NOTICE IS HEREBY GIVEN that the Fish and Game Commission (Commission), pursuant to the authority vested by sections 200, 205, 260, 265, 399, 5520, 5521, and 7149.8 of the Fish and Game Code and to implement, interpret or make specific sections 200, 205, 265, 275, 5520, 5521, 7145, and 7149.8 of said Code, proposes to amend Section 29.15, Title 14, California Code of Regulations, relating to recreational abalone closure.

Informative Digest/Policy Statement Overview

Current recreational abalone fishing regulations in Section 29.15, Title 14, California Code of Regulations (CCR), specify open areas, season, hours, daily limits, special gear provisions, measuring devices, abalone report card requirements, and minimum size limit. Subsection 29.15(i) closes all ocean waters to the take of abalone beginning on April 1, 2018. The closure is currently set to expire on April 1, 2021.

The Commission is proposing to extend the sunset date of the closure to April 1, 2026. A five-year extension of the sunset is expected to allow sufficient time for completion of the Red Abalone Fishery Management Plan and associated implementing regulations. In addition, the proposal will reorganize the subsections of Section 29.15 and update cross references to reflect that reorganization. The proposed regulation will also repeal the requirement in subsection (d) that states all legal size abalone detached must be retained.

Benefits of the Regulations

The proposed regulation will benefit the state’s environment by helping to ensure sustainable populations of red abalone for fishery and ecosystem management.

Consistency and Compatibility with Existing Regulations

The Legislature has delegated authority to the Commission to promulgate recreational fishing regulations (Fish and Game Code, sections 200, 205, and 265); no other state agency has the authority to promulgate such regulations. The Commission has conducted a search of Title 14, CCR, and determined that the proposed regulations are consistent with other recreational fishing regulations and marine protected area regulations in Title 14, CCR, and therefore has determined that the proposed regulation is neither inconsistent nor incompatible with existing state regulations.
