Regarding
Newhall Ranch Resource Management
and Development Plan (RMMP)
and the Spineflower Conservation
Plan (SCP)

RECEIVED

MAY 21 2009

Regulatory Branch

Attention Aaron D Allen

I followed this project for many years and spoke at the day long meeting in Downtown Los Angeles to voice my objections and concerns in 2003. It seems to me all these have been made worse by economic environmental and drought issues. It was apparent then that much was ignored or minimized.

Please consider the negative effects on the population of this area

Sincerely
Marybeth
Kaminski-Tower

058. Letter from Marybeth Kaminski-Power, dated May 18, 2009

Response 1

The Corps and CDFG appreciate the comment provided in your letter. Your opinion regarding economic, environmental, and drought issues will be included as part of the record and made available to decision makers prior to a final decision on the proposed Project. Please note that the Project's impacts related to population, housing, and economics were evaluated in the Draft EIS/EIR, **Section 4.19**, Socioeconomics and Environmental Justice; and the Project's water supply impacts during drought conditions were evaluated in the Draft EIS/EIR, **Section 4.3**, Water Resources. (See also revised **Section 4.3** of the Final EIS/EIR.) Because the comment does not address the content of the Draft EIS/EIR, no additional response is provided.
