California Endangered Species Act
 Incidental Take Permit No. 2081-2024-028-06
 (Amendment No. 1)

EASLEY RENEWABLE ENERGY PROJECT

I. Authority:

This Amended California Endangered Species Act (CESA) incidental take permit (ITP) is issued by the California Department of Fish and Wildlife (CDFW) pursuant to Fish and Game Code section 2081, subdivisions (b) and (c), and California Code of Regulations, Title 14, section 783.0 et seq. CESA prohibits the take¹ of any species of wildlife designated by the California Fish and Game Commission as an endangered, threatened, or candidate species.² However, CDFW may authorize the take of any such species by permit pursuant to the conditions set forth in Fish and Game Code section 2081, subdivisions (b) and (c). (See Cal. Code Regs., tit. 14, § 783.4.)

Permittee:	IP Easley, LLC
	IP Easley II, LLC
	IP Easley III, LLC
Principal Officer:	Simon Ross, Chief Commercial Officer
Contact Person:	Camille Wasinger, (510) 260-2192
Mailing Address:	Intersect Power (Easley Renewable Energy Project) c/o IP Easley, LLC, IP Easley II, LLC, and IP Easley III, LLC 9450 SW Gemini Drive, PMB#68743 Beaverton, OR 97008-0130

II. Amended ITP³ Background

On June 5, 2024, IP Easley, LLC; IP Easley II, LLC, and IP Easley III, LLC (Permittee) submitted a CESA ITP application to CDFW pursuant to Fish and Game Code section 2081, subdivisions (b) and (c), and California Code of Regulations title 14, section 783.0 et seq. The Permittee sought take coverage authorization for CESA listed species associated with project-related impacts from the Easley Renewable Energy Project (Project) in Riverside County.

¹Pursuant to Fish and Game Code section 86, “‘take’ means hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill.” (See also *Environmental Protection Information Center v. California Department of Forestry and Fire Protection* (2008) 44 Cal.4th 459, 507 [for purposes of incidental take permitting under Fish and Game Code section 2081, subdivision (b), “‘take’ ... means to catch, capture or kill”.])

²The definition of an endangered, threatened, and candidate species for purposes of CESA are found in Fish and Game Code sections 2062, 2067, and 2068, respectively.

³ When this incidental take permit and attachments refer to the “ITP”, it means the “Amended ITP” unless the context dictates otherwise

On November 22, 2024, CDFW issued ITP No. 2081-2024-028-06 to the Permittee authorizing take of Agassiz's desert tortoise (*Gopherus agassizii*) (Covered Species) associated with and incidental to the Project. The Project as described in the ITP as originally issued by CDFW includes the construction and operations and maintenance of a photovoltaic (PV) solar facility, battery energy storage system (BESS), and associated infrastructure to generate up to 390 megawatts (MW) of renewable electricity within an approximately 3,735-acre site. In issuing the original ITP, CDFW found, among other things, that the Permittee's compliance with the Conditions of Approval of the ITP would not jeopardize the continued existence of the Covered Species.

On October 25, 2024, western burrowing owl (*Athene cunicularia hypugaea*) (BUOW) became a candidate species under CESA. On January 22, 2025, CDFW initiated this major amendment to the original ITP to include BUOW as a Covered Species.

CDFW finds that this Amendment is a Major Amendment, as defined in California Code of Regulations, title 14, section 783.6, subdivision (c)(5).

Issuance of this Amendment will increase the number of species covered for take compared to the Project as originally approved; however, by implementing additional BUOW-specific take minimization measures it is not expected that this Amendment will increase Project impacts on these species (i.e., "impacts of the taking" as used in Fish and Game Code section 2081, subdivision (b)(2)).

Issuance of this Amendment does not affect CDFW's previous determination that issuance of the ITP meets and is otherwise consistent with the permitting criteria set forth in Fish and Game Code section 2081, subdivisions (b) and (c).

CDFW now amends and reissues this ITP including the revised provisions in this first Major Amendment (collectively, the Amended ITP). The Amended ITP includes all of the operative provisions as of the effective date of this Amended ITP. Attachment 7 to this Amended ITP shows the specific red-line changes made to the ITP as a result of this Major Amendment.

III. Effective Date and Expiration Date of this ITP:

The original ITP's effective date was November 22, 2024. This remains the effective date for the original take authorization. The Amended ITP shall become effective when signed by CDFW. Unless renewed by CDFW, this ITP and its authorization to take the Covered Species shall expire on **November 18, 2059**.

Notwithstanding the expiration date on the take authorization provided by this ITP, Permittee's obligations pursuant to this ITP do not end until CDFW accepts as complete the Permittee's Final Mitigation Report required by Condition of Approval 7.8 of this ITP.

IV. Project Location:

The Easley Renewable Energy Project (Project) is located on private and federal land in the central

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

part of the Chuckwalla Valley in Riverside County, approximately two miles north of Interstate 10 and the town of Desert Center, California (Figure 1). The Project is located within the Desert Center, Victory Pass, East of Victory Pass, and Corn Spring 7.5 U.S. Geological Survey topographic quadrangles. Lake Tamarisk Resort is located approximately 750 feet from the southwest corner of the Project. The existing Desert Sunlight and Desert Harvest solar projects are north of the Project, the Athos Renewable Energy Project is located to the east, and the Oberon Renewable Energy Project to the southeast.

V. Project Description:

The Project consists of construction and operation and maintenance (O&M) of a utility-scale solar photovoltaic (PV) electrical generating and battery energy storage system (BESS) and associated infrastructure facilities on approximately 3,735 acres of private and Bureau of Land Management (BLM)-administered land (Figure 2). The Project will generate up to 390 megawatts (MW) of renewable electricity via arrays of solar PV panels and store up to 650 MW in a BESS.

Project Components

Solar and Energy Storage Facility

The solar facility will include PV modules and support structures; inverters, transformers, and electrical collection system; a substation yard, and BESS.

Structures supporting the PV modules will consist of steel piles (e.g., cylindrical pipes, H-beams, helical screws, or similar structures), which will be driven into the soil using pneumatic techniques such as a hydraulic rock hammer attachment on the boom of a rubber-tired backhoe excavator.

The Project will be designed and laid out primarily in module blocks of 2 to 5 MW. Each block will include a Power Conversion Station constructed on a concrete pad or steel skid centrally located within the PV arrays. Each Power Conversion Station will contain up to six inverters, a transformer, a battery enclosure, and an 8 to 11-foot-high switchboard. Panels will be electrically connected into panel strings using wiring secured to the panel racking system. Underground cables will be installed to convey the direct current (DC) electricity from the panels via combiner boxes located throughout the PV arrays, to inverters located at the Power Conversion Station that would convert the DC to alternating current (AC) electricity. The 34.5 kilovolt (kV) collection cables will be buried underground in a trench about four feet deep, with segments installed overhead on wood poles to connect all of the solar facility development areas to the onsite substation. Where the collection system is installed overhead, up to approximately 30 wood poles located between 150 to 250 feet apart could be installed on the site where several circuits would need to cross each other. The typical height of the poles would be approximately 30 to 60 feet, with diameters varying from 12 to 20 inches.

A Project substation yard will transform or “step up” the voltage from 34.5 kV to 500 kV. The substation area will be graded and compacted to an approximately level grade. Concrete pads will be

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

constructed on site as foundations for substation equipment and the remaining area will be graveled to a maximum depth of approximately 12 inches. The BESS will consist of battery banks housed in electrical enclosures and buried electrical conduit. Over 500 electrical enclosures will be installed in six 4-foot storage containers, each measuring approximately 40 feet by 8 feet by 8.5 feet high on concrete foundations

Operations and Maintenance Facilities

New O&M facilities constructed at the Project site will be designed for Project security, employee offices, and parts storage with separate operations buildings for the solar facility and BESS. The O&M facility will include two O&M office buildings, each approximately 3,000 square feet and 15 feet high at the tallest point; up to 16 storage CONEX containers for spare parts covering a total area of approximately 7,500 square feet; laydown yards, and a parking area.

Gen-tie Line

A 7.5-mile 500 kV generation-tie (gen-tie) line within a 175-foot right-of-way will mainly traverse across the Oberon Renewable Energy Project site south of the Project area and connect into an existing substation on the Oberon Project site. From the Oberon onsite substation, the power generated by the Easley Project would be transmitted to the Southern California Edison (SCE) Red Bluff Substation via the existing Oberon 500 kV gen-tie line. The gen-tie line will be constructed with monopoles and will be on average 120 feet tall, with a maximum height up to approximately 199 feet where the proposed gen-tie would cross above existing transmission lines. There will be a total of approximately 45 gen-tie structures.

Roads

Access to the site will be provided from SR-177/Rice Road through multiple primary and secondary driveway entrances and from Kaiser Road. All new and improved access roads will be approximately 24 feet wide with a two-foot-wide shoulder on each side, for a total width of approximately 30 feet, including allowances for side slopes and surface runoff control. Construction of the access road segments will include compacting subsurface soils and placing a 4-inch-thick layer of asphalt concrete over a 6-inch-thick layer of compacted aggregate base. The Project's onsite roadway system will include a perimeter road surrounding the solar panels within the development fence lines, access roads, and internal roads.

Construction

Preconstruction activities include environmental resource surveys; geotechnical evaluations; surveying, staking, and flagging; desert tortoise exclusion fence installation; and establishment of construction staging areas.

Construction is anticipated to take approximately 20 months. Construction will begin with the main access road, security fencing around the solar facility site, clearing and construction of the main

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

access road, security fencing around solar facility site, clearing and construction of laydown yard, site grading and preparation, construction of the operations and maintenance building, parking area, and pad mounts on transformers. Construction will continue with the installation of temporary power, construction of on-site roads, construction of the substation and BESS, and assembly and installation of panel blocks and wiring.

Mass grading will not be conducted on the Project site. The substation, BESS, O&M facility, laydown yards, pre-fabrication areas, and internal and external road locations will require mowing, grubbing, grading, and compaction. Inverter station locations will require light grubbing. The solar array areas will require mowing and grubbing to a height of 12 inches. Woody vegetation will typically be chipped onsite and left in place to assist with revegetation and dust control.

Operation and Maintenance

Maintenance typically will include panel repairs; panel washing; maintenance of transformers, inverters, energy storage system, and other electrical equipment; road and fence repairs; and vegetation and pest management. On-site vegetation will be managed to ensure access to all areas of the site, reduce fire risk, and to assist in screening Project elements as needed. On-site vegetation may be trimmed approximately once every three years, as needed. Solar modules will be washed as needed (up to four times each year) using light utility vehicles with tow-behind water trailers. No chemical agents will be used for module washing. No heavy equipment will be used during normal operation. O&M vehicles will include trucks, forklifts, loaders, and water trucks.

VI. Covered Species Subject to Take Authorization Provided by this ITP:

This ITP covers the following species:

<u>Name</u>	<u>CESA Status</u> ⁴
1. Mojave desert tortoise (<i>Gopherus agassizii</i>)	Threatened ^{5a} Candidate ^{5b}
2. Western burrowing owl (<i>Athene cunicularia hypugaea</i>)	Candidate ⁶

These species and only these species are the “Covered Species” for the purposes of this ITP.

VII. Impacts of the Taking on Covered Species:

Project activities and their resulting impacts are expected to result in the incidental take of individuals

⁴ Under CESA, a species may be on the list of endangered species, the list of threatened species, or may be a candidate for listing as an endangered or threatened species.

^{5a}See Cal. Code Regs. tit. 14 § 670.5, subd. (b)(4)(A).

^{5b}See 2020 Cal. Reg. Notice Register, No. 41-Z, pp. 1349 (October 9, 2020).

⁶ The species’ status may change following the decision of the Fish and Game Commission to designate the species as threatened or endangered but if there is such a designation, the species will remain a covered species. See 2024 Ca. Reg. Notice Register, No. 43-Z, p. 1400 (October 25, 2024).

of the Covered Species. The activities described above expected to result in incidental take of individuals of the Covered Species include vegetation clearing; grading, leveling, and compaction; excavation; installation of fencing or barriers; installation and/or construction of temporary Project facilities and structures; general operation of vehicles and heavy equipment; noise, vibration, and dust generating activities; and capture and relocation activities (Covered Activities).

Incidental take of individuals of the Covered Species in the form of mortality ("kill") may occur as a result of Covered Activities such as collision with, or crushing by, vehicles or heavy equipment; crushing or burial of individuals or eggs in burrows; destruction of burrows and refugia; and increased predation. Incidental take of individuals of the Covered Species may also occur from the Covered Activities in the form of pursue, catch, capture, or attempt to do so of the Covered Species from capture and relocation activities. The area where authorized take of the Covered Species is expected to occur is within the 3,735-acre area for the Project site and within the gen-tie line corridor (collectively, the Project Area).

The Project is expected to cause the permanent loss of 1,239.4 acres of habitat for the desert tortoise and 1,051 acres of habitat for burrowing owl. Impacts of the authorized taking also include adverse impacts to the Covered Species related to temporal losses, increased habitat fragmentation and edge effects, and the Project's incremental contribution to cumulative impacts (indirect impacts). These impacts include stress resulting from noise and vibrations displacement from preferred habitat, increased competition for food and space, and increased vulnerability to predation.

VIII. Incidental Take Authorization of Covered Species:

This ITP authorizes incidental take of the Covered Species and only the Covered Species. With respect to incidental take of the Covered Species, CDFW authorizes the Permittee, its employees, contractors, and agents to take Covered Species incidentally in carrying out the Covered Activities, subject to the limitations described in this section and the Conditions of Approval identified below. This ITP does not authorize take of Covered Species from activities outside the scope of the Covered Activities, take of Covered Species outside of the Project Area, take of Covered Species resulting from violation of this ITP, or intentional take of Covered Species except for capture and relocation of Covered Species as authorized by this ITP.

IX. Conditions of Approval:

Unless specified otherwise, the following measures apply to all Covered Activities within the Project Area, including areas used for vehicular, aircraft (e.g. helicopter) ingress and egress, staging and parking, and noise and vibration generating activities that may/will cause take. CDFW's issuance of this ITP and Permittee's authorization to take the Covered Species are subject to Permittee's compliance with and implementation of the following Conditions of Approval:

- 1. Legal Compliance:** Permittee shall comply with all applicable federal, state, and local laws in existence on the effective date of this ITP or adopted thereafter.

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

- 2. CEQA Compliance:** Permittee shall implement and adhere to the mitigation measures related to the Covered Species in the Biological Resources section of the Environmental Impact Report (SCH No.: 2022110240) certified by Riverside County on August 27, 2024, as lead agency for the Project pursuant to the California Environmental Quality Act (CEQA) (Pub. Resources Code, § 21000 et seq.).
- 3. LSA Agreement Compliance:** Permittee shall implement and adhere to the mitigation measures and conditions related to the Covered Species in the Lake and Streambed Alteration Agreement (LSAA) (Notification No. EPIMS-RIV-50158-R6) for the Project executed by CDFW pursuant to Fish and Game Code section 1600 et seq.
- 4. ESA Compliance:** Permittee shall implement and adhere to the terms and conditions related to the Covered Species in the Easley Renewable Energy DRECP Activity Form per the Biological Opinion issued for the Proposed Land Use Plan amendment to the Desert Renewable Energy Conservation Plan (FWS-KRN/SBD/INY/LA/IMP/RIV-16B0138-16F0200) pursuant to the Federal Endangered Species Act. For purposes of this ITP, where the terms and conditions for the Covered Species in the federal authorization are less protective of the Covered Species or otherwise conflict with this ITP, the conditions of approval set forth in this ITP shall control.
- 5. ITP Time Frame Compliance:** Permittee shall fully implement and adhere to the conditions of this ITP within the time frames set forth below and as set forth in the Mitigation Monitoring and Reporting Program (MMRP), which is included as Attachment 1 to this ITP.
- 6. General Provisions:**
 - 6.1. Designated Representative.** Before starting Covered Activities, Permittee shall designate a representative (Designated Representative) responsible for communications with CDFW and overseeing compliance with this ITP. Permittee shall notify CDFW in writing before starting Covered Activities of the Designated Representative's name, business address, and contact information, and shall notify CDFW in writing if a substitute Designated Representative is selected or identified at any time during the term of this ITP.
 - 6.2. Biological Monitor(s).** Permittee shall designate Biological Monitor(s) knowledgeable and experienced in the biology and natural history of the Covered Species. The Biological Monitor(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate or avoid the incidental take of individual Covered Species and to minimize disturbance of Covered Species' habitat.
 - 6.3. Authorized Biologist for Desert Tortoise (DT Authorized Biologist).** Permittee shall designate an Authorized Biologist(s) knowledgeable in the biology and natural history of desert tortoise. The Authorized Biologist(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate and avoid the incidental take of individual desert

No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

tortoise and to minimize disturbance of desert tortoise habitat. Additionally, the Authorized Biologist(s) shall have experience with all activities that will be carried out for the Project including, but not limited to, excavating burrows, handling and temporarily holding desert tortoise, relocating/translocating the desert tortoise, reconstructing burrows, unearthing and relocating eggs, locating, identifying, and recording all forms of desert tortoise signs, collecting blood samples, conducting health assessments, conducting protocol level surveys, and/or attaching and removing transmitters to and from the desert tortoise.

6.3.1. Authorized Biologist for Burrowing Owl (BUOW Authorized Biologist). Permittee shall designate an Authorized Biologist(s) knowledgeable in the biology and natural history of burrowing owl. The BUOW Authorized Biologist shall be responsible for monitoring Covered Activities to help minimize and fully mitigate the incidental take of individual burrowing owl and to minimize disturbance of burrowing owl habitat. Additionally, the Authorized Biologist shall have experience with all activities that will be carried out for the Project including, but not limited to conducting passive exclusion activities, establishing no-disturbance buffers, excavating burrows, and monitoring blocked burrows.

6.4. Biologist and Veterinarian Approvals. Permittee shall obtain CDFW approval of the DT Authorized Biologist(s), BUOW Authorized Biologist(s), Biological Monitor(s), and if needed veterinarian(s), in writing before starting Covered Activities, and shall also obtain advance written approval if any of these entities are changed. For approval, the Designated Representative shall submit Attachment 2 and 2A of this ITP and an Excel spreadsheet listing in alphabetical order the names of the proposed Authorized Biologist(s), Biological Monitor(s), and veterinarian(s) to CDFW a minimum of 21 calendar days before starting Covered Activities or before any changes are made to these personnel. For each proposed Authorized Biologist(s) and Biological Monitor(s), the Excel spreadsheet shall include the activities outlined in this ITP and associated Desert Tortoise Translocation Plan (DTTP) and Burrowing Owl Mortality Reduction Plan that the Permittee is requesting approval for that individual to carry out.

6.5. Authorized Biologist and Biological Monitor Authority. To ensure compliance with the Conditions of Approval of this ITP, the Authorized Biologist(s) and/or Biological Monitor (collectively, Biologists) shall immediately stop any activity that does not comply with this ITP and/or order any reasonable measure to avoid the unauthorized take of an individual of the Covered Species. Permittee shall provide unfettered access to the Project Site and otherwise facilitate the Biologist(s) in the performance of his/her duties. If the Biologist(s) is unable to comply with the ITP, then the Biologist(s) shall notify the CDFW Representative immediately. Permittee shall not enter into any agreement or contract of any kind, including but not limited to non-disclosure agreements and confidentiality agreements, with its contractors and/or the Biologists(s) that prohibit or impede open communication

Incidental Take Permit
No. 2081-2024-028-06

EASLEY RENEWABLE ENERGY PROJECT

with CDFW, including but not limited to providing CDFW staff with the results of any surveys, reports, or studies or notifying CDFW of any non-compliance or take. Failure to notify CDFW of any non-compliance or take or injury of a Covered Species as a result of such agreement or contract may result in CDFW taking actions to prevent or remedy a violation of this ITP.

- 6.6. Education Program.** Permittee shall conduct an education program for all persons employed or otherwise working in the Project Area before performing any work. The program shall consist of a presentation from an approved Biologist that includes a discussion of the biology and general behavior of the Covered Species, information about the distribution and habitat needs of the Covered Species, sensitivity of the Covered Species to human activities, its status pursuant to CESA including legal protection, recovery efforts, penalties for violations and Project-specific protective measures described in this ITP. Permittee shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry in the Project Area. Permittee shall provide interpretation for non-English speaking workers, and the same instruction shall be provided to any new workers before they are authorized to perform work in the Project Area. Upon completion of the program, employees shall sign a form stating they attended the program and understand all protection measures. This training shall be repeated at least once annually for long-term and/or permanent employees that will be conducting work in the Project Area.
- 6.7. Construction Monitoring Documentation.** The Authorized Biologist(s) and Biological Monitor(s) shall maintain construction-monitoring documentation on-site in either hard copy or digital format throughout the construction period, which shall include a copy of this ITP with attachments and a list of signatures of all personnel who have successfully completed the education program. Permittee shall ensure a copy of the construction-monitoring documentation is available for review at the Project site upon request by CDFW.
- 6.8. Trash Abatement.** Permittee shall initiate a trash abatement program before starting Covered Activities and shall continue the program for the duration of the Project. Permittee shall ensure that trash and food items are contained in animal-proof containers and removed, ideally at daily intervals but at least once a week, to avoid attracting opportunistic predators such as ravens, coyotes, and feral dogs.
- 6.9. Dust Control.** Permittee shall implement dust control measures during Covered Activities to facilitate visibility for monitoring of the Covered Species by the Authorized Biologist(s) and Biological Monitor(s). Permittee shall keep the amount of water used to the minimum amount needed and shall not allow water to form puddles.

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

- 6.10. Erosion Control Materials.** Permittee shall prohibit use of erosion control materials potentially harmful to Covered Species and other species, such as monofilament netting (erosion control matting) or similar material, in potential Covered Species' habitat.
- 6.11. Delineation of Property Boundaries.** Before starting Covered Activities, Permittee shall clearly delineate the boundaries of the Project Area with fencing, stakes, or flags. Permittee shall restrict all Covered Activities to within the fenced, staked, or flagged areas. Permittee shall maintain all fencing, stakes, and flags until the completion of Covered Activities in that area.
- 6.12. Delineation of Habitat.** Permittee shall clearly delineate habitat of the Covered Species within the Project Area with posted signs, posting stakes, flags, and/or rope or cord, and place fencing as necessary to minimize the disturbance of Covered Species' habitat.
- 6.13. Project Access.** Project-related personnel shall access the Project Area using existing routes, or routes identified in the Project Description and shall not cross Covered Species' habitat outside of or en route to the Project Area. Permittee shall restrict Project-related vehicle traffic to established roads, staging, and parking areas. Permittee shall ensure that vehicle speeds do not exceed 20 miles per hour to avoid Covered Species on or traversing the roads. If Permittee determines construction of routes for travel are necessary outside of the Project Area, the Designated Representative shall contact CDFW for written approval before carrying out such an activity. CDFW may require an amendment to this ITP, among other reasons, if additional take of Covered Species will occur as a result of the Project modification.
- 6.14. Staging Areas.** Permittee shall confine all Project-related parking, storage areas, laydown sites, equipment storage, and any other surface-disturbing activities to the Project Area using, to the extent possible, previously disturbed areas. Additionally, Permittee shall not use or cross Covered Species' habitat outside of the marked Project Area unless provided for as described in Condition of Approval 6.13 of this ITP.
- 6.15. Hazardous Waste.** Permittee shall immediately stop and, pursuant to pertinent state and federal statutes and regulations, arrange for repair and clean up by qualified individuals of any fuel or hazardous waste leaks or spills at the time of occurrence, or as soon as it is safe to do so. Permittee shall exclude the storage and handling of hazardous materials from the Project Area and shall properly contain and dispose of any unused or leftover hazardous products off-site.
- 6.16. CDFW Access.** Permittee shall provide CDFW staff with reasonable access to the Project and mitigation lands under Permittee control, and shall otherwise fully cooperate with CDFW efforts to verify compliance with or effectiveness of mitigation measures set forth in this ITP.

Incidental Take Permit

(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

- 6.17. Refuse Removal.** Upon completion of Covered Activities, Permittee shall remove from the Project Area and properly dispose of all temporary fill and construction refuse, including, but not limited to, broken equipment parts, wrapping material, cords, cables, wire, rope, strapping, twine, buckets, metal or plastic containers, and boxes.
- 6.18. General Habitat and Species Avoidance.** Permittee shall, to the greatest extent feasible, avoid impacts/disturbances to sensitive plants, plant communities, and animals within the Project Area. In addition, Permittee shall avoid, to the maximum extent practicable, impacts/disturbance to perennial, native vegetation within the Project Area. To the maximum extent practicable, Permittee shall limit access-related Covered Activities to “drive and crush” rather than vegetation removal or grubbing.
- 6.19. Firearms and Dogs.** Permittee shall prohibit Project personnel and any other individual associated with the Project from bringing any firearms or dogs on the Project Area during Covered Activities, except those in the possession of authorized security personnel or local, state, or federal law enforcement officials, dogs that may be used to aid in official and approved monitoring procedures/protocols, or service dogs under Title II and Title III of the Americans with Disabilities Act.

7. Monitoring, Notification and Reporting Provisions:

- 7.1. Notification Before Commencement.** The Designated Representative shall notify CDFW 14 calendar days before starting Covered Activities and shall document compliance with all pre-Project Conditions of Approval before starting Covered Activities.
- 7.2. Notification of Non-compliance.** The Designated Representative shall immediately notify CDFW if the Permittee is not in compliance with any Condition of Approval of this ITP, including but not limited to any actual or anticipated failure to implement measures within the time periods indicated in this ITP and/or the MMRP. The Designated Representative shall follow up within 24 hours with a written report to CDFW describing, in detail, any non-compliance with this ITP and suggested measures to remedy the situation.
- 7.3. Notifying Procedures.** The Permittee or the Designated Representative shall provide all required notifications in this ITP by sending an email to the CDFW Regional Representative Rose Banks (Rose.Banks@wildlife.ca.gov) and as described in the Notices section of this ITP. All notifications shall be submitted via email to the Regional Representative and shall include the following information: ITP Number, the ITP Condition number that the notification is addressing, any necessary photos or attachments, and the name and phone numbers of the Biological Monitor(s) and/or Authorized Biologist(s) (if applicable).
- 7.4. Compliance Monitoring.**

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

7.4.1.1. During construction. The Authorized Biologist(s) and/or Biological Monitor(s) shall be on-site daily when Covered Activities occur. The Authorized Biologist(s) and/or Biological Monitor(s) shall conduct compliance inspections a minimum of three times a day (once during the onset of the day's work, once mid-day, and once at the conclusion of that day's work). The Authorized Biologist(s) and/or Biological Monitor(s) shall conduct compliance inspections to:

- (1) minimize incidental take of the Covered Species;
- (2) prevent unlawful take of species;
- (3) check for compliance with all measures of this ITP;
- (4) check all exclusion zones; and
- (5) ensure that signs, stakes, and fencing are intact, and that Covered Activities are only occurring in the Project Area.

