

**Region 6 Barrier ID: W224 (Remediated Barrier).**

**Barrier Name:** SR-108 through Sardine Meadow- existing Yosemite toad crossing structure.

**Linear Infrastructure:** SR-108.

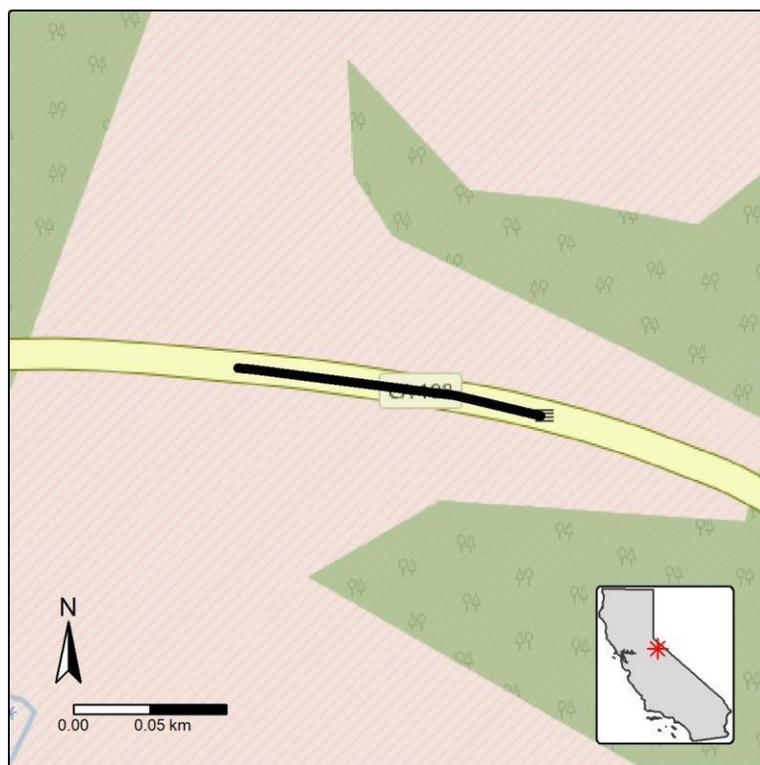

**Geographic Area:** SR-108, Mono County, Caltrans District 9.

**Length:** 0.16 km (0.10 mi).

**Target Species:** Yosemite Toad (*Anaxyrus canorus*).

**Connectivity Concerns:** SR-108 bisects a meadow that functions as a breeding site for Yosemite Toad. Roadkill has been an issue as toads crossed the road to get from one side of the meadow to the other.

**Remediation Goals:** Completed. Two different crossing structures were installed in 2020, one open-top and one closed-top. Post-completion monitoring underway.
