Site Overview

Photos are representative of the South Coast Region and may not be within this MPA.

What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

What is an SMCA?

An **SMCA** is a type of MPA that protects resources by allowing for only specific types of recreational and/or commercial take to occur.

Anacapa Island SMCA Key Habitats

- **Beaches:** 0.19 miles
- **Rocky shores:** 3.50 miles
- **Surfgrass:** 1.06 miles
- **Sand (all depths):** 6.62 square miles
- **Rock (all depths):** 0.14 square miles
- **Unidentified (all depths):** 0.55 square miles

Anacapa Island SMCA Overview

- **MPA size:** 7.3 square miles
- **Depth range:** 0 to 490 feet
- **Along-shore span (shoreline):** 2.0 miles

Where is Anacapa Island SMCA?

Boundaries and Regulations

This area includes Anacapa Island State Marine Conservation Area and the adjoining federal Anacapa Island Marine Conservation Area. Coordinates are provided for outer boundaries of the joined state and federal areas.*

Boundary: This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

- 34° 00.828' N. lat. 119° 26.623' W. long.;
- 34° 00.800' N. lat. 119° 26.700' W. long.;
- 34° 04.998' N. lat. 119° 26.700' W. long.;
- 34° 04.998' N. lat. 119° 24.600' W. long.; and
- 34° 00.417' N. lat. 119° 24.600' W. long.

Permitted/Prohibited Uses: Take of all living marine resources is prohibited EXCEPT for the recreational take of spiny lobster and [pelagic finfish](#) and the commercial take of spiny lobster.

** The state conservation area and federal conservation area have identical regulations. For complete state boundaries and rules, see California Code of Regulations Title 14, Section 632(b). For federal MPAs see Code of Federal Regulations, Federal Register 15 Part 922 and 50 CFR Part 660.*

Anacapa Island State Marine Conservation Area

How and Why Anacapa Island was Chosen for an SMCA

In 1998, the Channel Islands Marine Resources Restoration Committee, a group of concerned citizens, requested the Fish and Game Commission (Commission) to establish a network of MPAs around the northern Channel Islands. As a result of the request, the Commission directed the California Department of Fish and Wildlife and Channel Islands National Marine Sanctuary (Sanctuary) to jointly support a process to discuss MPAs in the Channel Islands area. After more than two years of meetings involving a broad based constituent group, CDFW and the Sanctuary drafted a recommendation for Channel Islands MPAs. Regulations took effect for these 13 sites on April 9, 2003. www.wildlife.ca.gov/Conservation/Marine/MPAs/Planning-Process#26189705-channel-islands Anacapa Island SMCA was one of them.

In 2008, while implementing the [Marine Life Protection Act](#) of 1999, Anacapa Island SMCA was retained by the Commission as part of the south coast region of MPAs with no regulatory changes from those already established and in effect since 2003.

Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.

For a list of species likely to benefit from MPAs statewide: www.dfg.ca.gov/marine/mpa/species.asp

For a list of species likely to benefit from south coast MPAs: www.dfg.ca.gov/marine/pdfs/binders_sc/b2q.pdf
