0° 04' 08" West 165.91 feet; thence North 0° 04' 47" West 498.64 feet; thence South 89° 57' 00" West 164.57 feet; thence North 0° 04' 11" West 184.90 feet; thence North 69° 21' 49" East 175.25 feet; thence North 0° 05' 22" West 584.25 feet; thence North 89° 43' 00" East 985.90 feet to the point of beginning.

Comment. Section 59275 continues former Fish and Game Code Section 10842 without substantive change. The refuge described in this section was formerly known as "Fish and Game District 1K."

1 **§ 59280. Firearms and other devices**

2 59280. (a) Notwithstanding any provision of law to the contrary, in the
3 Johnsville Game Refuge it shall be unlawful for any person to discharge a firearm
4 or other device capable of killing or injuring any animal.

5 (b) However, it shall not be unlawful for the lawful occupants of privately
6 owned lands or the employees of those occupants to possess firearms or other
7 devices capable of killing or injuring an animal without a permit.

8 **Comment.** Section 59280 continues the first paragraph of former Fish and Game Code Section
9 10665 without substantive change.

10 **§ 59285. Possession**

11 59285. Birds and animals lawfully taken and possessed outside of the
12 boundaries of the Johnsville Game Refuge may be possessed within the refuge.

13 **Comment.** Section 59285 continues the second paragraph of former Fish and Game Code
14 Section 10665 without substantive change.

15 Article 21. Mount Tamalpais Game Refuge

16 **§ 59300. Description**

17 59300. The following constitutes the Mount Tamalpais Game Refuge: All that
18 area within the County of Marin within the following boundaries:

19 Beginning at the intersection of the easterly shore of inner Bolinas Bay with the
20 northwesterly boundary line extended, of the Stinson ranch conveyed to A. H.
21 Stinson et al., by decree of distribution dated the 28th of July, 1911; thence
22 northwesterly along the said northwesterly boundary line to the southwesterly
23 boundary line of the lands of the Marin municipal water district on the crest of
24 Bollinas Ridge; thence northeasterly, northwesterly, and easterly along the westerly
25 and northerly boundary line of the watershed lands of the said water district to its
26 intersection with the southwesterly corner of the Rancho Canada de Herrera;
27 thence north 14 degrees west along the westerly line of said Rancho Canada de
28 Herrera to the southwesterly corner of the Bothin real estate property; thence in an
29 easterly direction along the southerly line of the said Bothin property to its
30 intersection with the westerly boundary line of the town of Fairfax; thence in a
31 general southerly direction along the westerly boundary of the said town of Fairfax
32 to its intersection with the southerly boundary line of the said Rancho Canada de
33 Herrera; thence northerly 83 degrees 15 minutes east along said southerly line
34 3,200 feet, more or less, to its intersection with the southeasterly line of the county
35 road leading from Fairfax to Bolinas; thence northerly along said road and along
36 the Fairfax-Bollinas County Road to a point in the southerly line of the right of
37 way of the Northwestern Pacific Railroad Company near Fairfax station; thence
38 along the said last-mentioned line in a southerly direction following the westerly
39 line of said railroad right of way to its intersection with the southerly line of the
40 road or highway immediately south of Alto station; thence following the southerly

1 side of said Alto-Belvedere Road and state highway easterly to its intersection
2 with the northwesterly line of the Town of Belvedere; thence following the
3 northwesterly line of the Town of Belvedere southwesterly to its extreme westerly
4 corner; thence in a direct line to the extreme northerly corner of the Town of
5 Sausalito; thence southwesterly along the northwesterly line of the Town of
6 Sausalito to its intersection with the Northwestern Pacific Railroad; thence
7 following the westerly line of the right of way of the Northwestern Pacific railroad
8 to Manzanita Station; thence southwesterly in a direct line to the Mill Valley State
9 Highway; thence westerly along the said highway to its intersection with
10 Tennessee Avenue; thence following the southerly and easterly line of Tennessee
11 Avenue, westerly and southerly, to the corner common to ranches E, F, and A, as
12 said ranches are delineated on the Tamalpais Land and Water Company's map No.
13 3; thence southwesterly along the southeasterly boundary lines of ranches E, L,
14 and K, as shown on the said last-mentioned map, to the shore of the Pacific Ocean;
15 thence northwesterly along the shore of the Pacific Ocean and across the easterly
16 end of the Bolinas sandspit, and along the easterly shore of inner Bolinas Bay, to
17 the point of beginning, excepting from the area of said Mount Tamalpais Game
18 Refuge all lands lying within incorporated areas.

19 **Comment.** Section 59300 continues former Fish and Game Code Section 10833 without
20 substantive change. The refuge described in this section was formerly known as "Fish and Game
21 District 2B."

22 **§ 59305. Take by private land owner**

23 59305. In Mt. Tamalpais Game Refuge, the lawful occupant of privately owned
24 land, or the employees of that occupant, may take on those lands, predatory, or
25 destructive birds and mammals that are not protected or fostered by any of the
26 laws of this state, and are not required to obtain permits for that taking.

27 **Comment.** Section 59305 continues former Fish and Game Code Section 10650 without
28 substantive change.

29 **§ 59310. Firearm use by high school militia**

30 59310. In the Mt. Tamalpais Game Refuge firearms may be possessed and used
31 by members of any high school militia while on the grounds of the high school at
32 which time they may be enrolled.

33 **Comment.** Section 59310 continues former Fish and Game Code Section 10651 without
34 substantive change.

35 **§ 59315. Special rules on take**

36 59315. (a) In the Mt. Tamalpais Game Refuge, no threatened, endangered, or
37 fully-protected birds or mammals may be taken under any permit issued by the
38 department.

39 (b) Except for wild pigs, it is unlawful to take any bird or mammal under a
40 permit issued by the department unless the person possessing the permit is

1 accompanied by a member of the commission, a deputy of the department, or a
2 sheriff or deputy sheriff of Marin County.

3 **Comment.** Section 59315 continues former Fish and Game Code Section 10652 without
4 substantive change.

5 Article 22. Preston School of Industry Game Refuge

6 § 59350. Description

7 59350. The Preston School of Industry Game Refuge consists of and includes
8 the following:

9 The Preston School of Industry Reservoir, which is situated on land occupied by
10 the Preston School of Industry, Ione, Amador County.

11 **Comment.** Section 59350 continues former Fish and Game Code Section 10841 without
12 substantive change.

13 TITLE 4. FISH AND GAME REFUGES

14 CHAPTER 1. FISH AND GAME REFUGES GENERALLY

15 § 59400. Fish and game refuge is both a fish refuge and game refuge

16 59400. Any refuge designated as a “fish and game refuge” shall be considered,
17 for the purposes of this part, as both a game refuge and a fish refuge.

18 **Comment.** Section 59400 continues former Fish and Game Code Section 10509 without
19 substantive change.

20 CHAPTER 2. SPECIFIC FISH AND GAME REFUGES

21 Article 1. General Provisions

22 § 59425. Described areas

23 59425. The areas described in this chapter are fish and game refuges.

24 **Comment.** Section 59425 continues former Fish and Game Code Section 10770 without
25 substantive change.

26 Article 2. San Francisco Fish and Game Refuge

27 § 59450. Description

28 59450. The following constitutes and shall be designated the San Francisco Fish
29 and Game Refuge: All that area within the County of San Mateo, within the
30 following boundaries:

31 Beginning at a point on the westerly side of the Skyline Boulevard where said
32 line crosses the fence line between the properties of the San Francisco Water
33 Department and the Jersey farm, thence following southerly the westerly line of

the Skyline Boulevard to the northerly line of the property of the Panama Realty Company, thence following in a generally southerly direction the easterly line of the property of the San Francisco Water Department to the center of the Canada Road, thence due west to the westerly line of said Canada Road, thence southerly along the westerly line of said road to the southerly line of the property of the San Francisco Water Department, thence westerly following the southerly line of the San Francisco Water Department to the Skyline Boulevard, thence northerly following the easterly line of the Skyline Boulevard to its intersection with the easterly line of the Carry E. Bridge property, thence following northerly the easterly line of the said Carry E. Bridge property to its intersection with the easterly line of the Skyline Boulevard, thence northerly following the easterly line of the said Skyline Boulevard to the Half Moon Bay Road, thence crossing the said Skyline Boulevard and said Half Moon Bay Road to the westerly line of the property of the San Francisco Water Department on the northerly side of said Half Moon Bay Road, thence following the westerly line of the San Francisco Water Department in a generally northwesterly direction to the point of beginning.

Comment. Section 59450 continues former Fish and Game Code Section 10771 without substantive change.

§ 59455. Transport of animals

59455. In the San Francisco Fish and Game Refuge, birds, mammals, fish, amphibians, and reptiles legally possessed may be carried openly by persons traveling through the refuge on public roads, between one-half hour before sunrise and one-half hour after sunset.

Comment. Section 59455 continues former Fish and Game Code Section 10653 without substantive change.

Note. Existing Section 10653 refers to the “San Francisco Game Refuge.” There is no game refuge with that name. However, there is a “San Francisco Fish and Game Refuge” (which, by law, is treated as both a fish refuge and game refuge). It seems probable that Section 10653 was intended to apply to the San Francisco Fish and Game Refuge. In proposed Section 59455, the provision is revised and located accordingly. **The Commission invites comment on whether that would cause any problems.**

§ 59460. Use of land for water supply purposes

59460. Nothing in this part prevents the full use of the land included in the San Francisco Fish and Game Refuge for water supply purposes, nor prohibits any authorized employee of the San Francisco water department from carrying out any reasonable measures that may be necessary for the protection of the water supply or the prevention of pollution of the streams or reservoirs.

Comment. Section 59460 continues former Fish and Game Code Section 10654 without substantive

Note. Existing Section 10654 refers to the “San Francisco Game Refuge.” There is no game refuge with that name. However, there is a “San Francisco Fish and Game Refuge” (which, by law, is treated as both a fish refuge and game refuge). It seems probable that Section 10654 was

intended to apply to the San Francisco Fish and Game Refuge. In proposed Section 59460, the provision is revised and located accordingly. **The Commission invites comment on whether that would cause any problems.**

TITLE 5. WATERFOWL REFUGES

CHAPTER 1. WATERFOWL REFUGES GENERALLY

§ 59500. Prohibition

59500. Except under a permit or specific authorization, it is unlawful to take or possess a bird, discharge a firearm or BB device, or release an arrow or crossbow bolt, within or into a waterfowl refuge.

Comment. Section 59500 continues former Fish and Game Code Section 10500(d) without substantive change.

See also Section 6102 (enforcement).

CHAPTER 2. SPECIFIC WATERFOWL REFUGES

Article 1. General Provisions

§ 59525. Described areas

59525. The areas described in this chapter are waterfowl refuges.

Comment. Section 59525 continues former Fish and Game Code Section 10860 without substantive change.

Article 2. San Leandro Waterfowl Refuge

§ 59550. Description

59550. The following constitutes a waterfowl refuge and shall be designated the San Leandro Waterfowl Refuge: All the area within the County of Alameda, within the following boundaries:

Beginning at the Bay Farm Island Bridge, in Alameda, thence in a southerly direction, following the levee on westerly side of San Leandro Bay to the Hagenburger Road, thence in a northeasterly direction along said Hagenburger Road to a point where the Pacific Gas and Electric tower line crosses said Hagenburger Road, thence following said Pacific Gas and Electric tower line to the Pacific Gas and Electric substation at the foot of Fiftieth Avenue in Oakland, thence in a westerly direction along the high tide line of San Leandro Bay to the point of beginning.

Comment. Section 59550 continues former Fish and Game Code Section 10861 without substantive change.

1 TITLE 6. MARINE LIFE REFUGES

2 CHAPTER 1. MARINE LIFE REFUGES GENERALLY

3 § 59600. Prohibition

4 59600. Except under a permit or specific authorization, it is unlawful to take or
5 possess an invertebrate or specimen of marine plant life in a marine life refuge.

6 **Comment.** Section 59600 continues former Fish and Game Code Section 10500(f) without
7 substantive change.

8 See also Section 6102 (enforcement).

9 CHAPTER 2. SPECIFIC MARINE LIFE REFUGES

10 Article 1. General Provisions

11 § 59625. Described areas

12 59625. The areas described in this chapter are marine life refuges.

13 **Comment.** Section 59625 continues former Fish and Game Code Section 10900 without
14 substantive change.

15 Article 2. Bodega Marine Life Refuge

16 § 59650. Description

17 59650. The following constitutes a marine life refuge and shall be designated the
18 Bodega Marine Life Refuge:

19 That portion of District 2590 consisting of that certain parcel of land bounded by
20 the line of Mean High Tide of the Pacific Ocean lying between the northern
21 boundary extended northwesterly and the southern boundary extended
22 southwesterly of the lands of the Regents of the University of California according
23 to the final order of condemnation in Case No. 47,617 in the Superior Court of the
24 State of California in and for the County of Sonoma, recorded in Book 1930, at
25 pages 656 and 659, inclusive, Official Records, Sonoma County, California, and
26 extending into and including the state waters of the State of California for a
27 distance of a thousand feet into the Pacific Ocean from the line of Mean High
28 Tide.

29 **Comment.** Section 59650 continues former Fish and Game Code Section 10903 without
30 substantive change.

31 § 59655. Director

32 59655. (a) The director may appoint the Director of the Bodega Marine Life
33 Refuge.

34 (b) The Director of the Bodega Marine Life Refuge may authorize any person to
35 enter the Bodega Marine Life Refuge for the purpose of taking fish, invertebrates,

1 or marine plants for scientific study and to take or possess fish, invertebrates, or
2 marine plants for scientific study.

3 (c) The Director of the Bodega Marine Life Refuge may authorize any person to
4 anchor a vessel in the Bodega Marine Life Refuge for the purpose of scientific
5 study.

6 **Comment.** Section 59655 continues former Fish and Game Code Section 10502.7 without
7 substantive change.

8 **§ 59670. Prohibitions**

9 59670. (a) Except as expressly provided in this part, it is unlawful to enter the
10 Bodega Marine Life Refuge for the purpose of taking or possessing any fish,
11 marine invertebrate, or marine plant, or to take or possess any fish, marine
12 invertebrate, or marine plant in the Bodega Marine Life Refuge.

13 (b) Except as permitted by federal law or emergency caused by hazardous
14 weather, it is unlawful to anchor or moor a vessel in the Bodega Marine Life
15 Refuge without authorization by the Director of the Bodega Marine Life Refuge
16 pursuant to Section 59655.

17 (c) This section does not prohibit or restrict navigation in the Bodega Marine
18 Life Refuge pursuant to federal law.

19 **Comment.** Section 59670 continues former Fish and Game Code Section 10656 without
20 substantive change.

21 **§ 59675. University of California**

22 59675. In the Bodega Marine Life Refuge, licensees of the Regents of the
23 University of California and all officers, employees, and students of that university
24 may take, for scientific purposes, any invertebrate or specimen of marine plant life
25 without a permit from the department.

26 **Comment.** Section 59675 continues former Fish and Game Code Section 10661 without
27 substantive change.

28 **Article 3. Catalina Marine Science Center Marine Life Refuge**

29 **§ 59700. Description**

30 59700. The following constitutes a marine life refuge and shall be designated the
31 Catalina Marine Science Center Marine Life Refuge:

32 All that area bounded on the south and southeast by the mean high tide line and
33 by the present seaward boundary of the lease to tide and submerged lands now
34 held by the University of Southern California from the State Lands Commission
35 (No. 3692.1 Public Resources Code Series) and extending from a point on the
36 mean high tide line at 33° 26' 39" North Latitude 118° 29' 19" West Longitude,
37 thence to 33° 26' 50" North Latitude 118° 29' 08" West Longitude, thence to 33°
38 26' 57.5" North Latitude 118° 28' 33.5" West Longitude, thence to 33° 26' 55"

1 North Latitude 118° 28' 32" West Longitude, and thence to a point on the mean
2 high tide line at 33° 26' 53.5" North Latitude 118° 28' 35" West Longitude.

3 **Comment.** Section 59700 continues former Fish and Game Code Section 10932 without
4 substantive change.

5 **§ 59705. Director**

6 59705. (a) The director may appoint the Director of the Catalina Marine Science
7 Center Marine Life Refuge.

8 (b) The Director of the Catalina Marine Science Center Marine Life Refuge may
9 authorize any person to enter the Catalina Marine Science Center Marine Life
10 Refuge for the purpose of taking fish or marine plants under the conditions that the
11 department determines necessary for the protection and propagation of fish and
12 wildlife and related scientific purposes in that refuge.

13 (c) The Director of the Catalina Marine Science Center Marine Life Refuge,
14 upon recommendation of the Director of the Catalina Marine Science Center, may
15 authorize any person involved in oceanographic and scientific research in and
16 around Santa Catalina Island to anchor or moor a vessel in the Catalina Marine
17 Science Center Marine Life Refuge.

18 **Comment.** Section 59705 continues former Fish and Game Code Section 10502.8 without
19 substantive change.

20 **§ 59710. Prohibitions**

21 59710. (a) Except as expressly provided in this part, it is unlawful to enter the
22 Catalina Marine Science Center Marine Life Refuge for the purpose of taking or
23 possessing any fish or marine plants or to take or possess any fish or marine plants
24 in the Catalina Marine Science Center Marine Life Refuge.

25 (b) Except as permitted by federal law or emergency caused by hazardous
26 weather, it is unlawful to anchor or moor a vessel in the Catalina Marine Science
27 Center Marine Life Refuge without authorization by the Director of the Catalina
28 Marine Science Center Marine Life Refuge pursuant to Section 59705.

29 (c) Section 59715 and this section do not prohibit or restrict navigation in the
30 Catalina Marine Science Center Marine Life Refuge pursuant to federal law.

31 **Comment.** Section 59710 continues former Fish and Game Code Section 10655.5 without
32 substantive change.

33 **§ 59715. Exceptions to prohibitions**

34 59715. (a) A person involved in oceanographic and scientific research in and
35 around Santa Catalina Island may be authorized by the Director of the Catalina
36 Marine Science Center Marine Life Refuge to enter the Catalina Marine Science
37 Center Marine Life Refuge and to anchor or moor a vessel therein.

38 (b) The Director of the Catalina Marine Science Center Marine Life Refuge, or
39 any person that the Director of the Catalina Marine Science Center Marine Life
40 Refuge has authorized under Section 59705, may take, for scientific purposes, any

1 fish or specimen of marine plant life under the conditions prescribed by the
2 department under Section 59705.

3 **Comment.** Section 59715 continues former Fish and Game Code Section 10655 without
4 substantive change.

5 Article 4. City of Encinitas Marine Life Refuge

6 § 59750. Description

7 59750. The land and ocean waters within the following boundaries constitute the
8 City of Encinitas Marine Life Refuge:

9 All those submerged lands lying between the mean high tide line in the City of
10 Encinitas, County of San Diego, State of California, and a line which is 600 feet
11 westerly of and parallel and concentric with that mean high tide line and lying
12 southerly of the westerly prolongation of the northerly right-of-way line of “D”
13 Street as shown on Map No. 148, in the City of Encinitas, County of San Diego,
14 State of California, filed in the office of the County Recorder of San Diego
15 County, and lying northerly of the following described line:

16 Beginning at the southeasterly corner of Lot N in Block 3 of Resubdivision of
17 Sea Cliff Villa, in the City of Encinitas, County of San Diego, State of California,
18 filed in the San Diego County Recorder’s office, December 10, 1914; thence
19 southwesterly along the southwesterly prolongation of the southeasterly line of
20 said Lot N, South 36°36’30” west, to a point on that line which is 600 feet
21 westerly of and parallel and concentric with the mean high tide line.

22 **Comment.** Section 59750 continues former Fish and Game Code Section 10913 without
23 substantive change.

24 Article 5. Dana Point Marine Life Refuge

25 § 59775. Description

26 59775. The following constitutes a marine life refuge and shall be designated as
27 the Dana Point Marine Life Refuge:

28 That portion of District 2625 consisting of land and ocean waters bounded by a
29 line commencing at Station 70 of the mean high tide line as shown on Document
30 Number 25208 recorded in Book 7651, page 69 of Official Records on file in the
31 Office of County Recorder of Orange County; thence along the mean high tide
32 line westerly and northerly 3500 feet more or less to intersection with a line which
33 is 2440 feet south of and parallel to the north line of Fractional Section 21, R. 8
34 W., T. 8 S., S.B.M.’; thence west 1200 feet; thence southerly and easterly 1200
35 feet from and parallel to the shore line to an intersection with a line which bears S
36 40° 00’ E. from said Station 70; thence N 40° 00’ W. 1200 feet more or less to the
37 point of beginning.

38 **Comment.** Section 59775 continues former Fish and Game Code Section 10907 without
39 substantive change.

1 **§ 59780. Director**

2 59780. (a) The director may appoint a Director of the Dana Point Marine Life
3 Refuge.

4 (b) Except as otherwise provided in this section, no state funds, including, but
5 not limited to, the Fish and Game Preservation Fund, shall be used to pay the
6 compensation or expenses of the Director of the Dana Point Marine Life Refuge.
7 A city, county, or special district may use any funds, including state funds
8 appropriated to the city, county, or special district, to pay the compensation and
9 expenses of the director and a public postsecondary educational institution may
10 use private or state funds to pay the compensation and expenses of the director.

11 (c) The Director of the Dana Point Marine Life Refuge may issue a permit
12 authorizing any person to enter the Dana Point Marine Life Refuge for the purpose
13 of taking fish or marine plants under the conditions that the department determines
14 to be necessary for the protection and propagation of fish and wildlife and related
15 scientific purposes in that refuge.

16 (d) The Director of the Dana Point Marine Life Refuge shall erect and maintain
17 signs identifying the boundaries of the Dana Point Marine Life Refuge. The signs
18 shall contain notification regarding the permit requirements of the refuge. The
19 signs shall specify that an access permit shall be obtained from the Director of the
20 Dana Point Marine Life Refuge and a scientific collector's permit from the
21 department in order to take any fish or specimen of marine plant life.

22 **Comment.** Section 59780 continues former Fish and Game Code Section 10502.6 without
23 substantive change.

24 **§ 59785. Take**

25 59785. (a) In the Dana Point Marine Life Refuge below the intertidal zone, the
26 following fish, mollusks, and crustaceans may be taken under the authority of a
27 sportfishing license as authorized by this code: abalone (subject to the moratorium
28 imposed under Section 45800), lobster, rockfish (Scorpaenidae), greenling, ling
29 cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass,
30 barred sand bass, sargo, croaker, queenfish, corbina, white seabass, opaleye,
31 halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead, bonito,
32 California halibut, sole, turbot, and sanddab.

33 (b) All other fish and forms of aquatic life are protected and may not be taken
34 without a written permit from the department.

35 (c) Fin fish shall be taken only by hook and line or by spearfishing gear.

36 **Comment.** Section 59785 continues former Fish and Game Code Section 10667(a) without
37 substantive change.

38 **§ 59790. Entry prohibition**

39 59790. Except as expressly provided in this article, it is unlawful to enter the
40 intertidal zone in the Dana Point Marine Life Refuge for the purpose of taking or
41 possessing, or to take or possess, any species of fish, plant, or invertebrate, or part

thereof, to use or have in possession any contrivance designed to be used for catching fish, to disturb any native plant, fish, wildlife, aquatic organism, or to take or disturb any natural geological feature.

Comment. Section 59790 generalizes the first sentence of former Fish and Game Code Section 10667(b) without substantive change.

Note. Existing Section 10667(b) refers to “this section.” Proposed Section 59790 would broaden that provision to refer to “this article.” This would include Section 10502.6 within the scope of the reference. **The Commission invites comment on whether that change would cause any problem.**

§ 59795. Exceptions to prohibitions

59795. (a) Section 59790 does not prohibit persons from entering the intertidal zone for the purpose of entertainment, recreation, and education while having a minimum impact on the intertidal environment and the living organisms therein. For this purpose, minimum impact includes foot traffic, general observation of organisms in their environment with immediate replacement of any unattached organisms to their natural location after temporary lifting for examination, and photography. Minimum impact does not include removal of attached organisms from their environment, gathering of fishing bait, littering, collecting rocks and shells, or turning rocks or other acts destructive to the environment.

(b) Notwithstanding Sections 59785 and 59790, the Director of the Dana Point Marine Life Refuge, or any person, who has a scientific collector’s permit from the department, to whom the Director of the Dana Point Marine Life Refuge has issued a permit pursuant to Section 59780, may take, for scientific purposes, any fish or specimen of marine plant life under the conditions prescribed by the department pursuant to Section 59780.

(c) This article does not prohibit the entry of state and local law enforcement officers, fire suppression agencies, and employees of the department in the performance of their official duties.

(d) This article does not prohibit or restrict navigation in the Dana Point Marine Life Refuge pursuant to federal law.

Comment. Subdivision (a) of Section 59795 continues the second through fourth sentences of former Fish and Game Code Section 10667(b) without substantive change.

Subdivision (b) continues former Fish and Game Code Section 10667(d).

Subdivision (c) continues the first sentence of former Fish and Game Code Section 10667(e).

Subdivision (d) continues the second sentence of former Fish and Game Code Section 10667(e).

Note. Existing Section 10667(e) refers twice to “this section.” Proposed Section 59795(c) and (d) would broaden that language to refer to “this article.” This would include Section 10502.6 within the scope of the references. **The Commission invites comment on whether that change would cause any problem.**

1 **§ 59800. “Intertidal zone” defined**

2 59800. For the purposes of this article, “intertidal zone” means the area of the
3 refuge between the mean lower low-water mark and the mean high-tide line
4 described in Section 59775.

5 **Comment.** Section 59800 continues former Fish and Game Code Section 10667(c) without
6 substantive change.

7 Article 6. Doheny Beach Marine Life Refuge

8 **§ 59825. Description**

9 59825. The following constitutes a marine life refuge and shall be designated as
10 the Doheny Beach Marine Life Refuge:

11 All that area lying 600 feet seaward of and below the mean high tide line of the
12 Pacific Ocean between the prolongation of the line common to Blocks A and B of
13 Tract No. 797, Capistrano Beach #3, in the County of Orange, State of California,
14 as per map recorded in Book 25, pages 10 to 15, inclusive, of Miscellaneous Maps
15 in the office of the County Recorder of such county, such line also being the
16 prolongation of the easterly line of Doheny State Beach, a unit of the State Park
17 System acquired by deed dated April 29, 1957, from the Union Oil Company of
18 California, recorded on October 9, 1957, in Book 4063 of Official Records at page
19 88, Orange County, California, and the east breakwater of the Dana Point Harbor,
20 a project of the Orange County Harbor District, a political subdivision of the State
21 of California.

22 **Comment.** Section 59825 continues former Fish and Game Code Section 10908 without
23 substantive change.

24 **§ 59830. Take of fish in refuge**

25 59830. (a) In the Doheny Beach Marine Life Refuge, the following fish,
26 mollusks, and crustaceans may be taken under the authority of a sportfishing
27 license as authorized by this code: abalone, lobster, rockfish (Scorpaenidae),
28 greenling, ling cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted
29 sand bass, barred sand bass, sargo, croaker, queenfish, corbina, white seabass,
30 opaleye, halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead,
31 bonito, California halibut, sole, turbot, and sanddab.

32 (b) Fin fish shall be taken only by hook and line or by spearfishing gear.

33 (c) All other fish and forms of aquatic life are protected and may not be taken
34 without a written permit from the department.

35 **Comment.** Section 59830 continues former Fish and Game Code Section 10664, as it relates to
36 the Doheny Beach Marine Refuge without substantive change.

Article 7. Hopkins Marine Life Refuge

§ 59850. Description

59850. That portion of District 2610 consisting of the land and ocean waters within the following boundaries constitutes a marine life refuge and shall be designated the Hopkins Marine Life Refuge:

Beginning at the point of intersection of the southeasterly corporate limit line of the City of Pacific Grove prolonged, and the line of highest tide of the Bay of Monterey; thence northwesterly along said line of highest tide to the intersection with the northerly extension of the west side of Third Street in said city; thence northerly to a point in said bay where the depth of water is 60 feet measured from the level of mean low tide; thence southeasterly along the line in said bay which line is at a constant depth of 60 feet measured from the level of mean low tide to the intersection with the southeasterly corporate limit line of said city prolonged; thence S. 58° 57' 45" W. along said southeasterly corporate limit line prolonged to the point of beginning.

Comment. Section 59850 continues former Fish and Game Code Section 10901 without substantive change.

§ 59855. Director

59855. The director may appoint the Director of the Hopkins Marine Life Refuge.

Comment. Section 59855 continues the first sentence of former Fish and Game Code Section 10502.5 without substantive change.

§ 59860. Special prohibition

59860. Except as expressly provided in this part, it is unlawful to enter the Hopkins Marine Life Refuge for the purpose of taking or possessing any fish or marine plants or to take or possess any fish or marine plants in the Hopkins Marine Life Refuge.

Comment. Section 59860 continues the first paragraph of former Fish and Game Code Section 10657.5 without substantive change.

§ 59865. Exceptions to prohibition

59865. (a) A person may be permitted by the Director of the Hopkins Marine Life Refuge to enter the Hopkins Marine Life Refuge under a permit.

(b) The Director of the Hopkins Marine Life Refuge, or any person to whom the Director of the Hopkins Marine Life Refuge has issued a permit under subdivision (c) of Section 59865, may take, for scientific purposes, any fish or specimen of marine plant life under the conditions prescribed by the department under subdivision (c) of Section 59865.

(c) The Director of the Hopkins Marine Life Refuge may issue a permit to any person under which the person may enter the Hopkins Marine Life Refuge for the

1 purpose of taking fish or marine plants under the conditions that the department
2 determines necessary for the protection and propagation of fish and wildlife and
3 related scientific purposes in that refuge.

4 (d) This section and Section 59860 do not prohibit or restrict navigation in the
5 Hopkins Marine Life Refuge pursuant to federal law.

6 **Comment.** Subdivisions (a) and (b) of Section 59865 continues former Fish and Game Code
7 Section 10657 without substantive change.

8 Subdivision (c) continues the second sentence of former Fish and Game Code Section 10502.5
9 without substantive change.

10 Subdivision (d) continues the second paragraph of former Fish and Game Code Section
11 10657.5 without substantive change.

12 Article 8. Irvine Coast Marine Life Refuge

13 § 59900. Description

14 59900. The following constitutes a marine life refuge and shall be designated as
15 the Irvine Coast Marine Life Refuge:

16 That portion of California state tide and submerged lands adjoining the Newport
17 Beach Marine Life Refuge as described in Section 59975 and bounded by a line
18 beginning at the intersection of the southwesterly extension of lot 141, Tract No.
19 3357 as shown on a map recorded in Book 107, Page 1 of Miscellaneous Maps on
20 file in the office of the County Recorder, Orange County and the Line of Ordinary
21 High Tide; thence, southeasterly along the Line of Ordinary High Tide
22 approximately 20,000 feet to its intersection with the southwesterly extension of
23 the northwesterly boundary line of the City of Laguna Beach; thence,
24 southwesterly along such southwesterly extension 600 feet; thence, northwesterly
25 along a line parallel to and 600 feet southwesterly of the Line of Ordinary High
26 Tide to the southwesterly extension of said lot 141; thence, northeasterly 600 feet
27 along such southwesterly extension to the point of beginning.

28 **Comment.** Section 59900 continues former Fish and Game Code Section 10912 without
29 substantive change.

30 § 59905. Take of fish in refuge

31 59905. (a) In the Irvine Coast Marine Life Refuge, the following fish, mollusks,
32 and crustaceans may be taken under the authority of a sportfishing license as
33 authorized by this code: abalone, lobster, rockfish (Scorpaenidae), greenling, ling
34 cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass,
35 barred sand bass, sargo, croaker, queenfish, corbina, white seabass, opaleye,
36 halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead, bonito,
37 California halibut, sole, turbot, and sanddab.

38 (b) Fin fish shall be taken only by hook and line or by spearfishing gear.

39 (c) All other fish and forms of aquatic life are protected and may not be taken
40 without a written permit from the department.

1 **Comment.** Section 59905 continues former Fish and Game Code Section 10664, as it relates to
2 the Irvine Coast Marine Refuge without substantive change.

3 Article 9. James V. Fitzgerald Marine Reserve

4 **§ 59925. Description**

5 59925. The following constitutes a marine life refuge and shall be designated the
6 James V. Fitzgerald Marine Reserve:

7 That portion of District 2590 consisting of that certain parcel of land bounded by
8 a line commencing at the mean high tide of the Pacific Ocean lying on a line
9 beginning at the northeasterly corner of Lot 8, Block 42 as said Lot and Block are
10 shown on “Map of Moss Beach Heights San Mateo County Cal”, recorded May 4,
11 1908, in Volume 6 of Maps at page 8, records of San Mateo County; thence North
12 88° 49′ West along the northerly line of said Lot 8 and its Northwesterly
13 prolongation to the intersection thereof with the Westerly line of that certain tract
14 of land (Parcel No. 1) conveyed to the County of San Mateo for a marine reserve,
15 recorded August 8, 1967, in Volume 5346 Official Records of San Mateo County
16 at page 62 (70483-AA) last mentioned intersection being the shoreline of the
17 Pacific Ocean (ordinary high water) and the true Point of Beginning along the
18 prolongation of the Northerly Line of said Lot 8, North 88° 49′ West, 1000 feet,
19 into the Pacific Ocean and thence generally Southerly and generally parallel to the
20 shoreline for a distance of approximately three statute miles to the extension of a
21 line beginning at the most Southerly terminus of Course No. 15 of the survey of
22 the Rancho Corral de Tierra as shown on a Plat thereof on file in the Office of the
23 Bureau of Land Management, U. S. Department of the Interior; said most
24 Southerly terminus also being distant on said Course No. 15, South 28° 30′ East
25 269.91 feet from the most Southerly corner of that certain 10.380 acre tract of land
26 conveyed to the United States of America by Deed dated June 18, 1940, recorded
27 October 28, 1940 in Book 918 of Official Records at page 373; running thence
28 from said point of beginning along a line that is the Southwesterly prolongation of
29 Course No. 14 of said survey, South 74° 45′ West to the shoreline of the Pacific
30 Ocean (ordinary high water) and the true point of beginning of the least area
31 herein described; thence from said true point of beginning along the prolongation
32 of said Course No. 14, South 74° 45′ West, 1000 feet into the Pacific Ocean,
33 thence Easterly along said line to the mean high tide line, thence generally
34 Northerly along the line of the mean high tide to the point of beginning.

35 **Comment.** Section 59925 continues former Fish and Game Code Section 10909 without
36 substantive change.

37 **§ 59930. Take of fish in refuge**

38 59930. (a) In the James V. Fitzgerald Marine Reserve, the following fish and
39 mollusks may be taken under the authority of a sport fishing license as authorized
40 by this code: abalone, rockfish (Sebastes), lingcod, surfperch (Embiotocidae),

1 monkeyface eel, rock eel, white croaker, halibut, cabezon (*Scorpaenichthys*
2 *marmoratus*), kelp greenling (*Hexagrammos decagrammus*), and smelt (*Osmeridae*
3 and *Antherinidae*).

4 (b) No fish listed in subdivision (a) that has fins may be taken except by hook
5 and line or by spearfishing.

6 (c) All other fish and forms of aquatic life are protected and may not be taken
7 without a written permit from the department.

8 **Comment.** Section 59930 continues former Fish and Game Code Section 10666 without
9 substantive change.

10 Article 10. Laguna Beach Marine Life Refuge

11 § 59950. Description

12 59950. The following constitutes a marine life refuge and shall be designated as
13 the Laguna Beach Marine Life Refuge:

14 That portion of District 2625 consisting of that certain parcel of land bounded by
15 a line commencing at the mean high tide of the Pacific Ocean lying on the
16 northern boundary of the City of Laguna Beach and running for a distance of 600
17 feet into the Pacific Ocean along that boundary, and thence generally
18 southeastward and generally parallel to the shoreline at a distance of
19 approximately 600 feet to the northern boundary of the South Laguna Beach
20 Marine Life Refuge, and thence generally northeastward for a distance of
21 approximately 700 feet to the mean high tide, and thence generally northwestward
22 along the line of mean high tide to the point of beginning.

23 **Comment.** Section 59950 continues former Fish and Game Code Section 10904 without
24 substantive change.

25 § 59955. Take of fish in refuge

26 59955. (a) In the Laguna Beach Marine Life Refuge, the following fish,
27 mollusks, and crustaceans may be taken under the authority of a sportfishing
28 license as authorized by this code: abalone, lobster, rockfish (*Scorpaenidae*),
29 greenling, ling cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted
30 sand bass, barred sand bass, sargo, croaker, queenfish, corbina, white seabass,
31 opaleye, halfmoon, surfperch (*Embiotocidae*), blacksmith, barracuda, sheephead,
32 bonito, California halibut, sole, turbot, and sanddab.

33 (b) Fin fish shall be taken only by hook and line or by spearfishing gear.

34 (c) All other fish and forms of aquatic life are protected and may not be taken
35 without a written permit from the department.

36 **Comment.** Section 59955 continues former Fish and Game Code Section 10664, as it relates to
37 the Laguna Beach Marine Refuge without substantive change.

Article 11. Newport Beach Marine Life Refuge

§ 59975. Description

59975. The following constitutes a marine life refuge and shall be designated as the Newport Beach Marine Life Refuge:

That portion of District 2625 consisting of that certain parcel of land bounded by the line of Mean High Tide of the Pacific Ocean between the eastern boundary of the City of Newport Beach and Poppy Avenue in the City of Newport Beach, and extending into and including the state waters of the State of California for a distance of two hundred feet into the Pacific Ocean from the line of Mean High Tide.

Comment. Section 59975 continues former Fish and Game Code Section 10905 without substantive change.

§ 59980. Take of fish in refuge

59980. (a) In the Newport Beach Marine Life Refuge, the following fish, mollusks, and crustaceans may be taken under the authority of a sportfishing license as authorized by this code: abalone, lobster, rockfish (Scorpaenidae), greenling, ling cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass, barred sand bass, sargo, croaker, queenfish, corbina, white seabass, opaleye, halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead, bonito, California halibut, sole, turbot, and sanddab.

(b) Fin fish shall be taken only by hook and line or by spearfishing gear.

(c) All other fish and forms of aquatic life are protected and may not be taken without a written permit from the department.

Comment. Section 59980 continues former Fish and Game Code Section 10664, as it relates to the Newport Beach Marine Refuge without substantive change.

Article 12. Niguel Marine Life Refuge

§ 60000. Description

60000. The following constitutes a marine life refuge and shall be designated as the Niguel Marine Life Refuge: That portion of California state tide and submerged lands bounded by a line commencing at a point which is the intersection of the line of mean high tide and a line which is 2,440 feet south of and parallel to the north line of Fractional Section 21, R.8W., T.8S., S.B.M., such point also being on the north boundary of the Dana Point Marine Life Refuge, thence along the mean high tide line northerly and westerly 12,000 feet more or less to its intersection with the westerly prolongation of the most northerly boundary line of lot 101 of "Three Arches Palisades No. 1" as shown on a map filed in book 3, page 3, Records of Surveys in the Office of the County Recorder, Orange County; thence, S. 89° 54' W. 1,200 feet from such point of intersection along the westerly prolongation of such northerly boundary line; thence, south and

1 west, and east parallel to and 1,200 feet from the line of mean high tide to a point
2 on the north line of Dana Point Marine Life Refuge and also being 1,200 feet west
3 of the point of beginning; thence, east 1,200 feet along the northerly boundary of
4 Dana Point Marine Life Refuge to the point of beginning.

5 **Comment.** Section 60000 continues former Fish and Game Code Section 10911 without
6 substantive change.

7 **§ 60005. Take of fish in refuge**

8 60005. (a) In the Niguel Marine Life Refuge, the following fish, mollusks, and
9 crustaceans may be taken under the authority of a sportfishing license as
10 authorized by this code: abalone, lobster, rockfish (Scorpaenidae), greenling, ling
11 cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass,
12 barred sand bass, sargo, croaker, queenfish, corbina, white seabass, opaleye,
13 halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead, bonito,
14 California halibut, sole, turbot, and sanddab.

15 (b) Fin fish shall be taken only by hook and line or by spearfishing gear.

16 (c) All other fish and forms of aquatic life are protected and may not be taken
17 without a written permit from the department.

18 **Comment.** Section 60005 continues former Fish and Game Code Section 10664, as it relates to
19 the Niguel Marine Refuge without substantive change.

20 **Article 13. Point Fermin Marine Life Refuge**

21 **§ 60025. Description**

22 60025. The following constitutes a marine life refuge and shall be designated as
23 the Point Fermin Marine Life Refuge:

24 That portion of District 2625 consisting of land and ocean waters bounded by
25 the line of mean high tide of the Pacific Ocean extending into and including the
26 state waters of the State of California for a distance of 600 feet below low-tide
27 mark, in the San Pedro area of the City of Los Angeles in an area generally
28 parallel to the shoreline lying between the easterly extension of 40th Street,
29 westerly to the southerly extension of Gaffey Street at Point Fermin.

30 **Comment.** Section 60025 continues former Fish and Game Code Section 10910 without
31 substantive change.

32 **§ 60030. Take of fish in refuge**

33 60030. (a) In the Point Fermin Marine Life Refuge, the following fish, mollusks,
34 and crustaceans may be taken under the authority of a sportfishing license as
35 authorized by this code: abalone, lobster, rockfish (Scorpaenidae), greenling, ling
36 cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted sand bass,
37 barred sand bass, sargo, croaker, queenfish, corbina, white seabass, opaleye,
38 halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead, bonito,
39 California halibut, sole, turbot, and sanddab.

- 1 (b) Fin fish shall be taken only by hook and line or by spearfishing gear.
2 (c) All other fish and forms of aquatic life are protected and may not be taken
3 without a written permit from the department.
4 **Comment.** Section 60030 continues former Fish and Game Code Section 10664, as it relates to
5 the Point Fermin Marine Refuge without substantive change.

6 Article 14. San Diego Marine Life Refuge

7 **§ 60050. Description**

8 60050. The following constitutes a marine life refuge and shall be designated the
9 San Diego Marine Life Refuge:

10 That portion of District 2625 consisting of that certain strip of land lying
11 between the westerly edge of Pueblo Lot No. 1298 of the pueblo lands of the City
12 of San Diego, according to the official map of said pueblo lands as made by James
13 Pascoe, and filed in the Office of the County Recorder of said County of San
14 Diego, and the lowest tide line opposite to and west of said pueblo lot, which said
15 strip of land is bounded on the north by the northerly boundary line of said pueblo
16 lot extended westerly and on the south by the southerly boundary line of said
17 pueblo lot extended westerly; together with the state waters of the State of
18 California adjacent thereto, being those state waters which lie between said
19 extended northerly and southerly boundaries of said pueblo lot and extend
20 westerly from said lowest low tide line for a distance of 1,000 feet.

21 **Comment.** Section 60050 continues former Fish and Game Code Section 10902 without
22 substantive change.

23 **§ 60055. University of California**

24 60055. In the San Diego Marine Life Refuge, licensees of the Regents of the
25 University of California and all officers, employees, and students of such
26 university may take, for scientific purposes, any invertebrate or specimen of
27 marine plant life without a permit from the department.

28 **Comment.** Section 60055 continues former Fish and Game Code Section 10658 without
29 substantive change.

30 Article 15. South Laguna Beach Marine Life Refuge

31 **§ 60075. Description**

32 60075. The following constitutes a marine life refuge and shall be designated as
33 the South Laguna Beach Marine Life Refuge:

34 That portion of District 2625 consisting of land and ocean waters bounded by a
35 line commencing at the intersection of the line of mean high tide of the Pacific
36 Ocean and a line which bears South 48° 50' 00" West from the most westerly
37 point of Lot 75 of Tract No. 702, as that tract is shown on a map recorded in Book
38 21, pages 1 to 3, Miscellaneous Maps, on file in the Office of the County Recorder

1 of Orange County; thence running South 48° 50′ 00″ West approximately 600 feet
2 to the minus 20 foot mean lower low water contour; thence southeasterly and
3 generally parallel to the shoreline to the northerly boundary of the Niguel Marine
4 Life Refuge; thence North 35° 57′ 06″ East to the line of mean high tide of the
5 Pacific Ocean; thence northwesterly along the line of mean high tide of the Pacific
6 Ocean to the point of beginning.

7 **Comment.** Section 60075 continues former Fish and Game Code Section 10906 without
8 substantive change.

9 **§ 60080. Take of fish in refuge**

10 60080. (a) In the South Laguna Beach Marine Life Refuge, the following fish,
11 mollusks, and crustaceans may be taken under the authority of a sportfishing
12 license as authorized by this code: abalone, lobster, rockfish (Scorpaenidae),
13 greenling, ling cod, cabezon, yellowtail, mackerel, bluefin tuna, kelp bass, spotted
14 sand bass, barred sand bass, sargo, croaker, queenfish, corbina, white seabass,
15 opaleye, halfmoon, surfperch (Embiotocidae), blacksmith, barracuda, sheephead,
16 bonito, California halibut, sole, turbot, and sanddab.

17 (b) Fin fish shall be taken only by hook and line or by spearfishing gear.

18 (c) All other fish and forms of aquatic life are protected and may not be taken
19 without a written permit from the department.

20 **Comment.** Section 60080 continues former Fish and Game Code Section 10664, as it relates to
21 the South Laguna Beach Marine Refuge without substantive change.

22 **TITLE 7. QUAIL REFUGES**

23 **CHAPTER 1. QUAIL REFUGES GENERALLY**

24 **§ 60200. Prohibition**

25 60200. Except under a permit or specific authorization, it is unlawful to take or
26 possess a quail in a quail refuge.

27 **Comment.** Section 60200 continues former Fish and Game Code Section 10500(e) without
28 substantive change.

29 See also Section 6102 (enforcement).

30 **CHAPTER 2. SPECIFIC QUAIL REFUGES**

31 **Article 1. General Provisions**

32 **§ 60225. Described areas**

33 60225. The areas described in this chapter are quail refuges.

34 **Comment.** Section 60225 continues former Fish and Game Code Section 10880 without
35 substantive change.

Article 2. Bolinas Quail Refuge

§ 60250. Description

60250. The following constitutes a quail refuge and shall be designated the Bolinas Quail Refuge: All that area within the County of Marin, within the following boundaries:

Beginning at a point on the southeasterly line of the lands of Ludwig B. Freudenthal, as the same is described in Book 158 of official records on page 261, of Marin County records, and at a point which is 20 feet above mean high tide of the Pacific Ocean, and running thence northeasterly and northwesterly along the southeasterly line of said Ludwig B. Freudenthal tract to a point on the southerly line of the “Mesa Road,” thence northeasterly and along the southerly line of Mesa Road to the westerly line of the road leading from the Town of Bolinas to Sausalito, thence southeasterly and along the southerly line of the county road leading through the Town of Bolinas to the landing wharf at the entrance of Bolinas Bay, and 20 feet above mean high tide, thence southwesterly, westerly and northwesterly along a line which is 20 feet above mean high tide to the point of beginning.

Comment. Section 60250 continues former Fish and Game Code Section 10881 without substantive change.

TITLE 8. CLAM REFUGES

CHAPTER 1. CLAM REFUGES GENERALLY

§ 60300. Prohibition

60300. Except under a permit or specific authorization, it is unlawful to take or possess a clam or an instrument or apparatus capable of being used to dig clams in a clam refuge.

Comment. Section 60300 continues former Fish and Game Code Section 10500(g) without substantive change.

See also Section 6102 (enforcement).

CHAPTER 2. SPECIFIC CLAM REFUGES

§ 60325. Pismo clam bearing beaches

60325. (a) The commission may close for the taking of clams not less than eight land miles of pismo clam bearing beaches within San Luis Obispo County as a clam refuge, but not more than 50 percent of any individual pismo clam bearing beach or beaches may be so closed at any time. The commission may from time to time vary the location of the closed and open portions of those beaches.

(b) Before the commission closes, opens, or varies the location of the closed and open portions of pismo clam bearing beaches, one or more members of the

1 commission shall hold a public hearing in the county to be affected, notice of
2 which has been published at least once in a newspaper of general circulation,
3 printed, and published in that county. The commission may determine which
4 newspaper will be most likely to give notice to the inhabitants of the county, and
5 its determination shall be final and conclusive. The commission may authorize any
6 employee of the department in its place to hold the hearings, in which event a copy
7 of a transcript of all proceedings taken or had at the hearing shall be furnished to
8 each commissioner at least five days before any regulation is made by the
9 commission.

10 **Comment.** Section 60325 continues former Fish and Game Code Section 10711 without
11 substantive change.

12 PART 2. MARINE LIFE PROTECTION ACT

13 TITLE 1. GENERAL PROVISIONS

14 § 60400. Short title

15 60400. This part shall be known and may be cited as the Marine Life Protection
16 Act.

17 **Comment.** Section 60400 continues former Fish and Game Code Section 2850 without
18 substantive change.

19 § 60405. Legislative findings and declarations

20 60405. The Legislature finds and declares all of the following:

21 (a) California's marine protected areas (MPAs) were established on a piecemeal
22 basis rather than according to a coherent plan and sound scientific guidelines.
23 Many of these MPAs lack clearly defined purposes, effective management
24 measures and enforcement. As a result, the array of MPAs creates the illusion of
25 protection while falling far short of its potential to protect and conserve living
26 marine life and habitat.

27 (b) California's extraordinary marine biological diversity is a vital asset to the
28 state and nation. The diversity of species and ecosystems found in the state's
29 ocean waters is important to public health and well-being, ecological health, and
30 ocean-dependent industry.

31 (c) Coastal development, water pollution, and other human activities threaten the
32 health of marine habitat and the biological diversity found in California's ocean
33 waters. New technologies and demands have encouraged the expansion of fishing
34 and other activities to formerly inaccessible marine areas that once recharged
35 nearby fisheries. As a result, ecosystems throughout the state's ocean waters are
36 being altered, often at a rapid rate.

1 (d) Fish and other sea life are a sustainable resource, and fishing is an important
2 community asset. MPAs and sound fishery management are complementary
3 components of a comprehensive effort to sustain marine habitats and fisheries.

4 (e) Understanding of the impacts of human activities and the processes required
5 to sustain the abundance and diversity of marine life is limited. The designation of
6 certain areas as sea life reserves can help expand our knowledge by providing
7 baseline information and improving our understanding of ecosystems where
8 minimal disturbance occurs.

9 (f) Marine life reserves are an essential element of an MPA system because they
10 protect habitat and ecosystems, conserve biological diversity, provide a sanctuary
11 for fish and other sea life, enhance recreational and educational opportunities,
12 provide a reference point against which scientists can measure changes elsewhere
13 in the marine environment, and may help rebuild depleted fisheries.

14 (g) Despite the demonstrated value of marine life reserves, only 14 of the
15 220,000 square miles of combined state and federal ocean water off California, or
16 six-thousandths of 1 percent, are set aside as genuine no take areas.

17 (h) For all of the above reasons, it is necessary to modify the existing collection
18 of MPAs to ensure that they are designed and managed according to clear,
19 conservation-based goals and guidelines that take full advantage of the multiple
20 benefits that can be derived from the establishment of marine life reserves.

21 **Comment.** Section 60405 continues former Fish and Game Code Section 2851 without
22 substantive change.

23 **§ 60410. Definitions**

24 60410. The following definitions govern the construction of this part:

25 (a) “Adaptive management,” with regard to marine protected areas, means a
26 management policy that seeks to improve management of biological resources,
27 particularly in areas of scientific uncertainty, by viewing program actions as tools
28 for learning. Actions shall be designed so that, even if they fail, they will provide
29 useful information for future actions, and monitoring and evaluation shall be
30 emphasized so that the interaction of different elements within marine systems
31 may be better understood.

32 (b) “Biogeographical regions” refers to the following oceanic or near shore
33 areas, seaward from the mean high tide line or the mouth of coastal rivers, with
34 distinctive biological characteristics, unless the team establishes an alternative set
35 of boundaries:

36 (1) The area extending south from Point Conception.

37 (2) The area between Point Conception and Point Arena.

38 (3) The area extending north from Point Arena.

39 (c) “Marine protected area” or “MPA” means a named, discrete geographic
40 marine or estuarine area seaward of the mean high tide line or the mouth of a
41 coastal river, including any area of intertidal or subtidal terrain, together with its
42 overlying water and associated flora and fauna that has been designated by law,

1 administrative action, or voter initiative to protect or conserve marine life and
2 habitat. An MPA includes marine life reserves and other areas that allow for
3 specified commercial and recreational activities, including fishing for certain
4 species but not others, fishing with certain practices but not others, and kelp
5 harvesting, provided that these activities are consistent with the objectives of the
6 area and the goals and guidelines of this part. MPAs are primarily intended to
7 protect or conserve marine life and habitat, and are therefore a subset of marine
8 managed areas (MMAs), which are broader groups of named, discrete geographic
9 areas along the coast that protect, conserve, or otherwise manage a variety of
10 resources and uses, including living marine resources, cultural and historical
11 resources, and recreational opportunities.

