(1) Target reference point. The current fishing season shall close on October 15 and the next season shall be delayed until April 15 if the average landing of pink shrimp falls below 12,500 pounds during the month of June.

(2) Limit reference point. The current fishing season shall close 10 calendar days following public notice and the start of the next season shall be delayed until April 15 if:

(A) The mean sea level height exceeds 7.5 feet above the station datum as calculated using sea level height measurements from the National Oceanic and Atmospheric Administration tide gauge at Crescent City, California between April 1 of the previous year through January 31 of the current year; and

(B) the average landing of pink shrimp falls below 10,000 pounds during the month of June.

(3) In determining the average landing in June, the department shall:

(A) Use landings data collected in June pursuant to Section 197 of these regulations.

(B) For vessels towing one trawl net, the landing shall be multiplied by a factor of 1.6.
