Reporting Oil Sightings - How do I report spilled oil?

If you spot spilled oil: Report your sighting to the [National Response Center](#) at **1-800-424-8802**.

Do not attempt to pick up the oil yourself. The Center for Toxicology and Environmental Health recommends that beach visitors in the Ventura area avoid contact with oil sheen on the water and tarballs on the beach. If oil gets on your skin, quickly clean the area with soap and water, baby oil, or another safe cleaning compound.
