

## **Description of Specific Edits to the Regulatory Text**

Section 8.00(a)(2): “closed to hook and line fishing” is removed. This is due to clarifications in added subsections.

Subsection 8.00(a)(2)(1): added to read “Legal fishing methods other than angling are permitted.”

Subsection 8.00(a)(2)(2): added to read “From the mouth to the Cock Robin Island Bridge, angling from shore for non-salmonids is permitted” to narrow the restrictions on angling to targeted non-salmonid species while retaining angling opportunities for other species of fish in the area.

Subsection 8.00(b)(2): “in Mendocino County” is added for consistency with previously existing regulations that are not intended to be changed with concurrent updates.

Section 8.00: The entire section is renumbered due to the length and complexity of the provisions of Section 8.00. Renumbering does not have any effect on the meaning or enforceability of the regulations but aids in the reading and identification of each provision more easily.

Section 7.40: References to Section 8.00 are corrected because of its renumbering. These changes are without regulatory effect (do not change the meaning of the regulations). All other amendments to Section 7.40 described in the Initial Statement of Reasons dated March 15, 2022, and approved for notice in April, are unchanged.
