

Crosswalk for Multi-APN Mitigation Land Package Review

Mitigation land packages with multiple APNs often have many documents to review. Some of these might not be organized or grouped in a manner that is consistent with what CDFW will be reviewing. For example, a single vesting deed might contain several parcels but not all of them are going to be part of the Conservation Easement (CE). Another example is when the CE is made up of several parcels, and the accompanying preliminary title report (PTR) assigns a number to each parcel, but the numbers do not necessarily match the numbers assigned to those parcels in the submitted land survey products. Both examples may occur together, which is even more complicated. Untangling this may require extensive time for CDFW staff; that situation can delay a review.

To facilitate a timely review, please download and fill out the Microsoft Excel file located here: [Crosswalk](#), and include it with the land package submittal.
