

BIRDS

Presented by:
Nadia Martin, Industrial Economics Inc.
on behalf of the Trustees

Potential Effects or Impacts

- Direct exposure to oil
- Oiling of habitat and food sources
- Response and clean up activities
 - Disturbance to birds
 - Bird habitat degradation

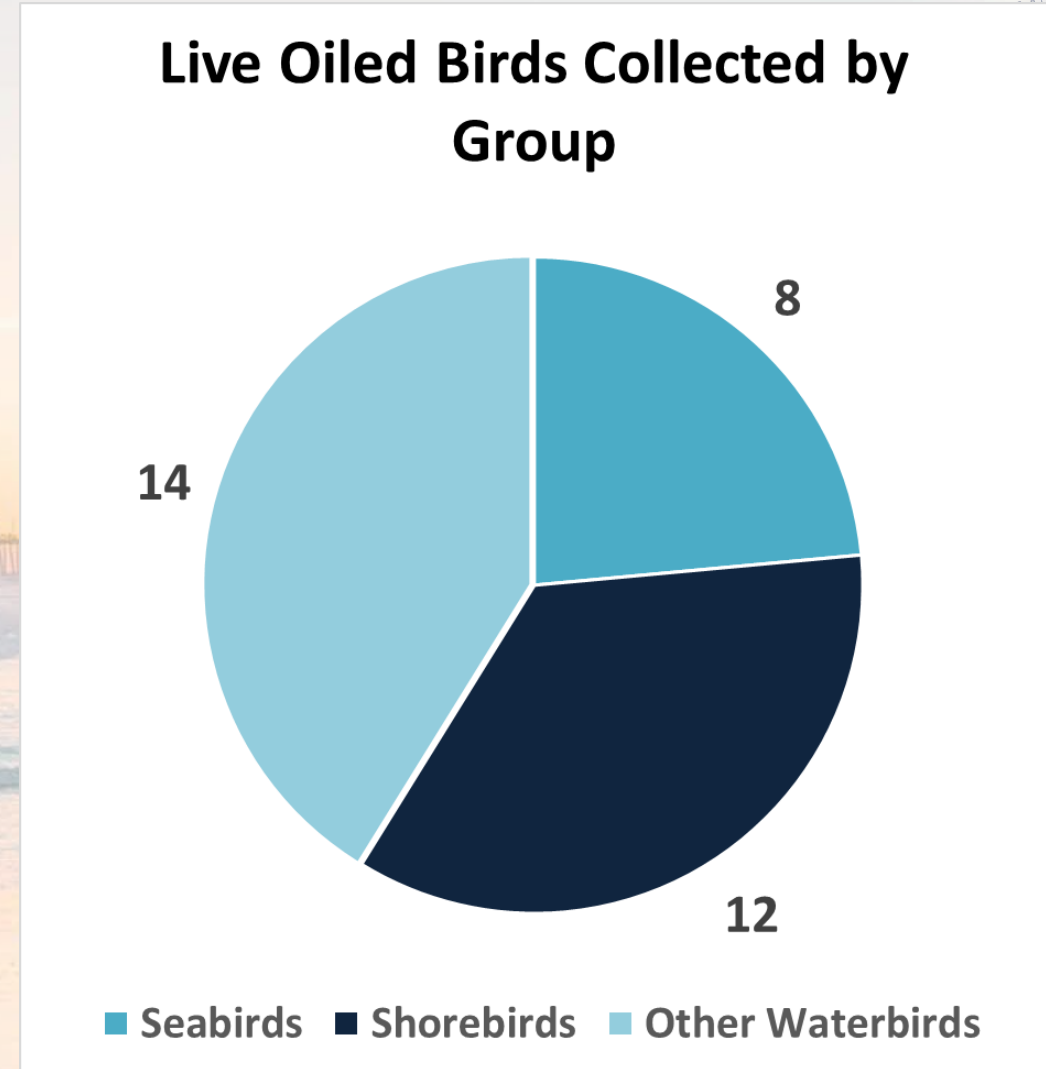

Injury Pathway

Preliminary Observations & Findings

- Data collected during and after the spill
 - Wildlife response data
 - Shorebird surveys
 - Pelican roost surveys
 - Western snowy plover monitoring and nest surveys
 - Wildlife overflights
- Supplementary information sources
 - Data on bird species from prior to the spill
 - Information on the impacts of oiling

Next Steps

- Continue data compilation and review from Western Snowy Plover monitoring efforts
- Evaluate and quantify injury to birds
 - Direct mortality
 - Sub-lethal injury
- Restoration planning for affected bird habitats and species
