Each task has a code associated with the type of training assignment where the task may be completed. These include: O = other, I = incident/event and R = rare event. Definitions for these codes may be found below*. While tasks can be performed in any situation, they must be evaluated on the specific type of incident/event for which they are coded. Tasks coded I must be evaluated on an incident/event, and so on. Performance of any task on other than the designated assignment is not valid for qualification. **If more than one code is listed, the task may be completed on any of the listed situations (e.g. If code I, O2 and O3 are listed, the task may be completed on any of the three listed).**

*Code:

- O = Task can be completed in a variety of situations, such as in a classroom, exercise or simulation, incident or event, or daily job.
- O1 = Task must be performed on a Full Scale Exercise with equipment deployment which is managed under the Incident Command System (ICS). Examples of exercises that may employ ICS include oil spill, search and rescue, hazardous material response, and fire.
- O2 = Task must be performed on an Exercise which is managed under the Incident Command System (ICS). Examples of exercises that may employ ICS include oil spill, search and rescue, hazardous material response, and fire.
- O3 = Training or Daily Job environment that tests knowledge/skills associated with the task.
- O4 = ICS course classroom environment that tests knowledge/skills associated with the task.
- I = Task must be performed on an incident or event which is managed under the Incident Command System (ICS). Examples of incidents and events that may employ ICS include oil spill, search and rescue, hazardous material response, fire, and emergency or non-emergency (planned or unplanned) events.
- R = Rare events seldom occur and opportunities to evaluate Trainee performance in real settings are limited. Examples of rare events include accidents, injuries, vehicle and aircraft crashes. Through interviews, the Verifying Officer may be able to determine if the Trainee could perform the task in a real situation.
