

Implementing the MLMA Master Plan

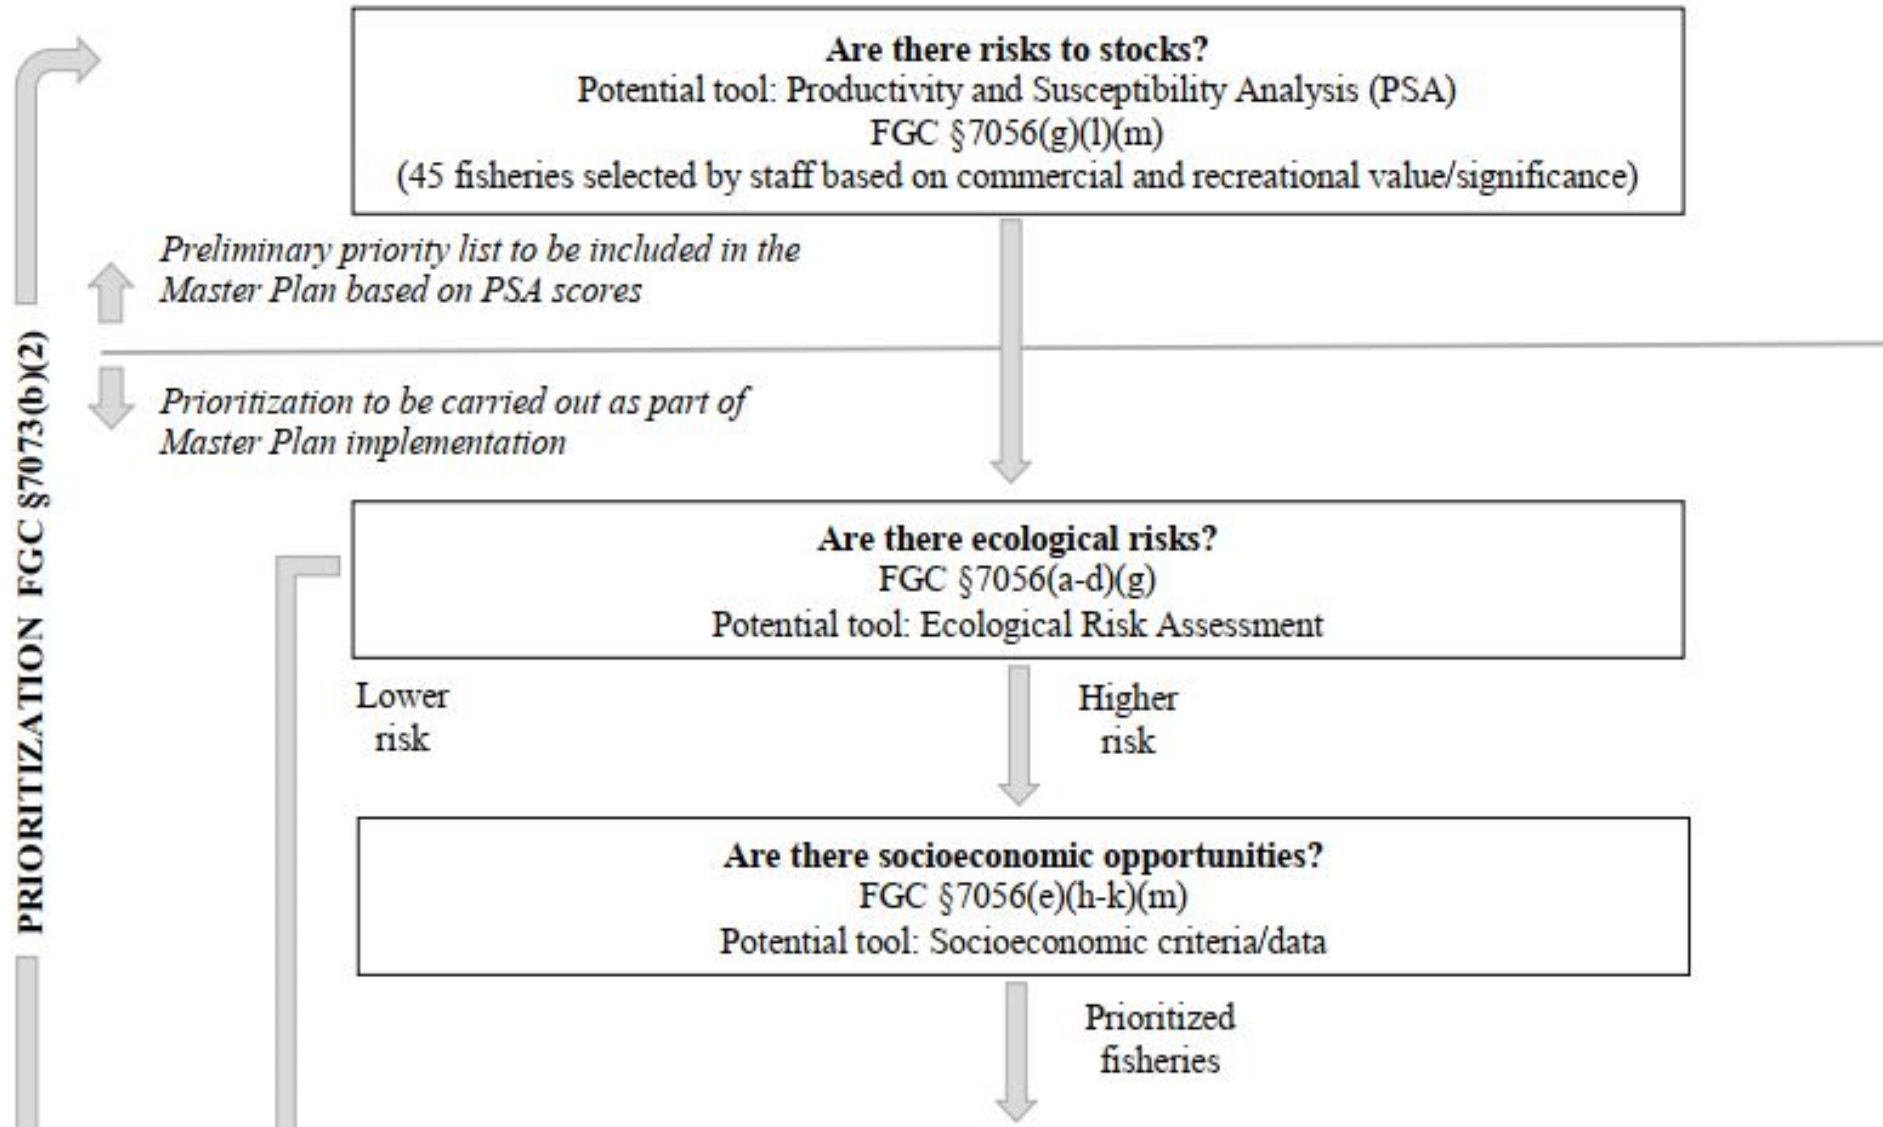

Prioritizing Key California Fisheries

Debbie Aseltine-Neilson, California Department

Fish and Game Commission Meeting

Sacramento, CA • December 12, 2019

Framework for MLMA-based Management

Conducting a Productivity-Susceptibility Analysis (PSA)

- Collaboration with CDFW and partners to select and apply a PSA to state-managed fisheries with greatest catch or landings (2015-2016)
- 45 state-managed fisheries
 - 21 finfish and 17 invertebrate species
- Interim priority list in 2018 Master Plan based on PSA results only

Customizing an Ecological Risk Assessment (ERA)

- Iterative tool development, involving partners and stakeholders
 - Draft tool shared and refined during stakeholder workshops as part of Master Plan amendment process
 - Tool further refined by CDFW to be more streamlined, intuitive, and timely

Conducting ERAs

- ERA framework (21 finfish, 3 invertebrate species)
 - Target = impact from fishing activity to target species (impacts not captured in the PSA)
 - Bycatch = risk from fishing activity to bycatch species
 - Habitat = risk from fishing activity to habitats where fishing occurs

Results: Commercial Fisheries

Scaled Management

- Scaled management addresses the questions:
 - What happens next for fisheries that have been identified as higher priority?
 - What is the appropriate management action?
- Scaled management seeks to match the level of management effort with the management needs and complexity of the fishery
- During process, also will address fisheries or factors not contemplated in the prioritization process

Next Steps

- Fish and Game Commission
 - Possible support for prioritization approach
- CDFW
 - Conduct scaled management tasks
 - Include results of scaling within updated Work Plan and provide at FGC February 2020 meeting

Thank You

Compiling the PSA and ERA Results

- Four Target attributes were added to those of the PSA to provide a more comprehensive risk assessment for target species
- Ranks from PSA (=PSA + Target), Bycatch, and Habitat were added to get final totals
