

California Terrestrial and Vernal Pool Invertebrates of Conservation Priority¹

Species	Federal ESA	CA ESA	G-Rank	S-Rank	Other Statuses
GASTROPODA (Snails and slugs)					
<i>Ammonitella yatesii</i> tight coin (=Yates' snail)	None	None	G1	S1	IUCN - Vulnerable
<i>Ancotrema voyanum</i> hooded lancetooth	None	None	G1G2	S1S2	BLM-Sensitive
<i>Assimineea infima</i> Badwater snail	None	None	G1	S1	IUCN - Vulnerable
<i>Binneya notabilis</i> Santa Barbara shelled slug	None	None	G1	S1	IUCN - Data Deficient
<i>Eremarionta immaculata</i> white desertsnailed	None	None	G1	S1	IUCN - Vulnerable
<i>Eremarionta millepalmarum</i> Thousand Palms desertsnailed	None	None	G1	S1	IUCN - Vulnerable
<i>Eremarionta morongoana</i> Morongo (=Colorado) desertsnailed	None	None	G1G3	S1	IUCN - Near Threatened
<i>Eremarionta rowelli bakerensis</i> Baker's desertsnailed	None	None	G3G4T1	S1	IUCN - Data Deficient
<i>Eremarionta rowelli mccoiana</i> California Mccoysnailed	None	None	G3G4T1	S1	IUCN - Data Deficient
<i>Haplotrema catalinense</i> Santa Catalina lancetooth	None	None	G1	S1	
<i>Haplotrema durantei</i> ribbed lancetooth	None	None	G1G2	S1S2	
<i>Helminthoglypta allynsmithi</i> Merced Canyon shoulderband	None	None	G1	S1	IUCN - Vulnerable
<i>Helminthoglypta arrosa monticola</i> mountain shoulderband	None	None	G2G3T1	S1	
<i>Helminthoglypta arrosa pomoensis</i> Pomo bronze shoulderband	None	None	G2G3T1	S1	IUCN - Data Deficient
<i>Helminthoglypta ayresiana sanctaerucis</i> Ayer's snail	None	None	G1G2T1T2	S1S2	
<i>Helminthoglypta callistoderma</i> Kern shoulderband	None	None	G1	S1	IUCN - Endangered

¹ This list pertains to Scientific Collecting Permit regulations (Title 14, Section 650, California Code of Regulations). The species on this list include vernal pool, terrestrial, and aquatic invertebrates with a terrestrial phase that are listed under the Federal and California Endangered Species Acts, or have a NatureServe rank of G1, G1G2, S1, S1S2, SH or SX. For a full list of invertebrates of conservation concern, see the California Natural Diversity Database *Special Animals List*: <https://www.wildlife.ca.gov/Data/CNDDDB/Plants-and-Animals>.

List generated on June 12, 2017 from a query of the California Natural Diversity Database.

