

## Attachment D -- Herring FMP Implementing Regulations 15-Day Notice

### EXPLANATION OF NON-SUBSTANTIAL CHANGES TO THE AMENDED SECTION 705, T14, CCR

Changes to the proposed regulation in Section 705 as described below are non-substantial or sufficiently related to the original text and the public was adequately placed on notice that these changes could result from the originally proposed regulatory action. These changes are clearly indicated on the attached amended regulatory text as follows: additions of new text are shown with double underline; ~~deletions of former added text~~ are shown with an underline and strikeout.

These non-substantial changes are related to the timing of the effective date of the regulation, which will be March 1, 2020. The regulations and forms were drafted in early 2019 and at this time should be updated with the correct fees for 2020 to avoid any confusion by the public and regulated persons when these regulations go into effect.

The changes to Section 705, T14, CCR are:

All (currently 2019) fees have been updated per the annual Implicit Price Deflator (IPD) as set forth in Section 713, Fish and Game Code, effective January 1, 2020.

Associated changes to forms DFW 327, DFW 1377 and DFW 1406 include:

All forms indicating the cost of fees have been amended per the IPD.

All amended forms are re-dated from ~~(NEW 4/11/2019)~~ to (NEW 10/30/2019) to visibly differentiate the former proposed forms from the amended forms which are the subject of this notice.

An addition of clarifying text to forms DFW 1406 and DFW 1377 regarding the deadline for submittal of renewals for permits in the 2020 license year, which is one month later than it will be in future years.

Update to the text regarding Permit Late Fees which clarifies when the penalties apply.

Changes as proposed in the original notice, and not affected by the non-substantial changes described, are indicated in underline for new text and strikeout for ~~deleted text~~ consistent with the original notice.
