California Endangered Species Act
Incidental Take Permit No. 2081-2022-018-03

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

I. Authority:

This California Endangered Species Act (CESA) Incidental Take Permit (ITP) is issued by the California Department of Fish and Wildlife (CDFW) pursuant to Fish and Game Code section 2081, subdivisions (b) and (c), and California Code of Regulations, title 14, section 783.0 et seq. CESA prohibits the take of any species of wildlife designated by the California Fish and Game Commission as an endangered, threatened, or candidate species. However, CDFW may authorize the take of any such species by permit pursuant to the conditions set forth in Fish and Game Code section 2081, subdivisions (b) and (c). (See Cal. Code Regs., tit. 14, § 783.4.)

Permittee:	City of Santa Rosa
Principal Officer:	Dan Hennessey, Director of Transportation and Public Works (707) 328-1291, dhennessey@srcity.org
Contact Person:	Kellen Johnston, (707) 543-3947, kjohnston@srcity.org
Mailing Address:	69 Stony Circle Santa Rosa, CA 95401

II. Effective Date and Expiration Date of this ITP:

This ITP is effective as of the date signed by CDFW below. Unless renewed by CDFW, this ITP and its authorization to take the Covered Species shall expire on **December 31, 2030.**

Notwithstanding the expiration date on the take authorization provided by this ITP, Permittee's obligations pursuant to this ITP do not end until CDFW accepts as complete the Permittee's Final Mitigation Report required by Condition of Approval 4.10 of this ITP.

III. Project Location:

The Robles Sewer Trunk Lining – Arlington to Sunland Project (Project) is a linear project that is approximately 0.76 miles long and located within a City of Santa Rosa-owned easement south of Scenic Avenue and north of Millbrae Avenue, and crosses Arlington Avenue and Sunland Avenue within unincorporated Sonoma County south of the City of Santa Rosa from approximate GPS coordinates 38.3748° N, 122.7479° W on the eastern end of the Project to 38.371984° N, 122.758657° W on the western side of the Project (Figures 1 and 2). The western portion of the Project also crosses Hazel Mitigation Bank. The Project site is bounded by undeveloped land and rural residences in all directions. The Project footprint is 2.55 acres and located on the following Assessor's Parcel Numbers:

- 134-243-037
- 134-243-008
- 134-243-009
- 134-243-011
- 134-243-025
- 134-242-011
- 134-242-010
- 134-241-014

The Project is within Township 6N, Range 8W, Sections 9 and 16 of the Cotati and Two Rock U.S. Geological Survey 7.5-minute quadrangle maps.

IV. Project Description:

The Project includes the rehabilitation of 3,000 linear feet of reinforced concrete pipe trunk sewer main. The existing underground 45-inch diameter sewer main pipeline is within a City of Santa Rosa-owned easement that spans the entire length of the Project. The trunk sewer main will be rehabilitated using trenchless cured-in-place pipelining technology, which consists of internally inspecting the pipeline via a closed-circuit television feed mounted on a "pig" within the pipeline, cleaning the interior of the pipe, and applying a sealant, fabric liner, and epoxy coat. The trenchless cured-in place pipeline technology will not require excavation, except for two sewer manholes that the fabric liner will be launched from and a road crossing at Arlington Avenue, with a total excavation area of 110 square feet. There will also

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

be work at six manholes not requiring excavation that includes temporary bypass pipeline suction and reinsertion, internal manhole rehabilitation, and liner termination, as outlined below. The Project does not include the construction of any new permanent above-ground surface facilities.

The Project will also include an above-ground temporary sewer bypass system for the duration of the Project. The temporary bypass pipeline will be between 12 and 18 inches in diameter and will maintain peak sewer function while the sewer main pipeline is being repaired. The temporary bypass pipeline will be connected to the sewer main via openings in one upstream and one downstream manhole. The temporary bypass pipeline will be removed after the completion of the sewer main repairs.

The following Project Activities will take place at each manhole within the Project (Figure 1):

- Manhole KK2703MH004: bypass suction location, no excavation required, 700-square-foot High Traffic Area work area required
- Manhole KK2703MH003: liner termination point and internal manhole rehabilitation, no excavation required, 225-square-foot High Traffic Area work area required
- Manhole KK2703MH002: liner launch point and internal manhole rehabilitation, 25 square feet of excavation required, work area within large central High Traffic Area
- Manhole KK2703MH001: internal manhole rehabilitation, no excavation required, work area within large central High Traffic Area
- Manhole KK2702MH001: liner launch point and internal manhole rehabilitation, 25 square feet of excavation required, work within large central High Traffic Work Area
- Manhole KK2702MH002: internal manhole rehabilitation and Arlington Avenue trenched crossing, 60 square feet of excavation required, work within large central High Traffic Work Area
- Manhole KK2702MH003: liner termination point, no excavation required, all work conducted underground
- Manhole KK2701MH001: bypass reinsertion point, no excavation required, 700-square-foot High Traffic Area work area required

The Project will be divided into two levels of construction activity: High Traffic Areas and Low Traffic Areas (Figures 1 and 2).

High Traffic Areas include the primary egress and ingress routes, staging and stockpiling locations, liner launch points, non-excavation work areas requiring more extensive vehicle and equipment access (including manhole work areas at Manhole KK2703MH004, Manhole KK2703MH003, and Manhole KK2701MH001 abutting the Low Traffic Areas), the road crossing at Arlington Avenue, and the bypass suction and reinsertion locations. The High Traffic Areas comprise 1.29 acres.

Low Traffic Areas include the western and northern portions of the Project where activity will be limited to no more than 40 one-way vehicle trips throughout the course of the Project. The primary work in these areas will include installation of the bypass pipe and liner termination points. Liner termination is done underground inside existing manholes. The bypass pipe will be propped up on wooden blocks every 50 feet within the Low Traffic Areas. In addition, plastic or wooden mats will be placed over wetland habitat within the Low Traffic Areas to avoid soil rutting and crushing vegetation from vehicle traffic. The Low Traffic Areas comprise 1.19 acres.

The Project site also includes 0.07 acres of developed land.

All Project access will be from Arlington Avenue.

V. Covered Species Subject to Take Authorization Provided by this ITP:

This ITP covers the following species:

<u>Name</u>	<u>CESA Status</u> ¹
California tiger salamander (<i>Ambystoma californiense</i> , CTS)	Threatened ²

This species and only this species is the “Covered Species” for the purposes of this ITP.

VI. Impacts of the Taking on Covered Species:

Project activities and their resulting impacts are expected to result in the incidental take of individuals of the Covered Species. The activities described above expected to result in incidental take of Covered Species include preparing the construction work areas; excavating; stockpiling of soil and materials; spoils disposal; constructing temporary access routes; preparing staging areas; operating heavy equipment; removing vegetation; vehicular movement; installing and maintaining Covered

¹ Under CESA, a species may be on the list of endangered species, the list of threatened species, or the list of candidate species.

²See Cal. Code Regs. tit. 14, § 670.5, subd. (b)(3)(G).

Species barrier fencing; capturing, handling, and relocating Covered Species; and surveying for Covered Species (Covered Activities).

Incidental take of individuals of Covered Species in the form of mortality ("kill") may occur as a result of Covered Activities such as crushing and entombing of individuals during construction; vehicular access; collapsing of burrows; and entrapment in excavated pits, trenches, or within construction materials. Incidental take of individuals of Covered Species may also occur from the Covered Activities in the form of pursue, catch, capture, or attempt to do so of Covered Species from surveying and relocating operations. The areas where authorized take of Covered Species is expected to occur include 1.29 acres of undeveloped land in the High Traffic Areas, including three isolated manhole work areas abutting by the Low Traffic Areas, within the 2.55-acre Project site (collectively, the Project Area).

The Project is expected to cause the temporary loss of 1.29 acres of upland habitat for Covered Species. Impacts of the authorized taking also include adverse impacts to the Covered Species related to temporal losses, increased habitat fragmentation and edge effects, and the Project's incremental contribution to cumulative impacts (indirect impacts). These impacts include stress resulting from noise and vibrations from tunneling and capture and relocation, and long-term effects due to increased pollution, displacement from preferred habitat, increased competition for food and space, increased vulnerability to predation, and capture and relocation.

VII. Incidental Take Authorization of Covered Species:

This ITP authorizes incidental take of the Covered Species and only the Covered Species. With respect to incidental take of the Covered Species, CDFW authorizes the Permittee, its employees, contractors, and agents to take Covered Species incidentally in carrying out the Covered Activities, subject to the limitations described in this section and the Conditions of Approval identified below. This ITP does not authorize take of Covered Species from activities outside the scope of the Covered Activities, take of Covered Species outside of the Project Area, take of Covered Species resulting from violation of this ITP, or intentional take of Covered Species except for capture and relocation of Covered Species as authorized by this ITP.

VIII. Conditions of Approval:

Unless specified otherwise, the following measures apply to all Covered Activities within the Project Area, including areas used for vehicular ingress and egress, staging and parking, and noise and vibration generating activities that may cause take. CDFW's issuance of this ITP and Permittee's authorization to take the Covered Species are subject to Permittee's compliance with and implementation of the following Conditions of Approval:

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

1. Legal Compliance: Permittee shall comply with all applicable federal, state, and local laws in existence on the effective date of this ITP or adopted thereafter.

2. ITP Time Frame Compliance: Permittee shall fully implement and adhere to the conditions of this ITP within the time frames set forth below and as set forth in the Mitigation Monitoring and Reporting Program (MMRP), which is included as Attachment 1 to this ITP.

3. General Provisions:

3.1. Designated Representative. Before starting Covered Activities, Permittee shall designate a representative (Designated Representative) responsible for communications with CDFW and overseeing compliance with this ITP. Permittee shall notify CDFW in writing before starting Covered Activities of the Designated Representative's name, business address, and contact information, and shall notify CDFW in writing if a substitute Designated Representative is selected or identified at any time during the term of this ITP.

3.2. Designated Biologist(s). Permittee shall submit to CDFW in writing the name, qualifications, business address, and contact information of the Designated Biologist(s) using the Biologist Resume Form (<https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=202869>) or another format containing the same information at least 30 days before starting Covered Activities. Permittee shall ensure that the Designated Biologist(s) are knowledgeable and experienced in the biology, natural history, collecting and handling of the Covered Species. The Designated Biologist(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate or avoid the incidental take of individual Covered Species and to minimize disturbance of Covered Species' habitat. Permittee shall obtain CDFW approval of the Designated Biologist(s) in writing before starting Covered Activities and shall also obtain approval in advance, in writing, if the Designated Biologist(s) must be changed.

3.3. Designated Biologist Authority. To ensure compliance with the Conditions of Approval of this ITP, the Designated Biologist shall immediately stop any activity that does not comply with this ITP and/or order any reasonable measure to avoid the unauthorized take of an individual of the Covered Species. Permittee shall provide unfettered access to the Project Site and otherwise facilitate the Designated Biologist in the performance of his/her duties. If the Designated Biologist is unable to comply with the ITP, then the Designated Biologist shall notify the CDFW Representative immediately. Permittee shall not enter into any agreement or contract of any kind, including but not limited to non-disclosure agreements and confidentiality

agreements, with its contractors and/or the Designated Biologist that prohibit or impede open communication with CDFW, including but not limited to providing CDFW staff with the results of any surveys, reports, or studies or notifying CDFW of any non-compliance or take. Failure to notify CDFW of any non-compliance or take or injury of a Covered Species as a result of such agreement or contract may result in CDFW taking actions to prevent or remedy a violation of this ITP.

- 3.4. Education Program.** Permittee shall conduct an education program for all persons employed or otherwise working in the Project Area before performing any work. The program shall consist of a presentation from the Designated Biologist that includes a discussion of the biology and general behavior of the Covered Species, information about the distribution and habitat needs of the Covered Species, sensitivity of the Covered Species to human activities, its status pursuant to CESA including legal protection, recovery efforts, penalties for violations and Project-specific protective measures described in this ITP. Permittee shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry in the Project Area. Permittee shall provide interpretation for non-English speaking workers, and the same instruction shall be provided to any new workers before they are authorized to perform work in the Project Area. Upon completion of the program, employees shall sign a form stating they attended the program and understand all protection measures.
- 3.5. Construction Monitoring Documentation.** The Designated Biologist(s) shall maintain construction-monitoring documentation on-site in either hard copy or digital format throughout the construction period, which shall include a copy of this ITP with attachments and a list of signatures of all personnel who have successfully completed the education program. Permittee shall ensure a copy of the construction-monitoring documentation is available for review at the Project site upon request by CDFW.
- 3.6. Trash Abatement.** Permittee shall initiate a trash abatement program before starting Covered Activities and shall continue the program for the duration of the Project. Permittee shall ensure that trash and food items are contained in animal-proof containers and removed, ideally at daily intervals but at least once a week, to avoid attracting opportunistic predators such as ravens, coyotes, and feral dogs.
- 3.7. Dust Control.** Permittee shall implement dust control measures during Covered Activities to facilitate visibility for monitoring of the Covered Species by the Designated Biologist. Permittee shall keep the amount of water used to the minimum amount needed and shall not allow water to form puddles.

- 3.8. Erosion Control Materials.** Permittee shall prohibit use of erosion control materials potentially harmful to Covered Species and other species, such as monofilament netting (erosion control matting) or similar material, in potential Covered Species' habitat.
- 3.9. Delineation of Property Boundaries.** Before starting Covered Activities, Permittee shall clearly delineate the boundaries of the Project Area with fencing, stakes, or flags. Permittee shall restrict all Covered Activities to within the fenced, staked, or flagged areas. Permittee shall maintain all fencing, stakes, and flags until the completion of Covered Activities.
- 3.10. Delineation of Habitat.** Permittee shall clearly delineate habitat of the Covered Species within the Project Area with posted signs, posting stakes, flags, and/or rope or cord, and place fencing as necessary to minimize the disturbance of Covered Species' habitat.
- 3.11. Project Access.** Project-related personnel shall access the Project Area using existing routes, and shall not cross Covered Species' habitat outside of or en route to the Project Area. Permittee shall restrict Project-related vehicle traffic to established roads, staging, and parking areas or as detailed in the High Traffic and Low Traffic Areas specifications of the Project Description. Permittee shall ensure that vehicle speeds do not exceed 20 miles per hour to avoid Covered Species on or traversing the roads. If Permittee determines construction of routes for travel are necessary outside of the Project Area, the Designated Representative shall contact CDFW for written approval before carrying out such an activity. CDFW may require an amendment to this ITP, among other reasons, if additional take of Covered Species will occur as a result of the Project modification.
- 3.12. Staging Areas.** Permittee shall confine all Project-related parking, storage areas, laydown sites, equipment storage, and any other surface-disturbing activities to the Project Area using, to the extent possible, previously disturbed areas. Additionally, Permittee shall not use or cross Covered Species' habitat outside of the marked Project Area unless provided for as described in Condition of Approval 3.11 of this ITP.
- 3.13. Hazardous Materials.** Permittee shall prepare and implement a Hazardous Materials Spill Prevention and Response Plan before starting Covered Activities. Permittee shall immediately stop and, pursuant to pertinent state and federal statutes and regulations, arrange for repair and clean up by qualified individuals of any fuel or hazardous waste leaks or spills at the time of occurrence, or as soon as it is safe to do so. Permittee shall exclude the storage and handling of hazardous materials from the Project Area and shall

properly contain and dispose of any unused or leftover hazardous products off-site.

- 3.14. CDFW Access.** Permittee shall provide CDFW staff with reasonable access to the Project and mitigation lands under Permittee control, and shall otherwise fully cooperate with CDFW efforts to verify compliance with or effectiveness of mitigation measures set forth in this ITP.
- 3.15. Refuse Removal.** Upon completion of Covered Activities, Permittee shall remove from the Project Area and properly dispose of all temporary fill and construction refuse, including, but not limited to, broken equipment parts, wrapping material, cords, cables, wire, rope, strapping, twine, buckets, metal or plastic containers, and boxes.

