## Overview

This document contains a list of animal taxa found within California or off the coast of the State that have been classified as endangered or threatened by the California Fish and Game Commission (FGC; state listed) or by the U.S. Secretary of the Interior or the U.S. Secretary of Commerce (federally listed). This list also includes taxa that are official candidates for state or federal listing, or have been officially proposed for federal listing, as well as taxa that were once listed but have since been delisted.

## Background

State listing is pursuant to the California Endangered Species Act of 1984 (CESA; California Code of Regulations, Title 14, Chapter 6, §§783.0-787.9; Fish and Game Code Chapter 1.5, §§ 2050-2115.5). The designations “Endangered” and “Rare” were first established in 1970 by the original California Endangered Species Act, and taxa with a state list date of June 27, 1971 were protected under this regulation. In 1984, CESA was amended, at which time the “Rare” designation was changed to “Threatened,” and on January 1, 1985, all animal species previously designated as “Rare” were reclassified as “Threatened.” The official California listing of Endangered and Threatened animals is contained in the California Code of Regulations, [Title 14, §670.5](#).

Federal listing is pursuant to the Federal Endangered Species Act of 1973, as amended (16 USC §§1531-1544; 50 CFR §§17.1-17.108). The federal agencies responsible for listing are the United States Fish and Wildlife Service (USFWS) and the National Marine Fisheries Service (NMFS). Prior federal regulations include the Endangered Species Conservation Act of 1969, and the Endangered Species Preservation Act of 1966, under which all species with a federal list date of March 11, 1967 were listed. The official federal listing of Endangered and Threatened animals is published in the Federal Register, [50 CFR §17.11](#).

## CDFW Fully Protected

The Fully Protected statute was the State's initial effort in the 1960s, pre-dating any endangered species act, to identify and provide protection to animals that were rare or faced possible extinction. Lists were created for birds, mammals, reptiles and amphibians, and fish. Most of the species on these lists have subsequently been listed under the California and/or federal endangered species acts; the exceptions are white-tailed kite, golden eagle, trumpeter swan, northern elephant seal, and ringtail cat. The white-tailed kite, golden eagle, and ringtail cat are tracked in the CNDDDB. The trumpeter swan and northern elephant seal are not tracked by the CNDDDB. More information on Fully Protected species and the take provisions can be found in the [Fish and Game Code](#): birds at [§3511](#), mammals at [§4700](#), reptiles and amphibians at [§5050](#), and fish at [§5515](#). Additional information on Fully Protected fish can be found in the [California Code of Regulations, Title 14, Division 1, Subdivision 1, Chapter 2, Article 4, §5.93](#). In July 2023, [Senate Bill no. 147](#) removed American peregrine falcon, brown pelican, and thickettail chub as fully protected species under the Fish & Game Code because they have been delisted-recovered under CESA or are considered extinct.

## List Content

Common and scientific names are shown as they are in current usage, typically based standards used by the [NatureServe Natural Heritage Network](#), unless otherwise noted. If current nomenclature differs from that in state and federal listing documents, the nomenclature at the time of listing is provided in the notes. Synonyms, name changes, and other clarifying points are also noted. Where state and federal listings apply to different ranges, subspecies, or populations, each taxa will be listed separately, and statuses that apply to only a portion of the taxon, or that also encompass other taxa, will be shown in parentheses. Where state and federal listings differ in name, but represent the same biological unit, the common name will be listed using the California state listing; the federal name will be listed in the notes.

The “List Date” for final federal listing is the date the listing became effective. This is typically not the date of publication of the rule in the Federal Register; it is usually about 30 days after publication, but may be longer.

If an animal was previously listed and no longer has any listing status, the entry text is grey. If an animal was previously proposed or a candidate for listing, but the listing was not warranted or was revoked, the record has been removed from the table.

For taxa having more than one status entry, the current status is in bold and underlined. All dates are in the “YYYYMMDD” format.

<i>Hydromantes shastae</i>	Shasta salamander	ST	19710627				<i>Hydromantes shastae</i> has been proposed to consist of cryptic genetic structuring that may warrant recognition of additional species named as <i>Hydromantes samweli</i> and <i>Hydromantes wintu</i> (Bingham et al. 2018, Bull. Mus. Comp. Zool. 161(10):403-427). Until formally reviewed by the Fish and Game Commission, all populations in the Shasta salamander complex are legally state threatened.
<i>Hydromantes shastae</i>	Shasta salamander	(ST)					Occurs southeast of Shasta Reservoir and Squaw Creek.
<i>Hydromantes wintu</i>	Wintu Shasta salamander	(ST)					Occurring on the Shasta Reservoir peninsula between McCloud River Arm and Pit River Arm.
<i>Hydromantes samweli</i>	Samwel Shasta salamander	(ST)					Occurs around Shasta Reservoir from Squaw Creek to Lake McCloud & southwest to French Gulch.
<i>Hydromantes brunus</i>	limestone salamander	ST	19710627	Fully Protected			
<i>Plethodon asupak</i>	Scott Bar salamander	ST	19710627				As recognized by the FGC, the Scott Bar salamander is currently protected under the CESA as a sub-population of the Siskiyou Mountains salamander ( <i>Plethodon stormi</i> ) (Calif. Regulatory Notice Register, No. 21-Z, p. 916, 20070525).

<i>Plethodon stormi</i>	Siskiyou Mountains salamander	ST	19710627				The common name is spelled incorrectly in Title 14 of the CCR as “Siskiyou mountain salamander.” Was a State Candidate for Delisting on 20050930. No action was taken by the FGC after the CDFW presented a Department report on 20061103; SMS was tabled at the 20070503 FGC meeting, and there was nothing to report regarding the Department’s environmental documents at the 20071011 meeting. Therefore, with respect to Fish & Game Code 2075, it is assumed that this is no longer a candidate for delisting.
<i>Spea hammondii</i>	western spadefoot				FPT	20231205	
<i>Anaxyrus californicus</i>	arroyo toad				FE	19950117	At the time of listing, arroyo toad was known as <i>Bufo microscaphus californicus</i> , a subspecies of southwestern toad. In 2001, it was determined to be its own species, <i>Bufo californicus</i> . Since then, many species in the genus <i>Bufo</i> were changed to the genus <i>Anaxyrus</i> , and now arroyo toad is known as <i>Anaxyrus californicus</i> .
