Introduction

Fishing contests represent an important component of recreational fishing in California, and typically include tournaments and derbies. In 2016 there were 1,594 permitted fishing contests across the state. Black bass tournaments represented 90% of all fishing contests held in California in 2016; therefore this report focuses on the black bass subset.

History of Fishing Contest Management

Beginning in 1975, organizers offering prizes for the taking of sport fish in any California water were required to obtain a fishing contest permit from the California Department of Fish and Wildlife (CDFW). Since 1985, organizers have been required to submit a “Fishing Contest Report” to the CDFW detailing the results of each permitted contest. In 1990 regulations were established that provided two types of contests, “Event” and “Annual.” An “Event” type contest permit is designed to regulate large fishing contests often run by commercial organizations. The “Annual” type contest permit is designed to gather data from smaller organized contests, such as those offered by bass clubs or individuals.

Permitting Process

An “Event” type permit is required for contests in which more than 50 anglers will participate, or the sponsor is offering \$1,000 or more in cash or prizes. An “Event” contest permit targeting black bass may not exceed 3 days in duration, and no more than one “Event” type contest may be held on any water on the same day. The exception to this is the Sacramento–San Joaquin Delta (Delta). On the Delta, up to 3 “Event” permits may be issued per day as long as only one weigh-in location appears in each of the following counties: San Joaquin, Contra Costa, and Sacramento.

An “Annual” type permit is required for contests with 50 or fewer participants and the sponsor is offering less than \$1,000 in cash or prizes. Up to 12 individual contests may appear on each “Annual” type permit, and there is no limit to the number of “Annual” type permits that can be issued for each date and/or water.

Reporting Requirement

For each permit issued, the organizer is required to complete and return a “Fishing Contest Report” to the CDFW within 30 days of the conclusion of each contest. Report compliance has varied from year to year. Beginning in 2007, in an effort to improve compliance, the CDFW began sending a “Letter of Notice” to organizers that specific contest reports were delinquent. In late 2008 CDFW improved reporting procedures by developing a writeable PDF form and e-mail submission procedures. In early 2016 CDFW instituted an online report form which allows tournament directors to submit their results directly to CDFW. This change has increased efficiency and accuracy for CDFW while streamlining the process for tournament directors.

Future of Fishing Contest Management

Fishing contests can put intense fishing pressure on black bass fisheries. Adaptive management is essential to ensure fishery health while maintaining and improving recreational fisheries. Adaptive management includes activities implemented by CDFW, water control agencies, fishing contest sponsors, and the anglers.

CDFW does its part by:

- Approving or denying permits to hold fishing contests according to regulations
- Rescinding permits of non-compliant sponsors
- Monitoring fishing contests with an observer
- Responding to angler inquiries and concerns regarding tournaments
- Assessing the effects of fishing contests on the fishery, including poor fish care, barotrauma incidence, and mortality rates

Tournament organizations can do their part by:

- Enforcing proper fish care by participants during each contest
- Enforcing any aquatic invasive guidelines for all boats, such as quagga mussel inspections, and ensuring participants are aware of any required inspections
- Supplying anglers with properly aerated tanks at weigh in to keep fish healthy while waiting to weigh in.
- Informing participants of unique conditions at any water, such as the presence of protected aquatic species, areas off limits to fishing, or non-standard length or bag limits
- Submitting all tournament contest reports in a timely manner.
- Communicating with the local marina, water control agency, or property owner to ensure you have the appropriate permits and permissions

Anglers can do their part by:

- Taking the best care of their fish possible at all points during the tournament. High mortality rates not only hurt an angler's performance in the tournament; they also negatively affect the fishery. The loss of large fish from the population reduces not only their density (and angler catch rates), but also reduces the spawning potential of the population. Larger females produce far more eggs than small females.
- Following directions from sponsors during weigh-ins
- Abiding by the special conditions identified for bass tournaments (See "Additional Resources")
- Following all guidelines and regulations relating to aquatic invasive and protected species

2016 Permits Issued

In 2016, a total of 1,589 permits were issued to sponsors offering prizes for the taking of game fish in California. Of those permits, 1,430 were issued for tournaments targeting black bass. Not all permitted contests were held since some contests were cancelled. In addition, not every contest sponsor submitted the required contest report. In 2016, 54% (n=773) of all black bass fishing contest sponsors submitted complete reports. Only completed reports were used in the analysis described in this report. In 2016 the Department implemented a new online reporting system for tournament contests that allows the sponsor to submit their contest report online. Traditionally, “Delinquent Notices” would be sent out to sponsors who have not submitted their report within 30 days. In 2016 these delinquent notices were not sent out. This is likely a factor in the decrease in reporting rate between 2015 and 2016. Overall reporting compliance has been decreasing since 2012.