4. Monitoring, Notification and Reporting Provisions:

- 4.1. Geographic Information Systems Data Files.** Before starting Covered Activities, the Permittee shall provide CDFW with Geographic Information Systems (GIS) data files for temporary habitat impact areas authorized under this ITP for each Covered Species. The Permittee shall provide any additional GIS data files for the Project or related Covered Species features within 30 days of CDFW's request. All GIS data files shall be provided in a format acceptable to CDFW.
- 4.2. Notification Before Commencement.** The Designated Representative shall notify CDFW 14 calendar days before starting Covered Activities and shall document compliance with all pre-Project Conditions of Approval before starting Covered Activities.
- 4.3. Notification of Non-Compliance.** The Designated Representative shall immediately notify CDFW if the Permittee is not in compliance with any Condition of Approval of this ITP, including but not limited to any actual or anticipated failure to implement measures within the time periods indicated in this ITP and/or the MMRP. The Designated Representative shall follow up within 24 hours with a written report to CDFW describing, in detail, any non-compliance with this ITP and suggested measures to remedy the situation.
- 4.4. Compliance Monitoring.** The Designated Biologist shall be on-site daily when Covered Activities occur unless otherwise approved in writing by CDFW. The Designated Biologist shall also conduct compliance inspections and check Covered Species temporary barriers and refuge areas pursuant to Condition of Approval 5.7 a minimum of once per week during periods of inactivity, and shall check Covered Species temporary barriers and refuge areas before,

during, and following storm events pursuant to Condition of Approval 5.7, unless otherwise approved in writing by CDFW. The Designated Biologist shall conduct compliance inspections to:

- (1) minimize incidental take of the Covered Species;
- (2) prevent unlawful take of species;
- (3) check for compliance with all measures of this ITP;
- (4) check all exclusion zones; and
- (5) ensure that signs, stakes, and fencing are intact, and that Covered Activities are only occurring in the Project Area.

The Designated Representative or Designated Biologist shall prepare daily written observation and inspection records summarizing oversight activities and compliance inspections, observations of Covered Species and their sign, survey results, and monitoring activities required by this ITP.

- 4.5. Reporting of Habitat Impacts.** Permittee shall monitor, calculate, and record in an electronic ledger the total amount of temporary impacts to Covered Species habitat and shall at a minimum account for these impacts based upon grassland and wetland habitat types.
- 4.6. Reporting of Vehicle and Equipment Trips within Low Traffic Areas.** Permittee shall monitor and record in an electronic ledger the total number of vehicle and equipment trips within Low Traffic Areas, which shall be limited to 40 total trips pursuant to Condition of Approval 5.6.1. A "trip" shall consist of one-way travel.
- 4.7. Monthly Compliance Report.** The Designated Representative or Designated Biologist shall compile the observation and inspection records identified in Conditions of Approval 4.3, 4.4, 4.5, and 4.6 into a Monthly Compliance Report and submit it to CDFW along with a copy of the MMRP table with notes showing the current implementation status of each mitigation measure. Monthly Compliance Reports shall be submitted to the CDFW offices listed in the Notices section of this ITP and via e-mail to CDFW's Regional Representative and Headquarters CESA Program. At the time of this ITP's approval, the CDFW Regional Representative is Nick Wagner (Nicholas.Wagner@wildlife.ca.gov) and Headquarters CESA Program email is CESA@wildlife.ca.gov. CDFW may at any time increase the timing and number of compliance inspections and reports required under this provision depending upon the results of previous compliance inspections. If CDFW

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

determines the reporting schedule must be changed, CDFW will notify Permittee in writing of the new reporting schedule.

- 4.8. Annual Status Report.** Permittee shall provide CDFW with an Annual Status Report (ASR) no later than January 31 of every year beginning with issuance of this ITP and continuing until CDFW accepts the Final Mitigation Report identified below. Each ASR shall include, at a minimum: (1) a summary of all Monthly Compliance Reports for that year identified in Condition of Approval 4.7; (2) a general description of the status of the Project Area and Covered Activities, including actual or projected completion dates, if known; (3) a copy of the table in the MMRP with notes showing the current implementation status of each mitigation measure; (4) an assessment of the effectiveness of each completed or partially completed mitigation measure in avoiding, minimizing and mitigating Project impacts; (5) all available information about Project-related incidental take of the Covered Species; (6) an accounting of the number of acres subject to temporary disturbance, both for the prior calendar year, and a total since ITP issuance; and (7) information about other Project impacts on the Covered Species.
- 4.9. CNDDDB Observations.** The Designated Biologist shall submit all observations of Covered Species to CDFW's California Natural Diversity Database (CNDDDB) within 60 calendar days of the observation and the Designated Biologist shall include copies of the submitted forms with the next Monthly Compliance Report or ASR, whichever is submitted first relative to the observation.
- 4.10. Final Mitigation Report.** No later than 45 days after completion of all mitigation measures, Permittee shall provide CDFW with a Final Mitigation Report. The Designated Biologist shall prepare the Final Mitigation Report which shall include, at a minimum: (1) a summary of all Monthly Compliance Reports and all ASRs; (2) a copy of the table in the MMRP with notes showing when each of the mitigation measures was implemented; (3) all available information about Project-related incidental take of the Covered Species; (4) information about other Project impacts on the Covered Species; (5) beginning and ending dates of Covered Activities; (6) an assessment of the effectiveness of this ITP's Conditions of Approval in minimizing and fully mitigating Project impacts of the taking on Covered Species; (7) recommendations on how mitigation measures might be changed to more effectively minimize take and mitigate the impacts of future projects on the Covered Species; and (8) any other pertinent information.
- 4.11. Notification of Take or Injury.** Permittee shall immediately notify the Designated Biologist if a Covered Species is taken or injured by a Project-related activity, or if a Covered Species is otherwise found dead or injured

within the vicinity of the Project. The Designated Biologist or Designated Representative shall provide initial notification to CDFW by calling the Regional Office at (707) 428-2002 and the CDFW Regional Representative in the Notices section. The initial notification to CDFW shall include information regarding the location, species, and number of animals/plants taken or injured and the ITP Number. Following initial notification, Permittee shall send CDFW a written report within two calendar days. The report shall include the date and time of the finding or incident, location of the animal/plant or carcass, and if possible, provide a photograph, explanation as to cause of take or injury, and any other pertinent information.

4.12. Notification of Non-Native Salamanders or Hybrids. The Designated Biologist shall immediately notify CDFW if a suspected barred tiger salamander (*Ambystoma tigrinum mavortium*) or California tiger salamander and non-native salamander hybrid is found within the Project Area within 24 hours by calling the Regional Office at (707) 428-2002 and the CDFW Regional Representative in the Notices section. Permittee shall consult with CDFW to determine measures to address non-native or hybrid populations.

5. Take Minimization Measures: The following requirements are intended to ensure the minimization of incidental take of Covered Species in the Project Area during Covered Activities. Permittee shall implement and adhere to the following conditions to minimize take of Covered Species:

5.1. Seasonal Work Period. Permittee shall limit all Covered Activities including but not limited to vehicle travel in in High Traffic and Low Traffic Areas, bypass pipeline placement and removal, and construction and heavy equipment use (such as excavation, grading, contouring, trenching, road construction and repair, or disking) to the work period from June 15 to October 15 (Dry Season).

5.2. Work Restriction and Preparation for All Rain Events. Permittee or the Designated Biologist shall consult the 72-hour weather forecast from the National Weather Service (NWS) prior to the start of all ground disturbing activities involving construction and heavy equipment use (such as excavation, grading, contouring, trenching, road construction and repair, or disking). For a weekly forecast see <https://forecast.weather.gov/MapClick.php?lat=38.4381&lon=-122.7125> and for a 48-hour percent precipitation forecast see <https://graphical.weather.gov/sectors/northcalifornia.php> and click on QPF in Amount of Precipitation row then toggle +/- 12 hours. Ground disturbing activities shall not begin unless a 72-hour no precipitation forecast is obtained covering the entire Project Area and necessary erosion control measures are

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

implemented. The Designated Biologist shall keep precipitation records on-site, and these records shall be subject to CDFW inspection.

- If a 40 percent or greater chance of rain is forecasted, then ground disturbing activities shall cease at least 24 hours prior to the forecasted rain and the Designated Biologist shall confirm with the Permittee that all necessary erosion control measures have been implemented prior to the onset of precipitation, unless otherwise approved in writing by CDFW.
- If ground-disturbing activities are approved by CDFW as described above, the Designated Biologist shall survey the work area before construction begins each day rain is forecast. If rain exceeds 0.25 inches during a 24-hour period, ground-disturbing activities shall cease.
- Twenty-four hours after the rain ceases and once there is less than a 40 percent chance of precipitation in the 24-hour forecast, ground disturbing activities may continue.

5.3. Time of Day Work Restriction. Permittee shall terminate all Covered Activities 30 minutes before sunset and shall not resume Covered Activities until 30 minutes after sunrise, unless otherwise approved in writing by CDFW. The Permittee shall use sunrise and sunset times established by the U.S. Naval Observatory Astronomical Applications Department for determining when Covered Activities shall terminate and resume.

5.4. Personnel Restriction. Permittee shall ensure that all construction activities and personnel, including subcontractors, are restricted to the active construction area surrounded by the CTS temporary barrier and public roads.

5.5. Prevention of Spread of Invasive Species. Permittee shall conduct Project activities in a manner that prevents the introduction, transfer, and spread of invasive species, including plants, animals, and microbes (e.g., algae, fungi, parasites, bacteria, etc.), from one Project site and/or waterbody to another. All equipment including excavators, trucks, and hand tools that may have come in contact with invasive plants or the seeds of these plants will be carefully cleaned before arriving on the site and shall also be carefully cleaned before removal from the site to prevent dispersal. Prevention Best Management Practices (BMPs) and guidelines for invasive plants can be found on the California Invasive Plant Council's (Cal-IPC) website at: <http://www.cal-ipc.org/ip/prevention/index.php> and for invasive mussels and aquatic species can be found at the Stop Aquatic Hitchhikers website: <http://www.protectyourwaters.net/>.

- 5.6. Covered Activities within Low Traffic Areas.** Covered Activities within the Low Traffic Areas shall be limited to wheeled vehicle and equipment traffic, foot traffic, and the placement of the above-ground bypass pipeline.
- 5.6.1.** Vehicle and equipment traffic within the Low Traffic Areas shall be limited to 40 total trips. A “trip” shall consist of one-way travel. Each trip shall be monitored and recorded pursuant to Condition of Approval 4.6.
- 5.6.2.** The bypass pipe shall be propped up on 4-inch-wide by 4-inch-tall by 18-inch-long wooden blocks every 50 feet within the Low Traffic Areas creating a gap beneath the bypass pipe every 50 feet large enough to allow for passage of Covered Species. The wooden block shall be removed once the bypass pipe is no longer in place.
- 5.6.3.** Project activities within the Low Traffic Areas shown on Figure 1 shall avoid small mammal burrows and other Covered Species refugia, as further described in Condition of Approval 5.15.1.
- 5.7. Covered Species Temporary Barrier for High Traffic Areas.** Permittee shall submit to CDFW for approval a Covered Species Temporary Barrier Plan for High Traffic Areas as shown on Figure 1 a minimum of 30 days prior to commencing Covered Activities. Permittee shall obtain CDFW’s written approval of the Covered Species Temporary Barrier Plan prior to commencing Covered Activities. Prior to any ground disturbing Covered Activities and under the direct supervision of the Designated Biologist, Permittee shall install a temporary barrier to prevent Covered Species from dispersing into the Project Area within the four noncontiguous High Traffic Areas shown on Figure 1. The barrier shall be designed to allow Covered Species to leave the Project Area using a one-way funnel at 100-foot intervals along the barrier, unless otherwise approved by CDFW in writing. The barrier shall remain in place until Covered Activities are completed, including during periods of inactivity. The Permittee shall maintain and repair the barrier immediately to ensure that it is functional and without defects. Permittee shall provide refuge opportunities, such as coverboards (2-foot x 2-foot plywood), along both sides at 100-foot intervals on each side, and a climbing barrier at the top of the temporary barrier, unless otherwise approved by CDFW in writing. The Designated Biologist shall check Covered Species temporary barriers and refuge areas daily during Covered Activities and before, during, and following storm events, and weekly during periods of inactivity. Animals found within the interior of the barrier shall be relocated outside of the barrier as described in the Covered Species Relocation Plan (see Condition of Approval 5.8).

- 5.8. Covered Species Relocation Plan.** Permittee shall submit a Covered Species Relocation Plan (Relocation Plan) a minimum of 30 days prior to the commencement of Covered Activities for approval in writing by CDFW. The Designated Biologist shall follow this Relocation Plan to install the Covered Species temporary barrier (see Condition of Approval 5.7); install any pitfall traps, cover boards, and drift fence arrays; check any pitfall traps and cover boards according to the rainfall-dependent schedule; and relocate captured Covered Species adults, juveniles, and larva to a suitable site.
- 5.9. Covered Species Handling and Injury.** Covered Species shall be handled and assessed according to the Restraint and Handling of Live Amphibians, USGS, National Wildlife Health Center (D. Earl Greene, ARMI SOP NO. 100; 16 February 2001) (Attachment 2). If an injured Covered Species is found during the Project term, the individual shall be evaluated by the Designated Biologist who shall then immediately contact the CDFW Regional Representative, via email and telephone, to discuss the next steps pursuant to Condition of Approval 4.11. If the CDFW Regional Representative cannot be contacted immediately, the injured Covered Species shall be placed in a shaded container and kept moist. If the CDFW Regional Representative is not available or has not responded within two hours of initial attempts, then the following steps shall be taken by the Designated Biologist:
- 5.9.1.** If the injury is minor or healing and the Covered Species is likely to survive, the Covered Species shall be released immediately in accordance with the Condition of Approval 5.8.
- 5.9.2.** If it is determined that the Covered Species has major or serious injuries as a result of Project-related activities the Designated Biologist shall immediately take it to a CDFW approved wildlife rehabilitation or veterinary facility. If taken into captivity the individual shall remain in captivity and not be released into the wild unless it has been kept in quarantine and the release is authorized by the CDFW and U.S. Fish and Wildlife Service. Permittee shall bear any costs associated with the care or treatment of such injured Covered Species. The circumstances of the injury, the procedure followed, and the final disposition of the injured animal shall be documented in a written incident report as described in Condition of Approval 4.11
- 5.10. Atypical Dens and Burrows.** Permittee shall ensure that all construction pipes, culverts, or similar structures that are stored in the Project Area for one or more overnight periods are either securely capped prior to storage or thoroughly inspected by the Designated Biologist before the pipe is subsequently buried, capped, or otherwise used or moved in any way. If a

Covered Species is discovered inside a pipe by the Designated Biologist or anyone else, the Designated Biologist shall move the animal to a safe nearby location per the Relocation Plan described in Condition of Approval 5.8.

- 5.11. Pre-Construction Covered Species Surveys in High Traffic Areas.** The Designated Biologist shall complete walking surveys of the four noncontiguous High Traffic Areas as shown on Figure 1 prior to any initial ground disturbing activity and shall follow earthmoving equipment to look for Covered Species during initial site excavation and other ground disturbing activities. Areas to be surveyed shall include suitable habitat features for the Covered Species such as upland areas as well as under woody or other debris. Pre-construction surveys shall be conducted in conjunction with Covered Species temporary barrier installation. If a Covered Species is discovered, the Designated Biologist shall move the animal to a safe nearby location (e.g., mouth of small mammal burrow outside of the construction area) and monitor it until it is determined that the animal is not imperiled by predators or other dangers (see Condition of Approval 5.8).
- 5.12. Pre-Construction Covered Species Surveys in Low Traffic Area Surveys.** Immediately prior to all ground disturbing activities, such as vehicle or equipment traffic or bypass pipe setup within the Low Traffic Areas as shown on Figure 1, the Designated Biologist shall complete walking surveys ahead of each vehicle and equipment trip to survey for Covered Species. If a Covered Species is discovered, the Designated Biologist shall move the animal to a safe nearby location (e.g., mouth of small mammal burrow outside of the construction area) and monitor it until it is determined that the animal is not imperiled by predators or other dangers (see Condition of Approval 5.8).
- 5.13. Protocol Plant Surveys.** In the plant survey season immediately prior to commencement of Project activities, the Designated Biologist shall complete protocol plant surveys of wetland habitat in the "Seasonal Wetland/Swale, Inside Action Area", "Wetted Grassland, Inside Action Area", "Seasonal Wetland/Swale, No Longer In Action Area, Sections of Permanent Easement Removed from Project Area", and Vernal Pool, No Longer in Action Area, Sections of Permanent Easement Removed from Project Area" as shown on Figure 3, and immediately adjacent areas, during the appropriate blooming seasons for Sonoma sunshine (*Blennosperma bakeri*), Sebastopol meadowfoam (*Limnanthes vinculans*), and Burke's goldfields (*Lasthenia burkei*) and prepare a survey report. Surveys shall utilize appropriate local reference sites and be conducted during the peak bloom period. Protocol surveys and reporting shall be conducted in accordance with the Santa Rosa Conservation Strategy, Appendix D (available here: <https://www.fws.gov/library/collections/santa-rosa-plain-conservation->

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

[strategy](#)) and CDFW's *Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities* (available here: <https://wildlife.ca.gov/Conservation/Survey-Protocols#377281280-plants>). The Permittee shall submit the survey report to CDFW and obtain CDFW's written approval of the report prior to commencing Covered Activities. If any blooming Sonoma sunshine, Sebastopol meadowfoam, or Burke's goldfields are detected, the Designated Biologist shall immediately contact the CDFW Representative via email (Nicholas.Wagner@wildlife.ca.gov) and the Project shall fully avoid the wetland habitat including avoiding placing wooden or plastic construction mats on the wetland occupied by the blooming plant until the plant is no longer blooming and has set seed as determined by the Designated Biologist. Additionally, Covered Activities at the wetland shall not proceed until CDFW has provided written approval: 1) of the Wetland Habitat Protection Plan pursuant to Condition of Approval 5.16, and 2) that placement of the construction mats on the wetland may proceed. All locations of Sonoma sunshine, Sebastopol meadowfoam, or Burke's goldfields shall be recorded in the field to ensure that the individuals can be located and avoided.