12 (d) “Marine life reserve,” for the purposes of this part, means a marine protected
13 area in which all extractive activities, including the taking of marine species, and,
14 at the discretion of the commission and within the authority of the commission,
15 other activities that upset the natural ecological functions of the area, are
16 prohibited. While, to the extent feasible, the area shall be open to the public for
17 managed enjoyment and study, the area shall be maintained to the extent
18 practicable in an undisturbed and unpolluted state.

19 (e) “Team” means the master plan team convened pursuant to subdivision (b) of
20 Section 2855.

21 **Comment.** Subdivisions (a) through (d) of Section 60410 continue former Fish and Game
22 Code Section 2852 without substantive change.

23 Subdivision (e) is new.

24 **§ 60415. Ocean Protection Council authority**

25 60415. Notwithstanding any other law and consistent with the authority granted
26 under Section 60450, commencing on July 1, 2013, the Ocean Protection Council
27 shall assume responsibility for the direction of policy of marine protected areas
28 (MPAs).

29 **Comment.** Section 60415 continues former Fish and Game Code Section 2850.5 without
30 substantive change.

31 **§ 60420. Consultation with United States Navy**

32 60420. The department shall confer as necessary with the United States Navy
33 regarding issues related to its activities.

34 **Comment.** Section 60420 continues former Fish and Game Code Section 2863 without
35 substantive change.

36 **TITLE 2. PROTECTIONS**

37 **§ 60450. Take of fish in MPA or marine life reserve**

38 60450. (a) The commission may regulate commercial and recreational fishing
39 and any other taking of marine species in MPAs.

(b) Notwithstanding any other provision of this code, the taking of a marine species in a marine life reserve is prohibited for any purpose, including recreational and commercial fishing, except that the commission may authorize the taking of a marine species for scientific purposes, consistent with the purposes of this part, under a scientific collecting permit issued by the department.

Comment. Section 60450 continues former Fish and Game Code Section 2860 without substantive change.

§ 60455. Impact analysis

60455. The department, in evaluating proposed projects with potential adverse impacts on marine life and habitat in MPAs, shall highlight those impacts in its analysis and comments related to the project and shall recommend measures to avoid or fully mitigate any impacts that are inconsistent with the goals and guidelines of this part or the objectives of the MPA.

Comment. Section 60455 continues former Fish and Game Code Section 2862 without substantive change.

TITLE 3. MARINE LIFE PROTECTION PROGRAM

§ 60475. Marine Life Protection Program

60475. (a) The Legislature finds and declares that there is a need to reexamine and redesign California's MPA system to increase its coherence and its effectiveness at protecting the state's marine life, habitat, and ecosystems.

(b) To improve the design and management of that system, the commission, pursuant to Section 60520, shall adopt a Marine Life Protection Program, which shall have all of the following goals:

(1) To protect the natural diversity and abundance of marine life, and the structure, function, and integrity of marine ecosystems.

(2) To help sustain, conserve, and protect marine life populations, including those of economic value, and rebuild those that are depleted.

(3) To improve recreational, educational, and study opportunities provided by marine ecosystems that are subject to minimal human disturbance, and to manage these uses in a manner consistent with protecting biodiversity.

(4) To protect marine natural heritage, including protection of representative and unique marine life habitats in California waters for their intrinsic value.

(5) To ensure that California's MPAs have clearly defined objectives, effective management measures, and adequate enforcement, and are based on sound scientific guidelines.

(6) To ensure that the state's MPAs are designed and managed, to the extent possible, as a network.

Comment. Section 60475 continues former Fish and Game Code Section 2853(a)-(b) without substantive change.

1 **§ 60480. Program elements**

2 60480. The Marine Life Protection Program may include areas with various
3 levels of protection, and shall include all of the following elements:

4 (a) An improved marine life reserve component consistent with the guidelines in
5 subdivision (c) of Section 60525.

6 (b) Specific identified objectives, and management and enforcement measures,
7 for all MPAs in the system.

8 (c) Provisions for monitoring, research, and evaluation at selected sites to
9 facilitate adaptive management of MPAs and ensure that the system meets the
10 goals stated in this part.

11 (d) Provisions for educating the public about MPAs, and for administering and
12 enforcing MPAs in a manner that encourages public participation.

13 (e) A process for the establishment, modification, or abolishment of existing
14 MPAs or new MPAs established pursuant to this program, that involves interested
15 parties, consistent with paragraph (7) of subdivision (b) of Section 12100, and that
16 facilitates the designation of MPAs consistent with the master plan adopted
17 pursuant to Section 60500.

18 **Comment.** Section 60480 continues former Fish and Game Code Section 2853(c) without
19 substantive change.

20 **TITLE 4. MASTER PLAN**

21 **§ 60500. Master plan**

22 60500. (a) The commission shall adopt a master plan that guides the adoption
23 and implementation of the Marine Life Protection Program adopted pursuant to
24 Title 3 (commencing with Section 60475) and decisions regarding the siting of
25 new MPAs and major modifications of existing MPAs. The plan shall be based on
26 the best readily available science.

27 (b)(1) The department shall prepare, or by contract shall cause to be prepared, a
28 master plan in accordance with this subdivision. In order to take full advantage of
29 scientific expertise on MPAs, the department shall convene a master plan team to
30 advise and assist in the preparation of the master plan, or hire a contractor with
31 relevant expertise to assist in convening the team.

32 (2) The team members convened pursuant to this subdivision shall have
33 expertise in marine life protection and shall be knowledgeable about the use of
34 protected areas as a marine ecosystem management tool. The members shall also
35 be familiar with underwater ecosystems found in California waters, with the
36 biology and habitat requirements of major species groups in the state's marine
37 waters, and with water quality and related issues.

38 (3) The team shall be composed of the following individuals:

39 (A) Staff from the department, the Department of Parks and Recreation, and the
40 State Water Resources Control Board, to be designated by each of those
41 departments.

1 (B) Five to seven members who shall be scientists, one of whom may have
2 expertise in the economics and culture of California coastal communities.

3 (C) One member, appointed from a list prepared by Sea Grant marine advisers,
4 who shall have direct expertise with ocean habitat and sea life in California marine
5 waters.

6 (4) The master plan shall be prepared with the advice, assistance, and
7 involvement of participants in the various fisheries and their representatives,
8 marine conservationists, marine scientists, and other interested persons. In
9 preparing the master plan, the department shall confer, to the extent feasible, with
10 the commission, the Pacific Fishery Management Council, the National Marine
11 Fisheries Service, the United States Navy, the United States Geological Survey's
12 national biological survey, staff from national marine sanctuaries off California,
13 Sea Grant researchers, marine advisers, and national parks personnel.

14 (5) The department may engage other experts to contribute to the master plan,
15 including scientists, geographic information system (GIS) experts, and commercial
16 and recreational fishermen, divers, and other individuals knowledgeable about the
17 state's underwater ecosystems, the history of fishing effort or MPA management,
18 or other relevant subjects.

19 (c) The department and team, in carrying out this part, shall take into account
20 relevant information from local communities, and shall solicit comments and
21 advice for the master plan from interested parties on issues including, but not
22 necessarily limited to, each of the following:

23 (1) Practical information on the marine environment and the relevant history of
24 fishing and other resources use, areas where fishing is currently prohibited, and
25 water pollution in the state's coastal waters.

26 (2) Socioeconomic and environmental impacts of various alternatives.

27 (3) Design of monitoring and evaluation activities.

28 (4) Methods to encourage public participation in the stewardship of the state's
29 MPAs.

30 **Comment.** Section 60500 continues former Fish and Game Code Section 2855 without
31 substantive change.

32 **§ 60505. Content of master plan**

33 60505. (a) The department and team shall use the best readily available
34 scientific information in preparing the master plan adopted pursuant to Section
35 60500, and shall organize the location-specific contents, where feasible, by
36 biogeographical region. In preparing the plan, the department and team shall use
37 and build upon the findings of the Sea Grant survey of protected areas in
38 California waters, which is entitled "California's Marine Protected Areas," the
39 report of the State Interagency Marine Managed Areas Workgroup, the
40 Department of Parks and Recreation's planning information and documents
41 regarding existing and potential underwater parks and reserves, maps and other

1 information from the department's marine nearshore ecosystem mapping project,
2 and other relevant planning and scientific materials.

3 (b) The master plan shall include all of the following components:

4 (1) Recommendations for the extent and types of habitat that should be
5 represented in the MPA system and in marine life reserves. Habitat types
6 described on maps shall include, to the extent possible using existing information,
7 rocky reefs, intertidal zones, sandy or soft ocean bottoms, underwater pinnacles,
8 sea mounts, kelp forests, submarine canyons, and seagrass beds.

9 (2) An identification of select species or groups of species likely to benefit from
10 MPAs, and the extent of their marine habitat, with special attention to marine
11 breeding and spawning grounds, and available information on oceanographic
12 features, including current patterns, upwelling zones, and other factors that
13 significantly affect the distribution of those fish or shellfish and their larvae.

14 (3) Recommendations to augment or modify the guidelines in subdivision (c) of
15 Section 60525, if necessary to ensure that the guidelines reflect the most up-to-
16 date science, including, for example, recommendations regarding the minimum
17 size of individual marine life reserves needed to accomplish the various goals set
18 forth in Sections 60475 and 60480.

19 (4) Recommended alternative networks of MPAs, including marine life reserves
20 in each biogeographical region that are capable of achieving the goals in Sections
21 60475 and 60480 and designed according to the guidelines in subdivision (c) of
22 Section 2857.

23 (5) A simplified classification system, which shall be consistent with the goals
24 of Sections 60475 and 60480 and the guidelines in subdivision (c) of Section
25 60525, and which may include protections for specific habitats or species, if no
26 system that meets these specifications has already been developed.

27 (6) Recommendations for a preferred siting alternative for a network of MPAs
28 that is consistent with the goals in Sections 60475 and 60480 and the guidelines in
29 subdivision (c) of Section 60525.

30 (7) An analysis of the state's current MPAs, based on the preferred siting
31 alternative, and recommendations as to whether any specific MPAs should be
32 consolidated, expanded, abolished, reclassified, or managed differently so that,
33 taken as a group, the MPAs best achieve the goals of Sections 60475 and 60480
34 and conform to the guidelines in subdivision (c) of Section 60525.

35 (8) Recommendations for monitoring, research, and evaluation in selected areas
36 of the preferred alternative, including existing and long-established MPAs, to
37 assist in adaptive management of the MPA network, taking into account existing
38 and planned research and evaluation efforts.

39 (9) Recommendations for management and enforcement measures for the
40 preferred alternative that apply systemwide or to specific types of sites and that
41 would achieve the goals of this part.

(10) Recommendations for improving the effectiveness of enforcement practices, including, to the extent practicable, the increased use of advanced technology surveillance systems.

(11) Recommendations for funding sources to ensure all MPA management activities are carried out and the Marine Life Protection Program is implemented.

(c) The team shall, as necessary, identify and define additional appropriate components of the master plan as soon as possible after enactment of this section.

Comment. Section 60505 continues former Fish and Game Code Section 2856 without substantive change.

§ 60510. Workgroup actions

60510. The workgroup shall, after appropriate consultation with members of the public, determine future actions for implementing the recommendations of its final report.

Comment. Section 60510 continues former Fish and Game Code Section 2854 without substantive change.

 **Note.** Existing Section 2854 uses the term “workgroup” without any prior use of the term in nearby provisions. Consequently, its meaning is not clear. Does the provision refer to the “State Interagency Marine Managed Areas Workgroup” that is mentioned in Section 2856?

The Commission invites Comment on how to clarify the meaning of Section 2854.

§ 60515. Peer review

60515. The department shall establish a process for external peer review of the scientific basis for the master plan prepared pursuant to Section 60500. The peer review process may be based, to the extent practicable, on the peer review process described in Section 12205.

Comment. Section 60515 continues former Fish and Game Code Section 2858 without substantive change.

§ 60520. Adoption of master plan

60520. (a) On or before January 1, 2005, the department shall submit to the commission a draft of the master plan prepared pursuant to this part.

(b) On or before April 1, 2005, after public review, not less than three public meetings, and appropriate modifications of the draft plan, the department shall submit a proposed final master plan to the commission.

(c) On or before December 1, 2005, the commission shall adopt a final master plan and a Marine Life Protection Program with regulations based on the plan and shall implement the program, to the extent funds are available. The commission’s adoption of the plan and a program based on the plan shall not trigger an additional review under the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).

(d) The commission shall hold at least two public hearings on the master plan and the Marine Life Protection Program prior to adopting the plan and program.

1 The commission may adopt the plan and the program immediately following the
2 second public hearing or at any duly noticed subsequent meeting.

3 (e) Upon the commission's adoption of the program, the commission shall
4 submit the master plan and program description, including marine life reserve and
5 other MPA designations, to the Joint Committee on Fisheries and Aquaculture for
6 review and comment.

7 (f) Upon receipt of the plan, the joint committee shall have 60 days to review the
8 plan and to submit written recommendations to the commission regarding the plan
9 and program. The joint committee shall only submit a recommendation to the
10 commission if a majority of the members agree to that recommendation. The
11 commission shall consider all recommendations submitted by the joint committee,
12 and may amend the program to incorporate the recommendations. If the
13 commission does not incorporate any recommendations submitted by the joint
14 committee, the commission shall set forth, in writing, its reasons for not
15 incorporating that recommendation.

16 **Comment.** Section 60520 continues former Fish and Game Code Section 2859 without
17 substantive change.

18 **Note.** Existing Section 2859 sets deadlines for the preparation and adoption of a master plan
19 that are more than 10 years in the past. **The Commission invites comment on whether any part**
20 **of Section 2859 should be repealed as obsolete.**

21 **§ 60525. MPA siting**

22 60525. (a) On or before July 1, 2001, the department shall convene, in each
23 biogeographical region and to the extent practicable near major working harbors,
24 siting workshops, composed of interested parties, to review the alternatives for
25 MPA networks and to provide advice on a preferred siting alternative. The
26 department and team shall develop a preferred siting alternative that incorporates
27 information and views provided by people who live in the area and other
28 interested parties, including economic information, to the extent possible while
29 maintaining consistency with the goals of Sections 60475 and 60480 and
30 guidelines in subdivision (c) of this section.

31 (b) The preferred alternative may include MPAs that will achieve either or both
32 of the following objectives:

33 (1) Protection of habitat by prohibiting potentially damaging fishing practices or
34 other activities that upset the natural ecological functions of the area.

35 (2) Enhancement of a particular species or group of species, by prohibiting or
36 restricting fishing for that species or group within the MPA boundary.

37 (c) The preferred siting alternative shall include MPA networks with an
38 improved marine life reserve component, and shall be designed according to each
39 of the following guidelines:

40 (1) Each MPA shall have identified goals and objectives. Individual MPAs may
41 serve varied primary purposes while collectively achieving the overall goals and
42 guidelines of this part.

(2) Marine life reserves in each bioregion shall encompass a representative variety of marine habitat types and communities, across a range of depths and environmental conditions.

(3) Similar types of marine habitats and communities shall be replicated, to the extent possible, in more than one marine life reserve in each biogeographical region.

(4) Marine life reserves shall be designed, to the extent practicable, to ensure that activities that upset the natural ecological functions of the area are avoided.

(5) The MPA network and individual MPAs shall be of adequate size, number, type of protection, and location to ensure that each MPA meets its objectives and that the network as a whole meets the goals and guidelines of this part.

(d) The department and team, in developing the preferred siting alternative, shall take into account the existence and location of commercial kelp beds.

(e) The department and team may provide recommendations for phasing in the new MPAs in the preferred siting alternative.

Comment. Section 60525 continues former Fish and Game Code Section 2857 without substantive change.

Note. Existing Section 2857(a) sets a deadline for certain actions that is more than 15 years in the past. **The Commission invites comment on whether any part of Section 2857 should be repealed as obsolete.**

§ 60530. Petitions of interested persons

60530. The commission shall, annually until the master plan is adopted and thereafter at least every three years, receive, consider, and promptly act upon petitions from any interested party, to add, delete, or modify MPAs, favoring those petitions that are compatible with the goals and guidelines of this part.

Comment. Section 60530 continues former Fish and Game Code Section 2861(a) without substantive change.

§ 60535. Other authority

60535. (a) Nothing in this part restricts any existing authority of the department or the commission to make changes to improve the management or design of existing MPAs or designate new MPAs prior to the completion of the master plan.

(b) The commission may abbreviate the master plan process to account for equivalent activities that have taken place before enactment of this part, providing that those activities are consistent with this part.

Comment. Section 60535 continues former Fish and Game Code Section 2861(b) without substantive change.

PART 3. MARINE MANAGED AREAS

1 **§ 60550. Designation, deletion, or modification of marine recreational management areas**

2 60550. (a) The commission may designate, delete, or modify state marine
3 recreational management areas established by the commission for hunting
4 purposes, state marine reserves, and state marine conservation areas, as delineated
5 in subdivision (a) of Section 36725 of the Public Resources Code.

6 (b) The commission shall consult with, and secure concurrence from, the State
7 Park and Recreation Commission prior to modifying or deleting marine reserves
8 and marine conservation areas designated by the State Park and Recreation
9 Commission. The commission shall not delete or modify state marine recreational
10 management areas designated by the State Park and Recreation Commission.

11 **Comment.** Section 60550 continues former Fish and Game Code Section 1590 without
12 substantive change.

13 **§ 60555. Marine Managed Areas Improvement Act**

14 60555. (a) The Marine Managed Areas Improvement Act (Chapter 7
15 (commencing with Section 36600) of Division 27 of the Public Resources Code)
16 establishes a uniform classification system for state marine managed areas and is
17 incorporated herein by reference. Any proposals for marine protected areas made
18 after January 1, 2002, shall follow the guidelines set forth in that act. Pursuant to
19 Section 36750 of the Public Resources Code, all marine protected areas in
20 existence and not reclassified in accordance with the Marine Life Protection Act
21 (Part 2 (commencing with Section 60400)) on January 1, 2002, shall be
22 reclassified by the State Interagency Coordinating Committee established pursuant
23 to Section 36800 of the Public Resources Code into one of the following
24 classifications:

25 (1) State marine reserve.

26 (2) State marine park.

27 (3) State marine conservation area.

28 (b) State marine recreational management areas established by the commission
29 for hunting purposes, state marine reserves, and state marine conservation areas
30 shall be designated, deleted, or modified by the commission pursuant to that act.
31 The restrictions and allowable uses applicable to those areas are as set forth in that
32 act.

33 **Comment.** Section 60555 continues former Fish and Game Code Section 1591 without
34 substantive change.

1 **PART 4. WILDLIFE MANAGEMENT AREAS, GAME FARMS, AND**
2 **PUBLIC SHOOTING GROUNDS**

3 **TITLE 1. GENERAL PROVISIONS**

4 **§ 60600. Department powers**

5 60600. For the purposes of propagating, feeding and protecting birds, mammals,
6 and fish, and establishing wildlife management areas or public shooting grounds
7 the department, with the approval of the commission, may do all of the following:

8 (a) Accept, on behalf of the state, donations of birds, mammals, and fish, and of
9 money given or appropriated. Those donations shall be used for the purposes for
10 which they are accepted, and, as nearly as may be, for any purpose indicated by
11 the donor.

12 (b) Acquire, by purchase, lease, rental or otherwise, and occupy, develop,
13 maintain, use and administer, land, or land and nonmarine water, or land and
14 nonmarine water rights, suitable for state game farms, wildlife management areas,
15 or public shooting grounds.

16 **Comment.** Section 60600 continues former Fish and Game Code Section 1525 without
17 substantive change.

18 **§ 60605. State ownership and regulation**

19 60605. Any property acquired for wildlife management areas or public shooting
20 grounds shall be acquired in the name of the state, and shall, at all times, be
21 subject to any rules and regulations that may be prescribed from time to time by
22 the commission for the occupation, use, operation, protection, and administration
23 of the property as wildlife management areas or public shooting grounds.

24 **Comment.** Section 60605 continues former Fish and Game Code Section 1526 without
25 substantive change.

26 **§ 60610. Acquired property**

27 60610. (a) The department shall do all things necessary to secure a valid title in
28 the state to the property acquired for wildlife management areas or public shooting
29 grounds but no payment shall be made therefor until the title is satisfactory to the
30 Attorney General, and is vested in the state.

31 (b) The acquisition of the property by the state is not prohibited by reason of
32 rights of way, easements, or reservations that, from their nature, in the opinion of
33 the department, will in no manner interfere with the use of the property for the
34 purpose for which it is acquired.

35 **Comment.** Section 60610 continues former Fish and Game Code Section 1527 without
36 substantive change.

TITLE 2. PROTECTIONS

§ 60625. Unlawful entry upon wildlife management area or public shooting ground

60625. Except in accordance with the regulations of the commission, it is unlawful to enter upon any wildlife management areas or public shooting grounds established under the provisions of this part, or to take therein any bird or the nest or eggs thereof, or any mammal.

Comment. Section 60625 continues the first paragraph of former Fish and Game Code Section 1530 without substantive change.

§ 60630. Regulation of take in public shooting ground

60630. (a) The taking of birds and mammals on public shooting grounds shall be regulated by the commission by regulation as provided in this section.

(b) Prior to a regulation pursuant to this section, the commission shall, at an open meeting of the commission, publicly announce the contents of the regulation it proposes to make and at the same time specify a subsequent open meeting to be held not less than 30 days thereafter at which it will take final action on the proposed regulation.

Comment. Section 60630 continues the second paragraph of former Fish and Game Code Section 1530 without substantive change.

TITLE 3. OPERATION

§ 60650. Acquired lands to operate on nonprofit basis

60650. Lands, or lands and water, acquired for public shooting grounds, state marine (estuarine) recreational management areas, or wildlife management areas shall be operated on a nonprofit basis by the department.

Comment. Section 60650 continues the first sentence of former Fish and Game Code Section 1528 without substantive change.

§ 60655. Multiple recreational use

60655. Multiple recreational use of wildlife management areas is desirable and that use shall be encouraged by the commission.

Comment. Section 60655 continues the second sentence of former Fish and Game Code Section 1528 without substantive change.

§ 60660. Facilities

60660. Except for hunting and fishing purposes, only minimum facilities to permit other forms of multiple recreational use, such as camping, picnicking, boating, or swimming, shall be provided.

Comment. Section 60660 continues the third sentence of former Fish and Game Code Section 1528 without substantive change.

1 **§ 60665. Fees for use privileges**

2 60665. Except as provided in Section 56080, and to defray the costs associated
3 with multiple use, the commission may determine and fix the amount of, and the
4 department shall collect, fees for any use privileges. However, tours by organized
5 youth and school groups are exempt from the payment of those fees.

6 **Comment.** Section 60665 continues the fourth and fifth sentences of former Fish and Game
7 Code Section 1528 without substantive change.

8 **§ 60670. Shooting permits**

9 60670. Only persons holding valid hunting licenses may apply for or obtain
10 shooting permits for public shooting grounds, state marine (estuarine) recreational
11 management areas, or wildlife management areas.

12 **Comment.** Section 60670 continues the sixth sentence of former Fish and Game Code Section
13 1528 without substantive change.

14 **§ 60675. Output of state game farm**

15 60675. The output of any state game farm shall be distributed on public lands or
16 where the department determines that the output will receive adequate protection
17 and be most likely to thrive and multiply.

18 **Comment.** Section 60675 continues former Fish and Game Code Section 1529 without
19 substantive change.

20 **§ 60680. Payments to offset local taxes and assessments**

21 60680. (a) When income is derived directly from real property acquired and
22 operated by the state as a wildlife management area, and regardless of whether
23 income is derived from property acquired after October 1, 1949, the department
24 may pay annually to the county in which the property is located an amount equal
25 to the county taxes levied upon the property at the time title to the property was
26 transferred to the state. The department may also pay the assessments levied upon
27 the property by any irrigation, drainage, or reclamation district.

28 (b) Any delinquent penalties or interest applicable to any of those assessments
29 made before September 9, 1953, are hereby canceled and shall be waived.

30 (c) Payments provided by this section shall only be made from funds that are
31 appropriated to the department for the purposes of this section.

32 (d) As used in this section, the term “wildlife management area” includes
33 waterfowl management areas, deer ranges, upland game bird management areas,
34 and public shooting grounds.

35 (e) Any payment made under this section shall be made on or before December
36 10 of each year, with the exception of newly acquired property for which
37 payments shall be made pursuant to subdivision (f).

38 (f) Any payments made for the purposes of this section shall be made within one
39 year of the date title to the property was transferred to the state, or within 90 days
40 from the date of designation as a wildlife management area, whichever occurs

1 first, prorated for the balance of the year from the date of designation as a wildlife
2 management area to the 30th day of June following the date of designation as a
3 wildlife management area, and, thereafter, payments shall be made on or before
4 December 10 of each year.

5 (g) Notwithstanding any other law, payments provided under this section shall
6 not be allocated to a school district, a community college district, or a county
7 superintendent of schools.

8 **Comment.** Section 60680 continues former Fish and Game Code Section 1504 without
9 substantive change.

10 **§ 60685. Mosquitos**

11 60685. (a) For purposes of this section, the following definitions apply:

12 (1) “Managed wetland habitat” means artificially irrigated and intensively
13 managed wetland habitat administered primarily for the benefit of waterfowl and
14 other wetland-dependent species.

15 (2) “Best management practices” means management strategies jointly
16 developed by the department, the State Department of Public Health, and
17 mosquito abatement and vector control districts, in consultation with the Central
18 Valley Joint Venture, for the ecological control of mosquitoes on managed
19 wetland habitat.

20 (3) “Mosquito abatement and vector control district” has the same meaning as
21 set forth in subdivision (f) of Section 2002 of the Health and Safety Code.

22 (4) “Wildlife management area” has the same meaning as set forth in
23 subdivision (d) of Section 60680.

24 (b) (1) A mosquito abatement and vector control district whose district
25 boundaries include one or more wildlife management areas or a mosquito
26 abatement and vector control district in which vectors and vectorborne diseases
27 from a wildlife management area may enter the district shall periodically, or at
28 least semiannually, notify the department of those areas that are of concern due to
29 the potential for high mosquito populations that may incur associated mosquito
30 control costs.

31 (2) (A) To reduce mosquito production at those wildlife management areas
32 described in paragraph (1), the department shall consult with local mosquito
33 abatement and vector control districts to identify those areas within wildlife
34 management areas having the highest need for additional mosquito reduction
35 through the implementation of best management practices.

36 (B) If the wetland occupies land outside the jurisdictional boundaries of a
37 mosquito abatement and vector control district, the department may consult with
38 the State Department of Public Health to determine which best management
39 practices can be implemented in the absence of an organized local mosquito
40 control program.

41 (c) This section does not affect existing authority of a mosquito abatement and
42 vector control district under Section 2040 of the Health and Safety Code.

(d) (1) A private landowner whose property includes managed wetland habitat located within the boundaries of a mosquito abatement and vector control district may initiate the opportunity to enter into a memorandum of understanding with the district if all of the following criteria are met:

(A) The managed wetland habitat is encumbered by a state or federal conservation easement or similar state or federal voluntary habitat agreement or is protected in perpetuity by state or federal law.

(B) The managed wetland habitat is within the boundaries of the Central Valley Joint Venture, as those boundaries are identified in the Central Valley Joint Venture Implementation Plan.

(2) The goal of a memorandum of understanding entered into pursuant to paragraph (1) is to establish a process to implement best management practices for the purposes of decreasing mosquito production, providing net cost savings to the landowner, decreasing the application of pesticides, and maintaining or enhancing the waterfowl habitat values on the property.

(3) Notwithstanding paragraph (2) of subdivision (a), the Central Valley Joint Venture, in consultation with mosquito abatement and vector control districts, the department, and the State Department of Public Health, may periodically modify the best management practices in order to best fulfill the purposes described in paragraph (2) of this subdivision.

(4) A memorandum of understanding entered into pursuant to paragraph (1) shall not conflict with the provisions of any applicable conservation easement or other state or federal habitat agreement. The participating private landowner shall ensure that the memorandum of understanding is in compliance with the requirements of this paragraph. Compliance with the requirements of this paragraph is the sole responsibility of the private landowner and subject to enforcement pursuant to the terms contained in any applicable conservation easement or habitat agreement.

Comment. Section 60685 continues former Fish and Game Code Section 1506 without substantive change, except that Section 1506(a)(3) is continued in Section 810.

PART 5. WILDLIFE AREAS, RANGES, AND RESERVES

§ 60700. Exchange or sale of property within specified areas

60700. (a) The department may, with the approval of the commission and the Department of General Services, take any of the following actions with regard to the areas listed in subdivision (d):

(1) Exchange any property lying within the boundaries of a listed area for property that is within or contiguous to that area.

(2) Sell any property within the boundaries of a listed area and use the proceeds to acquire property that is within or contiguous to that area.

(b) No exchange or sale of property authorized in subdivision (a) shall materially reduce the total area of any area listed in subdivision (d).

(c) A copy of each deed of conveyance executed and delivered by the department, and of each deed conveying lands to the state, pursuant to this section shall be delivered to the State Lands Commission.

(d) The provisions of this section apply to all of the following areas:

(1) The Doyle Deer Winter Range, located in Lassen County.

(2) The Tehama Deer Winter Range, located in Tehama County.

(3) The Honey Lake Waterfowl Management Area, located in Lassen County.

(4) The Imperial Waterfowl Management Area, located in Imperial County.

(5) The Mendota Waterfowl Management Area, located in Fresno County.

(6) The San Jacinto Wildlife Area, located in Riverside County.

(7) The Lakes Earl/Talawa Wildlife Area, located in Del Norte County.

(8) The Santa Rosa Mountains Bighorn Sheep Reserve, located in Riverside County.

(9) The Camp Cady Wildlife Area, located in San Bernardino County.

(10) The Butte Valley Wildlife Area, located in Siskiyou County.

(11) The Ash Creek Wildlife Area, located in Lassen and Modoc Counties.

(12) The Moss Landing Wildlife Area, located in Monterey County.

Comment. Section 60700 restates former Fish and Game Code Section 1500 without substantive change.

Note. Proposed Section 60700(a)-(c) would restate the first paragraph of existing Section 1500 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“The department may, with the approval of the commission and the Department of General Services, exchange any portion of the property lying within the boundaries of any area or range referred to in this section for any property within or contiguous to such area or range or may sell any portion of the property within such boundaries and with the proceeds thereof acquire any property within or contiguous to such area or range; provided, that no exchange or sale of property authorized in this section shall materially reduce the total area of any range or area referred to in this section. A copy of each deed of conveyance executed and delivered by the department, and of each deed conveying lands to the state, pursuant to this section shall be delivered to the State Lands Commission.”

The Commission invites comment on whether that restatement would cause any problems.

§ 60705. Mineral rights

60705. (a) The following rules govern an exchange or sale of property pursuant to Section 60700:

(1) If a parcel contains 15 acres or less, the director shall except and reserve to the state all mineral deposits below a depth of 500 feet, without surface rights of entry.

(2) If a parcel contains more than 15 acres, the director shall except and reserve to the state all mineral deposits together with the right to prospect for, mine, and remove the deposits. The rights to prospect for, mine, and remove shall be limited to those areas of the property conveyed that the director, after consultation with

1 the State Lands Commission, determines to be reasonably necessary for the
2 removal of the resources and deposits.

3 (b) For the purposes of this section, the mineral deposits reserved to the state are
4 those described in Section 6407 of the Public Resources Code.

5 **Comment.** Section 60705 restates former Fish and Game Code Section 1500.5 without
6 substantive change.

7 **Note.** Proposed Section 60705 would restate existing Section 1500.5 to improve its clarity,
8 without changing its substantive effect. The existing provision reads as follows:

9 “With respect to exchanging or selling any property pursuant to Section 1500, the director, with
10 respect to any parcel containing 15 acres or less, shall except and reserve to the state all mineral
11 deposits, as defined in Section 6407 of the Public Resources Code, below a depth of 500 feet,
12 without surface rights of entry. As to any parcel containing more than 15 acres, the director shall
13 except and reserve to the state all mineral deposits, as defined in Section 6407 of the Public
14 Resources Code, together with the right to prospect for, mine, and remove the deposits.”

15 **The Commission invites comment on whether that restatement would cause any problems.**

16 **§ 60710. Apiculture in wildlife area**

17 60710. (a) The department shall do both of the following:

18 (1) Consider authorizing apiculture on department-managed wildlife areas,
19 where deemed appropriate by the department.

20 (2) Determine, when developing or amending its land management plans, the
21 following:

22 (A) If the department-managed wildlife areas, or any portion of the those areas,
23 are suitable for apiculture and whether apiculture is consistent with the
24 management goals and objectives for those areas on a temporary, seasonal, or
25 long-term basis.

26 (B) If the administration of apiculture on department-managed wildlife areas,
27 where deemed appropriate by the department, is meeting the management goals
28 and objectives for those areas.

29 (C) The appropriate fee and lease rent to be assessed for conducting apiculture
30 on department-managed wildlife areas. The amount of the fee shall be sufficient to
31 recover, but not exceed, all reasonable administrative and implementation costs of
32 the department. The lease rent shall take into account whether the lease is a
33 nonexclusive use of the land.

34 (b) The department, in implementing this section, may consult with apiculture
35 experts, including, but not limited to, the Department of Food and Agriculture, the
36 University of California, other academic or professional experts, and interested
37 stakeholders, when considering authorizing apiculture on department-managed
38 wildlife areas consistent with the respective management goals and objectives for
39 those areas.

40 (c) Moneys collected for conducting apiculture on department-managed wildlife
41 areas pursuant to subparagraph (C) of paragraph (2) of subdivision (a) shall be
42 deposited by the department into the Wildlife Restoration Fund and, upon

1 appropriation by the Legislature, be used to support the management,
2 maintenance, restoration, and operation of department-managed wildlife areas.

3 (d) The department may authorize the temporary placement of beehives on
4 department-managed wildlife areas through simple lease or permit agreements
5 specifying appropriate conditions. These agreements are not subject to competitive
6 bidding requirements.

7 (e) The department may continue any authorization for apiculture on
8 department-managed areas that it granted before January 1, 2015, without taking
9 further action.

10 **Comment.** Section 60710 continues former Fish and Game Code Section 1745.2 without
11 substantive change.

12 **§ 60715. Lower Sherman Island**

13 60715. (a) The department, upon request of the leaseholder, shall extend any
14 existing lease for a recreational homesite on Lower Sherman Island to the holder
15 of any lease of lands under the control of the department, under the following
16 conditions:

17 (1) The existing lease is between the department and an individual person,
18 partnership, or any affiliated group of two or more persons.

19 (2) Subject to subdivision (e), the lease may be extended for the natural life of
20 the person who is the leaseholder on January 1, 1991. With respect to any lease to
21 an affiliated group or an association of persons, the lease shall expire upon the
22 death of the last individual who is a leaseholder on January 1, 1991.

23 (3) The lease, or any interest therein, may not be transferred, bequeathed,
24 hypothecated, encumbered, sublet, assigned, sold, alienated, exchanged, or
25 otherwise changed to the benefit of another party. The leaseholder shall annually
26 certify to the department that he or she has not transferred, bequeathed,
27 hypothecated, encumbered, sublet, assigned, sold, alienated, or exchanged the
28 lease for consideration or by gift, or otherwise.

29 (4) If a lease is violated or breached by the leaseholder at any time during the
30 life of the leaseholder, the lease may be terminated by the department within 30
31 days of the receipt by the department of actual or constructive notice of the breach.

32 (b) All leases entered into pursuant to this section shall include the following:

33 (1) A requirement for public access to navigable waters adjacent to the lease
34 properties.

35 (2) A provision prohibiting the introduction and cultivation of exotic plant
36 species and requiring existing exotic plant species to be removed according to a
37 plan developed by the department.

38 (3) A provision establishing the right of the department and county employees to
39 inspect the property for the purposes of monitoring and enforcing the conditions of
40 the lease.

41 (4) A provision requiring the lessee, within 60 days after the lease is extended,
42 and annually thereafter, to provide the department with proof that (A) the lessee

1 will remove the buildings and all ancillary structures and facilities necessary to
2 return the area to a natural condition, or (B) the lessee has made arrangements for
3 the removal of the buildings and all ancillary structures and facilities necessary to
4 return the area to a natural condition, upon termination of the lease.

5 (c) The department shall develop a plan for the removal of nonnative plants
6 from the island. The plan shall include, at a minimum, the following:

7 (1) The type and location of nonnative plants.

8 (2) The relative threat that these plants pose to the natural environment of the
9 island.

10 (3) A time schedule for the leaseholders to remove the nonnative plants within
11 200 yards of the leaseholders' structures.

12 (d) Proceeds from the leases of lands under the control of the department on
13 Lower Sherman Island shall be deposited in the Fish and Game Preservation Fund
14 and used for the purpose of enforcing and monitoring those lease terms and
15 managing the Lower Sherman Island Wildlife area.

16 (e) The department shall, on or before July 31, 1991, and annually thereafter,
17 review all leases of land subject to subdivision (a) under the control of the
18 department and, as soon as possible, charge the fair market rate on those leases of
19 land.

20 **Comment.** Section 60715 continues former Fish and Game Code Section 1526.4 without
21 substantive change.

22 **§ 60720. Fish and wildlife enhancement facilities**

23 60720. If the Department of Parks and Recreation contracts with the federal
24 government pursuant to Public Law 89-161 for the administration of recreation
25 development or fish and wildlife enhancement facilities, as authorized by Section
26 5006.6 of the Public Resources Code, the Department of Fish and Wildlife is
27 authorized to operate, maintain, and replace those facilities designated as fish and
28 wildlife enhancement facilities and to assume all costs of that operation,
29 maintenance, and replacement, subject to appropriation of funds by the
30 Legislature.

31 **Comment.** Section 60720 continues former Fish and Game Code Section 1014 without
32 substantive change.

33 **PART 6. ECOLOGICAL RESERVES**

34 **TITLE 1. ECOLOGICAL RESERVES**

35 **GENERALLY**

36 **§ 60750. Legislative declaration**

37 60750. The Legislature hereby declares that the policy of the state is to protect
38 threatened or endangered native plants, wildlife, or aquatic organisms or

1 specialized habitat types, both terrestrial and nonmarine aquatic, or large
2 heterogeneous natural gene pools for the future use of mankind through the
3 establishment of ecological reserves.

4 **Comment.** Section 60750 continues the first sentence of former Fish and Game Code Section
5 1580 without substantive change.

6 **§ 60755. “Ecological reserve” defined**

7 60755. As used in this part, “ecological reserve” means land or land and water
8 areas that are designated as an ecological reserve by the commission pursuant to
9 Section 60760 and that are to be preserved in a natural condition, or which are to
10 be provided some level of protection as determined by the commission, for the
11 benefit of the general public to observe native flora and fauna and for scientific
12 study or research.

13 **Comment.** Section 60755 continues former Fish and Game Code Section 1584 without
14 substantive change.

15 **§ 60760. Acquisition of property**

16 60760. (a) For the purpose of establishing ecological reserves, the department,
17 with the approval of the commission, may obtain, accept on behalf of the state,
18 acquire, or control, by purchase, lease, easement, gift, rental, memorandum of
19 understanding, or otherwise, and occupy, develop, maintain, use, and administer
20 land, or land and nonmarine water, or land and nonmarine water rights, suitable
21 for the purpose of establishing ecological reserves.

22 (b) Any property obtained, accepted, acquired, or controlled by the department
23 pursuant to this part may be designated by the commission as an ecological
24 reserve.

25 **Comment.** Section 60760 continues the second and third sentences of former Fish and Game
26 Code Section 1580 without substantive change.

27 **§ 60765. Regulation of ecological reserves**

28 60765. The commission may adopt regulations for the occupation, utilization,
29 operation, protection, enhancement, maintenance, and administration of ecological
30 reserves.

31 **Comment.** Section 60765 continues the fourth sentence of former Fish and Game Code
32 Section 1580 without substantive change.

33 **§ 60770. Ownership and regulation of property**

34 60770. Any property acquired in fee for ecological reserves shall be acquired in
35 the name of the state, and shall, at all times, be subject to any rules and regulations
36 that may be prescribed from time to time by the commission for the occupation,
37 use, operation, protection, and administration of the property as ecological
38 reserves.

39 **Comment.** Section 60770 continues former Fish and Game Code Section 1581 without
40 substantive change.

1 **§ 60775. Valid title to acquired property**

2 60775. The department shall do all things necessary to secure a valid title in the
3 state to the property acquired in fee for ecological reserves but no payment shall
4 be made therefor until the title is vested in and satisfactory to the state. No such
5 land will be acquired by eminent domain.

6 **Comment.** Section 60775 continues former Fish and Game Code Section 1582 without
7 substantive change.

8 **§ 60780. Prohibited entry**

9 60780. Except in accordance with the regulations of the commission it is
10 unlawful to enter upon any ecological reserves established under the provisions of
11 this part, or to take therein any bird or the nest or eggs thereof, or any mammal,
12 fish, mollusk, crustacean, amphibian, reptile or any other form of plant or animal
13 life.

14 **Comment.** Section 60780 continues former Fish and Game Code Section 1583 without
15 substantive change.

16 **§ 60785. Facilities and programs**

17 60785. (a) Notwithstanding Section 60750, which sets forth the primary
18 purposes of ecological reserves, the department may construct facilities and
19 conduct programs in ecological reserves it selects to provide natural history
20 education and recreation if those facilities and programs are compatible with the
21 protection of the biological resources of the reserve.

22 (b) As provided in Sections 56030 and 56080, the department may control
23 access, use, and collect fees for selected ecological reserves.

24 **Comment.** Section 60785 continues former Fish and Game Code Section 1585 without
25 substantive change.

26 **§ 60790. Ecological reserves not wildlife management areas**

27 60790. The ecological reserves shall not be classified as wildlife management
28 areas pursuant to Section 60680 and shall be exempt from Section 60680.

29 **Comment.** Section 60790 continues the fifth sentence of former Fish and Game Code Section
30 1580 without substantive change.

31 **TITLE 2. SPECIFIC ECOLOGICAL RESERVES**

32 **§ 60850. Upper Newport Bay Ecological Reserve Maintenance and Preservation Fund**

33 60850. (a) The Upper Newport Bay Ecological Reserve Maintenance and
34 Preservation Fund is hereby created in the State Treasury.

35 (b) Notwithstanding Section 13340 of the Government Code, the money in the
36 fund is continuously appropriated, without regard to fiscal years, to the department
37 for purposes related to the maintenance and preservation of the Upper Newport
38 Bay Ecological Reserve.

1 **Comment.** Section 60850 continues former Fish and Game Code Section 1586 without
2 substantive change.

3 **§ 60855. Magnesia Spring Ecological Reserve**

4 60855. The Mirage Trail within the Magnesia Spring Ecological Reserve shall
5 be open nine months of the year during the months of May to January, inclusive,
6 and closed for three months during the months of February to April, inclusive, to
7 recreational hiking if the commission determines that all of the following
8 conditions are met:

9 (a) Local public agencies or other nonstate entities will assume complete
10 financial responsibility for the following as determined to be necessary by the
11 commission:

12 (1) Fencing to dissuade hikers from traversing beyond the trail and into sensitive
13 Peninsular bighorn sheep habitat.

14 (2) Signage and educational materials to educate hikers about Peninsular
15 bighorn sheep.

16 (b) A single entity has been designated to fulfill the financial arrangements and
17 other terms and conditions determined by the commission to be necessary
18 pursuant to subdivision (a).

19 (c) The entity designated pursuant to subdivision (b) has committed to expend at
20 least one hundred thousand dollars (\$100,000) by January 1, 2018, to monitor the
21 Peninsular bighorn sheep, consistent with the Coachella Valley Multiple Species
22 Habitat Conservation Plan.

23 (d) The commission shall, beginning January 1, 2020, and by January 1 every
24 two years thereafter, at a public hearing, assess compliance with the requirements
25 of this section and post its findings and any recommendations on its Internet Web
26 site.

27 (e) This section shall remain in effect only until January 1, 2028, and as of that
28 date is repealed, unless a later enacted statute that is enacted before January 1,
29 2028, deletes or extends that date.

30 **Comment.** Section 60855 continues former Fish and Game Code Section 1587 without
31 substantive change.

32 **PART 7. PROTECTED SPAWNING AREAS**

33 **§ 60900. Protected spawning areas**

34 60900. (a) The department may manage, control, and protect the portions of the
35 following spawning areas that occupy state-owned lands, to the extent necessary to
36 protect fishlife in these areas:

37 (1) The Sacramento River between Keswick and Squaw Hill Bridge, near Vina.

38 (2) The Feather River between Oroville and the mouth of Honcut Creek.

39 (3) The Yuba River between Englebright Dam and a point approximately four
40 miles east of Marysville.

1 (4) The American River between Nimbus Dam and a point one mile downstream
2 from Arden Way.

3 (5) The Mokelumne River between Pardee Dam and Lockeford.

4 (6) The Stanislaus River between Goodwin Dam and Riverbank.

5 (7) The Tuolumne River between La Grange Dam and the Geer Road (J14)
6 Bridge.

7 (8) The Merced River between Crocker Huffman Dam and Cressey.

8 (9) The Trinity River between Lewiston Dam and the confluence of the North
9 Fork Trinity, near Helena.

10 (10) The Eel River, from Fort Seward to Lake Pillsbury.

11 (11) The South Fork Eel River.

12 (12) The Middle Fork Smith River, from its mouth to Knopki Creek.

13 (13) The South Fork Smith River, from its mouth to Harrington Creek.

14 (14) The Salmon River, from its mouth to Rush Creek on the South Fork
15 Salmon River, to Carter Meadow on the east fork of the South Fork Salmon River,
16 and to Finley Camp on the North Fork Salmon River.

17 (15) Battle Creek, from its mouth to Coleman Powerhouse.

18 (16) The Cosumnes River, from Meiss Road Bridge to Latrobe Road Bridge.

19 (17) The Van Duzen River, from Yager Creek to the falls 1½ miles above
20 Bloody Run Creek.

21 (18) The Mad River, from Blue Lake Bridge to Bug Creek.

22 (19) The Middle Fork Eel River.

23 (20) The Mattole River.

24 (21) The Noyo River.

25 (22) The Big River, Mendocino County.

26 (23) The Gualala River.

27 (24) The Garcia River, Mendocino County.

28 (b) In the event of a conflict between an action of the department pursuant to
29 this section and the action of another department or agency of the state or another
30 public agency, the action of the Department of Fish and Wildlife taken pursuant to
31 this section shall prevail, except in the event of conflict with the following actions:

32 (1) An action of the state or regional water quality control boards in establishing
33 waste discharge requirements.

34 (2) An action required for commerce and navigation.

35 (3) An action by a public agency that is reasonably necessary for bridge
36 crossings, water conservation or utilization, or flood protection projects, including
37 the construction, maintenance, and operation thereof. This paragraph shall not
38 apply to the depositing of materials, other than necessary structural materials, in,
39 or the removing of materials from the streambeds in the areas designated in this
40 section, other than as necessary for the installation of structures.

41 (c) The director shall disapprove a stream alteration of a prime salmon or
42 steelhead spawning area on land of which ownership has not been legally

determined, when in the director's opinion the alteration would prove deleterious to fishlife.

Comment. Section 60900 continues former Fish and Game Code Section 1505 without substantive change.

PART 8. WILDERNESS AREAS

§ 60950. Vehicle prohibition

60950. It is unlawful for any person other than a legally constituted peace officer or officer or employee of the Forest Service of the United States Department of Agriculture, the department, or of the Department of Forestry and Fire Protection, or county fish and game wardens or their duly authorized representatives, to travel by motor boat, automobile, motorcycle, or other type of motorized vehicle, or, except for emergencies and for rescue and aerial search for rescue purposes, to land an airplane, helicopter, or similar equipment, within the boundaries of a primitive, wilderness, or wild area closed to the above modes of travel as established by a duly authorized officer of the Forest Service of the United States Department of Agriculture and recorded in the office of the Regional Headquarters of the Pacific-Southwest Region of the Forest Service of the United States Department of Agriculture and with the department.

Comment. Section 60950 continues former Fish and Game Code Section 10740 without substantive change.

§ 60955. Exception to vehicle prohibition

60955. (a) Except as provided in subdivision (b), nothing in this part prohibits access to a road or trail, in an area described in Section 60950, by a person who is accessing the road or trail in order to reach land that the person lawfully possesses. A person who may lawfully access a road or trail pursuant to this subdivision may authorize another person to do the same.

(b) Notwithstanding subdivision (a), none of the motorized vehicles or aircraft mentioned in Section 60950 may be used by any person as a means of gaining access to the wilderness areas for the purpose of hunting or fishing. Nor shall anyone who lawfully enters a wilderness area with a motorized vehicle or aircraft fish or hunt while within that area after having entered with a motorized vehicle or aircraft.

Comment. Section 60955 restates former Fish and Game Code Section 10741 without substantive change.

Note. Proposed Section 60955 would restate Existing Section 10741 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“ Nothing in this article shall be construed as prohibiting access over any road or trail in any such area to any land to which any person is entitled to possession by such person or any person authorized by him to use such road or trail as a means of access to the land; provided, that none of the motorized vehicles or aircraft mentioned in Section 10740 shall be used by any person as a means of gaining access to the wilderness areas for the purpose of hunting or fishing. Nor shall

1 anyone having a lawful right to enter a wilderness area with a motorized vehicle or aircraft fish or
2 hunt while within the area after having entered the area with a motorized vehicle or aircraft.”

3 **The Commission invites comment on whether the proposed restatement would cause any**
4 **problems.**

5 DIVISION 17. ACTIVITIES THAT AFFECT WILDLIFE

6 PART 1. CALIFORNIA ENDANGERED SPECIES ACT

7 TITLE 1. GENERAL PROVISIONS

8 CHAPTER 1. SHORT TITLE AND LEGISLATIVE FINDINGS

9 § 62000. Short title

10 62000. This part shall be known and may be cited as the California Endangered
11 Species Act.

12 **Comment.** Section 62000 continues former Fish and Game Code Section 2050 without
13 substantive change.

14 § 62005. Need for conservation

15 62005. The Legislature hereby finds and declares all of the following:

16 (a) Certain species of fish, wildlife, and plants have been rendered extinct as a
17 consequence of human activities, untempered by adequate concern and
18 conservation.

19 (b) Other species of fish, wildlife, and plants are in danger of, or threatened
20 with, extinction because their habitats are threatened with destruction, adverse
21 modification, or severe curtailment, or because of overexploitation, disease,
22 predation, or other factors.

23 (c) These species of fish, wildlife, and plants are of ecological, educational,
24 historical, recreational, esthetic, economic, and scientific value to the people of
25 this state, and the conservation, protection, and enhancement of these species and
26 their habitat is of statewide concern.

27 **Comment.** Section 62005 continues former Fish and Game Code Section 2051 without
28 substantive change.

29 § 62010. General policy

30 62010. The Legislature further finds and declares that it is the policy of the state
31 to conserve, protect, restore, and enhance any endangered species or any
32 threatened species and its habitat and that it is the intent of the Legislature,
33 consistent with conserving the species, to acquire lands for habitat for these
34 species.

1 **Comment.** Section 62010 continues former Fish and Game Code Section 2052 without
2 substantive change.

3 **§ 62015. Scope of required mitigation**

4 62015. The Legislature further finds and declares that if any provision of this
5 part requires a person to provide mitigation measures or alternatives to address a
6 particular impact on a candidate species, threatened species, or endangered
7 species, the measures or alternatives required shall be roughly proportional in
8 extent to any impact on those species that is caused by that person. Where various
9 measures or alternatives are available to meet this obligation, the measures or
10 alternatives required shall maintain the person's objectives to the greatest extent
11 possible consistent with this section. All required measures or alternatives shall be
12 capable of successful implementation. This section governs the full extent of
13 mitigation measures or alternatives that may be imposed on a person pursuant to
14 this part. This section shall not affect the state's obligations set forth in Section
15 62010.

16 **Comment.** Section 62015 continues former Fish and Game Code Section 2052.1 without
17 substantive change.

18 **§ 62020. Project approval and alternatives**

19 62020. (a) The Legislature further finds and declares that it is the policy of the
20 state that public agencies should not approve projects as proposed that would
21 jeopardize the continued existence of any endangered species or threatened species
22 or result in the destruction or adverse modification of habitat essential to the
23 continued existence of those species, if there are reasonable and prudent
24 alternatives available consistent with conserving the species or its habitat that
25 would prevent jeopardy.

26 (b) Furthermore, it is the policy of this state and the intent of the Legislature that
27 reasonable and prudent alternatives shall be developed by the department, together
28 with the project proponent and the state lead agency, consistent with conserving
29 the species, while at the same time maintaining the project purpose to the greatest
30 extent possible.

31 **Comment.** Section 62020 continues former Fish and Game Code Section 2053 without
32 substantive change.

33 **Note.** Proposed Section 62020 would continue Section 2053, which was amended by 2018
34 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

36 **§ 62025. Mitigation and enhancement in lieu of infeasible alternatives**

37 62025. The Legislature further finds and declares that, in the event specific
38 economic, social, or other conditions make alternatives infeasible, individual
39 projects may be approved if appropriate mitigation and enhancement measures are
40 provided.

