SUMMARY OF 2002 DEER KILL

The 2002 California Deer Kill Report summarizes information gathered from deer tag report cards returned by successful hunters. Data were analyzed by season or hunt category; zone and hunt (Deer Management Subunit, DMS); zone of kill (Deer Management Unit, DMU); Deer Assessment Unit (DAU); county; Department region; Private Lands Management Area (PLM); archery method kill; method of kill; sex; antler class; and land ownership. Also included within the report are analyses of duplicate kill (hunters killing two deer); county of residence information; 2002 deer hunting regulation summary and 2002 deer tag draw summary. In addition, more extensive historical kill data have been included in various tables.

The majority of tables contained in this report present data which is derived directly from returned deer tags (reported kill). Tables 1a and 1b contain estimated kill information as well. The estimated kill is the reported kill times a correction factor which is specific for each zone. This zone correction factor is an estimator of the non-reporting rates specific to each zone and takes into account those successful hunters that failed to submit the report card section of the deer tag. The zone correction factors were derived through a telephonic survey of hunters in 1994 and 1995, and through cross comparisons of meatlocker records and report card databases. Zone specific non-reporting rates vary from 0 to 60 percent, while the 2002 statewide average non-reporting rate was approximately 45 percent. The highest non-reporting rates occur in the A and B Zones, while the lowest are in the X Zones. The reported deer kill on Private Lands Management Areas (PLM) is treated as the actual kill and non-reporting rates are not applied.

When describing deer kill information from this report, it is important to differentiate between **reported** or **estimated deer kill** in order to reduce inconsistency. The **estimated deer kill** is considered to be a more realistic approximation of the actual deer harvest and is used primarily for population modeling and analysis within the draft and final versions of the Environmental Document Regarding: Deer Hunting. Whenever possible the estimated deer kill should be used to more accurately reflect the total deer kill attributed to hunting for purposes of determining the effects of hunting on deer populations. When using deer kill data for comparison and detailed analysis of historical kill, method of kill, land ownership, area, and other parameters, it is best to use **reported deer kill** figures for consistency.

2002 ESTIMATED DEER KILL

In 2002, the statewide total estimated deer kill including all zones, hunts, and PLMs was approximately **33,311**; of which **448** were does, and **32,863** were bucks. ; The estimated deer kill for state zones and hunts accounted for approximately 32,737 (**311** does and **32,426** bucks), while the actual deer kill on PLMs was **574** deer (**137** does and **437** bucks). ; The overall statewide hunter success was estimated to be **17.0** percent (PLMs excluded). ; The estimated archery kill for statewide zones and hunts was **2,398** deer (PLMs excluded). ; Comparisons of estimated kill numbers between tables may not agree due to rounding.

2002 REPORTED DEER KILL

In 2002, the statewide total reported deer kill including all zones, hunts, and PLMs was ; **18,315** deer; of which **413** were does, and **17,902** were bucks. ; The reported deer kill for state zones and hunts was **17,741** deer (**276** does and **17,465** bucks). ; The overall statewide reported hunter success was **9.2** percent (PLMs excluded). ; The reported archery kill for statewide zones and hunts was **1,340** deer (PLMs excluded).

ADDITIONAL INFORMATION

Deer hunting zone and season date information are contained in the *California Hunting Regulations, Mammals and Furbearers* booklet, 2002. ; Information on tag allocation procedures, buck-doe-fawns ratios, and effects of deer hunting are contained in the *2002 Final Environmental Document Regarding Deer Hunting* (available in county libraries).

TABLE 1b NOTES:

- (a) Table 1b does not include PLM kill data. PLM kill analysis is included in TABLES 7a through 7f.
- (b) Estimated kill numbers may not agree with other tables due to rounding.
- (c) Archery Only tag kill is separate and not included within individual zones. See TABLE 8f for zone specific distribution of Archery Only tag kill.
- (d) Tag quotas and tags issued are for multi-zone tags, and not issued for individual zones. Unable to calculate hunter success for individual zones for multi-zone tags with single quotas due to unknown hunter effort.