The Designated Representative or Authorized Biologist shall prepare daily written observation and inspection records summarizing oversight activities and compliance inspections, observations of Covered Species and their sign, survey results, and monitoring activities required by this ITP.

7.4.1.2. During O&M. Once all construction is complete any work being performed outside the exclusionary fencing shall have an Authorized Biologist(s) and/or Biological Monitor(s) on-site to monitor any ground-disturbing Covered Activities and during perimeter fence inspections for the term of this ITP.

7.5. Quarterly Compliance Report during Construction. The Designated Representative or Authorized Biologist(s) and/or Biological Monitor(s) shall compile the observation and inspection records identified in Condition of Approval 7.4 into a Quarterly Compliance Report and submit it to CDFW along with a copy of the MMRP table with notes showing the current implementation status of each mitigation measure. Quarterly Compliance Reports shall be submitted to the CDFW offices listed in the Notices section of this ITP and via e-mail to CDFW's Regional Representative and Headquarters CESA Program. At the time of this ITP's approval, the CDFW Regional Representative is Rose Banks (Rose.Banks@wildlife.ca.gov) and Headquarters CESA Program email is CESA@wildlife.ca.gov. CDFW may at any time increase the timing and number of compliance inspections and reports required under this provision depending upon the results of previous compliance inspections. If CDFW determines the reporting schedule must be changed, CDFW will notify Permittee in writing of the new reporting schedule.

7.6. Annual Status Report. Permittee shall provide CDFW with an Annual Status Report (ASR) no later than January 31 of every year beginning with issuance of this ITP and continuing until

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

permit termination date or CDFW determines they are no longer necessary. Each ASR shall include, at a minimum: (1) a summary of all Quarterly Compliance Reports for that year identified in Condition of Approval 7.5; (2) a general description of the status of the Project Area and Covered Activities, including actual or projected completion dates, if known; (3) a copy of the table in the MMRP with notes showing the current implementation status of each mitigation measure; (4) an assessment of the effectiveness of each completed or partially completed mitigation measure in avoiding, minimizing and mitigating Project impacts; (5) all available information about Project-related incidental take of the Covered Species; and (6) information about other Project impacts on the Covered Species.

- 7.7. CNDDDB Observations.** The Authorized Biologist shall submit all observations of Covered Species to CDFW's California Natural Diversity Database (CNDDDB) within 60 calendar days of the observation and the Authorized Biologist shall include copies of the submitted forms with the next Quarterly Compliance Report or ASR, whichever is submitted first relative to the observation.
- 7.8. Final Construction Mitigation Report.** No later than 45 days after completion of all mitigation measures performed during the construction period, Permittee shall provide CDFW with a Final Mitigation Report. The Authorized Biologist shall prepare the Final Mitigation Report which shall include, at a minimum: (1) a summary of all Quarterly Compliance Reports and all ASRs; (2) a copy of the table in the MMRP with notes showing when each of the mitigation measures was implemented; (3) all available information about Project-related incidental take of the Covered Species; (4) information about other Project impacts on the Covered Species; (5) beginning and ending dates of Covered Activities; (6) an assessment of the effectiveness of this ITP's Conditions of Approval in minimizing and fully mitigating Project impacts of the taking on Covered Species; (7) recommendations on how mitigation measures might be changed to more effectively minimize take and mitigate the impacts of future projects on the Covered Species; (8) geographic information system (GIS) shapefiles in the format specified in Attachment 3 and (9) any other pertinent information.
- 7.9. Notification of Take or Injury.** Permittee shall immediately notify the Authorized Biologist(s) and/or Biological Monitor(s) if a Covered Species is taken or injured by a Project-related activity, or if a Covered Species is otherwise found dead or injured within the vicinity of the Project. The Authorized Biologist or Designated Representative shall provide initial notification to CDFW by following Condition of Approval 7.3. The initial notification to CDFW shall include information regarding the location, species, and number of animals taken or injured and the ITP Number. Following initial notification, Permittee shall send CDFW a written report within two calendar days. The report shall include the date and time of the finding or incident, location of the animal or carcass, and if possible, provide a photograph, explanation as to cause of take or injury, and any other pertinent information.

Incidental Take Permit

(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

8. Take Minimization Measures: The following requirements are intended to ensure the minimization of incidental take of Covered Species in the Project Area during Covered Activities. Permittee shall implement and adhere to the following conditions to minimize take of Covered Species:

- 8.1. Herbicides.** Permittee shall only use herbicides containing a harmless dye and registered with the California Department of Pesticide Regulation (DPR). All herbicides shall be applied in accordance with regulations set by DPR. All herbicides shall be used according to labeled instructions. Labeled instructions for the herbicide used shall be made available to CDFW upon request. No herbicide application when winds are greater than five (5) miles per hour.
- 8.2. Rodenticides and Insecticides.** Permittee shall not use rodenticides and/or insecticides on the Project Area without prior written permission from CDFW. Permittee shall not use any second-generation anticoagulant rodenticide (brodifacoum, bromadiolone, difethialone, and difenacoum) on the Project Area. Permittee shall not use any first-generation anticoagulant rodenticide (diphacinone, chlorophacinone, and warfarin) on the Project Area without prior written permission from CDFW.
- 8.3. Removal of Debris.** Permittee shall remove all hardened concrete and other loose debris in areas that need to be cleared by slowly removing stored material starting from the top and working down to ground level, rather than scooping from the ground up. This method will minimize the possibility of harming a Covered Species using the debris as shelter and will allow them to escape.
- 8.4. Entrapment Inspections.** Any pipes, culverts, or similar structures with a diameter greater than 3 inches and less than 8 inches aboveground shall be inspected by the Authorized Biologist(s) and/or Biological Monitor(s) for Covered Species' before the material is moved, buried, or capped. The Authorized Biologist(s) and/or Biological Monitor(s) shall inspect all open holes and trenches within Covered Species habitat at a minimum of twice a day and just prior to backfilling. At the end of each workday during construction, Permittee shall place an escape ramp at each end of trenches to allow any animals that may have become trapped in the trench to climb out overnight. The ramp may be constructed of either dirt fill or wood planking or other suitable material that is placed at an angle no greater than 30 degrees. If any worker discovers that Covered Species have become trapped, they shall halt Covered Activities and notify the Biological Monitor(s) and/or Authorized Biologist(s) immediately. Project workers and the Biological Monitor(s) and/or Authorized Biologist(s) shall allow the Covered Species to escape unimpeded if possible, or an Authorized Biologist(s) approved under Condition of Approval 6.4 of this ITP shall move the Covered Species out of harm's way before allowing work to continue.

(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

8.5. Pre-Construction Clearance Surveys for Desert Tortoise. No later than 30 days prior to start of Covered Activities, the DT Authorized Biologist(s) and/or Biological Monitor(s) approved under this ITP shall conduct pre-construction clearance surveys for desert tortoise, using the methods described in the most recent United States Fish and Wildlife Service (USFWS) Desert Tortoise (Mojave Population) Field Manual (hereinafter referred to as USFWS Field Manual). In addition to the guidance provided in the USFWS Field Manual, CDFW provides the following requirement(s):

8.5.1. Pre-construction clearance surveys shall be completed using perpendicular survey routes within the Project Area. Pre-construction clearance surveys cannot be combined with other clearance surveys conducted for other species while using the same personnel. Covered Activities cannot start until two (2) negative results from consecutive surveys using perpendicular survey routes for desert tortoise are documented.

8.5.2. These surveys shall cover 100 percent of the Project Area and a 50-foot buffer zone around the Project site. The Biological Monitor(s) and/or DT Authorized Biologist(s) shall record all potential desert tortoise and burrows within the pre-construction clearance survey area, using global positioning system (GPS) technology. The DT Authorized Biologist(s) and/or Biological Monitor(s) shall provide the results of the pre-construction clearance survey (including all information of the USFWS Protocol data sheet) to CDFW within 10 Calendar days of completing the surveys. The use of specialized equipment (e.g., fiber optics) may be necessary to thoroughly inspect all burrows in preparation for collapsing them.

8.5.3. Twenty-four hours prior to the start of any Covered Activities, except for areas already cleared within installation of desert tortoise exclusion fencing, the DT Authorized Biologist(s) and/or Biological Monitor shall conduct a final clearance survey of Project Area. The use of specialized equipment (e.g., fiber optics) may be necessary to thoroughly inspect all burrows in preparation for collapsing them.

8.6. Covered Species Observations. If a Covered Species is observed during Covered Activities, all work within 300 feet of the Covered Species shall immediately stop and the observation shall be immediately reported to the Authorized Biologist(s). Covered Activities shall not resume until the Authorized Biologist(s) and/or Biological Monitor(s) has verified the Covered Species has left the Project Area OR an Authorized Biologist(s) approved under Condition of Approval 6.4 of this ITP relocates the Covered Species as described in this ITP and Desert Tortoise Translocation Plan or passively relocates as described in the BUOW Mortality Reduction Plan. The Designated Representative shall notify CDFW of any Covered Species observations within the Project Area. Notification shall occur as described in Condition of Approval 7.3 within 24 hours. Notification and the written report shall include the date, location, and circumstances of the observation, the name of the Authorized

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

Biologist(s) that relocated the individual, pictures, map and shapefiles with the location (including GPS coordinates) where the individual was moved as specified in the DTTP.

8.7. Excavating Desert Tortoise Burrows. Only DT Authorized Biologist(s) and Biological Monitor(s) approved by CDFW are authorized to conduct burrow excavation. Excavation of burrows shall follow the methods described the USFWS Field Manual.

8.8. Desert Tortoise Translocation. Regardless of the number of desert tortoise estimated to be moved out of harm's way the Permittee shall prepare a Desert Tortoise Translocation Plan (DTTP) 30 Calendar days prior to start of Covered Activities and submit it according to Condition of Approval 7.3 of this ITP. Covered Activities are not authorized to start until the DTTP is approved in writing by CDFW. The DTTP shall follow the most current guidelines provided by USFWS and CDFW regarding desert tortoise translocation. Where guidance differs between USFWS and CDFW, verbal and/or written direction provided by CDFW always controls.

The list of items below are the most common examples of the differences between CDFW and USFWS guidelines. These shall be included in the DTTP along with the most recent USFWS translocation guidelines:

- Translocated tortoises are tortoises removed from the Project Area and/or have a radio transmitter attached.
- The Authorized Biologist shall determine when the creation of artificial burrows is needed.
- Ambient air temperature guidelines shall be followed as specified in Condition of Approval 8.9 of this ITP.
- Tortoises <100 millimeters (mm) midline carapace length (MCL) shall be released immediately without being held, transmitted, or blood drawn for disease testing as long as the temperature requirements in Condition of Approval 8.9 of this ITP above are met.
- CDFW does not authorize the release of tortoises that test positive for disease even if it does not show outward signs of the disease. If a tortoise tests positive for disease it is the responsibility of the Permittee to locate a CDFW approved facility to place the tortoise in. Any exception to this determination will need to be approved in writing by CDFW on a case-by-case basis.
- Disease testing shall not be done between November 1 and May 14. If a tortoise >100 mm MCL is found between November 1 and May 14 or earlier with written

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

approval from CDFW the tortoise shall be held in quarantine facilities and shall remain in quarantine until tested twice (once in the spring and once in the fall). If the tortoise tests negative for disease it can be released in accordance with the approved DTTP. Blood draw samples for *Mycoplasma agassizii* and *Mycoplasma testudineum* shall determine if a tortoise is negative or positive for disease. A combination of results from blood testing and visual inspection will be used to determine the health of a tortoise. Blood draw samples will be sent to: Dr. Mary Brown, University of Florida Mycoplasma Laboratory, 2015 SW Archer Road, Room V2-234, Gainesville Florida 32608, or other facility approved by CDFW. CDFW uses enzyme-linked immune assay (ELISA) test results to determine if a tortoise is positive for disease. The ELISA tests will be used to test for exposure to herpes virus (*Mycoplasma agassizii* and *Mycoplasma testudineum*).

- If a tortoise tests positive for or is suspected of disease, then the tortoise will be tested twice for disease (once in the spring after May 15 to and once in the fall). To determine results of blood testing use the most current guidelines provided by the University of Florida Mycoplasma Laboratory Department of Infectious Diseases and Pathology. The University of Florida Mycoplasma Laboratory Department of Infectious Diseases & Pathology 2013 criteria for classifying *Mycoplasma agassizii* and *Mycoplasma testudineum* is a titer <32 is negative, a titer > 64 is positive, and a titer of 32 is suspect (retesting in 6 weeks) or most current guidelines. All sample forms shall come from the University of Florida's guidance.
- The DTTP shall include a requirement that all translocated tortoises regardless of size be included in the translocation numbers and all reports.
- The DTTP shall propose one recipient site. Recipient sites shall have the vegetative structure to support all life stages of desert tortoises. In addition to the USFWS Field Manual guidelines the DTTP shall also include identifying the known threats or potential causes of population decline, how potential threats have been or would be addressed, complete physical examination and health assessments with sample collection, age-structure and sex ratios, protocol level surveys, vegetation classification and quality of habitat. The DTTP shall detail which characteristics are to be used to decide if a recipient site is similar enough to a Project Area including burrow aspects, and recovery needs such as habitat restoration and/or predator control.
- All tortoises >100 mm MCL removed off the Project Area shall be transmittered and monitored for 5 years post translocation.

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

- Recipient sites shall be a minimum of 4 miles (6.5 kilometers) away from highway/road right-of-way that does not include Covered Species fencing.
- All tortoise burrows within the Project Area shall be excavated following procedures outlined in the U. S. Fish and Wildlife Service Desert Tortoise Field Manual.
- Creation of artificial burrows, as well as translocation of tortoises and eggs shall only occur on land(s) (including Bureau of Land Management), when written authorization has been obtained from the landowner prior to the start of Covered Activities. The written permission from the landowner shall be included in the DTTP and the DTTP shall not be approved by CDFW until authorization is provided in writing. If creation of artificial burrows or translocation of tortoise or eggs is proposed to take place on private lands then in addition to written approval required above, some form of protection for the land such as a conservation easement shall be in place prior to translocation occurring.
- Cleaning and Disinfection Protocol. Trifectant and Rescue Ready to Use One Step Disinfectant Cleaner are the only products authorized under this ITP and its associated DTTP to be used as a disinfectant. These products are not authorized to be applied using a spray bottle or other spray methods.

Cleaning and Disinfection Protocol shall include the following: ⁷

- Remove all grossly visible debris.
- Wash the area or item with water and mild detergent.
- Thoroughly rinse the cleaned area to remove any detergent residue.
- Allow the area to dry completely.
- Apply disinfectant mixture.
- Allow the full disinfectant product recommended contact time.
- Thoroughly rinse away any residual disinfectant and allow the area or item to air dry.

8.9. Ambient Air Temperature. During all handling procedures, desert tortoise shall be treated in a manner to ensure that they do not overheat or exhibit signs of overheating (e.g., gaping, foaming at the mouth, etc.), or are placed in a situation where they cannot maintain surface and core temperatures necessary to their well-being. Tortoises shall be kept shaded at all times until it is safe to release them. For the purposes of this permit, ambient air temperature shall be measured in the shade, protected from wind, at a height of 5 centimeters above the ground surface. For all Covered Activities no desert tortoise

⁷ Brown, Mary. Cleaning and Disinfection Protocol. Department of Infectious Diseases and Pathology, College of Veterinary Medicine, Gainesville FL.

shall be captured, moved, transported, released, or purposefully caused to leave its burrow for whatever reason when the ambient air temperature is above 95° Fahrenheit (F) (35° Celsius (C)). No desert tortoise shall be captured if the ambient air temperature is anticipated to exceed 95° F (35° C) before handling or processing can be completed. If the ambient air temperature exceeds 95° F (35° C) during handling or processing, desert tortoises shall be kept shaded in an environment that does not exceed 95° F (35° C), and not released until ambient air temperature declines to below 95°F (35°C). Desert tortoises moved during the less active season (June 1 to August 31 and November 1 to March 31) shall be monitored by the DT Authorized Biologist(s) for at least two days after placement in the new burrows to ensure their safety. During relocation, the DT Authorized Biologist(s) may hold a captured desert tortoise overnight and move them the following morning within these temperature constraints.

8.10. Desert Tortoise Rehydration. If a desert tortoise voids its bladder as a result of being handled, the Authorized Biologist(s) shall rehydrate the animal(s). The Authorized Biologist(s) shall rehydrate the desert tortoise at the location where the animal(s) was or were captured, or the location where the animal(s) is or will be released. The Authorized Biologist(s) shall rehydrate the desert tortoise by placing it in a tub with a clean plastic disposable liner. The Authorized Biologist(s) shall add water to the lined tub while ensuring that the water level is not higher than the lower jaw of the animal. The Authorized Biologist(s) shall rehydrate each desert tortoise individually for a minimum of 10 to 20 minutes. The DT Authorized Biologist(s) shall place the lined tub in a quiet protected area during rehydration.

8.11. Desert Tortoise Handling Records. The DT Authorized Biologist(s) and/or Biological Monitor(s) shall maintain a record of all desert tortoises handled. This information shall include: (1) the locations (narrative and maps) and dates of observation, including whether the individual(s) was found above ground or in a burrow; (2) ambient temperature when handled and released; (3) general condition and health of the individual(s), including injuries, state of healing, and whether the individual(s) voided its bladders; (4) identified diagnostic markings (i.e., identification numbers or marked marginal scutes); (5) location moved from and location moved to (using GPS technology), including information on any burrow (natural or artificial) utilized; (6) whether any eggs were discovered and relocated; (7) digital photographs of any desert tortoise and eggs handled; and (8) results of ongoing monitoring. The Designated Representative(s) shall provide CDFW with the information listed above submitted in the quarterly reports during construction.

8.12. Desert Tortoise Guards. The design of desert tortoise guards shall include exit ramps and cleanout. Guards shall be installed along the Existing Right-of-Way fence. Guard locations

and design shall be provided to CDFW and shall be approved by CDFW in writing prior to starting Covered Activities.

- 8.13. Permanent Security Fencing with Attached Desert Tortoise Fencing.** The permanent desert tortoise exclusion fencing shall be attached to the 6-foot-high standard chain link security fencing. This fencing shall be installed around the array fields, operation and maintenance facilities, warehouses, substations, switchyard, and interconnection facilities and will remain in place during operations except it may be removed in places where wildlife-friendly fencing may be implemented over a portion of the facility site as described in Condition of Approval 8.23. The fence shall be constructed according to Chapter 8 of the USFWS Field Manual, but if any tortoises <100mm MCL are translocated within 500 meters of the Project site, tortoise fencing shall be 16 gauge or heavier galvanized after welded wire with mesh opening of ½ inch horizontal by ½ inch vertical (Attachment 4). The fence shall include the installation of shade structures along the outer fence perimeter placed at regular intervals. To prevent potential access at site access points, all gates would be installed with desert tortoise exclusion fencing affixed along the bottom portion of the gate structure.
- 8.14. Permanent Security Fence Maintenance Inspection.** The DT Authorized Biologist(s) and/or Biological Monitor(s) shall inspect the tortoise fencing during the Covered Activities, at the end of each workday during the construction period, monthly during O&M, and during major rainfall and high wind events within 24 hours to ensure desert tortoise is prohibited from entering the Project Area. If the fence is compromised, repairs shall be completed immediately, and clearance protocol level surveys shall be conducted as described in Condition of Approval 8.5.
- 8.15. Vehicle Inspection.** Workers shall inspect for desert tortoise under vehicles and equipment before the vehicles and equipment are moved. If a desert tortoise is present, the worker shall contact the DT Authorized Biologist(s) and/or Biological Monitor and wait for the tortoise to move unimpeded to a safe location or the DT Authorized Biologist(s) shall relocate the tortoise as described in Condition of Approval 8.8 before moving vehicles and equipment.
- 8.16. Staging Area and Parking Area.** The Permittee shall enclose all staging areas and parking areas with desert tortoise exclusion fencing. All parked vehicles and equipment shall be inspected prior to being moved. If a desert tortoise is found within a staging or parking area the worker shall immediately contact the Authorized Biologist(s) and/or Biological Monitor approved in Condition of Approval 6.4 of this ITP. A biologist approved in Condition of Approval 6.4 of this ITP shall relocate the desert tortoise in accordance with Condition of Approval 8.8 of this ITP and the DTTP.

- 8.17. Raven Management.** The Permittee shall prepare a Raven Management Plan to minimize the potential to attract common ravens to the site and submit it to CDFW for review and approval. In addition, the Permittee shall provide funds to the Renewable Energy Action Team (REAT) account established with the National Fish and Wildlife Foundation (NFWF) to contribute to a region-wide raven control plan to help address raven predation on the tortoise. This contribution shall be used to address raven predation on a regional basis and shall be calculated as a one-time payment of \$105 per acre of project disturbance. Based on this calculation the Permittee shall provide a one-time payment at \$105.00/acre for 1,475.3 acres at **\$154,906.50** to the REAT account established with NFWF's Raven Management Plan fund. A minimum of 15 days prior to the start of Covered Activities these funds shall be provided to NFWF using appropriate deposit document (Attachment 5) and proof of paying this fee shall be provided to CDFW within 24 hours after the funds have been provided to NFWF.
- 8.18. Erosion Control Materials.** To minimize the risk of ensnaring and strangling Covered Species, Permittee shall not use erosion control materials containing synthetic (e.g., plastic or nylon) monofilament netting. Geotextiles, fiber rolls, and other erosion control measures shall be made of loose-weave mesh, such as jute, coconut (coir) fiber, or other products without welded weaves. Permittee shall use erosion control materials composed entirely of natural-fiber biodegradable materials. Permittee shall not use plastic "photodegradable" erosion control materials.
- 8.19. Invasive Plant Management Plan.** Permittee shall develop an Invasive Plant Management Plan focused on controlling or eradicating existing invasive plants within the project site and preventing the introduction of new nonnative and invasive plants into the project site. The Plan shall include a list of plant species targeted for control or eradication, a description of the methods that will be used for control or eradication, a list of Best Management Practices to prevent the introduction and spread of invasive plant species into and out of the project site, monitoring requirement, success criteria, and a rapid response plan in the event that a new plant species invades the project site. The Plan shall be implemented during Covered Activities and monitored for the time specified in the Plan. The Plan shall be submitted to CDFW for review and approval no later than 30 days prior to the commencement of Covered Activities.
- 8.20. Full-Time Monitoring.** An Authorized Biologist(s) and/or Biological Monitor(s) shall be present during all Covered Activities that occur outside a permanent fenced area during the construction period. During the operations and maintenance period of the Project, an Authorized Biologist(s) shall be on-site to address any compliance-related issues.

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

8.21. Revegetation. Plantings and seed mix shall be approved by CDFW prior to application. Plantings and seed mix shall be comprised of only native plant material from the same geographic range as the Project.

8.22. Desert Tortoise Injury. If a desert tortoise is injured as a result of Project-related activities, the DT Authorized Biologist shall immediately take it to a CDFW approved wildlife rehabilitation or veterinary facility. Permittee shall identify the facility before starting Covered Activities. Permittee shall bear any costs associated with the care or treatment of such injured desert tortoise. The Permittee shall notify CDFW of the injury immediately by telephone and e-mail followed by a written incident report as described in Condition 7.3. Notification shall include the name of the facility where the animal was taken.

8.23. Burrowing Owl-Specific Take Minimization Measures

8.23.1. Burrowing Owl Mortality Reduction Plan. Permittee shall submit a Burrowing Owl (BUOW) Mortality Reduction Plan prepared by an approved BUOW Authorized Biologist to CDFW at least 30 days prior to beginning Covered Activities. Burrow exclusion, burrow excavation, artificial burrow construction, and other relocation activities shall not proceed until this plan has been approved in writing by CDFW. The BUOW Mortality Reduction Plan shall include, but not be limited to: detailed description of survey methodology; detailed burrow exclusion and excavation methods; methods for monitoring BUOW post-exclusion; proposed avoidance buffers based on project activity and disturbance level; proposed Covered Activities that may occur within a reduced buffer request; identification of a wildlife rehabilitation center or veterinary facility capable of and willing to treat injured BUOW or care for at-risk BUOW, BUOW eggs, and/or BUOW chicks; and procedure for collection and storage of BUOW carcasses. The plan should also include a section describing burrow replacement according to Condition of Approval 8.23.2. Only CDFW-approved BUOW Authorized Biologists or personnel following directions from and under the supervision of the BUOW Authorized Biologist, shall handle and transport injured BUOW for treatment or impacted BUOW eggs for salvage. All other BUOW handling is prohibited.

Once the BUOW Mortality Reduction Plan is approved in writing by CDFW, it shall be used for the duration of this ITP unless updated to reflect best available science in which case CDFW will contact the Permittee to discuss needed updates. Any proposed changes to the BUOW Mortality Reduction Plan shall be submitted, in writing, to CDFW and approved in writing prior to the implementation of any proposed modifications.

8.23.2. Burrowing Owl Burrow Replacement. Permittee shall replace each known BUOW burrow (as defined in Condition of Approval 8.23.5) that cannot be avoided within the Project Area with an artificial burrow to compensate for the loss of important shelter

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

used by BUOW for protection, reproduction, and escape from predators. The BUOW Burrow Replacement section within the BUOW Mortality Reduction Plan shall include, but not be limited to: a discussion and map of potential artificial burrow replacement locations; description of the replacement burrow design and dimensions (e.g., depth and width of burrow, width of burrow entrance, orientation of burrow entrance, number and placement of entrances to natal burrows); artificial burrow installation methods; and long-term artificial burrow protection and maintenance methods; and timing of BUOW installation/construction.

8.23.3. Burrowing Owl Pre-Construction Surveys and Reporting. The BUOW Authorized Biologist(s) shall conduct surveys to identify, flag, and map all potential, known, and/or nesting burrows (as defined in Condition of Approval 8.23.5) within 30 calendar days prior to beginning Covered Activities in each work area or phase. Surveys shall include the Project Area and 500 feet (where feasible) beyond the limits of the Project Area, unless otherwise approved in advance and in writing by CDFW. If the BUOW Authorized Biologist identifies any potential, known, or nesting BUOW burrows, the burrow(s) shall be monitored following the Conditions of Approval 8.23.6 and 8.23.7 unless avoided per Condition of Approval 8.23.5. Permittee shall provide the preconstruction survey results with a Burrow Map (see Condition of Approval 8.23.4) in a written report to CDFW's Regional Representative at least five calendar days prior to the beginning of Covered Activities. The report shall include, but not be limited to, methodology, survey date, and apparent status of each burrow (potential, known, or nesting). If a lapse in project-related work of 14 calendar days or longer occurs in any part of the Project Area, Permittee shall contact the CDFW Regional Representative by email and may be required to conduct additional BUOW burrow surveys and Burrow Map before work may be reinitiated in that part of the Project Area.

8.23.4. Burrow Map. The BUOW Authorized Biologist shall provide a KMZ map to CDFW of all BUOW burrows found during the surveys performed per Condition of Approval 8.23.3. The map shall show details and locations of all BUOW sightings and potential, known, and nesting BUOW burrows as defined in Condition of Approval 8.23.5. The map shall include an outline of the Project Area and a title, north arrow, scale bar, and legend.