California Terrestrial and Vernal Pool Invertebrates of Conservation Priority

Species	Federal ESA	CA ESA	G-Rank	S-Rank	Other Statuses
<i>Helminthoglypta coelata</i> mesa shoulderband	None	None	G1	S1	IUCN - Vulnerable
<i>Helminthoglypta concolor</i> whitefir shoulderband	None	None	G1G2	S1S2	
<i>Helminthoglypta fontiphila</i> Soledad shoulderband	None	None	G1	S1	
<i>Helminthoglypta greggi</i> Mohave shoulderband	None	None	G1	S1	
<i>Helminthoglypta hertleini</i> Oregon shoulderband	None	None	G1	S1S2	BLM-Sensitive
<i>Helminthoglypta milleri</i> peak shoulderband	None	None	G1	S1	
<i>Helminthoglypta mohaveana</i> Victorville shoulderband	None	None	G1	S1	IUCN - Near Threatened
<i>Helminthoglypta nickliniana awania</i> Peninsula coast range shoulderband	None	None	G3T1	S1	IUCN - Data Deficient
<i>Helminthoglypta nickliniana bridgesi</i> Bridges' coast range shoulderband	None	None	G3T1	S1S2	IUCN - Data Deficient
<i>Helminthoglypta sequoicola consors</i> redwood shoulderband	None	None	G2T1	S1	IUCN - Data Deficient
<i>Helminthoglypta stiversiana williamsi</i> Williams' bronze shoulderband	None	None	G2G3T1	S1	IUCN - Data Deficient
<i>Helminthoglypta taylori</i> westfork shoulderband	None	None	G1	S1	
<i>Helminthoglypta traskii pacoimensis</i> Pacoima shoulderband	None	None	G1G2T1	S1	
<i>Helminthoglypta traskii traskii</i> Trask shoulderband	None	None	G1G2T1	S1	
<i>Helminthoglypta uvasana</i> Grapevine shoulderband	None	None	G1	S1	
<i>Helminthoglypta vasquezii</i> Vasquez shoulderband	None	None	G1	S1	
<i>Helminthoglypta walkeriana</i> Morro shoulderband (=banded dune) snail	Endangered	None	G1	S1S2	IUCN - Critically Endangered
<i>Herpeteros angelus</i> Soledad desertsnailed	None	None	G1	S1	
<i>Hesperarion plumbeus</i> leaden slug	None	None	G1	S1	
<i>Megomphix californicus</i> Natural Bridge megomphix	None	None	G1G2	S1S2	
<i>Micrarionta facta</i> Santa Barbara islandsnail	None	None	G1G2	S1S2	IUCN - Vulnerable
<i>Micrarionta feralis</i> San Nicolas islandsnail	None	None	G1	S1	IUCN - Critically Endangered
<i>Micrarionta gabbi</i> San Clemente islandsnail	None	None	G1	S1	IUCN - Vulnerable

California Terrestrial and Vernal Pool Invertebrates of Conservation Priority

Species	Federal ESA	CA ESA	G-Rank	S-Rank	Other Statuses
<i>Micrarionta opuntia</i> pricklypear islandsnail	None	None	G1	S1	IUCN - Vulnerable
<i>Monadenia callipeplus</i> downy sideband	None	None	G1G2	S1S2	
<i>Monadenia circumcarinata</i> keeled sideband	None	None	G1	S1	BLM-Sensitive IUCN - Vulnerable
<i>Monadenia cristulata</i> crested sideband	None	None	G1G2	S1S2	
<i>Monadenia fidelis leonina</i> A terrestrial snail	None	None	G4G5T1T2	S1S2	
<i>Monadenia fidelis pronotis</i> rocky coast Pacific sideband	None	None	G4G5T1	S1	
<i>Monadenia infumata ochromphalus</i> yellow-based sideband	None	None	G2T1	S1	
<i>Monadenia infumata setosa</i> Trinity bristle snail	None	Threatened	G2T2	S2	IUCN - Vulnerable
<i>Monadenia marmarotis</i> marble sideband	None	None	G1	S1	
<i>Monadenia mormonum buttoni</i> Button's Sierra sideband	None	None	G2T1	S1S2	
<i>Monadenia mormonum hirsuta</i> hirsute Sierra sideband	None	None	G2T1	S1	BLM-Sensitive
<i>Monadenia troglodytes troglodytes</i> Shasta sideband	None	None	G1G2T1T2	S1S2	IUCN - Data Deficient USFS - Sensitive
<i>Monadenia troglodytes wintu</i> Wintu sideband	None	None	G1G2T1T2	S1S2	IUCN - Data Deficient USFS - Sensitive
<i>Monadenia tuolumneana</i> Tuolumne sideband	None	None	G1	S1	BLM-Sensitive
<i>Monadenia yosemitensis</i> Yosemite Mariposa sideband	None	None	G1	S1S2	
<i>Pristiloma shepardae</i> Shepard's snail	None	None	G1	S1	
<i>Prophysaon coeruleum</i> Blue-gray tailedropper slug	None	None	G3G4	S1S2	
<i>Punctum hannai</i> Trinity Spot	None	None	G1G2	S1S2	
<i>Radiocentrum avalonense</i> Catalina mountainsnail	None	None	G1	S1	IUCN - Critically Endangered
<i>Rothelix warnerfontis</i> Warner Springs shoulderband	None	None	G1	S1	USFS - Sensitive
<i>Sterkia clementina</i> San Clemente Island blunt-top snail	None	None	G1	S1S2	IUCN - Near Threatened
<i>Trilobopsis roperi</i> Shasta chaparral	None	None	G1	S1	USFS - Sensitive
<i>Trilobopsis tehamana</i> Tehama chaparral	None	None	G1	S1	BLM-Sensitive USFS - Sensitive

