California Endangered Species Act
Incidental Take Permit No. 2081(b)-2025-060-06

LOCUST GATEWAY DEVELOPMENT PROJECT

I. Authority:

This California Endangered Species Act (CESA) incidental take permit (ITP) is issued by the California Department of Fish and Wildlife (CDFW) pursuant to Fish and Game Code section 2081, subdivisions (b) and (c), and California Code of Regulations, Title 14, section 783.0 et seq. CESA prohibits the take¹ of any species of wildlife designated by the California Fish and Game Commission as an endangered, threatened, or candidate species.² However, CDFW may authorize the take of any such species by permit pursuant to the conditions set forth in Fish and Game Code section 2081, subdivisions (b) and (c). (See Cal. Code Regs., tit. 14, § 783.4.)

Permittee: IV5 Locust Gateway Logistics Center LLC

Principal Officer: Rohan A'Beckett, Vice President

Contact Person: Amir Latifian, Amir.Latifian@brookfieldproperties.com,
(310) 765-3265

Mailing Address: 1180 Peachtree St. NE Suite 1575
Atlanta, GA 30309

II. Effective Date and Expiration Date of this ITP:

This ITP is effective as of the date signed by CDFW below. Unless renewed by CDFW, this ITP and its authorization to take the Covered Species shall expire on **February 5, 2031**.

Notwithstanding the expiration date on the take authorization provided by this ITP, Permittee's obligations pursuant to this ITP do not end until CDFW accepts as complete the Permittee's Final Mitigation Report required by Condition of Approval 5.8 of this ITP.

¹Pursuant to Fish and Game Code section 86, "'take' means hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill." (See also *Environmental Protection Information Center v. California Department of Forestry and Fire Protection* (2008) 44 Cal.4th 459, 507 [for purposes of incidental take permitting under Fish and Game Code section 2081, subdivision (b), "'take' ... means to catch, capture or kill".])

²The definition of an endangered, threatened, and candidate species for purposes of CESA are found in Fish and Game Code sections 2062, 2067, and 2068, respectively.

III. Project Location:

The Locust Gateway Development Project (Project) is located on 44.2 acres south of the West Lowell Street, north of West Stonehurst Drive, west of North Locust Avenue, and east of North Alder Avenue within the City of Rialto, San Bernardino County (See Figure 1). The Project is located approximately 0.5 miles north of State Route 210 at approximately 34.150451, -117.415206; within U.S. Geological Survey (USGS) Devore 7.5 quadrangle, Section 21 and 28, Township 1 North, Range 5 West.

IV. Project Description:

The Project includes the development of 39.9 acres of undeveloped land into an industrial warehouse and 4.3 acres of off-site improvements adjacent to the site (see Figures 2 and 3).

The warehouse will be approximately 664,859 square-feet (sqft) in size, with 657,146 sqft of warehouse space and 7,713 sqft of ancillary office space, 365 vehicle parking stalls, 398 trailer parking stalls, and a fence-secured dock area with 82 dock doors associated with the warehouse. The Project also includes landscaping along public streets and parking areas. Access to the Project site will be provided via three new driveways on Lowell Street, and one driveway on Locust Avenue.

V. Covered Species Subject to Take Authorization Provided by this ITP:

This ITP covers the following species:

<u>Name</u>	<u>CESA Status³</u>
1. Crotch’s Bumble Bee (<i>Bombus crotchii</i>)	Candidate ⁴

This species and only this species is the “Covered Species” for the purposes of this ITP.

VI. Impacts of the Taking on Covered Species:

Project activities and their resulting impacts are expected to result in the incidental take of individuals of the Covered Species. The following Covered Activities are expected to result in incidental take of individuals of the Covered Species: initial site preparations; clearing and site grading; excavation, trenching, and backfilling; vehicle and foot traffic; staging and operating heavy equipment; access road construction; repair and resurfacing; handling of stockpiles and stored materials; soil compaction; vegetation clearing and maintenance (grading, mowing, grubbing); paving and concrete work and landscape installation; as well as other development activities related to the Project.

Incidental take of individuals of the Covered Species in the form of mortality (“kill”) may occur as a result of Covered Activities such as vehicle/equipment strikes and/or materials placement (crushing); burrow collapse associated with earthwork, vegetation removal and/or vehicle passage (entombment, crushing, or suffocation), ; equipment laydown, trenching, other excavations, grading,

³ Under CESA, a species may be on the list of endangered species, the list of threatened species, or the list of candidate species.

⁴ The species status may change following the decision of the Fish and Game Commission to designate the species as threatened or endangered but if there is such a designation, the species will remain a Covered Species.

horizontal directional drilling, pile driving, planting (direct contact with sharp objects and/or blunt-force trauma); placement of spoils and/or fill materials (entombment, crushing, and/or suffocation); and entanglement in erosion control materials (strangulation, immobility). Incidental take of individuals of the Covered Species may also occur from the Covered Activities in the form of pursue, catch, capture, or attempt to do so of the Covered Species from salvage, collection for identification, and/or relocation out of harm's way as required by this ITP. The areas where authorized take of the Covered Species is expected to occur include the Project's total on-site disturbance area consisting of approximately 39.9 acres (Project Area).

The Project is expected to cause the permanent loss of 28.6 acres of habitat for the Covered Species. Impacts of the authorized taking also include adverse impacts to the Covered Species related to temporal losses, increased habitat fragmentation and edge effects, and the Project's incremental contribution to cumulative impacts (indirect impacts). These impacts include: causing stress and disorientation to individuals of the Covered Species resulting from noise, ground vibrations, capture and relocation, and dust; loss or decline of foraging, nesting, and overwintering habitat; decreased food supply through changes in composition of floral nectar resources or abundance (starvation); increased vulnerability to predation; exposure to contaminants and hazardous materials (herbicides, pesticides, vehicle and equipment fuels and fluids); exposure of pathogens through introduction of contaminated water; and long-term effects due to displacement from preferred habitat, barriers, and increased travel distance to foraging, nesting, and overwintering habitat (i.e., decreased reproductive output, energetic expenses, exposure to predation and elements), increased pollution, and increased competition for food and space. Individuals displaced due to habitat loss and degradation may be unable to survive in adjacent areas if these areas are at carrying capacity or are unsuitable for colonization.

VII. Incidental Take Authorization of Covered Species:

This ITP authorizes incidental take of the Covered Species and only the Covered Species. With respect to incidental take of the Covered Species, CDFW authorizes the Permittee, its employees, contractors, and agents to take Covered Species incidentally in carrying out the Covered Activities, subject to the limitations described in this section and the Conditions of Approval identified below. This ITP does not authorize take of Covered Species from activities outside the scope of the Covered Activities, take of Covered Species outside of the Project Area, take of Covered Species resulting from violation of this ITP, or intentional take of Covered Species except for salvage and capture/release for identification of Covered Species as authorized by this ITP.