8.23.5. Burrowing Owl Burrow Avoidance. The Permittee shall establish no-disturbance buffer zones around known and nesting BUOW burrows according to the following guidelines:

- If a known BUOW burrow (a burrow that shows evidence of current or past use within the last 3 years or is known based on Project observations to have been used in the past) or an "atypical" burrow (e.g., a pipe, culvert, buckled concrete, etc.) showing signs of occupancy (e.g. BUOW presence, whitewash, pellets, prey remains, etc.) is discovered, Permittee shall establish a minimum no-disturbance

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

buffer. A no-disturbance buffer as described in the Mortality Reduction Plan shall be established around known BUOW burrows.

- If a BUOW burrow used for nesting (e.g., known BUOW burrow with indications of the presence of eggs, chicks, dependent young, and/or brooding or egg incubation) is discovered within or immediately adjacent to the Project Area, the Permittee shall follow procedures outlined in the Mortality Reduction Plan.
- If BUOW burrows cannot be avoided as described above, then the Permittee shall follow ITP Conditions of Approval 8.23.1, 8.23.6, and 8.23.7 as appropriate. If BUOW are visibly stressed by the Covered Activities or workers in the vicinity after these no-disturbance buffers are established, all work in the vicinity shall immediately cease and increased no-disturbance buffers will be determined by the BUOW Authorized Biologist(s) based on their behavioral observations of the affected BUOW. The Authorized Biologist shall report to CDFW any buffers that were increased due to behavioral observations for evaluation and determination of buffer effectiveness.

8.23.6. Burrowing Owl Burrow Exclusion and Excavation. The BUOW Authorized Biologist, or Biological Monitor under direct supervision of the Authorized Biologist, shall excavate known or potential burrows that exhibit signs of current or past BUOW use or characteristics suggestive of BUOW burrow (including burrows in natural substrate and in/under man-made structures) that cannot be avoided per the Condition of Approval 8.23.5 and that are within the footprint of ground-disturbing activities. Exclusion shall occur outside the breeding season unless otherwise approved by CDFW in advance in writing. Burrows to be destroyed shall be fully excavated, filled with dirt, and compacted to ensure that BUOW cannot reenter or use the burrow during the period that Covered Activities occur in the Project Area. An established BUOW burrow no-disturbance buffer may be removed once the burrow is collapsed and the BUOW(s) is/are no longer using the burrow.

- Potential BUOW burrows (any subterranean hole three inches or larger for which no evidence is present to conclude that the burrow is being used or has been used by a BUOW) without any signs of BUOW use or characteristics suggesting it is a BUOW burrow may be excavated immediately under the direct supervision of the BUOW Authorized Biologist without prior camera monitoring.
- Excavation of known BUOW burrows shall only occur after the BUOW Authorized Biologist has determined that BUOW is not currently present after 4 consecutive 24-hour periods of monitoring with infrared cameras. BUOW burrows shall be carefully excavated with hand tools, or by mechanical means if a specific

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

methodology is approved in writing by CDFW, until it is clear no individuals of BUOW are inside. If during the excavation process evidence of current use by BUOW is discovered, then burrow excavation shall cease immediately, and camera monitoring as described above shall be conducted/resumed. CDFW will be notified immediately.

- BUOW burrows used for nesting shall not be excavated until biological and camera monitoring confirm that the chicks have fledged and are no longer dependent on the nest and then only after written concurrence from CDFW.

8.23.7. Burrowing Owl Burrow Blockage. If an unoccupied BUOW burrow can be avoided by construction and does not need to be collapsed, but is within a distance of construction to cause significant stress to the BUOW, the Permittee shall block rather than destroy the burrow. The blocked burrow will be unblocked and made available for use after construction is complete. Burrows (including burrows in natural substrate and in/under man-made structures) may be blocked only immediately after the BUOW Authorized Biologist(s) has conducted four consecutive 24-hour periods of monitoring with infrared camera and determined that BUOW is not currently present. Burrow blockage shall be done in a manner that prevents burrowing animals from digging back into the burrow. All blocked burrows shall be monitored by the BUOW Authorized Biologist or Biological Monitor at least once a week to ensure that the exclusion material is still intact. If BUOW gains access to the burrow, the Permittee shall contact CDFW immediately and obtain written guidance regarding how to proceed. All blocked burrows shall be unblocked within 48 hours of completion of Construction Covered Activities within the prescribed buffer distance.

8.23.8. Burrowing Owl Injury. If a BUOW is injured or found dead within the vicinity of the Project Area, the Permittee shall notify CDFW of the injury or mortality to CDFW immediately by e-mail as described in Condition of Approval 7.3. The BUOW Authorized Biologist shall follow the BUOW Mortality Reduction Plan to either immediately: transport injured individuals to a CDFW-approved wildlife rehabilitation center or veterinary facility; or follow approved collection and storage procedures for deceased animals. Both options shall be identified per Condition of Approval 8.23.1. Permittee shall bear any cost associated with care and recovery of any injured BUOW adults, nestling(s) or egg(s) and hacking (controlled release of captive reared young).

9. Habitat Management Land Acquisition: CDFW has determined that permanent protection and perpetual management of compensatory habitat is necessary and required pursuant to CESA to fully mitigate Project-related impacts of the taking on the Covered Species that will result from implementation of the Covered Activities. This determination is based on factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

Activities will impact the habitat, and CDFW's estimate of the protected acreage required to provide for adequate compensation.

To meet this requirement, the Permittee shall either purchase 1,606 acres of desert tortoise credits and 1,838 acres of burrowing owl credits from a CDFW-approved mitigation or conservation bank pursuant to Condition of Approval 9.2 below OR shall provide for both the permanent protection and management of 1,606 acres of desert tortoise and 1,838 acres of burrowing owl Habitat Management (HM) lands pursuant to Condition of Approval 9.3 below and the calculation and deposit of the management funds pursuant to Condition of Approval 9.4 below. Mitigation credit purchase and/or HM lands acquisition may be nested such that the mitigation lands for one species may cover the mitigation requirements for the other species if it meets the selection criteria for each. Purchase of Covered Species credits OR permanent protection and funding for perpetual management of HM lands must be complete before starting Covered Activities, or within 18 months of the effective date of this ITP if Security is provided pursuant to Condition of Approval 10 below for all uncompleted obligations.

9.1. Cost Estimates. For the purposes of determining the Security amount, CDFW has estimated the cost sufficient for CDFW or its contractors to complete acquisition, protection, and perpetual management of the HM lands as follows:

- 9.1.1. Land acquisition costs for HM lands identified in Condition of Approval 9.3 below, estimated at \$3,500.00/acre for 1,606 acres: **\$5,621,000.00**. Land acquisitions costs are estimated using local fair market current value per acre for lands with habitat values meeting mitigation requirements;
- 9.1.2. All other costs necessary to review and acquire the land in fee title and record a conservation easement as described in Condition of Approval 9.3.1 and 9.3.2 below: **\$17,440.00**;
- 9.1.3. Start-up costs for HM lands, including initial site protection and enhancement costs as described in Condition of Approval 9.3.6 below, estimated at \$2,000.00/acre for 1,606 acres: **\$3,212,000.00**;
- 9.1.4. Interim management period funding as described in Condition of Approval 9.3.7 below, estimated at \$600.00/acre for 1,606 acres: **\$963,600.00**;
- 9.1.5. Long-term management funding as described in Condition of Approval 9.4 below, estimated at \$3,100.00/acre for 1,606 acres: **\$4,978,600.00**. Long-term management funding is estimated initially for the purpose of providing Security to ensure implementation of HM lands management;

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

9.1.6. Related transaction fees including but not limited to account set-up fees, administrative fees, title and documentation review and related title transactions, expenses incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW as described in Condition of Approval 9.5, estimated at **\$6,000**.

9.1.7. All costs associated with CDFW engaging an outside contractor to complete the mitigation tasks, including but not limited to acquisition, protection, and perpetual funding and management of the HM lands and restoration of temporarily disturbed habitat. These costs include but are not limited to the cost of issuing a request for proposals, transaction costs, contract administration costs, and costs associated with monitoring the contractor's work **\$75,000.00**.

9.2. Covered Species Credits. If the Permittee elects to purchase Covered Species credits to complete compensatory mitigation obligations, then Permittee shall purchase 1,606 acres of Covered Species credits from a CDFW-approved mitigation or conservation bank prior to initiating Covered Activities, or no later than 18 months from the issuance of this ITP if Security is provided pursuant to Condition of Approval 10 below. Prior to purchase of Covered Species credits, Permittee shall obtain CDFW approval to ensure the mitigation or conservation bank is appropriate to compensate for the impacts of the Project. Permittee shall submit to CDFW a copy of the Bill of Sale(s) and Payment Receipt prior to initiating Covered Activities or within 18 months from issuance of this ITP if Security is provided.

9.3. Habitat Management Lands Acquisition and Protection. If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall:

9.3.1. Fee Title. Transfer fee title of the HM lands to CDFW pursuant to terms approved in writing by CDFW. Alternatively, CDFW, in its sole discretion, may authorize a governmental entity, special district, non-profit organization, for-profit entity, person, or another entity to hold title to and manage the property provided that the district, organization, entity, or person meets the requirements of Government Code sections 65965-65968, as amended.

9.3.2. Conservation Easement. If CDFW does not hold fee title to the HM lands, CDFW shall act as grantee for a conservation easement over the HM lands or shall, in its sole discretion, approve a non-profit entity, public agency, or Native American tribe to act as grantee for a conservation easement over the HM lands provided that the entity, agency, or tribe meets the requirements of Civil Code section 815.3. If CDFW elects not to be named as the grantee for the conservation easement, CDFW shall be expressly named in the conservation easement as a third-party beneficiary. The Permittee shall obtain CDFW written approval of any conservation easement before its execution or

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

recordation. No conservation easement shall be approved by CDFW unless it complies with Civil Code sections 815-816, as amended, and Government Code sections 65965-65968, as amended and includes provisions expressly addressing Government Code sections 65966(j) and 65967(e). Because the “doctrine of merger” could invalidate the conservation interest, under no circumstances can the fee title owner of the HM lands serve as grantee for the conservation easement.

- 9.3.3. HM Lands Approval. Obtain CDFW written approval of the HM lands before acquisition and/or transfer of the land by submitting, at least three months before acquisition and/or transfer of the HM lands, documentation identifying the land to be purchased or property interest conveyed to an approved entity as mitigation for the Project’s impacts on Covered Species;
- 9.3.4. HM Lands Documentation. Provide a recent preliminary title report, Phase I Environmental Site Assessment, and other necessary documents (please contact CDFW for document list). All documents conveying the HM lands and all conditions of title are subject to the approval of CDFW, and if applicable, the Wildlife Conservation Board and the Department of General Services;
- 9.3.5. Land Manager. Designate both an interim and long-term land manager approved by CDFW. The interim and long-term land managers may, but need not, be the same. The interim and/or long-term land managers may be the landowner or another party. Documents related to land management shall identify both the interim and long-term land managers. Permittee shall notify CDFW of any subsequent changes in the land manager within 30 days of the change. If CDFW will hold fee title to the mitigation land, CDFW will also act as both the interim and long-term land manager unless otherwise specified. The grantee for the conservation easement cannot serve as the interim or long-term manager without the express written authorization of CDFW in its sole discretion.
- 9.3.6. Start-up Activities. Provide for the implementation of start-up activities, including the initial site protection and enhancement of HM lands, once the HM lands have been approved by CDFW. Start-up activities include, at a minimum: (1) preparing a final management plan for CDFW approval (2) conducting a baseline biological assessment and land survey report within four months of recording or transfer; (3) developing and transferring Geographic Information Systems (GIS) data if applicable; (4) establishing initial fencing; (5) conducting litter removal; (6) conducting initial habitat restoration or enhancement, if applicable; and (7) installing signage.
- 9.3.7. Interim Management (Initial and Capital). Provide for the interim management of the HM lands. The Permittee shall ensure that the interim land manager implements the

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

interim management of the HM lands as described in the final management plan and conservation easement approved by CDFW. The interim management period shall be a minimum of three years from the date of HM land acquisition and protection and full funding of the Endowment and includes expected management following start-up activities. Interim management period activities described in the final management plan shall include fence repair, continuing trash removal, site monitoring, and vegetation and invasive species management.

Permittee shall either (1) provide Security to CDFW for the minimum of three years of interim management that the land owner, Permittee, or land manager agrees to manage and pay for at their own expense, (2) establish an escrow account with written instructions approved in advance in writing by CDFW to pay the land manager annually in advance, or (3) establish a short-term enhancement account with CDFW or a CDFW-approved entity for payment to the land manager.

- 9.4. Endowment Fund.** If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall ensure that the HM lands are perpetually managed, maintained, and monitored by the long-term land manager as described in this ITP, the conservation easement, and the final management plan approved by CDFW. After obtaining CDFW approval of the HM lands, Permittee shall provide long-term management funding for the perpetual management of the HM lands by establishing a long-term management fund (Endowment). The Endowment is a sum of money, held in a CDFW-approved fund that is permanently restricted to paying the costs of long-term management and stewardship of the mitigation property for which the funds were set aside, which costs include the perpetual management, maintenance, monitoring, and other activities on the HM lands consistent with this ITP, the conservation easement, and the management plan required by Condition of Approval 9.3.6. Endowment as used in this ITP shall refer to the endowment deposit and all interest, dividends, other earnings, additions and appreciation thereon. The Endowment shall be governed by this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.

After the interim management period, Permittee shall ensure that the designated long-term land manager implements the management and monitoring of the HM lands according to the final management plan. The long-term land manager shall be obligated to manage and monitor the HM lands in perpetuity to preserve their conservation values in accordance with this ITP, the conservation easement, and the final management plan. Such activities shall be funded through the Endowment.

- 9.4.1. Identify an Endowment Manager. The Endowment shall be held by the Endowment Manager, which shall be either CDFW or another entity qualified pursuant to Government Code sections 65965-65968, as amended.

Permittee shall submit to CDFW a written proposal that includes: (i) the name of the proposed Endowment Manager; (ii) whether the proposed Endowment Manager is a governmental entity, special district, nonprofit organization, community foundation, or congressionally chartered foundation; (iii) whether the proposed Endowment Manager holds the property or an interest in the property for conservation purposes as required by Government Code section 65968(b)(1) or, in the alternative, the basis for finding that the Project qualifies for an exception pursuant to Government Code section 65968(b)(2); and (iv) a copy of the proposed Endowment Manager's certification pursuant to Government Code section 65968(e).

Within thirty days of CDFW's receipt of Permittee's written proposal, CDFW shall inform Permittee in writing if it determines the proposal does not satisfy the requirements of Fish and Game Code section 2081(b)(3) and, if so, shall provide Permittee with a written explanation of the reasons for its determination. If CDFW does not provide Permittee with a written determination within the thirty-day period, the proposal shall be deemed consistent with Section 2081(b)(3).

- 9.4.2. Calculate the Endowment Funds Deposit. After obtaining CDFW written approval of the HM lands, long-term management plan, and Endowment Manager, Permittee shall prepare an endowment assessment (equivalent to a Property Analysis Record (PAR)) to calculate the amount of funding necessary to ensure the long-term management of the HM lands (Endowment Deposit Amount). Note that the endowment for the easement holder should not be included in this calculation. The Permittee shall submit to CDFW for review and approval the results of the endowment assessment before transferring funds to the Endowment Manager.

- 9.4.2.1. Capitalization Rate and Fees. Permittee shall obtain the capitalization rate from the selected Endowment Manager for use in calculating the endowment assessment and adjust for any additional administrative, periodic, or annual fees.

- 9.4.2.2. Endowment Buffers/Assumptions. Permittee shall include in the endowment assessment assumptions the following buffers for endowment establishment and use that will substantially ensure long-term viability and security of the Endowment:

- 9.4.2.2.1. 10 Percent Contingency. A 10 percent contingency shall be added to each endowment calculation to hedge against underestimation of the fund, unanticipated expenditures, inflation, or catastrophic events.

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

9.4.2.2.2. Three Years Delayed Spending. The endowment shall be established assuming spending will not occur for the first three years after full funding.

9.4.2.2.3. Non-annualized Expenses. For all large capital expenses to occur periodically but not annually such as fence replacement or well replacement, payments shall be withheld from the annual disbursement until the year of anticipated need or upon request to Endowment Manager and CDFW.

9.4.3. Transfer Long-term Endowment Funds. Permittee shall transfer the long-term endowment funds to the Endowment Manager upon CDFW approval of the Endowment Deposit Amount identified above.

9.4.4. Management of the Endowment. The approved Endowment Manager may pool the Endowment with other endowments for the operation, management, and protection of HM lands for local populations of the Covered Species but shall maintain separate accounting for each Endowment. The Endowment Manager shall, at all times, hold and manage the Endowment in compliance with this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.

Notwithstanding Probate Code sections 18501-18510, the Endowment Manager shall not make any disbursement from the Endowment that will result in expenditure of any portion of the principal of the endowment without the prior written approval of CDFW in its sole discretion. Permittee shall ensure that this requirement is included in any agreement of any kind governing the holding, investment, management, and/or disbursement of the Endowment funds.

Notwithstanding Probate Code sections 18501-18510, if CDFW determines in its sole discretion that an expenditure needs to be made from the Endowment to preserve the conservation values of the HM lands, the Endowment Manager shall process that expenditure in accordance with directions from CDFW. The Endowment Manager shall not be liable for any shortfall in the Endowment resulting from CDFW's decision to make such an expenditure.

9.5. Reimburse CDFW. Permittee shall reimburse CDFW for all reasonable costs incurred by CDFW related to issuance and monitoring of this ITP, including, but not limited to transaction fees, account set-up fees, administrative fees, title and documentation review and related title transactions, costs incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW.

(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

10. Security: The Permittee may proceed with Covered Activities only after the Permittee has ensured funding (Security) to complete any activity required by Condition of Approval 9 that has not been completed before Covered Activities begin. Permittee shall provide Security as follows:

10.1. Security Amount. The Security shall be in the amount of **\$14,873,640.00** or in the amount identified in 9.1 specific to the obligation that has not been completed. This amount is determined by CDFW based on the cost estimates identified in Condition of Approval 9.1 above, sufficient for CDFW or its contractors to complete land acquisition, property enhancement, startup costs, initial management, long-term management, and monitoring.

10.2. Security Form. The Security shall be in the form of an irrevocable letter of credit (see Attachment 6) or another form of Security approved in advance in writing by CDFW's Office of the General Counsel.

10.3. Security Timeline. The Security shall be provided to CDFW before Covered Activities begin or within 30 days after the effective date of this ITP, whichever occurs first.

10.4. Security Holder. The Security shall be held by CDFW or in a manner approved in advance in writing by CDFW.

10.5. Security Transmittal. Permittee shall transmit it to CDFW by way of an approved instrument such as an escrow agreement, irrevocable letter of credit, or other.

10.6. Security Drawing. The Security shall allow CDFW to draw on the principal sum if CDFW, in its sole discretion, determines that the Permittee has failed to comply with the Conditions of Approval of this ITP.

10.7. Security Release. The Security (or any portion of the Security then remaining) shall be released to the Permittee after CDFW has conducted an on-site inspection and received confirmation that all secured requirements have been satisfied, as evidenced by:

Credit Purchase

- Copy of Bill of Sale(s) and Payment Receipt(s) or Credit Transfer Agreement for the purchase of Covered Species credits; and
- Timely submission of all required reports.

Habitat Management Land Acquisition (HMLA)

- Written documentation of the acquisition of the HM lands;
- Copies of all executed and recorded conservation easements;
- Written confirmation from the approved Endowment Manager of its receipt of the full

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

- Endowment; and
- Timely submission of all required reports.

Even if Security is provided, the Permittee must complete the required acquisition, protection and transfer of all HM lands and record any required conservation easements no later than 18 months from the effective date of this ITP. CDFW may require the Permittee to provide additional HM lands and/or additional funding to ensure the impacts of the taking are minimized and fully mitigated, as required by law, if the Permittee does not complete these requirements within the specified timeframe.

X. Amendment:

This ITP may be amended as provided by California Code of Regulations, Title 14, section 783.6, subdivision (c), and other applicable law. This ITP may be amended without the concurrence of the Permittee as required by law, including if CDFW determines that continued implementation of the Project as authorized under this ITP would jeopardize the continued existence of the Covered Species or where Project changes or changed biological conditions necessitate an ITP amendment to ensure that all Project-related impacts of the taking to the Covered Species are minimized and fully mitigated.

XI. Stop-Work Order:

If CDFW determines the Permittee has violated any term or condition of this ITP or has engaged in unlawful take, CDFW may issue Permittee a written stop-work order instructing the Permittee to suspend any Covered Activity for an initial period of up to 30 days or risk suspension or revocation of this ITP. CDFW can issue a stop-work order to prevent or remedy a violation of this ITP, including but not limited to the failure to comply with reporting or monitoring obligations, or to prevent the unauthorized take of any CESA endangered, threatened, or candidate species, regardless of whether that species is a Covered Species under this ITP. Permittee shall stop work immediately as directed by CDFW upon receipt of any such stop-work order. Upon written notice to Permittee, CDFW may extend any stop-work order issued to Permittee for a period not to exceed 30 additional days.

If Permittee fails to remedy the violation or to comply with a stop-work order, CDFW may proceed with suspension and revocation of this ITP. Suspension and revocation of this ITP shall be governed by California Code of Regulations, Title 14, section 783.7, and any other applicable law. Neither the Authorized Biologist nor CDFW shall be liable for any costs incurred in complying with stop-work orders.

XII. Liability:

All terms and conditions of this ITP shall be binding upon each Permittee. Notwithstanding California Civil Code section 1431 or any other provision of law, each Permittee shall be jointly and severally liable for performance of all terms, conditions, and obligations of this ITP and shall be jointly and severally liable for any unauthorized take or other violations of this ITP, whether committed by

EASLEY RENEWABLE ENERGY PROJECT

Permittees or any person acting on behalf of one or more Permittees, including their officers, employees, representatives, agents or contractors and subcontractors. Any failure by one or more Permittees to comply with any term, condition, or obligation herein shall be deemed a failure to comply by all Permittees.

XIII. Compliance with Other Laws:

This ITP sets forth CDFW's requirements for the Permittee to implement the Project pursuant to CESA. This ITP does not necessarily create an entitlement to proceed with the Project. Permittee is responsible for complying with all other applicable federal, state, and local law.

XIV. Notices:

Written notices, reports and other communications relating to this ITP shall be delivered to CDFW by email or registered first class mail at the following address, or at addresses CDFW may subsequently provide the Permittee. Notices, reports, and other communications shall reference the Project name, Permittee, and ITP Number (2081-2024-028-06) in a cover letter and on any other associated documents.

EASLEY RENEWABLE ENERGY PROJECT

Rose.Banks@wildlife.ca.gov

XV. Compliance with the California Environmental Quality Act:

CDFW's issuance of this ITP is subject to CEQA. CDFW is a responsible agency pursuant to CEQA with respect to this ITP because of prior environmental review of the Project by the lead agency, Riverside County. (See generally Pub. Resources Code, §§ 21067, 21069.) The lead agency's prior environmental review of the Project is set forth in the IP Easley LLC's Easley Renewable Energy Project Environmental Impact Report (EIR), (SCH No.: 2022110240 dated August 2024 that the lead agency certified for the Project on August 27, 2024. At the time Riverside County certified the EIR and approved the Project it also adopted various mitigation measures for the Covered Species as conditions of Project approval.

This ITP, along with CDFW's related CEQA findings, which are available as a separate document, provide evidence of CDFW's consideration of the lead agency's EIR for the Project and the environmental effects related to issuance of this ITP (CEQA Guidelines, § 15096, subd. (f)). CDFW finds that issuance of this ITP will not result in any previously undisclosed potentially significant effects on the environment or a substantial increase in the severity of any potentially significant environmental effects previously disclosed by the lead agency. Furthermore, to the extent the potential for such effects exists, CDFW finds adherence to and implementation of the Conditions of Project Approval adopted by the lead agency, and that adherence to and implementation of the Conditions of Approval imposed by CDFW through the issuance of this ITP, will avoid or reduce to below a level of significance any such potential effects. CDFW consequently finds that issuance of this ITP will not result in any significant, adverse impacts on the environment.

None of the factors that would trigger the need for subsequent or supplemental environmental analysis of the Project under Public Resources Code section 21166 or California Code of Regulations, title 14, sections 15162 and 15163, exist as a result of this Amendment.

XVI. Findings Pursuant to CESA:

These findings are intended to document CDFW's compliance with the specific findings requirements set forth in CESA and related regulations. (Fish & G. Code § 2081, subs. (b)-(c); Cal. Code Regs., tit. 14, §§ 783.4, subds, (a)-(b), 783.5, subd. (c)(2).)

CDFW finds based on substantial evidence in the ITP application, IP Easley LLC's Easley Renewable Energy Project Environmental Impact Report, the results of consultations, and the administrative record of proceedings, that issuance of this ITP complies and is consistent with the criteria governing the issuance of ITPs pursuant to CESA:

- (1) Take of Covered Species as defined in this ITP will be incidental to the otherwise lawful activities covered under this ITP;
- (2) Impacts of the taking on Covered Species will be minimized and fully mitigated through the

Incidental Take Permit
No. 2081-2024-028-06
(Amendment No. 1)
IP EASLEY, LLC; IP EASLEY II, LLC; IP EASLEY III, LLC
EASLEY RENEWABLE ENERGY PROJECT

implementation of measures required by this ITP and as described in the MMRP. Measures include: (1) permanent habitat protection; (2) establishment of avoidance zones; (3) worker education; and (4) Quarterly Compliance Reports. CDFW evaluated factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will impact the habitat, and CDFW's estimate of the acreage required to provide for adequate compensation. Based on this evaluation, CDFW determined that the protection and management in perpetuity of 1,606 acres of desert tortoise and 1,838 acres of burrowing owl compensatory habitat that is contiguous with other protected Covered Species habitat and/or is of higher quality than the habitat being destroyed by the Project, along with the minimization, monitoring, reporting, and funding requirements of this ITP minimizes and fully mitigates the impacts of the taking caused by the Project;

- (3) The take avoidance and mitigation measures required pursuant to the conditions of this ITP and its attachments are roughly proportional in extent to the impacts of the taking authorized by this ITP;
- (4) The measures required by this ITP maintain Permittee's objectives to the greatest extent possible;
- (5) All required measures are capable of successful implementation;
- (6) This ITP is consistent with any regulations adopted pursuant to Fish and Game Code sections 2112 and 2114;
- (7) Permittee has ensured adequate funding to implement the measures required by this ITP as well as for monitoring compliance with, and the effectiveness of, those measures for the Project; and
- (8) Issuance of this ITP will not jeopardize the continued existence of the Covered Species based on the best scientific and other information reasonably available, and this finding includes consideration of the species' capability to survive and reproduce, and any adverse impacts of the taking on those abilities in light of (1) known population trends; (2) known threats to the species; and (3) reasonably foreseeable impacts on the species from other related projects and activities. Moreover, CDFW's finding is based, in part, on CDFW's express authority to amend the terms and conditions of this ITP without concurrence of the Permittee as necessary to avoid jeopardy and as required by law.

**CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE
MITIGATION MONITORING AND REPORTING PROGRAM (MMRP)
CALIFORNIA ENDANGERED SPECIES ACT**

INCIDENTAL TAKE PERMIT NO. 2081-2024-028-06-A1

PERMITTEE: IP Easley, LLC; IP Easley II, LLC; IP Easley III, LLC

PROJECT: Easley Renewable Energy Project

PURPOSE OF THE MMRP

The purpose of the MMRP is to ensure that the impact minimization and mitigation measures required by the Department of Fish and Wildlife (CDFW) for the above-referenced Project are properly implemented, and thereby to ensure compliance with section 2081(b) of the Fish and Game Code and section 21081.6 of the Public Resources Code. A table summarizing the mitigation measures required by CDFW is attached. This table is a tool for use in monitoring and reporting on implementation of mitigation measures, but the descriptions in the table do not supersede the mitigation measures set forth in the California Incidental Take Permit (ITP) and in attachments to the ITP, and the omission of a permit requirement from the attached table does not relieve the Permittee of the obligation to ensure the requirement is performed.

OBLIGATIONS OF PERMITTEE

Mitigation measures must be implemented within the time periods indicated in the table that appears below. Permittee has the primary responsibility for monitoring compliance with all mitigation measures and for reporting to CDFW on the progress in implementing those measures. These monitoring and reporting requirements are set forth in the ITP itself and are summarized at the front of the attached table.

VERIFICATION OF COMPLIANCE, EFFECTIVENESS

CDFW may, at its sole discretion, verify compliance with any mitigation measure or independently assess the effectiveness of any mitigation measure.

TABLE OF MITIGATION MEASURES

The following items are identified for each mitigation measure: Mitigation Measure, Source, Implementation Schedule, Responsible Party, and Status/Date/Initials. The Mitigation Measure column summarizes the mitigation requirements of the ITP. The Source column identifies the ITP condition that sets forth the mitigation measure. The Implementation Schedule column shows the date or phase when each mitigation measure will be implemented. The Responsible Party column identifies the person or agency that is primarily responsible for implementing the mitigation measure. The Status/Date/Initials column shall be completed by the Permittee during preparation of each Status Report and the Final Mitigation Report, and must identify the implementation status of each mitigation measure, the date that status was determined, and the initials of the person determining the status.

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
BEFORE DISTURBING SOIL OR VEGETATION					
1	Before starting Covered Activities, Permittee shall designate a representative (Designated Representative) responsible for communications with CDFW and overseeing compliance with the ITP. Permittee shall notify CDFW in writing before starting Covered Activities of the Designated Representative's name, business address, and contact information, and shall notify CDFW in writing if a substitute Designated Representative is selected or identified at any time during the term of the ITP.	ITP Condition # 6.1	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
2	Permittee shall designate Biological Monitor(s) knowledgeable and experienced in the biology and natural history of the Covered Species. The Biological Monitor(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate or avoid the incidental take of individual Covered Species and to minimize disturbance of Covered Species' habitat.	ITP Condition # 6.2	Before commencing ground- or vegetation-disturbing activities	Permittee	
3	<p>Permittee shall designate an Authorized Biologist(s) knowledgeable in the biology and natural history of desert tortoise. The Authorized Biologist(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate and avoid the incidental take of individual desert tortoise and to minimize disturbance of desert tortoise habitat. Additionally, the Authorized Biologist(s) shall have experience with all activities that will be carried out for the Project including, but not limited to, excavating burrows, handling and temporarily holding desert tortoise, relocating/translocating the desert tortoise, reconstructing burrows, unearthing and relocating eggs, locating, identifying, and recording all forms of desert tortoise signs, collecting blood samples, conducting health assessments, conducting protocol level surveys, and/or attaching and removing transmitters to and from the desert tortoise.</p> <p>Permittee shall designate an Authorized Biologist(s) knowledgeable in the biology and natural history of burrowing owl. The BUOW Authorized Biologist shall be responsible for monitoring Covered Activities to help minimize and fully mitigate the incidental take of individual burrowing owl and to minimize disturbance of burrowing owl habitat. Additionally, the Authorized Biologist shall have experience with all activities that will be carried out for the Project including, but not limited to conducting passive exclusion activities, establishing no-disturbance buffers, excavating burrows, and monitoring blocked burrows.</p>	ITP Condition #6.3 and 6.3.1	Before commencing ground- or vegetation-disturbing activities	Permittee	
4	Permittee shall obtain CDFW approval of the DT Authorized Biologist(s), BUOW Authorized Biologist(s), Biological Monitor(s), and if needed veterinarian(s), in writing before starting Covered Activities, and shall also obtain advance written approval if any of these entities are changed. For approval, the Designated Representative shall submit Attachment 2 and 2A of the ITP and an Excel spreadsheet listing in alphabetical order the names of the proposed Authorized Biologist(s), Biological Monitor(s), and veterinarian(s) to CDFW a minimum of 21 calendar days before starting Covered Activities or before any changes are made to these personnel. For each proposed Authorized Biologist(s) and Biological Monitor(s), the Excel spreadsheet shall include the activities outlined in the ITP and associated Desert Tortoise Translocation Plan (DTTP) and Burrowing Owl Mortality Reduction Plan that the Permittee is requesting approval for that individual to carry out.	ITP Condition #6.4	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
5	Permittee shall conduct an education program for all persons employed or otherwise working in the Project Area before performing any work. The program shall consist of a presentation from an approved Biologist that includes a discussion of the biology and general behavior of the Covered Species, information about the distribution and habitat needs of the Covered Species, sensitivity of the Covered Species to human activities, its status pursuant to CESA including legal protection, recovery efforts, penalties for violations and Project-specific protective measures described in the ITP. Permittee shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry in the Project Area. Permittee shall provide interpretation for non-English speaking workers, and the same instruction shall be provided to any new workers before they are authorized to perform work in the Project Area. Upon completion of the program, employees shall sign a form stating they attended the program and understand all protection measures. This training shall be repeated at least once annually for long-term and/or permanent employees that will be conducting work in the Project Area..	ITP Condition # 6.6	Before commencing ground- or vegetation-disturbing activities / Entire Project	Permittee	
6	Permittee shall initiate a trash abatement program before starting Covered Activities and shall continue the program for the duration of the Project. Permittee shall ensure that trash and food items are contained in animal-proof containers and removed, ideally at daily intervals but at least once a week, to avoid attracting opportunistic predators such as ravens, coyotes, and feral dogs.	ITP Condition # 6.8	Before commencing ground- or vegetation-disturbing activities / Entire Project	Permittee	
7	Permittee shall implement dust control measures during Covered Activities to facilitate visibility for monitoring of the Covered Species by the Authorized Biologist(s) and Biological Monitor(s). Permittee shall keep the amount of water used to the minimum amount needed and shall not allow water to form puddles.	ITP Condition # 6.9	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
8	Before starting Covered Activities, Permittee shall clearly delineate the boundaries of the Project Area with fencing, stakes, or flags. Permittee shall restrict all Covered Activities to within the fenced, staked, or flagged areas. Permittee shall maintain all fencing, stakes, and flags until the completion of Covered Activities in that area.	ITP Condition # 6.11	Before commencing ground- or vegetation-disturbing activities / Entire Project	Permittee	
9	Permittee shall clearly delineate habitat of the Covered Species within the Project Area with posted signs, posting stakes, flags, and/or rope or cord, and place fencing as necessary to minimize the disturbance of Covered Species' habitat..	ITP Condition # 6.12	Before commencing ground- or vegetation-disturbing activities / Entire Project	Permittee	
10	The Designated Representative shall notify CDFW 14 calendar days before starting Covered Activities and shall document compliance with all pre-Project Conditions of Approval before starting Covered Activities	ITP Condition # 7.1	Before commencing ground- or vegetation-disturbing activities	Permittee	
11	The Designated Representative shall notify CDFW 14 calendar days before starting Covered Activities and shall document compliance with all pre-Project Conditions of Approval before starting Covered Activities.	ITP Condition # 7.1	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
12	<p>No later than 30 days prior to start of Covered Activities, the DT Authorized Biologist(s) and/or Biological Monitor(s) approved under the ITP shall conduct pre-construction clearance surveys for desert tortoise, using the methods described in the most recent United States Fish and Wildlife Service (USFWS) Desert Tortoise (Mojave Population) Field Manual (hereinafter referred to as USFWS Field Manual). In addition to the guidance provided in the USFWS Field Manual, CDFW provides the following requirement(s):</p> <p>8.5.1 Pre-construction clearance surveys shall be completed using perpendicular survey routes within the Project Area. Pre-construction clearance surveys cannot be combined with other clearance surveys conducted for other species while using the same personnel. Covered Activities cannot start until two (2) negative results from consecutive surveys using perpendicular survey routes for the desert tortoise are documented.</p> <p>8.5.2 These surveys shall cover 100 percent of the Project Area and a 50-foot buffer zone around the Project site. The Biological Monitor(s) and/or DT Authorized Biologist(s) shall record all potential desert tortoise and burrows within the pre-construction clearance survey area, using global positioning system (GPS) technology. The Authorized Biologist(s) and/or Biological Monitor(s) shall provide the results of the pre-construction clearance survey (including all information of the USFWS Protocol data sheet) to CDFW within 10 Calendar days of completing the surveys. The use of specialized equipment (e.g., fiber optics) may be necessary to thoroughly inspect all burrows in preparation for collapsing them.</p> <p>8.5.3 Twenty-four hours prior to the start of any Covered Activities, except for areas already cleared within installation of desert tortoise exclusion fencing, the DT Authorized Biologist(s) and/or Biological Monitor shall conduct a final clearance survey of Project Area. The use of specialized equipment (e.g., fiber optics) may be necessary to thoroughly inspect all burrows in preparation for collapsing them.</p>	ITP Condition # 8.5	Before commencing ground- or vegetation-disturbing activities	Permittee	
13	<p>The Permittee shall prepare a Raven Management Plan to minimize the potential to attract common ravens to the site and submit it to CDFW for review and approval. In addition, the Permittee shall provide funds to the Renewable Energy Action Team (REAT) account established with the National Fish and Wildlife Foundation (NFWF) to contribute to a region-wide raven control plan to help address raven predation on the tortoise. This contribution shall be used to address raven predation on a regional basis and shall be calculated as a one-time payment of \$105 per acre of project disturbance. Based on this calculation the Permittee shall provide a one-time payment at \$105.00/acre for 1,475.3 acres at \$154,906.50 to the REAT account established with NFWF's Raven Management Plan fund. A minimum of 15 days prior to the start of Covered Activities these funds shall be provided to NFWF using appropriate deposit document (Attachment 5) and proof of paying this fee shall be provided to CDFW within 24 hours after the funds have been provided to NFWF.</p>	ITP Condition # 8.17	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
14	<p>Permittee shall develop an Invasive Plant Management Plan focused on controlling or eradicating existing invasive plants within the project site and preventing the introduction of new nonnative and invasive plants into the project site. The Plan shall include a list of plant species targeted for control or eradication, a description of the methods that will be used for control or eradication, a list of Best Management Practices to prevent the introduction and spread of invasive plant species into and out of the project site, monitoring requirement, success criteria, and a rapid response plan in the event that a new plant species invades the project site. The Plan shall be implemented during Covered Activities and monitored for the time specified in the Plan. The Plan shall be submitted to CDFW for review and approval no later than 30 days prior to the commencement of Covered Activities</p>	ITP Condition # 8.19	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
15	<p>Permittee shall submit a Burrowing Owl (BUOW) Mortality Reduction Plan prepared by an approved BUOW Authorized Biologist to CDFW at least 30 days prior to beginning Covered Activities. Burrow exclusion, burrow excavation, artificial burrow construction, and other relocation activities shall not proceed until this plan has been approved in writing by CDFW. The BUOW Mortality Reduction Plan shall include, but not be limited to: detailed description of survey methodology; detailed burrow exclusion and excavation methods; methods for monitoring BUOW post-exclusion; proposed avoidance buffers based on project activity and disturbance level; proposed Covered Activities that may occur within a reduced buffer request; identification of a wildlife rehabilitation center or veterinary facility capable of and willing to treat injured BUOW or care for at-risk BUOW, BUOW eggs, and/or BUOW chicks; and procedure for collection and storage of BUOW carcasses. The plan should also include a section describing burrow replacement according to Condition of Approval 8.23.2. Only CDFW-approved BUOW Authorized Biologists or personnel following directions from and under the supervision of the BUOW Authorized Biologist, shall handle and transport injured BUOW for treatment or impacted BUOW eggs for salvage. All other BUOW handling is prohibited.</p> <p>Once the BUOW Mortality Reduction Plan is approved in writing by CDFW, it shall be used for the duration of the ITP unless updated to reflect best available science in which case CDFW will contact the Permittee to discuss needed updates. Any proposed changes to the BUOW Mortality Reduction Plan shall be submitted, in writing, to CDFW and approved in writing prior to the implementation of any proposed modifications.</p>	ITP Condition #8.23.1	Before commencing ground- or vegetation-disturbing activities	Permittee	
16	<p>Permittee shall replace each known BUOW burrow (as defined in Condition of Approval 8.23.5) that cannot be avoided within the Project Area with an artificial burrow to compensate for the loss of important shelter used by BUOW for protection, reproduction, and escape from predators. The BUOW Burrow Replacement section within the BUOW Mortality Reduction Plan shall include, but not be limited to: a discussion and map of potential artificial burrow replacement locations; description of the replacement burrow design and dimensions (e.g., depth and width of burrow, width of burrow entrance, orientation of burrow entrance, number and placement of entrances to natal burrows); artificial burrow installation methods; and long-term artificial burrow protection and maintenance methods; and timing of BUOW installation/construction.</p>	ITP Condition #8.23.2	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
17	The BUOW Authorized Biologist(s) shall conduct surveys to identify, flag, and map all potential, known, and/or nesting burrows (as defined in Condition of Approval 8.23.5) within 30 calendar days prior to beginning Covered Activities in each work area or phase. Surveys shall include the Project Area and 500 feet (where feasible) beyond the limits of the Project Area, unless otherwise approved in advance and in writing by CDFW. If the BUOW Authorized Biologist identifies any potential, known, or nesting BUOW burrows, the burrow(s) shall be monitored following the Conditions of Approval 8.23.6 and 8.23.7 unless avoided per Condition of Approval 8.23.5. Permittee shall provide the preconstruction survey results with a Burrow Map (see Condition of Approval 8.23.4) in a written report to CDFW's Regional Representative at least five calendar days prior to the beginning of Covered Activities. The report shall include, but not be limited to, methodology, survey date, and apparent status of each burrow (potential, known, or nesting). If a lapse in project-related work of 14 calendar days or longer occurs in any part of the Project Area, Permittee shall contact the CDFW Regional Representative by email and may be required to conduct additional BUOW burrow surveys and Burrow Map before work may be reinitiated in that part of the Project Area.	ITP Condition #8.23.3	Before commencing ground- or vegetation-disturbing activities	Permittee	
18	The BUOW Authorized Biologist shall provide a KMZ map to CDFW of all BUOW burrows found during the surveys performed per Condition of Approval 8.23.3. The map shall show details and locations of all BUOW sightings and potential, known, and nesting BUOW burrows as defined in Condition of Approval 8.23.5. The map shall include an outline of the Project Area and a title, north arrow, scale bar, and legend.	ITP Condition #8.23.4	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
19	<p>The Permittee shall establish no-disturbance buffer zones around known and nesting BUOW burrows according to the following guidelines:</p> <ul style="list-style-type: none"> • If a <u>known BUOW burrow</u> (a burrow that shows evidence of current or past use within the last 3 years or is known based on Project observations to have been used in the past) or an "atypical" burrow (e.g., a pipe, culvert, buckled concrete, etc.) showing signs of occupancy (e.g. BUOW presence, whitewash, pellets, prey remains, etc.) is discovered, Permittee shall establish a minimum no-disturbance buffer. A no-disturbance buffer as described in the Mortality Reduction Plan shall be established around known BUOW burrows. • If a <u>BUOW burrow</u> used for nesting (e.g., known BUOW burrow with indications of the presence of eggs, chicks, dependent young, and/or brooding or egg incubation) is discovered within or immediately adjacent to the Project Area, the Permittee shall follow procedures outlined in the Mortality Reduction Plan. • If BUOW burrows cannot be avoided as described above, then the Permittee shall follow ITP Conditions of Approval 8.23.1, 8.23.6, and 8.23.7 as appropriate. If BUOW are visibly stressed by the Covered Activities or workers in the vicinity after these no-disturbance buffers are established, all work in the vicinity shall immediately cease and increased no-disturbance buffers will be determined by the BUOW Authorized Biologist(s) based on their behavioral observations of the affected BUOW. The Authorized Biologist shall report to CDFW any buffers that were increased due to behavioral observations for evaluation and determination of buffer effectiveness 	ITP Condition #8.23.5	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
20	<p>The BUOW Authorized Biologist, or Biological Monitor under direct supervision of the Authorized Biologist, shall excavate known or potential burrows that exhibit signs of current or past BUOW use or characteristics suggestive of BUOW burrow (including burrows in natural substrate and in/under man-made structures) that cannot be avoided per the Condition of Approval 8.23.5 and that are within the footprint of ground-disturbing activities. Exclusion shall occur outside the breeding season unless otherwise approved by CDFW in advance in writing. Burrows to be destroyed shall be fully excavated, filled with dirt, and compacted to ensure that BUOW cannot reenter or use the burrow during the period that Covered Activities occur in the Project Area. An established BUOW burrow no-disturbance buffer may be removed once the burrow is collapsed and the BUOW(s) is/are no longer using the burrow.</p> <ul style="list-style-type: none"> Potential BUOW burrows (any subterranean hole three inches or larger for which no evidence is present to conclude that the burrow is being used or has been used by a BUOW) without any signs of BUOW use or characteristics suggesting it is a BUOW burrow may be excavated immediately under the direct supervision of the BUOW Authorized Biologist without prior camera monitoring. Excavation of known BUOW burrows shall only occur after the BUOW Authorized Biologist has determined that BUOW is not currently present after 4 consecutive 24-hour periods of monitoring with infrared cameras. BUOW burrows shall be carefully excavated with hand tools, or by mechanical means if a specific methodology is approved in writing by CDFW, until it is clear no individuals of BUOW are inside. If during the excavation process evidence of current use by BUOW is discovered, then burrow excavation shall cease immediately, and camera monitoring as described above shall be conducted/resumed. CDFW will be notified immediately. BUOW burrows used for nesting shall not be excavated until biological and camera monitoring confirm that the chicks have fledged and are no longer dependent on the nest and then only after written concurrence from CDFW 	ITP Condition #8.23.6	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
21	<p>If an unoccupied BUOW burrow can be avoided by construction and does not need to be collapsed, but is within a distance of construction to cause significant stress to the BUOW, the Permittee shall block rather than destroy the burrow. The blocked burrow will be unblocked and made available for use after construction is complete. Burrows (including burrows in natural substrate and in/under man-made structures) may be blocked only immediately after the BUOW Authorized Biologist(s) has conducted four consecutive 24-hour periods of monitoring with infrared camera and determined that BUOW is not currently present. Burrow blockage shall be done in a manner that prevents burrowing animals from digging back into the burrow. All blocked burrows shall be monitored by the BUOW Authorized Biologist or Biological Monitor at least once a week to ensure that the exclusion material is still intact. If BUOW gains access to the burrow, the Permittee shall contact CDFW immediately and obtain written guidance regarding how to proceed. All blocked burrows shall be unblocked within 48 hours of completion of Construction Covered Activities within the prescribed buffer distance.</p>	ITP Condition #8.23.7	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
22	Permittee shall either purchase 1,606 acres of desert tortoise credits and 1,838 acres of burrowing owl credits from a CDFW-approved mitigation or conservation bank pursuant to Condition of Approval 9.2 below OR shall provide for both the permanent protection and management of 1,606 acres of desert tortoise and 1,838 acres of burrowing owl Habitat Management (HM) lands pursuant to Condition of Approval 9.3 below and the calculation and deposit of the management funds pursuant to Condition of Approval 9.4 below. Mitigation credit purchase and/or HM lands acquisition may be nested such that the mitigation lands for one species may cover the mitigation requirements for the other species if it meets the selection criteria for each. Purchase of Covered Species credits OR permanent protection and funding for perpetual management of HM lands must be complete before starting Covered Activities, or within 18 months of the effective date of the ITP if Security is provided pursuant to Condition of Approval 10 below for all uncompleted obligations.	ITP Condition # 9	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
23	<p>CDFW has estimated the cost sufficient for CDFW or its contractors to complete acquisition, protection, and perpetual management of the HM lands as follows:</p> <ul style="list-style-type: none"> i) Land acquisition costs for HM lands identified in Condition of Approval 9.3 below, estimated at \$3,500.00/acre for 1,606 acres: \$5,621,000.00. Land acquisitions costs are estimated using local fair market current value per acre for lands with habitat values meeting mitigation requirements; ii) All other costs necessary to review and acquire the land in fee title and record a conservation easement as described in Condition of Approval 9.3.1 and 9.3.2 below: \$17,440.00; iii) Start-up costs for HM lands, including initial site protection and enhancement costs as described in Condition of Approval 9.3.6 below, estimated at \$2,000.00/acre for 1,606 acres: \$3,212,000.00; iv) Interim management period funding as described in Condition of Approval 9.3.7 below, estimated at \$600.00/acre for 1,606 acres: \$963,600.00; v) Long-term management funding as described in Condition of Approval 9.4 below, estimated at \$3,100.00/acre for 1,606 acres: \$4,978,600.00. Long-term management funding is estimated initially for the purpose of providing Security to ensure implementation of HM lands management; vi) Related transaction fees including but not limited to account set-up fees, administrative fees, title and documentation review and related title transactions, expenses incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW as described in Condition of Approval 9.5, estimated at \$6,000. vii) All costs associated with CDFW engaging an outside contractor to complete the mitigation tasks, including but not limited to acquisition, protection, and perpetual funding and management of the HM lands and restoration of temporarily disturbed habitat. These costs include but are not limited to the cost of issuing a request for proposals, transaction costs, contract administration costs, and costs associated with monitoring the contractor's work \$75,000.00. 	ITP Condition #9.1	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
24	If the Permittee elects to purchase Covered Species credits to complete compensatory mitigation obligations, then Permittee shall purchase 1,606 acres of Covered Species credits from a CDFW-approved mitigation or conservation bank prior to initiating Covered Activities, or no later than 18 months from the issuance of the ITP if Security is provided pursuant to Condition of Approval 10 below. Prior to purchase of Covered Species credits, Permittee shall obtain CDFW approval to ensure the mitigation or conservation bank is appropriate to compensate for the impacts of the Project. Permittee shall submit to CDFW a copy of the Bill of Sale(s) and Payment Receipt prior to initiating Covered Activities or within 18 months from issuance of the ITP if Security is provided.	ITP Condition #9.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
25	Transfer fee title of the HM lands to CDFW pursuant to terms approved in writing by CDFW. Alternatively, CDFW, in its sole discretion, may authorize a governmental entity, special district, non-profit organization, for-profit entity, person, or another entity to hold title to and manage the property provided that the district, organization, entity, or person meets the requirements of Government Code sections 65965-65968, as amended.	ITP Condition #9.3.1	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
26	If CDFW does not hold fee title to the HM lands, CDFW shall act as grantee for a conservation easement over the HM lands or shall, in its sole discretion, approve a non-profit entity, public agency, or Native American tribe to act as grantee for a conservation easement over the HM lands provided that the entity, agency, or tribe meets the requirements of Civil Code section 815.3. If CDFW elects not to be named as the grantee for the conservation easement, CDFW shall be expressly named in the conservation easement as a third-party beneficiary. The Permittee shall obtain CDFW written approval of any conservation easement before its execution or recordation. No conservation easement shall be approved by CDFW unless it complies with Civil Code sections 815-816, as amended, and Government Code sections 65965-65968, as amended and includes provisions expressly addressing Government Code sections 65966(j) and 65967(e). Because the "doctrine of merger" could invalidate the conservation interest, under no circumstances can the fee title owner of the HM lands serve as grantee for the conservation easement.	ITP Condition #9.3.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
27	Obtain CDFW written approval of the HM lands before acquisition and/or transfer of the land by submitting, at least three months before acquisition and/or transfer of the HM lands, documentation identifying the land to be purchased or property interest conveyed to an approved entity as mitigation for the Project's impacts on Covered Species.	ITP Condition #9.3.3	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
28	Provide a recent preliminary title report, Phase I Environmental Site Assessment, and other necessary documents (please contact CDFW for document list). All documents conveying the HM lands and all conditions of title are subject to the approval of CDFW, and if applicable, the Wildlife Conservation Board and the Department of General Services.	ITP Condition #9.3.4	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
29	Designate both an interim and long-term land manager approved by CDFW. The interim and long-term land managers may, but need not, be the same. The interim and/or long-term land managers may be the landowner or another party. Documents related to land management shall identify both the interim and long-term land managers. Permittee shall notify CDFW of any subsequent changes in the land manager within 30 days of the change. If CDFW will hold fee title to the mitigation land, CDFW will also act as both the interim and long-term land manager unless otherwise specified. The grantee for the conservation easement cannot serve as the interim or long-term manager without the express written authorization of CDFW in its sole discretion.	ITP Condition #9.3.5	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
30	Provide for the implementation of start-up activities, including the initial site protection and enhancement of HM lands, once the HM lands have been approved by CDFW. Start-up activities include, at a minimum: (1) preparing a final management plan for CDFW approval (2) conducting a baseline biological assessment and land survey report within four months of recording or transfer; (3) developing and transferring Geographic Information Systems (GIS) data if applicable; (4) establishing initial fencing; (5) conducting litter removal; (6) conducting initial habitat restoration or enhancement, if applicable; and (7) installing signage.	ITP Condition #9.3.6	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
31	<p>Provide for the interim management of the HM lands. The Permittee shall ensure that the interim land manager implements the interim management of the HM lands as described in the final management plan and conservation easement approved by CDFW. The interim management period shall be a minimum of three years from the date of HM land acquisition and protection and full funding of the Endowment and includes expected management following start-up activities. Interim management period activities described in the final management plan shall include fence repair, continuing trash removal, site monitoring, and vegetation and invasive species management.</p> <p>Permittee shall either (1) provide Security to CDFW for the minimum of three years of interim management that the land owner, Permittee, or land manager agrees to manage and pay for at their own expense, (2) establish an escrow account with written instructions approved in advance in writing by CDFW to pay the land manager annually in advance, or (3) establish a short-term enhancement account with CDFW or a CDFW-approved entity for payment to the land manager.</p>	ITP Condition #9.3.7	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
32	<p>If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall ensure that the HM lands are perpetually managed, maintained, and monitored by the long-term land manager as described in the ITP, the conservation easement, and the final management plan approved by CDFW. After obtaining CDFW approval of the HM lands, Permittee shall provide long-term management funding for the perpetual management of the HM lands by establishing a long-term management fund (Endowment). The Endowment is a sum of money, held in a CDFW-approved fund that is permanently restricted to paying the costs of long-term management and stewardship of the mitigation property for which the funds were set aside, which costs include the perpetual management, maintenance, monitoring, and other activities on the HM lands consistent with the ITP, the conservation easement, and the management plan required by Condition of Approval 9.3.6. Endowment as used in the ITP shall refer to the endowment deposit and all interest, dividends, other earnings, additions and appreciation thereon. The Endowment shall be governed by the ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.</p> <p>After the interim management period, Permittee shall ensure that the designated long-term land manager implements the management and monitoring of the HM lands according to the final management plan. The long-term land manager shall be obligated to manage and monitor the HM lands in perpetuity to preserve their conservation values in accordance with the ITP, the conservation easement, and the final management plan. Such activities shall be funded through the Endowment</p>	ITP Condition # 9.4	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
33	<p>The Endowment shall be held by the Endowment Manager, which shall be either CDFW or another entity qualified pursuant to Government Code sections 65965-65968, as amended.</p> <p>Permittee shall submit to CDFW a written proposal that includes: (i) the name of the proposed Endowment Manager; (ii) whether the proposed Endowment Manager is a governmental entity, special district, nonprofit organization, community foundation, or congressionally chartered foundation; (iii) whether the proposed Endowment Manager holds the property or an interest in the property for conservation purposes as required by Government Code section 65968(b)(1) or, in the alternative, the basis for finding that the Project qualifies for an exception pursuant to Government Code section 65968(b)(2); and (iv) a copy of the proposed Endowment Manager's certification pursuant to Government Code section 65968(e).</p> <p>Within thirty days of CDFW's receipt of Permittee's written proposal, CDFW shall inform Permittee in writing if it determines the proposal does not satisfy the requirements of Fish and Game Code section 2081(b)(3) and, if so, shall provide Permittee with a written explanation of the reasons for its determination. If CDFW does not provide Permittee with a written determination within the thirty-day period, the proposal shall be deemed consistent with Section 2081(b)(3).</p>	ITP Condition #9.4.1	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
34	After obtaining CDFW written approval of the HM lands, long-term management plan, and Endowment Manager, Permittee shall prepare an endowment assessment (equivalent to a Property Analysis Record (PAR)) to calculate the amount of funding necessary to ensure the long-term management of the HM lands (Endowment Deposit Amount). Note that the endowment for the easement holder should not be included in this calculation. The Permittee shall submit to CDFW for review and approval the results of the endowment assessment before transferring funds to the Endowment Manager.	ITP Conditions #9.4.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
35	Permittee shall obtain the capitalization rate from the selected Endowment Fund Manager for use in calculating the PAR and adjust for any additional administrative, periodic, or annual fees.	ITP Condition #9.4.2.1	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
36	<p>Permittee shall include in the endowment assessment assumptions the following buffers for endowment establishment and use that will substantially ensure long-term viability and security of the Endowment:</p> <ul style="list-style-type: none"> • A 10 percent contingency shall be added to each endowment calculation to hedge against underestimation of the fund, unanticipated expenditures, inflation, or catastrophic events. • The endowment shall be established assuming spending will not occur for the first three years after full funding. • For all large capital expenses to occur periodically but not annually such as fence replacement or well replacement, payments shall be withheld from the annual disbursement until the year of anticipated need or upon request to Endowment Fund Manager and CDFW. 	ITP Condition #9.4.2.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
37	Permittee shall transfer the long-term endowment funds to the Endowment Manager upon CDFW approval of the Endowment Deposit Amount identified above.	ITP Condition #9.4.3	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
38	<p>The approved Endowment Manager may pool the Endowment with other endowments for the operation, management, and protection of HM lands for local populations of the Covered Species but shall maintain separate accounting for each Endowment. The Endowment Manager shall, at all times, hold and manage the Endowment in compliance with the ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.</p> <p><u>Notwithstanding Probate Code sections 18501-18510, the Endowment Manager shall not make any disbursement from the Endowment that will result in expenditure of any portion of the principal of the endowment without the prior written approval of CDFW in its sole discretion. Permittee shall ensure that this requirement is included in any agreement of any kind governing the holding, investment, management, and/or disbursement of the Endowment funds.</u></p> <p>Notwithstanding Probate Code sections 18501-18510, if CDFW determines in its sole discretion that an expenditure needs to be made from the Endowment to preserve the conservation values of the HM lands, the Endowment Manager shall process that expenditure in accordance with directions from CDFW. The Endowment Manager shall not be liable for any shortfall in the Endowment resulting from CDFW's decision to make such an expenditure.</p>	ITP Condition 9.4.4	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
39	<p>Permittee shall reimburse CDFW for all reasonable costs incurred by CDFW related to issuance and monitoring of the ITP, including, but not limited to transaction fees, account set-up fees, administrative fees, title and documentation review and related title transactions, costs incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW.</p>	ITP Condition #9.5	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
40	<p>The Permittee may proceed with Covered Activities only after the Permittee has ensured funding (Security) to complete any activity required by Condition of Approval 9 that has not been completed before Covered Activities begin. Permittee shall provide Security as follows:</p> <ul style="list-style-type: none"> b) <u>Security Amount</u>. The Security shall be in the amount of \$14,873,640. This amount is based on the cost estimates identified in Condition of Approval 9.1 above; c) <u>Security Form</u>. The Security shall be in the form of an irrevocable letter of credit (see Attachment 6) or another form of Security approved in advance in writing by CDFW's Office of the General Counsel; d) <u>Security Timeline</u>. The Security shall be provided to CDFW before Covered Activities begin or within 30 days after the effective date of the ITP, whichever occurs first; e) <u>Security Holder</u>. The Security shall be held by CDFW or in a manner approved in advance in writing by CDFW; f) <u>Security Transmittal</u>. If CDFW holds the Security, Permittee shall transmit it to CDFW with a completed Mitigation Payment Transmittal Form or by way of an approved instrument such as escrow, irrevocable letter of credit, or other; g) <u>Security Drawing</u>. The Security shall allow CDFW to draw on the principal sum if CDFW, in its sole discretion, determines that the Permittee has failed to comply with the Conditions of Approval of the ITP; h) <u>Security Release</u>. The Security (or any portion of the Security then remaining) shall be released to the Permittee after all secured requirements have been met as evidenced by: <ul style="list-style-type: none"> • Timely submission of all required reports; • An on-site inspection by CDFW; and • Written approval from CDFW. <p>Even if Security is provided, the Permittee must complete the required acquisition, protection and transfer of all HM lands and record any required conservation easements no later than 18 months from the effective date of the ITP. CDFW may require the Permittee to provide additional HM lands and/or additional funding to ensure the impacts of the taking are minimized and fully mitigated, as required by law, if the Permittee does not complete these requirements within the specified timeframe.</p>	ITP Condition # 10	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
DURING CONSTRUCTION					
41	<p>To ensure compliance with the Conditions of Approval of the ITP, the Authorized Biologist(s) and/or Biological Monitor (collectively, Biologists) shall immediately stop any activity that does not comply with the ITP and/or order any reasonable measure to avoid the unauthorized take of an individual of the Covered Species. Permittee shall provide unfettered access to the Project Site and otherwise facilitate the Biologist(s) in the performance of his/her duties. If the Biologist(s) is unable to comply with the ITP, then the Biologist(s) shall notify the CDFW Representative immediately. Permittee shall not enter into any agreement or contract of any kind, including but not limited to non-disclosure agreements and confidentiality agreements, with its contractors and/or the Biologists(s) that prohibit or impede open communication with CDFW, including but not limited to providing CDFW staff with the results of any surveys, reports, or studies or notifying CDFW of any non-compliance or take. Failure to notify CDFW of any non-compliance or take or injury of a Covered Species as a result of such agreement or contract may result in CDFW taking actions to prevent or remedy a violation of the ITP.</p>	ITP Condition # 6.5	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
42	The Authorized Biologist(s) and Biological Monitor(s) shall maintain construction-monitoring documentation on-site in either hard copy or digital format throughout the construction period, which shall include a copy of the ITP with attachments and a list of signatures of all personnel who have successfully completed the education program. Permittee shall ensure a copy of the construction-monitoring documentation is available for review at the Project site upon request by CDFW	ITP Condition #6.7	Entire Project	Permittee	
43	Permittee shall prohibit use of erosion control materials potentially harmful to Covered Species and other species, such as monofilament netting (erosion control matting) or similar material, in potential Covered Species' habitat.	ITP Condition # 6.10	Entire Project	Permittee	
44	Project-related personnel shall access the Project Area using existing routes, or routes identified in the Project Description and shall not cross Covered Species' habitat outside of or en route to the Project Area. Permittee shall restrict Project-related vehicle traffic to established roads, staging, and parking areas. Permittee shall ensure that vehicle speeds do not exceed 20 miles per hour to avoid Covered Species on or traversing the roads. If Permittee determines construction of routes for travel are necessary outside of the Project Area, the Designated Representative shall contact CDFW for written approval before carrying out such an activity. CDFW may require an amendment to the ITP, among other reasons, if additional take of Covered Species will occur as a result of the Project modification.	ITP Condition #6.13	Entire Project	Permittee	
45	Permittee shall confine all Project-related parking, storage areas, laydown sites, equipment storage, and any other surface-disturbing activities to the Project Area using, to the extent possible, previously disturbed areas. Additionally, Permittee shall not use or cross Covered Species' habitat outside of the marked Project Area unless provided for as described in Condition of Approval 6.13 of the ITP	ITP Condition # 6.14	Entire Project	Permittee	
46	Permittee shall immediately stop and, pursuant to pertinent state and federal statutes and regulations, arrange for repair and clean up by qualified individuals of any fuel or hazardous waste leaks or spills at the time of occurrence, or as soon as it is safe to do so. Permittee shall exclude the storage and handling of hazardous materials from the Project Area and shall properly contain and dispose of any unused or leftover hazardous products off-site.	ITP Condition # 6.15	Entire Project	Permittee	
47	Permittee shall provide CDFW staff with reasonable access to the Project and mitigation lands under Permittee control, and shall otherwise fully cooperate with CDFW efforts to verify compliance with or effectiveness of mitigation measures set forth in the ITP.	ITP Condition # 6.16	Entire Project	Permittee	
48	Permittee shall, to the greatest extent feasible, avoid impacts/disturbances to sensitive plants, plant communities, and animals within the Project Area. In addition, Permittee shall avoid, to the maximum extent practicable, impacts/disturbance to perennial, native vegetation within the Project Area. To the maximum extent practicable, Permittee shall limit access-related Covered Activities to "drive and crush" rather than vegetation removal or grubbing.	ITP Condition # 6.18	Entire Project	Permittee	
49	Permittee shall prohibit Project personnel and any other individual associated with the Project from bringing any firearms or dogs on the Project Area during Covered Activities, except those in the possession of authorized security personnel or local, state, or federal law enforcement officials, dogs that may be used to aid in official and approved monitoring procedures/protocols, or service dogs under Title II and Title III of the Americans with Disabilities Act	ITP Condition #6.19	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
50	The Designated Representative shall immediately notify CDFW if the Permittee is not in compliance with any Condition of Approval of the ITP, including but not limited to any actual or anticipated failure to implement measures within the time periods indicated in the ITP and/or this MMRP. The Designated Representative shall follow up within 24 hours with a written report to CDFW describing, in detail, any non-compliance with the ITP and suggested measures to remedy the situation.	ITP Condition # 7.2	Entire Project	Permittee	
51	The Permittee or the Designated Representative shall provide all required notifications in the ITP by sending an email to the CDFW Regional Representative Rose Banks (Rose.Banks@wildlife.ca.gov) and as described in the Notices section of the ITP. All notifications shall be submitted via email to the Regional Representative and shall include the following information: ITP Number, the ITP Condition number that the notification is addressing, any necessary photos or attachments, and the name and phone numbers of the Biological Monitor(s) and/or Authorized Biologist(s) (if applicable)	ITP Condition # 7.3	Entire Project	Permittee	
52	<p><u>During construction.</u> The Authorized Biologist(s) and/or Biological Monitor(s) shall be on-site daily when Covered Activities occur. The Authorized Biologist(s) and/or Biological Monitor(s) shall conduct compliance inspections a minimum of three times a day (once during the onset of the day's work, once mid-day, and once at the conclusion of that day's work). The Authorized Biologist(s) and/or Biological Monitor(s) shall conduct compliance inspections to:</p> <ol style="list-style-type: none"> (1) minimize incidental take of the Covered Species; (2) prevent unlawful take of species; (3) check for compliance with all measures of the ITP; (4) check all exclusion zones; and (5) ensure that signs, stakes, and fencing are intact, and that Covered Activities are only occurring in the Project Area. <p>The Designated Representative or Authorized Biologist shall prepare daily written observation and inspection records summarizing oversight activities and compliance inspections, observations of Covered Species and their sign, survey results, and monitoring activities required by the ITP.</p> <p><u>During O&M.</u> Once all construction is complete any work being performed outside the exclusionary fencing shall have an Authorized Biologist(s) and/or Biological Monitor(s) on-site to monitor any ground-disturbing Covered Activities and during perimeter fence inspections for the term of the ITP</p>	ITP Condition # 7.4	Entire Project	Permittee	
53	The Designated Representative or Authorized Biologist(s) and/or Biological Monitor(s) shall compile the observation and inspection records identified in Condition of Approval 7.4 into a Quarterly Compliance Report and submit it to CDFW along with a copy of this MMRP table with notes showing the current implementation status of each mitigation measure. Quarterly Compliance Reports shall be submitted to the CDFW offices listed in the Notices section of the ITP and via e-mail to CDFW's Regional Representative and Headquarters CESA Program. At the time of the ITP's approval, the CDFW Regional Representative is Rose Banks (Rose.Banks@wildlife.ca.gov) and Headquarters CESA Program email is CESA@wildlife.ca.gov. CDFW may at any time increase the timing and number of compliance inspections and reports required under this provision depending upon the results of previous compliance inspections. If CDFW determines the reporting schedule must be changed, CDFW will notify Permittee in writing of the new reporting schedule	ITP Condition # 7.5	Entire Project (During Construction)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
54	Permittee shall provide CDFW with an Annual Status Report (ASR) no later than January 31 of every year beginning with issuance of the ITP and continuing until permit termination date or CDFW determines they are no longer necessary. Each ASR shall include, at a minimum: (1) a summary of all Quarterly Compliance Reports for that year identified in Condition of Approval 7.5; (2) a general description of the status of the Project Area and Covered Activities, including actual or projected completion dates, if known; (3) a copy of the table in this MMRP with notes showing the current implementation status of each mitigation measure; (4) an assessment of the effectiveness of each completed or partially completed mitigation measure in avoiding, minimizing and mitigating Project impacts; (5) all available information about Project-related incidental take of the Covered Species; and (6) information about other Project impacts on the Covered Species.	ITP Condition # 7.6	Entire Project	Permittee	
55	The Authorized Biologist shall submit all observations of Covered Species to CDFW's California Natural Diversity Database (CNDDDB) within 60 calendar days of the observation and the Authorized Biologist shall include copies of the submitted forms with the next Quarterly Compliance Report or ASR, whichever is submitted first relative to the observation.	ITP Condition # 7.7	Entire Project	Permittee	
56	Permittee shall immediately notify the Authorized Biologist(s) and/or Biological Monitor(s) if a Covered Species is taken or injured by a Project-related activity, or if a Covered Species is otherwise found dead or injured within the vicinity of the Project. The Authorized Biologist or Designated Representative shall provide initial notification to CDFW by following Condition of Approval 7.3. The initial notification to CDFW shall include information regarding the location, species, and number of animals taken or injured and the ITP Number. Following initial notification, Permittee shall send CDFW a written report within two calendar days. The report shall include the date and time of the finding or incident, location of the animal or carcass, and if possible, provide a photograph, explanation as to cause of take or injury, and any other pertinent information	ITP Condition # 7.9	Entire Project	Permittee	
57	Permittee shall only use herbicides containing a harmless dye and registered with the California Department of Pesticide Regulation (DPR). All herbicides shall be applied in accordance with regulations set by DPR. All herbicides shall be used according to labeled instructions. Labeled instructions for the herbicide used shall be made available to CDFW upon request. No herbicide application when winds are greater than five (5) miles per hour	ITP Condition # 8.1	Entire Project	Permittee	
58	Permittee shall not use rodenticides and/or insecticides on the Project Area without prior written permission from CDFW. Permittee shall not use any second-generation anticoagulant rodenticide (brodifacoum, bromadiolone, difethialone, and difenacoum) on the Project Area. Permittee shall not use any first-generation anticoagulant rodenticide (diphacinone, chlorophacinone, and warfarin) on the Project Area without prior written permission from CDFW.	ITP Condition # 8.2	Entire Project	Permittee	
59	Permittee shall remove all hardened concrete and other loose debris in areas that need to be cleared by slowly removing stored material starting from the top and working down to ground level, rather than scooping from the ground up. This method will minimize the possibility of harming a Covered Species using the debris as shelter and will allow them to escape.	ITP Condition # 8.3	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
60	Any pipes, culverts, or similar structures with a diameter greater than 3 inches and less than 8 inches aboveground shall be inspected by the Authorized Biologist(s) and/or Biological Monitor(s) for Covered Species' before the material is moved, buried, or capped. The Authorized Biologist(s) and/or Biological Monitor(s) shall inspect all open holes and trenches within Covered Species habitat at a minimum of twice a day and just prior to backfilling. At the end of each workday during construction, Permittee shall place an escape ramp at each end of trenches to allow any animals that may have become trapped in the trench to climb out overnight. The ramp may be constructed of either dirt fill or wood planking or other suitable material that is placed at an angle no greater than 30 degrees. If any worker discovers that Covered Species have become trapped, they shall halt Covered Activities and notify the Biological Monitor(s) and/or Authorized Biologist(s) immediately. Project workers and the Biological Monitor(s) and/or Authorized Biologist(s) shall allow the Covered Species to escape unimpeded if possible, or an Authorized Biologist(s) approved under Condition of Approval 6.4 of the ITP shall move the Covered Species out of harm's way before allowing work to continue	ITP Condition # 8.4	Entire Project	Permittee	
61	If a Covered Species is observed during Covered Activities, all work within 300 feet of the Covered Species shall immediately stop and the observation shall be immediately reported to the Authorized Biologist(s). Covered Activities shall not resume until the Authorized Biologist(s) and/or Biological Monitor(s) has verified the Covered Species has left the Project Area OR an Authorized Biologist(s) approved under Condition of Approval 6.4 of the ITP relocates the Covered Species as described in the ITP and Desert Tortoise Translocation Plan or passively relocates as described in the BUOW Mortality Reduction Plan. The Designated Representative shall notify CDFW of any Covered Species observations within the Project Area. Notification shall occur as described in Condition of Approval 7.3 within 24 hours. Notification and the written report shall include the date, location, and circumstances of the observation, the name of the Authorized Biologist(s) that relocated the individual, pictures, map and shapefiles with the location (including GPS coordinates) where the individual was moved as specified in the DTTP	ITP Condition # 8.6	Entire Project	Permittee	
62	Only DT Authorized Biologist(s) and Biological Monitor(s) approved by CDFW are authorized to conduct burrow excavation. Excavation of burrows shall follow the methods described the USFWS Field Manual.	ITP Condition # 8.7	Entire Project	Permittee	

