

## Proposed Emergency Regulatory Language

Section 27.20 is amended to read:

### **§ 27.20. Groundfish Management Areas, Seasons, Depths, Exceptions, and Fishery Closure/Rule Change Process Described.**

Regulations that follow in sections 27.25 through 27.50 define fishing seasons and depth constraints that are effective within each Groundfish Management Area (GMA). These sections apply to take and possession of federal groundfish species as defined in Section 1.91 and all greenlings of the genus *Hexagrammos*.

(a) Depth Constraints: In a GMA the take, retention and/or possession of certain federal groundfish and all greenlings of the genus *Hexagrammos* may be authorized or prohibited in waters shallower than, or deeper than, the identified depth constraint depending on the defined areas and seasons specified in sections 27.25 through 27.50. Two specific definitions of “depth” apply off California. In waters shallower than 30 fathoms, “depth” is defined by general depth contour lines. In waters equal to or deeper than 30 fathoms, “depth” is defined by approximating a particular depth contour by connecting the appropriate set of waypoints adopted in Federal regulations (50 CFR Part 660, Subpart C).

(b) General Provisions.

(1) Take and/or possession of federal groundfish species or species groups and all greenlings of the genus *Hexagrammos* is authorized or prohibited as provided in subsections (b)(1)(A) through (b)(1)(D) below and sections 27.25 through 27.50 of these regulations.

(A) Transit-Anchoring, drifting, or transiting in closed areas: The species or species groups that are closed to take and/or possession in part of a GMA may be possessed aboard a vessel in transit through a closed area with no fishing gear deployed in the water. In waters where groundfish species or species groups are closed to take and/or possession but authorized for take and/or possession in other areas, those species or species groups may be possessed aboard a vessel that is anchored, drifting, or transiting in or through that closed area. While anchoring, drifting, or transiting through an area closed to take and/or possession of these groundfish species or species groups, no gear may be deployed other than for the take of crustaceans with hoop nets used pursuant to subsection 29.80(b), Dungeness crab traps used pursuant to subsection 29.80(c), and dip nets used pursuant to Section 28.80.

(B) Federal groundfish exempt from seasons and depth constraints: “Other Flatfish” as defined in subsection 1.91(a)(10), petrale sole, starry flounder, California scorpionfish, leopard shark, and the federal groundfish species listed in Section 28.49 may be taken and/or possessed in all GMAs and depths year-round except as described in subsections 28.49(a) and 28.56(a).

(C) Shore Based Angling: When angling from shore (includes beaches, banks, piers, jetties, breakwaters, docks, and other man-made structures connected to the shore), all species, except those listed in subsection 28.55(b)(1), may be taken and/or possessed year-round (See subsection 27.50(b)(1) for exceptions in the Cowcod Conservation Areas). No vessel or watercraft (motorized or non-motorized) may be used to assist in the take, transport and/or possession of these species under this provision.

(D) Diving or Spearfishing: When diving or spearfishing, as authorized in Section 28.90, all species, except those listed in subsection 28.55(b)(1), may be taken and/or possessed year-round (See subsection 27.50(b)(2) for exceptions in the Cowcod Conservation Areas). When boat-based groundfish fishing is closed, all types of fishing gear, except spearfishing gear, are prohibited to be aboard the vessel or watercraft (motorized or non-motorized) when taking and/or possessing these species under this provision.