VIII. Conditions of Approval:

Unless specified otherwise, the following measures apply to all Covered Activities within the Project Area, including areas used for vehicular ingress and egress, and staging and parking that may/will cause take. CDFW's issuance of this ITP and Permittee's authorization to take the Covered Species are subject to Permittee's compliance with and implementation of the following Conditions of Approval:

- 1. Legal Compliance:** Permittee shall comply with all applicable federal, state, and local laws in existence on the effective date of this ITP or adopted thereafter.
- 2. CEQA Compliance:** Permittee shall implement and adhere to the mitigation measures related to the Covered Species in the Biological Resources section of the Environmental Impact Report (SCH No.: 2024061274) certified by City of Rialto on January 27, 2026 as lead agency for the Project pursuant to the California Environmental Quality Act (CEQA) (Pub. Resources Code, § 21000 et seq.).
- 3. ITP Time Frame Compliance:** Permittee shall fully implement and adhere to the conditions of this ITP within the time frames set forth below and as set forth in the Mitigation Monitoring and Reporting Program (MMRP), which is included as Attachment 1 to this ITP.
- 4. General Provisions:**
 - 4.1. Designated Representative.** Before starting Covered Activities, Permittee shall designate a representative (Designated Representative) responsible for communications with CDFW and overseeing compliance with this ITP. Permittee shall notify CDFW in writing before starting Covered Activities of the Designated Representative's name, business address, and contact information, and shall notify CDFW in writing if a substitute Designated Representative is selected or identified at any time during the term of this ITP.
 - 4.2. Designated Biologist(s), and/or Biological Monitor(s).** Permittee shall submit to CDFW in writing the name, qualifications, business address, and contact information of the Designated Biologist(s) and Biological Monitor(s) using the Biologist Resume Form (Attachment 2) or another format containing the same information at least 30 days before starting Covered Activities, or as otherwise approved by CDFW. Permittee shall ensure that the Designated Biologist(s) and Biological Monitor(s) are knowledgeable and experienced in the biology, natural history, collecting and handling of the Covered Species. The Designated Biologist(s) and Biological Monitor(s) shall be responsible for monitoring Covered Activities to help minimize and fully mitigate or avoid the incidental take of individual Covered Species and to minimize disturbance of Covered Species' habitat. Permittee shall obtain CDFW approval of the Designated Biologist(s) and Biological Monitor(s) in writing before starting Covered Activities and shall also obtain approval in advance, in writing, if the Designated Biologist(s) or Biological Monitor(s) must be changed.
 - 4.3. Designated Biologist Authority.** To ensure compliance with the Conditions of Approval of this ITP, the Designated Biologist shall immediately stop any activity that does not comply with this ITP and/or order any reasonable measure to avoid the unauthorized take of an individual of the Covered Species. Permittee shall provide unfettered access to the Project Site and otherwise facilitate the Designated Biologist in the performance of his/her duties. If the Designated Biologist is unable to comply with the ITP, then the Designated Biologist

shall notify the CDFW Representative immediately. Permittee shall not enter into any agreement or contract of any kind, including but not limited to non-disclosure agreements and confidentiality agreements, with its contractors and/or the Designated Biologist that prohibit or impede open communication with CDFW, including but not limited to providing CDFW staff with the results of any surveys, reports, or studies or notifying CDFW of any non-compliance or take. Failure to notify CDFW of any non-compliance or take or injury of a Covered Species as a result of such agreement or contract may result in CDFW taking actions to prevent or remedy a violation of this ITP.

- 4.4. Education Program.** Permittee shall conduct an education program for all persons employed or otherwise working in the Project Area before performing any work. The program shall consist of a presentation from the Designated Biologist that includes a discussion of the biology and general behavior of the Covered Species, information about the distribution and habitat needs of the Covered Species, sensitivity of the Covered Species to human activities, its status pursuant to CESA including legal protection, recovery efforts, penalties for violations and Project-specific protective measures described in this ITP. Permittee shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry in the Project Area. Permittee shall provide interpretation for non-English speaking workers, and the same instruction shall be provided to any new workers before they are authorized to perform work in the Project Area. Upon completion of the program, employees shall sign a form stating they attended the program and understand all protection measures. This training shall be repeated at least once annually for long-term and/or permanent employees that will be conducting work in the Project Area.
- 4.5. Construction Monitoring Documentation.** The Designated Biologist(s) and Biological Monitor(s) shall maintain construction-monitoring documentation on-site in either hard copy or digital format throughout the construction period, which shall include a copy of this ITP with attachments and a list of signatures of all personnel who have successfully completed the education program. Permittee shall ensure a copy of the construction-monitoring documentation is available for review at the Project site upon request by CDFW.
- 4.6. Trash Abatement.** Permittee shall initiate a trash abatement program before starting Covered Activities and shall continue the program for the duration of the Project. Permittee shall ensure that trash and food items are contained in animal-proof containers and removed, ideally at daily intervals but at least once a week, to avoid attracting opportunistic predators such as ravens, coyotes, and feral dogs.
- 4.7. Dust Control.** Permittee shall implement dust control measures during Covered Activities to facilitate visibility for monitoring of the Covered Species by the Designated Biologist. Permittee shall keep the amount of water used to the minimum amount needed and shall not allow water to form puddles.

- 4.8. Erosion Control Materials.** Permittee shall prohibit use of erosion control materials potentially harmful to Covered Species and other species, such as monofilament netting (erosion control matting) or similar material, in potential Covered Species' habitat.
- 4.9. Pesticide Use.** Permittee shall not use pesticides, including herbicides, insecticides, or rodenticides within the Project Area without prior consultation with and written approval from CDFW. Through this consultation, CDFW may approve limited use of herbicides through targeted spray (e.g., backpack sprayer) at a buffer from Covered Species habitat. If approved, all pesticide application should be conducted by a Licensed and Certified Pesticide Applicator and used as directed by the manufacturer. Use of neonicotinoid pesticides will not be approved by CDFW within the Project Area.

4.9.1. Permittee shall follow the best management practices described by Xerces Society's [Guidance to Protect Habitat from Pesticide Contamination](#), the California Department of Pesticide Regulation's [California's Managed Pollinator Protection Plan –MP3 \(2018\)](#), and the University of California's Division of Agriculture and Natural Resources Statewide Integrated Pest Management Program's [Best management practices to protect bees from pesticides](#). Permittee shall avoid using pesticides marked with the US Environmental Protection Agency's bee hazard icon. Permittee shall preferentially use chemicals that are rated green/III in [UC IPM Bee Precaution Database](#) and consider using the least toxic products at the least concentrated application possible. Additionally, Permittee shall avoid adjuvants that contain alkylphenol ethoxylates because these have been shown to be toxic to bees and increase the toxicity of the pesticides it is combined with. Permittee shall avoid the usage of soil fumigants, which penetrate the soil and can poison ground nesting bees. When pesticides are needed, Permittee shall use an IPM framework that incorporates multiple tools to increase the efficacy of the treatments, decrease the likelihood for pesticide resistance, the amount of pesticide needed in the long-term, and thereby reduce the likelihood of exposure and adverse impacts to non-target species from the treatments.

