5000 LOGISTICS

5100 Logistics Section Organization

The Logistics Section is responsible for providing facilities, all services and materials needed for the incident. The FOSC acting as the Incident Commander will determine the need to establish a Logistics Section on the incident. This is usually determined by the size of the incident, complexity of support, and how long the incident may last. Once the IC determines that there is a need to establish a separate Logistics function, an individual will be assigned as the Logistics Section Chief (LSC).

Six functional units can be established within the Logistics Section. If necessary, a two-branch structure can be used to facilitate span of control. The titles of the units are self descriptive. Not all of the units may be required, and they will be established based upon need.

5110 Logistics Section Planning Cycle Guide

5200 Support

The Support Branch Director, when activated, is under the direction of the Logistics Section Chief, and is responsible for development and implementation of logistics plans in support of the Incident Action Plan, including providing personnel, equipment, facilities, and supplies to support incident operations. The Support Branch Director supervises the operation of the Supply, Facilities, Ground Support and Vessel Support Units.

Refer to Chapter 2 of the Coast Guard [Incident Management Handbook](#).

5210 Supply

The Supply Unit Leader is primarily responsible for ordering personnel, equipment and supplies; receiving, and storing all supplies for the incident; maintaining an inventory of supplies; and servicing non-expendable supplies and equipment.

Refer to Chapter 2 of the Coast Guard [Incident Management Handbook](#).

5210.1 Oil Spill Response Equipment

5220 Facilities

5220.1 Incident Command Post Options

Incident command post needs vary from incident to incident. The below incident command posts have immediate access to necessary resources depending upon the incident requirements.

Northern Sector

PIEDRA BLANCAS POINT, DOI, NATIONAL BIOLOGICAL SERVICES FACILITY

ADDRESS: San Simeon, CA 93452
PHONE: (805) 927-3893 [0800-1730]
POC: Dr. Norman Scott, Project Leader
Galen Rathbun, Research Scientist
Brian Hatfield

AVAILABILITY: Year round.

PHYSICAL DESC: Former USCG Peidras Blancas lighthouse station. Structures include lighthouse and generator hut (generator mothballed); library/conference room.

COMMS. CAPABILITY: 2 phones in offices. Nearby antenna from includes phone company patch boxes may be configurable to multiplexed landline system and/or satellite uplinks.

SECURITY: Entrance road normally locked by keypad security device (combination = "4991")

LOGISTICS: Limited water and restroom facilities. Beach is directly accessible and is used with RHI; however, beaches are inundated with elephant seals between the months of January and June.

PARKING: 10 existing parking spaces, 3+ acres are located adjacent to US Navy Buildings.

COST: Unknown.

HEARST-SAN SIMEON STATE MONUMENT

ADDRESS: 750 Hearst Castle Road
San Simeon, CA 934552

PHONE: (805) 927-2068 [24 hrs]
(805) 927-2069 [24 hrs]

POC: John Melvin, Supervising Ranger
Jim Van Shamus, Chief Ranger
Bill Kramer, Operations Manager
Debra Weldon, Director

AVAILABILITY: Year-round. Public use peaks between Memorial Day and Labor Day.

PHYSICAL DESC: Conference room for 10-12 people. 6-8 folding tables, 50 folding chairs. Visitor center includes restrooms, restaurants and a theater. Nearby town of San Simeon has numerous motel and dining facilities.

COMMS. CAPABILITY: 100+ truncated phone lines in place now (used for touring reservations). 3 fax lines.

SECURITY: Reserve LE personnel available at about \$100/40 hrs. **LOGISTICS:**
Easy highway access.

PARKING: Parking exists for several hundred cars, including special areas for buses and supply trucks. Parking areas are well lit and paved.

COST: Park is the number one moneymaker for the state during peak summer months (80K-100K per day). Disruption of the monument's earnings may incur additional costs to RP liabilities.

HEARST STATE BEACH

ADDRESS: 750 Hearst Castle Road
San Simeon, CA 93452

PHONE: (805) 927-2068 [24 hrs]
(805) 927-2069 [24 hrs]

POC: John Melvin, Supervising Ranger
Jim Van Shamus, Chief Ranger
Bill Kramer, Operations Manager
Debra Weldon, Director

AVAILABILITY: Year-round day use. Public use peaks between Memorial Day and Labor Day. Available to USCG on long-term, 24 hr basis.