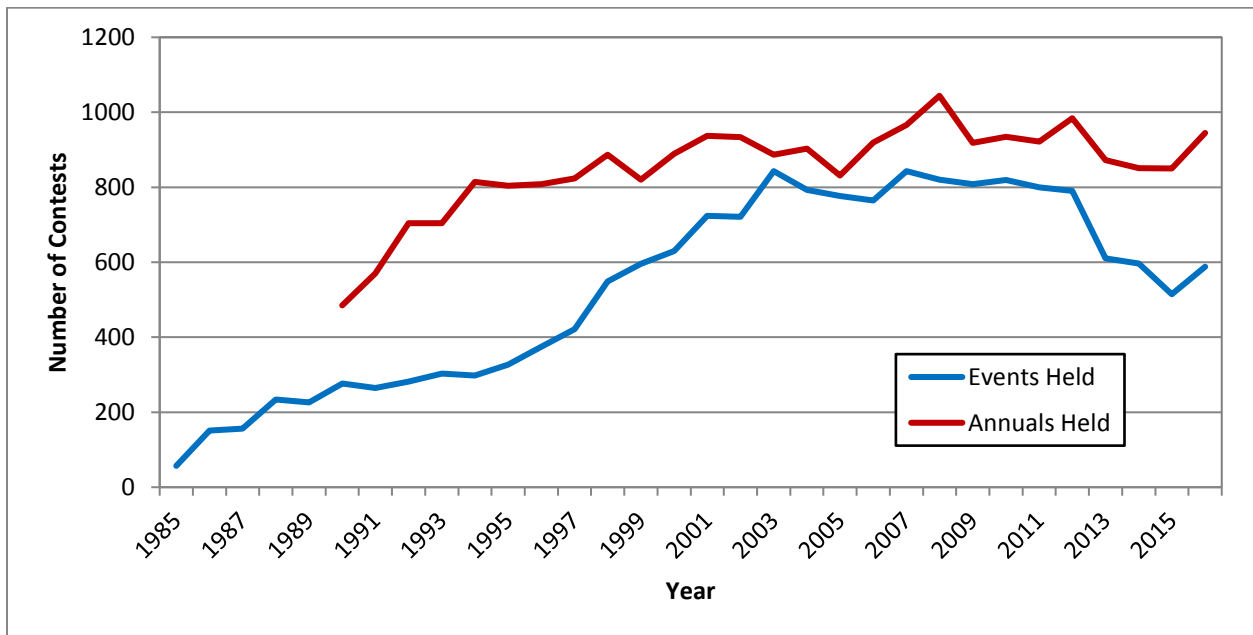

Figure 1. Number of “Event” and “Annual” type contests, 1985 - 2016.

A total of 611 “Event” type black bass contests were permitted in 2016, of which 295 reports were submitted. This represented the first increase in permitted Events since 2010 (Figure 1). Because some contests were either cancelled or submitted incomplete reports, only 271 reports were used in the summary for this report.

A total of 978 “Annual” type black bass contests were permitted in 2016, of which 471 reports were submitted. This represented the first increase in permitted Annuals since 2012 (Figure 1). Because some contests were either cancelled or submitted incomplete reports, only 438 reports were used in the summary for this report.

Participation

The total number of anglers participating in fishing contests in 2016 decreased from 2015 and continued the downward trend in total anglers over the past 5 years. The number of participants dropped 13% from 2015 for “Event” type contests (Figure 2). Participation by anglers in “Event” type contests has declined by 54% since 2007. The decline in 2016 was likely a result from the low reporting rate.

Although the total number of anglers participating in fishing contests has been decreasing, the average number of anglers per contest has been increasing since 2014 for both “Event” and “Annual” contests (Figure 3). “Event” contests averaged 65 participants per contest and “Annual” contests averaged 25 participants. The largest contest of 2016 attracted 445 anglers.

