

FORT SCOTT MUNITIONS®

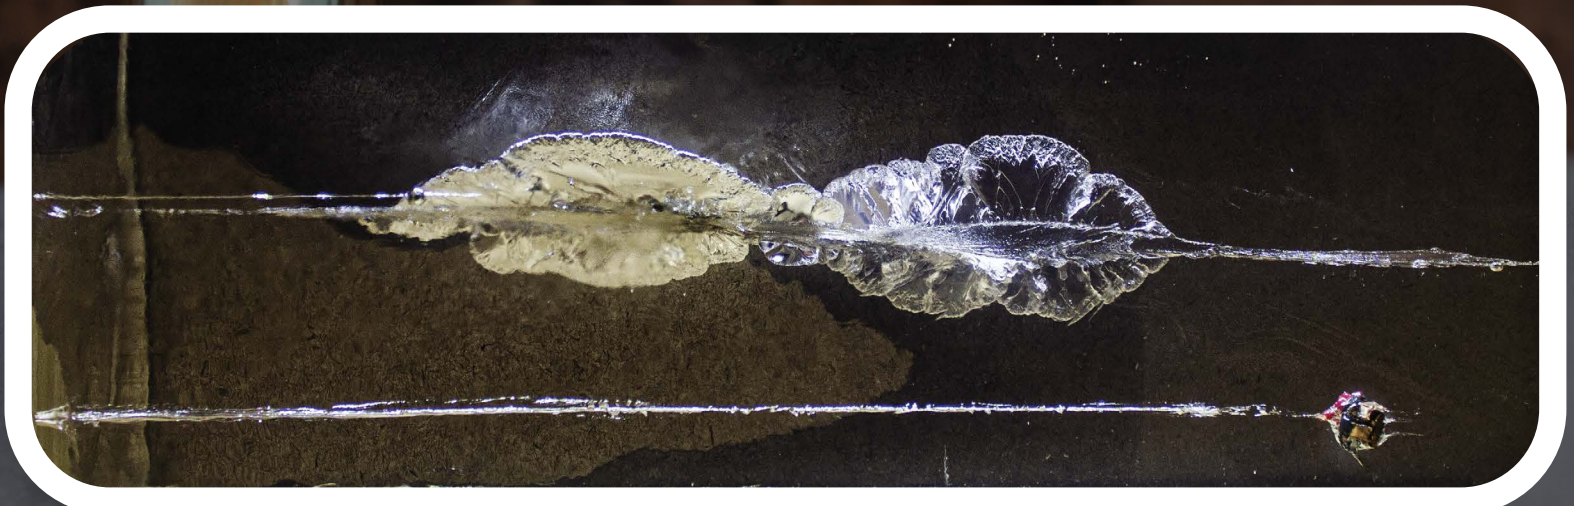

THIS IS TUMBLE UPON IMPACT®

SOLID COPPER SPUN SCS®

SOLID BRASS SPUN SBS®

Fort Scott Munitions® Tumble Upon Impact® ammunition is an all in one designed cartridge. From hunting, match shooting, to every day carry self defense, this ammunition offers superior results for every occasion. The TUI® bullets are machined from solid copper or brass rods on a CNC lathe. With the quality control that we require every day and the tight tolerances we keep our projectiles, you are able to trust and expect the same results with every pull of the trigger. With the bullets being solid copper or brass, you have no moving parts to rely on. Unlike most ammo, the TUI® rounds do the most damage internally instead of first contact with skin. With our patented design, our TUI® ammo tumbles end over end when it comes in contact with water based tissue, creating a more devastating wound channel.

A close-up, high-contrast photograph of a rifle magazine filled with ammunition. The magazine is dark, and the brass casings of the rounds are visible, with their pointed bullets protruding. The lighting is dramatic, highlighting the metallic textures and the sharp points of the bullets.

This was my first experience with Fort Scott Munitions and sometimes you need to know that your work is maybe the best that is out there. Your product speaks for itself, excellent ammunition. But your customer service is way ahead of the others. You went beyond the others by notifying me of when my order was out for delivery and then notified me that my order had been delivered. Your company, your products, and your customer service is very much appreciated. I will order again soon.

- Albert (Customer Review)