NatureServe Element Ranking

All Heritage Programs, such as the California Natural Diversity Database (CNDDDB) use the same ranking methodology, originally developed by The Nature Conservancy and now maintained and recently revised by NatureServe. It includes a **Global rank** (G-rank), describing the rank for a given taxon over its entire distribution and a **State rank** (S-rank), describing the rank for the taxon over its state distribution. For subspecies and varieties, there is also a “T” rank describing the global rank for the infraspecific taxon. The next page of this document details the criteria used to assign element ranks, from G1 to G5 for the Global rank and from S1 to S5 for the State rank. Procedurally, state programs such as the CNDDDB develop the State ranks. The Global ranks are determined collaboratively among the Heritage Programs for the states/provinces containing the species. NatureServe then checks for consistency and logical errors at the national level. Because the units of conservation may include non-taxonomic biological entities such as populations or ecological communities, NatureServe refers to the targets of biological conservation as elements rather than taxa.

An element rank is assigned using standard criteria and rank definitions. This standardization makes the ranks comparable between organisms and across political boundaries. NatureServe has developed a “rank calculator” to help increase repeatability and transparency of the ranking process. The three main categories that are taken into consideration when assigning an element rank are rarity, threats, and trends. Within these three categories, various factors are considered including:

- Range extent, area of occupancy, population size, total number of occurrences, environmental specificity and number of good occurrences (ranked A or B).
- Overall threat impact as well as intrinsic vulnerability (if threats are unknown).
- Long-term and short-term trends.

Detailed information on the newest element ranking methodology can be found here:

https://connect.natureserve.org/publications/StatusAssess_Methodology

With the above considerations in mind, refer below for the numerical definitions for G1-5 and S1-5. An element’s ranking status may be adjusted up or down depending upon the considerations above.

Element Ranking

GLOBAL RANKING

The *global rank* (G-rank) is a reflection of the overall status of an element throughout its global range. **Both Global and State ranks represent a letter and number score that reflects a combination of Rarity, Threat, and Trend factors, with weighting being heavier on Rarity than the other two.**

SPECIES OR NATURAL COMMUNITY LEVEL

- G1 = Critically Imperiled**—At very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
- G2 = Imperiled**—At high risk of extinction due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.
- G3 = Vulnerable**—At moderate risk of extinction due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.
- G4 = Apparently Secure**—Uncommon but not rare; some cause for long-term concern due to declines or other factors.
- G5 = Secure**—Common; widespread and abundant.

SUBSPECIES LEVEL

Taxa which are subspecies or varieties receive a taxon rank (**T-rank**) attached to their G-rank. Where the G-rank reflects the condition of the entire species, the T-rank reflects the global situation of just the subspecies. For example: the Point Reyes mountain beaver, *Aplodontia rufa* ssp. *phaea* is ranked G5T2. The G-rank refers to the whole species range i.e., *Aplodontia rufa*. The T-rank refers only to the global condition of ssp. *phaea*.

STATE RANKING

The *state rank* (S-rank) is assigned much the same way as the global rank, but state ranks refer to the imperilment status only within California’s state boundaries.

