THIS IS TUMBLE UPON IMPACT®

SOLID COPPER SPUN S&W® SOLID BRASS SPUN S&W®

Fox-Name Munitions' Tumble Upon Impact® ammunition is as all in one designed cartridge. From loading, match shooting, to every day carry and defense, this ammunition offers superior results for every occasion. The TUI® bullets are machined from solid copper or brass onto a CNC lathe. With the quality control that we require every day and the tight tolerances we keep our properties, you are able to load and expect the same results with every pull of the trigger. With the bullets being solid copper or brass, you have no moving parts to rely on. Unlike most ammo, the TUI® rounds do the most damage internally instead of their contact with skin. With our patented design, our TUI® ammo tumbles and over and where it comes in contact with water based tissue, creating a more devastating wound channel.