63	<p>Regardless of the number of desert tortoise estimated to be moved out of harm's way the Permittee shall prepare a Desert Tortoise Translocation Plan (DTTP) 30 Calendar days prior to start of Covered Activities and submit it according to Condition of Approval 7.3 of the ITP. Covered Activities are not authorized to start until the DTTP is approved in writing by CDFW. The DTTP shall follow the most current guidelines provided by USFWS and CDFW regarding desert tortoise translocation. Where guidance differs between USFWS and CDFW, verbal and/or written direction provided by CDFW always controls.</p> <p>The list of items below are the most common examples of the differences between CDFW and USFWS guidelines. These shall be included in the DTTP along with the most recent USFWS translocation guidelines:</p> <ul style="list-style-type: none"> • Translocated tortoises are tortoises removed from the Project Area and/or have a radio transmitter attached. • The Authorized Biologist shall determine when the creation of artificial burrows is needed. • Ambient air temperature guidelines shall be followed as specified in Condition of Approval 8.9 of the ITP. • Tortoises <100 millimeters (mm) midline carapace length (MCL) shall be released immediately without being held, transmitted, or blood drawn for disease testing as long as the temperature requirements in Condition of Approval 8.9 of the ITP above are met. • CDFW does not authorize the release of tortoises that test positive for disease even if it does not show outward signs of the disease. If a tortoise tests positive for disease it is the responsibility of the Permittee to locate a CDFW approved facility to place the tortoise in. Any exception to this determination will need to be approved in writing by CDFW on a case-by-case basis. • Disease testing shall not be done between November 1 and May 14. If a tortoise >100 mm MCL is found between November 1 and May 14 or earlier with written approval from CDFW the tortoise shall be held in quarantine facilities and shall remain in quarantine until tested twice (once in the spring and once in the fall). If the tortoise tests negative for disease it can be released in accordance with the approved DTTP. Blood draw samples for <i>Mycoplasma agassizii</i> and <i>Mycoplasma testudineum</i> shall determine if a tortoise is negative or positive for disease. A combination of results from blood testing and visual inspection will be used to determine the health of a tortoise. Blood draw samples will be sent to: Dr. Mary Brown, University of Florida Mycoplasma Laboratory, 2015 SW Archer Road, Room V2-234, Gainesville Florida 32608, or other facility approved by CDFW. CDFW uses enzyme-linked immune assay (ELISA) test results to determine if a tortoise is positive for disease. The ELISA tests will be used to test for exposure to herpes virus (<i>Mycoplasma agassizii</i> and <i>Mycoplasma testudineum</i>). • If a tortoise tests positive for or is suspected of disease, then the tortoise will be tested twice for disease (once in the spring after May 15 to and once in the fall). To determine results of blood testing use the most current guidelines provided by the University of Florida Mycoplasma Laboratory Department of Infectious Diseases and Pathology. The University of Florida Mycoplasma Laboratory Department of 	ITP Condition # 8.8	Entire Project	Permittee	
----	---	---------------------	----------------	-----------	--

	<p>Infectious Diseases & Pathology 2013 criteria for classifying <i>Mycoplasma agassizii</i> and <i>Mycoplasma testudineum</i> is a titer <32 is negative, a titer > 64 is positive, and a titer of 32 is suspect (retesting in 6 weeks) or most current guidelines. All sample forms shall come from the University of Florida's guidance.</p> <ul style="list-style-type: none"> • The DTTP shall include a requirement that all translocated tortoises regardless of size be included in the translocation numbers and all reports. • The DTTP shall propose one recipient site. Recipient sites shall have the vegetative structure to support all life stages of desert tortoises. In addition to the USFWS Field Manual guidelines the DTTP shall also include identifying the known threats or potential causes of population decline, how potential threats have been or would be addressed, complete physical examination and health assessments with sample collection, age-structure and sex ratios, protocol level surveys, vegetation classification and quality of habitat. The DTTP shall detail which characteristics are to be used to decide if a recipient site is similar enough to a Project Area including burrow aspects, and recovery needs such as habitat restoration and/or predator control. • All tortoises >100 mm MCL removed off the Project Area shall be transmittered and monitored for 5 years post translocation. • Recipient sites shall be a minimum of 4 miles (6.5 kilometers) away from highway/road right-of-way that does not include Covered Species fencing. • All tortoise burrows within the Project Area shall be excavated following procedures outlined in the U. S. Fish and Wildlife Service Desert Tortoise Field Manual. • Creation of artificial burrows, as well as translocation of tortoises and eggs shall only occur on land(s) (including Bureau of Land Management), when written authorization has been obtained from the landowner prior to the start of Covered Activities. The written permission from the landowner shall be included in the DTTP and the DTTP shall not be approved by CDFW until authorization is provided in writing. If creation of artificial burrows or translocation of tortoise or eggs is proposed to take place on private lands then in addition to written approval required above, some form of protection for the land such as a conservation easement shall be in place prior to translocation occurring. • Cleaning and Disinfection Protocol. Trifectant and Rescue Ready to Use One Step Disinfectant Cleaner are the only products authorized under the ITP and its associated DTTP to be used as a disinfectant. These products are not authorized to be applied using a spray bottle or other spray methods. <p>Cleaning and Disinfection Protocol shall include the following:</p> <ul style="list-style-type: none"> • Remove all grossly visible debris. • Wash the area or item with water and mild detergent. • Thoroughly rinse the cleaned area to remove any detergent residue. • Allow the area to dry completely. • Apply disinfectant mixture.

