

ATTENTION HUNTERS:

Nonlead ammo required at CDFW properties July 1

Beginning on July 1, 2015, certified nonlead ammunition will be required for all hunting on California Department of Fish and Wildlife (CDFW) properties (as defined in Sections 551, 552 and 630, Title 14, CCR).

If you plan to hunt any CDFW properties during the 2015-16 hunting season, you should purchase nonlead ammunition as soon as possible. Some nonlead ammunition may soon be in short supply so hunters should plan accordingly.
