

Region 1/Region 2 Barrier ID: W072 (Barrier).

Barrier Name: SR-32E Transfer/Deer Creek.

Linear Infrastructure: SR-32E.

Geographic Area: Tehama and Butte County.

Length: 40.97 km (25.46 mi).

Target Species: Deer (*Odocoileus hemionus*), Cascades frog (*Rana cascadae*), foothill yellow-legged frog (*Rana boylei*), mesocarnivores.

Connectivity Concerns: The barrier partially intersects (<50%) a linkage identified in a species movement study, regional connectivity study, or Conceptual Area Protection Plan, or inhibits connectivity between or within important habitat blocks. It bisects an ungulate migration corridor that has been mapped based on GPS collar data or expert knowledge. Expert knowledge or data indicates wildlife mortality of two or more species, but population-level impacts not expected.

Remediation Goals: Additional data collection and analysis is required. Possible remediation goals include expanding and enhancing existing infrastructure such as culverts and creek bridges, create new overpass and wildlife exclusion fencing.
