

LIVESTOCK LOSS DETERMINATION

Investigation ID: 082422-PLU

Date Investigated: 8/24/22

Cause of Death:

- Confirmed Wolf
- Probable Wolf
- Possible Wolf
- Non-Wolf Depredation
- Non-Depredation
- Unknown

General Area: Eastern Plumas County, private property

General situation and animal information: On August 24, CDFW was alerted to a potential livestock depredation. CDFW and USDA Wildlife Services investigated the carcass that day. The calf was estimated to have died 1-2 days earlier and the carcass was in sufficient condition to allow a thorough investigation.

Physical evidence of wolf predation: No evidence of wolf presence (e.g., tracks, scat, etc.) was observed.

Evidence of wolf presence near the time of the animal(s) death/injury: No confirmed wolf presence

Summary: The carcass was in sufficient condition to permit a thorough investigation and there was no evidence of depredation.
