

**FRGP 2010 MIGRATION PSN**

**APPENDIX I**

**REVIEW PROCESS**

## The Review Process

Each proposal received by the due date goes through a rigorous review process by the FRGP Technical Review Team (TRT), the California Coastal Salmonid Restoration Grants Peer Review Committee (PRC), and the Director of DFG. Through this process, proposals are evaluated and scored based on technical merit, biological soundness, and cost effectiveness, as well as DFG and NOAA Fisheries coast wide and regional goals and objectives. In brief, the review process is as follows:

1. **Administrative Review:** The administrative review will determine if the proposal package is complete and meets all the requirements for submission in Part II. If the proposal does not pass the administrative review, the proposal will be rejected.
2. **Technical Review**
  - A) The statewide Technical Review Team (TRT) includes DFG staff (both biological and engineering) and NOAA Fisheries staff. The TRT meets in June to conduct an initial review of all eligible proposals using criteria described in this PSN.
  - B) **Field Review:** Field reviews are conducted by a local team of appropriate DFG and NOAA staff. Each team of field reviewers evaluate the proposals in more detail for technical and biological soundness, and cost effectiveness. Please note that additional clarifying information/material may only be requested from the applicants by the field evaluators. No unsolicited materials will be accepted after the due date. Reviews from field evaluators are compiled and are forwarded to the TRT.
  - C) The TRT reconvenes in September to review scores and comments, provided by the field review, and assess how proposals meet DFG and NOAA Fisheries goals and objectives. The TRT assigns priorities to each proposal in consideration of the benefit to salmonid restoration. The Final TRT scores, priorities, and comments are forwarded to the California Coastal Salmonid Peer Review Committee (PRC).
3. **California Coastal Salmonid Peer Review Committee:** The PRC is composed of members appointed by the Director of Fish and Game who represent the California Advisory Committee on Salmon and Steelhead Trout, the agriculture industry, the timber industry, public water agencies, academia, and county supervisors. The PRC scores each proposal, and provides oversight of, and recommends priorities for, grant funding under this section.
4. **Director of the Department of Fish and Game:** The Director reviews the Department, TRT, and PRC recommendations and makes the final funding decision in early 2011.
