

**FY 2017-18 Wildlife Conservation Board Public Access Program
Award List**

CDFW Region	Applicant	County	Project Title	Project Description	Grant Amount	Fund Source
Central Region	Elkhorn Slough Foundation	Monterey	Elkhorn Slough Ecological Reserve Amphitheater	Project will redesign and construction of an outdoor amphitheater adjacent an oak grove. This project addresses concerns for visitor safety and comfort with the replacement of all existing amphitheater benches to a solid recycled material. Additionally, the proposed project will alleviate constant upkeep and resource outlay currently required to maintain the aging seating. The installation of the proposed shade structure will improve visitor enjoyment in the amphitheater by providing protection from rain and sun. Improvements to the amphitheater will also include a new electrical system, lighting, and small stage.	\$268,000	WRF
Bay Delta	East Bay Regional Park District	Contra Costa	Point Isabel Water Access Improvements	Project will construct a new 100-foot long ADA-accessible kayak ramp and replace 10-feet of deteriorated concrete steps. The existing 40-foot long jetty will be improved. The existing 50-foot long emergency egress area (near the Hoffman Channel inlet) will be improved by reconfiguring the boulders. A new 3,000 square foot rigging area will be created and interpretive and water trail signage installed. Two existing ADA Parking spots will be improved to current code standard and a 250-foot ADA access path will be constructed.	\$200,000	WRF
North Central	Sutter Butte Flood Control Agency	Butte County	Oroville Wildlife Area Public Access Improvements	Project will fund four recreation-related components. The work includes the construction of a culvert and new earthen canal crossing, grading work to provide new kayak/river access, and public parking and site access improvements at two locations. The grading and parking improvements will include the installation of large boulders, which will be placed around the perimeter to prevent vehicles from encroaching on the environment. There are limited level areas to park and the popular parking areas consist mainly of either loose gravel or large cobble. The parking areas will be leveled and Class 2 AB road base installed. The project will also construct a concrete foundation pad to allow the placement of ADA portable restrooms.	\$484,100	WRF
FY 2017-18 TOTAL ALLOCATION					\$952,100	WRF
