Site Name: Abandoned check dam (removed)

Stream Name: Arroyo Sequit

Structure Owner:

Year Remediated: 2014

Site Type: Dam

Site Status After Remediation: Remediated, fish response unconfirmed

Species Benefited After Remediation:

Immediate Downstream barrier PAD ID: [705778](#)

PAD ID: [723524](#)

Tributary To: Pacific Ocean

Barrier Remediation By: California Conservation Corps

Barrier Description Prior to Remediation: Partial

Count of Barriers Downstream: 2

Count of Barriers Upstream: 6

Distance Upstream to Next Barrier or Limit of Anadromy : 1.34537 Miles

*Site statistics based on June 2015 version of the Passage Assessment Database

Notes: The California Conservation Corps worked with the California State Parks and the Bay Foundation to remove the check dam structure and protruding metal pipe from Arroyo Sequit Creek. Two barriers (arizona xings: one partial (705777) and one total (705778)) downstream of the check dam are slated for removal by State Parks in 2015. They will be replaced with free span bridges. Before: Partial barrier assessed using the DFG restoration manual, and severity/passage determined by Caltrout in a 2006 assessment. Rating: GRAY, concrete dam, jump height 0 m, pool depth 0.92 m, slope 4.6%.
