*Site statistics based on June 2015 version of the Passage Assessment Database

Site Name: Rock and mortar dam (removed)

Stream Name: Holy Jim Creek

Structure Owner: U.S. Forest Service

Year Remediated: 2014

Site Type: Dam

Site Status After Remediation: Remediated, fish response unconfirmed

Species Benefited After Remediation: Steelhead

Immediate Downstream barrier PAD ID:

PAD ID: 758709

Tributary To: Arroyo Trabuco

Barrier Remediation By:U.S. Forest Service

Barrier Description Prior to Remediation:Total

Count of Barriers Downstream:

Count of Barriers Upstream:

Distance Upstream to Next Barrier or Limit of Anadromy : Miles

Notes: In December 2014, the Cleveland National Forest in conjunction with the Tahoe Mine Reclamation Crew removed this dam. Before: Total barrier per field survey conducted by U.S. Forest Service. 2013 USFS survey comments: Rock and mortar dam (5' h x 2.5' w), condition: Good. Barrier to juveniles Solid and intact, spillway is degraded and plugged with bedload Dams are planned for removal. Removal of dams will likely be completed between 2017- 2019.
