Subject: Newhall Ranch EIR/EIS Comment

Dear Dennis Bedford

On behalf of the Santa Clarita Well Owners Association, a 501c3 organization with a membership that will be directly affected by EIR/EIS choices set forth in the Newhall Ranch Co. plan, we request that a 120 extension for review be immediately granted to allow the plan's vast amounts of data be available for further review.

1

If any other information would be helpful in implementing our group's request, please do not hesitate to contact me either by email at the above address, phone at 661 298 2000 or via mail at

Santa Clarita Well Owners Association
PO Box 381
16654 Soledad Canyon Road
Santa Clarita, CA 91387

Please include our organization in all future notifications of hearings, decisions and other meeting pertaining to the Newhall Ranch/Santa Clara River Permit process.

2

Thank you

Robert Fleck
President

099. E-mail from Robert Fleck, dated June 11, 2009

Response 1

Draft EIS/EIR, **Section 4.3**, Water Resources, and **Subsection 6.5.3**, Cumulative Water Resources, address the proposed Project's impact on regional and local water resources, including the impact on local groundwater resources. This information was made available to the public on April 27, 2009. With regard to the request for an extension of the Draft EIS/EIR public review period, in response to this and other similar requests, CDFG and the Corps extended the review period. Please refer to **Topical Response 1: EIS/EIR Public Review Opportunities**. In addition, for further responsive information, please see revised **Section 4.3** of the Final EIS/EIR.

Response 2

As requested, the Santa Clarita Well Owners Association has been included on the distribution list for future Project-related notices.