4.9.2. Permittee shall avoid spraying herbicide on plants that are in bloom to minimize direct or indirect contact with the Covered Species. These plants may serve as obligate resources that an individual or colony is reliant upon. Instead, the Permittee shall target other vegetive phases when the chemicals are most effective as recommended by the manufacturer. Pesticides shall be applied directly to the targeted pest or site, and always according to the label. To avoid spray drift onto flowering resources and nests, pesticide application shall be completed when the Covered Species is not active.⁵ The Colony Active period typically occurs in the morning and evening, but can vary based on environmental conditions made by the

⁵ Hatfield, R., S. Jepsen, E. Mader, S. H. Black, and M. Shepherd. 2012. *Conserving Bumble Bees. Guidelines for Creating and Managing Habitat for America's Declining Pollinators*. 32 pp. Portland, OR: The Xerces Society for Invertebrate Conservation.

Designated Biologist. As a result, the Designated Biologist shall coordinate with the Permittee to determine an optimal period of the day for pesticide distribution. Appropriate weather conditions and other application best management practices, as well as label precautions, shall always be followed.

- 4.10. Delineation of Property Boundaries.** Before starting Covered Activities, Permittee shall clearly delineate the boundaries of the Project Area with fencing, stakes, or flags. Permittee shall restrict all Covered Activities to within the fenced, staked, or flagged areas. Permittee shall maintain all fencing, stakes, and flags until the completion of Covered Activities in that area.
- 4.11. Delineation of Habitat.** Permittee shall clearly delineate habitat of the Covered Species within the Project Area with posted signs, posting stakes, flags, and/or rope or cord, and place fencing as necessary to minimize the disturbance of Covered Species' habitat.
- 4.12. Project Access.** Project-related personnel shall access the Project Area using existing routes, or routes identified in the Project Description, and shall not cross Covered Species' habitat outside of or en route to the Project Area. Permittee shall restrict Project-related vehicle traffic to established roads, staging, and parking areas. Permittee shall ensure that vehicle speeds do not exceed 20 miles per hour to avoid Covered Species on or traversing the roads. If Permittee determines construction of routes for travel are necessary outside of the Project Area, the Designated Representative shall contact CDFW for written approval before carrying out such an activity. CDFW may require an amendment to this ITP, among other reasons, if additional take of Covered Species will occur as a result of the Project modification.
- 4.13. Staging Areas.** Permittee shall confine all Project-related parking, storage areas, laydown sites, equipment storage, and any other surface-disturbing activities to the Project Area using, to the extent possible, previously disturbed areas. Additionally, Permittee shall not use or cross Covered Species' habitat outside of the marked Project Area unless provided for as described in Condition of Approval 4.12 of this ITP.
- 4.14. Hazardous Waste.** Permittee shall immediately stop and, pursuant to pertinent state and federal statutes and regulations, arrange for repair and clean up by qualified individuals of any fuel or hazardous waste leaks or spills at the time of occurrence, or as soon as it is safe to do so. Permittee shall exclude the storage and handling of hazardous materials from the Project Area and shall properly contain and dispose of any unused or leftover hazardous products off-site.
- 4.15. CDFW Access.** Permittee shall provide CDFW staff with reasonable access to the Project and mitigation lands under Permittee control, and shall otherwise fully cooperate with CDFW

efforts to verify compliance with or effectiveness of mitigation measures set forth in this ITP.

- 4.16. Refuse Removal.** Upon completion of Covered Activities, Permittee shall remove from the Project Area and properly dispose of all temporary fill and construction refuse, including, but not limited to, broken equipment parts, wrapping material, cords, cables, wire, rope, strapping, twine, buckets, metal or plastic containers, and boxes.
- 4.17. Wildfire Prevention.** Basic fire suppression supplies shall be kept on site at all times. Hand removal of vegetation, mowing, and/or weed whacking are the authorized methods for vegetation removal.
- 4.18. Prevention of Spread of Invasive Species.** Permittee shall conduct Covered Activities in a manner that prevents the introduction, transfer, and spread of invasive species, including plants, animals, and microbes (for example, algae, fungi, parasites, bacteria), from one Project Area and/or waterbody to another. Prevention best management practices (BMPs) and guidelines for invasive plants can be found on the Cal-IPC's website at: <http://www.cal-ipc.org/ip/prevention/index.php/>. Permittee shall incorporate BMPs to minimize risk of introduction and/or spread of *Phytophthora* spp. within the Project Area.

5. Monitoring, Notification and Reporting Provisions:

- 5.1. Notification Before Commencement.** The Designated Representative shall notify CDFW 14 calendar days before starting Covered Activities and shall document compliance with all pre-Project Conditions of Approval before starting Covered Activities.
- 5.2. Notification of Non-compliance.** The Designated Representative shall immediately notify CDFW if the Permittee is not in compliance with any Condition of Approval of this ITP, including but not limited to any actual or anticipated failure to implement measures within the time periods indicated in this ITP and/or the MMRP. The Designated Representative shall follow up within 24 hours with a written report to CDFW describing, in detail, any non-compliance with this ITP and suggested measures to remedy the situation.
- 5.3. Daily Compliance Monitoring.** The Designated Biologist shall be on-site daily during any vegetation removal and ground-disturbing Covered Activities. The Designated Biologist shall conduct compliance inspections to: (1) minimize incidental take of the Covered Species; (2) prevent unlawful take of species; (3) check for compliance with all measures of this ITP; (4) check all exclusion zones; and (5) ensure that signs, stakes, and fencing are intact, and that Covered Activities are only occurring in the Project Area. The Designated Representative or Designated Biologist shall prepare daily written observation and inspection records summarizing oversight activities and compliance inspections, weather conditions,

observations of Covered Species and their sign, survey results, and monitoring activities required by this ITP.

