3. Overview (Required) - Summarize the proposed changes to regulations:

Clarification of the regulations to authorize the use of a harpoon as a landing aid.

4. Rationale (Required) - Describe the problem and the reason for the proposed change:

Harpoons are a common landing aid for large tuna on small boats. In recent years, more and larger bluefin tuna have been caught along the California coast, bringing to the fore the lack of clarity in the regulations regarding the use of a harpoon as a landing aid.

Online discussions, questions to wardens, etc all struggle to make sense of whether it is legal to harpoon a hook-and-line caught fish at the boat as a way to control and land the fish.

Most of the discussions revolve around references to harpoons as a method of take, and extrapolate to form an opinion about whether a fish landed with a harpoon was "taken" with a harpoon. Some point out that a netted salmon or a gaffed lingcod were not "taken" with a net or a gaff. Others have a different read.

The lack of certainty creates a risk of unintentional illegal activity for fishermen, and a difficult enforcement issue for wardens. It seems it should be fairly straightforward to amend the regulations to speak specifically to the use of harpoons as a landing aid. Likewise, it doesn't seem like permitting harpoons as a landing aid should be overly controversial vs. a gaff.

14.27.90(d): update to read “gaffed or harpooned”
14.28.65(d): update to read “No gaff hook or harpoon”

Note: I’m not policymaker or lawyer, so there may be better ways to articulate this change in the regs. I simply searched for “gaff” and suggested additional language to include harpoons as a landing aid.