1 **Comment.** Section 62025 continues former Fish and Game Code Section 2054 without
2 substantive change.

3 **§ 62030. Duty of state entities**

4 62030. The Legislature further finds and declares that it is the policy of this state
5 that all state agencies, boards, and commissions shall seek to conserve endangered
6 species and threatened species and shall utilize their authority in furtherance of the
7 purposes of this part.

8 **Comment.** Section 62030 continues former Fish and Game Code Section 2055 without
9 substantive change.

10 **§ 62035. Cooperation of landowners**

11 62035. The Legislature further finds and declares that the cooperation of the
12 owners of land that is identified as habitat for endangered species and threatened
13 species is essential for the conservation of those species and that it is the policy of
14 this state to foster and encourage that cooperation in furtherance of the purposes of
15 this part. Therefore, a landowner of property on which an endangered, threatened,
16 or candidate species lives shall not be liable for civil damages for injury to
17 employees of, or persons under contract with, the department if the injury occurs
18 while those persons are conducting survey, management, or recovery efforts with
19 respect to those species.

20 **Comment.** Section 62035 continues former Fish and Game Code Section 2056 without
21 substantive change.

22 **CHAPTER 2. DEFINITIONS**

23 **§ 62100. Application**

24 62100. The definitions in this chapter govern the construction of this part.

25 **Comment.** Section 62100 continues former Fish and Game Code Section 2060 without
26 substantive change.

27 **§ 62105. Candidate species**

28 62105. “Candidate species” means a native species or subspecies of a bird,
29 mammal, fish, amphibian, reptile, or plant that the commission has formally
30 noticed as being under review by the department for addition to either the list of
31 endangered species or the list of threatened species, or a species for which the
32 commission has published a notice of proposed regulation to add the species to
33 either list.

34 **Comment.** Section 62105 continues former Fish and Game Code Section 2068 without
35 substantive change.

36 **§ 62110. Conserve, conserving, and conservation**

37 62110. “Conserve,” “conserving,” and “conservation” mean to use, and the use
38 of, all methods and procedures that are necessary to bring any endangered species

1 or threatened species to the point at which the measures provided pursuant to this
2 part are no longer necessary. These methods and procedures include, but are not
3 limited to, all activities associated with scientific resources management, such as
4 research, census, law enforcement, habitat acquisition, restoration and
5 maintenance, propagation, live trapping, and transplantation, and, in the
6 extraordinary case where population pressures within a given ecosystem cannot be
7 otherwise relieved, may include regulated taking.

8 **Comment.** Section 62110 continues former Fish and Game Code Section 2061 without
9 substantive change.

10 **§ 62115. Endangered species**

11 62115. (a) “Endangered species” means a native species or subspecies of a bird,
12 mammal, fish, amphibian, reptile, or plant that is in serious danger of becoming
13 extinct throughout all, or a significant portion, of its range due to one or more
14 causes, including loss of habitat, change in habitat, overexploitation, predation,
15 competition, or disease.

16 (b) Any species determined by the commission as “endangered” on or before
17 January 1, 1985, is an “endangered species.”

18 **Comment.** Section 62115 continues former Fish and Game Code Section 2062 without
19 substantive change.

20 **§ 62120. Feasible**

21 62120. “Feasible” means feasible as defined in Section 21061.1 of the Public
22 Resources Code.

23 **Comment.** Section 62120 continues former Fish and Game Code Section 2063 without
24 substantive change.

25 **§ 62125. Project**

26 62125. “Project” means project as defined in Section 21065 of the Public
27 Resources Code.

28 **Comment.** Section 62125 continues former Fish and Game Code Section 2064 without
29 substantive change.

30 **§ 62128. Recover and recovery**

31 62128. “Recover” and “recovery” mean to improve, and improvement in, the
32 status of a species to the point at which listing is no longer appropriate under the
33 criteria set out in this part and any regulations adopted thereunder, and, if the
34 department has approved a recovery plan, satisfaction of the conditions of that
35 plan.

36 **Comment.** Section 62128 continues former Fish and Game Code Section 2064.5 without
37 substantive change.

38  **Note:** Proposed Section 62128 would continue Section 2064.5, which was added by 2018 Cal.
39 Stat. ch. 473.

1 **§ 62130. State lead agency**

2 62130. “State lead agency” means the state agency, board, or commission that is
3 a lead agency under the California Environmental Quality Act (Division 13
4 (commencing with Sec. 21000) of the Public Resources Code).

5 **Comment.** Section 62130 continues former Fish and Game Code Section 2065 without
6 substantive change.

7 **§ 62135. Threatened species**

8 62135. (a) “Threatened species” means a native species or subspecies of a bird,
9 mammal, fish, amphibian, reptile, or plant that, although not presently threatened
10 with extinction, is likely to become an endangered species in the foreseeable
11 future in the absence of the special protection and management efforts required by
12 this part.

13 (b) Any animal determined by the commission as “rare” on or before January 1,
14 1985, is a “threatened species.”

15 **Comment.** Section 62135 continues former Fish and Game Code Section 2067 without
16 substantive change.

17 **TITLE 2. LISTING OF ENDANGERED AND**
18 **THREATENED SPECIES**

19 **CHAPTER 1. GENERAL PROVISIONS**

20 **§ 62200. Establishment and maintenance of lists**

21 62200. (a) The commission shall establish a list of endangered species and a list
22 of threatened species.

23 (b) The commission shall add or remove species from either list if it finds, upon
24 the receipt of sufficient scientific information pursuant to this title, and based
25 solely upon the best available scientific information, that the action is warranted.

26 **Comment.** Section 62200 continues former Fish and Game Code Section 2070 without
27 substantive change.

28  **Note.** Proposed Section 62200 would continue Section 2070, which was amended by 2018
29 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
30 anticipation of its effect.

31 **§ 62205. Criteria**

32 62205. The department shall recommend, and the commission shall adopt,
33 criteria for determining if a species is endangered or threatened.

34 **Comment.** Section 62205 continues former Fish and Game Code Section 2071.5 without
35 substantive change.

1 **§ 62210. Notice of pending actions**

2 62210. (a) To provide all interested persons access to information and
3 notification of pending listing or delisting actions, the commission shall distribute
4 the related agenda of pending actions and those portions of its minutes of actions
5 taken under this title to any individuals who have notified the commission, in
6 writing with their address, of their interest. This notification shall be published in
7 the California Regulatory Notice Register and shall meet the requirements of
8 public notice as required for commission action under Section 62270, 62350,
9 62375, 62450, or 62500.

10 (b) The commission may impose an annual fee on those persons who request
11 inclusion on the list to be notified in order to offset the cost of establishing and
12 maintaining the list, and preparing and mailing the notices. Fees received pursuant
13 to this section shall be deposited in the Fish and Game Preservation Fund.

14 **Comment.** Section 62210 continues former Fish and Game Code Section 2078 without
15 substantive change.

16 CHAPTER 2. LISTING PROCESS

17 Article 1. Petition

18 **§ 62250. Guidelines**

19 62250. The commission shall adopt guidelines by which an interested person
20 may petition the commission to add a species to, or to remove a species from
21 either the list of endangered or the list of threatened species.

22 **Comment.** Section 62250 continues former Fish and Game Code Section 2071 without
23 substantive change.

24 **§ 62255. General content requirements**

25 62255. A petition shall be written, shall be clearly identified as a petition, and
26 shall clearly indicate the administrative measure recommended.

27 **Comment.** Section 62255 continues former Fish and Game Code Section 2072 without
28 substantive change.

29 **§ 62260. Specific content requirements**

30 62260. (a) To be accepted, a petition shall, at a minimum, include sufficient
31 scientific information that a petitioned action may be warranted.

32 (b) Petitions shall include information regarding the population trend, range,
33 distribution, abundance, and life history of a species, the factors affecting the
34 ability of the population to survive and reproduce, the degree and immediacy of
35 the threat, the impact of existing management efforts, suggestions for future
36 management, and the availability and sources of information.

1 (c) The petition shall also include information regarding the kind of habitat
2 necessary for species survival, a detailed distribution map, and any other factors
3 that the petitioner deems relevant.

4 **Comment.** Section 62260 continues former Fish and Game Code Section 2072.3 without
5 substantive change.

6 **§ 62265. Referral of petition to department**

7 62265. Within 10 days of the receipt of a petition from an interested person
8 under Section 62260, the commission shall refer the petition to the department.

9 **Comment.** Section 62265 continues former Fish and Game Code Section 2073 without
10 substantive change.

11 **§ 62270. Publication of notice of petition**

12 62270. (a) The commission shall publish a notice in the California Regulatory
13 Notice Register of the receipt of a petition prepared pursuant to Section 62260 by
14 the department, or by an interested party and referred to the department, pursuant
15 to Section 62265, or the commencement of an evaluation, to add a species to,
16 remove a species from, or change the status of a species on, the list of endangered
17 species or the list of threatened species pursuant to Section 62275.

18 (b) At a minimum, the notice shall include all of the following:

19 (1) The scientific and common name of the species.

20 (2) Habitat type, if that information is available in the petition.

21 (3) The location where interested persons can submit information to the
22 department relating to the petitioned species.

23 (c) The commission shall notify interested persons pursuant to Section 62210,
24 by mail, of the notices prepared pursuant to subdivision (a), and shall mail a copy
25 of the notice to those persons.

26 **Comment.** Section 62270 continues former Fish and Game Code Section 2073.3 without
27 substantive change.

28 **§ 62275. Department-initiated petition**

29 62275. (a) The department may, in the absence of a petition from an interested
30 party, recommend to the commission that it add a species to, or remove a species
31 from, either the list of endangered species or the list of threatened species.

32 (b) If it makes a recommendation under this section, the department shall
33 include the information specified in Section 62260.

34 (c) A department recommendation under this section shall be considered by the
35 commission as a petition with a departmental recommendation to accept and
36 consider as described in subdivision (b) of Section 62280, and is subject to
37 Sections 62350 to 62525, inclusive.

38 **Comment.** Section 62275 continues former Fish and Game Code Section 2072.7 without
39 substantive change.

1 **§ 62280. Department evaluation and recommendation**

2 62280. (a) Within 90 days of receipt of a petition, the department shall evaluate
3 the petition on its face and in relation to other relevant information the department
4 possesses or receives, and submit to the commission its written evaluation report
5 with one of the following recommendations to the commission:

6 (1) Based upon the information contained in the petition, there is not sufficient
7 information to indicate that the petitioned action may be warranted, and the
8 petition should be rejected.

9 (2) Based upon the information contained in the petition, there is sufficient
10 information to indicate that the petitioned action may be warranted, and the
11 petition should be accepted and considered.

12 (b) Upon the request of the director, the commission may grant the department
13 an extension of time, not to exceed 30 days, to allow the department additional
14 time to further analyze and evaluate the petition and complete its evaluation
15 report.

16 (c) The department's evaluation report shall include copies of, or a list of, all
17 information submitted to the department pursuant to subdivision (a) of Section
18 62285 during its evaluation of the petition. If copies are not included, the report
19 shall state where the listed information is available for review.

20 **Comment.** Section 62280 continues former Fish and Game Code Section 2073.5 without
21 substantive change.

22 **§ 62285. Public input during evaluation**

23 62285. (a) A person may submit information to the department relating to the
24 petitioned species during the evaluation of the petition pursuant to Section 62280.
25 The information shall relate to the matters identified in Section 62260.

26 (b) Within 30 days after receiving information pursuant to subdivision (a), the
27 department shall notify the petitioner regarding its content.

28 **Comment.** Section 62285 continues former Fish and Game Code Section 2073.4 without
29 substantive change.

30 **Note.** Proposed Section 62285 would continue Section 2073.4, which was amended by 2018
31 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
32 anticipation of its effect.

33 **§ 62290. Amendment of petition**

34 62290. (a) A petitioner may amend a petition at any time prior to the beginning
35 of the meeting held by the commission pursuant to Section 62350.

36 (b) If the commission determines that an amendment is substantive, the
37 commission shall resubmit the petition to the department for review pursuant to
38 Section 62280, publish notice of the amendment pursuant to Section 62270, and
39 renotify or continue any hearing scheduled pursuant to Section 62350 in order to
40 provide adequate opportunity for public comment.

1 **Comment.** Section 62290 continues former Fish and Game Code Section 2073.7 without
2 substantive change.

3 Article 2. Public Hearing and Meeting

4 **§ 62350. Scheduling**

5 62350. The commission shall schedule a petition for consideration at its next
6 available meeting, but not sooner than 30 days after receipt of the petition and
7 public release of the evaluation report, and distribute its pending agenda to
8 interested persons pursuant to Section 62210. The commission also shall make the
9 petition, evaluation report, and other materials received available for review.

10 **Comment.** Section 62350 continues former Fish and Game Code Section 2074 without
11 substantive change.

12 **§ 62355. Public hearing**

13 62355. At the meeting scheduled pursuant to Section 62350, the commission
14 shall hold a public hearing on the petition and shall receive information, written or
15 otherwise, and oral testimony.

16 **Comment.** Section 62355 continues the first sentence of former Fish and Game Code Section
17 2074.2(a) without substantive change.

18 **§ 62360. Closure of public hearing and record**

19 62360. (a) After the conclusion of oral testimony from the commission and
20 department staff, the petitioner, or any other persons, the commission may close
21 the public hearing and administrative record for the commission's decision
22 pursuant to this section.

23 (b) After the commission closes the public hearing, the administrative record for
24 the commission's decision is closed and it shall not be reopened except as
25 provided in Section 62365.

26 (c) Once the public hearing is closed, no person shall submit further information
27 to the commission for consideration on that petition and the commission shall not
28 accept any further information for consideration on that petition except as
29 provided in Section 62365.

30 **Comment.** Subdivision (a) of Section 62360 continues the second sentence of former Fish and
31 Game Code Section 2074.2(a) without substantive change.

32 Subdivisions (b) and (c) continue former Fish and Game Code Section 2074.2(b) without
33 substantive change.

34 **§ 62365. Reopening administrative record**

35 62365. The administrative record for the commission's decision pursuant to
36 Section 62360 shall not be reopened once the commission closes the public
37 hearing unless one of the following occurs prior to the commission's decision:

38 (a) There is a change in state or federal law or regulation that has a direct and
39 significant impact on the commission's determination as to whether the petition

provides sufficient information to indicate that the petitioned action may be warranted.

(b) The commission determines that it requires further information to evaluate whether the petition provides sufficient information to indicate that the petitioned action may be warranted. If the commission makes that determination during its deliberation, the commission may request, on the record at the scheduled meeting or at a continued meeting, further information on any issue relevant to making its determination as to whether the petition provides sufficient information to indicate that the petitioned action may be warranted. Any request by the commission pursuant to this subdivision shall specify a date by which the information must be submitted to the commission and shall serve to reopen the administrative record for the limited purpose of receiving further information relating to the issues specified by the commission in the request. Commission and department staff, the petitioner, or any other person may submit information in response to a request pursuant to this subdivision. If the commission reopens the record pursuant to this section, it shall provide an opportunity for public comment on the submitted information prior to the issuance of its decision.

Comment. Section 62365 continues former Fish and Game Code Section 2074.2(c) without substantive change.

§ 62370. Continuation of meeting

62370. (a) In its discretion, the commission may continue a meeting on a petition to a later date, which shall be no later than 90 days after the meeting scheduled pursuant to Section 62350, and subject to applicable notice and agenda requirements.

(b) If the public hearing has not yet closed, the meeting shall be continued for further public hearing and then deliberations.

(c) If the public hearing has been closed, the meeting will be continued for the purpose of deliberation, without further public hearing. In this case, a person shall not submit, and the commission shall not receive, further information relating to the petition except as provided in Section 62365.

Comment. Section 62370 continues former Fish and Game Code Section 2074.2(d) without substantive change.

Note. Proposed Section 62370 would restate existing Section 2074.2(d) to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“In its discretion, the commission may either close the public hearing and continue the meeting on the petition for the purpose of deliberation or continue both the public hearing and the meeting on the petition to a subsequent date, which shall be no later than 90 days after the meeting scheduled pursuant to Section 2074, and subject to applicable notice and agenda requirements.

If the commission closes the public hearing but continues the meeting for the purpose of deliberation, a person shall not submit, and the commission shall not receive, further information relating to the petition except as provided in subdivision (c).”

The Commission invites comment on whether that restatement would cause any problems.

1 **§ 62375. Commission findings**

2 62375. (a) At the meeting scheduled pursuant to Section 62350 or at a continued
3 meeting scheduled pursuant to Section 62370, the commission shall consider the
4 petition, the department's written report, written comments received, and oral
5 testimony provided during the public hearing, and the commission shall make and
6 enter in its record one of the following findings:

7 (1) If the commission finds that the petition does not provide sufficient
8 information to indicate that the petitioned action may be warranted, the
9 commission shall publish a notice of finding that the petition is rejected, including
10 the reasons why the petition is not sufficient.

11 (2) If the commission finds that the petition provides sufficient information to
12 indicate that the petitioned action may be warranted, the commission shall publish
13 a notice of finding that the petition is accepted for consideration. If the accepted
14 petition recommends the addition of a species to either the list of endangered
15 species or the list of threatened species, the commission shall include in the notice
16 that the petitioned species is a candidate species. The commission shall maintain a
17 list of species that are candidate species.

18 (b) The commission shall publish and distribute the findings relating to the
19 petition pursuant to Section 62210.

20 **Comment.** Section 62375 continues former Fish and Game Code Section 2074.2(e)-(f) without
21 substantive change.

22 **§ 62380. Notice of acceptance**

23 62380. If a petition is accepted by the commission for consideration, all
24 reasonable attempts shall be made to notify affected and interested parties and to
25 solicit data and comments on the petitioned action from as many persons as is
26 practicable. In addition to commission efforts to provide notification through
27 distribution of the commission agenda and minutes pursuant to Section 62210, the
28 department shall immediately undertake efforts to notify affected and interested
29 parties. Methods of notification may include, but are not limited to,
30 correspondence, newspaper notices, and press releases, and notification shall
31 include notice to owners of that land that may provide habitat essential to the
32 continued existence of the species, unless the director determines that ownership is
33 so widespread, fragmented, or complex as to make individual notice impractical.

34 **Comment.** Section 62380 continues former Fish and Game Code Section 2074.4 without
35 substantive change.

36 Article 3. Department Review

37 **§ 62400. Review**

38 62400. If the Commission accepts a petition for consideration, the department
39 shall promptly commence a review of the status of the species concerned in the
40 petition.

1 **Comment.** Section 62400 restates the first sentence of former Fish and Game Code Section
2 2074.6 without substantive change.

3  **Note.** The first clause of proposed Section 62400 was added to clarify the application of the
4 provision. **The Commission invites comment on whether that addition would cause any**
5 **problems.**

6 **§ 62405. Timing**

7 62405. (a) Within 12 months of the date of publication of a notice of acceptance
8 of a petition for consideration pursuant to paragraph (2) of subdivision (a) of
9 Section 62375, the department shall produce and make publicly available on the
10 department's Internet Web site a final written report.

11 (b) The revised report shall be posted on the department's Internet Web site for a
12 minimum of 30 days for public review prior to the hearing scheduled pursuant to
13 Section 62450.

14 (c) The commission may grant an extension of up to six months if the director
15 determines an extension is necessary to complete independent peer review of the
16 report, and to provide a minimum of 30 days for public review of the peer
17 reviewed report prior to the public hearing specified in Section 62450.

18 **Comment.** Subdivision (a) of Section 62405 continues the first part of the second sentence of
19 former Fish and Game Code Section 2074.6 without substantive change. A reference to the report
20 being "peer reviewed" is omitted as redundant. See Section 62410.

21 Subdivision (b) continues the fourth sentence of former Fish and Game Code Section 2074.6
22 without substantive change.

23 Subdivision (c) continues the fifth sentence of former Fish and Game Code Section 2074.6
24 without substantive change.

25 **§ 62410. Draft status review report**

26 62410. Prior to releasing a final written report, the department shall have a draft
27 status review report prepared and independently peer reviewed. Upon receiving
28 the peer reviewers' input, the department shall evaluate and respond in writing to
29 the independent peer review and shall amend the draft status review report as
30 appropriate.

31 **Comment.** Section 62410 continues the third sentence of former Fish and Game Code Section
32 2074.6 without substantive change.

33 **§ 62415. Final report**

34 62415. The final report, which shall be based on the best scientific information
35 available to the department, shall indicate whether the petitioned action is
36 warranted, make a preliminary identification of the habitat that may be essential to
37 the continued existence of the species, recommend management activities, and
38 make other recommendations for recovery of the species.

39 **Comment.** Section 62415 restates the second part of the second sentence of former Fish and
40 Game Code Section 2074.6 without substantive change.

§ 62420. Scope of inquiry

62420. This title does not impose any duty or obligation for, or otherwise require, the commission or the department to undertake independent studies or other assessments of any species when reviewing a petition and its attendant documents and comments. However, the department shall seek independent scientific peer review of the department’s draft status review report. The director may approve an extension of time for completion of the status report if necessary for the purposes of obtaining independent peer review pursuant to this article.

Comment. Section 62420 continues former Fish and Game Code Section 2074.8 without substantive change.

Notes. (1) The second sentence of existing Section 2074.8 requires that the department’s “status report” be peer reviewed. Presumably, this refers to the “draft status review report” required by existing Section 2074.6 (proposed Section 62410). If so, that language is redundant, as Section 2074.6 already requires that the draft status review report be peer reviewed. **The Commission invites comment on whether that language can be deleted without causing problems.**

(2) The second sentence of existing Section 2074.8 provides that the *director* may extend the time for completion of the “status report.” Presumably, this refers to the *final* report required by existing Section 2074.6 (proposed Section 62405), because there is no deadline specified for completion of the *draft* status review report. That rule seems to be at odds with the last sentence of existing Section 2074.6 (proposed Section 62405(c)), which authorizes the *Commission* to grant an extension to the deadline for completion of the final report. **The Commission invites comment on whether both the director and the Commission are authorized to extend the time for completion of the final report.**

Article 4. Commission Decision

§ 62450. Meeting

62450. The commission shall schedule the petition for final consideration at its next available meeting after receipt of the departmental report provided pursuant to Section 62405 and shall distribute the pending agenda for that meeting pursuant to Section 62210. The commission shall make the department’s report, or copies thereof, which was provided, pursuant to Section 62405, available for review upon request.

Comment. Section 62450 continues former Fish and Game Code Section 2075 without substantive change.

§ 62455. Public hearing

62455. At the meeting scheduled pursuant to Section 62450, the commission shall hold a public hearing on the petition and shall receive information, written or otherwise, and oral testimony.

Comment. Section 62455 continues the first sentence of former Fish and Game Code Section 2075.5(a) without substantive change.

1 **§ 62460. Closure of public hearing and record**

2 62460. (a) After the conclusion of oral testimony from the commission and
3 department staff, the petitioner, or any other person, the commission may close the
4 public hearing and the administrative record for the commission's decision
5 pursuant to this section.

6 (b) After the commission closes the public hearing, the administrative record for
7 the commission's decision is closed and it shall not be reopened except as
8 provided in Section 62465.

9 (c) Once the public hearing is closed, a person shall not submit further
10 information to the commission for consideration on that petition and the
11 commission shall not accept any further information for consideration on that
12 petition except as provided in Section 62465.

13 **Comment.** Subdivision (a) of Section 62460 continues the second sentence of former Fish and
14 Game Code Section 2075.5(a) without substantive change.

15 Subdivisions (b) and (c) continue former Fish and Game Code Section 2075.5(b) without
16 substantive change.

17 **§ 62465. Reopening administrative record**

18 62465. The administrative record for the commission's decision pursuant to
19 Section 62475 shall not be reopened once the commission closes the public
20 hearing unless one of the following occurs before the commission's decision:

21 (a) There is a change in state or federal law or regulation that has a direct and
22 significant impact on the commission's determination as to whether the petitioned
23 action is warranted.

24 (b) The commission determines that it requires further information to evaluate
25 whether the petitioned action is warranted. If the commission makes that
26 determination during its deliberation, the commission may request, on the record
27 at the scheduled meeting or at a continued meeting, further information on any
28 issue relevant to making its determination as to whether the petitioned action is
29 warranted. Any request by the commission pursuant to this subdivision shall
30 specify a date by which the information must be submitted to the commission and
31 shall serve to reopen the administrative record for the limited purpose of receiving
32 further information relating to the issues specified by the commission in the
33 request. Commission and department staff, the petitioner, or any other person may
34 submit information in response to a request pursuant to this subdivision.

35 **Comment.** Section 62465 continues former Fish and Game Code Section 2075.5(c) without
36 substantive change.

37 **§ 62470. Continuation of meeting**

38 62470. (a) In its discretion, the commission may continue a meeting on a
39 petition to a later date, which shall be no later than 90 days after the meeting
40 scheduled pursuant to Section 62450, and subject to applicable notice and agenda
41 requirements.

(b) If the public hearing has not yet closed, the meeting shall be continued for further public hearing and then deliberations.

(c) If the public hearing has been closed, the meeting will be continued for the purpose of deliberation, without further public hearing. In this case, a person shall not submit, and the commission shall not receive, further information relating to the petition except as provided in Section 62465.

Comment. Section 62470 continues former Fish and Game Code Section 2075.5(d) without substantive change.

Note. Proposed Section 62470 would restate existing Section 2075.5(d) to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“The commission, in its discretion, may either close the public hearing and continue the meeting on the petition for the purpose of deliberation or continue both the public hearing and the meeting on the petition to a subsequent date which is no later than 90 days after the meeting scheduled pursuant to Section 2075, and subject to applicable notice and agenda requirements. If the commission closes the public hearing but continues the meeting for the purpose of deliberation, a person shall not submit, and the commission shall not receive, further information relating to the petition except as provided in subdivision (c).”

The Commission invites comment on whether that restatement would cause any problems.

§ 62475. Commission findings

62475. (a) At the meeting scheduled pursuant to Section 62450, or at a continued meeting scheduled pursuant to Section 62470, the commission shall make one of the following findings based on the best available scientific information:

(1) The petitioned action is not warranted, in which case the finding shall be entered in the public records of the commission and the petitioned species shall be removed from the list of candidate species maintained pursuant to Section 62375.

(2) The petitioned action is warranted, or the petitioned action is not warranted but listing the petitioned species at a different status than that requested by the petitioner is warranted, in which case the commission shall, within 30 days of adopting written findings, publish a notice of that finding and shall add the species to, or remove the species from, the list of endangered species or the list of threatened species.

(b) Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code does not apply to the change in status of a species pursuant to this title. The commission shall submit the change in status to the Office of Administrative Law for filing with the Secretary of State and publication in the California Code of Regulations. The commission shall use underline or italics to indicate additions to, and strikeout to indicate deletions from, the California Code of Regulations to reflect the change in status.

Comment. Section 62475 continues former Fish and Game Code Section 2075.5(e) without substantive change.

Note. Proposed Section 62020 would continue Section 2075.5(e), which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 62480. Writ of mandate

62480. A finding made pursuant to Section 62475 is subject to judicial review under Section 1094.5 of the Code of Civil Procedure.

Comment. Section 62480 continues former Fish and Game Code Section 2076 without substantive change.

Note. Existing Section 2076 provides for mandamus review of “any finding pursuant to this section.” That reference to “this section” appears to be an error, as Section 2076 does not provide for any findings. The Commission believes that Section 2076 was intended to refer to the preceding provision, Section 2075.5. That would make sense, as Section 2075.5(e) provides for a final commission decision on whether to list a species as endangered or threatened. Proposed Section 62480 has been revised to refer to proposed Section 62475, which would continue existing Section 2075.5(e). **The Commission invites comment on whether that revision correctly captures the intended meaning of Section 2076.**

§ 62485. Emergency regulation

62485. (a) Notwithstanding Sections 62250 to 62475, inclusive, the commission may adopt a regulation that adds a species to the list of endangered species or to the list of threatened species as an emergency regulation pursuant to Section 1250 if the commission finds that there is any emergency posing a significant threat to the continued existence of the species.

(b) The commission shall notify affected or interested persons of the adoption of the emergency regulation pursuant to the methods described in Section 62380.

Comment. Section 62485 continues former Fish and Game Code Section 2076.5 without substantive change.

Article 5. Ongoing Review

§ 62500. Five-year review of listed species

62500. (a) Upon a specific appropriation of funds by the Legislature, the department shall, or if other funding is available, in the absence of a specific appropriation, may, review species listed as an endangered species or as a threatened species every five years to determine if the conditions that led to the original listing are still present.

(b) The review shall be conducted based on information that is consistent with the information specified in Section 62260 and that is the best scientific information available to the department.

(c) The review shall include a review of the identification of the habitat that may be essential to the continued existence of the species and the department’s recommendations for management activities and other recommendations for recovery of the species.

1 (d) The department shall notify any person who has notified the commission, in
2 writing with their address, of their interest, and the department may notify any
3 other person.

4 **Comment.** Section 62500 continues former Fish and Game Code Section 2077(a) without
5 substantive change.

6 **Note.** Proposed Section 62500 would continue Section 2077(a), which was amended by 2018
7 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
8 anticipation of its effect.

9 **§ 62505. Five-year review of species listed by both Commission and US Department of**
10 **Interior**

11 62505. Review pursuant to section 62500 of species that are listed by both the
12 commission and the United States Department of Interior shall be conducted in
13 conjunction with the five-year review process of the United States Department of
14 the Interior.

15 **Comment.** Section 62505 continues former Fish and Game Code Section 2077(b) without
16 substantive change.

17 **Note.** Proposed Section 62505 would continue Section 2077(b), which was amended by 2018
18 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
19 anticipation of its effect.

20 **§ 62510. Timing of initial five-year review**

21 62510. (a) Initial review of those species listed by the commission before
22 January 1, 1982, that are not listed by the federal government shall be undertaken
23 and completed by July 1, 1987.

24 (b) Initial review of those species listed by the commission after January 1,
25 1982, that are not listed by the federal government shall be undertaken and
26 completed within five years of the date the species was originally listed by the
27 commission.

28 **Comment.** Section 62510 continues former Fish and Game Code Section 2077(c) without
29 substantive change.

30 **§ 62515. Written report of five-year review results**

31 62515. (a) The department shall report in writing to the commission the results
32 of its five-year review for each listed species.

33 (b) The commission shall treat any report of the department under this section
34 that contains a recommendation to add a species to, or remove a species from, the
35 list of endangered species or the list of threatened species as a department
36 recommendation submitted pursuant to Section 62275.

37 **Comment.** Section 62515 continues former Fish and Game Code Section 2077(e) without
38 substantive change.

1 **§ 62520. Discretionary review**

2 62520. Notwithstanding any other provision of this article, the commission or
3 the department may review a species at any time based upon a petition or upon
4 other data available to the department and the commission.

5 **Comment.** Section 62520 continues former Fish and Game Code Section 2077(d) without
6 substantive change.

7 **§ 62525. Triennial report**

8 62525. (a) The department shall, by January 30 of every third year, beginning
9 January 30, 1986, prepare a report summarizing the status of all state listed
10 endangered, threatened, and candidate species, and shall post the report on the
11 commission's Internet Web site.

12 (b) The report shall include, but not be limited to, a listing of those species
13 designated as endangered, threatened, and candidate species, a discussion of the
14 current status of endangered, threatened, or candidate species, and the timeframes
15 for the review of listed species pursuant to this title.

16 **Comment.** Section 62525 continues former Fish and Game Code Section 2079 without
17 substantive change.

18 **TITLE 3. TAKE, IMPORTATION,**
19 **EXPORTATION, OR SALE**

20 **CHAPTER 1. PROHIBITION**

21 **§ 62600. Take, possession, purchase, or sale**

22 62600. No person or public agency shall import into this state, export out of this
23 state, or take, possess, purchase, or sell within this state, any species, or any part or
24 product thereof, that the commission determines to be an endangered species or a
25 threatened species, or attempt any of those acts, except as otherwise provided in
26 this part, the Native Plant Protection Act (Title 1 (commencing with Section
27 53800) of Part 3 of Division 14), or the California Desert Native Plants Act
28 (Division 23 (commencing with Section 80001) of the Food and Agricultural
29 Code).

30 **Comment.** Section 62600 continues former Fish and Game Code Section 2080 without
31 substantive change.

32 See also Sections 4482, 4570, 6202, 6204, 6206 (enforcement).

33  **Note.** Proposed Section 62600 would continue Section 2080), which was amended by 2018
34 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
35 anticipation of its effect.

1 **§ 62605. Candidate species**

2 62605. The provisions of this title shall apply to any species designated as a
3 candidate species under Section 62375 if notice has been given pursuant to Section
4 62380.

5 **Comment.** Section 62605 continues former Fish and Game Code Section 2085 without
6 substantive change.

7 **CHAPTER 2. GENERAL EXCEPTIONS**

8 **§ 62650. Take for scientific, educational, or management purposes**

9 62650. The department may authorize acts that are otherwise prohibited
10 pursuant to Section 62600, through permits or memorandums of understanding,
11 the department may authorize individuals, public agencies, universities, zoological
12 gardens, and scientific or educational institutions, to import, export, take, or
13 possess any endangered species, threatened species, or candidate species for
14 scientific, educational, or management purposes.

15 **Comment.** Section 62650 continues former Fish and Game Code Section 2081(a) without
16 substantive change.

17 **§ 62655. Take of fish authorized by specified provisions**

18 62655. This part does not apply to the taking of fish otherwise authorized
19 pursuant to Part 6 (commencing with Section 14200) of Division 6 or pursuant to
20 the provisions described in Sections 37805 and 45005.

21 **Comment.** Section 62655 continues the first clause of former Fish and Game Code Section
22 2083 without substantive change.

23 **§ 62665. Take of fish authorized by Commission**

24 62665. (a) The commission may authorize, subject to terms and conditions it
25 prescribes, and based on the best available scientific information, (1) the taking of
26 any candidate species, or (2) the taking of any fish by hook and line for sport that
27 is listed as an endangered, threatened, or candidate species, provided that in either
28 case the take is consistent with this part.

29 (b) The department may recommend to the commission that the commission
30 authorize, or not authorize, the taking of an endangered, threatened, or candidate
31 species pursuant to this section.

32 **Comment.** Section 62665 continues former Fish and Game Code Section 2084 without
33 substantive change.

34  **Note.** Proposed Section 62665 would continue Section 2084, which was amended by 2018
35 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
36 anticipation of its effect.

37 **§ 62670. Take authorized by department**

38 62670. (a) Nothing in this part or in any other provision of law prohibits the
39 taking or the incidental taking of any endangered, threatened, or candidate species

1 if the taking was authorized by the department through a permit or memorandum
2 of understanding, or in a natural communities conservation plan, habitat
3 conservation plan, habitat management plan, or other plan or agreement approved
4 by or entered into by the department, or in an amendment to a permit,
5 memorandum of understanding, plan, or agreement and all of the following
6 conditions are met:

7 (1) The application process commenced on or before April 10, 1997.

8 (2) The department approved the permit, memorandum of understanding, plan,
9 agreement, or amendment thereto within either of the following timeframes:

10 (A) On or before April 10, 1997.

11 (B) Between April 10, 1997, and January 1, 1998, and the department also
12 certifies that the permit, memorandum of understanding, plan, agreement, or
13 amendment thereto meets the substantive criteria of subdivision (a) of Section
14 62700.

15 (b) The permits, memoranda of understanding, plan, agreements, and
16 amendments thereto described in this section are deemed to be in full force and
17 effect, as of the date approved or entered into by the parties insofar as they
18 authorize the take of species.

19 (c) This section does not apply to the “Emergency Management Measures
20 Permit” issued by the department on March 15, 1995.

21 **Comment.** Section 62670 continues former Fish and Game Code Section 2081.1 without
22 substantive change.

23 **§ 62675. Sale of organism by person who possessed it before it was listed**

24 62675. This part does not prohibit the sale of any endangered species or
25 threatened species, or any part or product thereof, when the owner can
26 demonstrate that the species, or part or product thereof, was in the person’s
27 possession before the date upon which the commission listed the species as an
28 endangered species or threatened species or as an endangered animal or rare
29 animal prior to January 1, 1985, and shall not prohibit the sale of that part or
30 product by an individual not normally engaged in that sale if it was originally
31 possessed by the seller for the seller’s own use and so used by that seller.
32 However, it shall be unlawful to sell any species, or part or product thereof, if that
33 sale would have been unlawful prior to the date upon which the commission added
34 the species to the listing of endangered species or threatened species or to the
35 listing of endangered animals or rare animals prior to January 1, 1985.

36 **Comment.** Section 62675 continues former Fish and Game Code Section 2082 without
37 substantive change.

38 **§ 62680. Possession of animal possessed before it was listed**

39 62680. This part does not apply to the possession of individual animals that were
40 lawfully possessed before the commission listed the species as an endangered

1 species or as a threatened species or as an endangered animal or rare animal prior
2 to January 1, 1985.

3 **Comment.** Section 62680 continues the second clause of former Fish and Game Code Section
4 2083 without substantive change.

5 CHAPTER 3. INCIDENTAL TAKE

6 § 62700. Incidental take

7 62700. (a) The department may authorize acts that are otherwise prohibited
8 pursuant to Section 62600, by a permit for the take of endangered species,
9 threatened species, and candidate species if all of the following conditions are met:

10 (1) The take is incidental to an otherwise lawful activity.

11 (2) The impacts of the authorized take shall be minimized and fully mitigated.
12 The measures required to meet this obligation shall be roughly proportional in
13 extent to the impact of the authorized taking on the species. Where various
14 measures are available to meet this obligation, the measures required shall
15 maintain the applicant's objectives to the greatest extent possible. All required
16 measures shall be capable of successful implementation. For purposes of this
17 section only, impacts of taking include all impacts on the species that result from
18 any act that would cause the proposed taking.

19 (3) The applicant shall ensure adequate funding to implement the measures
20 required by paragraph (2), and for monitoring compliance with, and effectiveness
21 of, those measures.

22 (b) No permit may be issued pursuant to subdivision (a) if issuance of the permit
23 would jeopardize the continued existence of the species. The department shall
24 make this determination based on the best scientific and other information that is
25 reasonably available, and shall include consideration of the species' capability to
26 survive and reproduce, and any adverse impacts of the taking on those abilities in
27 light of (1) known population trends; (2) known threats to the species; and (3)
28 reasonably foreseeable impacts on the species from other related projects and
29 activities.

30 (c) The department shall adopt regulations to aid in the implementation of
31 subdivision (a) and the requirements of Division 13 (commencing with Section
32 21000) of the Public Resources Code, with respect to authorization of take. The
33 department may seek certification pursuant to Section 21080.5 of the Public
34 Resources Code to implement subdivision (a).

35 (e) Commencing January 1, 2019, the department shall post each new permit
36 issued pursuant to subdivision (a) on its Internet Web site within 15 days of the
37 effective date of the permit.

38 **Comment.** Section 62700 continues former Fish and Game Code Section 2081(b)-(e) without
39 substantive change.

 **Note.** Proposed Section 62700 would continue Section 2081(b)-(e), which was amended by 2018 Cal. Stat. ch. 329, § 11.5. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 62705. Incidental take authorized by federal entity

62705. (a) Notwithstanding any other provision of this part, Title 1 (commencing with Section 53800) of, or Title 2 (commencing with Section 53900) of Part 3 of Division 14, but subject to subdivision (c), if any person obtains from the United States Secretary of the Interior or the United States Secretary of Commerce an incidental take statement pursuant to Section 7 of the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1536) or an incidental take permit pursuant to Section 10 of that federal act (16 U.S.C. Sec. 1539) that authorizes the taking of an endangered species or a threatened species that is listed pursuant to Section 4 of that federal act (16 U.S.C. Sec. 1533) and that is an endangered species, threatened species, or a candidate species pursuant to this chapter, no further authorization or approval is necessary under this chapter for that person to take that endangered species, threatened species, or candidate species identified in, and in accordance with, the incidental take statement or incidental take permit, if that person does all of the following:

(1) Notifies the director in writing that the person has received an incidental take statement or an incidental take permit issued pursuant to the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.).

(2) Includes in the notice to the director a copy of the incidental take statement or incidental take permit.

(3) Includes with the notice payment of the permit application fee required pursuant to Chapter 6 (commencing with Section 63600).

(b) Upon receipt of the notice specified in paragraph (1) of subdivision (a), the director shall immediately have published in the General Public Interest section of the California Regulatory Notice Register the receipt of that notice.

(c) Within 30 days after the director has received the notice described in subdivision (a) that an incidental take statement or an incidental take permit has been issued pursuant to the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.), the director shall determine whether the incidental take statement or incidental take permit is consistent with this chapter. If the director determines within that 30-day period, based upon substantial evidence, that the incidental take statement or incidental take permit is not consistent with this chapter, then the taking of that species may only be authorized pursuant to this chapter.

(d) The director shall immediately publish the determination pursuant to subdivision (c) in the General Public Interest section of the California Regulatory Notice Register.

(e) Unless deleted or extended by a later enacted statute that is chaptered before the date this section is repealed, this section shall remain in effect only until, and is

1 repealed on, the effective date of an amendment to Section 7 or 10 of the federal
2 Endangered Species Act of 1973 (16 U.S.C. Secs. 1536 and 1539) that alters the
3 requirements for issuing an incidental take statement or an incidental take permit,
4 as applicable.

5 **Comment.** Section 62705 continues former Fish and Game Code Section 2080.1 without
6 substantive change.

7 **Note.** Proposed Section 62705 would continue Section 2080.1, which was amended by 2018
8 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
9 anticipation of its effect.

10 CHAPTER 4. SPECIFIC EXCEPTIONS

11 Article 1. Quantification Settlement Agreement

12 § 63300. Take from specified effects of implementation of agreement

13 63300. Notwithstanding Title 5 (commencing with Section 30200) of Part 3 of
14 Division 8, Title 4 (commencing with Section 32700) of Part 3 of Division 9, and
15 Sections 38200, 52200, and 53000, and contingent upon the fulfillment of the
16 conditions listed in Section 63305, the department may authorize, under this part
17 or Title 1 (commencing with Section 64500) of Part 2, the take of species resulting
18 from impacts attributable to the implementation of the Quantification Settlement
19 Agreement, as defined in subdivision (a) of Section 1 of Chapter 617 of the
20 Statutes of 2002, on all of the following:

21 (a) The salinity, elevation, shoreline habitat, or water quality of the Salton Sea.

22 (b) The quantity and quality of water flowing in the All American Canal, the
23 Coachella Canal, the Imperial Valley and Coachella Valley drains, the New and
24 Alamo Rivers, the Coachella Valley Stormwater Channel, and the habitat
25 sustained by those flows.

26 (c) Agricultural lands in the Imperial Valley.

27 (d) The quantity and quality of water flowing in the Colorado River, the habitat
28 sustained by those flows, and the collection of that water for delivery to authorized
29 users.

30 **Comment.** Section 63300 restates former Fish and Game Code Section 2081.7(a) without
31 substantive change.

32 § 63305. Application of Section 63300

33 63305. Section 63300 only applies if all of the following conditions are fulfilled:

34 (a) The Quantification Settlement Agreement is executed by the appropriate
35 parties on or before October 12, 2003.

36 (b) The department has determined that the appropriate agreements have been
37 executed to address environmental impacts at the Salton Sea that include
38 enforceable commitments requiring all of the following:

1 (1) Imperial Irrigation District to transfer 800,000 acre-feet of conserved water,
2 by conservation methods selected by the Imperial Irrigation District, to the
3 Department of Water Resources on a mutually agreed-upon schedule in exchange
4 for payment of one hundred seventy-five dollars (\$175) per acre-foot. The price
5 shall be adjusted for inflation on an annual basis.

6 (2) Imperial Irrigation District to transfer up to 800,000 additional acre-feet of
7 conserved water, by conservation methods selected by the Imperial Irrigation
8 District, to the Department of Water Resources during the first 15 years of the
9 Quantification Settlement Agreement on the schedule established for the
10 mitigation water that was previously to be transferred to the San Diego Water
11 Authority, or on a mutually agreed-upon schedule, at no cost for the water in
12 addition to the payment for the water from the mitigation fund described in
13 paragraph (1) of subdivision (b) of Section 3 of Chapter 613 of the Statutes of
14 2003.

15 (3) As a condition to acquisition of the water described in paragraph (1), the
16 Department of Water Resources shall be responsible for any environmental
17 impacts, including Salton Sea salinity, related to use or transfer of that water. As a
18 condition to acquisition of the water described in paragraph (2), the Department of
19 Water Resources shall be responsible for environmental impacts related to Salton
20 Sea salinity that are related to the use or transfer of that water.

21 (4) The Metropolitan Water District of Southern California (MWD) to purchase
22 up to 1.6 million acre-feet of the water provided in accordance with paragraphs (1)
23 and (2) from the Department of Water Resources at a price of not less than two
24 hundred fifty dollars (\$250) per acre-foot on a mutually agreed-upon schedule.
25 The price shall be adjusted for inflation on an annual basis. The Department of
26 Water Resources shall deposit all proceeds from the sale of water pursuant to this
27 paragraph, after deducting costs and reasonable administrative expenses, into the
28 Salton Sea Restoration Fund established in Section 56850.

29 (5) The Metropolitan Water District of Southern California to pay not less than
30 twenty dollars (\$20) per acre-foot for all special surplus water received by MWD
31 as a result of reinstatement of access to that water under the Interim Surplus
32 Guidelines by the United States Department of Interior subtracting any water
33 delivered to Arizona as a result of a shortage. The money shall be paid into the
34 Salton Sea Restoration Fund. The price shall be adjusted for inflation on an annual
35 basis. Metropolitan Water District of Southern California shall receive a credit
36 against future mitigation obligations under the Lower Colorado River Multi-
37 Species Conservation Plan for any funds provided under this paragraph to the
38 extent that those funds are spent on projects that contribute to the conservation or
39 mitigation for species identified in the Lower Colorado River Multi-Species
40 Conservation Plan and that are consistent with the preferred alternative for Salton
41 Sea restoration.

42 (6) Coachella Valley Water District, Imperial Irrigation District, and San Diego
43 County Water Authority to pay a total of thirty million dollars (\$30,000,000) to

1 the Salton Sea Restoration Fund as provided in paragraph (2) of subdivision (b) of
2 Section 3 of Chapter 613 of the Statutes of 2003.

3 (c) The requirements of subdivision (a) and (b) of Section 62700 are satisfied as
4 to the species for which take is authorized.

5 (d) The take authorization provides for the development and implementation, in
6 cooperation with federal and state agencies, of an adaptive management process
7 for monitoring the effectiveness of, and adjusting as necessary, the measures to
8 minimize and fully mitigate the impacts of the authorized take. The adjusted
9 measures are subject to Section 62015.

10 (e) The take authorization provides for the development and implementation in
11 cooperation with state and federal agencies of an adaptive management process
12 that substantially contributes to the long-term conservation of the species for
13 which take is authorized. Preparation of the adaptive management program and
14 implementation of the program is the responsibility of the department. The
15 department's obligation to prepare and implement the adaptive management
16 program is conditioned upon the availability of funds pursuant to the Water
17 Security, Clean Drinking Water, Coastal and Beach Protection Act of 2002, if it is
18 approved by the voters at the statewide general election to be held November 5,
19 2002 (Proposition 50), or other funds that may be appropriated by the Legislature
20 or approved by the voters for that purpose. The failure to appropriate funds does
21 not relieve the applicant of the obligations of subdivisions (c) and (d). However,
22 the applicant shall not be required to fund any program pursuant to this
23 subdivision.

24 (f) The requirements of subdivision (c) may be satisfied if the take is authorized
25 under this title.

26 **Comment.** Section 63305 restates former Fish and Game Code Section 2081.7(b)-(d) without
27 substantive change.

28  **Note.** Existing Section 2081.7(d)(4) (proposed Section 63305(f)) refers to "Chapter 10
29 (commencing with Section 2080)." The reference to "Chapter 10" appears to be erroneous.
30 Section 2080 is the first section of Article 3 of Chapter 1.5 (which would be continued as Title 3
31 of Part 1). Proposed Section 63305(f) corrects the error. **The Commission invites comment on
32 whether the proposed correction would cause any problem.**

33 § 63310. Restoration study

34 63310. (a) The Secretary of the Resources Agency, in consultation with the
35 department, the Department of Water Resources, the Salton Sea Authority,
36 appropriate air quality districts, and the Salton Sea Advisory Committee, shall
37 undertake a restoration study to determine a preferred alternative for the
38 restoration of the Salton Sea ecosystem and the protection of wildlife dependent
39 on that ecosystem.

40 (b) The Secretary of the Resources Agency shall extend an invitation to the
41 United States Geological Survey Salton Sea Science Office to also participate in
42 the restoration study, and the office may participate if it accepts the invitation.

1 (c) The restoration study shall be conducted pursuant to a process with deadlines
2 for release of the report and programmatic environmental documents established
3 by the secretary, in consultation with the department, the Department of Water
4 Resources, the Salton Sea Authority, and the Salton Sea Advisory Committee, and
5 the United States Geological Survey Salton Sea Science Office, if it is a
6 participant. The secretary shall use all available authority to enter into a
7 memorandum of understanding (MOU) with the Secretary of the Interior, as
8 provided in Section 101(b)(1)(B)(i) of the Salton Sea Reclamation Act of 1998
9 (P.L. 105-372) for the purpose of obtaining federal participation in the restoration
10 of the Salton Sea.

11 (d) The restoration study shall establish all of the following:

12 (1) An evaluation of alternatives for the restoration of the Salton Sea that
13 includes consideration of strategies for salinity control, habitation creation and
14 restoration, and different shoreline elevations and surface area configurations. The
15 alternatives shall consider the range of possible inflow conditions. The evaluation
16 established pursuant to this paragraph shall also include suggested criteria for
17 selecting and evaluating alternatives consistent with Title 10 (commencing with
18 Section 56800) of Part 2 of Division 15, including, but not limited to, at least one
19 most cost-effective, technically feasible, alternative.

20 (2) An evaluation of the magnitude and practicability of costs of construction,
21 operation, and maintenance of each alternative evaluated.

22 (3) A recommended plan for the use or transfer of water provided by paragraph
23 (2) of subdivision (b) of Section 63305. No water may be transferred pursuant to
24 that subdivision unless the secretary finds that transfer is consistent with the
25 preferred alternative for Salton Sea restoration.

26 (4) The selection of a preferred alternative consistent with Section 56900,
27 including a proposed funding plan to implement the preferred alternative. The
28 proposed funding plan shall include a determination of the moneys that are, or
29 may be, available to construct and operate the preferred project, including, but not
30 limited to, all of the following moneys:

31 (A) Moneys in the Salton Sea Restoration Fund established by Section 56850.

32 (B) State water and environmental bond moneys.

33 (C) Federal authorizations and appropriations.

34 (D) Moneys available through a Salton Sea Infrastructure Financing District
35 established pursuant to Section 53395.9 of the Government Code and local
36 assessments by the Salton Sea Authority or its member agencies.

37 (E) Moneys derived from user or other fees.

38 (e) The study identifying the preferred alternative shall be submitted to the
39 Legislature on or before December 31, 2006.

40 **Comment.** Section 63310 continues former Fish and Game Code Section 2081.7(e)(1)-(3)
41 without substantive change.

42 **Note.** The Commission invites comment on whether proposed Section 63310(e) can be
43 omitted as obsolete.

1 **§ 63315. Advisory committee**

2 63315. The Secretary of the Resources Agency shall establish an advisory
3 committee for purposes of Section 63310 as follows:

4 (a) The advisory committee shall be selected to provide balanced representation
5 of the following interests:

- 6 (1) Agriculture.
- 7 (2) Local governments.
- 8 (3) Conservation groups.
- 9 (4) Tribal governments.
- 10 (5) Recreational users.
- 11 (6) Water agencies.
- 12 (7) Air pollution control districts.
- 13 (8) Geothermal energy development.

14 (b) Appropriate federal agency representatives may be asked to serve in an ex
15 officio capacity.

16 (c) The Resources Agency shall consult with the advisory committee throughout
17 all stages of the alternative selection process.

18 (d) The advisory committee shall meet no fewer than six times annually.

19 (e) The secretary shall appoint a vice chair of the advisory committee from the
20 committee membership. The vice chair shall work with the secretary to develop
21 advisory committee agendas and to schedule meetings of the committee. The
22 secretary and vice chair shall appoint an agenda subcommittee to assist in the
23 preparation of advisory committee agendas.

24 (f) The advisory committee shall submit to the Resources Agency
25 recommendations to assist the agency in preparation of its restoration plan. The
26 Resources Agency shall develop a schedule for the completion of these
27 recommendations to ensure that these recommendations will be considered by the
28 agency in a timely and meaningful manner as the restoration plan is developed.
29 These recommendations may include, but are not limited to:

- 30 (1) The specific goals and objectives of the restoration plan.
- 31 (2) The range of alternative restoration actions that must be developed and
32 analyzed.
- 33 (3) The no action alternative.
- 34 (4) The criteria for determining economic and technical feasibility of the
35 alternatives.
- 36 (5) The range of options for funding the restoration plan.
- 37 (6) The selection of a preferred alternative for a restoration plan.