- 5.4. Weekly Compliance Monitoring.** During periods of inactivity or after clearing, grubbing, and grading have been completed, compliance inspections by the Designated Biologist may be reduced or ceased, only after Permittee obtains written approval from CDFW. Daily compliance inspections shall resume if the Designated Biologist or CDFW finds the Permittee is out of compliance with any Conditions of Approval of this ITP.
- 5.5. Monthly Compliance Report.** The Designated Representative or Designated Biologist shall compile the observation and inspection records identified in Condition of Approval 5.2, 5.3 and 5.4 into a Monthly Compliance Report and submit it to CDFW along with a copy of the MMRP table with notes showing the current implementation status of each mitigation measure. Monthly Compliance Reports shall be submitted to the CDFW offices listed in the Notices section of this ITP and via e-mail to CDFW’s Regional Representative and Headquarters CESA Program. At the time of this ITP’s approval, the CDFW Regional Representative is Lisa Cardoso (Lisa.Cardoso@Wildlife.ca.gov) and Headquarters CESA Program email is CESA@wildlife.ca.gov. CDFW may at any time increase the timing and number of compliance inspections and reports required under this provision depending upon the results of previous compliance inspections. If CDFW determines the reporting schedule must be changed, CDFW will notify Permittee in writing of the new reporting schedule.
- 5.6. Annual Status Report.** Permittee shall provide CDFW with an Annual Status Report (ASR) no later than January 31 of every year beginning with issuance of this ITP and continuing until CDFW accepts the Final Mitigation Report identified below. Each ASR shall include, at a minimum: (1) a summary of all Monthly Compliance Reports for that year identified in Condition of Approval 5.5; (2) a general description of the status of the Project Area and Covered Activities, including actual or projected completion dates, if known; (3) a copy of the table in the MMRP with notes showing the current implementation status of each mitigation measure; (4) an assessment of the effectiveness of each completed or partially completed mitigation measure in avoiding, minimizing and mitigating Project impacts; (5) all available information about Project-related incidental take of the Covered Species; (6) an accounting of the number of acres subject to permanent disturbance, both for the prior calendar year, and a total since ITP issuance; and (7) information about other Project impacts on the Covered Species.
- 5.7. CNDDDB Observations.** The Designated Biologist shall submit all observations of Covered Species to CDFW’s California Natural Diversity Database (CNDDDB) within 60 calendar days of the observation and the Designated Biologist shall include copies of the submitted forms with the next Monthly Compliance Report or ASR, whichever is submitted first relative to the observation. The Designated Biologist shall submit a notification of observation

(including species name, date of observation and GPS coordinates) by email to the CDFW Regional Representative (Lisa.Cardoso@Wildlife.ca.gov) and the Wildlife Diversity Program (wildlifemgt@wildlife.ca.gov) within 24 hours of observation.

- 5.8. Final Mitigation Report.** No later than 45 days after completion of all mitigation measures, Permittee shall provide CDFW with a Final Mitigation Report. The Designated Biologist shall prepare the Final Mitigation Report which shall include, at a minimum: (1) a summary of all Monthly Compliance Reports and all ASRs; (2) a copy of the table in the MMRP with notes showing when each of the mitigation measures was implemented; (3) all available information about Project-related incidental take of the Covered Species; (4) information about other Project impacts on the Covered Species; (5) beginning and ending dates of Covered Activities; (6) an assessment of the effectiveness of this ITP's Conditions of Approval in minimizing and fully mitigating Project impacts of the taking on Covered Species; (7) recommendations on how mitigation measures might be changed to more effectively minimize take and mitigate the impacts of future projects on the Covered Species; and (8) any other pertinent information.
- 5.9. Notification of Take or Injury.** Permittee shall immediately notify the Designated Biologist if a Covered Species is taken or injured by a Project-related activity, or if a Covered Species is otherwise found dead or injured within the vicinity of the Project. The Designated Biologist or Designated Representative shall provide initial notification to the CDFW Regional Representative via email at Lisa.Cardoso@Wildlife.ca.gov and by calling the Regional Office at (909) 484-0167. The initial notification to CDFW shall include information regarding the location, species, and number of animals taken or injured and the ITP Number. Following initial notification, Permittee shall send CDFW a written report within two calendar days. The report shall include the date and time of the finding or incident, location of the animal or carcass, and if possible, provide a photograph, explanation as to cause of take or injury, and any other pertinent information.
- 5.9.1. Crotch's Bumble Bee Salvage.** If a Crotch's bumble bee is accidentally killed during survey efforts, the carcass shall be photographed in situ, salvaged and placed in a labeled, clean plastic, resealable bag or vial and placed in a freezer. The label shall include a unique identifier (collection number), species name, time and date of collection, collection location, GPS location (including datum and horizontal error in feet), circumstances surrounding death (e.g., hot day and extreme shifts in temperature from ambient air to cooler may have contributed), collector name and contact information (phone number or email), and ITP tracking number. If deemed necessary by CDFW, the carcass shall be delivered to the following address and reported with photographs via email to the CDFW Regional Representative at the time of collection and shipping:

6. Take Minimization Measures: The following requirements are intended to ensure the minimization of incidental take of Covered Species in the Project Area during Covered Activities. Permittee shall implement and adhere to the following conditions to minimize take of Covered Species:

6.1. Vegetation Management. Disturbance or removal of vegetation shall be kept to the minimum necessary to complete Covered Activities. Vegetation marked for protection may only be trimmed with hand tools to the extent necessary to gain access to work sites. Permittee shall set mower blade heights no lower than 4 inches, unless otherwise approved by CDFW in writing. Permittee shall ensure that pesticide use only occurs when Covered Species are dormant or when flowers are no longer in bloom. See Condition of Approval 4.9.

6.2. Covered Species Pre-Construction Surveys. Prior to Covered Activities occurring during the Colony Active Period (generally February 1 through August 31) and Gyne Flight Season, the Designated Biologist shall search for the Covered Species through an area planned for Covered Activities. The Designated Biologist shall perform two surveys consisting of meandering transects no more than 10 days prior to the commencement of Covered Activities in that area⁶. The Designated Biologist shall conduct surveys at least four days apart with the second survey occurring within two days prior to starting Covered Activities in that area. The Designated Biologist shall focus attention on areas with blooming native and non-native nectar and pollen resources for the Covered Species. The survey duration shall be appropriate to the size of the area planned for Covered Activities plus 50 feet based on a minimum of one person-hour of searching per three acres of suitable habitat. The Designated Biologist shall conduct surveys between 8:00 AM and 4:00 PM (Pacific Standard Time) on warm sunny days between 65- and 90° F with sustained wind speeds measuring less than 8 miles per hour. If the Covered Species is detected or suspected during surveys, the Designated Biologist shall flag the area where the observation was made and closely monitor the areas that were flagged during Covered Activities. Results of all surveys shall be included in the monthly reports provided to CDFW per Condition of Approval 5.5

⁶ The following are example protocols that are used in survey method development:

- CDFW's Survey Considerations for California Endangered Species Act (CESA) Candidate Bumble Bee Species (June 6, 2023) <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=213150&inline>
- CA Bumble Bee Atlas non-lethal protocol (volunteer handbook) <https://www.cabumblebeeatlas.org/point-surveys.html>
- USFWS Rusty patched bumble bee protocol https://www.fws.gov/sites/default/files/documents/Survey_Protocols_RPBB_12April2019.pdf