5.14. Trench Escape and Inspection. The Designated Biologist shall inspect all open holes, sumps, and trenches within the Project Area at the beginning of each working day for trapped animals. To prevent inadvertent entrapment of Covered Species, the Designated Biologist shall oversee the covering of all trenches, holes, sumps, or other excavations with a greater than 1:1 (45 degree) slope of any depth with barrier material at the close of each working day such that Covered Species are unable to dig or squeeze under the barrier and become entrapped. The outer two feet of excavation cover shall conform to solid ground so that gaps do not occur between the cover and the ground and secured with soil staples or similar means to prevent gaps.

Each morning prior to beginning Covered Activities and immediately before trenches, holes, sumps, or other excavations are back-filled, the Designated Biologist shall thoroughly inspect them for Covered Species. Trenches, holes, sumps, or other excavations that are covered long-term shall be inspected at the beginning of each working day to ensure inadvertent entrapment has not occurred. Permittee shall cease all Covered Activities in the vicinity and notify the Designated Biologist immediately if any worker discovers that Covered Species have become trapped. If at any time a trapped Covered Species is discovered by the Designated Biologist or anyone else, the Designated Biologist shall capture and relocate the animal to a safe nearby location per the Relocation Plan described in Condition of Approval 5.8.

5.14.1. If the open holes, sumps, trenches, or excavations cannot be covered, then a Covered Species temporary barrier shall be installed around any trenches, holes, sumps, or other excavations to prevent Covered Species from becoming trapped. Refuge opportunities, such as coverboards shall be provided on the outside perimeter of the barrier.

5.15. Burrow and other Covered Species Potential Refugia Protection. The Designated Biologist shall mark for avoidance all small mammal burrows and other Covered Species potential refugia with flagging at the limits of access areas, including vehicle routes, and staging areas.

5.15.1. All Project activities, such as vehicle and equipment access and placement of the bypass pipe and wooden or plastic mats, within the Low Traffic Areas shown on Figure 1 shall avoid small mammal burrows and other Covered Species refugia.

5.16. Wetland Habitat Protection Plan. Permittee shall submit to CDFW for approval a Wetland Habitat Protection Plan detailing how impacts to wetlands will be protected a minimum of 30 days prior to commencing Covered Activities. Permittee shall obtain CDFW's written approval of the Wetland Habitat Protection Plan prior to commencing Covered Activities. The Wetland Habitat Protection Plan shall include:

- Specifications on wooden or plastic construction mats placed over wetlands as shown on Figure 2;
- Avoidance of placement of construction mats over Covered Species burrows or other refugia in Low Traffic Areas;
- Avoidance of previously detected Sonoma sunshine in the "Seasonal Wetland/Swale, No Longer In Action Area, Sections of Permanent Easement Removed from Project Area" shown on Figure 3 near the Low Traffic Area and any Sonoma sunshine, Sebastopol meadowfoam, or Burke's goldfields detected during pre-construction protocol plant surveys or otherwise in accordance with Condition of Approval 5.13;
- Areas outside of the High Traffic Areas and Low Traffic Areas, including "Areas of Permanent Easement Areas Removed from the Project", as shown in Figure 3 shall be fully avoided by the Project.
- Limiting vehicle traffic to 40 total trips in the Low Traffic Areas;
- Methods for determining appropriate soil dryness to avoid rutting;

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

- Minimizing excavation within wetlands in High Traffic Areas and avoiding excavation in wetlands in Low Traffic Areas;
- Recontouring to pre-construction conditions impacted wetlands in High Traffic Area pursuant to Condition of Approval 5.23; and
- Any additional methods to physically avoid rutting from vehicle and equipment use and placement of the bypass pipeline.

5.17. Temporary Impacts. To be considered a temporary impact, Permittee shall recontour and seed all temporary impact areas by October 15 of the year of the impact and the impacted area soils must be suitable to support small mammal burrows. Heavily compacted soil is not considered suitable. Additionally, these areas shall be made available to fossorial mammals and shall not be surrounded by fencing that limits access. Impacted areas that do not meet these requirements will be considered permanent impacts, an Amendment will be required, and additional Habitat Management Lands pursuant to Condition of Approval 6 may be required.

5.18. Refueling and Equipment Maintenance. Refueling of construction equipment and vehicles may not occur within 175 feet of any water body or anywhere that spilled fuel could drain to a wetland. Tarps or similar material shall be placed underneath construction equipment and vehicles, when refueling, to capture incidental spillage of fuels. Equipment and vehicles operating in the project area shall be checked and maintained daily to prevent leaks of fuels, lubricants, or other liquids.

5.19. Erosion and Dust Control. Permittee shall prepare and implement a detailed Erosion Control Plan (Plan). The Plan shall: 1) include appropriate erosion control measures to be implemented during construction, and 2) limit ground disturbance activities to dry weather to avoid increased surface water runoff and erosion onsite, and sedimentation in sensitive habitats located offsite. Erosion control elements shall be checked and maintained daily to ensure proper function and shall not contain monofilament netting. Any straw wattles are used shall be made from biodegradable materials only. Runoff from dust control shall be retained in the construction site and prevented from flowing into adjacent wetlands by installing appropriate erosion control devices, such as silt fences. Dust control water trucks shall be used throughout construction. The Designated Biologist shall check weekly the effectiveness of dust control measures and direct implementation of further measures if necessary to prevent damage to wetlands. Excessive dust control watering shall not occur. Puddling or sheeting flow of dust control water shall be prevented.

5.20. Designated Areas for Stockpiling Materials. Permittee shall ensure that all construction materials placed in the Project Area are not placed in areas where they could impact any wetlands.

5.21. Groundwater Encountered. Nuisance groundwater encountered during excavation shall be discharged at a location where it will infiltrate into the soil, resulting in no overland flow. Discharged water shall not be allowed to flow into wetlands. Permittee shall ensure that best management practices are used to control runoff water quality.

5.22. Spoil Pile Stabilization. Active spoil piles shall be covered/stabilized adequately when rainy conditions are evident (see Condition of Approval 5.2) or at any time when spoil material could enter Covered Species habitat.

5.23. Recontour Temporarily Impacted Wetlands within High Traffic Area. Temporarily impacted wetlands within the High Traffic Area shall be recontoured to pre-construction hydrological conditions. The Designated Biologist shall ensure that pre-construction hydrological conditions are adequately documented and that recontouring achieves pre-construction hydrological conditions. The Designated Biologist shall take pre- and post-construction photos of the impacted wetlands and provide documentation to CDFW demonstrating recontouring achieves pre-construction hydrological conditions, and upon Project completion Permittee shall obtain CDFW's written approval that pre-construction hydrological conditions have been achieved.

5.24. Pesticides Prohibited. Permittee shall ensure that rodenticides or other poisons used in the control of fossorial (burrow-dwelling) mammals, and herbicides, are not used within the Project Area during the term of this ITP unless otherwise approved in writing by CDFW.

5.25. Herbicides Prohibited. Permittee shall ensure that herbicides or other poisons used to control plants are not used within the Project Area unless otherwise approved in writing by CDFW.

6. Covered Species Credits or Habitat Management Land Acquisition, and Restoration: CDFW has determined that permanent protection and perpetual management of compensatory habitat is necessary and required pursuant to CESA to fully mitigate Project-related impacts of the taking on the Covered Species that will result from implementation of the Covered Activities. This determination is based on factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will

impact the habitat, and CDFW's estimate of the protected acreage required to provide for adequate compensation.

To meet this requirement, the Permittee shall either purchase 2.58 acres of Covered Species credits from a CDFW-approved mitigation or conservation bank pursuant to Condition of Approval 6.2 below OR shall provide for both the permanent protection and management of 2.58 acres of Habitat Management (HM) lands pursuant to Condition of Approval 6.3 below and the calculation and deposit of the management funds pursuant to Condition of Approval 6.4 below. Purchase of Covered Species credits OR permanent protection and funding for perpetual management of HM lands must be complete before starting Covered Activities, or within 18 months of the effective date of this ITP if Security is provided pursuant to Condition of Approval 7 below for all uncompleted obligations. The Permittee shall also restore on-site 1.29 acres of temporarily impacted Covered Species habitat pursuant to Condition of Approval 6.6 below.

6.1. Cost Estimates. For the purposes of determining the Security amount, CDFW has estimated the cost sufficient for CDFW or its contractors to complete purchase of credits OR acquisition, protection, and perpetual management of the HM lands, and restoration of 1.29 acres of temporarily impacted habitat as follows:

- 6.1.1.** Purchase of Covered Species credits at a conservation or mitigation bank as described in Condition of Approval 6.2 OR acquisition, protection, and perpetual management of HM lands as described in Condition of Approval 6.3 estimated at \$304,500 per acre; therefore, for 2.58 acres the estimated cost is **\$785,610**.
- 6.1.2.** Restoration of on-site temporary impacts to Covered Species habitat as described in Condition of Approval 6.6 estimated at \$6,199 per acre; therefore, for 1.29 acres the estimated cost is **\$7,997**.
- 6.1.3.** All costs associated with CDFW engaging an outside contractor to complete the mitigation tasks, including but not limited to acquisition, protection, and perpetual funding and management of the HM lands and restoration of temporarily disturbed habitat. These costs include but are not limited to the cost of issuing a request for proposals, transaction costs, contract administration costs, and costs associated with monitoring the contractor's work estimated at **\$40,000**.

6.2. Covered Species Credits. If the Permittee elects to purchase Covered Species credits to complete compensatory mitigation obligations, then Permittee shall purchase 2.58 acres of Covered Species credits from a CDFW-

approved mitigation or conservation bank prior to initiating Covered Activities, or no later than 18 months from the issuance of this ITP if Security is provided pursuant to Condition of Approval 7 below. Prior to purchase of Covered Species credits, Permittee shall obtain CDFW approval to ensure the mitigation or conservation bank is appropriate to compensate for the impacts of the Project. Permittee shall submit to CDFW a copy of the Bill of Sale(s) and Payment Receipt prior to initiating Covered Activities or within 18 months from issuance of this ITP if Security is provided.

6.3. Habitat Management Lands Acquisition and Protection. If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall:

6.3.1. Fee Title. Transfer fee title of the HM lands to CDFW pursuant to terms approved in writing by CDFW. Alternatively, CDFW, in its sole discretion, may authorize a governmental entity, special district, non-profit organization, for-profit entity, person, or another entity to hold title to and manage the property provided that the district, organization, entity, or person meets the requirements of Government Code sections 65965-65968, as amended.

6.3.2. Conservation Easement. If CDFW does not hold fee title to the HM lands, CDFW shall act as grantee for a conservation easement over the HM lands or shall, in its sole discretion, approve a non-profit entity, public agency, or Native American tribe to act as grantee for a conservation easement over the HM lands provided that the entity, agency, or tribe meets the requirements of Civil Code section 815.3. If CDFW elects not to be named as the grantee for the conservation easement, CDFW shall be expressly named in the conservation easement as a third-party beneficiary. The Permittee shall obtain CDFW written approval of any conservation easement before its execution or recordation. No conservation easement shall be approved by CDFW unless it complies with Civil Code sections 815-816, as amended, and Government Code sections 65965-65968, as amended and includes provisions expressly addressing Government Code sections 65966(j) and 65967(e). Because the “doctrine of merger” could invalidate the conservation interest, under no circumstances can the fee title owner of the HM lands serve as grantee for the conservation easement.

6.3.3. HM Lands Approval. Obtain CDFW written approval of the HM lands before acquisition and/or transfer of the land by submitting, at least three months before acquisition and/or transfer of the HM lands,

documentation identifying the land to be purchased or property interest conveyed to an approved entity as mitigation for the Project's impacts on Covered Species;

- 6.3.4.** HM Lands Documentation. Provide a recent preliminary title report, Phase I Environmental Site Assessment, and other necessary documents (please contact CDFW for document list). All documents conveying the HM lands and all conditions of title are subject to the approval of CDFW, and if applicable, the Wildlife Conservation Board and the Department of General Services;
- 6.3.5.** Land Manager. Designate both an interim and long-term land manager approved by CDFW. The interim and long-term land managers may, but need not, be the same. The interim and/or long-term land managers may be the landowner or another party. Documents related to land management shall identify both the interim and long-term land managers. Permittee shall notify CDFW of any subsequent changes in the land manager within 30 days of the change. If CDFW will hold fee title to the mitigation land, CDFW will also act as both the interim and long-term land manager unless otherwise specified. The grantee for the conservation easement cannot serve as the interim or long-term manager without the express written authorization of CDFW in its sole discretion.
- 6.3.6.** Start-Up Activities. Provide for the implementation of start-up activities, including the initial site protection and enhancement of HM lands, once the HM lands have been approved by CDFW. Start-up activities include, at a minimum: (1) preparing and implementing a Development and Restoration Plan approved by CDFW in writing; (2) preparing an Interim Management Plan, including the costs of interim management activities, approved by CDFW in writing; (3) preparing a Long-Term Management Plan, including the endowment assessment (see Condition of Approval 6.4.2), approved by CDFW in writing: (see <https://www.wildlife.ca.gov/Conservation/Planning/Banking/Templates>); (4) conducting a baseline biological assessment and land survey report within four months of recording or transfer; (5) developing and transferring Geographic Information Systems (GIS) data if applicable; (6) establishing initial fencing; (7) conducting litter removal; (8) conducting initial habitat restoration or enhancement, if applicable; and (9) installing signage;
- 6.3.7.** Interim Management (Initial and Capital). Provide for the interim management of the HM lands. The Permittee shall ensure that the interim

land manager implements the interim management of the HM lands as described in the final Interim Management Plan conservation easement approved by CDFW. The interim management period shall be a minimum of three years from the date of HM land acquisition and protection and full funding of the Endowment and includes expected management following start-up activities. Interim management period activities described in the final Interim Management Plan shall include but not be limited to fence repair, continuing trash removal, site monitoring, and vegetation and invasive species management.

Permittee shall either (1) provide Security to CDFW for the minimum of three years of interim management that the land owner, Permittee, or land manager agrees to manage and pay for at their own expense, (2) establish an escrow account with written instructions approved in advance in writing by CDFW to pay the land manager annually in advance, or (3) establish a short-term enhancement account with CDFW or a CDFW-approved entity for payment to the land manager.

6.4. Endowment Fund. If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall ensure that the HM lands are perpetually managed, maintained, and monitored by the long-term land manager as described in this ITP, the conservation easement, and the Long-Term Management Plan approved by CDFW . After obtaining CDFW approval of the HM lands, Permittee shall provide long-term management funding for the perpetual management of the HM lands by establishing a long-term management fund (Endowment). The Endowment is a sum of money, held in a CDFW-approved fund that is permanently restricted to paying the costs of long-term management and stewardship of the mitigation property for which the funds were set aside, which costs include the perpetual management, maintenance, monitoring, and other activities on the HM lands consistent with this ITP, the conservation easement, Long-Term Management Plan required by Condition of Approval 6.3.6. Endowment as used in this ITP shall refer to the endowment deposit and all interest, dividends, other earnings, additions and appreciation thereon. The Endowment shall be governed by this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.