38 (g) The Resources Agency shall periodically provide an update to the advisory
39 committee of the current work plan and schedule for the development of the
40 restoration plan.

41 **Comment.** Section 63315 continues former Fish and Game Code Section 2081.7(e)(4) without
42 substantive change.

1 **§ 63320. No exemption from other laws**

2 63320. This article shall not be construed to exempt from any other provision of
3 law the Quantification Settlement Agreement and the Agreement for Transfer of
4 Conserved Water by and between the Imperial Irrigation District and the San
5 Diego County Water Authority, dated April 29, 1998.

6 **Comment.** Section 63320 continues former Fish and Game Code Section 2081.7(f) without
7 substantive change.

8 **§ 63325. Related assessment by Resources Agency**

63325. (a) The Resources Agency shall undertake the necessary activities to
assess the protection of recreational opportunities, including, but not limited to,
hunting, fishing, boating, and birdwatching, and the creation of opportunities for
improved local economic conditions, surrounding the Salton Sea.

(b) The Resources Agency shall not undertake any of those activities if the agency determines they would constitute a project purpose for environmental documentation that is prepared pursuant to Sections 63300 to 63320, inclusive.

16 **Comment.** Section 63325 continues former Fish and Game Code Section 2081.8 without
17 substantive change.

Article 2. Chinook Salmon

19 **§ 63350. Findings and declarations**

20 63350. The Legislature finds and declares the following:

(a) The historic settlement approved by Congress in the San Joaquin River Restoration Settlement Act (Part I of Subtitle A of Title X of Public Law 111-11) directs the federal government to reintroduce spring run Chinook salmon to the San Joaquin River. In approving the settlement and the new statutory provisions governing the reintroduction of California central valley spring run Chinook salmon, Congress found that the implementation of the settlement, to resolve 18 years of contentious litigation regarding restoration of the San Joaquin River and the reintroduction of the salmon, was a unique and unprecedented circumstance. The settlement also provides that nothing in the settlement diminishes the statutory or regulatory protections under the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.) nor does it establish a precedent with respect to any other application of the federal act.

(b) Central valley spring run Chinook salmon have been listed since 1999 as a threatened species under this part and were still listed as of January 1, 2011.

(c) Restoring spring run Chinook salmon to the San Joaquin River is intended to further the conservation and recovery of the species.

(d) Consistent with the unique and historic circumstances that led to the settlement, nothing in this article is intended to create any precedent as to future application of this part, nor does this article otherwise modify other existing statutes or legal obligations.

Comment. Section 63350 continues former Fish and Game Code Section 2080.2 without substantive change.

§ 63355. Enhancement of survival permit

63355. (a) Notwithstanding any other provision of this part, if any person obtains from the Secretary of Commerce an enhancement of survival permit pursuant to subparagraph (A) of paragraph (1) of subdivision (a) of Section 1539 of Title 16 of the United States Code that authorizes the taking of spring run Chinook salmon (*Oncorhynchus tshawytscha*) in order to establish or maintain an experimental population in the San Joaquin River pursuant to subsection (j) of that section and the San Joaquin River Restoration Settlement Act (Part I of Subtitle A of Title X of Public Law 111-11), no further authorization or approval is necessary under this part for that person to take that species as identified in, and in accordance with, the enhancement of survival permit, if all of the following requirements are met:

(1) That person shall notify the director in writing that the person has received an enhancement of survival permit and include in the notification a copy of the permit.

(2) Upon receipt of the notice specified in paragraph (1), the director shall immediately have the notice published in the General Public Interest Section of the California Regulatory Notice Register.

(3) Within 30 days after the director has received the notice specified in paragraph (1), the director shall determine whether the enhancement of survival permit will further the conservation of the species. As used in this paragraph, “conservation” has the same meaning as defined in Section 62110.

(4) The director shall immediately have the determination pursuant to paragraph (3) published in the General Public Interest Section of the California Regulatory Notice Register.

(b) The timing and extent of a take authorization under this section shall be limited to the terms in the federal enhancement of survival permit and shall expire upon the expiration of the federal permit.

(c) This section shall remain in effect only until the effective date of an amendment to Section 1539 of Title 16 of the United States Code that alters the requirements for issuing an enhancement of survival permit, as applicable, and as of that date is repealed, unless a later enacted statute, that is chaptered before the date this section is repealed, deletes or extends that date.

Comment. Section 63355 continues former Fish and Game Code Section 2080.3 without substantive change.

Note. Existing Section 2080.3(a)(2) refers to “paragraph (1) of subdivision (c).” That reference is erroneous, as subdivision (c) is not divided into paragraphs. In context, it appears that the reference should have been to Section 2080.3(a)(1). That change has been made in proposed Section 63355. **The Commission invites comment on whether the change would cause any problems.**

1 Spring Creek Bridge in the County of Shasta, if all of the following conditions are
2 satisfied:

3 (1) The requirements of subdivisions (a) and (b) of Section 62700 are satisfied
4 for the take of the rough sculpin.

5 (2) The department ensures that all further measures necessary to satisfy the
6 conservation standard of subdivision (d) of Section 64515 are incorporated into
7 the project.

8 (3) The take authorization provides for the development and implementation, in
9 cooperation with federal and state agencies, of a monitoring program and an
10 adaptive management process until the department determines that any impacts
11 resulting from the replacement of the Spring Creek Bridge have been fully
12 mitigated.

13 (b) This section shall not be construed to exempt the project described in
14 subdivision (a) from any other law.

15 **Comment.** Section 63400 continues former Fish and Game Code Section 2081.4 without
16 substantive change.

17 Article 4. Threespine Stickleback

18 § 63450. Bouquet Creek

19 63450. (a) The department may authorize, under this part, the take of the
20 unarmored threespine stickleback (*Gasterosteus aculeatus williamsoni*) resulting
21 from impacts attributable to the habitat restoration project to restore, maintain, and
22 improve riparian habitat on public lands in the geographic area defined in
23 paragraph (1) and projects to restore the flow capacity to Bouquet Creek in
24 Bouquet Canyon on public lands, undertaken by the Los Angeles County
25 Department of Public Works, the Los Angeles Department of Water and Power,
26 and the United States Department of Agriculture, Forest Service, if all of the
27 following conditions are satisfied:

28 (1) The take authorization is limited to the portion of Bouquet Creek located
29 from a position normal to mile marker 8.3 on Bouquet Canyon Road to a position
30 normal to mile marker 16.3 on Bouquet Canyon Road, inclusive.

31 (2) The department has determined that the appropriate agreements have been
32 executed to address environmental impacts at the Bouquet Canyon area, including,
33 but not limited to, Bouquet Creek.

34 (3) The requirements of subdivisions (a) and (b) of Section 62700 are satisfied
35 for the take of the unarmored threespine stickleback.

36 (4) The department ensures that all further measures necessary to satisfy the
37 conservation standard of subdivision (d) of Section 64515 are incorporated into
38 the projects.

39 (5) A biologist will be on duty whenever an activity is conducted that may affect
40 the unarmored threespine stickleback.

1 (6) The take authorization provides for the development and implementation, in
2 cooperation with federal and state agencies, of a monitoring program and an
3 adaptive management process that satisfy the conservation standard of subdivision
4 (d) of Section 64515 for monitoring the effectiveness of, and adjusting, as
5 necessary, the measures to minimize and fully mitigate the impacts of the
6 authorized take.

7 (7) The take authorization provides for the development and implementation, in
8 cooperation with state and federal agencies, of an adaptive management process
9 that substantially contributes to the long-term conservation of the unarmored
10 threespine stickleback.

11 (b) This section shall not be construed to exempt the projects described in
12 subdivision (a) from any other law.

13 (c) This section shall not be construed to affect the contractual obligations of the
14 Los Angeles Department of Water and Power to provide water from Bouquet
15 Reservoir.

16 **Comment.** Section 63450 continues former Fish and Game Code Section 2081.6 without
17 substantive change.

18 **§ 63455. Metropolitan Water District of Southern California water supply facility**

19 63455. (a) The department may authorize, under this part, the incidental take of
20 unarmored threespine stickleback (*Gasterosteus aculeatus williamsoni*) attributable
21 to the periodic dewatering, inspection, maintenance, modification, or repair,
22 including emergency repair, of the Metropolitan Water District of Southern
23 California's Foothill Feeder water supply facility from Castaic Dam to the Joseph
24 Jensen Treatment Plant in the County of Los Angeles, contingent upon the
25 fulfillment of the following conditions:

26 (1) The department determines that the requirements of subdivisions (a) and (b)
27 of Section 62700 are satisfied for the take of the unarmored threespine stickleback.

28 (2) The department ensures that all further measures necessary to satisfy the
29 conservation standard of subdivision (d) of Section 64515 are incorporated into
30 the project.

31 (3) The take authorization provides for the development and implementation, in
32 cooperation with the department, of an adaptive management plan for monitoring
33 the effectiveness of, and adjusting as necessary, the measures to minimize and
34 fully mitigate the impacts of the authorized take and to satisfy the conservation
35 standard of subdivision (d) of Section 64515.

36 (4) A biologist who has substantial relevant experience evaluating impacts to
37 inland fisheries is on duty whenever an activity is conducted that may affect the
38 unarmored threespine stickleback.

39 (5) The Metropolitan Water District of Southern California consults with the
40 department to consider feasible measures to avoid and minimize incidental take of
41 unarmored threespine stickleback. For purposes of this paragraph, "feasible" has

1 the same meaning as defined in Section 15364 of Title 14 of the California Code
2 of Regulations.

3 (b) The take authorization shall cover any incidental take of unarmored
4 threespine stickleback attributable to the periodic dewatering, inspection,
5 maintenance, modification, or repair, including emergency repair, of the Foothill
6 Feeder that may occur in the following locations:

7 (1) Within the Santa Clara River, from the Bouquet Canyon Road Bridge to a
8 point located 4,000 feet downstream of where Commerce Center Drive, as of
9 January 1, 2016, dead-ends adjacent to the Santa Clara River.

10 (2) From the confluence with the Santa Clara River upstream to the following
11 locations:

12 (A) In Charlie Canyon to a point 1,000 feet upstream of the Foothill Feeder
13 facility dewatering structure.

14 (B) In San Francisquito Creek to the Copper Hill Drive bridge.

15 (C) In Placerita Creek to the Hacienda Lane crossing.

16 (D) In Bouquet Creek to the Newhall Ranch Road Bridge.

17 (c) The take authorization shall also cover any incidental take of unarmored
18 threespine stickleback that may occur in the course of implementing mitigation or
19 conservation actions required in the permit issued pursuant to subdivision (a) as
20 may be modified through an adaptive management plan adopted pursuant to
21 paragraph (3) of subdivision (a).

22 (d) The permit issued pursuant to subdivision (a) shall include conditions that
23 cover biological and scientific considerations including, but not limited to, criteria
24 for the handling of stranded fish and their relocation into suitable habitat, the
25 dewatering of the Foothill Feeder, and the reasonable and feasible mimicking of
26 streamflows. The permit conditions shall be in compliance with the project
27 description, mitigation measures, and release plan set forth in the certified
28 environmental impact report known as the “Foothill Feeder Repair and Future
29 Inspections Project Environmental Impact Report, January 2005, State
30 Clearinghouse Number 2005071082.” The permit conditions are subject to
31 amendment when required by the adaptive management plan or when modified by
32 a subsequent final environmental document pursuant to the California
33 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
34 Public Resources Code).

35 (e) This section shall not be construed to exempt from any other law the periodic
36 dewatering, inspection, maintenance, modification, or repair of the Foothill
37 Feeder.

38 (f) If the Metropolitan Water District of Southern California receives a permit
39 under this section, the permit shall require the district to report to the department
40 within six months after every dewatering of the Foothill Feeder. The report shall
41 address compliance with the permit conditions and the effectiveness of the
42 adaptive management plan in contributing to the conservation of the unarmored

1 threespine stickleback. The Metropolitan Water District of Southern California
2 shall ensure that each report is made available to the public.

3 (g) As used in this section, “modification” does not include alterations to expand
4 the maximum physical capacity of the Foothill Feeder to deliver water.

5 **Comment.** Section 63455 continues former Fish and Game Code Section 2081.10 without
6 substantive change.

7 Article 5. Lost River and Shortnose Sucker

8 § 63475. Klamath Hydroelectric Settlement Agreement

9 63475. (a) The department may authorize, under this part, the take or possession
10 of the Lost River sucker (*Deltistes luxatus* and *Catostomus luxatus*) and shortnose
11 sucker (*Chasmistes brevirostris*) resulting from impacts attributable to or
12 otherwise related to the decommissioning and removal of the Iron Gate Dam, the
13 Copco 1 Dam, the Copco 2 Dam, or the J.C. Boyle Dam, each located on the
14 Klamath River, consistent with the Klamath Hydroelectric Settlement Agreement,
15 if all of the following conditions are met:

16 (1) The department finds the authorized take will not jeopardize the continued
17 existence of the Lost River sucker or shortnose sucker.

18 (2) The impacts of the authorized take are minimized.

19 (3) The take authorization requires department approval of a sampling, salvage,
20 and relocation plan to be implemented and that describes the measures necessary
21 to minimize the take of adult Lost River sucker and shortnose sucker associated
22 with the department’s authorization. The plan shall provide for a sampling effort,
23 the results of which will provide information used to make decisions and to
24 implement the plan while utilizing the principles of adaptive management.

25 (b) This section shall not be construed to exempt the project described in
26 subdivision (a) from any other law.

27 **Comment.** Section 63475 continues former Fish and Game Code Section 2081.11 without
28 substantive change.

29  **Note.** Proposed Section 63475 would continue Section 2081.11, which was added by 2018
30 Cal. Stat. ch. 586. Although that bill will not take effect until 2019, it is included here in
31 anticipation of its effect.

32 Article 6. Limestone Salamander

33 § 63500. Ferguson Slide Permanent Restoration Project

34 63500. (a) Notwithstanding Section 52200, the department may authorize, under
35 this part, the incidental take of limestone salamander (*Hydromantes brunus*)
36 resulting from impacts attributable to the Department of Transportation’s
37 implementation of the Ferguson Slide Permanent Restoration Project on State
38 Route 140 from 8 miles east of Briceburg to 7.6 miles west of El Portal in
39 Mariposa County, contingent upon the fulfillment of the following conditions:

1 (1) The Department of Transportation begins construction of the Ferguson Slide
2 Permanent Restoration Project on or before January 1, 2016.

3 (2) The department has determined that the Department of Transportation will
4 adopt appropriate avoidance and mitigation measures to protect the limestone
5 salamander through enforceable commitments that, at a minimum, include the
6 following:

7 (A) A construction work window that prevents initial ground-disturbing
8 construction activities from occurring on the southern slope during the
9 salamander's active season of December to March, inclusive.

10 (B) Environmentally sensitive area fencing in the form of five-foot orange
11 plastic mesh, as well as salamander protection exclusionary fencing in the form of
12 24-inch sheet metal, will be erected if construction-related activities will occur
13 adjacent to limestone salamander habitat during their active season.

14 (C) A biological monitor will be onsite during active building to inspect the
15 worksite and all exclusionary fencing.

16 (D) All ground-disturbing activities within 100 feet will cease if a limestone
17 salamander is detected in an active construction site until the animal can be safely
18 removed from the area according to an agreed-upon salvage plan.

19 (3) The requirements of subdivisions (a) and (b) of Section 62700 are satisfied
20 for the take of the limestone salamander.

21 (4) The department ensures that all further measures necessary to satisfy the
22 conservation standard of subdivision (d) of Section 64515 are incorporated into
23 the project.

24 (5) The take authorization provides for the development and implementation, in
25 cooperation with the department, of an adaptive management process for
26 monitoring the effectiveness of, and adjusting as necessary, the measures to
27 minimize and fully mitigate the impacts of the authorized take. The adjusted
28 measures are subject to Section 62015.

29 (6) The failure to appropriate funds does not relieve the applicant of the
30 obligations of paragraphs (1) and (2).

31 (7) Any observations of the species in the worksite and any accidental injury or
32 mortality from vehicle strikes or other means will be reported to the department
33 immediately and the onsite biological monitor will notify the resident engineer
34 who will halt the work immediately.

35 (b) This section shall not be construed to exempt the Ferguson Slide Permanent
36 Restoration Project on State Route 140 from 8 miles east of Briceburg to 7.6 miles
37 west of El Portal in Mariposa County from any other law.

38 **Comment.** Section 63500 continues former Fish and Game Code Section 2081.9 without
39 substantive change.

Article 7. Bluntnose Leopard Lizard

§ 63510. Allensworth Community Services District

63510. (a) The department may authorize, under this title, by permit, the take or possession of the blunt-nosed leopard lizard (*Gambelia sila*) resulting from impacts attributable to or otherwise related to the Allensworth Community Services District's drilling and construction of a new water well, connection of the new water well to the existing distribution system, and construction of a new water storage tank, if both of the following conditions are met:

(1) The requirements of subdivisions (a) and (b) of Section 62700 are satisfied for the take of the blunt-nosed leopard lizard.

(2) The take authorization provides for the development and implementation of a monitoring program and an adaptive management plan, approved by the department, for monitoring the effectiveness of, and adjusting as necessary, the measures to minimize and fully mitigate the impacts of the authorized take.

(b) The permit issued pursuant to subdivision (a) shall cover any incidental take of a blunt-nosed leopard lizard that may occur in the course of implementing mitigation or conservation actions required in the permit.

(c) The permit conditions are subject to amendment when required by the monitoring program and adaptive management plan adopted pursuant to paragraph (2) of subdivision (a).

(d) This section shall not be construed to exempt the projects described in subdivision (a) from any other law.

Comment. Section 63510 continues former Fish and Game Code Section 2081.12 without substantive change.

Note. Proposed Section 63510 would continue Section 2018.12, which was added by 2018 Cal. Stat. ch. 22 as an urgency measure.

CHAPTER 5. EXPERIMENTAL POPULATIONS

§ 63550. Enhancement of survival permit

63550. (a) Notwithstanding any other provision of this chapter, if any person obtains from the Secretary of Commerce or the Secretary of the Interior an enhancement of survival permit pursuant to Section 1539(a)(1)(A) of Title 16 of the United States Code that authorizes the taking of an endangered species or a threatened species that is listed pursuant to Section 1533 of Title 16 of the United States Code and that is an endangered species, threatened species, or candidate species pursuant to this chapter in order to establish or maintain an experimental population, no further authorization or approval is necessary under this chapter for that person to take that endangered species, threatened species, or candidate species identified in, and in accordance with, the enhancement of survival permit, if all of the following requirements are met:

1 (1) That person shall notify the director in writing that the person has received
2 an enhancement of survival permit and include in the notification a copy of the
3 permit.

4 (2) Upon receipt of the notice specified in paragraph (1), the director shall
5 immediately have the notice published in the General Public Interest section of the
6 California Regulatory Notice Register.

7 (3) Within 30 days after the director has received the notice specified in
8 paragraph (1), the director determines the enhancement of survival permit will
9 further the conservation of the species. As used in this paragraph, “conservation”
10 has the same meaning as defined in Section 2061.

11 (4) The director shall immediately have the determination pursuant to paragraph
12 (3) published in the General Public Interest section of the California Regulatory
13 Notice Register.

14 (b) The timing and extent of a take authorization under this section shall be
15 limited to the terms in the federal enhancement of survival permit and shall expire
16 upon the expiration of the federal permit.

17 (c) (1) This section shall remain in effect only until the effective date of an
18 amendment to Section 1539 of Title 16 of the United States Code that alters the
19 requirements for issuing an enhancement of survival permit, as applicable, and as
20 of that date is repealed.

21 (2) If the director becomes aware that this section has been repealed pursuant to
22 this subdivision, the director shall notify the Legislature of that fact pursuant to
23 Section 9795 of the Government Code.

24 **Comment.** Section 63550 continues former Fish and Game Code Section 2080.5 without
25 substantive change.

26 **§ 63555. Experimental population**

27 63555. (a) For purposes of this chapter, “experimental population” means any
28 population nonessential to the continued existence of an endangered, threatened,
29 or candidate species, including any eggs, propagules, individuals, or offspring
30 arising solely therefrom, that the Secretary of the Interior or the Secretary of
31 Commerce designates as an experimental population pursuant to Section 1539(j)
32 of Title 16 of the United States Code.

33 (b) If a population of a species is an experimental population, no further
34 authorization or approval is necessary under this chapter for any person to
35 incidentally take members of that experimental population, if all of the following
36 requirements are met:

37 (1) The Secretary of the Interior or the Secretary of Commerce has published
38 regulations in the Federal Register for the designated experimental population as
39 required by Section 1539(j) of Title 16 of the United States Code.

40 (2) The director has determined, in writing, that the regulations specified in
41 paragraph (1) meet the requirements in subdivision (c).

1 (3) The action or activity that results in incidental take of the designated
2 experimental population is authorized by the regulations published in the Federal
3 Register.

4 (c) The director shall issue the determination described in paragraph (2) of
5 subdivision (b), if the director finds that the federal regulations described in
6 paragraph (1) of subdivision (b) meet all of the following criteria:

7 (1) The federal regulations will further the conservation of the species. As used
8 in this paragraph, “conservation” has the same meaning as defined in Section
9 2061.

10 (2) The federal regulations contain measures to avoid and minimize the impacts
11 of any taking allowed by the regulation.

12 (3) The federal regulations will not jeopardize the continued existence or
13 recovery of the species.

14 (d) If the director determines that the federal regulations described in paragraph
15 (1) of subdivision (b) are not consistent with this chapter, or if the action or
16 activity that results in incidental take is not authorized in those federal regulations,
17 the incidental take of members of the designated experimental population may
18 only be authorized pursuant to the other provisions of this chapter.

19 (e) The director shall publish the determination, pursuant to paragraph (2) of
20 subdivision (b), and subdivision (d), in the General Public Interest section of the
21 California Regulatory Notice Register.

22 **Comment.** Section 63555 continues former Fish and Game Code Section 2080.6 without
23 substantive change.

24 **§ 63560. Public outreach**

25 63560. It is the intent of the Legislature that, before the introduction of an
26 experimental population, as defined in Section 2080.6, onto land or into waters of
27 this state, the department should undertake appropriate public outreach, including
28 public meetings, in an effort to inform the public about the proposed introduction
29 of the experimental population and its potential effects, if any, on ongoing human
30 activities. To the extent practicable, this public outreach should include inviting
31 other public boards, departments, or agencies that may have a regulatory or other
32 role regarding the experimental population to collaborate with the department.
33 Nothing in this section shall be construed to modify any other law or legal
34 obligation.

35 **Comment.** Section 63560 continues former Fish and Game Code Section 2080.7 without
36 substantive change.

37 **CHAPTER 6. PERMIT APPLICATION FEE**

38 **§ 63600. Definitions**

39 63600. For purposes of this chapter, the following terms have the following
40 meanings:

(a) “Permit” means any authorization issued by the department pursuant to this title to take a species listed by this part as candidate, threatened, or endangered. The term includes a consistency determination pursuant to Section 62705 and a concurrence determination pursuant to Section 63355 or 63360.

(b) “Permit application” means an application for a permit, an amendment to a permit, or a renewal of a permit. The term includes a consistency determination request pursuant to Section 62705 and a concurrence determination request pursuant to Section 63355 or 63360.

(c) “Permittee” includes any individual, firm, association, organization, partnership, business, trust, corporation, limited liability company, district, city, county, city and county, town, federal agency, and the state who applies for or who has received a permit pursuant to this title.

(d) “Project” has the same meaning as defined in Section 21065 of the Public Resources Code.

(e) “Project cost” means the total direct and indirect project expenses that include, but are not limited to, labor, equipment, permanent materials and supplies, subcontracts, overhead, and miscellaneous costs. The term shall not include permit or license expenses or mitigation costs. For purposes of this paragraph, the term “permit” includes, but is not limited to, a permit as defined in subdivision (a).

(f) “Voluntary habitat restoration project” means a project that meets both of the following requirements:

(1) The project’s primary purpose is voluntary habitat restoration and the project may have other environmental benefits, and the project is not required as mitigation due to a regulatory action.

(2) The project is not part of a regulatory settlement, a regulatory enforcement action, or a court order.

Comment. Section 63600 continues former Fish and Game Code Section 2081.2(a) without substantive change.

Note. Proposed Section 63600 would continue Section 2081.2(a), which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63605. Collection and use of fee

63605. (a) The department shall collect a permit application fee for processing a permit application submitted pursuant to this title at the time the permit application is submitted to the department.

(b) Notwithstanding Section 64100, upon appropriation to the department from the Endangered Species Permitting Account, the department shall use the permit application fee to pay for all or a portion of the department’s cost of processing permit applications, permit development, and compliance monitoring pursuant to this title.

(c) This section does not apply to any of the following:

(1) Activities or costs associated with the review of projects, inspection and oversight of projects, and permits necessary to conduct timber operations, as defined in Section 4527 of the Public Resources Code, in accordance with Article 9.5 (commencing with Section 4629) of Chapter 8 of Part 2 of Division 4 of the Public Resources Code.

(2) Permits or memoranda of understanding authorized by Section 62650.

(3) Permits for voluntary habitat restoration projects.

Comment. Section 63605 continues former Fish and Game Code Section 2081.2(b) without substantive change.

§ 63610. Timing

63610. (a) For a permit application submitted to the department pursuant to this title on or after September 13, 2016, the department shall collect the permit application fee at the time the permit application is submitted. The department shall not deem the permit application complete until it has collected the permit application fee. A permit application submitted or deemed complete before September 13, 2016, shall not be subject to fees established pursuant to this article.

(b) If a permit application is withdrawn within 30 days after paying the permit application fee, the department shall refund any unused portion of the fee to the permittee.

(c) If a permit application is withdrawn after 30 days of paying the permit application fee, the department shall not refund any portion of the fee to the permittee.

Comment. Section 63610 continues former Fish and Game Code Section 2081.2(e) without substantive change.

Notes. (1) Existing Section 2081.2(e)(1) twice refers to “the effective date of this section.” According to the Legislative Counsel’s website, the section became effective on September 13, 2016. Proposed Section 63610 replaces the references to the effective date of the section with that date. **The Commission invites comment on whether that change would cause any problems.**

(2) Proposed Section 63610 would continue Section 2081.2(e), which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63615. Fee amounts

63615. The department shall assess the permit application fee as follows, subject to Sections 63620, 63630, and 63640:

(a) For a project, regardless of estimated project cost, that is subject only to Section 62705, 63355, or 63360, the department shall assess either of the following amounts:

(1) Seven thousand five hundred dollars (\$7,500).

(2) Six thousand dollars (\$6,000), if the project uses a department-approved conservation or mitigation bank to fulfill mitigation obligations pursuant to this title.

1 (b) For a project where the estimated project cost is less than one hundred
2 thousand dollars (\$100,000), the department shall assess either of the following
3 amounts:

4 (1) Seven thousand five hundred dollars (\$7,500).

5 (2) Six thousand dollars (\$6,000), if the project uses a department-approved
6 conservation or mitigation bank to fulfill mitigation obligations pursuant to this
7 title.

8 (c) For a project where the estimated project cost is one hundred thousand
9 dollars (\$100,000) or more but less than five hundred thousand dollars (\$500,000),
10 the department shall assess either of the following amounts:

11 (1) Fifteen thousand dollars (\$15,000).

12 (2) Twelve thousand dollars (\$12,000), if the project uses a department-
13 approved conservation or mitigation bank to fulfill mitigation obligations pursuant
14 to this title.

15 (d) For a project where the estimated project cost is five hundred thousand
16 dollars (\$500,000) or more, the department shall assess either of the following
17 amounts:

18 (1) Thirty thousand dollars (\$30,000).

19 (2) Twenty-four thousand dollars (\$24,000), if the project uses a department-
20 approved conservation or mitigation bank to fulfill mitigation obligations pursuant
21 to this title.

22 (e) The department shall collect a fee of seven thousand five hundred dollars
23 (\$7,500) for processing permit amendments that the department has determined
24 are minor as defined in regulation or fifteen thousand dollars (\$15,000) for
25 processing permit amendments that the department has determined are major as
26 defined in regulation.

27 **Comment.** Section 63615 continues former Fish and Game Code Section 2081.2(c) without
28 substantive change.

29 **§ 63620. Adjustment of fee amount**

30 63620. The department shall adjust the fees in this article pursuant to Section
31 3755.

32 **Comment.** Section 63620 continues former Fish and Game Code Section 2081.2(f)(1) without
33 substantive change.

34 **§ 63625. Additional fee to cover costs**

35 63625. (a) If the permit application fee paid pursuant to Section 63615 is
36 determined by the department to be insufficient to complete permitting work due
37 to the complexity of a project or the potential effects of a project, the department
38 shall collect an additional fee of up to ten thousand dollars (\$10,000) from the
39 permittee to pay for its estimated costs. Upon its determination, the department
40 shall notify the permittee of the reasons why an additional fee is necessary and the
41 estimated amount of the additional fee.

(b) The additional fee collected pursuant to subdivision (a) shall not exceed an amount that, when added to the fee paid pursuant to Section 63615, equals thirty-five thousand dollars (\$35,000). The department shall collect the additional fee before a final decision on the application by the department.

Comment. Section 63625 continues former Fish and Game Code Section 2081.2(d) without substantive change.

Note. Proposed Section 63625 would continue Section 2081.2(d), which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63630. Periodic review of fee amount

63630. The department, at least every five years, shall analyze permit application fees pursuant to Section 3755 to ensure the appropriate fee amounts are charged.

Comment. Section 63630 continues former Fish and Game Code Section 2081.2(f)(3) without substantive change.

Note. Proposed Section 63630 would continue Section 2081.2(f)(3), which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63635. Endangered Species Permitting Account

63635. Fees paid to the department pursuant to this article shall be deposited in the Endangered Species Permitting Account, which is hereby established in the Fish and Game Preservation Fund. Notwithstanding Section 64100, funds in the account shall be available to the department, upon appropriation by the Legislature, for the purposes of administering and implementing this part, except that fee moneys collected pursuant to this article shall only be used for the purposes of this title.

Comment. Section 63635 continues former Fish and Game Code Section 2081.2(g) without substantive change.

§ 63640. Article XIII B of the California Constitution

63640. The Legislature finds that all revenues generated under this article and used for the purposes for which they were imposed are not subject to Article XIII B of the California Constitution.

Comment. Section 63640 continues former Fish and Game Code Section 2081.2(f)(2) without substantive change.

1 TITLE 4. AGRICULTURE

2 CHAPTER 1. GENERAL PROVISIONS

3 § 63700. Accidental take in the course of lawful agricultural activities

4 63700. (a) Accidental take of candidate, threatened, or endangered species
5 resulting from an act that occurs on a farm or a ranch in the course of otherwise
6 lawful routine and ongoing agricultural activities is not prohibited by this part.

7 (b) For purposes of this section, “accidental” means unintended or unforeseen.

8 (c) This section shall remain in effect only until January 1, 2020, and as of that
9 date is repealed, unless a later enacted statute, that is enacted before January 1,
10 2020, deletes or extends that date.

11 Comment. Section 63700 continues former Fish and Game Code Section 2087 without
12 substantive change.

13 § 63705. Routine and ongoing agricultural activities

14 63705. Routine and ongoing agricultural activities shall be defined by the
15 department by regulation and shall not include the conversion of agricultural land
16 to a nonagricultural use.

17 Comment. Section 63705 continues former Fish and Game Code Section 2089 without
18 substantive change.

19 § 63710. Application to take of fish species

20 63710. This title does not authorize the take of fish species. “Fish species” as
21 used in this section means a member of the class Osteichthyes.

22 Comment. Section 63710 continues the first part of former Fish and Game Code Section 2088
23 without substantive change.

24 § 63715. Application to timber harvesting

25 63715. This title does not apply to timber harvesting governed by the State
26 Board of Forestry.

27 Comment. Section 63715 continues the second part of former Fish and Game Code Section
28 2088 without substantive change.

29 CHAPTER 2. VOLUNTARY PROGRAM

30 § 63750. Authorization of voluntary programs

31 63750. (a) The department, in cooperation with the Department of Food and
32 Agriculture, agricultural commissioners, extension agents, farmers, ranchers, and
33 other agricultural experts, shall adopt regulations that authorize locally designed
34 voluntary programs for routine and ongoing agricultural activities on farms or
35 ranches that encourage habitat for candidate, threatened, and endangered species,
36 and wildlife generally.

(b) Agricultural commissioners, extension agents, farmers, ranchers, or other agricultural experts, in cooperation with conservation groups, may propose those programs to the department.

(c) The department shall propose regulations for those programs not later than July 1, 1998.

Comment. Section 63750 continues former Fish and Game Code Section 2086(a) without substantive change.

Note. The Commission invites comment on whether proposed Section 63750(c) can be omitted as obsolete.

§ 63755. Program requirements

63755. Programs authorized under Section 63750 shall do all of the following:

(a) Include management practices that will, to the maximum extent practicable, avoid and minimize take of candidate, endangered, and threatened species, while encouraging the enhancement of habitat.

(b) Be supported by the best available scientific information for both agricultural and conservation practices.

(c) Be consistent with the policies and goals of this part.

(d) Be designed to provide sufficient flexibility to maximize participation and to gain the maximum wildlife benefits without compromising the economics of agricultural operations.

(e) Include terms and conditions to allow farmers or ranchers to cease participation in a program without penalty. The terms and conditions shall include reasonable measures to minimize take during withdrawal from the program.

Comment. Section 63755 continues former Fish and Game Code Section 2086(b) without substantive change.

§ 63760. Take occurring while management practices followed

63760. Any taking of candidate, threatened, or endangered species incidental to routine and ongoing agricultural activities that occurs while the management practices specified by subdivision (a) of Section 63755 are followed, is not prohibited by this part.

Comment. Section 63760 continues former Fish and Game Code Section 2086(c) without substantive change.

§ 63765. Renewal of programs

63765. The department shall automatically renew the authorization for these voluntary programs every five years, unless the Legislature amends or repeals this chapter in which case the program shall be revised to conform to this chapter.

Comment. Section 63765 continues former Fish and Game Code Section 2086(d)(1) without substantive change.

1 **§ 63770. Report on program effects**

2 63770. (a) Commencing in 2000, and every five years thereafter, the department
3 shall post a report regarding the effect of the programs on its Internet Web site.
4 The department shall consult with the Department of Food and Agriculture in
5 evaluating the programs and preparing the report.

6 (b) The report shall address factors such as the temporary and permanent
7 acreage benefiting from the programs, include an estimate of the amount of land
8 upon which routine and ongoing agricultural activities are conducted, provide
9 examples of farmer and rancher cooperation, and include recommendations to
10 improve the voluntary participation by farmers and ranchers.

11 **Comment.** Section 63770 continues former Fish and Game Code Section 2086(d)(2) without
12 substantive change.

13 **§ 63775. Nonrenewal or modification of program**

14 63775. If the authorization for these programs is not renewed or is modified
15 under Section 63765, persons participating in the program shall be allowed to
16 cease participating in the program in accordance with the terms and conditions
17 specified in subdivision (e) of Section 63755, without penalty.

18 **Comment.** Section 63775 continues former Fish and Game Code Section 2086(e) without
19 substantive change.

20 **§ 63780. Educational outreach by nonprofit entity**

21 63780. (a) The department may approve an application submitted by an
22 agricultural-based nonprofit organization or other entity registered as a California
23 nonprofit organization to initiate and undertake public education and outreach
24 activities that promote the achievement of the objectives of this part.

25 (b) An application submitted pursuant to this section shall include the following:

26 (1) The name and contact information of the participating organization.

27 (2) A brief description of the planned outreach activities.

28 (3) An end date for the outreach activities.

29 (c) The department may require a participating organization to submit, for
30 approval by the department, educational materials and outreach materials that are
31 disseminated to the public in furtherance of this section.

32 (d) A participating organization shall file an annual report with the department
33 before the end of each calendar year during the time period specified in the
34 application. The report shall include, but is not limited to, the following:

35 (1) Complete information on the activities conducted by the participating
36 organization in the prior year, including a description of all means of
37 communicating to the public and agricultural community, including personal
38 visits, electronic communications, organized meetings, or other means.

39 (2) A compilation of responses from the public and members of the agricultural
40 community that will assist the participating organization and the department to
41 modify or improve public education and outreach activities on an ongoing basis.

(3) An assessment of the existing knowledge within the agricultural community of programs and prohibitions under this part and a review of outreach activities that could be used to adapt and improve future outreach efforts.

(4) Information on a farm or ranch that has expressed interest in participating in a voluntary program pursuant to this chapter or the safe harbor agreement program contained in Title 5 (commencing with Section 63900). This provision does not require the annual report to include the identification to the department of an individual, farm, or ranch.

Comment. Section 63780 continues former Fish and Game Code Section 2086(f) without substantive change.

TITLE 5. CALIFORNIA STATE SAFE HARBOR AGREEMENT PROGRAM ACT

CHAPTER 1. GENERAL PROVISIONS

§ 63900. Short title

63900. This title shall be known and may be cited as the California State Safe Harbor Agreement Program Act.

Comment. Section 63900 continues former Fish and Game Code Section 2089.2(a) without substantive change.

§ 63905. Findings

63905. The Legislature finds that a key to the goals set forth in this title of conserving, protecting, restoring, and enhancing endangered, threatened, and candidate species, is their habitat. A significant portion of the state's current and potential habitat for these species exists on property owned by private citizens, municipalities, tribes, and other nonfederal entities. Conservation efforts on these lands and waters are critical to help these declining species. Using a collaborative stewardship approach to these lands and waters will help ensure the success of these efforts.

Comment. Section 63905 continues former Fish and Game Code Section 2089.2(b) without substantive change.

§ 63910. Definitions

63910. As used in this title, the following definitions apply:

(a) "Agreement" means a state safe harbor agreement approved by the department pursuant to this title. "Agreement" includes an agreement with an individual landowner and a programmatic agreement.

(b) "Baseline conditions" means the existing estimated population size, the extent and quality of habitat, or both population size and the extent and quality of habitat, for the species on the land to be enrolled in the agreement that sustain seasonal or permanent use by the covered species. Baseline conditions shall be

1 determined by the department, in consultation with the applicant, and shall be
2 based on the best available science and objective scientific methodologies. For
3 purposes of establishing baseline conditions, a qualified person that is not
4 employed by the department may conduct habitat surveys, if that person has
5 appropriate species expertise and has been approved by the department.

6 (c) "Declining or vulnerable species" include candidate species, species
7 proposed for listing as an endangered or threatened species pursuant to this
8 chapter, or species that the department determines may, in the near future, be
9 candidate species or proposed for listing as an endangered or threatened species
10 pursuant to this part.

11 (d) "Department" means the Department of Fish and Wildlife, acting through its
12 director or his or her designee.

13 (e) "Landowner" means any person or nonstate or federal entity or entities that
14 lawfully hold any interest in land or water to which they are committing to
15 implement the requirements of this title.

16 (f) "Management actions" means activities on the enrolled land or water that are
17 reasonably expected by the department to provide a net benefit to the species or
18 their habitat, or both.

19 (g) "Monitoring program" means a program established or approved by the
20 department in accordance with paragraph (6) of subdivision (a) of Section 63950.

21 (h) "Net conservation benefit" means the cumulative benefits of the
22 management activities identified in the agreement that provide for an increase in a
23 species' population or the enhancement, restoration, or maintenance of covered
24 species' suitable habitats within the enrolled property. Net conservation benefit
25 shall take into account the length of the agreement, any offsetting adverse effects
26 attributable to the incidental taking allowed by the agreement, and other mutually
27 agreed upon factors. Net conservation benefits shall be sufficient to contribute
28 either directly or indirectly to the recovery of the covered species. These benefits
29 include, but are not limited to, reducing fragmentation and increasing the
30 connectivity of habitats, maintaining or increasing populations, enhancing and
31 restoring habitats, and buffering protected areas.

32 (i) "Programmatic agreement" means a state safe harbor agreement issued to a
33 governmental or nongovernmental program administrator. The program
34 administrator for a programmatic agreement shall work with landowners and the
35 department to implement the agreement. The program administrator and the
36 department shall be responsible for ensuring compliance with the terms of the
37 agreement.

38 (j) "Qualified person" means a person with species expertise who has been
39 approved by the department.

40 (k) "Return to baseline" means, at the termination of an agreement, activities
41 undertaken by the landowner to return the species population or extent or quality
42 of habitat to baseline, excluding catastrophic events such as floods, unplanned

fires, or earthquakes, and other factors mutually agreed upon prior to permit issuance and that are beyond the control of the landowner.

Comment. Section 63910 continues former Fish and Game Code Section 2089.4 without substantive change.

Note. Proposed Section 63910 would continue Section 2089.4, which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63915. Purpose and effect

63915. (a) The purpose of this title is to establish a program that will encourage landowners to manage their lands voluntarily to benefit endangered, threatened, or candidate species, or declining or vulnerable species, and not be subject to additional regulatory restrictions as a result of their conservation efforts.

(b) This title does not relieve landowners of any legal obligation with respect to endangered, threatened, or candidate species existing on their land. The program established by this title is designed to increase species populations, create new habitats, and enhance existing habitats. Although this increase may be temporary or long term, California state safe harbor agreements shall not reduce the existing populations of species present at the time the baseline is established by the department.

Comment. Section 63915 continues former Fish and Game Code Section 2089.2(c)-(d) without substantive change.

Note. Proposed Section 63915 would continue Section 2089.2(c)-(d), which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63920. Regulations

63920. The department may promulgate regulations to implement this title.

Comment. Section 63920 continues former Fish and Game Code Section 2089.25 without substantive change.

§ 63925. List of qualified persons and program administrators

63925. The department, for informational purposes, shall maintain a list of qualified persons who have worked with the department on an approved agreement, and persons, entities, and organizations serving as program administrators for approved agreements.

Comment. Section 63925 continues former Fish and Game Code Section 2089.24 without substantive change.

§ 63930. Federal safe harbor agreement

63930. (a) If a federal safe harbor agreement, or a federal candidate conservation agreement with assurances, has been approved pursuant to applicable provisions of federal law and the federal agreement contains species that are endangered, threatened, candidate, or declining or vulnerable species pursuant to this chapter,

1 no further authorization or approval is necessary under this article for any person
2 authorized by that federal agreement to take the species identified in and in
3 accordance with the federal agreement, if that person and the department follow
4 all of the procedures specified in Section 62705, except that the determination of
5 consistency shall be made by the department based only on the issuance criteria
6 contained in this title.

7 (b) Any authority pursuant to subdivision (a) to take species identified in a
8 federal agreement shall terminate immediately upon the expiration or termination
9 of the federal agreement.

10 **Comment.** Section 63930 continues former Fish and Game Code Section 2089.22 without
11 substantive change.

12  **Note.** Proposed Section 63930 would continue Section 2089.22, which was amended by 2018
13 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
14 anticipation of its effect.

15 **§ 63935. Sunset date**

16 63935. This title shall remain in effect only until January 1, 2020, and as of that
17 date is repealed, unless a later enacted statute, that is enacted before January 1,
18 2020, deletes or extends that date.

19 **Comment.** Section 63935 continues former Fish and Game Code Section 2089.26 without
20 substantive change.

21 **CHAPTER 2. SAFE HARBOR AGREEMENT**

22 **Article 1. Permissible take**

23 **§ 63950. Department authorization of otherwise prohibited take**

24 63950. (a) In addition to the other provisions of this title, the department may
25 authorize acts that are or may become otherwise prohibited pursuant to Section
26 8000, 62600, or 62605 through an agreement, including a programmatic
27 agreement, if all the following conditions are met:

28 (1) The department receives a complete application containing all of the
29 information described in Section 64000.

30 (2) The take is incidental to an otherwise lawful activity.

31 (3) The department finds that the implementation of the agreement is reasonably
32 expected to provide a net conservation benefit to the species listed in the
33 application. This finding shall be based, at a minimum, upon the determination
34 that the agreement is of sufficient duration and has appropriate assurances to
35 realize these benefits.

36 (4) The take authorized by the agreement will not jeopardize the continued
37 existence of the species. This determination shall be made based on the provisions
38 of subdivision (b) of Section 62700.

(5) The department finds that the landowner has agreed, to the maximum extent practicable, to avoid or minimize any incidental take authorized in the agreement, including returning to baseline.

(6) The department has established or approved a monitoring program, based upon objective scientific methodologies, to provide information for the department to evaluate the effectiveness and efficiency of the agreement program, including whether the net conservation benefits set forth in the agreement are being achieved and whether the participating landowner is implementing the provisions of the agreement.

(7) The department has determined that sufficient funding is ensured, for it or its contractors or agents, to determine baseline conditions on the property, and that there is sufficient funding for the landowner to carry out management actions and for monitoring for the duration of the agreement.

(8) Implementation of the agreement will not be in conflict with any existing department-approved conservation or recovery programs for the species covered by the agreement.

(b) If the species covered by an agreement is a declining or vulnerable species, and the species is subsequently listed as an endangered, threatened, or candidate species pursuant to this chapter, no further authorization or approval shall be required for take of the species in accordance with the agreement, regardless of the species' change in status.

Comment. Section 63950 continues former Fish and Game Code Section 2089.6 without substantive change.

Note. Proposed Section 63950 would continue Section 2089.6, which was amended by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 63955. Owens pupfish

63955. The department may authorize the taking of the Owens pupfish in the Owens River watershed if the take is authorized under an agreement pursuant to this title.

Comment. Section 63955 continues former Fish and Game Code Section 2089.7 without substantive change.

Article 2. Agreement

§ 64000. Information to be submitted by landowner

64000. The landowner shall submit all of the following:

(a) A detailed map depicting the land proposed to be enrolled in the agreement.

(b) The common and scientific names of the species for which the landowner requests incidental take authorization.

1 (c) A detailed description of the landowner's current land and water use and
2 management practices that affect the covered species, and the habitat of the
3 covered species, for which the landowner requests incidental take authorization.

4 (d) A detailed description of the landowner's future land and water use and
5 management practices that may affect the covered species, and the habitat of the
6 covered species, for which the landowner requests incidental take authorization.
7 This description shall be used only for informational and planning purposes.

8 (e) The proposed duration of the agreement that is sufficient to provide a net
9 conservation benefit to the species covered in the permit and an explanation of the
10 basis for this conclusion.

11 (f) A detailed description of the proposed management actions and the
12 timeframe for implementing them.

13 (g) A description of the possible incidental take that may be caused by the
14 management actions and of the anticipated species populations and habitat
15 changes over the duration of the permit.

16 (h) A detailed description of the proposed monitoring program.

17 (i) Any other information that the department may reasonably require in order to
18 evaluate the application.

19 **Comment.** Section 64000 continues former Fish and Game Code Section 2089.8 without
20 substantive change.

21 **§ 64005. Treatment of proprietary information**

22 64005. (a) As used in this section, "proprietary information" means information
23 that is all of the following:

24 (1) Related to an agricultural operation or land that is a part of an agricultural
25 operation.

26 (2) A trade secret, or commercial or financial information, that is privileged or
27 confidential, and is identified as such by the person providing the information to
28 the department.

29 (3) Not required to be disclosed under any other provision of law or any
30 regulation affecting the land or the agricultural operation on the land.

31 (b) Proprietary information received by the department pursuant to Section
32 64000 is not public information, and the department shall not release or disclose
33 the proprietary information to any person, including any federal, state, or local
34 governmental agency, outside of the department.

35 (c) Notwithstanding subdivision (b), the department may release or disclose
36 proprietary information received pursuant to Section 64000 to the following
37 entities under the following circumstances:

38 (1) Any person or federal, state, or local governmental agency, to enforce this
39 title.

40 (2) Any person or federal, state, or local governmental agency working in
41 cooperation with the department to provide technical or financial assistance for the
42 purposes of implementing the program established by this title.

1 (3) Any entity, to the extent that the owner, operator, or producer has consented
2 to the release or disclosure.

3 (4) The general public, if the information has been transformed into a statistical
4 or aggregate form without identifying any individual owner, operator, or producer,
5 or the specific location from which the information was gathered.

6 **Comment.** Section 64005 continues former Fish and Game Code Section 2089.9 without
7 substantive change.

8 **§ 64010. Department access to land or water proposed for enrollment**

9 64010. (a) Neither this section nor Section 64045 provide the public a right of
10 entry onto the enrolled land or water. The landowner shall provide the department,
11 its contractors, or agents with access to the land or water proposed to be enrolled
12 in the agreement to develop the agreement, determine the baseline conditions,
13 monitor the effectiveness of management actions, or safely remove or salvage
14 species proposed to be taken.

15 (b) The department shall provide notice to the landowner at least seven days
16 before accessing the land or water for the purposes of subdivision (a). The notice
17 shall identify each person selected by the department, its contractors, or agents to
18 access the land or water.

19 (c) Notwithstanding subdivision (a), during the seven-day notice period, a
20 landowner may object, in writing, to a person selected to access the land or water.
21 If a landowner objects, another person shall be selected by the department, its
22 contractors, or agents, and notification shall be provided to the landowner pursuant
23 to subdivision (b). However, if a landowner objects to a selection on two
24 successive occasions, the landowner shall be deemed to consent to access to the
25 land or water by a person selected by the department, its contractors, or agents.
26 Failure by a landowner to object to the selection within the seven-day notice
27 period shall be deemed consent to access the land or water by a person selected by
28 the department, its contractors, or agents.

29 **Comment.** Section 64010 continues former Fish and Game Code Section 2089.20(a)-(c)
30 without substantive change.

31 **§ 64015. Alteration or modification of enrolled property**

32 64015. If an agreement has been approved and the department finds that the
33 agreement is being properly implemented, the department shall allow the
34 landowner to alter or modify the enrolled property, even if that alteration or
35 modification will result in the incidental take of a listed species, to the extent that
36 the alteration or modification returns the species to baseline conditions.

37 **Comment.** Section 64015 continues former Fish and Game Code Section 2089.10 without
38 substantive change.

1 **§ 64020. Advance notice of specified matters**

2 64020. Unless the department determines that it is inappropriate to do so based
3 on the nature of the management actions being proposed, the species listed in the
4 permit, or other factors, the agreement shall require that the landowner provide the
5 department with at least 60 days' advance notice of any of the following:

6 (a) Any incidental take that is anticipated to occur under the agreement.

7 (b) The landowner's plan to return to baseline at the end of the agreement.

8 (c) Any plan to transfer or alienate the landowner's interest in the land or water.

9 **Comment.** Section 64020 continues former Fish and Game Code Section 2089.12(a) without
10 substantive change.

11 **§ 64025. Department access to land after receiving notice**

12 64025. (a) If the department receives any notice described in Section 64020, the
13 landowner shall provide the department, its contractors, or agents with access to
14 the land or water for purposes of safely removing or salvaging the species.

15 (b) The department shall provide notice to the landowner at least seven days
16 prior to accessing the land or water for the purposes of subdivision (a). The notice
17 shall identify each person selected by the department, its contractors, or agents to
18 access the land or water.

19 (c) Notwithstanding subdivision (a), during the seven-day notice period, a
20 landowner may object, in writing, to a person selected to access the land or water.
21 If a landowner objects, another person shall be selected by the department, its
22 contractors, or agents, and notification shall be provided to the landowner pursuant
23 to subdivision (b). However, if a landowner objects to a selection on two
24 successive occasions, the landowner shall be deemed to consent to access to the
25 land or water by a person selected by the department, its contractors, or agents.
26 Failure by a landowner to object to the selection within the seven-day notice
27 period shall be deemed consent to access the land or water by a person selected by
28 the department, its contractors, or agents.

29 (d) If the landowner objects to a person selected to access the land or water
30 pursuant to subdivision (c), the 60-day notice period described in Section 64020
31 shall be tolled for the period between the landowner's objection to a person
32 selected for access to the land or water and the landowner's consent to a person
33 selected for access to the land or water.

34 **Comment.** Section 64025 continues former Fish and Game Code Section 2089.12(b) without
35 substantive change.

36 **§ 64030. Conveyance of enrolled land or water**

37 64030. If a landowner seeks to sell, transfer, or otherwise alienate the land or
38 water enrolled in the agreement during the term of the agreement, the person or
39 entity assuming that interest in the property shall (a) assume the existing
40 landowner's duties under the agreement, (b) enter into a new agreement with the

1 department, or (c) withdraw from an existing agreement under the terms provided
2 in the agreement, as approved by the department.

3 **Comment.** Section 64030 continues former Fish and Game Code Section 2089.16 without
4 substantive change.

5 **§ 64035. Agreement amendment**

6 64035. An agreement may be amended with the mutual consent of the
7 landowner and the department.

8 **Comment.** Section 64035 continues former Fish and Game Code Section 2089.14 without
9 substantive change.

10 **§ 64040. Suspension or revocation of agreement**

11 64040. The suspension and revocation of the agreement shall be governed by
12 suspension and revocation regulations adopted by the department.

13 **Comment.** Section 64040 continues former Fish and Game Code Section 2089.18 without
14 substantive change.

15 **§ 64045. Liability**

16 64045. (a) Nothing in this section or Section 64010 creates a duty of care or a
17 ground of liability for injury to person or property.