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
	<ul style="list-style-type: none"> Allow the full disinfectant product recommended contact time. Thoroughly rinse away any residual disinfectant and allow the area or item to air dry 				
64	During all handling procedures, desert tortoise shall be treated in a manner to ensure that they do not overheat or exhibit signs of overheating (e.g., gaping, foaming at the mouth, etc.), or are placed in a situation where they cannot maintain surface and core temperatures necessary to their well-being. Tortoises shall be kept shaded at all times until it is safe to release them. For the purposes of this permit, ambient air temperature shall be measured in the shade, protected from wind, at a height of 5 centimeters above the ground surface. For all Covered Activities no desert tortoise shall be captured, moved, transported, released, or purposefully caused to leave its burrow for whatever reason when the ambient air temperature is above 95° Fahrenheit (F) (35° Celsius (C)). No desert tortoise shall be captured if the ambient air temperature is anticipated to exceed 95° F (35° C) before handling or processing can be completed. If the ambient air temperature exceeds 95° F (35° C) during handling or processing, desert tortoises shall be kept shaded in an environment that does not exceed 95° F (35° C), and not released until ambient air temperature declines to below 95°F (35°C). Desert tortoises moved during the less active season (June 1 to August 31 and November 1 to March 31) shall be monitored by the DT Authorized Biologist(s) for at least two days after placement in the new burrows to ensure their safety. During relocation, the DT Authorized Biologist(s) may hold a captured desert tortoise overnight and move them the following morning within these temperature constraints.	ITP Condition #8.9	Entire Project	Permittee	
65	If a desert tortoise voids its bladder as a result of being handled, the DT Authorized Biologist(s) shall rehydrate the animal(s). The DT Authorized Biologist(s) shall rehydrate the tortoise at the location where the animal(s) was or were captured, or the location where the animal(s) is or will be released. The DT Authorized Biologist(s) shall rehydrate the Covered Species by placing it in a tub with a clean plastic disposable liner. The DT Authorized Biologist(s) shall add water to the lined tub while ensuring that the water level is not higher than the lower jaw of the animal. The DT Authorized Biologist(s) shall rehydrate each desert tortoise individually for a minimum of 10 to 20 minutes. The DT Authorized Biologist(s) shall place the lined tub in a quiet protected area during rehydration.	ITP Condition # 8.10	Entire Project	Permittee	
66	The DT Authorized Biologist(s) and/or Biological Monitor(s) shall maintain a record of all desert tortoises handled. This information shall include: (1) the locations (narrative and maps) and dates of observation, including whether the individual(s) was found above ground or in a burrow; (2) ambient temperature when handled and released; (3) general condition and health of the individual(s), including injuries, state of healing, and whether the individual(s) voided its bladders; (4) identified diagnostic markings (i.e., identification numbers or marked marginal scutes); (5) location moved from and location moved to (using GPS technology), including information on any burrow (natural or artificial) utilized; (6) whether any eggs were discovered and relocated; (7) digital photographs of any desert tortoise and eggs handled; and (8) results of ongoing monitoring. The Designated Representative(s) shall provide CDFW with the information listed above submitted in the quarterly reports during construction	ITP Condition # 8.11	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
67	The design of desert tortoise guards shall include exit ramps and cleanout. Guards shall be installed along the Existing Right-of-Way fence. Guard locations and design shall be provided to CDFW and shall be approved by CDFW in writing prior to starting Covered Activities.	ITP Condition # 8.12	Entire Project	Permittee	
68	The permanent desert tortoise exclusion fencing shall be attached to the 6-foot-high standard chain link security fencing. This fencing shall be installed around the array fields, operation and maintenance facilities, warehouses, substations, switchyard, and interconnection facilities and will remain in place during operations except it may be removed in places where wildlife-friendly fencing may be implemented over a portion of the facility site as described in Condition of Approval 8.23. The fence shall be constructed according to Chapter 8 of the USFWS Field Manual, but if any tortoises <100mm MCL are translocated within 500 meters of the Project site, tortoise fencing shall be 16 gauge or heavier galvanized after welded wire with mesh opening of ½ inch horizontal by ½ inch vertical (Attachment 4). The fence shall include the installation of shade structures along the outer fence perimeter placed at regular intervals. To prevent potential access at site access points, all gates would be installed with desert tortoise exclusion fencing affixed along the bottom portion of the gate structure	ITP Condition # 8.13	Entire Project	Permittee	
69	The DT Authorized Biologist(s) and/or Biological Monitor(s) shall inspect the tortoise fencing during the Covered Activities, at the end of each workday during the construction period, monthly during O&M, and during major rainfall and high wind events within 24 hours to ensure desert tortoise is prohibited from entering the Project Area. If the fence is compromised, repairs shall be completed immediately, and clearance protocol level surveys shall be conducted as described in Condition of Approval 8.5.	ITP Condition # 8.14	Entire Project	Permittee	
70	Workers shall inspect for desert tortoise under vehicles and equipment before the vehicles and equipment are moved. If a desert tortoise is present, the worker shall contact the DT Authorized Biologists(s) and/or Biological Monitor and wait for the tortoise to move unimpeded to a safe location or the DT Authorized Biologist(s) shall relocate the tortoise as described in Condition of Approval 8.8 before moving vehicles and equipment.	ITP Condition # 8.15	Entire Project	Permittee	
71	The Permittee shall enclose all staging areas and parking areas with Covered Species exclusion fencing. All parked vehicles and equipment shall be inspected prior to being moved. If a Covered Species is found within a staging or parking area the worker shall immediately contact the Authorized Biologist(s) and/or Biological Monitor approved in Condition of Approval 6.4 of the ITP. A biologist approved in Condition of Approval 6.4 of the ITP shall relocate the Covered Species in accordance with Condition of Approval 8.8 of the ITP and the DTTP	ITP Condition # 8.16	Entire Project	Permittee	
72	To minimize the risk of ensnaring and strangling Covered Species, Permittee shall not use erosion control materials containing synthetic (e.g., plastic or nylon) monofilament netting. Geotextiles, fiber rolls, and other erosion control measures shall be made of loose-weave mesh, such as jute, coconut (coir) fiber, or other products without welded weaves. Permittee shall use erosion control materials composed entirely of natural-fiber biodegradable materials. Permittee shall not use plastic "photodegradable" erosion control materials	ITP Condition # 8.18	Entire Project	Permittee	
73	An Authorized Biologist(s) and/or Biological Monitor(s) shall be present during all Covered Activities that occur outside a permanent fenced area during the construction period. During the operations and maintenance period of the Project, an Authorized Biologist(s) shall be on-site to address any compliance-related issues	ITP Condition # 8.20	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
74	Plantings and seed mix shall be approved by CDFW prior to application. Plantings and seed mix shall be comprised of only native plant material from the same geographic range as the Project	ITP Condition # 8.21	Entire Project	Permittee	
75	If a desert tortoise is injured as a result of Project-related activities, the DT Authorized Biologist shall immediately take it to a CDFW approved wildlife rehabilitation or veterinary facility. Permittee shall identify the facility before starting Covered Activities. Permittee shall bear any costs associated with the care or treatment of such injured desert tortoise. The Permittee shall notify CDFW of the injury to the Covered Species immediately by telephone and e-mail followed by a written incident report as described in Condition 7.3. Notification shall include the name of the facility where the animal was taken.	ITP Condition # 8.22	Entire Project	Permittee	
76	If a BUOW is injured or found dead within the vicinity of the Project Area, the Permittee shall notify CDFW of the injury or mortality to CDFW immediately by e-mail as described in Condition of Approval 7.3. The BUOW Authorized Biologist shall follow the BUOW Mortality Reduction Plan to either immediately: transport injured individuals to a CDFW-approved wildlife rehabilitation center or veterinary facility; or follow approved collection and storage procedures for deceased animals. Both options shall be identified per Condition of Approval 8.23.1. Permittee shall bear any cost associated with care and recovery of any injured BUOW adults, nestling(s) or egg(s) and hacking (controlled release of captive reared young).	ITP Condition #8.23.8	Entire Project	Permittee	
POST-CONSTRUCTION					
77	Upon completion of Covered Activities, Permittee shall remove from the Project Area and properly dispose of all temporary fill and construction refuse, including, but not limited to, broken equipment parts, wrapping material, cords, cables, wire, rope, strapping, twine, buckets, metal or plastic containers, and boxes.	ITP Condition # 6.17	Post-construction	Permittee	
78	No later than 45 days after completion of all mitigation measures performed during the construction period, Permittee shall provide CDFW with a Final Mitigation Report. The Authorized Biologist shall prepare the Final Mitigation Report which shall include, at a minimum: (1) a summary of all Quarterly Compliance Reports and all ASRs; (2) a copy of the table in this MMRP with notes showing when each of the mitigation measures was implemented; (3) all available information about Project-related incidental take of the Covered Species; (4) information about other Project impacts on the Covered Species; (5) beginning and ending dates of Covered Activities; (6) an assessment of the effectiveness of the ITP's Conditions of Approval in minimizing and fully mitigating Project impacts of the taking on Covered Species; (7) recommendations on how mitigation measures might be changed to more effectively minimize take and mitigate the impacts of future projects on the Covered Species; (8) geographic information system (GIS) shapefiles in the format specified in Attachment 3 and (9) any other pertinent information.	ITP Condition # 7.8	Post-construction and after completion of mitigation	Permittee	
79	CDFW accepts the Final Mitigation Report as complete.	ITP Condition # 6.16	Post-construction	CDFW

CDFW Region 6 Desert Tortoise Biologist Qualification Form

This form requests information about the qualifications of the Desert Tortoise Authorized Biologist and Biological Monitor specified in California Endangered Species Act Incidental Take Permits (ITP) and Lake or Streambed Alteration (LSA) Agreements issued by California Department of Fish and Wildlife (CDFW).

While use of this form is not mandatory, CDFW strongly recommends completing this form as it will ensure the receipt of adequate information and expedite CDFW review of qualifications.

Requesting Approval for: Authorized Biologist (AB) or Biological Monitor (BM) (skills needed are determined by the conditions in the ITP and measures in the LSA)

Date Submitted: _____

Requesting Approval as: ☐ Desert Tortoise AB ☐ Desert Tortoise BM

SECTION I. BIOLOGIST NAME AND CONTACT INFORMATION:

SUBMIT EACH RESUME AS A SEPARATE DOCUMENT

Name	Requested Role(s) ¹	Species/Resource(s)

This form requests information about the qualifications of the Qualified Biologist, Designated Biologist and Biological Monitor specified in California Endangered Species Act Incidental Take Permits (ITP) and Lake or Streambed Alteration (LSA) Agreements issued by California Department of Fish and Wildlife (CDFW). **Completing this form will ensure the receipt of adequate information and expedite CDFW review of qualifications.**

¹ Requested roles correspond to the biological staffing requirements indicated in the Lake and Streambed Alteration (LSA) Agreement or California Endangered Species Act Incidental Take Permit (ITP). Roles may include a "Qualified Biologist" or "Designated Biologist" with the necessary experience to survey for special status species, or a "Biological Monitor" with the necessary experience to monitor construction activities for special status species. An individual may request more than one role.

Relevant LSA Agreement Measures or ITP Conditions²:

SECTION IV. SPECIES AND RESOURCE EXPERIENCE – SUMMARY

This section summarizes experience by special status species and other resource. Use one row for each species or other resource where surveys or special protections are required in the CESA ITP or LSA Agreement for which biologist approval is requested.³ If more space is needed, add rows to this table. Provide details in Section V.

Species or Resource	Number of Field Seasons & Hours, Life Stages Observed Provide project details in Section 5	Life History Knowledge Describe formal workshops & training with dates, or informal training details	CDFW SCP, MOU, & USFWS 10a1a Authorization Number & Authorized Activities This form does not fulfill SCP, MOU, & USFWS 10a1a reporting requirements
Insert Species or Resource 1	Field seasons: Hours: Life Stages:		Issued to: Expiration: Agency contact:
Insert Species or Resource 2	Field seasons: Hours: Life Stages:		Issued to: Expiration: Agency contact:
Insert Species or Resource 3	Field seasons: Hours: Life Stages:		Issued to: Expiration: Agency contact:

² List all measures and conditions from the LSA Agreement or ITP requiring biological staff (i.e., Qualified Biologist, Designated Biologist, or Biological Monitor).

³ Often LSA Agreements/ITPs require surveys and other protections for multiple species and other resources. Include only those for which the biologist has experience and is requesting approval.

GIS data collection condition for mitigation sites.

Provide CDFW with GIS Shapefiles. Collect data in WGS84 reference coordinate system in decimal degrees (DD). Provide shapefiles of the following information:

Project Information- County project is in, Project Name, Accessors Parcel Number, Lat, Long, acres, and permit number.

HM Land Information – County HM Lands are located in, Accessors Parcel Number, Lat, Long, acres, and name of mitigation package.

GIS data collection condition for translocation sites.

Provide CDFW with GIS Shapefiles. Collect data in WGS84 reference coordinate system in decimal degrees (DD). Provide shapefiles of the following information:

Project Information- County project is in, Project Name, Accessors Parcel Number, Lat, Long, acres, and permit number.

Desert Tortoise Translocation- County recipient site is located, Recipient Site, Recipient Site Accessor Parcel Number, Lat, Long, Acres of recipient site, desert tortoise release location within recipient site, age translocatee, sex of translocatee, date of translocation, and disease test results of each translocatee.

Attachment 4

APPENDIX C

Recommended Specifications for Desert Tortoise Exclusion Fencing and Tortoise Guard

DESERT TORTOISE EXCLUSION FENCE (2005)

DETAIL A

DETAIL B

RECOMMENDED DESIGN FOR DESERT TORTOISE EXCLUSION FENCE

GENERAL NOTES:

1. Ensure that fence posts and materials conform to the standards approved by the U.S. Fish and Wildlife Service.
2. Ensure that the height above ground level is no less than 18 inches and no higher than 24 inches.
3. Ensure that the depth of fence material below ground level is about 12 inches but no less than 6 inches. (See SECTION A above)
4. Install additional steel posts when existing fence posts exceed 10 feet.
5. Attach fence material to existing fence or wire using hog rings at 12-inch intervals.
6. Fasten fence material to posts with 3 tie wires with a wire near the top, bottom and center of the fence material.
7. Backfill trenches with excavated material and compact the material.
8. Attach fence material to all gates. Ensure that clearance at base of gate achieves zero ground clearance.
9. Substitute smooth wire for barbed wire if additional support wires are necessary.
10. The number placement of support wires may be modified to allow sheep and deer to pass safely.
11. Erosion at the edge of the fence material where the fence crosses washes may occur and requires appropriate and timely monitoring and repair.
12. Tie the fence into existing culverts and cattle guards when determined necessary to allow desert tortoise passage underneath roadways.

4-strand wire fence

Hog rings 12-18" intervals See Detail B

Galvanized fence material

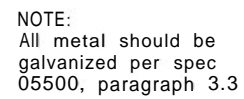

SECTION A

1. Use this fence design (see below) only for that portion of the fence where fence material cannot be placed 6 inches below existing ground level due to presence of bedrock, large rocks or caliche substrate.
2. Ensure that the fence height above ground level is no less than 22 inches.
3. Ensure that there is a zero to 2-inch ground clearance at the bend.
4. Ensure that the bent portion of the fence is lying on the ground and pointed in the direction of desert tortoise habitat.
5. Cover the portion of the fence that is flush with the ground with cobble (rocks placed on top of the fence material to a vertical thickness up to 4 inches).
6. When substrate no longer is composed of bedrock or caliche, install fence using design shown above.

CROSS SECTION

RENEWABLE ENERGY ACTION TEAM DEPOSIT DOCUMENT

Detailed instructions for properly completing this document begin on page 7. REAT agencies are responsible for completing this form and submitting it to NFWF when a project proponent will be depositing funds with NFWF, but the deposits identified in the document will be made by the project proponent. Once the deposit document is completed the applicable REAT agency should submit a copy to NFWF and the project proponent. The project proponent should include a copy with the deposit.

Sub-Account and Required Mitigation Activities¹:

Check the appropriate box below of the Sub-Account that is to receive monies and provide the required information in the numbered sub-sections that follow. If more than one Sub-Account is to receive monies, for each additional Sub-Account check multiple boxes and provide the required information.

☐ **1. Land Acquisition Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **2. Initial Enhancement Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **3. Restoration & Habitat Management Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):

¹ The term "Mitigation Activities" for purposes of this Deposit Document means "any biological mitigation or conservation actions required as conditions of Project approval, and other actions agreed to by the Proponent in the Project description, as identified in a Decision Document. Mitigation Activities include, but may not be limited to, the acquisition, protection, and long-term management of compensatory habitat; the restoration, enhancement, or protection of other habitat; actions to protect or manage sensitive species; related monitoring and reporting; and other associated actions, including but not limited to land appraisals and inspections, title searches, and special studies."

- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **4. Initial & Capital Management & Maintenance Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **5. Long-Term Management & Maintenance Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **6. Raven Management Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):

- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):

Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information: *CDFW*

- d.

☐ **7. Bald & Golden Eagle Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **8. Condor Sub-Account**

- a. Description of Mitigation Activity (including acreage totals):
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
- c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
- d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

☐ **9. Mitigation Effectiveness Monitoring Sub-Account**

Insert information about the "NFWF Annual Fee" and "Investment Policy Statement" below after discussing these items with NFWF in advance.

NFWF Annual Fee:

Investment Policy Statement:

- a. Description of Mitigation Activity (including acreage totals):

-
- b. Citation (e.g., page, section, condition number) to Applicable Decision Document(s)
(these documents must be provided to NFWF at time of submission of Deposit Document):
 - c. Implementation Schedule (including determination of start date, performance period, and due date and determination method for satisfaction of the required Mitigation Activity):
 - d. Applicable REAT Agency(ies) with Authority over Implementation of the Mitigation Activity and Contact Information:

DEPOSIT DOCUMENT INFORMATION & INSTRUCTIONS

The Deposit Document is for use by the Renewable Energy Action Team Agencies (USFWS, BLM, DFW, and CEC) and the National Fish and Wildlife Foundation (NFWF). The Deposit Document is not itself a Decision Document. The Deposit Document is to be filled out by the appropriate REAT Agency(ies) staff, as determined by the REAT Agencies. The REAT Agency staff who takes the lead in preparing the Deposit Document shall coordinate with the other applicable REAT Agency staff, non-REAT Agency staff if the lead permitting agency is not a REAT Agency, and NFWF staff prior to finalizing the Deposit Document. REAT agencies are responsible for completing this form and submitting it to NFWF when a project proponent will be depositing funds with NFWF, but the deposits identified in the document will be made by the project proponent. Once the deposit document is completed the applicable REAT agency should submit a copy to NFWF and the project proponent. The project proponent should include a copy with the project proponent's deposit.

The REAT Agency to take the lead in preparing the Deposit Document shall be as follows:

- The CEC if the CEC is a permitting agency regardless of whether the project is on public or private lands
- The BLM if the CEC is not a permitting agency and the project is on public lands
- The DFW if the CEC is not a permitting agency, the project is on private lands, and the DFW issues a permit under Fish and Wildlife Code section 2081(b)
- The USFWS if the CEC is not a permitting agency, the project is on private lands, and the DFW makes a consistency determination under Fish and Wildlife Code section 2080.1

A. Project Name:

- Identify the name of the permitted project.

B. Project Phase:

- If the project has been permitted in phases, specify the phase(s) to which this Deposit Document applies.

C. Project Location:

- Identify the county in which the project is located.
- Provide available information as to township, range, section, and base and meridian.

D. Land Ownership of Project Site:

- Indicate whether the land on which the permitted project or project phase(s) is located is privately or publicly owned.
- If it is publicly owned, identify the applicable governmental entity.

E. Permittee/Grantee:

- Identify the name of the permittee/grantee, which also may be known as the project proponent or responsible party.
- If the permittee/grantee is a company that is owned by another company, identify the name of the parent company.

F. Permitting Agency and Decision Documents:

- Check the box of each permitting agency. This is an agency that has issued a decision document (permit or other authorization) for the project or project phase(s).
- Under the applicable permitting agency, identify the decision document by (1) name; (2) date; (3) permit identification number.
- Submit with the Deposit Document, a CD or hard copy of each decision document, and indicate by checking the box that the decision document is attached.
- Under the applicable permitting agency, identify the project identification or tracking number. For example, for BLM, this is the “CACA” number. For DFW, this may be an “ITP”, “SAA”, “SCH”, or other number. For the CEC, this is the “Decision” number. For the USFWS, this is the “Permit” or “File” number. For DFW, if any funds collected by DFW pursuant to SB 34 are being deposited, check the box indicating this fact and specify in the “Required Measure Details” of the deposit document which of the measures are to be paid for using such funds.

G. Monies Required for Deposit:

- There are the following potential new and already established Sub-Accounts for each Project established under the NFWF REAT Mitigation Account. For each new Sub-Account there is a one-time \$3400 Deposit Fee, and an Annual Fee. The Sub-Accounts and the associated NFWF fees to be paid by the project proponent are as follows:
 1. Land Acquisition Sub-Account
 - a. NFWF Deposit Fee (\$3400 one-time)
 - b. NFWF Annual Fee (greater of 3% or \$1000 annual)
 2. Initial Enhancement Sub-Account
 - a. NFWF Deposit Fee (\$3400 one-time)
 - b. NFWF Annual Fee (greater of 3% or \$1000 annual)
 3. Restoration & Habitat Management Sub-Account
 - a. NFWF Deposit Fee (\$3400 one-time)
 - b. NFWF Annual Fee (greater of 3% or \$1000 annual)
 4. Long-Term Management & Maintenance Sub-Account
 - a. NFWF Deposit Fee (\$3400 one-time)
 - b. NFWF Annual Fee (1%)
 5. Initial & Capital Management & Maintenance Sub-Account
 - a. NFWF Deposit Fee (\$3400 one-time)
 - b. NFWF Annual Fee (greater of 1% or \$1000 annual)
 6. Raven Management Sub-Account
 - a. NFWF Deposit Fee (already established and paid by the initial depositor)
 - b. NFWF Annual Fee (greater of 2% or \$1000 annual)
 7. Bald & Golden Eagle Sub-Account
 - a. NFWF Deposit Fee (already established and paid by the initial depositor)
 - b. NFWF Annual Fee (greater of 2% or \$1000 annual)
 8. Condor Sub-Account
 - a. NFWF Deposit Fee (already established and paid by the initial depositor)
 - b. NFWF Annual Fee (greater of 2% or \$1000 annual)
 9. Mitigation Effectiveness Monitoring Sub-Account
 - a. NFWF Deposit Fee (\$3400 one-time)
 - b. NFWF Annual Fee (to be determined on a sub-account specific basis and set forth in Section 9 of Sub-Account and Required Mitigation Activities of the Deposit Document)

- Check the box next to each Sub-Account that is to receive monies for required measures for the permitted project or project phase(s).
- See Section J below for instructions on entering dollar amounts for the applicable Sub-Account.
- To calculate the “**TOTAL DEPOSIT for Project (or Project Phase)**,” add together all of the amounts indicated in the spaces provided to be deposited into each of the sub-accounts for the required Mitigation Activities cost estimates.
- Please note that all costs are best estimates. In addition, with respect to any Mitigation Activities, including Land Acquisition Mitigation Activities, that are based on the REAT Cost Table, the costs are the REAT’s best estimates as of July 23, 2010. Actual costs will be determined at the time of the transactions and may change the funding needed to implement the required Mitigation Activities. Regardless of the estimates, the Project proponent is responsible for providing adequate funding to implement the required Mitigation Activities.

H. Deposit Document Prepared & Submitted by and Date:

- The REAT Agency staff who takes the lead in preparing the Deposit Document shall identify his/her name, contact information, and Agency, and date. This information is helpful for NFWF staff if there are questions about the Deposit Document.

I. Prior Deposit Documents:

- Check the box if a prior deposit document was submitted for the project. If the box is checked, identify the phase of the project and the total dollar figure of the deposit for which the prior deposit document was submitted. There is space to identify up to five (5) prior deposit documents.

J. Specific Sub-Account Information

1. Land Acquisition Sub-Account:

- A Land Acquisition Sub-Account is for land acquisitions for compensatory mitigation.
- The amount of money to be deposited for the Land Acquisition Sub-Account can be found in the “Total – Land Acquisition” line-item on the applicable REAT Cost Table. This amount includes the estimated cost of all land acquisition measures (which may involve multiple habitat types), the NFWF Annual Management Fee, the NFWF Deposit Fee for the Land Acquisition Sub-Account establishment). The applicable REAT Agencies may also indicate an RFP fee when they anticipate the need for an RFP associated with a Mitigation Activity.
- All NFWF fees for the Land Acquisition Sub-Account are calculated per sub-account, not per habitat type.
- NFWF’s prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.
- In the “**Monies Required for Deposit into Sub-Accounts**” section of the Deposit Document:
 - In the space provided for the Land Acquisition Deposit line-item, specify the amount of money to be deposited into the Land Acquisition Sub-Account for the land acquisition, including the NFWF Annual Management Fee.
 - In the space provided for the RFP Fee line-item, if the applicable REAT Agencies indicate the need for an RFP associated with the land acquisition and the depositor is

including the RFP Fee in its deposit, specify the amount of money to be deposited into the Land Acquisition Sub-Account for the anticipated RFP.

- In the space provided for the NFWF Deposit Fee line-item, specify the amount of money to be deposited into the Land Acquisition Sub-Account for the NFWF Deposit Fee to establish the sub-account.

2. Initial Enhancement Sub-Account:

- a. An Initial Enhancement Sub-Account is for initial actions to enhance the habitat on the acquired compensatory mitigation lands.
- b. The amount of money to be deposited for the Initial Enhancement Sub-Account can be found in the “Total – Initial Enhancement” line-item on the applicable REAT Cost Table. This amount includes the estimated cost of initial enhancement measures, the NFWF Annual Management Fee, and the NFWF Deposit Fee for the Initial Enhancement Sub-Account establishment.
- c. All NFWF fees for the Initial Enhancement Sub-Account are calculated per sub-account.
- d. NFWF’s prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.
- e. In the “**Monies Required for Deposit into Sub-Accounts**” section of the Deposit Document:
 - In the space provided for the Initial Enhancement Deposit line-item, specify the amount of money to be deposited into the Initial Enhancement Sub-Account for initial enhancement activities, including the NFWF Annual Management Fee.
 - In the space provided for the NFWF Deposit Fee line-item, specify the amount of money to be deposited into the Initial Enhancement Sub-Account for the NFWF Deposit Fee to establish the sub-account.

3. Restoration & Habitat Management Sub-Account:

- a. A Restoration & Habitat Management Sub-Account is for actions to mitigate impacts by restoring and/or managing habitats on existing public or private lands, or on acquired compensatory mitigation lands.
- b. The amount of money to be deposited for the Restoration & Habitat Management Sub-Account can be found in the “Total – Restoration & Habitat Management” line-item on the applicable REAT Cost Table. This amount includes the estimated cost of restoration and habitat management measures, the NFWF Annual Management Fee, and the NFWF Deposit Fee for the Restoration & Habitat Management Sub-Account establishment.
- c. All NFWF fees for the Restoration & Habitat Management Sub-Account are calculated per sub-account.
- d. NFWF’s prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.
- e. In the “**Monies Required for Deposit into Sub-Accounts**” section of the Deposit Document:
 - In the space provided for the Restoration & Habitat Management Deposit line-item, specify the amount of money to be deposited into the Restoration & Habitat Management Sub-Account for restoration and habitat management activities, including the NFWF Annual Management Fee.
 - In the space provided for the NFWF Deposit Fee line-item, specify the amount of money to be deposited into the Restoration & Habitat Management Sub-Account for the NFWF Deposit Fee to establish the sub-account.

4. Initial & Capital Management & Maintenance Sub-Account:

- a. An Initial & Capital Management & Maintenance Sub-Account is for actions required to manage and maintain lands acquired for compensatory mitigation in the first three years or other initial period of management and maintenance.
- b. The amount of money to be deposited for the Initial & Capital Management & Maintenance Sub-Account can be found in the “Total – Initial & Capital Management & Maintenance” line-item on the applicable REAT Cost Table. This amount includes the estimated cost of initial and capital management and maintenance measures, the NFWF Annual Management Fee, and the NFWF Deposit Fee for the Initial & Capital Management & Maintenance Sub-Account establishment.
- c. All NFWF fees for the Initial & Capital Management & Maintenance Sub-Account are calculated per sub-account.
- d. NFWF’s prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.
- e. In the “**Monies Required for Deposit into Sub-Accounts**” section of the Deposit Document:
 - o In the space provided for the Initial & Capital Management & Maintenance Deposit line-item, specify the amount of money to be deposited into the Initial & Capital Management & Maintenance Sub-Account for initial and capital management and maintenance activities, including the NFWF Annual Management Fee.
 - o In the space provided for the NFWF Deposit Fee line-item, specify the amount of money to be deposited into the Initial & Capital Management & Maintenance Sub-Account for the NFWF Deposit Fee to establish the sub-account.