PHYSICAL DESC: State beach is located directly across the highway from Hearst-San Simeon State Monument visitor center. Potable water, 4 restrooms, 6-8 folding tables, 50 folding chairs. Beach includes an operable pier accessible by boat and land vehicles. No hoist available.

COMMS. CAPABILITY: Entrance station equipped with 800 MHz radio comms. Two phone lines in place now: one at entrance and one at concession stand. 110 AC available.

SECURITY: Reserve LE personnel available at about \$1000/40 hr. Additional staff personnel available at about \$400/40 hrs.

LOGISTICS: Facility can be entirely cleared by park personnel within 24-hours.

PARKING: 100+ vehicles on paved lots. Adjacent, level dirt area is available.

COST: Reserve LE personnel available at about \$1000/40 hrs.

COLEMAN DRIVE/MORRO ROCK PARKING AREA, MORRO BAY, CA

ADDRESS: City of Morro Bay
Morro Bay, CA
PHONE: (805) 772-6254 [MBPD] NOTE: contact
Morro Bay Police Department.
POC: Dick Rodgers, Chief Harbor Officer
Jim Kroll, Harbor Officer
AVAILABILITY: Year-round
PHYSICAL DESC: Approximately 8-acre unpaved. Drainage fair, may be
unsuitable as staging area during heavy rains. 2 WPBs stationed nearby.
COMMS. CAPABILITY: Pay phone on site. SECURITY:
No gate, but entrance is controllable.
LOGISTICS: No restroom, showers or lighting available. Potable water available via
2-inch line.
PARKING: 300+ spaces. Plenty of parking for large trucks. Good helo landing
sites available.

INN AT MORRO BAY, MORRO BAY CA

ADDRESS: 60 State Park Road
Morro Bay, CA 93442
PHONE: (805) 772-5651 [24 hrs]
(805) 772-4779 [fax]
POC: Scott Zachary, Director of Sales and Marketing
John Woodruff, General Manager
AVAILABILITY: Year-round
PHYSICAL DESC: Local motel: 96 rooms, 4 conference rooms, 4 multi-use
spaces.
COMMS. CAPABILITY: 6+ phone lines, 2 fax lines, Internet connection with e-mail.
SECURITY:
LOGISTICS: Facility has full-service restaurant and offers off-site catering.
Laundering available on site. Inn has small boat dock. 35 tables and 130 chairs.

5250.2 State Agency Aircraft

Department of Fish and Wildlife

Contact: OSPR Spill Coordinator

- (4) Cessna 185, single engine/3 On or near shore
- Fish & Wildlife radio

(1) Partenavia Observer light
twin engine Over water recon
Air/ground search aerial photo,
vertical camera hatch

(1) Cessna 337, light twin
engine/3passenger Over water
recon
Fish & Game radio, water survival gear

(1) King Air 200, medium twin
engine/8 On shore
Fish & game radio, no water survival gear

Department Of Forestry & Fire Protection

Contact: OSPR Spill Coordinator through the State wide emergency
command center:
daytime (916) 653-8360, 24 hours (916) 653-8362

(1) Beechcraft BE-55, light twin
engine

(1) Beechcraft BE-58, medium twin engine/4 On shore personnel
and equipment transport

(1) Cessna 337, light twin
engine/2 On shore recon.
Infrared sensor, (FLIR) equipment, no water survival gear

(8) Helicopters, B-205/9
On shore, personnel and equipment
transport Sling load equipment, no water
survival gear

Department Of California Highway Patrol

Contact: OSPR Spill Coordinator to the Sacramento
Communication Center, (916) 445-2211

(14) Cessna 185, light single
engine/3 On or near shore
Multi freq. band recon comms radios, no water survival gear

(9) Helicopters, light single
engine/3 to 4 On shore
personnel & equipment transport
Multi freq. band comms radios, no water survival gear

5250.3 Civilian Aircraft**Air Response, Inc.**

4949 E. Falcon Dr.
Mesa, AZ 85205
602-844-0800

(1) DC-4, medium multi-engine Day,
VFR, offshore, cargo Aerial spraying,
dispersant spraying

Ameriflight

4700 Empire Ave., Hanger 1
Burbank, CA 91505
818-980-5005

(1) Falcon 20 small or medium sized
(3) Lear 35A Cargo & personnel None
(13) Beech 99 Transport None
(5) Cessna 208 Unknown

Aspen Helicopters, Inc.

