As mandated by the Oil Pollution Act of 1990 and the National Contingency Plan (40CFR300), the 2014 revision of the Los Angeles-Long Beach (LA-LB) Area Contingency Plan (ACP) has been completed and is effective 01 May 2015. This marks the ninth revision of this plan and supersedes the 2011 LA-LB ACP. This edition remains in effect until superseded.

The 2014 LA-LB ACP was revised through the efforts of the U.S. Coast Guard, California Department of Fish and Wildlife Office of Spill Prevention and Response (OSPR) and the LA-LB Area Committee membership.

The public and all marine environmental protection stakeholders can download the 2014 LA-LB ACP from the OSPR website at www.wildlife.ca.gov/ospr. Publication via the internet allows the Area Committee to provide the response community with the most up-to-date version of the ACP. While the ACP is revised triennially, the ACP may be updated with new information at any time by the Area Committee. Any updates to this document shall be referred to as "interim updates" and will be made available on the OSPR website.

Comments and recommendations regarding this plan are welcome and should be submitted through the LA-LB Area Committee.

Sincerely,

J. F. Williams
Captain, U.S. Coast Guard
Federal On-Scene Coordinator

MEMORANDUM

From:  M. E. Rochester, CAPT
CG SECTOR Los Angeles-Long Beach

To: Distribution

Subj: PROMULGATION OF LOS ANGELES-LONG BEACH AREA CONTINGENCY
PLAN, 2014.4.

1. This letter promulgates the 2018 update to the Area Contingency Plan (ACP) covering the Federal On-Scene Coordinator's (FOSC) Los Angeles-Long Beach Area of Responsibility. This document will remain in effect until superseded by competent authority.
2. Enclosed is the Los Angeles-Long Beach Area Contingency Plan, 2014.4. My principal guidance for marine environmental response is to remove a worst-case discharge of oil or release of a hazardous substance, and to mitigate or prevent a substantial threat of such a discharge or release from a vessel, offshore facility, or onshore facility operating in or near the Coast Guard FOSC area of responsibility.
3. This plan fulfills the requirement for Sector Los Angeles-Long Beach to develop a supporting plan as mandated by the Oil Pollution Act of 1990 and the National Contingency Plan (40 CFR 300).
4. All earlier versions of the Los Angeles-Long Beach Area Contingency Plan are superseded by the Los Angeles-Long Beach Area Contingency Plan, 2014.4 and should be recycled properly.
5. The Los Angeles-Long Beach Area Contingency Plan, 2014.4 is available to the public on USCG Sector Los Angeles-Long Beach's Homeport site: <https://homeport.uscg.mil/port-directory/los-angeles-long-beach>. Publication via the internet allows the Area Committee to provide the response community with the most up to date version of the ACP. While the ACP is revised annually, the ACP may be updated with new information at any time by the Area Committee. Any such updates to this document shall be referred to as "interim updates," and will be made available on the USCG Sector Los Angeles-Long Beach Homeport site.
6. Comments and recommendations regarding this plan are welcome and should be submitted through either the Los Angeles-Long Beach Area Committee or through Mr. Butch Willoughby (Robert.M.Willoughby@uscg.mil) from my staff.
