

Entities approved for specific projects starting April 2021

Determinations are made on a project-by-project basis. In the context of a specific permit or approval issued by CDFW, CDFW's regional permitting staff undertake a project-by-project review to determine if the entity proposed for those roles and responsibilities has the qualifications and capacity to hold conservation easement(s) and/or manage and steward the specific mitigation land(s). Therefore, entities listed would not necessarily be approved for other projects.