2899 West 5th St.
Oxnard, CA 93030
805-985-5416

(1) Bell 206 BIII Onshore/offshore
(2) Bell206 L1 passenger & cargo None
(3) Partnavia transportation (internal & external)
aerial survey, aerial dispersant spraying
(1) Piper Chieftain Unknown Unknown
(2) Bell 206 L3 Unknown Unknown
(1) Bell 222 Unknown Unknown

Biegert Aviation, INC.

Memorial Airport 22022 S. Price Rd.
Chandler, AZ 85248
520-796-2400

No aircraft N/A
(2) Spray Adds Packs, Dispersant spraying, Roll-on/Roll-off spraying package
for C-130 aircraft

Briles Wings & Helicopters, INC.

16303 Waterman Dr.
Van Nuys, CA 91406
818-994-1445

(5) Bell 206B/4

(4) Bell 206L/6 Day
VFR, onshore & offshore transport

Business Jet Solutions

19301 Campus Drive
Santa Ana, CA 92707
714-852-8300
fax 714-852-684

Varies aircraft & helicopters Available, including Gulfstream IV, Challengers, Learjets, Citations, King Airs, Bell Jet Ranger (helo), Bell Long Ranger (helo), & Augusta (helo). Turbojets can carry up to 16 personnel.

Day, night, VFR, IFR, onshore/offshore, Executive transport, light to medium cargo transport.

Petroleum Helicopters, Inc.

302 Moffett Place
Goleta, CA 93117 (Santa Barbara Airport)
805-964-0684

(1) Bell 206L/6

Onshore & offshore personnel/cargo transport, internal/external loads, aerial survey, dispersant.

None

(1) Bell 212/13

Onshore & offshore personnel/cargo transport, internal/external loads, aerial survey, dispersant.

None

(1) Bell 412/13

Onshore & offshore personnel/cargo transport, internal/external loads, aerial survey, dispersant.

None

5400 Communications

5410 Communications Plan

5410.1 Incident Communications

The primary purpose of this annex is to establish which radio frequencies will be used for interagency communication in an oil spill response. Most of the frequencies are within the marine band of the VHF-FM spectrum. Section 5370 is a graphic representation of this frequency allocation. A secondary purpose is to identify the operating frequencies used by principal federal and state agencies, and provide an overview of those agencies' capabilities and resources.

Unified Command Calling and Coordination Frequency

Channel 83A (157.175Mhz) has been chosen as the frequency for communication between the Coast Guard and OSPR. This frequency will also be used for communications with

USCG and OSPR aircraft involved in the response operation.

Unified Command/Responsible Party Calling and Coordination Frequency

150.980Mhz has been designated as the frequency for communication between the Coast Guard or OSPR and the Responsible Party and the major co-ops in this Area of Responsibility.

U.S. Coast Guard working frequencies:

Channel 81A (157.075Mhz) has been designated as the frequency for communication between U.S. Coast Guard units and other Coast Guard personnel who are part of the FOSC staff.

Channel 21A - primary working/SAR frequency used by Station Channel Islands Harbor

Channel 23A - primary working/SAR frequency used by Station Los Angeles.

Channel 16 - (156.8Mhz) Designated under international convention for use for ship-to-ship hailing and distress in international waters. ALL users are required to use channel 16 for only these purposes and then switch to other channels for subsequent communications. Oil spill response is no exception.

Channel 13 - (156.65Mhz) Designated as bridge-to-bridge hailing and navigation safety frequency in inland and offshore waters. It may be used only to establish contact and make arrangements between vessels in crossing, meeting, or overtaking situations in accordance with the International or Inland Navigation Rules.

Safety Frequency

Channel 06 (156.3Mhz) is designated as the frequency, which may be used by all parties for communication on matters involving human health and safety. FCC regulations require all vessels equipped with VHF-FM capability to have this channel.

CA Office of Oil Spill Prevention and Response (OSPR) working frequency

In central and northern California, OSPR wardens' and biologists' working frequencies are 159.435Mhz (TX) and 151.415Mhz (Rx). However, OSPR wardens do have radios with VHF channel 83A, and this may be the best way to establish and maintain contact between them and CG first responders in the initial stages of a spill response.

County OES and local government agency operating frequencies

County OES's and local government agencies such as police, fire, county sheriffs, and environmental health departments have frequencies and communications systems established within their counties. It is not the intent of this plan to interfere with or change those established systems. CALCORD (156.075Mhz) is the frequency to be used for coordination among those agencies and between those agencies and OSPR.

Intra-agency and Intra-company communications

It is expected that each government agency and private company involved in the response operation will continue to use its own normal working frequency(s) for internal communication.

