SALMON AND TROUT GO TO FIRST GRADE
A Thematic Unit

Compiled and created by
Gail Hickman Davis, Salmonids in the Classroom Program Coordinator,
California Department of Fish and Game
Central Region
Linda Rasmussen, First Grade teacher,
Hazel Fischer Elementary School, Arnold, CA

December 2009
Salmonids in the Classroom is part of a statewide education program sponsored by the California Department of Fish and Game along with many community partners including fishing organizations and other government entities throughout the state. You may have heard it called Trout in the Classroom or Salmon in the Classroom depending on the region of the state that the program serves.

This program involves training teachers to hatch trout or salmon in their classrooms. The classes then take them to their local waterway to be released into the wild.

We encourage teachers to take part in this program but it is not necessary to take advantage of the lessons in this book. Only one ongoing lesson directly involves the students in observing the fish.

The first step is to teach the students about the life cycle of the salmon and trout. This is done best with the aid of pictures and, if available, videos. After they understand that concept, the other lessons will fall in place.

It is our hope that this unit, Salmon and Trout Go To First Grade, will help you introduce and intrigue your students regarding the wonders of salmon, trout, and other life in their local rivers. We encourage you and your students to visit the local river or creek, either as a group or with their families and friends. Even if a field trip is not possible, we hope you enjoy using this guide to open the children’s eyes to the delights of nature.

If a child is to keep alive his inborn sense of wonder... he needs the companionship of at least one adult who can share it, rediscovering with him the joy, excitement and mystery of the world we live in. — Rachel Carson
The California Department of Fish and Game maintains native fish, wildlife, plant species and natural communities for their intrinsic and ecological value and their benefits to people. This includes habitat protection and maintenance in a sufficient amount and quality to ensure the survival of all species and natural communities. The Department is also responsible for the diversified use of fish and wildlife including recreational, commercial, scientific and educational uses.

This publication includes adaptations or material from the publications:

_The Fish Hatchery Next Door, An Educator’s Guide_ by the Oregon Department of Fish and Wildlife

_Salmonids in the Classroom, curriculum resource materials for the study of Pacific salmonids in British Columbia_, prepared by their 36 federal Department of Fisheries and Oceans and the provincial Ministry of Environment, Lands, and Parks.

_Salmon and Trout Go to School_, written by Diane Higgins and illustrated by Gary Bloomfield.

Word searches and fill-ins were created with Discovery Channel School’s Puzzlemaker.

Includes illustrations by Gail Hickman Davis.

Habitats of Salmon and Trout

Trout and salmon need cold water to survive and grow. Snow melt from mountain peaks, and rainfall feed their stream and lake habitats. Healthy salmonid streams are usually shaded by trees. The tree roots make the stream banks stable and provide hiding places for the fish. Leaves from the trees fall into the stream and become food for insects, which are in turn eaten by salmon and trout.

As young salmon and trout grow larger, they move from shallow areas into deep pools. Pools are scoured when water plunges over or around boulders and logs. The "bubble curtain" is a favorite place for salmon and trout. They can't be seen by predators above and there is plenty of oxygen. The current brings insects and other small food items. At the end of pools, where the stream narrows, the current picks up and washes the gravels clean, making them ideal for nests.

Some salmon and trout spend their lives in lakes, constantly moving about to find food. The surface of lakes may freeze in winter and the water underneath becomes quite cold. After spring thaw, salmonids feed around the edges of lakes. As the lake surface warms in summer, they retreat to the cold depths. They eat small animals called plankton, and insects that alight on the surface of the lake. As trout grow larger in lake environments, they often feed on small fish, such as minnows or even smaller trout.
Seagoing Salmon And Steelhead

Anadromous salmonids spend part of their lives in salt water. Chinook salmon, Coho salmon, steelhead trout and coastal cutthroat trout are all Anadromous. These fish leave their streams and migrate out to the ocean, where they grow much larger than salmonids that stay in the stream all the time. Chinook usually move into the estuary when they are several months old. The other anadromous fish all spend at least one year in the stream before migrating to sea.

At the river’s mouth, fresh water flows into the sea. The sea also surges into the river, and salt water mixes with fresh water. This area of brackish water is the estuary. Migrating fish stay in the estuary for a while before entering the ocean. They find new types of food to eat and grow larger, which helps them survive in the ocean. Their bodies also adjust to the salt water.

The ocean is a vast resource for the fish. They find much to eat, and they grow very large. Cutthroat trout usually keep close to the river’s mouth, and stay for only a few months, so they remain fairly small. But salmon and steelhead stay in the ocean for several years and grow very large. They may swim many miles up and down the coast line. California's north coast is one of the places richest in food in the Pacific Ocean.
Trout Life Cycle

Eggs develop in the gravel and hatch into alevins.