18 (b) Notwithstanding any other law, the landowner is not required to do either of
19 the following:

20 (1) Maintain enrolled land or water, or land or water proposed to be enrolled in
21 an agreement, in a condition that is safe for access, entry, or use by the
22 department, its contractors, or agents for purposes of providing access pursuant to
23 subdivision (a) of Section 64010.

24 (2) Provide to the department, its contractors, or agents, any warning of a
25 hazardous condition, use, structure, or activity on enrolled land or water, or land or
26 water proposed to be enrolled in an agreement, for purposes of providing access
27 pursuant to subdivision (a) of Section 64010.

28 (c) Notwithstanding any other law, the landowner shall not be liable for any
29 injury, and does not owe a duty of care, to the department, its contractors, or
30 agents resulting from any act or omission described in paragraph (1) or (2) of
31 subdivision (b).

32 (d) The provision of access to land pursuant to subdivision (a) of Section 64010
33 shall not be construed as any of the following:

34 (1) An assurance that the land or water is safe.

35 (2) A grant to the person accessing the land or water of a legal status for which
36 the landowner would owe a duty of care.

37 (3) An assumption of responsibility or liability for any injury to a person or
38 property caused by any act of the person to whom access to the land or water is
39 provided.

1 (e) Notwithstanding subdivisions (b), (c), and (d), this section shall not be
2 construed to limit a landowner's liability for an injury under either of the
3 following circumstances:

4 (1) Willful or malicious failure to guard or warn against a dangerous condition,
5 use, structure, or activity on the land or water.

6 (2) Express invitation to a person by the landowner to access the land or water,
7 in a manner that is beyond the access required to be provided pursuant to
8 subdivision (a) of Section 64010.

9 **Comment.** Section 64045 continues former Fish and Game Code Section 2089.20(d)-(e)
10 without substantive change.

11 **§ 64050. Neighboring landowner**

12 64050. (a) A landowner that owns land that abuts a property enrolled in a state
13 safe harbor agreement shall not be required, for purposes of an incidental take
14 permit, to undertake the management activities set forth in the state safe harbor
15 agreement, if all of the following conditions are met:

16 (1) The neighboring landowner allows the department to determine baseline
17 conditions on the property.

18 (2) The neighboring landowner agrees to maintain the baseline conditions for
19 the duration specified in the safe harbor agreement.

20 (3) The department determines that allowing the neighboring landowner to
21 receive an incidental take permit for the abutting property does not undermine the
22 net conservation benefit determination made by the department in the approval of
23 the safe harbor agreement.

24 (4) The take authorized by the department will not jeopardize the continued
25 existence of the species. This determination shall be made in accordance with
26 subdivision (b) of Section 62700.

27 (b) Unless the department determines that it is inappropriate to do so based on
28 the species listed in the permit, or any other factors, the neighboring landowner
29 shall provide the department with at least 60 days' advance notice of any of the
30 following:

31 (1) Any incidental take that is anticipated to occur under the permit.

32 (2) The neighboring landowner's plan to return to baseline conditions.

33 (3) Any plan to transfer or alienate the neighboring landowner's interest in the
34 land or water.

35 (c) If the department receives any notice described in subdivision (b), the
36 neighboring landowner shall provide the department, its contractors, or agents
37 with access to the land or water for purposes of safely removing or salvaging the
38 species.

39 (d) The department shall provide notice to the neighboring landowner at least
40 seven days before accessing the land or water for the purposes of subdivision (c).
41 The notice shall identify each person selected by the department, its contractors, or
42 agents to access the land or water.

(e) Notwithstanding subdivision (d), during the seven-day notice period, the neighboring landowner may object, in writing, to a person selected to access the land or water. If the neighboring landowner objects, another person shall be selected by the department, its contractors, or agents, and notification shall be provided to the neighboring landowner pursuant to subdivision (d). However, if the neighboring landowner objects to a selection on two successive occasions, the neighboring landowner shall be deemed to consent to access to the land or water by a person selected by the department, its contractors, or agents. Failure by the neighboring landowner to object to the selection within the seven-day notice period shall be deemed consent to access the land or water by the person selected by the department, its contractors, or agents.

Comment. Section 64050 continues former Fish and Game Code Section 2089.23 without substantive change.

Article 3. Special Circumstances

§ 64075. Forest land subject to conservation easement

64075. (a) The department shall, to the maximum extent practicable, prioritize the review of, and decision to approve, an agreement if the property proposed to be enrolled in the agreement is encumbered by a conservation easement that requires a permanent commitment to protect, restore, and maintain habitat conditions, provided that the department finds that practices consistent with the conservation easement can reasonably be expected to provide a net conservation benefit to the species listed in the application.

(b) If the property proposed to be enrolled in an agreement is subject to a conservation easement, the department, to the maximum extent practicable, shall rely on the conservation easement to fulfill the requirements of Section 64000.

(c) This section only applies to agreements where a majority of the property is forestland.

Comment. Section 64075 continues former Fish and Game Code Section 2089.5 without substantive change.

<p>Note. Proposed Section 64075 would continue Section 2089.5, which was added by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.</p>

TITLE 6. RECOVERY PLAN

§ 64100. Development of nonregulatory recovery plan

64100. (a) Upon a specific appropriation of funds by the Legislature, or if funding is otherwise available, the department may develop and implement nonregulatory recovery plans for the conservation and survival of species listed as an endangered species or as a threatened species, unless the department finds that the recovery plan will not promote the conservation of the species.

(b) The department, in developing and implementing recovery plans, shall, to the extent practicable, give priority to those endangered or threatened species, without regard to taxonomic classification, that are most likely to benefit from a recovery plan, particularly those species populations that are, or may be, significantly affected by anticipated land use changes, climate change, or changes in aquatic conditions.

Comment. Section 64100 continues former Fish and Game Code Section 2079.1(a)-(b) without substantive change.

Note. Proposed Section 64100 would continue Section 2079.1(a)-(b), which was added by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

§ 64105. Plan content

64105. (a) Each recovery plan shall be based on the best available scientific information and shall, at a minimum, include all of the following:

(1) A description of site-specific management actions necessary to achieve the recovery plan's goal for the conservation of the species.

(2) Objective, measurable criteria that, when achieved, would result in a determination, in accordance with the provisions of this section, that the species be removed from the list of endangered species or the list of threatened species, as applicable.

(3) Estimates of the time required and the cost to carry out those measures needed to achieve the goal of the recovery plan and to achieve intermediate steps toward that goal.

(b) The department, in developing and implementing a recovery plan, may consider data and appropriate information from public and private agencies and institutions, and other qualified persons, in addition to data and appropriate information derived from the public process required pursuant to subdivision (b) of Section 64110.

(c) The department may, in its discretion, adopt, or may adopt with revisions, an existing federal recovery plan for a species described in subdivision (a) of Section 64100 that is also listed as an endangered species or a threatened species pursuant to Section 4 of the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1533) if the department finds that the recovery plan is consistent with the provisions of this title.

Comment. Section 64105 continues former Fish and Game Code Section 2079.1(c)-(e) without substantive change.

Note. Proposed Section 64105 would continue Section 2079.1(c)-(e), which was added by 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in anticipation of its effect.

1 **§ 64110. Guidelines and criteria**

2 64110. (a) Subject to subdivision (a) of Section 64100, and pursuant to
3 subdivision (b), the department shall adopt guidelines and criteria to aid in the
4 implementation of this title. Upon adoption, the department shall post the
5 guidelines and criteria on its Internet Web site.

6 (b) Development of a recovery plan pursuant to subdivision (a) of Section
7 64100, and adoption of guidelines and criteria pursuant to subdivision (a), shall be
8 through a public process including at least one public meeting at which the
9 department provides landowners, local governments, and interested members of
10 the public the opportunity for input. The public meeting may be in conjunction
11 with a meeting of the commission. In the case of a recovery plan, the public
12 meeting shall be held in the recovery planning area.

13 (c) Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of
14 Title 2 of the Government Code does not apply to the development, adoption, or
15 amendment of guidelines, criteria, or recovery plans pursuant to this title.

16 **Comment.** Section 64110 continues former Fish and Game Code Section 2079.1(f)-(h) without
17 substantive change.

18  **Note.** Proposed Section 64110 would continue Section 2079.1(f)-(h), which was added by
19 2018 Cal. Stat. ch. 329. Although that bill will not take effect until 2019, it is included here in
20 anticipation of its effect.

21 **PART 2. PLANNING AND MITIGATION**

22 **TITLE 1. GENERAL PROVISIONS**

23 **§ 64400. Planning and environmental compliance division**

24 64400. (a) The department shall establish an internal division with the primary
25 purpose of performing comprehensive planning and environmental compliance
26 services with priority given to projects involving the building of eligible
27 renewable energy resources.

28 (b) The internal division shall ensure the timely completion of plans pursuant to
29 the Natural Community Conservation Planning Act (Title 2 (commencing with
30 Section 64500)).

31 (c) For purposes of this section, “eligible renewable energy resources” has the
32 same meaning as in the California Renewables Portfolio Standard Program
33 (Article 16 (commencing with Section 399.11) of Chapter 2.3 of Part 1 of Division
34 1 of the Public Utilities Code).

35 **Comment.** Section 64400 continues former Fish and Game Code Section 705 without
36 substantive change.

1 TITLE 2. NATURAL COMMUNITY
2 CONSERVATION PLANNING ACT

3 CHAPTER 1. GENERAL PROVISIONS

4 § 64500. Short title

5 64500. This title shall be known, and may be cited, as the Natural Community
6 Conservation Planning Act.

7 **Comment.** Section 64500 continues former Fish and Game Code Section 2800 without
8 substantive change.

9 § 64505. Findings and declarations

10 64505. The Legislature finds and declares all of the following:

11 (a) The continuing population growth in California will result in increasing
12 demands for dwindling natural resources and result in the continuing decline of the
13 state's wildlife.

14 (b) There is a need for broad-based planning to provide for effective protection
15 and conservation of the state's wildlife heritage while continuing to allow
16 appropriate development and growth.

17 (c) Natural community conservation planning is an effective tool in protecting
18 California's natural diversity while reducing conflicts between protection of the
19 state's wildlife heritage and reasonable use of natural resources for economic
20 development.

21 (d) Natural community conservation planning promotes coordination and
22 cooperation among public agencies, landowners, and other private interests,
23 provides a mechanism by which landowners and development proponents can
24 effectively address cumulative impact concerns, promotes conservation of
25 unfragmented habitat areas, promotes multispecies and multihabitat management
26 and conservation, provides one option for identifying and ensuring appropriate
27 mitigation that is roughly proportional to impacts on fish and wildlife, and
28 promotes the conservation of broad-based natural communities and species
29 diversity.

30 (e) Natural community conservation planning can provide for efficient use and
31 protection of natural and economic resources while promoting greater sensitivity
32 to important elements of the state's critical natural diversity.

33 (f) Natural community conservation planning is a voluntary and effective
34 planning process that can facilitate early coordination to protect the interests of the
35 state, the federal government, and local public agencies, landowners, and other
36 private parties.

37 (g) Natural community conservation planning is a mechanism that can provide
38 an early planning framework for proposed development projects within the
39 planning area in order to avoid, minimize, and compensate for project impacts to
40 wildlife.

1 (h) Natural community conservation planning is consistent with, and will
2 support, the fish and wildlife management activities of the department in its role as
3 the trustee for fish and wildlife within the state.

4 (i) The purpose of natural community conservation planning is to sustain and
5 restore those species and their habitat identified by the department that are
6 necessary to maintain the continued viability of those biological communities
7 impacted by human changes to the landscape.

8 (j) Natural community conservation planning is a cooperative process that often
9 involves local, state, and federal agencies and the public, including landowners
10 within the plan area. The process should encourage the active participation and
11 support of landowners and others in the conservation and stewardship of natural
12 resources in the plan area during plan development using appropriate measures,
13 including incentives.

14 **Comment.** Section 64505 continues former Fish and Game Code Section 2801 without
15 substantive change.

16 **§ 64510. Further findings and declarations**

17 64510. The Legislature further finds and declares that it is the policy of the state
18 to conserve, protect, restore, and enhance natural communities. It is the intent of
19 the Legislature to acquire a fee or less than fee interest in lands consistent with
20 approved natural community conservation plans and to provide assistance with the
21 implementation of those plans.

22 **Comment.** Section 64510 continues former Fish and Game Code Section 2802 without
23 substantive change.

24 **§ 64515. Definitions**

25 64515. The definitions in this section govern the construction of this title:

26 (a) “Adaptive management” means to use the results of new information
27 gathered through the monitoring program of the plan and from other sources to
28 adjust management strategies and practices to assist in providing for the
29 conservation of covered species.

30 (b) “Candidate species” has the same meaning as defined in Section 62105.

31 (c) “Changed circumstances” are reasonably foreseeable circumstances that
32 could affect a covered species or geographic area covered by the plan.

33 (d) “Conserve,” “conserving,” and “conservation” mean to use, and the use of,
34 methods and procedures within the plan area that are necessary to bring any
35 covered species to the point at which the measures provided pursuant to Part 1
36 (commencing with Section 62000) are not necessary, and for covered species that
37 are not listed pursuant to Part 1 (commencing with Section 62000), to maintain or
38 enhance the condition of a species so that listing pursuant to Part 1 (commencing
39 with Section 62000) will not become necessary.

40 (e) “Covered species” means those species, both listed pursuant to Part 1
41 (commencing with Section 62000) and nonlisted, conserved and managed under

1 an approved natural community conservation plan and that may be authorized for
2 take. Notwithstanding Title 5 (commencing with Section 30200) of Part 3 of
3 Division 8, Title 4 (commencing with Section 32700) of Part 3 of Division 9, and
4 Sections 38200, 52200, 53000, fully protected species may be covered species
5 pursuant to this subdivision, and taking of fully protected species may be
6 authorized pursuant to Section 64605 for any fully protected species conserved
7 and managed as a covered species under an approved natural community
8 conservation plan.

9 (f) “Department assurance” means the department’s commitment pursuant to
10 Section 64610.

11 (g) “Monitoring program” means a program within an approved natural
12 community conservation plan that provides periodic evaluations of monitoring
13 results to assess the adequacy of the mitigation and conservation strategies or
14 activities and to provide information to direct the adaptive management program.
15 The monitoring program shall, to the extent practicable, also be used to meet the
16 monitoring requirements of Section 21081.6 of the Public Resources Code. A
17 monitoring program includes all of the following:

18 (1) Surveys to determine the status of biological resources addressed by the
19 plan, including covered species.

20 (2) Periodic accountings and assessment of authorized take.

21 (3) Progress reports on all of the following matters:

22 (A) Establishment of habitat reserves or other measures that provide equivalent
23 conservation of covered species and providing funding where applicable.

24 (B) Compliance with the plan and the implementation agreement by the wildlife
25 agencies, local governments, and landowners who have responsibilities under the
26 plan.

27 (C) Measurements to determine if mitigation and conservation measures are
28 being implemented roughly proportional in time and extent to the impact on
29 habitat or covered species authorized under the plan.

30 (D) Evaluation of the effectiveness of the plan in meeting the conservation
31 objectives of the plan.

32 (E) Maps of land use changes in the plan area that may affect habitat values or
33 covered species.

34 (4) A schedule for conducting monitoring activities.

35 (h) “Natural community conservation plan” or “plan” means the plan prepared
36 pursuant to a planning agreement entered into in accordance with Section 64555.
37 The plan shall identify and provide for those measures necessary to conserve and
38 manage natural biological diversity within the plan area while allowing compatible
39 and appropriate economic development, growth, and other human uses.

40 (i) “Person” has the same meaning as defined in subdivision (i) of Section 9100.

41 (j) (1) “Plan participant,” prior to approval of a natural community conservation
42 plan and execution of an implementation agreement, means a signatory to the
43 planning agreement.

(2) Upon approval of a natural community conservation plan and execution of an implementation agreement, “plan participant” means the permittees and any local agency that is a signatory to the implementing agreement.

(k) “Unforeseen circumstances” means changes affecting one or more species, habitat, natural community, or the geographic area covered by a conservation plan that could not reasonably have been anticipated at the time of plan development, and that result in a substantial adverse change in the status of one or more covered species.

(l) “Wildlife” has the same meaning as defined in Section 560.

(m) “Wildlife agencies” means the department and one or both of the following:

(1) United States Fish and Wildlife Service.

(2) National Marine Fisheries Service.

Comment. Section 64515 continues former Fish and Game Code Section 2805 without substantive change.

§ 64520. Regulations

64520. The department may adopt regulations for the development and implementation of natural community conservation plans consistent with this title.

Comment. Section 64520 continues former Fish and Game Code Section 2825 without substantive change.

§ 64530. Department compensation

64530. (a) The department may be compensated for the actual costs incurred in participating in the preparation and implementation of natural community conservation plans. These costs may include consultation with other parties to agreements authorized by Section 64555, providing and compiling wildlife and wildlife habitat data, reviewing and approving the final plan, monitoring implementation of the plan, and other activities necessary to the preparation and implementation of a plan.

(b) The department may be compensated for those expenses identified in subdivision (a) according to a schedule in the agreement authorized by Section 64555.

Comment. Section 64530 continues former Fish and Game Code Section 2829 without substantive change.

CHAPTER 2. PLANNING

§ 64550. Authority to undertake planning

64550. Any person, or any local, state, or federal agency, independently, or in cooperation with other persons, may undertake natural community conservation planning.

Comment. Section 64550 continues former Fish and Game Code Section 2809 without substantive change.

1 **§ 64555. Cooperative agreement to conduct planning**

2 64555. The department may enter into an agreement with any person or public
3 entity for the purpose of preparing a natural community conservation plan, in
4 cooperation with a local agency that has land use permit authority over the
5 activities proposed to be addressed in the plan, to provide comprehensive
6 management and conservation of multiple wildlife species, including, but not
7 limited to, those species listed pursuant to Title 2 (commencing with Section
8 62200) of Part 1.

9 **Comment.** Section 64555 continues the first sentence of former Fish and Game Code Section
10 2810(a) without substantive change.

11 **§ 64560. Agreement requirements**

12 64560. A planning agreement entered into pursuant to Section 64555 shall meet
13 all of the following conditions:

14 (a) The agreement shall be binding upon the department, other participating
15 federal, state, and local agencies, and participating private landowners.

16 (b) The agreement shall define the geographic scope of the conservation
17 planning area.

18 (c) The agreement shall identify a preliminary list of those natural communities,
19 and the endangered, threatened, candidate, or other species known, or reasonably
20 expected to be found, in those communities, that are intended to be the initial
21 focus of the plan.

22 (d) The agreement shall identify preliminary conservation objectives for the
23 planning area.

24 (e) The agreement shall establish a process for the inclusion of independent
25 scientific input to assist the department and plan participants, and to do all of the
26 following:

27 (1) Recommend scientifically sound conservation strategies for species and
28 natural communities proposed to be covered by the plan.

29 (2) Recommend a set of reserve design principles that addresses the needs of
30 species, landscapes, ecosystems, and ecological processes in the planning area
31 proposed to be addressed by the plan.

32 (3) Recommend management principles and conservation goals that can be used
33 in developing a framework for the monitoring and adaptive management
34 component of the plan.

35 (4) Identify data gaps and uncertainties so that risk factors can be evaluated.

36 (f) The agreement shall require coordination with federal wildlife agencies with
37 respect to the federal Endangered Species Act (16 U.S.C. Sec. 1531 et seq.).

38 (g) The agreement shall encourage concurrent planning for wetlands and waters
39 of the United States.

40 (h) The agreement shall establish an interim process during plan development
41 for project review wherein discretionary projects within the plan area subject to
42 Division 13 (commencing with Section 21000) of the Public Resources Code that

1 potentially conflict with the preliminary conservation objectives in the planning
2 agreement are reviewed by the department prior to, or as soon as possible after the
3 project application is deemed complete pursuant to Section 65943 of the
4 Government Code and the department recommends mitigation measures or project
5 alternatives that would help achieve the preliminary conservation objectives. As
6 part of this process, information developed pursuant to subdivision (e) of Section
7 64560 shall be taken into consideration by the department and plan participants.
8 Any take of candidate, threatened, or endangered species that occurs during this
9 interim period shall be included in the analysis of take to be authorized under an
10 approved plan. Nothing in this subdivision is intended to authorize take of
11 candidate, protected, or endangered species.

12 (i) The agreement shall establish a process for public participation throughout
13 the plan development and review pursuant to Section 64570.

14 (j) The agreement shall include a provision specifying the amount of
15 compensation, if any, payable to the department pursuant to Section 64530.

16 **Comment.** Subdivisions (a) through (i) of Section 64560 continues former Fish and Game
17 Code Section 2810(b) without substantive change.

18 Subdivision (j) continues the second sentence of former Fish and Game Code Section 2810(a)
19 without substantive change.

20 **§ 64565. Implementation agreement**

21 64565. A natural community conservation plan approved pursuant to Section
22 64580 shall include an implementation agreement that contains all of the
23 following:

24 (a) Provisions defining species coverage, including any conditions of coverage.

25 (b) Provisions for establishing the long-term protection of any habitat reserve or
26 other measures that provide equivalent conservation of covered species.

27 (c) Specific terms and conditions, which, if violated, would result in the
28 suspension or revocation of the permit, in whole or in part. The department shall
29 include a provision requiring notification to the plan participant of a specified
30 period of time to cure any default prior to suspension or revocation of the permit
31 in whole or in part. These terms and conditions shall address, but are not limited
32 to, provisions specifying the actions the department shall take under all of the
33 following circumstances:

34 (1) If the plan participant fails to provide adequate funding.

35 (2) If the plan participant fails to maintain the rough proportionality between
36 impacts on habitat or covered species and conservation measures.

37 (3) If the plan participant adopts, amends, or approves any plan or project
38 without the concurrence of the wildlife agencies that is inconsistent with the
39 objectives and requirements of the approved plan.

40 (4) If the level of take exceeds that authorized by the permit.

41 (d) Provisions specifying procedures for amendment of the plan and the
42 implementation agreement.

1 (e) Provisions ensuring implementation of the monitoring program and adaptive
2 management program.

3 (f) Provisions for oversight of plan implementation for purposes of assessing
4 mitigation performance, funding, and habitat protection measures.

5 (g) Provisions for periodic reporting to the wildlife agencies and the public for
6 purposes of information and evaluation of plan progress.

7 (h) Mechanisms to ensure adequate funding to carry out the conservation actions
8 identified in the plan.

9 (i) Provisions to ensure that implementation of mitigation and conservation
10 measures on a plan basis is roughly proportional in time and extent to the impact
11 on habitat or covered species authorized under the plan. These provisions shall
12 identify the conservation measures, including assembly of reserves where
13 appropriate and implementation of monitoring and management activities, that
14 will be maintained or carried out in rough proportion to the impact on habitat or
15 covered species and the measurements that will be used to determine if this is
16 occurring.

17 **Comment.** Section 64565 continues former Fish and Game Code Section 2820(b) without
18 substantive change.

19 **§ 64570. Public participation in plan development and review**

20 64570. The department shall establish, in cooperation with the parties to the
21 planning agreement, a process for public participation throughout plan
22 development and review to ensure that interested persons, including landowners,
23 have an adequate opportunity to provide input to lead agencies, state and federal
24 wildlife agencies, and others involved in preparing the plan. The public
25 participation objectives of this section may be achieved through public working
26 groups or advisory committees, established early in the process. This process shall
27 include all of the following:

28 (a) A requirement that draft documents associated with a natural community
29 conservation plan that are being considered for adoption by the plan lead agency
30 shall be available for public review and comment for at least 60 days prior to the
31 adoption of that draft document. Preliminary public review documents shall be
32 made available by the plan lead agency at least 10 working days prior to any
33 public hearing addressing these documents. The review period specified in this
34 subdivision may run concurrently with the review period provided for any
35 document required by the California Environmental Quality Act (Division 13
36 commencing with Section 21000) of the Public Resources Code) that is
37 associated with the natural community conservation plan. This subdivision shall
38 not be construed to limit the discretion of a public agency to revise any draft
39 documents at a public hearing.

40 (b) A requirement to make available in a reasonable and timely manner all draft
41 plans, memoranda of understanding, maps, conservation guidelines, species

1 coverage lists, and other planning documents associated with a natural community
2 conservation plan that are subject to public review.

3 (c) A requirement that all public hearings held during plan preparation or review
4 for approval are complementary to, or integrated with, those hearings otherwise
5 provided by law.

6 (d) An outreach program to provide access to information for persons interested
7 in the plan, including landowners, with an emphasis on obtaining input from a
8 balanced variety of affected public and private interests, including state and local
9 governments, county agricultural commissioners, agricultural organizations,
10 landowners, conservation organizations, and the general public.

11 **Comment.** Section 64570 continues former Fish and Game Code Section 2815 without
12 substantive change.

13 **§ 64575. Public review prior to approval**

14 64575. Prior to department approval of the planning agreement, the public shall
15 have 21 calendar days to review and comment on the proposed planning
16 agreement.

17 **Comment.** Section 64575 continues former Fish and Game Code Section 2810(d) without
18 substantive change.

19 **§ 64580. Plan approval**

20 64580. The department shall approve a natural community conservation plan for
21 implementation after making the following findings, based upon substantial
22 evidence in the record:

23 (a) The plan has been developed consistent with the process identified in the
24 planning agreement entered into pursuant to Section 64555.

25 (b) The plan integrates adaptive management strategies that are periodically
26 evaluated and modified based on the information from the monitoring program
27 and other sources, which will assist in providing for the conservation of covered
28 species and ecosystems within the plan area.

29 (c) The plan provides for the protection of habitat, natural communities, and
30 species diversity on a landscape or ecosystem level through the creation and long-
31 term management of habitat reserves or other measures that provide equivalent
32 conservation of covered species appropriate for land, aquatic, and marine habitats
33 within the plan area.

34 (d) The development of reserve systems and conservation measures in the plan
35 area provides, as needed for the conservation of species, all of the following:

36 (1) Conserving, restoring, and managing representative natural and seminatural
37 landscapes to maintain the ecological integrity of large habitat blocks, ecosystem
38 function, and biological diversity.

39 (2) Establishing one or more reserves or other measures that provide equivalent
40 conservation of covered species within the plan area and linkages between them
41 and adjacent habitat areas outside of the plan area.

1 (3) Protecting and maintaining habitat areas that are large enough to support
2 sustainable populations of covered species.

3 (4) Incorporating a range of environmental gradients (such as slope, elevation,
4 aspect, and coastal or inland characteristics) and high habitat diversity to provide
5 for shifting species distributions due to changed circumstances.

6 (5) Sustaining the effective movement and interchange of organisms between
7 habitat areas in a manner that maintains the ecological integrity of the habitat areas
8 within the plan area.

9 (e) The plan identifies activities, and any restrictions on those activities, allowed
10 within reserve areas that are compatible with the conservation of species, habitats,
11 natural communities, and their associated ecological functions.

12 (f) The plan contains specific conservation measures that meet the biological
13 needs of covered species and that are based upon the best available scientific
14 information regarding the status of covered species and the impacts of permitted
15 activities on those species.

16 (g) The plan contains a monitoring program.

17 (h) The plan contains an adaptive management program.

18 (i) The plan includes the estimated timeframe and process by which the reserves
19 or other conservation measures are to be implemented, including obligations of
20 landowners and plan signatories and consequences of the failure to acquire lands
21 in a timely manner.

22 (j) The plan contains provisions that ensure adequate funding to carry out the
23 conservation actions identified in the plan.

24 **Comment.** Section 64580 continues former Fish and Game Code Section 2820(a) without
25 substantive change.

26 **§ 64585. Approval of agreement not a “project”**

27 64585. The approval of a planning agreement is not a project pursuant to
28 Division 13 (commencing with Section 21000) of the Public Resources Code.

29 **Comment.** Section 64585 continues former Fish and Game Code Section 2810(c) without
30 substantive change.

31 **CHAPTER 3. IMPLEMENTATION**

32 **§ 64600. Department actions**

33 64600. Concurrent with the approval by the department of a final natural
34 community conservation plan, the department shall do both of the following:

35 (a) Establish a list of species that are authorized for take pursuant to Section
36 64605 and the department shall make specific findings to support coverage
37 pursuant to Sections 64565 and 64580. For purposes of determining whether a
38 species should receive coverage under a plan, the department shall use, in addition
39 to the standards required for the adoption of a plan, one or more of the following
40 criteria:

(1) Coverage is warranted based upon regional or landscape level consideration, such as healthy population levels, widespread distribution throughout the plan area, and life history characteristics that respond to habitat-scale conservation and management actions.

(2) Coverage is warranted based on regional or landscape level considerations with site specific conservation and management requirements that are clearly identified in the plan for species that are generally well-distributed, but that have core habitats that must be conserved.

(3) Coverage is warranted based upon site specific considerations and the identification of specific conservation and management conditions for species within a narrowly defined habitat or limited geographic area within the plan area.

(b) Find that the mitigation measures specified in the plan and imposed by the plan participants are consistent with subdivision (d) of Section 64505.

Comment. Section 64600 continues former Fish and Game Code Section 2821 without substantive change.

Note. Existing Section 2821 requires the department to “make specific findings to support coverage pursuant to Section 2820.” Section 2820 is a long section that addresses many aspects of the approval and implementation of a natural community conservation plan. In proposed Section 64600(a), the reference is revised to refer to the provisions that seem most relevant to the purpose of the reference: proposed Sections 64565 and 64580. **The Commission invites comment on whether that change would cause any problems.**

§ 64605. Authorized take

64605. At the time of plan approval, the department may authorize by permit the taking of any covered species, including species designated as fully protected species pursuant to Title 5 (commencing with Section 30200) of Part 3 of Division 8, Title 4 (commencing with Section 32700) of Part 3 of Division 9, or Sections 38200, 52200, and 53000, whose conservation and management is provided for in a natural community conservation plan approved by the department.

Comment. Section 64605 continues former Fish and Game Code Section 2835 without substantive change.

§ 64610. Assurances

64610. The department may provide assurances for plan participants commensurate with long-term conservation assurances and associated implementation measures pursuant to the approved plan.

(a) When providing assurances pursuant to this section, the department’s determination of the level of assurances and the time limits specified in the implementation agreement for assurances may be based on localized conditions and shall consider all of the following:

(1) The level of knowledge of the status of the covered species and natural communities.

(2) The adequacy of analysis of the impact of take on covered species.

1 (3) The use of the best available science to make assessments about the impacts
2 of take, the reliability of mitigation strategies, and the appropriateness of
3 monitoring techniques.

4 (4) The appropriateness of the size and duration of the plan with respect to
5 quality and amount of data.

6 (5) The sufficiency of mechanisms for long-term funding of all components of
7 the plan and contingencies.

8 (6) The degree of coordination and accessibility of centralized data for analysis
9 and evaluation of the effectiveness of the plan.

10 (7) The degree to which a thorough range of foreseeable circumstances are
11 considered and provided for under the adaptive management program.

12 (8) The size and duration of the plan.

13 (b) If there are unforeseen circumstances, additional land, water, or financial
14 compensation or additional restrictions on the use of land, water, or other natural
15 resources shall not be required without the consent of plan participants for a period
16 of time specified in the implementation agreement, unless the department
17 determines that the plan is not being implemented consistent with the substantive
18 terms of the implementation agreement.

19 **Comment.** Section 64610 continues former Fish and Game Code Section 2820(f) without
20 substantive change.

21 **§ 64615. No effect on application of CEQA**

22 64615. Nothing in this title exempts a project proposed in a natural community
23 conservation planning area from Division 13 (commencing with Section 21000) of
24 the Public Resources Code or otherwise alters or affects the applicability of that
25 division.

26 **Comment.** Section 64615 continues former Fish and Game Code Section 2826 without
27 substantive change.

28 **§ 64620. CEQA analysis**

29 64620. To the extent provided pursuant to Division 13 (commencing with
30 Section 21000) of the Public Resources Code and any guidelines adopted pursuant
31 thereto, if the impacts on one or more covered species and its habitat are analyzed
32 and mitigated pursuant to a program environmental impact report for a plan
33 adopted pursuant to this title, a plan participant that is a lead agency or a
34 responsible agency under that division shall incorporate in the review of any
35 subsequent project in the plan area the feasible mitigation measures and
36 alternatives related to the biological impacts on covered species and their habitat
37 developed in the program environmental impact report.

38 **Comment.** Section 64620 continues former Fish and Game Code Section 2820(e) without
39 substantive change.

1 **§ 64625. Data and reports available for public review**

2 64625. Any data and reports associated with the monitoring program required by
3 Sections 64565 and 64580 shall be available for public review. The entity
4 managing the plan shall also conduct public workshops on an annual basis to
5 provide information and evaluate progress toward attaining the conservation
6 objectives of the plan.

7 **Comment.** Section 64625 continues former Fish and Game Code Section 2820(d) without
8 substantive change.

9 **§ 64630. Use of conservation corps**

10 64630. To the extent practicable, implementation of natural community
11 conservation plans shall use the services of either the California Conservation
12 Corps or local community conservation corps.

13 **Comment.** Section 64630 continues former Fish and Game Code Section 2827 without
14 substantive change.

15 **§ 64635. Injunctive relief**

16 64635. The department may seek injunctive relief against any plan participant,
17 person, or entity to enforce this title.

18 **Comment.** Section 64635 continues former Fish and Game Code Section 2822 without
19 substantive change.

20 **§ 64640. Suspension of take or revocation of permit**

21 64640. The department shall suspend or revoke any permit, in whole or in part,
22 issued for the take of a species subject to Section 64605 if the continued take of
23 the species would result in jeopardizing the continued existence of the species.

24 **Comment.** Section 64640 continues former Fish and Game Code Section 2823 without
25 substantive change.

26 **§ 64645. Breach of proportionality between take and conservation**

27 64645. If a plan participant does not maintain the proportionality between take
28 and conservation measures specified in the implementation agreement and does
29 not either cure the default within 45 days or enter into an agreement with the
30 department within 45 days to expeditiously cure the default, the department shall
31 suspend or revoke the permit, in whole or in part.

32 **Comment.** Section 64645 continues former Fish and Game Code Section 2820(c) without
33 substantive change.

34 **§ 64650. Local government authority to acquire land or water**

35 64650. Nothing in this title prohibits a local government from exercising any
36 power or authority granted to it pursuant to state law to acquire land or water to
37 implement a plan.

38 **Comment.** Section 64650 continues former Fish and Game Code Section 2828 without
39 substantive change.

1 **§ 64655. Effect on take in specified circumstances**

2 64655. Nothing in this title prohibits the taking or the incidental take of any
3 identified species if the taking is authorized by the department pursuant to any of
4 the following:

5 (a) A natural community conservation plan or amended plan approved by the
6 department prior to January 1, 2002. Any permits, plans, implementation
7 agreements, and amendments to those permits, plans, or implementation
8 agreements described in this section are deemed to be in full force and effect as of
9 the date approved or entered into by the parties insofar as they authorize the take
10 of identified species pursuant to an approved natural community conservation plan
11 and shall be governed solely by former Chapter 10 (commencing with Section
12 2800) of Division 3 of the Fish and Game Code as it read on December 31, 2001.

13 (b) Any natural community conservation plan, or subarea plan, approved, or
14 amended on or after January 1, 2002, for which a planning or enrollment
15 agreement meets any of the following criteria, which shall be solely governed in
16 accordance with former Chapter 10 (commencing with Section 2800) of Division
17 3 of the Fish and Game Code as it read on December 31, 2001:

18 (1) The natural community conservation plan was entered into between the
19 department and plan participants prior to January 1, 2001, and is carried out
20 pursuant to Rule 4(d) for the California Gnatcatcher (Federal Register Volume 58,
21 December 10, 1993), including the southern subregion of Orange County.

22 (2) The natural community conservation plan was prepared pursuant to the
23 planning agreement for the San Diego Multiple Species Conservation Plan.

24 (3) The natural community conservation plan was prepared pursuant to the
25 planning agreement for the San Diego Multiple Habitat Conservation Plan.

26 (c) Any programmatic natural community conservation plan approved by the
27 department on or before January 1, 2002.

28 (d) Any natural community conservation plan developed pursuant to a planning
29 or enrollment agreement executed on or before January 1, 2001, and for which the
30 department finds that the plan has been developed using a public participation and
31 scientific analysis process substantially in conformance with the intent of
32 subdivision (e) of Section 64560 and Section 64570.

33 (e) Any natural community conservation plan developed pursuant to a planning
34 agreement executed on or before January 1, 2002, and which the department finds
35 is in substantial compliance with Sections 64565, 64580, 64610, 64620, 64625,
36 64645.

37 (f) (1) Any natural community conservation plan or subarea plan initiated on or
38 before January 1, 2000, or amendments thereto, by Sweetwater Authority, Helix
39 Water District, Padre Dam Municipal Water District, Santa Fe Irrigation District,
40 or the San Diego County Water Authority, which the department determines is
41 consistent with the approved San Diego Multiple Habitat Conservation Program or
42 the San Diego Multiple Species Conservation Program, is exempt from Sections
43 64555, 64560, 64575, and 64585, and subdivision (a) of Section 64580, except as

provided in paragraph (2), if the department finds that the plan has been developed and is otherwise in conformance with this title.

(2) The public water agencies identified in this subdivision and the department shall include independent scientific input as described in paragraphs (1) to (4), inclusive, of subdivision (e) of Section 64560 into the proposed plans in a manner that focuses on the covered species that are proposed for take authorization and that are not otherwise covered in the San Diego Multiple Species Conservation Program or the San Diego Multiple Habitat Conservation Program.

(3) The scientific input required by paragraph (2) shall be based on the best and most current scientific data generally available, and shall assure that documentation for coverage of all species is equal or greater than the San Diego Multiple Habitat Conservation Program.

Comment. Section 64655 continues former Fish and Game Code Section 2830 without substantive change.

Notes. (1) Existing Section 2830(e) refers to a “natural community conservation plan developed pursuant to a planning agreement executed on or before January 1, 2002, and which the department finds is in substantial compliance with Section 2820.” It is not certain which parts of Section 2820 are relevant to the purpose of that reference. Out of caution, proposed Section 64655(e) refers to every provision of the proposed law that would continue part of existing Section 2820. **The Commission invites comment on whether that approach is overbroad and, if so, which provisions can be dropped from the reference.**

(2) Existing Section 2830(f)(1) provides that certain entities are “exempt from Section 2810.” It is not certain which parts of Section 2810 are relevant to the purpose of that reference. Out of caution, proposed Section 64655(f)(1) refers to every provision of the proposed law that would continue part of existing Section 2810. **The Commission invites comment on whether that approach is overbroad and, if so, which provisions can be dropped from the reference.**

§ 64660. San Diego dedication of open space

64660. (a) Notwithstanding any other provision of law, lands designated as of January 1, 2013, as open-space lands in a document entitled “Declaration of the Dedication of Land” approved by a resolution of the San Diego City Council in the same manner in which the city council processes approval of dedicated open space, reserving to the city council the authority to grant easements for utility purposes in, under, and across dedicated property, if those easements and facilities to be located thereon do not significantly interfere with the park and recreational use of the property, and filed with the Office of the City Clerk for the City of San Diego, and, if required, at the Office of the County of San Diego Assessor/Recorder/County Clerk, are dedicated land under the City Charter of the City of San Diego.

(b) Upon filing of that document in accordance with subdivision (a), the Office of the City Clerk for the City of San Diego, and, if applicable, the Office of the County of San Diego Assessor/Recorder/County Clerk shall make the document available for inspection by the public upon request.

Comment. Section 64660 continues former Fish and Game Code Section 2831 without substantive change.

 **Note.** Existing Section 2831 does not have any obvious connection to Natural Community Conservation Planning. **The Commission invites comment on whether this section would be better located elsewhere (and if so, where).**

TITLE 3. ADVANCE MITIGATION AND REGIONAL CONSERVATION INVESTMENT STRATEGIES

CHAPTER 1. GENERAL PROVISIONS

Article 1. Legislative Findings and Intent

§ 64700. Findings and declarations

64700. (a) The Legislature finds and declares that it would be beneficial to identify species and habitat conservation initiatives at a regional scale, including actions to address the impacts of climate change and other wildlife stressors, in order to guide voluntary investments in conservation, and compensatory mitigation for impacts to ecological resources, including impacts to threatened and endangered species, other sensitive species, natural communities, ecological processes, and wildlife corridors.

(b) The purpose of this title is to promote the voluntary conservation of natural resources, including biodiversity and ecological processes, and to enhance resiliency to climate change and other threats. In order to further this goal, it is the policy of the state to encourage voluntary mechanisms to conserve biological and other ecological resources and to identify conservation actions, including actions to promote resiliency to the impacts of climate change and other stressors to species and habitat.

(c) It is further the policy of the state to encourage voluntary mechanisms to identify and implement advance mitigation actions that do all of the following:

(1) Can be used to compensate for project impacts, including, but not limited to, infrastructure and renewable energy projects, more efficiently.

(2) Are effective ecologically.

(3) Will help to conserve regionally important biological and other ecological resources.

(d) In enacting this title, it is the intent of the Legislature to promote science-based conservation, including actions to promote resiliency to the impacts of climate change and other stressors. It is further the intent of the Legislature to create nonregulatory mechanisms to guide investments in conservation, infrastructure, and compensatory mitigation for impacts to natural resources, including impacts to threatened and endangered species, other sensitive species, natural communities, ecological processes, and connectivity.

1 (e) In enacting this title, it is not the intent of the Legislature to regulate the use
2 of land, establish land use designations, or to affect, limit, or restrict the land use
3 authority of any public agency.

4 (f) Further, in enacting this title, it is not the intent of the Legislature that an
5 approved regional conservation investment strategy would be binding on
6 independent public agency action within the strategy's geographic scope.

7 **Comment.** Section 64700 continues former Fish and Game Code Section 1850 without
8 substantive change.

9 **§ 64705. Legislative intent**

10 64705. It is the intent of this title to establish requirements that provide
11 sufficient flexibility to develop each regional conservation investment strategy
12 based on the best available information regarding the strategy area.

13 **Comment.** Section 64705 continues former Fish and Game Code Section 1854(b) without
14 substantive change.

15 **Article 2. Definitions**

16 **§ 64710. Application**

17 64710. The definitions in this article govern this title.

18 **Comment.** Section 64710 restates the introductory clause of former Fish and Game Code
19 Section 1851 without substantive change.

20 **§ 64715. Administrative draft natural community conservation plan**

21 64715. "Administrative draft natural community conservation plan" means a
22 substantially complete draft of a natural community conservation plan that is
23 released after January 1, 2016, to the general public, plan participants, and the
24 department.

25 **Comment.** Section 64715 continues former Fish and Game Code Section 1851(a) without
26 substantive change.

27 **§ 64720. Areas of conservation emphasis**

28 64720. "Areas of Conservation Emphasis" means the biodiversity analysis
29 completed by the department in 2010, or the latest update of that analysis.

30 **Comment.** Section 64720 continues former Fish and Game Code Section 1851(b) without
31 substantive change.

32 **§ 64725. Compensatory mitigation**

33 64725. "Compensatory mitigation" means actions taken to fulfill, in whole or in
34 part, mitigation requirements under state or federal law or a court mandate.

35 **Comment.** Section 64725 continues former Fish and Game Code Section 1851(c) without
36 substantive change.

1 **§ 64730. Conservation action**

2 64730. “Conservation action” means an action to preserve or to restore
3 ecological resources, including habitat, natural communities, ecological processes,
4 and wildlife corridors, to protect those resources permanently, and to provide for
5 their perpetual management, so as to help to achieve one or more biological goals
6 and objectives for one or more focal species. Conservation actions may include,
7 but are not limited to, actions to offset impacts to focal species.

8 **Comment.** Section 64730 continues former Fish and Game Code Section 1851(d) without
9 substantive change.

10 **§ 64735. Conservation easement**

11 64735. “Conservation easement” means a perpetual conservation easement that
12 complies with Chapter 4 (commencing with Section 815) of Title 2 of Part 2 of
13 Division 2 of the Civil Code.

14 **Comment.** Section 64735 continues former Fish and Game Code Section 1851(e) without
15 substantive change.

16 **§ 64740. Focal species**

17 64740. “Focal species” means sensitive species within a regional conservation
18 investment strategy area that are analyzed in the strategy and will benefit from
19 conservation actions and habitat enhancement actions set forth in the strategy.

20 **Comment.** Section 64740 continues former Fish and Game Code Section 1851(f) without
21 substantive change.

22 **§ 64745. Habitat enhancement action**

23 64745. “Habitat enhancement action” means an action to improve the quality of
24 wildlife habitat, or to address risks or stressors to wildlife, that has long-term
25 durability but does not involve land acquisition or the permanent protection of
26 habitat, such as improving in-stream flows to benefit fish species, enhancing
27 habitat connectivity, or invasive species control or eradication.

28 **Comment.** Section 64745 continues former Fish and Game Code Section 1851(g) without
29 substantive change.

30 **§ 64750. Performance-based milestones**

31 64750. “Performance-based milestones” means specifically identified steps in
32 the implementation of a conservation action or habitat enhancement action, such
33 as site protection, initiating implementation, completing implementation, or
34 achieving performance standards.

35 **Comment.** Section 64750 continues former Fish and Game Code Section 1851(h) without
36 substantive change.

1 **§ 64755. Performance standards**

2 64755. “Performance standards” means observable or measurable physical or
3 biological attributes that are used to determine if a conservation action or habitat
4 enhancement action has met its objectives.

5 **Comment.** Section 64755 continues former Fish and Game Code Section 1851(i) without
6 substantive change.

7 **§ 64760. Permanently protect**

8 64760. “Permanently protect” means doing both of the following acts:

9 (a) Recording a conservation easement, in a form approved in advance in
10 writing by the department, or establishing perpetual protection of land in a manner
11 consistent with draft or approved natural community conservation plans within the
12 area of the applicable regional conservation investment strategy and approved in
13 advance in writing by the department, that prevents development, prohibits
14 inconsistent uses, and ensures that habitat for focal species is maintained.

15 (b) Providing secure, perpetual funding for management of the land, monitoring,
16 and legal enforcement.

17 **Comment.** Section 64760 continues former Fish and Game Code Section 1851(j) without
18 substantive change.

19 **§ 64765. Regional conservation assessment**

20 64765. “Regional conservation assessment” means information and analyses
21 that document the important species, ecosystems, ecosystem processes, protected
22 areas, and linkages within an ecoregion to provide the appropriate context for
23 nonbinding, voluntary conservation strategies and actions. Those assessments
24 include information for the identification of areas with greatest probability for
25 long-term ecosystem conservation success incorporating cobenefits of ecosystem
26 services, such as carbon, water, and agricultural lands. A regional conservation
27 assessment may be used to provide context at an ecoregional or subcoregional
28 scale to assist with the development of a regional conservation investment
29 strategy.

30 **Comment.** Section 64765 continues the first three sentences of former Fish and Game Code
31 Section 1851(k) without substantive change.

32 **§ 64770. Regional conservation investment strategy**

33 64770. “Regional conservation investment strategy” means information and
34 analyses prepared pursuant to this title to inform nonbinding and voluntary
35 conservation actions and habitat enhancement actions that would advance the
36 conservation of focal species, habitat, and other natural resources and to provide
37 nonbinding voluntary guidance for the identification of wildlife and habitat
38 conservation priorities, investments in ecological resource conservation, or
39 identification of locations for compensatory mitigation for impacts to species and
40 natural resources.

1 **Comment.** Section 64770 continues the first sentence of former Fish and Game Code Section
2 1851(*l*) without substantive change.

3 **§ 64775. Regional level**

4 64775. “Regional level” means the geographic scale of relevant ecologically
5 defined units such as ecoregions.

6 **Comment.** Section 64775 continues former Fish and Game Code Section 1851(*m*) without
7 substantive change.

8 **§ 64780. Sensitive species**

9 64780. “Sensitive species” means any special status species identified by a state
10 or federal agency.

11 **Comment.** Section 64780 continues former Fish and Game Code Section 1851(*n*) without
12 substantive change.

13 Article 3. Implementation and Scope

14 **§ 64800. Guidelines**

15 64800. The department may adopt guidelines and criteria to aid in the
16 implementation of this title. Chapter 3.5 (commencing with Section 11340) of Part
17 1 of Division 3 of Title 2 of the Government Code does not apply to the
18 development, adoption, or amendment of guidelines or criteria pursuant to this
19 section. These guidelines and criteria shall be posted on the department’s Internet
20 Web site.

21 **Comment.** Section 64800 continues former Fish and Game Code Section 1858 without
22 substantive change.

23 **§ 64805. Fees**

24 64805. The department shall collect fees or other compensation from a person or
25 entity that proposes to enter into a mitigation credit agreement, and from a public
26 agency that proposes a regional conservation investment strategy or a regional
27 conservation assessment, to pay for all or a portion of the department’s costs
28 relating to the mitigation credit agreement, proposed strategy, or proposed
29 assessment.

30 **Comment.** Section 64805 continues former Fish and Game Code Section 1857 without
31 substantive change.

32 **§ 64810. Limitations**

33 64810. The department shall approve no more than eight regional conservation
34 investment strategies.

35 **Comment.** Section 64810 continues former Fish and Game Code Section 1861 without
36 substantive change.

1 **§ 64815. Report to Legislature**

2 64815. (a) The department shall submit a report to the Legislature on or before
3 January 1, 2020, regarding the implementation of this title.

4 (b) The report required to be submitted pursuant to subdivision (a) shall be
5 submitted in compliance with Section 9795 of the Government Code.

6 **Comment.** Section 64815 continues former Fish and Game Code Section 1859 without
7 substantive change.

8 **§ 64820. Effect on specified statutes**

9 64820. Nothing in this title supersedes, limits, or otherwise modifies the
10 Sacramento-San Joaquin Delta Reform Act of 2009 (Division 35 (commencing
11 with Section 85000) of the Water Code) or Division 22.3 (commencing with
12 Section 32300) of the Public Resources Code.

13 **Comment.** Section 64820 continues former Fish and Game Code Section 1860 without
14 substantive change.

15 **CHAPTER 2. REGIONAL CONSERVATION ASSESSMENT**

16 **§ 64850. Voluntary**

17 64850. A regional conservation assessment is nonbinding, voluntary, and does
18 not create, modify, or impose regulatory requirements or standards, regulate the
19 use of land, establish land use designations, or affect the land use authority of, or
20 the exercise of discretion by, any public agency. The preparation and use of a
21 regional conservation assessment is voluntary.

22 **Comment.** Section 64850 continues the fourth and fifth sentences of former Fish and Game
23 Code Section 1851(k) without substantive change.

24 **§ 64855. Proposal and approval**

25 64855. (a) A regional conservation assessment may be proposed by the
26 department or any other public agency.

27 (b) A regional conservation assessment may be proposed by the department or
28 any other public agency.

29 (c) The department may approve a regional conservation assessment only for the
30 purposes of a regional conservation investment strategy pursuant to this title.

31 (d) A regional conservation assessment is not required for department approval
32 of a regional conservation investment strategy.

33 **Comment.** Section 64855 continues former Fish and Game Code Section 1853(a) without
34 substantive change.

35 **§ 64860. Requirements**

36 64860. A regional conservation assessment shall do all of the following:

37 (a) Identify and summarize relevant regional pressures and stressors, including
38 climate change vulnerability, conservation areas and habitat connectivity values,
39 included in all of the following:

1 (1) Conservation plans, such as the State Wildlife Action Plan and approved
2 natural community conservation plans.

3 (2) Analyses designed to identify areas of high biological diversity, such as the
4 Areas of Conservation Emphasis.

5 (3) Analyses designed to identify areas for habitat connectivity.

6 (b) Identify the best available scientific information and analyses, including
7 geospatial information regarding the distribution of species and natural
8 communities.

9 (c) Use spatial analysis to identify ecological relationships between existing
10 protected areas and conservation areas.

11 (d) Use standard or prevalent vegetation classifications and standard ecoregional
12 classifications for terrestrial and aquatic data to enable and promote consistency
13 among regional conservation assessments throughout California.

14 (e) Compile input and summary data in a consistent format that could be
15 uploaded for interactive use in an Internet Web portal and that would allow
16 stakeholders to generate queries of regional conservation values within the
17 strategy area.

18 (f) Be consistent with administrative draft natural community conservation
19 plans, approved natural community conservation plans, and regional habitat
20 conservation plans, and approved recovery plans within the ecoregion or
21 subecoregion included in the assessment.

22 (g) Consider existing major water, transportation, and transmission
23 infrastructure facilities in the assessment area and account for reasonably
24 foreseeable development of major infrastructure facilities, including, but not
25 limited to, renewable energy and housing.

26 (h) Include provisions ensuring that the strategy will be in compliance with all
27 applicable state and local requirements and does not preempt the authority of local
28 agencies to implement infrastructure and urban development in local general
29 plans.

30 (i) Include provisions ensuring that the assessment is consistent with and
31 complements any approved natural community conservation plan or regional
32 federal habitat conservation plan that overlaps with the assessment area.

33 (j) Include an explanation of whether, and to what extent, the assessment is
34 consistent with any previously approved assessment or amended assessment, state
35 or federal recovery plan, or other state or federal approved conservation strategy
36 that overlaps with the assessment area.