Alternate oil spill containment and cleanup frequencies

47 CFR Part 90.65 designates the frequencies listed below as available for use in oil spill containment and cleanup operations.

- (1) 36.25Mhz VHF-FM
- (2) 41.71Mhz VHF-FM
- (3) 154.585Mhz VHF-FM

- (4) 158.445Mhz VHF-FM
- (5) 159.480Mhz VHF-FM
- (6) 454.000Mhz UHF*
- (7) 459.000Mhz UHF*

*these are the primary operating frequencies used by the co-ops Clean Bay and Marine Spill Response Corporation

5410.2 Communications Support

Refer to Section 5410.3 of this Plan

Coast Guard Communication Capabilities

The Coast Guard Sector Los Angeles - Long Beach is equipped with a local VHF-FM Band radio in its command center. Transmitting from its low site antenna on top of the Sector LA-LB building, it has a reliable range of approximately 20 miles, which covers up to the east coast of Catalina Island.

However, the Coast Guard has a system of high sites along the coast designed to provide VHF-FM and UHF coverage of the entire coast called Rescue 21.

Rescue 21 is an advanced command, control, and communications system that improve the ability of the Coast Guard to assist mariners in distress and save lives as well as heighten Homeland Security measures. Rescue 21 provides the communications infrastructure for Search and Rescue, Marine Safety, Law Enforcement, Environmental Protection, Homeland Security Missions. Rescue 21 system added phone patch, direction finding, playback, simultaneous communications, and UHF communications capability.

The locations of these high sites are listed below:

Cambria (High site shared with Sector SF) Honda Ridge Bald Mountain Laguna Peak Catalina Island San Nicholas Island San Clemente (High site shared with Sector SD) San Onofre Peak (High site shared with Sector SD)

The Coast Guard **Pacific Strike Team** possesses a cache of programmable hand-held VHF-FM radios and a computer, which can tune those radios to any desired frequency. The Strike Team also owns several portable repeaters, which can be tuned to a desired frequency and deployed wherever necessary. It also has one portable INMARSAT telephone system.

Transportable Communication Centers (TCC'S)

The TCC is a self-contained, rapidly deployable Coast Guard manned and maintained Communications Module. It can provide a full range of telecommunications capabilities to support a large oil spill response. These include:

- point to point, air/ground, ship/shore, and shore side radio communications (secure or non-secure) in the HF, VHF and UHF.
- different types of antennas for best propagation and coverage in remote and uneven terrain
- cellular telephone (secure, non-secure, and computer/data link)
- INMARSAT (satellite telephone system)
- Landline phone bank of over 100 lines

One TCC is located at the Coast Guard Communications Area Master Station Pacific (CAMSPAC) at Pt. Reyes, CA in a six hour (B-6) recall status. It can be towed by truck or airlifted by helicopter. Aviation Electronic Technicians and Radiomen accompany the units. The TCC can be powered by generators (which accompany the unit) or directly connected to a power source. The full antenna setup requires an area of approximately 200 feet by 200 feet. These are important considerations in the decision where to locate the unit and perhaps the forward command post.

OSPR Communications Capabilities:

OSPR also has a system of repeaters and high sites throughout the state. At present coastal coverage is approximately 75%. However, two portable repeaters are also available to provide coverage in remote areas and provide for a local net at a spill site. OSPR vehicles and personnel throughout the state have VHF-FM radios (150-174Mhz), and OSPR has a cache of 34 handheld "pool" radios for use by other agencies or groups assisting in spill response.

Communications Status Charts

In order for all response agencies to effectively organize communications efforts, information on communications status must be shared by all agencies at the staging area. Once mobile communications trailers are in place, and agencies have checked into CH83A, a communications status chart listing each agencies' guard requirements should be prepared and updated as situations dictate. All agencies should fill in the appropriate information on a chart similar to the Communications Status Chart (Figure 5000.C) on the next page. The communications status chart should also be reproduced in paper form and distributed to all other response agencies located at the staging area. Additional updates or changes in unit status may be relayed via CH83A once communication status charts have been distributed.

Security Awareness

Radio communications, unless encrypted for secure transmission, are subject to electronic surveillance and monitoring by private citizens and the public media. All agencies should be security conscious before transmitting information by radio that may be considered media sensitive, proprietary, or private. Good judgment is the only rule that applies; however, public affairs representatives should be consulted for guidance in specific instances if necessary.
