

Lower American River Conservancy Program Advisory Committee  
Parkway Tour Agenda  
September 9, 2019

Please join the Advisory Committee (AC) members and Wildlife Conservation Board (WCB) staff on the Lower American River Parkway (Parkway) Tour to visit four sites along the lower reach of the Parkway. The American River Parkway includes those portions of the area described in the American River Parkway Plan between the Nimbus Dam and the confluence of the American River and the Sacramento River. The goals of this trip are to educate the committee members and WCB staff on the current conditions of the Parkway and show them potential and current community investment sites.

Members of the public are invited to participate in the tour but are responsible for their own transportation and lunch. There are no entrance fees or parking fees at any of the sites. All times are approximate. If you would like to attend this tour, please sign up [here](#).

The field tour will begin at Camp Pollock, located at 1501 Northgate Boulevard, Sacramento, CA 95815. You can visit Sacramento Valley Conservancy's [website](#) for detailed driving directions.