37 **Comment.** Section 64860 continues former Fish and Game Code Section 1853(c) without
38 substantive change.

1 CHAPTER 3. REGIONAL CONSERVATION INVESTMENT STRATEGY

2 Article 1. Regional Conservation Investment Strategy Generally

3 **§ 64900. Purpose**

4 64900. The purpose of a regional conservation investment strategy shall be to
5 inform science-based nonbinding and voluntary conservation actions and habitat
6 enhancement actions that would advance the conservation of focal species,
7 including the ecological processes, natural communities, and habitat connectivity
8 upon which those focal species depend, and to provide nonbinding voluntary
9 guidance for one or more of the following:

10 (a) Identification of wildlife and habitat conservation priorities, including
11 actions to address the impacts of climate change and other wildlife stressors.

12 (b) Investments in resource conservation.

13 (c) Infrastructure.

14 (d) Identification of areas for compensatory mitigation for impacts to species
15 and natural resources.

16 **Comment.** Section 64900 continues former Fish and Game Code Section 1852(b) without
17 substantive change.

18 **§ 64905. Voluntary**

19 64905. Regional conservation investment strategies are intended to provide
20 scientific information for the consideration of public agencies, are voluntary, and
21 do not create, modify, or impose regulatory requirements or standards, regulate the
22 use of land, establish land use designations, or affect the land use authority of or
23 exercise of discretion by, any public agency. The preparation and use of regional
24 conservation investment strategies for this guidance is voluntary.

25 **Comment.** Section 64905 continues the second and third sentences of former Fish and Game
26 Code Section 1851(l) without substantive change.

27 **§ 64910. Content**

28 64910. A regional conservation investment strategy shall include all of the
29 following:

30 (a) An explanation of the conservation purpose of and need for the strategy.

31 (b) The geographic area of the strategy and rationale for the selection of the
32 area, together with a description of the surrounding ecoregions and any adjacent
33 protected habitat areas or linkages that provide relevant context for the
34 development of the strategy.

35 (c) The focal species included in, and their current known or estimated status
36 within, the strategy.

37 (d) Important resource conservation elements within the strategy area, including,
38 but not limited to, important ecological resources and processes, natural
39 communities, habitat, habitat connectivity, and existing protected areas, and an

1 explanation of the criteria, data, and methods used to identify those important
2 conservation elements.

3 (e) A summary of historic, current, and projected future stressors and pressures
4 in the strategy area, including climate change vulnerability, on the focal species,
5 habitat, and other natural resources, as identified in the best available scientific
6 information, including, but not limited to, the State Wildlife Action Plan.

7 (f) Consideration of major water, transportation and transmission infrastructure
8 facilities, urban development areas, and city, county, and city and county general
9 plan designations that accounts for reasonably foreseeable development of major
10 infrastructure facilities, including, but not limited to, renewable energy and
11 housing in the strategy area.

12 (g) Provisions ensuring that the strategy will be in compliance with all
13 applicable state and local requirements and does not preempt the authority of local
14 agencies to implement infrastructure and urban development in local general
15 plans.

16 (h) Conservation goals and measurable objectives for the focal species and
17 important conservation elements identified in the strategy that address or respond
18 to the identified stressors and pressures on focal species.

19 (i) Conservation actions, including a description of the general amounts and
20 types of habitat that, if preserved or restored and permanently protected, could
21 achieve the conservation goals and objectives, and a description of how the
22 conservation actions and habitat enhancement actions were prioritized and
23 selected in relation to the conservation goals and objectives.

24 (j) Provisions ensuring that the strategy is consistent with and complements any
25 administrative draft natural community conservation plan, approved natural
26 community conservation plan, or federal habitat conservation plan that overlaps
27 with the strategy area.

28 (k) An explanation of whether and to what extent the strategy is consistent with
29 any previously approved strategy or amended strategy, state or federal recovery
30 plan, or other state or federal approved conservation strategy that overlaps with the
31 strategy area.

32 (l) A summary of mitigation banks and conservation banks approved by the
33 department or the United States Fish and Wildlife Service that are located within
34 the strategy area or whose service area overlaps with the strategy area.

35 (m) A description of how the strategy's conservation goals and objectives
36 provide for adaptation opportunities against the effects of climate change for the
37 strategy's focal species.

38 (n) Incorporation and reliance on, and citation of, the best available scientific
39 information regarding the strategy area and the surrounding ecoregion, including a
40 brief description of gaps in relevant scientific information, and use of standard or
41 prevalent vegetation classifications and standard ecoregional classifications for
42 terrestrial and aquatic data to enable and promote consistency among regional
43 conservation investment strategies throughout California.

1 **Comment.** Section 64910 continues former Fish and Game Code Section 1852(c) without
2 substantive change.

3 **§ 64915. Considerations**

4 64915. In addition to considering the potential to advance the conservation of
5 focal species, regional conservation investment strategies shall consider all of the
6 following:

7 (a) The conservation benefits of preserving working lands for agricultural uses.

8 (b) Reasonably foreseeable development of infrastructure facilities.

9 (c) Reasonably foreseeable projects in the strategy area, including, but not
10 limited to, housing.

11 (d) Reasonably foreseeable development for the production of renewable
12 energy.

13 (e) Draft natural community conservation plans within the area of the applicable
14 regional conservation investment strategy.

15 **Comment.** Section 64915 continues former Fish and Game Code Section 1852(e) without
16 substantive change.

17 **§ 64920. Incorporation of regional conservation assessment**

18 64920. If a regional conservation assessment that encompasses the area of a
19 proposed regional conservation investment strategy has already been approved by
20 the department, the strategy shall explain how and to what extent it has
21 incorporated the assessment information and analysis.

22 **Comment.** Section 64920 continues former Fish and Game Code Section 1853(b) without
23 substantive change.

24 **§ 64925. Format**

25 64925. A regional conservation investment strategy shall compile input and
26 summary priority data in a consistent format that could be uploaded for interactive
27 use in an Internet Web portal and that would allow stakeholders to generate
28 queries of regional conservation values within the strategy area.

29 **Comment.** Section 64925 continues former Fish and Game Code Section 1852(d) without
30 substantive change.

31 **§ 64930. Consistent metrics.**

32 64930. The department shall require the use of consistent metrics that
33 incorporate both the area and quality of habitat and other natural resources in
34 relation to a regional conservation investment strategy's conservation objectives to
35 measure the net change resulting from the implementation of conservation actions
36 and habitat enhancement actions.

37 **Comment.** Section 64930 continues former Fish and Game Code Section 1854(e) without
38 substantive change.

1 **§ 64935. Proposal and approval**

2 64935. (a) A regional conservation investment strategy may be proposed by the
3 department or any other public agency, and shall be developed in consultation
4 with local agencies that have land use authority within the geographic area of the
5 regional conservation investment strategy.

(b) The department may approve a regional conservation investment strategy pursuant to this title.

(c) The department may only approve a regional conservation investment strategy if one or more state agencies request approval of the regional conservation investment strategy through a letter sent to the director indicating that the proposed regional conservation investment strategy would contribute to meeting both of the following state goals:

(1) Conservation.

4 (2) Public infrastructure or forest management.

5 **Comment.** Section 64935 continues former Fish and Game Code Section 1852(a) without
6 substantive change.

Article 2. Procedure

18 **§ 64960. Notice of intent**

64960. (a) A public agency shall publish notice of its intent to create a regional conservation investment strategy.

(b) This notice shall be filed with the Governor's Office of Planning and Research and the county clerk of each county in which the regional conservation investment strategy is found in part or in whole.

(c) If preparation of a regional conservation investment strategy was initiated before January 1, 2017, this notice shall not be required.

26 **Comment.** Section 64960 continues former Fish and Game Code Section 1854(c)(1) without
27 substantive change.

§ 64965. Department review and acceptance of draft

64965. (a) After a draft regional conservation investment strategy or an
amendment to a strategy is submitted to the department for approval, the
department shall have 30 days within which to deem the draft regional
conservation investment strategy or an amended strategy complete or to explain in
writing to the public agency submitting the strategy or amended strategy what is
needed to complete the strategy or amended strategy.

(b) Within 30 days of deeming a draft regional conservation investment strategy or amended strategy complete, the department shall make the draft strategy or amended strategy available to the public on its Internet Web site for review and comment for a period of at least 30 days and shall notify any public agency, organization, or individual who has filed a written request to the department for notices regarding draft regional conservation strategies.

1 **Comment.** Section 64965 continues former Fish and Game Code Section 1854(c)(2) without
2 substantive change.

3 **§ 64970. Public meeting and comment**

4 64970. (a) A public agency proposing a strategy or amended strategy shall hold
5 a public meeting to allow interested persons and entities to receive information
6 about the draft regional conservation investment strategy or amended strategy
7 early in the process of preparing it and to have an adequate opportunity to provide
8 written and oral comments. The public meeting shall be held at a location within
9 or near the strategy area.

10 (b) In a draft regional conservation investment strategy or amended strategy
11 submitted to the department for approval, the public agency shall include
12 responses to written public comments submitted during the public comment
13 period.

14 (c) If preparation of a regional conservation investment strategy was initiated
15 before January 1, 2017, and a public meeting regarding the strategy or amended
16 strategy that is consistent with the requirements of this article was held before
17 January 1, 2017, an additional public meeting shall not be required.

18 (d) If preparation of a regional conservation investment strategy was initiated
19 before January 1, 2017, and a public meeting regarding the strategy was not held
20 before January 1, 2017, the public meeting required under this article may be held
21 after January 1, 2017, if it is held at least 30 days before the strategy is submitted
22 to the department for approval.

23 **Comment.** Section 64970 continues former Fish and Game Code Section 1854(c)(3) without
24 substantive change.

25 **§ 64975. Notice of meeting**

26 64975. At least 30 days before holding a public meeting to distribute
27 information about the development of a draft regional conservation investment
28 strategy or amended strategy, a public agency proposing a strategy shall provide
29 notice of a regional conservation investment strategy or amended strategy public
30 meeting as follows:

31 (a) On the public agency's Internet Web site and any relevant LISTSERV.

32 (b) To each city, county, and city and county within or adjacent to the regional
33 conservation investment strategy area.

34 (c) To the implementing entity for each natural community conservation plan or
35 federal regional habitat conservation plan that overlaps with the strategy area.

36 (d) To each public agency, organization, or individual who has filed a written
37 request for the notice, including any agency, organization, or individual who has
38 filed a written request to the department for notices of all regional conservation
39 investment strategy public meetings.

40 **Comment.** Section 64975 continues former Fish and Game Code Section 1854(c)(4) without
41 substantive change.

1 **§ 64980. Notice of final draft**

2 64980. At least 60 days before submitting a final regional conservation
3 investment strategy or amended strategy to the department for approval, the public
4 agency proposing the investment strategy or amended strategy shall notify the
5 board of supervisors and the city councils in each county within the geographical
6 scope of the strategy and provide the board of supervisors and the city councils
7 with an opportunity to submit written comments for a period of at least 30 days.

8 **Comment.** Section 64980 continues former Fish and Game Code Section 1854(c)(5) without
9 substantive change.

10 **§ 64985. Department review of final draft**

11 64985. After a final regional conservation investment strategy or amended
12 strategy is submitted to the department for approval, the department shall have 30
13 days within which to approve the final regional conservation investment strategy
14 or amended strategy or to explain in writing to the public agency submitting the
15 strategy or amended strategy what is needed to approve the strategy or amended
16 strategy.

17 **Comment.** Section 64985 continues former Fish and Game Code Section 1854(c)(6) without
18 substantive change.

19 **§ 64990. Limitation on department rejection**

20 64990. The department shall not reject biologically appropriate and adequate
21 compensatory mitigation proposed by a project proponent on the basis that the
22 compensatory mitigation is not a conservation action or habitat enhancement
23 identified in a regional conservation investment strategy.

24 **Comment.** Section 64990 continues former Fish and Game Code Section 1855(e) without
25 substantive change.

26 **§ 64995. Internet publication**

27 64995. The department shall make all approved regional conservation
28 investment strategies, including all updates to scientific information and analyses
29 used in a regional conservation investment strategy and any amendments to the
30 strategy available on its Internet Web site.

31 **Comment.** Section 64995 continues former Fish and Game Code Section 1854(d) without
32 substantive change.

33 **§ 65000. Duration**

34 65000. (a) The department may prepare or approve a regional conservation
35 investment strategy, or approve an amended strategy, for an initial period of up to
36 10 years after finding that the strategy meets the requirements of Article 1
37 (commencing with Section 64900).

38 (b) The department may extend the duration of an approved or amended regional
39 conservation investment strategy for additional periods of up to 10 years after

1 updating the strategy for new scientific information and finding that the strategy
2 continues to meet the requirements of Article 1 (commencing with Section 64900).

3 (c) For purposes of this article, an amended strategy means a complete regional
4 conservation investment strategy prepared by a public agency to amend
5 substantially and to replace an approved strategy submitted by the public agency.

6 **Comment.** Section 65000 continues former Fish and Game Code Section 1854(a) without
7 substantive change.

8 Article 3. Effect

9 § 65050. Effect on public agencies

10 65050. (a) Regional conservation investment strategies shall not affect the
11 authority or discretion of any public agency and shall not be binding upon public
12 agencies other than parties to a mitigation credit agreement.

13 (b) Nothing in this title increases or decreases the authority or jurisdiction of the
14 department regarding any land use, species, habitat, area, resource, plan, process,
15 or corridor.

16 (c) Regional conservation investment strategies are intended to provide
17 scientific information for the consideration of public agencies.

18 (d) Nothing in this title or any other provision of law requires any public agency,
19 other than a public agency that is party to a mitigation credit agreement, to adopt,
20 implement, or otherwise adhere to a regional conservation investment strategy or a
21 regional conservation assessment.

22 **Comment.** Section 65050 continues former Fish and Game Code Section 1855(a) without
23 substantive change.

24 § 65055. Effect on other processes

25 65055. The approval or existence of a regional conservation investment strategy,
26 mitigation credit agreement, or credit pursuant to this title does not do any of the
27 following:

28 (a) Modify in any way the standards for issuance of incidental take permits or
29 consistency determinations pursuant to Section 62700 or 62705, issuance of take
30 authorizations pursuant to Section 64605, the issuance of lake or streambed
31 alteration agreements pursuant to Section 69750, or any other provision of this
32 code or regulations adopted pursuant to this code.

33 (b) Modify in any way the standards under the California Environmental Quality
34 Act (Division 13 (commencing with Section 21000) of the Public Resources
35 Code), or in any way limit a lead agency's or responsible agency's discretion, in
36 connection with any determination of whether a proposed project may or may not
37 result in significant environmental effects or in any way establish a presumption in
38 connection with any determination of whether a proposed project may or may not
39 result in significant environmental effects or whether a proposed project's impacts
40 would be mitigated.

- 1 (c) Prohibit or authorize any project or project impacts.
- 2 (d) Create a presumption or guarantee that any proposed project will be
- 3 approved or permitted, or that any proposed impact will be authorized, by any
- 4 state or local agency.
- 5 (e) Create a presumption that any proposed project will be disapproved or
- 6 prohibited, or that any proposed impact will be prohibited, by any state or local
- 7 agency.
- 8 (f) Alter or affect, or create additional requirements for, the general plan of the
- 9 city, county, or city and county, in which it is located.
- 10 (g) Constitute any of the following, for the purposes of the California
- 11 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
- 12 Public Resources Code):
- 13 (1) A plan, policy, or regulation adopted for the purpose of avoiding or
- 14 mitigating an environmental effect.
- 15 (2) A local policy or ordinance protecting biological resources.
- 16 (3) An adopted local, regional, or state habitat conservation plan.
- 17 **Comment.** Section 65055 continues former Fish and Game Code Section 1855(b) without
- 18 substantive change.

 **Note.** Existing Section 1855(b) refers to “the issuance of lake or streambed alteration agreements pursuant to Section 1602...” In proposed Section 65055, the reference to Section 1602 has been narrowed to refer to subdivision (a) of that section, the part of the section that authorizes the issuance of such agreements (proposed Section 69750). **The Commission invites comment on whether that revision would cause a problem.**

24 § 65060. Effect on project proponent

25 65060. (a) Nothing in this title shall require a project proponent seeking to
26 provide compensatory mitigation pursuant to Section 62700, 62705, or 64605, or
27 the California Environmental Quality Act (Division 13 (commencing with Section
28 21000) of the Public Resources Code) to take any of the following actions:

- 29 (1) Undertake conservation actions or habitat enhancement actions identified in
- 30 a regional conservation investment strategy.
- 31 (2) Implement, contribute to, fund, or otherwise comply with the actions
- 32 described in a regional conservation investment strategy.
- 33 (3) Enter into a mitigation credit agreement.
- 34 (4) Use or purchase mitigation credits established pursuant to this title to satisfy
- 35 the compensatory mitigation requirements.

36 (b) Nothing in this chapter shall prevent a project proponent from proposing
37 mitigation consistent with one or more strategies approved pursuant to this title.

38 **Comment.** Section 65060 continues former Fish and Game Code Section 1855(c) without
39 substantive change.

40  **Notes.** (1) Existing Section 1855(c) (proposed Section 65060(b)) provides that “nothing in
41 this section shall prevent a project proponent from proposing mitigation consistent with one or
42 more strategies approved pursuant to this chapter.” It is not clear which provisions of “this
43 section” (i.e., Section 1855) are intended to be covered by that disclaimer. In proposed Section

65060, the disclaimer is revised to refer to “this chapter” (which would continue Section 1855(a)-(c)). **The Commission invites comment on whether the scope of that reference should be broadened or narrowed.**

(2) Existing Section 1855(c) refers to “a project proponent seeking to provide compensatory mitigation pursuant to Section 1602” and other specified sections. There is no language in Section 1602 that clearly authorizes or requires “compensatory mitigation.” The section does authorize the imposition of “measures” to protect an adversely affected fish or wildlife resource, but it is not clear that those are understood to be “compensatory mitigation.” As a tentative measure, the reference to Section 1602 has not been continued in proposed Section 65060. **The Commission invites comment on whether the reference to Section 1602 should be included and, if so, which portion of Section 1602 is relevant to the reference.**

CHAPTER 4. MITIGATION CREDITS

§ 65100. Creation

65100. (a) A conservation action or habitat enhancement action that measurably advances the conservation objectives of an approved regional conservation investment strategy may be used to create mitigation credits that can be used to compensate for impacts to focal species and other species, habitat, and other natural resources, as provided in this chapter.

(b) The requirements of this chapter apply only to the creation of mitigation credits under mitigation credit agreements pursuant to this chapter and do not establish requirements for other forms of compensatory mitigation.

Comment. Section 65100 continues former Fish and Game Code Section 1856(a) without substantive change.

§ 65105. Requirements

65105. For a conservation action or habitat enhancement action identified in a regional conservation investment strategy to be used to create mitigation credits pursuant to this chapter, the regional conservation investment strategy shall include, in addition to the requirements of Article 1 (commencing with Section 64900) of Chapter 3, all of the following:

(a) An adaptive management and monitoring strategy for conserved habitat and other conserved natural resources.

(b) A process for updating the scientific information used in the strategy, and for tracking the progress of, and evaluating the effectiveness of, conservation actions and habitat enhancement actions identified in the strategy, in offsetting identified threats to focal species and in achieving the strategy’s biological goals and objectives, at least once every 10 years, until all mitigation credits are used.

(c) Identification of a public or private entity that will be responsible for the updates and evaluation required pursuant to subdivision (b).

Comment. Section 65105 continues former Fish and Game Code Section 1856(b) without substantive change.

1 **§ 65110. Use of mitigation credits**

2 65110. A mitigation credit created in accordance with this chapter may be used
3 to fulfill, in whole or in part, compensatory mitigation requirements established
4 under any state or federal environmental law, as determined by the applicable
5 local, state, or federal regulatory agency, including, but not limited to, the
6 following:

7 (a) To compensate for take or other adverse impacts of activities authorized
8 pursuant to Part 1 (commencing with Section 62000) within the regional
9 conservation investment strategy area.

10 (b) To reduce adverse impacts to fish or wildlife resources, or both, from
11 activities authorized pursuant to Title 3 (commencing with Section 69700) of Part
12 4 within the regional conservation investment strategy area to less than substantial.

13 (c) To mitigate significant effects on the environment within the regional
14 conservation investment strategy area pursuant to the California Environmental
15 Quality Act (Division 13 (commencing with Section 21000) of the Public
16 Resources Code) and Guidelines for Implementation of the California
17 Environmental Quality Act (Chapter 3 (commencing with Section 15000) of
18 Division 6 of Title 14 of the California Code of Regulations).

19 **Comment.** Section 65110 continues former Fish and Game Code Section 1856(c) without
20 substantive change.

21 **§ 65115. Long-term durability of enhancement action**

22 65115. (a) The department shall ensure the long-term durability of a habitat
23 enhancement action.

24 (b) If a habitat enhancement action is used to create one or more mitigation
25 credits pursuant to this chapter, the habitat enhancement action shall remain in
26 effect at least until the site of the environmental impact is returned to preimpact
27 ecological conditions.

28 **Comment.** Section 65115 continues former Fish and Game Code Section 1856(d) without
29 substantive change.

30 **§ 65120. Mitigation credit agreement**

31 65120. (a) To create mitigation credits pursuant to this chapter, a person or
32 entity, including a state or local agency, shall enter into a mitigation credit
33 agreement with the department.

34 (b) The mitigation credit agreement shall identify the type and number of
35 mitigation credits proposed to be created and the terms and conditions under
36 which the mitigation credits may be used.

37 (c) Mitigation credits shall not be created on a site that has already been
38 permanently protected and has been used, or is currently in use, to fulfill
39 compensatory mitigation requirements for one or more projects.

1 (d) The person or entity may create and use, sell, or otherwise transfer the
2 mitigation credits upon department approval that the credits have been created in
3 accordance with the agreement.

4 **Comment.** Section 65120 continues former Fish and Game Code Section 1856(e) without
5 substantive change.

6 **§ 65125. Creation process**

7 65125. (a) To enter into a mitigation credit agreement with the department, a
8 person or entity shall submit a draft mitigation credit agreement to the department
9 for its review, revision, and approval or disapproval.

10 (b) Within five days of deeming a draft agreement complete, the department
11 shall publish notice of the availability of the draft agreement by filing its notice
12 with the Governor's Office of Planning and Research and the city and county
13 clerks of each county in which the agreement is applicable in part or in whole and
14 shall make the draft agreement available to the public on its Internet Web site, and
15 to any public agency, organization, or individual who has filed a written request to
16 the department for notices regarding agreements, for review and comment for a
17 period of at least 45 days.

18 (c) Following the notice period required by subdivision (b), the department shall
19 respond to written comments submitted during the public comment period and
20 may approve the agreement, approve it with revisions, or disapprove it.

21 (d) The department may enter into a mitigation credit agreement if it determines
22 that the mitigation credit agreement does all of the following:

23 (1) Provides contact information for, and establishes the qualifications of, the
24 person or entity entering into the agreement, the entity that will manage the site of
25 the conservation action or habitat enhancement action, and any contractors or
26 consultants.

27 (2) Fully describes the proposed conservation actions or habitat enhancement
28 actions and explains how, and to what extent, they will measurably advance
29 conservation objectives of the regional conservation investment strategy that have
30 not yet been achieved.

31 (3) Identifies the location of the conservation actions or habitat enhancement
32 actions, including a location map, address, and size of the site where the proposed
33 conservation action or habitat enhancement action will be implemented.

34 (4) Provides color aerial and ground-level photographs that reflect current
35 conditions on the site and surrounding properties.

36 (5) Explains how the mitigation credits will be created, including, but not
37 limited to, information regarding proposed ownership arrangements, long-term
38 management strategy, and any phases of implementation.

39 (6) Identifies mitigation banks and conservation banks approved by the
40 department as a mitigation alternative and explains how available mitigation
41 credits at those banks will be purchased or used in combination with the mitigation
42 credits created under the mitigation credit agreement or, if those available

1 mitigation credits will not be purchased or used, why they will not be purchased or
2 used.

3 (7) Includes a natural resources evaluation that documents biotic and abiotic
4 baseline conditions, including past, current, and adjacent land uses, vegetation
5 types, species information, topography, hydrology, and soil types.

6 (8) Identifies public lands and permanently protected lands in the vicinity of the
7 conservation actions or habitat enhancement actions.

8 (9) Fully describes the proposed type and quantity of mitigation credits and the
9 supporting rationale. Mitigation credits created pursuant to this chapter shall
10 directly correlate to the focal species and other species, habitat, and other natural
11 resources protected by the conservation actions or habitat enhancement actions.

12 (10) Identifies metrics or indicators by which the proposed conservation action
13 or habitat enhancement action's contribution to achieving the strategy's
14 conservation goals and objectives can feasibly be measured with existing
15 technology. The net ecological gain from the implementation of conservation
16 actions and habitat enhancement actions that include habitat restoration shall be
17 reported using consistent metrics that measure the increment of gain in the area
18 and quality of habitat or other natural resource values compared to baseline
19 conditions described in the regional conservation investment strategy, and
20 measures the increment of gain in relation to the regional conservation investment
21 strategy's conservation objectives.

22 (11) Describes the proposed landownership of the site or sites of the
23 conservation actions or habitat enhancement actions.

24 (12) Includes a template conservation easement, or other instrument providing
25 for perpetual protection of land in a manner consistent with approved natural
26 community conservation plans within the area of the applicable regional
27 conservation investment strategy, for the sites of any conservation action and an
28 explanation of how the long-term durability of the sites of any habitat
29 enhancement actions will be ensured.

30 (13) Ensures that the implementation of the conservation action or habitat
31 enhancement action will be adequately funded and that long-term protection and
32 management of the site will be funded in accordance with Chapter 4.6
33 (commencing with Section 65965) of Division 1 of Title 7 of the Government
34 Code or, if a state agency proposed to enter into a mitigation credit agreement,
35 other comparable funding mechanism approved by the department in accordance
36 with an adopted statewide policy regarding funding for long-term management
37 and operations of mitigation sites.

38 (14) Includes a template monitoring and long-term adaptive management plan.

39 (15) Explains the terms and conditions under which the proposed mitigation
40 credits may be sold or otherwise transferred and how the proposed mitigation
41 credits will be accounted for, including the specific methods proposed for
42 reporting and maintaining a record of credit creation, release, and use, sale, or
43 transfer.

1 (16) Includes enforcement provisions.

2 (17) Ensures that, for each site on which the conservation actions or habitat
3 enhancement actions will be implemented, information consistent with, pursuant
4 to this title, the information required for a mitigation bank in subdivision (c) of
5 Section 65455 and subdivisions (b) to (h), inclusive, of Section 65505 shall be
6 prepared and submitted to the department for review for adequacy and approval
7 prior to implementation.

8 (18) Includes a proposed credit ledger and credit release schedule that meets the
9 requirements of Section 65135.

10 **Comment.** Section 65125 continues former Fish and Game Code Section 1856(f) without
11 substantive change.

12 **§ 65130. Project that quantifiably exceeds compensatory mitigation requirements**

13 65130. (a) Mitigation credit agreements may be used to establish the terms and
14 conditions under which mitigation credits can be created by projects that improve
15 wildlife habitat, or that address stressors to wildlife, to an extent that quantifiably
16 exceeds compensatory mitigation requirements established by the department for
17 those projects pursuant to Title 3 (commencing with Section 69700) of Part 4 or
18 Part 1 (commencing with Section 62000).

19 (b) Those projects may include, but are not limited to:

20 (1) The construction of setback levees that result in the creation of more
21 floodplain or riparian habitat than is required to compensate for construction
22 impacts.

23 (2) The construction of transportation facility improvements that remove
24 barriers to fish or wildlife movement and thereby improve the quality of habitat or
25 address stressors to wildlife to a greater extent than is required to compensate for
26 construction impacts.

27 (c) For those projects, the project proponent may submit a draft mitigation credit
28 agreement that proposes the terms and conditions under which mitigation credits
29 may be created and used by or in conjunction with those projects to the department
30 for its review, revision, and approval. The submission may occur concurrently
31 with, or after, an application submitted pursuant to Part 1 (commencing with
32 Section 62000) or a notice submitted pursuant to Title 3 (commencing with
33 Section 69700) of Part 4 or may occur after the application or notice is submitted.
34 Where a draft mitigation agreement is submitted concurrently with the application
35 or notice, the department shall review the draft mitigation credit agreement
36 concurrently with its review of the application or notice and shall, to the maximum
37 extent practicable, complete its review of both the notice or application and the
38 draft agreement concurrently.

39 (d) Mitigation credit agreements submitted to the department pursuant to this
40 section may comply with the requirements of Section 65135 with a credit release
41 schedule related to construction of the project that will improve wildlife habitat, or
42 will address stressors to wildlife, to an extent that exceeds compensatory

1 mitigation requirements quantifiably. For those projects, construction of the
2 project may be a performance-based milestone required by subdivision (b) of
3 Section 65135.

4 **Comment.** Section 65130 continues former Fish and Game Code Section 1856(h) without
5 substantive change.

6 **§ 65135. Release of mitigation credits**

7 65135. (a) The release of mitigation credits for use, sale, or transfer under a
8 mitigation credit agreement shall require the department's approval in accordance
9 with this section.

10 (b) The release of mitigation credits shall be tied to performance-based
11 milestones and achievement of ecological performance standards. The credit
12 release schedule for each mitigation credit agreement shall reserve a substantial
13 share of the total credits for release after those ecological performance standards
14 are fully achieved.

15 (c) Performance-based milestones shall include, but are not be limited to, the
16 following:

17 (1) Recording a conservation easement consistent with approved natural
18 community conservation plans within the area of the applicable regional
19 conservation investment strategy on the site of a conservation action, or putting
20 into place measures that ensure the long-term durability of a habitat enhancement
21 action in accordance with Section 65115.

22 (2) Completing construction of a habitat restoration action.

23 (3) Achieving temporal ecological performance standards for habitat restoration,
24 such as standards established for one year, three years, or five years following the
25 initiation of habitat restoration.

26 (4) Fully achieving ecological performance standards.

27 (5) The terms of the credit release schedule shall be specified in the mitigation
28 credit agreement. When conservation actions and habitat enhancement actions are
29 implemented and meet the performance-based milestones specified in the credit
30 release schedule, credits shall be created in accordance with the credit release
31 schedule. If a conservation action or habitat enhancement action does not meet
32 performance-based milestones, the department may suspend the release of credits,
33 reduce the number of credits, or otherwise modify the credit release schedule
34 accordingly.

35 (d) In order for mitigation credits to be released, the person or entity that has
36 entered into a mitigation credit agreement shall demonstrate to the department that
37 the appropriate performance-based milestones for credit release have been met.
38 The department shall determine whether the milestones have been met and the
39 credits may be released.

40 **Comment.** Section 65135 continues former Fish and Game Code Section 1856(g) without
41 substantive change.

1 **§ 65140. Effect on conservation bank or mitigation bank**

2 65140. Nothing in this title is intended to limit or impose additional conditions
3 on the creation or sale of mitigation credits by a conservation bank or mitigation
4 bank approved by the department pursuant to Title 3 (commencing with Section
5 65300).

6 **Comment.** Section 65140 continues former Fish and Game Code Section 1856(i) without
7 substantive change.

8 **§ 65145. Application to natural community conservation plan**

9 65145. (a) The creation of mitigation credits pursuant to this chapter from a
10 conservation action or habitat enhancement action implemented within the plan
11 area of an approved natural community conservation plan shall not duplicate or
12 replace mitigation requirements set forth in the natural community conservation
13 plan and shall require the advance written approval of the plan's implementing
14 entity.

15 (b) Mitigation credits created pursuant to this chapter may be used for covered
16 activities under an approved natural community conservation plan only in
17 accordance with the requirements of the plan.

18 (c) Individuals and entities eligible for coverage as a participating special entity
19 under an approved natural community conservation plan may use mitigation
20 credits created pursuant to this chapter only if the plan's implementing entity
21 declines to extend coverage to the covered activity proposed by the eligible
22 individual or entity.

23 **Comment.** Section 65145 continues former Fish and Game Code Section 1856(j) without
24 substantive change.

25 **§ 65150. Application to Delta water conveyance facilities**

26 65150. Mitigation credits provided by this title shall not be utilized to fund or
27 offset the costs of the design, construction, or mitigation of new Delta water
28 conveyance facilities.

29 **Comment.** Section 65150 continues former Fish and Game Code Section 1855(d) without
30 substantive change.

31 **§ 65155. Internet publication**

32 65155. The department shall make project mitigation credit and release
33 information, including the demonstration submitted pursuant to subdivision (d) of
34 Section 65135, publicly available on the department's Internet Web site.

35 **Comment.** Section 65155 continues former Fish and Game Code Section 1856(k) without
36 substantive change.

1 TITLE 4. CONSERVATION BANK AND
2 MITIGATION BANK APPLICATIONS AND FEES

3 CHAPTER 1. GENERAL PROVISIONS

4 Article 1. Findings and Declarations

5 § 65300. Findings and declarations

6 65300. The Legislature finds and declares as follows:

7 (a) Mitigation banks and conservation banks provide for the conservation of
8 important habitats and habitat linkages, take advantage of economies of scale that
9 are often not available to individualized mitigation projects, and simplify the state
10 regulatory compliance process while achieving conservation goals.

11 (b) The department authorizes the establishment of private and public
12 conservation and mitigation banks that can provide viable consolidated mitigation
13 for adverse impacts caused by projects. Banks sell habitat or species credits to
14 project proponents having mitigation responsibilities that require compensation for
15 impacts to wetlands, threatened or endangered species, and other sensitive
16 resources. The state policy on conservation banks was established in 1995 by the
17 Natural Resources Agency and the California Environmental Protection Agency.

18 (c) In 2011, the department and other state and federal agencies, including the
19 United States Fish and Wildlife Service, the National Marine Fisheries Service,
20 the United States Army Corps of Engineers, and the United States Environmental
21 Protection Agency, renewed a memorandum of understanding for the purpose of
22 jointly establishing a framework for developing and using combined or
23 coordinated approaches to mitigation and conservation banking in the state. The
24 memorandum of understanding includes provisions for the development and
25 continuous improvement of standardized banking program documents and
26 guidance. Existing standardized documents identified in the memorandum of
27 understanding include bank enabling instruments, conservation easements, long-
28 term management plans, and bank proposal review checklists, among others.

29 (d) The department has properly excluded from being eligible as mitigation and
30 conservation banks those lands that are not suitable to become banks, for reasons
31 that include that the lands do not support significant biological resources or are not
32 biologically viable, are subject to potentially inconsistent uses, encumbrances, or
33 requirements, or would not meet requirements of permits or authorizations that
34 require mitigation.

35 (e) Greater transparency is desired to ensure that mitigation requirements of
36 regulatory programs, permits, and authorizations are fully met when employing
37 conservation and mitigation banks, and that the monitoring of banks to ensure
38 long-term conservation of species and habitats is scientifically valid.

1 (f) The private and public mitigation and conservation banks and the private and
2 public entities to which bank credits are sold should fully fund the administrative
3 and regulatory costs of the department in providing banking program services,
4 administration and oversight.

5 (g) The department has found that the establishment and use of conservation and
6 mitigation banks may result in added ecological benefits and reduced
7 administrative costs over the more traditional forms of smaller, single-purpose
8 mitigation projects.

9 (h) It is the intent of the Legislature that banking and all other forms of
10 mitigation for wildlife species comply with regulatory requirements, are based on
11 the best available scientific information, can be implemented successfully, and
12 have adequate funding to achieve mitigation measures and be monitored for
13 compliance and effectiveness. The Legislature recognizes that mitigation and
14 conservation banking is important to the state because banks provide regulatory
15 efficiencies, environmental benefits, and economic advantages. Properly
16 developed and monitored banks have demonstrated their value and efficacy and
17 are important tools in mitigating impacts to resources and in conserving a wide
18 range of habitat lands.

19 **Comment.** Section 65300 continues former Fish and Game Code Section 1797 without
20 substantive change.

21 Article 2. Definitions

22 § 65305. Application

23 65305. The definitions in this article govern this title.

24 **Comment.** Section 65305 restates the introductory clause of former Fish and Game Code
25 Section 1797.5 without substantive change.

26 § 65310. Bank

27 65310. “Bank” means a conservation bank, mitigation bank, or conservation and
28 mitigation bank.

29 **Comment.** Section 65310 continues former Fish and Game Code Section 1797.5(a) without
30 substantive change.

31 § 65315. Bank enabling instrument

32 65315. “Bank enabling instrument” means a written agreement with the
33 department regarding the establishment, use, operation, and maintenance of the
34 bank.

35 **Comment.** Section 65315 continues former Fish and Game Code Section 1797.5(b) without
36 substantive change.

1 **§ 65320. Bank sponsor**

2 65320. “Bank sponsor” means the person or entity responsible for establishing
3 and operating a bank.

4 **Comment.** Section 65320 continues former Fish and Game Code Section 1797.5(c) without
5 substantive change.

6 **§ 65325. Conservation bank**

7 65325. “Conservation bank” means a publicly or privately owned and operated
8 site that is to be conserved and managed in accordance with a written agreement
9 with the department that includes provisions for the issuance of credits, on which
10 important habitat, including habitat for threatened, endangered, or other special
11 status species, exists, has been, or will be created to do any of the following:

12 (a) Compensate for take or other adverse impacts of activities authorized
13 pursuant to Part 1 (commencing with Section 62000).

14 (b) Reduce adverse impacts to fish or wildlife resources from activities,
15 authorized pursuant to Title 3 (commencing with Section 69700) of Part 4, to less
16 than substantial.

17 (3) Mitigate significant effects on the environment pursuant to the California
18 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
19 Public Resources Code) and Guidelines for Implementation of the California
20 Environmental Quality Act (Chapter 3 (commencing with Section 15000) of
21 Division 6 of Title 14 of the California Code of Regulations).

22 (d) Establish mitigation in advance of any impacts or effects.

23 (e) To the extent feasible and practicable, protect habitat connectivity for fish
24 and wildlife resources for purposes of this article.

25 **Comment.** Section 65325 continues former Fish and Game Code Section 1797.5(d) without
26 substantive change.

27 **§ 65330. Conservation easement**

28 65330. “Conservation easement” means a perpetual conservation easement, as
29 defined by Section 815.1 of the Civil Code, covering the real property that
30 comprises the bank site.

31 **Comment.** Section 65330 continues former Fish and Game Code Section 1797.5(e) without
32 substantive change.

33 **§ 65335. Mitigation bank**

34 65335. “Mitigation bank” means either of the following:

35 (a) A bank site or mitigation bank site as defined by Section 65855.

36 (b) Any publicly or privately owned and operated site, other than those defined
37 by Section 65855, on which wetlands exist, have been, or will be created, and that
38 is to be conserved and managed in accordance with a written agreement with the
39 department for any of the purposes described in subdivisions (a) to (d), inclusive,
40 of Section 65325.

1 **Comment.** Section 65335 continues former Fish and Game Code Section 1797.5(f) without
2 substantive change.

3 **§ 65340. Person**

4 65340. “Person” has the meaning set forth in subdivision (i) of Section 9100.

5 **Comment.** Section 65340 continues former Fish and Game Code Section 1797.5(g) without
6 substantive change.

7 **§ 65345. Prospectus**

8 65345. “Prospectus” means a written summary of the proposed bank containing
9 a sufficient level of detail to support informed department review and comment.

10 **Comment.** Section 65345 continues former Fish and Game Code Section 1797.5(h) without
11 substantive change.

12 Article 3. Scope

13 **§ 65400. Submissions prior to January 1, 2013**

14 65400. A bank prospectus, agreement, or amendment package submitted to the
15 department, but not approved as of January 1, 2013, shall be reviewed for
16 completeness or acceptability in accordance with the timelines provided by this
17 title and only after the department has collected all appropriate fees pursuant to
18 this title.

19 **Comment.** Section 65400 continues former Fish and Game Code Section 1798.7 without
20 substantive change.

21 CHAPTER 2. APPLICATION PROCEDURE

22 Article 1. Prospectus

23 **§ 65450. Optional draft prospectus**

24 65450. (a) Any person interested in establishing any bank with the department
25 may elect to submit an optional draft prospectus for review by the department.

26 (b) Any draft prospectus shall be accompanied by a draft prospectus review fee
27 of one thousand five hundred dollars (\$1,500) to fund the reasonable cost of the
28 department’s review services.

29 (c) The draft prospectus review, while optional, is intended to identify potential
30 issues early so that the potential bank sponsor may attempt to address those issues
31 prior to initiating the formal review process.

32 (d) The draft prospectus is a brief proposal submitted when scoping the concept
33 of a bank, contemplating pursuing a bank idea, or for those new to the banking
34 process.

35 (e) No later than 30 calendar days after the department receives a draft
36 prospectus and review fee, the department shall make an initial evaluation of the

1 proposed concept and notify the person who submitted the draft prospectus of
2 potential issues identified by the department.

3 **Comment.** Section 65450 continues former Fish and Game Code Section 1798(a) without
4 substantive change.

5 **§ 65455. Submission**

6 65455. (a) Any person seeking to establish a bank with the department shall
7 submit a bank prospectus to the department together with a prospectus review fee
8 of ten thousand dollars (\$10,000) to fund the reasonable cost of the department's
9 review services.

10 (b) If a draft prospectus and the review fee have been submitted pursuant to
11 Section 65450, then the review fee for the bank prospectus shall be eight thousand
12 five hundred dollars (\$8,500) so as not to exceed a total fee of ten thousand dollars
13 (\$10,000).

14 (c) The bank prospectus shall contain at least all of the following information:

15 (1) The proposed bank name.

16 (2) Contact information, including, but not limited to, the bank sponsor, property
17 owner, and any consultants.

18 (3) A general location map, address, and the size of the proposed bank in acres.

19 (4) A 7.5-minute United States Geological Survey map showing proposed
20 boundaries of the bank.

21 (5) Color aerial photographs that reflect current conditions on the site of the
22 proposed bank and surrounding properties.

23 (6) Description of how the bank will be established and operated, including, but
24 not limited to, proposed ownership arrangements, long-term management strategy,
25 and any phases.

26 (7) Qualifications of bank sponsor.

27 (8) Preliminary natural resources surveys that document biotic and abiotic
28 baseline conditions, including past, current, and adjacent land uses, vegetation
29 types, species information, topography, hydrology, and soil types.

30 (9) Map of proposed bank service areas.

31 (10) Map depicting other conserved lands in the vicinity of the proposed bank.

32 (11) Description of bank objectives that includes how the proposed bank would
33 contribute to connectivity and ecosystem function.

34 (12) A current preliminary report covering the site of the proposed bank that
35 identifies the owner of the fee simple title and shows all liens, easements, and
36 other encumbrances and depicts all relevant property lines, easements, dedications,
37 and other features.

38 (13) A declaration of whether or not the proposed bank site has been or is being
39 used as mitigation, is designated or dedicated for park or open space use, or
40 designated for purposes that may be inconsistent with habitat preservation.

41 (14) Details of any public funding received for acquisition or restoration of, or
42 other purposes related to, the proposed bank site.

Comment. Section 65455 continues former Fish and Game Code Section 1798(b) without substantive change.

§ 65460. Review

65460. (a) No later than 30 calendar days after the department receives a bank prospectus and the prospectus review fee, the department shall determine whether or not the prospectus is complete and provide written notice of its determination to the person who submitted the prospectus.

(b) If a prospectus is not complete, it may be made complete and resubmitted.

(c) If the department determines that the prospectus is complete, then within 90 calendar days of that determination, the department shall determine whether or not the prospectus is acceptable and notify the person who submitted the prospectus of the determination.

(d) The department may request clarifying information during the prospectus review process.

Comment. Section 65460 continues former Fish and Game Code Section 1798(c)-(d) without substantive change.

§ 65465. Decision

65465. (a) If the department determines that a bank prospectus is acceptable then a bank agreement package may be submitted in accordance with Article 2 (commencing with Section 65500).

(b) If the department determines that a bank prospectus is not acceptable the department shall state the reasons for the determination. The prospectus may be resubmitted in accordance with Section 65450 if further consideration is desired. Any resubmittal must be accompanied by payment of a new prospectus review fee.

Comment. Section 65465 continues former Fish and Game Code Section 1798(e) without substantive change.

Note. Existing Section 1798(e)(2) (proposed Section 65465(b)) provides that, on disapproval of a bank prospectus, the applicant can resubmit for further consideration “in accordance with subdivision (a).” That reference seems odd. Section 1798(a) establishes an *optional* procedure for submission of a *draft* prospectus, for advisory review. By contrast, Section 1798(b) provides the procedure for submission of a *final* bank prospectus, for determinative review. It is not clear why Section 1798(e)(2) would require submission of a draft prospectus, rather than a revised version of a final prospectus. **The Commission invites comment on whether the reference to Section 1798(a) is erroneous.**

§ 65470. Guidelines

65470. The department may adopt and amend guidelines and criteria for the purposes of this article pursuant to Section 65680.

Comment. Section 65470 continues former Fish and Game Code Section 1798(f) without substantive change.

Article 2. Bank Agreement Package

§ 65500. Submission

65500. (a) If the department determines that a bank prospectus is acceptable pursuant to Article 1 (commencing with Section 65450), the person seeking to establish the bank may submit a bank agreement package to the department.

(b) Pursuant to Section 65685, the department may adopt and amend guidelines and criteria for the bank agreement package, including, but not limited to, recommended standard forms for bank enabling instruments or long-term management plan and conservation easements.

Comment. Section 65500 continues former Fish and Game Code Section 1798.5(a)(1) without substantive change.

Note. Existing Section 1798.5(a)(1) (proposed Section 65500(b)) provides that the department may adopt guidelines and criteria for a bank package agreement “pursuant to subdivision (b) of Section 1799.1.” That reference appears to be incorrect. Section 1799.1(b) has no obvious connection to the purpose of the cross-reference. It specifies a rule for the deposit of certain fees. However, Section 1799.1(c) does address the adoption of guidelines and criteria. In proposed Section 65500(b), the cross-reference has been changed to refer to the provision that continues Section 1799.1(c) (proposed Section 65685). **The Commission invites comment on whether that change would cause any problems.**

§ 65505. Content

65505. The bank agreement package shall be consistent with the prospectus and contain at least all of the following information:

(a) The draft bank enabling instrument and all exhibits.

(b) Drafts of the interim management plan, long-term management plan, bank closure plan, and, if applicable, a development or construction plan for the bank.

(c) A draft conservation easement, or if potential state ownership is contemplated by the department, a draft grant deed.

(d) A map and written description of the proposed bank service area.

(e) A proposed credit ledger and credit release schedule for the bank.

(f) A property analysis record or other comparable economic analysis of the funding necessary to support bank maintenance activities, such as monitoring and reporting, in perpetuity.

(g) Estimates of financial assurances and proposed forms of security. Proposed forms of security may be either cash or a letter of credit.

(h) A phase I environmental site assessment of the site of the proposed bank dated not more than six months prior to the date the bank agreement package is submitted to the department. This assessment shall be performed in accordance with the American Society of Testing and Materials Standard E1527-05 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” or any successive ASTM standard active at the time of the assessment.

1 **Comment.** Section 65505 continues former Fish and Game Code Section 1798.5(a)(2) without
2 substantive change.

3 **§ 65510. Fee**

4 65510. The department shall collect a fee of twenty-five thousand dollars
5 (\$25,000) per bank agreement package to fund the cost of the department's review
6 services. The fee shall be collected at the time the bank agreement package is
7 submitted to the department.

8 **Comment.** Section 65510 continues former Fish and Game Code Section 1798.5(b) without
9 substantive change.

10 **§ 65515. Review**

11 65515. (a) Within 30 calendar days following the department's receipt of a bank
12 agreement package and fee pursuant to Section 65500, the department shall
13 determine whether or not the package is complete and give written notice of the
14 determination to the person who submitted the package.

15 (b) If the department determines that the bank agreement package is not
16 complete, it may be made complete and resubmitted.

17 (c) If the department determines that the bank agreement package is complete,
18 within 90 calendar days of that determination, the department shall determine
19 whether or not it is acceptable and notify the person who submitted the package of
20 the determination. If the department determines that the bank agreement package
21 is not acceptable, the department shall state the reasons.

22 (d) The department may request clarifying information during the bank
23 agreement review process.

24 **Comment.** Section 65515 continues former Fish and Game Code Section 1798.5(c)-(d)
25 without substantive change.

26 **§ 65520. Request for supplemental information**

27 65520. (a) If the department needs supplemental information during its review
28 of the bank agreement package in order to fully evaluate the proposed bank, the
29 regional manager or departmental equivalent, or a higher level department
30 employee, shall provide the person seeking to establish the bank a written request
31 for the needed information.

32 (b) Upon the department's receipt of the requested information, a new 90-day
33 period shall begin during which the department shall determine acceptability
34 pursuant to subdivision (c) of Section 65515.

35 (c) If the department does not receive the requested information within 60
36 calendar days of the department's request, the bank agreement package will be
37 deemed unacceptable.

38 **Comment.** Section 65520 continues former Fish and Game Code Section 1798.5(e) without
39 substantive change.

1 **§ 65525. Changes proposed by applicant during review**

2 65525. (a) If the person seeking to establish the bank proposes changes to the
3 bank agreement package that have not been solicited by the department during its
4 90-day review period, including, but not limited to, parties, number or type of
5 credits, bank size, number or type of species, credit release schedule, service area,
6 design change, or other changes as identified by the department as necessitating
7 additional review time, the department, acting through the regional manager or
8 department equivalent, or a higher level department employee, shall assess a one-
9 time fee of ten thousand dollars (\$10,000) to cover the reasonable cost of the
10 department's services in reviewing the changes.

11 (b) A new 90-day review period shall begin upon the department's receipt of the
12 proposed changes and the associated review fee, during which it will determine
13 acceptability pursuant to subdivision (c) of Section 65515.

14 **Comment.** Section 65525 continues former Fish and Game Code Section 1798.5(f) without
15 substantive change.

16 **§ 65530. Extension of time for review**

17 65530. If the department determines that 90 days is insufficient time to complete
18 its review of the bank agreement package for reasons including, but not limited to,
19 the size, location, or complexity of the bank, that the package includes a
20 development or construction plan, complexity of the bank agreement package, or
21 substantial variations from recommended standard forms, the department may
22 extend the 90-day period for reviewing the bank agreement package by an
23 additional 60 calendar days.

24 **Comment.** Section 65530 continues former Fish and Game Code Section 1798.5(g) without
25 substantive change.

26 **§ 65535. Resubmission after negative determination**

27 65535. (a) If the department determines that a bank agreement package is not
28 acceptable, the package may be resubmitted in accordance with Section 65500 if
29 further consideration is desired.

30 (b) Any resubmittal shall be accompanied by payment of a new bank agreement
31 package review fee.

32 **Comment.** Section 65535 continues former Fish and Game Code Section 1798.5(h) without
33 substantive change.

34 Article 3. Bank Amendment

35 **§ 65550. Submission**

36 65550. (a) Any person seeking to amend any bank shall submit to the
37 department a complete bank amendment package containing each of the original
38 bank agreement package documents, including any prior amendments, as well as

1 any documents proposed to be amended or that would be affected by the proposed
2 amendment.

3 (b) The department may adopt and amend guidelines and criteria for the bank
4 amendment package pursuant to Section 65685.

5 **Comment.** Section 65550 continues former Fish and Game Code Section 1798.6(a) without
6 substantive change.

7 **Note.** Existing Section 1798.6(a) (proposed Section 65550(b)) provides that the department
8 may adopt guidelines and criteria for a bank amendment package “pursuant to subdivision (b) of
9 Section 1799.1.” That reference appears to be incorrect. Section 1799.1(b) has no obvious
10 connection to the purpose of the cross-reference. It specifies a rule for the deposit of certain fees.
11 However, Section 1799.1(c) does address the adoption of guidelines and criteria. In proposed
12 Section 65550(b), the cross-reference has been changed to refer to the provision that continues
13 Section 1799.1(c) (proposed Section 65685). **The Commission invites comment on whether**
14 **that change would cause any problems.**

15 **§ 65555. Review**

16 65555. (a) Within 30 calendar days following its receipt of a draft bank
17 amendment package and any fee required by Sections 65560 and 65565, the
18 department shall determine whether or not the package is complete and give
19 written notice of that determination to the person who submitted the package.

20 (b) If the department determines that the bank amendment package is complete,
21 then within 90 calendar days of that determination, the department shall determine
22 whether or not the package is acceptable and notify the person who submitted the
23 package of that determination.

24 (c) If the bank amendment package is determined not to be acceptable, the
25 determination shall state the reasons.

26 (d) The department may request clarifying information during the bank
27 amendment review process.

28 **Comment.** Section 65555 continues the first four sentences of former Fish and Game Code
29 Section 1798.6(b) without substantive change.

30 **§ 65560. Fee amount**

31 65560. (a) The department shall collect a fee of either seven thousand five
32 hundred dollars (\$7,500) or twenty-five thousand dollars (\$25,000) per bank
33 amendment package to fund the reasonable cost of the department’s review
34 services.