- S1 = Critically Imperiled**—Critically imperiled in the state because of extreme rarity (often 5 or fewer populations) or because of factor(s) such as very steep declines making it especially vulnerable to extirpation from the state.
- S2 = Imperiled**—Imperiled in the state because of rarity due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors making it very vulnerable to extirpation from the state.
- S3 = Vulnerable**—Vulnerable in the state due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors making it vulnerable to extirpation from the state.
- S4 = Apparently Secure**—Uncommon but not rare in the state; some cause for long-term concern due to declines or other factors.
- S5 = Secure**—Common, widespread, and abundant in the state.

Notes:

<p>1. Other considerations used when ranking a species or natural community include the pattern of distribution of the element on the landscape, fragmentation of the population/stands, and historical extent as compared to its modern range. It is important to take a bird's eye or aerial view when ranking sensitive elements rather than simply counting element occurrences.</p>	<p>3. Other symbols:</p> <p style="margin-left: 20px;">GH All sites are historical; the element has not been seen for at least 20 years, but suitable habitat still exists (SH = All California sites are historical).</p> <p style="margin-left: 20px;">GX All sites are extirpated; this element is extinct in the wild (SX = All California sites are extirpated).</p> <p style="margin-left: 20px;">GXC Extinct in the wild; exists in cultivation.</p> <p style="margin-left: 20px;">G1Q The element is very rare, but there are taxonomic questions associated with it.</p> <p style="margin-left: 20px;">T Rank applies to a subspecies or variety.</p>

Listing and Special Status Information

CALIFORNIA ENDANGERED SPECIES ACT (CESA) LISTING CODES: The listing status of each species is current as of the date of this list. The most current changes in listing status will be found in the “Endangered and Threatened Animals List,” which the CNDDDB updates and issues quarterly.

SE	State listed as Endangered
ST	State listed as Threatened
SCE	State candidate for listing as Endangered
SCT	State candidate for listing as Threatened
SCD	State candidate for delisting

FEDERAL ENDANGERED SPECIES ACT (ESA) LISTING CODES: The listing status is current as of the date of this list. The most current changes in listing status will be found in the “Endangered and Threatened Animals List,” which the CNDDDB updates and issues quarterly. Federal listing actions contained in the Federal Register are also available at: <http://www.regulations.gov>

FE	Federally listed as Endangered
FT	Federally listed as Threatened
FPE	Federally proposed for listing as Endangered
FPT	Federally proposed for listing as Threatened
FPD	Federally proposed for delisting
FC	Federal candidate species (former Category 1 candidates)

Section 4(c)(2)(A) of the Act requires the U.S. Fish and Wildlife Service to conduct a **review** of listed species at least once every **five** years. Five year reviews from the Sacramento Fish and Wildlife Office are available at: https://www.fws.gov/sacramento/es/Five-Year-Reviews/es_five-year.htm

BLM Sensitive: Bureau of Land Management (BLM) Manual §6840 states that “BLM sensitive species are: (1) species listed or proposed for listing under the Endangered Species Act (ESA), and (2) species requiring special management consideration to promote their conservation and reduce the likelihood and need for future listing under the ESA, which are designated as Bureau sensitive by the State Director(s). All Federal candidate species, proposed species, and delisted species in the 5 years following delisting will be conserved as Bureau sensitive species.” The California-BLM Sensitive Animals list is available at: <https://www.blm.gov/programs/fish-and-wildlife/threatened-and-endangered/state-te-data/california>

IUCN - The International Union for Conservation of Nature (IUCN): The IUCN assesses, on a global scale, the conservation status of species, subspecies, varieties and even selected subpopulations in order to highlight taxa threatened with extinction, and therefore promote their conservation. Detailed information on the IUCN and the Red List is available at: <http://www.iucnredlist.org>

Xerces Society Red List: The Xerces Society is an international non-profit organization dedicated to protecting biological diversity through invertebrate conservation. The Society advocates for invertebrates and their habitats by working with scientists, land managers, educators, and citizens on conservation and education projects. Their core programs focus on endangered species, native pollinators, and watershed health. More information on the Red List is available at: <http://www.xerces.org>.