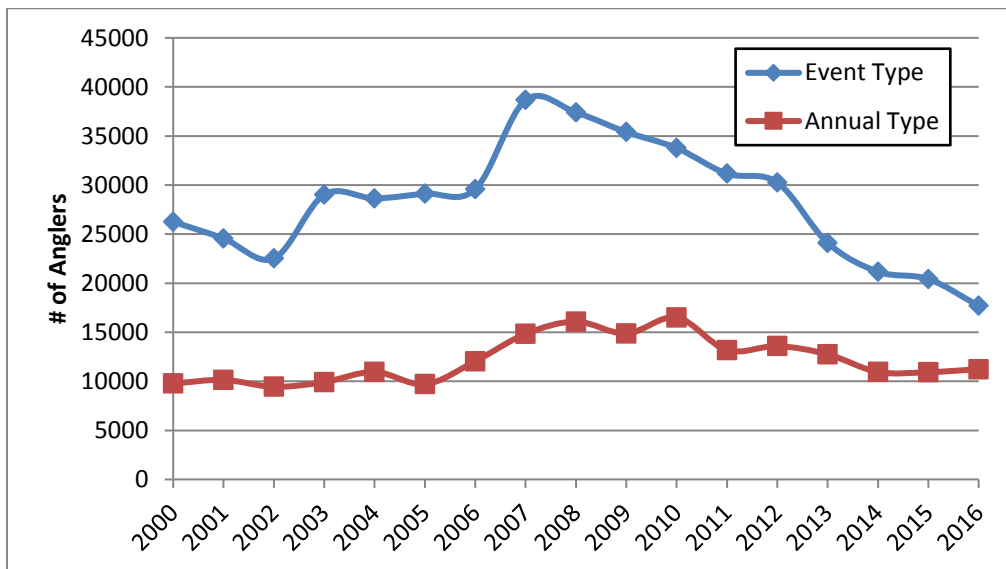

Figure 2. Total number of participants in black bass fishing contests, 2000-2016

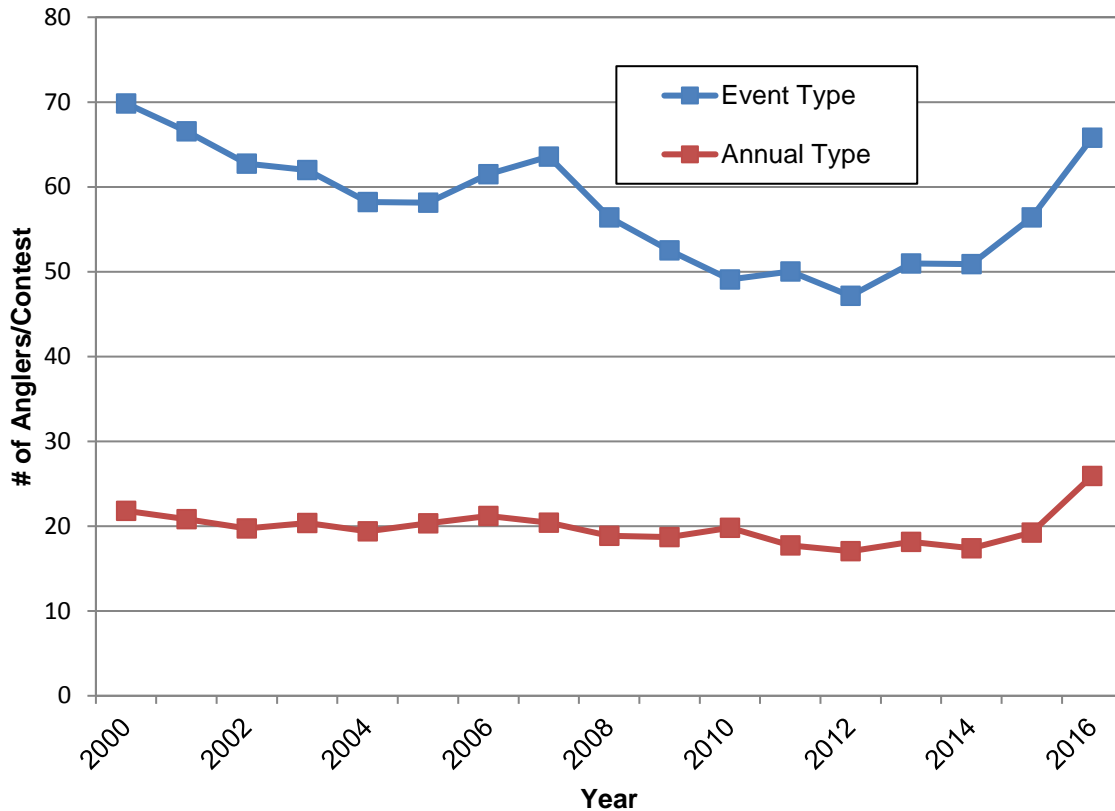

Figure 3. Average number of participants in Event and Annual type contests, 2000-2016