35 (b) The fee of seven thousand five hundred dollars (\$7,500) is intended to cover
36 the reasonable cost of the department’s services in reviewing simple amendments,
37 such as a change in bank name, ownership change, address change, or proposed
38 decrease in the number of credits proposed.

39 (c) The fee of twenty-five thousand dollars (\$25,000) is intended to cover the
40 reasonable cost of the department’s services in reviewing all other amendments,
41 including, but not limited to, requests for increase change in service area, or
42 increase in the number of credits.

1 (d) A regional manager or department equivalent, or a higher level department
2 representative employee, shall determine which of the two fees is appropriate and
3 shall provide notification of that determination to the person who submitted the
4 request for bank amendment package pursuant to subdivisions (b) through (d),
5 inclusive, of Section 65565.

6 **Comment.** Section 65560 continues former Fish and Game Code Section 1798.6(c)(1) without
7 substantive change.

8 **§ 65565. Payment of fee**

9 65565. (a) An initial fee of seven thousand five hundred dollars (\$7,500) shall
10 be submitted to the department with the bank amendment package.

11 (b) Within 30 calendar days following the department's receipt of a bank
12 amendment package and the initial fee, pursuant to subdivision (a), the department
13 shall determine whether or not the package is complete and give written notice of
14 the determination to the person who submitted it and, if applicable, notice pursuant
15 to Section 65560 that the person shall remit an additional fee of seventeen
16 thousand five hundred dollars (\$17,500).

17 (c) If noticed by the department, the additional fee of seventeen thousand five
18 hundred dollars (\$17,500) shall be submitted to the department within 30 days of
19 the notice.

20 (d) If the additional fee is not received by this date, the review timelines in this
21 article shall be suspended until the fee is received by the department.

22 **Comment.** Section 65565 continues former Fish and Game Code Section 1798.6(c)(2)-(3)
23 without substantive change.

24 **§ 65570. Decision**

25 65570. (a) If the department determines that the bank amendment package is not
26 complete, the package may be made complete and resubmitted.

27 (b) If the department determines that the bank amendment package is complete,
28 then within 90 calendar days of that determination and the receipt of the additional
29 fee pursuant to subdivisions (b) through (d), inclusive, of Section 65565, if
30 applicable, the department shall determine whether or not the bank amendment
31 package is acceptable and notify the person who submitted the package of the
32 determination.

33 (c) If the department determines that the bank amendment package is not
34 acceptable the determination shall state the reasons.

35 (d) The department may request clarifying information during the bank
36 amendment review process.

37 **Comment.** Section 65570 continues former Fish and Game Code Section 1798.6(c)(4) & (d)
38 without substantive change.

1 **§ 65575. Request for supplemental information**

2 65575. (a) If the department needs supplemental information during its review
3 of the bank amendment package in order to fully evaluate the proposed
4 amendment, the regional manager or department equivalent, or a higher level
5 department employee, shall provide the person seeking to amend the bank, in
6 writing, a written request for the needed information.

7 (b) Upon the department's receipt of the requested information, a new 90-day
8 period shall begin during which the department will determine acceptability
9 pursuant to subdivisions (a) and (b) of Section 65570.

10 (c) If the department does not receive the requested information within 60
11 calendar days of the department's request, the bank amendment package shall be
12 deemed unacceptable.

13 **Comment.** Section 65575 continues former Fish and Game Code Section 1798.6(e) without
14 substantive change.

15 **§ 65580. Changes proposed by applicant during review**

16 65580. (a) If the person seeking to amend the bank proposes changes to the bank
17 amendment package that have not been solicited by the department during its the
18 department's 90-day review period, including, but not limited to, parties, number
19 or type of credits, bank size, number or type of species, credit release schedule,
20 service area, design change, or other changes as identified by the department to
21 require additional review time, the department, acting through the regional
22 manager or department equivalent, or a higher level department employee, shall
23 assess a one-time fee of ten thousand dollars (\$10,000) to cover the reasonable
24 cost of the department's services in reviewing the changes.

25 (b) A new 90-day review period shall begin upon receipt of the proposed
26 changes and the fee, during which the department shall determine acceptability
27 pursuant to subdivisions (a) and (b) of Section 65570.

28 **Comment.** Section 65580 continues former Fish and Game Code Section 1798.6(f) without
29 substantive change.

30 **§ 65585. Extension of time**

31 65585. The department may extend the 90-day period for reviewing the bank
32 amendment package by an additional 60 days if the department determines that 90
33 days is insufficient time to complete its review of a bank amendment package for
34 reasons that may include, but are not limited to, the size, location, or complexity of
35 the bank or bank amendment documents, that the package includes a development
36 plan, or that there are substantial variations from recommended standard forms.

37 **Comment.** Section 65585 continues the fifth sentence of former Fish and Game Code Section
38 1798.6(b) without substantive change.

39 **Note:** Existing Section 1798.6(b) (proposed Section 65585) seems to substantially duplicate
40 Section 1798.6(g) (proposed Section 65590). **The Commission invites comment on whether**
41 **one of those provisions can be deleted as redundant.**

1 **§ 65590. Extension of time**

2 65590. If the department determines that 90 days is insufficient time to complete
3 its review of the bank amendment package for reasons, including, but not limited
4 to, the size, location, or complexity of the bank or bank amendment package, that
5 the package includes a development or construction plan, or substantial variations
6 from recommended standard forms, the department may extend the 90-day period
7 for reviewing the bank amendment package by an additional 60 calendar days.

8 **Comment.** Section 65590 continues former Fish and Game Code Section 1798.6(g) without
9 substantive change.

10 **§ 65600. Resubmission after negative determination**

11 65600. (a) If the department determines that a bank amendment package is not
12 acceptable, then the package may be resubmitted in accordance with Section
13 65550 if further consideration is desired.

14 (b) Any resubmittal shall be accompanied by payment of all applicable bank
15 amendment package review fees.

16 **Comment.** Section 65600 continues former Fish and Game Code Section 1798.6(h) without
17 substantive change.

18 **CHAPTER 3. IMPLEMENTATION**

19 **§ 65650. General approval requirement**

20 65650. Until the department has approved a bank, in writing, and, if applicable,
21 a conservation easement has been recorded on the site, no bank shall be operative,
22 vested, or final, nor bank credits issued. No amendment to an approved bank shall
23 be effective without the written approval of the department.

24 **Comment.** Section 65650 continues former Fish and Game Code Section 1799(a) without
25 substantive change.

26 **§ 65655. Compliance review**

27 65655. Following approval of a final bank agreement package and
28 establishment of a bank, the department shall conduct compliance review activities
29 as provided in the approved bank enabling instrument.

30 **Comment.** Section 65655 continues former Fish and Game Code Section 1799(b) without
31 substantive change.

32 **§ 65660. Database**

33 65660. (a) The department shall establish and maintain a database that allows
34 bank sponsors to accurately update and add information about mitigation and
35 conservation banks.

36 (b) This data shall be available on the department's Internet Web site or
37 accessible by a link from the department's Internet Web site.

38 (c) The available information shall include, but is not limited to, the total
39 number of each type of bank credit, the types of credits sold or obligated, the

1 number of credits sold or obligated, the number of credits applied, the balance of
2 each type of credit remaining, the status of the species and habitat at the bank,
3 links to the bank's long-term management plans, and links to the complete annual
4 monitoring reports required by departmental policy.

5 (d) Information contained in the database created pursuant to former Title 2
6 (commencing with Section 64700) on January 1, 2011, shall be incorporated into
7 the database established pursuant to subdivision (a).

8 **Comment.** Section 65660 continues former Fish and Game Code Section 1799(c) without
9 substantive change.

10 **§ 65665. Annual report**

11 65665. (a) By January 1, 2014, and annually thereafter, the department shall
12 provide a report to the Legislature.

13 (b) The report shall include the following information based on data from the
14 previous calendar year:

15 (1) Number of new bank applications, prospectuses, bank agreement packages,
16 and amendments received.

17 (2) Number of bank applications approved, rejected because not complete,
18 rejected because not acceptable, and withdrawn.

19 (3) Name of new or existing bank, geographic location, number of acres,
20 number of credits approved for each habitat type or species, and number of credits
21 sold.

22 (4) An accounting of fees collected pursuant to this title.

23 (5) A statement of whether or not the timelines for bank review in this title were
24 met.

25 (6) Other information determined by the department to be relevant in assessing
26 the effectiveness of the department's mitigation and conservation banking
27 program.

28 **Comment.** Section 65665 continues former Fish and Game Code Section 1799(d) without
29 substantive change.

30 **§ 65670. Implementation and compliance fees**

31 65670. (a) The department shall collect fees to pay for all or a portion of the
32 department's bank implementation and compliance costs.

33 (b) The department shall collect a total payment of sixty thousand (\$60,000) per
34 bank, apportioned by an amount that equals the ratio of the number of credits
35 released to the total number of credits in the bank, and shall be identified in the
36 bank enabling instrument.

37 (c) Payments shall be due following each credit release no later than the due date
38 for the submission of the bank's annual report. The payments shall be submitted
39 following each credit release and no later than the time of the submission of the
40 bank's annual report.

1 (d) The department may require the bank to cease selling credits and may stop
2 credit releases until these fees are paid in full.

3 (e) The department shall assess a penalty of 10 percent of the amount of fees due
4 if there is a failure to remit the amount payable when due.

5 **Comment.** Section 65670 continues former Fish and Game Code Section 1799(e) without
6 substantive change.

7 **§ 65675. Fee adjustment**

8 65675. The department shall annually adjust the fees in this title pursuant to
9 Section 3755.

10 **Comment.** Section 65675 continues former Fish and Game Code Section 1799.1(a) without
11 substantive change.

12 **§ 65680. Deposit of fees**

13 65680. Moneys received pursuant to this title shall be deposited in a separate
14 dedicated account within the Fish and Game Preservation Fund and expended for
15 the purposes of this title.

16 **Comment.** Section 65680 continues former Fish and Game Code Section 1799.1(b) without
17 substantive change.

18 **§ 65685. Guidelines**

19 65685. (a) The department shall adopt and amend guidelines and criteria to
20 implement this title.

21 (b) The department shall develop these guidelines and criteria in coordination
22 with interested parties, including, but not limited to, bank sponsors, conservation
23 organizations, and federal and state bank approving agencies. The guidelines shall
24 incorporate all relevant documents and program guidance, including, but not
25 limited to, the 2011 Memorandum of Understanding approved by the United
26 States Fish and Wildlife Service, the United States Army Corps of Engineers, and
27 the United States Environmental Protection Agency, for the purpose of jointly
28 establishing a framework for developing and using combined or coordinated
29 approaches to mitigation and conservation banking in California. Chapter 3.5
30 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the
31 Government Code shall not apply to the development, adoption, or amendment, of
32 guidelines or criteria pursuant to this section. The guidelines and criteria shall be
33 posted on the department's Internet Web site.

34 **Comment.** Section 65685 continues former Fish and Game Code Section 1799.1(c) without
35 substantive change.

36 **§ 65690. Reimbursement of costs**

37 65690. The costs of a conservation and mitigation banking program, including,
38 but not limited to, costs incurred by the department during its guideline adoption
39 and review, approval, establishment, monitoring, and oversight of banks, shall be

reimbursed from revenues of conservation and mitigation bank application fees imposed pursuant to this title.

Comment. Section 65690 continues former Fish and Game Code Section 1799.1(d) without substantive change.

Note. Existing Section 1799.1(d) refers to fees imposed pursuant to Sections 1798.5, 1798.6, and 1799. Proposed Section 65690 simplifies this reference, referring instead to fees imposed pursuant to “this title.” **The Commission does not believe that this would result in any substantive change, but invites comment on that point.**

TITLE 5. SACRAMENTO-SAN JOAQUIN VALLEY WETLANDS MITIGATION BANK ACT OF 1993

CHAPTER 1. GENERAL PROVISIONS

Article 1. Short Title

§ 65800. Short title

65800. This title shall be known and may be cited as the Sacramento-San Joaquin Valley Wetlands Mitigation Bank Act of 1993.

Comment. Section 65800 continues former Fish and Game Code Section 1775 without substantive change.

Article 2. Findings, Declarations, and Intent

§ 65805. Findings and declarations

65805. The Legislature finds and declares the following:

(a) Wetlands are an important natural resource of the Sacramento-San Joaquin Valley because they provide significant habitat for migratory waterfowl of the Pacific flyway, for endangered species, and for many other resident wildlife and fish populations. Wetlands provide additional public benefits, including water quality improvement, flood protection, stream bank stabilization, recreation, and scientific research.

(b) Active and voluntary involvement by private landowners is necessary for the long-term availability and productivity of wetlands in the Sacramento-San Joaquin Valley.

(c) Large wetland preserves in the Sacramento-San Joaquin Valley, under certain circumstances, can provide an environmentally preferable alternative to a number of small, isolated wetland preserves of the same type surrounded by urban development.

(d) It is the policy of the state with respect to the Sacramento-San Joaquin Valley:

1 (1) To provide for the protection, preservation, restoration, enhancement, and
2 expansion of the wetland habitat in the Sacramento-San Joaquin Valley.

3 (2) To promote the protection, preservation, restoration, enhancement, and
4 expansion of the Sacramento-San Joaquin Valley wetlands in concert with other
5 federal, state, and local programs, and interested parties.

6 (3) To improve cooperative efforts among private, nonprofit, and public entities
7 for the management and protection of wetlands.

8 (4) To assure that no net loss of either wetland acreage or habitat values results
9 from activities pursuant to this title in the Sacramento-San Joaquin Valley that
10 otherwise comply with state and federal law.

11 (5) To encourage and maintain a predictable, efficient, and timely regulatory
12 framework for environmentally acceptable development.

13 (6) To assure that the construction or maintenance of wetland mitigation banks
14 in the Sacramento-San Joaquin Valley does not reduce any local tax base, does not
15 create any uncompensated increased requirement for local services, and does not
16 create conditions that have the potential to adversely affect the public health.

17 (7) To provide an alternative for accomplishing offsite mitigation in the
18 Sacramento-San Joaquin Valley when offsite mitigation is required under a fill
19 permit issued pursuant to Section 404 of the federal Clean Water Act (33 U.S.C.
20 Sec. 1344 et seq.).

21 (e) This title constitutes a nonexclusive alternative to other lawful methods of
22 mitigating project impacts upon wetlands and maintaining and increasing wetlands
23 acreage and habitat values generally. Specifically, this title is not intended to, and
24 shall not be interpreted to:

25 (1) Condone or encourage the removal, loss, or degradation of wetlands.

26 (2) Condone or encourage the removal, loss, or degradation of habitat for any
27 rare, threatened, or endangered species.

28 (3) Abrogate any other local, state, or federal law or policy relating to wetlands,
29 nor prohibit any city or county from prohibiting the removal, filling, or other
30 destruction of particular wetlands.

31 (4) Establish maximum or minimum standards or any other requirements for
32 wetland fill or mitigation, except for mitigation banks established pursuant to this
33 title.

34 (5) Have legal or necessary precedential application to any other area of the
35 state, or to other lands, resources, situations, or circumstances.

36 (6) Preclude other forms of mitigation banking, including private or for-profit
37 programs, within the Sacramento-San Joaquin Valley.

38 (7) Be the exclusive method of providing compensation by permittees for the
39 loss of wetlands within the Sacramento-San Joaquin Valley.

40 **Comment.** Section 65805 continues former Fish and Game Code Section 1776 without
41 substantive change.

1 **§ 65810. Legislative intent**

2 65810. It is the intent of the Legislature that the funds necessary to cover the
3 costs of administering this title be provided by the purchase of credits in
4 mitigation bank sites.

5 **Comment.** Section 65810 continues former Fish and Game Code Section 1776.5 without
6 substantive change.

7 **§ 65815. Purpose**

8 65815. The purpose of this title is to ensure that no net loss of wetland acreage
9 or habitat values within the Sacramento-San Joaquin Valley occurs as a result of
10 fill permit activities pursuant to Section 404 of the federal Clean Water Act (33
11 U.S.C. Sec. 1344 et seq.).

12 **Comment.** Section 65815 continues former Fish and Game Code Section 1780 without
13 substantive change.

14 **§ 65820. Goal**

15 65820. It is the state’s goal to increase the total wetlands acreage and values
16 within the Sacramento-San Joaquin Valley.

17 **Comment.** Section 65820 continues former Fish and Game Code Section 1781 without
18 substantive change.

19 Article 3. Definitions

20 **§ 65850. Application**

21 65850. Unless the context otherwise requires, the definitions in this article
22 govern the construction of this title.

23 **Comment.** Section 65850 continues former Fish and Game Code Section 1777 without
24 substantive change.

25 **§ 65855. Bank site or mitigation bank site**

26 65855. “Bank site” or “mitigation bank site” means a publicly or privately
27 owned and operated site on which wetlands have been or will be created in
28 accordance with this title to compensate for adverse impacts caused by removal or
29 fill permit activities authorized pursuant to Section 404 of the federal Clean Water
30 Act (33 U.S.C. Sec. 1344 et seq.). “Bank site” or “mitigation bank site” may
31 include land on which rice is grown as long as those lands are managed as
32 ricelands and those lands meet the other requirements of Sections 65950 and
33 65955.

34 **Comment.** Section 65855 continues former Fish and Game Code Section 1777.2 without
35 substantive change.

36 **§ 65860. Credit**

37 65860. “Credit” means a numerical value that represents the wetland acreage
38 and habitat values of a mitigation bank site.

1 **Comment.** Section 65860 continues former Fish and Game Code Section 1777.5 without
2 substantive change.

3 **§ 65865. Operator**

4 65865. “Operator” means the department, or a public or private person or entity
5 approved by the department, to administer a wetlands mitigation bank site.

6 **Comment.** Section 65865 continues former Fish and Game Code Section 1778 without
7 substantive change.

8 **§ 65870. Permittee**

9 65870. “Permittee” means a public or private person or entity that meets all of
10 the following conditions:

11 (a) Has received a permit pursuant to Section 404 of the federal Clean Water Act
12 (33 U.S.C. Sec. 1344 et seq.) for the removal or filling of wetlands, subject to a
13 condition that allows the permittee to compensate for the wetland loss through
14 participation in a wetland mitigation bank pursuant to this title.

15 (b) Proposes to compensate for the loss of the wetlands through participation in
16 a wetlands mitigation bank pursuant to this title.

17 (c) Proposes the discharge at a site within a qualifying urban area and not more
18 than 40 miles from a bank site with sufficient acreage of the same types of
19 wetlands that will provide suitable replacement habitat for the values that may be
20 lost from the conversion of the existing wetlands.

21 **Comment.** Section 65870 continues former Fish and Game Code Section 1778.5 without
22 substantive change.

23 **§ 65875. Qualifying urban area**

24 65875. “Qualifying urban area” means any of the following when they occur
25 within the Sacramento-San Joaquin Valley:

26 (a) A geographical area having a population of 50,000 or more inhabitants
27 within the jurisdiction of a city, or a town, as defined by Sections 20 and 21 of the
28 Government Code.

29 (b) A portion of any geographical area within a town, as defined in Section 21 of
30 the Government Code, which has a population density equal to, or exceeding,
31 1,500 persons per square mile and which has a population of 50,000 or more
32 inhabitants.

33 (c) A geographical area having a population density equal to, or exceeding,
34 1,500 persons per square mile, and an adjacent city, as defined in Section 20 of the
35 Government Code, where the combined population of the geographical area and
36 the city equals 50,000 or more inhabitants.

37 (d) A geographical area within the sphere of influence of a city or community
38 services district for which the projected population of the adopted general plan
39 equals 10,000 or more inhabitants.

40 **Comment.** Section 65875 continues former Fish and Game Code Section 1779 without
41 substantive change.

1 **§ 65880. Sacramento-San Joaquin Valley**

2 65880. “Sacramento-San Joaquin Valley” means the central valley region, as
3 defined in subdivision (g) of Section 13200 of the Water Code.

4 **Comment.** Section 65880 continues former Fish and Game Code Section 1779.5 without
5 substantive change.

6 **CHAPTER 2. WETLANDS MITIGATION BANKS**

7 **§ 65950. Standards and criteria**

8 65950. (a) The department, in cooperation with those agencies specified in
9 65970, shall adopt regulations that establish standards and criteria for the bank site
10 qualification process, for the evaluation of wetland habitat acreage and values
11 created at the bank sites, and for the operation and evaluation of bank sites, and
12 any other regulations that are necessary to implement this title.

13 (b) These criteria shall require, at a minimum, that the newly created wetland
14 provide the hydrologic, vegetative, and wildlife characteristics, including the food
15 web components, of a naturally occurring wetland system that is equal to the site
16 being mitigated.

17 (c) With respect to bank site standards and operator qualifications, the
18 department shall consider, at a minimum, all of the following criteria:

19 (1) A requirement that the bank site have a reliable, adequate, and available
20 water supply necessary to provide wetland values. For wetlands dependent only on
21 rainfall, rainfall satisfies this requirement.

22 (2) The relative ease or difficulty of converting uplands into wetlands at the
23 bank site.

24 (3) The anticipated maintenance necessary to sustain the recreated and created
25 wetlands at the bank site.

26 (4) The proximity of the bank site to other established preserves or natural
27 features historically associated with abundant wildlife values.

28 (5) The proximity of the bank site to urban or populated areas that could reduce
29 the bank site’s long-term biological values.

30 (6) The demonstrated ability of the bank site operator to create, administer,
31 maintain, and protect the bank site in perpetuity in its enhanced state, including
32 financial, technical, and management ability.

33 (7) The relative abundance or scarcity of the wetland type to be created at the
34 bank site.

35 **Comment.** Section 65950 continues former Fish and Game Code Section 1784(a)-(b) without
36 substantive change.

37 **§ 65955. Ricelands**

38 65955. (a) A bank site or mitigation bank site may include any lands on which
39 rice is grown as long as those lands are managed as ricelands with the required

1 enhanced wetland values if they otherwise qualify under this title and either of the
2 following conditions exist:

3 (1) The lands are lands on which rice was grown after January 1, 1996. For
4 purposes of this paragraph, to qualify as new wetland values, rice shall not have
5 been grown on the lands for 10 years before the application is submitted pursuant
6 to Section 65960.

7 (2) The lands are lands on which rice was grown before January 1, 1996. These
8 lands shall qualify only if there is an increase in wetland habitat value that is equal
9 to the site being mitigated. For purposes of this paragraph, a wetland value shall
10 only be provided for lands on which rice was grown that are proposed for wetlands
11 mitigation for the period when that land is flooded between the harvesting of rice
12 and the planting of the next crop. This paragraph shall apply only to lands that
13 were not flooded after harvest between January 1, 1982, and January 1, 1992.

14 (b) Any mitigation site established pursuant to subdivision (a) may be replaced
15 by a new site of an equal wetland value.

16 (c) This section and Section 65950 shall not be construed to permit waters used
17 to flood rice fields in order to create wetlands mitigation to be credited as
18 beneficial to wildlife under federal law.

19 **Comment.** Section 65955 continues former Fish and Game Code Section 1784(c)-(e) without
20 substantive change.

21 **§ 65960. Application**

22 65960. If any person desires to establish a wetlands mitigation bank site under
23 this title, the person shall apply to the department for a determination that the bank
24 site and the operator qualify under the criteria established by the department
25 pursuant to this title.

26 **Comment.** Section 65960 continues the first sentence of former Fish and Game Code Section
27 1785 without substantive change.

28 **§ 65965. Determination is “project”**

29 65965. A determination that a bank site qualifies under this title is a project for
30 purposes of Section 21065 of the Public Resources Code.

31 **Comment.** Section 65965 continues the second sentence of former Fish and Game Code
32 Section 1785 without substantive change.

33 **§ 65970. Memorandum of understanding requirement**

34 65970. (a) Before any wetlands are created on the bank site qualified pursuant to
35 Section 65960, the department shall coordinate and shall be a signatory to a
36 memorandum of understanding with the operator.

37 (b) The United States Environmental Protection Agency, the United States
38 Army Corps of Engineers, the Fish and Wildlife Service of the United States
39 Department of the Interior, the Central Valley Regional Water Quality Control
40 Board, and the State Department of Health Services or its designee, or any of

1 them, may be signatories by indicating to the department their interest in
2 participating within 90 days of being notified by the department of the
3 department's intent to initiate the procedures described in this section and Section
4 69575.

5 (c) Any county located in whole or in part in the Sacramento-San Joaquin
6 Valley may, by ordinance, require that it be a signatory to any memorandum of
7 understanding for a bank site to be established within its boundary.

8 **Comment.** Section 65970 continues former Fish and Game Code Section 1786(a) without
9 substantive change.

10 **§ 65975. Content of memorandum of understanding**

11 65975. The memorandum of understanding shall include, but is not limited to,
12 all of the following items:

13 (a) Identification of the mitigation bank site, including the legal property
14 description, acreage, types, and location of existing wetlands within the
15 boundaries of the bank site.

16 (b) An agreement, by each of the governmental agencies in Section 65970, that
17 all new, successfully created wetland acreage shall qualify to be credited against
18 the approved removal or fill of wetlands located in the qualifying urban area and
19 within 40 miles of the bank site and is consistent with the procedures set out in this
20 title.

21 (c) An agreement by the operator to do both of the following:

22 (1) Maintain all wetland habitat within the bank in optimum condition in
23 perpetuity, barring an unforeseen natural catastrophe that precludes the viability of
24 wetlands.

25 (2) Establish a trust or bond in favor of the department that provides sufficient
26 funds to ensure administration, protection, operation, and maintenance in
27 perpetuity of the wetland habitat acreage and values at the mitigation bank site if
28 the operator defaults in performing the duties required pursuant to paragraph (1).

29 (d) In the case of privately owned bank sites, identification of the circumstances
30 that would constitute a major breach of the agreement and that would result in
31 either the replacement of the operator, or the passing of title from the owner to the
32 state, or both, including identification of procedures for adequate notice and
33 opportunity for the operator to be heard and to correct any breach.

34 **Comment.** Section 65975 continues former Fish and Game Code Section 1786(b) without
35 substantive change.

36 **§ 65980. Payment to county**

37 65980. (a) If the bank site owner is a public entity, that entity shall pay annually
38 to the county in which the property is located an amount equal to the county taxes
39 levied on the property at the time title to the bank site is transferred to that entity.
40 The public entity shall also pay the assessments levied upon the property by any
41 irrigation, drainage, or reclamation district.

(b) Payments under this section shall be made on or before December 10 of each year, except for newly acquired bank sites, for which payments shall be made pursuant to subdivision (c).

(c) Payments for newly acquired bank sites shall be made within one year of the date title to the property was transferred to the state, prorated for the balance of the year from the date title was transferred to the 30th day of June following the date title was transferred, and, thereafter, payments shall be made on or before December 10 of each year.

Comment. Section 65980 continues former Fish and Game Code Section 1787 without substantive change.

CHAPTER 3. WETLANDS

§ 66050. Creation of wetland or vernal pool

66050. (a) Upon the successful creation of any wetlands of at least 20 acres, or in the case of vernal pools, upon successful creation of vernal pools on a site at least 20 acres in size, the operator may request a determination by the department of the number of acres in the mitigation bank site, and the relative habitat value thereof, that qualify for credit against prospective wetland loss in the qualifying urban area.

(b) In determining the amount of mitigation bank credit, no credit shall be provided for habitat values or acreage that was in existence prior to the establishment of the bank.

Comment. Section 66050 continues former Fish and Game Code Section 1790 without substantive change.

§ 66055. Determination and classification of wetlands

66055. (a) Upon receipt of a request pursuant to Section 66050, the department shall determine the number of acres that are wetlands in the bank site based on the criteria established pursuant to Sections 65950 and 69555, and the department shall classify those wetlands according to established biological criteria.

(b) The classifications shall include, but are not limited to, the following wetland types:

- (1) Perennial freshwater marsh.
- (2) Perennial brackish marsh.
- (3) Seasonal freshwater marsh.
- (4) Wet meadow.
- (5) Vernal pool.
- (6) Riparian woodland.
- (7) Riparian scrub.

Comment. Section 66055 continues former Fish and Game Code Section 1791 without substantive change.

1 **§ 66060. Pricing and costs**

2 66060. (a) In the interest of assuring that the minimum price for wetland credit
3 is sufficient to ensure the financial integrity of the bank, the department may
4 establish a minimum price for each bank established pursuant to this title.

5 (b) The operator may set a higher price to the extent that price is consistent with
6 the terms of the memorandum of understanding executed pursuant to Section
7 65960.

8 (c) After the department determines the number of wetland acres in the bank site
9 that qualify for credit against wetland loss in a qualifying urban area, the operator
10 shall provide to the department, and the department shall verify, an accounting of
11 the average cost for each wetland acre created, by wetland type for the purpose of
12 determining credits, using the following factors:

13 (1) Land costs, including the reasonable interest cost of holding the land.

14 (2) Wetland creation costs.

15 (c) Wetland administration, maintenance, and protection costs.

16 (3) Annual taxes, including all tax increases allowed under applicable state law,
17 and in-lieu payments pursuant to Section 65980, if applicable.

18 (4) Costs incurred by the department in establishing the bank site, and the direct
19 cost of necessary ongoing monitoring and oversight.

20 (5) Any other information relevant to a determination of the cost of preserving
21 the wetlands in perpetuity.

22 **Comment.** Section 66060 continues former Fish and Game Code Section 1792 without
23 substantive change.

24 **§ 66065. Reimbursement of department expenses**

25 The department shall be reimbursed for those expenses of the department
26 identified in Section 66060 according to a schedule contained in an agreement
27 with the person establishing a wetland mitigation bank. The agreement shall be
28 approved by all parties prior to the commencement of planning activities.

29 **Comment.** Section 66065 continues former Fish and Game Code Section 1792.5 without
30 substantive change.

31 **CHAPTER 4. DISCHARGE INTO WETLANDS**

32 **§ 66100. Compensation**

33 66100. A permittee shall provide compensation pursuant to Section 404 of the
34 federal Clean Water Act (33 U.S.C. Sec. 1344 et seq.). The department shall
35 classify the wetlands that the permittee will remove according to wetland type,
36 consistent with Chapter 3 (commencing with Section 66050).

37 **Comment.** Section 66100 continues former Fish and Game Code Section 1793 without
38 substantive change.

1 **§ 66105. Conditions on compensation**

2 66105. Compensation pursuant to Section 66100 is subject to the condition that
3 the operator establish the trust or bond required by paragraph (2) of subdivision (c)
4 of Section 65975 and, in addition, is subject to the following conditions:

5 (a) The full payment shall be used to purchase credits in the mitigation bank site.

6 (b) The payment shall provide for purchase of bank site wetland acreage
7 required by Section 66100 that has the same hydrologic, vegetative, and other
8 characteristics as the system for which it will serve as mitigation.

9 (c) A permittee shall not participate in a wetlands mitigation bank if a net loss of
10 wetland habitat values or acreage occurs.

11 **Comment.** Section 66105 continues former Fish and Game Code Section 1794 without
12 substantive change.

13 **§ 66110. Permittee obligations**

14 66110. After payment to the operator pursuant to this chapter, the permittee has
15 no further obligations with respect to the operation of the bank site to which
16 payment was made, unless the permittee has an equity involvement in the bank.

17 **Comment.** Section 66110 continues former Fish and Game Code Section 1795 without
18 substantive change.

19 **§ 66115. Last date for qualification of bank sites**

20 66115. No bank site shall be qualified under Section 65960 on or after January
21 1, 2015.

22 **Comment.** Section 66115 continues former Fish and Game Code Section 1796 without
23 substantive change.

24 **TITLE 6. PROJECT FEES**

25 **§ 66200. Fee to defray costs**

26 66200. (a) The department shall impose and collect a filing fee in the amount
27 prescribed in Section 66215 to defray the costs of managing and protecting fish
28 and wildlife trust resources, including, but not limited to, consulting with other
29 public agencies, reviewing environmental documents, recommending mitigation
30 measures, developing monitoring requirements for purposes of the California
31 Environmental Quality Act (Division 13 (commencing with Section 21000) of the
32 Public Resources Code), consulting pursuant to Section 21104.2 of the Public
33 Resources Code, and other activities protecting those trust resources identified in
34 the review pursuant to the California Environmental Quality Act.

35 (b) The filing fees shall be proportional to the cost incurred by the department
36 and shall be annually reviewed and adjustments recommended to the Legislature
37 in an amount necessary to pay the full costs of department programs as specified.
38 The department shall annually adjust the fees pursuant to Section 3755.

Comment. Section 66200 continues former Fish and Game Code Section 711.4(a)-(b) without substantive change.

§ 66205. CEQA filing fee

66205. (a) All project applicants and public agencies subject to the California Environmental Quality Act shall pay a filing fee for each proposed project, as specified in Section 66215.

(b) Filing fees shall be paid at the time and in the amount specified in Section 66215.

(c) Notwithstanding Sections 21080.5 and 21081 of the Public Resources Code, a project shall not be operative, vested, or final, and local government permits for the project shall not be valid, until the filing fees required pursuant to this article are paid.

Comment. Section 66205 continues former Fish and Game Code Section 711.4(c)(1) & (3) without substantive change.

§ 66210. Exceptions to CEQA filing fee

66210. Notwithstanding subdivision (a) of Section 66205, a filing fee shall not be paid pursuant to this article if any of the following conditions exist:

(a) The project has no effect on fish and wildlife.

(b) The project is being undertaken by the department.

(c) The project costs are payable by the department from any of the following sources that are held by the department:

(1) The Public Resources Account in the Cigarette and Tobacco Products Surtax Fund.

(2) The California Wildlife, Coastal, and Park Land Conservation Fund of 1988.

(3) The Habitat Conservation Fund.

(4) The Fisheries Restoration Account in the Fish and Game Preservation Fund.

(5) The Commercial Salmon Stamp Dedicated Subaccount in the Fish and Game Preservation Fund.

(6) Striped bass stamp funds collected pursuant to Section 7360.

(7) The California Ocean Resource Enhancement Account.

(d) The project is implemented by the department through a contract with either a nonprofit entity or a local government agency.

Comment. Section 66210 continues former Fish and Game Code Section 711.4(c)(2) without substantive change.

Note. Existing Section 711.4(c)(2) refers to “striped bass stamp funds collected pursuant to Section 7360.” Section 7360 was repealed in 2010. See 2009 Cal. Stat. ch. 381. The reference is continued in proposed Section 66210(c)(6). **The Commission invites comment on how to correct the erroneous reference.** Should it be repealed as obsolete? Replaced with a reference to the “former” section?

§ 66215. Fee amount

66215. The fees shall be in the following amounts:

1 (a) For a project that is statutorily or categorically exempt from the California
2 Environmental Quality Act, including those certified regulatory programs that
3 incorporate statutory and categorical exemptions, a filing fee shall not be paid.

4 (b) For a project for which a negative declaration is prepared pursuant to
5 subdivision (c) of Section 21080 of the Public Resources Code, the filing fee is
6 one thousand eight hundred dollars (\$1,800). A local agency collecting the filing
7 fee shall remit the fee to the county clerk at the time of filing a notice of
8 determination pursuant to Section 21152 of the Public Resources Code. A state
9 agency collecting the filing fee shall remit the fee to the Office of Planning and
10 Research at the time of filing a notice of determination pursuant to Section 21108
11 of the Public Resources Code.

12 (c) For a project with an environmental impact report prepared pursuant to the
13 California Environmental Quality Act, the filing fee is two thousand five hundred
14 dollars (\$2,500). A local agency collecting the filing fee shall remit the fee to the
15 county clerk at the time of filing a notice of determination pursuant to Section
16 21152 of the Public Resources Code. A state agency collecting the filing fee shall
17 remit the fee to the Office of Planning and Research at the time of filing a notice
18 of determination pursuant to Section 21108 of the Public Resources Code.

19 (d) For a project that is subject to a certified regulatory program pursuant to
20 Section 21080.5 of the Public Resources Code, the filing fee is eight hundred fifty
21 dollars (\$850). The filing fee shall be paid to the department before the filing of
22 the notice of determination pursuant to Section 21080.5 of the Public Resources
23 Code.

24 **Comment.** Section 66215 continues former Fish and Game Code Section 711.4(d) without
25 substantive change.

26 See also Section 6250 (enforcement).

27 **§ 66220. County clerk**

28 66220. (a) The county clerk may charge a documentary handling fee of fifty
29 dollars (\$50) per filing in addition to the filing fee specified in Section 66215.

30 (b) The county clerk of each county and the Office of Planning and Research
31 shall maintain a record, both electronic and in paper, of all environmental
32 documents received. The record shall include, for each environmental document
33 received, the name of each applicant or lead agency, the document filing number,
34 the project name as approved by the lead agency, and the filing date. The record
35 shall be made available for examination or audit by authorized personnel of the
36 department during normal business hours.

37 **Comment.** Section 66220 continues former Fish and Game Code Section 711.4(e)(1) without
38 substantive change.

39 **§ 66225. Remittance of fee**

40 66225. (a) The filing fee imposed and collected pursuant to Section 66215 shall
41 be remitted monthly to the department within 30 days after the end of each month.

1 The remittance shall be accompanied with the information required pursuant to
2 Section 66220. The amount of fees due shall be reported on forms prescribed and
3 provided by the department.

4 (b) The department shall assess a penalty of 10 percent of the amount of fees
5 due for a failure to remit the amount payable when due. The department may
6 pursue collection of delinquent fees through the Controller's office pursuant to
7 Section 12419.5 of the Government Code.

8 **Comment.** Section 66225 continues former Fish and Game Code Section 711.4(e)(2)-(3)
9 without substantive change.

10 **§ 66230. Nonpayment**

11 66230. All unpaid fees are a statutory assessment subject to collection under
12 procedures as provided in the Revenue and Taxation Code.

13 **Comment.** Section 66230 continues the second sentence of former Fish and Game Code
14 Section 711.4(f) without substantive change.

15 **§ 66235. Number of fees per project**

16 66235. Only one filing fee shall be paid for each project unless the project is
17 tiered or phased, or separate environmental documents are required.

18 **Comment.** Section 66235 continues former Fish and Game Code Section 711.4(g) without
19 substantive change.

20 **§ 66240. Effect on specified department duties**

21 66240. This article does not preclude or modify the duty of the department to
22 recommend, require, permit, or engage in mitigation activities pursuant to the
23 California Environmental Quality Act.

24 **Comment.** Section 66240 continues former Fish and Game Code Section 711.4(h) without
25 substantive change.

26 **§ 66245. Coastal Commission permit process**

27 66245. The permit process of the California Coastal Commission, as certified by
28 the Secretary of the Resources Agency, is exempt from the payment of the filing
29 fees prescribed by subdivision (d) of Section 66215 insofar as the permits are
30 issued under any of the following regulations:

31 (a) Subchapter 4 (commencing with Section 13136) of Chapter 5 of Division 5.5
32 of Title 14 of the California Code of Regulations.

33 (b) Subchapter 1 (commencing with Section 13200), Subchapter 3 (commencing
34 with Section 13211), Subchapter 3.5 (commencing with Section 13214),
35 Subchapter 4 (commencing with Section 13215), Subchapter 4.5 (commencing
36 with Section 13238), Subchapter 5 (commencing with Section 13240), Subchapter
37 6 (commencing with Section 13250), and Subchapter 8 (commencing with Section
38 13255.0) of Section 66215 14 of the California Code of Regulations.

39 **Comment.** Section 66245 continues former Fish and Game Code Section 711.4(i) without
40 substantive change.

Note. Existing Section 711.4(i) refers to “Subchapter 3 (commencing with Section 13213).” That appears to be an error. Subchapter 3 begins with Section 13211, not Section 13213. Proposed Section 66245 corrects that error. **The Commission invites comment on whether the change would cause any problems.**

§ 66250. Federal agencies

66250. (a) The fish and wildlife resources are held in trust for the people of the state by and through the department.

(b) Insofar as state wildlife trust resources exist and depend upon federal proprietary lands or federal land and water adjacent to or affecting state trust resources, all persons engaging in projects or activities under federal license, contract, or permit, to the extent permitted by federal law, shall be governed by this article and shall pay project filing fees unless the payment of state filing and permit fees is explicitly preempted by the authority of the federal agency permitting the use or modification of state trust resources.

(c) Insofar as state wildlife trust resources exist and depend upon federal proprietary lands or federal lands and waters adjacent to or affecting state trust resources, all federal agencies acting in their proprietary capacity, to the extent permitted by federal law, shall be governed by this article and Sections 10005 and 21089 of the Public Resources Code, unless the payment of state filing and permit fees is explicitly preempted by the authority of a particular federal agency.

(d) If a court of competent jurisdiction finds that any provision of this section or the application thereof to any federal agency, person, or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the section which can be given effect without the invalid provision or application, and to this end the provisions of this section are severable.

(e) For purposes of this section, “person” includes any individual, firm, association, organization, partnership, business, trust, corporation, limited liability company, company, district, city, county, city and county, town, the state, and any of the agencies of those entities.

Comment. Subdivisions (a) through (d) of Section 66250 continue former Fish and Game Code Section 711.7 without substantive change.

Subdivision (e) continues former Fish and Game Code Section 711.2 without substantive change.

Note. To the extent permitted by federal law, existing Section 711.7 provides for the application of “this article” to “all persons engaging in projects or activities under federal license, contract, or permit” and to “all federal agencies acting in their proprietary capacity.” The language of the section strongly suggests that its purpose is to require such persons and agencies to pay state filing and permit fees.

Technically, the reference to “this article” has broader application than that. Section 711.7 is included in an article that contains numerous provisions addressing different topics. However, with the exception of Section 711.4, none of those provisions appear to be relevant to the matters addressed by Section 711.7. For that reason, Section 711.7 has been located within an article containing Section 711.4; the references to “this article” have not been changed. Consequently, those references would only encompass Section 711.4. **The Commission believes that this**

would preserve the meaning of the references, without substantive change, but invites public comment on that point.

PART 3. POLLUTION

TITLE 1. WATER POLLUTION

CHAPTER 1. PROHIBITIONS

Article 1. Contaminants

§ 66500. Prohibition

66500. Except as provided in Section 66505, it is unlawful to deposit in, permit to pass into, or place where it can pass into the waters of this state any of the following:

(a) Any petroleum, acid, coal or oil tar, lampblack, aniline, asphalt, bitumen, or residuary product of petroleum, or carbonaceous material or substance.

(b) Any refuse, liquid or solid, from any refinery, gas house, tannery, distillery, chemical works, mill, or factory of any kind.

(c) Any sawdust, shavings, slabs, or edgings.

(d) Any factory refuse, lime, or slag.

(e) Any cocculus indicus.

(f) Any substance or material deleterious to fish, plant life, mammals, or bird life.

Comment. Section 66500 continues former Fish and Game Code Section 5650(a) without substantive change.

See also Sections 6300, 6302, 6654 (enforcement).

§ 66505. Exception

66505. This article does not apply to a discharge or a release that is expressly authorized pursuant to, and in compliance with, the terms and conditions of a waste discharge requirement pursuant to Section 13263 of the Water Code or a waiver issued pursuant to subdivision (a) of Section 13269 of the Water Code issued by the State Water Resources Control Board or a regional water quality control board after a public hearing, or that is expressly authorized pursuant to, and in compliance with, the terms and conditions of a federal permit for which the State Water Resources Control Board or a regional water quality control board has, after a public hearing, issued a water quality certification pursuant to Section 13160 of the Water Code. This article does not confer additional authority on the State Water Resources Control Board, a regional water quality control board, or any other entity.

Comment. Section 66505 continues former Fish and Game Code Section 5650(b) without substantive change.

(1) The defendant complied with all applicable state and federal laws and regulations requiring that the discharge or release be reported to a government agency.

(3) The defendant took reasonable and appropriate measures to effectively mitigate the discharge or release in a timely manner.

(c) The affirmative defense in subdivision (a) does not apply and may not be raised by any defendant who has on two prior occasions in the preceding five years, in any combination within the same county in which the case is prosecuted, either pleaded nolo contendere, been convicted of a violation of this article, or suffered a judgment for a violation of this article or Article 2 (commencing with Section 6320) of Chapter 3 of Title 10 of Part 4 of Division 3. This subdivision shall apply only to cases filed on or after January 1, 1997.

Comment. Section 66510 continues former Fish and Game Code Section 5650(c)-(f) without substantive change.

§ 66525. Prohibition

(b) The abandonment of any motor vehicle in any manner that violates this section shall constitute a rebuttable presumption affecting the burden of producing evidence that the last registered owner of record, not having complied with Section 5900 of the Vehicle Code, is responsible for that abandonment and is thereby liable for the cost of removal and disposition of the vehicle. This section prohibits the placement of a vehicle body on privately owned property along a streambank by the property owner or tenant for the purpose of preventing erosion of the streambank.

1 (c) This section does not apply to a refuse disposal site that is authorized by the
2 appropriate local agency having jurisdiction or to the depositing of those materials
3 in a container from which the materials are routinely removed to a legal point of
4 disposal.

5 (d) This section shall be enforced by all law enforcement officers of this state.

6 **Comment.** Section 66525 continues former Fish and Game Code Section 5652 without
7 substantive change.

8 See also Sections 6552, 6554 (enforcement).

9 CHAPTER 2. CLEAN-UP

10 § 66700. Continuing pollution

11 66700. Whenever it is determined by the department that a continuing and
12 chronic condition of pollution exists, the department shall report that condition to
13 the appropriate regional water quality control board, and shall cooperate with the
14 board in obtaining correction or abatement in accordance with any laws
15 administered by the board for the control of practices for sewage and industrial
16 waste disposal.

17 **Comment.** Section 66700 continues former Fish and Game Code Section 5651 without
18 substantive change.

19 § 66705. Responsible party obligations

20 66705. (a) It is the intent of the Legislature that expeditious cleanup is the
21 primary interest of the people of the State of California in order to protect the
22 people and the environment of the state.

23 (b) In addition to any other penalty, anyone responsible for polluting,
24 contaminating, or obstructing waters of this state, or depositing or discharging
25 materials threatening to pollute, contaminate, or obstruct waters of this state, to the
26 detriment of fish, plant, bird, or animal life in those waters, shall be required to
27 remove any substance placed in the waters, or to remove any material threatening
28 to pollute, contaminate, or obstruct waters of this state, which can be removed,
29 that caused the prohibited condition, or to pay the costs of the removal by the
30 department.

31 (c) Prior to taking any action committing the use of state funds pursuant to this
32 section or Section 66710, the department shall first make a reasonable effort to
33 have the person responsible, when that person is known and readily available,
34 remove, or agree to pay for the removal of, the substance causing the prohibited
35 condition, if the responsible person acts expeditiously and does not cause the
36 prohibited condition to be prolonged to the detriment of fish, plant, animal, or bird
37 life in the affected waters. When the responsible party is unknown or is not
38 providing adequate and timely cleanup, the emergency reserve account of the
39 Toxic Substances Control Account in the General Fund shall be used to provide
40 funding for the cleanup pursuant to Section 25354 of the Health and Safety Code.

1 When those or other funds are not available, moneys in the Fish and Wildlife
2 Pollution Account shall be available, in accordance with Section 67510, for
3 funding the cleanup expenses.

4 **Comment.** Section 66705 continues former Fish and Game Code Section 12015 without
5 substantive change.

6 **§ 66710. Department clean-up of petroleum products**

7 66710. (a) In addition to the responsibilities imposed pursuant to Section 66700,
8 the department may clean up or abate, or cause to be cleaned up or abated, the
9 effects of any petroleum or petroleum product deposited or discharged in the
10 waters of this state or deposited or discharged in any location onshore or offshore
11 where the petroleum or petroleum product is likely to enter the waters of this state,
12 order any person responsible for the deposit or discharge to clean up the petroleum
13 or petroleum product or abate the effects of the deposit or discharge, and recover
14 any costs incurred as a result of the cleanup or abatement from the responsible
15 party.

16 (b) An order shall not be issued pursuant to this section for the cleanup or
17 abatement of petroleum products in any sump, pond, pit, or lagoon used in
18 conjunction with crude oil production that is in compliance with all applicable
19 state and federal laws and regulations.

20 (c) The department may issue an order pursuant to this section only if there is an
21 imminent and substantial endangerment to human health or the environment and
22 the order shall remain in effect only until any cleanup and abatement order is
23 issued pursuant to Section 13304 of the Water Code. A regional water quality
24 control board shall incorporate the department's order into the cleanup and
25 abatement order issued pursuant to Section 13304 of the Water Code, unless the
26 department's order is inconsistent with any more stringent requirement established
27 in the cleanup and abatement order. Any action taken in compliance with the
28 department's order is not a violation of any subsequent regional water quality
29 control board cleanup and abatement order issued pursuant to Section 13304 of the
30 Water Code.

31 (d) The Administrator of the Office of Spill Prevention and Response has the
32 primary authority to serve as a state incident commander and direct removal,
33 abatement, response, containment, and cleanup efforts with regard to all aspects of
34 any placement of petroleum or a petroleum product in the waters of the state,
35 except as otherwise provided by law. This authority may be delegated.

36 (e) For purposes of this section, the following definitions apply:

37 (1) "Petroleum product" means oil of any kind or form, including, but not
38 limited to, fuel oil, sludge, oil refuse, and oil mixed with waste other than dredged
39 spoil. "Petroleum product" does not include any pesticide that has been applied for
40 agricultural, commercial, or industrial purposes or that has been applied in
41 accordance with a cooperative agreement authorized by Section 116180 of the
42 Health and Safety Code, that has not been discharged accidentally or for purposes

1 of disposal, and the application of which was in compliance with all applicable
2 state and federal laws and regulations.

3 (2) “State incident commander” means a person with the overall authority for
4 managing and conducting incident operations during an oil spill response, who
5 shall manage an incident consistent with the standardized emergency management
6 system required by Section 8607 of the Government Code. Incident management
7 generally includes the development of objectives, strategies, and tactics, ordering
8 and release of resources, and coordinating with other appropriate response
9 agencies to ensure that all appropriate resources are properly utilized and that this
10 coordinating function is performed in a manner designed to minimize risk to other
11 persons and to the environment.

12 **Comment.** Section 66710 continues former Fish and Game Code Section 5655 without
13 substantive change.

14 **§ 66715. Civil liability for damages and clean-up costs**

15 66715. (a) In addition to any other provision of law, any person who discharges
16 or deposits any substance or material deleterious to fish, plant, bird, or animal life
17 or their habitat into, or which threatens to enter, the waters of this state is liable
18 civilly to the department for all actual damages to fish, plant, bird, or animal life or
19 their habitat and, in addition, for the reasonable costs incurred in cleaning up the
20 deleterious substance or material or abating its effects, or both.

21 (b) For the purposes of this section, “deleterious substance or material” does not
22 include substances or materials otherwise expressly permitted or authorized to be
23 deposited or discharged into waters of the state by law.

24 **Comment.** Section 66715 continues former Fish and Game Code Section 12016 without
25 substantive change.

26 **CHAPTER 3. FISHING CLOSURE**

27 **§ 66800. Closure**

28 66800. (a) Notwithstanding Section 11500 and except as provided in Section
29 66820, within 24 hours of a spill or discharge, the director shall close to the take of
30 fish and shellfish all affected waters where fishing, including all commercial,
31 recreational, and nonlicensed subsistence fishing, may take place, or where
32 aquaculture operations are taking place.

33 (b) For the purposes of subdivision (a), the following terms have the specified
34 meanings:

35 (1) “Affected waters” means all waters in the vicinity of the spill or discharge or
36 where the spilled or discharged material has spread, or is likely to spread.

37 (2) “Discharge” and “spill” have the meanings provided in Section 8670.3 of the
38 Government Code.

39 (c) In determining where a spill or discharge is likely to spread, the director shall
40 consult with the Administrator of the Office of Spill Prevention and Response.

(d) At the time of closure, the department shall make all reasonable efforts to notify the public of the closure, including notification to commercial and recreational fishing organizations, and posting of warnings on public piers and other locations where subsistence fishing is known to occur. The department shall coordinate, when possible, with local and regional agencies and organizations to expedite public notification.

(e) Closure pursuant to this section is not required if, within 24 hours of notification of a spill or discharge, the Office of Environmental Health Hazard Assessment finds that a public health threat does not or is unlikely to exist.

Comment. Subdivisions (a) and (b) of Section 66800 restate the first sentence of former Fish and Game Code Section 5654(a)(1) without substantive change.

Subdivisions (c) and (d) continue the remaining sentences of former Fish and Game Code Section 5654(a)(1) without substantive change.

Subdivision (e) continues former Fish and Game Code Section 5654(a)(2) without substantive change.

Note. Proposed Section 66800(a)-(b) would restate the first sentence of existing Section 5654(a)(1) to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“Notwithstanding Section 5523 and except as provided in paragraph (2), the director, within 24 hours of notification of a spill or discharge, as those terms are defined in Section 8670.3 of the Government Code, where any fishing, including all commercial, recreational, and nonlicensed subsistence fishing, may take place, or where aquaculture operations are taking place, shall close to the take of all fish and shellfish all waters in the vicinity of the spill or discharge or where the spilled or discharged material has spread, or is likely to spread.”

The Commission invites comment on whether that restatement would cause any problems.

