Project Title: San Jacinto Wildlife Area Land Management Plan (LMP)

Project Applicant: California Department of Fish and Wildlife

Project Location (include county): County of Riverside and Cities of Moreno Valley and Beaumont

Project Description: The San Jacinto Wildlife Area (SJWA) is one of the larger public land holdings in Southern California, is a highly utilized recreational resource, and supports a diverse array of biological resources. CDFW has prepared the SJWA LMP to help guide its future planning and management operations for the SJWA. The general purpose of the SJWA is to protect and enhance habitat for plant and wildlife species and to provide the public with compatible, related recreational uses. Biological resources that would continue to be or would newly be managed under the LMP include wetland habitats, riparian habitats, alkali habitats, vernal pools, waterfowl habitats, agriculture fields, Stephens' kangaroo rat habitat, and upland habitats. Current/existing public uses that would continue to be allowed and managed under the LMP include waterfowl and upland game hunting, bird watching, hiking, hunting dog training, horseback riding, nature study, photography, and mountain biking.

This is to advise that the California Department of Fish and Wildlife has approved the above described project on August 24, 2020 and has made the following determinations regarding the above described project.