5. Long-Term Management & Maintenance Sub-Account:

- a. A Long-Term Management & Maintenance Sub-Account is for actions required for the long-term management and maintenance of lands acquired for compensatory mitigation following the initial period of management and maintenance.
- b. If the project is at the initial stage where the developer is securing the performance of the requirement to set aside funds for the long-term management and maintenance of compensatory mitigation lands that have yet to be acquired, then the dollar figure in the “Total – Long-Term Management & Maintenance” line-item on the applicable REAT Cost Table represents the amount of the security for performance to be deposited or placed with the applicable REAT Agencies. This amount is an estimate based on a formula specified by the REAT Agencies.
 - i. The space provided for the Long-Term Management & Maintenance line-item on the Deposit Document should be left blank because the security for performance is not deposited with NFWF.
- f. If the project is at the phase where the compensatory mitigation lands have been approved by the applicable REAT Agencies for acquisition or CE protection, and 1) the amount of money required to be set aside for the long-term management and maintenance of the mitigation lands has been calculated and approved by the applicable REAT Agencies in accordance with a Property Record Analysis (PAR) or other property analysis methodology; and 2) NFWF is to be the holder of the Long-Term Management & Maintenance funds, then in the “**Monies Required for Deposit into Sub-Accounts**” section of the Deposit Document:

- ii. In the space provided for the Long-Term Management & Maintenance Deposit line-item, specify the amount of money to be deposited into the Long-Term Management & Maintenance Sub-Account for the long-term management and maintenance of the compensatory mitigation lands. This should be the amount identified in the PAR or other property analysis methodology for long-term management and maintenance activities (which incorporates into its calculation the NFWF Annual Management Fee).
- iii. In the space provided for the NFWF Deposit Fee line-item, specify the amount of money to be deposited into the Long-Term Management & Maintenance Sub-Account for the NFWF Deposit Fee to establish the sub-account.
- c. All NFWF fees for the Long-Term Management & Maintenance Sub-Account are calculated per sub-account.
- d. The REAT's prevailing Investment Policy Statement for Mitigation Endowment Accounts Held by the National Fish and Wildlife Foundation (As of July 2018) governs the investment of funds in this sub-account.
- e. Other special provisions as set forth below on pages 16-17 apply to this sub-account.

6. Raven Management Sub-Account:

- a. The Raven Management Sub-Account is a single comingled sub-account for actions to manage ravens in order to minimize and mitigate impacts to desert tortoise, as identified by the Raven Management Work Group and approved by the REAT Agency Managers following the elements outlined in Mitigation for Common Raven Predation on the Desert Tortoise (http://dmg.gov/documents/20101130_RPT_Common_Raven_Predation_on_DT_USFW_S.pdf) and analyzed in the Environmental Assessment to Implement a Desert Tortoise Recovery Plan Task: Reduce Common Raven Predation on the Desert Tortoise (USFWS et. al 2008).
- b. The amount of money to be deposited into the Raven Management Sub-Account is the estimated cost of raven management measures, as determined by the applicable REAT Agencies, including the NFWF Annual Management Fee, and, if applicable, the NFWF Deposit Fee for the Raven Management Sub-Account establishment.
- c. NFWF's prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.
- d. In the **"Monies Required for Deposit into Sub-Accounts"** section of the Deposit Document:
 - o In the space provided for the Raven Management Deposit line-item, specify the amount of money to be deposited into the Raven Management Sub-Account for raven management activities, including the NFWF Annual Management Fee.

7. Bald & Golden Eagle Sub-Account:

- a. The Bald & Golden Eagle Sub-Account is a single, comingled sub-account actions to conserve bald and golden eagles and minimize impacts from development.
- b. The amount of money to be deposited into the Bald & Golden Eagle Account is the estimated cost of bald and golden eagle Mitigation Activities, as determined by the applicable REAT Agencies, including the NFWF Annual Management Fee, and if applicable, the NFWF Deposit Fee for Bald & Golden Eagle Sub-Account establishment.
- c. NFWF's prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.

- d. In the **“Monies Required for Deposit into Sub-Accounts”** section of the Deposit Document:
 - o In the space provided for the Bald & Golden Eagle Deposit line-item, specify the amount of money to be deposited into the Bald & Golden Eagle Sub-Account for bald and golden eagle activities, including the NFWF Annual Management Fee.

8. Condor Sub-Account:

- a. The Condor Sub-Account is a single, comingled sub-account for actions to conserve and manage condors.
- b. The amount of money to be deposited into the Condor Sub-Account is the estimated cost of Condor Activities, as determined by the applicable REAT Agencies, including the NFWF Annual Management Fee, and if applicable, the NFWF Deposit Fee for the Condor Sub-Account establishment.
- c. NFWF’s prevailing Investment Policy Statement Governing Cash Management governs the investment of funds in this sub-account.
- d. In the **“Monies Required for Deposit into Sub-Accounts”** section of the Deposit Document:
 - o In the space provided for the Condor Deposit line-item, specify the amount of money to be deposited into the Condor Sub-Account for condor activities, including the NFWF Annual Management Fee.
 - o As to the initial deposit, in the space provided for the NFWF Deposit Fee line-item on the Deposit Document, specify the amount of money to be deposited into the Condor Sub-Account for the NFWF Deposit Fee to establish the sub-account.

9. Mitigation Effectiveness Monitoring Sub-Account:

- a. The Mitigation Effectiveness Monitoring Sub-Account is for identified mitigation effectiveness monitoring, as specified by the applicable REAT Agencies.
- b. The amount of money to be deposited into the Mitigation Effectiveness Monitoring Sub-Account is the estimated cost of Mitigation Effectiveness Monitoring Activities, as determined by the applicable REAT Agencies, including the NFWF Annual Management Fee, and if applicable, the NFWF Deposit Fee for the Mitigation Effectiveness Monitoring Sub-Account establishment.
- c. All NFWF fees for the Mitigation Effectiveness Monitoring Sub-Account are calculated per sub-account. The NFWF Annual Management Fee for this sub-account is to be determined on a sub-account specific basis and set forth in Section 9 of Sub-Account and Required Mitigation Activities of the Deposit Document.
- d. The applicable prevailing NFWF Investment Policy Statement to govern the investment of funds in this sub-account is to be determined on a sub-account specific basis and set forth in Section 9 of Sub-Account and Required Mitigation Activities of the Deposit Document.
- e. In the **“Monies Required for Deposit into Sub-Accounts”** section of the Deposit Document:
 - o In the space provided for the Mitigation Effectiveness Monitoring Deposit line-item, specify the amount of money to be deposited into the Initial Enhancement Sub-Account for mitigation effectiveness monitoring activities, including the NFWF Annual Management Fee.

- In the space provided for the NFWF Deposit Fee line-item, specify the amount of money to be deposited into the Mitigation Effectiveness Monitoring Sub-Account for the NFWF Deposit Fee to establish the sub-account.

K. Sub-Account and Required Mitigation Activities² Details:

- The following are the Mitigation Activities by Sub-Account:
 1. **Land Acquisition:** These are land acquisitions for compensatory mitigation.
 2. **Initial Enhancement:** These are initial actions to enhance the habitat on the acquired compensatory mitigation lands.
 3. **Restoration & Habitat Management:** These are actions to mitigate impacts by restoring and/or managing habitats on existing public or private lands, or on acquired compensatory mitigation lands.
 4. **Initial & Capital Management & Maintenance:** These are actions required to manage and maintain lands acquired for compensatory mitigation in the first three years or other initial period of management and maintenance.
 5. **Long-term Management & Maintenance:** These are actions required for the long-term management and maintenance of lands acquired for compensatory mitigation following the initial period of management and maintenance.
 6. **Raven Management:** These are actions to manage ravens in order to minimize and mitigate impacts to desert tortoise, as identified by the Raven Management Work Group and approved by the REAT Agency Managers following the elements outlined in Mitigation for Common Raven Predation on the Desert Tortoise (http://dmg.gov/documents/20101130_RPT_Common_Raven_Predation_on_DT_USFW_S.pdf) and analyzed in the Environmental Assessment to Implement a Desert Tortoise Recovery Plan Task: Reduce Common Raven Predation on the Desert Tortoise (USFWS et. al 2008).
 7. **Bald & Golden Eagle:** These are actions to conserve bald and golden eagles and minimize impacts from development.
 8. **Condor:** These are actions to conserve and manage condors.
 9. **Mitigation Effectiveness Monitoring:** These are actions for identified mitigation effectiveness monitoring, as specified by the applicable REAT Agencies.
- Make a list of the required Mitigation Activities to be funded with monies deposited into the applicable Sub-Account.
- For each Mitigation Activity, please provide the specific information in subsections a-d, as follows:
 - Subsection a.: Description of the Mitigation Activity
 - Subsection b.: Citation(s) to the applicable Decision Document(s) requiring the Mitigation Activity, such as the page, section, and condition number. Please provide copies of the Decision Document(s) to NFWF at the time of submission of the Deposit Document.
 - Subsection c: Determination of the start date, performance period, and due date and determination method for satisfaction of Mitigation Activity
 - Subsection d.: Identification of the applicable REAT Agency(ies) with authority over implementation of the Mitigation Activity, the name of the agency contact

² See Footnote 1 for the definition of the term "Mitigation Activities."

- person/representative for the sub-account, and the contact information for the such person, including phone number and email address.
- For DFW, indicate which Mitigation Activity, if any, are to be paid for using deposited SB 34 funds, the use of which is limited to mitigation.

SPECIAL PROVISIONS FOR LONG-TERM MANAGEMENT & MAINTENANCE SUB-ACCOUNTS

The REAT Agencies and NFWF have agreed to the following provisions and procedures for Long-Term Management & Maintenance Sub-Accounts established within the REAT Account. To the extent these provisions and procedures pertain to disbursements of monies from such sub-accounts, such provisions and procedures will be included in Recipient Agreements that NFWF signs with entities or individuals that receive monies from Long-Term Management & Maintenance Sub-Accounts (Recipients).

- A. The applicable REAT Agency(ies) are responsible for approving the Property Analysis Record, or equivalent endowment assessment methodology (in either case the “Endowment Assessment”) that calculates the amount of money necessary to provide a source of long-term or perpetual funding for the long-term management and maintenance of the applicable compensatory mitigation lands required by or incorporated as agreed to in the applicable Decision Document(s), and shall approve an associated payment schedule for disbursements from a Long-Term Management & Maintenance Sub-Account.
- B. The REAT Agencies may elect to meet with NFWF at intervals as requested by the REAT Agencies (but no more frequently than annually) to review, in consultation with NFWF’s investment advisors, the financial status of any Long-Term Management & Maintenance Sub-Accounts for the purpose of assessing whether actual investment performance to date, prevailing economic conditions, or other factors pose a material risk of depletion with respect to such Long-Term Management & Maintenance Sub-Accounts. If NFWF and the applicable REAT Agencies determine, in consultation with NFWF’s investment advisors, that there exists a material risk of depletion with respect to any Long-Term Management & Maintenance Sub-Accounts, NFWF and the applicable REAT Agencies will jointly develop one or more options that may be employed by the applicable REAT Agency(ies) to mitigate such risk. Options include, but are not necessarily limited to, a determination and directive by the applicable REAT Agency(ies) to suspend or reduce disbursements from one or more Long-Term Management & Maintenance Sub-Accounts for a period of time until the risk of depletion has receded to acceptable levels. The determination to implement any such risk mitigation options shall be made by the applicable REAT Agency(ies) acting in their sole discretion, in writing, to NFWF. To the greatest extent feasible, the applicable REAT Agency(ies) will exercise their discretion in a manner that does not adversely affect the ability to achieve the biological minimization and mitigation objectives under the applicable REAT Agency’s(ies’) respective Decision Documents. NFWF will implement risk mitigation options as directed in writing by the applicable REAT Agency(ies).
- C. To the extent authorized by applicable Decision Documents, law or regulation, the applicable REAT Agency(ies) may suspend or reduce disbursements from a Long-Term Management & Maintenance Sub-Account for reasons related to the Recipient’s performance of long-term land management and maintenance activities on the applicable compensatory mitigation lands. In the event any applicable REAT Agency exercises such authority, it will provide written notice and direction to NFWF to suspend or reduce disbursements. NFWF will suspend or reduce disbursements from a Long-Term Management & Maintenance Sub-Account as directed by the applicable REAT Agency(ies) in writing.

- D. To the extent authorized by applicable Decision Documents, law or regulation, the applicable REAT Agency(ies) may authorize or direct NFWF in writing to make disbursements from a Long-Term Management & Maintenance Sub-Account to fund a project or activity that was not accounted for in the applicable Endowment Assessment, including but not necessarily limited to activities in response to a catastrophic event, e.g., recovery after a fire. NFWF will make such disbursements, as directed by the applicable REAT Agency(ies) in writing. The applicable REAT Agency(ies) acknowledge that such disbursements may impair the viability of the applicable Long-Term Management & Maintenance Sub-Account as a source of perpetual funding for long-term management and maintenance activities for the applicable compensatory mitigation lands.
- E. NFWF shall not be liable in any respect to the REAT Agencies or any Recipient, or to any other person or entity, for:
1. any errors, omissions, inaccuracies, or other elements of any Endowment Assessment approved by the applicable REAT Agency(ies) for compensatory mitigation lands required by or incorporated into a Decision Document;
 2. any decision, direction, or instruction by the applicable REAT Agency(ies) that suspends or reduces disbursements of funding from any Long-Term Management & Maintenance Sub-Account; or
 3. any decision, direction, or instruction by the applicable REAT Agency(ies) that directly or indirectly impairs the viability of any Long-Term Management & Maintenance Sub-Account as a source of perpetual funding for the long-term management and maintenance activities for the applicable compensatory mitigation lands.

SUBMITTING THE DEPOSIT DOCUMENT AND FUNDS FOR DEPOSIT

The Deposit Document may be submitted to NFWF by a REAT Agency separately from, but concurrent with, the Project Proponent's payment of funds for deposit, or the Deposit Document may be submitted to NFWF by the Project Proponent together with the payment of funds for deposit. The funds for deposit may be paid by check or wire:

All deposits must include a notation identifying the name of the project for which the deposit is being made.

Deposits by check shall be sent to:

National Fish and Wildlife Foundation
1133 15th Street, NW, Suite 1000
Washington, D.C. 20005
Attn: Chief Financial Officer

Deposits by wire shall be sent to:

For depositors desiring to send funds to NFWF via electronic funds transfer, the deposit will be made in accordance with wire instructions provided by NFWF in writing at the time of deposit.

[Financial institution letterhead]

IRREVOCABLE STANDBY LETTER OF CREDIT
NO. **[number issued by financial institution]**

Issue Date: **[date]**

Beneficiary:

California Department of Fish and Wildlife
Habitat Conservation Planning Branch
960 Riverside Parkway, Suite 90
West Sacramento, CA 95605
Attn: HCPB Mitigation Funds

Amount: U.S. \$**[dollar number]** **[(dollar amount)]**

Expiry: **[Date]** at our counters

Dear Sirs:

1. At the request and on the instruction of our customer, **[name of applicant]** ("Applicant"), we, **[name of financial institution]** ("Issuer"), hereby establish in favor of the beneficiary, the California Department of Fish and Wildlife ("CDFW"), this irrevocable standby letter of credit ("Credit") in the principal sum of U.S. \$**[dollar number]** **[(dollar amount)]** ("Principal Sum").
2. We are informed this Credit is and has been established for the benefit of CDFW pursuant to the terms of the incidental take permit for the **[name of project]** issued by CDFW to the Applicant on **[date]** (No. **[number]**) ("Permit").
3. We are further informed that pursuant to the Permit, the Applicant has agreed to complete certain mitigation requirements in the Permit ("Mitigation Requirements").
4. We are finally informed that this Credit is intended by CDFW and the Applicant to serve as a security device for the performance by the Applicant of the Mitigation Requirements.
5. CDFW shall be entitled to draw upon this Credit only by presentation of a duly executed Certificate for Drawing ("Certificate") in the same form as Attachment A,

which is attached hereto, at our office located at [***name and address of financial institution***].

6. The Certificate shall be completed and signed by an Authorized Representative of CDFW as defined in paragraph 12 below. Presentation by CDFW of a completed Certificate may be made in person or by registered mail, return receipt requested, or by overnight courier.
7. Upon presentation of a duly executed Certificate as above provided, payment shall be made to CDFW, or to the account of CDFW, in immediately available funds, as CDFW shall specify.
8. If a demand for payment does not conform to the terms and conditions of this Credit, we shall give CDFW prompt notice that the demand for payment was not effected in accordance with the terms and conditions of this Credit, state the reasons therefore, and await further instruction.
9. Upon being notified that the demand for payment was not effected in conformity with the Credit, CDFW may correct any such non-conforming demand for payment under the terms and conditions stated herein.
10. All drawings under this Credit shall be paid with our funds. Each drawing honored by us hereunder shall reduce, *pro tanto*, the Principal Sum. By paying to CDFW an amount demanded in accordance herewith, we make no representations as to the correctness of the amount demanded.
11. This Credit will be cancelled upon receipt by us of Certificate of Cancellation, which: (i) shall be in the form of Attachment B, which is attached hereto, and (ii) shall be completed and signed by an Authorized Representative of CDFW, as defined in paragraph 12 below.
12. An Authorized Representative shall mean the Director of CDFW; the General Counsel of CDFW; a Regional Manager of CDFW; or the Branch Manager of CDFW's Habitat Conservation Planning Branch.
13. This Credit shall be automatically extended without amendment for additional periods of one year from the present or any future expiration date hereof, unless at least sixty (60) days prior to any such date, we notify CDFW in writing by registered mail, return receipt requested, or by overnight courier that we elect not to consider this Credit extended for any such period.
14. Communications with respect to this Credit shall be in writing and addressed to us at [***name and address of financial institution***], specifically referring upon such writing to this credit by number. The address for notices with respect to this Credit shall be: (i) for CDFW: Department of Fish and Wildlife, Habitat Conservation Planning Branch, 960 Riverside Parkway, Suite 90, West

Sacramento, CA 95605, Attn: HCPB Mitigation Funds; and (ii) for the Applicant:
[name and address of applicant].

15. This Credit may not be transferred.
16. This Credit is subject to the International Standby Practices 1998 ("ISP 98"). As to matters not covered by the ISP 98 and to the extent not inconsistent with the ISP 98, this credit shall be governed by and construed in accordance with the laws of the State of California.
17. This Credit shall, if not canceled, expire on **[expiration date]**, or any extended expiration date.
18. We hereby agree with CDFW that documents presented in compliance with the terms of this Credit will be duly honored upon presentation, as specified herein.
19. This Credit sets forth in full the terms of our undertaking. Such undertaking shall not in any way be modified, amended or amplified by reference to any document or instrument referred to herein or in which this Credit is referred to or to which this Credit relates and any such reference shall not be deemed to incorporate herein by reference any document or instrument.

[**Name and address of financial institution**]

Re: Irrevocable Standby Letter of Credit No. [**number issued by financial institution**]

The undersigned, a duly Authorized Representative of the California Department of Fish and Wildlife ("CDFW"), as defined in paragraph 12 in the above-referenced standby letter of credit ("Credit"), hereby certifies to the Issuer that:

1. [**Insert one of the following statements:** "In the opinion of CDFW, the Applicant has failed to complete the Mitigation Requirements referenced in paragraph 3 of the Credit." **or** "As set forth in paragraph 13, the Issuer has informed CDFW that the Credit will not be extended and the Applicant has not provided CDFW with an equivalent security approved by CDFW to replace the Credit."]
2. The undersigned is authorized under the terms of the Credit to present this Certificate as the sole means of demanding payment on the Credit.
3. CDFW is therefore making a drawing under the Credit in amount of U.S. \$_____.
4. The amount demanded does not exceed the Principal Sum of the Credit.

Therefore, CDFW has executed and delivered this Certificate as of this ____ day of [**month**], [**year**].

CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE

[**Insert one of the following:** "Director" **or** "General Counsel" **or** "Regional Manager, [**Name of Regional Office**]" **or** "Branch Manager, Habitat Conservation Planning Branch"]

ATTACHMENT B

CERTIFICATE FOR CANCELLATION

[**Name and address of financial institution**]

Re: Irrevocable Standby Letter of Credit No. [**number issued by financial institution**]

The undersigned, a duly Authorized Representative of the California Department of Fish and Wildlife ("CDFW"), as defined in the paragraph 12 in the above-referenced Irrevocable Standby Letter of Credit ("Credit"), hereby certifies to the Issuer that:

1. [**Insert one of the following statements:** "The Applicant has presented documentary evidence of full compliance with the Mitigation Requirements referenced in paragraph 3 of the Credit." **or** "The Applicant has provided CDFW with an equivalent security approved by CDFW to replace the Credit."]
2. CDFW therefore requests the cancellation of the Credit.

Therefore, CDFW has executed and delivered this Certificate for Cancellation as of this ____ day of [**month**], [**year**].

CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE

[**Insert one of the following:** "Director" **or** "General Counsel" **or** "Regional Manager, [**Name of Regional Office**]" **or** "Branch Manager, Habitat Conservation Planning Branch"]

Attachment 7

Amendment No. 1 with Track Changes

For Amended Incidental Take Permit No. 2081-2024-028-06
Easley Renewable Energy Project

1. The Authority Section has been amended as follows:

This Amended California Endangered Species Act (CESA) incidental take permit (ITP) is issued by the California Department of Fish and Wildlife (CDFW) pursuant to Fish and Game Code section 2081, subdivisions (b) and (c), and California Code of Regulations, Title 14, section 783.0 et seq. CESA prohibits the take¹ of any species of wildlife designated by the California Fish and Game Commission as an endangered, threatened, or candidate species.² However, CDFW may authorize the take of any such species by permit pursuant to the conditions set forth in Fish and Game Code section 2081, subdivisions (b) and (c). (See Cal. Code Regs., tit. 14, § 783.4.)

Permittee:	IP Easley, LLC
	IP Easley II, LLC
	IP Easley III, LLC
Principal Officer:	Simon Ross, Chief Commercial Officer
Contact Person:	Camille Wasinger, (303-909-6396) 260-2192
Mailing Address:	Intersect Power (Easley Renewable Energy Project) c/o IP Easley, LLC, IP Easley II, LLC, and IP Easley III, LLC 9450 SW Gemini Drive, PMB#68743 Beaverton, OR 97008-0130

2. The Amended ITP Background section has been inserted preceding the Effective Date and Expiration section and describes Amendment No. 1 as follows:

On June 5, 2024, IP Easley, LLC; IP Easley II, LLC, and IP Easley III, LLC (Permittee) submitted a CESA ITP application to CDFW pursuant to Fish and Game Code section 2081, subdivisions (b) and (c), and California Code of Regulations title 14, section 783.0 et seq. The Permittee sought take coverage authorization for CESA listed species associated with project-related impacts from the Easley Renewable Energy Project (Project) in Riverside County.

On November 22, 2024, CDFW issued ITP No. 2081-2024-028-06 to the Permittee authorizing take of Agassiz's desert tortoise (*Gopherus agassizii*) (Covered Species) associated with and incidental to the Project. The Project as described in the ITP as originally issued by CDFW includes the construction and operations and maintenance of a photovoltaic (PV) solar facility, battery energy storage system (BESS), and associated infrastructure to generate up to 390 megawatts (MW) of renewable electricity within an approximately 3,735-acre site. In issuing the original ITP, CDFW found, among other things,

¹Pursuant to Fish and Game Code section 86, "'take' means hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill." (See also *Environmental Protection Information Center v. California Department of Forestry and Fire Protection* (2008) 44 Cal.4th 459, 507 [for purposes of incidental take permitting under Fish and Game Code section 2081, subdivision (b), "'take' ... means to catch, capture or kill".])

²The definition of an endangered, threatened, and candidate species for purposes of CESA are found in Fish and Game Code sections 2062, 2067, and 2068, respectively.

that the Permittee's compliance with the Conditions of Approval of the ITP would not jeopardize the continued existence of the Covered Species.

On October 25, 2024, western burrowing owl (*Athene cunicularia hypugaea*) (BUOW) became a candidate species under CESA. On January 22, 2025, CDFW initiated this major amendment to the original ITP to include BUOW as a Covered Species.

CDFW finds that this Amendment is a Major Amendment, as defined in California Code of Regulations, title 14, section 783.6, subdivision (c)(5).

Issuance of this Amendment will increase the number of species covered for take compared to the Project as originally approved; however, by implementing additional BUOW-specific take minimization measures it is not expected that this Amendment will increase Project impacts on these species (i.e., "impacts of the taking" as used in Fish and Game Code section 2081, subdivision (b)(2)).

Issuance of this Amendment does not affect CDFW's previous determination that issuance of the ITP meets and is otherwise consistent with the permitting criteria set forth in Fish and Game Code section 2081, subdivisions (b) and (c).

CDFW now amends and reissues this ITP including the revised provisions in this first Major Amendment (collectively, the Amended ITP). The Amended ITP includes all of the operative provisions as of the effective date of this Amended ITP. Attachment 7 to this Amended ITP shows the specific red-line changes made to the ITP as a result of this Major Amendment.

2.3. The Effective Date and Expiration Date of this ITP section has been amended as follows:

~~This ITP is~~The original ITP's effective as of ~~date was~~ November 22, 2024. This remains the date effective date for the original take authorization. The Amended ITP shall become effective when signed by CDFW ~~below~~. Unless renewed by CDFW, this ITP and its authorization to take the Covered Species shall expire on **November 18, 2059**.

3.4. Covered Species Subject to Take Authorization Provided by this ITP has been amended as follows:

This ITP covers the following species:

<u>Name</u>	<u>CESA Status³</u>
1. Mojave desert tortoise (<i>Gopherus agassizii</i>)	Threatened ^{4a}

³ Under CESA, a species may be on the list of endangered species, the list of threatened species, or ~~the list of~~may be a candidate for listing as an endangered or threatened species.

^{4a}See Cal. Code Regs. tit. 14 § 670.5, subd. (b)(4)(A).

^{4b}See 2020 Cal. Reg. Notice Register, No. 41-Z, pp. 1349 (October 9, 2020))).

Candidate^{4b}Candidate^{5b}2. ~~This~~Western burrowing owl (*Athene cunicularia hypugaea*) Candidate⁵

These species and only ~~this~~these species ~~is~~are the “Covered Species” for the purposes of this ITP.

4.5. Impacts of the Taking on Covered Species has been amended as follows:

The Project is expected to cause the permanent loss of 1,~~475.3~~239.4 acres of habitat for the ~~Covered Species~~desert tortoise and 1,051 acres of habitat for burrowing owl. Impacts of the authorized taking also include adverse impacts to the Covered Species related to temporal losses, increased habitat fragmentation and edge effects, and the Project’s incremental contribution to cumulative impacts (indirect impacts). These impacts include stress resulting from noise and vibrations displacement from preferred habitat, increased competition for food and space, and increased vulnerability to predation.