§ 66805. Assessment of closure

66805. Within 48 hours of notification of a spill or discharge subject to Section 66800, the director, in consultation with the Office of Environmental Health Hazard Assessment, shall make an assessment and determine all of the following:

(a) The danger posed to the public from fishing in the area where the spill or discharge occurred or spread, and the danger of consuming fish taken in the area where the spill or discharge occurred or spread.

(b) Whether the areas closed for the take of fish or shellfish should be expanded to prevent any potential take or consumption of any fish or shellfish that may have been contaminated by the spill or discharge.

(c) The likely period for maintaining a closure on the take of fish and shellfish in order to prevent any possible contaminated fish or shellfish from being taken or consumed or other threats to human health.

Comment. Section 66805 continues former Fish and Game Code Section 5654(b) without substantive change.

§ 66810. Immediate reopening

66810. If the director finds in his or her assessment pursuant to Section 66805 that there is no significant risk to the public or to the fisheries, the director may

1 immediately reopen the closed area and waive the testing requirements of Sections
2 66820 and 66830.

3 **Comment.** Section 66810 continues former Fish and Game Code Section 5654(d) without
4 substantive change.

5 **Note.** Existing Section 5654(d) refers to the “testing requirements” of Section 5654(e) and
6 (f). Section 5654(f) (proposed Section 66830) does not appear to impose any testing
7 requirements. **The Commission invites comment on whether the cross-reference to that**
8 **provision can be deleted as erroneous.**

9 **§ 66820. Expedited testing**

10 66820. Except under the conditions specified in Section 66810, after complying
11 with Sections 66800 and 66805, the director, in consultation with the Office of
12 Environmental Health Hazard Assessment, but in no event more than seven days
13 from the notification of the spill or discharge, shall order expedited tests of fish
14 and shellfish that would have been open for take for commercial, recreational, or
15 subsistence purposes in the closed area if not for the closure, to determine the
16 levels of contamination, if any, and whether the fish or shellfish is safe for human
17 consumption.

18 **Comment.** Section 66820 continues former Fish and Game Code Section 5654(e) without
19 substantive change.

20 **§ 66825. Assessment of fish aboard vessel in closed area**

21 66825. Within 48 hours after receiving notification of a spill or discharge
22 subject to Section 66800, or as soon as is feasible, the director, in consultation
23 with the Office of Environmental Health Hazard Assessment, shall assess and
24 determine the potential danger from consuming fish that have been contained in a
25 recirculating seawater tank onboard a vessel that may become contaminated by the
26 vessel’s movement through an area where the spill or discharge occurred or
27 spread.

28 **Comment.** Section 66825 continues former Fish and Game Code Section 5654(c) without
29 substantive change.

30 **§ 66830. Action in response to OEHHA assessment**

31 66830. (a) Within 24 hours of receiving a notification from the Office of
32 Environmental Health Hazard Assessment that no threat to human health exists
33 from the spill or discharge or that no contaminant from the spill or discharge is
34 present that could contaminate fish or shellfish, the director shall reopen the areas
35 closed pursuant to this chapter. The director may maintain a closure in any
36 remaining portion of the closed area where the Office of Environmental Health
37 Hazard Assessment finds contamination from the spill or discharge persists that
38 may adversely affect human health.

39 (b) The director, in consultation with the commission, may also maintain a
40 closure in any remaining portion of the closed area where commercial fishing or
41 aquaculture occurs and where the department determines, pursuant to this

subdivision, that contamination from the spill or discharge persists that may cause the waste of commercial fish or shellfish as regulated by Section 21610.

Comment. Section 66830 continues former Fish and Game Code Section 5654(f) without substantive change.

§ 66835. Consultation with affected groups

66835. (a) To the extent feasible, the director shall consult with representatives of commercial and recreational fishing associations and subsistence fishing communities regarding the extent and duration of a closure, testing protocols, and findings.

(b) If a spill or discharge occurs within the lands governed by a Native American tribe or affects waters flowing through tribal lands, or tribal fisheries, the director shall consult with the affected tribal governments.

Comment. Section 66835 continues former Fish and Game Code Section 5654(g) without substantive change.

§ 66840. Reimbursement of costs

66840. The director shall seek full reimbursement from the responsible party or parties for the spill or discharge for all reasonable costs incurred by the department in carrying out this chapter, including, but not limited to, all testing.

Comment. Section 66840 continues former Fish and Game Code Section 5654(h) without substantive change.

**TITLE 2. CALIFORNIA MARINE RESOURCES
LEGACY ACT**

CHAPTER 1. GENERAL PROVISIONS

Article 1. Preliminary Provisions

§ 67000. Short title

67000. This act shall be known, and may be cited, as the California Marine Resources Legacy Act.

Comment. Section 67000 continues former Fish and Game Code Section 6600 without substantive change.

§ 67005. Findings and declarations

67005. The Legislature finds and declares all of the following:

(a) California's extraordinary marine biological diversity is a vital asset to the state and nation. The diversity of species and ecosystems found in the ocean waters off the state is important to public health and well-being, ecological health, and ocean-dependent economic activities.

1 (b) Although the state maintains various programs to protect, restore, and
2 enhance California's marine resources, the effect of these programs is limited by
3 inadequate and unstable funding.

4 (c) There is an existing permitting process for decommissioning and fully
5 removing offshore oil platforms or production facilities. Owners and operators are
6 currently responsible for the full cost of decommissioning and remediating those
7 facilities.

8 (d) According to the United States Department of the Interior, the 23 oil and gas
9 platforms in federal waters off the California coast are expected to reach the end of
10 their useful production lifetimes and be decommissioned between 2015 and 2030.

11 (e) The California Ocean Science Trust in its June 2010 study, titled "Evaluating
12 Alternatives for Decommissioning California's Offshore Oil and Gas Platforms: A
13 Technical Analysis to Inform State Policy," analyzed a number of
14 decommissioning alternatives to full rig removal and determined that the most
15 likely alternative is to remove the upper portion of the rig and leave the remainder
16 of the structure in place.

17 (f) The California Ocean Science Trust report and other studies indicate that the
18 partial removal option can result in a net benefit to the marine environment and
19 substantial cost savings compared to full removal of an oil platform or production
20 facility.

21 (g) Provided that partial removal of an oil rig would result in a net benefit to the
22 marine environment compared to full removal, it is in the interest of the state that a
23 portion of the cost savings that result from partial removal should be shared with
24 the citizens of this state to protect and enhance the state's marine resources.

25 (h) It is also in the interest of the state that any program to allow partial removal
26 of oil platforms meet all of the following criteria:

27 (1) Partial removal shall result in a net benefit to the marine environment
28 compared to full removal.

29 (2) The determination of whether partial removal would result in a net benefit to
30 the marine environment should be made only after scientific study and evaluation.

31 (3) Because the location and depth of an oil platform, as well as other ecological
32 factors, create a unique environment, each oil platform shall be subject to
33 scientific study and evaluation before partial removal is allowed.

34 (4) The costs of the scientific study and evaluation should be borne by the
35 applicant.

36 **Comment.** Section 67005 continues former Fish and Game Code Section 6601 without
37 substantive change.

38 **§ 67010. Definitions**

39 67010. For purposes of this title, the following terms have the following
40 meanings:

41 (a) "Applicant" means the owner or operator of an offshore oil structure in state
42 or federal waters or another party responsible for decommissioning an offshore oil

1 structure in state or federal waters who applies pursuant to this title to carry out
2 partial removal of the structure.

3 (b) “Commission” means the State Lands Commission.

4 (c) “Conservancy” means the State Coastal Conservancy.

5 (d) “Cost savings” means the difference between the estimated cost to the
6 applicant of complete removal of an oil platform as required by state and federal
7 leases and the estimated costs to the applicant of partial removal of the oil
8 platform pursuant to this title.

9 (e) “Council” means the Ocean Protection Council.

10 (f) “Endowment” means the California Endowment for Marine Preservation
11 established in Division 37 (commencing with Section 71500) of the Public
12 Resources Code.

13 (g) “Exclusive economic zone (EEZ)” means the zone as measured from the
14 mean high tide line seaward to 200 nautical miles, as set forth in Presidential
15 Proclamation 5030 of March 10, 1983, in which the United States proclaimed
16 jurisdiction over the resources of the ocean within 200 miles of the coastline.

17 (h) “National Fishing Enhancement Act of 1984” means Title II of Public Law
18 98-623.

19 (i) “Offshore oil structure” means platforms, piers, and artificial islands located
20 seaward of mean lower low water, used for oil and gas exploration, development,
21 production, processing, or storage.

22 (j) “Oil” means any kind of petroleum, liquid hydrocarbons, natural gas, or
23 petroleum products or any fraction or residues therefrom.

24 (k) “Open coastal marine resources” means those marine resources that use open
25 coastal waters as their habitat.

26 (l) “Open coastal waters” means the area composed of the submerged lands of
27 the state that are below the mean lower low water, extending seaward to the
28 boundaries of the exclusive economic zone.

29 (m) “Partial removal” means an alternative to full removal of an offshore oil
30 structure, in compliance with all requirements of this title.

31 (n) “State waters” means waters within the seaward boundary of the state as
32 identified in Section 2 of Article III of the California Constitution.

33 **Comment.** Section 67010 continues former Fish and Game Code Section 6602 without
34 substantive change.

35 **§ 67015. No limitation of other authority or duties**

36 67015. Nothing in this title is intended, and it shall not be construed, to limit or
37 affect the authority or duties of any state or local agency, including, but not limited
38 to, the commission, the council, and the California Coastal Commission.

39 **Comment.** Section 67015 continues former Fish and Game Code Section 6605(a) without
40 substantive change.

Article 2. Program Generally

§ 67050. Nature of program

67050. (a) This title establishes a program through which an applicant may voluntarily apply to the department to carry out partial removal of the structure.

(b) The program established pursuant to this title shall be deemed consistent with, and part of, the California Artificial Reef Program pursuant to Title 3 (commencing with Section 25600) of Part 3 of Division 7 for purposes of compliance with federal law including the National Fishing Enhancement Act of 1984.

(c) Except as specified in Section 67065, the department shall serve as the primary authority for carrying out the program, including review and approval of applications to partially remove an offshore oil structure in state or federal waters and management and operation of decommissioned offshore oil structures in state or federal waters approved pursuant to this title.

Comment. Section 67050 continues former Fish and Game Code Section 6603(a)-(c) without substantive change.

§ 67055. Application approval

67055. Final approval of an application shall not be granted until the applicant complies with all requirements of the title, including the payment of all costs to the state to review and approve the proposed project as required by Section 67115 and the transmittal of the required portion of cost savings to the endowment and other parties as required by Section 67265.

Comment. Section 67055 continues former Fish and Game Code Section 6603(d) without substantive change.

§ 67060. Funding

67060. The department may obtain funds for the planning, development, maintenance, and operation of an offshore oil structure transferred to the department pursuant to this title and may accept gifts, subventions, grants, rebates, reimbursements, and subsidies from any lawful source.

Comment. Section 67060 continues former Fish and Game Code Section 6603(e) without substantive change.

§ 67065. Proposal for partial removal is a project

67065. (a) A proposed project to partially remove an offshore oil structure pursuant to this title is a project as defined in subdivision (c) of Section 21065 of the Public Resources Code and is therefore subject to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) and shall be reviewed pursuant to the time limits established in Section 21100.2 of the Public Resources Code.

1 (b) The Natural Resources Agency shall serve as the lead agency for the
2 environmental review of any project proposed pursuant to this title.

3 **Comment.** Section 67065 continues former Fish and Game Code Section 6604 without
4 substantive change.

5 **§ 67070. No limitation on liability**

6 67070. Nothing in this title shall be construed to do any of the following:

7 (a) Relieve the applicant or prior owner or operator of an offshore oil structure
8 from any continuing liability under any of the following, if the liability is
9 associated with seepage or release of oil from an offshore oil structure that was
10 decommissioned pursuant to an order of, or any action taken by, and in accordance
11 with, any applicable rule or regulation of, any federal or state agency:

12 (1) Any state statute or regulation regarding liability for the spilling of oil.

13 (2) The federal Oil Pollution Act of 1990 (33 U.S.C. Sec. 2701 et seq.).

14 (3) Any other provision of law.

15 (b) Establish any new liability on the part of the state.

16 (c) Require any agency with jurisdiction to approve the partial removal of an
17 offshore oil structure.

18 (d) Promote, encourage, or facilitate offshore oil exploration, development, and
19 production within California's open coastal waters.

20 (e) Require the United States Department of the Interior or the commission to
21 modify, amend, or alter an existing oil and gas lease to approve partial removal of
22 an offshore oil structure.

23 (f) Alter any existing law or applicable rule or regulation of any federal or state
24 agency that establishes liability for damages arising with respect to artificial reefs
25 or reef materials, including, but not limited to, components of decommissioned oil
26 structures.

27 (g) Alter any existing law or policy that protects natural reefs.

28 (h) Approve any particular method of abandonment.

29 **Comment.** Section 67070 continues former Fish and Game Code Section 6605(b) without
30 substantive change.

31 **§ 67075. Partial removal is not mitigation**

32 67075. Any partial removal of an offshore oil structure pursuant to this title shall
33 not be used or counted as mitigation for any environmental impacts or natural
34 resource damages.

35 **Comment.** Section 67075 continues former Fish and Game Code Section 6605(c) without
36 substantive change.

37 **§ 67080. Regulation**

38 67080. The department may adopt regulations to implement this title.

39 **Comment.** Section 67080 continues former Fish and Game Code Section 6603(f) without
40 substantive change.

1 CHAPTER 2. PARTIAL REMOVAL OF OFFSHORE OIL STRUCTURES

2 Article 1. Application

3 **§ 67100. Application generally**

4 67100. (a) An owner or operator, or other party responsible for
5 decommissioning, of an offshore oil structure may apply to the department for
6 approval to partially remove the structure pursuant to the requirements of this title.

7 (b) The department shall design and make available to potential applicants an
8 application process that will facilitate review of the application by the department
9 in a timely manner, consistent with Section 67065.

10 (c) Upon receipt of an application pursuant to this section, the department shall
11 transmit a copy of the application to the council, the commission, and the
12 endowment, which shall constitute notice to these agencies.

13 **Comment.** Section 67100 continues former Fish and Game Code Section 6610 without
14 substantive change.

15 **§ 67105. Application content**

16 67105. (a) The application for partial removal shall include, at a minimum, all of
17 the following:

18 (1) The applicant's plan and schedule for partial removal of the offshore oil
19 structure, including removal of any portion of the structure as appropriate to
20 maintain navigational safety.

21 (2) A determination of the estimated cost of partial removal and the estimated
22 cost of full removal.

23 (3) A determination of the environmental impacts and benefits to the marine
24 environment from partial removal and full removal of the structure.

25 (4) Identification of all permits, leases, and approvals required by any
26 governmental agency, including a permit issued by the United States Army Corps
27 of Engineers if required for offshore oil structures, and a lease issued by the
28 commission if the proposed project involves state tidelands and submerged lands,
29 and a proposed schedule for the applicant or the state to receive those permits,
30 leases, and approvals.

31 (b) The department may require the applicant to submit a management plan for
32 the structure following partial removal, including maintenance in a manner
33 consistent with navigational safety, enforcement, and monitoring.

34 (c) The information submitted pursuant to subdivisions (a) and (b) shall be used
35 by the department for advisory purposes only. Final determinations regarding the
36 partial removal and management of the offshore oil structure, net benefit to the
37 marine environment from partial removal, and cost savings from partial removal
38 shall be made solely by the department, council, and commission, as specified in
39 this title, based on their independent review and judgment.

1 **Comment.** Section 67105 continues former Fish and Game Code Section 6611 without
2 substantive change.

3 **§ 67110. Application completeness**

4 67110. Upon receipt of an application to partially remove an offshore oil
5 structure pursuant to this title, the department shall determine whether the
6 application is complete and includes all information needed by the department.

7 **Comment.** Section 67110 continues former Fish and Game Code Section 6612(a) without
8 substantive change.

9 **§ 67115. Financial assurances**

10 67115. (a) Upon a determination that the application is complete, the applicant
11 shall provide surety bonds executed by an admitted surety insurer, irrevocable
12 letters of credit, trust funds, or other forms of financial assurances, determined by
13 the department to be available and adequate, to ensure that the applicant will
14 provide sufficient funds to the department, council, commission, and conservancy
15 to carry out all required activities pursuant to this chapter, including all of the
16 following:

17 (1) Environmental review of the proposed project pursuant to Section 67065.

18 (2) A determination of net environmental benefit pursuant to Article 2
19 (commencing with Section 67150).

20 (3) A determination of cost savings pursuant to Article 3 (commencing with
21 Section 67200).

22 (4) Preparation of a management plan for the structure pursuant to Section
23 67250.

24 (5) Implementation of the management plan and ongoing maintenance of the
25 structure after the department takes title pursuant to Section 67275.

26 (6) Development of an advisory spending plan pursuant to Section 67280.

27 (7) Other activities undertaken to meet the requirements of this chapter,
28 including the costs of reviewing applications for completeness, and reviewing,
29 approving, and permitting the proposed project, which includes the costs of
30 determining whether the project meets the requirements of all applicable laws and
31 regulations and the costs of environmental assessment and review.

32 (b) The department shall consult with the council, commission, and conservancy
33 in determining appropriate funding for activities to be carried out by those
34 agencies.

35 (c) The funds provided pursuant to Section 67110 shall not be considered in the
36 calculation of cost savings pursuant to Article 3 (commencing with Section 67200)
37 or the apportionment of cost savings pursuant to Section 67265.

38 **Comment.** Section 67115 continues former Fish and Game Code Section 6612(b) without
39 substantive change.

1 **§ 67120. Startup costs**

2 67120. (a) The first person to file an application on and after January 1, 2011, to
3 partially remove an offshore oil structure pursuant to this title, shall pay, in
4 addition to all costs identified under Section 67115, the startup costs incurred by
5 the department or the commission to implement this title, including the costs to
6 develop and adopt regulations pursuant to this title.

7 (b) This payment of startup costs shall be reimbursed by the department as
8 provided in paragraph (3) of subdivision (c) of Section 67265.

9 **Comment.** Section 67120 continues former Fish and Game Code Section 6612(c) without
10 substantive change.

11 **§ 67125. Environmental review**

12 67125. As soon as feasible after reaching the agreement pursuant to Section
13 67115, the lead agency shall begin the environmental review of the proposed
14 project as required pursuant to Section 67065.

15 **Comment.** Section 67125 continues former Fish and Game Code Section 6612(d) without
16 substantive change.

17 Article 2. Determination of Net Benefit

18 **§ 67150. Council determination of net benefit**

19 67150. The council shall determine whether the partial removal of an offshore
20 oil structure pursuant to this title provides a net benefit to the marine environment
21 compared to the full removal of the structure.

22 **Comment.** Section 67150 continues former Fish and Game Code Section 6613(a) without
23 substantive change.

24 **§ 67155. Establishment of criteria**

25 67155. As a necessary prerequisite to determining net environmental benefit as
26 required in Section 67150, the council shall, upon receipt of its initial application
27 from the department pursuant to Section 67100, establish appropriate criteria for
28 evaluating the net environmental benefit of full removal and partial removal of
29 offshore oil structures.

30 (a) The criteria shall include, but are not limited to, the depth of the partially
31 removed structure in relation to its value as habitat and the location of the
32 structure, including its proximity to other reefs, both natural and artificial.

33 (b) The criteria shall not include any consideration of the funds to be generated
34 by the partial removal of the structure.

35 (c) In determining the criteria, the council shall consult with appropriate entities,
36 including, but not limited to, the department, the commission, the California
37 Coastal Commission, and the California Ocean Science Trust.

38 (d) The council shall establish the criteria in time to use them in making its
39 initial determination of net environmental benefit pursuant to this article.

1 **Comment.** Section 67155 continues former Fish and Game Code Section 6613(b) without
2 substantive change.

3 **§ 67160. Making the determination**

4 67160. (a) Upon certification of environmental documents pursuant to the
5 California Environmental Quality Act, the council shall, based on the criteria
6 developed pursuant to Section 67155 and other relevant information, determine
7 whether partial removal of the structure would provide a net benefit to the marine
8 environment compared to full removal of the structure.

9 (b) In making the determination, the council shall, at a minimum, take into
10 account the following:

11 (1) The contribution of the proposed structure to protection and productivity of
12 fish and other marine life.

13 (2) Any adverse impacts to biological resources or water quality, or any other
14 marine environmental impacts, from the full removal of the facility that would be
15 avoided by partial removal as proposed in the application.

16 (3) Any adverse impacts to biological resources or water quality, or any other
17 marine environmental impacts, from partial removal of the structure as proposed
18 in the application.

19 (4) Any benefits to the marine environment that would result from the full
20 removal of the structure or from partial removal as proposed in the application.

21 (5) Any identified management requirements and restrictions of the partially
22 removed structure, including, but not limited to, restrictions on fishing or other
23 activities at the site.

24 **Comment.** Section 67160 continues former Fish and Game Code Section 6613(c) without
25 substantive change.

26 **§ 67165. Specified benefits excluded from determination**

27 67165. Benefits resulting from the contribution of cost savings to the
28 endowment shall not be considered in the determination of net environmental
29 benefit.

30 **Comment.** Section 67165 continues former Fish and Game Code Section 6613(d) without
31 substantive change.

32 **§ 67170. Assistance of other entities**

33 67170. The council may contract or enter into a memorandum of understanding
34 with any other appropriate governmental or nongovernmental entity to assist in its
35 determination of net environmental benefit.

36 **Comment.** Section 67170 continues former Fish and Game Code Section 6613(e) without
37 substantive change.

1 **§ 67175. Finality of determination**

2 67175. The determination made pursuant to this article and submitted to the
3 department by the council shall constitute the final determination and shall not be
4 revised except by the council.

5 **Comment.** Section 67175 continues former Fish and Game Code Section 6613(f) without
6 substantive change.

7 **§ 67180. Timeliness**

8 67180. The council shall take all feasible steps to complete its determination in a
9 timely manner that accommodates the department's schedule for consideration of
10 the application.

11 **Comment.** Section 67180 continues former Fish and Game Code Section 6613(g) without
12 substantive change.

13 Article 3. Determination of Cost Savings

14 **§ 67200. Commission determination**

15 67200. (a) Upon certification of the appropriate environmental documents by the
16 lead agency, the commission shall determine, or cause to be determined, the cost
17 savings that will result from the partial removal of an offshore oil structure as
18 proposed in the application compared to full removal of the structure.

19 (b) The commission shall ensure that any cost savings are accurately and
20 reasonably calculated.

21 **Comment.** Subdivision (a) of Section 67200 continues former Fish and Game Code Section
22 6614(a) without substantive change.

23 Subdivision (b) continues the first sentence of former Fish and Game Code Section 6614(b)
24 without substantive change.

25 **§ 67205. Assistance of other entities**

26 67205. The commission may contract or enter into a memorandum of
27 understanding with any other appropriate governmental agency or other party,
28 including an independent expert, to ensure that cost savings are accurately and
29 reasonably calculated.

30 **Comment.** Section 67205 continues the second sentence of former Fish and Game Code
31 Section 6614(b) without substantive change.

32 **§ 67210. Consideration of government entity estimates**

33 67210. (a) The commission shall consider any estimates of cost savings made by
34 any governmental agency, including, but not limited to, the Internal Revenue
35 Service, the Franchise Tax Board, and the United States Department of the
36 Interior.

37 (b) The commission shall include in its determination a written explanation,
38 which shall be available to the public, of the differences, and the reasons for the

1 differences, between the commission's determination of cost savings and any
2 other estimates of cost savings the commission considered.

3 **Comment.** Section 67210 continues former Fish and Game Code Section 6614(c) without
4 substantive change.

5 **§ 67215. Duties of applicant**

6 67215. The applicant shall provide all necessary documentation, as determined
7 by the commission, to allow the commission to calculate the amount of cost
8 savings. Failure to provide information requested by the commission in a timely
9 manner may result in rejection of the application.

10 **Comment.** Section 67215 continues former Fish and Game Code Section 6614(d) without
11 substantive change.

12 **§ 67220. Finality of determination**

13 67220. The determination made pursuant to this article and submitted to the
14 department by the commission shall constitute the final determination and shall
15 not be revised except by the commission.

16 **Comment.** Section 67220 continues former Fish and Game Code Section 6614(e) without
17 substantive change.

18 **§ 67225. Timeliness**

19 67225. The commission shall take all feasible steps to complete its
20 determination in a timely manner that accommodates the department's schedule
21 for consideration of the application.

22 **Comment.** Section 67225 continues former Fish and Game Code Section 6614(f) without
23 substantive change.

24 **Article 4. Application Approval**

25 **§ 67250. Department responsibilities**

26 67250. Prior to granting conditional approval of an application for partial
27 removal of an offshore oil structure, the department shall do all of the following:

28 (a) Prepare a plan to manage the offshore oil structure after its partial removal.
29 The plan shall include measures to manage fishery and marine life resources at
30 and around the structure in a manner that will ensure that the net benefits to the
31 marine environment identified pursuant to Article 1 (commencing with Section
32 67150) are maintained or enhanced. Consistent with state and federal law,
33 management measures may include a buffer zone in which fishing or removal of
34 marine life is restricted or prohibited.

35 (b) Provide an opportunity for public comment on the application pursuant to the
36 California Environmental Quality Act.

37 (c) Hold a public hearing in the county nearest to the location of the offshore oil
38 structure that is the subject of the application.

1 **Comment.** Section 67250 continues former Fish and Game Code Section 6615 without
2 substantive change.

3 **§ 67255. Standards for granting conditional approval**

4 67255. The department may grant conditional approval of an application for
5 partial removal of an offshore oil structure only if all of the following criteria are
6 satisfied:

7 (a) The partial removal of the offshore oil structure and the planning,
8 development, maintenance, and operation of the structure would be consistent with
9 all applicable state, federal, and international laws, including, but not limited to,
10 all of the following:

11 (1) The federal Magnuson-Stevens Fishery Conservation and Management Act
12 (16 U.S.C. Sec. 1801 et seq.).

13 (2) The federal National Fishing Enhancement Act of 1984 (33 U.S.C. Sec. 2101
14 et seq.).

15 (3) The federal Coastal Zone Management Act (16 U.S.C. Sec. 1451 et seq.).

16 (4) The California Coastal Management Program.

17 (5) The Marine Life Management Act (Title 3 (commencing with Section
18 12100) of Part 4 of Division 6.

19 (6) The Marine Life Protection Act (Part 2 (commencing with Section 60400) of
20 Division 16).

21 (7) State and federal water quality laws.

22 (8) Navigational safety laws.

23 (b) The partial removal of the offshore oil structure provides a net benefit to the
24 marine environment compared to full removal of the structure, as determined
25 pursuant to Article 2 (commencing with Section 67150).

26 (c) The cost savings that would result from the conversion of the offshore oil
27 platform or production facility have been determined pursuant to Article 3
28 (commencing with Section 67200).

29 (d) The applicant has provided sufficient funds consistent with Section 67115.

30 (e) The department and the applicant have entered into a contractual agreement
31 whereby the applicant will provide sufficient funds for overall management of the
32 structure by the department, including, but not limited to, ongoing management,
33 operations, maintenance, monitoring, and enforcement as these relate to the
34 structure.

35 (f) The department has entered into an indemnification agreement with the
36 applicant that indemnifies the state and the department, to the extent permitted by
37 law, against any and all liability that may result, including, but not limited to,
38 active negligence, and including defending the state and the department against
39 any claims against the state for any actions the state undertakes pursuant to this
40 chapter. The agreement may be in the form of an insurance policy, cash
41 settlement, or other mechanism as determined by the department. In adopting
42 indemnification requirements for the agreement, the department shall ensure that

1 the state can defend itself against any liability claims against the state for any
2 actions the state undertakes pursuant to this chapter and pay any resulting
3 judgments. The department shall consult with and, as necessary, use the resources
4 of the office of the Attorney General in preparing and entering into the
5 indemnification agreement.

6 (g) The applicant has applied for and received all required permits, leases, and
7 approvals issued by any governmental agency, including, but not limited to, a
8 lease issued by the commission if the proposed project involves state tidelands and
9 submerged lands. For structures located in federal waters, all of the following
10 requirements shall be met:

11 (1) The department and the owner or operator of the structure reach an
12 agreement providing for the department to take title to the platform or facility as
13 provided in Section 67275.

14 (2) The department acquires the permit issued by the United States Army Corps
15 of Engineers.

16 (3) The partial removal of the structure is approved by the Bureau of Ocean
17 Energy Management, Regulation and Enforcement of the United States
18 Department of the Interior.

19 **Comment.** Section 67255 continues former Fish and Game Code Section 6616 without
20 substantive change.

21 **§ 67260. Conditional approval**

22 67260. Upon a finding that all the requirements of Sections 67250 and 67255
23 have been met, the department shall grant conditional approval to an application
24 for partial removal of an offshore oil structure.

25 **Comment.** Section 67260 continues former Fish and Game Code Section 6617 without
26 substantive change.

27 **§ 67265. Apportionment of cost savings**

28 67265. (a) The cost savings from the partial removal of an offshore oil structure,
29 as determined pursuant to Article 3 (commencing with Section 67200), shall be
30 apportioned and transmitted as described in this section.

31 (b) Upon receipt of conditional approval pursuant to Section 67260, the owner
32 or operator of the structure shall apportion and directly transmit a portion of the
33 total amount of the cost savings to the entities in subdivision (c) as follows:

34 (1) Fifty-five percent, if transmitted before January 1, 2017.

35 (2) Sixty-five percent, if transmitted on or after January 1, 2017, and before
36 January 1, 2023.

37 (3) Eighty percent, if transmitted on or after January 1, 2023.

38 (c) Of the total amount of the cost savings to be transmitted pursuant to
39 subdivision (b), the applicant shall directly transmit the following amounts to the
40 following entities:

1 (1) Eighty-five percent shall be deposited into the California Endowment for
2 Marine Preservation established pursuant to Division 37 (commencing with
3 Section 71500) of the Public Resources Code.

4 (2) Ten percent shall be deposited into the General Fund.

5 (3) Two percent shall be deposited into the Fish and Game Preservation Fund
6 for expenditure, upon appropriation by the Legislature, by the department to pay
7 any costs imposed by this title that are not otherwise provided for pursuant to
8 Section 67115 and subdivision (e) of Section 67255. Any moneys remaining in the
9 Fish and Game Preservation Fund, after providing for these costs, shall be used,
10 upon appropriation by the Legislature, first to reimburse the payment of the startup
11 costs described in Section 67120, and thereafter to conserve, protect, restore, and
12 enhance the coastal and marine resources of the state consistent with the mission
13 of the department.

14 (4) Two percent shall be deposited into the Coastal Act Services Fund,
15 established pursuant to Section 30620.1 of the Public Resources Code, and shall
16 be allocated to support state agency work involving research, planning, and
17 regulatory review associated with the application and enforcement of coastal
18 management policies in state and federal waters pursuant to state and federal
19 quasi-judicial authority over offshore oil and gas development.

20 (5) One percent shall be deposited with the board of supervisors of the county
21 immediately adjacent to the location of the facility prior to its decommissioning.
22 The amount paid to the county shall be managed pursuant to paragraph (1) of
23 subdivision (d) of Section 6817 of the Public Resources Code.

24 **Comment.** Section 67265 continues former Fish and Game Code Section 6618 without
25 substantive change.

26 **§ 67270. Final approval**

27 67270. Upon a determination by the department that the full amount of cost
28 savings has been transmitted pursuant to Section 67265, the department shall grant
29 final approval of the application for partial removal of an offshore oil structure.

30 **Comment.** Section 67270 continues former Fish and Game Code Section 6619 without
31 substantive change.

32 **§ 67275. Requirements for state to take title**

33 67275. The department shall not take title to a decommissioned offshore oil
34 structure in open coastal waters or take responsibility for management of the
35 structure pursuant to this chapter until decommissioning and partial removal of the
36 structure have been completed and both of the following requirements are met:

37 (a) The partial removal of the structure has been granted final approval by the
38 department.

39 (b) The state is indemnified, as required in subdivision (f) of Section 67255,
40 from any liability that may result from approving the partial removal of an

1 offshore oil structure or any liability that may result from the ownership of the
2 structure.

3 **Comment.** Section 67275 continues former Fish and Game Code Section 6620 without
4 substantive change.

5 **§ 67280. Advisory spending plan**

6 67280. Upon the department's final approval of the first application for partial
7 removal of an offshore oil structure pursuant to Section 67270, the conservancy
8 shall create an advisory spending plan for cost savings deposited in the
9 endowment, to provide the Board of Directors of the California Endowment for
10 Marine Preservation with guidance on spending those funds. The conservancy
11 shall update the spending plan no less than once every five years, except the
12 conservancy shall also update the spending plan when each additional application
13 for partial removal is approved. The conservancy shall submit a copy of the
14 spending plan and all updates to the plan to the Legislature, in accordance with
15 Section 9795 of the Government Code, and to the Board of Directors of the
16 California Endowment for Marine Preservation.

17 **Comment.** Section 67280 continues former Fish and Game Code Section 6621 without
18 substantive change.

19 **TITLE 3. OIL SUMPS**

20 **§ 67400. Definition of "oil sump"**

21 67400. For the purposes of this title, "oil sump" has the meaning provided in
22 Section 3780 of the Public Resources Code.

23 **Comment.** Section 67400 continues part of the first sentence of former Fish and Game Code
24 Section 1016(a) and (b) without substantive change.

25 **§ 67405. Hazard to wildlife**

26 67405. (a) Whenever the department determines that an oil sump is hazardous to
27 wildlife, but does not constitute an immediate and grave danger to wildlife, the
28 department shall forthwith notify the State Oil and Gas Supervisor of that
29 condition in order that the State Oil and Gas Supervisor may take action pursuant
30 to Section 3783 of the Public Resources Code to have that condition cleaned up or
31 abated.

32 (b) The department in making that notification shall specify the hazardous
33 conditions.

34 **Comment.** Section 67405 continues former Fish and Game Code Section 1016(a), except for
35 the part that is continued in Section 67400, without substantive change.

36 **§ 67410. Immediate and grave danger to wildlife**

37 67410. (a) Whenever the department determines that an oil sump constitutes an
38 immediate and grave danger to wildlife, the department shall forthwith notify the

1 State Oil and Gas Supervisor of that condition in order that the State Oil and Gas
2 Supervisor may take action pursuant to Section 3784 of the Public Resources Code
3 to have that condition cleaned up or abated.

4 (b) The department, in making that notification, shall specify the immediate and
5 grave danger.

6 **Comment.** Section 67410 continues former Fish and Game Code Section 1016(b), except for
7 the part that is continued in Section 67400, without substantive change.

8 **§ 67415. Regulations**

9 67415. The commission shall promulgate any rules and regulations that are
10 necessary to implement the provisions of this title, including a reasonable
11 definition of the term “hazardous” for the purposes of this title. It is the intent of
12 the Legislature that the department adopt, as a part of those rules and regulations, a
13 definition of the term “wildlife,” as herein employed, which will provide for
14 reasonable exclusions consistent with effectuating the wildlife protection purposes
15 of this title.

16 **Comment.** Section 67415 continues former Fish and Game Code Section 1016(c) without
17 substantive change.

18 **§ 67420. No limitation on other department authority or duties**

19 67420. No provision of this title shall be construed as a limitation on the
20 authority or responsibilities of the department with respect to the enforcement or
21 administration of any provision of state law that it is authorized or required to
22 enforce or administer.

23 **Comment.** Section 67420 continues former Fish and Game Code Section 1016(d) without
24 substantive change.

25 **TITLE 4. FINANCES**

26 **§ 67500. Fish and Wildlife Pollution Account**

27 67500. (a) There is a Fish and Wildlife Pollution Account in the Fish and Game
28 Preservation Fund.

29 (b) The Fish and Wildlife Pollution Account is the successor to the Fish and
30 Wildlife Pollution Cleanup and Abatement Account in the Fish and Game
31 Preservation Fund which is hereby abolished. All references in any law to the Fish
32 and Wildlife Pollution Cleanup and Abatement Account shall be deemed to refer
33 to the Fish and Wildlife Pollution Account. All money in the Fish and Wildlife
34 Pollution Cleanup and Abatement Account on January 1, 1996, shall be
35 transferred to the Fish and Wildlife Pollution Account.

36 (c) The following subaccounts are created within the Fish and Wildlife Pollution
37 Account:

38 (1) The Oil Pollution Administration Subaccount.

39 (2) The Oil Pollution Response and Restoration Subaccount.

(3) The Hazardous Materials Administration Subaccount.

(4) The Hazardous Materials Response and Restoration Subaccount.

Comment. Section 67500 continues former Fish and Game Code Section 13010 without substantive change.

§ 67505. Deposit of specified funds

67505. (a) The state portion of any recovery or settlement of money damages received pursuant to any citation or charges brought under the following sections by the people by or through any state or local public entity shall be deposited in the following subaccounts:

(1) Administrative and judicially imposed fines, penalties, or punitive damages resulting from either civil or criminal action or administrative civil liability for violations of the oil and petroleum product control and discharge provisions of this code, including, but not limited to, Sections 4470, 6302, and 66715, Article 2 (commencing with Section 4480) of Chapter 2 of Title 2 of Part 4 of Division 3, and Title 1 (commencing with Section 66500) and shall be deposited in the Oil Pollution Administration Subaccount or the Oil Pollution Response and Restoration Subaccount as determined by administrative or judicial settlement, or as provided by law.

(2) Administrative and judicially imposed fines, penalties, or punitive damages resulting from either criminal or administrative civil liability for violations of hazardous materials and other pollution laws including, but not limited to, Sections 4470, 11500, and 66715, and Article 2 (commencing with Section 4480) of Chapter 2 of Title 2 of Part 4 of Division 3, shall be deposited in the Hazardous Materials Administration Subaccount or the Hazardous Materials Response and Restoration Subaccount as determined by administrative or judicial settlement or as provided by law.

(b) Notwithstanding Section 3600, any recovery or settlement of money received pursuant to the following sections shall be deposited in the Fish and Wildlife Pollution Account:

(1) Title 1 (commencing with Section 66500) of Part 3 of Division 17.

(2) Section 66705 or 66715.

(3) Chapter 4 (commencing with Section 151) of Division 1.5 of the Harbors and Navigation Code.

(4) Section 13442 of the Water Code.

(5) Proceeds or recoveries from pollution and abatement actions.

(c) Any recovery or settlement of money damages, including, but not limited to, civil penalties arising out of any civil action filed and maintained by the Attorney General in the enforcement of Title 1 (commencing with Section 66500) shall be deposited in the Fish and Wildlife Pollution Account in the Fish and Game Preservation Fund.

Comment. Subdivision (a) of Section 67505 continues former Fish and Game Code Section 13011 without substantive change.

Subdivision (b) continues former Fish and Game Code Section 12017(a)(2)-(6) without substantive change.

Subdivision (c) continues former Fish and Game Code Section 5656 without substantive change.

Notes. (1) Existing Section 13011(a) contains an erroneous cross-reference to “Chapter 2 (commencing with Section 5600) of Part 1 of Division 6.” There is no Section 5600 in existing law. In proposed Section 67505(a)(1), the reference is revised to refer to the relevant pollution-related provisions of the referenced chapter (i.e., proposed “Title 1 (commencing with Section 66500)”). **The Commission invites comment on whether that revision would cause any problems.**

(2) Existing Section 13011(b) refers to “Part 1 (commencing with Section 5500) of Division 6.” That part is a miscellaneous collection of provisions, only one of which appears to be relevant to the purpose of the reference (existing Section 5523). In proposed Section 67505, the reference is narrowed to refer to the provision that would continue Section 5523 (proposed Section 11500). **The Commission invites comment on whether that revision would cause any problems.**

(3) Existing Section 12017(a) refers to Section 13001. In proposed Section 67505(b), that reference is narrowed to refer to the part of Section 13001(a) that appears to be relevant to the purpose of the reference. **The Commission invites comment on whether that revision would cause any problems.**

§ 67510. Continuous appropriation

67510. Moneys in the Fish and Wildlife Pollution Account are continuously appropriated to the department, except as provided in Section 67530.

Comment. Section 67510 continues former Fish and Game Code Section 12017(b) without substantive change.

§ 67515. Expenditures

67515. (a) Funds in the account shall be expended for the following purposes:

(1) Abatement, cleanup, and removal of pollutants from the environment.

(2) Response coordination, planning, and program management.

(3) Resource injury determination.

(4) Resource damage assessment.

(5) Economic valuation of resources.

(6) Restoration or rehabilitation at sites damaged by pollution.

(b) Notwithstanding subdivision (a), funds in the account in excess of one million dollars (\$1,000,000) as of July 1 of each year may also be expended for the preservation of California plants, wildlife, and fisheries.

(c) Funds in the account may be expended for cleanup and abatement if a reasonable effort has been made to have the responsible party pay cleanup and abatement costs and funds are not available for disbursement from the emergency reserve account of the Toxic Substances Control Account in the General Fund pursuant to Section 25354 of the Health and Safety Code.

(d) The department may use funds in the account to pay the costs of consultant contracts for resource injury determination or damage assessment during hazardous material or oil spill emergencies. These contracts are not subject to Part 2 (commencing with Section 10100) of Division 2 of the Public Contract Code.

1 **Comment.** Section 67515 continues former Fish and Game Code Section 12017(c)-(f) without
2 substantive change.

3 **§ 67520. Maximum funds on deposit**

4 67520. (a) Funds on deposit in the subaccounts shall not exceed the amounts
5 prescribed below, adjusted in accordance with Section 2212 of the Revenue and
6 Taxation Code to equal 1995 dollars:

7 (1) The Oil Pollution Administration Subaccount shall not exceed five million
8 dollars (\$5,000,000).

9 (2) The Oil Pollution Response and Restoration Subaccount shall not exceed ten
10 million dollars (\$10,000,000).

11 (3) The Hazardous Materials Administration Subaccount shall not exceed five
12 million dollars (\$5,000,000).

13 (4) The Hazardous Material Response and Restoration Subaccount shall not
14 exceed ten million dollars (\$10,000,000).

15 (b) All funds in the Fish and Wildlife Pollution Account in excess of the
16 amounts listed above, on June 30 of each fiscal year, shall be used by the
17 department in succeeding fiscal years for projects that preserve California plants,
18 wildlife, and fisheries.

19 **Comment.** Section 67520 continues former Fish and Game Code Section 13012 without
20 substantive change.

21 **§ 67525. Prudent reserve**

22 67525. (a) Appropriations from either the Oil Pollution Administration
23 Subaccount or the Hazardous Materials Administration Subaccount shall not
24 exceed one third of the maximum fund level established under Section 67520 in
25 order to maintain a prudent reserve for future appropriations.

26 (b) If the director or his or her designee expends funds from the prudent reserve
27 established pursuant to subdivision (a) for activities authorized under subdivision
28 (b) of Section 67530, the director or the director's designee shall ensure that there
29 are adequate funds remaining in those subaccounts to carry out their purposes.
30 Expenditures from the prudent reserve shall be repaid in part, or in full, from any
31 funds received pursuant to subdivision (a) of Section 67505 until those reserves
32 are fully reimbursed.

33 (c) The director or his or her designee, shall recover from the spiller, responsible
34 party, or, in the absence of those responsible parties, from a particular pollution
35 abatement or remediation account, all expenditures paid pursuant to subdivisions
36 (b) and (d) of Section 67530, and all costs incurred by the department arising from
37 the administration and enforcement of applicable pollution laws. The director or
38 his or her designee may request, and a district attorney, city attorney, or other
39 prosecuting agency, as part of a prosecution or negotiation, may allege a claim for,
40 these costs and expenditures and shall deposit any recoveries into the fund from
41 which they were expended.

(d) The director or his or her designee shall ensure that there are adequate funds in the accounts and subaccounts specified in this section to carry out their purposes.

Comment. Section 67525 continues former Fish and Game Code Section 13013 without substantive change.

Note. Existing Section 13013(c) refers to “expenditures paid from the accounts established pursuant to subdivisions (b) and (d) of Section 13230.” That reference is confusing. While Section 13230(b) and (d) do authorize expenditures, they do not establish any accounts. In proposed Section 67525, the language has been revised to eliminate any reference to the establishment of accounts. **The Commission invites comment on whether that revision would cause any problems.**

§ 67530. Expenditures from specified subaccounts

67530. (a) Funds deposited in the Oil Pollution Administration Subaccount created pursuant to paragraph (1) of subdivision (c) of Section 67500 shall, upon appropriation by the Legislature, only be expended by the director, his or her deputy, or designee, for the costs of administering the pollution response, abatement, and habitat restoration activities not otherwise authorized by the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act.

(b) Notwithstanding Section 13340 of the Government Code, funds deposited in the Oil Pollution Response and Restoration Subaccount created pursuant to paragraph (2) of subdivision (c) of Section 67500 are continuously appropriated to the department for expenditure by the director, his or her deputy, or designee, without regard to fiscal years for response and restoration activity related to oil spills not otherwise authorized by the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act.

(c) Funds deposited in the Hazardous Materials Administration Subaccount created pursuant to paragraph (3) of subdivision (c) of Section 67500 shall, upon appropriation by the Legislature, only be expended by the director, his or her deputy, or designee, for the reasonable cost of administering the hazardous materials response and restoration activities of the department.

(1) These activities shall include the cross training and staffing of existing department and interagency personnel necessary to achieve efficiency in the use of existing funds and resources in response to hazardous materials and restoration activities of the department.

(2) The department may appoint and contract with technical experts to assist in the response and remediation of toxic material discharges.

(d) Notwithstanding Section 13340 of the Government Code, funds deposited in the Hazardous Materials Response and Restoration Subaccount are continuously appropriated to the director, his or her deputy, or designee, for expenditure without regard to fiscal years for the response and abatement of hazardous materials that are spilled or discharged on the lands and in the waters of the state, and for the protection, preservation, and restoration of fish and wildlife impacted by discharges of hazardous materials into the environment of the state. No funds

appropriated from this subaccount shall be expended to establish personnel positions nor shall any personnel positions be created with contract funds from this subaccount.

Comment. Section 67530 continues former Fish and Game Code Section 13230 without substantive change.

§ 67535. Cost accounting system

67535. Consistent with Section 3525, the department shall maintain a cost accounting system that accounts for the costs of each activity or program engaged in pursuant to Section 67530 using funds from the subaccounts listed in that section.

Comment. Section 67535 continues former Fish and Game Code Section 13231 without substantive change.

PART 4. WATER DIVERSION, OBSTRUCTION, AND ALTERATION

TITLE 1. DAMS, CONDUITS, AND SCREENS

CHAPTER 1. GENERAL PROVISIONS

Article 1. Definitions

§ 68000. Definitions

68000. As used in this title:

(a) “Dam” includes all artificial obstructions.

(b) “Conduit” includes pipe, millrace, ditch, flume, siphon, tunnel, canal, and any other conduit or diversion used for the purpose of taking or receiving water from any river, creek, stream, or lake.

(c) “Owner” includes the United States (except that for the purpose of Sections 68105, 68405, and 68650, “owner” does not include the United States as to any dam in the condition the dam existed on September 15, 1945), the State, a person, political subdivision, or district (other than a fish and game district) owning, controlling or operating a dam or pipe.

(d) “United States” means the United States of America, and in relation to any particular matter includes the officers, agents, employees, agencies, or instrumentalities authorized to act in relation thereto.

Comment. Section 68000 continues former Fish and Game Code Section 5900 without substantive change.

Note. Existing Section 5900 (c) provides that, in specified sections, the term “owner” does not include the United States. One of the specified sections, existing Section 5933, does not use the term “owner.” The reference to Section 5933 has not been continued in proposed Section 68000. **The Commission invites comment on whether that revision would cause any problems.**

Article 2. Application of Chapter to United States

§ 68050. Legislative intent

68050. (a) In including the United States within the scope of this title the Legislature declares that it understands that the law and policy of the United States with respect to the development of water resources, the reclamation of land from flood and overflow, and in all other respects is to comply with state laws respecting water.

(b) The provisions of this title provide a procedure for the United States to comply with the provisions and policy of state law respecting its subject matter.

Comment. Section 68050 continues former Fish and Game Code Section 5902 without substantive change.

§ 68055. Application to construct or enlarge dam

68055. The United States shall file with the commission pursuant to this title a separate application for each dam it proposes to construct or enlarge if an owner other than the United States would be required to file an application pursuant to Division 3 of the Water Code in order to construct or enlarge the same dam. The application shall be on forms provided by the department.

Comment. Section 68055 continues former Fish and Game Code Section 5903 without substantive change.

§ 68060. Application content

68060. (a) The application of the United States shall give the following information:

(1) The name and address of the owner.

(2) The location, type, size, and height of the proposed dam and appurtenant works.

(3) The storage capacity of the reservoir.

(4) Such other pertinent information as the commission requires.

(5) As accurately as may be readily obtained, the area of the drainage basin, rainfall, and stream flow records and flood flow records and estimates.

(6) The purpose for which the impounded or diverted water is to be used.

(7) Such other appropriate information as may be necessary in a given instance.

(b) If the physical conditions involved and the size of the dam render the above requirements unnecessary as to drainage areas, rainfall, stream flow, and flood flow, the commission may waive the requirements.

Comment. Section 68060 continues former Fish and Game Code Section 5904 without substantive change.

CHAPTER 2. PROHIBITED OBSTRUCTIONS

Article 1. General Prohibition

§ 68100. Obstruction generally

68100. (a) No person shall cause or having caused, permit to exist any log jam, debris accumulation or other artificial barrier in any stream in this state, which prevents the passing of fish up and down stream or which the Commission determines to be deleterious to fish.

(b) The Commission determination is subject to court review.

(c) This section does not apply to a dam for the storage or diversion of water, a public bridge and the approaches thereto, a groin, jetty, seawall, breakwater, bulkhead, wharf, or pier, that is permitted by law, or debris from mining operations,

Comment. Section 68100 restates former Fish and Game Code Section 5948 without substantive change.

Note. Proposed Section 68100 would restate existing Section 5948 to improve its clarity, without changing its substantive effect. The existing provision reads as follows:

“No person shall cause or having caused, permit to exist any log jam or debris accumulation or any other artificial barrier, except a dam for the storage or diversion of water, public bridges and approaches thereto, groins, jetties, seawalls, breakwaters, bulkheads, wharves and piers permitted by law, and debris from mining operations, in any stream in this State, which will prevent the passing of fish up and down stream or which is deleterious to fish as determined by the commission, subject to review by the courts.”

The Commission invites comment on whether that restatement would cause any problems.

Article 2. Prohibition in Specified Districts

§ 68105. Obstruction in specified districts

68105. Except as otherwise provided in this code, it is unlawful to construct or maintain in any stream in Districts 2505, 2510, 2515, 2525, 2530, 2535, 2540, 2545, 2550, 2555, 2560, 2565, 2595, 2600, 2605, 2660, and 2665, any device or contrivance that prevents, impedes, or tends to prevent or impede, the passing of fish up and down stream.

Comment. Section 68105 continues former Fish and Game Code Section 5901 without substantive change.

See also Section 6380 (enforcement).

Note. Existing Section 5901 refers to District 1 7/8 and District 2 3/4. Neither of those districts exist in the current code. The references to them are omitted from proposed Section 68104. **The Commission invites comment on whether that revision would cause any problems.**

CHAPTER 3. FISHWAYS

Article 1. General Prohibitions and Obligations

§ 68300. Damage or obstruction

68300. It is unlawful to willfully destroy, injure, or obstruct any fishway.

Comment. Section 68300 continues former Fish and Game Code Section 5936 without substantive change.

§ 68305. Maintenance

68305. The owner of any dam upon which a fishway has been provided shall keep the fishway in repair and open and free from obstructions to the passage of fish at all times.

Comment. Section 68305 continues former Fish and Game Code Section 5935 without substantive change.

§ 68310. Water flow

68310. (a) The owner of any dam shall allow sufficient water at all times to pass through a fishway, or in the absence of a fishway, allow sufficient water to pass over, around or through the dam, to keep in good condition any fish that may be planted or exist below the dam.

(b) During the minimum flow of water in any river or stream, permission may be granted by the department to the owner of any dam to allow sufficient water to pass through a culvert, waste gate, or over or around the dam, to keep in good condition any fish that may be planted or exist below the dam, when, in the judgment of the department, it is impracticable or detrimental to the owner to pass the water through the fishway.

Comment. Section 68310 continues former Fish and Game Code Section 5937 without substantive change.

§ 68315. Fishing in impounded waters

68315. (a) The owner of a dam shall accord to the public for the purpose of fishing, the right of access to the waters impounded by the dam during the open season for the taking of fish in the stream or river, subject to the regulations of the commission.

(b) Subdivision (a) does not apply to any impoundment of water by a dam that is wholly located on privately owned land that is primarily agricultural or residential in nature if the impounded waters are from a stream or river that is not naturally frequented by fish and if the dam does not prevent the free passage of fish over or around the dam. The Legislature finds and declares that this subdivision is intended to be declaratory of existing law.

Comment. Section 68315 continues former Fish and Game Code Section 5943 without substantive change.