- 6.2.1. Bumble Bee Identification.** Bumble bees should be identified on-site, using a careful approach to prevent disturbance, and documented through in-situ photography by a Designated Biologists trained in photographing the Covered Species for identification purposes. If bumble bee identification cannot be determined, the Designated Biologist must assume the presence of the individual to be Covered Species. The bee may be captured using a net bloom and carefully transferring the bee into a sterile vial. The bee should be kept in the vial for no more than 10 minutes in ambient temperature, before being placed in a cooler, containing crushed ice, not ice packs, set at a temperature above 25° F. A thermometer should be placed in the cooler to avoid potential freeze and kill of bee. Time in the cooler should be limited to no more than 120 minutes. To identify bee species, carefully remove bee from the vial, and photograph against a solid or gridded background away from direct sun. Photos should include the following in order to accurately identify the bumble bee: the hind leg for distinguishing sex; the face, including detail of the color patterns of the face, top of the head, and ideally cheek length; color pattern of the abdomen; color pattern on the thorax, including color below the bases of the wings; if the species has a yellow face, and a single yellow stripe on the abdomen, include the ventral side of the abdomen.
- 6.2.2. Locating Nests.** The Designated Biologist shall make every effort to locate nests if the Covered Species is suspected or confirmed within the Project Area. The Designated Biologist shall observe any ground animal burrow entrances for signs of the Covered Species. To confirm a suspected Covered Species nest, the Designated Biologist may block/cover any burrow entrance with a jar/vial (or similar) of appropriate size for no more than 30 minutes or until a bumble bee is detected. The vial should be monitored by the Designated Biologist for the duration that it is on the suspected nest in case a bumble bee does enter the vial. The Designated Biologist shall also observe bunch grasses, thatched annual grasses, brush piles, old bird nests, dead trees, or hollow logs to determine if a potential nest could be present. The Designated Biologist shall identify the species of bumble bee if a bumble bee is detected.
- 6.2.3. Nest Buffer.** If a Covered Species nest is detected or suspected, the Permittee, in consultation with the Designated Biologist, shall prohibit or immediately stop all Covered Activities within 50 feet of the nest. Permittee shall delineate the 50-foot buffer and notify all workers not to enter the environmentally sensitive area. The Designated Representative or Designated Biologist shall contact CDFW's Regional Representative within 24 hours for further consultation (see Condition of Approval 6.3). The Designated Biologist shall record the nest location with a GPS (including datum and horizontal accuracy in feet) and include photographs and a map of the nest location as part of notification to CDFW's Regional Representative. Permittee shall increase the size and/or modify the environmentally sensitive area buffer upon

notice from CDFW. Permittee shall maintain buffers until the nest has senesced or consulted for further instructions from CDFW's Regional Representative. Nest senescence can be determined by observing or surveying for gynes and drones in the fall. When determining senescence, the Designated Biologists shall monitor the nest for senescence for no less than 60 minutes per day for 3 consecutive days.

6.2.4. Repeat Surveys Following Periods of Inactivity. If Covered Activities are suspended for longer than three days during the Colony Active Period and Gyne Flight Season the Designated Biologist shall perform a minimum of one visual survey prior to re-starting Covered Activities.

6.2.5. Daily Visual Sweeps. The Designated Biologist shall conduct daily visual sweeps of the daily work area by walking ahead of grading and vegetation removal equipment for Covered Species at the start of daily work and throughout the daily workday. The Designated Biologist shall intermittently repeat visual sweeps throughout the daily work window because the Covered Species is unlikely to be active before the start of daily Covered Activities that initiate prior to 8:00 AM. After initial vegetation clearing has been completed, the frequency of daily visual sweeps may be modified after Permittee consults with and obtains written approval from CDFW.

6.3. Covered Species Observation (Suspected or Confirmed). If a suspected or confirmed Covered Species is detected in the Project Area, the Designated Representative or Designated Biologist shall immediately contact the CDFW Regional Representative by phone (805-712-0346) or email (Lisa.Cardoso@Wildlife.ca.gov). After any suspected or confirmed identification of the Covered Species in the Project Area, the Designated Biologist shall be present on-site for daily monitoring of Covered Activities until otherwise communicated by CDFW.

If a suspected or confirmed Covered Species individual is detected within the Project Area, every effort shall be made by the Designated Biologist to find the active nest. Covered Species nest surveys shall include the Project Area and a 50-foot buffer beyond the Project Area. If a Covered Species nest is found in the surveyed area, the Designated Biologist shall delineate a 50-foot no-activity buffer around the nest until the nest senesces (becomes inactive and is no longer in use, as determined by the Designated Biologist in consultation with the CDFW Regional Representative), or the Covered Activity in the Project Area is complete, whichever is first. The nest location shall be recorded with a GPS (including datum and horizontal accuracy in feet) and the Designated Biologist shall report the nest location to the CDFW Regional Representative within 24 hours of finding the nest.

7. Habitat Management Land Acquisition and Restoration: CDFW has determined that permanent protection and perpetual management of compensatory habitat is necessary and required pursuant to CESA to fully mitigate Project-related impacts of the taking on the Covered Species

that will result from implementation of the Covered Activities. This determination is based on factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will impact the habitat, and CDFW’s estimate of the protected acreage required to provide for adequate compensation.

To meet this requirement, the Permittee shall provide for both the permanent protection and management of 20 acres of high quality Riversidean Alluvial Fan Sage Scrub Habitat Management (HM) lands pursuant to Condition of Approval 7.2 below and the calculation and deposit of the management funds pursuant to Condition of Approval 7.3 below. Permanent protection and funding for perpetual management of HM lands must be complete before starting Covered Activities, or within 18 months of the effective date of this ITP if Security is provided pursuant to Condition of Approval 8 below for all uncompleted obligations.

7.1. Cost Estimates. For the purposes of determining the Security amount, CDFW has estimated the cost sufficient for CDFW or its contractors to complete acquisition, protection, and perpetual management of the HM lands as follows:

- 7.1.1.** Land acquisition costs for HM lands identified in Condition of Approval 7.2 below, estimated at \$200,006.00/acre for 20 acres: **\$4,000,120.00**. Land acquisitions costs are estimated using local fair market current value per acre for lands with habitat values meeting mitigation requirements;
- 7.1.2.** All other costs necessary to review and acquire the land in fee title and record a conservation easement as described in Condition of Approval 7.2.1 and 7.2.2 below: **\$17,440.00**;
- 7.1.3.** Start-up costs for HM lands, including initial site protection and enhancement costs as described in Condition of Approval 7.2.6 below, estimated at **\$121,301.80**;
- 7.1.4.** Interim management period funding as described in Condition of Approval 7.27 below, estimated at **\$209,443.60**;
- 7.1.5.** Long-term management funding as described in Condition of Approval 7.3 below, estimated at \$55,515.64/acre for 20 acres: **\$1,110,312.80**. Long-term management funding is estimated initially for the purpose of providing Security to ensure implementation of HM lands management.
- 7.1.6.** Related transaction fees including but not limited to account set-up fees, administrative fees, title and documentation review and related title transactions, expenses incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW as described in Condition of Approval 7.2, estimated at **\$8,800.00**.

7.1.7. All costs associated with CDFW engaging an outside contractor to complete the mitigation tasks, including but not limited to acquisition, protection, and perpetual funding and management of the HM lands and restoration of temporarily disturbed habitat. These costs include but are not limited to the cost of issuing a request for proposals, transaction costs, contract administration costs, and costs associated with monitoring the contractor's work, estimated at **\$75,000.00**.

7.2. Habitat Management Lands Acquisition and Protection. If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall:

7.2.1. Fee Title. Transfer fee title of the HM lands to CDFW pursuant to terms approved in writing by CDFW. Alternatively, CDFW, in its sole discretion, may authorize a governmental entity, special district, non-profit organization, for-profit entity, person, or another entity to hold title to and manage the property provided that the district, organization, entity, or person meets the requirements of Government Code sections 65965-65968, as amended.

7.2.2. Conservation Easement. If CDFW does not hold fee title to the HM lands, CDFW shall act as grantee for a conservation easement over the HM lands or shall, in its sole discretion, approve a non-profit entity, public agency, or Native American tribe to act as grantee for a conservation easement over the HM lands provided that the entity, agency, or tribe meets the requirements of Civil Code section 815.3. If CDFW elects not to be named as the grantee for the conservation easement, CDFW shall be expressly named in the conservation easement as a third-party beneficiary. The Permittee shall obtain CDFW written approval of any conservation easement before its execution or recordation. No conservation easement shall be approved by CDFW unless it complies with Civil Code sections 815-816, as amended, and Government Code sections 65965-65968, as amended and includes provisions expressly addressing Government Code sections 65966(j) and 65967(e). Because the "doctrine of merger" could invalidate the conservation interest, under no circumstances can the fee title owner of the HM lands serve as grantee for the conservation easement.

7.2.3. HM Lands Approval. Obtain CDFW written approval of the HM lands before acquisition and/or transfer of the land by submitting, at least three months before acquisition and/or transfer of the HM lands, documentation identifying the land to be purchased or property interest conveyed to an approved entity as mitigation for the Project's impacts on Covered Species;

7.2.4. HM Lands Documentation. Provide a recent preliminary title report, Phase I Environmental Site Assessment, and other necessary documents in [CDFW's Permittee Checklist of Documents for Habitat Management Land Property Review](#)

[and Protection](#). All documents conveying the HM lands and all conditions of title are subject to the approval of CDFW, and if applicable, the Wildlife Conservation Board and the Department of General Services;

- 7.2.5. Land Manager.** Designate both an interim and long-term land manager approved by CDFW. The interim and long-term land managers may, but need not, be the same. The interim and/or long-term land managers may be the landowner or another party. Documents related to land management shall identify both the interim and long-term land managers. Permittee shall notify CDFW of any subsequent changes in the land manager within 30 days of the change. If CDFW will hold fee title to the mitigation land, CDFW will also act as both the interim and long-term land manager unless otherwise specified. The grantee for the conservation easement cannot serve as the interim or long-term manager without the express written authorization of CDFW in its sole discretion.
- 7.2.6. Start-up Activities.** Provide for the implementation of start-up activities, including the initial site protection and enhancement of HM lands, once the HM lands have been approved by CDFW. Start-up activities include, at a minimum: (1) preparing a final management plan for CDFW approval (see optional management plan template at <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=227736>) (2) conducting a baseline biological assessment and land survey report within four months of recording or transfer; (3) developing and transferring Geographic Information Systems (GIS) data if applicable; (4) establishing initial fencing; (5) conducting litter removal; (6) conducting initial habitat restoration or enhancement, if applicable; and (7) installing signage;
- 7.2.7. Interim Management (Initial and Capital).** Provide for the interim management of the HM lands. The Permittee shall ensure that the interim land manager implements the interim management of the HM lands as described in the final management plan and conservation easement approved by CDFW. The interim management period shall be a minimum of three years from the date of HM land acquisition and protection and full funding of the Endowment and includes expected management following start-up activities. Interim management period activities described in the final management plan shall include fence repair, continuing trash removal, site monitoring, and vegetation and invasive species management, floral resource (nectar and pollen) establishment, floral resource irrigation and protection, floral resource monitoring, floral resource maintenance, potential remedial measures and costs, Covered Species surveys, and trespass management.

Permittee shall either (1) provide Security to CDFW for the minimum of three years of interim management that the land owner, Permittee, or land manager agrees to manage and pay for at their own expense, (2) establish an escrow account with

written instructions approved in advance in writing by CDFW to pay the land manager annually in advance, or (3) establish a short-term enhancement account with CDFW or a CDFW-approved entity for payment to the land manager.

- 7.3. Endowment Fund.** If the Permittee elects to provide for the acquisition, permanent protection, and perpetual management of HM lands to complete compensatory mitigation obligations, then the Permittee shall ensure that the HM lands are perpetually managed, maintained, and monitored by the long-term land manager as described in this ITP, the conservation easement, and the final management plan approved by CDFW. After obtaining CDFW approval of the HM lands, Permittee shall provide long-term management funding for the perpetual management of the HM lands by establishing a long-term management fund (Endowment). The Endowment is a sum of money, held in a CDFW-approved fund that is permanently restricted to paying the costs of long-term management and stewardship of the mitigation property for which the funds were set aside, which costs include the perpetual management, maintenance, monitoring, and other activities on the HM lands consistent with this ITP, the conservation easement, and the management plan required by Condition of Approval 75. Endowment as used in this ITP shall refer to the endowment deposit and all interest, dividends, other earnings, additions and appreciation thereon. The Endowment shall be governed by this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.

After the interim management period, Permittee shall ensure that the designated long-term land manager implements the management and monitoring of the HM lands according to the final management plan. The long-term land manager shall be obligated to manage and monitor the HM lands in perpetuity to preserve their conservation values in accordance with this ITP, the conservation easement, and the final management plan. Such activities shall be funded through the Endowment.

- 7.3.1. Identify an Endowment Manager.** The Endowment shall be held by the Endowment Manager, which shall be either CDFW or another entity qualified pursuant to Government Code sections 65965-65968, as amended.

Permittee shall submit to CDFW a written proposal that includes: (i) the name of the proposed Endowment Manager; (ii) whether the proposed Endowment Manager is a governmental entity, special district, nonprofit organization, community foundation, or congressionally chartered foundation; (iii) whether the proposed Endowment Manager holds the property or an interest in the property for conservation purposes as required by Government Code section 65968(b)(1) or, in the alternative, the basis for finding that the Project qualifies for an exception pursuant to Government Code section 65968(b)(2); and (iv) a copy of the proposed Endowment Manager's certification pursuant to Government Code section 65968(e).

Within thirty days of CDFW’s receipt of Permittee’s written proposal, CDFW shall inform Permittee in writing if it determines the proposal does not satisfy the requirements of Fish and Game Code section 2081(b)(3) and, if so, shall provide Permittee with a written explanation of the reasons for its determination. If CDFW does not provide Permittee with a written determination within the thirty-day period, the proposal shall be deemed consistent with Section 2081(b)(3).

7.3.2. Calculate the Endowment Funds Deposit. After obtaining CDFW written approval of the HM lands, long-term management plan, and Endowment Manager, Permittee shall prepare an endowment assessment (equivalent to a Property Analysis Record (PAR)) to calculate the amount of funding necessary to ensure the long-term management of the HM lands (Endowment Deposit Amount). Note that the endowment for the easement holder should not be included in this calculation. The Permittee shall submit to CDFW for review and approval the results of the endowment assessment before transferring funds to the Endowment Manager.

7.3.2.1. Capitalization Rate and Fees. Permittee shall obtain the capitalization rate from the selected Endowment Manager for use in calculating the endowment assessment and adjust for any additional administrative, periodic, or annual fees.

7.3.2.2. Endowment Buffers/Assumptions. Permittee shall include in the endowment assessment assumptions the following buffers for endowment establishment and use that will substantially ensure long-term viability and security of the Endowment:

7.3.2.2.1. 10 Percent Contingency. A 10 percent contingency shall be added to each endowment calculation to hedge against underestimation of the fund, unanticipated expenditures, inflation, or catastrophic events.

7.3.2.2.2. Three Years Delayed Spending. The endowment shall be established assuming spending will not occur for the first three years after full funding.

7.3.2.2.3. Non-annualized Expenses. For all large capital expenses to occur periodically but not annually such as fence replacement or well replacement, payments shall be withheld from the annual disbursement until the year of anticipated need or upon request to Endowment Manager and CDFW.

7.3.3. Transfer Long-term Endowment Funds. Permittee shall transfer the long-term endowment funds to the Endowment Manager upon CDFW approval of the Endowment Deposit Amount identified above.

7.3.4. Management of the Endowment. The approved Endowment Manager may pool the Endowment with other endowments for the operation, management, and protection of HM lands for local populations of the Covered Species but shall maintain separate accounting for each Endowment. The Endowment Manager shall, at all times, hold and manage the Endowment in compliance with this ITP, Government Code sections 65965-65968, as amended, and Probate Code sections 18501-18510, as amended.

Notwithstanding Probate Code sections 18501-18510, the Endowment Manager shall not make any disbursement from the Endowment that will result in expenditure of any portion of the principal of the endowment without the prior written approval of CDFW in its sole discretion. Permittee shall ensure that this requirement is included in any agreement of any kind governing the holding, investment, management, and/or disbursement of the Endowment funds.

Notwithstanding Probate Code sections 18501-18510, if CDFW determines in its sole discretion that an expenditure needs to be made from the Endowment to preserve the conservation values of the HM lands, the Endowment Manager shall process that expenditure in accordance with directions from CDFW. The Endowment Manager shall not be liable for any shortfall in the Endowment resulting from CDFW's decision to make such an expenditure.

7.4. Reimburse CDFW. Permittee shall reimburse CDFW for all reasonable costs incurred by CDFW related to issuance and monitoring of this ITP, including, but not limited to transaction fees, account set-up fees, administrative fees, title and documentation review and related title transactions, costs incurred from other state agency reviews, and overhead related to transfer of HM lands to CDFW.

7.5. Long-Term Management Plan. The Permittee shall prepare or fund the preparation of a Long-Term Management Plan (LTMP) designed to sustain or surpass the habitat quality of the HM lands, in perpetuity. At a minimum, the LTMP shall identify: (1) an estimated description of the physical condition of the mitigation site (at completion), including water resources and habitat types, and a map that identifies the location of the site; (2) goals related to sustaining habitat quality, wildlife usage, and overall function of the HM lands; and (3) management strategies proposed to meet those goals, including a monitoring and maintenance schedule, maintenance of signage and a list of contingency measures. Permittee should consult with CDFW for LTMP requirements and for an appropriate LTMP template. The Permittee shall be responsible for implementing the LTMP and shall submit a

Management Report every five years documenting, at a minimum: (1) management activities completed within the previous five-year term, including: (a) any remedial measures completed, (b) details of non-native species removal including: (i) species removed, (ii) the amount and frequency of removal, and (iii) the techniques used, and (c) enforcement activity necessary; (2) an assessment of overall habitat quality within the HM lands, including: (a) percent native and non-native vegetation cover, (b) any shifts in habitat type, (c) any loss of habitat cover, (d) any change in water resources, and (e) any new non-native species observed; and (3) an evaluation of the success or failure of management strategies implemented and any changes to management strategies proposed in response to the success or failures. The Management Report shall include photos documenting the management activities. Permittee shall submit the LTMP to CDFW for review and approval within one year after the effective date of this ITP.

8. **Security:** The Permittee may proceed with Covered Activities only after the Permittee has ensured funding (Security) to complete any activity required by Condition of Approval 7 that has not been completed before Covered Activities begin. Permittee shall provide Security as follows:
 - 8.1. **Security Amount.** The Security shall be in the amount of **\$5,542,418.20** or in the amount identified in 7.1 specific to the obligation that has not been completed. This amount is determined by CDFW based on the cost estimates identified in Condition of Approval 7.1 above, sufficient for CDFW or its contractors to complete land acquisition, property enhancement, startup costs, initial management, long-term management, and monitoring.
 - 8.2. **Security Form.** The Security shall be in the form of an irrevocable letter of credit (see Attachment 3) or another form of Security approved in advance in writing by CDFW’s Office of the General Counsel.
 - 8.3. **Security Timeline.** The Security shall be provided to CDFW before Covered Activities begin or within 30 days after the effective date of this ITP, whichever occurs first.
 - 8.4. **Security Holder.** The Security shall be held by CDFW or in a manner approved in advance in writing by CDFW.
 - 8.5. **Security Transmittal.** Permittee shall transmit security to CDFW by way of an approved instrument such as an escrow agreement, irrevocable letter of credit, or other.
 - 8.6. **Security Drawing.** The Security shall allow CDFW to draw on the principal sum if CDFW, in its sole discretion, determines that the Permittee has failed to comply with the Conditions of Approval of this ITP.
 - 8.7. **Security Release.** The Security (or any portion of the Security then remaining) shall be released to the Permittee after CDFW has conducted an on-site inspection and received confirmation that all secured requirements have been satisfied, as evidenced by:

- Written documentation of the acquisition of the HM lands;
- Copies of all executed and recorded conservation easements;
- Written confirmation from the approved Endowment Manager of its receipt of the full Endowment; and
- Timely submission of all required reports.

Even if Security is provided, the Permittee must complete the required acquisition, protection and transfer of all HM lands and record any required conservation easements no later than 18 months from the effective date of this ITP. CDFW may require the Permittee to provide additional HM lands and/or additional funding to ensure the impacts of the taking are minimized and fully mitigated, as required by law, if the Permittee does not complete these requirements within the specified timeframe.

IX. Amendment:

This ITP may be amended as provided by California Code of Regulations, Title 14, section 783.6, subdivision (c), and other applicable law. This ITP may be amended without the concurrence of the Permittee as required by law, including if CDFW determines that continued implementation of the Project as authorized under this ITP would jeopardize the continued existence of the Covered Species or where Project changes or changed biological conditions necessitate an ITP amendment to ensure that all Project-related impacts of the taking to the Covered Species are minimized and fully mitigated.

X. Stop-Work Order:

If CDFW determines the Permittee has violated any term or condition of this ITP or has engaged in unlawful take, CDFW may issue Permittee a written stop-work order instructing the Permittee to suspend any Covered Activity for an initial period of up to 30 days or risk suspension or revocation of this ITP. CDFW can issue a stop-work order to prevent or remedy a violation of this ITP, including but not limited to the failure to comply with reporting or monitoring obligations, or to prevent the unauthorized take of any CESA endangered, threatened, or candidate species, regardless of whether that species is a Covered Species under this ITP. Permittee shall stop work immediately as directed by CDFW upon receipt of any such stop-work order. Upon written notice to Permittee, CDFW may extend any stop-work order issued to Permittee for a period not to exceed 30 additional days.

If Permittee fails to remedy the violation or to comply with a stop-work order, CDFW may proceed with suspension and revocation of this ITP. Suspension and revocation of this ITP shall be governed by California Code of Regulations, Title 14, section 783.7, and any other applicable law. Neither the Designated Biologist nor CDFW shall be liable for any costs incurred in complying with stop-work orders.

XI. Compliance with Other Laws:

This ITP sets forth CDFW's requirements for the Permittee to implement the Project pursuant to CESA. This ITP does not necessarily create an entitlement to proceed with the Project. Permittee is responsible for complying with all other applicable federal, state, and local law.

XII. Notices:

Written notices, reports and other communications relating to this ITP shall be delivered to CDFW by email or registered first class mail at the following address, or at addresses CDFW may subsequently provide the Permittee. Notices, reports, and other communications shall reference the Project name, Permittee, and ITP Number (2081(b)-2025-060-06) in a cover letter and on any other associated documents.

LOCUST GATEWAY DEVELOPMENT PROJECT

XIII. Compliance with the California Environmental Quality Act:

CDFW's issuance of this ITP is subject to CEQA. CDFW is a responsible agency pursuant to CEQA with respect to this ITP because of prior environmental review of the Project by the lead agency, City of Rialto. (See generally Pub. Resources Code, §§ 21067, 21069.) The lead agency's prior environmental review of the Project is set forth in the *Locust Gateway Development Project Environmental Impact Report* (SCH No.: 2024061274) dated September 2025, that the City of Rialto certified for Locust Gateway Development Project on January 27, 2026. At the time the lead agency certified the EIR and approved the Project it also adopted various mitigation measures for the Covered Species as conditions of Project approval.

This ITP, along with CDFW's related CEQA findings, which are available as a separate document, provide evidence of CDFW's consideration of the lead agency's EIR for the Project and the environmental effects related to issuance of this ITP (CEQA Guidelines, § 15096, subd. (f)). CDFW finds that issuance of this ITP will not result in any previously undisclosed potentially significant effects on the environment or a substantial increase in the severity of any potentially significant environmental effects previously disclosed by the lead agency. Furthermore, to the extent the potential for such effects exists, CDFW finds adherence to and implementation of the Conditions of Project Approval adopted by the lead agency, and that adherence to and implementation of the Conditions of Approval imposed by CDFW through the issuance of this ITP, will avoid or reduce to below a level of significance any such potential effects. CDFW consequently finds that issuance of this ITP will not result in any significant, adverse impacts on the environment.

XIV. Findings Pursuant to CESA:

These findings are intended to document CDFW's compliance with the specific findings requirements set forth in CESA and related regulations. (Fish & G. Code § 2081, subs. (b)-(c); Cal. Code Regs., tit. 14, §§ 783.4, subds, (a)-(b), 783.5, subd. (c)(2).)

CDFW finds based on substantial evidence in the ITP application, Locust Gateway Development Project, the results of consultations, and the administrative record of proceedings, that issuance of this ITP complies and is consistent with the criteria governing the issuance of ITPs pursuant to CESA:

- (1) Take of Covered Species as defined in this ITP will be incidental to the otherwise lawful activities covered under this ITP;
- (2) Impacts of the taking on Covered Species will be minimized and fully mitigated through the implementation of measures required by this ITP and as described in the MMRP. Measures include: (1) permanent habitat protection; (2) establishment of avoidance zones; (3) worker education; and (4) Monthly Compliance Reports. CDFW evaluated factors including an assessment of the importance of the habitat in the Project Area, the extent to which the Covered Activities will impact the habitat, and CDFW's estimate of the acreage required to provide for adequate compensation. Based on this evaluation, CDFW determined that the protection and management in perpetuity of 36.4 acres of compensatory habitat that is

Incidental Take Permit
No. 2081(b)-2025-060-06
IV5 LOCUST GATEWAY LOGISTICS CENTER LLC
LOCUST GATEWAY DEVELOPMENT PROJECT

contiguous with other protected Covered Species habitat and/or is of higher quality than the habitat being destroyed by the Project, along with the minimization, monitoring, reporting, and funding requirements of this ITP minimizes and fully mitigates the impacts of the taking caused by the Project;

- (3) The take avoidance and mitigation measures required pursuant to the conditions of this ITP and its attachments are roughly proportional in extent to the impacts of the taking authorized by this ITP;
- (4) The measures required by this ITP maintain Permittee’s objectives to the greatest extent possible;
- (5) All required measures are capable of successful implementation;
- (6) This ITP is consistent with any regulations adopted pursuant to Fish and Game Code sections 2112 and 2114;
- (7) Permittee has ensured adequate funding to implement the measures required by this ITP as well as for monitoring compliance with, and the effectiveness of, those measures for the Project; and
- (8) Issuance of this ITP will not jeopardize the continued existence of the Covered Species based on the best scientific and other information reasonably available, and this finding includes consideration of the species’ capability to survive and reproduce, and any adverse impacts of the taking on those abilities in light of (1) known population trends; (2) known threats to the species; and (3) reasonably foreseeable impacts on the species from other related projects and activities. Moreover, CDFW’s finding is based, in part, on CDFW’s express authority to amend the terms and conditions of this ITP without concurrence of the Permittee as necessary to avoid jeopardy and as required by law.