Fishing Location

“Event” type fishing contests were held on 43 different waters throughout California in 2016 (Table 2). In northern California, the Sacramento-San Joaquin Delta held the most tournaments of any water body, but it is also the only location where up to 3 events can be permitted per day. For all other locations, Clear Lake was the most popular location in northern California, while El Capitan Lake was the most popular location in southern California.

“Annual” type fishing contests were held on 59 different waters throughout California in 2016 (Table 3). Similar to “Event” contests, the greatest number of “Annual” type tournaments were held on the Sacramento-San Joaquin Delta, while Clear Lake was the second most popular tournament location. In the southern portion of the state, El Capitan Lake was again the most popular water.

Table 3. Number of “Annual” contests held at each water in 2016.

Timing

On average, 58 fishing contests targeting bass were held statewide each month in 2016. During April, the most popular month for bass contests, there were 96 contests held throughout the state. Spring is the preferred time for tournament fishermen to target bass because the fish have typically moved up into shallow water and feed aggressively in preparation for spawning.

On average, 22 “Event” type contests were held each month throughout the state. December has consistently been the month with the fewest contests held (Figure 4). Fewer sponsors avoided the period from June 15th – September 15th than in the past. This is the period of the 6-hour rule. The 6-hour rule dictates that the time between blast off and the first weigh-in is not to exceed six hours in duration. The 6-hour rule was implemented to help protect fish health when water temperature is high and there is the possibility of increased mortality.

For “Annual” type fishing contests, organizers conducted an average of 36 tournaments each month (Figure 4). April was the most popular month to hold a tournament with 56 contests held statewide. The 6-hour rule did not seem to deter organizers of “Annual” type contests either, as 184 contests were held between June 15th and September 15th. December-February were the least desirable months for sponsors of both “Annual” and “Event” type permits.

