to review this EXTREMELY LARGE document of 16,000 pages. Give concerned citizens and biologists a chance to check what Newhall Ranch is claiming. I remember they once sent hazing machines that made loud noises, out to the river so the wildlife could not be found. Just 4 months breathing room will be enough. thank you for your consideration.

## a concerned citizen

## 075. E-mail from Lynne Alison Winner, dated June 4, 2009

## Response 1

In response to this and other requests, the Corps and CDFG extended the comment period for the Draft EIS/EIR. Please refer to **Topical Response 1: EIS/EIR Public Review Opportunities**.

Regarding the hazing machines, they were used for a period time within the NRMP permit area. The use of such devices was subsequently discontinued, and no hazing machines were used at any time within the RMDP/SCP study area, nor will such machines be used should federal and state permits be issued as part of the proposed Project or any alternative.