Alevins stay in the gravel. They get food from their yolk sacs and grow bigger.

Spawning trout lay eggs in gravel stream bottoms. Trout often spawn several times in their lives.

After the yolk sac is used up, the tiny fish are fry. They swim out of the gravel to find food. They will live in gentle water near the stream bank until they get bigger.

As the fry grow stronger, they can take up positions in the main current of the stream. They eat insects and other small animals that live in, or fall into, the stream.

Adults often eat other fish, even smaller trout. Although they may live longer, trout do not grow as large as their relatives, the salmon and steelhead, because they don’t go out to sea.

Some trout live in lakes. They may live there all their lives, but often spawn in streams.
Eggs develop in the gravel and hatch into alevins. Alevins stay in the gravel. They get food from their yolk sacs and grow bigger.

When the yolk sac is gone, the tiny fry swim out of the gravel and begin to eat insects and other food.

Spawners lay eggs in redds. After spawning, chinook and coho salmon die. Steelhead may swim back to the sea and then return to the river to spawn again.

Salmon return to their home rivers to spawn. They swim hard and jump high to get back to where they were born.

The salmon migrate downstream, toward the sea. The smolts spend some time in the estuary, getting ready to enter the ocean.

Adult salmon spend several years in the ocean, where they swim many miles and grow very large.

Salmon And Steelhead Life Cycle
WHAT I KNOW!
MY SALMON OR TROUT BOOK

This book is meant to be an introduction to the life cycle of Pacific salmonids that the students can read, decorate, and call their own.

**STEP 1:** Copy the next to pages back-to-back (2-sided). Make sure the tops of the pages are at the same end of the paper.

**STEP 2:** Cut the page in half on the horizontal dashed line.

**STEP 3:** Fold the two halves on the vertical dashed line.

**STEP 4:** Insert the half with page 2 into the half with cover as shown.

**STEP 5:** Staple to bind the book together.
The smolts grow up to be adults.

Eggs stay in the nest. The nest is called a redd.
Adults lay eggs.

The **alevins** hide in the gravel.

The **fry** look for food.
The smolts grow up to be adults.

Eggs stay in the nest. The nest is called a redd.
Adults lay eggs.

The alevins hide in the gravel.

The fry look for food.
My Salmon/TROUT Observations

The students will witness three main life stages of the trout or salmon during this project— the egg, alevin, and fry stages. This book is designed to give them space to observe and record those three stages. Of course, more pages can be added if the students record more observations.
My Salmon Observations

My Trout Observations

Name_________________________
MY FLIP FLAP

FISH BOOK

To make this book, copy pages 17 and 18 back to back so that behind the fish the page is blank. Behind “This book belongs to” should be the text on the 4 mini pages. Make one copy per student.

To make the book:

1. Fold lengthwise so that the fish is on the outside.

2. Unfold the paper.

3. Cut along the dotted lines to the fold (up to the stop signs).

4. Refold the page. You should have four mini covers now.

5. The students can now illustrate their books.

Adapted from the flip flap book on www.vickiblackwell.com/makingbooks.html
This book belongs to

MY FLIP FLAP FISH BOOK
Salmon and trout lay their eggs in nests of rocks. The nests are called redds.

The fish hatch with yolk sacs. They are called alevins.

Salmon and trout may swim to the ocean to grow up.

They return to the river to lay eggs.
Folded Fish Book

Materials Needed:

- copies of the cover fish located in the appendix; one for each student
- double-sided copies of the 11”x4” pages of the book that are located in the appendix
- glue sticks
- pencils
- markers, crayons, or colored pencils
- scissors

Procedure:
This activity gives the students a chance to make a book of their own. Depending on your students’ skill levels and the time you have available, you may want to do some of the folding or cut beforehand.

When the book is closed it will look like this:

When the head cover and tail cover are pulled apart the book will open.

Then the middle of the book flips up to reveal a larger page.
To Assemble:

1. Keeping the four boxes of text on the outside, fold the 11”x4” copy in half lengthwise along the dotted line.

2. Fold the paper on the two edges on the vertical lines so that the text is inside.

3. Fold the two edges on the vertical lines so that the edges turn outward.

4. Cut the top layer on the dotted lines up to the fold. This will free the middle section to flip up and reveal the drawing space for habitat.

5. Trim the book covers by cutting along the dotted lines. Glue the covers on the edges of the book.

6. Now it's time to draw in the book!
WHAT A STORY!

What do you think just happened? Write a story.
Rhyming with Trout

Use the letters in the box to make words that rhyme with trout.

sh  st  p  ab

Extra Challenge!
Write a word that means the opposite of “with” and rhymes with “trout”.