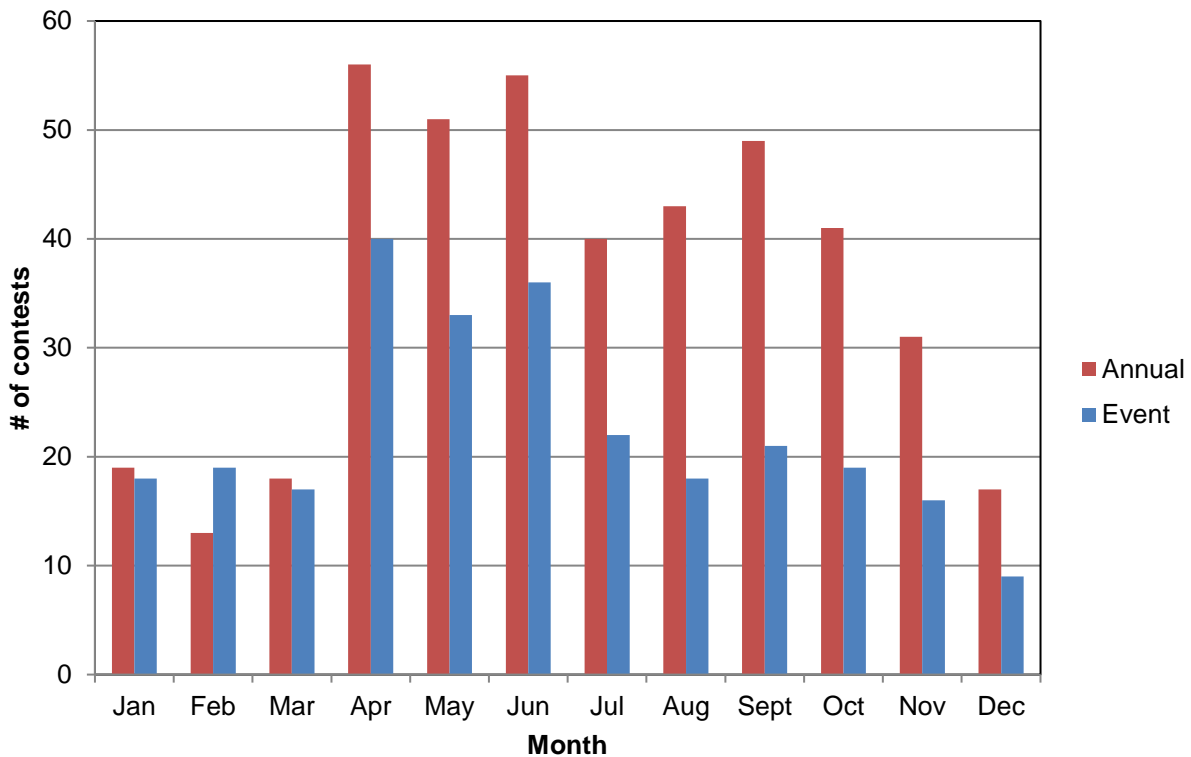

Figure 4. Number of Contests per month in 2016 by type

Total Catch

A total of 62,761 bass were reported caught in fishing contests in 2016. This includes Largemouth, Smallmouth, and Spotted/Alabama bass because tournament sponsors don't separate each species on reports. This represents a 27% decrease compared to total catch reported in 2015, and a 9% decrease in the 5-year average (Figure 5). These decreases are likely a result of the decline in reporting rate in 2016.

Organizers of "Event" type contests reported a total catch of 37,270 black bass (Table 3). This represents 33% decrease in total catch from what was reported in 2015. For "Annual" type contests, organizers reported a total catch of 24,491 black bass (Table 3). This represents a 14% decrease in total catch from what was reported in 2015.

Year	Total Catch in Event Contests	Total Catch in Annual Contests	Year	Total Catch in Event Contests	Total Catch in Annual Contests

Table 3. Total number of black bass caught per year by contest type.

