

Good Afternoon,

The California Department of Fish and Wildlife's Invasive Species Program has been notified of new funding opportunities for invasive species projects. The U.S. Department of Agriculture (USDA) has released information on available grants for organizations and people interested in working on this years' invasive species priorities during the 2016 Fiscal Year. For information on programs in USDA that may be used to fund and support invasive species related projects, open the workbook found on the [USDA Grants and Partnership Programs for Invasive Species](#) webpage. Please direct questions to the appropriate contact listed under each funding program in the workbook.

Sincerely,

Martha Volkoff
Environmental Program Manager
Invasive Species Program