Name______________________________
Water flows down the mountains and hills into small creeks. Creeks join together to make a bigger river. Creeks may flow into a lake. Rivers flow into the ocean. The beach is the land next to the ocean. Salmon and trout migrate down the rivers into the ocean. They migrate back up the river when it is time to spawn.
A RIVER MAP!

Write the label that belongs to each number. Use the word box to help you.

The Trout Fish Song
Sung to the tune of “Mary Had a Little Lamb”
Words by Susan King

Trout fish always
lay their eggs,
lay their eggs,
lay their eggs.
Trout fish always
lay their eggs and
they are very small.
Then they swim with their yolk sacs, their yolk sacs, their yolk sacs. Then they swim with their yolk sacs and they are called alevins.
Then they need to button up, button up, button up. Then they need to button up and then they swim so fast.
Then we take them to the lake, to the lake, to the lake. Then we take them to the lake and then they grow so big.
Then we take them to the river, to the river, to the river. Then we take them to the river and then they grow so big.
Then it starts all over again, over again, over again
Then it starts all over again just like it did before.
The Trout Fish Song
Sung to the tune of “Mary Had a Little Lamb”
Words by Susan King

Trout fish always
lay their eggs,
lay their eggs,
lay their eggs.
Trout fish always
lay their eggs and
they are very small.

Then they swim with
their yolk sacs,
their yolk sacs,
their yolk sacs.
Then they swim with their yolk sacs and
they are called alevins.

Then they need to
button up,
button up,
button up.
Then they need to button up and
then they swim so fast.

Then we take them
to the river,
to the river,
to the river.
Then we take them
to the river and then
they grow so big.

Then it starts all
over again,
over again,
over again,
Then it starts
all over again
just like it did before.

or

Then we take them
to the lake,
to the lake,
to the lake.
Then we take them
to the lake and then
they grow so big.
Glossary

Glossary entries:

- **alevin**: A new baby salmon or trout. It has a yolk sac for food. The alevin lives in the rocks in the stream.

- **fry**: A small young fish that have recently hatched.

- **redd**: A salmon or trout nest. It is made in the rocks in the stream.

- **spawn**: Making new life. A female fish lays eggs and a male fish fertilizes them.

- **yolk sac**: A "bag" of food that is connected to the stomach of a very young salmon.
Content Standards covered by this thematic unit

Language Arts

Reading

1.0 Word Analysis, Fluency, and Systematic Vocabulary Development

Concepts About Print
1.1 Match oral words to printed words.
1.2 Identify the title and author of a reading selection.
1.3 Identify letters, words, and sentences.

Phonemic Awareness
1.4 Distinguish initial, medial, and final sounds in single-syllable words.
1.6 Create and state a series of rhyming words, including consonant blends.
1.7 Add, delete, or change target sounds to change words [e.g., change cow to how; pan to an].
1.8 Blend two to four phonemes into recognizable words [e.g., /c/ a/ t/ = cat; /f/ a/ t/ = flat].
1.9 Segment single-syllable words into their components [e.g., /c/ a/ t/ = cat; /s/ p/ l/ a/ t/ = splat; /r/ i/ch/ = rich].

Decoding and Word Recognition
1.10 Generate the sounds from all the letters and letter patterns, including consonant blends and long- and short-vowel patterns (i.e., phonograms), and blend those sounds into recognizable words.
1.11 Read common, irregular sight words [e.g., the, have, said, come, give, of].
1.12 Use knowledge of vowel digraphs and r-controlled letter-sound associations to read words.
1.13 Read compound words and contractions.
1.14 Read inflectional forms [e.g., -s, -ed, -ing] and root words [e.g., look, looked, looking].
1.15 Read common word families [e.g., -ite, -ate].
1.16 Read aloud with fluency in a manner that sounds like natural speech.

2.0 Reading Comprehension

Structural Features of Informational Materials
2.1 Identify text that uses sequence or other logical order.

Comprehension and Analysis of Grade-Level-Appropriate Text
2.2 Respond to who, what, when, where, and how questions.
2.3 Follow one-step written instructions.
2.4 Use context to resolve ambiguities about word and sentence meanings.
2.6 Relate prior knowledge to textual information.

Writing

1.0 Writing Strategies

Organization and Focus
1.1 Select a focus when writing.
1.2 Use descriptive words when writing.

Penmanship
1.3 Print legibly and space letters, words, and sentences appropriately.