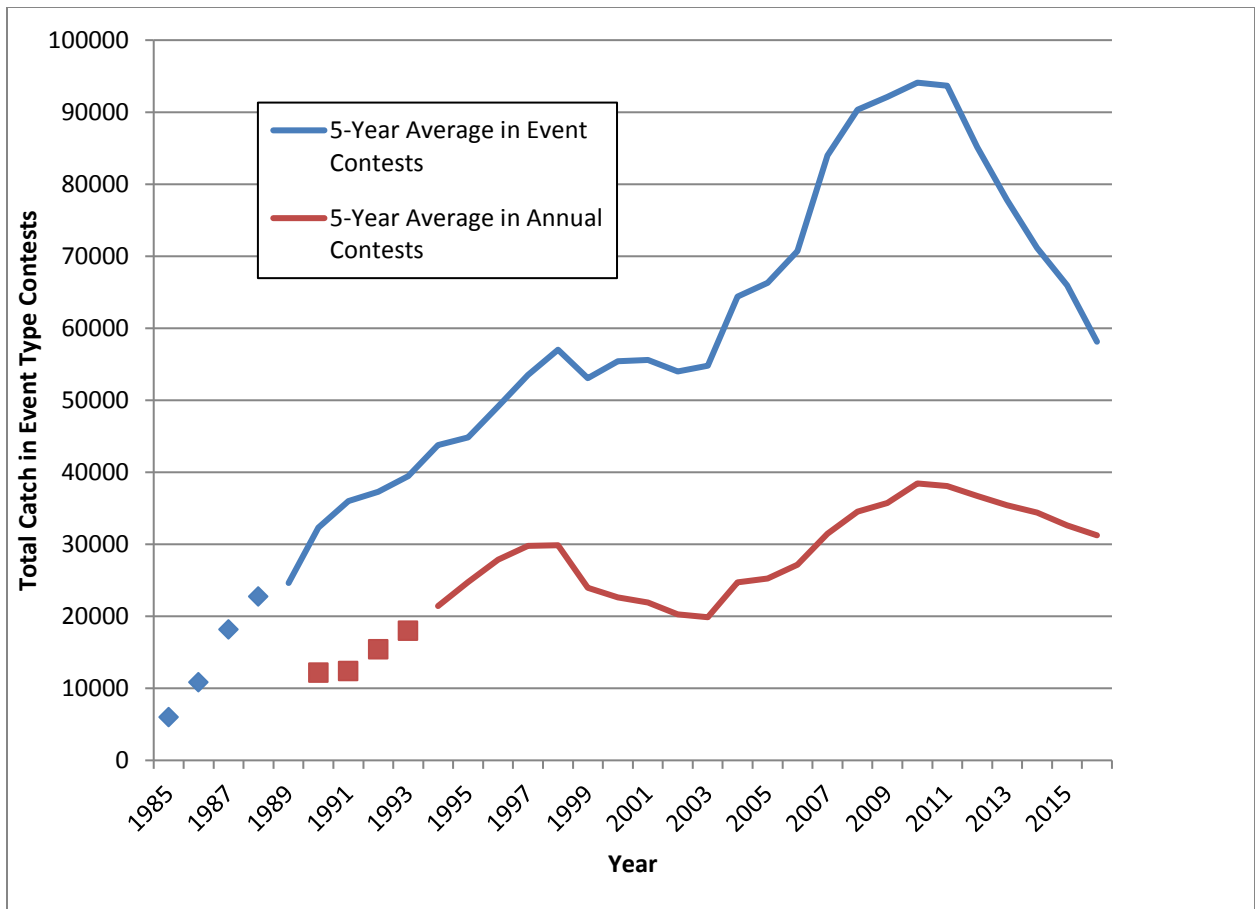

Figure 5. Five-year average black bass total catch in Event and Annual type contests, 1985 - 2016.

Fish Size

The average weight of all black bass weighed in during 2016 was 2.14 pounds; an 8% decrease from the average size reported in 2015. This is the combined average weight of Largemouth, Smallmouth, and Spotted/Alabama bass. In “Event” type contests, the average bass weighed 2.25 pounds. In “Annual” type contests, the average weight of bass was 2.08 pounds (Figure 7).

