

Lower American River Conservancy Program Advisory Committee
Parkway Tour Agenda
November 30, 2023

Please join the Wildlife Conservation Board (WCB) and members of the Lower American River Conservancy Program Advisory Committee on the fourth tour of the lower American River Parkway (Parkway). This tour will feature three sites along the upper reach of the Parkway in Fair Oaks. The goals of the trip are to educate the committee members, WCB staff, and the public on the current conditions of the Parkway and introduce potential and current community investment sites.

All participants are responsible for their own transportation, water, and lunch. Entrance fees and parking fees will be waived at all the sites. A couple sites will include short walks on dirt trails. Please wear comfortable walking shoes and outdoor attire. All times are approximate. If you would like to attend this tour, please sign up [here](#).

The tour will begin at the Nimbus Fish Hatchery, located at 2001 Nimbus Rd, Gold River, CA 95670, and will end at the Upper Sunrise Boat Ramp parking lot, located at coordinates 38.635697, -121.264063, near the intersection of S. Bridge Street and the Old Fair Oaks Bridge in Gold River.