After the interim management period, Permittee shall ensure that the designated long-term land manager implements the management and monitoring of the HM lands according to the Long-Term Management Plan. The long-term land manager shall be obligated to manage and monitor the

HM lands in perpetuity to preserve their conservation values in accordance with this ITP, the conservation easement, and the Long-Term Management Plan. Such activities shall be funded through the Endowment.

- 6.4.1. Identify an Endowment Manager.** The Endowment shall be held by the Endowment Manager, which shall be either CDFW or another entity qualified pursuant to Government Code sections 65965-65968, as amended.

Permittee shall submit to CDFW a written proposal that includes: (i) the name of the proposed Endowment Manager; (ii) whether the proposed Endowment Manager is a governmental entity, special district, nonprofit organization, community foundation, or congressionally chartered foundation; (iii) whether the proposed Endowment Manager holds the property or an interest in the property for conservation purposes as required by Government Code section 65968(b)(1) or, in the alternative, the basis for finding that the Project qualifies for an exception pursuant to Government Code section 65968(b)(2); and (iv) a copy of the proposed Endowment Manager's certification pursuant to Government Code section 65968(e).

Within thirty days of CDFW's receipt of Permittee's written proposal, CDFW shall inform Permittee in writing if it determines the proposal does not satisfy the requirements of Fish and Game Code section 2081 (b)(3) and, if so, shall provide Permittee with a written explanation of the reasons for its determination. If CDFW does not provide Permittee with a written determination within the thirty-day period, the proposal shall be deemed consistent with Section 2081 (b)(3).

- 6.4.2. Calculate the Endowment Funds Deposit.** After obtaining CDFW written approval of the HM lands and Endowment Manager, Permittee shall prepare an endowment assessment (equivalent to a Property Analysis Record (PAR)) to calculate the amount of funding necessary to ensure the long-term management of the HM lands (Endowment Deposit Amount) and include the endowment assessment in the Long-Term Management Plan. Note that the endowment for the easement holder is a separate cost from the Endowment Deposit Amount and should not be included in this calculation. The Permittee shall submit to CDFW for review and approval the results of the endowment assessment before transferring funds to the Endowment Manager.

- 6.4.2.1. Capitalization Rate and Fees.** Permittee shall obtain the capitalization rate from the selected Endowment Manager for use in

calculating the endowment assessment and adjust for any additional administrative, periodic, or annual fees.

6.4.2.2. Endowment Buffers/Assumptions. Permittee shall include in the endowment assessment assumptions the following buffers for endowment establishment and use that will substantially ensure long-term viability and security of the Endowment:

6.4.2.2.1. 10 Percent Contingency. A 10 percent contingency shall be added to each endowment calculation to hedge against underestimation of the fund, unanticipated expenditures, inflation, or catastrophic events.

6.4.2.2.2. Three Years Delayed Spending. The endowment shall be established assuming spending will not occur for the first three years after full funding.

6.4.2.2.3. Non-Annualized Expenses. For all large capital expenses to occur periodically but not annually such as fence replacement or well replacement, payments shall be withheld from the annual disbursement until the year of anticipated need or upon request to Endowment Manager and CDFW.

6.4.3. Transfer Long-Term Endowment Funds. Permittee shall transfer the long-term endowment funds to the Endowment Manager upon CDFW approval of the Endowment Deposit Amount identified above.

6.4.4. Management of the Endowment. The approved Endowment Manager may pool the Endowment with other endowments for the operation, management, and protection of HM lands for local populations of the Covered Species but shall maintain separate accounting for each Endowment. The Endowment Manager shall, at all times, hold and manage the Endowment in compliance with this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.

Notwithstanding Probate Code sections 18501-18510, the Endowment Manager shall not make any disbursement from the Endowment that will result in expenditure of any portion of the principal of the endowment without the prior written approval of CDFW in its sole discretion. Permittee shall ensure that this requirement is included in any agreement of any kind governing the holding, investment, management, and/or disbursement of the Endowment funds.

Notwithstanding Probate Code sections 18501-18510, if CDFW determines in its sole discretion that an expenditure needs to be made from the Endowment to preserve the conservation values of the HM lands, the Endowment Manager shall process that expenditure in accordance with directions from CDFW. The Endowment Manager shall not be liable for any shortfall in the Endowment resulting from CDFW's decision to make such an expenditure.

- 6.5. Reimburse CDFW.** Permittee shall reimburse CDFW for all reasonable costs incurred by CDFW related to issuance and monitoring of this ITP, including, but not limited to transaction fees, account set-up fees, administrative fees, title and documentation review and related title transactions, costs incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW.
- 6.6. Habitat Restoration.** Permittee shall restore on-site the 1.29 acres of Covered Species habitat that will be temporarily impacted during construction to pre-Project or better conditions. At least 30 days prior to the initiation of Project construction, the Permittee shall submit a Vegetation Restoration Plan (Plan) to CDFW for approval to facilitate revegetation of the 1.29 acres of temporary construction impacts on-site. The Permittee shall obtain CDFW's written approval of the Plan and ensure that the Plan is successfully implemented. The Plan shall identify plant species that will be damaged or removed during Project activities and include detailed specifications for restoring all temporarily impacted areas, such as seed mixes and application methods. For seeding and mulching exposed slopes, the seed blend shall include locally native grass species at a ratio appropriate to the site. The Plan shall also indicate the best time of year for seeding to occur, three (3) years of monitoring, maintenance, and reporting, and success criteria. Permittee is responsible for monitoring and maintaining the restored areas for a period of three (3) years or until the Plan success criteria have been met, whichever is longer. The Plan shall include regular watering of plantings to ensure adequate growth if necessary. Permittee shall complete seeding/planting as soon as possible, but no later than October 15 of the year of impact. At the discretion of CDFW, all exposed areas where seeding/planting is unsuccessful after 90 days shall receive appropriate soil preparation and a second application of seeding/planting, straw, or mulch as soon as is practical on a date mutually agreed upon.
- 7. Security:** The Permittee may proceed with Covered Activities only after the Permittee has ensured funding (Security) to complete any activity required by Condition of Approval 6 that has not been completed before Covered Activities begin. Permittee shall provide Security as follows:

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

- 7.1. Security Amount. The Security shall be in the amount of **\$833,607** or in the amount identified in Condition of Approval 6.1 specific to the obligation that has not been completed. This amount is determined by CDFW based on the cost estimates identified in Condition of Approval 6.1 above, sufficient for CDFW or its contractors to complete purchasing Covered Species credits OR HM land acquisition, property enhancement, startup costs, initial management, long-term management, and monitoring, AND restoration of on-site temporary impacts.
- 7.2. Security Form. The Security shall be in the form of an irrevocable letter of credit (see Attachment 3) or another form of Security approved in advance in writing by CDFW's Office of the General Counsel.
- 7.3. Security Timeline. The Security shall be provided to CDFW before Covered Activities begin or within 30 days after the effective date of this ITP, whichever occurs first.
- 7.4. Security Holder. The Security shall be held by CDFW or in a manner approved in advance in writing by CDFW.
- 7.5. Security Transmittal. Permittee shall transmit security to CDFW by way of an approved instrument such as an escrow agreement, irrevocable letter of credit, or other.
- 7.6. Security Drawing. The Security shall allow CDFW to draw on the principal sum if CDFW, in its sole discretion, determines that the Permittee has failed to comply with the Conditions of Approval of this ITP.
- 7.7. Security Release. The Security (or any portion of the Security then remaining) shall be released to the Permittee after CDFW has conducted an on-site inspection and received confirmation that all secured requirements have been satisfied, as evidenced by:

For Covered Species credits

- Copy of Bill of Sale(s) and Payment Receipt(s) or Credit Transfer Agreement for the purchase of Covered Species credits; and
- Timely submission of all required reports.

OR for the permanent protection and management of HM Lands

- Written documentation of the acquisition of the HM lands;

- Copies of all executed and recorded conservation easements;
- Written confirmation from the approved Endowment Manager of its receipt of the full Endowment; and
- Timely submission of all required reports.

AND for habitat restoration

- Successful restoration of temporary impacts.

Even if Security is provided, the Permittee must complete the required acquisition, protection and transfer of all HM lands and record any required conservation easements no later than 18 months from the effective date of this ITP. CDFW may require the Permittee to provide additional HM lands and/or additional funding to ensure the impacts of the taking are minimized and fully mitigated, as required by law, if the Permittee does not complete these requirements within the specified timeframe.

IX. Amendment:

This ITP may be amended as provided by California Code of Regulations, title 14, section 783.6, subdivision (c), and other applicable law. This ITP may be amended without the concurrence of the Permittee as required by law, including if CDFW determines that continued implementation of the Project as authorized under this ITP would jeopardize the continued existence of the Covered Species or where Project changes or changed biological conditions necessitate an ITP amendment to ensure that all Project-related impacts of the taking to the Covered Species are minimized and fully mitigated.

X. Stop-Work Order:

If CDFW determines the Permittee has violated any term or condition of this ITP or has engaged in unlawful take, CDFW may issue Permittee a written stop-work order instructing the Permittee to suspend any Covered Activity for an initial period of up to 30 days or risk suspension or revocation of this ITP. CDFW can issue a stop-work order to prevent or remedy a violation of this ITP, including but not limited to the failure to comply with reporting or monitoring obligations, or to prevent the unauthorized take of any CESA endangered, threatened, or candidate species, regardless of whether that species is a Covered Species under this ITP. Permittee shall stop work immediately as directed by CDFW upon receipt of any such stop-work order. Upon written notice to Permittee, CDFW may extend any stop-work order issued to Permittee for a period not to exceed 30 additional days.

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

If Permittee fails to remedy the violation or to comply with a stop-work order, CDFW may proceed with suspension and revocation of this ITP. Suspension and revocation of this ITP shall be governed by California Code of Regulations, title 14, section 783.7, and any other applicable law. Neither the Designated Biologist nor CDFW shall be liable for any costs incurred in complying with stop-work orders.

XI. Liability:

All terms and conditions of this ITP shall be binding upon each Permittee. Notwithstanding California Civil Code section 1431 or any other provision of law, each Permittee shall be jointly and severally liable for performance of all terms, conditions, and obligations of this ITP and shall be jointly and severally liable for any unauthorized take or other violations of this ITP, whether committed by Permittees or any person acting on behalf of one or more Permittees, including their officers, employees, representatives, agents or contractors and subcontractors. Any failure by one or more Permittees to comply with any term, condition, or obligation herein shall be deemed a failure to comply by all Permittees.

XII. Compliance with Other Laws:

This ITP sets forth CDFW's requirements for the Permittee to implement the Project pursuant to CESA. This ITP does not necessarily create an entitlement to proceed with the Project. Permittee is responsible for complying with all other applicable federal, state, and local law.

XIII. Notices:

Written notices, reports and other communications relating to this ITP shall be delivered to CDFW by email or registered first class mail at the following address, or at addresses CDFW may subsequently provide the Permittee. Notices, reports, and other communications shall reference the Project name, Permittee, and ITP Number (2081-2022-018-03) in a cover letter and on any other associated documents.

Unless Permittee is notified otherwise, CDFW's Regional Representative for purposes of addressing issues that arise during implementation of this ITP is:

Nick Wagner, Senior Environmental Scientist (Specialist)
California Department of Fish and Wildlife – Bay Delta Region
2825 Cordelia Road, Suite 100
Fairfield, CA 94534
Telephone: (707) 428-2075
Nicholas.Wagner@wildlife.ca.gov

XIV. Compliance with the California Environmental Quality Act:

CDFW's issuance of this ITP is subject to CEQA. CDFW is a responsible agency pursuant to CEQA with respect to this ITP. (See generally Pub. Resources Code, § 21069.) The City of Santa Rosa is the CEQA lead agency for the Project. (See generally Pub. Resources Code, § 21067.) The lead agency's determination is set forth in the Notice of Exemption, dated August 4, 2021, that the City of Santa Rosa approved for the Robles Trunk Lining Phase I Project on August 4, 2021. Pursuant to Public Resources Code section 21080.1, subdivision (a), the lead agency is responsible for determining whether a project is exempt from CEQA and that determination "shall be final and conclusive on all persons, including responsible agencies." For this reason, CDFW is bound by the City of Santa Rosa's determination that the project is exempt from CEQA review.

XV. Findings Pursuant to CESA:

These findings are intended to document CDFW's compliance with the specific findings requirements set forth in CESA and related regulations (Fish & G. Code, § 2081, subs. (b)-(c); Cal. Code Regs., tit. 14, §§ 783.4, subds, (a)-(b), 783.5, subd. (c)(2)).

CDFW finds based on substantial evidence in the ITP application, the results of site visits and consultations, and the administrative record of proceedings, that issuance of this ITP complies and is consistent with the criteria governing the issuance of ITPs pursuant to CESA:

- (1) Take of Covered Species as defined in this ITP will be incidental to the otherwise

Incidental Take Permit
No. 2081-2022-018-03

CITY OF SANTA ROSA

ROBLES SEWER TRUNK LINING – ARLINGTON TO SUNLAND

lawful activities covered under this ITP;

- (2) Impacts of the taking on Covered Species will be minimized and fully mitigated through the implementation of measures required by this ITP and as described in the MMRP. Measures include: (1) permanent habitat protection; (2) establishment of avoidance zones; (3) worker education; and (4) Monthly Compliance Reports. CDFW evaluated factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will impact the habitat, and CDFW's estimate of the acreage required to provide for adequate compensation. Based on this evaluation, CDFW determined that the protection and management in perpetuity of 2.58 acres of compensatory habitat that is contiguous with other protected Covered Species habitat and/or is of higher quality than the habitat being destroyed by the Project, along with the minimization, monitoring, reporting, and funding requirements of this ITP minimizes and fully mitigates the impacts of the taking caused by the Project;
- (3) The take avoidance and mitigation measures required pursuant to the conditions of this ITP and its attachments are roughly proportional in extent to the impacts of the taking authorized by this ITP;
- (4) The measures required by this ITP maintain Permittee's objectives to the greatest extent possible;
- (5) All required measures are capable of successful implementation;
- (6) This ITP is consistent with any regulations adopted pursuant to Fish and Game Code sections 2112 and 2114;
- (7) Permittee has ensured adequate funding to implement the measures required by this ITP as well as for monitoring compliance with, and the effectiveness of, those measures for the Project; and
- (8) Issuance of this ITP will not jeopardize the continued existence of the Covered Species based on the best scientific and other information reasonably available, and this finding includes consideration of the species' capability to survive and reproduce, and any adverse impacts of the taking on those abilities in light of (1) known population trends; (2) known threats to the species; and (3) reasonably foreseeable impacts on the species from other related projects and activities. Moreover, CDFW's finding is based, in part, on CDFW's express authority to amend the terms and conditions of this ITP without concurrence of the Permittee as necessary to avoid jeopardy and as required by law.

Attachment 1

**CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE
MITIGATION MONITORING AND REPORTING PROGRAM (MMRP)
CALIFORNIA ENDANGERED SPECIES ACT**

INCIDENTAL TAKE PERMIT NO. 2081-2022-018-03

PERMITTEE: City of Santa Rosa

**PROJECT: Robles Sewer Trunk Lining –
Arlington to Sunland**

PURPOSE OF THE MMRP

The purpose of the MMRP is to ensure that the impact minimization and mitigation measures required by the California Department of Fish and Wildlife (CDFW) for the above-referenced Project are properly implemented, and thereby to ensure compliance with section 2081 (b) of the Fish and Game Code and section 21081.6 of the Public Resources Code. A table summarizing the mitigation measures required by CDFW is attached. This table is a tool for use in monitoring and reporting on implementation of mitigation measures, but the descriptions in the table do not supersede the mitigation measures set forth in the California Incidental Take Permit (ITP) and in attachments to the ITP, and the omission of a permit requirement from the attached table does not relieve the Permittee of the obligation to ensure the requirement is performed.

OBLIGATIONS OF PERMITTEE

Mitigation measures must be implemented within the time periods indicated in the table that appears below. Permittee has the primary responsibility for monitoring compliance with all mitigation measures and for reporting to CDFW on the progress in implementing those measures. These monitoring and reporting requirements are set forth in the ITP itself and are summarized at the front of the attached table.

VERIFICATION OF COMPLIANCE, EFFECTIVENESS

CDFW may, at its sole discretion, verify compliance with any mitigation measure or independently assess the effectiveness of any mitigation measure.

TABLE OF MITIGATION MEASURES

The following items are identified for each mitigation measure: Mitigation Measure, Source, Implementation Schedule, Responsible Party, and Status/Date/Initials. The Mitigation Measure column summarizes the mitigation requirements of the ITP. The Source column identifies the ITP condition that sets forth the mitigation measure. The Implementation Schedule column shows the date or phase when each mitigation measure will be implemented. The Responsible Party column identifies the person or agency that is primarily responsible for implementing the mitigation measure. The Status/Date/Initials column shall be completed by the Permittee during preparation of each Status Report and the Final Mitigation Report, and must identify the implementation status of each mitigation measure, the date that status was determined, and the initials of the person determining the status.

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
BEFORE DISTURBING SOIL OR VEGETATION					
1	Designated Representative. Before starting Covered Activities, Permittee shall designate a representative (Designated Representative) responsible for communications with CDFW and overseeing compliance with this ITP. Permittee shall notify CDFW in writing before starting Covered Activities of the Designated Representative's name, business address, and contact information, and shall notify CDFW in writing if a substitute Designated Representative is selected or identified at any time during the term of this ITP.	ITP Condition # 3.1	Before commencing ground- or vegetation-disturbing activities	Permittee	
2	Designated Biologist(s). Permittee shall submit to CDFW in writing the name, qualifications, business address, and contact information of the Designated Biologist(s) using the Biologist Resume Form (https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=202869) or another format containing the same information at least 30 days before starting Covered Activities. Permittee shall ensure that the Designated Biologist(s) are knowledgeable and experienced in the biology, natural history, collecting and handling of the Covered Species. The Designated Biologist(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate or avoid the incidental take of individual Covered Species and to minimize disturbance of Covered Species' habitat. Permittee shall obtain CDFW approval of the Designated Biologist(s) in writing before starting Covered Activities and shall also obtain approval in advance, in writing, if the Designated Biologist(s) must be changed.	ITP Condition # 3.2	Before commencing ground- or vegetation-disturbing activities	Permittee	
3	Education Program. Permittee shall conduct an education program for all persons employed or otherwise working in the Project Area before performing any work. The program shall consist of a presentation from the Designated Biologist that includes a discussion of the biology and general behavior of the Covered Species, information about the distribution and habitat needs of the Covered Species, sensitivity of the Covered Species to human activities, its status pursuant to CESA including legal protection, recovery efforts, penalties for violations and Project-specific protective measures described in this ITP. Permittee shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry in the Project Area. Permittee shall provide interpretation for non-English speaking workers, and the same instruction shall be provided to any new workers before they are authorized to perform work in the Project Area. Upon completion of the program, employees shall sign a form stating they attended the program and understand all protection measures.	ITP Condition # 3.4	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
4	Trash Abatement. Permittee shall initiate a trash abatement program before starting Covered Activities and shall continue the program for the duration of the Project. Permittee shall ensure that trash and food items are contained in animal-proof containers and removed, ideally at daily intervals but at least once a week, to avoid attracting opportunistic predators such as ravens, coyotes, and feral dogs.	ITP Condition # 3.6	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
5	Delineation of Property Boundaries. Before starting Covered Activities, Permittee shall clearly delineate the boundaries of the Project Area with fencing, stakes, or flags. Permittee shall restrict all Covered Activities to within the fenced, staked, or flagged areas. Permittee shall maintain all fencing, stakes, and flags until the completion of Covered Activities.	ITP Condition # 3.9	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
6	Delineation of Habitat. Permittee shall clearly delineate habitat of the Covered Species within the Project Area with posted signs, posting stakes, flags, and/or rope or cord, and place fencing as necessary to minimize the disturbance of Covered Species' habitat.	ITP Condition # 3.10	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
7	Hazardous Materials. Permittee shall prepare and implement a Hazardous Materials Spill Prevention and Response Plan before starting Covered Activities. Permittee shall immediately stop and, pursuant to pertinent state and federal statutes and regulations, arrange for repair and clean up by qualified individuals of any fuel or hazardous waste leaks or spills at the time of occurrence, or as soon as it is safe to do so. Permittee shall exclude the storage and handling of hazardous materials from the Project Area and shall properly contain and dispose of any unused or leftover hazardous products off-site.	ITP Condition # 3.13	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
8	CDFW Access. Permittee shall provide CDFW staff with reasonable access to the Project and mitigation lands under Permittee control, and shall otherwise fully cooperate with CDFW efforts to verify compliance with or effectiveness of mitigation measures set forth in this ITP.	ITP Condition # 3.14	Before commencing ground- or vegetation-disturbing activities/ Entire Project	Permittee	
9	Geographic Information Systems Data Files. Before starting Covered Activities, the Permittee shall provide CDFW with Geographic Information Systems (GIS) data files for temporary habitat impact areas authorized under this ITP for each Covered Species. The Permittee shall provide any additional GIS data files for the Project or related Covered Species features within 30 days of CDFW's request. All GIS data files shall be provided in a format acceptable to CDFW.	ITP Condition # 4.1	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
10	Notification Before Commencement. The Designated Representative shall notify CDFW 14 calendar days before starting Covered Activities and shall document compliance with all pre-Project Conditions of Approval before starting Covered Activities.	ITP Condition # 4.2	Before commencing ground- or vegetation-disturbing activities	Permittee	
11	Seasonal Work Period. Permittee shall limit all Covered Activities including but not limited to vehicle travel in in High Traffic and Low Traffic Areas, bypass pipeline placement and removal, and construction and heavy equipment use (such as excavation, grading, contouring, trenching, road construction and repair, or disking) to the work period from June 15 to October 15 (Dry Season).	ITP Condition # 5.1	Before commencing ground- or vegetation-disturbing activities	Permittee	
12	<p>Work Restriction and Preparation for All Rain Events. Permittee or the Designated Biologist shall consult the 72-hour weather forecast from the National Weather Service (NWS) prior to the start of all ground disturbing activities involving construction and heavy equipment use (such as excavation, grading, contouring, trenching, road construction and repair, or disking). For a weekly forecast see https://forecast.weather.gov/MapClick.php?lat=38.4381&lon=-122.7125 and for a 48-hour percent precipitation forecast see https://graphical.weather.gov/sectors/northcalifornia.php and click on QPF in Amount of Precipitation row then toggle +/- 12 hours. Ground disturbing activities shall not begin unless a 72-hour no precipitation forecast is obtained covering the entire Project Area and necessary erosion control measures are implemented. The Designated Biologist shall keep precipitation records on-site, and these records shall be subject to CDFW inspection.</p> <ul style="list-style-type: none"> • If a 40 percent or greater chance of rain is forecasted, then ground disturbing activities shall cease at least 24 hours prior to the forecasted rain and the Designated Biologist shall confirm with the Permittee that all necessary erosion control measures have been implemented prior to the onset of precipitation, unless otherwise approved in writing by CDFW. • If ground-disturbing activities are approved by CDFW as described above, the Designated Biologist shall survey the work area before construction begins each day rain is forecast. If rain exceeds 0.25 inches during a 24-hour period, ground-disturbing activities shall cease. • Twenty-four hours after the rain ceases and once there is less than a 40 percent chance of precipitation in the 24-hour forecast, ground disturbing activities may continue. 	ITP Condition # 5.2	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
13	<p>Covered Species Temporary Barrier for High Traffic Areas. Permittee shall submit to CDFW for approval a Covered Species Temporary Barrier Plan for High Traffic Areas as shown on Figure 1 a minimum of 30 days prior to commencing Covered Activities. Permittee shall obtain CDFW's written approval of the Covered Species Temporary Barrier Plan prior to commencing Covered Activities. Prior to any ground disturbing Covered Activities and under the direct supervision of the Designated Biologist, Permittee shall install a temporary barrier to prevent Covered Species from dispersing into the Project Area within the four noncontiguous High Traffic Areas shown on Figure 1. The barrier shall be designed to allow Covered Species to leave the Project Area using a one-way funnel at 100-foot intervals along the barrier, unless otherwise approved by CDFW in writing. The barrier shall remain in place until Covered Activities are completed, including during periods of inactivity. The Permittee shall maintain and repair the barrier immediately to ensure that it is functional and without defects. Permittee shall provide refuge opportunities, such as coverboards (2-foot x 2-foot plywood), along both sides at 100-foot intervals on each side, and a climbing barrier at the top of the temporary barrier, unless otherwise approved by CDFW in writing. The Designated Biologist shall check Covered Species temporary barriers and refuge areas daily during Covered Activities and before, during, and following storm events, and weekly during periods of inactivity. Animals found within the interior of the barrier shall be relocated outside of the barrier as described in the Covered Species Relocation Plan (see Condition of Approval 5.8).</p>	ITP Condition # 5.7	Before commencing ground- or vegetation-disturbing activities	Permittee	
14	<p>Covered Species Relocation Plan. Permittee shall submit a Covered Species Relocation Plan (Relocation Plan) a minimum of 30 days prior to the commencement of Covered Activities for approval in writing by CDFW. The Designated Biologist shall follow this Relocation Plan to install the Covered Species temporary barrier (see Condition of Approval 5.7); install any pitfall traps, cover boards, and drift fence arrays; check any pitfall traps and cover boards according to the rainfall-dependent schedule; and relocate captured Covered Species adults, juveniles, and larva to a suitable site.</p>	ITP Condition # 5.8	Before commencing ground- or vegetation-disturbing activities	Permittee	
15	<p>Pre-Construction Covered Species Surveys in High Traffic Areas. The Designated Biologist shall complete walking surveys of the four noncontiguous High Traffic Areas as shown on Figure 1 prior to any initial ground disturbing activity and shall follow earthmoving equipment to look for Covered Species during initial site excavation and other ground disturbing activities. Areas to be surveyed shall include suitable habitat features for the Covered Species such as upland areas as well as under woody or other debris. Pre-construction surveys shall be conducted in conjunction with Covered Species temporary barrier installation. If a Covered Species is discovered, the Designated Biologist shall move the animal to a safe nearby location (e.g., mouth of small mammal burrow outside of the construction area) and monitor it until it is determined that the animal is not imperiled by predators or other dangers (see Condition of Approval 5.8).</p>	ITP Condition # 5.11	Before commencing ground- or vegetation-disturbing activities	Designated Biologist	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
16	<p>Pre-Construction Covered Species Surveys in Low Traffic Area Surveys. Immediately prior to all ground disturbing activities, such as vehicle or equipment traffic or bypass pipe setup within the Low Traffic Areas as shown on Figure 1, the Designated Biologist shall complete walking surveys ahead of each vehicle and equipment trip to survey for Covered Species. If a Covered Species is discovered, the Designated Biologist shall move the animal to a safe nearby location (e.g., mouth of small mammal burrow outside of the construction area) and monitor it until it is determined that the animal is not imperiled by predators or other dangers (see Condition of Approval 5.8).</p>	ITP Condition # 5.12	Before commencing ground- or vegetation-disturbing activities	Designated Biologist	
17	<p>Protocol Plant Surveys. In the plant survey season immediately prior to commencement of Project activities, the Designated Biologist shall complete protocol plant surveys of wetland habitat in the "Seasonal Wetland/Swale, Inside Action Area", "Wetted Grassland, Inside Action Area", "Seasonal Wetland/Swale, No Longer In Action Area, Sections of Permanent Easement Removed from Project Area", and Vernal Pool, No Longer in Action Area, Sections of Permanent Easement Removed from Project Area" as shown on Figure 3, and immediately adjacent areas, during the appropriate blooming seasons for Sonoma sunshine (<i>Blennosperma bakeri</i>), Sebastopol meadowfoam (<i>Limnanthes vincularis</i>), and Burke's goldfields (<i>Lasthenia burkei</i>) and prepare a survey report. Surveys shall utilize appropriate local reference sites and be conducted during the peak bloom period. Protocol surveys and reporting shall be conducted in accordance with the Santa Rosa Conservation Strategy, Appendix D (available here: https://www.fws.gov/library/collections/santa-rosa-plain-conservation-strategy) and CDFW's Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities (available here: https://wildlife.ca.gov/Conservation/Survey-Protocols#377281280-plants). The Permittee shall submit the survey report to CDFW and obtain CDFW's written approval of the report prior to commencing Covered Activities. If any blooming Sonoma sunshine, Sebastopol meadowfoam, or Burke's goldfields are detected, the Designated Biologist shall immediately contact the CDFW Representative via email (Nicholas.Wagner@wildlife.ca.gov) and the Project shall fully avoid the wetland habitat including avoiding placing wooden or plastic construction mats on the wetland occupied by the blooming plant until the plant is no longer blooming and has set seed as determined by the Designated Biologist. Additionally, Covered Activities at the wetland shall not proceed until CDFW has provided written approval: 1) of the Wetland Habitat Protection Plan pursuant to Condition of Approval 5.16, and 2) that placement of the construction mats on the wetland may proceed. All locations of Sonoma sunshine, Sebastopol meadowfoam, or Burke's goldfields shall be recorded in the field to ensure that the individuals can be located and avoided.</p>	ITP Condition # 5.13	Before commencing ground- or vegetation-disturbing activities	Designated Biologist	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
18	<p>Burrow and other Covered Species Potential Refugia Protection. The Designated Biologist shall mark for avoidance all small mammal burrows and other Covered Species potential refugia with flagging at the limits of access areas, including vehicle routes, and staging areas.</p> <p>All Project activities, such as vehicle and equipment access and placement of the bypass pipe and wooden or plastic mats, within the Low Traffic Areas shown on Figure 1 shall avoid small mammal burrows and other Covered Species refugia.</p>	ITP Condition # 5.15, 5.15.1	Before commencing ground- or vegetation-disturbing activities	Designated Biologist	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
19	<p>Wetland Habitat Protection Plan. Permittee shall submit to CDFW for approval a Wetland Habitat Protection Plan detailing how impacts to wetlands will be protected a minimum of 30 days prior to commencing Covered Activities. Permittee shall obtain CDFW's written approval of the Wetland Habitat Protection Plan prior to commencing Covered Activities. The Wetland Habitat Protection Plan shall include:</p> <ul style="list-style-type: none"> • Specifications on wooden or plastic construction mats placed over wetlands as shown on Figure 2; • Avoidance of placement of construction mats over Covered Species burrows or other refugia in Low Traffic Areas; • Avoidance of previously detected Sonoma sunshine in the "Seasonal Wetland/Swale, No Longer In Action Area, Sections of Permanent Easement Removed from Project Area" shown on Figure 3 near the Low Traffic Area and any Sonoma sunshine, Sebastopol meadowfoam, or Burke's goldfields detected during pre-construction protocol plant surveys or otherwise in accordance with Condition of Approval 5.13; • Areas outside of the High Traffic Areas and Low Traffic Areas, including "Areas of Permanent Easement Areas Removed from the Project", as shown in Figure 3 shall be fully avoided by the Project. • Limiting vehicle traffic to 40 total trips in the Low Traffic Areas; • Methods for determining appropriate soil dryness to avoid rutting; • Minimizing excavation within wetlands in High Traffic Areas and avoiding excavation in wetlands in Low Traffic Areas; • Recontouring to pre-construction conditions impacted wetlands in High Traffic Area pursuant to Condition of Approval 5.23; and • Any additional methods to physically avoid rutting from vehicle and equipment use and placement of the bypass pipeline. 	ITP Condition # 5.16	Before commencing ground- or vegetation-disturbing activities	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
20	<p>Covered Species Credits or Habitat Management Land Acquisition, and Restoration: CDFW has determined that permanent protection and perpetual management of compensatory habitat is necessary and required pursuant to CESA to fully mitigate Project-related impacts of the taking on the Covered Species that will result from implementation of the Covered Activities. This determination is based on factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will impact the habitat, and CDFW's estimate of the protected acreage required to provide for adequate compensation.</p> <p>To meet this requirement, the Permittee shall either purchase 2.58 acres of Covered Species credits from a CDFW-approved mitigation or conservation bank pursuant to Condition of Approval 6.2 below OR shall provide for both the permanent protection and management of 2.58 acres of Habitat Management (HM) lands pursuant to Condition of Approval 6.3 below and the calculation and deposit of the management funds pursuant to Condition of Approval 6.4 below. Purchase of Covered Species credits OR permanent protection and funding for perpetual management of HM lands must be complete before starting Covered Activities, or within 18 months of the effective date of this ITP if Security is provided pursuant to Condition of Approval 7 below for all uncompleted obligations. The Permittee shall also restore on-site 1.29 acres of temporarily impacted Covered Species habitat pursuant to Condition of Approval 6.6 below.</p>	ITP Condition # 6	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
21	<p>Cost Estimates. For the purposes of determining the Security amount, CDFW has estimated the cost sufficient for CDFW or its contractors to complete purchase of credits OR acquisition, protection, and perpetual management of the HM lands, and restoration of 1.29 acres of temporarily impacted habitat as follows:</p> <p>Purchase of Covered Species credits at a conservation or mitigation bank as described in Condition of Approval 6.2 OR acquisition, protection, and perpetual management of HM lands as described in Condition of Approval 6.3 estimated at \$304,500 per acre; therefore, for 2.58 acres the estimated cost is \$785,610.</p> <p>Restoration of on-site temporary impacts to Covered Species habitat as described in Condition of Approval 6.6 estimated at \$6,199 per acre; therefore, for 1.29 acres the estimated cost is \$7,997.</p> <p>All costs associated with CDFW engaging an outside contractor to complete the mitigation tasks, including but not limited to acquisition, protection, and perpetual funding and management of the HM lands and restoration of temporarily disturbed habitat. These costs include but are not limited to the cost of issuing a request for proposals, transaction costs, contract administration costs, and costs associated with monitoring the contractor's work estimated at \$40,000.</p>	ITP Condition # 6.1	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
22	<p>Covered Species Credits. If the Permittee elects to purchase Covered Species credits to complete compensatory mitigation obligations, then Permittee shall purchase 2.58 acres of Covered Species credits from a CDFW-approved mitigation or conservation bank prior to initiating Covered Activities, or no later than 18 months from the issuance of this ITP if Security is provided pursuant to Condition of Approval 7 below. Prior to purchase of Covered Species credits, Permittee shall obtain CDFW approval to ensure the mitigation or conservation bank is appropriate to compensate for the impacts of the Project. Permittee shall submit to CDFW a copy of the Bill of Sale(s) and Payment Receipt prior to initiating Covered Activities or within 18 months from issuance of this ITP if Security is provided.</p>	ITP Condition # 6.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
23	<p>Habitat Management Lands Acquisition and Protection. If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall:</p> <p>Fee Title. Transfer fee title of the HM lands to CDFW pursuant to terms approved in writing by CDFW. Alternatively, CDFW, in its sole discretion, may authorize a governmental entity, special district, non-profit organization, for-profit entity, person, or another entity to hold title to and manage the property provided that the district, organization, entity, or person meets the requirements of Government Code sections 65965-65968, as amended.</p> <p>Conservation Easement. If CDFW does not hold fee title to the HM lands, CDFW shall act as grantee for a conservation easement over the HM lands or shall, in its sole discretion, approve a non-profit entity, public agency, or Native American tribe to act as grantee for a conservation easement over the HM lands provided that the entity, agency, or tribe meets the requirements of Civil Code section 815.3. If CDFW elects not to be named as the grantee for the conservation easement, CDFW shall be expressly named in the conservation easement as a third-party beneficiary. The Permittee shall obtain CDFW written approval of any conservation easement before its execution or recordation. No conservation easement shall be approved by CDFW unless it complies with Civil Code sections 815-816, as amended, and Government Code sections 65965-65968, as amended and includes provisions expressly addressing Government Code sections 65966(j) and 65967(e). Because the "doctrine of merger" could invalidate the conservation interest, under no circumstances can the fee title owner of the HM lands serve as grantee for the conservation easement.</p>	ITP Conditions # 6.3, 6.3.1, 6.3.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
24	<p>HM Lands Approval. Obtain CDFW written approval of the HM lands before acquisition and/or transfer of the land by submitting, at least three months before acquisition and/or transfer of the HM lands, documentation identifying the land to be purchased or property interest conveyed to an approved entity as mitigation for the Project's impacts on Covered Species;</p>	ITP Condition # 6.3.3	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
25	<p>HM Lands Documentation. Provide a recent preliminary title report, Phase I Environmental Site Assessment, and other necessary documents (please contact CDFW for document list). All documents conveying the HM lands and all conditions of title are subject to the approval of CDFW, and if applicable, the Wildlife Conservation Board and the Department of General Services;</p>	ITP Condition # 6.3.4	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
26	<p>Land Manager. Designate both an interim and long-term land manager approved by CDFW. The interim and long-term land managers may, but need not, be the same. The interim and/or long-term land managers may be the landowner or another party. Documents related to land management shall identify both the interim and long-term land managers. Permittee shall notify CDFW of any subsequent changes in the land manager within 30 days of the change. If CDFW will hold fee title to the mitigation land, CDFW will also act as both the interim and long-term land manager unless otherwise specified. The grantee for the conservation easement cannot serve as the interim or long-term manager without the express written authorization of CDFW in its sole discretion.</p>	ITP Condition # 6.3.5	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
27	<p>Start-Up Activities. Provide for the implementation of start-up activities, including the initial site protection and enhancement of HM lands, once the HM lands have been approved by CDFW. Start-up activities include, at a minimum: (1) preparing and implementing a Development and Restoration Plan approved by CDFW in writing; (2) preparing an Interim Management Plan, including the costs of interim management activities, approved by CDFW in writing; (3) preparing a Long-Term Management Plan, including the endowment assessment (see Condition of Approval 6.4.2), approved by CDFW in writing; (see https://www.wildlife.ca.gov/Conservation/Planning/Banking/Templates); (4) conducting a baseline biological assessment and land survey report within four months of recording or transfer; (5) developing and transferring Geographic Information Systems (GIS) data if applicable; (6) establishing initial fencing; (7) conducting litter removal; (8) conducting initial habitat restoration or enhancement, if applicable; and (9) installing signage;</p>	ITP Condition # 6.3.6	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
28	<p>Interim Management (Initial and Capital). Provide for the interim management of the HM lands. The Permittee shall ensure that the interim land manager implements the interim management of the HM lands as described in the final Interim Management Plan conservation easement approved by CDFW. The interim management period shall be a minimum of three years from the date of HM land acquisition and protection and full funding of the Endowment and includes expected management following start-up activities. Interim management period activities described in the final Interim Management Plan shall include but not be limited to fence repair, continuing trash removal, site monitoring, and vegetation and invasive species management.</p> <p>Permittee shall either (1) provide Security to CDFW for the minimum of three years of interim management that the land owner, Permittee, or land manager agrees to manage and pay for at their own expense, (2) establish an escrow account with written instructions approved in advance in writing by CDFW to pay the land manager annually in advance, or (3) establish a short-term enhancement account with CDFW or a CDFW-approved entity for payment to the land manager.</p>	ITP Condition # 6.3.7	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
29	<p>Endowment Fund. If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall ensure that the HM lands are perpetually managed, maintained, and monitored by the long-term land manager as described in this ITP, the conservation easement, and the Long-Term Management Plan approved by CDFW . After obtaining CDFW approval of the HM lands, Permittee shall provide long-term management funding for the perpetual management of the HM lands by establishing a long-term management fund (Endowment). The Endowment is a sum of money, held in a CDFW-approved fund that is permanently restricted to paying the costs of long-term management and stewardship of the mitigation property for which the funds were set aside, which costs include the perpetual management, maintenance, monitoring, and other activities on the HM lands consistent with this ITP, the conservation easement, Long-Term Management Plan required by Condition of Approval 6.3.6. Endowment as used in this ITP shall refer to the endowment deposit and all interest, dividends, other earnings, additions and appreciation thereon. The Endowment shall be governed by this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.</p> <p>After the interim management period, Permittee shall ensure that the designated long-term land manager implements the management and monitoring of the HM lands according to the Long-Term Management Plan. The long-term land manager shall be obligated to manage and monitor the HM lands in perpetuity to preserve their conservation values in accordance with this ITP, the conservation easement, and the Long-Term Management Plan. Such activities shall be funded through the Endowment.</p>	ITP Condition # 6.4	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
30	<p>Identify an Endowment Manager. The Endowment shall be held by the Endowment Manager, which shall be either CDFW or another entity qualified pursuant to Government Code sections 65965-65968, as amended.</p> <p>Permittee shall submit to CDFW a written proposal that includes: (i) the name of the proposed Endowment Manager; (ii) whether the proposed Endowment Manager is a governmental entity, special district, nonprofit organization, community foundation, or congressionally chartered foundation; (iii) whether the proposed Endowment Manager holds the property or an interest in the property for conservation purposes as required by Government Code section 65968(b)(1) or, in the alternative, the basis for finding that the Project qualifies for an exception pursuant to Government Code section 65968(b)(2); and (iv) a copy of the proposed Endowment Manager's certification pursuant to Government Code section 65968(e).</p> <p>Within thirty days of CDFW's receipt of Permittee's written proposal, CDFW shall inform Permittee in writing if it determines the proposal does not satisfy the requirements of Fish and Game Code section 2081(b)(3) and, if so, shall provide Permittee with a written explanation of the reasons for its determination. If CDFW does not provide Permittee with a written determination within the thirty-day period, the proposal shall be deemed consistent with Section 2081(b)(3).</p>	ITP Condition # 6.4.1	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
31	<p>Calculate the Endowment Funds Deposit. After obtaining CDFW written approval of the HM lands and Endowment Manager, Permittee shall prepare an endowment assessment (equivalent to a Property Analysis Record (PAR)) to calculate the amount of funding necessary to ensure the long-term management of the HM lands (Endowment Deposit Amount) and include the endowment assessment in the Long-Term Management Plan. Note that the endowment for the easement holder is a separate cost from the Endowment Deposit Amount and should not be included in this calculation. The Permittee shall submit to CDFW for review and approval the results of the endowment assessment before transferring funds to the Endowment Manager.</p> <p>Capitalization Rate and Fees. Permittee shall obtain the capitalization rate from the selected Endowment Manager for use in calculating the endowment assessment and adjust for any additional administrative, periodic, or annual fees.</p> <p>Endowment Buffers/Assumptions. Permittee shall include in the endowment assessment assumptions the following buffers for endowment establishment and use that will substantially ensure long-term viability and security of the Endowment:</p> <p>10 Percent Contingency. A 10 percent contingency shall be added to each endowment calculation to hedge against underestimation of the fund, unanticipated expenditures, inflation, or catastrophic events.</p> <p>Three Years Delayed Spending. The endowment shall be established assuming spending will not occur for the first three years after full funding.</p> <p>Non-Annualized Expenses. For all large capital expenses to occur periodically but not annually such as fence replacement or well replacement, payments shall be withheld from the annual disbursement until the year of anticipated need or upon request to Endowment Manager and CDFW.</p>	ITP Condition # 6.4.2	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
32	<p>Transfer Long-Term Endowment Funds. Permittee shall transfer the long-term endowment funds to the Endowment Manager upon CDFW approval of the Endowment Deposit Amount identified above.</p>	ITP Condition # 6.4.3	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
33	<p>Management of the Endowment. The approved Endowment Manager may pool the Endowment with other endowments for the operation, management, and protection of HM lands for local populations of the Covered Species but shall maintain separate accounting for each Endowment. The Endowment Manager shall, at all times, hold and manage the Endowment in compliance with this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.</p> <p>Notwithstanding Probate Code sections 18501-18510, the Endowment Manager shall not make any disbursement from the Endowment that will result in expenditure of any portion of the principal of the endowment without the prior written approval of CDFW in its sole discretion. Permittee shall ensure that this requirement is included in any agreement of any kind governing the holding, investment, management, and/or disbursement of the Endowment funds.</p> <p>Notwithstanding Probate Code sections 18501-18510, if CDFW determines in its sole discretion that an expenditure needs to be made from the Endowment to preserve the conservation values of the HM lands, the Endowment Manager shall process that expenditure in accordance with directions from CDFW. The Endowment Manager shall not be liable for any shortfall in the Endowment resulting from CDFW's decision to make such an expenditure.</p>	ITP Condition # 6.4.4	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
34	Reimburse CDFW. Permittee shall reimburse CDFW for all reasonable costs incurred by CDFW related to issuance and monitoring of this ITP, including, but not limited to transaction fees, account set-up fees, administrative fees, title and documentation review and related title transactions, costs incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW.	ITP Condition # 6.5	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
35	<p>Security: The Permittee may proceed with Covered Activities only after the Permittee has ensured funding (Security) to complete any activity required by Condition of Approval 6 that has not been completed before Covered Activities begin. Permittee shall provide Security as follows:</p> <p>Security Amount. The Security shall be in the amount of \$833,607 or in the amount identified in Condition of Approval 6.1 specific to the obligation that has not been completed. This amount is determined by CDFW based on the cost estimates identified in Condition of Approval 6.1 above, sufficient for CDFW or its contractors to complete purchasing Covered Species credits OR HM land acquisition, property enhancement, startup costs, initial management, long-term management, and monitoring, AND restoration of on-site temporary impacts.</p> <p>Security Form. The Security shall be in the form of an irrevocable letter of credit (see Attachment 3) or another form of Security approved in advance in writing by CDFW's Office of the General Counsel.</p> <p>Security Timeline. The Security shall be provided to CDFW before Covered Activities begin or within 30 days after the effective date of this ITP, whichever occurs first.</p> <p>Security Holder. The Security shall be held by CDFW or in a manner approved in advance in writing by CDFW.</p> <p>Security Transmittal. Permittee shall transmit security to CDFW by way of an approved instrument such as an escrow agreement, irrevocable letter of credit, or other.</p>	ITP Condition # 7, 7.1 to 7.5	Before commencing ground- or vegetation-disturbing activities (or within 18 months of issuance of the ITP if Security is provided)	Permittee	
DURING CONSTRUCTION					

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
36	Designated Biologist Authority. To ensure compliance with the Conditions of Approval of this ITP, the Designated Biologist shall immediately stop any activity that does not comply with this ITP and/or order any reasonable measure to avoid the unauthorized take of an individual of the Covered Species. Permittee shall provide unfettered access to the Project Site and otherwise facilitate the Designated Biologist in the performance of his/her duties. If the Designated Biologist is unable to comply with the ITP, then the Designated Biologist shall notify the CDFW Representative immediately. Permittee shall not enter into any agreement or contract of any kind, including but not limited to non-disclosure agreements and confidentiality agreements, with its contractors and/or the Designated Biologist that prohibit or impede open communication with CDFW, including but not limited to providing CDFW staff with the results of any surveys, reports, or studies or notifying CDFW of any non-compliance or take. Failure to notify CDFW of any non-compliance or take or injury of a Covered Species as a result of such agreement or contract may result in CDFW taking actions to prevent or remedy a violation of this ITP.	ITP Condition # 3.3	Entire Project	Permittee	
37	Construction Monitoring Documentation. The Designated Biologist(s) shall maintain construction-monitoring documentation on-site in either hard copy or digital format throughout the construction period, which shall include a copy of this ITP with attachments and a list of signatures of all personnel who have successfully completed the education program. Permittee shall ensure a copy of the construction-monitoring documentation is available for review at the Project site upon request by CDFW.	ITP Condition # 3.5	Entire Project	Designated Biologist	
38	Dust Control. Permittee shall implement dust control measures during Covered Activities to facilitate visibility for monitoring of the Covered Species by the Designated Biologist. Permittee shall keep the amount of water used to the minimum amount needed and shall not allow water to form puddles.	ITP Condition # 3.7	Entire Project	Permittee	
39	Erosion Control Materials. Permittee shall prohibit use of erosion control materials potentially harmful to Covered Species and other species, such as monofilament netting (erosion control matting) or similar material, in potential Covered Species' habitat.	ITP Condition # 3.8	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
40	Project Access. Project-related personnel shall access the Project Area using existing routes, and shall not cross Covered Species' habitat outside of or en route to the Project Area. Permittee shall restrict Project-related vehicle traffic to established roads, staging, and parking areas or as detailed in the High Traffic and Low Traffic Areas specifications of the Project Description. Permittee shall ensure that vehicle speeds do not exceed 20 miles per hour to avoid Covered Species on or traversing the roads. If Permittee determines construction of routes for travel are necessary outside of the Project Area, the Designated Representative shall contact CDFW for written approval before carrying out such an activity. CDFW may require an amendment to this ITP, among other reasons, if additional take of Covered Species will occur as a result of the Project modification.	ITP Condition # 3.11	Entire Project	Permittee	
41	Staging Areas. Permittee shall confine all Project-related parking, storage areas, laydown sites, equipment storage, and any other surface-disturbing activities to the Project Area using, to the extent possible, previously disturbed areas. Additionally, Permittee shall not use or cross Covered Species' habitat outside of the marked Project Area unless provided for as described in Condition of Approval 3.11 of this ITP.	ITP Condition # 3.12	Entire Project	Permittee	
42	Notification of Non-Compliance. The Designated Representative shall immediately notify CDFW if the Permittee is not in compliance with any Condition of Approval of this ITP, including but not limited to any actual or anticipated failure to implement measures within the time periods indicated in this ITP and/or the MMRP. The Designated Representative shall follow up within 24 hours with a written report to CDFW describing, in detail, any non-compliance with this ITP and suggested measures to remedy the situation.	ITP Condition # 4.3	Entire Project	Designated Representative	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
43	<p>Compliance Monitoring. The Designated Biologist shall be on-site daily when Covered Activities occur unless otherwise approved in writing by CDFW. The Designated Biologist shall also conduct compliance inspections and check Covered Species temporary barriers and refuge areas pursuant to Condition of Approval 5.7 a minimum of once per week during periods of inactivity, and shall check Covered Species temporary barriers and refuge areas before, during, and following storm events pursuant to Condition of Approval 5.7, unless otherwise approved in writing by CDFW. The Designated Biologist shall conduct compliance inspections to:</p> <ul style="list-style-type: none"> (1) minimize incidental take of the Covered Species; (2) prevent unlawful take of species; (3) check for compliance with all measures of this ITP; (4) check all exclusion zones; and (5) ensure that signs, stakes, and fencing are intact, and that Covered Activities are only occurring in the Project Area. <p>The Designated Representative or Designated Biologist shall prepare daily written observation and inspection records summarizing oversight activities and compliance inspections, observations of Covered Species and their sign, survey results, and monitoring activities required by this ITP.</p>	ITP Condition # 4.4	Entire Project	Designated Biologist	
44	<p>Reporting of Habitat Impacts. Permittee shall monitor, calculate, and record in an electronic ledger the total amount of temporary impacts to Covered Species habitat and shall at a minimum account for these impacts based upon grassland and wetland habitat types.</p>	ITP Condition # 4.5	Entire Project	Permittee	
45	<p>Reporting of Vehicle and Equipment Trips within Low Traffic Areas. Permittee shall monitor and record in an electronic ledger the total number of vehicle and equipment trips within Low Traffic Areas, which shall be limited to 40 total trips pursuant to Condition of Approval 5.6.1. A "trip" shall consist of one-way travel.</p>	ITP Condition # 4.6	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
46	Monthly Compliance Report. The Designated Representative or Designated Biologist shall compile the observation and inspection records identified in Conditions of Approval 4.3, 4.4, 4.5, and 4.6 into a Monthly Compliance Report and submit it to CDFW along with a copy of the MMRP table with notes showing the current implementation status of each mitigation measure. Monthly Compliance Reports shall be submitted to the CDFW offices listed in the Notices section of this ITP and via e-mail to CDFW's Regional Representative and Headquarters CESA Program. At the time of this ITP's approval, the CDFW Regional Representative is Nick Wagner (Nicholas.Wagner@wildlife.ca.gov) and Headquarters CESA Program email is CESA@wildlife.ca.gov. CDFW may at any time increase the timing and number of compliance inspections and reports required under this provision depending upon the results of previous compliance inspections. If CDFW determines the reporting schedule must be changed, CDFW will notify Permittee in writing of the new reporting schedule.	ITP Condition # 4.7	Entire Project	Designated Representative/ Designated Biologist	
47	Annual Status Report. Permittee shall provide CDFW with an Annual Status Report (ASR) no later than January 31 of every year beginning with issuance of this ITP and continuing until CDFW accepts the Final Mitigation Report identified below. Each ASR shall include, at a minimum: (1) a summary of all Monthly Compliance Reports for that year identified in Condition of Approval 4.7; (2) a general description of the status of the Project Area and Covered Activities, including actual or projected completion dates, if known; (3) a copy of the table in the MMRP with notes showing the current implementation status of each mitigation measure; (4) an assessment of the effectiveness of each completed or partially completed mitigation measure in avoiding, minimizing and mitigating Project impacts; (5) all available information about Project-related incidental take of the Covered Species; (6) an accounting of the number of acres subject to temporary disturbance, both for the prior calendar year, and a total since ITP issuance; and (7) information about other Project impacts on the Covered Species.	ITP Condition # 4.8	Entire Project	Permittee	
48	CNDDDB Observations. The Designated Biologist shall submit all observations of Covered Species to CDFW's California Natural Diversity Database (CNDDDB) within 60 calendar days of the observation and the Designated Biologist shall include copies of the submitted forms with the next Monthly Compliance Report or ASR, whichever is submitted first relative to the observation.	ITP Condition # 4.9	Entire Project	Designated Biologist	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
49	Notification of Take or Injury. Permittee shall immediately notify the Designated Biologist if a Covered Species is taken or injured by a Project-related activity, or if a Covered Species is otherwise found dead or injured within the vicinity of the Project. The Designated Biologist or Designated Representative shall provide initial notification to CDFW by calling the Regional Office at (707) 428-2002 and the CDFW Regional Representative in the Notices section. The initial notification to CDFW shall include information regarding the location, species, and number of animals/plants taken or injured and the ITP Number. Following initial notification, Permittee shall send CDFW a written report within two calendar days. The report shall include the date and time of the finding or incident, location of the animal/plant or carcass, and if possible, provide a photograph, explanation as to cause of take or injury, and any other pertinent information.	ITP Condition # 4.11	Entire Project	Permittee	
50	Notification of Non-Native Salamanders or Hybrids. The Designated Biologist shall immediately notify CDFW if a suspected barred tiger salamander (<i>Ambystoma tigrinum mavortium</i>) or California tiger salamander and non-native salamander hybrid is found within the Project Area within 24 hours by calling the Regional Office at (707) 428-2002 and the CDFW Regional Representative in the Notices section. Permittee shall consult with CDFW to determine measures to address non-native or hybrid populations.	ITP Condition # 4.12	Entire Project	Designated Biologist	
51	Time of Day Work Restriction. Permittee shall terminate all Covered Activities 30 minutes before sunset and shall not resume Covered Activities until 30 minutes after sunrise, unless otherwise approved in writing by CDFW. The Permittee shall use sunrise and sunset times established by the U.S. Naval Observatory Astronomical Applications Department for determining when Covered Activities shall terminate and resume.	ITP Condition # 5.3	Entire Project	Permittee	
52	Personnel Restriction. Permittee shall ensure that all construction activities and personnel, including subcontractors, are restricted to the active construction area surrounded by the CTS temporary barrier and public roads.	ITP Condition # 5.4	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
53	<p>Prevention of Spread of Invasive Species. Permittee shall conduct Project activities in a manner that prevents the introduction, transfer, and spread of invasive species, including plants, animals, and microbes (e.g., algae, fungi, parasites, bacteria, etc.), from one Project site and/or waterbody to another. All equipment including excavators, trucks, and hand tools that may have come in contact with invasive plants or the seeds of these plants will be carefully cleaned before arriving on the site and shall also be carefully cleaned before removal from the site to prevent dispersal. Prevention Best Management Practices (BMPs) and guidelines for invasive plants can be found on the California Invasive Plant Council's (Cal-IPC) website at: http://www.cal-ipc.org/ip/prevention/index.php and for invasive mussels and aquatic species can be found at the Stop Aquatic Hitchhikers website: http://www.protectyourwaters.net/.</p>	ITP Condition # 5.5	Entire Project	Permittee	
54	<p>Covered Activities within Low Traffic Areas. Covered Activities within the Low Traffic Areas shall be limited to wheeled vehicle and equipment traffic, foot traffic, and the placement of the above-ground bypass pipeline.</p> <p>Vehicle and equipment traffic within the Low Traffic Areas shall be limited to 40 total trips. A "trip" shall consist of one-way travel. Each trip shall be monitored and recorded pursuant to Condition of Approval 4.6.</p> <p>The bypass pipe shall be propped up on 4-inch-wide by 4-inch-tall by 18-inch-long wooden blocks every 50 feet within the Low Traffic Areas creating a gap beneath the bypass pipe every 50 feet large enough to allow for passage of Covered Species. The wooden block shall be removed once the bypass pipe is no longer in place.</p> <p>Project activities within the Low Traffic Areas shown on Figure 1 shall avoid small mammal burrows and other Covered Species refugia, as further described in Condition of Approval 5.15.1.</p>	ITP Condition # 5.6, 5.6.1, 5.6.2, 5.6.3	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
55	<p>Covered Species Handling and Injury. Covered Species shall be handled and assessed according to the Restraint and Handling of Live Amphibians, USGS, National Wildlife Health Center (D. Earl Greene, ARMI SOP NO. 100; 16 February 2001) (Attachment 2). If an injured Covered Species is found during the Project term, the individual shall be evaluated by the Designated Biologist who shall then immediately contact the CDFW Regional Representative, via email and telephone, to discuss the next steps pursuant to Condition of Approval 4.11. If the CDFW Regional Representative cannot be contacted immediately, the injured Covered Species shall be placed in a shaded container and kept moist. If the CDFW Regional Representative is not available or has not responded within two hours of initial attempts, then the following steps shall be taken by the Designated Biologist:</p> <p>If the injury is minor or healing and the Covered Species is likely to survive, the Covered Species shall be released immediately in accordance with the Condition of Approval 5.8.</p> <p>If it is determined that the Covered Species has major or serious injuries as a result of Project-related activities the Designated Biologist shall immediately take it to a CDFW approved wildlife rehabilitation or veterinary facility. If taken into captivity the individual shall remain in captivity and not be released into the wild unless it has been kept in quarantine and the release is authorized by the CDFW and U.S. Fish and Wildlife Service. Permittee shall bear any costs associated with the care or treatment of such injured Covered Species. The circumstances of the injury, the procedure followed, and the final disposition of the injured animal shall be documented in a written incident report as described in Condition of Approval 4.11</p>	ITP Condition # 5.9, 5.9.1, 5.9.2	Entire Project	Designated Biologist	
56	<p>Atypical Dens and Burrows. Permittee shall ensure that all construction pipes, culverts, or similar structures that are stored in the Project Area for one or more overnight periods are either securely capped prior to storage or thoroughly inspected by the Designated Biologist before the pipe is subsequently buried, capped, or otherwise used or moved in any way. If a Covered Species is discovered inside a pipe by the Designated Biologist or anyone else, the Designated Biologist shall move the animal to a safe nearby location per the Relocation Plan described in Condition of Approval 5.8.</p>	ITP Condition # 5.10	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
57	<p>Trench Escape and Inspection. The Designated Biologist shall inspect all open holes, sumps, and trenches within the Project Area at the beginning of each working day for trapped animals. To prevent inadvertent entrapment of Covered Species, the Designated Biologist shall oversee the covering of all trenches, holes, sumps, or other excavations with a greater than 1:1 (45 degree) slope of any depth with barrier material at the close of each working day such that Covered Species are unable to dig or squeeze under the barrier and become entrapped. The outer two feet of excavation cover shall conform to solid ground so that gaps do not occur between the cover and the ground and secured with soil staples or similar means to prevent gaps.</p> <p>Each morning prior to beginning Covered Activities and immediately before trenches, holes, sumps, or other excavations are back-filled, the Designated Biologist shall thoroughly inspect them for Covered Species. Trenches, holes, sumps, or other excavations that are covered long-term shall be inspected at the beginning of each working day to ensure inadvertent entrapment has not occurred. Permittee shall cease all Covered Activities in the vicinity and notify the Designated Biologist immediately if any worker discovers that Covered Species have become trapped. If at any time a trapped Covered Species is discovered by the Designated Biologist or anyone else, the Designated Biologist shall capture and relocate the animal to a safe nearby location per the Relocation Plan described in Condition of Approval 5.8.</p> <p>If the open holes, sumps, trenches, or excavations cannot be covered, then a Covered Species temporary barrier shall be installed around any trenches, holes, sumps, or other excavations to prevent Covered Species from becoming trapped. Refuge opportunities, such as coverboards shall be provided on the outside perimeter of the barrier.</p>	ITP Condition # 5.14, 5.14.1	Entire Project	Designated Biologist	
58	<p>Burrow and other Covered Species Potential Refugia Protection. The Designated Biologist shall mark for avoidance all small mammal burrows and other Covered Species potential refugia with flagging at the limits of access areas, including vehicle routes, and staging areas.</p> <p>All Project activities, such as vehicle and equipment access and placement of the bypass pipe and wooden or plastic mats, within the Low Traffic Areas shown on Figure 1 shall avoid small mammal burrows and other Covered Species refugia.</p>	ITP Condition # 5.15, 5.15.1	Entire Project	Designated Biologist	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
59	Temporary Impacts. To be considered a temporary impact, Permittee shall recontour and seed all temporary impact areas by October 15 of the year of the impact and the impacted area soils must be suitable to support small mammal burrows. Heavily compacted soil is not considered suitable. Additionally, these areas shall be made available to fossorial mammals and shall not be surrounded by fencing that limits access. Impacted areas that do not meet these requirements will be considered permanent impacts, an Amendment will be required, and additional Habitat Management Lands pursuant to Condition of Approval 6 may be required.	ITP Condition # 5.17	Entire Project	Permittee	
60	Refueling and Equipment Maintenance. Refueling of construction equipment and vehicles may not occur within 175 feet of any water body or anywhere that spilled fuel could drain to a wetland. Tarps or similar material shall be placed underneath construction equipment and vehicles, when refueling, to capture incidental spillage of fuels. Equipment and vehicles operating in the project area shall be checked and maintained daily to prevent leaks of fuels, lubricants, or other liquids.	ITP Condition # 5.18	Entire Project	Permittee	
61	Erosion and Dust Control. Permittee shall prepare and implement a detailed Erosion Control Plan (Plan). The Plan shall: 1) include appropriate erosion control measures to be implemented during construction, and 2) limit ground disturbance activities to dry weather to avoid increased surface water runoff and erosion onsite, and sedimentation in sensitive habitats located offsite. Erosion control elements shall be checked and maintained daily to ensure proper function and shall not contain monofilament netting. Any straw wattles are used shall be made from biodegradable materials only. Runoff from dust control shall be retained in the construction site and prevented from flowing into adjacent wetlands by installing appropriate erosion control devices, such as silt fences. Dust control water trucks shall be used throughout construction. The Designated Biologist shall check weekly the effectiveness of dust control measures and direct implementation of further measures if necessary to prevent damage to wetlands. Excessive dust control watering shall not occur. Puddling or sheeting flow of dust control water shall be prevented.	ITP Condition # 5.19	Entire Project	Permittee	
62	Designated Areas for Stockpiling Materials. Permittee shall ensure that all construction materials placed in the Project Area are not placed in areas where they could impact any wetlands.	ITP Condition # 5.20	Entire Project	Permittee	
63	Groundwater Encountered. Nuisance groundwater encountered during excavation shall be discharged at a location where it will infiltrate into the soil, resulting in no overland flow. Discharged water shall not be allowed to flow into wetlands. Permittee shall ensure that best management practices are used to control runoff water quality.	ITP Condition # 5.21	Entire Project	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
64	Spoil Pile Stabilization. Active spoil piles shall be covered/stabilized adequately when rainy conditions are evident (see Condition of Approval 5.2) or at any time when spoil material could enter Covered Species habitat.	ITP Condition # 5.22	Entire Project	Permittee	
65	Recontour Temporarily Impacted Wetlands within High Traffic Area. Temporarily impacted wetlands within the High Traffic Area shall be recontoured to pre-construction hydrological conditions. The Designated Biologist shall ensure that pre-construction hydrological conditions are adequately documented and that recontouring achieves pre-construction hydrological conditions. The Designated Biologist shall take pre- and post-construction photos of the impacted wetlands and provide documentation to CDFW demonstrating recontouring achieves pre-construction hydrological conditions, and upon Project completion Permittee shall obtain CDFW's written approval that pre-construction hydrological conditions have been achieved.	ITP Condition # 5.23	Entire Project	Permittee	
66	Pesticides Prohibited. Permittee shall ensure that rodenticides or other poisons used in the control of fossorial (burrow-dwelling) mammals, and herbicides, are not used within the Project Area during the term of this ITP unless otherwise approved in writing by CDFW.	ITP Condition # 5.24	Entire Project	Permittee	
67	Herbicides Prohibited. Permittee shall ensure that herbicides or other poisons used to control plants are not used within the Project Area unless otherwise approved in writing by CDFW.	ITP Condition # 5.25	Entire Project	Permittee	
POST-CONSTRUCTION					
68	Refuse Removal. Upon completion of Covered Activities, Permittee shall remove from the Project Area and properly dispose of all temporary fill and construction refuse, including, but not limited to, broken equipment parts, wrapping material, cords, cables, wire, rope, strapping, twine, buckets, metal or plastic containers, and boxes.	ITP Condition # 3.15	Post-construction	Permittee	

	Mitigation Measure	Source	Implementation Schedule	Responsible Party	Status / Date / Initials
69	<p>Final Mitigation Report. No later than 45 days after completion of all mitigation measures, Permittee shall provide CDFW with a Final Mitigation Report. The Designated Biologist shall prepare the Final Mitigation Report which shall include, at a minimum: (1) a summary of all Monthly Compliance Reports and all ASRs; (2) a copy of the table in the MMRP with notes showing when each of the mitigation measures was implemented; (3) all available information about Project-related incidental take of the Covered Species; (4) information about other Project impacts on the Covered Species; (5) beginning and ending dates of Covered Activities; (6) an assessment of the effectiveness of this ITP's Conditions of Approval in minimizing and fully mitigating Project impacts of the taking on Covered Species; (7) recommendations on how mitigation measures might be changed to more effectively minimize take and mitigate the impacts of future projects on the Covered Species; and (8) any other pertinent information.</p>	ITP Condition # 4.10	Post-construction and after completion of mitigation	Permittee	
70	<p>Habitat Restoration. Permittee shall restore on-site the 1.29 acres of Covered Species habitat that will be temporarily impacted during construction to pre-Project or better conditions. At least 30 days prior to the initiation of Project construction, the Permittee shall submit a Vegetation Restoration Plan (Plan) to CDFW for approval to facilitate revegetation of the 1.29 acres of temporary construction impacts on-site. The Permittee shall obtain CDFW's written approval of the Plan and ensure that the Plan is successfully implemented. The Plan shall identify plant species that will be damaged or removed during Project activities and include detailed specifications for restoring all temporarily impacted areas, such as seed mixes and application methods. For seeding and mulching exposed slopes, the seed blend shall include locally native grass species at a ratio appropriate to the site. The Plan shall also indicate the best time of year for seeding to occur, three (3) years of monitoring, maintenance, and reporting, and success criteria. Permittee is responsible for monitoring and maintaining the restored areas for a period of three (3) years or until the Plan success criteria have been met, whichever is longer. The Plan shall include regular watering of plantings to ensure adequate growth if necessary. Permittee shall complete seeding/planting as soon as possible, but no later than October 15 of the year of impact. At the discretion of CDFW, all exposed areas where seeding/planting is unsuccessful after 90 days shall receive appropriate soil preparation and a second application of seeding/planting, straw, or mulch as soon as is practical on a date mutually agreed upon.</p>	ITP Condition # 6.6	Post-construction	Permittee

Restraint and Handling of Live Amphibians

STANDARD OPERATING PROCEDURE
ARMI SOP No. 100

Revised, 16 February 2001

- I. PURPOSE: Provide guidelines for humane handling of amphibians so that injury and distress to the amphibian are minimized.
- II. SCOPE: These guidelines apply to larvae and tadpoles, as well as adult frogs, toads, salamanders and neotenes. Because of their anatomically different and very delicate skin, tadpoles and larvae must be handled differently than post- metamorphic amphibians.
- III. EQUIPMENT and SUPPLIES.
 - A. Standard capture equipment (seine nets, dip nets, minnow traps)
 - B. Clear plastic bags (half liter or full liter size)
- IV. BACKGROUND: There are three main hazards associated with handling live amphibians: two to the amphibian and one to the handler. To amphibians, the main dangers of being handled are skin damage that could result in secondary skin infections, and bone and muscle injuries caused by struggling when being held. For the handler, the main danger comes from toxic skin secretions produced by some amphibians (in the USA, this is mostly newts and the introduced giant/marine toad). Tadpoles and larvae have thin delicate skin that is very easily damaged by the slightest handling. The skin of larvae lacks keratin and has fewer cell layers than adult amphibian skin. Therefore, direct contact handling of tadpoles and larvae is to be avoided; instead, these amphibian stages are examined through clear flexible plastic bags containing water. Although the skin of adult (post-metamorphic) amphibians has keratin and is less delicate than larval skin, their skin is still much more delicate than the skin of reptiles, birds and mammals. Rough handling of adult amphibians can easily result in skin abrasions, small tears, punctures, erosions and ulcers; normally, minor skin wounds heal quickly, but if contaminants, sewage or high levels of microorganisms are present in the pond or other environment, then wound infections are possible.

Frogs and Toads. All amphibians can be expected to struggle following capture. For anurans, there is a danger that vigorous kicking with the

hindlimbs can cause joint dislocations or a broken (fractured) back; broken backs are a well-documented and major problem in another species that moves by hopping---rabbits. Therefore, proper restraint of anurans, first and foremost involves inhibiting their ability to kick. Salamanders. For salamanders, there are three major dangers associated with handling: 1) loss (automizing) of the tail, 2) damage to the very delicate external gills (in neotenes), and 3) back injury during whip-like thrashing movements.

V. METHODS OF PHYSICAL RESTRAINT:

- A. Anurans. Medium and large size frogs and toads (those about 5 grams and larger) should be grasped around the waist with the hindlimbs fully extended. The animal should not be allowed to bend (flex) its hip and knee joints, since this would allow it to kick.
- B. Caudates. Medium and large size salamanders (those about 5 grams and larger) should be grasped in the middle of the body between the forelimbs and hindlimbs. Larval and neotenic salamanders should never be grasped around the head or neck, because the gills can be easily damaged. Under no circumstances should salamanders be grasped by the tail or picked up by the tail.
- C. Larvae. All larvae (including tadpoles) should be handled with nets or scoops. For examinations, the larvae should be placed in a clear plastic bag with a mild amount of water. Alternatively, larvae may be sedated with an anesthetic and examined in a dish or bowl of water. As much as possible, larvae should be examined only while they are in water. Larvae should not be grasped with bare hands.

VI. MISHAPS.

- A. Skin wounds: If an amphibian suffers a skin wound during handling, it is recommended that the wound be sprayed with the over-the-counter product, Bactine® (See the SOP on Toe Clipping of Frogs and Toads, NWHC ACUC Protocol 2001-004). All other topical antiseptics and disinfectants (sprays and ointments) are CONTRAINDICATED in amphibians. If possible, the animal should then be released on land rather than into water, since the antiseptic spray would be quickly washed off in water.
- B. Broken back: If a frog or toads suffers a broken back during capture or handling, it should be promptly euthanized. It would be inhumane to release such a crippled animal. An animal with a broken back will have serious damage to the spinal cord and should show almost immediate paralysis of the hindlimbs and tail. Recommended methods of humane euthanasia include (see NWHC ACUC Protocol 1999-009, Methods of Euthanasia):

1. Pithing
 2. Overdosing in anesthetic solutions of MS222 or benzocaine.
 3. Application of a benzocaine-based topical ointment (as used by humans to relieve tooth-aches) to the top of the head and dorsum of the body.
- C. Broken leg: If a major bone of a limb is broken during capture or handling, the animal should be euthanized or taken to a wildlife rehabilitation center or veterinarian for treatment. A broken leg bone typically is recognized as an abnormal bend in the leg where there is no joint; other signs of a broken leg bone are protrusion of a bone fragment through the skin, inability of the animal to move a limb or position a leg in its normal resting posture. After treatment, amphibians with broken bones might be given to a zoo or placed in a captive breeding program. Only if the injured amphibian is kept isolated from all other fish, amphibians and reptiles (e.g., in a separate cage) during treatment, can it later be considered for release at the point of capture. Injuries to digits (toes and fingers) generally are not life-threatening; if the skin of the injured toe also is wounded, then treatment with Bactine® prior to immediate release is acceptable. If a toe bone is broken and protruding through the skin, the affected toe may be amputated just proximal to the site of the fracture, the stump should be sprayed with Bactine®, and the animal may be released.
- D. Automized tail: If a salamander automizes (detaches) its tail during capture or handling, the stump should be treated (sprayed) with Bactine®; the salamander can then be promptly released.
- E. Crushing injuries to head and body. Amphibians that have serious injuries to skin, muscles and bones should be promptly euthanized. Crushing injuries that are limited to a limb or tail will require treatment at a wildlife rehabilitation center or a veterinary clinic; alternatively, the animal may be euthanized, but it would be inhumane to release a seriously injured amphibian.
- F. Snout abrasions. Amphibians that are held in glass or clear plastic containers may jump head-first into the glass, or may rub their snout against the container in attempts to burrow out. If amphibians are held for more than an hour in a clear container (bottle, aquarium, etc), they should be examined for evidence of skin injury at the tip of the snout and elsewhere around the head prior to release. If abrasions are detected, they should be sprayed with Bactine® prior to release.
- G. Toxic skin secretions. All amphibians have glands in their skin that secrete a vast number of chemicals; some of which are merely

noxious and repellant- like, while others may cause skin or eye irritation, and some may actually kill. The poison-dart frogs of Central America are an example of a frog with toxic secretions that can kill a human. Among the native amphibians of the United States, the two amphibians of greatest concern are giant toads (also called cane toads, marine toads, aka toads; *Bufo marinus*) and western newts of the genus, *Taricha*.

Giant toads secrete a potent white mucoid substance from their parotid glands (large warts just behind the eyes) that affects the heart, but it is not absorbed through the intact human skin; however, the toxin is readily absorbed through the eyes and mouth. Hence, the best way to prevent poisoning is to carefully avoid rubbing the eyes or putting fingers in the mouth after handling a giant toad. If skin secretions of giant toads contact the eye or mouth, then flush promptly with generous amounts of clean fresh water or contact lens wetting solution, and then seek emergency care at a clinic or hospital if stinging or numbness of the eye or mouth develops.

Newts of the genus, *Taricha*, also secrete toxins from their skin; it is presumed that the entire body of these newts secretes toxins (newts and other salamanders do not have parotid glands). Their skin secretions are very irritating to the eyes and mouth. Temporary blindness (lasting about 24 hrs) has been reported by field biologists that handled newts and then rubbed their eyes. If sensations of blurred vision, or burning or stinging of the eyes occur after handling any genus or species of newt, wash the eyes with copious amounts of fresh clean water (or contact lens wetting solutions) and promptly seek medical care. Persons with newt skin secretions in their eyes are advised not to drive a vehicle or operate other dangerous or heavy equipment.

Finally, it is possible that other amphibian species in the USA besides giant toads and newts, could produce skin secretions that are irritants to the eyes. Furthermore, amphibians may carry some bacteria in their intestines and feces that are human pathogens, such as the bacteria, *Salmonella* and *Leptospira*. Hence, it is always best to practice good personal hygiene after handling any amphibian (namely, thoroughly wash your hands with soap and water).

[Financial institution letterhead]

IRREVOCABLE STANDBY LETTER OF CREDIT
NO. **[number issued by financial institution]**

Issue Date: **[date]**

Beneficiary:

California Department of Fish and Wildlife
Habitat Conservation Planning Branch
960 Riverside Parkway, Suite 90
West Sacramento, CA 95605
Attn: HCPB Mitigation Funds

Amount: U.S. \$**[dollar number]** **[(dollar amount)]**

Expiry: **[Date]** at our counters

Dear Sirs:

1. At the request and on the instruction of our customer, **[name of applicant]** ("Applicant"), we, **[name of financial institution]** ("Issuer"), hereby establish in favor of the beneficiary, the California Department of Fish and Wildlife ("CDFW"), this irrevocable standby letter of credit ("Credit") in the principal sum of U.S. \$**[dollar number]** **[(dollar amount)]** ("Principal Sum").
2. We are informed this Credit is and has been established for the benefit of CDFW pursuant to the terms of the incidental take permit for the **[name of project]** issued by CDFW to the Applicant on **[date]** (No. **[number]**) ("Permit").
3. We are further informed that pursuant to the Permit, the Applicant has agreed to complete certain mitigation requirements in the Permit ("Mitigation Requirements").
4. We are finally informed that this Credit is intended by CDFW and the Applicant to serve as a security device for the performance by the Applicant of the Mitigation Requirements.
5. CDFW shall be entitled to draw upon this Credit only by presentation of a duly executed Certificate for Drawing ("Certificate") in the same form as

Attachment A, which is attached hereto, at our office located at [**name and address of financial institution**].

6. The Certificate shall be completed and signed by an Authorized Representative of CDFW as defined in paragraph 12 below. Presentation by CDFW of a completed Certificate may be made in person or by registered mail, return receipt requested, or by overnight courier.
7. Upon presentation of a duly executed Certificate as above provided, payment shall be made to CDFW, or to the account of CDFW, in immediately available funds, as CDFW shall specify.
8. If a demand for payment does not conform to the terms and conditions of this Credit, we shall give CDFW prompt notice that the demand for payment was not effected in accordance with the terms and conditions of this Credit, state the reasons therefore, and await further instruction.
9. Upon being notified that the demand for payment was not effected in conformity with the Credit, CDFW may correct any such non-conforming demand for payment under the terms and conditions stated herein.
10. All drawings under this Credit shall be paid with our funds. Each drawing honored by us hereunder shall reduce, *pro tanto*, the Principal Sum. By paying to CDFW an amount demanded in accordance herewith, we make no representations as to the correctness of the amount demanded.
11. This Credit will be cancelled upon receipt by us of Certificate of Cancellation, which: (i) shall be in the form of Attachment B, which is attached hereto, and (ii) shall be completed and signed by an Authorized Representative of CDFW, as defined in paragraph 12 below.
12. An Authorized Representative shall mean the Director of CDFW; the General Counsel of CDFW; a Regional Manager of CDFW; or the Branch Manager of CDFW's Habitat Conservation Planning Branch.
13. This Credit shall be automatically extended without amendment for additional periods of one year from the present or any future expiration date hereof, unless at least sixty (60) days prior to any such date, we notify CDFW in writing by registered mail, return receipt requested, or by overnight courier that we elect not to consider this Credit extended for any such period.
14. Communications with respect to this Credit shall be in writing and addressed to us at [**name and address of financial institution**], specifically

referring upon such writing to this credit by number. The address for notices with respect to this Credit shall be: (i) for CDFW: Department of Fish and Wildlife, Habitat Conservation Planning Branch, 960 Riverside Parkway, Suite 90, West Sacramento, CA 95605, Attn: HCPB Mitigation Funds; and (ii) for the Applicant: [***name and address of applicant***].

15. This Credit may not be transferred.

16. This Credit is subject to the International Standby Practices 1998 ("ISP 98"). As to matters not covered by the ISP 98 and to the extent not inconsistent with the ISP 98, this credit shall be governed by and construed in accordance with the laws of the State of California.

17. This Credit shall, if not canceled, expire on [***expiration date***], or any extended expiration date.

18. We hereby agree with CDFW that documents presented in compliance with the terms of this Credit will be duly honored upon presentation, as specified herein.

19. This Credit sets forth in full the terms of our undertaking. Such undertaking shall not in any way be modified, amended or amplified by reference to any document or instrument referred to herein or in which this Credit is referred to or to which this Credit relates and any such reference shall not be deemed to incorporate herein by reference any document or instrument.

Re: Irrevocable Standby Letter of Credit No. [**number issued by financial institution**]

The undersigned, a duly Authorized Representative of the California Department of Fish and Wildlife ("CDFW"), as defined in paragraph 12 in the above-referenced standby letter of credit ("Credit"), hereby certifies to the Issuer that:

1. [**Insert one of the following statements:** "In the opinion of CDFW, the Applicant has failed to complete the Mitigation Requirements referenced in paragraph 3 of the Credit." **or** "As set forth in paragraph 13, the Issuer has informed CDFW that the Credit will not be extended and the Applicant has not provided CDFW with an equivalent security approved by CDFW to replace the Credit."]
2. The undersigned is authorized under the terms of the Credit to present this Certificate as the sole means of demanding payment on the Credit.
3. CDFW is therefore making a drawing under the Credit in amount of U.S. \$_____.
4. The amount demanded does not exceed the Principal Sum of the Credit.

Therefore, CDFW has executed and delivered this Certificate as of this ___ day of [**month**], [**year**].
