## A California Department of Fish and Wildlife Newsletter Volume 3, Number 2

Greetings!

Welcome to the latest edition of *Eye on Invasives*, the California Department of Fish and Wildlife's newsletter dedicated to providing the public with new and important information about invasive species in California. As you may have noticed, we have changed the way you receive our newsletter, which can now be accessed here: <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentVersionID=124125>.

This issue of *Eye on Invasives* focuses on invasive species issues in the Sacramento-San Joaquin River Delta. Inside, you will find a Research Spotlight article by Evyan Borgnis and Dr. Katharyn Boyer of the Romberg Tiburon Center for Environmental Studies, San Francisco University, discussing the potential impacts of climate change on native and invasive pondweeds in the Delta. This issue also features a Partner Spotlight article on the Aquatic Weed Control Program implemented by the Boating and Waterways Division of the California Department of Parks and Recreation.

We hope you enjoy reading our latest issue, and encourage you to share it with others who may be interested in learning about California's invasive species and their impacts. We also welcome suggestions on invasive species related topics for future editions, which may be submitted to [Invasives@wildlife.ca.gov](mailto:Invasives@wildlife.ca.gov).

Sincerely,

Susan Ellis  
Invasive Species Program Manager  
California Department of Fish and Wildlife