2.0 Writing Applications (Genres and Their Characteristics)
2.2 Write brief expository descriptions of a real object, person, place, or event, using sensory details.

Written and Oral English Language Conventions

1.0 Written and Oral English Language Conventions

Sentence Structure
1.1 Write and speak in complete, coherent sentences.
Grammar
1.2 Identify and correctly use singular and plural nouns.
1.3 Identify and correctly use contractions (e.g., isn't, aren't, can't, won't) and singular possessive pronouns (e.g., my/ mine, his/ her, hers, your/s) in writing and speaking.

Punctuation
1.5 Use a period, exclamation point, or question mark at the end of sentences.
1.6 Use knowledge of the basic rules of punctuation and capitalization when writing.

Capitalization
1.7 Capitalize the first word of a sentence, names of people, and the pronoun I.

Spelling
1.8 Spell three-and four-letter short-vowel words and grade-level-appropriate sight words correctly.

Mathematics

Number Sense
1.0 Students understand and use numbers up to 100:
1.1 Count, read, and write whole numbers to 100.

2.0 Students demonstrate the meaning of addition and subtraction and use these operations to solve problems:
2.1 Know the addition facts (sums to 20) and the corresponding subtraction facts and commit them to memory.
2.5 Show the meaning of addition (putting together, increasing) and subtraction (taking away, comparing, finding the difference).

Statistics, Data Analysis, and Probability
1.0 Students organize, represent, and compare data by category on simple graphs and charts:
1.1 Sort objects and data by common attributes and describe the categories.
1.2 Represent and compare data (e.g., largest, smallest, most often, least often) by using pictures, bar graphs, tally charts, and picture graphs.

Science

Life Sciences
2. Plants and animals meet their needs in different ways. As a basis for understanding this concept:
   a. Students know different plants and animals inhabit different kinds of environments and have external features that help them thrive in different kinds of places.
   b. Students know both plants and animals need water, animals need food, and plants need light.
   c. Students know animals eat plants or other animals for food and may also use plants or even other animals for shelter and nesting.

Earth Sciences
3. Weather can be observed, measured, and described. As a basis for understanding this concept:
   a. Students know the sun warms the land, air, and water.

Investigation and Experimentation
4. Students will:
   a. Draw pictures that portray some features of the thing being described.
   b. Record observations and data with pictures, numbers, or written statements.

History-Social Science

Section 1.01 A Child's Place in Time and Space
1.2 Students compare and contrast the absolute and relative locations of places and people and describe the physical and/or human characteristics of places.
1. Locate on maps and globes their local community, California, the United States, the seven continents, and the four oceans.
2. Compare the information that can be derived from a three-dimensional model to the information that can be derived from a picture of the same location.

Visual Arts

1.0 Artistic Perception
Processing, Analyzing, and Responding to Sensory Information Through the Language and Skills Unique to the Visual Arts
1.1 Describe and replicate repeated patterns in nature, in the environment, and in works of art.
1.3 Identify the elements of art in objects in nature, in the environment, and in works of art, emphasizing line, color, shape/form, and texture.

2.0 Creative Expression
Creating, Performing, and Participating in the Visual Arts
Skills, Processes, Materials, and Tools
2.4 Plan and use variations in line, shape/form, color, and texture to communicate ideas or feelings in works of art.
2.8 Create artwork based on observations of actual objects and everyday scenes.

Music

2.0 Creative Expression
Creating, Performing, and Participating in Music

2.1 Sing with accuracy in a developmentally appropriate range.
2.2 Sing age-appropriate songs from memory.
Content Standards by activity

A River Map:
- History-Social Science -- 1.2.1, 1.2.2.
- Language Arts -- Reading: 1.1, 1.14, 2.3,

Fishy Numbers:
- Language Arts -- Reading: 2.3
- Math -- Number Sense: 1.1

Alevins and Adults Venn Diagram:
- Math -- Number Sense: 1.1, 2.5; Statistics, Data Analysis, and Probability: 1.1, 1.2

Definition Matchup:
- Language Arts -- Reading: 1.1, 1.10, 1.11, 2.3, 2.6; Writing: 1.3
- Science -- Life Sciences: 2a, 2b, 2c

My Salmon/Trout Book:

My Salmon Book

Name__________________________
My Trout Book

Name ____________________________
Draw healthy trout habitat. Don't forget to draw food and shelter for the trout.
| | Trout lay eggs in rivers and streams. Their nests are made of gravel and are called redds. | Alevins hatch from the eggs and become fry. They will grow fast if they have good habitat. | When they get older and become smolts they may swim to the ocean. | When they are adults, they will return to the stream where they hatched to lay their eggs. |