5.6. Condition of Approval 6 General Provisions has been amended as follows:

5.36.3 Authorized Biologist ~~for Desert Tortoise (DT Authorized Biologist)~~. Permittee shall designate an Authorized Biologist(s) knowledgeable in the biology and natural history of ~~the Covered Species~~desert tortoise. The Authorized Biologist(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate and avoid the incidental take of individual ~~Covered Species~~desert tortoise and to minimize disturbance of ~~Covered Species’~~desert tortoise habitat. Additionally, the Authorized Biologist(s) shall have experience with all activities that will be carried out for the Project including, but not limited to, excavating burrows, handling and temporarily holding ~~the Covered Species~~desert tortoise, relocating/translocating the ~~Covered Species~~desert tortoise, reconstructing ~~Covered Species~~ burrows, unearthing and relocating ~~Covered Species~~ eggs, locating, identifying, and recording all forms of ~~Covered Species~~desert tortoise signs, collecting ~~Covered Species~~ blood samples, conducting ~~Covered Species~~ health assessments, conducting ~~Covered Species~~ protocol level surveys, and/or attaching and removing transmitters to and from the ~~Covered Species~~desert tortoise.

6.3.1 Authorized Biologist for Burrowing Owl (BUOW Authorized Biologist). Permittee shall designate an Authorized Biologist(s) knowledgeable in the biology and natural history of burrowing owl. The BUOW Authorized Biologist shall be responsible for monitoring Covered Activities to help minimize and fully mitigate the incidental take of individual burrowing owl and to minimize disturbance of burrowing owl habitat. Additionally, the Authorized Biologist shall have experience with all activities that will be carried out for

⁵ The species’ status may change following the decision of the Fish and Game Commission to designate the species as threatened or endangered but if there is such a designation, the species will remain a covered species. See 2024 Ca. Reg. Notice Register, No. 43-Z, p. 1400 (October 25, 2024).

the Project including, but not limited to conducting passive exclusion activities, establishing no-disturbance buffers, excavating burrows, and monitoring blocked burrows.

5.46.4 **Biologist and Veterinarian Approvals.** Permittee shall obtain CDFW approval of the DT Authorized Biologist(s), BUOW Authorized Biologist(s), Biological Monitor(s), and if needed veterinarian(s), in writing before starting Covered Activities, and shall also obtain advance written approval if any of these entities are changed. For approval, the Designated Representative shall submit Attachment 2 and 2A of this ITP and an Excel spreadsheet listing in alphabetical order the names of the proposed Authorized Biologist(s), Biological Monitor(s), and veterinarian(s) to CDFW a minimum of 21 calendar days before starting Covered Activities or before any changes are made to these personnel. For each proposed Authorized Biologist(s) and Biological Monitor(s), the Excel spreadsheet shall include the activities outlined in this ITP and associated Desert Tortoise Translocation Plan (DTTP) and Burrowing Owl Mortality Reduction Plan that the Permittee is requesting approval for that individual to carry out.

5.56.5 **Authorized Biologist and Biological Monitor Authority.** To ensure compliance with the Conditions of Approval of this ITP, the Authorized Biologist(s) and/or Biological Monitor (collectively, Biologists) shall immediately stop any activity that does not comply with this ITP and/or order any reasonable measure to avoid the unauthorized take of an individual of the Covered Species. Permittee shall provide unfettered access to the Project Site and otherwise facilitate the ~~Authorized Biologist(s) and/or Biological Monitor(s)~~ in the performance of his/her duties. If the ~~Authorized Biologist(s) and/or Biological Monitor(s)~~ is unable to comply with the ITP, then the ~~Authorized Biologist(s) and/or Biological Monitor(s)~~ shall notify the CDFW Representative immediately. Permittee shall not enter into any agreement or contract of any kind, including but not limited to non-disclosure agreements and confidentiality agreements, with its contractors and/or the ~~Authorized Biologist(s) and/or Biological Monitor~~ Biologists(s) that prohibit or impede open communication with CDFW, including but not limited to providing CDFW staff with the results of any surveys, reports, or studies or notifying CDFW of any non-compliance or take. Failure to notify CDFW of any non-compliance or take or injury of a Covered Species as a result of such agreement or contract may result in CDFW taking actions to prevent or remedy a violation of this ITP.

5.66.6 **Education Program.** Permittee shall conduct an education program for all persons employed or otherwise working in the Project Area before performing any work. The program shall consist of a presentation from ~~the Authorized~~ an approved Biologist that includes a discussion of the biology and general behavior of the Covered Species, information about the distribution and habitat needs of the Covered Species, sensitivity of the Covered Species to human activities, its status pursuant to CESA including legal protection, recovery efforts, penalties for violations and Project-specific protective measures described in this ITP. Permittee shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry in the Project Area.

6.7. Take Minimization Measures have been amended as follows:

8.5 Pre-Construction Clearance Surveys- for Desert Tortoise. No later than 30 days prior to start of Covered Activities, the DT Authorized Biologist(s) and/or Biological Monitor(s) approved under this ITP shall conduct pre-construction clearance surveys for ~~Covered Species~~desert tortoise, using the methods described in the most recent United States Fish and Wildlife Service (USFWS) Desert Tortoise (Mojave Population) Field Manual (hereinafter referred to as USFWS Field Manual). In addition to the guidance provided in the USFWS Field Manual, CDFW provides the following requirement(s):

8.5.1 Pre-construction clearance surveys shall be completed using perpendicular survey routes within the Project Area. Pre-construction clearance surveys cannot be combined with other clearance surveys conducted for other species while using the same personnel. Covered Activities cannot start until two (2) negative results from consecutive surveys using perpendicular survey routes for ~~the Covered Species~~desert tortoise are documented.

8.5.2 These surveys shall cover 100 percent of the Project Area and a 50-foot buffer zone around the Project site. The Biological Monitor(s) and/or DT Authorized Biologist(s) shall record all potential ~~Covered Species~~desert tortoise and burrows within the pre-construction clearance survey area, using global positioning system (GPS) technology. The DT Authorized Biologist(s) and/or Biological Monitor(s) shall provide the results of the pre-construction clearance survey (including all information of the USFWS Protocol data sheet) to CDFW within 10 Calendar days of completing the surveys. The use of specialized equipment (e.g., fiber optics) may be necessary to thoroughly inspect all burrows in preparation for collapsing them.

8.5.3 Twenty-four hours prior to the start of any Covered Activities, except for areas already cleared within installation of desert tortoise exclusion fencing, the DT Authorized Biologist(s) and/or Biological Monitor shall conduct a final clearance survey of Project Area. The use of specialized equipment (e.g., fiber optics) may be necessary to thoroughly inspect all burrows in preparation for collapsing them.

8.6 Covered Species Observations. If a Covered Species is observed during Covered Activities, all work within 300 feet of the Covered Species shall immediately stop and the observation shall be immediately reported to the Authorized Biologist(s). Covered Activities shall not resume until the Authorized Biologist(s) and/or Biological Monitor(s) has verified the Covered Species has left the Project Area OR an Authorized Biologist(s) approved under Condition of Approval 6.4 of this ITP relocates the Covered Species as described in this ITP and Desert Tortoise Translocation Plan-or passively relocates as described in the BUOW Mortality Reduction Plan. The Designated Representative shall notify CDFW of any Covered

Species observations within the Project Area. Notification shall occur as described in Condition of Approval 7.3 within 24 hours. Notification and the written report shall include the date, location, and circumstances of the observation, the name of the Authorized Biologist(s) that relocated the individual, pictures, map and shapefiles with the location (including GPS coordinates) where the individual was moved as specified in the DTTP.

8.7 Excavating ~~Covered Species~~ Desert Tortoise Burrows. Only DT Authorized Biologist(s) and Biological Monitor(s) approved by CDFW are authorized to conduct burrow excavation. Excavation of burrows shall follow the methods described the USFWS Field Manual.

8.8 ~~Covered Species~~ Desert Tortoise Translocation. Regardless of the number of ~~Covered Species~~ desert tortoise estimated to be moved out of harm's way the Permittee shall prepare a Desert Tortoise Translocation Plan (DTTP) 30 Calendar days prior to start of Covered Activities and submit it according to Condition of Approval 7.3 of this ITP. Covered Activities are not authorized to start until the DTTP is approved in writing by CDFW. The DTTP shall follow the most current guidelines provided by USFWS and CDFW regarding ~~Covered Species~~ desert tortoise translocation. Where guidance differs between USFWS and CDFW, verbal and/or written direction provided by CDFW always controls.

8.9 Ambient Air Temperature. During all handling procedures, ~~Covered Species~~ desert tortoise shall be treated in a manner to ensure that they do not overheat or exhibit signs of overheating (e.g., gaping, foaming at the mouth, etc.), or are placed in a situation where they cannot maintain surface and core temperatures necessary to their well-being. ~~Covered Species~~ Tortoises shall be kept shaded at all times until it is safe to release them. For the purposes of this permit, ambient air temperature shall be measured in the shade, protected from wind, at a height of 5 centimeters above the ground surface. For all Covered Activities no ~~Covered Species~~ desert tortoise shall be captured, moved, transported, released, or purposefully caused to leave its burrow for whatever reason when the ambient air temperature is above 95° Fahrenheit (F) (35° Celsius (C)). No ~~Covered Species~~ desert tortoise shall be captured if the ambient air temperature is anticipated to exceed 95° F (35° C) before handling or processing can be completed. If the ambient air temperature exceeds 95° F (35° C) during handling or processing, ~~Covered Species~~ desert tortoises shall be kept shaded in an environment that does not exceed 95° F (35° C), and not released until ambient air temperature declines to below 95°F (35°C). ~~Covered Species~~ Desert tortoises moved during the less active season (June 1 to August 31 and November 1 to March 31) shall be monitored by the DT Authorized Biologist(s) for at least two days after placement in the new burrows to ensure their safety. During relocation, the DT Authorized Biologist(s) may hold a captured ~~Covered Species~~ desert tortoise overnight and move them the following morning within these temperature constraints.

8.10 ~~Covered Species~~ Desert Tortoise Rehydration. If a ~~Covered Species~~ desert tortoise voids its bladder as a result of being handled, the Authorized Biologist(s) shall rehydrate the animal(s). The Authorized Biologist(s) shall rehydrate the ~~Covered Species~~ desert tortoise

at the location where the animal(s) was or were captured, or the location where the animal(s) is or will be released. The Authorized Biologist(s) shall rehydrate the ~~Covered Species~~desert tortoise by placing it in a tub with a clean plastic disposable liner. The Authorized Biologist(s) shall add water to the lined tub while ensuring that the water level is not higher than the lower jaw of the ~~Covered Species~~animal. The Authorized Biologist(s) shall rehydrate each ~~Covered Species~~desert tortoise individually for a minimum of 10 to 20 minutes. The Authorized Biologist(s) shall place the lined tub in a quiet protected area during rehydration.

8.11 ~~Covered Species~~Desert Tortoise Handling Records. The DT Authorized Biologist(s) and/or Biological Monitor(s) shall maintain a record of all ~~Covered Species~~desert tortoises handled. This information shall include: (1) the locations (narrative and maps) and dates of observation, including whether the individual(s) was found above ground or in a burrow; (2) ambient temperature when handled and released; (3) general condition and health of the individual(s), including injuries, state of healing, and whether the individual(s) voided its bladders; (4) identified diagnostic markings (i.e., identification numbers or marked marginal scutes); (5) location moved from and location moved to (using GPS technology), including information on any burrow (natural or artificial) utilized; (6) whether any eggs were discovered and relocated; (7) digital photographs of any ~~Covered Species~~desert tortoise and eggs handled; and (8) results of ongoing monitoring. The Designated Representative(s) shall provide CDFW with the information listed above submitted in the quarterly reports during construction.

8.12 ~~Covered Species~~Desert Tortoise Guards. The design of ~~Covered Species~~desert tortoise guards shall include exit ramps and cleanout. Guards shall be installed along the Existing Right-of-Way fence. Guard locations and design shall be provided to CDFW and shall be approved by CDFW in writing prior to starting Covered Activities.

8.13 ~~Permanent Security Fencing with Attached Desert Tortoise Fencing.~~ The permanent desert tortoise exclusion fencing shall be attached to the 6-foot-high standard chain link security fencing. This fencing shall be installed around the array fields, operation and maintenance facilities, warehouses, substations, switchyard, and interconnection facilities and will remain in place during operations except it may be removed in places where wildlife-friendly fencing may be implemented over a portion of the facility site as described in Condition of Approval 8.23. The fence shall be constructed according to Chapter 8 of the USFWS Field Manual, but if any tortoises <100mm MCL are translocated within 500 meters of the Project site, tortoise fencing shall be 16 gauge or heavier galvanized after welded wire with mesh opening of ½ inch horizontal by ½ inch vertical (Attachment 4). The fence shall include the installation of shade structures along the outer fence perimeter placed at regular intervals. To prevent potential access at site access points, all gates would be installed with desert tortoise exclusion fencing affixed along the bottom portion of the gate structure.

8.14 Permanent Security Fence Maintenance Inspection. The DT Authorized Biologist(s) and/or Biological Monitor(s) shall inspect the ~~Covered Species~~tortoise fencing during the Covered Activities, at the end of each workday during the construction period, monthly during O&M, and during major rainfall and high wind events within 24 hours to ensure ~~Covered Species~~desert tortoise is prohibited from entering the Project Area. If the fence is compromised, repairs shall be completed immediately, and clearance protocol level surveys shall be conducted as described in Condition of Approval 8.5.

8.15 Vehicle Inspection. Workers shall inspect for ~~Covered Species~~desert tortoise under vehicles and equipment before the vehicles and equipment are moved. If a ~~Covered Species~~desert tortoise is present, the worker shall contact the DT Authorized Biologist(s) and/or Biological Monitor and wait for the ~~Covered Species~~tortoise to move unimpeded to a safe location or the DT Authorized Biologist(s) shall relocate the ~~Covered Species~~tortoise as described in Condition of Approval 8.8 before moving vehicles and equipment.

8.16 Staging Area and Parking Area. The Permittee shall enclose all staging areas and parking areas with ~~Covered Species~~desert tortoise exclusion fencing. All parked vehicles and equipment shall be inspected prior to being moved. If a ~~Covered Species~~desert tortoise is found within a staging or parking area the worker shall immediately contact the Authorized Biologist(s) and/or Biological Monitor approved in Condition of Approval 6.4 of this ITP. A biologist approved in Condition of Approval 6.4 of this ITP shall relocate the ~~Covered Species~~desert tortoise in accordance with Condition of Approval 8.8 of this ITP and the DTTP.

8.22 ~~Covered Species~~Desert Tortoise Injury. If a ~~Covered Species~~desert tortoise is injured as a result of Project-related activities, the DT Authorized Biologist shall immediately take it to a CDFW approved wildlife rehabilitation or veterinary facility. Permittee shall identify the facility before starting Covered Activities. Permittee shall bear any costs associated with the care or treatment of such injured ~~Covered Species~~desert tortoise. The Permittee shall notify CDFW of the injury ~~to the Covered Species~~ immediately by telephone and e-mail followed by a written incident report as described in Condition 7.3. Notification shall include the name of the facility where the animal was taken.

8.23 Burrowing Owl-Specific Take Minimization Measures

8.23.1 Burrowing Owl Mortality Reduction Plan. Permittee shall submit a Burrowing Owl (BUOW) Mortality Reduction Plan prepared by an approved BUOW Authorized Biologist to CDFW at least 30 days prior to beginning Covered Activities. Burrow exclusion, burrow excavation, artificial burrow construction, and other relocation activities shall not proceed until this plan has been approved in writing by CDFW. The BUOW Mortality Reduction Plan shall include, but not be limited to: detailed description of survey methodology; detailed burrow exclusion and excavation methods; methods for monitoring BUOW post-exclusion; proposed avoidance

buffers based on project activity and disturbance level; proposed Covered Activities that may occur within a reduced buffer request; identification of a wildlife rehabilitation center or veterinary facility capable of and willing to treat injured BUOW or care for at-risk BUOW, BUOW eggs, and/or BUOW chicks; and procedure for collection and storage of BUOW carcasses. The plan should also include a section describing burrow replacement according to Condition of Approval 8.23.2. Only CDFW-approved BUOW Authorized Biologists or personnel following directions from and under the supervision of the BUOW Authorized Biologist, shall handle and transport injured BUOW for treatment or impacted BUOW eggs for salvage. All other BUOW handling is prohibited.

Once the BUOW Mortality Reduction Plan is approved in writing by CDFW, it shall be used for the duration of this ITP unless updated to reflect best available science in which case CDFW will contact the Permittee to discuss needed updates. Any proposed changes to the BUOW Mortality Reduction Plan shall be submitted, in writing, to CDFW and approved in writing prior to the implementation of any proposed modifications.

8.23.2 Burrowing Owl Burrow Replacement. Permittee shall replace each known BUOW burrow (as defined in Condition of Approval 8.23.5) that cannot be avoided within the Project Area with an artificial burrow to compensate for the loss of important shelter used by BUOW for protection, reproduction, and escape from predators. The BUOW Burrow Replacement section within the BUOW Mortality Reduction Plan shall include, but not be limited to: a discussion and map of potential artificial burrow replacement locations; description of the replacement burrow design and dimensions (e.g., depth and width of burrow, width of burrow entrance, orientation of burrow entrance, number and placement of entrances to natal burrows); artificial burrow installation methods; and long-term artificial burrow protection and maintenance methods; and timing of BUOW installation/construction.

8.23.3 Burrowing Owl Pre-Construction Surveys and Reporting. The BUOW Authorized Biologist(s) shall conduct surveys to identify, flag, and map all potential, known, and/or nesting burrows (as defined in Condition of Approval 8.23.5) within 30 calendar days prior to beginning Covered Activities in each work area or phase. Surveys shall include the Project Area and 500 feet (where feasible) beyond the limits of the Project Area, unless otherwise approved in advance and in writing by CDFW. If the BUOW Authorized Biologist identifies any potential, known, or nesting BUOW burrows, the burrow(s) shall be monitored following the Conditions of Approval 8.23.6 and 8.23.7 unless avoided per Condition of Approval 8.23.5. Permittee shall provide the preconstruction survey results with a Burrow Map (see Condition of Approval 8.23.4) in a written report to CDFW's Regional Representative at least five calendar days prior to the beginning of Covered Activities. The report shall include, but not be limited to, methodology, survey

date, and apparent status of each burrow (potential, known, or nesting). If a lapse in project-related work of 14 calendar days or longer occurs in any part of the Project Area, Permittee shall contact the CDFW Regional Representative by email and may be required to conduct additional BUOW burrow surveys and Burrow Map before work may be reinitiated in that part of the Project Area.

8.23.4 Burrow Map. The BUOW Authorized Biologist shall provide a KMZ map to CDFW of all BUOW burrows found during the surveys performed per Condition of Approval 8.23.3. The map shall show details and locations of all BUOW sightings and potential, known, and nesting BUOW burrows as defined in Condition of Approval 8.23.5. The map shall include an outline of the Project Area and a title, north arrow, scale bar, and legend.

8.23.5 Burrowing Owl Burrow Avoidance. The Permittee shall establish no-disturbance buffer zones around known and nesting BUOW burrows according to the following guidelines:

- If a known BUOW burrow (a burrow that shows evidence of current or past use within the last 3 years or is known based on Project observations to have been used in the past) or an "atypical" burrow (e.g., a pipe, culvert, buckled concrete, etc.) showing signs of occupancy (e.g. BUOW presence, whitewash, pellets, prey remains, etc.) is discovered, Permittee shall establish a minimum no-disturbance buffer. A no-disturbance buffer as described in the Mortality Reduction Plan shall be established around known BUOW burrows.
- If a BUOW burrow used for nesting (e.g., known BUOW burrow with indications of the presence of eggs, chicks, dependent young, and/or brooding or egg incubation) is discovered within or immediately adjacent to the Project Area, the Permittee shall follow procedures outlined in the Mortality Reduction Plan.
- If BUOW burrows cannot be avoided as described above, then the Permittee shall follow ITP Conditions of Approval 8.23.1, 8.23.6, and 8.23.7 as appropriate. If BUOW are visibly stressed by the Covered Activities or workers in the vicinity after these no-disturbance buffers are established, all work in the vicinity shall immediately cease and increased no-disturbance buffers will be determined by the BUOW Authorized Biologist(s) based on their behavioral observations of the affected BUOW. The Authorized Biologist shall report to CDFW any buffers that were increased due to behavioral observations for evaluation and determination of buffer effectiveness.

8.23.6 Burrowing Owl Burrow Exclusion and Excavation. The BUOW Authorized Biologist, or Biological Monitor under direct supervision of the Authorized Biologist, shall excavate known or potential burrows that exhibit signs of current or past BUOW use or characteristics suggestive of BUOW burrow (including burrows in natural substrate and in/under man-made structures) that cannot be avoided per the

Condition of Approval 8.23.5 and that are within the footprint of ground-disturbing activities. Exclusion shall occur outside the breeding season unless otherwise approved by CDFW in advance in writing. Burrows to be destroyed shall be fully excavated, filled with dirt, and compacted to ensure that BUOW cannot reenter or use the burrow during the period that Covered Activities occur in the Project Area. An established BUOW burrow no-disturbance buffer may be removed once the burrow is collapsed and the BUOW(s) is/are no longer using the burrow.

- Potential BUOW burrows (any subterranean hole three inches or larger for which no evidence is present to conclude that the burrow is being used or has been used by a BUOW) without any signs of BUOW use or characteristics suggesting it is a BUOW burrow may be excavated immediately under the direct supervision of the BUOW Authorized Biologist without prior camera monitoring.
- Excavation of known BUOW burrows shall only occur after the BUOW Authorized Biologist has determined that BUOW is not currently present after 4 consecutive 24-hour periods of monitoring with infrared cameras. BUOW burrows shall be carefully excavated with hand tools, or by mechanical means if a specific methodology is approved in writing by CDFW, until it is clear no individuals of BUOW are inside. If during the excavation process evidence of current use by BUOW is discovered, then burrow excavation shall cease immediately, and camera monitoring as described above shall be conducted/resumed. CDFW will be notified immediately.
- BUOW burrows used for nesting shall not be excavated until biological and camera monitoring confirm that the chicks have fledged and are no longer dependent on the nest and then only after written concurrence from CDFW.

8.23.7 Burrowing Owl Burrow Blockage. If an unoccupied BUOW burrow can be avoided by construction and does not need to be collapsed, but is within a distance of construction to cause significant stress to the BUOW, the Permittee shall block rather than destroy the burrow. The blocked burrow will be unblocked and made available for use after construction is complete. Burrows (including burrows in natural substrate and in/under man-made structures) may be blocked only immediately after the BUOW Authorized Biologist(s) has conducted four consecutive 24-hour periods of monitoring with infrared camera and determined that BUOW is not currently present. Burrow blockage shall be done in a manner that prevents burrowing animals from digging back into the burrow. All blocked burrows shall be monitored by the BUOW Authorized Biologist or Biological Monitor at least once a week to ensure that the exclusion material is still intact. If BUOW gains access to the burrow, the Permittee shall contact CDFW immediately and obtain written guidance regarding how to proceed. All blocked burrows shall be unblocked within 48 hours of completion of Construction Covered Activities within the prescribed buffer distance.

8.23.8 Burrowing Owl Injury. If a BUOW is injured or found dead within the vicinity of the Project Area, the Permittee shall notify CDFW of the injury or mortality to CDFW immediately by e-mail as described in Condition of Approval 7.3. The BUOW Authorized Biologist shall follow the BUOW Mortality Reduction Plan to either immediately: transport injured individuals to a CDFW-approved wildlife rehabilitation center or veterinary facility; or follow approved collection and storage procedures for deceased animals. Both options shall be identified per Condition of Approval 8.23.1. Permittee shall bear any cost associated with care and recovery of any injured BUOW adults, nestling(s) or egg(s) and hacking (controlled release of captive reared young).

7.8. Condition of Approval 9 Habitat Management Land Acquisition has been amended as follows:

To meet this requirement, the Permittee shall either purchase 1,606 acres of ~~Covered Species~~desert tortoise credits and 1,838 of burrowing owl credits from a CDFW-approved mitigation or conservation bank pursuant to Condition of Approval 9.2 below OR shall provide for both the permanent protection and management of 1,606 acres of desert tortoise and 1,838 acres of Habitat Management (HM) lands pursuant to Condition of Approval 9.3 below and the calculation and deposit of the management funds pursuant to Condition of Approval 9.4 below. Mitigation credit purchase and/or HM lands acquisition may be nested such that the mitigation lands for one species may cover the mitigation requirements for the other species if it meets the selection criteria for each. Purchase of Covered Species credits OR permanent protection and funding for perpetual management of HM lands must be complete before starting Covered Activities, or within 18 months of the effective date of this ITP if Security is provided pursuant to Condition of Approval 10 below for all uncompleted obligations.

8.9. The Compliance with the California Environmental Quality Act section has been amended as follows:

None of the factors that would trigger the need for subsequent or supplemental environmental analysis of the Project under Public Resources Code section 21166 or California Code of Regulations, title 14, sections 15162 and 15163, exist as a result of this Amendment.

9.10. The Findings Pursuant to CESA section has been amended as follows:

These findings are intended to document CDFW's compliance with the specific findings requirements

set forth in CESA and related regulations. (Fish & G. Code § 2081, subs. (b)-(c); Cal. Code Regs., tit. 14, §§ 783.4, subds, (a)-(b), 783.5, subd. (c)(2).)

CDFW finds based on substantial evidence in the ITP application, IP Easley LLC's Easley Renewable Energy Project Environmental Impact Report, the results of consultations, and the administrative record of proceedings, that issuance of this ITP complies and is consistent with the criteria governing the issuance of ITPs pursuant to CESA:

- (1) Take of Covered Species as defined in this ITP will be incidental to the otherwise lawful activities covered under this ITP;
- (2) Impacts of the taking on Covered Species will be minimized and fully mitigated through the implementation of measures required by this ITP and as described in the MMRP. Measures include: (1) permanent habitat protection; (2) establishment of avoidance zones; (3) worker education; and (4) Quarterly Compliance Reports. CDFW evaluated factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will impact the habitat, and CDFW's estimate of the acreage required to provide for adequate compensation. Based on this evaluation, CDFW determined that the protection and management in perpetuity of 1,606 acres of desert tortoise and 1,838 acres of burrowing owl compensatory habitat that is contiguous with other protected Covered Species habitat and/or is of higher quality than the habitat being destroyed by the Project, along with the minimization, monitoring, reporting, and funding requirements of this ITP minimizes and fully mitigates the impacts of the taking caused by the Project;

10.11. The Attachments section has been amended as follows:

Figure 1	Map of Project
Attachment 1	Mitigation Monitoring and Reporting Program
Attachment 2	Biologist Resume Form <u>Forms</u>
Attachment 3	GIS Data Collection Requirements
Attachment 4	Exclusion Fence
Attachment 5	Raven Management Renewable Deposit Document
Attachment 6	Letter of Credit Form
<u>Attachment 7</u>	<u>Amendment No. 1 with Track Changes</u>
