

Staff Summary for April 16-17, 2025

28. Regulation Change Petitions - Marine**Today's Item**Information ☐Action ☒

This is a standing agenda item for the Commission to receive new regulation change petitions and act on regulation change petitions received from the public at previous meetings. For this meeting:

1. Act on previously received regulation change petitions
2. Receive new petitions for regulation change
3. Receive comments on petitions previously-referred for review and recommendation but not yet scheduled for action, including an update on received amended petitions for modifications to marine protected areas (MPAs).

Summary of Previous/Future Actions**(A) *Petitions for Regulation Change – Scheduled for Action***

- Received Petition 2025-1 February 12-13, 2025
- **Today potentially act on Petition 2025-1 April 16-17, 2025**

(B) *New Petitions for Regulation Change – Receipt*

- **Today receive new petitions. April 16-17, 2025**
- Potentially act on new petitions June 11-12, 2025

(C) *Comments Received on Referred Petitions***Background****(A) *Action on Previously Received Regulation Change Petitions***

Petitions received at the previous meeting are scheduled for Commission action at its next regular Commission meeting, to (1) deny, (2) grant, or (3) refer to a Commission committee, staff, or the Department for further evaluation or information gathering. Referred petitions are scheduled for action once a recommendation is received.

Today, one regulation change petition is scheduled for action:

- I. Petition 2025-01: Request to amend methods of recreational take of limpets (Exhibit A2)

The staff recommendation and rationale, developed with input from Department staff, is provided in Exhibit A1.

(B) *Receive New Petitions for Regulation Change*

Pursuant to Section 662, any person requesting that the Commission adopt, amend, or repeal a regulation must complete and submit form FGC 1. Regulation change petition forms submitted by the public are “received” at this Commission meeting if they are

Staff Summary for April 16-17, 2025

delivered by the public comment or supplemental comment deadlines or delivered in person to the Commission meeting.

Under the Bagley-Keene Open Meeting Act, the Commission cannot discuss or act on any matter not included on the agenda, other than determine whether to schedule issues raised by the public for consideration at future meetings. Thus, petitions for regulation change generally follow a two-meeting cycle of receipt and decision. The Commission will act on petitions received at today's meeting at the next regularly scheduled Commission meeting (currently June 11-12, 2025), following staff evaluation, unless the petition is rejected under the 10-day staff review as prescribed in subsection 662(b).

Today, there are no new marine petition(s) for regulation change; however, amendments to five MPA petitions currently under review were received and are detailed under part (C) of this item.

(C) ***Referred Petitions***

Comments on Referred Petitions

This item is for receiving public comments for any petition previously referred for review and recommendation but not yet ready for Commission action. Action on any referred petition will be scheduled once the Commission receives a recommendation.

Marine Protected Area (MPA) Petitions Currently Under Review: Amended MPA Petitions

Following the Commission's action on five MPA petitions in December 2024 ("bin 1"), staff is providing an update on the remaining 15 pending MPA petitions ("bin 2"). The Commission allowed the 15 MPA petitioners to submit amended versions of original petitions, setting deadlines of January 10, 2025 for submission of statements of intent to amend and March 14, 2025 for submission of final amendments.

In February 2025, staff reported having received three amended petitions and six statements of intent to amend (details available in the [February Commission Meeting staff summary](#)).

Update

Of the six petitions with statements of intent, four submitted amended MPA petitions by the deadline, one with an extension to March 26 to allow for tribal input (those petition tracking numbers have been appended with "AM 1"). Additionally, one amended petition received by the January deadline was resubmitted with clarifying revisions (the petition tracking number has been appended with "AM2"). The amended petitions are included as exhibits.

Therefore, a total of seven amended MPA petitions were received and are the versions that will be reviewed by the Department and Commission. Each petitioner submitted a summary of, and rationale for, their amendments. In addition, petitioners resubmitted their original Form FGC1 with the changes from the original MPA petition indicated with strikethrough and underlined text to assist in identifying what was changed. The seven petitions, as amended, are:

Staff Summary for April 16-17, 2025

- Petition 2023-23MPA_AM1 (exhibits C3, C4)
- Petition 2023-27MPA_AM1 (exhibits C5, C6)
- Petition 2023-15MPA_AM2 (exhibits C7, C8)
- Petition 2023-24MPA_AM1 (exhibits C9, C10)
- Petition 2023-28MPA_AM1 (exhibits C11, C12)
- Petition 2023-29MPA_AM1 (exhibits C13, C14)
- Petition 2023-33MPA_AM1 (exhibits C15, C16)

Exhibit C1 summarizes the seven amended bin 2 petitions, separated into each distinct proposed action, and identifies which proposed actions were amended. In total, the seven petitions collectively include 16 actions that were amended by the petitioners. Petitioners for the seven petitions with amendments were given an opportunity to review the table for accuracy; additional edits may be necessary.

The Department is in the process of integrating the petition amendments into its online [MPA Petition Process StoryMap](#).

Next Steps for Review of Referred MPA Petitions

Exhibit C2 is a table of all bin 2 petitions, separated into distinct proposed actions, with the amendments submitted by petitioners fully incorporated. This table reflects the versions of the petitioned actions that will undergo evaluation by the Department.

At its February meeting, the Commission indicated its interest in potential additional meeting dates to jointly review MPA petition evaluations and recommendations in a committee-style format (similar to a legislative “committee of the whole”), to allow for more informal discussion and deliberation amongst commissioners about the complex evaluations and important decisions regarding MPA petitions. The Commission requested that staff provide potential meeting dates adjoining Commission meetings either late in 2025, or early 2026, to follow Department release of petition evaluations and recommendations currently proposed for the November MRC meeting (see Agenda Item 30A, MRC). Staff is exploring the feasibility of different dates and will bring options to today’s meeting.

Significant Public Comments

(C) *Referred Petitions*

1. *2023-24MPA_AM1*: The petitioner summarizes their amendments, proposed evaluation criteria aligned with the Marine Life Management Act (MLMA) master plan, highlighted their connection to the Laguna MPAs (including their Handicapped Scuba Project), and invited staff and commissioners to visit (Exhibit C17).
2. *2023-28MPA_AM1*: The Santa Barbara Community Action Network (SBCAN) (Exhibit C18) and the mayor of the City of Guadalupe (Exhibit C19) express strong support for the proposed Point Sal State Marine Reserve (SMR). SBCAN emphasizes marine life protection; its cultural significance for local indigenous communities; its benefits for

Staff Summary for April 16-17, 2025

wildlife viewing, ecotourism, and the local economy; and the MPA's potential role in ocean health and climate resilience. The mayor specifically highlights the importance of protecting biodiversity at Point Sal for future generations and of the Chumash people's connection to the location.

3. *2023-29MPA_AM1*:
 - a. Two Carpinteria residents, one a graduate student at UC Santa Barbara specializing in benthic ecosystem research, oppose the proposed MPA for Carpinteria Reef. They argue it is the closest accessible shore fishing spot for people without boats, cite a lack of scientific justification for MPA designation, question the need for added protection for juvenile white sharks already illegal to harvest, and dispute the potential for spillover effects due to the lack of fishable adjacent areas and uncertain larval transport due to currents. Finally, they highlight its disproportionate impact on underrepresented communities, contending the MPA would negatively impact low-income families by limiting shore fishing access. They also disagree that increasing Native American access requires excluding the public (exhibits C20 and C21).
 - b. California Surf Fishing expresses support for Mishopshno State Marine Conservation Areas (SMCA) after engaging with petition co-sponsors and Fish On, another fishing advocacy organization. They also engaged Carpinteria shore anglers and obtained around 1,000 signatures online from anglers in support of shore fishing in SMCAs. They support the petition, as it meets connectivity guidelines, would allow low-impact fishing, and has the potential to strengthen the state's MPA network (Exhibit C23).
4. *2023-33MPA_AM1*: A surf fisher opposes the proposed Cabrillo SMR expansion, stating it would eliminate a valuable shore fishing location, one of the few productive ones in the region. While generally supporting MPAs, they suggest moving the boundary southward by 1.5 miles to preserve this shore fishing spot, emphasizing the importance of shore fishing for equity, its minimal environmental impact, and angler quality of life (Exhibit C22).
5. *2023-15MPA_AM2*: The petitioner advocates for a standardized evaluation process for all MPA petitions using the MLPA Master Plan for MPAs framework. The petitioner highlights the master plan's measurable regional objectives, structured under the MLPA's six goals, and notes support from various organizations endorsing its adaptive management approach. To illustrate this framework's use, the petitioner analyzes their own petition against relevant south coast regional objectives, arguing the analysis demonstrates that it aligns with master plan goals. This analysis was also provided to the MRC in March (Exhibit C24).

Recommendation

Commission staff:

(A) *Action on Previously Received Regulation Change Petitions*

Deny Petition 2025-01 for reasons set forth in Exhibit A1.

Staff Summary for April 16-17, 2025

(C) Referred Petitions

Receive and discuss potential meeting dates in late 2025 or early 2026 (to be proposed by staff during today's meeting) for the Commission to review MPA petition evaluations and recommendations, using a committee-style format, after Department release. Schedule dates, if any, under Agenda Item 31(C) Future Meetings.

Motion

Moved by _____ and seconded by _____ that the Commission adopts the staff recommendation to deny Petition 2025-01.

OR

Moved by _____ and seconded by _____ that the Commission adopts the following action for Petition 2025-01: _____.

California Fish and Game Commission

Petitions for Regulation Change — Action (updated April 1, 2025)

CFGC - California Fish and Game Commission CDFW - California Department of Fish and Wildlife WRC - Wildlife Resources Committee MRC - Marine Resources Committee , MR - Marine Region
 Grant: CFGC is willing to consider the petitioned action through a process Deny: Not willing to consider the petitioned action Refer: Need more information before the final decision

Tracking No.	Date Received	Name of Petitioner	Short Description	CFGC Receipt	CFGC Initial Action Date	Initial Staff Recommendation
2025-01	1/16/2025	Cheryl Wilen	Modify language to allow a flexible blade or knife, e.g. "putty knife" for take of limpets	2/12-13/2025	4/16-17/2025	DENY: The proposed method may support harvest effectiveness and also may increase harvest efficiency, raising concerns regarding potential impacts on limpet populations and the sustainability of harvest levels. The increase in number of people harvesting from the intertidal zone, which has continued since the COVID pandemic, coupled with the potential for a more efficient harvesting method, creates a heightened risk of unsustainable take. Currently, there is insufficient data on the population status of harvested limpet species to assess the risk or determine whether the existing daily bag limit of 35 individuals remains appropriate. Given these constraints and the potential for increased harvest pressure, a precautionary approach is warranted.

Tracking Number: (2025-01)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Cheryl Wilen

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: **Authority cited: Sections 200, 205, 219, 265 and 275, Fish and Game Code. Reference: Sections 200, 205, 255, 265, 270 and 275, Fish and Game Code.**

3. Overview (Required) - Summarize the proposed changes to regulations: Replace "hook-and-line" with "flexible blades or knife, e.g. putty knife**". This is requested specifically for limpets.**

4. Rationale (Required) - Describe the problem and the reason for the proposed change: Mollusks Abalone, clams, scallops, mussels, etc. 14 CCR § 29.10. General. (a) Except as otherwise provided in this article, saltwater mollusks, including octopus, may be taken only on hook-and-line or with the hands." be modified to allow the use of flexible blades, e.g. putty knife, to collect limpets.

As you know, there is no way to collect them using a hook and line and collecting by hand is quite dangerous as one must hit them with their hand in a very specific way to get them to disengage with the rocks. One wrong hit and the collector can fall into the ocean or hard onto slippery rocks. Use of flexible knives is safer and less likely to damage the substrate. Keeping the collection limit at 35/day will ensure that the area is not overfished.

SECTION II: Optional Information

5. **Date of Petition: January 15, 2025**

6. **Category of Proposed Change**

☐ Sport Fishing

☐ Commercial Fishing

☐ Hunting

☒ Other, please specify: **California Recreational Ocean Fishing Regulations
General Ocean Invertebrate Fishing Regulations**

7. **The proposal is to:** *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

☒ Amend Title 14 CCR § 29.10 Section(s) Mollusks Abalone, clams, scallops, mussels, etc. General. (a) Except as otherwise provided in this article, saltwater mollusks, including octopus, may be taken only on hook-and-line or with the hands

☐ Add New Title 14 Section(s): [Click here to enter text.](#)

☐ Repeal Title 14 Section(s): [Click here to enter text.](#)

8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition** [Click here to enter text.](#)
Or ☒ Not applicable.

9. **Effective date:** If applicable, identify the desired effective date of the regulation. If the proposed change requires immediate implementation, explain the nature of the emergency: [Click here to enter text.](#)

10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents: [Click here to enter text.](#)

11. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing: None

12. **Forms:** If applicable, list any forms to be created, amended or repealed:

[Click here to enter text.](#)

SECTION 3: FGC Staff Only

Date received: [01/16/2025](#)

FGC staff action:

☒ Accept - complete

☐ Reject - incomplete

☐ Reject - outside scope of FGC authority

Tracking Number

Date petitioner was notified of receipt of petition and pending action: _____

Meeting date for FGC consideration: _____

FGC action:

- ☐ Denied by FGC
- ☐ Denied - same as petition Tracking Number
- ☐ Granted for consideration of regulation change

California Fish and Game Commission

Table 1: Amended Marine Protected Area (MPA) Petitions for Regulation Change (Bin 2)

April 10, 2025

Background

In December 2023, the California Fish and Game Commission (Commission) received 20 MPA petitions. Seventeen of the 20 petitions bundled multiple requested MPA changes (both regulatory and non-regulatory) into single documents. In total, the 20 petitions included 86 individual proposed changes. At the February 2024 Commission meeting, Commission and California Department of Fish and Wildlife (CDFW) staff provided a table that itemized the individual proposed changes by petition ([link to February 2024 summary table found here](#)). Each individual request was assigned a unique tracking ID associated with the petition number and summarized into a summary table containing all petitions. The table partitioned discrete unique action requests and categorized them by affected MPA, bioregion, Marine Life Protection Act (MLPA) action category (modify, establish, or abolish), action type (e.g., boundaries, take, classification), proposed action, and the justification as stated by the petitioner. The Commission petition tracking number and the unique action request numbers were combined into one category, titled “Tracking ID.”

Petitions were sorted into two categories, or “bins”: Bin 1 contained petitions identified for immediate evaluation and Bin 2 contained petitions for which additional information was necessary before evaluating. Bin 1 petitions were evaluated by the Department in 2024, and the Commission acted on all Bin 1 petitions in December 2024. During the December meeting, the Commission also offered Bin 2 petitioners an opportunity to submit amendments to their petition by March 14, 2025. These were received at the Commission’s February and April 2025 meetings. This document provides updates to the original February 2024 summary table by integrating amendments submitted by petitioners for Bin 2 petitions.

- **Bin 2 Petitions:** There are 15 MPA petitions that were sorted into the Bin 2 category. The 15 Bin 2 petitions collectively include 69 proposed unique actions; including 50 regulatory requests and 19 non-regulatory requests for changes.
- **Amended Bin 2 Petitions:** In total, seven of the 15 Bin 2 petitions were amended by petitioners. The seven petitions collectively include 39 proposed unique actions; 16 of the 39 proposed unique actions were amended.
- **Table 1 (this document):** Table 1 summarizes all actions in amended petitions and highlights changes to actions proposed in amendments.
- **Table 2 (separate document):** Table 2 provides the current list of Bin 2 petitions, incorporating the amendments as the versions that will be evaluated by CDFW.

Select acronyms: SMCA = state marine conservation area, SMR = state marine reserve, DMR = decadal management review,
SCP = scientific collecting permit

Table 1. Amended Bin 2 MPA Petitions Itemized by Individual Actions

Table 1 summarizes amended Bin 2 MPA petitions by individual actions. Only updated action items have had their tracking ID updated with an “AM1” or “AM2” at the end. Note, there was only one “AM2” assigned (2023-15 AM1 was resubmitted as AM2 to make minor clarifications of language). Alterations from original petitions are marked in red with underline. Deleted language from original petitions are marked with ~~strikethrough~~. Language included in the original petition but not specified in original February 2024 summary table is in black underline.

The table column titled Amendment Justification Stated by the Petitioner provides a summary of information provided by petitioners. For complete information on the petitioner’s justification for the amendments, including outreach, please refer to individual petitions and cover letters (provided as exhibits in Item 28 materials, April 2025 Commission meeting).

California Fish and Game Commission
Table 2: Bin 2 Marine Protected Area (MPA) Petitions for Regulation Change, as
Revised by Amended Petitions

April 10, 2025

The California Fish and Game Commission is in the midst of a process to review and consider proposed changes to MPAs and the MPA management program through a petition process, consistent with recommendations from the first decadal management review of California's network of MPAs.

In 2023, the Commission received 20 MPA petitions with 86 individual actions proposed across the 20 petitions. In 2024, after the California Department of Fish and Wildlife completed its evaluation and made recommendations for five of the petitions, referred to as the "bin 1" petitions, the Commission took action; a total of 17 individual actions were addressed with those five petitions.

The remaining 15 petitions are referred to as "bin 2" petitions; they contain a total of 69 proposed individual actions. In December 2024, the Commission offered the bin 2 petitioners an opportunity to submit amendments to their petitions. The following pages contain a table of all the bin 2 petitions with amendments submitted by petitioners integrated into the full list of proposed actions.

The table partitions the petitions into the individual proposed actions and categorizes them by affected MPA, bioregion, Marine Life Protection Act (MLPA) action category (modify, establish, or abolish), action type (e.g., boundaries, take, classification), proposed action, and the justification as stated by the petitioner. The Commission petition tracking number and the unique action request numbers were combined into one category, titled "Tracking ID."

- **Bin 2 Petitions:** There are 15 MPA petitions in the bin 2 category; collectively they contain 69 individual proposed actions; including 50 regulatory requests and 19 non-regulatory requests for changes.
- **Amended Bin 2 Petitions:** Seven of the bin 2 petitions were amended by petitioners; collectively they contain amendments to 16 of the individual proposed actions.
- **Table 1 (*a separate document*):** Only summarizes individual actions in the seven amended petitions, with the amended actions highlighted.
- **Table 2 (*this document*):** Table 2 provides the complete list of bin 2 petitions with amendments incorporated; these are the versions that will be evaluated by the California Department of Fish and Wildlife.

Select acronyms: SMCA = state marine conservation area, SMR = state marine reserve, DMR = decadal management review, SCP = scientific collecting permit

Table 2. All Bin 2 MPA Petitions Itemized by Individual Actions, Updated to Reflect Amended Individual Actions

Tracking ID (Petition #- unique action)	Petitioner	Affected MPA	Bio- region	MLPA Action Category	Action Type	Proposed Action	Justification Stated by the Petitioner
2023-15MPA_1 _AM2	Blake Hermann	Footprint SMR	South	Modify	Classification /Take	Reclassify SMR to SMCA to allow either the limited take of highly migratory species (HMS) and possession of coastal pelagic species, or the take of pelagic finfish via six options. Options include various combinations of methods of take, including: Hook-and-line, spear, harpoon (swordfish only), and options to prohibit "bottom-contact gear" (see petition for specific options).	This proposal provides an opportunity to fill knowledge gaps by converting no-take MPAs to limited take MPAs; these MPAs weren't originally designed to protect pelagic species or highly migratory species (HMS) as MPAs have minimal protective benefits to HMS; there is an equity imbalance, as a higher proportion of the MPAs within the Channel Islands are no-take SMRs compared to the rest of the state which has a greater percentage of SMCAs; public support from fishery businesses, groups, and individuals; calls to DMR appendix A bullet points: "Allow take of migratory and pelagic species in MPAs that currently do not allow it" and "Return MPA fishing opportunities, especially in legacy fishing areas that were previously open to fishing."

Tracking ID (Petition #- unique action)	Petitioner	Affected MPA	Bio- region	MLPA Action Category	Action Type	Proposed Action	Justification Stated by the Petitioner
2023-15MPA_2 _AM2	Blake Hermann	Gull Island SMR	South	Modify	Classification /Take	Reclassify SMR to an SMCA (or an inshore SMCA or SMR with an offshore SMCA) to allow either the limited take of highly migratory species (HMS) and possession of coastal pelagic species, or the take of pelagic finfish via six options. Options include various combinations of methods of take, including: Hook-and-line, spear, harpoon (swordfish only), and options to prohibit "bottom-contact gear" (see petition for specific options).	This proposal provides an opportunity to fill knowledge gaps by converting no-take MPAs to limited take MPA; these MPAs weren't originally designed to protect pelagic species or HMS as MPAs have minimal protective benefits to HMS; there is an equity imbalance, as a higher proportion of the MPAs within the Channel Islands are no-take SMRs compared to the rest of the state which has a greater percentage of SMCAs; public support from fishery businesses, groups, and individuals; calls to DMR appendix A bullet points: "Allow take of migratory and pelagic species in MPAs that currently do not allow it" and "Return MPA fishing opportunities, especially in legacy fishing areas that were previously open to fishing."

2023-15MPA_3 _AM2	Blake Hermann	Santa Barbara Island SMR	South	Modify	Classification /Take	Reclassify SMR to an SMCA (or an inshore SMCA or SMR with an offshore SMCA) to allow either the limited take of highly migratory species (HMS) and possession of coastal pelagic species, or the take of pelagic finfish via six options. Options include various combinations of methods of take, including: Hook-and-line, spear, harpoon (swordfish only), and options to prohibit "bottom-contact gear" (see petition for specific options).	This proposal provides an opportunity to fill knowledge gaps by converting no-take MPAs to limited take MPA; these MPAs weren't originally designed to protect pelagic species or HMS as MPAs have minimal protective benefits to HMS; there is an equity imbalance, as a higher proportion of the MPAs within the Channel Islands are no-take SMRs compared to the rest of the state which has a greater percentage of SMCAs; public support from fishery businesses, groups, and individuals; calls to DMR appendix A bullet points: "Allow take of migratory and pelagic species in MPAs that currently do not allow it" and "Return MPA fishing opportunities, especially in legacy fishing areas that were previously open to fishing."
2023-16MPA_1	Richard Ogg, Bodega Bay Fisherman's Marketing Association	Stewart's Point SMR	North	Modify	Classification /Take	Reclassify SMR to SMCA to allow commercial take of salmon by trolling	Broadening areas where salmon trolling is allowed will improve fishery resiliency as the fishery is currently at risk; aligns with the MLPA master plan for MPAs goals and objectives 1.1, 1.5, 2.4, and 5.1 and the DMR recommendation 6c.

Tracking ID (Petition #- unique action)	Petitioner	Affected MPA	Bio- region	MLPA Action Category	Action Type	Proposed Action	Justification Stated by the Petitioner
2023-16MPA_2	Richard Ogg, Bodega Bay Fisherman's Marketing Association	Bodega Head SMR	North	Modify	Classification /Take	Reclassify SMR to SMCA to allow commercial take of salmon by trolling	Broadening areas where salmon trolling is allowed will improve fishery resiliency as the fishery is currently at risk; aligns with the MLPA master plan for MPAs goals and objectives 1.1, 1.5, 2.4, and 5.1 and the DMR recommendation 6c.
2023-18MPA_1	Greg Helms, Ocean Conservancy	Vandenberg SMR	Central	Modify	Classification /Take	Divide into two MPAs; redesignate a narrow alongshore portion as SMCA and allow recreational shore fishing for finfish by hook and line	Maintain contribution to MLPA Master Plan goals 1- 4 and 6 while addressing equity concerns caused by consumptive activity allowed nearby and within Vandenberg SMR.
2023-18MPA_2	Greg Helms, Ocean Conservancy	Point Conception SMR	South	N/A	Non- regulatory	Continued support of Marine Monitor (M2) radar monitoring	Aligns with the DMR management program of enforcement and compliance; consistent with MLPA Master Plan goal 5.
2023-18MPA_3	Greg Helms, Ocean Conservancy	Kashtayit SMCA	South	Modify	Take	Simplify take regulations to: "Recreational take of finfish, invertebrates (except rock scallops and mussels), and giant kelp by hand harvest is allowed."	Simplifies regulatory language and enhances public understanding without compromising the intent of the MPA.
2023-18MPA_5	Greg Helms, Ocean Conservancy	Campus Point SMCA	South	N/A	Non- regulatory	Change color of no-take SMCA from purple to red on maps	Enhances public understanding.
2023-18MPA_6	Greg Helms, Ocean Conservancy	San Miguel Island Special Closure	South	Abolish	Special closure	Eliminate pinniped special closure MPA	Simplifies regulatory language; consistent with MPA design guidelines.

Tracking ID (Petition #- unique action)	Petitioner	Affected MPA	Bio- region	MLPA Action Category	Action Type	Proposed Action	Justification Stated by the Petitioner
2023-18MPA_7	Greg Helms, Ocean Conservancy	Anacapa Island Special Closure	South	Modify	Allowable uses	Revise regulations to allow boat access to Frenchy's Cove	Accounts for regional stakeholder group intent while addressing non-consumptive access concern.
2023-18MPA_8	Greg Helms, Ocean Conservancy	Anacapa Island Special Closure	South	Abolish	Special closure	Reassess and consider removing the full-island special closure	Simplifies regulatory language; consistent with MPA design guidelines.
2023-19MPA_1	Sam Cohen, Santa Ynez Band of Chumash Mission Indians	N/A (New – Chitqawi SMA)	Central	Establish	Establish new MPA	Designate new tribal co-management SMCA with the Santa Ynez Band of Chumash Indians between Morro Bay and Cambria	Reaching 30x30; lack of existing tribal co-management in the area.
2023-20MPA_1	Sam Cohen, Santa Ynez Band of Chumash Mission Indians	Point Buchon SMCA	Central	N/A	Non- regulatory - tribal	Establish co- management with Chumash at Point Buchon SMCA (maybe SMR too)	Point Buchon SMCA may be included in the proposed Chumash Heritage National Marine Sanctuary, so co- management may help that future scenario.
2023-20MPA_2	Sam Cohen, Santa Ynez Band of Chumash Mission Indians	Point Buchon SMR	Central	Modify	Boundaries	Adjust the northern boundary to align with Point Buchon	Extending boundary to the physical Point Buchon will provide geographic marker to fishermen (cited in MPA Collaborative Regulatory Recommendation).
2023-21MPA_1	Rosa Laucci, Tolowa Dee-ni' Nation	Pyramid Point SMCA	North	Modify	Take	Remove take allowance for recreational surf smelt by dip net or Hawaiian type throw net; retain current tribal take exemption	Smelt is culturally important species to the Tolowa Dee-ni' Nation and has declined significantly.
2023-21MPA_2	Rosa Laucci, Tolowa Dee-ni' Nation	Pyramid Point SMCA	North	Modify	Boundaries	Change northern boundary to align with recognized California/Oregon state line	Original boundary used a mapping system that does not align with on-the-ground state line.

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Keith Rootsaert

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code.

3. Overview (Required) - Summarize the proposed changes to regulations:

Kelp Restoration

Multiple methods in 3 SMCAs and 1 SMR.

Kelp Protection by Redesignation

Edward F. Ricketts State Marine Conservation Area to Edward F. Ricketts State Marine Reserve.

Pacific Grove Marine Gardens State Marine Conservation Area to Pacific Grove Marine Gardens State Marine Reserve.

Carmel Bay State Marine Conservation Area to Carmel Bay State Marine Reserve.

Kelp Protection by Designation

The Tanker's Reef enforcement area as Tanker's Reef State Marine Reserve.

Permission to deploy buoys

Prevent anchor damage to rocky reef denizens,

Navigation aid for kelp restoration activities.

Regulatory Pathway for
Sunken ship and other artificial reef structures

SCP Framework Changes
Management of Kelp Restoration

Public Outreach
Adopt a Reef for Kelp Restoration

4. Rationale (Required) - Describe the problem and the reason for the proposed change:

This [Giant Kelp Restoration](#) petition advances MLPA [goals](#) 1-6 and has strong community support of volunteers and grassroots funding. The MPA Collaborative network [lists](#) many of these issues on rows 77, 78, 83, & 88, and was supported by all present at the Monterey MPA Collaborative Meeting at Asilomar, August 16, 2023.

This petition is in alignment with the [prioritized recommendations](#) from the California Marine Protected Area Decadal Management Review, [near-term Priorities \(ongoing- 2 years\)](#), Cornerstone Governance, Regulatory and Review Framework, Recommendation 04. Apply what is learned from the first Decadal Management Review to support proposed changes to the MPA Network and Management Program. Also: Management Program, Policy and Permitting 18: Utilize OPC's Restoration and Mitigation Policy to develop a framework to evaluate and approve appropriate restoration and mitigation actions within MPAs and MMAs

Kelp Restoration

Due to widespread urchin barrens following the 2014-2016 marine heat wave and kelp biomass decline in central and northern California, kelp restoration is a proven remedy by scuba divers culling urchins to suppress grazing pressure. Early [results](#) at Tanker's Reef in Monterey have shown that divers culling urchins results in natural kelp recruitment and survival.

This petition will allow certified Kelp Restoration Specialty Divers, recreational and commercial fishermen, to participate in a Regenerative Fishery which suppresses grazing pressure from urchins and promotes giant kelp survival in three State Marine Conservation Areas: Edward F. Ricketts, Pacific Grove Marine Gardens, and Carmel Bay State Marine Conservation Areas and in "Whaler's Cove", a portion of the Point Lobos State Marine Reserve.

The methods will involve multiple techniques to suppress grazing pressure on kelp and to enhance kelp recruitment and survivorship and are explained in further detail in [Blueprint for Kelp Restoration in Monterey](#).

Suppression:

Hand culling of urchins.

Commercial harvest of urchins for urchin ranching and food sales.

Baiting & trapping urchins.

Utilizing natural defenses of acid weed.

Removing invasive marine algae.

Benefitting:

Pruning kelp canopy to promote growth and resilience to storms.

Out-planting kelp on the reef.

Spore dispersal by sporophyte bags.

Artificial reef structures.

All the methods employed will be detailed, discussed, and approved by the [Department](#) and work would be performed in coordination with other restoration activities. [Reef Check California](#) is our monitoring partner and will perform modified kelp forest monitoring surveys of the treated sites and controls. Reports on the project criteria will be discussed bi-weekly with the Department and as requested by the FGC.

We are asking that these kelp restoration methods be permitted without a SCP both inside and outside MPAs and will involve changes to sportfishing regulations to allow unlimited culling of urchins by hand tools, deploying sporophyte bags, etc. We ask that recreational fishermen be allowed to trap, harvest, capture for research, and cull urchins. Commercial fishing regulations will require a restoration exception to harvesting urchins in MPAs and exemption to the [wanton waste rule](#) for kelp restoration activities to allow commercial fishermen to cull urchins that are below the 4.5 cm minimum useful harvest size or for commercial divers to alternate between commercial and recreational fishing.

Kelp Protection by Redesignation:

The MPAs were mapped without considering the possibility of a native invertebrate species becoming overabundant and gobbling up most of the algae in the ecosystem combined with the Department's unwillingness to address that crisis. Urchin barrens have occurred sporadically for millennia as evidenced by the millions of urchin-made holes in the benthos at Tanker's Reef. 250 years ago, when southern sea otters were nearly extirpated by the fur trade, the abalone and urchins flourished and for 125 years kelp disappeared from the central coast until abalone were eventually overfished and take banned south of San Francisco in [1997](#) and giant kelp again became dominant. In 2007, the central coast MPA rules were formed to prohibit the take of any invertebrates, relying on a written provision for "restoration" as an "allowed" activity in MPAs but the Department does not "permit" restoration because they have conjured a de facto contradictory 7th goal of MPAs to "not disturb" them.

In Monterey the community led group Giant Kelp Restoration Project has successfully defended a kelp forest at Tanker's Reef and is was aspiring to restore large kelp forests on both sides of the Monterey Peninsula by SCP. FGC would not consider petitions allowing take of invertebrates in the SMCAs & SMRs until the [Decadal Management Review](#) could be completed. Now that the DMR has passed, this petition is seeking to begin the Adaptive Management Review Cycle for the central coast MPAs that have remained unmodified since 2007.

Kelp forests need protection from fishing pressure which has detrimental effects on species richness and kelp biomass. By designating the areas of kelp restoration as State Marine Reserves, fishing pressure will be considerably reduced. This is safer for the volunteer divers involved to avoid fishing boat traffic or getting hooked by fishing gear while diving.

Recreational sportfishers and kelp harvesters have expressed opposition to changing SMCAs to SMRs. The fishers feel that they will never get to fish in these areas again without a reversing petition that would be time consuming and difficult to obtain from FGC. The kelp harvester is only permitted to harvest kelp in non-SMRs and even though kelp harvest is part of our restoration plan, the concern is that the MPA designation may occur without an allowance for kelp harvest for abalone aquaculture. Although kelp harvest is essential for giant kelp resilience and survivorship, the Department and OPC don't acknowledge this interaction. To obtain a consensus of proponents we ask the Department to consider keeping the SMCA designation and writing in a SMCA specific rule that when a Kelp Restoration Management Permit is active, fin fishing is not allowed.

The MLPA is now administered in 3-year Adaptive Management Review Cycles and there is now flexibility in addressing the kelp crisis in a way that accomplishes the MLPA goals but also does not harm the environment in a long term, unforeseen and unwanted way that occurred on the central coast for the last 16 years. The [G2KR](#) projects at Lovers Cove and at [Tanker's Reef](#) demonstrated that the effort of the certified volunteer divers can be consistently and positively directed to restore kelp forests. Restoration work in these clearly described and familiar MPA boundaries would avoid confusion and guide diver effort in a predictable and effective strategy. In an Adaptive Management Review Cycle these methods can be continuously evaluated and adapted to the evolving stressors in the environment and as our knowledge, techniques, and capabilities at restoring kelp similarly evolve.

In future Adaptive Management Review Cycles the consequences of kelp restoration can be reviewed and the FGC may consider applying these methods more broadly, changing allowed methods, and allowing fishing under modified conditions. The other Monterey SMRs are acting as "controls" without treatment, but in the next review cycle we may ask for those SMRs to be treated as well in order to halt urchin migration and to achieve our goal, pledged to the [Kelp Forest Alliance](#), to restore 2000 acres of giant kelp around the Monterey Peninsula by 2030.

[Research](#) shows the reduced fishing pressure in places where fish are born will be beneficial to the fishery in the future when more fish live to adulthood and make more fish. In the future the kelp situation may change, and these places may be opened again in future management cycles to fishing for selected species, or in coordination with scientific monitoring protocols. The three State Marine Conservation Areas mentioned presently have diminished fish stocks and species richness and could benefit from a temporary fishing prohibition. This closure, in coordination with kelp restoration, will benefit adjacent areas with the "spillover effect" of the MPAs providing better fishing opportunities for participants.

This closure would not affect commercial fishermen who are prohibited from fishing in SMCAs already, but mostly the recreational fishermen who fish from shore. The fishermen fishing from boats are typically fishing further from shore because the fish are not as plentiful in the nearshore SMCAs now that the kelp has thinned. Although this closure would prohibit fishing at the Monterey Breakwater parking lot, there is still accessible fishing at the Commercial Wharf. Surf fishing from shore is generally not done at the Tanker's Reef area but further to the north at Sunset, Seacliff and New Brighton State Parks.

There are some fishermen that fish on the west side of Lovers Point and the north side of Point Pinos that would be displaced in a portion of the Pacific Grove Marine Gardens SMCA that is frequented by tourists and rented out by Pacific Grove for [weddings](#). To mitigate the loss of this fishing opportunity we recommend the replacement of the Del Monte Bathhouse [Pier](#), by others. It is not fair that our community group of volunteers is working hard to restore kelp and suppress kelp grazers while the state licenses individuals to fish in the same place and time with activities that are detrimental to that same kelp's growth and survival while also endangering diver's lives with propellers and fishing hooks.

The [Central Coast](#) Regional Stakeholder Group's intent during regional MLPA planning process (including MPA-specific goals/objectives and design considerations), adopted in April 2007, was found to be aligned with our proposal to improve the conservation status. In the [Regional Goals Design Considerations](#) #3."To the extent possible, site MPAs to prevent fishing effort shifts that would result in serial depletion" is what has happened in these places due to fishing pressure being concentrated in only a few accessible places. Redesignating the SMCAs as SMRs aligns with the original intent of more fishing prohibitions at two sites and stopping serial depletion of species at all three sites.

[Edward F. Ricketts SMCA](#) was proposed by the [RSG](#) to be split as half Edward F. Ricketts SMCA and half Edward C. Cooper SMR so the original intent was to make the area closest to the breakwater into a SMR. John Wolfe, Diving representative to the Regional Stakeholder Group, recalled that a disabled veteran testified that the breakwater was the "only place he could fish" so fishing by hook and line was decided to be allowed. There was a favorite wolf eel that lived on the wall and a spearfishermen shot it and threw it in a garbage can and divers were outraged so fishing by spear was not allowed on this site and the site is partially closed to fishing already. The fishermen fishing off the breakwater wall is a constant danger to divers at this most popular dive site on the west coast of North America and for safety it must stop. There is disabled access at the municipal wharf for fishermen.

[Pacific Grove Marine Gardens SMCA](#) was proposed by the [RSG](#) to be an SMR north of Point Pinos. Presently the delineation between Asilomar SMR and PG Marine Gardens SMCA is at Point Pinos, so the original intent was to make a large portion north of the peninsula protected as a SMR. This was the first area impacted by widespread urchin barrens in 2015 and is a high priority site for kelp restoration.

[Carmel Bay SMCA](#) was implemented as designed but has poor fishing opportunities and depletion of species because it is the only accessible fishing place south of the Monterey Peninsula until Malpasos Creek south of Point Lobos SMR. The loss of kelp forests exacerbates the problem because rockfish are born in kelp forests and take 8-10 years to reach maturity.

These MPAs were all [described](#) as "High Priority" sites by OPC's [research](#) that would have the highest probability of kelp restoration success.

Kelp Protection by Designation:

We propose that a portion of the Tanker's Reef enforcement area be designated the Tanker's Reef State Marine Reserve (working title).

A revised Tanker's Reef SMR of 193 acres from 685 acres, (23%)

This kelp forest was created by volunteer divers and is very vulnerable from fishing pressure because it is outside of MPA fishing prohibitions. Routinely fishermen in boats and kayaks take fish at the 11 acre kelp forest. The experimental 2.5-acre underwater cable grid is studied by OPC, CDFW, MBNMS, and Reef Check California. We try very hard to reduce externalities as much as possible to determine a natural process of kelp reforestation. Fishermen taking fish is an externality for the scientific design and confounds the results. Fishing gear often becomes entangled in underwater navigation cables used to guide divers. Furthermore, boat propellers are a threat to injure scuba divers in the area under the water.

Designating this area as a State Marine Reserve will also protect more sandy habitat at Del Monte Beach, the most eroded beach in California, at a time when the beach is nourished after the closure of [sand mining](#) in Southern Monterey Bay and studied by [USGS](#).

In the [Regional Goals Design Considerations](#) #8, "To the extent possible, site MPAs to take advantage of existing long-term monitoring studies" is consistent with designating Tanker's Reef, the site of CDFW/MBNMS and Reef Check surveys, as a State Marine Reserve.

Permission to deploy buoys

Boat anchors on rocky reefs often disturb sensitive marine habitat with their heavy chains scraping in an arc from the anchor to the boat. In a sensitive kelp restoration site that has frequent visits, dropping and recovery of the anchor disturbs the kelp we are trying to defend. By deploying a temporary buoy that the boats can attach to instead of dropping an anchor, the kelp is not disturbed. The use of buoys also aids the divers in the kelp restoration activity by providing underwater visual markers to guide where to cull the urchins and protect the kelp.

This petition seeks to allow seasonal deployment of certain colored and well-maintained buoys to be deployed in kelp restoration areas for the purpose of directing boats where to anchor and to direct divers for the purpose of kelp restoration.

Regulatory Pathway for an Artificial Reef:

Since 2010 Scuba divers have expressed an interest in diving on a sunken ship in Monterey Bay and this was proposed by the community group California Ships to Reefs and studied by the Office of National Marine Sanctuaries [in 2012](#). In 2017 Artificial Reefs was established as a priority for Monterey Bay National Marine Sanctuary Advisory Council. This was proposed to CDFW, but because the State has never permitted an artificial reef in State waters, this was never permitted. However, there are 52 other [artificial permitted reefs](#) in California including the Wheeler North Reef in Southern California. created in 2008.

Creating a shipwreck in protected nearshore waters deep enough to not be displaced by winter storms would be of interest to the scuba diving community. It will also serve as a unique scientific baseline to observe what is the order of marine life formation on a “blank” surface. It may also be beneficial to plant kelp on [artificial structures](#) better suited to kelp growth and marine aquaculture. This petition seeks a pathway for the FGC to determine if an artificial reef is in the public interest and establish an application process to obtain permission from CDFW and other state and federal agencies.

This request is in alignment with the [prioritized recommendations](#) from the California Marine Protected Area Decadal Management Review, near-term Priorities (ongoing- 2 years), Cornerstone Governance, MPA Statewide Leadership Team and Partner Coordination 09. Continue to coordinate and collaborate with OPC and other agencies on California’s ocean and coastal priorities to enhance coastal biodiversity, climate resiliency, human access and use, and a sustainable blue economy.

SCP Framework Changes

Management of Kelp Restoration

This petition is in furtherance of the [prioritized recommendations](#) from the California Marine Protected Area Decadal Management Review, near-term Priorities (ongoing- 2 years), Cornerstone Management Program, Policy and Permitting, Recommendations 17. Improve the application and approval process for scientific collecting permits. And 18. Utilize OPC’s Restoration and Mitigation Policy to develop a framework to evaluate and approve appropriate restoration and mitigation actions within MPAs and MMAs

We propose to establish a new process in CDFW’s Scientific Collecting Permit program for Restoration Permits. Presently the process available for the Department to manage restoration projects in marine ecosystems is the Scientific Collecting Permit process where

applicants submit applications for \$71.62 and pay \$269.08 for a [Special Use Permit](#) to operate a project with certain methods, species take restrictions, and reporting requirements. We request similar fees for Kelp Restoration Management Permits.

In our 2018 SCP permit with Reef Check we were not able to amend the permit to take sufficient red urchins and we had to abandon the project. In our 2 attempts to obtain SCPs for kelp restoration methods we were denied. Our pre-application to cull urchins in 3 SMCAs has been in process for 18 months before we can submit it into the SCP portal. The problem is that kelp restoration seeks to change a grazer species population within the defined area, but “Decision Tree” limits the take of species to not affect and change a species population within the area. This leads to situations where kelp restoration experiments are impossible because the number of permitted animals to take is very small and not enough to benefit the recruitment and survival of kelp forests. This led to the abandonment of our experiment at Lovers Cove in year 3 when we couldn’t remove sufficient red urchins.

The scientific method requires isolation of treatment methods and establishment of a control area. This places a limitation on kelp restoration practitioners to only employ singular methods when the best results are possible using [multiple methods](#). This also restricts the kelp restoration activities by attempting to answer scientific questions where the goal is simply kelp restoration and this scientific component is best accomplished by science divers rather than certified kelp restoration specialists. Once a permit application is obtained it is difficult to change as new discoveries are made that affect kelp survivorship and the process to attempt to amend a permit takes over a year. At the end of the typical 3 year SCP permit period the treatment must stop, and the 5 year post-restoration monitoring period begins. This is contradictory to the goals of kelp restoration and has led to similar abandonment of work in the treatment area at Tanker’s Reef where the effort is desired to be continued by the volunteers, but because the experiment stops after 3 years, the divers are not allowed to come back and tend the kelp forest they successfully created and defended. ~~The extension of Tanker’s Reef is “noticed” at the FGC and hopefully will be extended 5 years, but the point is that~~ Restoration should lead the activity and scientific experiments should evaluate, but not interfere with, or seek to end, the restoration effort.

Kelp Restoration is an allowable activity in SMRs, and now with the unanimous passage of [AB63](#), in SMCAs as well. However, restoration is allowed but not permitted. Our attempt to obtain a [Restoration Management Permit](#) was denied because the law does not address conspecifics. The Department could issue a Letter of Authorization, similar to the one written for the Monterey Bay Aquarium to repair intake pipes, but that is not available to us for inequitable reasons that support the built environment over the natural environment. The only available process we are told is available to us is the SCP process, which is exceedingly slow and inappropriate mechanism which, by rule, restricts the restoration activity to being deliberately inconsequential to improving the health of the MPA.

To remedy this, we petition that the Department establish a “Restoration” category in the SCP process that would allow restoration methods, coordinate with CDFW Research, and establish periodic reviews of restoration efforts, allow for 10-year project durations, and allow take of overpopulating species until the species reaches the threshold density observed pre-marine heatwave of 2014.

Additional comments on the SCP Portal and Process are that the website interface is very clunky and time consuming to complete, especially when submitting for take of multiple species at multiple locations and the program slowly populates look-up tables. The response to permit applications is not transparent, we never know who made the comments and there is not an ability to clarify and discuss the commenter's concerns. There is not an opportunity to have a conversation of what would be acceptable, only a rejection and it becomes incumbent on the petitioner to apply again and guess what would be acceptable. We ask that these issues be repaired in the SCP software and Kelp Restoration Management Permit Project approval process.

Public Outreach

This petition asks the FGC to affirm kelp restoration as public policy in MPAs and to celebrate community collaboration in kelp restoration, mitigating climate change, and conserving biodiversity in public outreach to stakeholders and encourage ocean stewardship. At the October 12 [FGC meeting](#) the commissioners suggested kelp practitioner leadership be unified under an "Adopt a Reef" community program, which is a wonderful idea, and we ask the commission to consider our proposed sites as G2KR adopted reefs. We ask that FGC and the Department promote kelp restoration collaboration on their website and in public outreach. This is [prioritized](#) in California Marine Protected Area Decadal Management Review, near-term Priorities (ongoing- 2 years), Cornerstone Management Program, Outreach and Education, Recommendation 16. Conduct more targeted outreach to specific audiences to connect stakeholders with coastal resources and to encourage stewardship and compliance with regulations.

Thank you for considering our petitions! In our effort to be succinct and consolidate seven petitions into one, we reduced arguments in favor of the proposal yet still exceeded 5 pages. Additional rationale/justification is available upon request and may be presented at future FGC meetings.

SECTION II: Optional Information

5. **Date of Petition:** 11/29/23 **AMENDED 1/13/25**
6. **Category of Proposed Change**
X Sport Fishing
X Commercial Fishing
☐ Hunting
X Other, please specify: MPAs, Section 6.32
7. **The proposal is to:** (*To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>*)
X Amend Title 14 Section(s): 29.06 and others.
X Add New Title 14 Section(s): 29.06 and others.
☐ Repeal Title 14 Section(s): [Click here to enter text.](#)
8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition 2021-025 & 2023-02**

Or ☐ Not applicable.

9. **Effective date:** If applicable, identify the desired effective date of the regulation.
If the proposed change requires immediate implementation, explain the nature of the emergency: 4/1/24
10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents: See blue links in this document and supporting documents [here](#).
11. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing: See Recreational Sea Urchin fiscal impact study in October FGC Meeting materials [here](#).
12. **Forms:** If applicable, list any forms to be created, amended or repealed: N/A

SECTION 3: FGC Staff Only

Date received:

FGC staff action:

- ☐ Accept - complete
☐ Reject - incomplete
☐ Reject - outside scope of FGC authority

Tracking Number

Date petitioner was notified of receipt of petition and pending action:

Meeting date for FGC consideration:

FGC action:

- ☐ Denied by FGC
☐ Denied - same as petition

Tracking Number

- ☐ Granted for consideration of regulation change

Subject: RE: Petition Amendment Request

Dear FGC Staff,

Attached is a revised version of our FGC-1 Petition Amendment Request. Please consider this our final amendment request and the Department can begin working on it.

I also revised the last email to reflect the new page number references in yellow highlighter. I also clarified R7 as requested by Susan Ashcraft in the petition 2023-23MPA below.

Dear FGC staff,

This email serves as our **Notice of Intent to Amend** and **Petition Amendment Request** for FGC Petition 2023-23MPA. See attached amended petition 2023-23-MPAR FINAL.

R1

Specific Change: Page 3. In Monterey the community led group Giant Giant Kelp Restoration Project has successfully defended a kelp forest at Tanker's Reef and is was aspiring to restore large kelp forests on both sides of the Monterey Peninsula by SCP.

Rationale: This change is to the tense of the word "is" to become "was". We had hoped to work in MPAs with a Scientific Collecting Permit and pre-applied with the Department for 22 months, but we did not obtain the permit. A SCP was instead granted to UCSC in 2024 at the sites we proposed.

R2

Specific Change: Page 4. Add the following paragraph: Recreational sportfishers and kelp harvesters have expressed opposition to changing SMCAs to SMRs. The fishers feel that they will never get to fish in these areas again without a reversing petition that would be time consuming and difficult to obtain from FGC. The kelp harvester is only permitted to harvest kelp in non-SMRs and even though kelp harvest is part of our restoration plan, the concern is that the MPA designation may occur without an allowance for kelp harvest for abalone aquaculture. Although kelp harvest is essential for giant kelp resilience and survivorship, the Department and OPC don't acknowledge this interaction. To obtain a consensus of proponents we ask the Department to consider keeping the SMCA designation and writing in a SMCA specific rule that when a Kelp Restoration Management Permit is active, fin fishing is not allowed.

Rationale: This amendment is intended to address concerns by opposition parties and develop a consensus. Because there are many interrelated and dependent parts to this petition and passage of any part is uncertain, it is important that each petition be more independent. For example: if the SMCAs are designated as SMRs but kelp canopy pruning is not allowed, it would shut down the Monterey Abalone Company or if the KRMP component is not implemented then there is no mechanism to sunset the SMR designation. Because the process of obtaining Adaptive

Management changes on the Central Coast may take more than 17 years, fishers are understandably reluctant to rely on Adaptive Management to reopen fishing in SMRs when fish stocks recover in the future. Changing SMCAs to have a provision for Kelp Restoration Management Permit fishing prohibition deconflicts the fishing and diving activities and puts a sunset date on the fishing prohibition which allows for depleted rockfish stocks in the SMCAs to recover.

While we understand that prohibiting fishing benefits kelp forests and biodiversity, the fishers deny the science is conclusive. Fishing is detrimental to kelp forests and is exacerbated by culling urchins that benefit the snails that eat the urchin carcasses and kelp. G2KR is not staffed to counter the fisher's assertions and so we will rely on the rationale that fishing in a kelp restoration site is a deadly conflict of activities. There is a similar petition 2023-33 for changing MPA designations in Santa Cruz that can argue the DMR scientific findings, and we will defer to Laura Deehan and Environment California to pursue that rationale in places without the compounding influence of kelp restoration activities and conflicting uses.

R3

Specific Change: Page 5. We propose that a portion of the Tanker's Reef enforcement area be designated the Tanker's Reef State Marine Reserve (working title).

Rationale: Add the words "a portion of" to the description. The enforcement area was set very large for enforcement purposes but is larger than needed for kelp restoration purposes. The area to the east of the reserve serves as the control area where restoration efforts are not undertaken. See map below for proposed area.

A revised Tanker's Reef SMR of 193 acres from 685 acres, (23%)

R4

Specific Change: Page 8. We request similar fees for Kelp Restoration Management Permits.

Rationale: Add the word “Management” to the permit name. The working title of Kelp Restoration Management Permit more closely aligns with the State Kelp Restoration Management Plan that informs the permit framework. See R6.

R5

Specific Change: Page 8. The extension of Tanker’s Reef is “noticed” at the FGC and hopefully will be extended 5 years, but the point is that Restoration should lead the activity and scientific experiments should evaluate, but not interfere with, or seek to end, the restoration effort.

Rationale: Delete a portion of the sentence. Our request to extend Tanker’s Reef for 5 years was denied for the sake of the scientific experiment and anticipation of the SCP in R1.

R6

Specific Change: Page 9. We ask that these issues be repaired in the SCP software and Kelp Restoration Management Permit Project approval process.

Rationale: Revised the working title of the permit. See R4.

R7

Overlooked Petition:

Page 9. Public Outreach by FGC and the Department is requested and should be reflected in the petition breakdown into subparts.

The petition reads:

Public Outreach

This petition asks the FGC to affirm kelp restoration as public policy in MPAs and to celebrate community collaboration in kelp restoration, mitigating climate change, and conserving biodiversity in public outreach to stakeholders and encourage ocean stewardship. At the October 12 [FGC meeting](#) the commissioners suggested kelp practitioner leadership be unified under an “Adopt a Reef” community program, which is a wonderful idea, and we ask the commission to consider our proposed sites as G2KR adopted reefs. We ask that FGC and the Department promote kelp restoration collaboration on their website and in public outreach. This is [prioritized](#) in California Marine Protected Area Decadal Management Review, near-term Priorities (ongoing- 2 years), Cornerstone Management Program, Outreach and Education, Recommendation 16. Conduct more targeted outreach to specific audiences to connect stakeholders with coastal resources and to encourage stewardship and compliance with regulations.

Please note

Petition 2023-23MPA was submitted 11/29/23. The MPA binning process delayed evaluation and consideration into 2025. FGC asking for petitioners to engage with organized opposition and creating corresponding amendments is an additional burden to unfunded public petitioners to revise plans even before the Department considers the petition. It is not clear how much to weaken the petition before it is historically opposed by the Department of “No”. How many cards should we take when the dealer is showing a face card? We engaged with the public, G2KR divers, local

governments, recreational fishers, commercial fishers, and kelp harvesters but we don't have written guidance or counter proposals from them to address their concerns. We have not received feedback on this amendment, and this is our best attempt to address concerns. We do not have consensus on this petition and/or this amendment.

Subject: RE: Petition Amendment Request

Hi Keith,

Thanks for submitting your statement. I have a couple of questions.

First, I noticed that the changes you proposed below are integrated thoroughly into the form FGC 1 text, but the revised map showing the revised proposed Tankers Reef SMR is not part of the FGC 1 document. Could you please add (insert) the map image into the FGC 1 document after your description of the revised proposal on page 5?

Also, the rationale is built into your email but not also added to the FGC 1 document. That's fine – we can attach your email to support understanding of the revised petition.

Finally, I'm not sure I understand what your email says about R 7 (re: overlooked petition). Could you clarify?

If you don't have any other pieces of your petition you want to amend, then this can serve as more than a statement of intent, but also the actual amended petition request. i.e., we can move forward with it. Please confirm if that is the case.

In summary, two things:

1. Could you please add the map image of your revised proposed SMR boundaries to the FGC 1 form (preferably after the description on page 5)?
2. Do you plan to make other changes? If not, when you re-send with the map inserted into FGC 1, let us know this is your amendment request and we will forward for review to CDFW

Thank you,

Susan

Petition 2023-23MPA was submitted 11/29/23. The MPA binning process delayed evaluation and consideration into 2025. FGC asking for petitioners to engage with organized opposition and creating corresponding amendments is an additional burden to unfunded public petitioners to revise plans even before the Department considers the petition. It is not clear how much to weaken the petition before it is historically opposed by the Department of “No”. How many cards should we take when the dealer is showing a face card? We engaged with the public, G2KR divers, local governments, recreational fishers, commercial fishers, and kelp harvesters but we don’t have written guidance or counter proposals from them to address their concerns. We have not received feedback on this amendment, and this is our best attempt to address concerns. We do not have consensus on this petition and/or this amendment.

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Azsha Hudson

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Authority cited: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code

3. Overview (Required) - Summarize the proposed changes to regulations: ~~This petition seeks to reclassify the Anacapa State Marine Conservation Area (SMCA) as a State Marine Reserve (SMR) or at a minimum reclassify the portion of the SMCA from shore to at least 30 meters depth to better protect eelgrass habitat.~~

This petition seeks to protect the eelgrass meadows located in the Anacapa Island State Marine Conservation Area (SMCA) from hard bottomed objects such as the gear type listed for the commercial lobster fishery and anchors used for vessels. We ask the Commission to evaluate the below solutions and choose the one that best protects the eelgrass meadow while allowing for community access:

- Change current regulations to disallow commercial lobster fishing year round
- Change current regulations to disallow hard bottomed fishing gear (including anchoring if applicable) near eelgrass meadows
- Change the existing border, prohibiting the deployment of lobster traps from 0-30 meters (0-98.43 feet) instead of the existing 0-20 feet

4. Rationale (Required) - Describe the problem and the reason for the proposed change:

Numerous state and federal policies underscore the importance of eelgrass as an important yet vulnerable species that provides nursery habitat for fish, reduces coastal erosion, acts as a carbon sink, and increases species diversity by providing three-dimensional structure on sandy bottomed habitats.

Based on a scientific study conducted at the Anacapa SMCA from 2016 to 2019¹, and a growing body of literature on eelgrass recruitment and ecology, there is compelling evidence that seasonally occurring lobster trapping and anchoring in the SMCA is destroying eelgrass beds that are otherwise thriving in the adjacent Anacapa SMR.

~~The limited subset of pelagic fishing methods allowed at the Anacapa SMCA also creates challenges for enforcement by requiring officers to board vessels and confirm compliance on an individual basis.~~ This petition requests Fish and Game Commission (FGC) approval to support the goals of the Marine Life Protection Act (MLPA), align with state and federal policies focused on eelgrass resilience and health, and protect important eelgrass and associated marine life at Anacapa Island.

SECTION II: Optional Information

5. Date of Petition: ~~11/17/2023~~ AMENDED 1/17/2025

Category of Proposed Change

- 6.** ☐ Sport Fishing
☐ ~~Commercial~~ Commercial Fishing

X Other, please specify: MPAs, Section 632.

7. The proposal is to: *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

- X Amend Title 14 Section(s): [Westlaw regulations.](#)
☐ Add New Title 14 Section(s): Click here to enter text.
☐ Repeal Title 14 Section(s): Click here to enter text.

8. If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition Click here to enter text.

Or X Not applicable.

9. Effective date: If applicable, identify the desired effective date of the regulation.
If the proposed change requires immediate implementation, explain the nature of the emergency: November 1, ~~2024~~ 2025

¹Jessica Altstatt (2021). Island Eelgrass (*Zostera pacifica*): Focused Assessment of Condition and Extent of Meadows and Biological Monitoring of Associated Fish and Invertebrate Communities

10. Supporting documentation: Identify and attach to the petition any information supporting the proposal including data, reports and other documents:

- Petition narrative on eelgrass at Anacapa SMCA
- White paper research from Jessica Alstatt.

11. Economic or Fiscal Impacts: Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing:

This petition protects habitat that confers biodiversity and biomass benefits that enhance the health of Anacapa Island and surrounding ecosystems. Eelgrass beds filter nutrients, stabilize sediments, and increase complexity of the substrate and effective habitat for marine life. As demonstrated by numerous reports of lobster traps “fishing the line” of the Anacapa SMR, fishers perceive that the nearby fully protected MPA has created a beneficial habitat for lobster trapping. Notably, a recent study on the California spiny lobster fishery determined that the short-term losses from a restrictive MPA is compensated by an over 200% increase in total catch after about 6 years of MPA designation.²

This petition is intended to protect ~~would close~~ the Anacapa SMCA eelgrass meadow and associated biodiversity from ~~to~~ lobster trapping which occurs during the months of November and December. The proposed amendment would extend the prohibition to include these months, and would also prevent anchoring damage from pelagic fishing efforts. The three potential options we offer to the Commission ~~While converting this SMCA into an SMR may~~ have short term impacts on recreational and commercial fishing, any such impacts will be offset by the long-term ecosystem wide benefits of protecting eelgrass function at this valuable site.

12. Forms: If applicable, list any forms to be created, amended or repealed:

**Re: Anacapa Island State Marine Conservation Area (2023-27MPA) Revised
Petition Cover Message**

Dear President Murray and honorable commissioners:

In November 2023, the Environmental Defense Center (“EDC”) submitted a petition (2023-27MPA) to reclassify the Anacapa Island State Marine Conservation Area (“Anacapa SMCA”) as a State Marine Reserve (“SMR”) or, at a minimum, to reclassify the portion of the SMCA from shore to at least 30 meters depth to better protect eelgrass habitat. We now request that the Fish and Game Commission (“FGC”) and California Department of Fish and Game (“CDFW”) evaluate the below solutions and choose the one that best protects the eelgrass meadow while allowing for community access:

- Change current regulations to disallow commercial lobster fishing year round
- Change current regulations to disallow hard bottomed fishing gear (including anchoring if applicable) near eelgrass meadows
- Change the existing border, prohibiting the deployment of lobster traps from 0-30 meters (0-98.43 feet) instead of the existing 0-20 feet

We came to the above alternative solutions after extensive and ongoing community outreach (please refer to EDC’s July 31, 2024, letter re: Petition for Anacapa State Marine Conservation Area – Agenda Item 6(c) for more detailed explanation (see attached). The goal of our petition is to protect the historic eelgrass meadow that has gone through rehabilitation and replantation efforts and is being directly threatened by hard bottomed lobster traps, with potential impact from other hard bottomed items like anchors.

Sincerely,

Azsha Hudson
Marine Conservation Analyst & Program Manager

Petition2025-15MPA Amendment Cover Message

The revisions to this petition involve two sets of informational changes: amendments to the original petition actions and additional stakeholder feedback/rationale that has been gathered over the last year.

Petition actions being revised:

- Modification of options 3 and 4 in the original petition to align with federal feedback and existing regulations in Groundfish Exclusion Areas (GEAs). Rather than only allowing “surface-fishing-methods” the options now restrict “bottom-contact-gears,” like the GEAs. This change was made so that entirely new language and definitions do not need to be drafted in a case options 3 or 4 are selected. (Located on page 3, 11, and 18)
- Addition of a 5th and 6th option consisting of only non-hook-and-line gear methods for consideration, this is not an additional action, just a different combination of allowable methods from the original petition. The new options 5 and 6 would only allow recreational spearfishing of pelagic finfish (option 5) or highly migratory species (option 6) and would allow the commercial take of swordfish by harpoon (options 5 and 6). These options were added to be the least invasive as possible in terms of take, be possibly easier to enforce than the other hook-and-line options and would solve the commercial swordfish gear drift problems for harpoon gears (but not for DSBG). (Located on page 3 and 18)
- Modification of the optional nearshore/offshore MPA boarder at the Santa Barbara Island MPA to a straight line between two points of latitude and longitude versus the original boarder being the 1 nautical mile line from the island. The reason for this change is to align to the MPA design criteria set in the MLPA which states to not use odd shapes or curves, only straight lines between tenth or whole minute latitudes and longitudes. (Located on page 3, 19, and 20)
- Modification of how deep-set-buoy-gear (DSBG) will be considered in the petition. Currently DSBG is only a federal fishery and still in its EFP stage at the State level, consideration of its allowance inside the state waters of MPAs will remain pending with the FGC and CDFW until DSBG is a state fishery. Until then, only a federal process may allow DSBG in the federal portions of the MPAs. Therefore, DSBG has been isolated from all of the options, now having its own action section due to the unique case of that process. (Located on page 4, 16, and 17)

Additional stakeholder feedback/rationale being added:

- Commercial swordfish gear(s) uncontrollable movement into primarily these MPAs, per MDFE effort data, poses problems that must be resolved. (Located on pages 11-13)
- Naval closures local to the Channel Islands restricting most offshore fishing opportunity except near two of the petition MPAs. (Located on page 13)
- Additional information pertaining to adaptive management, the MPA Master Plans (2008 and 2016), the MLPA, and climate resiliency in the scope of this specific petition. (Located on pages 14-15)

Tracking Number: (2023-15MPA_AM2)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages.

1. Person or organization requesting the change (Required)

Name of primary contact person: Blake Hermann

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested:

-Fish and Game Code (FGC) Division 1, Chapter 2, Sections 200, 205c, 265, and 399

-Fish and Game Code (FGC) Division 2, Chapter 5, Sections 1590 and 1591

-Fish and Game Code (FGC) Division 3, Chapter 10.5, Sections 2860 and 2861

-Fish and Game Code (FGC) Division 6, Chapter 6, Section 6750

-Public Resource Code (PRC) Division 27, Chapter 7, Sections 36725(a) and 36725(e)

3. Overview (Required) - Summarize the proposed changes to regulations:

This petition requests a modification to three Marine Protected Areas (MPAs) off Southern Santa Cruz Island and Santa Barbara Island, known as the Footprint Marine Reserve (The Footprint), Gull Island Marine Reserve (Gull Island), and The Santa Barbara Island Marine Reserve (SBI). The Footprint and Gull Island Reserves are located on the southeast and southwest sides of Santa Cruz Island respectively, and the SBI Reserve is located on the south-east corner of Santa Barbara Island.

This petition requests, for the reasons stated in the accompanying sections, that The Footprint, Gull Island, and SBI Reserves be modified and partially opened and converted into limited take conservation areas with implementation of one the following options (listed from the most to least allowances):

Option 1: The least restrictive option, with some existing precedent SCMA's (2nd preferred option):

- The recreational take of pelagic finfish* by hook-and-line and spear is allowed.
- The commercial take of pelagic finfish* by hook-and-line, and swordfish by harpoon is allowed.
- ~~Deep Set Buoy Gear (DSBG) is allowed in the federal portions of the proposed MPAs. **~~

Option 2: Elevated protections in species selectivity (1st preferred option):

- The recreational take of Highly Migratory Species (HMS)* by hook-and-line and spear is allowed.
- The commercial take of Highly Migratory Species (HMS)* by hook-and-line, and swordfish by harpoon is allowed.
- The possession of Coastal Pelagic Species (CPS) is allowed.
- ~~Deep Set Buoy Gear (DSBG) is allowed in the federal portions of the proposed MPAs. **~~

~~Option 3: Option 1 with only allowance of "surface fishing methods:" ***~~

- ~~The recreational take of pelagic finfish* is allowed via surface fishing methods.~~
- ~~The commercial take of pelagic finfish* by hook-and-line via surface fishing methods, and swordfish by harpoon are allowed.~~

~~Option 4: Option 2 with only allowance of "surface fishing methods:"~~

- ~~The recreational take of Highly Migratory Species (HMS)* is allowed via surface fishing methods.~~
- ~~The commercial take of Highly Migratory Species (HMS)* by hook-and-line via surface fishing methods, and swordfish by harpoon are allowed.~~
- ~~The possession of Coastal Pelagic Species (CPS) is allowed.~~

Option 3: Same as option 1 with restriction of "bottom-contact-gears." (4th preferred option)

- The recreational take of pelagic finfish is allowed by hook-and-line and spear, except through the use of bottom-contact-hook-and-line and bottom contact gears, which is restricted.
- The commercial take of pelagic finfish by hook-and-line is allowed, except through the use of bottom-contact-hook-and-line and bottom contact gears, which is restricted.
- The commercial take of swordfish by harpoon is allowed.

Option 4: Same as option 2 with restriction of "bottom-contact-gears." (3rd preferred option)

- The recreational take of highly migratory species is allowed by hook-and-line and spear, except through the use of bottom contact hook-and-line and bottom contact gears, which is restricted.
- The commercial take of highly migratory species by hook-and-line is allowed, except through the use of bottom-contact-hook-and-line and bottom contact gears, which is restricted.
- The commercial take of swordfish by harpoon is allowed.
- The possession of coastal pelagic species is allowed.

Option 5: non-hook-and-line of pelagic finfish (6th preferred option):

- The recreational take of pelagic finfish by spear is allowed.
- The commercial take of swordfish by harpoon is allowed.

Option 6: non-hook-and-line of highly migratory species (5th preferred option):

- The recreational take of highly migratory special by spear is allowed.

- The commercial take of swordfish by harpoon is allowed.

Deep-Set-Buoy-Gear (DSBG):

DSBG, currently being a federal exclusive fishery, would need to be considered inside of these areas through a federal stakeholder process and would ultimately only allow DSBG in the federal water portions of these MPAs. Analysis of allowing DSBG inside of the state water portions of these MPAs will remain pending with the FGC and CDFW until it passes the EFP stage, becoming an official state gear type, and if one of the above options is grated entirely or in-part.

Each of the above options **may** also include a reduced in size, more selective, limited-take or no-take zone within the Gull Island and SBI zones. However, as discussed later, these areas are only needed if Options 1 or 3 are selected (See Attached: Full Analysis Document 1).

*List of State HMS, CPS, and Pelagic finfish per Title 14 CA § 1.49, 1.39, and 632(3):

-Highly migratory species means any of the following: albacore, bluefin, bigeye, and yellowfin tuna (*Thunnus* spp.); skipjack tuna (*Katsuwonus pelamis*); dorado (dolphinfish) (*Coryphaena hippurus*); striped marlin (*Tetrapturus audax*); thresher sharks (common, pelagic, and bigeye) (*Alopias* spp); shortfin mako shark (*Isurus oxyrinchus*); blue shark (*Prionace glauca*); and Pacific swordfish (*Xiphias gladius*).

-Coastal pelagic species means any of the following: northern anchovy (*Engraulis mordax*), Pacific sardine (*Sardinops sagax*), Pacific mackerel (*Scomber japonicus*), jack mackerel (*Trachurus symmetricus*), and market squid (*Loligo opalescens*).

-Pelagic finfish, are a subset of finfish defined as: northern anchovy (*Engraulis mordax*), barracudas (*Sphyraena* spp.), billfishes (family *Istiophoridae*), dolphinfish (*Coryphaena hippurus*), Pacific herring (*Clupea pallasii*), jack mackerel (*Trachurus symmetricus*), Pacific mackerel (*Scomber japonicus*), salmon (*Oncorhynchus* spp.), Pacific sardine (*Sardinops sagax*), blue shark (*Prionace glauca*), salmon shark (*Lamna ditropis*), shortfin mako shark (*Isurus oxyrinchus*), thresher sharks (*Alopias* spp.), swordfish (*Xiphias gladius*), tunas (family *Scombridae*) including Pacific bonito (*Sarda chiliensis*), and yellowtail (*Seriola lalandi*).

~~**Deep Set Buoy Gear (DSBG), if allowed, would **only** be allowed beyond the 3nm line, outside of state waters, as is currently fished. Barring any future changes or exempted fishing permits (EFPs).~~

***See Full Analysis Document attachment (Document 1) for detailed description.

4. Rationale (Required) - Describe the problem and the reason(s) for the proposed change:

The Problem:

Initially established in 2003 and federally expanded in 2006, the Channel Islands MPA network containing The Footprint, Gull Island, and SBI Reserves was the first network of its kind in California history. This island network later expanded into the statewide MPA network during coastal implementation phases from 2007-2012. The problem created by these first MPAs was the unintentional protection of seasonal pelagic and highly migratory species that migrate into Southern California during the summer months.

The allowance of limited pelagic or highly migratory take in these areas falls in line with the adaptive management measures set forth in the Decadal Management Review (DMR) and reinforced by the Marine Resource Council's (MRC) near-term recommendations. The proposed changes also fall in line with the MPA Master Plan and align with FGC comments on previous change request petitions.

While maintaining the original intentions for the creation of the MPAs, the proposed changes will have minimal impacts on the ecosystem due to the selective nature of the gear being recommended and highly mobile species it would allow for.

Summary of the reasons for change:

This petition aims to prove this proposal is justified by showing the following*:

- Limited take of pelagic finfish or HMS does not significantly affect or interfere with the species and features the MPAs aim to protect
- The proposed changes provide better equality of MPA policy across the state
- The 20 years of data from these and other MPAs support the proposed changes
- The proposed changes are in line with MPA decadal management review (DMR) comprehensive recommendations and the near-term priority recommendations of the marine resource committee (MRC)
- The proposed changes follow precedent set by the FGC's comments on previously submitted petitions, the current MPA overviews, the 2016 MPA master plan for the southern section, and the original 2002 MPA CEQA for the Channel Islands Network
- The proposed changes exclusively allow for sustainable fishing methods on no at risk populations/species
- The proposed changes support sustainable commercial fisheries the state and NOAA have expressed desire to further expand
- The proposed changes are reasonably enforceable (per discussions with F&G officers)
- The proposed changes have mass public support from the public, fishery groups, non-fishery groups, and conservation organizations

If implemented the resulting changes may have the following effects:

- The Channel Islands MPA network would be updated to allow for a more equitable 60/40 no-take to limited take closure ratio, which would be in line with the state's ratio
- Would provide new fishing opportunities to sustainable recreational and commercial fisheries while producing minimal impacts to the intended protected structures and species
- Provide new research opportunities for observing previous no-take zones under new allowance of pelagic or HMS limited-take
- Help grow local business and further develop the local and state economy

*Further detailed explanations, analysis, and figures are included in Document 1, and the remaining documentation in the "Supporting Documentation" section.

SECTION II: Optional Information

5. **Date of Petition:** Submitted-11/22/2023

AMENDED 3/14/2025

6. **Category of Proposed Change**

☒ Sport Fishing

☒ Commercial Fishing

☐ Hunting

☐ Other, please specify: [Click here to enter text.](#)

7. **The proposal is to:** *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

☒ Amend Title 14 Section(s): Division 1, Subdivision 2, Chapter 11, § 632 |

☐ Add New Title 14 Section(s): |

☐ Repeal Title 14 Section(s): |

*See Document 20 for State and Federal Code modifications example

8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition** [Click here to enter text.](#)

Or ☒ Not applicable.

9. **Effective date:** If applicable, identify the desired effective date of the regulation.

If the proposed change requires immediate implementation, explain the nature of the emergency: Due to the change regarding modifying existing MPAs that cover both State and Federal waters, the federal bodies (NOAA, NMS, and PFMC) must mirror the above changes in their portions of the MPAs to allow for reasonable enforcement of these areas. Due to the lack of precedent, this being the first time the FGC is allowing petitions for individual or groups of MPAs to be modified, new channels need to be opened in order to facilitate such changes. A reasonable amount of time for all parties (state, federal, and public) to review and confirm the reasonings and data provided is required. This petition simply requests this change be made as soon as is practical. |

10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents:

Document 1: Complete, in-depth analysis of the prescribed changes and key points including weighing out the aforementioned change options, scientific basis, and stock assessment analysis.

Why Change These MPAs?

California's MPA network has provided valuable data for researchers allowing for observations of small-scale ecosystems in their raw form with no human intervention. That being said, all research focuses on the local non-pelagic species in these areas. The reasonings for this will be discussed later in depth but is a result of the massive area pelagic populations cover making their net presence the same everywhere. It is for this reason that if changes are made, the local non-pelagic species will remain unaffected, and still be protected under the proposed changes.

This petition aims to prove that specific limited-take allowances will not significantly interfere with the populations the MPAs aim to protect. This petition requests 3 current MPAs be modified to limited take in order to allow for sufficient numbers of no-take zones to still remain in the Channel Islands Network for research and public non-consumptive use (approximately 60% of the island network will remain no-take zones).

With the proposed change, there lies immense research opportunity in filling gaps in our knowledge. Never has a no-take MPA been converted into a limited-take zone. If there are factors that limited-take of pelagic or HMS does have on the local, non-pelagic populations (currently none are known), this change would allow for a whole new branch of research to take place; observing converted no-take zones after 20 years of historical data.

This petition acknowledges the need for no-take MPAs around the Channel Islands to act as a baseline to research as well as areas for the public to view undisturbed waters, and if implemented approximately 60% of the island network would remain no-take. This would mirror the state average for no-take zones. This petition also acknowledges there is no reason to request for a limited take zone in an area far offshore or often locked by foul weather that would theoretically only be fished a handful of times a year. These areas were selected for the reason that they offer sufficient new opportunities to the fishing community and researchers if the no-take areas are converted into limited-take areas.

A unique fact of these three MPAs, and other MPAs in the Channel Islands network is their expansion beyond state waters, something we see nowhere else in the state. All three of these MPAs are part of this subset of state/federal MPAs, extending 6nm from the islands compared to the traditional 3nm a normal MPA would cover. This means for this specific petition, if changes are made, both State and Federal changes should be mirrored to allow for reasonable enforcement and streamlining of regulations. The Commission and CDFW would likely need to partner with NOAA and the Channel Islands National Marine Sanctuary (CINMS) to make these dual zone changes within each MPA. Therefore, this petition will also be addressing NOAA/CINMS and federal fisheries in addition to the Commission and state, so all agencies are aware of the changes being requested and the supporting factors for this change.

The First California MPAs:

The Channel Islands MPA network was the first set of MPAs in California history. Established in 2003, the state closures were expanded in 2006 into federal waters, completing the Channel Islands MPA network. The first state MPAs off the central coast were then implemented one year later, in 2007, beginning the statewide network. The Channel Islands MPAs had no accompanying southern section coastal MPAs until the southern section's implementation in 2012, which also marked the completion year of the state MPA network and nearly a decade of existence for the Channel Islands MPAs.

Being the first, the Channel Islands Network acted as a baseline, moving the state into previously unexplored territory, that today has grown into the current network. That being said, these first MPA implementations were not perfect. We have learned a lot since their creation, from better understandings of both non-pelagic and pelagic species to new closures ideas that followed in the four coastal MPA regions. Now that we have had more than 20 years to observe how this island network acts, it is time to make fine-tuned adjustments in order to modernize the Channel Island network to better mirror the remaining state network and the latest research.

MPA Intentions - Focus on Local Non-Pelagic Species:

Being the first set of MPAs and covering both state and federal waters, the state partnered with the Channel Islands National Marine Sanctuary (CINMS) and NOAA to develop a plan in order to determine how the Channel Islands MPA network would look. In the end, a two-part CEQA was developed that laid out the MPA plan for the Channel Islands network, in which the broad and specific reasonings for The Footprint, Gull Island, and SBI reserves were discussed (*Docs. 3-5*).

Broadly speaking all three of these Channel Islands MPAs were put into effect either around common invertebrate/fishing grounds or were built off of an existing invertebrate closure (SBI). The CEQA acknowledges that placing MPAs around these zones may have congested fishing efforts elsewhere and may slow fisheries short-term. However long-term, it was the belief that these protected areas would act as a sort of oasis, growing mass populations inside that would expand out as they grow to capacity inside reserves. These populations would then radiate from these areas and would in turn help fisheries over time.

We can see the idea of protecting the local, nearshore species of the Channel Islands very evident in each of the three MPA justifications in the CEQA (*Docs. 3-5*), the 2016 MPA master plan goals (*Doc. 10*), and the published MPA overviews (*Docs. 7-9*).

According to the CEQA, The Footprint was originally established with the primary intention to protect the unique rocky reefs and rebuild the rockfish populations (*Doc. 7*). The CEQA discussed the depleted groundfish stocks at the time and mentioned how they would benefit the most from the MPA's implementation. The Gull Island and SBI reserves also discuss deep water reefs and rockfish, but focus more on endangered bird nesting grounds, abalone populations, and the more diverse, nearshore species along the islands they border (*Docs. 8 and 9*). The broad implication of the MPAs in the CEQA was the intention that local populations of fish, birds, and mammals inside the MPAs would, "respond to protection within the reserve through increased density, individual size, and reproductive potential," (*Docs. 3 and 4*).

This logic is something we see echoed today in the modern MPA overviews of the three MPAs and the goals of the MPA Master Plan (*Doc. 10*). In the MPA overviews under, "Why was this location chosen for a state marine reserve?" we still see reasons such as the protection of canyons, rocky reefs, pinnacles, kelp forests, and rocky nearshore habitats for local non-pelagic species including copper rockfish, sheephead, cowcod, and bocaccio. However, there is zero mention of any pelagic or HMS in these overviews. This point is further reinforced by the southern section MPA master plan, where under its goals, states its intentions revolve around protecting the ecosystems within the MPAs and help rebuild rare or depleted populations of species that are, "more likely to benefit from MPAs," and, "Protect selected species and the habitats on which they depend while allowing some commercial and/or recreational harvest of migratory, highly mobile, or other species; and other activities," (*Doc. 10*). All of these protective goals are catered to the local species of non-pelagic fish, while the pelagic goals clearly state that pelagic and HMS should have limited take areas, something that the Channel Island network severely lacks compared to the rest of the state.

Proposed Changes Effect on the Original MPA Intentions:

As mentioned, the original and current goals of these three MPAs revolve around protecting the local, non-pelagic, and nearshore species within them. The idea of a radiating effect helping fisheries around MPAs does indeed hold merit for local populations of non-pelagic species. Species like groundfish that could in theory live, feed, and spawn all within one MPA are a prime example of this working as intended today. A groundfish that may have lived its entire lifecycle inside of a protected area, will only affect that local protected area if that individual was taken. This is why if implemented, the changes would still protect all invertebrates and non-pelagic species, such as rockfish, leaving the original science backed protections, and MPA intentions, in effect.

In regard to these intentions for pelagic or HMS, limited pelagic or HMS take would not noticeably affect any of the pelagic or HMS populations within our waters. This is the case since pelagic and HMS are either highly mobile or seasonal migrators, moving with currents rather than remaining on structure or in a small MPA zone. It is one thing if an entire or significant population of a species live inside a protected area, but for species that live and move over a vast area, these MPAs are negligible in helping their population. Species that live and feed over massive areas of ocean, and spawn hundreds of miles away from the network are intrinsically less affected by a small area they may or may not pass through each year. Unlike the non-pelagic species covered in the CEQA, Master Plan, and modern overviews, pelagic species' population densities, individual sizes, and reproductive potentials are not meaningfully affected by these MPAs. Populations would essentially remain as affected by human impacts whether this proposal goes into effect or not due to the protected areas covering so little of the area they live in. This is something that was actually touched on in the CEQA, where it is stated, "No-take areas, so long as their size is large relative to the

movement of the species, will lead to increased (species) abundance,” (*Doc. 6*). Essentially, due to pelagics and HMS covering so much area throughout their travels, the impact on a pelagic or highly migratory species being protected inside the existing MPAs is near zero. Therefore, there is no scientific basis to leave protections for these species in effect within these three MPAs.

A prime example is the swordfish, one of the three primary species that would be reasonably targeted inside the MPAs if partially opened. Satellite tag data from the Pflieger Institute of Environmental Research (PIER) (*Doc. 15*) shows tagged swordfish off southern California traveling from the tag location to as far south as Cabo (900 nm), or nearly as far west as Hawaii (1900 nm) to spawn in the winter/spring. They then migrate back to Southern California one year later in the summer to feed. Like the swordfish, other HMS such as marlin or tuna are also examples of species that travel massive distances every year during their migrations. These species cover so much water that the net environmental impact from small areas like these MPAs is near zero. It is for this reason the petition requests that pelagic or highly migratory species are able to be targeted inside of these three areas.

Following MPA Reports, The Need for Adaptive Management:

In January 2023 the DMR of the State’s MPA network was published and contained comprehensive recommendations including the following considerations:

- “Allow take of migratory and pelagic species in MPAs that currently do not allow it” and
- “Return MPA fishing opportunities, especially in legacy fishing areas that were previously open to fishing.” (*Doc. 12*)

The Footprint, Gull Island, and SBI Reserves fall under legacy pelagic fishing areas, being once completely open. In alignment with the DMR, these legacy areas can be justifiably re-opened to the limited take of pelagic or HMS per the recommendations.

This change is also supported by the recommendation of the Marine Resource Committee (MRC), as outlined in the networks near-term priorities from the DMR. Stating we must, “Apply what is learned from the first Decadal Management Review to support proposed changes to the MPA Network and Management Program.” We have had ample time to observe these MPAs over their two-decade existence, now that we better understand the low impacts pelagic and HMS have on the network, we can justifiably adaptively manage these MPAs, opening them to limited take. In addition to the DMR and MRC recommendations the 2016 MPA master plan directly called for limited take areas of pelagic or HMS. Due to these three MPAs being the among the oldest modern MPAs, existing since 2003, it is possible the Master Plan considerations from 2016 were not as refined in 2003. This is something we can now remedy, by modifying these MPAs to modern network outlooks.

In addition to adaptive management measures there also exists a pre-DMR precedent from the FGC stating that the MPA network is not designed for pelagic or HMS. In 2020 the FGC denied a petition calling for creating a sanctuary/MPA for Great White Sharks near Carpinteria on the grounds that MPAs are intended, “[...] not (to protect) individual species, **especially highly mobile, pelagic species**,” (*Doc. 11*). Following the FGC’s reason for rejection, this argument can be applied to support the case for the allowance of pelagic or HMS take within the listed reserves, because these species, per their pelagic/highly migratory designation, fall into this category.

Pursuing Equitable Policy Through Modernized SMCAs:

The MPA Network was founded on four key pillars with the innovative idea that these pillars would allow for the adaptive management of the system. One of these pillars is policy and permitting which calls for consistent policy across the network to allow for fair network governance.

After the Channel Islands MPAs were established, the remaining network followed. Comparing

the Channel Islands network to the remaining state network we see large shifts toward the partial-take state marine conservation areas (SMCAs) and less overall water coverage.

The Channel Islands network of MPAs covers 21% (318 mi²) of the total sanctuary waters. Compared to the 16% of state waters currently protected under the network, this means there is a 31% increase in protected areas around the Channel Islands than the rest of the state.

Not only is there an increased area of closures (by percentage) within the Channel Islands network, but also, significantly less relative area open to limited-take. Of the 13 various closures around the island network all but 2 are no-take sections. This only accounts for only 11.43 square miles of water of the 318 square mile closure area, or 3.59% of the sanctuary's closures. By comparison, the state network contains about 40% limited take areas. This is a wide discrepancy between the Channel Islands network and the state network (Over 10 times the relative area around the Channel Islands is no take compared to the rest of the state). If implemented, the percent area of limited take in the Channel Islands Network would roughly mirror the State's 40% limited take figure, bringing more equity to the local region. The raw figures are shown in the table below.

Table 1: Comparison of MPA (no-take) and SMCA (limited take) of the Channel Islands MPAs vs the Entire State MPA Network		
	Channel Islands MPA Network (State and Federal Waters)	State MPA Network
% of Waters Protected (no-take and limited take)	21% (~318 mi ²)	16%
% of network that is No-Take	96.41% (~306.58 mi ²)	60%
% of network that is limited take	3.59% (~11.41 mi ²)	40%
% of network that would be limited take if changes implemented*	41.17% (~130.93 mi ²)	<40%

*This assumes the optional “nearshore” closures are not implemented and includes the Channel Islands network in the state network figures.

The goal of these changes is to allow for enough reasonable take of pelagic or HMS at comparable levels of opportunity zones to the rest of the MPA network (~40% partial take allowance). If implemented, the Channel Islands network would still have elevated protected area rates, 21% compared to the state average of 16%, but would provide a better ratio of limited take areas.

Current examples of limited take areas outside of the island network in Southern California include SMCAs such as the Pt. Dume, Abalone Cove, Blue Cavern, and Farnsworth SMCAs (Doc. 17), which allow for some form of pelagic finfish take. Other statewide examples of limited take SMCAs outside Southern California cater to pelagic finfish and salmon, technically not a pelagic finfish by biological definition, but a species that still covers mass distances every year. This petition simply requests that we adapt too and update the Channel Islands network to the same standards we see in the rest of California.

Enforcement Analysis:

On the surface, the opening of limited take for pelagic or HMS in these current no-take MPAs could create additional enforcement issues for F&G Wardens covering these areas. However, upon talking to the warden office and local wildlife officers it was determined this was not the case. It is the intention of this petition that the changes made would be enforced similarly to how current pelagic

allowed SMCA's are enforced. For the local Ventura agency, enforcement would be identical to how officers enforce the Anacapa Island SMCA.

Discussions with the enforcement agency have indicated that there are currently no issues with enforcement in the current pelagic allowed SMCAs. It is their standpoint that the current enforcement regulations are clear and allow officers to make decisions swiftly and appropriately. The current regulation that outlines enforcement of the SMCAs is under California Code of Regulations Title 14 Section 632(a)(1)(C) (*Doc. 18*). To summarize the code, take or possession of species except specific individuals or groups listed is prohibited. Meaning, under the proposed regulations, the take and possession of pelagic or HMS would be allowed within the conservation area, but the take and possession of non-pelagic or non-HMS species, like groundfish, would be not allowed. There is an added exception that only possession of coastal pelagic species (CPS) would be allowed if an HMS specific option is selected (it is preferred one is). The reasoning for this addition is the allowance for such HMS targeting vessels to possess baitfish that is commonly used to target such species. Due to the clear-cut boundaries of enforcement regulations, and the input from F&G wardens, it was determined that the additional enforcement required by these changes is both minimal and overlaps with current pelagic allowed SMCAs they currently patrol and enforce. In addition, since petition submittal the new GEAs follow a very similar structure to the goals of this petition, and if offshore reefs can be designated GEAs and enforced there is little to no reason why limited take allowances to these MPAs could not be.

Mass Public Support:

The origins of the pelagic allowed zones go back to the original implementation of the Channel Islands MPA network which includes 2 areas for pelagic take. However, the waters these two zones cover are located on the northern side of Anacapa and Santa Cruz islands, areas where very little pelagic/HMS fishing takes place. HMS fishing method trial maps for DSBG and deep drop show a clear picture of the primary pelagic/HMS grounds in southern California (*Doc. 16*). The maps clearly display most pelagic and HMS fishing occurs on the southern sides of the four northern islands. Almost no fishing efforts are made in the two northern zones. Primarily, most pelagic and HMS targeting fishing around the Channel Islands occurs 2-12 miles south of the northern islands, down the entire 4 island chain. All three of the requested MPA lie in these areas.

Fisheries that actively target or have targeted pelagic or HMS off the northern Channel Islands have wanted these types of changes since the implementation of the network and have commented both in the past and present about the desire to allow for more pelagic or HMS limited take. Comments from 2002 in the CEQA and from 2023 DMR show this desire. However, back in 2002, we did not know nearly as much about the pelagic or HMS migrations and what impacts allowing a small fishery inside these areas could be. Today this is simply not the case. We now know that this change, if implemented, will further streamline current regulations concerning pelagic or HMS, while having a net minimal impact on the local ecosystems inside these MPAs. This petition has the official backing and support of several fishery businesses, groups, and individuals, *Doc. 2 for list and letter*, and also includes a publicly signable petition containing over ~~880~~ 1000 signatures at the time of submittal.

Included Stakeholder feedback and additional information (added January 2025)

Commercial Swordfish:

A large conflict that comes up with the three mentioned Channel Islands MPAs and the commercial swordfish fishery is the 3 MPA's current no-take allowance, which includes the retrieval of legally taken fish.

The harpoon swordfish fishery takes a swordfish by locating a basking fish on the surface and attempting to hit it with a hand thrust harpoon. Once hit, fish are left to tire on a set of gear marked with a flag, if not immediately retrievable. This soak time varies greatly, from 1-8 hours, but it is typically no longer than 2 or 3 hours. In that time, fish could pull gear several miles, 1-5 on average in my experience participating in the fishery. This movement occasionally brings gear into an MPA before being retrievable. Even if fish are taken miles away, there is still a random chance the legally taken fish on harpoon gear ends up inside the closure come retrieval time. There is nothing we can do to stop a swordfish from swimming where it wants to go while on gear.

Similarly, DSBG sets 10 flags with 10 hooks at 1000ft in open waters for swordfish. Swordfish hooked with this method can move gear similarly to harpoon fish in terms of distance. This is because if a hooked fish does not come to the boat immediately, the gear is placed back in the water to let the fish tire and to monitor the remaining set, leaving legally hooked fish the possibility to move into a closure as well.

Both of these problems are more prevalent around the Channel Islands and the three MPAs mentioned in 2023-15MPA because these MPAs extend an additional 3nm offshore into federal waters, overlapping more with the more offshore swordfish-fishery grounds. Today, retrieving a dead harpoon fish or fighting/retrieving a hooked fish inside these no-take closures is illegal, something that should be resolved some way. This is especially the case for harpoon fish, as unlike DSBG fish that could be cutoff or released with a tag, harpoon fish cannot be let go once hit.

This problem is compounded in the commercial swordfish fishery due to the fishery's reliance on calm waters to eyeball or locate a basking swordfish. Of the northern Channel Islands one MPAs in particular, The Footprint, sits in the lee of the islands, the place where the islands act as a physical weather barrier from the normal westerly wind and swell. This calm section was historically important and remains an essential area to the swordfish fishery more than other fisheries because of its reliance on spotting vs hooking a fish. These weather pockets force the fishery to operate in the lee area regardless of the MPA's presence. The result is a higher effort around the MPA, not because there is any more swordfish there than other places, but because that is the only zone that has fishable conditions most days at the Northern Channel Islands. This closer proximity to the MPA due to weather leads to higher chances of interactions where legally taken fish tow gear into the closures as mentioned above. We can see this higher landing rate and therefore higher chance of interactions by observing commercial block catch data showing the blocks containing and surrounding the Footprint, blocks 707 and 708 are especially productive due to the calmer waters. These two blocks alone captured 2.82% of state swordfish landings, locally comprising 15.63% of the swordfish produced by the Santa Barbara Port Area over the last 18 years (MFDE¹), particularly high values for an HMS.

It is understandable that opening these MPAs simply on the idea that the weather is better than other zones is not a valid reason on its own, but that is not the point. The point is that this calm zone, and the higher effort inside of it, results in higher chances of gear unintentionally moving into the closure. This unique combination of factors gives even more reason to resolve this problem now during this adaptive management process.

As a result, the FGC, CDFW, PFMC, and CINMS should take this interaction into account in order to better consider the individual actions for allowing the harpoon and DSBG fishery access to operate in or, at the very least retrieve, legally taken swordfish within the 3 requested MPAs because of this gear movement problem.

1. MFDE under only swordfish landings from 1/1/2008 to 12/31/2023. The Santa Barbara Port Area was used for the local filters to include Ports around the Channel Islands (petition's area of concern).

Image depicting average day in the Northern Channel Islands with The Footprint MPA outlined. Displayed wind “lee” for commercial swordfish is predominately around the closure forcing effort and gear interactions with the MPA to be higher (conditions are “fishable” under 10kts, blue color). Wind model used in the NOAA HRRR model mid-day (12:00) during peak effort time.

Local Naval Closures:

From my talks with general HMS fishermen at as many talks as I could attend locally, the issue of military operations off the southern side of the 4 northern Channel Islands was brought up enough time to look into and warrant discussion. The primary argument brought up is, while HMS cover large areas and are fishable outside of the MPAs, military operations close off most and sometimes all fishable area for HMS around the Channel Islands around the northern Channel Islands for local fleets except small areas largely taken up by the two existing MPAs, The Footprint and Gull Island.

While on the water targeting HMS, I have removed from and forced into a different area where no or less HMS are realistically present (more inshore, into foul weather, or into an MPA). There are two types of naval closures on the southern side of the Channel Islands, total range closures and radius closures. Some days one or the other is active and some days both are active depending on the exercise. The location of closure radiuses from operations does vary, but the missile range closure is constant polygon. This zone covers a large area of offshore waters on the southern side of the islands, where HMS effort locally occurs. Included is an image of the points provided to me by the Naval Warfare Center Pt. Mugu depicting the range closure when they are in a live fire event, shaded in light red. The hollow circles depict radius closures from boat coordinates and restricted distances from said positions are enforced by aircraft. Note, a 1.5 nm corridor from land was still permitted for basic transit, so closures did not go all the way to the island shore. The Footprint and Gull Island MPAs have also been included depicting which areas fall inside and outside the missile range.

Event frequency does vary from 0 to 6 days a week, and closure radiuses from boats change based on the activity and number of vessels participating. Currently the only way of acquiring event data is with direct talks with Naval officers <24hr before an event, and in some cases the day of on the radio.

Naval closures at the Northern Channel Islands overlaid with The Footprint and Gull Island MPAs.

The Point Mugu Naval Missile Range closure is the entire light red shaded area.

The two circles are closed radii from vessels operating in the same area, radii closures did leave a 1.5 nm corridor open from the island.

Adaptive Management, the MLPA, and the Master Plans (addition):

Adaptive Management: It should be noted that the adaptive management of the MPA Network is not a one-way street. Adaptive management is defined by Fish and Game Code section 2852(a)² as, “a management policy that seeks to improve management of biological resources, particularly in areas of scientific uncertainty, by viewing program actions as tools for learning...” It is a practice where, as conditions change or we learn more about something, in this case the MPA network, we actively amend management regulations to reflect what currently is known to be a reasonable management method. That being said, consistently increasing protected areas or the level of protection for all species in an area every management cycle is not the only direction this process is allowed to go in order to manage the network. If sufficient evidence is provided and goals can still be met, adaptive management can certainly be used to decrease restrictions in cases where we still accomplish the same goals, something Petition2023-15MPA claims is possible due to the lack of or how little pelagic/HMS interactions are with MPA goals, as supported by the Master Plans. If we can still accomplish the stated goals of the network in these specific MPAs while allowing some take of HMS or pelagic species, the network can certainly still be considered improved as a result. The latest example of adaptive management lowering regulation was the repealing of the Cowcod Conservation Areas (CCAs) and implementation of the smaller Groundfish Exclusion Areas (GEAs) after the cowcod population was considered rebuilt and healthy.

The MLPA: The goals of the MLPA and accompanying plans are clear. The largest goal being to preserve local ecosystems, allowing them to grow undisturbed as much as possible by people, resulting in higher levels in local species’ abundance and biodiversity for future generations to observe. From the onset of this petition, it has been a foundational idea that allowing take of pelagic or HMS inside these areas will both, not significantly affect local species abundance or populations, as they would still be protected, and that the HMS populations would not be significantly affected by such a change. The argument of lowering protections in a petition like this is understood at face value, but the goal of the petition is to examine if we can accomplish the same or a satisfactory level of the stated goals under these “lower protections.”

MPA Master Plans: Appendix G of the 2008 Master Plan³ discusses the idea of species affected by MPAs, mentioning pelagic and HMS groups are overall less affected. Additionally, as the original petition mentions, the current 2016 MPA Master Plan for the southern section outlines within its goals⁴ that areas of protection providing limited pelagic take or HMS take be provided. This is something we do not see around the Channel Islands in nearly comparable amounts to the rest of the state network, this effect is worsened by the federal expansions at the Channel Islands encroaching more into offshore waters where more pelagic fishing occurs. Previous FGC MPA discussions provided additional input on MPAs and HMS interactions where the commission stated that MPAs are intended to protect (local) ecosystems, not individual species, especially those that are highly mobile or pelagic⁵. Both FGC comments, and statements from the 2008 and 2016 Master Plans support the idea that pelagic finfish and HMS are both not as affected by these MPAs and that areas allowing take of just pelagic finfish or HMS be included in the network.

2. https://leginfo.ca.gov/faces/codes_displaySection.xhtml?lawCode=FGC§ionNum=2852.

3. <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=113013&inline#:~:text=Species%20with%20a%20strong%20tendency,their%20entire%20range%20of%20movement>.

4. <http://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=112492&inline> (pg. F-5 (Goal 2, specifically point 4))

5. <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=207757&inline> (pg. 9)

All of the above evidence and precedent came to light after the establishment of the Channel Islands network in 2002, so it is somewhat understandable why the decisions were made back then to leave these areas as no-take zones, we simply did not know as much then as we do now. However, 20 years later with all of this modern evidence and precedent elsewhere along the coast in the 40% of the more-modern coastal network that is limited take, I believe it is more than justifiable to re-evaluate the Channel Islands Network to our current scientific understanding for pelagic/HMS allowed areas in MPAs.

Kelp Restoration and Climate Resiliency:

A final comment of concerns mentions granting limited take access to these areas for Pelagic finfish or HMS will negatively impact local species such as groundfish or those important to kelp restoration and therefore climate resiliency, including but not limited to sheephead and spiny lobster.

The preferred option of only allowing take of HMS was preferred with species interactions specifically in mind. The more selective list of HMS avoids pelagic finfish species, like yellowtail, that could be targeted with methods that are more likely to interfere with non-pelagic species (weighted, bottom contact dropper loops). HMS effort for tuna or billfish consists primarily of surface casting a jig/bait, trolling baits on the surface, or fishing in the middle of the water column. It is very unlikely those targeting HMS species this way will have many interactions with non-pelagic species such as groundfish. Additionally, pelagic or HMS fishing is done primarily offshore, away from nearshore kelp ecosystems, and away from nearshore areas spiny lobster and sheephead frequent.

The four Options Breakdown including Stock and Fishery Analysis:

This section will discuss the impact the allowed fisheries may have on the species that would primarily be targeted, the pros and cons of the ~~four~~ options, and the possible nearshore closure(s). The discussions on the ~~four~~ options and optional no take zones are meant to provide the thoughts and opinions of pelagic and HMS fishery groups and individuals for the Commission to better understand their viewpoints.

-Pelagic and HMS Stock and Fishery Analysis: Out of all of the HMS, Bluefin tuna migrate the furthest in terms of net geographical distance traveled in their lifetime, with individuals who reach maturity traveling from the coast of California across the pacific to Japan, moving up to 70 miles per day during said migration. Billfish (Swordfish or Marlin) travel in two more distinct groups, rotating from California either toward the mid-pacific and Hawaii or off the coast of Mexico, moving up to 35 miles per day according to tag data. All these species and the other pelagic and HMS affected by this change follow migrations similar these, coming into waters off of California in the early summer (June-July), and mostly departing by early winter (November-December). This migration timeline and fishing attempts toward HMS in California are directly related, meaning most, if not all, fishing will be during these 5-7 months, leaving waters relatively untouched the remaining months of each year.

The fishery impact from these changes would be minimal to the overall take of HMS and their stocks. It is the primary intention of this petition that the species primarily targeted inside of these areas (if HMS or pelagic fishing is allowed), would be swordfish, bluefin tuna, and striped marlin. While some other attempts toward more exotic species such as yellowfin or dorado may occur, it would be rarely available.

Fishery efforts in these MPAs also needs to be considered. Pelagic and HMS do not remain in small areas, rather moving with the water and currents. HMS fishery efforts would not be concentrated inside of these proposed limited-take areas, but rather flow through them as the water these species follow flows through these areas. The fishery would cover the same grounds it does

today, with the changes allowing targeting though these areas compared to having to work around them as these species move through them. The two most targeted species in these areas that would be retained are bluefin tuna and swordfish. Striped marlin would likely be targeted the most in terms of fishing effort, but almost all marlin captures are recreational and result in a release.

According to NOAA the bluefin tuna population is not subject to overfishing and stock assessments show the population has “significantly increased,” (*Doc. 13*). If any of the listed options is accepted, all recreational methods of take would be available for bluefin tuna. A majority of this would be hook-and-line, with spearfishing taking up the remaining numbers. Commercially, only hook-and-line bluefin would be permitted as spearfishing is not a commercial option. A concern that was raised was the allowance of commercial hook-and-line bluefin take within these areas. Some groups believed allowing commercial take would prove to have too much of an impact on the stock. However, observing NOAA commercial landing data we see that California’s commercial fishermen only account for 2% of the yearly pacific bluefin that is commercially harvested, meaning the local commercial fishery has a minimal impact on the stock (*Doc. 13*).

The stock numbers and movements are similar for swordfish as well. NOAA lists the pacific swordfish stock is at safe levels and not subject to overfishing (*Doc. 14*). The total local impact by California vessels is listed as minimal with a “significant majority” of swordfish landed by Hawaii based longline vessels. Commercially, with the phasing out of the drift gillnet (DGN), both the state and federal agencies have made it readily apparent they are trying to find new ways to better target and expand commercial swordfish in California. All three of these current MPAs lie in the middle of some of the only reliably fishable swordfish grounds in the Channel Islands. All sit downwind of islands that block the wind and provide fair weather for fishing to occur on days fishing elsewhere is not possible under current allowed commercial methods (Harpoon and DSBG). This is especially the case for harpoon swordfish, a fishery that requires flat-calm water. The allowance for partial take of swordfish inside these regions would allow for a larger calm area to be covered and fished for migrating swordfish.

Unlike bluefin, depending on the accepted option, certain allowances for swordfish take would be made, but some may still be restricted. Options 1 and 2, if either are accepted, would allow all recreational methods for take of swordfish. Historically, this has almost exclusively been surface baiting basking swordfish, a fishery with zero deep water impacts, and has near zero impacts on anything in that area except for the swordfish it targets. Recently however, anglers have begun to mirror commercial methods, and have begun placing baited hooks at deeper depths (~900-1000 ft) for swordfish. Under current regulation, this method of “deep dropping” has no difference/distinction between hook-and-line fishing and would therefore be allowed.

For commercial methods of take, harpoon swordfish would be allowed under any accepted option. This globally recognized sustainable fishery with zero bycatch, is a fishery perfectly suited to have as little impact as possible on the local, non-pelagic ecosystems when a fish is taken. However, like the recreational hook-and-line case, the allowance of commercial hook-and-line for pelagic or HMS inside these regions would allow commercial deep drop of swordfish.

Along with deep drop methods, and in the spirit of fairness to the commercial fleets, ~~Options 1 and 2 would also allow~~ the use of standard-deep-set-buoy-gear (DSBG) ~~in the federal waters only of the proposed limited take areas (as it is currently primarily fished)~~ is proposed in this petition as an isolated action item (see amendment cover letter and revised options). DSBG is currently a federally exclusive fishery, with the exception of one exempted fishing permit (EFP). DSBG is a method consisting of ten separate flags and buoys with one line and one hook on each flag/buoy and is a modern sustainable fishery for swordfish. Due to the nature of these areas overlapping federal waters containing a harpoon allowance (state and federal), the argument for federal authorization of DSBG in these areas is being requested if hook-and-line deep drop is allowed. As previously mentioned, this

change, along with other federal water changes would assumably be made by NOAA and the CINMS working with the state.

These methods of targeting swordfish at depth do have more impact than recreational surface baiting or commercial harpooning. However, the impact of these methods and their bycatch is minimal on non-HMS or pelagic species. This type of fishing has been praised by conservation organizations like Oceana and PEW for its high selectivity and extremely low bycatch (*Links 5/6*). There is also over 10 years of historical catch data for DSBG, the method that hook-and-line deep drop branched from, and 7 years of data from NOAA detailed in the chart below.

Looking at the data we can see that from 2015-2022, DSBG captured 91.2% swordfish, and a 96.9% mix of swordfish and thresher shark (another HMS). Of the “other sharks” and “other fish” most of these species were a mix of other pelagics (i.e., mako sharks, opah, and escolar). This means that nearly 99.8% of all species caught with DSBG are HMS. Almost no non-pelagic or non-HMS species have been landed under this type

of fishery, due to its extreme selectivity. In the small number of cases where non-HMS species were hooked, the active tending of this gear allows for most bycatch to be released alive and well. Since deep drop methods mirror DSBG it is reasonable to assume their catch rates would mirror DSBG rates as well. It is for this reason that deep drop and federal authorization of DSBG for swordfish were listed allowances under Options 1 and 2, since they produce the lowest bycatch numbers, but produce the higher success rates for swordfish catch compared to harpoon or surface baiting.

~~If Options 1 and 2 are rejected but Option 3 or 4 are accepted, all HMS or pelagic targeting methods would still be allowed except those going deep to primarily target swordfish. These options call for the use of only “surface fishing methods,” a term used to describe all non-deep drop methods. This includes methods such as trolling, live bait casting, lure casting, live bait drifting (on the surface), and all other methods anglers or commercial fishermen use besides deep dropping or DSBG.~~

-The ~~four~~ Options and Their Reasonings: Each of the ~~four~~ options is designed to have a minimal impact on the protected area’s local ecosystem but vary in both allowed species and allowed gear types. There are ~~really two~~ several sets of choices, when we break down the ~~four~~ options. The first choice allows either pelagic finfish take and possession, or HMS take and possession with possession of coastal pelagic species (CPS). The logic behind allowing pelagic finfish is primarily the precedent already set on other SMCAs. Pelagic finfish cover the 3 species that would primarily be targeted (swordfish, bluefin tuna, and striped marlin), cover other pelagic species that would occasionally be targeted, and have existing SMCAs elsewhere that already allow for this subset of species. However, this list also covers more species than the HMS list, and as will be discussed, these extra species may pose undesirable issues if limited-take implementations are not made properly. The logic behind allowing HMS take and possession, and CPS possession is that the three targeted species also fall under this more selective classification of species. Meaning there would be a more selective list of species allowed to be taken, thus less overall impact on what could be done inside these areas. Allowing only HMS limited take would also avoid the possible pelagic finfish issues discussed below. The reasoning for the CPS allowance is it would allow common baitfish used to fish HMS to still be retained inside of these areas.

The second choice is the allowance of all hook-and-line methods, restricting “bottom-contact-gears” for better groundfish/bycatch avoidance, or not allowing any hook-and-line gears, just allowing spearfishing and harpoon methods. This is a tiered choice increases in selectivity of gears. Non-restricted hook-and-line of pelagic finfish or HMS of course would give the most access, restricting of bottom-contact-gears is the middle ground which mirrors federal GEAs, and the most selective is the removal of all hook-and-line for just spear and harpoon fishing. Any of these selections can be paired to a pelagic finfish or HMS allowance, making up the 6 total options. ~~including deep drop, and DSBG, or only allowing “surface fishing methods.”~~ The logic with allowing deep drop and federal DSBG allowance is the data shows that these methods are extremely selective and prove effective in targeting primarily swordfish at depth. This choice would allow for more area of opportunity to selectively target swordfish, something the State, NOAA, and PFMG has made very apparent they want to help accomplish, especially commercially with the end of the gillnet dropping landings of California swordfish. The logic with allowing “surface fishing methods” is an attempt at regulating out the deep dropping methods inside of these zones if the State deems them too impactful to allow. If this choice is made, it would make the limited take areas more selective to swordfish methods only, leaving surface baiting recreationally and harpooning commercially as the only allowed methods to target swordfish. If this option is selected, the state would have to clearly define “deep dropping” (to not allow it) or define “surface fishing methods” (to only allow those).

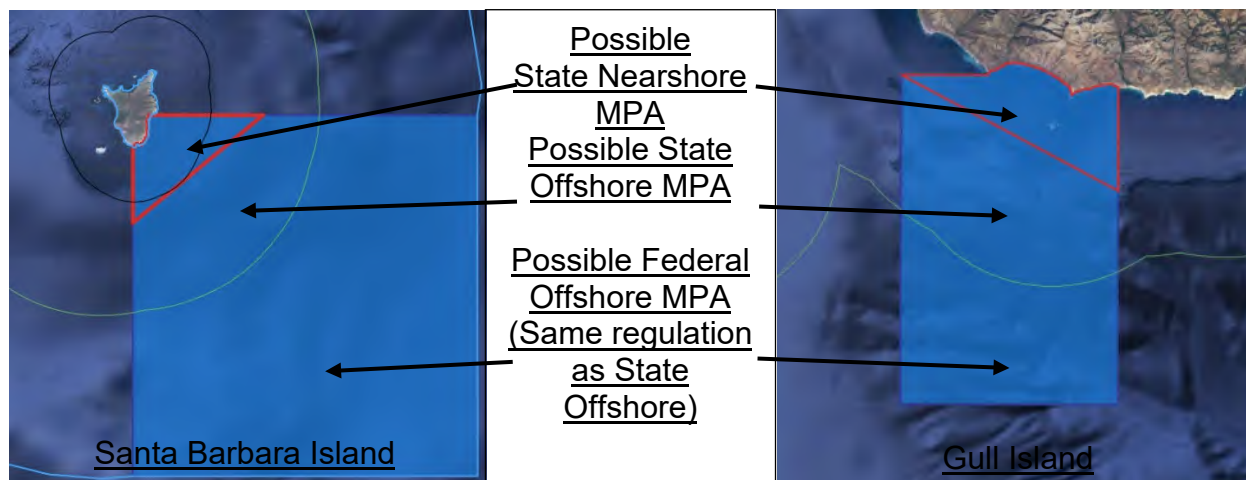

In addition to the four main options, there exists the isolated action for DSBG and a final choice of adding a nearshore closure to the Gull Island and SBI zones with more selective or no fishing methods being allowed. The selected limited take option would then be implemented outside of this boundary throughout the remaining “offshore” area. The logic behind this choice has several factors, some of which are the existence of a nearshore/offshore pair in the Farnsworth and Point Buchon SMCAs, and the desire to continue having stricter limited-take or no-take regions closer to the more diverse shorelines. These nearshore regions rarely contain any species this petition intends on anglers targeting, meaning whether or not a nearshore zone is implemented, areas this close to the respective islands would have such a low fishery presence that they would effectively remain untouched, with one key exception.

If an option allowing the hook-and-line take of pelagic finfish is made it is recommended that the nearshore region be implemented. This is due to the fact that limited-take of pelagic finfish by hook-and-line would allow certain game fish species to be targeted in the local, nearshore ecosystems on fishing beds. The intent of this petition is to protect from this type of fishing allowance, intending limited take allowance for these regions to be open water fishing of pelagic or highly migratory species during their movements. This possibility of nearshore bed fishing is only the case for two species on the pelagic finfish list, yellowtail and barracudas. These are species that if pelagic finfish were allowed with no nearshore zone implemented, would definitely be targeted within the nearshore areas of the SBI and Gull Island closures. Again, it is the intention of this petition to only allow for offshore take of pelagic or highly migratory species, primarily billfish and tuna. Allowing pelagic finfish with no nearshore region that accounts for bed fishing of pelagic species such as yellowtail may interfere with the local ecosystem we still aim to protect. If the below listed coordinates are the border for the nearshore regions (table 2), the water outside of these areas at Gull Island and SBI is reasonably deep enough to ensure little to no effort would be made to target these species and would yield almost zero results.

Table 2: Proposed Coordinates and options for the Nearshore limited or no take areas for Gull Island and Santa Barbara Island	
Gull Island Nearshore MPA	Santa Barbara Island Nearshore MPA
<p>33° 58.000' N. lat. 119° 53.000' W. long, and 33° 55.800' N. lat. 119° 48.000' W. long</p> <p>Regulation within nearshore area:</p> <p>Recreational and commercial take of (pelagic finfish or HMS, depending on the state's choice) is allowed via surface casting, kite fishing, and surface trolling. The commercial take of swordfish by harpoon is allowed. (preferred)</p> <p>Or</p> <p>A no take region (not preferred)</p>	<p>The 1nm boundary of SBI within the current MPA</p> <p>Regulation within nearshore area:</p> <p>Recreational and commercial take of (pelagic finfish or HMS, depending on the state's choice) is allowed via surface casting, kite fishing, and surface trolling. The commercial take of swordfish by harpoon is allowed. (preferred)</p> <p>Or</p> <p>A no take region (not preferred)</p>

Table 2: Proposed Coordinates and options for the Nearshore limited or no take areas for Gull Island and Santa Barbara Island (Amended)	
Gull Island Nearshore MPA	Santa Barbara Island Nearshore MPA
<p><u>The nearshore-offshore boarder would be bound by a straight line running from 33° 58.000' N. lat. 119° 53.000' W. long, to 33° 55.800' N. lat. 119° 48.000' W. long, within the existing MPA.</u></p> <p><u>Regulation within nearshore area:</u></p> <p><u>The recreational take of (either Pelagic Finfish or Highly Migratory Species (option dependent)) by spearfishing is allowed.</u></p> <p><u>The commercial take of swordfish by harpoon is allowed.</u></p> <p><u>The possession of Coastal Pelagic Species is allowed*. (*Only needed if HMS option is selected)</u></p> <p><u>(Preferred Choice)</u></p> <p><u>Or</u></p> <p><u>A no-take region (not preferred)</u></p>	<p><u>The nearshore-offshore boarder would be bound by a straight line running from 33° 28.500' N. -118° 59.300' W. to 33° 26.500' N. -119° 02.200' W within the existing MPA.</u></p> <p><u>Regulation within nearshore area:</u></p> <p><u>The recreational take of (either Pelagic Finfish or Highly Migratory Species (option dependent)) by spearfishing is allowed.</u></p> <p><u>The commercial take of swordfish by harpoon is allowed.</u></p> <p><u>The possession of Coastal Pelagic Species is allowed*. (*Only needed if HMS option is selected)</u></p> <p><u>(Preferred Choice)</u></p> <p><u>Or</u></p> <p><u>A no-take region (not preferred)</u></p>

The listed coordinates for the nearshore closures are only the listed coordinates for the dividing line between the proposed nearshore area and the offshore limited take SMCA and FMCA. The collective closure borders of the nearshore and offshore areas would be the same area as the current MPAs. If these are placed in effect along with the selected option applied outside, these nearshore regions would cover sufficient area to prevent nearshore bed-fishing efforts. While possible changes to these borders may be made, it is the fisheries' belief they are sufficient in preventing what would otherwise be a problem if an unrestricted pelagic finfish option is accepted. Further consultations with active fishery members should be made if these borders are desired to be modified. The preference for stricter limited-take rather than no-take is simply that these areas would contain so little presence of these species, that they would effectively be fully protected, but have rare opportunity for the selective allowed methods in them. In addition, as the preferred nearshore allowed methods mirror those in options 5 and 6, these nearshore areas are only needed if a hook-and-line option (1-4) is granted.

The Most Requested Option and Closing Remarks:

It is this petition's preference that in order to avoid the nearshore pelagic finfish risk all together, one of the ~~two~~ three HMS allowance options be selected (Options 2, 4, or 6) with the nearshore zone not selected. Option 2 is the preferred selection since this option allows for the most HMS opportunity, recreationally and commercially, while still remaining extremely selective, and leaving a minimal impact on the local, non-pelagic ecosystems. Option 2, with no accompanying nearshore zones would allow for HMS targeting within the entire area. In the unlikely case HMS are present nearshore, they may still be targeted with minimal local impact as they move through an area under the same selective fishing methods allowed elsewhere. The lack of nearshore zones in this case would also allow for easier enforcement of the area by wardens not having to worry about different zones within an area. If a nearshore region is desired, the more selective limited-take option is preferred. This change would still allow for selective enough take of HMS and prevent any bottom fishing activity nearshore.

In terms of the three MPAs, all three MPAs would preferably be converted to limited take areas. Discussions with those involved in the possible affected fisheries revealed a strong preference for The Footprint to be converted to limited take, with Gull Island and SBI having equal amounts of preference to be opened to limited take.

In closing this analysis, special thanks to all the individuals who provided the input and data to make this petition possible. I would especially like to thank the FGC and its staff for their assistance with and the creation of this adaptive management process.

Remaining Supporting Documents and Sources:

Document 2: Supporters letter for the petition. Summarizes the petition, its reasonings, and its intentions. Was sent out to business and individuals that could be impacted by this change or provide scientific input asking for their support of the petition and its rationale (signature list on the letter).

CHANNEL COAST MARINE

Dear FGC,

On behalf of the hundreds of thousands of anglers that frequent Southern California, and all of the businesses they support, the following organizations and individuals extend their special support and ask for your approval of this petition. This petition would allow for the limited recreational and commercial take of Pelagic Finfish or Highly Migratory Species (HMS) via select, sustainable fishing methods. The changes would apply to the following Marine Protected Areas (MPAs):

- The Footprint Marine Reserve
- Gull Island Marine Reserve
- The Santa Barbara Island Marine Reserve

This proposed regulation modification aims to return extremely selective take opportunities that the original MPA network implementation unintentionally removed. These regions would become state and federal marine conservation areas (SMCAs/MCAs) but would still provide the original protections to the species and ecosystems each of the MPAs intends to preserve.

The allowance of pelagic or HMS in these areas would provide more equal opportunities to anglers around Southern California targeting fast moving species, like billfish or tuna. Currently, these species cannot be followed into these zones as they move through them, traveling with the currents rather than remain on the structure or in the local ecosystems the MPAs are intended to protect. If accepted, anglers would have the opportunity to follow these species as they constantly flow in and out of these areas.

The push for this change is backed by the California State 2022 MPA Decadal Review, the MRC's near-term objectives, the 2016 MPA Master Plan, and several other state and federal reports/comments. We the fisherman, groups, clubs, and business owners, of California kindly ask for your approval of this petition.

Sincerely,

AFTCO

Documents 3, 4, and 5: Original founding reasoning for the Footprint, Gull Island, and Santa Barbara Island MPAs respectively, to be created and expanded into federal waters of the marine sanctuary from the Channel Islands CEQA in 2002. There is little to no mention of pelagic or HMS species, with primary objectives for the Footprint MPA being groundfish replenishment, and for Gull Island and SBI MPAs, being either or a mix of abalone, rockfish, or endangered bird populations. Original paper found here: <https://nrmsecure.dfg.ca.gov/FileHandler.ashx?DocumentID=151023>

Footprint State Marine Reserve

The Footprint SMR is located in open waters in the passage south of Santa Cruz and Anacapa Islands. The Footprint SMR is 28.6 nm², **6.4 square nautical miles of which would be within State waters and the rest** entirely within Federal waters. It is described and analyzed here as a part of the entire recommendation, but not the decision before the Fish and Game Commission. The majority of the proposed Footprint SMR is sand or gravel between 90-900 ft. The Footprint includes several submerged rocky features, including pinnacles and submarine canyons that once supported large population of numerous rockfish species. Today, the rockfish populations around the Footprint are severely depleted from intensive recreational and commercial fishing in the region. Although populations are depleted, the habitat supports a variety of species, including bocaccio and cowcod, both recognized as overfished by the PFMC. Fish populations in the vicinity of the Footprint are likely to respond to protection within a reserve through increased density, individual size, and reproductive potential.

Gull Island, Santa Cruz Island State Marine Reserve

The Gull Island SMR is located on the southwest side of Santa Cruz Island. The reserve includes 2.9 nautical miles of shoreline from Morse Point to the point along the shore at 33° 58' N, 119° 48' W. The reserve extends south approximately three nautical miles to the State waters boundary. The Gull Island SMR contains 16.2 square nautical miles. A subsequent Federal waters phase would add 22.1 square nautical miles for a cumulative total of 38.3 square nautical miles.

Historically, Gull Island supported a diverse and abundant marine fauna. Although these populations are reduced, the habitat supports a variety of species. Fish populations in the vicinity of Gull Island are likely to respond to protection within a reserve through increased density, individual size, and reproductive potential. The Gull Island SMR would protect a variety of different habitat types from the nearshore to the continental slope. Sand beach is the predominant shoreline habitat at the border of the Gull Island SMR. Endangered snowy plovers may occur there and the beach supports one of the few populations of pismo clams at the islands. The remaining shoreline is covered with cobble beaches.

Subtidal habitats in the Gull Island SMR are mixed sand and rocky reefs. Red and green algae dominate inshore areas. Gull Island supports an intermittent population of giant kelp, but the kelp populations are reduced. Subtidal habitats support patchy populations of surfgrass. Rocky intertidal and subtidal habitats once supported populations of red, pink, white, and black abalone, but only a small population of red abalone, and very few black abalone have been observed recently. The Gull Island area supports large populations of purple urchins. Rocky subtidal habitats from Gull Island to Laguna Point support populations of spiny lobster. Purple hydrocoral (Allopora) is found in deeper rocky reefs around Gull Island.

Shallow rocky habitat extends offshore to Gull Island. Nearshore reefs support populations of various rockfish species. However, rockfish are not as diverse in this region because of physical changes associated with the mixing of warmer waters from the California Counter Current with cooler waters from the California Current. Southern species such as

5-27

California sheephead and wrasses are relatively common in the Gull Island region. The region also supports spawning populations of white seabass and halibut. Thresher and mako sharks are fished in the deeper waters near stronger currents.

Santa Barbara Island State Marine Reserve

Santa Barbara Island SMR is located at the southeast side of Santa Barbara Island. The reserve includes one nautical mile of shoreline from South Point to the eastern point of the

5-22

island. The reserve boundaries extend east and south to the State waters boundary. The Santa Barbara Island SMR contains 13.2 square nautical miles. A subsequent Federal waters addition would add 46.3 square nautical miles for a cumulative total of 59.5 square nautical miles.

Santa Barbara Island, Sutil Island, and Shag Rock support major seabird and marine mammal colonies. Santa Barbara Island supports breeding colonies of numerous seabirds, including the endangered California brown pelican, western gull, black oystercatcher, black storm-petrel, Leach's storm-petrel, Brandt's cormorant, pelagic cormorant, Cassin's auklet, pigeon guillemot and Xantus's murrelet. California sea lions haul out on sandy beaches on the southeastern side of Santa Barbara Island. Harbor seals and northern elephant seals occasionally haul out in the same place.

The exposed rocky shoreline along Santa Barbara Island is interspersed with occasional cobble beaches (10-12 m wide) in protected coves. The rocky intertidal habitat descends steeply to patchy reefs in large areas of sand. Patchy populations of surfgrass grow on subtidal rocks (15-20 m). Populations of giant kelp on reefs around Santa Barbara Island have declined relative to historical data. Red and purple sea urchins and brittle stars (*Ophiothrix*) dominate the rocky subtidal habitats around Santa Barbara Island. Spiny lobsters are abundant in rocky subtidal habitats in the vicinity of South Point and large mussel beds can be found in the rocky intertidal habitats on the southeastern side of Santa Barbara Island.

The continental shelf drops to approximately 200 m less than ½ mile from shore, and continues to drop to 400 m within 3 miles of Santa Barbara Island. In the past, populations of white, green, pink, and black abalone inhabited intertidal and subtidal rocky habitats. The reserve includes rocky subtidal habitats, from approximately 25-66 m, that may contribute to the recovery of the endangered white abalone. Sandy subtidal habitats support halibut populations near the northern border of the Santa Barbara Island SMR. California sheephead have been observed near South Point.

Document 6: Original 2002 CEQA: Dr. Ray Hilborn stating the size of an MPA must be large relative to a species' total movement to be actually impactful on their population abundance.

has reached population levels which increase natural mortality rates...@ Likewise, Dr. Ray Hilborn of the University of Washington=s College of Ocean and Fishery Sciences noted in comments on proposals for marine reserves in the Sanctuary that, A...it is almost universally accepted that exploitation reduces population sizes.... **No-take areas, so long as their size is large relative to the movement of the species, will lead to increased abundance within the reserve.**@

Documents 7, 8, and 9: Current Footprint, Gull Island, and SBI MPA descriptions in “Why the location was chosen...” (Highlighted below)

Footprint State Marine Reserve

Southern California - Established January 2012

What is a California marine protected area (or "MPA")?

An MPA is a type of managed area primarily set aside to protect or conserve marine life and habitats in marine or estuarine waters. California's MPA Network consists of 124 areas with varying levels of protection, and 14 special closures, all designed to help safeguard the state's marine ecosystems. Fishing and collecting are banned at marine reserves such as Footprint State Marine Reserve, providing this MPA with the highest level of protection.

One goal for California's MPAs was to strategically place them near each other to form an interconnected network that would help to preserve the flow of life between marine ecosystems. Within that network each MPA has unique goals and regulations, and non-consumptive activities, permitted scientific research, monitoring, and educational pursuits may be allowed.

Why was this location chosen for a state marine reserve?

One of the goals for Footprint State Marine Reserve is to protect the deepwater communities of fish and invertebrates located at this convergence of warm water currents from the tropics and cold water currents from Alaska. The resulting rich and varied marine life here includes many different species. Colorful cold-water corals and sponges cover the large cobble and boulder features of the reserve. Deep, rocky reefs provide habitat for copper rockfish, cowcod, and bocaccio, while brittle stars and California sea cucumbers can be found on the sandy seafloor.

Footprint State Marine Reserve was established as one of 13 Channel Islands MPAs in 2003, and re-established as part of the statewide MPA Network in 2012. This state marine reserve shares a southern border with the federal Footprint Marine Reserve, and overlaps a portion of the [Channel Islands National Marine Sanctuary](#). Placing a state marine reserve here provides very high levels of protection for local marine species and the habitats they use.

Quick Facts: Footprint State Marine Reserve

- **MPA size:** 7.05 square miles
- **Depth range:** 171 to 1,656 feet
- **Habitat composition:**
 - Rock: 0.35 square miles
 - Sand/mud: 4.80 square miles

Gull Island State Marine Reserve

Southern California - Established January 2012

What is a California marine protected area (or "MPA")?

An MPA is a type of managed area primarily set aside to protect or conserve marine life and habitats in marine or estuarine waters. California's MPA Network consists of 124 areas with varying levels of protection, and 14 special closures, all designed to help safeguard the state's marine ecosystems. Fishing and collecting are banned at marine reserves such as Gull Island State Marine Reserve, providing this MPA with the highest level of protection.

One goal for California's MPAs was to strategically place them near each other to form an interconnected network that would help to preserve the flow of life between marine ecosystems. Within that network each MPA has unique goals and regulations, and non-consumptive activities, permitted scientific research, monitoring, and educational pursuits may be allowed.

Why was this location chosen for a state marine reserve?

One of the goals for Gull Island State Marine Reserve is to protect the diverse submarine canyon, rocky reef and pinnacle, kelp forest, and sandy plain habitat found at this location, where warm water currents from the tropics and cold water currents from Alaska converge. These habitats are used by a rich and varied selection of marine fish and invertebrates such as purple hydrocoral, a species not often seen in the Northern Channel Islands. Kelp forests and reefs provide shelter for opaleye, California spiny lobster, and cabezon, while schools of California barracuda and bonito may be seen in deeper, offshore waters.

Gull Island State Marine Reserve was established as one of 13 Channel Islands MPAs in 2003, and re-established as part of the statewide MPA Network in 2012. The reserve shares a southern border with the federal Gull Island Marine Reserve, and overlaps a portion of the Channel Islands National Marine Sanctuary and Channel Islands National Park. Placing a state marine reserve here provides very high levels of protection for local marine species and the habitats they use.

Santa Barbara Island State Marine Reserve

Southern California - Established January 2012

What is a California marine protected area (or "MPA")?

An MPA is a type of managed area primarily set aside to protect or conserve marine life and habitats in marine or estuarine waters. California's MPA Network consists of 124 areas with varying levels of protection, and 14 special closures, all designed to help safeguard the state's marine ecosystems. Fishing and collecting are banned at marine reserves such as Santa Barbara Island State Marine Reserve, providing this MPA with the highest level of protection.

One goal for California's MPAs was to strategically place them near each other to form an interconnected network that would help to preserve the flow of life between marine ecosystems. Within that network each MPA has unique goals and regulations, and non-consumptive activities, permitted scientific research, monitoring, and educational pursuits may be allowed.

Why was this location chosen for a state marine reserve?

One of the goals for Santa Barbara Island State Marine Reserve is to protect the sandy seafloor, surfgrass, kelp forest, and rocky nearshore habitat found there. Sea urchins, California mussels, and acorn barnacles thrive along the island's rocky coastline. Giant sea bass, California sheephead, and Pacific angel sharks hunt and seek shelter in the island's kelp forests and eelgrass beds, while California halibut and other flatfish rest in the sandy sediments. Santa Barbara Island is also home to a large breeding colony of Scripps's murrelet, a seabird on California's threatened species list, and fourteen other species of bird.

Santa Barbara Island State Marine Reserve was established as one of 13 Channel Islands MPAs in 2003, and re-established as part of the statewide MPA Network in 2012. This state marine reserve shares a southeastern border with the federal Santa Barbara Island Marine Reserve. The reserve overlaps part of the Channel Islands National Park and Channel Islands National Marine Sanctuary. Placing a state marine reserve here provides very high levels of protection for local marine species and the habitats they use.

Document 10: MPA Master plan goal for the southern section, that calls for the protections of at-risk local species while allowing for limited take of pelagic or HMS.

Goal 2. To help sustain, conserve, and protect marine life populations, including those of economic value, and rebuild those that are depleted.

1. Help protect or rebuild populations of rare, threatened, endangered, depressed, depleted, or overfished species, and the habitats and ecosystem functions upon which they rely.¹⁴
2. Sustain or increase reproduction by species likely to benefit from MPAs, with emphasis on those species identified as more likely to benefit from MPAs, and promote retention of large, mature individuals.¹⁵
3. Sustain or increase reproduction by species likely to benefit from MPAs with emphasis on those species identified as more likely to benefit from MPAs through protection of breeding, spawning, foraging, rearing or nursery areas or other areas where species congregate.
4. Protect selected species and the habitats on which they depend while allowing some commercial and/or recreational harvest of migratory, highly mobile, or other species; and other activities.

Document 11: Denied petition for White Shark MPA on grounds MPAs are **especially not focused** on pelagic or HMS (Highlighted below)

Appendix G: Decadal Management Review Supplemental Tables

ACTION TYPE	YEAR	REQUEST	RATIONALE	ADAPTIVE MANAGEMENT ACTION TAKEN
Petition denied	2020	Petition submitted to amend MPA regulations to allow surfboard fishing at the South La Jolla SMR.	California Constitution, Article 1 Section 25, recreational take from a surfboard, even catch-and-release is not a fishery	No fishing is allowed in SMR per design criteria
Petition denied	2020	Petition submitted to establish MPA at Padaro Beach, Carpinteria, to protect great white shark nursery grounds.	An MPA with boating and fishing restrictions at Padaro Beach, Carpinteria, will help protect white shark nursery grounds.	MPAs are intended to protect ecosystems, not individual species, especially highly mobile, pelagic species
Petition denied	2020	Petition submitted to add unlimited recreational take of invasive species <i>Sargassum horneri</i> in Crystal Cove SMCA	CDFW failed to respond and stop the spread of the invasive species <i>Sargassum horneri</i> , plus <i>Sargassum horneri</i> is not a marine resource.	No recreational culling permitted within MPAs.

Document 12: MPA Decadal Review-Appendix A: Comprehensive Recommendations for the Review- Recommends to open legacy grounds and allow pelagic/HMS take in MPAs (Highlighted below)

Regulatory and Review Framework

- Conduct annual engagement meetings with stakeholders to inform them about MPA Management Program activities that inform decadal reviews.
- Define clear management reporting goals, including the scale of reporting at the statewide, regional, or local scale.
- Ensure that adaptive management changes to individual MPAs and the MPA Network are evidence based.
- Simplify designations by changing no-take SMCAs to SMRs after maintenance of existing infrastructure is permitted.
- **Return MPA fishing opportunities, especially in legacy fishing areas that were previously open to fishing.**
- **Allow take of migratory and pelagic species in MPAs that currently do not allow it.**
- Allow commercial urchin take in MPAs that allow commercial lobster take.
- Do not allow boat operations within 100 yards of a remnant kelp forest within MPAs.
- Requests to change specific MPAs (not including formal petitions; see Appendix G):
 - Relocate Piedras Blancas MPA north, just south of Cape San Martin to protect nursery grounds.
 - Increase the size of Matlahuayl State Marine Reserve to include Point La Jolla and the Boomer Beach area where the sea lion colony is located.

Document 13: NOAA Stock and Fishery Analysis for Bluefin Tuna, stock status, and minimal habitat impacts highlighted.

SPECIES DIRECTORY

Pacific Bluefin Tuna

Overview | Seafood | Management | Resources

Pacific Bluefin Tuna
Thunnus orientalis

Also Known As
Northern bluefin tuna, Tuna, Bluefin tuna

Quick Facts

REGION Pacific Islands, West Coast

 **FISHWATCH**
U.S. SEAFOOD FACTS

About the Species

Although Pacific-wide populations are well below target levels, U.S. wild-caught Pacific bluefin tuna is a smart seafood choice because it is sustainably managed under rebuilding measures that limit harvest by U.S. fishermen.

School of bluefin tuna. Credit: NOAA Fisheries

Population
The stock is overfished, but **the fishing rate promotes population growth.**

Fishing Rate
Not subject to overfishing.

Habitat Impacts
Fishing gear used to catch bluefin tuna rarely contacts the seafloor so habitat impacts are minimal.

Bycatch
Regulations are in place to minimize bycatch.

Population Status

- According to the 2022 stock assessment, Pacific bluefin tuna is overfished, but not subject to overfishing. Summary stock assessment information can be found on [Stock SMART](#).
- NOAA Fisheries first determined the Pacific bluefin tuna stock to be overfished in 2013. The 2022 assessment completed by the [International Scientific Committee for Tuna and Tuna-Like Species](#) in the North Pacific Ocean found the stock is still overfished, but **stock size has significantly increased.**

- The average annual bluefin landings by U.S. commercial vessels fishing in the eastern Pacific Ocean represent only 2 percent of the average annual landings from all fleets fishing there.

Document 14: NOAA Stock and Fishery Analysis for Swordfish, stock status and minimal habitat impacts highlighted.

SPECIES DIRECTORY

North Pacific Swordfish

Overview | Seafood | Resources

North Pacific Swordfish

Xiphias gladius

Also Known As
Broadbill swordfish, Espada, Emperado, A'u, Mekajiki, Shuzome

Quick Facts
REGION: Pacific Islands, West Coast

FISHWATCH
U.S. SEAFOOD FACTS

About the Species

U.S. wild-caught North Pacific swordfish is a smart seafood choice because it is sustainably managed and responsibly harvested under U.S. regulations.

Researchers tagging a swordfish. Credit: Pflieger Institute of Environmental Research

Population
The stocks are not overfished.

Fishing Rate
The Western and Central North Pacific stock is not subject to overfishing. Reduced to end overfishing for the Eastern Pacific stock.

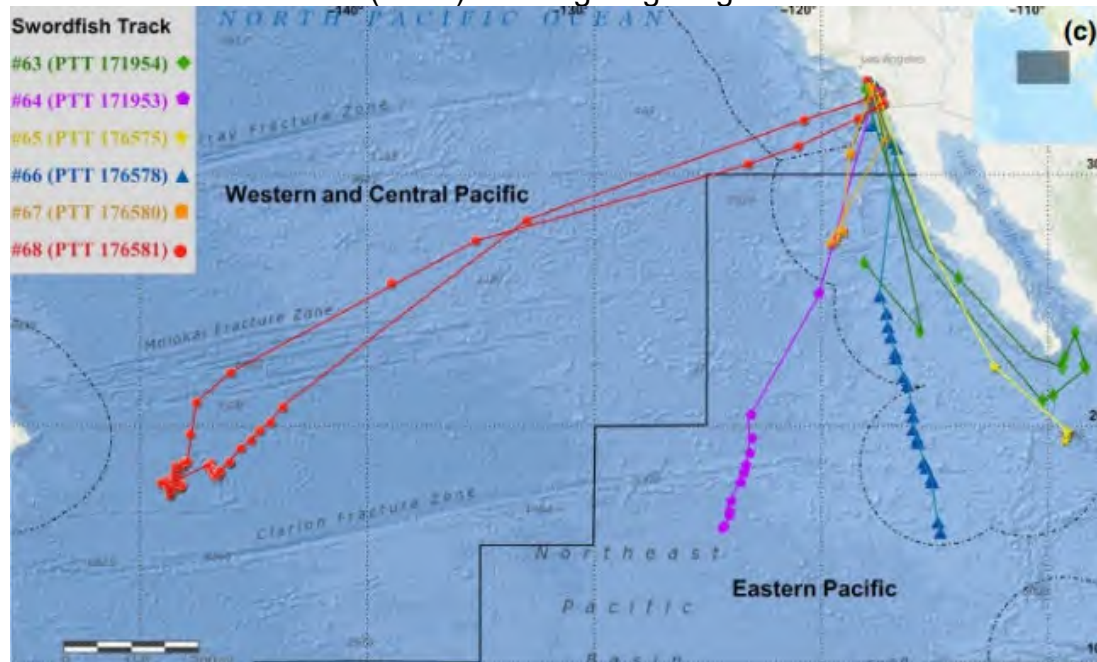

Habitat Impacts
Fishing gear used to catch Pacific swordfish rarely contacts the seafloor so habitat impacts are minimal.

Bycatch
Regulations are in place to minimize bycatch.

Population Status

- There are two stocks of North Pacific swordfish: the Eastern Pacific Ocean stock and the Western and Central North Pacific Ocean stock. According to the most recent stock assessments:
 - The Eastern Pacific Ocean stock is not overfished but is subject to overfishing (2014 stock assessment). Summary stock assessment information can be found on [Stock SMART](#).
 - The Western and Central North Pacific Ocean stock is not overfished and is not subject to overfishing (2018 stock assessment). Summary stock assessment information can be found on [Stock SMART](#).

Document 15: Swordfish migration data collected via satellite tags deployed by the Pflieger Institute of Environmental Research (PIER) showing long ranges swordfish travel relative to the MPAs.

Document 16: DSBG and deep drop fishery efforts map displaying the wide area HMS fishing activity covers, and lack of northern Santa Cruz and Anacapa island efforts, where the only 2 SMCAs are located.

Document 17: Current pelagic finfish limited take SMCAs outside of the Channel Islands Network. These limited take MPAs were implemented in 2012, after the island network in 2003, and display the 9 year shift toward more pelagic allowed areas.

Document 18: Definition of State Marine Conservation Areas per California Code of Regulations Title 14 Section 632(a)(1)(C). The recommended change would make these MPAs effectively SMCAs and MCAs with limited HMS take and CPS possession.

(C) State Marine Conservation Areas: In a state marine conservation area, it is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource for commercial or recreational purposes, or a combination of commercial and recreational purposes except as specified in subsection 632(b), areas and special regulations for use. The department may issue scientific collecting permits pursuant to Section 650. The commission may authorize research, education, and recreational activities, and certain commercial and recreational harvest of marine resources, provided that these uses do not compromise protection of the species of interest, natural community, habitat, or geological features.

Document 19: Charts displaying no-take vs limited-take areas around the Channel Islands vs. the whole State MPA Network showing the disparity of no-take areas around the islands. If the changes are made, this disparity would all but disappear (see Table 1 in the analysis for before and after ratios). The calculation also includes federal sections of the MPAs.

Document 20: How the regulatory language could read if the preferred proposed change was selected (limited HMS take, deep drop methods and federal DSBG allowed, no nearshore closure)

NOTE: Existing regulation modifications presented similar to how CDFW shows yearly changes, ~~crossed out~~ being removed regulation and **red** being the amended regulation. State and federal sections are listed with proposed changes. For simplicity the federal amendments will follow the states for the MPA specific changes.

State and Federal Definition Modifications-

Amend: 14 CCR § 632 (a)** and 15 CFR 922.71:

(13) **Highly Migratory Species.** Highly migratory species, for the purpose of this section, are a subset of finfish defined as: albacore, bluefin, bigeye, and yellowfin tuna (*Thunnus* spp.); skipjack tuna (*Katsuwonus pelamis*); dorado (dolphinfish) (*Coryphaena hippurus*); striped marlin (*Tetrapturus audax*); thresher sharks (common, pelagic, and bigeye) (*Alopias* spp); shortfin mako shark (*Isurus oxyrinchus*); blue shark (*Prionace glauca*); and Pacific swordfish (*Xiphias gladius*). *Marlin is not allowed for commercial take

(14) **Coastal Pelagic Species:** Coastal pelagic species, for the purpose of this section, are a subset of finfish and invertebrates defined as: northern anchovy (*Engraulis mordax*), Pacific sardine (*Sardinops sagax*), Pacific mackerel (*Scomber japonicus*), jack mackerel (*Trachurus symmetricus*), and market squid (*Loligo opalescens*).

**** (13) and (14)** exclusive to 14 CCR § 632 (a), amendments to 15 CFR 922.71 would read identical but not include “(13)” and “(14).” Highly Migratory species and Coastal Pelagic species are defined under State regulations (Title 14 §1.49 and 1.39), meaning the change to Title 14 § 632 (a) may not be required.

State MPA Modifications-

Amend: 14 CCR § 632 (b) (109)

(109) Gull Island State Marine ~~Reserve~~. **Conservation Area.**

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

33° 58.065' N. lat. 119° 50.967' W. long.;

33° 58.000' N. lat. 119° 51.000' W. long.;

33° 58.000' N. lat. 119° 53.000' W. long.;

33° 55.449' N. lat. 119° 53.000' W. long.; thence eastward along the three nautical mile offshore boundary to

33° 54.257' N. lat. 119° 48.000' W. long.; and

33° 57.769' N. lat. 119° 48.000' W. long.

(B) ~~Area restrictions defined in subsection 632(a)(1)(A) apply.~~ **Area restrictions defined in subsection 632(a)(1)(C) apply, with the following specified exceptions:**

- 1. The recreational take of highly migratory species is allowed.**
- 2. The commercial take of highly migratory species by hook-and-line and swordfish by harpoon is allowed. The use of standard deep-set-buoy-gear is permitted outside of state waters (3nm).**
- 3. The possession of coastal pelagic species is allowed.**

Amend: 14 CCR § 632 (b) (114)

(114) Footprint State Marine ~~Reserve~~. **Conservation Area.**

(A) This area is bounded by the straight lines connecting the following points in the order listed except where noted:

33° 59.300' N. lat. 119° 30.965' W. long.;

33° 57.510' N. lat. 119° 30.965' W. long.; thence eastward along the three nautical mile offshore boundary to

33° 57.264' N. lat. 119° 25.987' W. long.;

33° 59.300' N. lat. 119° 25.987' W. long.; and

33° 59.300' N. lat. 119° 30.965' W. long.

(B) ~~Area restrictions defined in subsection 632(a)(1)(A) apply.~~ **Area restrictions defined in subsection 632(a)(1)(C) apply, with the following specified exceptions:**

- 1. The recreational take of highly migratory species is allowed.**

2. The commercial take of highly migratory species by hook-and-line and swordfish by harpoon is allowed. The use of standard deep-set-buoy-gear is permitted outside of state waters (3nm).
3. The possession of coastal pelagic species is allowed.

Amend: 14 CCR § 632 (b) (116)

(116) Santa Barbara Island State Marine ~~Reserve~~ **Conservation Area**.

(A) This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed except where noted:

33° 28.500' N. lat. 119° 01.813' W. long.;

33° 28.500' N. lat. 118° 58.051' W. long.; thence along the three nautical mile offshore boundary to

33° 24.842' N. lat. 119° 02.200' W. long.; and

33° 27.911' N. lat. 119° 02.200' W. long.

(B) ~~Area restrictions defined in subsection 632(a)(1)(A) apply.~~ **Area restrictions defined in subsection 632(a)(1)(C) apply, with the following specified exceptions:**

1. The recreational take of highly migratory species is allowed.
2. The commercial take of highly migratory species by hook-and-line and swordfish by harpoon is allowed. The use of standard deep-set-buoy-gear is permitted outside of state waters (3nm).
3. The possession of coastal pelagic species is allowed.

NOTE: It may not be required to mention deep-set-buoy-gear (DSBG) in the state regulation as it would not be allowed in state waters. However, as all regulations (State and federal) may be listed under one “rulebook” this mention of federal DSBG allowance maybe needed.

Federal Modifications-

Amend: 15 CFR 922.73(b):

(b) **Marine conservation area.** Unless prohibited by [50 CFR part 660](#) (Fisheries off West Coast States), the following activities are prohibited and thus unlawful for any person to conduct or cause to be conducted within the **specified** marine conservation areas described in appendix C to this subpart, except as specified in paragraphs (b) through (e) of [§ 922.72](#):

(b.1). Anacapa Island Marine Conservation Area

(1) Harvesting, removing, taking, injuring, destroying, collecting, moving, or causing the loss of any Sanctuary resource, or attempting any of these activities, except:

(i) Recreational fishing for pelagic finfish; or

(ii) Commercial and recreational fishing for lobster.

(2) Possessing fishing gear on board a vessel, except legal fishing gear used to fish for lobster or pelagic finfish, unless such gear is stowed and not available for immediate use.

(3) Possessing any Sanctuary resource, except legally harvested fish.

(b.2) Gull Island (Santa Cruz Island) Marine Conservation Area

(1) Harvesting, removing, taking, injuring, destroying, collecting, moving, or causing the loss of any Sanctuary resource, or attempting any of these activities, except:

- (i) Recreational fishing for highly migratory species; or
- (ii) Commercial fishing for highly migratory species by hook-and-line and harpoon. DSBG is allowed inside of federal waters.
- (iii) Possession of coastal pelagic species.

(2) Possessing fishing gear on board a vessel, except legal fishing gear used to fish for highly migratory species, unless such gear is stowed and not available for immediate use.

(3) Possessing any Sanctuary resource, except legally harvested fish.

(b.3) Footprint Marine Conservation Area

(1) Harvesting, removing, taking, injuring, destroying, collecting, moving, or causing the loss of any Sanctuary resource, or attempting any of these activities, except:

- (i) Recreational fishing for highly migratory species; or
- (ii) Commercial fishing for highly migratory species by hook-and-line and harpoon. DSBG is allowed inside of federal waters.
- (iii) Possession of coastal pelagic species.

(2) Possessing fishing gear on board a vessel, except legal fishing gear used to fish for highly migratory species, unless such gear is stowed and not available for immediate use.

(3) Possessing any Sanctuary resource, except legally harvested fish.

(b.4) Santa Barbara Island Marine Conservation Area

(1) Harvesting, removing, taking, injuring, destroying, collecting, moving, or causing the loss of any Sanctuary resource, or attempting any of these activities, except:

- (i) Recreational fishing for highly migratory species; or
- (ii) Commercial fishing for highly migratory species by hook-and-line and harpoon. DSBG is allowed inside of federal waters.
- (iii) Possession of coastal pelagic species.

(2) Possessing fishing gear on board a vessel, except legal fishing gear used to fish for highly migratory species, unless such gear is stowed and not available for immediate use.

(3) Possessing any Sanctuary resource, except legally harvested fish.

Amend: Appendix B to Subpart G of Part 922 (Marine Reserve Boundaries) for 15 CFR 922 B.4, B.5, B.6, B.7, and B.8.

B.4. Gull Island (Santa Cruz Island) Marine Reserve

~~The Gull Island Marine Reserve (Gull Island) boundary is defined by the 3 nmi State boundary, the coordinates provided in Table B-4, and the following textual description.~~

~~The Gull Island boundary extends from Point 1 to Point 2 along a straight line. It then extends along a straight line from Point 2 to the 3 nmi State boundary where a line defined by connecting Point 2 and Point 3 with a straight line intersects the 3 nmi State boundary. The boundary then follows the 3 nmi~~

~~State boundary westward until it intersects the line defined by connecting Point 4 and Point 5 with a straight line. At that intersection, the boundary extends from the 3 nmi State boundary to Point 5 along a straight line.~~

~~Table B-4—Gull Island (Santa Cruz Island) Marine Reserve~~

Point	Latitude	Longitude
1	33.86195 ° N	119.80000 " W
2	33.86195 ° N	119.88330 " W
3	33.92690 ° N	119.88330 " W
4	33.90700 ° N	119.80000 " W
5	33.86195 ° N	119.80000 " W

B.4. Scorpion (Santa Cruz Island) Marine Reserve

The Scorpion Marine Reserve (Scorpion) boundary is defined by the 3 nmi State boundary, the coordinates provided in Table B-5, and the following textual description.

The Scorpion boundary extends from Point 1 to Point 2 along a straight line. It then extends along a straight line from Point 2 to the 3 nmi State boundary where a line defined by connecting Point 2 and Point 3 with a straight line intersects the 3 nmi State boundary. The boundary then follows the 3 nmi State boundary westward until it intersects the line defined by connecting Point 4 and Point 5 with a straight line. At that intersection, the boundary extends from the 3 nmi State boundary to Point 5 along a straight line.

~~Table B-4~~**—Scorpion (Santa Cruz Island) Marine Reserve**

Point	Latitude	Longitude
1	34.15450 ° N	119.59170 " W

4	33.90700 ° N	119.80000 " W
5	33.86195 ° N	119.80000 " W

C.3. Footprint Marine Conservation Area

The Footprint Marine Conservation Area (Footprint) boundary is defined by the 3 nmi State boundary, the coordinates provided in Table B–6, and the following textual description.

The Footprint boundary extends from Point 1 to Point 2 along a straight line. It then extends along a straight line from Point 2 to the 3 nmi State boundary where a line defined by connecting Point 2 and Point 3 with a straight line intersects the 3 nmi State boundary. The boundary follows the 3 nmi State boundary northeastward and then southeastward until it intersects the line defined by connecting Point 4 and Point 5 along a straight line. At that intersection, the boundary extends from the 3 nmi State boundary to Point 5 along a straight line.

Table B–6—Footprint Marine Conservation Area

Point	Latitude	Longitude
1	33.90198 ° N	119.43311 " W
2	33.90198 ° N	119.51609 " W
3	33.96120 ° N	119.51609 " W
4	33.95710 ° N	119.43311 " W
5	33.90198 ° N	119.43311 " W

C.4. Santa Barbara Island Marine Conservation Area

The Santa Barbara Island Marine Conservation Area (Santa Barbara) boundary is defined by the 3 nmi State boundary, the coordinates provided in Table B–8, and the following textual description.

The Santa Barbara boundary extends from Point 1 to Point 2 along a straight line. It then extends along a straight line from Point 2 to the 3 nmi State boundary where a line defined by connecting Point 2 and Point 3 with a straight line intersects the 3 nmi State boundary. The boundary follows the 3 nmi State boundary northeastward until it intersects the line defined by connecting Point 4 and Point 5 with a straight line. At that intersection, the boundary extends from the 3 nmi State boundary to Point 5 along a straight line. The boundary then extends from Point 5 to Point 6 along a straight line.

11. Economic or Fiscal Impacts: Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing:

- Would give local charter businesses better access to local Northern Channel Island banks, helping business and reducing fuel costs and emissions spent traveling further offshore.
- Would significantly assist the commercial swordfish industry and total domestic swordfish landings, returning legacy harpoon fishery waters, and allowing for more sustainable, domestic product to be landed by harpoon and DSBG after the phase out of drift nets.

12. Forms: If applicable, list any forms to be created, amended or repealed:

None to my knowledge. |

Subject: Resubmital of Petition2023-15MPA

Hello,

This is the resubmission of the amended petition provided in January. It only contains minor fixes in general spelling and grammar errors, and clarifies "recreational take of pelagics or HMS" as only by hook-and-line or spear. These are the only available methods but just for clarity I included that small edit.

Thanks,

Blake

Petition2025-15MPA Amendment Cover Message

The revisions to this petition involve two sets of informational changes: amendments to the original petition actions and additional stakeholder feedback/rationale that has been gathered over the last year.

Petition actions being revised:

- Modification of options 3 and 4 in the original petition to align with federal feedback and existing regulations in Groundfish Exclusion Areas (GEAs). Rather than only allowing “surface-fishing-methods” the options now restrict “bottom-contact-gears,” like the GEAs. This change was made so that entirely new language and definitions do not need to be drafted in a case options 3 or 4 are selected. (Located on page 3, 11, and 18)
- Addition of a 5th and 6th option consisting of only non-hook-and-line gear methods for consideration, this is not an additional action, just a different combination of allowable methods from the original petition. The new options 5 and 6 would only allow recreational spearfishing of pelagic finfish (option 5) or highly migratory species (option 6) and would allow the commercial take of swordfish by harpoon (options 5 and 6). These options were added to be the least invasive as possible in terms of take, be possibly easier to enforce than the other hook-and-line options and would solve the commercial swordfish gear drift problems for harpoon gears (but not for DSBG). (Located on page 3 and 18)
- Modification of the optional nearshore/offshore MPA boarder at the Santa Barbara Island MPA to a straight line between two points of latitude and longitude versus the original boarder being the 1 nautical mile line from the island. The reason for this change is to align to the MPA design criteria set in the MLPA which states to not use odd shapes or curves, only straight lines between tenth or whole minute latitudes and longitudes. (Located on page 3, 19, and 20)
- Modification of how deep-set-buoy-gear (DSBG) will be considered in the petition. Currently DSBG is only a federal fishery and still in its EFP stage at the State level, consideration of its allowance inside the state waters of MPAs will remain pending with the FGC and CDFW until DSBG is a state fishery. Until then, only a federal process may allow DSBG in the federal portions of the MPAs. Therefore, DSBG has been isolated from all of the options, now having its own action section due to the unique case of that process. (Located on page 4, 16, and 17)

Additional stakeholder feedback/rationale being added:

- Commercial swordfish gear(s) uncontrollable movement into primarily these MPAs, per MDFE effort data, poses problems that must be resolved. (Located on pages 11-13)
- Naval closures local to the Channel Islands restricting most offshore fishing opportunity except near two of the petition MPAs. (Located on page 13)
- Additional information pertaining to adaptive management, the MPA Master Plans (2008 and 2016), the MLPA, and climate resiliency in the scope of this specific petition. (Located on pages 14-15)

Tracking Number: **(2023-24MPA-AM1)**

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Laguna Bluebelt Coalition

Name of primary contact person: Mike Beanan

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Authority cited: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code.

3. Overview (Required) -

- a. Extend the Laguna Beach SMCA no-take regulation down to the southern border of the City of Laguna Beach. This area is currently covered by the Dana Point SMCA, which only protects tide pool resources, not the offshore kelp beds.

4. Rationale (Required) -

The revised Petition is based upon input from the Orange County Marine Protected Area Collaborative (OCMPAC) and enforcement recommendations from participants. The revised Petition locates the southern No Take SMCA border to follow one East/West latitude line to facilitate a consistent offshore boundary. Laguna Beach has recently taken over enforcement of the South Laguna beaches all the way down to the City border. ~~Right now there is confusion due to the different regulations within one city.~~

This regulation change will make enforcement easier and more consistent because it will create continuity within the city, where the same rules apply to all beaches. All Laguna Beach lifeguards have received MPO training and enforce no-take rules for the

rest of the city beaches. This will result in an increase in outreach and enforcement effectiveness, which supports priority recommendation number 15.

High fishing and lobstering pressure are taking a toll on the remaining kelp beds in South Laguna due to overharvesting and substrate degradation possibly due to anchor chain drag. The Sustainable Fisheries Act of 1996 established new requirements for fishery management councils to identify and describe Essential Fish Habitat and to protect, conserve, and enhance these EFH for the benefit of fisheries. A 2002 update to these EFH regulations allowed fishery management councils to designate Habitat Areas of Particular Concern (HAPCs). HAPCs are considered high priority areas for conservation, management, or research because they are important to ecosystem function, sensitive to human activities, stressed by development, or are rare. The rocky reef and kelp beds in this particular area of South Laguna are slightly different than those in the rest of the city because of the steep drop of the cliffs into the ocean. This creates a unique microhabitat where water nutrients are mixed due to wave refraction off the cliffs.

There are kelp forests offshore in these areas that are desperately needed as habitat. One of the original design considerations for designating MPAs was to “Include within MPAs suitable rocky habitat containing abundant kelp and/or foliose algae” (CMLPA Master Plan for MPAs, Appendix F). ~~When the MPA boundaries were finalized in 2012, the kelp was at its highest extent of coverage since 1967 (see supplemental graph), so the total area of kelp forest was overestimated.~~ The kelp beds off South Laguna have been nearly decimated possibly by overharvesting and anchor chain drag and need to be protected. This, in combination with the potential for additional kelp decline due to warm water and recent wildfire events makes it imperative that we protect as much as possible. The Science Advisory Team (SAT) determined Laguna Beach’s MPA to be the minimum size for success.

The Marine Mammal Protection Act also requires action to be taken here. The south end of the no-take SMCA is visible from shore as a line of lobster trap buoys extending out from the cliffs and beach. One MPA watch volunteer reported 223 buoys off of Table Rock beach on 11/8/2023. This represents a virtual “wall” of dangerous trap lines that interrupt whale migration paths. Whales have been seen frequently traveling very close to shore along this stretch of coastline (see supplemental photo of Thousand Steps beach). A December 2019, [Men's Journal](#) magazine article stated that in the preceding few weeks Dana Point Boat captains had logged more than 40 sightings of gray whale cow-calf pairs in the shallow coves of Laguna Beach. The lobster buoy lines likely create a dangerous obstacle for migrating whales, which are protected under the MMPA.

Residents in South Laguna support the extension of the no-take SMCA as evidenced by the attached letters of support from the Three Arch Bay Community Services District, Orange County Coastkeeper, Laguna Canyon Conservancy, Laguna Bluebelt Coalition, and the South Laguna Civic Association. They feel that it is not equitable to have only the north and central beaches protected. Please see the attached letters of support. The

Laguna Beach City Council also supports further analysis and participation in the process.

SECTION II: Optional Information

5. **Date of Petition:** 11/29/2023 **AMENDED 03/11/2025**
6. **Category of Proposed Change**
☐ Sport Fishing
☐ Commercial Fishing
☐ Hunting
☒ Other, please specify: MPAs, Section 632.
7. **The proposal is to:** *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*
☒ Amend Title 14 Section(s): [Westlaw regulations](#).
☐ Add New Title 14 Section(s): [Click here to enter text](#).
☐ Repeal Title 14 Section(s): [Click here to enter text](#).
8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition**
Or ☒ Not applicable.
9. **Effective date:** If applicable, identify the desired effective date of the regulation.
If the proposed change requires immediate implementation, explain the nature of the emergency:
This should be implemented as soon as possible. Ancient California Gray Whale Migration is currently being altered due to proliferation of nearshore lobster traps and rope buoys at the southern SMCA boundary.
10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents:
(A) Map of proposed Boundary Adjustment.
(B) Letter of support from the Three Arch Bay Community Services District
(C) Letter of support from the South Laguna Civic Association
(D) Letter of support from the Laguna Bluebelt Coalition
(E) Letter of support from Orange County Coastkeeper
(F) Letter of support from the Laguna Canyon Conservancy
(G) ~~Graphic from "Status of the Kelp Beds in 2019: Orange & San Diego Counties. Prepared for the Region Nine Kelp Survey Consortium" by MBC Aquatic Sciences~~
(H) ~~Full Report: "Status of the Kelp Beds in 2019"~~
(I) Photo of gray whale at Thousand Steps Beach
11. **Economic or Fiscal Impacts:** Although no socioeconomic data is provided, there may be a fiscal impact on commercial lobster fishers due to reducing their fishing grounds. However, fishing effort will be closer to Dana Point Harbor to save fuel costs and use of ropeless buoys will be encouraged. With removal of lobster buoy lines as migration barriers, whale watching

tours can resume in Laguna Beach (\$10 million estimated annual revenues to Dana Point economy). Less anchoring by CPFVs will reduce anchor chain drag damaging local reefs and kelp forests. ~~Estimated resident property values gain an increase of 20% from proximity to a fully protected MPA~~

12. Forms: If applicable, list any forms to be created, amended or repealed:

Subject: Revision to Laguna Bluebelt Coalition Petition 2023-24 MPA

Commissioners and Staff,

The Laguna Bluebelt Coalition seeks to revise the southern boundary for Petition 2023-24MPA to a No Take SMCA (State Marine Conservation Area) for citywide enforcement consistency and protection of essential sea life habitat between Palos Verdes and La Jolla MPAs.

The proposed revised No Take SMCA is within the jurisdiction of the City of Laguna Beach and has widespread support from community organizations and the City's Environmental and Sustainability Committee. Community support includes the South Laguna Civic Association, Three Arch Bay Service District, Village Laguna, Laguna Canyon Conservancy, Project O, OC Coastkeeper and many individuals.

The City of Laguna Beach has submitted multiple letters seeking to participate in processing the Laguna Bluebelt Petition. In a December 10, 2024 letter to the Commission, Laguna Beach Mayor Rounaghi emphasized the "City looks forward to reviewing the State's assessment of Petition 2023-24 MPA" and "The City remains committed to actively participate and providing informed input...".

Presently, the southern area of Laguna Beach is inaccurately designated as within the Dana Point SMCA leading to confusion about place names and take regulations. The Petition will simplify the no take regulation for the entire city of Laguna Beach, address inaccurate place names and restore Laguna Beach as the correct jurisdiction for this area. The revised No Take SMCA boundary will be identified by the prominent bluff top outcropping at Three Arch Bay consistent with the Laguna Beach City Limits.

The Petition reflects the MLPA's Adaptive Management Objectives to:

- Protect the structure and function of marine ecosystems
- Improve native marine life populations, including those of economic value
- Ensure minimal disturbance while allowing for sustainable opportunities for recreation, education and research
- Ensure comprehensive representation of all key habitats, including unique habitats
- Use learning acquired through administration of the MLPP to adaptively manage the objectives, management measures, enforcement efforts, and scientific guidelines to inform management decisions
- MPAs function as a cohesive statewide network

Size and Spacing Considerations

The Science Advisory Team (SAT) spacing requirements determined Laguna Beach is an essential linkage for larval dispersal among Southern California's MPAs. Guidelines set a maximum distance and minimum size for each MPA.

Maximum Shoreline Distance: To ensure the persistence of a suite of species in an MPA network, the maximum distance between MPAs was determined to be within 50 -100 km (31 -62 miles). A network of MPAs 20 km (12 miles) in length met the upper boundary of the preferred size guidelines and led to population persistence for a larger set of movement combinations. With MPAs this large, decreasing spacing produced a more substantial effect. MPAs of 20 km (12 mile) shoreline length protected a much larger range of movement combinations when spaced 50 km (31 miles) apart (51.8%) than when spaced 100 km apart (21.6%). This increase occurred because persistence of populations with large mean larval dispersal was maintained through a network effect, rather than self-persistence. Laguna Beach's MPAs maximum distance are 50 miles from Palos Verdes MPAs and 72 miles from La Jolla MPAs to meet this goal.

In summary, bigger MPAs yield better results for protecting marine life. Laguna Beach is an excellent candidate when you combine community support and the City's present MPA enforcement measures to be able to achieve noteworthy success.

Minimum Alongshore Extent: To best protect adult populations, based on adult neighborhood sizes and movement patterns, Guidelines conclude MPAs should have an alongshore extent of at least 3-6 miles of coastline, and preferably 6-12.5 miles. Larger MPAs would be needed to fully protect marine birds, mammals, and migratory fish. Combined and simplified, the Guideline indicates that MPAs should have a minimum area of 9-18 square miles, or a preferred area of 18-36 square miles.

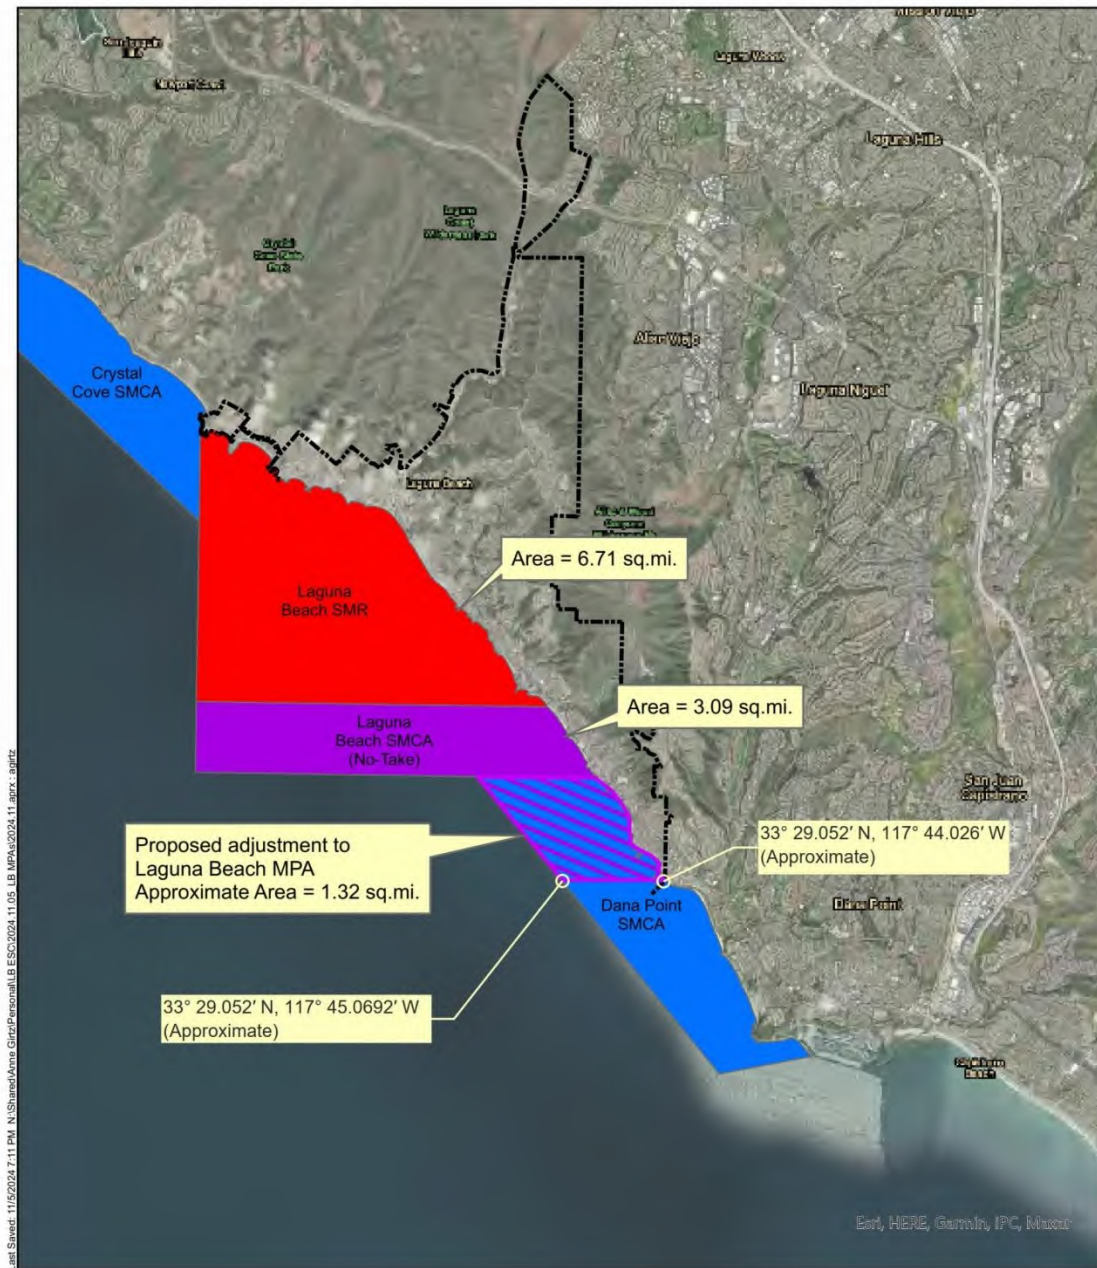

The Revised Petition to include full protection of all of Laguna Beach's MPAs is necessary to comply with SAT Guidelines since, once approved, it will protect 7 miles of coastline slightly within the preferred alongshore extent (6-12 miles). A fully protected Laguna MPA will also grow to 11 square miles, the minimum preferred area (9-18 square miles).

Once approved, the citywide and a fully protected MPA will comply with SAT Guidelines for preferred coastline and size. This will be complimented by local, well-established education and enforcement capabilities to support the continued success for Laguna Beach's MPAs.

Stakeholder Collaboration

The Laguna Bluebelt Coalition, a statewide model for MPA Collaboratives since 2009, has met with key stakeholders through OCMFAC including fishing groups, tribal representatives, game wardens and others to revise Petition 2023-24MPA to accommodate the local lobster fishery. By adjusting the southern SMCA to follow the east/west latitude line at the request of the Dana Point lobster group, placement of lobster traps is facilitated by a consistent GPS latitude line to avoid encroachment into the proposed southern Laguna Beach No Take SMCA.

Economic Considerations

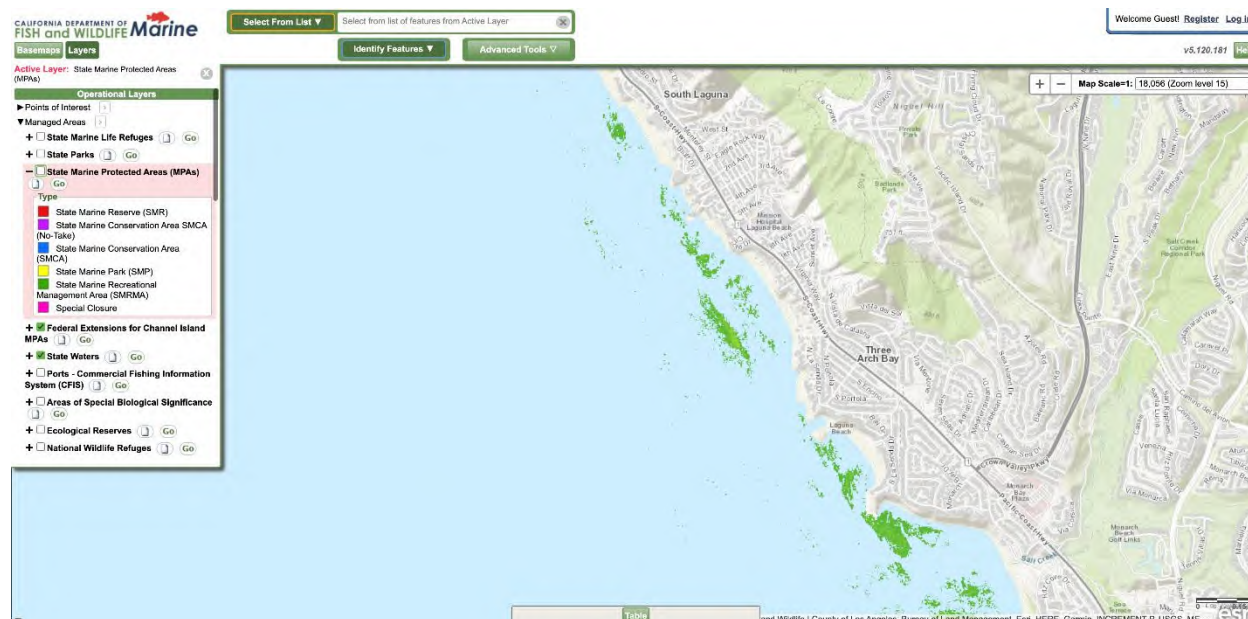

While commercial fishing businesses generally object to MPAs, it is worth noting that Dana Wharf has shifted operations away from fishing to pursue new economic opportunities as the Whale and Dolphin Watching Capital of the World – America’s first Whale Heritage Site. The designation of just over 1 square mile of a new No Take SMCA is just a fraction of the present Dana Wharf fishing grounds and will not measurably impact their annual sportfishing and whale tour revenues. Dana Wharf presently operates large fishing grounds spanning hundreds of square miles from Dana Point south to Camp Pendleton and west to Catalina and San Clemente Islands.

See: [The Ultimate Guide To Fishing In Dana Point, CA | Dana Wharf](#)

Essential Marine Habitats

With steep coastal bluffs, isolated coves and offshore reefs, Laguna Beach’s southern coastline provides unique habitats for coastal sea life nurseries. Kelp forests populate local reefs throughout the city while dolphin and whales routinely transit the area for foraging opportunities and annual migration.

Laguna Beach’s Essential Kelp Habitat

The City of Laguna Beach has a long ocean tradition and is committed to protecting marine resources. All Marine Safety Lifeguards are qualified as Marine Protection Officers to maintain a robust education and enforcement program.

The Laguna Beach General Plan and Policies recognize the value of coastal resources (see References).

The success of Laguna’s Marine Protected Areas over the past 12 years is clear evidence that sea life can be protected and restored in an urban environment. The City’s commitment to manage over 6 million visitors continues to educate and motivate compliance with all MPA regulations and policies. Revising

the southern SMCA boundary for full citywide protection will support the community's dedication to achieve the goals and objectives of the State's Marine Life Protection Act.

The Laguna Bluebelt Coalition appreciates the dedicated role of the Fish and Game Commission to serve as a global leader in advancing the State's recovery of sea life for present and future generations.

Laguna Beach General Plan and Policies

Action 1.1.1 Protect natural assets and open-space areas to maintain their role as “carbon sinks.”

Policy 4.1 Policy 4.2 Develop and adopt a program to protect sensitive coastal resources.

Action 4.1.1 Compile an inventory of the City’s coastal resources and prepare a Coastal Resources Protection Program.

Action 4.2.2 Enforce State’s Marine Life Management Act and identified Marine Life Protected areas within the City and local regulations for the protection of marine life and intertidal resources and to conduct educational and outreach programs.

Action 10.7.2 Periodically review the City’s Water Quality Control Ordinance and related policies for protecting marine resources and update as appropriate.

In cooperation with the State Department of Fish and Game, a Marine Preserve was created by the State in 1968 for a portion of the City’s shoreline particularly rich in tidepool life. In addition to the Marine Preserve, the State, in conjunction with the City, established an Ecological Reserve in 1974, creating, in essence, a marine sanctuary, or a protected “aquarium”.

Policies 2-A Encourage the expansion of the Marine Life Refuges and the designation of particularly unique or ecologically sensitive coastal areas as Ecological Reserves (such as seal and bird rocks), pursuant to the provisions of the State Department of Fish and Game.

2-F Develop a local enforcement program, pending funding availability, consisting of shoreline protection regulations and citation authority for Marine Safety personnel.

2-H Support restoration of offshore kelp beds.

41 Watershed Protection and Restoration Promote the protection and restoration of offshore, coastal, lake, stream or wetland waters and habitats and preserve them to the maximum extent practicable in their natural state. Oppose activities that may degrade the quality of offshore, coastal, lake, stream or wetland waters and habitat and promote the rehabilitation of impaired waters and habitat.

Develop an enforcement program for the protection of marine life resources.

Promote an expanded Marine Life Refuge.

Marine Resources: A small estuary occurs at the mouth of Aliso Creek. As recently as 1976 this estuary supported the Tidewater Goby, a species considered uncommon and declining in numbers due to habitat loss. A resource inventory included in the Orange County Conservation Element identifies the presence of the South Laguna Marine Life Refuge in the South Laguna area. The refuge, near the mouth of Aliso Creek, was given refuge status by the California Fish and Game Commission because the animal

populations in the rocky intertidal habitat had not been subjected to the collecting pressures that had occurred in other areas along the south coast.

[Laguna Bluebelt - Working Together for a Healthy Ocean](#)

Working Together for a Healthy Ocean. Support our New Marine Reserves Your support is critical if they are to succeed.

www.lagunabluebelt.com

Mike Beanan, Co-founder, Laguna Beach Coalition

Thank you for including us in the process to evaluate and, hopefully, approve Petition 2023-24-R to protect all of Laguna Beach's Marine Life.

Based upon stakeholder input, we have submitted a Revised Petition offered as a compromise to support and ease near shore enforcement along one, common latitude line. The original petition followed Laguna Beach's City Limits extending southwesterly from the shoreline. This made the determination of the offshore boundary difficult according to participants at a recent stakeholder meeting hosted by the Orange County Marine Protected Area Collaborative in Dana Point. While there is some debate about who made the suggestion, which led to an unfortunate misunderstanding, the revised petition before you is a smaller SMCA No Take than originally requested but still protects kelp and essential fish habitats.

When evaluating the Petitions, I suggest we comply with and enhance the goals of the Marine Management Plan by increasing the coherence and effectiveness in protecting the state's marine life and habitats, marine ecosystems, and marine natural heritage with full citywide protection. Fortunately, Laguna's unique MPAs have dramatically improved

recreational, educational and study opportunities provided by marine ecosystems through coordinated enforcement by Marine Safety Lifeguards, Park Rangers and community volunteers working together to minimize human disturbance. Petition 2023-4-R is consistent with all of the goals for the Marine Management Act and legislative intent of the Marine Life Protection Act of 1999.

I am not unfamiliar with economic challenges. I grew up in a large working class family in Northern California surfing the cold, wild waves while diving for abalone with my brothers off of Gualala and Mendocino or fishing mountain lakes. Leaving high school and to avoid the draft, I joined the Navy, studied navigation and was assigned to SEAL Team One, as a Platoon Sergeant and sent to Vietnam. Turning 21, I got out, worked my way through college and earned a degree in Biology before being hired as Assistant Dean at UC Irvine to manage veteran programs. One of my first projects was a pioneering Handicapped Scuba Project for wheelchair veterans and others...now a worldwide opportunity for the physically challenged community to enjoy and explore underwater wonders.

I continue now to swim and free dive Laguna's remarkable MPAs while traveling and Scuba diving other MPAs. I encourage FGC staff and commissioners to visit and swim Laguna's MPA and see large Sheepshead and robust kelp forests free of sea urchin barrens.

As a Californian, I feel an opportunity and responsibility to protect and restore our natural heritage - an abundant ocean teeming with sea life. Please consider approving the Laguna Bluebelt's Petition 2023-24-R as part of your legacy for California's sea life protection.

August 29, 2023

Commissioners and Staff,

Since 2012, with the implementation of the California Marine Life Protection Act of 1999, Laguna Beach has successfully managed a network of Marine Protected Areas as a statewide model of collaboration and appreciates the support of the Fish & Game Commission in that effort.

On the heels of annexation of South Laguna beaches coming under the purview of the City of Laguna Beach on March 1, 2023, we are requesting an expansion of the “No Take SMCA” provisions to extend throughout all Laguna Beach MPAs. In addition to alignment with Laguna Beach’s commitment to the national “30 x 30 Initiative Plan” to conserve 30% of America's land and waters by 2030, a citywide “No Take” provision will provide enforcement consistency and community equity while protecting South Laguna kelp reefs – key to carbon sequestration, rising sea temperatures and attenuating bluff erosion.

Multiple benefits will accompany extending the Laguna Beach No Take MPA from 7.2 to 7.9 miles: from Aliso Beach and Totuava Cove through Three Arch Bay (TAB) southwest to the Laguna Beach city limit, see attached map. TAB has exceptional nursery beds for marine life in its bays that are not protected under our current MPAs. For this reason, coupled with the decimating impacts of over-fishing in the unprotected SMCA along TAB during the past 10 years, the TAB Community Services District requested in May 2023 that California Fish and Wildlife Commission extend the No Take MPA through “the southernmost point of the city of Laguna Beach – Mussel Cove, also known as Three Arch Bay.”

The Laguna Bluebelt Coalition, Laguna Ocean Foundation through their education and outreach programs, the City of Laguna Beach’s Environmental Sustainability Committee, and the enthusiastic 100% support and collaboration of our City Council and Marine Safety Department have enabled us to be strong watchdogs and local stewards of our MPAs. Together, we have focused on habitat restoration, water-quality education, wildlife and resource protection, and networking.

Laguna Beach’s rocky coastline has been scientifically determined to provide ideal tidepool and kelp forest habitats as a vital genetic linkage for marine life between the Palos Verde Peninsula and La Jolla Cove. No Take MPAs in Laguna Beach have created increased sea life populations, support an expanding variety of ecotourism recreational opportunities, and have proven to be essential to mitigating decades of over-fishing.

Citywide MPA consistency will further improve ocean water quality by reducing harmful greenhouse gas emissions from fishing boats traveling from Dana Point to Laguna Beach.

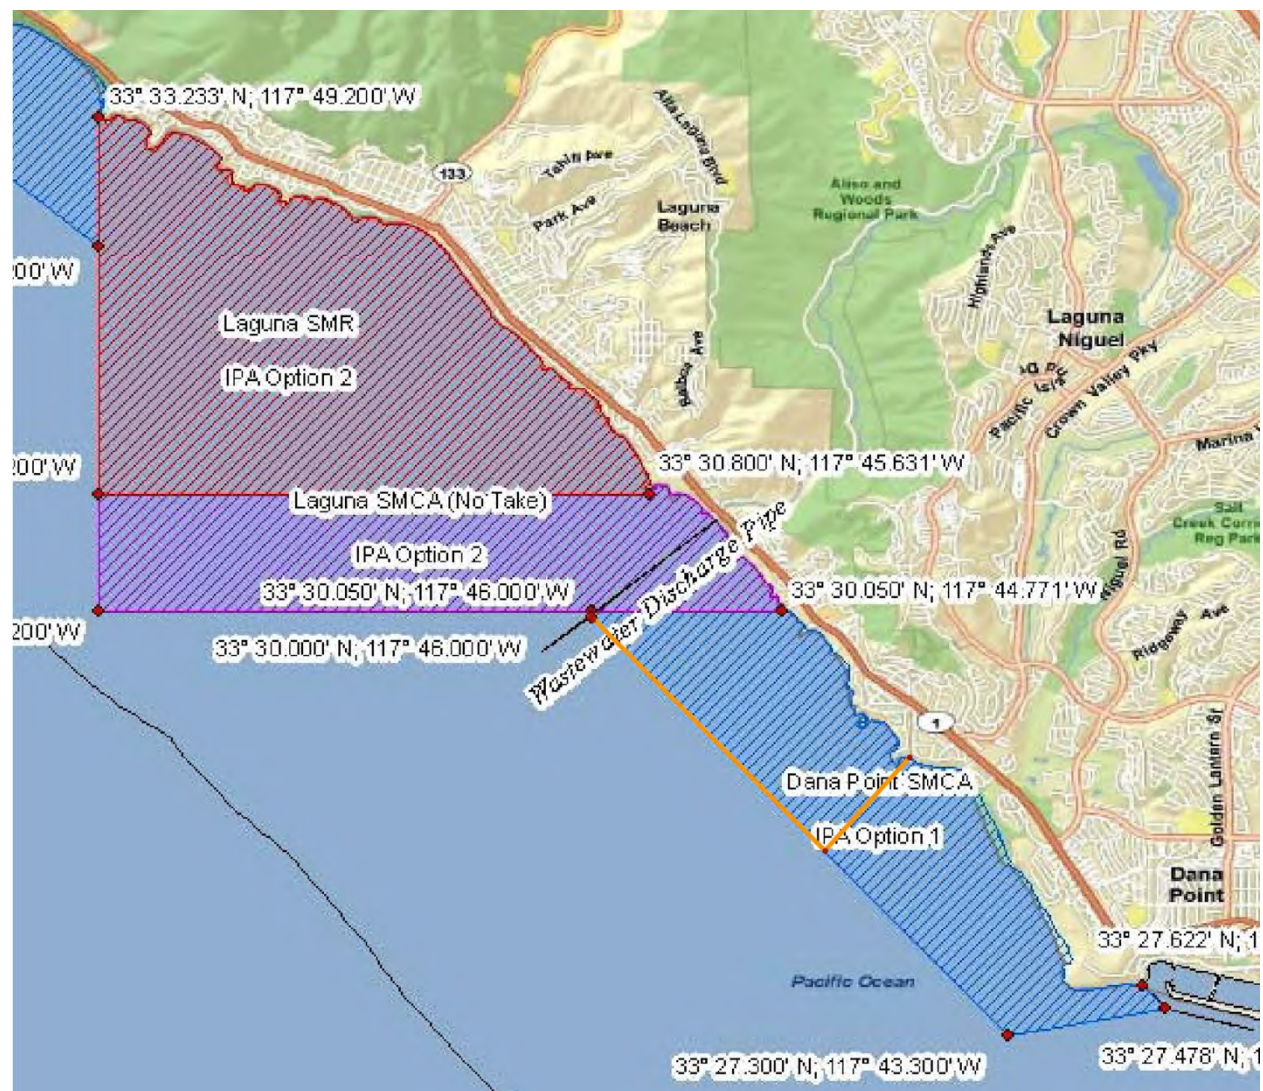

Climate change science recognizes the ocean as key to reversing negative anthropogenic climate impacts.

Thank you for your support of Laguna's Marine Protected Areas and for your consideration of an expansion of the network of No Take MPAs citywide which will increase protections to California's sea life populations and habitat value while benefitting us all.

Greg O'Loughlin, President
South Laguna Civic Association

RE: Support for Extending Laguna Beach's Southern MPA Boundary

Dear Commissioners,

The Board of Directors of the Laguna Canyon Conservancy (LCC) joins with our local environmental colleagues and organizations in support of extending the Marine Protected Areas at the southern end of Laguna Beach.

LCC believes a revision is vital to ensuring an increase in protection of California's sea life populations and ecosystems, as well as enforcing consistency of rules and regulations, along with community equity. It is also important to achieve the City of Laguna Beach's 30 x 30 contribution to protect 30% of the world's coastal marine areas by 2030.

As stewards of our wilderness, we hope the Commission will support the goals and requests of Laguna Beach's environmental groups to expand the network of No Take MPAs citywide and protect our coastal environment for present and future generations to come. Thank you in advance for making this critical step forward.

Laguna Canyon Conservancy is a non-profit, all-volunteer environmental organization founded in 1988 to Save and Protect Laguna Canyon. LCC members have been involved in expanding the South Coast Wilderness nature reserves of Orange County that now include over 22,000 acres of parks, open space, and marine preserves. For more information, please visit:

**RE: Letter of Support for Citywide "No Take"
Marine Protected Areas (SMR and SMCA) in Laguna Beach, Orange County, California**

Commissioners and Staff,

With the implementation of the California Marine Life Protection Act of 1999, Laguna Beach has successfully managed a network of MPAs as a statewide model of collaboration, education and enforcement. To provide citywide enforcement consistency, the Laguna Bluebelt Coalition requests extending "no take" provisions to include all of Laguna Beach's State Marine Conservation Areas (SMCAs) to the southern City Limits.

Laguna Beach's rocky coastline has been scientifically determined to provide ideal tidepool and kelp forest habitats as a vital genetic linkage for marine life between the Palos Verde Peninsula and La Jolla Cove. The City of Laguna Beach continues to benefit economically and ecologically from Marine Protected Areas with experienced Marine Protection Officers (MPOs), community vigilance, marine life education and comprehensive fishing restrictions.

The South Laguna SMCA is characterized by steep bluffs and compact coves to create a unique coastal ecology with tide pools, deep rocks and kelp forests. Wave action and backwash energy from bluffs surrounded by offshore kelp forests offers a local mixing zone for marine mammal and sealife foraging. Annual migrations of California Gray Whales often use South Laguna Coves as a rest stop for mothers and calves. Laguna Beach's other No Take MPAs have increased sea life populations and currently support a variety of ecotourism recreational opportunities.

While most of Laguna Beach restricts fishing, South Laguna is a designated State Marine Conservation Area allowing recreational and commercial fishing. Daily, concentrated fishing effort in the South Laguna SMCA has unfortunately contributed to over-fishing during the past ten years by recreational fishers and commercial passenger fishing vessels (CPFVs). Expansion of Laguna Beach's MPAs is essential to mitigate decades of regional over-fishing.

Expanding "No Take" provisions for all City MPAs will contribute to the City's commitment to the national "30 x 30 Initiative Plan" to conserve 30% of America's land and waters by 2030. The March 1, 2023 annexation of South Laguna beach areas by the City of Laguna Beach requires "No Take" provisions for the South Laguna SMCA to provide citywide enforcement consistency and community equity.

Climate change science recognizes the ocean as key to reversing negative anthropogenic climate impacts and the City of Laguna Beach is committed to a Climate Action Plan. Citywide MPA enforcement

consistency will improve ocean water quality by reducing harmful greenhouse gas emissions from commercial fishing boats traveling far from Dana Point to fish in South Laguna.

The City Council proudly supports the Marine Protected Areas and City policies encourage expanding marine life refuges.

Thank you for your dedicated efforts to protect California's marine life and for considering our request to extend citywide "No Take" protection for all of Laguna Beach's MPAs.

Re: Support for Laguna Bluebelt Coalition Petition to extend the no-take SMCA to the southern boundary of the City of Laguna Beach

Dear President Sklar and Commissioners,

OC Coastkeeper has the mission to protect swimmable, drinkable, fishable water and promote watershed resilience throughout our region. We have been actively working to support and implement Marine Protected Areas since the passage of the Marine Life Protection Act. We support the Laguna Bluebelt Coalition's petition regarding an extension of the Laguna Beach no-take SMCA boundary to the southern border of the city and urge you to approve this proposed boundary change.

Orange County beaches have some of the most beautiful beaches and coves found anywhere in the world. Visitation is high, and therefore the protection offered by the MPAs is vital. Most of the city is protected by the Laguna Beach State Marine Reserve (SMR) and the Laguna Beach no-take State Marine Conservation Area (SMCA). However, there is a stretch of coastline that lies within the city limits that does not receive the same level of protection. Commercial and recreational fishing is permitted in these waters and residents are alarmed by the amount of fishing and the number of lobster traps that they see regularly. This area of the coastline has not been sufficiently studied to get scientific data on the impact of fishing, but local residents that spend substantial time in the water have noted a decrease in fish in the unprotected area.

These coves support vital kelp forest habitat, which is on the decline across the state. The rocky substrate that supports the kelp as well as the fish and invertebrates that utilize the kelp are impacted by lobster traps and anchors. The kelp is still present, but now fails to reach the surface. We must protect this habitat while it still has the ability to come back.

Another concern in this area is the whale migration route. Whales frequently come in close to the shore through Laguna Beach on their migration to and from the calving and breeding grounds in Baja California. During Lobster season, the whales run into a virtual wall of lobster ropes and buoys, which pose a serious threat to entanglement.

Extension of the no take SMCA boundary south will assist enforcement of MPA regulations by making the entire City of Laguna Beach a no take zone. The City of Laguna Beach has recently taken over management of all of the beaches in the city. Until last summer, the County of Orange was in charge of managing all of the beaches south of Aliso Creek. Now that

beach management is consistent throughout the city, the MPA rules should be consistent as well. This will make it easier for the public to identify where they can and can't fish, and for enforcement officers to do their job.

To help MPA enforcement, protect whales, and preserve the remaining kelp beds, we urge the commission **to extend the no-take SMCA boundary to coincide with the southern boundary of the City of Laguna Beach.** We enthusiastically support California's MPA Network and believe the MPAs are working to preserve biodiversity. In the case of Laguna Beach, the MPA extension will enhance the protection of vital ecosystems and create a more consistent and cohesive enforcement policy.

Sincerely,

A handwritten signature in black ink, appearing to read "Raymond T. Helmreich". The signature is fluid and cursive, with the first name "Raymond" being more prominent than the last name.

RE: Letter of Support for Laguna Beach City-wide Marine Protected Areas including South Laguna, to the Southern Point of Mussel Cove, Orange County, California

Dear Commissioners,

Since 2012, with the implementation of the California Marine Life Protection Act of 1999, Laguna Beach has successfully managed a network of Marine Protected Areas (MPAs) as a statewide model of collaboration, education and enforcement. To provide marine protection consistently throughout all of Laguna Beach, the Community Services District of Three Arch Bay supports an extension of marine protection via "no take" Marine Conservation Areas (SMCAs) to the point at the end of Mussel Cove, which is the southern border of Laguna Beach, in the community of Three Arch Bay (TAB).

Laguna Beach's rocky coastline has been scientifically determined to provide ideal tidepool and kelp forest habitats as a vital genetic linkage for marine life between the Palos Verde Peninsula and La Jolla Cove. The City of Laguna Beach continues to benefit economically and ecologically from Marine Protected Areas.

Three Arch Bay (TAB), which includes Mussel Cove, in South Laguna's SMCA, is characterized by steep bluffs and compact coves that create a unique coastal ecology with tide pools, deep rocks and kelp forests. Wave action and backwash energy from bluffs surrounded by offshore kelp forests offers a local mixing zone for marine mammal and sea life foraging.

While most of Laguna Beach restricts fishing, the southern end of Laguna Beach was only designated a State Marine Conservation Area, which allows continued recreational and commercial fishing. Unfortunately, the over-fishing during the past ten years by commercial and recreational fishermen, including commercial passenger fishing vessels (CPFVs), has devastated the kelp beds, fish population, and sea life across South Laguna. Expansion of Laguna Beach's MPAs is essential to mitigate decades of regional over-fishing particularly in South Laguna.

Thus, we request that you initiate and vote to provide an extended "no take" Marine Protected Area (SMR and SMCA) Citywide, across Laguna Beach, including South Laguna, to the Southern Point of Mussel Cove, Orange County, California. This would extend the existing marine protections throughout Laguna Beach, including the southernmost point of the city of Laguna Beach – Mussel Cove, also known as Three Arch Bay.

As a community, we are active stewards of our waterways and marine resources, ensuring quality management of our natural resources, and would appreciate the state's support of our efforts by extending the MPA to the Southern end of Laguna Beach.

Thank you,

Gary Rubel
President
Three Arch Bay Community Services District

Subject: Revision to Laguna Bluebelt Coalition Petition 2023-24 MPA

Commissioners and Staff,

The Laguna Bluebelt Coalition seeks to revise the southern boundary for Petition 2023-24MPA to a No Take SMCA (State Marine Conservation Area) for citywide enforcement consistency and protection of essential sea life habitat between Palos Verdes and La Jolla MPAs.

The proposed revised No Take SMCA is within the jurisdiction of the City of Laguna Beach and has widespread support from community organizations and the City's Environmental and Sustainability Committee. Community support includes the South Laguna Civic Association, Three Arch Bay Service District, Village Laguna, Laguna Canyon Conservancy, Project O, OC Coastkeeper and many individuals.

The City of Laguna Beach has submitted multiple letters seeking to participate in processing the Laguna Bluebelt Petition. In a December 10, 2024 letter to the Commission, Laguna Beach Mayor Rounaghi emphasized the "City looks forward to reviewing the State's assessment of Petition 2023-24 MPA" and "The City remains committed to actively participate and providing informed input...".

Presently, the southern area of Laguna Beach is inaccurately designated as within the Dana Point SMCA leading to confusion about place names and take regulations. The Petition will simplify the no take regulation for the entire city of Laguna Beach, address inaccurate place names and restore Laguna Beach as the correct jurisdiction for this area. The revised No Take SMCA boundary will be identified by the prominent bluff top outcropping at Three Arch Bay consistent with the Laguna Beach City Limits.

The Petition reflects the MLPA's Adaptive Management Objectives to:

- Protect the structure and function of marine ecosystems
- Improve native marine life populations, including those of economic value
- Ensure minimal disturbance while allowing for sustainable opportunities for recreation, education and research
- Ensure comprehensive representation of all key habitats, including unique habitats
- Use learning acquired through administration of the MLPP to adaptively manage the objectives, management measures, enforcement efforts, and scientific guidelines to inform management decisions
- MPAs function as a cohesive statewide network

Size and Spacing Considerations

The Science Advisory Team (SAT) spacing requirements determined Laguna Beach is an essential linkage for larval dispersal among Southern California's MPAs. Guidelines set a maximum distance and minimum size for each MPA.

Maximum Shoreline Distance: To ensure the persistence of a suite of species in an MPA network, the maximum distance between MPAs was determined to be within 50 -100 km (31 -62 miles). A network of MPAs 20 km (12 miles) in length met the upper boundary of the preferred size guidelines and led to population persistence for a larger set of movement combinations. With MPAs this large, decreasing spacing produced a more substantial effect. MPAs of 20 km (12 mile) shoreline length protected a much larger range of movement combinations when spaced 50 km (31 miles) apart (51.8%) than when spaced 100 km apart (21.6%). This increase occurred because persistence of populations with large mean larval dispersal was maintained through a network effect, rather than self-persistence. Laguna Beach's MPAs maximum distance are 50 miles from Palos Verdes MPAs and 72 miles from La Jolla MPAs to meet this goal.

In summary, bigger MPAs yield better results for protecting marine life. Laguna Beach is an excellent candidate when you combine community support and the City's present MPA enforcement measures to be able to achieve noteworthy success.

Minimum Alongshore Extent: To best protect adult populations, based on adult neighborhood sizes and movement patterns, Guidelines conclude MPAs should have an alongshore extent of at least 3-6 miles of coastline, and preferably 6-12.5 miles. Larger MPAs would be needed to fully protect marine birds, mammals, and migratory fish. Combined and simplified, the Guideline indicates that MPAs should have a minimum area of 9-18 square miles, or a preferred area of 18-36 square miles.

The Revised Petition to include full protection of all of Laguna Beach's MPAs is necessary to comply with SAT Guidelines since, once approved, it will protect 7 miles of coastline slightly within the preferred alongshore extent (6-12 miles). A fully protected Laguna MPA will also grow to 11 square miles, the minimum preferred area (9-18 square miles).

Once approved, the citywide and a fully protected MPA will comply with SAT Guidelines for preferred coastline and size. This will be complimented by local, well-established education and enforcement capabilities to support the continued success for Laguna Beach's MPAs.

Stakeholder Collaboration

The Laguna Bluebelt Coalition, a statewide model for MPA Collaboratives since 2009, has met with key stakeholders through OCMFAC including fishing groups, tribal representatives, game wardens and others to revise Petition 2023-24MPA to accommodate the local lobster fishery. By adjusting the southern SMCA to follow the east/west latitude line at the request of the Dana Point lobster group, placement of lobster traps is facilitated by a consistent GPS latitude line to avoid encroachment into the proposed southern Laguna Beach No Take SMCA.

Submitted electronically to fgc@fgc.ca.gov

RE: Amendments to Petition 2023-28MPA: Point Sal State Marine Reserve

Dear President Zavaleta and Honorable Commissioners:

In November 2023, Natural Resources Defense Council (NRDC) submitted petition 2023-28MPA to the Fish and Game Commission (FGC) proposing a new marine protected area (MPA) off the coast of Point Sal, to be named Point Sal State Marine Reserve (SMR).

With the ecological significance of the area in mind, we proposed regulations for the Point Sal SMR that are aligned with current State Marine Reserves: *“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource.”* Given the historic and contemporary importance of the region to the Chumash people, we also recommended that the state consult with local Indigenous communities and Tribes before designation to determine whether a State Marine Conservation Area with exemptions for cultural and subsistence use of relevant Indigenous communities and Tribes in the area is warranted.

Since January 2024, we have conducted extensive outreach with community members and interested parties to discuss the proposal and gather additional insights and information. These conversations have improved our understanding of the Point Sal region and provided a greater appreciation of the historical and contemporary significance of the area for Chumash peoples. Our discussions with local communities, Tribal members, and Tribal organizations in particular, informed our decision to amend the original petition submitted to the FGC.

Our decision to amend Petition 2023-28MPA to allow recreational take of finfish by hook-and-line from shore is in recognition of: 1) the importance of this area for federally and non-federally recognized Chumash peoples, and 2) the importance of the area for shore-based subsistence and sport fishers. We support having the option to rename the Point Sal State Marine Conservation Area with a Chumash place name after further consultation with Chumash Tribes in the region. While we explored options for renaming the proposed SMCA, we were unable to affirmatively determine an appropriate Chumash name in time for the amendment deadline.

We hope this amendment, informed by the additional insight and information gathered through our outreach efforts with local communities and interested parties, encourages the Commission to support the proposed Point Sal SMCA.

Thank you for your consideration.

Sincerely,

Sandy Aylesworth
Director, Pacific Initiative, Nature

Petition to Designate a New State Marine Reserve at Point Sal, Central California
PETITION NARRATIVE

Point Sal is located in Santa Barbara County, California, roughly 50 miles (80 kilometers) to the northwest of Point Conception. The nearest city to Point Sal is Guadalupe, located about six miles to the northeast, and Vandenberg Space Force Base is located to the south. Known for its scenic beauty, rugged cliffs, and stunning ocean views, Point Sal is a relatively remote and undeveloped area along California's coastline. Its waters are home to rich biodiversity, productive oceanographic features, and intact food webs that are worth protecting. This petition calls for the designation of a new ~~State Marine Reserve or~~ State Marine Conservation Area allowing for cultural and subsistence use by Tribes and Indigenous communities in this area, to advance the goals of California's network of marine protected areas (MPAs) in the face of climate change and threats from increased human activities and threats in the future.

Goals

The overall goals of this new MPA are to 1) protect this rich and productive ecosystem and the biodiversity found within, 2) to protect this larval retention zone and the connectivity dynamics within the region, and 3) to enhance the climate resilience of the broader state MPA network.

Proposed boundaries

In keeping with state MPA design and feasibility guidelines provided by CDFW, the proposed area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

- a. 34.880667518 N lat. 120.726433061 W long. (SW corner)
- b. 34.929894739 N lat. 120.727488272 W long (NW corner)
- c. 34.930008197 N lat. 120.666597401 W long. (NE corner)
- d. 34.880979714 N lat. 120.639473286 W long. (SE corner)

The proposed boundaries were drawn to align with visible landmarks and natural geographies as much as possible, with the northern boundary beginning at Mussel Point, and the southern boundary drawn at the end of Brown's Beach. The eastern boundary aligns with the mean high tide line, and the western boundary extends out to the edge of state waters as recommended by state feasibility guidelines.

The proposed area is 14.22 square miles with an alongshore span of 3.2 miles, which meets the state's minimum size guidelines and design recommendations. The proposed area is located 19 miles alongshore from Point Buchon SMR/SMCA, the nearest MPA to the north, which meets the state's minimum spacing recommendations, and 6.5 miles from Vandenberg SMR, the nearest MPA to the south.

Ecological significance of the area

The coastal waters around Point Sal in California support a diverse and dynamic marine ecosystem. The rocky coast is home to abundant and rich tidepools. The kelp beds found in waters leeward of the point provide habitat for endangered Southern sea otters and many other kelp-associated species. The rocks and coastal habitats around the point provide critical roosting and foraging habitats for multiple species of seabirds. State waters surrounding the point are home to a variety of feeding and migrating marine mammals, including bottlenose and common dolphins, harbor porpoises, humpback and gray whales, California sea lions, harbor seals, elephant seals, and Steller sea lions.¹

An analysis of species, habitats, threats, and existing protections within the California Current found that the waters around Point Sal are among the top 5% in conservation value in the California Current.² Notably, the area remained within the top 5% regardless of whether conservation value was being measured utilizing the species richness index or the rarity index, with a significant portion of these areas falling into the top 2%. This region of California is also well-known as a marine biogeographic 'transitional zone' for ocean and coastal biota. Many species reach the southern or northern limits of their ranges here, making it an important biogeographic boundary along California's coast.³

The nutrient-rich waters in this region support a productive food web. Upwelling, where nutrient-rich deep waters rise to the surface, enhances primary productivity, providing ample food resources for a variety of marine organisms, from plankton to larger predators. A krill hotspot⁴ and Biologically Important Area (BIA) for blue whale foraging are located just outside the proposed area,⁵ indicating that these waters are productive enough to support feeding blue whales, which ingest up to 16 tons of krill per day.⁶ The state waters within the proposed area are home to several other BIAs for marine mammal species, including a BIA for humpback whale foraging, a BIA for migrating gray whales, and BIA for resident harbor porpoises.⁷

Lion Rock haul out and roosting site

Lion Rock, located off the southern coast of Point Sal, is an important haul out site for sea lions and other marine mammals. As many as 883 sea lions have been observed on the rock on a

⁷ NOAA, "Biologically Important Area Map."

single day, and the site is also occasionally used by Steller sea lions and elephant seals.⁸ Haulouts are critical to the behavioral cycles of foraging, resting, and breeding for pinnipeds. However, these species are highly sensitive to visual and auditory disturbance and will leave haulouts when they become stressed – even abandoning them permanently, if disturbances occur frequently. Undisturbed haulouts are thus necessary for the protection of these species. Given Point Sal's remote location, Lion Rock currently experiences little to no human-caused disturbance⁹ and may be one of the few remaining undisturbed haulouts along the busy California coastline – making it especially important for the conservation of these marine mammals.

Commented [S11]: discrepancy in spelling from "haul out". are these supposed to be different?

Lion Rock is also an important roosting site and breeding site for many seabird species. Roosting is a vital behavior for seabirds, providing essential rest, social interaction, protection, and nesting opportunities, thereby enhancing their energy conservation, reproductive success, and overall well-being in the dynamic marine environment. Seabirds like cormorants do not have oil-producing glands to help their feathers repel water, making roosting especially critical for these species to dry after foraging. Thousands of cormorants have been observed roosting on Lion Rock,¹⁰ and it is also a roost site of significant importance for Brown Pelicans, which until recently were listed as endangered species.¹¹ Finally, Lion Rock is a breeding site of growing importance for Brandt's cormorants, with as many as 14 breeding pairs observed on the rock in recent years.¹²

Connectivity and larval retention zone

Although wind-driven upwelling is a vital source of nutrients for California ecosystems, this large-scale offshore transport of coastal ocean water poses a significant challenge to larval stages of marine organisms that must recruit to coastal environments. Headlands, such as found at Point Sal, can help to mitigate this effect by slowing down or recirculating ocean currents, and research has shown waters on the leeward sides of coastal promontories or headlands provide refuge for fish and invertebrate larvae against offshore transport during upwelling events.¹³ These "larval retention zones" are critical for enhanced recruitment, and help to ensure that adult populations are supplied with larvae in recruitment-limited upwelling regions.¹⁴ Larval retention zones also serve as biological hotspots, where upwelling delivers

¹⁴ Ibid.

nutrients that then fuel phytoplankton growth and support marine food webs. This effect has been shown even for small headlands like Point Sal (e.g., Bodega Headland).¹⁵

Point Sal's leeward waters are known to serve as a larval retention zone in this stretch of the Central Coast. One study used seabird foraging rates as a proxy for juvenile fish recruitment to explore whether seabird foraging and geographic indicators can be used to identify larval retention zones, in order to help inform MPA network spatial design.¹⁶ The findings show that both long and short headlands—including Point Sal—lead to higher juvenile fish abundance, and that coastal orientation was an important determinant of juvenile fish abundance. Pelagic cormorant foraging rates were also found to be higher at south-facing coasts like Point Sal's compared to other coastal orientations. This is due to weaker offshore advection caused by coastal upwelling along south-facing coasts, and eddies forming in the lee of the south-facing coasts of embayments.¹⁷

This biological evidence for local retention zones is supported by physical oceanography data. Multiple studies of oceanographic currents in the area show that within the Santa Barbara Channel, ocean currents primarily run from east to west.¹⁸ Just north of Point Conception there is strong seasonal equatorward flow heading south. Around the area of Point Sal, the interaction of these westward and southward surface currents cause convergence.¹⁹ Additionally, the region experiences episodic periods of wind relaxation in the spring, leading to less vigorous upwelling with important biological consequences for larval retention and surface productivity.²⁰

Historical and cultural use

Point Sal holds significant cultural and historical ties to the Chumash people, who have inhabited the region for thousands of years.²¹ For instance, the Chumash village Axwin was located very close to the area.²² There is abundant evidence of Chumash occupation of Point Sal as recently as 250 years ago and as far back as 4,800 years ago. Rock rings where homes once stood, grinding stones, and other Chumash artifacts are easily visible. Human remains found at Chumash burial sites indicate that the diet of ~~ancient peoples~~ Indigenous peoples living

at Point Sal was high in marine protein, demonstrating the strong link between coastal peoples and marine resources.²³ There are many Chumash people who still live in the general area and come to Point Sal for a variety of reasons. Protecting the marine waters and coastal resources of Point Sal would help to recognize its value as a cultural heritage site that still contributes to the identity and sense of place for many of the ~~tribe~~ Indigenous people of Central California today.

Habitat

Since the creation of the California MPA network, a new dataset that allows for detailed delineation of the habitat categories used in the design of the MPA network for all California state waters has been completed and made available through the California State Mapping Program (CSMP). Using this dataset, we characterized the habitat types present in the area proposed for protection around Point Sal (Figure 1).²⁴

The proposed area is characterized by a large amount of sandy bottom, with some rocky substrate south of the point and in the northeast portion of the area (8.3% shallow (0-30m) rocky bottom, 41.9% shallow sandy bottom, 1.2% deeper (30-100m) rocky bottom, and 48.6% deeper sandy bottom). Kelp beds are present on the shallow rocky bottom substrate (personal communications, Dan Robinette), supporting numerous marine species like rockfish and sea otters.²⁵

Adding this area to the California state MPA network would increase the number of replicate sites for these four important habitat types, as recommended by the science-based guidelines for the MLPA planning process and recent peer-reviewed guidelines for the design of climate-smart MPA networks.²⁶

Land-sea connection

Coastal marine ecosystems are influenced by both ocean- and land-based activities. Conservation efforts focused on addressing ocean-based threats alone are often compromised by land-based impacts that affect coastal ecosystems, such as nutrient runoff, organic and inorganic pollutants, and the direct impacts associated with high levels of human traffic and visitation.²⁷ Planning for and designating MPAs that are linked with terrestrial reserves or adjacent to areas with little to no human impact can therefore considerably improve MPA

conservation outcomes.²⁸ The proposed SMRCA is adjacent to Point Sal State Beach, which currently protects approximately 80 acres and includes just over 1 1/2 miles of ocean frontage. Due to its remote location, and possibly these terrestrial protections, Point Sal's terrestrial habitats remain relatively undisturbed and free of negative human impacts,²⁹ making the waters around Point Sal a particularly valuable area to protect.

Access and recreation

The coastline of the proposed SMR-SMCA is currently accessible through Point Sal State Beach and Point Sal Trail. Recreational activities at Point Sal State Beach include fishing, beach combing, hiking, nature study, photography, picnicking, and sunbathing.

In 1998, heavy rains destroyed Point Sal Road in several places, which was the main access road for Point Sal State Beach. The road was closed until May 2008, when Air Force and County officials announced they had reached an interim agreement to provide access. They have since been "coordinating to place informational signs, fix fences and repair washed-out sections of the County road", though progress has been extremely slow. The road remains closed, although according to California's State Parks Department, efforts to develop a long-term access plan to Point Sal State Beach are ongoing.³⁰

Point Sal State Beach is currently best accessed via Point Sal Trail, which is located at the end of Brown Road. This moderately challenging trail is approximately 10.2 miles round trip to the beach and back,³¹ and is open year-round. It provides unparalleled access to untouched pristine coastal wilderness, traversing astonishingly beautiful coastal habitats such as dunes, chaparral, windswept bluffs, and rocky cliffs. The trail is described as "a very popular area for hiking".³²

By making the ocean more productive and resilient to climate change, stronger marine protections like the proposed Point Sal SMR-SMCA can enhance shore-based recreation. When combined with efforts to increase access and connect more people to nature, additional state MPAs can give those from marginalized communities more equitable access to the ocean's resources and benefits. California's MPAs have been shown to increase the biomass of fishery-targeted species and promote "spillover" into nearby coastal areas, benefitting nearby fishing grounds.³³ The California Environmental Protection Agency identifies the adjacent city of Guadalupe as "disadvantaged" under CA Senate Bill 535, and their synthesis of environmental and socioeconomic indicators further reveals that Guadalupe – alongside Santa Maria and Lompoc – are underprivileged communities that experience significant cumulative impacts from

pollution.³⁴ Given these communities' close proximity to Point Sal, implementing an ~~SMR~~SMCA at the proposed site could enhance access for disadvantaged populations to valuable coastal resources and fishing opportunities, as a popular shore fishing site is located just north of the proposed Point Sal SMCA boundary, near the Rancho Guadalupe Dunes Reserve area. In addition to the designation of a new Point Sal ~~SMR~~SMCA, we urge the state to redouble its efforts to provide access to Point Sal State Beach by reopening Point Sal Road.

Socioeconomic impacts

Current fishing in the proposed area is limited, likely due to its considerable distance from nearest port areas of Morro Bay and Santa Barbara. The proposed Point Sal MPA overlaps with 14% of California fishing block 631, and 11% of California fishing block 632. According to the Marine Fisheries Data Explorer, annual landings reported from these blocks over a ten year period from 2012 to 2022 were an average of 231,460 lbs by weight and \$678,632 by value per year.³⁵ This represents just 0.11% of the landings by weight, and 1.1% of landings by value, reported for the Central Coast region over the same 10 year period.^{36,37} For this reason, and due to the relatively small proposed size of the MPA, we believe the establishment of an ~~SMR~~SMCA in this area would have minimal economic impact to commercial fisheries.

Our request to CDFW for recreational fishing data from this area was being processed at time of submission; we will evaluate the potential impact to recreational fishers and submit it to the state following receipt of the requested data.

Historical context

During the MLPA planning process, a large SMR around Point Sal was proposed in External Proposed MPA Package AC. The proposed SMR was 21.92 mi², with an alongshore span of 6.1 miles and depth range of 0-192 feet. Based upon a review of the historical documents provided by the Fish & Game Commission in October 2023, it is not clear why the state chose not to designate this proposed SMR at that time.

Future stressors may compromise California's coastal waters and nearby MPAs

There is increasing pressure to develop resources in and otherwise utilize California's coastal waters. For example, as efforts intensify to mitigate and adapt to climate change, the state is

³⁴ OEHHA, "CalEnviroScreen 4.0," Text, CA.Gov, September 20, 2021, <https://oehha.ca.gov/calenviroscreen/report/calenviroscreen-40>; OEHHA, "Final Designation of Disadvantaged Communities Pursuant to Senate Bill 535" (CalEPA, May 2022).

³⁵ Assuming equal distribution of effort and value across all years. Because smaller timescales resulted in confidential data outputs from the Marine Fisheries Data Explorer, we aggregated 10 years of landings data from both blocks to calculate average annual landings data. However, the state should look into the confidential data to find more detailed estimates of fisheries landings from this area.

³⁶ We defined the Central Coast region as all fishing blocks from Point Ano Nuevo to Point Conception:

<https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=144496&inline>

³⁷ California Department of Fish and Wildlife, "Marine Fisheries Data Explorer," database, MFDE, accessed November 21, 2023, <https://wildlife.ca.gov/Conservation/Marine/Data-Management-Research/MFDE>.

investing in offshore wind and desalination plants. Interest in ocean-based carbon dioxide removal (CDR) is growing, and aquaculture activities are proliferating. Scientists warn that a rising wave of ocean industrialization, such as underway in California's waters, -will pose additional strain on marine biodiversity.³⁸

MPAs along the central coast of California will likely experience these types of stressors in the coming decade. Vandenberg SMR, located 17 km to the south of this proposed area, and the Point Buchon SMR/SMCA complex, located 50 km to the north, are both sited near potential future offshore wind development projects. The proposed California Demonstration Project (CADEMO) seeks to place four floating offshore wind turbines in state waters just outside the boundaries of Vandenberg SMR, and would deliver power via a subsea cable traveling under the seafloor to an onshore cable landing site at Vandenberg Space Force Base. The Morro Bay Wind Energy Area is located in federal waters just outside Point Buchon SMCA, and two leases have recently been issued to commercial wind developers to begin planning for offshore wind development. Offshore wind construction and operations are expected to impact the marine environment through increased ocean noise, collisions with turbines, entanglements, the introduction of electromagnetic fields, alterations to existing habitats and hydrodynamics, and the possible release of contaminants.³⁹ While the state of California is working closely with developers and the federal government to minimize the environmental impacts of these projects as much as possible, it stands to reason that the region, including Vandenberg SMR and the Point Buchon SMR/SMCA complex, will experience some level of adverse impact related to the development of heavily industrialized renewable energy projects.

In addition, Point Buchon SMR/SMCA is located just north of the Diablo Canyon Power Plant, which uses seawater for its once-through cooling process. The plant's intake pipes draw in more than 2.5 billion gallons of water per day. This large and continuous seawater withdrawal is estimated to kill roughly 1.5 billion fish in early life stages each year, as creatures are sucked into the cooling systems or become impinged against the screens on the open-water pipes.⁴⁰ The cooling water is also discharged back into the ocean water at a warmer temperature, which can cause additional harm to kelp, fish, and other marine life in the area.⁴¹ While Diablo Canyon's intake is not directly within the Point Buchon SMR/SMCA cluster, the area of source water being drawn into the plant likely overlaps with the MPA boundaries and has the potential to withdraw marine life out of the protected area.

As the increase of local stressors are likely to strain resources in the Vandenberg and Point Buchon MPAs, a new MPA at Point Sal could help to protect similar habitat not subject to these

⁴¹ *Ibid.*

local stressors, adding a helpful replicate MPA to serve as an insurance policy for the region's MPA network.

Climate resilient MPA networks

Changing ocean conditions, such as warming temperatures, acidification, and reduced oxygen, combined with increasing crowding, and pressure on our ecosystems, will compound local stressors mentioned above – putting California's spectacular marine biodiversity at elevated risk. MPAs are increasingly recognized as an important ocean-climate solution. Fully protected MPAs can allow for disturbed and degraded areas to recover, and also promote and retain complex, intact food webs and ecosystems that are better at resisting future stressors.⁴² A recent meta-analysis of more than 22,000 peer-reviewed studies spanning more than 200 MPAs around the world demonstrated that marine reserves can significantly enhance carbon sequestration, coastal protection, biodiversity, and the reproductive capacity of marine organisms as well as fishers' catch and income.⁴³

Further, when designed with climate resilience in mind, MPA networks can provide greater resilience than single MPAs on their own.⁴⁴ A new analysis focused on the California Bight has identified 21 actionable guidelines for the design of climate-smart MPA networks across large geographies and international boundaries.⁴⁵ The designation of a new MPA at Point Sal would meet or help to advance at least 11 of these climate-smart MPA design guidelines ([Appendix A](#)). Specifically, a new MPA at Point Sal would help to increase habitat representation and replication; protect critical and unique areas relevant to the life histories of important California species; incorporate and enhance connectivity across the broader MPA network; provide permanent protections better suited for the maintenance of ecosystem function and resilience at relevant timescales for climate resilience, and; enhance the MPA network's protections for healthy and relatively undisturbed habitats ([Appendix A](#)). In the face of increasing impacts related to climate change, it is critical that the state adaptively manage its MPA network with climate resilience in mind.

Relevance to MLPA Goals and DMR Recommendations

This proposed Point Sal [SMCAMR](#) contributes directly to MLPA Goals 1, 2, 3, and 6 ([California Marine Life Protection Act](#)). Protecting the rich biodiversity, relatively undisturbed habitats, and important larval retention zone found in the relatively undisturbed waters around Point Sal would

⁴⁵ Arafah-Dalmau et al., "Integrating Climate Adaptation and Transboundary Management."

help to protect the state's marine life and habitats, marine ecosystems, and marine natural heritage, as well as improve recreational, educational and study opportunities provided by marine ecosystems subject to minimal human disturbance.

In addition, this petition helps to advance DMR Recommendation 4.b.) "Identify and utilize best science-based approaches to inform potential changes to the MPA Network in order to enhance Network performance." New and groundbreaking peer-reviewed guidelines for the design of climate-smart MPA networks have recently been developed, and the proposed MPA at Point Sal aligns strongly with these guidelines.⁴⁶ We recommend the state consider these guidelines for the review and implementation of additional proposals to enhance and expand California's MPA network.

We must pass on a healthier ocean for future generations to experience, benefit from, and enjoy. California has the opportunity now to protect the conservation legacy of our iconic coastal state, including its rich and diverse marine wildlife. We urge the state to designate a new MPA at Point Sal to enhance the protection and climate resilience of our coastal and ocean resources, for the benefit of current and future generations of Californians.

State of California – Fish and Game Commission

PETITION TO THE CALIFORNIA FISH AND GAME COMMISSION FOR REGULATION CHANGE

FGC 1 (Rev 06/19) Page 1 of 4

Tracking Number: (2023-28MPA-AM1)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. **Person or organization requesting the change (Required)**
Name of primary contact person: Lisa Suatoni, National Resources Defense Council
Address: 111 Sutter St 21st floor, San Francisco, CA 94104
Telephone number: [REDACTED]
Email address: [REDACTED]
2. **Rulemaking Authority (Required)** - Authority cited: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code.
3. **Overview (Required)** - We propose the designation of a new State Marine ~~Reserve~~ Conservation Area (SMCA) in the waters around Point Sal, Central California to 1) protect ~~this~~ the rich and productive ecosystem and biodiversity found within, 2) protect an important larval retention zone and enhance the connectivity dynamics within the region, and 3) enhance the climate resilience of the broader state MPA network.

The proposed area aligns with state MPA design and feasibility guidelines provided by CDFW, and is bounded by the mean high tide line, the 3 nm state waters boundary, and straight lines connecting the following points in the order listed:

- 34.880667518 N lat. 120.726433061 W long. (SW corner)
- 34.929894739 N lat. 120.727488272 W long. (NW corner)
- 34.930008197 N lat. 120.666597401 W long. (NE corner)
- 34.880979714 N lat. 120.639473286 W long. (SE corner)

The proposed SMCA would prohibit the injury, damage, take, or possession of all living, geological, or cultural marine resources with the exception of recreational take of finfish from shore using hook and line. This permitted activity would allow for fishing access to the

shoreline and marine resources for recreational, traditional, ceremonial, cultural, and subsistence purposes for the public including, the Chumash people and other members of federally -and non-federally recognized tribes.

However, We recommend that the state consult with local Indigenous communities and Tribes to explore co-management options for the Point, Sal SMCA before designation, to determine whether a State Marine Conservation Area with exemptions for cultural and subsistence use of relevant Indigenous communities and Tribes in the area is warranted.

4. **Rationale (Required)** - Located in Santa Barbara County, Point Sal is an ecologically rich and relatively remote promontory along the coastline that supports a diverse marine ecosystem and provides critical habitat for seabirds and marine mammals alike. The nutrient-rich waters found at this site allow for a diversity of ocean life to thrive ~~here~~, with kelp beds, rich tidepools, and productive waters that support humpback whales, gray whales, a variety of sea lions and seals, sea otters, and a biologically important feeding area for endangered blue whales nearby. Offshore, Lion Rock is a significant roosting site for seabirds like the Brown pelican and Brandt's cormorant, ~~and also~~ acts as a relatively undisturbed haul-out for sea lions, seals, and other pinnipeds, underlining the area's conservation value for these animals as the California coastline becomes increasingly developed. In addition, the leeward waters of Point Sal act as a larval retention zone. Larval retention zones, which are known to be highly beneficial areas for the recruitment of fish and invertebrate larvae in wind-driven upwelling zones while promoting the biodiversity of the surrounding ecosystem. ~~Historically,~~ Point Sal also holds cultural significance for the Chumash people, with evidence of their occupation as recently as 250 years ago and as far back as 4,800 years ago; Chumash artifacts are visible throughout Point Sal, and analyses of burial sites from the area demonstrate the rich cultural ties to the traditional stewards of this land. Furthermore, Point Sal is still of importance to the Chumash people who visit and use the area today,

Formatted: Line spacing: Multiple 1.08 li

Protecting the waters of Point Sal aligns strongly with the goals set by the California Marine Life Protection Act (MLPA), especially with regards to the protection of natural biodiversity found in relatively undisturbed marine ecosystems. Given the remote nature of Point Sal, its relative lack of human disturbance, and ~~increasing potential for increased~~ threats to the California MPAs found nearby, there is value in an urgent need to protect the ecological merits and maximize the ecological and biological benefits that Point Sal provides to the marine species that inhabit the area and to the broader Central California region. As development of the state's coastline and seascape progresses, protecting ~~these relatively~~ undisturbed, untouched areas will add to the resilience of the MPA network by providing refugia for marine life from encroaching threats. Furthermore, designating an MPA in the proposed area will improve recreational, educational, and study opportunities at Point Sal and support equitable access to coastal resources moving forward into the future.

Formatted: Font: Not Bold, Font color: Auto

Commented [SI1]: alternatively could say undisturbed

See Petition Narrative for full rationale.

SECTION II: Optional Information

5. **Date of Petition:** 11/30/2023 AMENDED 3/14/2025

6. Category of Proposed Change

- ☐ Sport Fishing
- ☐ Commercial Fishing
- ☐ Hunting
- ☒ Other, please specify: MPAs, Section 632.

7. The proposal is to: *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

- ☒ Amend Title 14 Section(s): [Westlaw regulations](#).
- ☐ Add New Title 14 Section(s): [Click here to enter text](#).
- ☐ Repeal Title 14 Section(s): [Click here to enter text](#).

8. If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition

Or ☒ Not applicable.

9. Effective date: If applicable, identify the desired effective date of the regulation.
If the proposed change requires immediate implementation, explain the nature of the emergency:

10. Supporting documentation: Identify and attach to the petition any information supporting the proposal including data, reports and other documents:

- a. Proposed Point Sal SMR petition narrative
- b. Figure 1 - Proposed Point Sal SMR habitat map
- c. Appendix A - Climate-smart MPA design guidelines met by proposed Point Sal SMR
- d. Appendix B - Proposed Point Sal SMR letter of support

11. Economic or Fiscal Impacts: Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing:

Current fishing in the proposed area is limited, likely due to its considerable distance from the nearest port areas of Morro Bay and Santa Barbara. The proposed Point Sal MPA overlaps with 14% of California fishing block 631, and 11% of California fishing block 632. According to the Marine Fisheries Data Explorer, annual landings reported from these blocks over a 10-ten year period from 2012 to 2022 were an average of 231,460 lbs by weight and \$678,632 by value per year. This represents just 0.11% of the landings by weight, and 1.1% of landings by value, reported for the Central Coast region over the same 10--year period. For this reason, and due to the relatively small proposed size of the MPA, we believe the establishment of an SMR in this area would have minimal economic impact to commercial fisheries.

Our request to CDFW for recreational fishing data from this area was being processed at time of submission; we will evaluate the potential impact to recreational fishers and submit it to the state following receipt of the requested data.

RE: Amendments to Petition 2023-28MPA: Point Sal State Marine Reserve

Dear President Zavaleta and Honorable Commissioners:

In November 2023, Natural Resources Defense Council (NRDC) submitted petition 2023-28MPA to the Fish and Game Commission (FGC) proposing a new marine protected area (MPA) off the coast of Point Sal, to be named Point Sal State Marine Reserve (SMR).

With the ecological significance of the area in mind, we proposed regulations for the Point Sal SMR that are aligned with current State Marine Reserves: *“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource.”* Given the historic and contemporary importance of the region to the Chumash people, we also recommended that the state consult with local Indigenous communities and Tribes before designation to determine whether a State Marine Conservation Area with exemptions for cultural and subsistence use of relevant Indigenous communities and Tribes in the area is warranted.

Since January 2024, we have conducted extensive outreach with community members and interested parties to discuss the proposal and gather additional insights and information. These conversations have improved our understanding of the Point Sal region and provided a greater appreciation of the historical and contemporary significance of the area for Chumash peoples. Our discussions with local communities, Tribal members, and Tribal organizations in particular, informed our decision to amend the original petition submitted to the FGC.

Our decision to amend Petition 2023-28MPA to allow recreational take of finfish by hook-and-line from shore is in recognition of: 1) the importance of this area for federally and non-federally recognized Chumash peoples, and 2) the importance of the area for shore-based subsistence and sport fishers. We support having the option to rename the Point Sal State Marine Conservation Area with a Chumash place name after further consultation with Chumash Tribes in the region. While we explored options for renaming the proposed SMCA, we were unable to affirmatively determine an appropriate Chumash name in time for the amendment deadline.

We hope this amendment, informed by the additional insight and information gathered through our outreach efforts with local communities and interested parties, encourages the Commission to support the proposed Point Sal SMCA.

Thank you for your consideration.

Sincerely,

Sandy Aylesworth
Director, Pacific Initiative, Nature
Natural Resources Defense Council

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: Lisa Suatoni

Address: Natural Resources Defense Council, [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

Co-sponsors: Sam Cohen - Santa Ynez Band of Chumash Indians, Azsha Hudson - Environmental Defense Center

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested:

Authority cited: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code.

3. Overview (Required):

The attached document describes a proposal for an additional California-Chumash co-management SMCA in the South Coast region to be named Mishopshno, after following the ancestral Chumash village located in the area to honor the cultural heritage of the Chumash people and their continued relationship to their ancestral lands and waters. The Mishopshno proposed SMCAMPA would prohibit the injury, damage, take, or possession of all living, geological, or cultural marine resources with the exception of Tribal take using hand based equipment by the Santa Ynez Band of Chumash Indians, and following exceptions: recreational take of finfish fishing from shore using hook and line. These permitted activities would; and allow for enhanced access to the shoreline and marine resources for traditional, ceremonial, cultural, and subsistence purposes for the public including: federally recognized tribe of the the Santa Ynez Band of Chumash Indians (SYBCI) ; and for who will work to extend access to other non-federally recognized Chumash people.

The proposed area aligns with state MPA Master Plan design and feasibility guidelines provided by CDFW, and is bounded by the mean high tide line, the tip of Salt Point the 3-nm state waters boundary,

and straight lines connecting the following points in the order listed:

1. [SE: 119.53589W long. 34.366106N lat.](#)
2. [NE: 119.53589W long. 34.395977N lat.](#)
3. [NW: 119.587711W long. 34.416944N lat.](#)
4. [SW: 119.587711W long. 34.366106N lat.](#)

4. Rationale (Required) - Describe the problem and the reason for the proposed change:

The intent of the SMCA is to 1) help meet the Master Plan's size and spacing guidelines for spacing between protected habitats, promoting connectivity in the network and representation of habitat types, 2) protect habitat attractive to marine wildlife, such as juvenile white sharks, and 3) [honor the nearby historical Mishopshno village and cultural heritage of the Chumash in the area and restore management to the SYBCI of this portion of coastal waters. This petition calls for a co-management agreement between the State of California and the SYBCI through continued access to the shoreline and marine resources for traditional, ceremonial, cultural, and subsistence purposes for all Chumash people. allow enhanced access to the shoreline and marine resources for traditional, ceremonial, cultural, and subsistence purposes for the federally recognized tribe of the Santa Ynez Band of Chumash Indians, who will work to extend access to other non-federally recognized Chumash people. See attached documentation for further details.](#)

SECTION II: Optional Information

5. Date of Petition: 11/30/2023 AMENDED 3/26/2025

6. Category of Proposed Change

- ☐ Sport Fishing
- ☐ Commercial Fishing
- ☐ Hunting
- ☒ Other, please specify: MPAs, Section 632

7. The proposal is to: *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

- ☒ Amend Title 14 Section(s): [Westlaw Regulations](#)
- ☐ Add New Title 14 Section(s): Click here to enter text.
- ☐ Repeal Title 14 Section(s): Click here to enter text.

8. If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition

- ☒ Not applicable.

9. Effective date: If applicable, identify the desired effective date of the regulation. If the proposed change requires immediate implementation, explain the nature of the emergency: At the discretion of the Commission.

10. Supporting documentation: Identify and attach to the petition any information supporting the proposal including data, reports and other documents: See attached.

- a. Proposed Mishopshno SMCA petition narrative [\(updated as of 3/26/2025\)](#)

- b. Appendix A – Expanded synthesis of juvenile white shark aggregation at proposed Mishopshno SMCA
- c. Appendix B – Proposed Mishopshno SMCA letter of support

11. Economic or Fiscal Impacts: Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing:

Some commercial fishing and fishing by commercial passenger fishing vessels (CPFVs) occurs in this area. The proposed Mishopshno SMCA is located in California fishing block number 652, which provides a very small proportion of landings for the Santa Barbara Port Area by weight and value (see petition narrative for more detailed data). The proposed SMCA would close 18% of this fishing block to fishing. Furthermore, the regulations and boundaries for the SMCA have been amended following extensive outreach and discussions with local Tribes and fishers, in order to limit direct, near-term impacts to extractive activities to the greatest extent possible while still adhering to the MLPA's science-based size criteria and guidance around high levels of protection (see petition narrative for more detail). Considering the relatively low proportion of landings and value coming from this fishing block, the small size of the proposed SMCA within the fishing block, and the amended boundaries that allow continued access to a locally important fishing areas, we anticipate that establishing this SMCA would have limited impact on commercial fishing vessels and CPFVs in the area.

Further, previous designations of local MPAs have resulted in benefits for the commercial CA spiny lobster fishery.

Unknown. However, ~~this region is a popular fishing spot for spiny lobster in particular and preventing take in the region may not be welcomed by recreational fishers in the area. Yet, research has shown an increase in lobster populations within local MPAs and a resulting increase in lobster catch in neighboring zones.~~ Recent work found that a 35% reduction in fishing area was compensated for by a 225% increase in total catch after 6 years, demonstrating local scale trade-offs provided benefits to fisheries. The designation of this MPA is likely to have a similarly positive impact on this fishery in the medium- to long-term.

Finally, enhanced ocean protections can also benefit our economy, as millions of visitors travel to California's iconic coastline each year to recreate and enjoy a healthy ocean, supporting our state's blue economy. This area holds special importance for visitors and residents alike engaging in ocean and coastal recreation, as well as for local Chumash people engaging in cultural and subsistence practices and for recreational fishers. The proposed SMCA would support these activities, allowing public access and all non-consumptive activities, allowing fishing from shore using hook-and-line, and granting a Tribal take exemption for the federally recognized Santa Ynez Band of Chumash Indians to fish with the use of traditional hand-based equipment. While there are concerns among recreational and commercial fishers about the fiscal impacts of the proposed SMCA, many businesses assert that the creation of the Mishopshno SMCA would bolster their business through indirect tourism and recreation impacts. By making the ocean healthier and more resilient to climate change, marine protections help safeguard everyone's ability to enjoy these areas through a variety of recreational activities, far into the future.

RE: Amendments to Petition 2023-29MPA: Mishopshno State Marine Conservation Area

Dear President Zavaleta and Honorable Commissioners:

In 2023, the Santa Ynez Band of Chumash Indians (SYBCI), Environmental Defense Center (EDC), and Natural Resources Defense Council (NRDC) submitted petition 2023-29MPA to the Fish and Game Commission (FGC) proposing a California-Chumash co-managed marine protected area (MPA) off the coast of Carpinteria, to be named Mishopshno State Marine Conservation Area (SMCA) after the ancestral Chumash village located in the area.

Given the significance of the area to the Chumash people and the important scientific research and monitoring being conducted within the proposed boundary, the original petition proposed the following suggested regulations:

Take of all living, geological, or cultural marine resources is prohibited except:

- 1. The following federally recognized tribe is exempt from the area and take regulations found in subsection 632(b)(9) of these regulations and shall comply with all other existing regulations and statutes: The federally recognized tribe of the Santa Ynez Band of Chumash Indians. Within the proposed SMCA, the Chumash would be allowed to fish with the use of hand-based equipment. The proposed exemptions would be consistent with allowing tribal take exemptions as currently defined in Title 14, §632(a)(11), which identify how a member of a federally recognized tribe may be authorized to take living marine resources from an MPA with site-specific take restrictions. Members taking living marine resources under this provision are subject to current seasonal, bag, possession, gear and size limits in existing Fish and Game Code statutes and regulations of the Commission, except otherwise provided for in Title 14, §632(b).*
- 2. Scientific research pursuant to the MLPA regulations for SMCAs. (14 C.F.R. section 632(a)(1)(C).*

Since January 2024, our Tribal Nation and our two organizations have conducted over 100 in-person, video and phone meetings with community members and interested parties to discuss the Mishopshno SMCA proposal. These conversations have improved our understanding of the Carpinteria area, highlighted community support for protecting the coastal waters, and shaped our supplemental site-specific research. Our discussions with local Tribes, Tribal organizations, and fishers in particular have informed our decision to amend the original petition submitted to the FGC.

We developed the amendments to Petition 2023-29MPA to ensure non-federally recognized Tribes retain shore fishing access, and to limit direct, near-term impacts to extractive activities to the greatest extent possible, while still adhering to the Master Plan science-based design criteria and guidance around high levels of protection. Our amended proposed regulations are:

- Allow for the recreational take of finfish from shore using hook-and-line, promoting access to certain important marine and cultural resources for all Chumash people – including non-federally recognized Tribes;
- Allow for recreational take of finfish from shore using hook-and-line for the public;
- Reduce the SMCA in size to 9 square miles, with boundaries that leave Armpit Reef, the easternmost edge of Carpinteria Reef, and the eastern portion of the kelp forest associated with Carpinteria Reef outside of the MPA's boundaries, to allow for continued recreational and commercial fishing access to certain important local fishing grounds.

These amendments are supplemental to the amendment submitted on February 9, 2024, which excluded the Carpinteria Salt Marsh Reserve from the proposed Mishopshno SMCA boundaries given its existing protection and management under the UC Natural Reserve System.

We hope these amendments, which are informed by the additional insight and information gathered through our outreach efforts with local communities and interested parties, encourage the Commission to approve the Mishopshno SMCA.

Thank you for your consideration.

Sincerely,

Sam Cohen

Overview

The intent of this marine protected area (MPA) is to 1) help meet the Master Plan design guidelines for spacing between protected habitats, promoting connectivity in the network and representation of habitat types, 2) protect habitat important to marine wildlife, such as juvenile white sharks (JWS), and 3) restore management to the Santa Ynez Band of Chumash Indians (SYBCI) of this portion of coastal waters. This petition calls for a co-management agreement between the State of California and the SYBCI and continued access to the shoreline and marine resources for traditional, ceremonial, cultural, and subsistence purposes for all Chumash people.

We propose a new SMCA named Mishopshno for a prominent Chumash coastal village that was proximate to the marine area to be protected. Mishopshno village was an important coastal site in the ancestral lands of the diverse Chumash people because of its use for boatbuilding and its close proximity to the ocean. It was described by members of the Portolá expedition who encountered the town on August 17, 1769 as “...at the very edge of the sea a large village or very regular town here at this point, appearing at a distance as though it were a shipyard, because at the moment they were building a canoe that still had its topmost plank lacking from it (dubbed by soldiers La Carpinteria, the Carpenter Shop).”¹ The canoes described here were tomol, Chumash watercraft built using sophisticated techniques for production of wooden planks and waterproofing with specialized local clay.² Chumash tomol paddlers still use the area to practice for their annual crossing to Limuw, also known as Santa Cruz Island.

Designation of a new Tribal MPA supports California and Biden era federal initiatives to enhance tribal co-management.³ The Mishopshno SMCA would provide an additional Tribal co-management MPA for the South Coast and is an example of two of the four coastal 30x30 “key strategies.” 1) adaptive management of the MPAs network, and 2) advancing Tribally led conservation.⁴ Further, it would help advance Recommendation 2 of the CDFW DMR Report, “Create a Pathway to Tribal Co-Management.”⁵ *This petition is co-sponsored by the federally recognized Santa Ynez Band of Chumash Indians, the Natural Resources Defense Council, and Environmental Defense Center.*

⁵ CDFW, *California’s Marine Protected Area Network Decadal Management Review*, 2022

1. Habitat, Spacing, & Connectivity

The MPA Network was designed to function as an ecological network to ensure the protection of California's diverse coastal ecosystems.⁶ During the design and planning phase, a science advisory team (SAT) identified the key metrics needed to achieve network connectivity, including MPA size, spacing, and key habitat representation and replication.⁷ Currently, mainland coastal MPAs in the Santa Barbara region, Campus Point and Point Dume, are approximately 74 miles apart, 12 miles further than the recommended maximum MPA spacing distance of 62 miles to ensure ecological connectivity (Figure 1).⁸ This proposal aims to address that gap by adding a protected area around what is now called Carpinteria, CA (the ancestral home of the SYBCI).

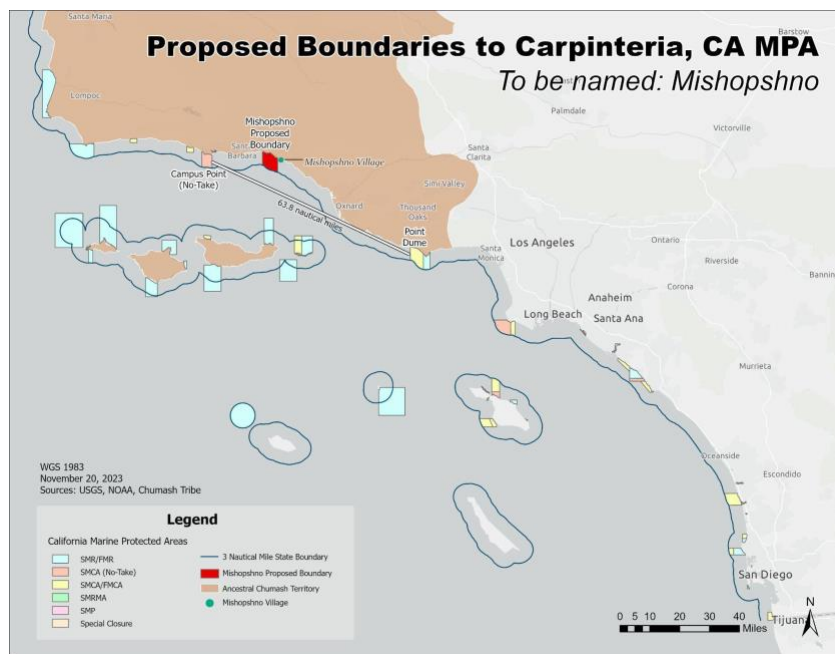

Figure 1: Map of southern California MPAs with the proposed SMCA near Carpinteria shown in red. The 64 nm distance between two existing MPAs at Campus Point and Point Dume is indicated. This distance is greater than the maximum suggested spacing to ensure ecological connectivity. Mishopshno was one of the many Chumash villages in the region at the time of European colonization.

Carpinteria, initially proposed to be the site for an MPA in the original planning stages for the network, lies on the mainland coast north of the Channel Islands.⁹ Within a relatively small area, a diversity of habitat types exist

including rocky reef, rocky intertidal, sandy habitats, sandy beaches, kelp forests, and surfgrass beds. Associated with these habitat features are higher trophic level species including halibut, lobster, nearshore sharks and rays, and multiple harbor seal haulouts. Research shows that MPAs with a diversity of habitat types and depths facilitate increased connectivity among habitats.¹⁰

The proposed SMCA would protect the marine waters adjacent to Carpinteria Salt Marsh Reserve, which protects a critically important Southern California estuary. The marsh lies adjacent to a sandy beach, subtidal rocky reef, and kelp beds, enabling the exchange of nutrients. The marsh also provides a regional nursery for halibut and other marine and estuarine fish, which supports a productive nearshore marine ecosystem.¹¹ Carpinteria Reef, part of which would be within the SMCA's boundaries, is a large rocky reef with kelp beds. The reef supports one of the more abundant marine life communities and persistent kelp beds in Santa Barbara County.¹² The proposed SMCA encompasses 90% of local biodiversity and counts as a "replicate," as determined from biological surveys, for the following habitat types: kelp forest (2.2 mile length), beaches (3.6 mile length), and nearshore (0-30m) soft bottom substrate (3.2 mile length).¹³ The proposed SMCA also contains the following habitat types: hardened shores (1.7 mile length), tidal flats (0.1 mile length), nearshore hard-bottomed substrate (0.34 square mile area and 0.2 mile length at 0-30m depth), deeper hard-bottomed substrate (0.02 square mile area at 30-100m depth), and deeper soft-bottom substrate (2.94 square mile area at 30-100m depth).¹⁴ Furthermore, the South Coast MLPA Planning region protects a lower proportion of nearshore hard-bottomed habitat than other regions.¹⁵ Incorporation of the Mishopshno SMCA would increase the representation of these habitat types for the region.

Ecological connectivity modeling has advanced since the initial network design process. Recent studies have confirmed that the system is generally functioning as an effective network, and that MPAs are well-connected both demographically and environmentally.¹⁶ In addition, modeling results suggest that the positive effect of MPAs on the size and abundance of species within their boundaries also enhances their contribution to larval connectivity outside their boundaries.¹⁷ The proposed Mishopshno SMCA may further this beneficial contribution, by providing an additional MPA in the network with increased larval and reproductive output.

In the coming decades, ocean temperature thresholds will be exceeded more often because of the combination of marine heatwaves and long-term warming.¹⁸ The inclusion of a diversity of upwelling regimes and habitat types in California's MPA network, such as those in the mainland and Channel Island MPAs, is thought to offer additional insurance against changing conditions.¹⁹ As a general matter, ensuring proper spacing, placement, and consequently connectivity of southern mainland MPAs is increasingly important in light of climate change.²⁰

2. Habitat attractive to White Sharks (see Appendix A for further detail)

The habitat distribution for the northeast Pacific population of white sharks is broad, spanning from Baja California to a point northwest in the Bering Sea off the Aleutian Islands.²¹ However, research suggests that juveniles of this population are utilizing a narrower band of coastal waters for nursery habitat, stretching from the Southern California Bight to Baja.²² Spatial data of white shark movements show that in areas off Carpinteria, JWS form aggregations for periods of weeks to months.²³ These spatial patterns suggest that this habitat attracts JWS, and that the area serves as an important white shark nursery.

White sharks are listed under Appendix II of the Convention on International Trade of Endangered Species of Wild Fauna and Flora (CITES).²⁴ The species is slow to reach reproductive maturity and produces only a small number of young each year, making it vulnerable to human stressors.²⁵ Research conducted in the Southern California Bight has found that fisheries bycatch is likely the main source of mortality for JWS.²⁶ Another factor threatening white sharks is a warming climate and ocean that has led to many species' historic distribution changing.

Juvenile white sharks inhabit a narrow habitat range, choosing shallow habitats (< 1000 m deep) close to land (< 30 km of the shoreline) in waters ranging from 14 to 24°C.²⁷ They can form aggregations at these ideal locations and display a high degree of residency.²⁸ Historically, Southern California was a suitable habitat eight months of the year, while coastal habitats in Baja California were suitable year-round.²⁹ Recent research shows that the average observed white shark density in Carpinteria increased significantly across three years beginning in 2019.³⁰ Utilizing detection data, a study found a JWS hot spot at Padaro Beach in Carpinteria in the months from May to December in 2020.³¹ In this study, the tagged individuals were observed across a stretch of coastline from Loon Point south to Carpinteria State Beach.³² Padaro Beach was classified as an ideal JWS aggregation spot due to its sandy beach with a rocky reef adjacent to an estuary inlet and low wave energy compared to many of the other nursery habitats available.³³ Although it was previously believed that JWS do not show site fidelity, there is growing evidence that the Southern California Bight is a region of primary nursery habitat,

with specific “hotspots” like Carpinteria attracting fairly stable aggregations, and that the suitability of the habitat has been increasing relative to areas further south as a result of climate change.

3. The Importance of Tribally led Marine Stewardship and Tribal Co-Management

The Marine Life Protection Act (MLPA) did not direct how state agencies were to engage or consult with Tribes during the establishment process of California’s MPA network, and does not acknowledge coastal Indigenous peoples’ long-standing relationships to, dependence on, and stewardship of marine resources.³⁴ During the MLPA implementation process, there were opportunities for Tribes to engage in stakeholder groups through the Blue Ribbon Task Force and regional stakeholder process. However, Tribes are sovereign nations and require government-to-government consultation. These factors resulted in California Tribes’ initial opposition to the creation of the MPA network – many Tribes were fearful the MLPA could restrict Indigenous cultures and ways of life.

By the time the MLPA planning process came to the fourth and final coastal region, the North Coast, Tribes in the North were raising concerns about the lack of an official consultation with Tribal Nations on MPA designations in their ancestral waters. This resulted in state agencies implementing a consultation process that included Tribes as sovereigns and creating the exemption of “Tribal take,” to ensure that Tribes would retain access to their cultural and subsistence resources.³⁵ In the years following the MPA network’s implementation, Tribes, state agencies, and policymakers have made extensive progress to encourage and facilitate Tribal marine co-management and access in MPAs.³⁶

Now, as California is conducting its first-ever adaptive management process, there is an opportunity to more thoroughly include the groups that were underrepresented during the initial implementation of the network, both Tribal and non-Tribal entities. This petition and Petition 2023-19MPA for the Chitqawi SMCA are the first Tribally proposed state MPAs in California. Designating this MPA would strengthen the role and authority of California Tribes in the state’s ocean and marine life protection efforts. With co-management, the Mishopshno MPA would also contribute to the integration of Tribes in California’s marine monitoring and management initiatives. Furthermore, this proposal aligns with the state’s goal of supporting Tribally led conservation.³⁷

Socioeconomic Considerations

This area holds special importance for residents and visitors engaging in ocean and coastal recreation, for local Chumash people engaging in cultural and subsistence practices, and for commercial and recreational fishers.

³⁷ “30x30: Conserving 30% of California’s Coastal Waters by 2030 - California Ocean Protection Council.” California Ocean Protection Council, 7 Jan. 2025, opc.ca.gov/30x30/.

Carpinteria is a popular area for surfers, swimmers, kayakers, birdwatchers, beach walkers, freedivers, shore fishers, and more. For instance, there are multiple surf schools in the area, and vessels cluster along the shore during the summer to observe JWS.³⁸ By making the ocean healthier and more resilient to climate change, strong marine protections help safeguard everyone's ability to enjoy these areas through a variety of recreational activities, far into the future. Enhanced ocean protections can also benefit our economy, as millions of visitors travel to California's iconic coastline each year to recreate and enjoy a healthy ocean, supporting our state's blue economy. In 2023, ocean tourism brought just over \$2 billion in travel-related spending to Santa Barbara County and supported more than 20,000 jobs.³⁹

One of the primary goals of this SMCA is to honor the Chumash people's cultural heritage and continued relationship with their ancestral lands and waters. Many culturally significant species for the Chumash are found in Carpinteria and the area proposed for protection, including but not limited to: sheep and kelp crab, Giant keyhole limpet, California mussel, Pacific sand dollar, several octopus species, wavy turban snail, California cone snail, harbor seal, leopard shark, brown pelican, Heerman's gull, Brandt's cormorant, double-crested cormorant, and more.⁴⁰ As mentioned previously, Chumash tomol paddlers use the beaches and waters of the Carpinteria area to practice for their annual crossing to Limuw, also known as Santa Cruz Island. Local Chumash people also fish from shore for cultural, recreational, and subsistence purposes, typically using hook-and-line gear.

This is a popular area for recreational fishing as well. The sandy shores of Santa Claus and Padaro Beaches are known as particularly desirable surf fishing locations. Carpinteria Reef and its associated kelp forest provide critical habitat for many marine species, including several targeted by recreational fishers.⁴¹ The nearby sandy beaches provide a safe entry point for people entering the water in California's often challenging coastal ocean conditions (e.g. large surf or swell), making this area a popular spearfishing and freediving location. Spearfishing can have a substantial negative effect on populations of marine fishes with small home ranges due to the targeted selection of larger individuals, which have the highest reproductive output. Some popular spearfishing and freediving targets, such as California sheephead, many species of rockfish, kelp bass (also known as calico bass), and California spiny lobster, have small home ranges and have been shown to benefit from the protections of California MPAs.⁴²

Commercial fishing and fishing by commercial passenger fishing vessels (CPFVs) also occurs in this area. The proposed Mishopshno SMCA makes up 18% of California fishing block number 652. According to publicly available data accessed via the Marine Fisheries Data Explorer (MFDE), commercial fishing in this block represents an extremely small proportion of landings for the Santa Barbara Port Area, both by weight and value. In 2023, landings from fishing block 652 represented 0.22% of total landings by weight, and 1.1% of total landings by value, reported

³⁸ Personal communications to local businesses and residents, February – March 2025.

<https://industry.visitcalifornia.com/research/economic-impact>.

⁴⁰ Wishtoyo Foundation 2004; Santa Barbara Coastal LTER Data Catalog, <https://sbclter.msi.ucsb.edu/data/catalog/>, accessed September 2023.

⁴¹ While our request to CDFW for recreational lobster fishing data from this area was being processed at time of submission, several conversations with local fishers confirm that Carpinteria Reef is a popular area for recreational lobster fishing by hand.

⁴² California MPA Long Term Monitoring Program Final Reports: 1) Carr et al. 2021, Monitoring and Evaluation of Kelp Forest Ecosystems in the MLPA Marine Protected Area Network, https://caseagrant.ucsd.edu/system/files/2022-06/Kelp%20Forest%20Technical%20Report%20Narrative_v2.pdf 2) Hamilton et al. California Collaborative Fisheries Research Program (CCFRP) – Monitoring and Evaluation of California Marine Protected Areas. https://caseagrant.ucsd.edu/sites/default/files/CCFRP_Final_Report.pdf.

for the Santa Barbara Port Area from Southern California waters.⁴³ Over the previous ten-year period from 2013-2023, fisheries landings from fishing block 652 represented 0.16% of total landings by weight, and 0.63% of total landings by value, reported for the Santa Barbara Port Area from Southern California waters.

The MDFE data shows fishing block 652 represents a very small percentage of landings for halibut and California spiny lobster as well, which are both important commercial fisheries in the area. In 2023, halibut landings from block 652 represented 0.5% of total halibut landings by weight, and 0.6% of total halibut landings by value for the Santa Barbara Port Area.⁴⁴ Over the previous ten-year period from 2013-2023, halibut landings from this block represented 4.3% of total halibut landings by weight, and 3.9% of total halibut landings by value for the Santa Barbara Port Area. In 2023, California spiny lobster landings from block 652 represented 2.2% of total lobster landings by weight, and 2.2% of total lobster landings by value for the Santa Barbara Port Area. Over the previous ten-year period from 2013-2023, California spiny lobster landings from this block represented 2% of total lobster landings by weight, and 1.9% of total lobster landings by value for the Santa Barbara Port Area from Southern California waters.

Considering the above data and the size of the proposed Mishopshno SMCA, which makes up 18% of fishing block 652, we anticipate that closing this area to commercial fishing would have limited impact on overall commercial fisheries landings for the Santa Barbara Port Area. Overall, regional and statewide fishery landings and values were not negatively impacted by California's MPAs.⁴⁵ The commercial California spiny lobster fishery in the Santa Barbara region has seen significant benefits from MPAs – commercial landings more than doubled in the six years after local MPAs were established, with fishermen able to “fish the line” to intercept mature lobster leaving the MPAs.⁴⁶ A 35% reduction in fishing area resulted in a 225% increase in total catch, “indicating at a local scale that the trade-off of fishing ground for no-fishing zones benefitted the fishery.”⁴⁷

However, we are sensitive to the fact that the proposed MPA would limit some fishing access in the Carpinteria area and understand that these data above do not necessarily mean an MPA designation would not have an impact on individual fishers and businesses. In 2023, the latest year with data available, a total of 15 fishers, 19 businesses, and 16 vessels reported landings from fishing block 652. With this in mind, discussions with local fishers and fishing representatives have helped to further characterize the nature and spatial distribution of fishing in the area proposed for protection. We have amended the proposed SMCA's size and boundaries to exclude some of the preferred fishing areas and reduced the proposal as much as the Master Plan's scientifically informed size guidelines allow (see “Boundary Description” below).⁴⁸

⁴³ Southern California waters defined as all fishing blocks from Point Conception to the US-Mexico border (blocks 652-2035):

⁴⁷ Lenihan et al. 2021

⁴⁸ CDFW Master Plan for Marine Protected Areas 2016, Appendix A, page A-35.

Private conversations and publicly available data from MFDE show that commercial and recreational vessels in the Santa Barbara port area primarily visit the Channel Islands for fishing trips and target the nearshore area around Carpinteria when weather conditions make travel to the islands unsafe or undesirable. According to several fishers with knowledge of the area, fishing near Carpinteria Reef is often considered dangerous for vessels due to its shallow depth. Navigational charts and observations of breaking waves on the reef structure during certain conditions substantiate these accounts. Several commercial and recreational fishers noted that Armpit Reef, a hard-bottom structure located offshore of Carpinteria Reef, is a desirable and productive fishing location in the area that is fished when the islands are otherwise inaccessible. To preserve this option, we changed the southern boundary of the proposed Mishopshno SMCA so that Armpit Reef lies outside of the MPA boundaries, thereby maintaining locally accessible and frequented fishing locations for individual commercial and recreational vessels fishing in the area.

As stated in the original Mishopshno SMCA proposal, this MPA would allow for public access, all non-consumptive activities, and a Tribal take exemption for the SYBCI to fish with the use of hand-based equipment. After subsequent discussions with local stakeholders and Tribal members related to the consumptive activities noted above, we are proposing the below amendments to the original petition. These amendments will help limit direct, near-term impacts to extractive activities to the greatest extent possible, while still adhering to the Master Plan science-based size criteria and guidance around high levels of protection:

- Allow for the recreational take of finfish from shore using hook-and-line, promoting access to certain important marine and cultural resources for all Chumash people – including non-federally recognized Tribes
- Allow for recreational take of finfish from shore using hook-and-line for the public.
- Establish boundaries for the SMCA that leave Armpit Reef, the easternmost edge of Carpinteria Reef, and the associated kelp forest outside of the MPA's boundaries to allow for continued recreational and commercial fishing access to certain important local fishing grounds.

See “Boundary Description” and “Proposed Regulations” for more detail.

Conclusion

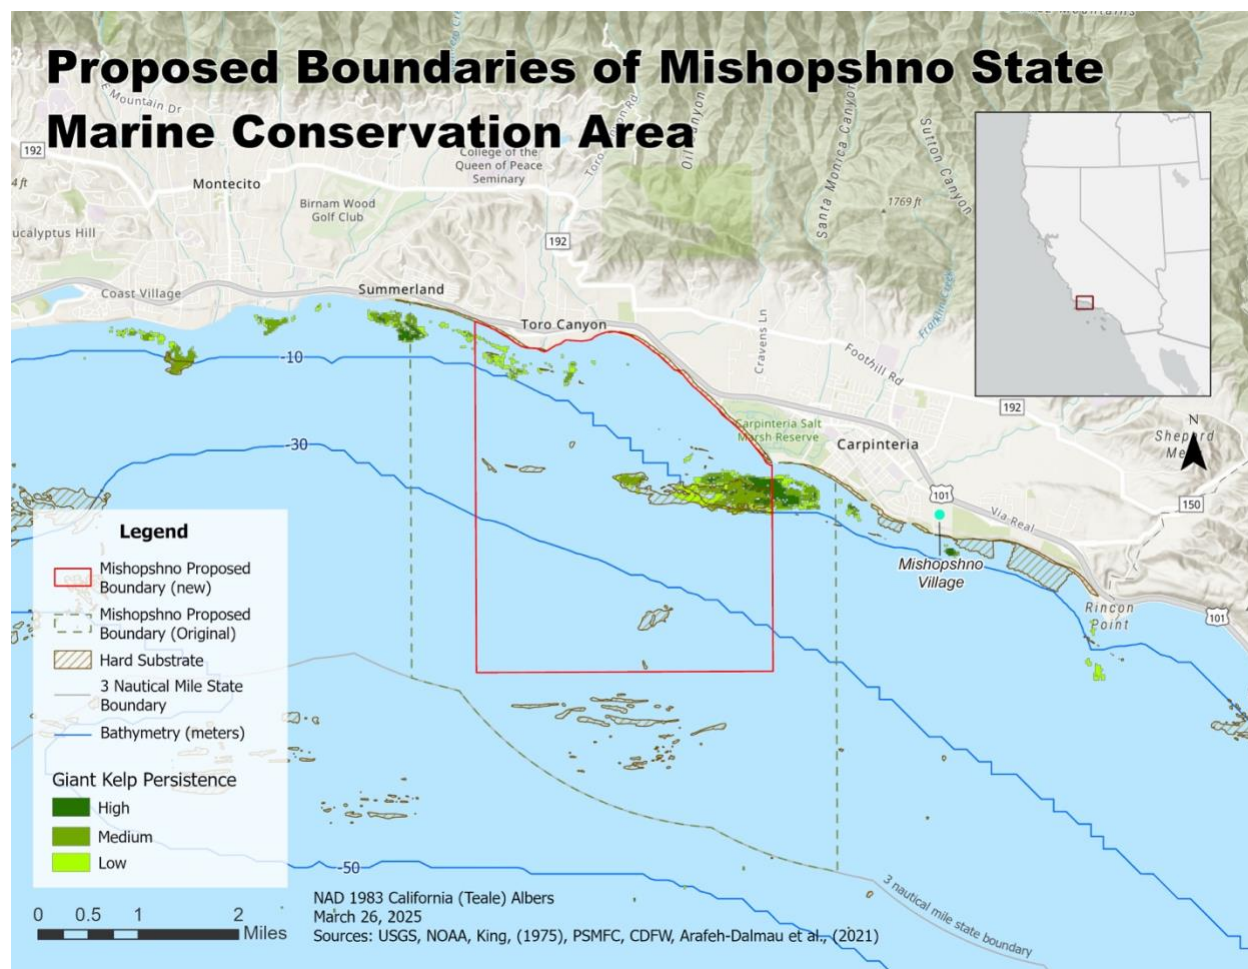

The proposed MPA would address a physical gap in the MPA network and increase the proportion of rocky reef habitat in the southern portion of the MPA network. Research focused on JWS has shown the waters off Carpinteria are a frequent hotspot for juvenile white sharks, offering specific habitat features that support this critical life stage. The proposed MPA would allow some forms of recreational fishing within its boundaries, and its boundaries are designed to allow fishing access to a popular offshore rocky reef area while still meeting the MLPA Science Advisory Team criteria and having a high level of protection. Finally, designation of the proposed MPA would add a new Tribal MPA in the region, strengthening the role of the Tribes in co-management, monitoring, and marine education activities.

Boundary Description

The proposed boundaries of the SMCA were informed by extensive outreach and discussions with local Tribes and fishers. The proposed boundaries meet a difficult-to-achieve compromise between upholding science-based size and area criteria,⁴⁹ protecting critical habitat and

⁴⁹ CDFW Master Plan for Marine Protected Areas 2016, Appendix A, page A-35.

promoting connectivity for the broader network, while allowing continued fishing access to important local fishing areas.

The western boundary is located at 119.54W, extending from the shore at Summerland to 34.37N. The eastern boundary is located at 119.58W, extending from the coast at Franklin Creek (also known as Santa Monica Creek) to 34.37N.

Area: 9.05 square miles

Shore adjacent distance: 3.63 miles

MPA coordinates:

1. SE: 119.53589W long. 34.366106N lat.
2. NE: 119.53589W long. 34.395977N lat.
3. NW: 119.587711W long. 34.416944N lat.
4. SW: 119.587711W long. 34.366106N lat.

The eastern boundary, located at the eastern shore of Santa Monica Creek at Salt Point, would ensure the protection of important habitat and food sources for JWS at the mouth of the Carpinteria Salt Marsh. This eastern boundary would allow for continued fishing access to the eastern edge of Carpinteria Reef and the eastern portion of its associated kelp forest. This eastern portion of the reef is a known popular fishing area for recreational fishers, especially

those who access the reef and kelp bed from the downshore sandy beach using public parking areas nearby. This placement would also provide a known, easily recognizable landmark and shoreline feature as the starting point for the eastern boundary of this MPA, allowing for a common, easily referenced understanding of this boundary per CDFW guidelines.⁵⁰

The southern boundary would ensure protection of the ecologically important nearshore rocky reef and kelp habitat of Carpinteria Reef while allowing access to the popular fishing area offshore called Armpit Reef.

The western boundary, located just west of Loon Point, would ensure the protection of important sandy-bottom habitat for JWS off Padaro Beach and additional hard-bottom substrate and kelp forest cover around Loon Point. In addition to conserving these important habitats, the revised western boundary at this location would ensure the SMCA meets the Master Plan minimum size and spacing guidelines while allowing continued fishing opportunities in the areas west of Loon Point.

As described above, the proposed SMCA boundaries adhere to the Master Plan design guidelines. The designation of an SMCA that is smaller than these minimum size guidelines would hinder the area's ability to meet the design objectives and MLPA goals for which they were developed: protect adult populations; protect the diversity of species that live at different depths; and accommodate the movements of individuals across depth zones (MLPA goals 2 & 6).⁵¹ It is therefore imperative that the SMCA be no smaller than these recommended minimum size guidelines.

Proposed Regulations

This petition proposes the following regulations for an SMCA for the region outlined above:

Take of all living, geological, or cultural marine resources is prohibited except:

1. *The following federally recognized tribe is exempt from the area and take regulations found in subsection 632(b)(9) of these regulations and shall comply with all other existing regulations and statutes:
The federally recognized tribe of the Santa Ynez Band of Chumash Indians.
Within the proposed SMCA, the Chumash would be allowed to fish with the use of hand-based equipment. The proposed exemptions would be consistent with allowing Tribal take exemptions as currently defined in Title 14, §632(a)(11), which identify how a member of a federally recognized Tribe may be authorized to take living marine resources from an MPA with site-specific take restrictions. Members taking living marine resources under this provision are subject to current seasonal, bag, possession, gear and size limits in existing Fish and Game Code statutes and regulations of the Commission, except otherwise provided for in Title 14, §632(b).*
2. *Scientific research pursuant to the MLPA regulations for SMCAs (14 C.F.R. section 632(a)(1)(C) is allowed.*
3. *Recreational take of finfish by hook-and-line from shore is allowed.*

⁵⁰ CDFW Master Plan for Marine Protected Areas 2016; Saarman et al. 2013

⁵¹ CDFW Master Plan for Marine Protected Areas 2016, Appendix A.

These regulations would allow access to the area for scientific research and allow some recreational take using a low-impact gear type.⁵² The regulations would allow use of shoreline and marine resources for traditional, ceremonial, cultural, and subsistence purposes for the SYBCI and for non-federally recognized Chumash people. The state should consult with the SYBCI to formalize a co-management agreement for the SMCA. The SYBCI will work to include non-federally recognized Tribal members in the management of the area. With the regulations detailed above, the Mishopshno SMCA would qualify as a “highly protected” MPA according to science-based criteria set forth by The MPA Guide.⁵³ Research shows that fully and highly protected MPAs are more likely to benefit populations of targeted species, protect high levels of biodiversity, and promote ecosystem resilience.⁵⁴

⁵² Single lines (hooks, pole and line, rod, troll) and low-impact traditional extraction are identified by The MPA Guide as small-scale, selective gear with low impact and therefore compatible with highly protected MPAs. Grorud-Colvert, Kirsten, et al. 2021. “The MPA Guide: A Framework to Achieve Global Goals for the Ocean.” Science, September. <https://doi.org/10.1126/science.abf0861>.

Proposed Boundaries of Mishopshno State Marine Conservation Area

March 26, 2025

Erika Zavaleta, President
California Fish and Game Commission
715 P Street, 16th Floor
Sacramento, CA 95817

Submitted electronically to fgc@fgc.ca.gov

RE: Amendments to Petition 2023-29MPA: Mishopshno State Marine Conservation Area

Dear President Zavaleta and Honorable Commissioners:

In 2023, the Santa Ynez Band of Chumash Indians (SYBCI), Environmental Defense Center (EDC), and Natural Resources Defense Council (NRDC) submitted petition 2023-29MPA to the Fish and Game Commission (FGC) proposing a California-Chumash co-managed marine protected area (MPA) off the coast of Carpinteria, to be named Mishopshno State Marine Conservation Area (SMCA) after the ancestral Chumash village located in the area.

Given the significance of the area to the Chumash people and the important scientific research and monitoring being conducted within the proposed boundary, the original petition proposed the following suggested regulations:

Take of all living, geological, or cultural marine resources is prohibited except:

- 1. The following federally recognized tribe is exempt from the area and take regulations found in subsection 632(b)(9) of these regulations and shall comply with all other existing regulations and statutes: The federally recognized tribe of the Santa Ynez Band of Chumash Indians. Within the proposed SMCA, the Chumash would be allowed to fish with the use of hand-based equipment. The proposed exemptions would be consistent with allowing tribal take exemptions as currently defined in Title 14, §632(a)(11), which identify how a member of a federally recognized tribe may be authorized to take living marine resources from an MPA with site-specific take restrictions. Members taking living marine resources under this provision are subject to current seasonal, bag, possession, gear and size limits in existing Fish and Game Code statutes and regulations of the Commission, except otherwise provided for in Title 14, §632(b).*
- 2. Scientific research pursuant to the MLPA regulations for SMCAs. (14 C.F.R. section 632(a)(1)(C).*

Since January 2024, our Tribal Nation and our two organizations have conducted over 100 in-person, video and phone meetings with community members and interested parties to discuss the Mishopshno SMCA proposal. These conversations have improved our understanding of the Carpinteria area, highlighted community support for protecting the coastal waters, and shaped our supplemental site-specific research. Our discussions with local Tribes, Tribal organizations, and fishers in particular have informed our decision to amend the original petition submitted to the FGC.

We developed the amendments to Petition 2023-29MPA to ensure non-federally recognized Tribes retain shore fishing access, and to limit direct, near-term impacts to extractive activities to the greatest extent possible, while still adhering to the Master Plan science-based design criteria and guidance around high levels of protection. Our amended proposed regulations are:

- Allow for the recreational take of finfish from shore using hook-and-line, promoting access to certain important marine and cultural resources for all Chumash people – including non-federally recognized Tribes;
- Allow for recreational take of finfish from shore using hook-and-line for the public;
- Reduce the SMCA in size to 9 square miles, with boundaries that leave Armpit Reef, the easternmost edge of Carpinteria Reef, and the eastern portion of the kelp forest associated with Carpinteria Reef outside of the MPA's boundaries, to allow for continued recreational and commercial fishing access to certain important local fishing grounds.

These amendments are supplemental to the amendment submitted on February 9, 2024, which excluded the Carpinteria Salt Marsh Reserve from the proposed Mishopshno SMCA boundaries given its existing protection and management under the UC Natural Reserve System.

We hope these amendments, which are informed by the additional insight and information gathered through our outreach efforts with local communities and interested parties, encourage the Commission to approve the Mishopshno SMCA.

Thank you for your consideration.

Sincerely,

Sam Cohen

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change: Environment California Research and Policy Center and Azul

Name of primary contact person: Laura Deehan, Environment California

Address: 3435 Wilshire Blvd., Suite 385, Los Angeles, CA, 90010

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Authority cited: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code.

3. Overview (Required) - This joint petition from Environment California and Azul requests minor or modest expansions for 6 state MPAs and the designation of one new State Marine Park in order to enhance protections for California's kelp forests – a critical ecosystem and habitat type that provides myriad benefits for both human and marine communities, and which has experienced significant declines in the last decade due to natural and human-related causes. In particular, the regulation changes put forth in this petition seek to enhance protections for resilient, stable, and persistent kelp forest patches as identified by recent analyses and peer-reviewed research. Proposed boundary and regulation changes include (see Table 1):

- i. Cabrillo SMR - expand westward and northward by ~~15.2 sq mi~~ ~9.9 sq mi
- ii. Point Dume SMCA - expand westward by 4.6 sq mi
- iii. South Point SMR - expand westward by 26.3 sq mi
- iv. Gull Island SMR - expand northward by 1.8 sq mi
- v. Point Conception SMR - expand eastward by 14.6 sq mi

vi. Natural Bridges SMR - expand southward by ~~13.7 sq mi~~, eastward to the edge of Natural Bridges State Beach by ~14.5 sq mi

vii. Pleasure Point, Santa Cruz - designate 3.2 sq mi as a new State Marine Reserve Conservation Area

4.. **Rationale (Required)** - The state of California has experienced significant losses of its kelp forest cover since the designation of the MPA network. While we could not know which areas would persist in the face of extreme threats at the time the MPA network was originally established, new data and research has since helped to identify kelp beds that have persisted and are most resilient in the face of climatic and other disturbances. Enhancing protections for the state's most resilient, stable, and persistent kelp forest patches now will allow us to preserve what we have left, and increase our chances of restoration in the future. Removing, to the extent possible, direct human impacts on these resilient kelp forests that are potential climatic refuges will not only help these areas persist, but will also enhance the state's restoration efforts for other kelp forests in decline. By focusing resources on the immediate protection of already identified important areas with outsized conservation benefits, the state can advance the goals of the Marine Life Protection Act, advance the new 30x30 target, and take a cost-effective approach to kelp restoration by protecting the natural regeneration potential of kelp forest ecosystems statewide.

See Petition Narrative attached for comprehensive rationale and methods behind site selection.

AMENDED 3/14/2025

6. Category of Proposed Change

☐ Sport Fishing

☐ Commercial Fishing

☒ Hunting

☐ Other, please specify: MPAs, Section 632.

7. The proposal is to: (To determine section number(s), see current year regulation booklet or

~~<https://govt.westlaw.com/calregs>~~)

☐ Amend Title 14 Section(s): [Westlaw regulations.](#)

☐ Add New Title 14 Section(s): Click here to enter text.

☐ Repeal Title 14 Section(s): Click here to enter text.

8. If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition ~~Click here to enter text.~~ Or ☐ Not applicable.

9. **Effective date:** If applicable, identify the desired effective date of the regulation. If the proposed change requires immediate implementation, explain the nature of the emergency: As soon as is practicable for the State of California
10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents:
- Petition Narrative ([Amended](#))
 - Appendix A - Highly persistent kelp beds and “medium priority” restoration sites warranting protection with expanded California MPAs, as identified by Ospina-Giraldo et al. 2023 and Arafeh-Dalmau et al. 2021
 - Table 1 - Proposed Boundary and Regulation Changes
 - [Table 2 - Amended Proposed Boundary and Regulation Changes](#)
 - Appendix B - Letters of support:
 - [Petition signed by over 10,000 members of the public, collected in 2024](#)
 - [Petition signed by 6,000 members of the public, collected by CALPIRG Students](#)
 - [Updated letters \(2\) from 52 scientists](#)
 - [Updated letter from 17 businesses](#)
 - Petitioner's letter of support
 - Joint letter from Drs. Nur Arafeh-Dalmau, Fiorenza Micheli, Kyle Cavanaugh, Dawn Murray, and Carolina Olguin-Jacobson
 - Letter from Dr. Tom Bell, Woods Hole Oceanographic Institute
 - Letter from Hannah Nevins, Santa Cruz seabird biologist
 - Joint letter from 27 scientists, researchers, and educators
 - Letter from Assemblymember Dawn Addis, 30th District
 - Letter from Fred Keeley, Mayor of Santa Cruz
 - Joint letter from 21 NGOs
 - Letter from Environmental Action signed by 2,487 members of the public
 - Letter signed by 214 CALPIRG students
 - Letter from 4 California college student leaders
 - Petition signed by over 7,000 members of the public, [collected in 2023](#)
11. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing:
- Enhanced, long-term protection of highly resilient kelp forest areas will bolster the diverse stakeholders, interests and industries that benefit from our coastal marine resources. Low-impact, non-consumptive recreational activities such as diving, snorkeling, and surfing will be unaffected - and even enhanced - by expanded MPAs, which will also provide enhanced research and education opportunities. Short-term impacts to recreational and commercial fishermen will be outweighed by larger benefits in the future, as has been demonstrated here in California and around the world ([Bucaram et al. 2018](#), [Medoff et al 2022](#)). For example, an analysis of CDFW fisheries data found that regional and statewide fishery landings and values do not appear to have been negatively impacted by MPAs ([Murray and Hee 2019](#)), and an analysis of California spiny lobster fishery found that short-term losses were compensated for by a 225% increase in total catch after 6 years of MPA designation ([Lenihan et al. 2021](#)).
12. **Forms:** If applicable, list any forms to be created, amended or repealed:

Re: Amendments to Petition to Modify CA Marine Protected Area Network to Enhance
Protections for California's Most Resilient Kelp Forests

Dear President Zavaleta and Honorable Commissioners,

Attached is Environment California Research & Policy Center & Azul's request to amend
Petition 2023-33MPA. We are amending four of the petition's seven actions following
conversations with community members and stakeholders.

We believe that these amendments will allow the state to balance long-term, strong protections
for stable kelp forest habitat areas with compatible community uses like shore-based subsistence
fishing, and create clarity at Natural Bridges around what uses are prohibited where.

On the following page, Table A ("Table A -- Cover message, Request to Amend Petition
2023-33MPA, Table of proposed amendments") outlines which action IDs we are seeking to
amend. Detailed descriptions of our proposed amendments and justifications can be found in
Table 2 ("Table 2-- Amendments to Petition to Modify the CA Marine Protected Area Network
to Enhance Protections for California's Most Resilient Kelp Forests"), where we have annotated
our changes in red underline and ~~black strikethrough~~. Our updated petition form, narrative and
appendix A, alongside new support letters are attached following those forms. Our request
concludes with the original support letters we submitted with Petition 2023-33MPA.

Thank you for this opportunity, and please reach out if you need any additional information.

Sincerely,

Laura Deehan
State Director
Environment California Research & Policy Center

**Petition to Modify the CA Marine Protected Area Network
to Enhance Protections for California's Most Resilient Kelp Forests**

Joint Submission by Environment California and Azul

PETITION NARRATIVE

Overview

California has experienced severe losses of its kelp forests since the designation of its statewide MPA network. At the time the MPA network was established, we could not know which kelp beds would be most resilient in the face of climate-related threats. However, in light of new data and research identifying the location of the state's persistent and stable kelp beds, adaptive management of the MPA network to better protect these kelp areas is therefore of critical importance.

This petition seeks to strengthen the statewide MPA network's protections for California's most resilient, stable, and persistent kelp forest patches – preserving what we have left now, to increase our chances of successful restoration in the future. Removing, to the extent possible, direct human impacts on these resilient kelp forests that are potential climatic refuges will not only help these areas persist, but will also enhance the state's restoration efforts for other kelp forests in decline. These efforts will also benefit kelp-forest dependent species, such as endangered Southern sea otters and threatened species of abalone. By focusing resources on the immediate protection of already identified important areas with outsized conservation benefits, the state can advance the goals of the Marine Life Protection Act, advance the new 30x30 target, and take a cost-effective approach to kelp restoration by protecting the natural regeneration potential of kelp forest ecosystems statewide.

Importance and decline of California's kelp forests

California's kelp forests provide numerous and invaluable ecological and environmental benefits. These underwater ecosystems serve as critical nurseries for a wide variety of marine species, providing shelter and food for numerous fish, invertebrates, and marine mammals, including the endangered Southern sea otter. Kelp acts as a natural water filter, as it absorbs excess nutrients and helps maintain water quality by reducing the risk of harmful algal blooms. Kelp forests may also play a role in carbon sequestration, capturing atmospheric carbon dioxide and helping to mitigate climate change. In addition to their ecological importance, kelp forests offer enormous cultural and economic benefits to California. They hold enormous cultural and economic significance for many of the Tribes and Indigenous communities that call California's coastal waters home. They support thriving commercial and recreational fisheries, contributing to the state's economy. The beauty and biodiversity of these forests attract tourists and divers, bolstering the state's tourism industry. Moreover, kelp can act as a buffer against coastal erosion, protecting shorelines from the damaging impacts of storms and waves.

However, kelp forests in California have experienced a significant decline in recent years due to a combination of natural and human-induced factors. One of the most important drivers of this

decline is the warming of ocean waters, which has been linked to climate change. Sustained elevated sea temperatures known as "marine heatwaves" have caused significant stress to kelp populations, leading to widespread loss of kelp stands, increased susceptibility of key urchin predators to disease, and exploding populations of herbivorous sea urchins. The recent 2014-2016 marine heatwave left California's kelp forests decimated, with over 90% of bull kelp reported lost in Northern California and significant losses reported across the state (Bell et al. 2023, Arafeh-Dalmau et al. 2023). Human activities have also played a role in the degradation of kelp forests. Overfishing and removal of key predators like sea otters, predatory fishes, California spiny lobster, rock crab, and sea stars have disrupted food webs and resulted in trophic cascades in these ecosystems, allowing herbivorous species to graze on kelp unchecked. Additionally, coastal development, pollution, and nutrient runoff degrade water quality and promote the growth of invasive species that outcompete native kelp. The loss of kelp cover across the state has widespread economic and ecological impacts, has led to the closure of the recreational red abalone fishery in Northern California and has hindered Southern sea otter population expansion, as great white shark bite mortalities increase where kelp cover has declined at the northern and southern edges of this iconic species' range (Nicholson et al. 2018, Moxley et al. 2019).

The decline of California's kelp forests since the time the MPA network was completed seriously threatens the state's marine biodiversity, fisheries, and overall ecological health and undermines the goals of the Marine Life Protection Act. This adaptive management review cycle is critically timed to respond to kelp loss. It is vital to increase protections immediately to confer as much resilience as possible to future disruptions.

MPAs and kelp forest conservation

Around the world, MPAs have been found to enhance the overall health and resilience of ocean ecosystems (Edgar et al. 2014, Jacquemont et al. 2022), and to promote long-term kelp forest stability (Peleg et al. 2023). By providing long-term protections for predator species within their boundaries - such as southern sea otters, California spiny lobster, rock crabs, wolf eels, and predatory fishes like California sheephead - MPAs help to regulate local populations of kelp consumers, thereby having cascading positive impacts on kelp growth and persistence (Eisaguirre et al. 2020, Kawamata & Taino 2021, House & Allen 2022, Heineke et al. 2023). Promoting intact food webs and natural ecological processes can also help to improve overall resilience in the face of other natural and man-made stressors that MPAs cannot directly mitigate, such as warming ocean temperatures and nutrient runoff (Roberts et al. 2017, Arafeh-Dalmau et al. 2023). Noting these benefits and abilities, the California MLPA specifically identified kelp forests as one of the habitats requiring greater protection ([MLPA Section 2856\(a\)\(2\)\(A\)](#)).

We have seen the benefits of long-term protection of California's kelp forests. The Decadal Management Review of the statewide MPA network found that, while kelp species across the state experienced large-scale declines during the 2014-2016 marine heatwave, "overall, kelp canopy was more stable and appeared to be more resilient inside MPAs" (CA MPA DMR 2022). The South Coast region's kelp forests, in particular – where fishing pressure was highest before the implementation of the MLPA – seem to have benefited from protections, with increases in

California sheephead and California spiny lobster within MPAs thought to help facilitate grazer suppression and lead to more stable giant kelp abundance during and after the marine heatwave (DMR Kelp Forest Technical Report 2021).

MPAs can also serve as a complementary management measure for kelp restoration. While California's MPAs were not explicitly designed with the restoration of kelp forests in mind, MPAs in general are considered a form of indirect kelp restoration due to their ability to promote intact food webs through reduced fishing pressure, which in turn helps to reduce kelp grazing pressure, as described above (Hopf et al. 2022). In addition, stable kelp forests help to promote natural regeneration of nearby areas, by providing a supply of propagules to recovering populations close by (Arafeh-Dalmau et al. 2021, Giraldo-Ospina et al. 2023). A recent global synthesis of kelp restoration found that the most successful restoration projects are those located near existing stable kelp forests (Eger et al. 2022). MPAs that protect these stable kelp forests can help to promote their continued persistence by removing extractive or destructive activities, and potentially further boost kelp restoration efforts by promoting healthy predator populations that “spillover” into nearby areas (e.g. Lenihan et al. 2021), helping to reduce grazer pressure in a broader area (Kawamata & Taino 2021). Harnessing the power of these dense, stable, and resilient kelp beds for the natural regeneration of nearby areas using area-based protection can also free up much-needed resources needed for intensive, direct restoration efforts elsewhere.

Based on this new and growing scientific evidence base, the state should protect more of California's most stable and resilient kelp forests now, in order to enhance the conservation benefits and ability of our statewide MPA network to meet the goals of the MLPA while giving kelp restoration efforts a leg up in the future.

Identifying resilient kelp forests in California

Since the creation of California's MPA network, new research has emerged utilizing satellite and in-situ data over a decades-long year timescale to identify the kelp forests exhibiting higher levels of persistence and stability in California.

A multi-institution team of researchers used satellite data to provide high-resolution maps of the most persistent giant kelp and bull kelp patches in California during the last 35 to 38 years (Arafeh-Dalmau et al. 2021, Arafeh-Dalmau et al. 2023). Importantly, these studies analyzed the extent to which highly persistent kelp patches are protected within the state's MPA network, and found that these important kelp forest areas are currently not adequately protected among regions. Only 20.9 % of the most highly persistent giant kelp forests in Central California, 8.4% in Southern California, and less than 1% in Northern California are fully protected in MPAs (Arafeh-Dalmau et al. 2021). Bull kelp is even less well protected – only 3.4% of the the most highly persistent bull kelp forests in Northern Central California, and 0.1% of those in Northern California are fully protected in MPAs (Arafeh-Dalmau et al. 2023). The authors of these studies recommend increasing protections for these important and highly persistent kelp forest areas.

In addition, the Ocean Protection Council recently funded the development of an ecologically-focused, spatially explicit prioritization tool to identify priority kelp restoration sites in

California waters (Giraldo-Ospina et al. 2023). Notably, this research used in-situ data as well as satellite imagery to determine the stability and current status of kelp forests across California's coastline, making the resulting prioritization index particularly robust. Of particular importance to this petition, the tool identifies kelp beds that have been historically stable, that persisted or bounced back quickly during the 2014-2016 marine heatwave, and that are currently doing well compared to other kelp forests – namely, the most stable and resilient kelp forest areas in state waters. Characterized as “medium priority” restoration sites – that is, historically stable kelp beds that are currently in good condition – these areas have a large potential for enhancing the natural regeneration and/or successful restoration actions of nearby kelp beds. The authors suggest potential actions: “Monitor these sites for triggers that may warrant intervention; Defend these sites from current or future threats; and Study these sites to understand the mechanisms of resistance to the marine heatwave.”

In light of these new studies, and in line with the site classifications put forth by Giraldo-Ospina et.al, we strongly recommend the state take action to protect as much of these newly-identified, stable, highly resilient kelp forest patches as possible with well-protected MPAs in the coming years. Protecting these iconic, dense kelp beds is one of California's best shots at preserving – and eventually restoring – our critically important kelp forest ecosystems quickly and cost-effectively.

Proposed areas for additional or enhanced MPA protections

Using spatially-explicit data detailing where highly persistent kelp beds and “medium priority” restoration sites overlap, as outlined by Arafah-Dalmau et al. 2021, 2023, and Giraldo-Ospina et al. 2023, we identified areas where additional protections are necessary to promote the continued persistence and stability of California's healthiest kelp forests (see Table 1).

Preference was given to areas already within or adjacent to existing California MPAs, recognizing the substantial scientific and stakeholder input involved in creating the original network through the MLPA process, and in order to adhere as much as possible to the original intent and science-based spacing guidelines provided by the SAT during the creation of the network. We recommend reducing spacing between MPAs in some places is necessary to increase the representation of these highly persistent and resilient kelp beds that have a greater chance of persisting into the future in our state MPA network. We also encourage the state to consider whether there are other areas of highly persistent and resilient kelp not included in this proposal that would be good candidates for new or expanded MPA protections.

To develop the proposal further, we collected information through interviews and other personal communications with scientists including Dr. Anita Giraldo-Ospina and Dr. Nur Arafah Dalmau, who graciously provided data, assisted with the interpretation of results to identify the recommended areas, and reviewed the proposal for accuracy. We also gathered expert input and data from individuals, local community groups, MPA Collaborative Network members, conservation organizations, and more. While their cooperation should not be taken as an endorsement, we greatly appreciate the information and guidance provided by these individuals which contributed to the overall accuracy and scientific validity of this proposal.

We did not focus on “high priority” restoration sites identified by Giraldo-Ospina et al. 2023, in order to avoid proposing MPA protections for areas that may require more intensive, direct restoration methods, such as grazer suppression activities, that are not currently permitted within MPA boundaries. However, we urge the state to consider what, if any, direct restoration activities might be compatible with different MPA designations within the state’s network (e.g. line 20 of the [MPA Collaborative Network’s Vetted Regulation Recommendations](#)), recognizing that the impacts of climate change may still degrade some kelp beds within MPAs in the future, and proactive restoration efforts may be warranted.

Since submitting our petitions in 2023, we have received feedback from community members and stakeholders, including members of the recreational and commercial fishing communities. Based on this feedback, we have revised the boundaries and regulations in several of the areas where we have proposed changes. These changes can be found in red in Table 1.

As noted in our original petitions, ~~Finally, it should be noted that,~~ while the general location and specific boundaries for proposed areas are listed in Table 1, we continue to be are happy to work with State and its partners to refine the proposed areas and boundaries in more detail, keeping in mind CDFW MPA design guidelines and the state’s interest in taking a holistic approach for reviewing petitions and enhancing the network to meet the statewide 30x30 goal.

Socioeconomic impacts

Enhanced, long-term protection of highly resilient kelp forest areas will bolster the diverse stakeholders, interests and industries that benefit from our coastal marine resources. Low-impact, non-consumptive recreational activities such as diving, snorkeling, and surfing will be unaffected – and even enhanced – by expanded MPAs, which will also provide enhanced research and education opportunities. Short-term impacts to recreational and commercial fishermen will be outweighed by larger benefits in the future, as has been demonstrated here in California and around the world (Bucaram et al. 2018, Lenihan et al. 2021, Medoff et al. 2022). For example, an analysis of CDFW fisheries data found that regional and statewide fishery landings and values do not appear to have been negatively impacted by MPAs (Murray and Hee 2019), and an analysis of California spiny lobster fishery found that any short-term losses were compensated for by a 225% increase in total catch after 6 years of MPA designation (Lenihan et al. 2021).

Relevance to MLPA Goals and DMR Recommendations

Enhancing the protection of kelp forests in California aligns strongly with Goals 1, 2, 3, and 4 of the California MLPA. By safeguarding California’s most resilient and stable kelp forests, as detailed in this petition, we will preserve critical habitat for a diverse range of marine species, from endangered sea otters to commercially valuable fish species. Kelp forests play a crucial role in the recovery and sustainability of marine life populations, as they serve as nurseries and refuges for many species, including those targeted by fisheries. These vibrant ecosystems also offer intrinsic value by supporting biodiversity and exceptional natural beauty, and their recreational and scientific use and enjoyment make them vital for the public ([MLPA Section 2856\(a\)\(2\)\(A\)](#)).

In addition, the regulation and boundary changes proposed by this petition specifically advance DMR Recommendation #4 - “Apply what is learned from the DMR to support proposed changes to the MPA Network and Management Program”. The DMR found that California MPAs helped to promote kelp forest resilience and recovery during and after the severe 2014-2016 marine heatwave. In the face of increasing climate impacts and as we struggle to recover from recent kelp forest declines across the state, expanding the MPA network in key, targeted areas can help to ensure the continued persistence of our remaining, most resilient kelp forests.

Relevance to Broader State Processes, Policies, and Goals

We applaud the actions that the State of California has already taken to respond to the severe declines in kelp forest cover across the state, including recent commercial kelp harvest closures in Northern California, annual harvest limits in Northern California, and the initiation of a statewide Kelp Restoration and Management Plan. We strongly support taking a whole-ocean approach to ensuring sustainable and effective management of kelp in our state waters ([Crowfoot et al. Objective 3.2](#)).

The MPA changes proposed in this petition complement the state’s ongoing kelp restoration and management work. They will also help to reduce the state’s costs associated with kelp restoration – harnessing the ability of well-protected, resilient kelp beds to promote the natural regeneration of nearby areas, allowing the state to direct more of its much-needed resources and funding for intensive restoration efforts in harder-hit areas with little kelp cover left.

Finally, this petition aligns strongly with the statewide goal set by both Governor Newsom and the legislature to conserve 30% of our coastal waters by 2030. If implemented in its entirety, the actions proposed in this petition will see an additional ~1.5% of state waters protected in highly to fully-protected areas, while helping the network to better achieve the goals set forth in the MLPA.

Appendix A

Distribution of Highly Persistent Kelp Beds Near State MPAs Proposed for Expansion

Highly persistent kelp beds identified by Arafteh-Dalmau et al. 2021 are depicted by light blue pixels. Priority kelp restoration sites characterized by Ospina-Giraldo et al. 2023 are shown using colored circles. “High priority” restoration sites are dark red, “medium priority” sites are bright orange, and “low” and “very low” priority sites are light and very light gray.

Existing California MPAs are denoted by red, purple, or blue polygons, and the 3 nm state waters limit is shown as a blue line.

Cabrillo SMR

Point Dume SMCA

Gull Island SMR

South Point SMR

Point Conception SMR

Natural Bridges SMR

Pleasure Point, Santa Cruz

TABLE 1 - Petition to Modify the CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Name	Proposed action	Brief description	Proposed regulations and boundary change	Historical context	Notes
Cabrillo State Marine Reserve (SMR)	Expand by 15.2 sq miles	Large patches of dense, stable kelp forests exist along a large stretch of coast along Point Loma to the north of the very small existing SMR. Expansion is compatible with Cabrillo SMR's current goal to "protect diverse kelp forest, surfgrass, sandy seafloor, and intertidal and nearshore rocky reef habitat". Approximately 1,000,000 people visit the area annually which provides access to the ocean for thousands of school children and other groups. Recreational and subsistence fishing is common here.	No change in regulations. Maintain existing eastern and southern boundaries. Shift the western boundary to the edge of state waters per state MPA design and size guidelines, and shift the northern boundary to a visible geographic landmark at Swordfish Point to bring resilient kelp beds along the western shore of Point Loma within MPA protections. The new proposed boundaries would form straight lines, follow the mean high tide line, and follow the state waters boundary from the current southeast corner of the SMR to approximately the following coordinates: - Southwest corner: 32° 66.223' N lat. 117° 30.345' W long. - Northwest corner: 32° 72.539' N lat. 117°31.664' W long. - Northeast corner: 32° 72.529' N lat. 117°25.836' W long.	This area was initially included in a large proposed SMR ("Point Loma SMR", Proposal C) in recognition that this is an area of greater biological diversity than other areas. However, the state opted for a reserve far smaller than the science-based minimum size guidelines to avoid conflict with fishing grounds offshore.	To balance kelp forests protection with recreation and low-impact subsistence fishing, we are willing to consider the creation of a new SMCA alongside the existing SMR that allows for recreational hook-and-line fishing and spearfishing.
Point Dume State Marine Conservation Area (SMCA)	Expand by 4.6 sq mi	A large, dense, resilient kelp bed is located immediately west of the current SMCA's boundaries. We propose a small expansion of the SMCA to protect this important kelp bed. Currently, the SMCA protects nearly 16 square miles of sandy beach and seafloor habitat, rocky shores, kelp forests, surfgrass beds, an upwelling zone, and less than a quarter square mile of deep submarine canyon, which together create an area of high biodiversity. This SMCA also provides for excellent surfing, diving, tidepooling, and whale watching opportunities.	No change in regulations. Shift the western boundary to the edge of El Sol County Beach to bring the highly resilient patch of dense kelp forest just west of the current SMCA into MPA protection. The proposed new western boundary forms a straight line extending southward from the mean high tide line to the 3 nm state waters limit at approximately the following coordinates: - Northwest corner: 34°0413' N lat. 118°9063' W long. - Southwest corner: 33°9899' N lat. 118°9063' W long.	The kelp beds within the proposed expansion area were part of a historic SMP proposal ("Lechuza SMP", Proposal C) that sought to protect these persistent kelp beds along the Malibu Coast. This proposed SMP was not taken up by the state at the time, likely in favor of designating the Point Dume SMR/SMCA complex just to the east and to maintain spacing guidelines. In addition, the Point Dume SMR/SMCA boundaries were placed to the west of Point Dume in order to leave waters to the east of the point open/unprotected to accommodate for heavy commercial and recreational use - suggesting that the western side of the point was seen as less desirable for commercial and recreational interests.	
South Point SMR	Expand by 26.3 sq mi	The Northern Channel Islands contain some of the largest remaining resilient kelp beds in state waters, although large portions of the islands have experienced die-offs and are rated as "high priority" sites by Ospina-Giraldo et al. 2023. The stretch of coastline to the northwest of South Point SMR on Santa Rosa Island contains one of the largest contiguous resilient kelp beds on the islands. The SMR currently protects around 13 square miles of ocean habitat including rocky reefs, sandy seafloor, surfgrass beds, and small patches of highly resilient kelp forests. Expansion would help to bring the large stretch of resilient kelp bed to the northwest under MPA protection, and is compatible with the SMR goal to "protect the rocky reef, kelp forest, sandy plain habitat found here". This area is remote and only accessible via boat. Backcountry beach camping along the South Point SMR shoreline is permitted from September 16 through December 3.	No change in regulations. Shift the western boundary of the SMR to the westernmost tip of Santa Rosa Island with protections extending south to the 3 nm state waters limit, bringing a large, contiguous patch of resilient kelp forest along the southwest coastline under MPA protections. The new western boundary should form a straight line extending south, connecting the island's westernmost tip and the 3 nm state waters limit at approximately the following coordinates: -Northwest corner: 34°0013' N lat. 120°2507' W long. -Southwest corner: 33°938' N lat. 120°2507' W long.	South Point SMR was established as one of the 13 Channel Islands MPAs in 2003 and re-established with no changes as part of the state MPA network in 2012.	
Gull Island SMR	Expand by 1.8 sq mi	The Northern Channel Islands contain some of the largest remaining resilient kelp beds in state waters, although large portions of the islands have experienced die-offs and are rated as "high priority" sites by Ospina-Giraldo et al. 2023. A small area of unprotected coastline to the northwest of Gull Island SMR contains highly resilient kelp beds worth protecting. Expansion is compatible with the SMR goal to "protect the rocky reef, kelp forest, sandy plain habitat found here".	No change in regulations. Shift the northern boundary of the SMR to the mean high tide line along the southwest coastline of Santa Cruz Island, to bring the highly resilient kelp beds at Posa Anchorage under MPA protection. The new northern boundary should follow the mean high tide line until it joins with an extension of the existing western boundary, at approximately 34°000' N lat.	Gull Island SMR was established as one of the 13 Channel Islands MPAs in 2003 and re-established with no changes as part of the state MPA network in 2012.	
Point Conception SMR	Expand by 14.6 sq mi	A very large patch of resilient kelp forest exists just outside the current eastern boundary of Point Conception SMR. Ospina-Giraldo et al 2023 identified this patch as having a lower risk of future losses compared to nearby kelp patches, and being valuable for natural regeneration and long-term monitoring ("cluster 2" in Hypothetical Use Case #4). Data from an existing shore-based radar system that has been deployed at the site since 2020 shows the area immediately east of the currently MPA appears to be used largely for transit, rather than fishing. Access to this area is currently limited, allowing for additional protections to confer high conservation value while minimizing socioeconomic impacts.	No change in regulations. Maintain existing western and southern boundaries, and shift eastern boundary westward between Arroyo San Agustin and Canada de la Agujas beaches to bring the large resilient kelp bed to the east of Point Conception SMR within MPA protections. The new eastern boundary should form a straight line between the mean high tide line and the 3nm state waters boundary at approximately the following coordinates: -Northeast corner: 34°45' N lat. 120°3445' W long. -Southeast corner: 34°40' N lat. 120°3445' W long.	The proposed expansion area appears to have been initially included in a larger proposed SMR during the MLPA planning process (South Coast Proposal C) in recognition of this area's biological and oceanographic importance. The rationale for the smaller current boundaries for Point Conception SMR is unclear from the historical documents provided.	

Natural Bridges SMR	Expand by 13.7 sq mi	Multiple patches of resilient kelp forest exist just offshore from the current SMR boundaries. The original intent of this SMR was to protect the intertidal zone from tidepooling and shore fishing while leaving skiff fishing unimpacted. However, increasing climate impacts, the critical condition of the state's kelp forests, and strong public support for expanded protections, warrant a reevaluation and expansion of this SMR to protect these highly resilient kelp beds and newly vulnerable marine populations.	No change in regulations. Maintain existing western and eastern boundaries, and shift southern boundary out to the 3nm state waters limit to protect the resilient kelp beds and deeper habitats and pelagic waters per CDFW design and feasibility guidelines, as well as recently published peer-reviewed guidelines for climate-resilient MPA design (Arafeh-Dalmau et al. 2023).	The Natural Bridges SMR was designed as an intertidal SMR, specifically to avoid socio-economic impacts. The preferred option of siting a SMR that extends to greater depth range (as identified in the IDC proposal) was not pursued in an effort to reduce socio-economic impacts by avoiding siting SMRs adjacent to Santa Cruz harbor.	
Pleasure Point SMR	Designate ~3.2 sq mi	<p>A large, dense patch of resilient kelp forest exists just off Pleasure Point. The kelp beds of the northern Monterey Bay are some of the largest and most persistent in the state. This area in particular is a well-known and popular surfing location, with little commercial fishing taking place (pers. comms H. Nevins) and minimal recreational hook-and-line fishing and spearfishing occurring when surf conditions are flat. There are strong access points to the area, many educational and recreational opportunities, and a growing, colloquially named "shark park" nearby as the presence of juvenile white sharks increases. See letter from H. Nevins in Appendix B detailing the broader conservation value of the area.</p>	<p>We propose a no-take SMR to best protect this large kelp forest from all destructive and extractive activities. See Column F for an acceptable alternative, and additional consideration. Proposed regulations are as follows:</p> <p><i>"It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource."</i></p> <p>Proposed boundaries range from the northeastern edge of Trees Beach along the mean high tide line to the tip of Soquel Point. From the mean high tide line, the proposed boundary extends south (offshore) by 2.5 sq mi, in keeping with CDFW design guidelines and recent peer-reviewed guidelines for climate-resilient MPA design recommending a variety of habitats and depth ranges be represented within an MPA (Arafeh-Dalmau et al. 2023). While this area would not meet the state's minimum size guidelines, we recognize the importance of this area for recreational fishing and believe a strategically placed MPA of this size would protect as much of the kelp forest as possible while minimizing economic impact to the larger region, and providing conservation benefits to the broader region as detailed in Appendix A's letter from H. Nevins.</p>	n/a	To balance kelp forest protection with recreation and low-impact subsistence fishing, we are willing to consider a new Pleasure Point SMCA that allows for recreational hook-and-line fishing and spearfishing. In addition, to better protect the ecologically rich and biologically important waters of Soquel Cove nearby, we strongly suggest the state consider designating a larger State Marine Park (or State Marine Conservation Area allowing for all recreational activities) alongside, or in tandem with, the Pleasure Point detailed here for enhanced recreational and ecological benefits (see Appendix A letter from H. Nevins).

TABLE 2 - **Amendments to** Petition to Modify the CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Name	Proposed action	Brief description	Proposed regulations and boundary change	Historical context	Notes/Justification
Cabrillo State Marine Reserve (SMR)	Expand by 15.2 sq miles - 9.9 sq mi	Large patches of dense, stable kelp forests exist along a large stretch of coast along Point Loma to the north of the very small existing SMR. Expansion is compatible with Cabrillo SMR's current goal to "protect diverse kelp forest, surfgrass, sandy seafloor, and intertidal and nearshore rocky reef habitat". Approximately 1,000,000 people visit the area annually which provides access to the ocean for thousands of school children and other groups. Recreational and subsistence fishing is common here.	No change in regulations. Maintain existing eastern and southern boundaries. Shift the western boundary to the edge of state waters per state MPA design and size guidelines, and shift the northern boundary to a visible geographic landmark at New Hope Rock, such as the collection of buildings north of Building 609 Swordfish Point to bring resilient kelp beds along the western shore of Point Loma within MPA protections. The new proposed boundaries would form straight lines, follow the mean high tide line, and follow the state waters boundary from the current southeast corner of the SMR to approximately the following coordinates: - Southwest corner: 32° 66.223' N lat. 117° 30.345' W long. - Northwest corner: 32° 72.639' N lat. 117° 34.664' W long. 32° 42' 12.7188" N lat. 117° 18' 53.5788" W long. 117° 15' 20.3976" W long. - Northeast corner: 32° 72.620' N lat. 117° 25.836' W long. 32° 42' 12.7188" N lat. 117° 15' 20.3976" W long.	This area was initially included in a large proposed SMR ("Point Loma SMR", Proposal C) in recognition that this is an area of greater biological diversity than other areas. However, the state opted for a reserve far smaller than the science-based minimum size guidelines to avoid conflict with fishing grounds offshore.	To balance kelp forests protection with recreation and low-impact subsistence fishing, we are willing to consider the creation of a new SMCA alongside the existing SMR that allows for recreational hook-and-line fishing and spearfishing. <u>Following conversations with local stakeholders, we are proposing a smaller reserve that will still protect areas of stable kelp forest while allowing for local commercial lobster fishing north of New Hope Rock</u>
Point Dume State Marine Conservation Area (SMCA)	Expand by 4.6 sq mi	A large, dense, resilient kelp bed is located immediately west of the current SMCA's boundaries. We propose a small expansion of the SMCA to protect this important kelp bed. Currently, the SMCA protects nearly 16 square miles of sandy beach and seafloor habitat, rocky shores, kelp forests, surfgrass beds, an upwelling zone, and less than a quarter square mile of deep submarine canyon, which together create an area of high biodiversity. This SMCA also provides for excellent surfing, diving, tidepooling, and whale watching opportunities.	No change in regulations. Propose allowing recreational take from shore by hook and line and spearfishing. Shift the western boundary to the edge of El Sol County Beach to bring the highly resilient patch of dense kelp forest just west of the current SMCA into MPA protection. The proposed new western boundary forms a straight line extending southward from the mean high tide line to the 3 nm state waters limit at approximately the following coordinates: - Northwest corner: 34°0413' N lat. 118°9063' W long. - Southwest corner: 33°9899' N lat. 118°9063' W long.	The kelp beds within the proposed expansion area were part of a historic SMP proposal ("Lechuza SMP", Proposal C) that sought to protect these persistent kelp beds along the Malibu Coast. This proposed SMP was not taken up by the state at the time, likely in favor of designating the Point Dume SMR/SMCA complex just to the east and to maintain spacing guidelines. In addition, the Point Dume SMR/SMCA boundaries were placed to the west of Point Dume in order to leave waters to the east of the point open/unprotected to accommodate for heavy commercial and recreational use - suggesting that the western side of the point was seen as less desirable for commercial and recreational interests.	- The Santa Ynez Band of Chumash Indians are exempt from this SMCA's take regulations - it is a culturally important area - Petition 2023-14MPA, submitted by the California Sea Urchin Commission, proposes to expand take even further by allowing for the commercial take of urchins within this SMCA. - Except for the petition above, FGC meetings and staff summary Nov/Dec notes show no complaints submitted by fishing interests in the Point Dume region <u>We recieved requests from recreational fishers that this change would increase access for subsistence fishing and we feel this approach balances recreation and kelp conservation.</u> <u>We would also be open to allowing recreational hook and line and spear fishing from non-motorized watercraft, should there be a legal pathway to creating that form of exemption</u>
South Point SMR	Expand by 26.3 sq mi	The Northern Channel Islands contain some of the largest remaining resilient kelp beds in state waters, although large portions of the islands have experienced die-offs and are rated as "high priority" sites by Ospina-Giraldo et al. 2023. The stretch of coastline to the northwest of South Point SMR on Santa Rosa Island contains one of the largest contiguous resilient kelp beds on the islands. The SMR currently protects around 13 square miles of ocean habitat including rocky reefs, sandy seafloor, surfgrass beds, and small patches of highly resilient kelp forests. Expansion would help to bring the large stretch of resilient kelp bed to the northwest under MPA protection, and is compatible with the SMR goal to "protect the rocky reef, kelp forest, sandy plain habitat found here". This area is remote and only accessible via boat. Backcountry beach camping along the South Point SMR shoreline is permitted from September 16 through December 3.	No change in regulations. Shift the western boundary of the SMR to the westernmost tip of Santa Rosa Island with protections extending south to the 3 nm state waters limit, bringing a large, contiguous patch of resilient kelp forest along the southwest coastline under MPA protections. The new western boundary should form a straight line extending south, connecting the island's westernmost tip and the 3 nm state waters limit at approximately the following coordinates: -Northwest corner: 34°0013' N lat. 120°2507' W long. -Southwest corner: 33°938' N lat. 120°2507' W long.	South Point SMR was established as one of the 13 Channel Islands MPAs in 2003 and re-established with no changes as part of the state MPA network in 2012.	Santa Rosa Island is a traditional home of the Chumash Located where warm water currents from the tropics and cold water currents from Alaska converge = ecologically rich and important area
Gull Island SMR	Expand by 1.8 sq mi	The Northern Channel Islands contain some of the largest remaining resilient kelp beds in state waters, although large portions of the islands have experienced die-offs and are rated as "high priority" sites by Ospina-Giraldo et al. 2023. A small area of unprotected coastline to the northwest of Gull Island SMR contains highly resilient kelp beds worth protecting. Expansion is compatible with the SMR goal to "protect the rocky reef, kelp forest, sandy plain habitat found here".	No change in regulations. Shift the northern boundary of the SMR to the mean high tide line along the southwest coastline of Santa Cruz Island, to bring the highly resilient kelp beds at Posa Anchorage under MPA protection. The new northern boundary should follow the mean high tide line until it joins with an extension of the existing western boundary, at approximately 34°000' N lat.	Gull Island SMR was established as one of the 13 Channel Islands MPAs in 2003 and re-established with no changes as part of the state MPA network in 2012.	

TABLE 2 - Amendments to Petition to Modify the CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Point Conception SMR	Expand by 14.6 sq mi	A very large patch of resilient kelp forest exists just outside the current eastern boundary of Point Conception SMR. Ospina-Giraldo et al 2023 identified this patch as having a lower risk of future losses compared to nearby kelp patches, and being valuable for natural regeneration and long-term monitoring ("cluster 2" in Hypothetical Use Case #4). Data from an existing shore-based radar system that has been deployed at the site since 2020 shows the area immediately east of the currently MPA appears to be used largely for transit, rather than fishing. Access to this area is currently limited, allowing for additional protections to confer high conservation value while minimizing socioeconomic impacts.	No change in regulations. Maintain existing western and southern boundaries, and shift eastern boundary westward between Arroyo San Agustin and Canada de la Agujas beaches to bring the large resilient kelp bed to the east of Point Conception SMR within MPA protections. The new eastern boundary should form a straight line between the mean high tide line and the 3nm state waters boundary at approximately the following coordinates: -Northeast corner: 34°45' N lat. 120°3445' W long. -Southeast corner: 34°40' N lat. 120°3445' W long.	The proposed expansion area appears to have been initially included in a larger proposed SMR during the MLPA planning process (South Coast Proposal C) in recognition of this area's biological and oceanographic importance. The rationale for the smaller current boundaries for Point Conception SMR is unclear from the historical documents provided.	Ecologically rich and important to Indigenous Chumash people The remoteness of its location makes it one of the least-visited mainland marine protected areas (MPAs) along California's south coast
Natural Bridges SMR	Expand by 13.7 sq mi <u>~14.5 sq mi</u>	Multiple patches of resilient kelp forest exist just offshore from the current SMR boundaries. The original intent of this SMR was to protect the intertidal zone from tidepooling and shore fishing while leaving skiff fishing unimpacted. However, increasing climate impacts, the critical condition of the state's kelp forests, and strong public support for expanded protections, warrant a reevaluation and expansion of this SMR to protect these highly resilient kelp beds and newly vulnerable marine populations.	No change in regulations. Maintain existing western and eastern boundary, <u>shift eastern boundary to encompass Natural Bridges State Beach</u> and shift southern boundary out to the 3nm state waters limit to protect the resilient kelp beds and deeper habitats and pelagic waters per CDFW design and feasibility guidelines, as well as recently published peer-reviewed guidelines for climate-resilient MPA design (Arafeh-Dalmau et al. 2023).	The Natural Bridges SMR was designed as an intertidal SMR, specifically to avoid socio-economic impacts. The preferred option of siting a SMR that extends to greater depth range (as identified in the IDC proposal) was not pursued in an effort to reduce socio-economic impacts by avoiding siting SMRs adjacent to Santa Cruz harbor.	Proximity of Santa Cruz Harbor to other ports, many fishermen travel within and beyond the region to conduct their fishing activities. <u>We would consider a southern boundary that is closer to shore, like near the continental shelf, if the state receives feedback to indicate such a change would better balance conservation with fishing interests.</u> <u>Santa Cruz MPA collaborative had identified this expansion as option that would clarify and reduce confusion around permitted uses at the state beach.</u>
Pleasure Point SMR- SMCA	Designate ~3.2 sq mi	A large, dense patch of resilient kelp forest exists just off Pleasure Point. The kelp beds of the northern Monterey Bay are some of the largest and most persistent in the state. This area in particular is a well-known and popular surfing location, with little commercial fishing taking place (pers. comms H. Nevins) and minimal recreational hook-and-line fishing and spearfishing occurring when surf conditions are flat. There are strong access points to the area, many educational and recreational opportunities, and a growing, colloquially named "shark park" nearby as the presence of juvenile white sharks increases. See letter from H. Nevins in Appendix B detailing the broader conservation value of the area.	We propose a <u>State Marine Conservation Area</u> no take SMR to protect this large kelp forest from all <u>most</u> destructive and extractive activities. Proposed regulations are as follows: <i>"It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource with the following exceptions: recreational take from shore by hook and line and spearfishing."</i> Proposed boundaries range from the northeastern edge of Trees Beach along the mean high tide line to the tip of Soquel Point. From the mean high tide line, the proposed boundary extends south (offshore) by 2.5 sq mi, in keeping with CDFW design guidelines and recent peer-reviewed guidelines for climate-resilient MPA design recommending a variety of habitats and depth ranges be represented within an MPA (Arafeh-Dalmau et al. 2023). While this area would not meet the state's minimum size guidelines, we recognize the importance of this area for recreational fishing and believe a strategically placed MPA of this size would protect as much of the kelp forest as possible while minimizing economic impact	We acknowledge the deliberate effort during the MLPA planning process to avoid siting MPAs near recreational access areas to allow for small vessels and kayaks to access fishing opportunities. However, in light of changing conditions, the extreme and significant losses of kelp cover over the past 10 years, and strong public support for additional protections, increased protections are warranted for this last remaining, resilient kelp area. Sufficient access remains for recreational use in immediate vicinity.	To balance kelp forest protection with recreation and low-impact subsistence fishing, we are <u>proposing a new</u> willing to consider a new Pleasure Point SMCA that allows for <u>shore-based</u> recreational hook-and-line fishing and spearfishing. In addition, to better protect the ecologically rich and biologically important waters of Soquel Cove nearby, we strongly suggest the state consider designating a larger State Marine Park (or State Marine Conservation Area allowing for all recreational activities) alongside, or in tandem with, the Pleasure Point detailed here for enhanced recreational and ecological

Re: Amendments to Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Zavaleta and Honorable Commissioners,

As scientists, researchers, and educators who work to understand our changing oceans and inspire the next generation of ocean stewards, we write to express our continued support for the expansion and strengthening of California's network of Marine Protected Areas (MPAs) to help safeguard the state's diverse marine ecosystems and ensure the long-term resilience of our ocean habitats.

Globally, the ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. California's coastal ecosystems have not been spared these global trends: Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Only an average of 55 Pacific leatherback turtles are now found foraging off California's coast every year, a notable decrease from the yearly average of 128 Pacific leatherbacks observed in the region from 1990 to 2003.² Marine heatwaves have doubled over the last 30 years and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.³

Through its adaptive management process California has a unique opportunity to take bold, effective and science-based action to conserve its marine biodiversity by expanding and strengthening its groundbreaking network of state MPAs. MPAs, like state parks on land, protect unique and important ocean habitats from destructive human activities that can damage the integrity of marine ecosystems. Globally and in California, strongly protected and well-enforced MPAs have been shown to be highly effective in conserving biodiversity, enhancing ecosystem

³IPCC (2021). Summary for Policymakers. In: Climate Change 2021: The Physical Science Basis. Contribution of Working Group I to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change [Masson-Delmotte VP, Zhai A, Pirani SL, Connors C, Péan S, et al. (Eds.)].;

resilience, and mitigating the impacts of climate change on our oceans.⁴ Well-designed and well-implemented reserves better preserve natural interactions within ecosystems, allowing for greater resiliency in the face of rising global temperatures and changing environmental conditions.⁵

California's network of MPAs, established through the 1999 Marine Life Protection Act (MLPA), has now been in place for over a decade. The state's Decadal Management Review (DMR) analyzed a decade of monitoring data and showed that the MPA network has generally been effective at protecting ocean habitats and increasing fisheries-targeted species' biomass.⁶ Now, in the face of increasing threats, we need to build on this system and maintain California's role as a national and global leader in the effort to protect our ocean habitats.

That's why we, as scientists, researchers, and educators, urged you to expand and strengthen our state's network of MPAs via the adaptive management process of the DMR during the initial round of proposals submitted in November 2023.

Specifically, we supported the expansion of the MPA network to include additional protections for California's most resilient kelp forests. While these vital and iconic ecosystems have faced declines statewide in recent years, kelp forests in some areas have persisted or bounced back quickly in the face of marine heatwaves and other disturbances.⁷ By expanding protections for these resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas, helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby. Globally, kelp restoration has been most successful in places adjacent to/contiguous with healthy kelp forest ecosystems.⁸

Enhancing the protection of California's kelp forests strongly aligns with Goals 1, 2, 3, and 4 of the MLPA by preserving natural diversity, sustaining marine life populations, protecting marine habitats for their intrinsic value, and improving recreational and educational opportunities while minimizing human disturbance. Safeguarding resilient kelp ecosystems will ensure critical habitat preservation for diverse marine species, including endangered sea otters and commercially valuable fish.

⁸ Eger, A.M., Marzinelli, E.M., Christie, H., Fagerli, C.W., Fujita, D., Gonzalez, A.P., Hong, S.W., Kim, J.H., Lee, L.C., McHugh, T.A., Nishihara, G.N., Tatsumi, M., Steinberg, P.D. and Vergés, A. (2022), Global kelp forest restoration: past lessons, present status, and future directions. *Biol Rev*, 97: 1449-1475.

It is also vital that existing California MPAs are able to achieve their stated goals of conserving biodiversity and ecosystem health. During the initial proposals, we encouraged the state to consider increasing protections for MPAs that are currently only lightly or minimally protected, especially in places where weaker or more complicated regulations lead to poor compliance and enforcement. Research has shown that highly and fully protected areas, where few if any destructive or extractive activities are allowed, provide greater ecological benefits than lightly or minimally protected areas.⁹ This global research has been borne out in California's coastal MPAs: Recent research that evaluated the conservation performance of 59 of California's MPAs shows that the network provides positive results that span across multiple ecosystems, with a significant increase in the fish biomass of species targeted by fishing inside fully protected zones.¹⁰ Ten years after establishing fully protected areas in the Channel Islands National Marine Sanctuary, fish targeted by fishing became 50% more abundant and their total biomass increased by 80%.¹¹ These benefits can extend beyond MPA boundaries through positive spillover effects, increasing fish populations in surrounding waters. Another study found that MPAs provide benefits to California spiny lobster fisheries through spillover effects. Over six years, lobster populations grew significantly faster inside MPAs, and commercial catch increased by 225% in the fishing block containing these MPAs.¹²

The state's network currently protects 12% of state waters in highly- or fully-protected MPAs, as defined by Grorud-Colvert et al. (2021), which leaves 4% of the network lacking the most effective conservation protections.¹³ By expanding the level of protection to areas already identified as ecologically important, we can ensure that the area's vulnerable marine resources have the chance to recover and flourish, aligning with the goals of the MLPA and the state's commitment to protect more of its coastal waters.

Our ocean is not just a source of clean air, wildlife, and natural beauty but also a mystery that beckons exploration and discovery. It is our moral imperative to lead the nation and the world in taking bold actions to preserve the sea by following the guide of science, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

President Zavaleta and Honorable Commissioners, you have a chance to take up this imperative and champion the expansion and strengthening of California's network of Marine Protected Areas. By doing so, you will leave a lasting legacy of marine stewardship that will keep California at the forefront of ocean conservation, nationally and globally.

Sacramento, CA 94244-2090

March 14th, 2025

Dear Governor Newsom and Honorable Commissioners of the California Fish and Game Commission:

As marine and environmental scientists, academics and researchers, we are writing to emphasize the critical state of California's marine ecosystems and the importance of ocean conservation. We strongly support expanding Marine Protected Areas (MPAs) to protect our ocean. Following the submission of 20 petitions in the adaptive management process, we support proposals that expand MPAs to better protect kelp forests and strengthen enforcement against illegal fishing, while opposing proposals that would reduce protections for the network.

California's ocean faces unprecedented threats from rising ocean temperatures, biodiversity loss, and other climate stressors. We have lost more than 90% of its kelp forests since 2014, impacting threatened species such as the southern sea otters as they lose their habitat.¹⁴ Marine heatwaves have doubled over the last 30 years, becoming more intense and longer in duration, putting stress on California's marine species and ecosystems.¹⁵

More than one-fifth of the world's coral reefs have been effectively destroyed, and many of those that remain face imminent collapse¹⁶. Average acidity levels have risen by approximately 30 % since the industrial era started, as the oceans have absorbed carbon dioxide emitted to the atmosphere, and are projected to affect our waterways and food sources that we rely on¹⁷. This change in ocean chemistry may make the ocean uninhabitable for certain marine species and bring serious consequences for ocean ecosystems and food webs. About 90 percent of global fish stocks are classified as fully exploited, overexploited or depleted¹⁸. About a tenth are hovering on the edge of collapse. The effects of this loss reverberate throughout marine ecosystems; declines in biodiversity exponentially weaken an ecosystem's ability to recover from disturbances, worsen water quality and lead to widespread resource collapse.

In the face of this urgent crisis, California has the opportunity to take bold, effective action. Our ocean holds some of the most biodiverse ecosystems in the world, and our state has been a global leader in ocean conservation.¹⁹ At this critical juncture, the marine conservation path that

¹⁹ CA Department of Fish and Wildlife "About California's Marine Protected Areas", 2025

California chooses has the opportunity to set the course for the nation and the world. Over two decades ago, the state passed the groundbreaking Marine Life Protection Act (MLPA), which called on the state to create a network of MPAs to enhance sustainable ocean ecosystems²⁰ As threats to California's coastal ecosystems continue, it is critical that MPAs are strengthened and expanded to protect more of our kelp forests. Protecting specific habitat areas, including the remaining areas of stable kelp forests, is a crucial step in safeguarding our diverse marine species and ensuring the long-term well-being of our ocean environments. Kelp forests provide habitat for marine species, create natural barriers to climate change stressors, serve as carbon sinks and support local businesses that depend on California's ocean.²¹ By expanding protections for resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby.²²

No-take MPAs (i.e., "fully" protected MPAs) are especially impactful in conserving and restoring marine ecosystems. Expanding MPAs is critical to close coverage gaps within the network and strengthen protective effectiveness. Recent research that evaluated the conservation performance of 59 of California's MPAs shows that the network provides positive results that span across multiple ecosystems, with a significant increase in the fish biomass of species targeted by fishing inside fully protected zones²³. Ten years after establishing fully protected areas in the Channel Islands National Marine Sanctuary, fish targeted by fishing became 50% more abundant and their total biomass increased by 80%²⁴. These benefits can extend beyond MPAs through positive spillover effects, increasing fish populations in surrounding waters²⁵. Another study found that MPAs provide benefits to California spiny lobster fisheries through spillover effects. Over six years, lobster populations grew significantly faster inside MPAs, and commercial catch increased by 225% in the fishing block containing these MPAs²⁶. All of these metrics tell a story about the effectiveness of MPAs as a tool to improve the health of the marine ecosystem; ocean spaces with more species, and more diverse individuals, have a better chance of survival as climate change intensifies.

Further, no-take marine reserves can improve ecosystem resilience, as the ocean is faced with myriad stressors. By providing areas that serve as buffers against climate change, fully protected MPAs adapt to changing environmental conditions because they better preserve natural

²⁶ Lenihan et al., "Evidence that spillover from Marine Protected Areas benefits the spiny lobster (*Panulirus interruptus*) fishery in southern California", Scientific Reports, January 2021. Retrieved from <https://www.nature.com/articles/s41598-021-82371-5>

interactions within ecosystems, allowing for greater resiliency.²⁷ On the other hand, lightly protected areas do not have the same benefits for biodiversity as fully protected marine reserves and highly protected areas that achieve similar conservation outcomes. As California moves forward to protect more ocean space, areas that count as “conserved” should align with a clear scientific standard that effectively protects biodiversity.

We oppose proposals that promote unsustainable fishing practices that place pressure on California’s marine ecosystems, creating cascading effects on the whole marine species that depend on them. These practices threaten to disrupt vital ecological relationships and damage the long-term health of our coastal waters.

To ensure an effective implementation of MPAs, we support proposals that strengthen comprehensive enforcement mechanisms to minimize poor compliance and prevent illegal fishing. Research has shown that greatest ecological benefits can be achieved in areas with few extractive activities²⁸. However, without effective monitoring and well-defined rules, activities may continue in MPAs that threaten the marine ecosystems they were designed to protect. Therefore, we advocate for expanding MPAs while ensuring robust enforcement measures.

Enhancing the protection of California's kelp forests strongly aligns with Goals 1, 2, 3, and 4 of the MLPA by preserving natural diversity, sustaining marine life populations, protecting marine habitats for their intrinsic value, and improving recreational and educational opportunities while minimizing human disturbance.²⁹ Safeguarding resilient kelp ecosystems will ensure critical habitat preservation for diverse marine species, including endangered sea otters and commercially valuable fish.

In order to keep track of progress and allow California’s efforts to set the standard nationally and globally, the state should use scientific criteria to distinguish between different levels of protection and classify existing protected areas. A scientific framework should be applied to evaluate proposals for areas that need to be conserved or areas where protections should be strengthened for existing MPAs.

Our ocean is a source of clean air, wildlife, and natural beauty, but also a mystery that beckons preservation and exploration. We cannot afford to lose more of our vital kelp forests. California has the opportunity to lead the nation and the world in taking bold action to preserve the sea,

RE: CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Dear President Zavaleta and Honorable Commissioners:

As marine and environmental businesses and recreationists, we know first hand the value California's nature holds for residents and visitors alike. California's ocean holds some of the most biodiverse ecosystems in the world and the state has been a global leader in ocean conservation to keep it that way. Now, we are writing to you to urge the Fish and Game Commission (FGC) to prioritize strengthening the state's existing network of Marine Protected Areas (MPAs) so that California can continue to safeguard its treasured ocean life and set an example for the nation and the globe of responsible environmental stewardship.

California's coastline serves as a captivating haven for individuals seeking to revel in its myriad wonders. Our coast offers many recreational activities, such as surfing, swimming, kayaking, scuba diving, whale watching, and an array of other pursuits. That is why, as business owners and community members who rely on a vibrant ocean, we are worried about the ongoing biodiversity crisis in our ocean. Over the last half-century, marine vertebrate populations have declined by nearly 50 percent, and the number of endangered marine species is growing globally.³⁰ Marine heatwaves have doubled over the last 30 years, and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.³¹

Climate change, combined with coastal pollution and marine debris, harms wildlife through entanglement, ingestion and habitat disruption.³² Unsustainable fisheries remain the number one driver of biodiversity loss in the ocean.³³ Yet overfishing continues. About 90 % of global fish stocks are classified as fully exploited, overexploited or depleted.³⁴ On the U.S. West Coast, six commercially caught fish stocks, including three species of salmon, remain on the overfished and

³⁴ Mukhisa Kituyi and Peter Thomson, "[90% of fish stocks are used up – fisheries subsidies must stop emptying the ocean](#)," World Economic Forum, July 13, 2018.

overfishing list.³⁵ Overfishing can result in cascading effects throughout the marine ecosystems; declines in biodiversity's ability to recover from disturbances, widespread ecosystem/habitat collapse and undermining the ocean's ability to perform its role as a carbon sink.³⁶ As a business that relies on the ocean's ecosystem for sustenance and profits, these statistics are extremely worrisome.

In the face of this urgent crisis, the California government has the opportunity to take robust and effective action. As the adaptive management process following the submission of 20 petitions has opened up, we support proposals that expand MPAs to better protect kelp forests and strengthen enforcement against overfishing. Research has shown that greatest ecological benefits can be achieved in areas with few extractive activities³⁷.

No-take marine reserves (i.e., "fully" protected MPAs) are one of the most effective ways to conserve biodiversity and ecosystem function and improve ecosystem resilience, as the ocean is faced with myriad stressors. Marine reserves provide areas that serve as buffers against the impacts of climate change and are able to adapt to acidifying waters, rising sea levels, intensified storm events, and decreases in oxygen availability. Ten years after establishing fully protected areas in the Channel Islands National Marine Sanctuary, fish targeted by fishing became 50% more abundant and their total biomass increased by 80%³⁸.

We oppose proposals to weaken the MPA network as that could place more pressure on California's marine ecosystems. We've lost over 90% of our kelp forests off the coasts of Northern California since 2014³⁹, creating detrimental effects on the whole marine species that depend on them. We cannot afford to lose more of these vital kelp forests.

Stronger MPA coverage and healthier marine ecosystems are critical for local marine businesses like us who depend on California's vibrant ocean. California's ocean economy provides 1,035 million jobs for California residents, over \$143 billion in output, and \$84 billion in gross state product (GSP), contributing to about 7% of the state's workforce.⁴⁰ However, if we continue to not take any action to preserve the ocean, then this will decrease over time. Not only will hundreds of thousands of people be out of a job, but we will not receive the intrinsic benefits we receive from having access to our beautiful California coasts. We are asking the government to take real action to prevent this great loss, as we rely on the ocean for so much more than just our livelihoods.

A broad set of Californians love the ocean, and our community should be included in making decisions that impact our state's coastal waters. It's important that the diversity of California's ocean users is reflected in this political process. This includes youth, recreational users, conservation groups, businesses, ocean lovers and more.

The ocean is a source of clean air to breathe, wildlife to marvel at, beauty and mystery. It is imperative that California continue to lead the nation and world in taking bold action for the sake of the sea and its future.

Sincerely,

Governor Newsom signed Executive Order N-82-20 in which he supported the creation of more Marine Protected Areas (MPAs). These help give safe havens for the animals in the area, animals like the California Sea Lion, our iconic Elephant Seals, and the adorable Harbor Seals which all use the Channel Islands National Marine Sanctuary along with others along the coast, the Southern Sea Otters which rely on the kelp forests in our MPAs, the humongous Mola Mola which live in and around the Point Lobos SMR, our protected Abalone which live in MPAs like Sea Lion Cove SMCA and the Edward F. Ricketts SMCA, and so many more.

These amazing animals are why we are advocating for expanding California's network of MPAs, in particular to protect key kelp forests along the coast.

In the past month, CALPIRG volunteers engaged over 12,000 UC students in one-on-one conversations, and educated over 18,000 overall about expanding Marine Protected Areas in California. We have experienced overwhelming support!

CALPIRG Students

Dear California State Leaders,

While approximately 16% of California's coastal waters are conserved, only 12% have the level of protection scientists say is needed to defend against biodiversity loss and climate impacts. California's unique network of 124 Marine Protected Areas (MPAs) makes the state a global leader in protecting the critical habitats and life existing in and around our oceans. However, with a warming planet, and historic species extinctions, it is clear that California must strengthen and expand our existing network of protections with highly and fully protected MPAs. Highly protected areas only allow light extractive activities, while fully protected areas do not allow any extractive or environmentally destructive activities. I am asking you to call for the adoption of more highly and fully protected marine areas, which must be the standard for protecting 30% of our ocean by 2030.

Signed,
6,000 UC Students

or scan the QR Code to view student support

CALPIRG activists also educated middle school students in the Los Angeles area about the benefits of MPAs for endangered species. Over 200 students and their teachers participated in a lesson about the endangered Southern Sea Otter and the importance of habitat protection through Marine Protected Areas!

Dear Gov. Newsom and California officials,

As decades of pollution, industrial-scale fishing, and climate change threaten the ocean, I urge you to support expanding California's marine protected areas to provide safety for marine wildlife. Please protect the state's last remaining kelp forests and strengthen enforcement in existing marine protected areas.

With your leadership, California can create a safe harbor for wildlife, including sea otters, shore birds, and sea turtles. And our state can continue to lead the country and the world in ocean conservation.

Sincerely,

Assembly District 2

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

Environment California Research & Policy Center has one mission that drives everything we do: to protect our natural world. We envision a better, greener California: one that protects and restores more places where all life can thrive and offers us and our children the opportunity to live healthier, more enriching lives.

Azul is a grassroots organization working to conserve marine resources. We treasure the life-sustaining force of the ocean, as well as the physical and spiritual nourishment it provides us. We are a Gente powered and led effort, focused first on celebrating our rich Latino conservation traditions and connecting them to current solutions. Our work is based in authentic engagement, community building, and collaboration.

That's why we welcomed the goal set by Governor Newsom and his Administration of protecting 30% of lands and coastal waters by 2030 ('30x30'), which was codified with the passage of SB337 this Fall. This goal reflects the new scientific consensus that humanity must set aside much more of the ocean to sustain healthy marine life populations and ecosystems.

The State of California's network of Marine Protected Areas (MPAs), created by the Marine Life Protection Act (MLPA), has demonstrated that area-based marine protection works: during the state's recently completed Decadal Management Review (DMR), scientific analysis showed that the network has generally succeeded in protecting ocean habitats, increasing biomass of fishery-targeted species, and enhancing the climate resilience of California's coastal ecosystems.

However, the amount of coastal waters currently protected within the statewide MPA network falls far below the state's 30% goal. Only 12% of California state waters are covered in highly to fully protected areas – the types of protected areas known to provide the best conservation outcomes – and an additional 4% is covered in lightly protected areas that allow considerable human impacts within their boundaries. In total, 16% of state waters are currently protected within an MPA.

We must do more. Coastal and marine ecosystems face growing threats related to climate change and increased human use, as well as emerging threats from new ocean uses such as offshore wind and aquaculture. In the face of these threats, now is the time to make significant improvements to the existing MPA network via an adaptive management process to better protect our ocean and coastal resources in the future.

That is why we are submitting two petitions for rulemaking intended to strengthen the network's ability to conserve critical habitat types and better manage the network. Each of the two petitions stands on their own and are based on new and updated science that were not available to policymakers at the time of designating the original network. The areas we have proposed for expansion or strengthening are prime examples of where California's ocean life stands to benefit through new or updated permanent, area-based protections created under the MLPA.

The areas we are proposing are likely not the only areas that would fit the criteria for enhanced protection laid out in our petitions, nor are our criteria the only ecological criteria that could be used to systemically strengthen the existing network in line with the state's new 30x30 goal. We urge the Fish and Game Commission and all relevant state agencies to conduct analyses that will highlight the habitat types, species, and regions underserved by the current network, with an eye toward building a state MPA network that is resilient in the face of rising ocean temperatures, emerging threats, and continued pressure on endangered and threatened species.

Californians can be proud that we have led the way in ocean conservation over the past decades. It's time to take up the mantle of leadership once again, globally and nationally, not only to create a better future for the amazing life off of our own coasts, but also to inspire other decision makers to do so along every coastline, in every part of the ocean.

With your leadership, our groundbreaking marine protected area network can take its next leap forward.

Sincerely,

Laura Deehan

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Dear President Sklar and Honorable Commissioners,

We are writing in support of Environment California Research & Policy Center's petition to increase protections for remaining persistent kelp forests in California state waters through the Marine Life Protection Act (MLPA)'s adaptive management process. As kelp forests contend with increased threats from climate change, predator loss, and invasive species, taking action to preserve the highly persistent kelp forest areas that have so far withstood these threats will be critical to the state's efforts to conserve this essential ecosystem and achieve area-based conservation targets.

California's kelp forests provide numerous and invaluable ecological and environmental benefits. These underwater ecosystems serve as critical nurseries for a wide variety of marine species, providing shelter and food for numerous fish, invertebrates, and marine mammals. They support thriving commercial and recreational fisheries, attract tourists and divers, and can help dampen the impacts of coastal erosion and storm impacts. However, recent decades have seen a decline in kelp forest cover across the Pacific West Coast, including California, due to a combination of natural and human-induced factors such as a major marine heatwave and the loss of predators of kelp grazers by overfishing and disease.

Marine protected areas are a critical tool for increasing the resilience of kelp ecosystems in the face of these stressors. However, the state of California's MPA network has gaps in coverage for the state's most persistent kelp forests. Recent analyses identifying the extent of persistent giant kelp and bull kelp forests in California found only 20.9% of the most highly persistent forests in Central California, 8.4% in Southern California, and less than 1% in Northern California are fully protected.^{1,2} Improving the MPA network to better protect our remaining stable kelp forests will aid in increasing the resilience of these ecosystems and prevent further loss of kelp cover.

State officials should utilize all tools at their disposal to address the ongoing threats to kelp forests. Marine protected areas like those created through the California MLPA are a tool that

¹ Arafeh-Dalmau et al. 2021, Southward decrease in the protection of persistent giant kelp forests in the northeast Pacific. *Communications Earth & Environment*. <https://doi.org/10.1038/s43247-021-00177-9>

² Arafeh-Dalmau et al. 2023, Shortfalls in the protection of persistent bull kelp forests in the USA. *Biological Conservation*. <https://doi.org/10.1016/j.biocon.2023.110133>

has been underutilized in efforts to protect and restore our kelp forests—and one we cannot afford to ignore.

The state has an opportunity to incorporate these new scientific findings into the state network of marine protected areas, ensuring the network better addresses emerging threats to our kelp forests and provides the best possible support for restoration efforts. The petition submitted by Environment California RPC is supported by recent scientific analysis employing 35 years of satellite data to identify persistent kelp forests, and is based on extensive global research demonstrating the benefits of highly to fully protected areas.

As scientists who have spent decades studying our ocean ecosystems, we urge you to take swift action to protect and preserve our coastal and marine resources and natural heritage in the face of increasing climate impacts. Our future depends on it.

Thank you for your ongoing efforts to protect California's ocean heritage, and we look forward to engaging in this important work for years to come.

Re: Support for new MPA to protect kelp, seabirds, and sharks of Santa Cruz

Dear President Sklar and Honorable Commissioners,

As a local seabird and marine ecosystem biologist, I am writing in support of a new State Marine Reserve proposed by Environment California and Azul to protect kelp, seabirds, and sharks in coastal waters of Santa Cruz County, CA. As climate change impacts ocean conditions, corresponding shifts in fishing behavior will create new risks for forage fish and place increasing pressure on ocean wildlife. Providing protections now for forage fish within critical nearshore kelp forests and sandy bottom environments is essential for mitigating future threats to migratory seabirds, whales, and sharks.

The proposed MPA off Soquel Point in Santa Cruz is positioned within the northern Monterey Bay bight, a biologically rich and unique marine region encompassing nearshore kelp forests, sandy beach, and deeper soft-bottom habitats. Physically, these waters are influenced by the Año Nuevo upwelling front and the area is characterized by a broad shallow shelf. These features create a unique ocean circulation pattern where freshly upwelled and nutrient rich cold-water eddies become slower and recirculate within this semi-enclosed bay¹. These waters are ideal growing conditions for phytoplankton, crustaceans and cephalopods, larval fishes and forage fishes (anchovies, sardines, herring), which create the base of the food web for predatory sharks, seabirds, and whales.

This biologically diverse area is recognized as important to more than 100 species of marine seabirds and shorebirds, mammals and sea turtles (Harvey & Benson 1997², Henkel 2006³, Neuman et al. 2008⁴). In the summer months, enormous flocks of Sooty Shearwater travel 20,000 km from New Zealand 20,000 km to feed on the anchovy schools (Figure 1) within the

¹ Graham and Largier 1997. [Upwelling shadows as nearshore retention sites: the example of northern Monterey Bay](#). Continental Shelf Research, 1997

³ Henkel 2004. [Seasonal Abundance of Marine Birds in Monterey Bay, California](#). Western Birds: 126-146.

⁴ Neuman, Henkel, and Page. 2008. [Shorebird use of sandy beaches in central California](#) Waterbirds.

northern bight of the Bay (Figure 2) (Adams et al. 2012⁵). This annual natural feeding frenzy phenomenon is described as the “River of Birds” and is fueled by the dense nearshore aggregations of anchovies, which are also host to iconic lunge-feeding humpback whales,⁶ pelicans, and gulls.

An “Oasis Effect” has been described for these nearshore areas in California⁷ by which whales and other marine animals aggregate in large numbers to feed in nearshore “oases” of forage fish during times of poor food availability offshore. Similarly, Endangered Leatherback Sea Turtles travel from offshore areas to feed within the bight when ocean conditions nearshore favor jellyfish⁸. The connection between nearshore and offshore forage fish dynamics figures importantly in the future conservation of these globally connected migratory species⁹.

However, these areas are not protected from extractive uses including fisheries. Despite 30 years of protected designation within the Monterey Bay National Marine Sanctuary, Adelaars et al. 2012¹⁰ found that the relative level of conservation, particularly within the northern bay sandy shelf area of the Sanctuary, is low. The Sanctuary primarily protects the waters from offshore oil and gas exploitation, but does not protect against the impacts of fishing and many other human activities which may compromise thriving marine food webs. Large important areas of nearshore sandy-bottom and kelp forest habitats in Monterey Bay remain unprotected (see Figure 7 in Adelaars et al.).

In addition, over the past 10 years our coastal ecosystems have seen significant shifts in the face of a changing climate. Warming waters – including intense episodic marine heatwaves – have caused mobile species to temporarily shift their geographic ranges to remain within suitable environmental conditions,¹¹ often increasing the chances for harmful interactions with fisheries and other human activities. In the Monterey Bay, warming waters have led to habitat

compression for whales and other mobile marine species, causing them to move inshore more frequently to feed and resulting in record-high whale entanglements in fishing gear.¹² Other species such as Common Murre, Rhinoceros Auklets and Brandt's Cormorant engage in prey switching as a strategy to buffer prey availability¹³, utilizing species from kelp forests and nearshore ecosystems when offshore species are less abundant. Maintaining healthy nearshore environments with a diversity of prey sources for predators experiencing climatic stressors is critical for the climate resilience of the overall ecosystem. However, the very changes underpinning these shifts in wildlife behavior can also influence fisher behavior,¹⁴ putting pressure on these food webs at the very time that they're needed to maintain ecosystem resilience.

Conservation of healthy forage fish populations in the face of climate change is critical. A recent review highlighted the need for conservation of the prey base with regard to the seabird populations in California, noting that where humans and wild predators coexist, human fishers are far more efficient in their prey harvesting activities¹⁵. Further, a global review by Cury et al. 2011 suggested a precautionary approach of leaving one third of the fish biomass for the seabirds¹⁶. Both of these studies point to the need for establishing protections of forage fish for seabirds which are not exploited to full capacity. A new state MPA would strengthen protections for forage fish now, before shifting ocean conditions bring new threats to this area. The proposed MPA area is not currently not currently subject to any significant commercial take, making protecting this area now of minimal economic impact to existing fisheries.

Conservation in this area is aided by the participation of actively engaged citizen scientists. Citizens in Santa Cruz County are very concerned about marine conservation and actively participate in citizen science activities including water quality (Coastal Watershed Council), intertidal and subtidal monitoring (LIMPETS¹⁷, Reef Check California) and beach monitoring (BeachCOMBERS, Nevins et al. 2011¹⁸). Since 1997, citizen scientists have been monitoring

¹⁶ Cury et al. 2011. [Global Seabird Response to Forage Fish Depletion—One-Third for the Birds](#). Science

¹⁷ Pearse et al. 2015 [Long-term monitoring of surfgrass meadows in the Monterey Bay National Marine Sanctuary : recovery followed by stability after the termination of a domestic sewage discharge](#).

¹⁸ Nevins, Benson, Phillips, de Marignac, DeVogelaere, Ames and Harvey. 2011. [Coastal Ocean Mammal and Bird Education and Research Surveys \(BeachCOMBERS\), 1997-2007: ten years of monitoring beached marine birds and mammals in the Monterey Bay National Marine Sanctuary](#).

impacts to marine birds and mammals in and around the proposed MPA, contributing significant evidence for understanding human impacts, documenting the recovery of species in the region, and complementing long-term monitoring efforts by the state.

Northern Monterey Bay is host to a multitude of ocean-focused activities and these have created a thriving nature-based economy: surfers treasure the waves of Pleasure Point from Soquel Point to Capitola; beachgoers enjoy tidepooling, birdwatching, fossil hunting, and fishing along the rocky and sandy shores of New Brighton and Seacliff Beaches. Recently, locals have called this area a “Shark Park”, due to the increased use of the area by juvenile white sharks as seen by drones. This natural phenomenon has created a boon for shark-ecotourism businesses based out of Santa Cruz and Capitola (Figure 3). An established MPA in the area would help provide long-term protections for this oft-maligned species which requires nearshore sandy beaches for growth and survival, while supporting local nature-focused businesses.

The proposed MPA would also amplify nearby land-based protected areas, including four California State Parks (New Brighton, Seacliff Beach, Manresa and Sunset State Beaches). Establishing a land-sea connection between terrestrial and coastal protected areas will not only enhance broader ecological ecosystem function, but could connect users within the proposed MPA to interpretive aspects of state parks, which offer extensive access (trails, beach access, RV and tent camping) and interpretive resources (rangers and visitor centers).

In summary, the proposed MPA would provide multiple species and habitats ecological benefits and greater resilience in the face of climate-related impacts and shifting fishing behaviors, as well as leverage local citizen efforts to increase coastal protection and enhancements for marine species. This effort would enable future generations to enjoy firsthand the natural phenomena of the River of Birds by migratory Sooty Shearwaters and the nursery area found to be important for juvenile White Sharks by protecting the basis of the food web in this ecosystem.

Thank you for considering this proposed designation.

Sincerely,

A handwritten signature in cursive script, reading "Hannah Nevins". The signature is written in dark ink on a light background.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

As scientists, researchers, and educators who work to understand our changing oceans and inspire the next generation of ocean stewards, we write to express our support for the expansion and strengthening of California's network of Marine Protected Areas (MPAs) to help safeguard the state's diverse marine ecosystems and ensure the long-term resilience of our ocean habitats.

Globally, the ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. California's coastal ecosystems have not been spared these global trends: Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Only an average of 55 Pacific leatherback turtles are now found foraging off California's coast every year, a notable decrease from the yearly average of 128 Pacific leatherbacks observed in the region from 1990 to 2003.² Marine heatwaves have doubled over the last 30 years and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.³

Now, California has a unique opportunity to take bold, effective and science-based action to conserve its marine biodiversity by expanding its groundbreaking network of state MPAs. MPAs, like state parks on land, protect unique and important ocean habitats from destructive human activities that can damage the integrity of marine ecosystems. Globally and in California, strongly protected and well-enforced MPAs have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate

² Benson, Scott R., Karin A. Forney, Jeffrey E. Moore, Erin L. LaCasella, James T. Harvey, and James V. Carretta. ["A Long-Term Decline in the Abundance of Endangered Leatherback Turtles, Dermochelys Coriacea, at a Foraging Ground in the California Current Ecosystem."](#) *Global Ecology and Conservation* 24 November 2020.

³ IPCC (2021). Summary for Policymakers. In: Climate Change 2021: The Physical Science Basis. Contribution of Working Group I to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change [Masson-Delmotte VP, Zhai A, Pirani SL, Connors C, Péan S, et al. (Eds.)].;

change on our oceans.⁴ Well-designed and well-implemented reserves better preserve natural interactions within ecosystems, allowing for greater resiliency in the face of rising global temperatures and changing environmental conditions.⁵

California's network of MPAs, established through the 1999 Marine Life Protection Act, celebrated its tenth anniversary last year. The state's recent Decadal Management Review (DMR) analyzed a decade of monitoring data and showed that the MPA network has generally been effective at protecting ocean habitats and increasing fisheries-targeted species' biomass.⁶ Now, in the face of increasing threats, we need to build on this system and maintain California's role as a national and global leader in the effort to protect our ocean habitats.

That's why we, as scientists, researchers, and educators, urge you to expand and strengthen our state's network of MPAs via the adaptive management process of the DMR.

Specifically, we support the expansion of the MPA network to include additional protections for California's most resilient kelp forests. While these vital and iconic ecosystems have faced declines statewide in recent years, kelp forests in some areas have persisted or bounced back quickly in the face of marine heatwaves and other disturbances.⁷ By expanding protections for these resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas, helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby. Globally, kelp restoration has been most successful in places adjacent to/contiguous with healthy kelp forest ecosystems.⁸

It is also vital that existing California MPAs are able to achieve their stated goals of conserving biodiversity and ecosystem health. We encourage the state to consider increasing protections for MPAs that are currently only lightly or minimally protected, especially in places where weaker or more complicated regulations lead to poor compliance and enforcement. Research has shown that highly and fully protected areas, where few if any destructive or extractive activities are allowed, provide greater ecological benefits than lightly or minimally protected areas.⁹ The

⁸ Eger, A.M., Marzinelli, E.M., Christie, H., Fagerli, C.W., Fujita, D., Gonzalez, A.P., Hong, S.W., Kim, J.H., Lee, L.C., McHugh, T.A., Nishihara, G.N., Tatsumi, M., Steinberg, P.D. and Vergés, A. (2022), Global kelp forest restoration: past lessons, present status, and future directions. *Biol Rev*, 97: 1449-1475.

⁹ Kirsten Grorud-Colvert *et al.*, [The MPA Guide: A framework to achieve global goals for the ocean](#). *Science* **373**, eabf0861(2021). DOI:10.1126/science.abf0861

state's network currently protects 12% of state waters in highly- or fully-protected MPAs, as defined by Grorud-Colvert et al. (2021), which leaves 4% of the network lacking the most effective conservation protections.¹⁰ By expanding the level of protection to areas already identified as ecologically important, we can ensure that the area's vulnerable marine resources have the chance to recover and flourish.

Our ocean is not just a source of clean air, wildlife, and natural beauty but also a mystery that beckons exploration and discovery. It is our moral imperative to lead the nation and the world in taking bold actions to preserve the sea, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

President Sklar and Honorable Commissioners, you have a chance to take up this imperative and champion the expansion and strengthening of California's network of Marine Protected Areas. By doing so, you will leave a lasting legacy of marine stewardship that will keep California at the forefront of ocean conservation, nationally and globally.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this urgent matter. Together, we can ensure a healthier, more abundant future for the unique marine ecosystems that define California.

Re: Strengthening and Expanding California's Marine Protected Area Network

Dear President Sklar and Honorable Commissioners,

As an Assemblymember and advocate for the health and vitality of California's coastal ecosystems, I write to express my support for the expansion of the state's network of Marine Protected Areas (MPAs) to include the expansion and strengthening of Point Buchon SMCA and Natural Bridges SMR. Protecting specific habitat areas, including the remaining areas of stable kelp forests, and increasing the rigor of existing marine protected areas are crucial steps in safeguarding our diverse marine species and ensuring the long-term well-being of the ecosystems off our shores.

The state of our ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Pollution, overfishing, offshore drilling and other human activities are threatening ocean habitat and marine species, while the changing climate increases the risk of extreme weather events and puts even greater stress on ocean ecosystems.^{2,3}

In the face of these mounting threats, California has a unique opportunity to take bold and effective action to conserve ocean habitats and ensure a greater abundance of life off our coast. Over two decades ago, the state passed the groundbreaking Marine Life Protection Act (MLPA), which called on the state to use one of the most powerful tools for ocean conservation: marine protected areas (MPAs).

¹ Meredith McPherson et. al, [Large-scale shift in the structure of a kelp forest ecosystem co-occurs with an epizootic and marine heatwave](#), Communications Biology, March 5, 2021

² James Horrox, Steve Blackledge and Kelsey Lamp, "[New Life for the Ocean: How marine protections keep our waters wild](#)," Environment America Research and Policy Center & Frontier Group, February 2021.

³ Arafah-Dalmau et al., [Integrating climate adaptation and transboundary management: Guidelines for designing climate smart marine protected areas](#), One Earth 6, 1–19 November 17, 2023 ^a 2023 Published

MPAs, like state parks on land, protect unique and important ocean habitats from activities that can damage ocean life. Areas that are strongly protected have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate change on our oceans.⁴ California's network of MPAs, foreseen in the MLPA, celebrated its tenth-anniversary last year, and the state's decadal management review showed that marine life in existing reserves better withstood recent marine heatwaves, and reserves across the state had higher biomass of commercially caught fish than areas lacking protection.⁵ Now, we need to build on this system and maintain California's role as a leader, both nationally and globally, in the fight to protect more ocean habitats.

That's why I urge you to expand our state's network of MPAs within the adaptive management process of the Decadal Management Review. In particular, I am writing in support of the strengthening and expansion of Point Buchon SMCA and Natural Bridges SMR off the coast of my community.

We, as Californians, have a deep love for our ocean and feel a profound responsibility to participate in decisions that impact our state's coastal waters. Our ocean is not just a source of clean air, wildlife, and natural beauty but also a mystery that beckons exploration and discovery. It is our moral imperative to lead the nation and the world in taking bold actions to preserve the sea in our own backyard, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

In conclusion, we strongly urge you, Honorable Commissioners, to expand California's MPA network to encompass areas of persistent kelp, with a particular focus on safeguarding the strengthening and expansion of Point Buchon SMCA and Natural Bridges SMR.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "Dawn Addis". The signature is fluid and cursive, with the first name "Dawn" and last name "Addis" clearly distinguishable.

RE: Petition to Modify the CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Dear President Sklar and Honorable Commissioners:

As a mayor and advocate for the health and vitality of California's coastal ecosystems, I write to express my unwavering support for the expansion of the State's network of Marine Protected Areas (MPAs), including the expansion of Natural Bridges SMR and the implementation of a new MPA at Pleasure Point. Protecting specific habitat areas, including the remaining areas of stable kelp forests, and increasing the rigor of existing marine protected areas are crucial steps in safeguarding our diverse marine species and ensuring the long-term well-being of the ecosystems off our shores.

The state of our ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Pollution, overfishing, offshore drilling, and other human activities are threatening ocean habitats and marine species, while the changing climate increases the risk of extreme weather events and puts even greater stress on ocean ecosystems.^{2 3}

In the face of these mounting threats, California has a unique opportunity to take bold and effective action to conserve ocean habitats and ensure a greater abundance of life off our coast. Over two decades ago, the State passed the groundbreaking Marine Life Protection Act (MLPA), which called on the State to use one of the most powerful tools for ocean conservation: MPAs.

MPAs, like state parks on land, protect unique and important ocean habitats from activities that can damage ocean life. Areas that are strongly protected have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate change on our oceans.⁴

⁴ James Horrox, Steve Blackledge and Kelsey Lamp, [How Life on the Ocean: How marine protections keep our waters wild](#), Environment America Research and Policy Center & Frontier Group, February 2021.

California's network of MPAs, foreseen in the MLPA, celebrated its tenth anniversary last year, and the State's decadal management review showed that marine life in existing reserves better withstood recent marine heatwaves, and reserves across the State had higher biomass of commercially caught fish than areas lacking protection.⁵

Now, we need to build on this system and maintain California's role as a leader, both nationally and globally, in the fight to protect more ocean habitats.

That is why I urge you to expand our State's network of MPAs within the adaptive management process of the Decadal Management Review. In particular, I am writing in support of the expansion of the Natural Bridges SMR and the implementation of a new MPA at Pleasure Point off the coast of my community, Santa Cruz.

As the author of the Marine Life Management Act and the Marine Life Protection Act, I am fully supportive of Environment California's request for additional marine protected areas. When I was Speaker pro tempore of the California Assembly (1996–2002), I was deeply involved in this subject. In my last year, I also authored the California Ocean Trust Act, which created the California Ocean Science Trust (Cal-OST). Cal-OST has written extensively about the successes within the MPAs, and more would be a very good idea.

We, as Californians, have a deep love for our ocean and feel a profound responsibility to participate in decisions that impact our State's coastal waters. Our ocean is not just a source of clean air, wildlife, and natural beauty but also a mystery that beckons exploration and discovery. It is our moral imperative to lead the nation and the world in taking bold actions to preserve the sea in our own backyard, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

In conclusion, we strongly urge you, Honorable Commissioners, to expand California's MPA network to encompass areas of persistent kelp, with a particular focus on safeguarding Natural Bridges State Marine Reserve and implementing a new MPA at Pleasure Point. By doing so, you will leave a lasting legacy of environmental stewardship.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this proposal. Together, we can ensure a healthier, more abundant future for the unique marine ecosystems that define California.

Sincerely,

Fred Keeley
Mayor

Sacramento, CA 95814

November 30th, 2023

RE: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Dear President Sklar and Honorable Commissioners:

Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ California sea otters are still listed as threatened under the Endangered Species Act, and one of the biggest barriers to this species' recovery and range expansion is increased shark bites from a lack of kelp forest cover. Marine

¹ Meredith McPherson et. al, [Large-scale shift in the structure of a kelp forest ecosystem co-occurs with an epizootic and marine heatwave](#), Communications Biology, March 5, 2021

heatwaves have doubled over the last 30 years, and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.²

In the face of these mounting threats, California has a unique opportunity to take bold and effective action to conserve ocean habitats and ensure a greater abundance of life off our coast. Over two decades ago, the state passed the groundbreaking Marine Life Protection Act (MLPA), which called on the state to use one of the most powerful tools for ocean conservation: marine protected areas (MPAs).

MPAs, like state parks on land, protect unique and important ocean habitats from activities that can damage ocean life. Areas that are strongly protected have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate change on our oceans.³ By providing areas that serve as buffers against climate change, fully protected MPAs adapt to changing environmental conditions because they better preserve natural interactions within ecosystems, allowing for greater resiliency.⁴

California's network of MPAs, foreseen in the MLPA, celebrated its tenth anniversary last year, and the state's decadal management review showed that MPAs effectively protect ocean habitats and increase fishery-targeted species' biomass. Now, we need to build on this system and maintain California's role as a national and global leader in the fight to protect more ocean habitats.

Protecting specific habitat areas, including the remaining areas of stable kelp forests is a crucial step in safeguarding our diverse marine species and ensuring the long-term well-being of our ocean environments.

We support the expansion of the MPA Network to include some of the most resilient kelp forests along California's coastline, by expanding Cabrillo State Marine Reserve, Point Dume State Marine Conservation Area, South Point State Marine Reserve, Gull Island State Marine Reserve, Point Conception State Marine Reserve, Natural Bridges State Marine Reserve, and by creating a new MPA around the beautiful kelp forest off Pleasure Point near Santa Cruz. While kelp forests have faced declines statewide in recent years, in these areas they have persisted or bounced back quickly in the face of marine heatwaves and other disturbances.⁵ By expanding protections for

⁵ California Department of Fish and Wildlife. (2022). California's Marine Protected Area Network Decadal Management Review.

these resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas, helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby.

Enhancing the protection of California's kelp forests strongly aligns with Goals 1, 2, 3, and 4 of the MLPA by preserving natural diversity, sustaining marine life populations, protecting marine habitats for their intrinsic value, and improving recreational and educational opportunities while minimizing human disturbance.⁶ Safeguarding resilient kelp ecosystems will ensure critical habitat preservation for diverse marine species, including endangered sea otters and commercially valuable fish.

Our ocean is a source of clean air, wildlife, and natural beauty, but also a mystery that beckons preservation and exploration. California has the opportunity to lead the nation and the world in taking bold action to preserve the sea, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

Environmental Action was founded in 1970, on the first Earth Day, as a community of grassroots environmental activists working for a cleaner, greener world. We are submitting the following 2,487 signatures in support of Environment California Research & Policy Center's petitions for rulemaking in the state's adaptive management process for the California Marine Protected Area network.

Each of the 2,487 people signed the following letter:

Dear Governor Newsom,

Sea otters bobbing in the surf. Whales diving deep to feed. Seabirds flying above. Our state's coastline is home to wildlife, large and small. As Californians, we've taken steps to protect this ocean heritage by creating a network of marine protected areas that, just like state parks on land, help protect and restore ocean life.

I urge you to strengthen this network through the Decadal Management Review in line with your important goal of protecting 30 percent of our state waters by 2030. Specifically, I urge you to expand the network to protect the state's last remaining kelp forests, critical homes to fish and sea otters, and to strengthen existing areas that don't yet provide high levels of protection to ocean life.

With your support, California can expand this network of ocean parks to create a brighter future for the ocean life that calls our state home, and hopefully inspire others across the country and around the world to follow our lead.

Sincerely,

As a group that works to protect our most amazing and at risk wildlife across the country, we know that preserving and restoring habitats will be critical to seeing our ocean life thrive. Whether it's a return of sea otters to more of the coastline or more abundant seabirds flying above our heads, expanding and strengthening California's network of marine protected areas will create a more hopeful future for the wild animals that call the state's coastline home.

But the decisions made on California's coast will not only impact the state's wildlife: as with many environmental issues, California's actions here have the potential to reverberate far and wide. If the state acts with ambition during this adaptive management process to fulfill the state's 30 by 30 commitment, it can set the national standard for ocean conservation, leading the country and the globe forward to a better future for our oceans.

Sincerely,

Patrick Kelly-Fischer

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

CALPIRG Students is a statewide, student-run, and student-funded organization that works to protect the environment, make college affordable, and promote civic engagement. We have over 20,000 dues-paying members across the UC system and have been on campus for almost 50 years advocating for students on issues that students care about most. As part of our ongoing efforts to win better protections for California's ocean, we are submitting 214 signatures from our supporters on campuses across the state in support of Environment California Research & Policy's petitions for rulemaking in the state's adaptive management process for the California marine protected area network.

Each of the 214 people signed the following letter:

To: Governor Gavin Newsom

Sea otters bobbing in the surf. Whales diving deep to feed. Seabirds flying above. Our state's coastline is home to wildlife, large and small. As students and young people, we are proud to live in a state that has taken steps to protect this ocean heritage for future generations. California's network of marine protected areas are places that, just like state parks on land, help protect and restore ocean life.

I urge you to strengthen this network through the Decadal Management Review in line with your important goal of protecting 30 percent of our state waters by 2030. Specifically, I urge you to expand the network to protect the state's last remaining kelp forests, critical homes to fish and sea otters, and to strengthen existing areas that don't yet provide high levels of protection to ocean life.

With your support, California can expand this network of ocean parks to create a brighter future for the ocean life that calls our state home, and hopefully inspire others across the country and around the world to follow our lead.

As young people, we are working everyday to tackle the most pressing problems facing our ocean, our climate and our communities. That's why we are heartened to see state leaders like

Governor Newsom and the state legislature set bold and ambitious goals to protect more of our coastline.

But goals need to be followed by action to ensure the future health and abundance of our ocean wildlife and wild places. That's why our student members have been campaigning for better ocean protections, and why we are excited to have this opportunity in the Decadal Management Review to push our state's groundbreaking network of MPAs forward. An expanded, strengthened network will make our coasts more resilient in the face of climate change and give our ocean life a chance to thrive.

Thank you for this opportunity, and we look forward to working with you to continue to create a better future for California's coasts.

Sincerely,

A handwritten signature in black ink, appearing to read "Clara".

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

In solidarity with the shared responsibility for the well-being of our planet, particularly the oceans and coastlines we hold dear, we are reaching out as college students to express our firm support for the amplification and extension of California's Marine Protected Area (MPA) network. Understanding the critical importance of maintaining stable kelp ecosystems and safeguarding conserved ocean areas, we are committed to ensuring the prolonged vitality of our oceans and the myriad marine species that inhabit them.

The state of our ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Only 50 Pacific leatherback turtles are now found foraging off California's coast, a notable decrease from the 178 Pacific leatherbacks observed from 1990 to 2003.² Marine heatwaves have doubled over the last 30 years, and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.³

In the face of these mounting threats, California has a unique opportunity to take bold and effective action to conserve ocean habitats and ensure a greater abundance of life off our coast. Over two decades ago, the state passed the groundbreaking Marine Life Protection Act (MLPA), which called on the state to use one of the most powerful tools for ocean conservation: marine protected areas (MPAs).

¹ Meredith McPherson et. al, [Large-scale shift in the structure of a kelp forest ecosystem co-occurs with an epizootic and marine heatwave](#), Communications Biology, March 5, 2021

² Benson, Scott R., Karin A. Forney, Jeffrey E. Moore, Erin L. LaCasella, James T. Harvey, and James V. Carretta. ["A Long-Term Decline in the Abundance of Endangered Leatherback Turtles, Dermochelys Coriacea, at a Foraging Ground in the California Current Ecosystem."](#) *Global Ecology and Conservation* 24 (November 2020).

³ García-Reyes, Marisol, Andrew Leising, Rebecca Asch, Steven Bograd, and Tessa M Hill. Rep. Indicators of Climate Change in California, ["Coastal Ocean Temperature"](#), *California Office of Environmental Health Hazard Assessment*, 2022.

MPAs, like state parks on land, protect unique and important ocean habitats from activities that can damage ocean life. Areas that are strongly protected have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate change on our oceans.⁴ By providing areas that serve as buffers against climate change, fully protected MPAs adapt to changing environmental conditions because they better preserve natural interactions within ecosystems, allowing for greater resiliency.⁵

California's network of MPAs, foreseen in the MLPA, celebrated its tenth anniversary last year, and the state's Decadal Management Review (DMR) showed that MPAs effectively protect ocean habitats and increase fishery-targeted species' biomass. The DMR found that the older the MPA, the larger the increase in the biomass of fished species. Some ecological communities like kelp forests and rocky intertidal ecosystems within MPAs appeared more resilient and recovered more quickly after marine heatwaves than similar habitats outside MPAs.⁶ Now, we need to build on this system and maintain California's role as a national and global leader in the fight to protect more ocean habitats.

We support the expansion of the MPA Network to include critical, resilient kelp forests along California's coastline. While these vital and iconic ecosystems have faced declines statewide in recent years, kelp forests in some areas have persisted or bounced back quickly in the face of marine heatwaves and other disturbances.⁷ By expanding protections for these resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas, helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby.

It is also vital that existing California MPAs are able to achieve their stated goals of conserving biodiversity and ecosystem health. We encourage the state to consider increasing protections for MPAs that are currently only lightly or minimally protected, especially in places where weaker or more complicated regulations lead to poor compliance and enforcement. Research has shown that highly and fully protected areas, where few if any destructive or extractive activities are allowed, provide greater ecological benefits than lightly or minimally protected areas.⁸

As college students, we keenly feel the urgency to address the environmental crises, particularly along California's coast. Having grown up witnessing the impacts of climate change, it's clear

⁴ Arafteh-Dalmau et al., [Integrating climate adaptation and transboundary management: Guidelines for designing climate smart marine protected areas](#), One Earth 6, 1–19 November 17, 2023 ^a 2023 Published by Elsevier Inc.

⁵ Jankowska, Emilia, et al. "[Climate Benefits from Establishing Marine Protected Areas Targeted at Blue Carbon Solutions](#)." *Proceedings of the National Academy of Sciences*, vol. 119, no. 23, 2022.

⁶ California Department of Fish and Wildlife. (2022). California's Marine Protected Area Network Decadal Management Review.

⁷ California Department of Fish and Wildlife. (2022). California's Marine Protected Area Network Decadal Management Review.

⁸ Ibid Kirsten Grorud-Colvert *et al.*, [The MPA Guide: A framework to achieve global goals for the ocean](#). *Science* **373**, eabf0861(2021). DOI:10.1126/science.abf0861

that action is needed to limit harm to the environment. That's why we urge the Fish and Game Commission to make significant changes in preserving and protecting our vast ocean habitats, ensuring a meaningful and lasting impact for generations to come.

Our ocean is not just a provider of fresh air, diverse wildlife, and breathtaking scenery; it's also an enigma that calls us to explore and uncover its secrets. As college students, we believe it's our duty to be at the forefront of national and global efforts, taking bold steps to safeguard the ocean. This commitment ensures its future and the welfare of communities dependent on it for survival and prosperity.

In conclusion, we strongly urge you, Fish and Game Commissioners, to champion the expansion and fortification of California's network of Marine Protected Areas, with a particular focus on safeguarding kelp forests and reinforcing the protection of existing MPAs. By doing so, you will leave a lasting legacy of environmental stewardship.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this urgent matter. Together, we can ensure a healthier, more abundant future for the unique marine ecosystems that define California.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

From the foothills of the Sierras to the seaside of the Central Coast, Californians care about our ocean and the life that calls it home. That's why we are submitting the attached 7,549 signatures in support of our petitions for rulemaking in the Decadal Management Review adaptive management process.

Each of the 7,549 people signed the following letter:

Dear Governor Newsom,

California's coastline is home to stunning beaches, amazing wildlife, and is a true treasure for everyone who lives in or visits our state. That's why we've invested in protecting this ocean heritage through the creation of our state network of marine protected areas. Just like state parks on land, these areas help protect and restore ocean life.

Now we have an opportunity to strengthen this network through the Decadal Management Review. I urge you to use this process to advance your important goal of protecting 30% of our state waters by 2030. Specifically, I urge you to expand the network to protect the state's last remaining kelp forests, critical homes to fish and sea otters, and to strengthen existing areas that don't yet provide high levels of protection for ocean life.

With your leadership, California can expand this network of ocean parks to create a brighter future for our state's ocean life and continue to lead the country in ocean conservation.

Sincerely,

By expanding the state's MPA network to better protect areas of stable kelp and by strengthening protections for areas not currently achieving their conservation outcomes due to weak or confusing regulations, the state can help our coasts adapt and thrive in the face of rising temperatures and emerging threats.

With your leadership, we can create a better future for California's coastal ecosystems and the wildlife that calls them home.

Sincerely,

Laura Deehan

Re: Amendments to Petition to Modify CA Marine Protected Area Network to Enhance
Protections for California's Most Resilient Kelp Forests

Dear President Zavaleta and Honorable Commissioners,

Attached is Environment California Research & Policy Center & Azul's request to amend
Petition 2023-33MPA. We are amending four of the petition's seven actions following
conversations with community members and stakeholders.

We believe that these amendments will allow the state to balance long-term, strong protections
for stable kelp forest habitat areas with compatible community uses like shore-based subsistence
fishing, and create clarity at Natural Bridges around what uses are prohibited where.

On the following page, Table A ("Table A -- Cover message, Request to Amend Petition
2023-33MPA, Table of proposed amendments") outlines which action IDs we are seeking to
amend. Detailed descriptions of our proposed amendments and justifications can be found in
Table 2 ("Table 2-- Amendments to Petition to Modify the CA Marine Protected Area Network
to Enhance Protections for California's Most Resilient Kelp Forests"), where we have annotated
our changes in red underline and ~~black strikethrough~~. Our updated petition form, narrative and
appendix A, alongside new support letters are attached following those forms. Our request
concludes with the original support letters we submitted with Petition 2023-33MPA.

Thank you for this opportunity, and please reach out if you need any additional information.

Sincerely,

Laura Deehan
State Director
Environment California Research & Policy Center

Table A -- Cover message, Request to Amend Petition 2023-33MPA, Table of proposed amendments

Contact Organization	Petition Tracking Number	Unique Action ID	Affected MPA	MLPA Action Category (modify, establish, abolish)	Action Type	Action Category	Proposed Action	<u>Justification</u>
Laura Deehan, Environment California Research and Policy Center and Azul	2023-33MP A	2023-33MP A_1	Cabrillo State Marine Reserve (SMR)	Modify	Boundaries	Boundary change-expansion	Expand westward and northward by 15.2 sq mi <u>~9.99 sq mi</u>	<u>Stakeholder feedback--commercial fishers (see Table 2)</u>

TABLE 2 - **Amendments to** Petition to Modify the CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Name	Proposed action	Brief description	Proposed regulations and boundary change	Historical context	Notes/Justification
Cabrillo State Marine Reserve (SMR)	Expand by 15.2 sq miles - 9.9 sq mi	Large patches of dense, stable kelp forests exist along a large stretch of coast along Point Loma to the north of the very small existing SMR. Expansion is compatible with Cabrillo SMR's current goal to "protect diverse kelp forest, surfgrass, sandy seafloor, and intertidal and nearshore rocky reef habitat". Approximately 1,000,000 people visit the area annually which provides access to the ocean for thousands of school children and other groups. Recreational and subsistence fishing is common here.	No change in regulations. Maintain existing eastern and southern boundaries. Shift the western boundary to the edge of state waters per state MPA design and size guidelines, and shift the northern boundary to a visible geographic landmark at New Hope Rock, such as the collection of buildings north of Building 609 Swordfish Point to bring resilient kelp beds along the western shore of Point Loma within MPA protections. The new proposed boundaries would form straight lines, follow the mean high tide line, and follow the state waters boundary from the current southeast corner of the SMR to approximately the following coordinates: - Southwest corner: 32° 66.223' N lat. 117° 30.345' W long. - Northwest corner: 32° 72.639' N lat. 117° 34.664' W long. 32° 42' 12.7188" N lat. 117° 18' 53.5788" W long. Northwest corner: 32° 72.639' N lat. 117° 34.664' W long. 32° 42' 12.7188" N lat. 117° 15' 20.3976" W long.	This area was initially included in a large proposed SMR ("Point Loma SMR", Proposal C) in recognition that this is an area of greater biological diversity than other areas. However, the state opted for a reserve far smaller than the science-based minimum size guidelines to avoid conflict with fishing grounds offshore.	To balance kelp forests protection with recreation and low-impact subsistence fishing, we are willing to consider the creation of a new SMCA alongside the existing SMR that allows for recreational hook-and-line fishing and spearfishing. <u>Following conversations with local stakeholders, we are proposing a smaller reserve that will still protect areas of stable kelp forest while allowing for local commercial lobster fishing north of New Hope Rock</u>
Point Dume State Marine Conservation Area (SMCA)	Expand by 4.6 sq mi	A large, dense, resilient kelp bed is located immediately west of the current SMCA's boundaries. We propose a small expansion of the SMCA to protect this important kelp bed. Currently, the SMCA protects nearly 16 square miles of sandy beach and seafloor habitat, rocky shores, kelp forests, surfgrass beds, an upwelling zone, and less than a quarter square mile of deep submarine canyon, which together create an area of high biodiversity. This SMCA also provides for excellent surfing, diving, tidepooling, and whale watching opportunities.	No change in regulations. Propose allowing recreational take from shore by hook and line and spearfishing. Shift the western boundary to the edge of El Sol County Beach to bring the highly resilient patch of dense kelp forest just west of the current SMCA into MPA protection. The proposed new western boundary forms a straight line extending southward from the mean high tide line to the 3 nm state waters limit at approximately the following coordinates: - Northwest corner: 34°0413' N lat. 118°9063' W long. - Southwest corner: 33°9899' N lat. 118°9063' W long.	The kelp beds within the proposed expansion area were part of a historic SMP proposal ("Lechuza SMP", Proposal C) that sought to protect these persistent kelp beds along the Malibu Coast. This proposed SMP was not taken up by the state at the time, likely in favor of designating the Point Dume SMR/SMCA complex just to the east and to maintain spacing guidelines. In addition, the Point Dume SMR/SMCA boundaries were placed to the west of Point Dume in order to leave waters to the east of the point open/unprotected to accommodate for heavy commercial and recreational use - suggesting that the western side of the point was seen as less desirable for commercial and recreational interests.	- The Santa Ynez Band of Chumash Indians are exempt from this SMCA's take regulations - it is a culturally important area - Petition 2023-14MPA, submitted by the California Sea Urchin Commission, proposes to expand take even further by allowing for the commercial take of urchins within this SMCA. - Except for the petition above, FGC meetings and staff summary Nov/Dec notes show no complaints submitted by fishing interests in the Point Dume region <u>We received requests from recreational fishers that this change would increase access for subsistence fishing and we feel this approach balances recreation and kelp conservation.</u> <u>We would also be open to allowing recreational hook and line and spear fishing from non-motorized watercraft, should there be a legal pathway to creating that form of exemption</u>
South Point SMR	Expand by 26.3 sq mi	The Northern Channel Islands contain some of the largest remaining resilient kelp beds in state waters, although large portions of the islands have experienced die-offs and are rated as "high priority" sites by Ospina-Giraldo et al. 2023. The stretch of coastline to the northwest of South Point SMR on Santa Rosa Island contains one of the largest contiguous resilient kelp beds on the islands. The SMR currently protects around 13 square miles of ocean habitat including rocky reefs, sandy seafloor, surfgrass beds, and small patches of highly resilient kelp forests. Expansion would help to bring the large stretch of resilient kelp bed to the northwest under MPA protection, and is compatible with the SMR goal to "protect the rocky reef, kelp forest, sandy plain habitat found here". This area is remote and only accessible via boat. Backcountry beach camping along the South Point SMR shoreline is permitted from September 16 through December 3.	No change in regulations. Shift the western boundary of the SMR to the westernmost tip of Santa Rosa Island with protections extending south to the 3 nm state waters limit, bringing a large, contiguous patch of resilient kelp forest along the southwest coastline under MPA protections. The new western boundary should form a straight line extending south, connecting the island's westernmost tip and the 3 nm state waters limit at approximately the following coordinates: -Northwest corner: 34°0013' N lat. 120°2507' W long. -Southwest corner: 33°938' N lat. 120°2507' W long.	South Point SMR was established as one of the 13 Channel Islands MPAs in 2003 and re-established with no changes as part of the state MPA network in 2012.	Santa Rosa Island is a traditional home of the Chumash Located where warm water currents from the tropics and cold water currents from Alaska converge = ecologically rich and important area
Gull Island SMR	Expand by 1.8 sq mi	The Northern Channel Islands contain some of the largest remaining resilient kelp beds in state waters, although large portions of the islands have experienced die-offs and are rated as "high priority" sites by Ospina-Giraldo et al. 2023. A small area of unprotected coastline to the northwest of Gull Island SMR contains highly resilient kelp beds worth protecting. Expansion is compatible with the SMR goal to "protect the rocky reef, kelp forest, sandy plain habitat found here".	No change in regulations. Shift the northern boundary of the SMR to the mean high tide line along the southwest coastline of Santa Cruz Island, to bring the highly resilient kelp beds at Posa Anchorage under MPA protection. The new northern boundary should follow the mean high tide line until it joins with an extension of the existing western boundary, at approximately 34°000' N lat.	Gull Island SMR was established as one of the 13 Channel Islands MPAs in 2003 and re-established with no changes as part of the state MPA network in 2012.	

TABLE 2 - Amendments to Petition to Modify the CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests

Point Conception SMR	Expand by 14.6 sq mi	A very large patch of resilient kelp forest exists just outside the current eastern boundary of Point Conception SMR. Ospina-Giraldo et al 2023 identified this patch as having a lower risk of future losses compared to nearby kelp patches, and being valuable for natural regeneration and long-term monitoring ("cluster 2" in Hypothetical Use Case #4). Data from an existing shore-based radar system that has been deployed at the site since 2020 shows the area immediately east of the currently MPA appears to be used largely for transit, rather than fishing. Access to this area is currently limited, allowing for additional protections to confer high conservation value while minimizing socioeconomic impacts.	No change in regulations. Maintain existing western and southern boundaries, and shift eastern boundary westward between Arroyo San Agustin and Canada de la Agujas beaches to bring the large resilient kelp bed to the east of Point Conception SMR within MPA protections. The new eastern boundary should form a straight line between the mean high tide line and the 3nm state waters boundary at approximately the following coordinates: -Northeast corner: 34°45' N lat. 120°3445' W long. -Southeast corner: 34°40' N lat. 120°3445' W long.	The proposed expansion area appears to have been initially included in a larger proposed SMR during the MLPA planning process (South Coast Proposal C) in recognition of this area's biological and oceanographic importance. The rationale for the smaller current boundaries for Point Conception SMR is unclear from the historical documents provided.	Ecologically rich and important to Indigenous Chumash people The remoteness of its location makes it one of the least-visited mainland marine protected areas (MPAs) along California's south coast
Natural Bridges SMR	Expand by 13.7 sq mi <u>~14.5 sq mi</u>	Multiple patches of resilient kelp forest exist just offshore from the current SMR boundaries. The original intent of this SMR was to protect the intertidal zone from tidepooling and shore fishing while leaving skiff fishing unimpacted. However, increasing climate impacts, the critical condition of the state's kelp forests, and strong public support for expanded protections, warrant a reevaluation and expansion of this SMR to protect these highly resilient kelp beds and newly vulnerable marine populations.	No change in regulations. Maintain existing western and eastern boundary, <u>shift eastern boundary to encompass Natural Bridges State Beach</u> and shift southern boundary out to the 3nm state waters limit to protect the resilient kelp beds and deeper habitats and pelagic waters per CDFW design and feasibility guidelines, as well as recently published peer-reviewed guidelines for climate-resilient MPA design (Arafeh-Dalmau et al. 2023).	The Natural Bridges SMR was designed as an intertidal SMR, specifically to avoid socio-economic impacts. The preferred option of siting a SMR that extends to greater depth range (as identified in the IDC proposal) was not pursued in an effort to reduce socio-economic impacts by avoiding siting SMRs adjacent to Santa Cruz harbor.	Proximity of Santa Cruz Harbor to other ports, many fishermen travel within and beyond the region to conduct their fishing activities. <u>We would consider a southern boundary that is closer to shore, like near the continental shelf, if the state receives feedback to indicate such a change would better balance conservation with fishing interests.</u> <u>Santa Cruz MPA collaborative had identified this expansion as option that would clarify and reduce confusion around permitted uses at the state beach.</u>
Pleasure Point SMR- SMCA	Designate ~3.2 sq mi	A large, dense patch of resilient kelp forest exists just off Pleasure Point. The kelp beds of the northern Monterey Bay are some of the largest and most persistent in the state. This area in particular is a well-known and popular surfing location, with little commercial fishing taking place (pers. comms H. Nevins) and minimal recreational hook-and-line fishing and spearfishing occurring when surf conditions are flat. There are strong access points to the area, many educational and recreational opportunities, and a growing, colloquially named "shark park" nearby as the presence of juvenile white sharks increases. See letter from H. Nevins in Appendix B detailing the broader conservation value of the area.	We propose a <u>State Marine Conservation Area</u> no take SMR to protect this large kelp forest from all most destructive and extractive activities. Proposed regulations are as follows: <i>"It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource with the following exceptions: recreational take from shore by hook and line and spearfishing."</i> Proposed boundaries range from the northeastern edge of Trees Beach along the mean high tide line to the tip of Soquel Point. From the mean high tide line, the proposed boundary extends south (offshore) by 2.5 sq mi, in keeping with CDFW design guidelines and recent peer-reviewed guidelines for climate-resilient MPA design recommending a variety of habitats and depth ranges be represented within an MPA (Arafeh-Dalmau et al. 2023). While this area would not meet the state's minimum size guidelines, we recognize the importance of this area for recreational fishing and believe a strategically placed MPA of this size would protect as much of the kelp forest as possible while minimizing economic impact	We acknowledge the deliberate effort during the MLPA planning process to avoid siting MPAs near recreational access areas to allow for small vessels and kayaks to access fishing opportunities. However, in light of changing conditions, the extreme and significant losses of kelp cover over the past 10 years, and strong public support for additional protections, increased protections are warranted for this last remaining, resilient kelp area. Sufficient access remains for recreational use in immediate vicinity.	To balance kelp forest protection with recreation and low-impact subsistence fishing, we are <u>proposing a new</u> willing to consider a new Pleasure Point SMCA that allows for <u>shore-based</u> recreational hook-and-line fishing and spearfishing. In addition, to better protect the ecologically rich and biologically important waters of Soquel Cove nearby, we strongly suggest the state consider designating a larger State Marine Park (or State Marine Conservation Area allowing for all recreational activities) alongside, or in tandem with, the Pleasure Point detailed here for enhanced recreational and ecological

Working Together for a Healthy Ocean. Support our New Marine Reserves Your support is critical if they are to succeed.

www.lagunabluebelt.com

Mike Beanan, Co-founder, Laguna Beach Coalition

Thank you for including us in the process to evaluate and, hopefully, approve Petition 2023-24-R to protect all of Laguna Beach's Marine Life.

Based upon stakeholder input, we have submitted a Revised Petition offered as a compromise to support and ease near shore enforcement along one, common latitude line. The original petition followed Laguna Beach's City Limits extending southwesterly from the shoreline. This made the determination of the offshore boundary difficult according to participants at a recent stakeholder meeting hosted by the Orange County Marine Protected Area Collaborative in Dana Point. While there is some debate about who made the suggestion, which led to an unfortunate misunderstanding, the revised petition before you is a smaller SMCA No Take than originally requested but still protects kelp and essential fish habitats.

When evaluating the Petitions, I suggest we comply with and enhance the goals of the Marine Management Plan by increasing the coherence and effectiveness in protecting the state's marine life and habitats, marine ecosystems, and marine natural heritage with full citywide protection. Fortunately, Laguna's unique MPAs have dramatically improved recreational, educational and study opportunities provided by marine ecosystems through coordinated enforcement by Marine Safety Lifeguards, Park Rangers and community volunteers working together to minimize human disturbance. Petition 2023-4-R is consistent with all of the goals for the Marine Management Act and legislative intent of the Marine Life Protection Act of 1999.

I am not unfamiliar with economic challenges. I grew up in a large working class family in Northern California surfing the cold, wild waves while diving for abalone with my brothers off of Gualala and Mendocino or fishing mountain lakes. Leaving high school and to avoid the draft, I joined the Navy, studied navigation and was assigned to SEAL Team One, as a Platoon Sergeant and sent to Vietnam. Turning 21, I got out, worked my way through college and earned a degree in Biology before being hired as Assistant Dean at UC Irvine to manage veteran programs. One of my first projects was a pioneering Handicapped Scuba Project for wheelchair veterans and others...now a worldwide opportunity for the physically challenged community to enjoy and explore underwater wonders.

I continue now to swim and free dive Laguna's remarkable MPAs while traveling and Scuba diving other MPAs. I encourage FGC staff and commissioners to visit and swim Laguna's MPA and see large Sheepshead and robust kelp forests free of sea urchin barrens.

As a Californian, I feel an opportunity and responsibility to protect and restore our natural heritage - an abundant ocean teeming with sea life. Please consider approving the Laguna Bluebelt's Petition 2023-24-R as part of your legacy for California's sea life protection.

Re: Support for Petition 2023-28MPA

Dear President Zavaleta and Honorable Commissioners:

Santa Barbara County Action Network supports the proposed Point Sal State Marine Reserve (Petition 2023-28MPA) near the city of Guadalupe. Conserving this special area will help protect and restore ocean health, enhance coastal recreation experiences, and help ensure Santa Barbara County's coastal economy thrives for decades to come. SBCAN urges you to approve this proposal.

The Point Sal MPA would conserve an important habitat that supports rich biodiversity, such as kelp forests, rocky reefs, tidepools, sandy beaches, migratory whale corridors, an important larval retention zone, and a seabird and sea lion rookery. Protecting this area would have positive impacts that spread beyond its boundary, bolstering ocean resilience and keeping our coastal waters healthy. This area holds cultural significance for several Indigenous communities in our region. Designating this MPA would honor and strengthen the Chumash peoples' stewardship of the area and elevate their historical and present-day connection to the region.

In addition, this area holds special importance for ocean and coastal recreation communities. Point Sal is home to stunning coastal bluff trails that are frequented by local hikers and tourists to view wildlife, relax at the beach and enjoy the remote and pristine area. By making the ocean healthier and more resilient to climate change, strong marine protections help preserve everyone's ability to enjoy these areas through a variety of recreational activities, far into the future. This also benefits our economy – collectively, ocean-based recreational activities contribute to our state's \$28 billion ocean tourism and recreation economy. In 2023, coastal tourism brought just over \$2 billion in travel-related spending to Santa Barbara County and supported more than 20,000 jobs.

The Commission's continued work to protect our state's biodiversity is critical at a time when ocean conservation is more important than ever. Thank you for the opportunity to express our strong support for these proposals that aim to fill a current gap in network design to improve ecological connectivity throughout the region, provide additional resilience in the face of climate change, and protect critical marine habitats.

Sincerely,

Jeanne Sparks, Co-Executive Director

Re: Letter of Support for Petition 2023-28-MPA

Dear President Zavaleta and Honorable Commissioners,

I am writing to express my support for Petition 2023-28-MPA, which would designate a new marine protected area (MPA) off the coast of Point Sal. As a lifelong resident and current mayor of Guadalupe, the closest city to Point Sal, I believe this new MPA will benefit our community and safeguard a cherished natural space for the residents of Guadalupe and visitors to our area.

I have been coming to Point Sal since I was a young boy. Like many other community residents within the Santa Maria Valley, the Point Sal area and the waters identified in the proposed Point Sal Area, believe that this protection is necessary to protect and enhance the waters residents have enjoyed for decades. This designation will protect the Point Sal MPA for generations to come. Located at the convergence of two major ocean currents, the highly productive waters around Point Sal are home to kelp beds, rich tidepools, and a diversity of marine life including humpback whales, gray whales, sea lions, seals, sea otters, seabirds, and more. Many residents of Guadalupe frequent the trails to Point Sal overlooking the coast to view wildlife, relax at the beach, and enjoy the remote and pristine area. When it was accessible, many in our community would visit Point Sal State Beach to spend time with family and enjoy the shore. This area is important to my community, my neighbors, and my constituents. Ensuring that we protect it for future generations aligns deeply with the City of Guadalupe's values.

The Central Coast's world-famous coastline is a biodiversity hotspot for marine life and attracts visitors from around the world. In 2023, tourism brought just over \$2 billion (about \$6.2 per person in the US) in travel-related spending to Santa Barbara County and supported more than 20,000 jobs. Continuing to build and strengthen our tradition of ecotourism is a priority of the City of Guadalupe. Our local economy believes that this MPA designation will enhance tourism for our area in collaboration with the Guadalupe Dunes Non-Profit, the Guadalupe Business

Association, Inc., as well as the Santa Maria Valley Chamber of Commerce. Acting to secure ocean protections now will help our local economy stay vibrant in the long run – ultimately supporting the many local businesses and tourism operations that rely on healthy landscapes and seascapes.

Further, the City of Guadalupe acknowledges and supports the importance of Chumash people's historic and contemporary connection to this place. Historically, Point Sal holds cultural significance for the Chumash people, with evidence of habitation as far back as 4,800 years ago. Chumash artifacts are visible throughout Point Sal, and analyses of burial sites from the area demonstrate the rich cultural ties to the traditional stewards of this land. The city was proud to support the recent designation of the Chumash Heritage Marine National Sanctuary, and we are pleased to support this proposal that honors and protects culturally significant waters for the Chumash people.

We commend the continued work of the Commission to advance the conservation of our state's valuable and unique marine resources. Designating a protected area at Point Sal will further bolster the strength of California's MPA network, support local communities and businesses, and safeguard our coastal ecosystems for future generations. Thank you for your consideration of this petition, and the opportunity to submit recommendations for the adaptive management of California's MPA network as part of the Decadal Management Review process.

Sincerely,

Ariston D. Julian, Mayor
City of Guadalupe

Subject: 2023-29MPA Mishopshno State Marine Conservation Area

ATTN: Fish & Game Commission

My name is William Ray, from Carpinteria, CA. I'm writing to you today with comments about 2023-29MPA: Mishopshno State Marine Conservation Area.

I am writing to express my strong opposition to the proposed Marine Protected Area (MPA) designation for Carpinteria Reef. As a graduate student at UCSB specializing in benthic ecosystem research, I dive at Carpinteria Reef approximately 100 times per year and have firsthand knowledge of its ecological health and the role it plays in the local community. The arguments presented in favor of this MPA lack scientific justification and fail to consider the significant negative impacts it would have on the residents who rely on this area for subsistence fishing, research, and recreation.

Lack of Scientific Justification for MPA Designation

Proponents of the MPA claim that it will provide protection for juvenile white sharks. However, white sharks are already illegal to fish in California, making additional protections redundant. There is no evidence to suggest that an MPA would enhance their conservation beyond existing regulations.

Additionally, arguments citing "spillover effects" for commercially and recreationally important species such as lobster and rockfish are scientifically flawed in this context. Spillover effects occur when protected populations expand into adjacent fishable areas, but Carpinteria Reef is one of the only accessible reef structures in this section of coastline. With no significant adjacent reef habitats, the premise that an MPA here would enhance fisheries through larval dispersal or adult migration is unsupported. Furthermore, local hydrodynamics at Carpinteria Reef differ from other regional sites; currents here are primarily tide-driven rather than advection-based, making claims of larval transport benefits highly questionable.

Disproportionate Impact on Underrepresented Communities

Carpinteria is a diverse community, home to one of the largest and most densely populated

Hispanic populations in the Tri-County area. Many low-income families depend on this reef as a vital source of fresh, sustainable protein, particularly given the high cost of living. Restricting access to this resource would disproportionately impact these underrepresented communities while providing no demonstrated ecological benefit.

Additionally, while the proposal emphasizes increasing access for Native American communities, it does not explain how restricting public access achieves this goal. True inclusivity should focus on increasing opportunities for all local communities, not implementing exclusionary policies.

Sincerely,

William Ray

From: Kyle Murphy <[REDACTED]>

Sent: Sunday, March 16, 2025 07:44 PM

To: FGC <FGC@fgc.ca.gov>

Subject: 2023-29MPA: Mishopshno State Marine Conservation Area

ATTN: Fish & Game Commission

My name is Kyle Murphy, from Carpinteria, CA. I'm writing to you today with comments about 2023-29MPA: Mishopshno State Marine Conservation Area.

It is upsetting to hear about the proposed area between Carpinteria and Summerland becoming a Marine Conservation Area. This beautiful coastline with accessible reef structures close to shore offers the closest experience one can take part of in relation to the Channel Islands. If you don't own a boat like myself, Carpinteria reef specifically, is the closest experience of spearfishing/diving one can take part of with its offered kelp forest, rocky reef substrate, and diverse marine ecosystem. Carpinteria reef is an important resource to myself and my community. It allows for one to be in touch with nature in which one can forage their own food under the proper restrictions and guidelines implemented by Fish and Game. I take pride in myself and others who go out of their way to forage for food locally versus buying fish/invertebrates from the store, not knowing where they came from, not knowing if they were fished sustainably, and not knowing if they were marinated in chemicals/preservatives to extend their shelf life. Myself and others treat our next meals with the upmost respect.

Unfortunately, there are no other nearby reefs on this whole coastline that are accessible with the "spill over" benefits of this MPA. In terms of the juvenile white sharks needing protection, these marine vertebrates are already illegal to fish, so they don't need more protecting. I'm definitely for support of Tribal co-management of this area, however, increasing the access for one community doesn't have to be by excluding all the other users.

I hope you take my comments of this matter into consideration for not making this area into an Marine Conservation Area.

Subject: 2023-33MPA - Specifically Cabrillo SMR expansion

Providing you with perspective of an avid surf fisherman, living in San Diego. And focusing on the proposed Cabrillo SMR expansion. Hope you'll find this argument honest, logical and specific, not a political pamphlet or an industry opinion.

What does fishing mean to me? A way of life, metal therapy, physical exercise (at the age of 54 my running and gym days are over). I can honestly not imagine my life without fishing.

What I think about California Marine Protective areas? I love them as they are. Together with all the fishing regulations they provide sustainable fishing supply for me to enjoy. Without them, there would not be many fish around.

Why I am protesting Cabrillo SMR expansion? We all know: 10-20% of spots hold 80-90% of fish. In my case, surf-fishing for halibut and calico bass happens only in areas with reef and kelp. Currently in San Diego County most of those areas are already protected. An exception is Sunset Cliffs area north of the existing Cabrillo SMR. The proposed expansion would eliminate the last significant piece of fishable reef in San Diego county.

In reality, most of that area is not approachable on foot. So, if you would move the boundary of new proposed area 1.5 miles south of Swordfish Point (proposed north boundary), no objective surf fishermen would complain.

I hope you consider the above in your deliberation. Below, I am adding some thoughts, that are not mine, and I expect you have already heard those many times. Never the less, I agree with them, and wanted to repeat them.

Equity argument: most people cannot afford boats; many cannot pay to fish on commercial boats. What is left for them is shoreline.

Environmental impact of shoreline fishing is negligible:

- It covers sliver strip of water near the shore.
- No electronics is used to locate the fish.
- Fish is released most of the time. Since started shore fishing, I have released > 95% of my catch. Boat fishing creates waste, spearfishing creates waste too.

It is really a valid argument that opening shoreline to fishing in all protected area would not impact habitat recovery and would help to many of us that count on fishing to improve quality of our lives.

Subject: Sign-On Letter for the Mishopshno SMCA

Greetings! This is Kaspar Kazazian from www.californiasurffishing.net. After engaging with communities through the following outreach methods, we express support for the Mishopshno SMCA.

1. We worked with all of the Mishopshno petition co-sponsors as well as Fish On Conservation to build a consensus.
2. We had conversations with 6 experienced shore fishermen who frequently fish the Carpinteria area and are familiar with the different fishing areas. These were trusted individuals, many that we already knew as local fishermen and have fished with numerous times. Coupled with our knowledge of fishing the area over the years, we obtained a complete picture of what fishermen fish for in each of the beaches in the SMCA. We aim to respect all types of low impact fishing in this SMCA: Subsistence fishermen (croakers and perch at Carpinteria Beach and Santa Claus Beach), halibut fishermen (in the mixed sand and reef of Padaro / Loon Point, mostly catch and release), inlet fishermen (by Sand Point, for stripers, etc), Kayak fishermen (at the nearby offshore Carp Reef).
3. Through our social media page, we obtained ~1,000 signatures for fishermen's support of shore fishing in SMCA's, such as the Mishopshno SMCA:
<https://www.change.org/p/allow-shore-fishing-in-smca-s>
4. We support the petition to create the Mishopshno SMCA for the following reasons:
 - Meet original scientific MPA connectivity guidelines by filling the gap that currently exists. We believe that filling this MPA connectivity gap will increase fish populations, benefitting both fishermen and the fish.
 - Of all types of ocean fishing, recreational shore fishing and kayak fishing offer the lowest cost, the easiest access, and the least environmental impact to fish / kelp forests. From an equity perspective, shore fishing can be enjoyed by a diverse range of communities who are within driving distance to the coastline. We believe that allowing recreational shore fishing and kayak fishing in SMCA's is in alignment with the state's Marine Life Protection Act (Goal #3 for recreation) and MPA Decadal Management Review (Recommendation #7 & #9 for equity & accessibility).
 - The creation of this highly protected SMCA (in alignment with low impact fishing gear

criteria per the MPA Guide User Manual) will strengthen the state's MPA network, per state goals, including 30x30.

Sincerely,

Kaspar Kazazian

Subject: Comment on Bin 2 MPA Petition evaluation process

Hello all,

See attached comment letter requesting and supporting previous comments that petition be evaluated under the MPA Master Plan(s), most notably the guiding regional objectives under the MLPA goals from the Master Plans.

Letter additionally breaks down the Master Plan's objectives in the scope of Petition2023-15MPA specifically, highlighting why petition should be considered. This is all referencing the most recent revised version of the petition submitted in January.

Thank you,

Blake Hermann

Petitioner - Petition2023-15MPA

Guiding the Petition process through the MPA Master Plan's Regional Objectives under the MLPA Goals, and Petition 2023-15 MPA's support under said Goals and Objectives

To the FGC and MRC,

The adaptive management process of the MPA network through the petition process has been an all encompassing process stretching nearly two years and has consisted of many meetings with stakeholders from a multitude of backgrounds across the State.

Currently, several stakeholders have differing views on and are determining under what venues to discuss bin 2 petitions. Personally, I do not mind MRC or full commission discussions, but do see benefits to possibly holding discussions at both. This way we could benefit from the more casual open floor of the MRC and still keep all commissioners involved and informed on these petitions to gain the best final actions on these petitions from the full commission.

That being said, one commonality throughout this process from all groups has been the calling for the analysis process to be explicitly guided by the existing MPA Master Plan's (MMP) adaptive management process. This calling has come from all sides, from recreational and commercial fishing organizations such as AllWaters, CFSB, CCA, and the American Sportfishing Anglers (ASA), to environmental NGOs like Azul, Environment California, Environmental Defence Center, the NRDC, and WILDCOAST. The latter eNGOs were among 17 groups who jointly signed and sent a letter to the FGC explicitly stating to guide the process through the MMP and its objectives in January.

The MMPs are a framework that guides the adaptive management process of the MPAs as that was part of their original intention. The process guided by the MMP lays out a clear analysis path through lists of "objectives" that fall under the six broader goals of the MLPA. These objectives under the six MLPA goals are what the MMP uses to determine if an MLPA goal is met, as the objectives are, "more specific and measurable than the broader MLPA goals," according to the MMP. In order to best determine if an MLPA goal is met, we look at these objectives stated under the regional MMP and determine if the objective is satisfied using the best available science/data. This process is laid out in Chapter 4.5 of the 2016 MMP, and the measurable objectives under each MLPA goal can be found in the regional appendices (C-F) in the suitably named "Regional Goals and Objectives" sections of the MMP.

I would not only like to echo all comments from both sides of the aisle to guide the process through the MMP(s) and their objectives, but to also bring up that Petition2023-15MPA is one of, if not, the only petition with explicitly stated support in the MMP objectives (see Goal 2 Objective 4 (2.4) below). This stated support of Petition2023-15MPA is laid out by not only the more-modern 2016 MMP, but even the original MMP from 2008, showing a historic, scientifically based rationale for Petition2023-15MPA, that came after the designation of the Northern Channel Islands Network. This shows our obligation to update this pre-MMP island network to modern standards we see in our coastal network that better follows these underlining MMP objectives.

The remaining sections of this document will go through all of the six goals of the MLPA (bold), the guiding MMP regional objectives under each MLPA goal (numbers), and provide a breakdown response of the specific objective through the scope of Petition2023-15MPA (letters). For context, Petition2023-15MPA is requesting 3 SMRs at the Northern Channel Islands be modified to SMCAs to allow for the limited take of Highly Migratory Species (HMS) or pelagic finfish, listing a variety of different allowable gear options, 6 in total not including additional possible nearshore/offshore MPA configurations. The core rationale of the petition is, we know the benefits of MPAs on HMS/pelagic species are very low compared to the high burden certain local MPA networks, in this case the Channel Islands, place on HMS/pelagic fisheries, and that we see pelagic allowances everywhere else but not in the older Channel Islands network where pelagic allowed areas should arguably be the most prevalent.

MLPA Goal 1. To protect the natural diversity and abundance of marine life, and the structure, function, and integrity of marine ecosystems.

1. Protect and maintain species diversity and abundance consistent with natural fluctuations, including areas of high native species diversity and representative habitats.
 - a. The three MPAs in the petition and their locations are not intrinsically unique to HMS/pelagic finfish due to their highly migratory nature. The migratory nature of these species and the vast area of water they cover shows clear evidence that any take of HMS or pelagic finfish within these MPAs will not significantly affect HMS or pelagic finfish abundance any more than what existing fishery pressure already exerts on these species outside of the MPAs. Additionally, pelagic and HMS fisheries are all offshore, open-water fisheries, and are non-bottom contact. This means any effect on representative habitats containing a diverse spread of species on bottom reefs or nearshore kelp forests will be minimal due to

fishing simply not occurring there, still protecting those species that benefit from MPAs the most.

We already see this in use outside of the Channel Islands Network in the more-modern coastal network that came under the state driven MLPA implementation process. Nearly 40% of the coastal network allows for some form of limited, mostly pelagic, take and still protects those species and habitats that benefit from the protection, the pre-MMP/MLPA Channel Islands only has 3.5%.

2. Protect areas with diverse habitat types in close proximity to each other.
 - a. As the petition prefers only HMS take being allowed, the alternative being a pelagic finfish allowance, the only habitat type affected by this change will be open water. Pelagics and HMS are open water targeted species, one rarely sees billfish or tunas targeted even remotely nearshore let alone in a kelp forest or shallow reef. The unique habitats inside the three MPAs such as kelp forests or rocky reefs will see little to no change in relative level of protection. Even the bottom areas of the three MPAs, which consists of mostly empty mud flats thousands of feet deep, will see no meaningful change in its protection as nearly all HMS or pelagic effort is done at or near the surface or in the mid-water, rarely deeper than 100ft. If needed, the petition also includes options further restricting bottom contact gears outright, but again HMS and pelagic effort mostly avoids the bottom in general.
3. Protect natural size and age structure and genetic diversity of populations in representative habitats.
 - a. The species that live inside these MPAs year-round that gain the most from them are nearshore species living in the shallow-nearshore sections of the MPAs, or are groundfish frequenting the bottom habitat nearshore and offshore on rocky reefs. This fact is stated in the 2008 MMP appendix G which describes what species benefit the most from MPAs and why. As these non-pelagic, local species are predominantly found in these nearshore habitats, and not in open water where HMS and pelagics are found, all of these local, non-pelagic species can expect their populations and genetic diversities to be unaffected by this change. HMS or pelagic species would of course experience some form of take; however, as previously mentioned, levels of take within these areas would not be any different from the surrounding open area and would not be in levels affecting their population structures within the MPA.

4. Protect biodiversity, natural trophic structure, and food webs in representative habitats.
 - a. The amount of HMS or pelagic finfish in these areas is not expected to be significantly higher than the surrounding open area due to their migratory nature. Because of this, the overall trophic structure and food webs of the area will not be significantly affected as any interactions with these HMS or pelagic species will still be present as they move in and out of the area on the currents. The existing protections on local, non-pelagics will remain, leaving the remaining levels of the web unchanged.

While some argue pelagic fisheries can just work around the closures, around the Channel Islands because of the higher closure rates, the federal offshore expansions, naval closures, and weather restrictions around the islands make pelagic fisheries are significantly more constricted. Allowing limited pelagic access inside these MPAs will benefit the fisheries not because they contain more pelagic or HMS, but because the added total available area is locally significant.
5. Promote recovery of natural communities from disturbances, both natural and human induced, including water quality.
 - a. HMS and pelagic finfish are well managed groups of fish that are in no need of recovery. In fact, the HMS fishery is one state and federal managers are actively trying to grow due to domestic lack of participation. The water quality protections within the three Channel Islands MPAs in the petition will of course still remain even if the petition is accepted in-part or fully. Additionally the Channel Islands National Marine Sanctuary water quality regulations in the entire area in and out of the MPAs will remain in effect.

MLPA Goal 2. To help sustain, conserve, and protect marine life populations, including those of economic value, and rebuild those that are depleted.

1. Help protect or rebuild populations of rare, threatened, endangered, depressed, depleted, or overfished species, and the habitats and ecosystem functions upon which they rely.
 - a. As mentioned under Gaol 1.5a, none of the HMS or pelagic finfish species that would be targeted in these three MPAs are rare, threatened, endangered, depressed, depleted, or overfished. The open water habitats they live inside will still have existing protections on the habitat. Currently, an overwhelming percentage of HMS consumed in this State are longline imports versus our cleaner hook-and-line fleets. Local swordfish and tuna

fishermen locally pick from the same stocks international longline fleets do, taking only a fraction of the stock and offering a superior grade of seafood both commercially and recreationally for personal consumption. Allowing access to these areas offers a way to meaningfully impact local fleets around the Channel Islands by providing them more water to cover while also not significantly impacting the HMS or pelagic stocks which are currently significantly more affected by international fisheries.

2. Sustain or increase reproduction by species likely to benefit from MPAs, with emphasis on those species identified as more likely to benefit from MPAs, and promote retention of large, mature individuals.
 - a. Appendix G of the 2008 MMP breaks down, on a species level, fish that benefit from MPAs the most and fish that benefit the least. The MMP states that, species benefiting from MPAs the most are local, non-pelagic species:

“MPAs are likely to have their greatest direct benefits on residential species. In general, MPAs offer direct protection to less mobile or sedentary species that locally aggregate in specific habitats (e.g., many of the rockfish species).” -Appendix G of the 2008 MMP

These local, non-pelagic species would still be protected even if this petition was accepted, still allowing for these species to benefit the most from the MPAs, and retain populations of large, mature individuals. The 2008 MMP additionally states that HMS and pelagic finfish are species that receive less if any benefits from MPAs due to sheer amount of water they cover:

“Species with a strong tendency to move will not benefit significantly from the establishment of MPAs [...] Direct benefits of MPAs are expected to be much reduced for highly migratory species (e.g., swordfish, tunas, some sharks) that likely spend relatively little time inside local coastal MPAs. Protection of these mobile species and their contributions to local marine ecosystems may best be addressed by larger-scale regulatory measures.” -Appendix G of the 2008 MMP

With the above guiding information, there is no scientifically supporting rationale to leave the three MPAs in Petition2023-15MPA completely closed to pelagics or HMS. Rather, due to the area traveled by HMS or pelagic finfish, best protective practices are seasonal restrictions, and

size/length requirements, something we already use Stateside with pelagic finfish and federally with HMS. The primary driver this petition only applies to three MPAs and not others was, unlike other no-take areas, pelagic or HMS can more than reasonably be targeted whilst meeting our protection goals in these three MPAs specifically (see Goal 2.4a below). For example, there is no reason to request pelagic or HMS access in MPAs simply too far offshore due to lack of total effort or areas too nearshore that would reasonably never offer significant amounts of pelagic or HMS opportunities because they are too shallow.

3. Sustain or increase reproduction by species likely to benefit from MPAs with emphasis on those species identified as more likely to benefit from MPAs through protection of breeding, spawning, foraging, rearing or nursery areas or other areas where species congregate.
 - a. As mentioned above in Goal 2.2a those species “likely to benefit from MPAs,” non-pelagics/groundfish, will continue to be protected including their breeding, spawning, foraging, rearing and nursery areas, including other areas where species congregate, kelp forests/rocky reefs. These respective habitats will also see little to no effect as pelagic or HMS fishing efforts rarely overlap nearshore areas, shallow, or deep water reefs. These protections still being in effect will allow individuals to grow and mature, increasing local reproduction of the species.
4. Protect selected species and the habitats on which they depend, while allowing some commercial and/or recreational harvest of migratory, highly mobile, or other species; and other activities.
 - a. This MMP objective displays the central ideas of Petition2023-15MPA, clearly stating areas like those requested in the petition be provided. The Channel Islands MPAs (which contain the three MPAs in the petition) are the oldest in the modern network and expand the furthest offshore, yet they provide the least amount of pelagic allowance in the State. The original intentions for these MPAs was protecting local, non-pelagic species, namely groundfish. The Footprint Reserve is a glowing example of this, disconnected from any mainland or island and over a deepwater reef that once was a groundfish fishing area. The MPA went in to specifically rebuild overfished groundfish populations, yet it provides no pelagic allowance. In fact, the Footprint is the only MPA in the State that is disconnected from land that does not have any type of limited pelagic allowance.

Broadly speaking, the Channel Islands network exceeds the State Network in terms of percent area in MPAs, 21% of island waters are protected compared to the State as a whole which has 16% of its waters protected. The Channel Islands are also the only network of MPAs in the State that extend 6 nautical miles offshore, twice the normal 3 nm distance offshore we see. This offshore expansion interferes more with HMS/pelagic fisheries compared to the other State MPAs that are more nearshore.

One would assume that with the higher percent of protection locally and twice the offshore interference that reasonable amounts of pelagic or HMS access would be given, yet the Channel Islands network offers the least pelagic access in the entire MPA network. Where 40% of the State MPAs have some form of pelagic allowance the Channel Islands network only provides 3.5%. While these protections were justifiable over 20 years ago when MPAs were newer, the coastal network didn't exist, the MMPs didn't exist, and less was known about MPAs and pelagic species; the two more-modern MMPs and this objective specifically are glowing examples of why we must adaptively manage the network and provide reasonable amounts of pelagic access where it is realistic as touched on above in Goal 2.2a.

MLPA Goal 3. To improve recreational, educational, and study opportunities provided by marine ecosystems that are subject to minimal human disturbances, and to manage these uses in a manner consistent with protecting biodiversity.

1. Sustain or enhance cultural, recreational, and educational experiences and uses (for example, by improving catch rates, maintaining high scenic value, lowering congestion, increasing size or abundance of species, and protecting submerged sites).
 - a. The allowance of this petition would certainly provide decongestion of HMS or pelagic fishing areas, especially around Santa Cruz Island during Naval Activity days when most areas beyond 3nm of the island are closed and pelagic opportunity is extremely limited. Catch rates would increase relatively proportional to the included area as the MPAs do not hold significantly more or less HMS or pelagic finfish than the already open waters do. Scenic value of land based and submerged sites would not change, as HMS or pelagic fishing activity has little to no bottom contact interference and is done offshore away from the more biodiverse nearshore areas. Lastly, as mentioned, the size and abundance of local species will not change as they will still be protected, even the size and

abundance of HMS or pelagics should not vary beyond normal fluctuations due to the species covering so much area.

2. Provide opportunities for scientifically valid studies, including studies on MPA effectiveness and other research that benefits from areas with minimal or restricted human disturbance.
 - a. Within the three MPAs the petition looks at there are currently no scientific studies occurring in the midwater where limited take will be present. Occasional bottom surveys of deep water reefs occur inside and outside of these MPAs and the broader Channel Islands; however, a pelagic allowance will not affect these ROV trips or the abundance/diversities of species researchers observe on said trips (we already interact with them when they are outside of the MPAs).
3. Provide opportunities for collaborative scientific monitoring and research projects that evaluate MPAs that promote adaptive management and link with fisheries management, seabird and mammals information needs, classroom science curricula, cooperative fisheries research and volunteer efforts, and identifies participants.
 - a. If granted, this petition does open some doors for scientific monitoring of an area previously closed to everything being opened to HMS or pelagic finfish. This information could be used as part of future adaptive management cycles of the network. While ties between MPAs and fishery management still do exist, these ties have decreased in the pelagic arena for smaller MPAs and nearshore MPA networks, which is what we currently have. The key reason for this is in order for an MPA to have impact on HMS it would have to cover significant amounts of offshore ocean over multiple jurisdictions and international waters, not the nearshore waters most of our network covers. Enforcement alone of an area of that size is simply unreasonable which is why HMS fisheries are managed under size, quantity, and quota limits, not MPAs.

MLPA Goal 4. To protect marine natural heritage, including protection of representative and unique marine life habitats in South Coast California waters, for their intrinsic value.

1. Include within MPAs key and unique habitats identified by the SAT for this region.
 - a. The SAT identified several key and unique habitats to be included in the Southern California section. All of these habitats concern unique bottom structures or substrates and nearshore features like kelp forests. The primary habitat HMS fishing will occur is away from these habitats in open

water. Any of these unique habitats will still remain protected as HMS or pelagic effort never occurs there enough.

2. Include and replicate, to the extent possible [practicable], representatives of all marine habitats identified in the MLPA or the California Marine Life Protection Act Master Plan for Marine Protected Areas across a range of depths.
 - a. This object mirrors the previous Goal 4.1 and requests protections exist across the listed unique habitats in a variety of depth ranges. The three MPAs in Petition2023-15MPA will still have the same protections on the habitat and local, non-pelagic species that live in said habitat.

MLPA Goal 5. To ensure that South Coast California's MPAs have clearly defined objectives, effective management measures, and adequate enforcement, and are based on sound scientific guidelines.

1. Minimize negative socioeconomic impacts and optimize positive socioeconomic impacts for all users including coastal dependent entities, communities, and interests, to the extent possible, and if consistent with the MLPA and its goals and guidelines.
 - a. Opening these areas, to the requested levels of HMS or pelagic take the petition requests, would minimize the negative socioeconomic impacts these areas currently have while they are no-take. While total take of HMS will not increase by magnitudes, allowance of HMS take inside of the three MPAs will offer alternatives to fishermen on poor weather days due to the MPAs covering most of the consistently calm waters around the Channel Islands. This will not only help to increase local and cleaner commercial fisheries, but also offer benefits to recreational pelagic fisheries, especially catch-and-release marlin fisheries. All of this could be accomplished whilst still meeting the objectives of the MMP and protecting the species that these MPAs are meant for.
2. Provide opportunities for interested parties to help develop objectives, a long-term monitoring plan that includes standardized biological and socioeconomic monitoring protocols, a long-term education and outreach plan, and a strategy for MPA evaluation.
 - a. This objective is somewhat out of the scope of Petition2023-15MPA in this analysis; however, any possible long term monitoring of the MPAs after a change like this is encouraged to validate the claims made in this petition, and that what we see as an effect of making this change is what we expect.

3. Effectively use scientific guidelines in the California Marine Life Protection Act Master Plan for Marine Protected Areas.
 - a. I urge the department and commission to follow these guidelines and MMP objectives for this petition process, as their is their entire purpose, and to understand that Petition2023-15MPA does in fact have explicit support from the MMP and by extension the MLPA. This analysis is meant to show that Petition2023-15MPA is adhering to most, if not all, of these scientific guidelines/objectives.
4. Ensure public understanding of, compliance with, and stakeholder support for MPA boundaries and regulations.
 - a. While any limited-take area offers more complexity than a completely open or closed area, similar existing MPAs in the State that allow for pelagic take show the public can understand and follow regulations allowing take of a set list of species, pelagic finfish or HMS. Outside of MPAs, groundfish exclusion areas (GEAs), established federally, also mirror this petition by restricting only non-pelagic species take (groundfish take) but still allowing for all pelagic take displaying public understanding and enforcement feasibility.

It goes without saying that among those that frequent the Channel Islands offshore areas for pelagic species, a petition like this has complete public support. I have been on the water around these islands for 25 years, and was a part of the first generation of anglers to grow up with these MPAs in effect. Throughout these years the call to allow pelagic access in these areas has existed throughout the local community, and without this call, this massive community driven consensus, this petition would have never existed.

There are some who oppose this petition, there always will be; however, one thing I have yet to receive is a scientifically based reason for these areas to remain closed to HMS or pelagic species, all rational has been emotional. While there are research studies that show massive MPAs, those that rival the size of this State in area, may offer some benefits to pelagics, our Network simply does not and cannot accommodate that type of scale. In fact, a denied petition in 2020 by this Commission explicitly stated that on the record, when a petition requested an MPA be made for an HMS (white sharks) this commission's reply was to deny it because, "MPAs are intended to protect ecosystems, not individual species, especially highly mobile, pelagic species." This precedent has been set

multiple times, there is no reason to not apply it to a set of MPAs that were made before it all, this is a textbook example of adaptive management.

5. Include simple, clear, and focused site-specific objectives/rationales for each MPA and ensure that site-level rationales for each MPA are linked to one or more regional objectives.
 - a. The founding reasons for these MPAs at the Channel Islands in 2002 was the idea to protect our local, non-pelagic species, mainly groundfish at the time. These ideas are still reiterated today in the MPA summaries of all three of these MPAs, the focus on non-pelagic local species, birds, and mammals is clear. While the existing protections certainly can continue to accomplish that objective, Petition2023-15MPA offers a way we can both meet those same goals, and allow for some reasonable forms of take for pelagic species as we see elsewhere in the more modern MPA network. The rationales laid out in this document are evidence that under Petition2023-15MPA's changes we can still meet the same regional objectives we currently meet, plus those revolving around reasonable levels of pelagic take. These additional met objectives, and lower economic impacts make this petition one that arguably helps strengthen the overall network, not weaken it.

MLPA Goal 6. To ensure that the South Coast's MPAs are designed and managed, to the extent possible, as a component of a statewide network.

1. Provide opportunities to promote a process that informs adaptive management and includes stakeholder involvement for regional review and evaluation of management effectiveness to determine if regional MPAs are an effective component of a statewide network.
 - a. We are currently in this adaptive management process as a result of the DMR which includes stakeholder involvement at Commission and MRC meetings discussing this and other MPA adaptive management petitions. While I wish official meetings could be held regionally for petitions I understand that is not doable for this specific process. That being said, unofficial meetings where locals attended (clubs, organizations, MPA Collaboratives) feedback on this petition was overwhelmingly positive.
2. Provide opportunities to coordinate with future MLPA regional stakeholder groups in other regions to ensure that the statewide MPA network meets the goals of the MLPA.

- a. This is already being done at the full commission and MRC levels where stakeholders across the State voice thoughts on regional MPA petitions. Stakeholder support for a petition like this is what one would generally expect, local fisheries/community support, statewide support from fisheries groups/organizations, and statewide lack of support from environmental organizations. It should again be mentioned that supporting reasons for petition2023-15MPA and how it is supported by both the objective and goals of the MMP and MLPA respectively, is the purpose of this document.
3. Ensure ecological connectivity within and between regional components of the statewide network.
 - a. The Channel Islands network is unique in that it is partially isolated from the Coastal MPA network. That being said, connectivity will still be occurring under an accepted petition in part or full as existing protections on species that actually benefit from these MPAs and their habitats will still remain protected. This will keep local species connectivity as strong as it has been under the current network. Pelagic species will still have local MPAs that are no-take at all four islands, in the border network, and far offshore (but still inside the EEZ) where little or no pressure exists on them.
4. Provide for protection and connectivity of habitat for those species that utilize different habitats over their lifetime.
 - a. As mentioned in several of the above objectives, those species that utilize different habitats over their lifetime are primarily local, non-pelagic species. These species will remain completely protected. Pelagic and especially HMS are species that are in the open water, pelagic region their entire lives, from egg to maturity. All of the species proposed for limited take in Petition2023-15MPA have very limited, if any, interactions or movements between different habitats explicitly due to their life cycles.

The above analysis of the MPA Master Plan's objective based analysis process for adaptive management changes to the MPA network clearly shows that Petition2023-15MPA is supported by the MMP and the MLPA. Not only are there guiding objectives of the 2016 and 2008 MMPs that outright say we must provide areas for pelagic take and that pelagic species are less affected by MPAs, but here we have the Channel Islands network of MPAs that came into effect prior to any MMP providing almost no limited pelagic areas, nothing comparable to what we see in the more-modern coastal network that was guided by the MMP. This is a glowing example of the need for adaptive management in lieu of guiding management documents, CDFW

and FGC statements on previous petitions, and actual MPA implementations from the coastal MLPA that are based on our more-modern data and scientifically based evidence and outlook on MPAs. If I could only say one thing about this petition it would be: we can have pelagic allowed areas and our local protections without weakening the network just like we already have everywhere else. Please consider granting this petition.

Thank you,
Blake Hermann