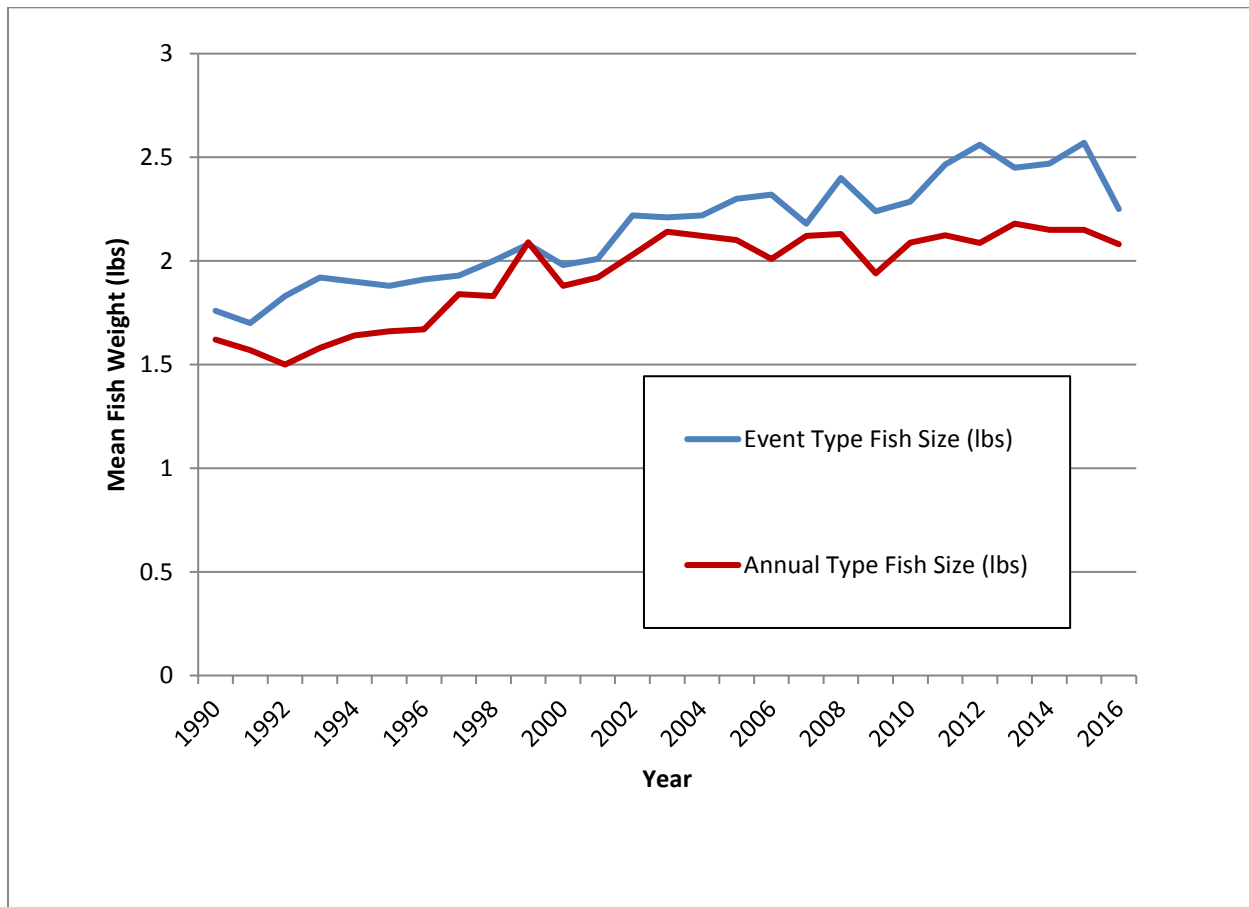

Figure 7. Mean fish weight at Event and Annual type black bass contests, 1990 – 2016.

At each tournament, a record is kept noting the largest bass weighed in at that contest. In 2016, the largest bass weighed in during a bass tournament was a 12.02lb Largemouth Bass caught on 04/23/2016 from the California Delta. The largest Spotted/Alabama Bass taken in a tournament was caught at New Bullards Bar and weighed 10.55lbs. New Bullards Bar Reservoir is known for producing the California State Record Spotted/Alabama Bass in 2015. This fish was also caught in a tournament and weighed 11.18lbs.

While these bass are trophy class fish, they are not close to the largest bass ever caught during a tournament in California. The largest tournament-caught bass on record (18.24 pounds) was caught in 1993 from Lake Cachuma (Table 4). The largest tournament caught bass in 2016 was the smallest on record since 1986.

Year	Location	Date	Species	Weight (lbs)
1986	Clear Lake	6/15/1986	Largemouth	12.80
1987	Lake Castaic	6/6/1987	Largemouth	17.90
1988	Lake Cachuma	3/18/1988	Largemouth	16.40

2016	CA Delta	4/23/2016	Largemouth	12.02

Table 4. Largest fish caught during a tournament, 1986-2016.

Initial Mortality

Tournament organizers are required to release all bass alive and in good condition back to the water where taken. In some instances, bass are brought to the scales dead. This is recorded as initial mortality on the Fishing Contest Report submitted by the contest organizer. Initial mortality is the only type of tournament-associated loss regularly monitored for bass fishing contests, although an unknown amount of delayed mortality occurs after release. Delayed mortality can be significant, and has been documented as high as 85% in other states.

Initial mortality is the reason the 6-hour rule was implemented for the months of June-September. Higher water temperature and lower oxygen concentrations lead to higher initial mortality. Shortening the contest to 6 hours or 6 hours between weigh-in's if the contest has multiple weigh-in's prevents fish from being kept in livewells for extended periods of time.

For "Event" contests in 2016 the initial mortality was 0.85%. This was a 53% decrease from the 1.6% initial mortality in 2015. Initial mortality for "Annual" type contests was 1.62%. This was the same rate as in 2015. Initial mortality has remained less than 2.0% since 1988, when CDFW implemented the "Special Black Bass Tournament Conditions" to protect fish health.

Additional Resources and FAQ

Where are upcoming tournaments?

Upcoming fishing contests are found on the [CDFW Fishing Contests](#) web page.

Contact Max Fish, CDFW Lake and Reservoir Program's Warmwater Specialist, for more information at max.fish@wildlife.ca.gov or (916) 327-8849.

How do I apply for a fishing contest permit?

Visit the [CDFW Fishing, Tournaments and Derbies](#) web page and complete form FG-775.

Mail or turn in your application at your regional CDFW headquarters, with an address line "ATTN: Fishing Contest Application." The appropriate addresses are listed on the third page of the Fishing Contest Application (FG-775).

Permit Exemptions:

Forms requesting exemption from fishing regulations are also available on the [CDFW Fishing, Tournaments and Derbies](#) web page.

How do I report the results of a fishing contest?

Within 30 days of the completion of each contest, submit results through the online reporting service available on the [CDFW Black Bass Contest Reporting](#) web page or complete form FG-776, accessible on the [CDFW Fishing, Tournaments and Derbies](#) web page.

Submit this report via email to contestreports@wildlife.ca.gov or mail completed form to:
