

Staff Summary for April 15-16, 2026

20. Sport Fishing 2026 (Inland and Marine)**Today's Item**Information Action

Consider authorizing publication of notice of intent to amend sport fishing regulations.

Summary of Previous/Future Actions

- | | |
|---|--------------------------|
| • Wildlife Resources Committee (WRC) vetting and recommendation | January 13, 2026; WRC |
| • Today's notice hearing | April 15-16, 2026 |
| • Discussion hearing | June 17-18, 2026 |
| • Adoption hearing | August 12-13, 2026 |

Background

At the September 2024 and January 2025 WRC meetings, the Department presented recommendations for amendments to sport fishing regulations. For workload management purposes, further consideration of the recommendations was postponed. At the September 2025 WRC meeting, the Department reintroduced its recommendations, along with a number of new ones, for potential consideration in a rulemaking this year. At its January 2026 meeting, WRC recommended that the Commission support a future rulemaking regarding sport fishing.

The Department recommends the Commission amend sport fishing regulations to improve clarity, increase angler opportunities, and protect fish populations. The recommended amendments, which encompass almost two dozen sections of regulatory code, are intended to make:

- Regulation language clarifications
- Changes to increase fishing opportunities
- Changes to fishing gear, measuring, and sampling
- Protective changes for vulnerable fish populations
- Changes to steelhead fishing report and restoration cards
- Low-flow regulation changes

Further details and rationales regarding all components of the proposed changes can be found in the draft initial statement of reasons (Exhibit 2), and specifics for each proposed change can be found in the draft proposed regulatory language (Exhibit 3). The Department has also provided a document summarizing many of the recommended changes, included as Exhibit 6.

Significant Public Comments

1. The Department, coincident with its transmittal of the draft initial statement of reasons, included letters of support from local governments and NGOs regarding different elements of the regulatory change package:

Staff Summary for April 15-16, 2026

- a. The Modoc County Board of Supervisors supports removing the minimum size requirement from all waters within Lassen and Modoc counties, with the exception of Mountain Meadows Reservoir (Exhibit 7).
- b. CalTrout supports reopening lower Battle Creek from June 30 to December 31 for fishing with artificial lures with barbless hooks, updating regulations to include Trout Creek in Section 7.50 and adopting catch-and-release only regulations, and removing Fall River Lake and Pond from the wild trout designation and from Section 7.50 (Exhibit 8).
- c. Trout Unlimited supports making Trout Creek (Siskiyou County) a catch-and-release only fishery (Exhibit 9).
- d. The Fall River Conservancy supports removing Fall River Lake and Pond from the wild trout designation and from Section 7.50 (Exhibit 10).
- e. The Lassen County Board of Supervisors supports removing the minimum size requirement from all waters within Lassen and Modoc counties, with the exception of Mountain Meadows Reservoir, and supports reverting the Susan River fishing season to the historic traditional trout opener on the last Saturday in April through November 15 (Exhibit 11).

Recommendation

Commission staff: Authorize publication of a notice of intent to amend regulations pertaining to sport fishing as recommended by the Department.

Committee: Authorize publication of a notice of intent to amend regulations as recommended by the Department.

Department: Authorize publication of a notice of intent to amend regulations pertaining to sport fishing regulations consistent with the draft initial statement of reasons and draft proposed regulatory language.

Staff Summary for April 15-16, 2026

Motion

Moved by _____ and seconded by _____ that the Commission authorizes publication of a notice of its intent to amend sections 1.62 et al., related to sport fishing regulations.

MEMORANDUM

Date: March 18, 2026

To: Melissa Miller-Henson, Executive Director
Fish and Game Commission

From: Meghan Hertel, Director

Subject: Submittal of Initial Statement of Reasons for the April 15-16, 2026 Fish and Game Commission meeting to Amend Sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88, 6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701, Title 14, California Code of Regulations, Re: Sport Fishing Regulations Update

Please find attached the Initial Statement of Reasons to amend sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88, 6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701, Title 14, California Code of Regulations. The proposed regulatory changes are needed to effectively manage California's sport fisheries and clarify sport fishing regulations, increase angler opportunities, and protect fish populations. Authorization of this request for publication of notice at the April 2026 Commission meeting will allow for discussion at the June 2026 Commission meeting, and possible adoption at the August 2026 Commission meeting.

If you have any questions or need additional information, please contact Jay Rowan, Chief, Fisheries Branch or Maggie McCann, Senior Environmental Scientist, at Fisheries@wildlife.ca.gov.

Initial Statement of Reasons for Regulatory Action

Amend Sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88,
6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701,
Title 14, California Code of Regulations
Re: Sport Fishing Regulations Update

I. Date of Initial Statement of Reasons: February 23, 2026

II. Dates and Locations of Scheduled Hearings

(a) Notice Hearing

Date: April 16, 2026

Location: Sacramento

(b) Discussion Hearing

Date: June 18, 2026

Location: Sacramento

(c) Adoption Hearing

Date: August 13, 2026

Location: Sacramento

III. Description of Regulatory Action

(a) Statement of Specific Purpose of Regulatory Change and Factual Basis for Determining that Regulation Change is Reasonably Necessary

Unless otherwise specified, all section references in this document are to Title 14 of the California Code of Regulations (CCR).

This regulatory proposal combines California Department of Fish and Wildlife (Department) and public requests for changes to Title 14, CCR sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88, 6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701, for the 2026 sport fishing regulatory cycle. This proposal contains multiple updates that would clarify sport fishing regulations, increase angler opportunities, change gear requirements, change fish measurement and sampling protocols, improve the steelhead report card and low-flow regulations, and protect vulnerable fish populations. These proposed regulatory changes are needed to effectively manage California's sport fisheries, and correct errors and inaccuracies in the existing regulations to reduce public confusion and improve regulatory enforcement.

Proposed Regulations

The Department is proposing changes to the following regulations in Title 14, CCR. Due to the number and complexity of the regulation change proposal, the changes are organized below into categories.

Regulation Language Clarifications:

The proposed changes are necessary in order to enhance clarity, consistency, or fix errors, and do not alter the application or enforcement of these regulations:

- **Section 2.11, Special Fishing Methods – Lake County:** In 2014, Clear Lake Hitch were listed under California Endangered Species Act (CESA) as threatened and can no longer be taken without a CESA incidental take permit or MOU. The language in Section 2.11 conflicts with the take prohibitions for Clear Lake Hitch and needs to be removed from Title 14 CCR.
- **Section 5.65, Shad, American:** In 2025 there was a regulation change to allow spearfishing as a method of take for American Shad in the Valley District in Section 2.30. The proposed change would add spearfishing as a method of take allowable for American Shad in the Valley District in Section 5.65. This would make Section 5.65 consistent with Section 2.30.
- **Section 5.85, subsection (a)(2), Trout:** This proposal would add Section 7.00, which lists general regulations in each District, to the list of sections excepted from general statewide trout regulations. This proposal would remove ambiguities associated with wardens enforcing fishing regulation violations.
- **Section 6.34, Southern District Definition:** The current regulations definition of the “Southern District” in Section 6.34 erroneously copies the Sierra District definition. This change would correct the language to the as-intended definition of the Southern District.
- **Section 7.50, subsection (b)(90), McCloud River and Tributaries:** This proposal would clean up, reorganize, and group streams with similar regulations in subsection 7.50(b)(90) for the McCloud River and tributaries. This would simplify the regulation, making it easier to understand by grouping waters with similar regulations.
- **Section 7.50, subsection (b)(145), Sq. Valley Creek:** The name of Sq. Valley Creek was changed by federal legislation through the Department of Interior’s Order 3404 on September 8, 2022 to Yét Atwam Creek. This proposal would make the regulation text consistent with federal legislation.
- **Section 230, subsection (g)(2), Issuance of Permits for Contests Offering Prize for the Taking of Game Fish:** There is a minor grammar error in subsection 230(g)(2), which has an ungrammatical ‘s’ that would be removed from the word “changes”.
- **Section 7.40, subsection (b):** Renumber subsections (b)(28) through (b)(124) to account for the addition of multiple special waters to this subsection. Section 7.40, like Section 7.50, are listed by special water in alphabetical order to help anglers find the water they search for in this regulation. Updates to other regulations sections have been made in this proposal to update or remove unnecessary references to 7.40(b) and 7.50(b) due to the continual changes in the numbering of these sections when waters are added or removed. There are minor edits to text to align subsection 7.40(b) and 7.50(b) language with the updated Section 8.00 language that is part of this proposal, which will clarify boundaries in both sections where descriptions are unclear, provide consistent placement of text, and update subsection references between Section 8.00 and subsection 7.40(b) where needed. Subsection (b)(43)(D)(1) has been consolidated into subsection 7.40(b)(43)(D) to provide clarification and removal of the additional box and subsection (1). In subsection 7.40(b)(72)(C), the boundary feature has a name change from “Sonoma/Mendicino Boy Scout Council Camp” to “Camp Noyo” to reflect

the name change of the property. For the Smith River, subsection 7.40(b)(108)(A), was added to match the language in proposed subsection 8.00(a)(4) describing the Smith River from the mouth to the confluence with Rowdy Creek. This change was made to align with the Smith River sections described in subsections 7.40(b)(108)(B) and (C).

Changes To Increase Fishing Opportunities

The proposed changes described below would increase fishing opportunities in the affected regulation sections.

- **Section 4.20, subsection (d), Bait Fish Use in the Sacramento River (Shasta and Tehama Co.):** This proposed change would move the upper limit of the Sacramento River upstream from Highway 32 Bridge to Deschutes Bridge for bait fish use. Generally, declining fish populations associated with drought and climate change have limited many fishing opportunities. At the same time, Striped Bass populations have expanded into more areas of the Sacramento River, especially after the Red Bluff Diversion Dam was permanently opened. This proposed change would allow live fin fish to be used further up the Sacramento River, which would increase fishing opportunities for Striped Bass and other non-native fishes that are currently limited to use of lures and other methods. It may also increase harvest of these non-native species, which could have a potential benefit on vulnerable salmonid populations.
- **Section 5.00, subsection (b), Black Bass (Lassen and Modoc Co.):** This proposed change would remove the black bass minimum size requirement from waters in Lassen and Modoc counties, except for Mountain Meadows Reservoir where the minimum size would remain at 12 inches. Growth rates of Largemouth Bass are typically slow within Lassen and Modoc counties due shorter growing season attributable to the high elevation. Additionally, reservoirs containing large bass populations are often overrun with stunted bass, and few bass are able to reach the 12-inch minimum size requirement for harvest. The 12-inch minimum size requirement reduces the number of harvested bass, which could affect the bass populations by further stunting their growth. Removing the minimum size requirement in these locations would increase the harvest of smaller bass and improve the size class structure within the bass populations. Mountain Meadows Reservoir is still recovering from being drained in 2015 and has the potential to grow trophy class bass as it has in the past. The 12-inch minimum size requirement at Mountain Meadows Reservoir would be maintained under the General Statewide Restrictions regulations allowing the bass population to grow, and allow more young bass to grow to the 12-inch size minimum and larger. Subsection numbers (b)(3) through(b)(14) have been re-numbered to allow for the two counties added into this section. The Lassen Board of Supervisors and the Modoc Board of Supervisors with the Modoc Fish, Game, and Recommendation Department sent letters of support for this change. Also, subsection 5.00(b)(2) for Inyo County is proposed to be split into separate boxes in the table and subsections(A) and (B), to provide clarity on open season and bag limits, without changing any of the regulations.
- **Section 7.00, subsection (b)(2), District General Regulations—Sierra District (Shasta and Tehama Co.):** This proposed change would increase fishing opportunity by allowing the use of bait during summer months within anadromous streams in Shasta

and Tehama counties when anadromous fish are not present. Declining fish populations associated with drought and climate change have limited many fishing opportunities. At the same time, Striped Bass populations have expanded into more areas of the Sacramento River, especially after the Red Bluff Diversion Dam was permanently opened. The proposed split season with June 16 to September 30 dropped the artificial lure requirement for allowable use of live fin fish as bait during this period when bass. Allowing appropriate live fin fish bait to be used further up the Sacramento River would increase fishing opportunities on Striped Bass and other non-native fishes that are currently limited to lures and other methods. It may also increase harvest, which could have a potential benefit on salmonid populations.

- **Section 7.40, subsection (b)(11), Battle Creek (Shasta and Tehama Co.):** This proposed change would re-open lower Battle Creek from 1,250 feet below Coleman Fish Hatchery weir to its confluence with the Sacramento River from June 30 to December 31, with the restriction that only artificial lures with barbless hooks may be used. This change would provide recreational angling opportunities for native and non-native warmwater fish species and hatchery-origin trout and steelhead.
 - Lower Battle Creek from the mouth to Coleman Fish Hatchery weir is currently closed to angling year-round. Allowing angler access to lower Battle Creek beginning June 30 will increase fishing opportunities on Striped and Black Bass. Battle Creek was historically a popular steelhead fishery, but was closed to angling in the early 1990's to ensure that Coleman National Fish Hatchery would annually secure sufficient adult steelhead broodstock.
 - Returns of hatchery-origin steelhead to Coleman National Fish Hatchery are now routinely in excess of broodstock collection targets. Presently, these fish are only available to recreational anglers in the mainstem Sacramento River. However, due to a variety of factors, contact with these fish in the mainstem Sacramento River is extremely low. Furthermore, the mainstem Sacramento River steelhead fishery is primarily boat-based. Shore-based steelhead fishing on lower Battle Creek would provide opportunity to much broader angling interest groups.
 - The harvest of Coleman Hatchery steelhead is expected to be minimal based on observed creel data from neighboring hatchery steelhead fisheries on the American and Feather Rivers due to angler preference for catch and release angling.
- **Section 7.40, subsection (b)(50), Klamath River Basin Regulations:** This proposed change would increase fishing opportunity in the Klamath River by allowing catch and release fishing within anadromous sections of the mainstem Klamath River from the Copco Road bridge at Copco to Lakeview Road bridge near Iron Gate (Siskiyou County). The open season would be a summer season from the fourth Saturday in May through August 31, with a restriction that only artificial lures with barbless hooks may be used. Additional restrictions include a zero harvest limit for hatchery trout and steelhead as well as being closed to the take and possession of Chinook Salmon. This change would provide recreational angling opportunity for freshwater fish during the summer months within the [Klamath Dam Removal project area](#). The proposed summer season

regulations would provide consistency with currently open waters adjacent to and upstream of this subsection.

- Section 7.50, subsection (b)(47), Fall River Complex (Shasta and Siskiyou Co.):** The Fall River is a unique river in that it is fed by multiple natural springs (i.e., spring-fed system) and is a prime trout fishing water. The “Fall River Complex” was added to the freshwater sport fishing regulations in 2021. The angling regulation addition coincided with an expansion of the Fall River wild trout designation. Department justified the addition and expansion by citing its unique spring-fed system and genetic differences and life histories among Rainbow Trout (*Oncorhynchus mykiss*) within the Fall River system, which is a research project led by U.C. Davis with assistance from the Department. The regulation was put in place to provide protections for Rainbow Trout in the Fall River Complex and was the result of litigation by the Fall River Conservancy. Fall River Pond and Fall River Lake were not included in the U.C. Davis research and there is limited data to suggest that Rainbow Trout from the Fall River Complex mix with Rainbow Trout in Fall River Lake and Fall River Pond, so the inclusion of these two locations is not necessary. The current regulations have been unpopular with anglers, and research suggests they are not effective in protecting the population of Rainbow Trout that was intended to be protected by this regulation. CalTrout, Trout Unlimited, and Fall River Conservancy have sent support letters for the proposed change. This proposed change would remove subsections (47)(L) Fall River Pond and (47)(M) Fall River Lake from subsection 7.50(b)(47) Fall River Complex (Shasta and Siskiyou Co.). The removal of these two paragraphs Fall River Pond and Fall River Lake from subsection 7.50(b) means that these stretches of waters would then fall under subsection 5.85(a)(1), which outlines the statewide general trout regulations for take allowances. Owing to the removal of subsections (b)(47)(L) and (b)(47)(M), the language for subsection (b)(47)(A) is shifted from the confluence of the Fall River with the Pit River, to Pit No. 1 PG&E Diversion Dam.
- Section 7.50, subsection (b)(149), Susan River (Lassen Co.) and Section 8.10, Susan River Youth Derby:** This proposed change would revert fishing regulations to the previous trout opener (Last Saturday in April through November 15) that was updated by previous regulation change in 2020 (OAL file #2020-1204-02s). The proposed change would also update language to include a special open season for youth participating in the Youth Fishing Derby in Section 8.10 to start prior to the proposed earlier season start. Reverting to the traditional trout season will increase angler opportunity by lengthening the season in the spring and shortening the winter season. During much of the winter the river is typically unfishable (due to ice and snow), so the winter provides little to no opportunity. Water in the Susan River can warm significantly in the late spring and early summer, as releases from McCoy Flat and Hog Flat reservoirs increase. Having the season open earlier will provide more opportunity while angling conditions are good, while not impacting spawning.

Changes to Fishing Gear, Measuring, and Sampling

The following proposed changes are related to fishing gear, measuring and sampling regulation restrictions:

- **Sections 1.62, 28.25, 28.30, 28.32, and 28.35, Minimum and Maximum Size and Alternate Length and Species Specific Regulations:**

This proposed change would amend Section 1.62 to more clearly define the method to determine total length of finfish. The change would clarify that total length is measured with the fish's mouth closed, lying flat on a horizontal surface, and that the tail may be pinched, fanned, or naturally swung (see Figures 1-3 below for a photograph of these tail positions). Fanning and swinging of a fish's tail is expressly allowed for salmon and halibut but not specified in the general maximum length in Section 1.62. It has been a long-time practice for our law enforcement officers to allow this technique, but it is not consistently understood by anglers. Importantly, crew onboard Commercial Passenger Fishing Vessels (CPFVs) have requested clarification, to ensure they are measuring passengers' fish correctly.

Figure 1: Fish measurement natural

Figure 2: Fish measurement pinched

Figure 3: Fish measurement swung (*the hand in the photo blocks the view of the tail, but is similar to pinched*)

The proposed change also includes changing the phrase “fish, mollusks or crustaceans” to “finfish or invertebrates” and clarifies that measurement of invertebrate species is specified within the individual invertebrate regulations. The proposal also changes existing language that refers to “mollusks, or crustaceans” to the term “invertebrates” which is more inclusive and encompasses other groups like echinoderms. It clarifies that methods to determine length for invertebrates are found in the individual subsections for those species. Recreational fishing groups including American Sportfishing Association, Sportfishing Association of California, and Coastal Conservation Association of California were contacted and support these changes.

The proposed change additionally removes alternate length measurements from Section 1.62, and from the sections for barracuda, kelp and sand basses, and white sea bass (sections 28.25, 28.30, and 28.35, respectively). Alternate length is proposed to be removed as it causes unnecessary confusion and concerns with law enforcement. The allowance of retaining filleted fish (i.e., Section 27.65), with associated minimum fillet lengths provided for these species, makes the use of an alternate length unnecessary. A provision to use either total length or a 5-pound minimum weight limit for bonito, found in Section 28.32, was established to make recreational catch limits consistent with commercial catch limits. Given that this consistency is no longer necessary and that determining weight at sea onboard a boat is generally difficult and inaccurate, along with the fact that the minimum size limit adequately protects the fish stock, the 5-pound weight limit alternative is not needed and is proposed for removal. The Department consulted with representatives from the American Sportfishing Association, Coastal Conservation Association of California, and Sportfishing Association of California who all agreed that the existing provisions to allow alternate lengths and the 5-pound minimum weight limit for bonito were confusing and unnecessary.

The proposed change would also add Fish and Game Code sections 7701 and 7708 to the authorities list of Section 1.62. Adding those authorities would help clarify that Section 1.62 applies to both recreational and commercial fisheries.

- **Section 1.73, Salmon:** This proposed change would require any person in possession of a recreationally taken salmon in which an adipose fin is present to provide the Department a tissue sample upon request. This includes the additional requirement of all persons fishing for salmon to provide a tissue sample from unmarked (i.e., adipose fin present) salmon upon request by an authorized agent or employee of the Department. Amending biological sample collection requirements allows for the use of Parentage-Based Tagging (PBT) in fisheries surveys advances fisheries monitoring in a number of ways. PBT is highly efficient, as the tagging process requires only genotyping the parents to produce a 100% tag rate of offspring, which can lead to higher tag recovery rates and improved statistical precision of estimates. Additionally, there is no physical tag loss or handling mortality associated with PBT; parentage assignments can be obtained non-lethally via a small tissue sample, and large-scale tagging can occur at a much lower cost compared to physical marking and tagging methods. This proposal would allow the Department to integrate PBT recovery data into the current salmon management framework, allowing tissue samples to be collected from unmarked salmon contacted in monitoring programs.
- **Section 2.10, Hook and Weight Restrictions:**

This proposed change would allow for the usage of a small lightweight weight directly attached below a hook and expansion of fishable waters with treble hooks on non-buoyant lures. The amendment of subsections 2.10(b)(3) and (4) would clarify regulations for the public and wildlife officers. The change to weights being allowed below a hook would not apply to lakes and reservoirs, the Sacramento-San Joaquin Delta, or the Colorado River as outlined in subsection 2.10(b). The change to the use of treble hooks on non-buoyant lures would have an expanded boundary within the Valley District. The use of treble hooks on non-buoyant lures would be permissive in portions of the mainstem Sacramento, American, Feather, and Yuba rivers. The gear type allowed in the newly permissive sections would be limited to lures made of soft or hard plastics, or wood, which would reduce snagging risk to salmonid species while creating more opportunity for non-salmonid angling.

Current regulations do not allow the use of weights of any size attached directly below a hook in rivers or streams. Also, the use of treble hooks on non-buoyant lures exceeding one ounce cannot be used in this same geographic area. The intention of these regulations is to prevent the use of gear rigging that could be used to snag native fishes in their migration or spawning habitat. However, these restrictions minimize angling opportunity by limiting the techniques and species that can be targeted, especially during the time of year when native species are not present. Additionally, small lightweight weights attached below a hook can help sink light terminal tackle in the water column, and are used in popular angling techniques legal in other states. Depending on gear rigging, some common lures and techniques do not pose a snagging risk, and could be techniques that California anglers utilize to target trout, bass, and other species.

In the angling community there is confusion about the legality of techniques and tackle. This confusion stems from the popularity of the techniques that utilize this configuration in other states, similar fisheries occurring here in California, and because the method is permissible in lakes, reservoirs, and the Delta. This change would improve law enforcement's ability to enforce these regulations consistently across the state and reduce the need to intervene as frequently.

- **Section 7.40(b)(40)(A)1. and 2., Eel River:** This proposed change would update the gear restriction boundary to align with more recognizable features, providing clarity for both anglers and law enforcement. The boundary line would change from the mouth of the Eel River to Fulmor Road, and instead be the mouth to Cock Robin Island, resulting in a slight shift downstream (~.5 miles).

Protective Changes for Vulnerable Populations

The following proposed changes are recommended to protect vulnerable populations, while preserving fishing opportunities:

- **Section 6.35 and subsection 7.00(b)(2), Sierra District Definition and District General Regulations:** This proposed change would modify the Sierra district boundary in Section 6.35 to include a small section of Yuba County (“Yuba County east of New Bullards Bar Dam;”) to protect experimentally reintroduced Chinook Salmon. This change would also close Chinook Salmon fishing in the North Fork Feather River (NFFR) above Chester Diversion Dam, and on the North Yuba River (NYR) above New Bullards Bar Dam all year in subsection 7.00(b)(2). This proposal also adds two specific subsections in Section 7.00, the Sierra District (adding (b)(3) and (b)(4), the NFFR above Chester Diversion Dam, and on the NYR above New Bullards Bar Dam, which will be closed to Chinook Salmon fishing all year). This closure does not include New Bullards Bar Reservoir, just the tributaries. Scientific studies are currently being implemented within the NFFR, led by the California Department of Water Resources, and in the NYR, led by the Department, evaluating Spring-Run Chinook Salmon reintroduction to these historical habitats. Changing the regulation to close fishing of Chinook Salmon at all times of the year in these waterways will allow for study fish through various developmental stages (eggs, alevin, fry, parr, smolt, adult) to remain in the study area informing study results and reintroduction efforts.
- **Section 7.40(b), Addition of Creeks with Special Regulations:** This proposed change would recommend adding new special regulation sections for Clear Creek (added as subsection (b)(28)), Cow Creek (added as subsection (b)(36)), Cottonwood Creek (added as subsection (b)(35)), and Paynes Creek (added as subsection (b)(74)). This proposal would also change the Antelope Creek boundary under (b)(5) from the confluence with the North Fork downstream to Ponderosa Way crossing on the North Fork and South Fork to make angling more protective for Central Valley steelhead in this subsection. Local fishing opportunities are currently very limited due to a variety of overlapping regulations, some of which are not necessary. Allowing the public, especially children, to catch warm water fish with bait in anadromous streams in the middle of the summer when anadromous fish species are not present would be very beneficial to the public and the Department’s [Recruit, Retain, Reactivate \(R3\)](#) goals. With the exception of Clear Creek, Cow Creek, Cottonwood Creek, and Paynes Creek, the majority anadromous tributaries have specific protective regulations already present in 7.40; adding Clear Creek, Cow Creek, Cottonwood Creek, and Paynes Creek will complete this protective set of regulations. The Department is also frequently criticized by local water users about the predation of listed stocks on non-native species. Allowing this regulation change would be a first step in addressing their concerns. These additions result in renumbering most of subsection 7.40(b) bodies of water to maintain the alphabetical listing.

- **Section 7.50(b)(6), Arroyo Seco River (Monterey Co.):** On the Arroyo Seco River (Monterey Co.), above the waterfall located approximately 3.5 miles above the U.S. Forest Service Ranger Station, change the trout bag limit from 5 trout to 5 Brown Trout and 0 Rainbow Trout, and add a Special Restriction of “only artificial lures with barbless hooks may be used”. The upper Arroyo Seco River contains a population of native Coastal Rainbow Trout (*Oncorhynchus mykiss*), offering a unique sport fishing opportunity in the Salinas River watershed in Monterey County. Like other trout populations throughout California, this population of native Coastal Rainbow Trout has likely been negatively impacted by increasingly severe drought conditions (Dagit et al. 2017). The population has also likely been impacted by degradation of instream habitat conditions due to recent wildfires, such as the Dolan fire. The current fishing regulations allow for the harvest of 5 trout per person per day above the waterfall on the Arroyo Seco River. The upper Arroyo Seco River is in relatively close proximity to urban areas; thus, with the current 5 trout bag limit, there is the potential for high angler harvest of Coastal Rainbow Trout. The lack of a gear restriction for trout currently allows the potential for high deep-hooking and catch and release mortality rates that can be associated with the use of bait and barbed hooks when angling non-anadromous salmonids (Hooton 2001; DuBois and Kuklinkski 2004). Additionally, the upper Arroyo Seco contains a non-native population of Brown Trout (*Salmo trutta*) which offers sport fishing opportunities, though they may negatively impact native Coastal Rainbow Trout through competition and predation (Hasegawa 2016). Changing trout regulations in the upper Arroyo Seco to a 5 Brown Trout and 0 Rainbow Trout bag limit with an artificial lures with barbless hooks only special restriction will ensure that this recreational Rainbow Trout fishery is protected and sustainable, while allowing recreational anglers the option of harvesting non-native brown trout.

 - Further, Rainbow Trout produced above the Arroyo Seco Gorge are likely capable of travelling downstream of the waterfall (possible total barrier to upstream migration) to the Salinas River, and eventually the Pacific Ocean, possibly supplementing anadromous federally threatened South-Central California Coast steelhead productivity in the Salinas River watershed. Resident *O. mykiss* above barriers constitute a key life history strategy expressed by the species, allowing populations to persist through prolonged droughts which restrict access of adult steelhead into arid systems like the Arroyo Seco, and serve as an important genetic reserve for these populations (Clemento et al. 2009). Thus, in addition to supporting the persistence of a unique native Coastal Rainbow Trout sport fishery in Monterey County, conserving Coastal Rainbow Trout in the upper Arroyo Seco watershed through this regulation change will support steelhead population viability in the Salinas River watershed, where returns of anadromous adults are drastically reduced from historical numbers (Cuthbert et al. 2014).
 - Additionally, this regulation change will maintain consistency with sections open to fishing above anadromy within other streams absent of major impassible dams in the Region 4 coastal counties. These streams each have an artificial lures with barbless hooks only gear restriction, as well as either a 0 trout bag limit or 2 hatchery trout bag limit (effectively a 0 trout bag limit, as the Department does not plant hatchery trout within steelhead streams in the Region 4 coastal counties) – these waters include the Big Sur River, Little Sur River, and Salmon Creek. This regulation

- change also maintains consistency with the upper Carmel River above Los Padres Reservoir (technically within anadromy due to steelhead assisted migration operations), which contains both a native coastal rainbow trout and non-native brown trout population and has a 5 Brown Trout 0 Rainbow Trout daily bag limit.
- Changing the upper Arroyo Seco to a 5 Brown Trout 0 Rainbow Trout daily bag limit through this proposed regulation change will not impact trout planting or stocked trout angling, as trout planting does not occur in this stream.
 - **Section 7.50, subsection (b)(90), McCloud River and Tributaries (Shasta and Siskiyou Cos):** This proposed change would add Trout Creek into subsection 7.50(b)(90), McCloud River and Tributaries under proposed paragraph (G), to provide angling regulation protections for McCloud River Redband Trout (MRRT), consistent with other streams in the MRRT Refugium. Trout Creek has been identified as a high priority conservation stream, but not included as a “Core Conservation Stream” in MRRT Conservation Agreement (CA) (2017). Confounding genetic results prior to the completion of the CA was the justification for Trout Creek to be excluded as a core conservation stream. However, since the genetics results, the Department has identified a “95% barrier” where MRRT collected upstream of the barrier were shown to be genetically distinct, and Rainbow Trout collected downstream of the barrier were shown to be slightly introgressed (Rainbow Trout cross with MRRT). Additionally, non-native Brown Trout are found downstream of the barrier but not upstream. The Department is currently working with the private landowner to improve the 95% barrier to ensure introgressed and non-native trout are unable to pass upstream at all flows, thence protecting the genetically distinct population upstream. In addition to improving the barrier, angling regulation changes are necessary to provide further protection for this population. The proposed angling regulations are consistent with Swamp Creek in the Refugium which provides a stable MRRT population where catch and release recreational angling will have no population level impacts. Trout Creek is currently the focus for other restoration opportunities, and the Department is developing plans with the U.S. Forest Service and not for profit agencies for meadow restoration, cattle exclusion fencing, and methods to remove non-native fish (dewatering) and repopulate with genetically distinct MRRT, reclaiming all of Trout Creek for MRRT as the long-term conservation goal. Trout Unlimited submitted a letter in support of this change. Other organizational changes are made to group streams with similar regulations for clarity purposes. Former 7.50(b)(90)(C) Swamp Creek is re-numbered to paragraph (F) to occur below those creeks in the McCloud River watershed that are closed to all fishing all year. With the addition of Trout Creek and all tributaries as proposed paragraph (G), the remaining paragraphs for subsection 7.50(b)(90) are re-numbered.

Steelhead Fishing Report and Restoration Card Changes, Sections 1.74, 5.88, and 701

To better align with seasonal adult steelhead run timing, improve data management, and assess non-compliant reporting, the Steelhead Fishing Report and Restoration Card (Card; steelhead report card) reporting period is proposed to be changed from a 12-month calendar period to a 9-month reporting period. The adjusted Card reporting period would be August 1st through April 30th the following year, and required to be returned or reported to the Department by May 31st. The Card would be required for anglers targeting any steelhead or Rainbow Trout in anadromous waters during this 9-month period. Anglers would be able to

obtain the subsequent Card starting July 1st to allow time for the Department to process the previous season's Cards returned by May 31st. Any Card holder who fails to return or report by the May 31st deadline shall be subject to a non-refundable non-return fee, and will not be able to obtain the subsequent Card until that fee is paid. From May 1st through July 31st of each year, anglers would not need a Card to fish for steelhead or Rainbow Trout in anadromous waters.

These changes are necessary because there is currently lack of data collection and inability to analyze data in a timely fashion. Shifting the reporting months to mirror the 9-month period run timing of steelhead would allow the Department to process Cards more efficiently, and have data readily available to inform management strategies for the steelhead fishery statewide. By shifting the reporting period to 9 months, the Department will have time between seasons to assess non-compliance, and can implement penalties prior to the subsequent year's Card is issued, including fees and prohibitions for non-compliant report card holders. This change is expected to increase reporting, which will increase data quality.

Shifting the reporting period to mirror the seasonal run timing of returning and spawning steelhead between August to April will increase the ability to more accurately analyze data and manage steelhead runs. Adult steelhead are generally not present in most anadromous waters from May through July, so there is not a need to collect angler data during these months. Anglers will still be able to fish for Rainbow Trout/ steelhead during these months in waters open to angling; however, a Card will not be required. Anglers will also be able to continue to harvest a hatchery steelhead if caught during these months and not have to report on the Card. This proposed change would result in cost and time saving for the Department. The low return rates result in poor data collection causes pressure on Department staff to validate the Card data, which can create fiscal impacts for additional staff time and monitoring programs. Implementation of a non-return fee and a seasonal report card has previously demonstrated with other species the ability to significantly increase reporting from other report card programs, and would reduce the effort and cost to validate steelhead Card data caused by low return. From 2020 to 2024 report cards were returned between 21.6% to 35.9% of the time, numbers low enough to negatively affect the Department's ability to manage steelhead.

Additionally, the proposal would clarify that the Card is required when targeting Rainbow Trout, *Oncorhynchus mykiss*, in anadromous waters. There is currently a loophole in the language that allows an angler to state they are not fishing for steelhead, only Rainbow Trout, which technically does not require a Card. For improved enforcement, the language would be updated to include both terms and would require anglers to have a report card and fill it out when targeting either Rainbow Trout or steelhead in anadromous waters. Steelhead and Rainbow Trout are the same species with differing life histories and are not distinguishable while fishing.

The following changes are to Sections 1.74, 5.88, and 701 relating to the steelhead report card:

- **Section 1.74. Sport Fishing Report Card Requirements.**

Add subsection (c)(7)

Add the requirement of all report card holders shall return or report their Cards to the department even if no fishing occurred, or the report card holder was unsuccessful. This would apply to all species that require a report card. This would provide additional clarity to the angler as well as potentially increase card return and reporting. Renumber subsection (c)(7) to (c)(8) to allow for this addition.

Add subsection (d)(3)

Add a subsection specific to the steelhead report card that outlines the dates a card is required, update the return/report by date of May 31st and implement an additional non-return fee in addition to the seasonal Card fee for the subsequent season Card if failed to return on time. The non-return fee will be implemented following the May 2028 reporting period for the 2027-2028 seasonal card, allowing anglers time to adjust to the new reporting deadline. As a new subsection specifically for this Card is added, steelhead is removed from the lists of species in subsections (d)(1) and (d)(1)(A).

Amend subsections (e) and (f)

In subsections (e)(1) and (2) and (f)(3) the above added (d)(3) reference would be added to specify the subsection to reference for report card return and reporting mechanisms and lost cards.

- **Section 5.88. Steelhead Report and Restoration Card Requirements for Inland Waters**

Section title adjustments

Add the word “Fishing” to the title for Section 5.88 for consistency with the existing terminology for the Card listed elsewhere in the Section. Further, “FG 682” is an unnecessary and incorrect reference in the title that is proposed to be removed.

Amend subsection (a)

Add the word “valid” and “Rainbow Trout” to clarify language that anglers must have a valid report card to take steelhead or Rainbow Trout in anadromous waters. As noted above, Steelhead and Rainbow Trout are the same species with differing life histories and are not distinguishable while fishing. dd clarifying language including the dates a card is required for the reporting period described above, add Steelhead or “Rainbow Trout equal to or” greater than 16 inches, and define hatchery and wild steelhead as steelhead with or without adipose fins.

Amend subsection (b)

In subsection (b), add subsections (1), (2), and (3) which substitute the current (b), (c), (d), and title subsection (b) “Reporting Requirements.” Throughout subsection (b), substitute “cardholder” for “report card holder.” Add subsection to (b)(3) to include “and the number of hours fished” which is currently listed on the issued card, but does not appear in regulation text. Add subsections (4) and (5), to describe the process to return a report card as well and

details describing the non-return fee and implementation date. Also rename subsections (e) to (6) to include in the reporting requirements.

Amend subsection (f)

Rename to subsection (c), and remove “annual” from “annual fee,” as the fee is further specified in Section 701.

Add to list of Authority

This regulation would identify additional sources of authority for the Commission to list the steelhead report card fee under the general authorization the Commission has for take and possession of wildlife.

- **Section 701. Sport Fishing Forms and Fees**

Add subsection (h)

The 2027 Card would act as a shortened season transitional card from the current annual report card to the seasonal report card and be valid January 1st to April 30th, still abiding by the updated May 31st reporting deadline. Anglers who purchase the 2027 Card will have the opportunity to receive the 2027-2028 Card with the nine-month reporting period at no cost. Non-return fees would be implemented beginning following the May 2028 reporting period.

Add subsections (h) and (i)

The Card fee is currently specified in Section 7380 of the Fish and Game Code, and is not currently listed in Section 701 of Title 14. Section 701 of Title 14 lists the fees for the various report cards required by the Department. This proposed change would add subsection (h) for the 2027 Card and subsection (i) for the 2027-2028 Card to Section 701 to establish this fee in regulation for subsequent adjustment pursuant to Fish and Game Code Section 713.

Add subsection (j)

This proposed change would add a subsection (j) for the 2027-2028 Steelhead Report Card Non-Return Fee to be \$20.00. This would be in line with other report cards’ non-return fee amounts, and only begin implementation for the 2027-2028 Card. This phasing would allow anglers a year to adjust to the updated reporting deadline of May 31st.

- **Transition to the new Steelhead Report Card**

During the transition year of 2027, there would be a need to obtain two Cards. The 2027 Card would act as a shortened season transitional card from the current calendar year report card, to the nine-month reporting period card, and be valid January 1st to April 30th, still abiding by the updated May 31st reporting deadline. For the 2027 shortened season transitional card, anglers will not be subject to a non-return fee.

- Anglers who purchase the 2027 Card will have the opportunity to receive the 2027-2028 seasonal card at no cost.
- Anglers who do not purchase the 2027 Card can purchase the 2027-2028 card at the price specified in Section 701.

- Beginning with the 2027-2028 Card reporting period (August 1, 2027 through April 30, 2028, to be returned by May 31, 2027), anglers who purchased a Card on or after July 1, 2027 and do not report that Card, shall be subject to the non-refundable non-return fee, in addition to the seasonal report card fee for the issuance of a Card in the subsequent season.

Low-Flow Regulation Changes, Sections 7.00, 7.40(b), 7.50(b), and 8.00

This proposed change would reorganize, condense, and clean up the language in the low-flow regulations, standardize the identification of stream gauges, and remove streams from 8.00 that lack low-flow criteria.

- **Section 7.00, District General Regulations:** This proposal would add Section 8.00, which lists low-flow restrictions to the to the paragraph about existing restrictions (such as methods, gear, fishing hours, and use of bait) when angling in District waters. This proposal would remove ambiguities associated with anglers following regulations for low flow conditions, as well as wardens enforcing fishing regulation violations.
- **Section 7.40, subsection (b) and 7.50 subsection (b), Updates to Special Water Bodies regarding Low-Flow:** Proposed changes throughout the special waters tables in subsections 7.40(b) and 7.50(b) serve to better align subsection 7.40(b) language with the updated Section 8.00 language that is part of this proposal. Organizational changes, such as moving the text “...Also see Section 8.00(a, b, or c) Low Flow Restrictions” to the end of the “Body of Water” description improves consistency informing the angler to be aware of low-flow considerations for the re-organized subsections 8.00(a), (b), or (c). These changes are necessary to clarify boundaries in both sections where descriptions are unclear, provide consistent placement of text, and update subsection references between 8.00, 7.40(b), and 7.50(b) as needed. In subsection (b) for Arroyo Seco Corralitos Creek, Llagas Creek, Pajaro River, Salinas River and tributaries, Uvas or Carnadero Creek references to Section 8.00 are removed, as these waters are proposed as being removed from the Low Flow restrictions due to lack of low flow threshold. More details on the removal of these waters are provided in the following description of changes for Section 8.00.
- **Section 8.00, Low-Flow Restrictions:** This proposed change would rewrite, reorganize, and simplify the low-flow regulations. A new website for low-flow fishing restrictions was launched in early 2025, which brought more attention to the language and content in Section 8.00. Subsections 8.00(a) and (b), which previously directed anglers to different regional phone lines, may now be combined and condensed into the revised subsection 8.00(a) now that there is an online platform during the time period of September 1 through April 30. Subsection 8.00(c) for the San Mateo, Santa Clara, Santa Cruz, and Monterey county water bodies is restructured to the revised subsection 8.00(b). This effort began as an initiative to remove redundancies and improve stylistic inconsistencies in the regulation (i.e. standardized identification of stream gauges with USGS gauging station number, stream, and nearest town), and turned into a more expansive effort to improve Section 8.00 in its entirety for conciseness, clarity, and consistency in language, after input from Department regional staff. These changes will make the regulations easier to understand, thereby reducing angler confusion.

- New subsection 8.00(a): consolidate and update the low-flow conditions for river and stream closures including those water bodies listed from north to south within Del Norte, Humboldt, Mendocino, Sonoma, Napa, and Marin counties.
 - Align Section 8.00 with 7.40(b) with boundaries in both sets of regulations where descriptions are inconsistent that are not intended to change current fishing boundaries. E.g. “Fulmor Road, at its paved junction with the south bank of the Eel River” [8.00(a)(2)(A)] to “the Cock Robin Island Bridge.”
 - Clarification on the reaches for the rivers, creeks, and streams in Mendocino County (except for the Russian and Gualala rivers) that flow directly to the Pacific Ocean listed alphabetically from Albion River to Usal Creek.
 - Clarification on the reaches of the river, creeks, and streams in Sonoma and Marin counties (except for the Russian River) that flow directly to the Pacific ocean listed alphabetically from Gualala River to Walker Creek.
 - For the Smith River, the reach description was updated to say “...*the main stem Smith River from the mouth of Rowdy Creek to the ~~mouth of Patrick Creek (tributary of the Middle Fork Smith River)~~ confluence with the Middle Fork and South Fork.*” This update serves to align subsection 7.40(b)(108), paragraphs (A), (B), and (C), as Section 7.40 listed the Smith River from the mouth to the confluence of the middle and south forks, and separately, middle fork Smith River from the mouth to Patrick Creek. No boundaries are actually changed, just how the sections are divided up.
- New subsection 8.00(b): consolidate and update the low-flow conditions for river and stream closures including those water bodies listed from north to south within San Mateo, Santa Clara, Santa Cruz, and Monterey counties.
 - This proposal adds quantitative low-flow criteria to Pescadero, Aptos, and Soquel Creeks that will not allow fishing on days when flows fall below determined thresholds. These creeks currently lack quantitative low-flow criteria, and instead defer to the Department to determine when flows may impede fish passage. This provides clarity for the public on when these locations would be closed to fishing. These new low-flow criteria will protect steelhead when they are most vulnerable. Department staff in the managing region submitted an internal memo requesting this change.
 - For proposed subsection 8.00(b)(4) (Pescadero Creek), (b)(5) (San Lorenzo River), and (b)(8) (Carmel River), certain anadromous reaches or adjacent waters that follow in the subsequent paragraphs (e.g., Butano, San Gregorio, Scott, Waddell, Gibson, Malpasso Creeks, etc.) are described for clarity to assist the angler with understanding what reaches are considered for the low-flow criteria.
- The proposed changes described in subsections 8.00(a)(1) through (3) and (b)(1) through (3), would allow the ability to make split block decisions instead of solid block decisions. Allowing split block decisions has the potential to provide additional opportunity by adding angling days and reduce angler frustration. The current

regulations specify the days when Department staff will determine low-flow fishing closures, and fishing on all days between Department updates shall either be opened or closed (solid block decision). Now with the new website, it is easier to display and update information, and the Department could provide more flexibility in determining low-flow fishing closures. Instead of closing or opening fishing for an entire two-to-four-day period, the Department could choose to close fishing for only part of the two-to-four-day period (split block decision). Split block decisions will allow the Department to be more flexible and precise in applying closures only to days when flows are predicted to fall below minimum thresholds. For example, Department staff currently post an update on Friday by 1pm whether a particular river will be open or closed the following Saturday, Sunday, and Monday. Split block decision would be the same thing, except instead of having to decide all open or all closed the following Saturday, Sunday, and Monday, staff would be able to call Saturday open, but Sunday and Monday closed, or just Monday closed. The website would be updated only on the days designated in regulations.

- Arroyo Seco Corralitos Creek, Llagas Creek, Pajaro River, Salinas River and tributaries, Uvas or Carnadero Creek are proposed to be removed from Section 8.00 as these waters currently lack of low flow thresholds and until those are determined by the Department these waters do not need to be listed in the restricted list. Additional waters in Section 7.40 that referenced Section 8.00 that are not and are not proposed to be added to 8.00, but were listed in error, have been removed for clarity (proposed subsections 7.40(b)(108)(C)(2) and (D)(3)).
- This proposal includes language and grammar clean-up, as well as some changes to standardize the naming of stream gauges and consistency in boundaries between 7.40 and 8.00, update to location names (Usal Road and correcting spelling of George Tryon Bridge) and a property name change (Camp Noyo).

(b) Goals and Benefits of the Regulation

As stated in Fish and Game Code Section 1700, Conservation of Aquatic Resources, it is the policy of this state to encourage the conservation, maintenance, and utilization of the living resources of the ocean and other waters under the jurisdiction and influence of the state for the benefit of all the citizens of the state and to promote the development of local fisheries and distant water fisheries based in California in harmony with international law, respecting fishing and the conservation of the living resources of the ocean and other waters under the jurisdiction and influence of the state. The objectives of this policy include, but are not limited to, the maintenance of sufficient populations of all species of aquatic organisms to ensure their continued existence, and the maintenance of a sufficient resource to support a reasonable sport use. Adoption of scientifically-based sport fish seasons, size limits, and bag and possession limits provides for the maintenance of sufficient populations sport fish to ensure their continued existence.

The benefits of the proposed regulations are consistent with the sustainable management of California's sport fisheries, general health and welfare of California residents, and promotion of businesses that rely on sport fishing throughout California.

(e) Public Discussions of Proposed Regulations Prior to Public Notice

The Department presented the proposed amendments to the sport fishing regulations at the Commission's Wildlife Resources Committee meetings on September 11, 2025 and January 13, 2026.

IV. Description of Reasonable Alternatives to Regulatory Action

(a) Alternatives to Regulation Change

No alternatives were identified by or brought to the attention of Commission staff that would have the same desired regulatory effect.

(b) No Change Alternative

The no change alternative would leave the current regulations in place.

V. Mitigation Measures Required by Regulatory Action

The proposed regulatory action will have no negative impact on the environment; therefore, no mitigation measures are needed.

VI. Impact of Regulatory Action

The potential for significant statewide adverse economic impacts that might result from the proposed regulatory action has been assessed, and the following initial determinations relative to the required statutory categories have been made:

(a) Significant Statewide Adverse Economic Impact Directly Affecting Businesses, Including the Ability of California Businesses to Compete with Businesses in Other States

The proposed action will not have a significant statewide adverse economic impact directly affecting business, including the ability of California businesses to compete with businesses in other states. The proposed changes provide clarification of existing regulations that are necessary for the continued preservation of fisheries resources, while providing sport fishing opportunities and thus, the prevention of adverse economic impacts.

(b) Impact on the Creation or Elimination of Jobs Within the State, the Creation of New Businesses or the Elimination of Existing Businesses, or the Expansion of Businesses in California; Benefits of the Regulation to the Health and Welfare of California Residents, Worker Safety, and the State's Environment

The Commission does not anticipate adverse impacts on the creation or elimination of jobs within the state. The Commission does not anticipate adverse impacts on the creation of new business, the elimination of existing businesses or the expansion of businesses in California. The proposed changes are to provide clarification of existing regulations or that provide minor increases in fishing opportunities. These changes are not anticipated to change the level of fishing activity enough to affect the demand for goods and services related to sport fishing enough to impact the demand for labor, nor induce the creation of new businesses, the elimination, nor the expansion of businesses in California.

The Commission anticipates benefits to the environment by the sustainable management of fishery resources throughout the state. The Commission anticipates general benefits to the health and welfare of Californians through expanded outdoor recreational opportunities and responsible management of public resources. The Commission does not anticipate any benefits to the health and welfare of California residents or to worker safety.

(c) Cost Impacts on a Representative Private Person or Business

The Commission is not aware of any cost impacts that a business would necessarily incur in reasonable compliance with the proposed action. The proposed non-reporting fee for steelhead report cards introduces a \$20 fee to any card holder failing to return/report by the May 31st deadline. Any angler who doesn't pay the non-reporting fee after the deadline will not be able to obtain any subsequent season's card until that fee is paid. This fee can be entirely avoided if the angler returns the card in compliance with the regulation, or if anglers choose to fish in anadromous waters from May 1st through July 31st of each year, as they would not need a card to fish for steelhead or Rainbow Trout during that period.

(d) Costs or Savings to State Agencies or Costs/Savings in Federal Funding to the State: None. No changes to costs or savings to federal funding are anticipated by the proposed clarification of existing regulations. The Department program implementation and enforcement are projected to remain the same with a stable volume of fishing activity.

Department staff estimate that currently 30-35% of anglers return their steelhead report card, with an average of approximately 43,500 cards sold over the last six years¹, for an average of 30,450 to 28,275 non-returned cards. The proposed 20\$ non-return fee would mean a maximum potential of \$609,000-\$565,500 would be accrued in fines, representing additional revenue for the Department. However, this does not take into account a likely increase in return rates or the fact that not everyone will pay the fine, as suggested by the exact same changes from the lobster report card, which had an approximate 16% return rate from 2008-2011 without a non-return fee and increased reporting to 39%-54% from 2014 to 2025.²

If the steelhead report card increased reporting rates similarly by 20-30%, the Department would have a projected 50-65% return rate and could potentially see 21,750 to 13,050 unreturned cards with a maximum revenue potential of \$435,000 to \$261,000 in accrued fines (average of \$348,000). See STD 399 addendum for further details.

- (e) Nondiscretionary Costs/Savings to Local Agencies: None.
- (f) Programs Mandated on Local Agencies or School Districts: None.
- (g) Costs Imposed on Any Local Agency or School District that is Required to be Reimbursed Under Part 7 (commencing with Section 17500) of Division 4, Government Code: None.
- (h) Effect on Housing Costs: None.

VII. Economic Impact Assessment

(a) Effects of the Regulation on the Creation or Elimination of Jobs Within the State

The Commission does not anticipate adverse impacts on the creation or elimination of jobs within the state because the proposed amendments are not anticipated to change the level of fishing activity enough to affect the demand for goods and services related to sportfishing enough to impact the demand for labor.

(b) Effects of the Regulation on the Creation of New Businesses or the Elimination of Existing Businesses Within the State

The Commission does not anticipate that any of the proposed amendments would induce impacts on the creation of new business or the elimination of existing businesses, because the economic impacts of the proposed clarifications of existing regulations are unlikely to be stimulate or lessen the demand for goods or services related to sport fishing, travel, or tourism to the affected areas.

(c) Effects of the Regulation on the Expansion of Businesses Currently Doing Business Within the State

The Commission does not anticipate that any of the proposed clarification of existing regulations would induce impacts on the expansion of businesses currently doing business within the state. The proposed regulations are not anticipated to increase demand for services

¹ <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=178047&inline>

² <https://wildlife.ca.gov/Conservation/Marine/Invertebrates/Lobster>

or products from the existing businesses that serve individuals who engage in inland sport fishing. The number of fishing trips and angler economic contributions are expected to remain within the range of historical averages.

(d) Benefits of the Regulation to the Health and Welfare of California Residents

The Commission does not anticipate direct benefits to the health and welfare of California residents besides the furtherance of opportunities for sport fishing which is healthy outdoor recreation and form of relaxation for many. Sport fishing also provides opportunities for multi-generational family activities and promotes respect for California's environment by younger generations, the future stewards of California's natural resources.

(e) Benefits of the Regulation to Worker Safety

The Commission does not anticipate any benefits to worker safety from the proposed regulations because inland sport fishing does not impact working conditions.

(f) Benefits of the Regulation to the State's Environment

Under the proposed regulations, the Commission anticipates benefits to the environment in the sustainable management of inland fishery resources. It is the policy of this state to encourage the conservation, maintenance, and utilization of the living resources of waters under the jurisdiction and influence of the state for the benefit of all the citizens of the state. The objectives of this policy include, but are not limited to, the maintenance of sufficient populations of all species of aquatic organisms to ensure their continued existence, and the maintenance of a sufficient resource to support a reasonable sport use.

(g) Other Benefits of the Regulation

Other benefits of the regulation include consistency with federal fishery management goals, and support for businesses that rely on inland sport fishing.

Informative Digest/Policy Statement Overview

This regulatory proposal combines California Department of Fish and Wildlife (Department) and public requests for changes to California Code of Regulations (CCR) Title 14, sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88, 6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701, for the 2026 sport fishing regulatory cycle. This proposal contains multiple amendments that would clarify sport fishing regulations, increase angler opportunities, change gear requirements, change fish measurement and sampling protocols, improve the steelhead report card and low-flow regulations, and protect vulnerable fish populations. These proposed regulatory changes are needed to effectively manage California's sport fisheries, and correct errors and inaccuracies in the existing regulations to reduce public confusion and improve regulatory enforcement.

The Department is proposing changes to the following regulations in Title 14, CCR:

Regulation Language Clarifications:

The proposed changes are necessary in order to enhance clarity or fix errors, and do not alter the application or enforcement of these regulations:

- **Section 2.11, Special Fishing Methods – Lake County:** In 2014, Clear Lake Hitch were listed under California Endangered Species Act (CESA) as threatened and can no longer be taken without a CESA incidental take permit or MOU. The language in Section 2.11 conflicts with the take prohibitions for Clear Lake Hitch and needs to be removed from Title 14 CCR.
- **Section 5.65, Shad, American:** In 2025 there was a regulation change to allow spearfishing as a method of take for American Shad in the Valley District in Section 2.30. The proposed change would add spearfishing as a method of take allowable for American Shad in the Valley District in Section 5.65. This would make Section 5.65 consistent with Section 2.30.
- **Section 5.85, subsection (a)(2), Trout:** This proposal would add Section 7.00, which lists general regulations in each District, to the list of sections excepted from general statewide trout regulations. This proposal would remove ambiguities associated with wardens enforcing fishing regulation violations.
- **Section 6.34, Southern District Definition:** The current regulations definition of the “Southern District” in Section 6.34 erroneously copies the Sierra District definition. This change would correct the language to the as-intended definition of the Southern District.
- **Section 7.50, subsection (b)(90), McCloud River and Tributaries:** This proposal would clean up, reorganize, and group streams with similar regulations in subsection 7.50(b)(90) for the McCloud River and tributaries. This would simplify the regulation, making it easier to understand by grouping waters with similar regulations.
- **Section 7.50(b)(145), Sq. Valley Creek:** The name of Sq. Valley Creek was changed by federal legislation through the Department of Interior's Order 3404 on September 8, 2022 to Yét Atwam Creek. This proposal would make the regulation text consistent with federal legislation.

- **Section 230, subsection (g)(2), Issuance of Permits for Contests Offering Prize for the Taking of Game Fish:** There is a minor grammar error in subsection 230(g)(2) which has an ungrammatical ‘s’ that would be removed from the word “changes”.
- **Section 7.40, subsection (b):** Updates to other regulations sections have been made in this proposal to update or remove unnecessary references to subsections 7.40(b) and 7.50(b) due to the continual changes in the numbering of these sections when waters are added or removed. There are minor edits to text to align subsection 7.40(b) and 7.50(b) language with the updated Section 8.00 language that is part of this proposal which will clarify boundaries in both sections where descriptions are unclear, provide consistent placement of text, and update subsection references between Section 8.00 and subsection 7.40(b) where needed.

Changes To Increase Fishing Opportunities

The proposed changes described below would increase fishing opportunities in the effected regulation sections.

- **Section 4.20, subsection (d) Bait Fish Use in the Sacramento River (Shasta and Tehama Co.):** This proposed change would move the upper limit of the Sacramento River upstream from Highway 32 Bridge to Deschutes Bridge for bait fish use. Generally, declining fish populations associated with drought and climate change have limited many fishing opportunities. At the same time Striped Bass populations have expanded into more areas of the Sacramento River, especially after the Red Bluff Diversion Dam was permanently opened. This proposed change would allow live fin fish to be used further up the Sacramento River which would increase fishing opportunities for striped bass and other non-native fishes that are currently limited use of lures and other methods. It may also increase harvest of these non-native species which could have a potential benefit on vulnerable salmonid populations.
- **Section 5.00, subsection (b), Black Bass (Lassen and Modoc Co.):** This proposed change would remove the black bass minimum size requirement from waters in Lassen and Modoc counties, except for Mountain Meadows Reservoir where the minimum size would remain at 12 inches. Growth rates of largemouth bass are typically slow within Lassen and Modoc counties due shorter growing season attributable to the high elevation. Additionally, reservoirs containing large bass populations are often overrun with stunted bass and few bass are able to reach the 12-inch minimum size requirement for harvest. The 12-inch minimum size requirement reduces the number of harvested bass, which could affect the bass populations by further stunting their growth. Removing the minimum size requirement in these locations would increase the harvest of smaller bass and improve the size class structure within the bass populations. Mountain Meadows Reservoir is still recovering from being drained in 2015 and has the potential to grow trophy class bass as it has in the past. The 12-inch minimum size requirement at Mountain Meadows Reservoir would be maintained under the General Statewide Restrictions regulations allowing the bass population to grow and allow more small young bass to grow to the 12-inch size minimum and larger.
- **Section 7.00, subsection (b)(2), District General Regulations—Sierra District (Shasta and Tehama Co.):** This proposed change would increase fishing opportunity

by allowing the use of bait during summer months within anadromous streams in Shasta and Tehama counties when anadromous fish are not present. Declining fish populations associated with drought and climate change have limited many fishing opportunities. At the same time, striped bass populations have expanded into more areas of the Sacramento River, especially after the Red Bluff Diversion Dam was permanently opened. The proposed split season with June 16 to September 30 dropped the artificial lure requirement for allowable use of live fin fish as bait during this period when bass.

- **Section 7.40, subsection (b)(11), Battle Creek (Shasta and Tehama Co.):** This proposed change would re-open lower Battle Creek from 1,250 feet below Coleman Fish Hatchery weir to its confluence with the Sacramento River from June 30 to December 31, with the restriction that only artificial lures with barbless hooks may be used. This change would provide recreational angling opportunities for native and non-native warmwater fish species and hatchery-origin trout and steelhead.
 - Lower Battle Creek from the mouth to Coleman Fish Hatchery weir is currently closed to angling year-round. Allowing angler access to lower Battle Creek beginning June 30 will increase fishing opportunities on Striped and Black Bass. Battle Creek was historically a popular steelhead fishery but was closed to angling in the early 1990's to ensure that Coleman National Fish Hatchery would annually secure sufficient adult steelhead broodstock.
 - Returns of hatchery-origin steelhead to Coleman National Fish Hatchery are now routinely in excess of broodstock collection targets. Presently these fish are only available to recreational anglers in the mainstem Sacramento River. However, due to a variety of factors, contact with these fish in the mainstem Sacramento River is extremely low. Furthermore, the mainstem Sacramento River steelhead fishery is primarily boat-based. Shore-based steelhead fishing on lower Battle Creek would provide opportunity to much broader angling interest groups.
- **Section 7.40, subsection (b)(50), Klamath River Basin Regulations:** This proposed change would increase fishing opportunity in the Klamath River by allowing catch and release fishing within anadromous sections of the mainstem Klamath River from the Copco Road bridge at Copco to Lakeview Road bridge near Iron Gate (Siskiyou County). The open season would be a summer season from the fourth Saturday in May through August 31, with a restriction that only artificial lures with barbless hooks may be used. Additional restrictions include a zero harvest limit for hatchery trout and steelhead as well as being closed to the take and possession of Chinook Salmon. This change would provide a recreational angling opportunity for freshwater fish during the summer months within the Klamath Dam Removal project area. The proposed summer season regulations would provide consistency with currently open waters adjacent to and upstream of this subsection.
- **Section 7.50, subsection (b)(47), Fall River Complex (Shasta and Siskiyou Co.):** This proposed change would remove subsections (47)(L) Fall River Pond and (47)(M) Fall River Lake from 7.50(b)(47) Fall River Complex (Shasta and Siskiyou Co.). If removed from 7.50(b) Fall River Pond and Fall River Lake would then fall under regulation Section 5.85(a)(1) statewide general trout regulations for take allowances.

- **Section 7.50, subsection (b)(149), Susan River (Lassen Co.) and Section 8.10, Susan River Youth Derby:** This proposed change would revert fishing regulations to the previous trout opener (Last Saturday in April through Nov. 15). The proposed change would also update language to include a special open season for youth participating in the Youth Fishing Derby in Section 8.10 to start prior to the proposed earlier season start. Reverting to the traditional trout season will increase angler opportunity by lengthening the season in the spring and shortening the winter season. During much of the winter the river is typically unfishable (due to ice and snow), so the winter provides little to no opportunity. Water in the Susan River can warm significantly in the late spring and early summer, as releases from McCoy Flat and Hog Flat reservoirs increase. Having the season open earlier will provide more opportunity while angling conditions are good, while not impacting spawning.

Changes to Fishing Gear, Measuring, and Sampling

The following proposed changes are related to fishing gear, measuring and sampling regulation restrictions:

- **Sections 1.62, 28.25, 28.30, 28.32, and 28.35, Minimum and Maximum Size and Alternate Length:**

This proposed change would amend Section 1.62 to more clearly define the method to determine total length of finfish. The proposal would clarify that total length is measured with the fish's mouth closed, lying flat on a horizontal surface, and that the tail may be pinched, fanned, or naturally swung. Fanning and swinging of a fish's tail is expressly allowed for salmon and halibut but not specified in the general maximum length in Section 1.62. It has been a long-time practice for our law enforcement officers to allow this technique, but it is not consistently understood by anglers. Importantly, crew onboard Commercial Passenger Fishing vessels have requested clarification, to ensure they are measuring passenger's fish correctly.

The proposed change also includes changing the phrase "fish, mollusks or crustaceans" to "finfish or invertebrates" and clarifies that measurement of invertebrate species is specified within the individual invertebrate regulations. The proposal also changes existing language that refers to "mollusks, or crustaceans" to the term "invertebrates" which is more inclusive and encompasses other groups like echinoderms. It clarifies that methods to determine length for invertebrates are found in the individual sub sections for those species.

The proposed change additionally removes alternate length measurements from Section 1.62, and from the sections for barracuda, kelp and sand basses, and white sea bass, sections 28.25, 28.30, and 28.35 respectively. Alternate length is proposed to be removed as it causes unnecessary confusion and concerns with law enforcement. The allowance of retaining filleted fish, with associated minimum fillet lengths provided for these species, makes the use of an alternate length unnecessary. A provision to use either total length or a 5-pound minimum weight limit for bonito, found in section 28.32, was established to make recreational catch limits consistent with commercial catch limits.

- **Section 1.73, Salmon:** This proposed change would require any person in possession of a recreationally taken salmon in which an adipose fin is present to provide the Department a

tissue sample upon request. This includes the additional requirement of all persons fishing for salmon to provide a tissue sample from unmarked (i.e., adipose fin present) salmon upon request by an authorized agent or employee of the Department. Amending biological sample collection requirements to allow for use of Parentage-Based Tagging (PBT) in fisheries surveys advances fisheries monitoring in a number of ways. PBT is highly efficient, as the tagging process requires only genotyping the parents to produce a 100% tag rate of offspring, which can lead to higher tag recovery rates and improved statistical precision of estimates. Additionally, there is no physical tag loss or handling mortality associated with PBT, parentage assignments can be obtained non-lethally via a small tissue sample, and large-scale tagging can occur at a much lower cost compared to physical marking and tagging methods. This proposal would allow the Department to integrate PBT recovery data into the current salmon management framework, allowing tissue samples to be collected from unmarked salmon contacted in monitoring programs.

- **Section 2.10(b)(3) and (b)(4), Hook and Weight Restrictions:**

This proposed change would allow for the usage of a small lightweight weight directly attached below a hook and expansion of fishable waters with treble hooks on non-buoyant lures. The amendment of subsections 2.10(b)(3) and (4) would clarify regulations for the public and wildlife officers. The change to weights being allowed below a hook would not apply to lakes and reservoirs, the Sacramento-San Joaquin Delta, or the Colorado River as outlined in subsection 2.10(b). The change to the use of treble hooks on non-buoyant lures would have an expanded boundary within the Valley District. The use of treble hooks on non-buoyant lures would be permissive in portions of the mainstem Sacramento, American, Feather, and Yuba rivers. The gear type allowed in the newly permissive sections would be limited to lures made of soft or hard plastics, or wood, which would reduce snagging risk to salmonid species while creating more opportunity for non-salmonid angling.

In the angling community there is confusion about the legality of techniques and tackle. This confusion stems from the popularity of the techniques that utilize this configuration in other states, similar fisheries occurring here in California, and because the method is permissible in lakes, reservoirs, and the Delta. This change would improve law enforcement's ability to enforce these regulations consistently across the state and reduce the need to intervene as frequently.

- **Section 7.40(b)(40)(A)1. and 2., Eel River:** This proposed change would update the gear restriction boundary to align with more recognizable features providing clarity for both anglers and law enforcement. The boundary line would change from the mouth of the Eel River to Fulmor Road, and instead be the mouth to Cock Robin Island, resulting in a slight shift downstream (~.5 miles).

Protective Changes for Vulnerable Populations

The following proposed changes are recommended to protect vulnerable populations while preserving fishing opportunities:

- **Sections 6.35 and subsection 7.00(b)(2), Sierra District Definition and District General Regulations:** This proposed change would modify the Sierra district boundary in Section 6.35 to include a small section of Yuba County ("Yuba County east of New Bullards

Bar Dam;”) to protect experimentally reintroduced Chinook fish, This change would also close Chinook Salmon fishing in the North Fork Feather River (NFFR) above Chester Diversion Dam, and on the North Yuba River (NYR) above New Bullards Bar Dam all year in Section 7.00(b)(2). This proposal will also add two specific subsections in Section 7.00, the Sierra District (adding (b)(3) and (b)(4), the NFFR above Chester Diversion Dam, and on the NYR above New Bullards Bar Dam, which will be closed to Chinook Salmon fishing all year. This closure does not include New Bullards Bar, just the tributaries. Scientific studies are currently being implemented within the NFFR, led by the California Department of Water Resources, and in the NYR, led by the Department, evaluating Spring-Run Chinook Salmon reintroduction to these historical habitats. Changing the regulation to close fishing of Chinook Salmon at all times of the year in these waterways will allow for study fish through various developmental stages (eggs, alevin, fry, parr, smolt, adult) to remain in the study area informing study results and reintroduction efforts.

- **Section 7.40, subsection (b) addition of Creeks with Special Regulations:** This proposed change would recommend adding new special regulation sections for Clear Creek (added as subsection (b)(28)), Cow Creek (added as subsection (b)(36)), Cottonwood Creek (added as subsection (b)(35)), and Paynes Creek (added as subsection (b)(74)). This proposal would also change the Antelope Creek boundary from the confluence with the North Fork downstream to Ponderosa Way crossing on the North Fork and South Fork to make angling more protective for Central Valley steelhead in this subsection. Local fishing opportunities are currently very limited due to a variety of overlapping regulations, some of which are not necessary. Allowing the public, especially children to catch warm water fish with bait in anadromous streams in the middle of the summer when anadromous fish species are not present would be very beneficial to the public and the Department’s Recruit, Retain, Reactivate (R3) goals. With the exception of Clear Creek, Cow Creek, Cottonwood Creek, and Paynes Creek, the majority anadromous tributaries have specific protective regulations already present in 7.40; adding Clear Creek, Cow Creek, Cottonwood Creek, and Paynes Creek will complete this protective set of regulations. These additions will result in renumbering most of subsection 7.40(b) bodies of water to maintain alphabetical listing.
- **Section 7.50(b)(6), Arroyo Seco River (Monterey Co.):** On the Arroyo Seco River (Monterey Co.), above the waterfall located approximately 3.5 miles above the U.S. Forest Service Ranger Station, change the trout bag limit from 5 trout to 5 Brown Trout and 0 Rainbow Trout, and add a Special Restriction of “only artificial lures with barbless hooks may be used”. The upper Arroyo Seco River contains a population of native Coastal Rainbow Trout (*Oncorhynchus mykiss*), offering a unique sport fishing opportunity in the Salinas River watershed in Monterey County. Like other trout populations throughout California, this population of native Coastal Rainbow Trout has likely been negatively impacted by increasingly severe drought conditions. The population has also likely been impacted by degradation of instream habitat conditions due to recent wildfires, such as the Dolan fire. The current fishing regulations allow for the harvest of 5 trout per person per day above the waterfall on the Arroyo Seco River. The upper Arroyo Seco River is in relatively close proximity to urban areas; thus, with the current 5 trout bag limit, there is the potential for high angler harvest of Coastal Rainbow Trout. The lack of a gear restriction for trout currently allows the potential for high deep-hooking and catch and release mortality rates

that can be associated with the use of bait and barbed hooks when angling non-anadromous salmonids. Additionally, the upper Arroyo Seco contains a non-native population of Brown Trout (*Salmo trutta*) which offers sport fishing opportunities, though they may negatively impact native Coastal Rainbow Trout through competition and predation. Changing trout regulations in the upper Arroyo Seco to a 5 Brown Trout and 0 Rainbow Trout bag limit with an artificial lures with barbless hooks only special restriction will ensure that this recreational Rainbow Trout fishery is protected and sustainable, while allowing recreational anglers the option of harvesting non-native brown trout.

- Section 7.50, subsection (b)(90), McCloud River and Tributaries (Shasta and Siskiyou Cos):** This proposed change would add Trout Creek into subsection 7.50(b)(90), McCloud River and Tributaries under proposed paragraph (G), to provide angling regulation protections for McCloud River Redband Trout (MRRT), consistent with other streams in the MRRT Refugium. Trout Creek has been identified as a high priority conservation stream, but not included as a “Core Conservation Stream” in MRRT Conservation Agreement (CA) (2017). Confounding genetic results prior to the completion of the CA was the justification for Trout Creek to be excluded as a core conservation stream. However, since the genetics results, the Department has identified a “95% barrier” where MRRT collected upstream of the barrier were shown to be genetically distinct, and Rainbow Trout collected downstream of the barrier were shown to be slightly introgressed (Rainbow Trout cross with MRRT). Additionally, non-native Brown Trout are found downstream of the barrier but not upstream. The Department is currently working with the private landowner to improve the 95% barrier to ensure introgressed and non-native trout are unable to pass upstream at all flows, thence protecting the genetically distinct population upstream. In addition to improving the barrier, angling regulation changes are necessary to provide further protection for this population. The proposed angling regulations are consistent with Swamp Creek in the Refugium which provides a stable MRRT population where catch and release recreational angling will have no population level impacts.

Steelhead Fishing Report and Restoration Card Changes, Sections 1.74, 5.88, and 701

To better align with seasonal adult steelhead run timing, improve data management, and assess non-compliant reporting, the Steelhead Fishing Report and Restoration Card (Card; steelhead report card) reporting period is proposed to be changed from a 12-month calendar period to a 9-month reporting period. The adjusted Card reporting period would be August 1st through April 30th the following year and required to be returned or reported to the Department by May 31st. The Card would be required for anglers targeting any steelhead or Rainbow Trout in anadromous waters during this 9-month period. Anglers would be able to obtain the subsequent season Card starting July 1st to allow time for the Department to process the previous season’s Cards returned by May 31st. Any Card holder who fails to return or report by the May 31st deadline shall be subject to a non-refundable non-return fee and will not be able to obtain the subsequent season Card until that fee is paid. From May 1st through July 31st of each year, anglers would not need a Card to fish for steelhead or Rainbow Trout in anadromous waters.

Shifting the reporting months to mirror the 9-month period run timing of steelhead would allow the Department to process Cards more efficiently and have data readily available to inform management strategies for the steelhead fishery statewide. By shifting the reporting period to 9

months, the Department will have time between seasons to assess non-compliance and can implement penalties prior to the subsequent year's Card issues, including fees and prohibitions for non-compliant report card holders.

Shifting the reporting period to mirror the seasonal run timing of returning and spawning steelhead between August to April will increase the ability to more accurately analyze data and manage steelhead runs. Adult steelhead are generally not present in most anadromous waters from May through July, so there is not a need to collect angler data during these months. Anglers will still be able to fish for Rainbow Trout/steelhead during these months in waters open to angling, however a Card will not be required. Anglers will also be able to continue to harvest a hatchery steelhead if caught during these months and not have to report on the Card.

Additionally, the proposal would clarify that the Card is required when targeting Rainbow Trout, *Oncorhynchus mykiss*, in anadromous waters. There is currently a loophole in the language that allows an angler to state they are not fishing for steelhead, only Rainbow Trout, which technically does not require a Card. For improved enforcement, the language would be updated to include both terms and would require anglers to have a report card and fill it out when targeting either Rainbow Trout or steelhead in anadromous waters

Low-Flow Regulation Changes, Sections 7.00, 7.40 subsection (b), 7.50 subsection (b), and 8.00

This proposed change would reorganize, condense, and clean up the language in the low-flow regulations, standardize the identification of stream gauges, and remove streams from 8.00 that lack low-flow criteria.

- **Section 7.00, District General Regulations:** This proposal would add Section 8.00, which lists low-flow restrictions to the paragraph about existing restrictions (such as methods, gear, fishing hours, and use of bait) when angling in District waters. This proposal would remove ambiguities associated with anglers following regulations for low flow conditions, as well as wardens enforcing fishing regulation violations.
-
- **Section 7.40, subsection (b) and 7.50, subsection (b), Updates to Special Water Bodies regarding Low-Flow:** Proposed changes throughout the special waters tables in subsections 7.40(b) and 7.50(b) serve to better align subsection 7.40(b) language with the updated Section 8.00 language that is part of this proposal. Organizational changes, improves consistency informing the angler to be aware of low-flow considerations for the re-organized subsections 8.00(a), (b), or (c). These changes are necessary to clarify boundaries in both sections where descriptions are unclear, provide consistent placement of text, and update subsection references between 8.00, 7.40(b), and 7.50(b) as needed. In subsection (b) for Arroyo Seco Corralitos Creek, Llagas Creek, Pajaro River, Salinas River and tributaries, Uvas or Carnadero Creek references to Section 8.00 are removed, as these waters are proposed as being removed from the Low Flow restrictions due to lack of low flow threshold.
- **Section 8.00, Low-Flow Restrictions:** This proposed change would rewrite, reorganize, and simplify the low-flow regulations. A new website for low-flow fishing restrictions was

launched in early 2025, which brought more attention to the language and content in Section 8.00. Subsections 8.00(a) and (b), which previously directed anglers to different regional phone lines, may now be combined and condensed into the revised subsection 8.00(a) now that there is an online platform during the time period of September 1 through April 30. Subsection 8.00(c) for the San Mateo, Santa Clara, Santa Cruz, and Monterey county water bodies is restructured to the revised subsection 8.00(b). This effort began as an initiative to remove redundancies and improve stylistic inconsistencies in the regulation (i.e. standardized identification of stream gauges with USGS gauging station number, stream, and nearest town), and turned into a more expansive effort to improve Section 8.00 in its entirety for conciseness, clarity, and consistency in language, after input from Department regional staff. These changes will make the regulations easier to understand, thereby reducing angler confusion.

- The proposed changes described in subsections 8.00(a)(1) through (3) and (b)(1) through (3), would allow the ability to make split block decisions instead of solid block decisions. Allowing split block decisions has the potential to provide additional opportunity by adding angling days and reduce angler frustration. The current regulations specify the days when Department staff will determine low-flow fishing closures, and fishing on all days between Department updates shall either be opened or closed (solid block decision). Now with the new website, it is easier to display and update information, and the Department could provide more flexibility in determining low-flow fishing closures. Instead of closing or opening fishing for an entire two-to-four-day period, the Department could choose to close fishing for only part of the two-to-four-day period (split block decision). Split block decisions will allow the Department to be more flexible and precise in applying closures only to days when flows are predicted to fall below minimum thresholds.
 - New subsection 8.00(a): consolidate and update the low-flow conditions for river and stream closures including those water bodies listed from north to south within Del Norte, Humboldt, Mendocino, Sonoma, Napa, and Marin counties.
 - New subsection 8.00(b): consolidate and update the low-flow conditions for river and stream closures including those water bodies listed from north to south within San Mateo, Santa Clara, Santa Cruz, and Monterey counties.
 -

Benefits of the Proposed Regulations

As stated in Fish and Game Code Section 1700, Conservation of Aquatic Resources, it is the policy of this state to encourage the conservation, maintenance, and utilization of the living resources of the ocean and other waters under the jurisdiction and influence of the state for the benefit of all the citizens of the state and to promote the development of local fisheries and distant water fisheries based in California in harmony with international law, respecting fishing and the conservation of the living resources of the ocean and other waters under the jurisdiction and influence of the state. The objectives of this policy include, but are not limited to, the maintenance of sufficient populations of all species of aquatic organisms to ensure their continued existence, and the maintenance of a sufficient resource to support a reasonable sport use. Adoption of scientifically-based sport fish seasons, size limits, and bag and possession limits provides for the maintenance of sufficient populations sport fish to ensure their continued existence.

The benefits of the proposed regulations are consistent with the sustainable management of California's sport fisheries, general health and welfare of California residents, and promotion of businesses that rely on sport fishing throughout California.

Consistency and Compatibility with Existing Regulations

Article IV, Section 20 of the State Constitution specifies that the Legislature may delegate to the Fish and Game Commission such powers relating to the protection and propagation of fish and game as the Legislature sees fit. The Legislature has delegated to the Commission the power to regulate recreational fishing in waters of the state (Fish and Game Code sections 200, 205, 315, and 316.5). The Commission has reviewed its own regulations and finds that the proposed regulations are neither inconsistent nor incompatible with existing state regulations. The Commission has searched the California Code of Regulations and finds no other state agency regulations pertaining to sport fishing seasons, bag, gear and possession limits.

Proposed Regulatory Language

Section 1.62, Title 14, CCR, is amended to read:

§ 1.62. Minimum and Maximum Size.

No ~~fish, mollusks or crustaceans~~ finfish or invertebrates less than the legal minimum size or greater than the maximum legal size (total, ~~or fork or alternate~~) may be possessed, except as otherwise provided. Total length for finfish is the longest ~~straightline~~ straight-line measurement from the tip of the ~~head~~ snout or jaw, whichever extends furthest while the mouth is closed to the end of the longest lobe of the tail, measured while the fish is lying flat in a natural resting position, without resort to any force other than the swinging, pinching, or fanning of the tail, unless otherwise specified in regulation. Fork length for finfish is the straight-line distance from the tip of the ~~head~~ snout or jaw, whichever extends furthest while the mouth is closed to the center of the tail fin, measured while the fish is lying flat in a natural resting position. ~~Tip of the head shall be the most anterior point on the fish with the mouth closed and the fish lying flat on its side.~~ ~~Alternate length is the straight-line distance from the base of the foremost spine of the first dorsal fin to the end of the longest lobe of the tail.~~ Legal minimum and maximum sizes for invertebrates are provided in specific regulations for each species or group. Unless otherwise provided, all ~~fish, mollusks or crustaceans~~ finfish or invertebrates less than the legal minimum size or greater than the maximum legal size must be returned immediately to the water from which they were taken.

Authority cited: Sections 200, 205, 219, 265, ~~and 275,~~ 7701, and 7708, Fish and Game Code.

Reference: Sections 200, 205, 265 and 270, Fish and Game Code.

Section 1.73, Title 14, CCR, is amended to read:

§ 1.73. Salmon.

(a) Salmon includes Chinook, coho, pink, chum, and sockeye salmon.

(b) Any person in possession of a recreationally taken salmon with a missing adipose fin (the small, fleshy fin on the back of the fish between the back fin and tail) shall immediately relinquish the head of the salmon, upon request by an authorized agent or employee of the department, to facilitate the recovery of any coded-wire tag. The head may be removed by the fish owner or, if removed by the official department representative, the head shall be removed in a manner to minimize loss of salmon flesh and the salmon shall immediately be returned to the fish owner.

(c) Any person in possession of a recreationally taken salmon in which an adipose fin is present shall immediately provide a tissue sample upon request by an authorized agent or employee of the Department.

Authority cited: Sections 200, 205, 265 and 275, Fish and Game Code

Reference: Sections 200, 205, 265, 270, 275 and 7060, Fish and Game Code.

Section 1.74, Title 14, CCR, is amended to read:

§ 1.74. Sport Fishing Report Card Requirements.

...

[No change to subsections (a) and (b)]

...

(c) General Report Card Requirements.

(1) Any person fishing for or taking any of the species identified in this Section shall have in their immediate possession a valid non-transferable report card issued by the department for the particular species. See special exemption regarding possession of report cards for lobster divers in Section 29.91 of these regulations.

(2) All entries made on any physical report card or tag shall be legible and in indelible ink.

(3) A report card holder fishing with a one, two, or ten-day sport fishing license may replace the expired fishing license without purchasing a new report card so long as the report card is still valid.

(4) Report cards are not transferable and shall not be transferred to another person. No person shall possess any report card other than their own.

(5) A person may only obtain one abalone report card per report card period.

(6) Any report card holder who fills in all available lines on their steelhead, salmon, sturgeon, or lobster report card shall return or report the card to the department pursuant to subsection 1.74(e) prior to purchasing a second card.

(7) Report card holders shall return or report their report cards to the department pursuant to subsection 1.74(e) even if the report card holder did not fish or was unsuccessful.

~~(7)~~ Data recording and tagging procedures vary between report cards and species. See specific regulations in sections

5.80 (Inland white sturgeon),

5.87 (North Coast salmon),

5.88 (Steelhead),

27.90 (Ocean white sturgeon),

29.16 (Abalone),

and 29.91 (Spiny lobster) that apply in addition to the regulations of this Section.

(d) Report Card Return and Reporting Requirements

(1) Report card holders shall return or report their salmon, ~~steelhead~~, or abalone report cards to the department pursuant to subsection 1.74(e) by January 31 of the following year or abalone report cards to the department pursuant to subsection 1.74(e) by January 31 of the following year.

(A) Any report card holder who fails to return or report their salmon, ~~steelhead~~, or abalone report card to the department by the deadline may be restricted from obtaining the same card in a subsequent license year or may be subject to an additional fee for the issuance of the same card in a subsequent license year.

(2) Report card holders shall return or report their lobster report cards pursuant to subsection 1.74(e) by April 30 following the close of the lobster season for which the card was issued.

(A) Any report card holder who fails to return or report their lobster report card by April 30 following the close of the lobster season specified on the card shall be subject to a nonrefundable non-return fee specified in Section 701, in addition to the annual report card fee, for the issuance of a lobster report card in the subsequent fishing season.

(3) Report card holders shall return or report their Steelhead Fishing Report and Restoration Card (“steelhead report card”) pursuant to subsection 1.74(e) by May 31 following the close of the steelhead report card season for which the card was issued. Steelhead report cards are required from August 1 through April 30.

(A) Any report card holder who fails to return or report their steelhead report card by May 31 following the end date specified on the card shall be subject to a non-refundable non-return fee specified in Section 701, in addition to the seasonal report card fee for the issuance of the subsequent year’s steelhead report card.

1. Implementation of the fees described in Section 1.74(d)(3)(A) shall begin with the May 2028 reporting period.

(e) Report Card Return and Reporting Mechanisms:

(1) By mail or in person at the address specified on the card. A report card returned by mail shall be postmarked by the date applicable to that card as specified in subsection 1.74(d)(1), 1.74(d)(2), 1.74(d)(3), 5.80(g), or 27.90(g).

(2) Online through the department's license sales service website by the date applicable to that card as specified in subsection 1.74(d)(1), 1.74(d)(2), 1.74(d)(3), 5.80(g), or 27.90(g).

Report card holders reporting online will be provided a confirmation number upon successful submission. The report card holder must record the provided confirmation number in the space provided on the report card and retain the report card for 90 days after the reporting deadline. Report cards submitted online must be surrendered to the department upon demand.

(3) If a report card is submitted by mail and not received by the department, it is considered not returned unless the report card holder reports their report card as lost pursuant to subsection 1.74(f).

(f) Lost report cards.

(1) Lobster, salmon, sturgeon, and steelhead. Notwithstanding subsection 1.74(c)(5), any report card holder who loses their report card during the report card period for which it is valid may purchase an additional report card by submitting payment to an authorized license agent or department license sales office. Catch information from the lost report card shall not be transferred to the new card. Information from lost lobster, salmon, sturgeon, and steelhead report cards shall be reported as specified in subsection 1.74(f)(3).

(2) Abalone. Notwithstanding subsection 1.74(c)(5), any report card holder who loses their report card during the period for which it is valid may purchase a replacement report card.

(A) The Department may issue a replacement report card for abalone upon completion of the following:

1. Submitting an affidavit to any department license sales office containing all the information specified in subsection 1.74(f)(3)(B); and

2. Submitting payment of the report card fee and the non-refundable replacement-processing fee specified in Section 701.

(B) Department staff shall enter the harvest information from the affidavit to the replacement report card.

(C) Based on the information provided on the affidavit, department staff shall remove tags reported as used and issue only the number of tags that were reported as unused on the lost original report card.

(D) Report card holders shall verify that the harvest information has been accurately transferred from the affidavit to their replacement report card.

(E) The replacement report card shall be reported pursuant to the requirement for the original report card as specified in subsection 1.74(d).

NOTE: the original report card should not be reported.

(3) Reporting requirements. Except for lost abalone report cards for which a replacement card was purchased, all lost report cards shall be reported by the harvest report submission deadline date applicable to that card as specified in subsection 1.74(d)(1), 1.74(d)(2), 1.74(d)(3), 5.80(g), or 27.90(g) by one of the following methods:

(A) Online through the department's license sales service website;

or

(B) Submitting an affidavit, signed under penalty of perjury, to a department license sales office containing the following information:

1. The report card holder's full name, GOID#, and a statement confirming that the originally issued report card is lost and cannot be recovered.

2. A statement containing the report card holder's best recollection of the prior catch records that were entered on the report card that was lost.

3. A statement describing the factual circumstances surrounding the loss of the report card.

Authority cited: Sections 200, 205, 265, 275, 1050, 1053.1, 1055.1 and 7380, Fish and Game Code.

Reference: Sections 110, 200, 205, 265, 275, 713, 1050, 1053.1, 1055.1, 7149.8, 7380, 7381 and 7382, Fish and Game Code.

Section 2.10, Title 14, CCR, is amended to read:

§ 2.10. Hook and Weight Restrictions.

(a) Definition of Gap: For the purposes of this section, “gap” means the distance measured from the point of a hook to the shank.

(b) Maximum Gaps and Gear Rigging for Rivers and Streams unless otherwise provided (does not apply to lakes and reservoirs, the Sacramento-San Joaquin Delta) (see Section 1.71 for definition of the Delta), and the Colorado River.

(1) No person shall use any single hook with a gap greater than 1 inch or any multiple hook with a gap greater than 3/4 inch.

(2) It is unlawful to use any hook which is directly or indirectly attached closer than 18 inches to any weight exceeding 1/2 ounce.

~~(43) It is unlawful to use any weight directly attached below a hook. combined weight exceeding 1/4 ounce directly attached to or below a hook.~~

~~(34) It is unlawful to use any multiple hook or more than one single hook on non-buoyant artificial lures exceeding one ounce, except when using artificial lures made out of soft or hard plastics and/or wood in portions of waters described below:~~

- ~~(A) The American River from the confluence with the Sacramento River to the U.S. Geological Survey gauging station cable crossing about 300 yards downstream from the Nimbus Hatchery fish rack site.~~
- ~~(B) The Feather River from the confluence with the Sacramento River to the Table Mountain Bicycle Bridge.~~
- ~~(C) The mainstem Sacramento River from the Delta to 650 feet below Keswick Dam.~~
- ~~(D) The Yuba River from the confluence with the Feather River upstream to 250 feet below Daquerre Point Dam.~~

(c) Maximum Gaps for the Sacramento-San Joaquin Delta (see Section 1.71 for definition of the Delta).

(1) No person shall use any single hook with a gap greater than 1 inch or any multiple hook with a gap greater than 3/4 inch.

Authority cited: Sections 200, 205, 265 and 275, Fish and Game Code.

Reference: Sections 200, 205, 265 and 275, Fish and Game Code.

Section 2.11, Title 14, CCR, is amended to read:

§ 2.11. Special Fishing Methods—Lake County. [Repealed]

~~(a) In Clear Lake and its tributaries, hitch may be taken by hand or hand-held dip net.~~

~~(b) No barriers or weirs may be constructed to herd fish.~~

~~(c) All hitch are to be utilized and not left as waste.~~

~~(d) All fish taken by hand or net other than hitch must be immediately returned live to the water. No other fish may be possessed along with hitch as part of a mixed bag.~~

Authority cited: Sections 200, 255 and 265, Fish and Game Code.

Reference: Sections 200, 205, 255 and 265, Fish and Game Code.

Section 4.20, Subsection (d)(2) Title 14, CCR, is amended to read:

§ 4.20. Bait Fish Use in the Valley and South Central Districts.

Except as provided below, live or dead fin fish shall not be used or possessed for use as bait in the Valley or South Central District:

(a) Live or dead golden shiner, fathead minnow, mosquitofish, longjaw mudsucker, and Pacific staghorn sculpin, and dead threadfin shad, Mississippi silverside and lamprey may be used in all Valley and South Central District waters except those listed in subsection (f) below.

(b) Red shiner may be used only in the Valley District north of Interstate 580 and Highway 132.

(c) Yellowfin gobies may be used in the Valley District only in those areas described in subsections (d)(1)–(3) below.

(d) In addition, except for trout and salmon, fin fish lawfully taken in the following waters by angling or with bait fish methods approved in Section 4.05 may be used only in the waters where taken:

(1) Carquinez Strait and Suisun Bay and their tributaries and saltwater tributaries.

(2) Sacramento River and tidewater of tributaries downstream from the ~~Highway 32-Deschutes~~ bridge near ~~Hamilton City-Anderson~~, Feather River downstream from the Oroville Hatchery Fish Barrier Dam, and American River downstream from Nimbus Dam.

(3) San Joaquin River and tidewater of tributaries downstream from Interstate 5 bridge.

(e) Live threadfin shad, Mississippi silverside and lamprey may be used only at the location where taken.

(f) Fin fish may not be used in Keller Lake (Glenn Co.), Letts Lake (Colusa Co.), Merced Lake (San Francisco Co.), Upper and Lower Plaskett Meadow Ponds (Glenn Co.), Whale Rock Reservoir (San Luis Obispo Co.).

Authority cited: Sections 200, 205, 265 and 270, Fish and Game Code.

Reference: Sections 200 and 205, Fish and Game Code.

Section 5.00, Title 14, CCR, is amended to read:

§ 5.00. Black Bass.

It is unlawful to take or possess black bass except as provided in this section:

(Note: Some waters are closed to all fishing under Sections 7.40 and 7.50.)

(a) General Statewide Restrictions:

(1) Lakes/Reservoirs and the Sacramento-San Joaquin Delta: The following waters, except for those listed in subsection (b), are open to fishing all year, with a 12-inch total length minimum size limit and a five-fish daily bag limit: All lakes and reservoirs in the State, and the Sacramento-San Joaquin River Delta (see Section 1.71 for definition of the Delta).

(2) Rivers/Streams and Private Ponds: Rivers, streams, canals, and lakes or ponds entirely on private lands that are not listed in subsection (b) are open all year with no size limit and a five-fish daily bag limit.

(b) Special Regulations: Counties and individual waters listed below are those having regulations different from the General Statewide Restrictions in subsection (a).

DISTRICTS AND COUNTIES WITH SPECIAL REGULATIONS

Area or Body of Water	Open Season	Size (total length)	Bag Limit
(1) Colorado River District: All waters (Bag and size limits conform with Arizona regulations.).	All year.	13-inch minimum.	6
<p>(2) Inyo Co.: All streams east of Highway 395 from the southern Inyo Co. line north to the junction of Highway 6 and east of Highway 6 to the Mono Co. line, except those streams listed by name in Section 7.50(b), Special Fishing Regulations.</p> <p>The remaining streams of Inyo Co., except those waters listed in Section 7.50(b), Special Fishing Regulations. All Lakes, Big Pine Canal, Fish Spring Canal, and Millpond in Inyo Co.</p>	<p>All year.</p> <p>Last Sat. in Apr. through Nov. 15.</p> <p>Closed to bass fishing from Nov. 16 through the Fri. preceding the last Sat. in Apr.</p> <p>All year.</p>	<p>12-inch minimum.</p> <p>12-inch minimum.</p> <p>12-inch minimum.</p>	<p>5</p> <p>5</p> <p>5</p>

Area or Body of Water	Open Season	Size (total length)	Bag Limit
<u>(A) The remaining streams of Inyo Co., except those waters listed in Section 7.50(b), Special Fishing Regulations.</u>	<u>Last Sat. in Apr. through Nov. 15.</u> <u>Closed to bass fishing from Nov. 16 through the Fri. preceding the last Sat. in Apr.</u>	12-inch minimum.	<u>5</u>
<u>(B) All Lakes, Big Pine Canal, Fish Spring Canal, and Millpond in Inyo Co.</u>	<u>All year.</u>	<u>12-inch minimum.</u>	<u>5</u>
<u>(3) Lassen Co: all waters except Mountain Meadows Reservoir.</u>	<u>All year.</u>	<u>No size limit.</u>	<u>5</u>
<u>(4) Modoc Co:</u>	<u>All year.</u>	<u>No size limit.</u>	<u>5</u>
<u>(35) Mono Co.: All streams except for Fish Slough (see subsection (b)(4011)) and those waters listed by name in Section 7.50(b), Special Fishing Regulations</u>	<u>Last Sat. in Apr. through Nov. 15.</u> <u>Closed to bass fishing from Nov. 16 through the Fri. preceding the last Sat. in Apr.</u>	No size limit.	5
<u>(46) Plumas Co.: All waters.</u>	<u>All year.</u>	No size limit.	5

INDIVIDUAL BODIES OF WATER WITH SPECIAL REGULATIONS

Area or Body of Water	Open Season	Size (total length)	Bag Limit
(57) Barrett Lake (San Diego Co.) (Also see Section 2.08.)	All year.	Catch and Release only.	0
(68) Casitas Lake (Ventura Co.)	All year.	12-inch minimum. No more than one over 22 inches.	5
(79) Castaic Lake (Los Angeles Co.).	All year.	12-inch minimum.	5
(810) Cuyamaca Lake (San Diego Co.).	All year.	No size limit for Largemouth Bass. Catch and Release only for Smallmouth Bass.	5
(911) Fish Slough (Mono Co.), except the fenced portions of Fish Slough within the BLM Spring, which are closed to all fishing all year. See Section 7.50(b)(49), Special Fishing Regulations.	All year.	No size limit.	5
(4012) Hodges Lake (San Diego Co.).	All year.	15-inch minimum.	5
(4413) Lett's Lake (Colusa Co.).	All year.	No size limit.	5
(4214) Plaskett Meadows lakes, upper and lower (Glenn Co.).	All year.	No size limit.	5
(4315) Shaver Lake (Fresno Co.).	All year.	No size limit.	5

Area or Body of Water	Open Season	Size (total length)	Bag Limit
(4416) Upper Otay Lake (San Diego Co.). (Also see Section 2.08.)	All year	Catch and Release only.	0

Authority cited: Sections 200, 205, 265, 270 and 275, Fish and Game Code. Reference: Sections 200 and 205, Fish and Game Code.

Section 5.65, Subsection (c) of Title 14, CCR, is amended to read:

§ 5.65. Shad, American.

(a) Open season: All year, except for closures listed under special regulations.

(b) Limit: Twenty-five.

(c) Methods of take: Shad may be taken only by angling, except that spearfishing or a dip net may be used in the Valley District.

Authority cited: Sections 200, 205, 219, 265 and 275, Fish and Game Code.

Reference: Sections 200, 205, 255, 265, 270 and 275, Fish and Game Code.

Section 5.85, Subsection (a)(2) of Title 14, CCR, is amended to read:

§ 5.85. Trout.

As used in this section and unless otherwise noted, daily bag and possession limits mean the total number of trout in combination including, but not limited to, Rainbow, Golden, Brown, and Cutthroat Trout.

(a) General Statewide Regulations:

(1) All inland lakes, reservoirs, and ponds, including those on private lands, are open to fishing all year with a five-trout daily bag limit and ten-trout possession limit.

(2) All inland streams, rivers, and canals, except those listed in Sections 7.00, 7.40(b) and 7.50(b), are open to fishing from the last Saturday in April through November 15 with a five-trout daily bag limit and ten-trout possession limit, with no gear restrictions. From November 16 through the Friday preceding the last Saturday in April, a zero-trout bag limit applies, and only artificial lures with barbless hooks may be used for all species of fish. In waters where the bag limit for trout is zero, trout must be released unharmed and should not be removed from the water.

(3) Exceptions:

(A) All waters listed in Sections 7.40(b) and 7.50(b).

(B) Brook Trout bag and possession limits in Section 5.84 and statewide trout daily bag and possession limits are cumulative.

Authority cited: Sections 200, 205, 219, 265 and 275, Fish and Game Code.

Reference: Sections 200, 205, 255, 265, 270 and 275, Fish and Game Code.

Section 5.88, Title 14, CCR, is amended to read:

§ 5.88. Steelhead Fishing Report and Restoration Card Requirements for Inland Waters (FG 682).

(a) Steelhead Fishing Report and Restoration Card (“steelhead report card”) Required. All anglers must have a valid Steelhead Fishing Report and Restoration Card in their possession while fishing for or taking steelhead or Rainbow Trout in anadromous waters as defined in Section 1.04, from August 1 through April 30. Anglers must complete and return the card pursuant to regulations in this Section and in Section 1.74. For purposes of these regulations, a steelhead trout is defined as any ~~rainbow trout~~ Rainbow Trout equal to or greater than 16 inches in length found in anadromous waters. Hatchery steelhead have a healed adipose fin clip (adipose fin is absent). Wild steelhead are those not showing a healed adipose fin clip (adipose fin present).

(b) Reporting Requirements:

(1) Prior to beginning fishing activity, the ~~cardholder~~ report card holder must record the month, day, and location code on the first available line on the report card.

(~~e~~2) When a hatchery steelhead is retained, the report card holder must immediately mark the appropriate field.

(~~d~~3) When the report ~~cardholder~~ card holder moves to another location code, or finishes fishing for the day, the angler must immediately record on the card the number of wild and hatchery steelhead that were released ~~from that location~~ and the number of hours fished.

(4) Report card holders shall return or report their Steelhead Fishing Report and Restoration Card to the department pursuant to subsection 1.74(d)(3) by May 31, even if you did not fish or were unsuccessful at catching steelhead.

(5) Any report card holder who fails to return or report their Steelhead Fishing Report and Restoration Card to the department by the deadline shall be subject to a non-refundable non-return fee, for the issuance of the subsequent year’s steelhead report card.

(A) The non-return fee for the Steelhead Fishing Report and Restoration Card is specified in Section 701 of these regulations.

1. Implementation of the non-refundable non-return fee shall begin with the May 2028 reporting period.

(~~e~~6) In the event an angler fills in all lines and returns a Steelhead Fishing Report and Restoration Card, an additional card must be purchased to continue to fish for steelhead. See Section 1.74.

(f~~c~~) The ~~annual~~ fee for the Steelhead Fishing Report and Restoration Card is specified in Section 7380 of the Fish and Game Code and listed in Section 701 of these regulations.

Authority cited: Section 200, 205, 265, 399, and 7380, Fish and Game Code.

Reference: Sections 7380 and 7381, Fish and Game Code.

Section 6.34, Title 14, CCR, is amended to read:

§ 6.34. Southern District Definition.

~~The Sierra District consists of all of Modoc, Lassen, Shasta, Sierra, Plumas, Alpine, Inyo and Mono counties; Tulare County east of the west boundaries of Sequoia National Forest and Sequoia National Park; Fresno County east of the west boundaries of Sierra and Sequoia National Forests (excluding Pine Flat Lake); Madera County east of the west boundary of Sierra National Forest; Mariposa, Tuolumne, Calaveras, Amador, El Dorado, Placer and Nevada counties east of Highway 49 (excluding Don Pedro, McClure and New Melones lakes); the portion of Siskiyou County southeast of a line drawn between Mt. Eddy and the Black Butte summit railroad crossing of Interstate 5 and east of Interstate 5 between the railroad crossing and Weed and east of Highway 97 between Weed and the Oregon border; and Tehama County excluding Black Butte Lake. Those waters excluded above are part of the Valley District (see Section 6.36).~~

The Southern District consists of the inland waters of all of Los Angeles, Orange, San Diego, Santa Barbara and Ventura counties and those portions of Riverside and San Bernardino counties outside of the Colorado River District (see section 6.37).

Authority cited: Sections 200, 205, 265 and 275, Fish and Game Code.

Reference: Sections 110, 200 and 205, Fish and Game Code.

Section 6.35, Title 14, CCR, is amended to read:

§ 6.35. Sierra District Definition.

The Sierra District consists of all of Modoc, Lassen, Shasta, Sierra, Plumas, Alpine, Inyo and Mono counties; Tulare County east of the west boundaries of Sequoia National Forest and Sequoia National Park; Fresno County east of the west boundaries of Sierra and Sequoia National Forests (excluding Pine Flat Lake); Madera County east of the west boundary of Sierra National Forest; Mariposa, Tuolumne, Calaveras, Amador, El Dorado; Yuba County east of New Bullards Bar Dam; Placer and Nevada counties east of Highway 49 (excluding Don Pedro, McClure and New Melones lakes); the portion of Siskiyou County southeast of a line drawn between Mt. Eddy and the Black Butte summit railroad crossing of Interstate 5 and east of Interstate 5 between the railroad crossing and Weed and east of Highway 97 between Weed and the Oregon border; and Tehama County excluding Black Butte Lake. Those waters excluded above are part of the Valley District (see Section 6.36).

Authority cited: Sections 200, 205, 265 and 275, Fish and Game Code.

Reference: Sections 110, 200 and 205, Fish and Game Code.

Section 7.00, Subsection (b)(2) of Title 14, CCR, is amended to read:

§ 7.00. District General Regulations.

Unless otherwise provided, waters shown as open to hatchery trout and hatchery steelhead fishing in subsections (a) through (g) below are open to fishing for other species. Gear restrictions listed in this section apply to the take of all species of fish unless otherwise noted. Every body of water listed in subsections (a) through (g) is closed to all fishing, except during the open season as shown. Unless otherwise provided, waters closed to hatchery trout and hatchery steelhead fishing are closed to fishing for all other species, except that these closures do not apply to fishing for amphibians (see Section 5.05), freshwater clams (see Section 5.20), crayfish (see Section 5.35), and lamprey (see Section 5.40), using legal fishing methods other than hook-and-line fishing, and saltwater clams, crabs, ghost shrimp, and blue mud shrimp (see Ocean Regulations Booklet Sections 29.20 to 29.87). Crabs may only be taken using hoop nets or by hand, and Dungeness crab may only be taken within the North Coast District and Sonoma and Mendocino Counties.

Daily bag and possession limits, unless otherwise provided, mean the total number of hatchery trout and hatchery steelhead. Unless otherwise provided, no more than one daily bag limit may be possessed. Coho (silver) Salmon may not be taken in any of the waters of the State. Incidentally hooked Coho (silver) Salmon must be immediately released unharmed to the waters where they are hooked. In waters where the bag limit for hatchery trout and hatchery steelhead is zero, fish for which the bag limit is zero must be released unharmed and should not be removed from the water.

These waters may also be subject to restrictions on fishing methods and gear (Sections 2.00 through 2.45), fishing hours (Section 3.00), ~~and~~ the use of bait (Sections 4.00 through 4.30), and low-flow restrictions (Section 8.00).

...

[No changes to (a)(1) through (a)(2)]

Section 7.40, Subsection (b) of Title 14, CCR, is amended to read:

§ 7.40. Alphabetical List of Hatchery Trout, Hatchery Steelhead, and Salmon Waters with Special Fishing Regulations.

(a) General Provisions:

(1) Every body of water listed in subsection (b) is closed to the take of hatchery trout, hatchery steelhead, and salmon and to fishing for these species, unless otherwise noted.

(2) Every body of water listed in subsection (b) is closed to all fishing except during the open season as shown. Unless otherwise provided, waters shown as open to hatchery trout, hatchery steelhead, and salmon fishing in subsection (b) are open to fishing for other species. Gear restrictions listed in this section apply to the take of all species of fish unless otherwise noted.

(3) Unless otherwise provided, waters closed to hatchery trout, hatchery steelhead, or salmon fishing are closed to fishing for all other species, except that these closures do not apply to fishing for amphibians (see Section 5.05), freshwater clams (see Section 5.20), crayfish (see Section 5.35), and lamprey (see Section 5.40), using legal fishing methods other than hook-and-line fishing, and saltwater clams, crabs, ghost shrimp, and blue mud shrimp (see Ocean Regulations Booklet sections 29.20 to 29.87). Crabs may only be taken using hoop nets or by hand, and Dungeness crab may not be taken within the North Coast District and Sonoma and Mendocino counties.

(4) Unless otherwise provided, it is unlawful to possess more than one daily bag limit.

(5) The waters in subsection (b) may also be subject to restrictions on fishing methods and gear (Sections 2.00 through 2.45), fishing hours (Section 3.00), and the use of bait (Sections 4.00 through 4.30).

(b)

<i>Body of Water</i>	<i>Open Season and Special Restrictions</i>	<i>Daily Bag and Possession Limit</i>
(1) Alameda Creek and tributaries (Alameda and Santa Clara Cos.).		

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(A) Alameda Creek and tributaries downstream of San Antonio, Calaveras, and Del Valle Reservoirs except for Arroyo Del Valle between Bernal Ave. and the Thiessen St. intersection with Vineyard Ave.	Closed to all fishing all year.	
1. Arroyo Del Valle between Bernal Ave. and the Thiessen St. intersection with Vineyard Ave.	All year. Only artificial lures with barbless hooks may be used.	0 trout.
(2) Albion River (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Main stem below the confluence of <u>with the South Fork Albion.</u> <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(3) Alder Creek (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Main stem below Tramway Gulch. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
<i>[... No changes to 7.40(b)(4)(A) through (D)...]</i>		
(5) Antelope Creek (Tehama Co.).		

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(A) From confluence with North Fork downstream <u>Ponderosa Way crossing on the North Fork and South Fork</u> to U.S. Geological Survey gauging station cable crossing at mouth of Antelope Creek Canyon.	Last Sat. in April through Nov. 15. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) From U.S. Geological Survey gauging station cable crossing at mouth of Antelope Creek Canyon downstream to mouth of Antelope Creek.	Jun. 16 through Sep. 30.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(6) Aptos Creek (Santa Cruz Co.) from <u>the</u> mouth to <u>the first bridge</u> on Aptos Creek Road. Also see Low-Flow Restrictions Section 8.00(eb) <u>Low-Flow Restrictions</u> .	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(7) Arroyo Grande Creek (San Luis Obispo Co.) from mouth to Lopez Canyon Dam.	Closed to all fishing all year.	
(8) Arroyo Leon (San Mateo Co.).	Closed to all fishing all year.	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(9) Arroyo Seco River (Monterey Co.). Also see Section 8.00(c) Low-Flow Restrictions. The main stem Arroyo Seco and tributaries below the waterfall located approximately 3.5 miles upstream from the U.S. Forest Service Ranger Station.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(10) Auburn Ravine Creek and tributaries (Placer Co.) east of Nelson Lane.	Fourth Sat. in May through Oct. 15.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(11) Battle Creek (Shasta and Tehama Cos.).		
(A) From mouth to <u>1,250 feet below</u> Coleman Fish Hatchery weir <u>to the mouth.</u>	Closed to all fishing all year. <u>June 30 to December 31. Only artificial lures with barbless hooks may be used.</u>	<u>2 hatchery trout or hatchery steelhead**.</u> <u>4 hatchery trout or hatchery steelhead** in possession.</u>
(B) From 250 feet upstream from the Coleman National Fish Hatchery upstream to Angel Falls (near Mineral) on the South Fork and to Ponderosa Way Bridge on the North Fork.	Last Sat. in Apr. through Nov. 15. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(12) Bear River (Humboldt Co.) downstream from County Road Bridge at Capetown, excluding tributaries.	Fourth Sat. in May. Through Mar. 31. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(13) Bear River and tributaries (Placer Co.) from Highway 65 to the South Sutter Irrigation District Diversion Dam.	Fourth Sat. in May through Oct. 15.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(14) Big Chico Creek (Butte Co.).		
(A) From the mouth to Bear Hole, located approximately one mile downstream from the upper end of Bidwell Park.	Jun. 16 through Feb. 15. Only artificial lures with barbless hooks may be used from Oct. 16 through Feb 15.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) From Bear Hole to the upper boundary of the Big Chico Creek Ecological Reserve.	Nov. 1 through Apr. 30. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(C) From the upper boundary of the Big Chico Creek Ecological Reserve to Higgins Hole Falls, located about ½ mile upstream from Ponderosa Way.	Closed to all fishing all year.	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(15) Big Lagoon (Humboldt Co.). For purposes of this subsection, the boundary between Big Lagoon and Maple Creek is the first private road bridge, located approximately ½ mile southeast of the Highway 101 bridge crossing.	All year. Only barbless hooks may be used. Cutthroat Trout minimum size limit: 10 inches.	2 Cutthroat Trout. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(16) Big River (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Main stem below the confluence of <u>with</u> Two Log Creek. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(17) Big Sur River (Monterey Co.). Big Sur River within Pfeiffer Big Sur State Park, east of the Highway 1 bridge, to its boundary within the Ventana Wilderness Area.	Closed to all fishing all year.	
(18) Black Butte River and tributaries (Glenn Co.) except Cold Creek.	Closed to all fishing all year.	
(19) Bodfish Creek and tributaries (Santa Clara Co.).	Closed to all fishing all year.	
(20) Bogus Creek (Siskiyou Co.).	See Klamath River, <u>in</u> subsection 7.40(b) (50) .	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(21) Brush Creek (Mendocino Co.). Main stem below the Lawson bridge Bridge. Also see Section 8.00(ca) Low-Flow Restrictions.	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(22) Butano Creek (San Mateo Co.). From the mouth to county bridge on Pescadero-Bean Hollow Road. Also see Section 8.00(cb) Low-Flow Restrictions.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(23) Butte Creek (Butte and Sutter Cos.).		
(A) From the Oro-Chico Road bridge crossing south of Chico to the Centerville Head Dam, located 300 yards downstream from the DeSabra Powerhouse below DeSabra Reservoir.	Nov. 15 through Feb. 15. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

<i>Body of Water</i>	<i>Open Season and Special Restrictions</i>	<i>Daily Bag and Possession Limit</i>
(B) From the Oro-Chico Road bridge crossing south of Chico to the point that Butte Creek enters the Sacramento River both via Butte Slough outfall gates at Moon's Bend and through Butte Slough, thence both the East and West Canals of the Sutter Bypass, thence Sacramento Slough.	All year.	Open to fishing for non-salmonids only. Closed to the take of trout and steelhead.
(24) Calaveras River downstream from New Hogan Dam and the diverting canal (Mormon Slough) from Bellota Weir downstream to Interstate Highway 5 (Calaveras and San Joaquin Cos.).	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(25) Carmel River and tributaries above Los Padres Dam (Monterey Co.).	Last Sat. in Apr. through Nov. 15. Only artificial lures with barbless hooks may be used.	5 trout, 0 Rainbow Trout.
(26) Carmel River below Los Padres Dam. (Monterey Co.).		
(A) Carmel River tributaries below Los Padres Dam and main stem from Los Padres Dam to the bridge at Robles Del Rio/Esquiline Roads (Rosie's Bridge).	Closed to all fishing all year.	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(B) Carmel River main stem below the bridge at Robles Del Rio/Esquiline Roads (Rosie's Bridge). Also see Section 8.00(eb) Low-Flow Restrictions.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., and opening and closing days. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(27) Chorro Creek (San Luis Obispo Co.) from the mean high tide line upstream to the South Bay Boulevard Bridge.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
<u>(28) Clear Creek (Shasta Co.).</u>		
<u>(A) Clear Creek from Whiskeytown Dam to 650 feet below Whiskeytown Dam.</u>	<u>Closed to fishing all year.</u>	
<u>(B) Clear Creek from 650 feet below Whiskeytown Dam to the confluence of the Sacramento River.</u>	<u>Last Sat. in Apr. through Nov.15. Only artificial lures with barbless hooks may be used.</u>	<u>2 hatchery trout or hatchery steelhead**.</u> <u>4 hatchery trout or hatchery steelhead** in possession.</u> <u>Closed to the take of salmon.</u>
(28) <u>29</u> Codornices Creek (Alameda Co.).	Closed to all fishing all year.	
(29) <u>30</u> Coon Creek and tributaries (Placer Co.) east of Highway 65.	Fourth Sat. in May through Oct. 15.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(3031) Coon Creek (San Luis Obispo Co.).	Closed to all fishing all year.	
(3432) Corralitos Creek (Santa Cruz Co.) from the mouth to Browns Valley Road. Also see Section 8.00(c) Low-Flow Restrictions.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(3233) Cosumnes River (Sacramento Co.) from Highway 99 bridge upstream to the Latrobe vehicle bridge.	Jan. 1 through Oct. 15. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(3334) Cottoneva Creek (Mendocino Co.). Main stem below the confluence of <u>with</u> South Fork Cottoneva Creek. Also see Section 8.00(b <u>a</u>) Low-Flow Restrictions.	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
<u>(35) Cottonwood Creek (Shasta and Tehama Co.)</u>		
<u>(A) Cottonwood Creek main stem and Tributaries upstream of the confluence with south fork Cottonwood Creek.</u>	<u>Last Sat. in Apr. through Nov. 15. Only artificial lures with barbless hooks may be used.</u>	<u>2 hatchery trout or hatchery steelhead**.</u> <u>4 hatchery trout or hatchery steelhead** in possession.</u>

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
<u>(B) From the confluence of south fork Cottonwood Creek to the confluence of the Sacramento River.</u>	<u>Jun. 16 through Sep. 30. Only artificial lures with barbless hooks may be used.</u>	<u>2 hatchery trout or hatchery steelhead**.</u> <u>4 hatchery trout or hatchery steelhead** in possession.</u>
(3436) Coyote Creek (Santa Clara Co.).	Last Sat. in Apr. through Nov. 15. Only artificial lures and barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
<u>(37) Cow Creek (Shasta Co.)</u>		
<u>(A) Cow Creek main stem above Highway 44 Bridge and all Tributaries.</u>	<u>Last Sat. in Apr. through Nov. 15. Only artificial lures with barbless hooks may be used.</u>	<u>2 hatchery trout or hatchery steelhead**.</u> <u>4 hatchery trout or hatchery steelhead** in possession.</u>
<u>(B) From Highway 44 Bridge to the confluence of the Sacramento River.</u>	<u>Jun. 16 through Sep. 30. Only artificial lures with barbless hooks may be used.</u>	<u>2 hatchery trout or hatchery steelhead**.</u> <u>4 hatchery trout or hatchery steelhead** in possession.</u>
(3538) Deer Creek (Tehama Co.).		

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(A) From 250 feet below Upper Deer Creek Falls and fishway (located 1.5 miles upstream from Potato Patch Campground) downstream 31 miles to the U.S. Geological Survey gauging station cable crossing at mouth of Deer Creek Canyon (see Section 2.35 for closure at Upper Deer Creek Falls).	Last Sat. in Apr through Nov. 15. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) From U.S. Geological Survey gauging station cable crossing at mouth of Deer Creek Canyon downstream to mouth of Deer Creek.	Jun. 16 through Sep. 30.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(3639) Deer Creek (Yuba and Nevada Cos.) from mouth to Smartville-Englebright Dam road crossing.	Fourth Sat. in May through Oct. 15. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(3740) Dry Creek and tributaries (Placer Co.) east of the Atkinson Street Bridge in Roseville.	Fourth Sat. in May through Oct. 15.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(3841) Dry Creek (Yuba and Nevada Cos.) from mouth to Sid Smith Dam about one mile above junction of Scott Forbes and Peoria Roads.	Fourth Sat. in May through Oct. 15.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(3942) Earl Lake/Talawa (Del Norte Co.)	All year. Only barbless hooks may be used. Cutthroat Trout minimum size limit: 10 inches.	2 Cutthroat Trout. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(4043) Eel River (Humboldt, Lake, Mendocino and Trinity Cos.). All waters of the Eel River Drainage except those listed below are closed to all fishing.	Section 8.00(a) Low-Flow Restrictions also apply.	
(A) Main stem.		
1. From <u>the mouth to Fulmor Road, at its paved junction with the south bank of the Eel River the Cock Robin Island Bridge.</u> Also see Section 8.00(a) Low-Flow Restrictions	All year. Only artificial lures with barbless hooks may be used from Apr. 1 through the Fri. preceding the fourth Sat. in May. Only barbless hooks may be used from fourth Sat. in May through Mar. 31.	Catch and release of Chinook Salmon. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
2. From Fulmor Road, at its paved junction with the south bank of the Eel River <u>the Cock Robin Island Bridge to the confluence with the South Fork Eel River.</u> Also see Section 8.00(a) Low-Flow Restrictions.	All year. Only artificial lures with barbless hooks may be used from Apr. 1 through Sep. 30. Only barbless hooks may be used from Oct. 1 through Mar. 31.	Catch and release of Chinook Salmon. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
3. From <u>the</u> South Fork Eel River to Cape Horn Dam.	Jan. 1 through Mar. 31 and fourth Sat. in May through Sep. 30. Only artificial lures with barbless hooks may be used. Apr. 1 through the fourth Fri. in May and Oct. 1 through Dec. 31.	Catch and release of Chinook Salmon. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession. Closed to all fishing.
(B) Van Duzen River.		
1. Main stem from its junction <u>confluence</u> with the Eel River <u>upstream</u> to the end of Golden Gate Drive near Bridgeville (approximately 4,000 feet upstream from the Little Golden Gate Bridge). Also see Section 8.00(a) Low-Flow Restrictions.	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Sep. 30. Only barbless hooks may be used from Oct. 1 through Mar. 31.	Catch and release of Chinook Salmon. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(C) South Fork Eel River from <u>the</u> mouth to <u>the</u> <u>confluence with</u> Rattlesnake Creek. Also see Low-Flow Restrictions, Section 8.00(a).	Apr. 1 to fourth Fri. in May. Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Sep. 30. Only barbless hooks may be used from Oct. 1 through Mar. 31.	Closed to all fishing. Catch and release of Chinook Salmon. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(D) Middle Fork Eel River from the mouth to the confluence with Bar Creek. Also See Section 8.00(a) Low-Flow Restrictions.	<p><u>Jan. 1 through May 31 and Jul. 16 through Sep. 30.</u></p> <p><u>At all times, only artificial lures with barbless hooks may be used.</u></p> <p><u>Jun. 1 through Jul. 15 and Oct. through Dec. 31.</u></p>	<p><u>2 hatchery trout or hatchery steelhead**.</u></p> <p><u>4 hatchery trout or hatchery steelhead** in possession.</u></p> <p><u>Closed to all fishing.</u></p>
1. Middle Fork main stem from mouth to Bar Creek. Also see Section 8.00(a) Low flow Restrictions.	<p>Jan. 1 through May 31 and Jul. 16 through Sep. 30.</p> <p>At all times, only artificial lures with barbless hooks may be used.</p> <p>Jun. 1 through Jul. 15 and Oct. through Dec. 31.</p>	<p>2 hatchery trout or hatchery steelhead**.</p> <p>4 hatchery trout or hatchery steelhead** in possession.</p> <p>Closed to all fishing.</p>
(4144) Elk Creek (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Main stem below the confluence of <u>with</u> South Fork Elk Creek. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	<p>Fourth Sat. in May through Mar. 31.</p> <p>Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31.</p> <p>Only barbless hooks may be used from Nov. 1 through Mar. 31.</p>	<p>2 hatchery trout or hatchery steelhead**.</p> <p>4 hatchery trout or hatchery steelhead** in possession.</p>
(4245) Elk River (Humboldt Co.) downstream from Highway 101 bridge, excluding tributaries.	<p>Fourth Sat. in May through Mar. 31.</p> <p>Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31.</p> <p>Only barbless hooks may be used from Oct. 1 through Mar. 31.</p>	<p>2 hatchery trout or hatchery steelhead**.</p> <p>4 hatchery trout or hatchery steelhead** in possession.</p>

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(4346) Feather River below Fish Barrier Dam (Butte, Sutter and Yuba cos.).		
<i>[...No changes to 7.40(b)(46)(A) through (F)...]</i>		
(4447) Freshwater Creek (Humboldt Co.) downstream from bridge at "3 Corners" on the Old Arcata Road, excluding tributaries.	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(4548) Garcia River (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Main stem below the Eureka Hill Road bridge. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(4649) Greenwood Creek (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Main stem below the log bridge about 1 ½ miles east of Highway 1. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Saturday in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit

(DE) North Fork Smith River.		
1. From the mouth to <u>the confluence with</u> Stony Creek. Also see Section 8.00(a) Low-Flow Restrictions.	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Aug. 31. Only barbless hooks may be used from Sep. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession. 2 Cutthroat Trout, minimum size limit: 10 inches total length. 1 Chinook Salmon and no more than 5 wild Chinook Salmon* over 22 inches per year.
2. Above the mouth of Stony Creek.	Fourth Sat. in May through Oct. 31. Only artificial lures with barbless hooks may be used.	2 Cutthroat Trout, minimum size limit: 10 inches total length. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(406 109) Sonoma Creek and tributaries (Sonoma Co.). Sonoma Creek and tributaries between the Sonoma Creek seasonal waterfall in Sugarloaf Ridge State Park (located 0.2 miles upstream of the west end of the Canyon	Closed to all fishing all year.	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
Trail) and the Highway 121 bridge. Note: Sonoma Creek below the Highway 121 bridge is tidewater, and is under regulations for the Ocean and San Francisco Bay District (see Sections 1.53 and 27.00).		
(407 <u>110</u>) Soquel Creek (Santa Cruz Co.) from <u>the</u> mouth to <u>the</u> confluence of <u>with</u> East and West branch. Also see Section 8.00(eb) Low-Flow Restrictions.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(408 <u>111</u>) Stanislaus River.		
(A) From Goodwin Dam down-stream to the Highway 120 bridge in Oakdale.	Jan. 1 through Oct. 31. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) From the Highway 120 bridge in Oakdale to the mouth.	Jan. 1 through Oct. 31. Bait may be used from Jan. 1 through Oct. 31. However, from Apr. 1 through the Fri. preceding the fourth Sat. in May, bait may be used only with single hooks having a gap between ½ and 1 inch, or with multiple hooks having a gap between ¼ and ½ inch.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(409 <u>112</u>) Stevens Creek (Santa Clara Co.)	Last Sat. in Apr. through Nov. 15. Only artificial lures with	2 hatchery trout or hatchery steelhead**.

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
downstream of Stevens Reservoir.	barbless hooks may be used.	4 hatchery trout or hatchery steelhead** in possession.
(440113) Stone Lagoon (Humboldt Co.).	All year. Only artificial lures with barbless hooks may be used. Cutthroat Trout minimum size limit: 14 inches.	2 Cutthroat Trout. 2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(444114) Ten Mile River (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Ten Mile River main stem below the confluence with the <u>North Fork Ten Mile River North Fork</u> , and the <u>North Fork Ten Mile River North Fork</u> below the confluence with Bald Hill Creek. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures With <u>with</u> barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through May 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(442115) Topanga Canyon Creek and tributaries (Los Angeles Co.).	Closed to all fishing all year.	
(443116) Trabuco Creek (a.k.a. Arroyo Trabuco Creek) (Orange Co.). Downstream of the Interstate Highway 5 bridge to the confluence with San Juan Creek.	Closed to all fishing all year.	
(444117) Trinity River and tributaries downstream of Lewiston Dam.	See Klamath River, subsection (b)(50).	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(445118) Tuolumne River (Stanislaus and Tuolumne Cos.).		
(A) From La Grange Dam downstream to Hickman Bridge.	Jan. 1 through Oct. 31. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) From Hickman Bridge to the mouth.	Jan. 1 through Oct. 31. Bait may be used from Jan. 1 through Oct. 31. However, from Apr. 1 through the Fri. preceding the fourth Sat. in May, bait may be used only with single hooks having a gap between ½ and 1 inch, or with multiple hooks having a gap between ¼ and ½ inch.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(446119) Usal Creek and tributaries (Mendocino Co.). Also see Section 8.00(b) Low-Flow Restrictions. Usal Creek main stem below the Usal-Shelter Cove Road. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(447120) Uvas or Carnadero Creek (Santa Clara Co.). Also see Section 8.00(c) Low-Flow Restrictions.		
(A) From Highway 152 bridge to Uvas Dam.	Closed to all fishing all year.	

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(B) From mouth to Highway 152 bridge.	Dec. 1 through Mar. 7, but only on Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(418121) Van Duzen River (Humboldt Co.).	See Eel River (subsection (b)(40)) and Section 8.00(a) Low-Flow Restrictions.	
(419122) Waddell Creek (Santa Cruz Co.) from the mouth to the Highway 1 bridge. Also see Section 8.00(e <u>b</u>) Low-Flow Restrictions.	Dec. 1 through Mar. 7, but only Sat., Sun., Wed., legal holidays and opening and closing days. Only barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(420123) Walker Creek and tributaries (Marin Co.). Also see Section 8.00(b) Low-Flow Restrictions.		
(A) Walker Creek main stem below Highway 1. <u>Also see Section 8.00(a) Low-Flow Restrictions.</u>	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used from the fourth Sat. in May through Oct. 31. Only barbless hooks may be used from Nov. 1 through Mar. 31.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) Walker Creek main stem above Highway 1 and all Walker Creek tributaries.	Closed to all fishing all year.	
(421124) Walnut Creek (Contra Costa Co.).		

Body of Water	Open Season and Special Restrictions	Daily Bag and Possession Limit
(A) Upstream of the confluence with Grayson Creek.	Fourth Sat. in May through Mar. 31. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) Downstream of the confluence with Grayson Creek.	All year.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(422 <u>125</u>) Wildcat Creek and tributaries (Contra Costa Co.).	Closed to all fishing all year.	
(423 <u>126</u>) Yuba River (Yuba and Nevada Cos.) from mouth to Englebright Dam.		
(A) From mouth to the Highway 20 bridge.	All year. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.
(B) From Highway 20 bridge to Englebright Dam.	Dec. 1 through Aug. 31. Only artificial lures with barbless hooks may be used.	2 hatchery trout or hatchery steelhead**. 4 hatchery trout or hatchery steelhead** in possession.

* Wild Chinook Salmon are those not showing a healed adipose fin clip and not showing a healed left ventral fin clip.

**Hatchery trout or steelhead in anadromous waters are those showing a healed adipose fin clip (adipose fin is absent). Unless otherwise provided, all other trout and steelhead must be immediately released. Wild trout or steelhead are those not showing a healed adipose fin clip (adipose fin is present).

Section 8.00, Title 14, CCR, is amended to read:

§ 8.00. Low-Flow Restrictions.

~~(a) Eel River, Mad River, Mattole River, Redwood Creek, Smith River and Van Duzen River. Stream closures: Special Low Flow Conditions.~~

~~(1) From September 1 through April 30:~~

~~(A) Any of the stream reaches listed in subsections (a)(2) through (8) below shall be closed to all angling on Tuesday and Wednesday when the department determines that the flow on the previous Monday at any of the designated gauging stations is less than the minimum flows set forth in subsections (a)(2) through (8).~~

~~(B) Any of the stream reaches listed in subsections (a)(2) through (8) below shall be closed to all angling on Thursday and Friday when the department determines that the flow on the previous Wednesday at any of the designated gauging stations is less than the minimum flows set forth in subsections (a)(2) through (8).~~

~~(C) Any of the stream reaches listed in subsections (a)(2) through (8) below shall be closed to all angling from Saturday through Monday when the department determines that the flow on the previous Friday at any of the designated gauging stations is less than the minimum flows set forth in subsections (a)(2) through (8). Note: Authority cited: Sections 200, 205, 265 and 270, Fish and Game Code. Reference: Sections 200, 205 and 265, Fish and Game Code.~~

~~(D) Notwithstanding subsections (a)(1)(A) through (C), the department may close or keep a stream reach closed to fishing when the minimum flow is exceeded on the scheduled flow determination day if the department is reasonably assured that the stream flow is likely to decrease below the minimum flow as specified in subsections (a)(2) through (8) before or on the next flow determination date.~~

~~(E) The department may reopen a stream at any time during a closed period if the minimum flow as specified in subsections (a)(2) through (8) is exceeded and the department is reasonably assured that it will remain above the minimum flow until the next scheduled Monday, Wednesday, or Friday flow determination. The department shall make information available to the public by a webpage updated, as necessary, no later than 1:00 p.m. each Monday, Wednesday, and Friday as to whether any stream will be open or closed to fishing. It shall be the responsibility of the angler to use the webpage designated in the sport fishing regulations booklet to obtain information on the status of any stream.~~

~~(2) Eel River~~

~~(A) From the mouth to Fulmor Road, at its paved junction with the south bank of Eel River. Closed to angling, except:~~

~~1. Legal fishing methods other than angling are permitted.~~

~~2. From the mouth to Cock Robin Island Bridge, angling from shore for non-salmonids is permitted.~~

~~Minimum Flow: 350 cfs at the gauging station near Scotia.~~

~~(B) The main stem Eel River from the paved junction of Fulmor Road with the Eel River to the South Fork Eel River. Minimum Flow: 350 cfs at the gauging station near Scotia.~~

~~(3) The South Fork of the Eel River downstream from Rattlesnake Creek and the Middle Fork Eel River downstream from the Bar Creek. Minimum Flow: 340 cfs at the gauging station at Miranda.~~

~~(4) Van Duzen River: The main stem Van Duzen River from its junction with the Eel River to the end of Golden Gate Drive near Bridgeville (approximately 4,000 feet upstream from the Little Golden Gate Bridge).~~

~~Minimum Flow: 150 cfs at the gauging station near Grizzly Creek Redwoods State Park.~~

~~(5) Mad River: The main stem Mad River from the Hammond Trail Railroad Trestle to Cowan Creek.~~

~~Minimum Flow: 200 cfs at the gauging station at the Highway 299 bridge.~~

~~(6) Mattole River: The main stem of the Mattole River from the mouth to Honeydew Creek.~~

~~Minimum Flow: 320 cfs at the gauging station at Petrolia.~~

~~(7) Redwood Creek: The main stem of Redwood Creek from the mouth to its confluence with Bond Creek.~~

~~Minimum Flow: 300 cfs at the gauging station near the Highway 101 bridge.~~

~~(8) Smith River: The main stem Smith River from the mouth of Rowdy Creek to the mouth of Patrick Creek (tributary of the Middle Fork Smith River); the South Fork Smith River from the mouth upstream approximately 1000 feet to the County Road (George Tyron-) bridge and Craigs Creek to its confluence with Jones Creek; and the North Fork Smith River from the mouth to its confluence with Stony Creek.~~

~~Minimum Flow: 600 cfs at the Jedediah Smith Redwoods State Park gauging station.~~

~~Check the Department's regulations page at www.wildlife.ca.gov/regulations for Low-Flow Restrictions and Information.~~

~~(b) Mendocino, Sonoma, and Marin County coastal streams: Stream Closures: Special Low-Flow Conditions.~~

~~(1) From September 1 through April 30:~~

~~(A) Any of the stream reaches listed in subsections (b)(2) through (5) below shall be closed to all angling on Tuesday and Wednesday when the department determines that the flow on the previous Monday at the applicable designated gauging stations is less than the minimum flows set forth in subsections (b)(2) through (5).~~

~~(B) Any of the stream reaches listed in subsections (b)(2) through (5) below shall be closed to all angling on Thursday and Friday when the department determines that the flow on the previous Wednesday at the applicable designated gauging stations is less than the minimum flows set forth in subsections (b)(2) through (5).~~

~~(C) Any of the stream reaches listed in subsections (b)(2) through (5) below shall be closed to all angling from Saturday through Monday when the department determines that the flow on the previous Friday at the applicable designated gauging stations is less than the minimum flows set forth in subsections (b)(2) through (5).~~

~~(D) Notwithstanding subsections (b)(1)(A) through (C), the department may close or keep a stream reach closed to fishing when the minimum flow is exceeded on the scheduled flow determination day if the department is reasonably assured that the stream flow is likely to decrease below the minimum flow as specified in subsections (b)(2) through (5) before or on the next flow determination date.~~

~~(E) The department may reopen a stream at any time during a closed period if the minimum flow as specified in subsections (b)(2) through (5) is exceeded and the department is reasonably assured that it will remain above the minimum flow until the next scheduled Monday, Wednesday, or Friday flow determination.~~

~~(F) The department shall make information available to the public by a webpage updated, as necessary, no later than 1:00 p.m. each Monday, Wednesday, and Friday as to whether any stream will be open or closed to fishing. It shall be the responsibility of the angler to use the webpage designated in the sport fishing regulations booklet to obtain information on the status of any stream.~~

~~Check the Department's regulations page at www.wildlife.ca.gov/regulations for Low-Flow Restrictions and information.~~

~~(2) All rivers, creeks, and streams that flow directly into the Pacific Ocean (and its bays) in Mendocino County, except for the Russian and Gualala rivers. This excludes sections and reaches above fish migration barriers, dams, and natural features that prevent upstream anadromous migration.~~

~~Minimum Flow: 200 cfs at the USGS gauging station on the main stem Navarro River near Navarro, CA.~~

~~(3) All rivers, creeks, and streams that flow directly into the Pacific Ocean (and its bays) in Sonoma and Marin Counties, except for the Russian River. This excludes sections and reaches above fish migration barriers.~~

~~Minimum Flow: 150 cfs at the gauging station on the South Fork Gualala River near Sea Ranch (Sonoma County).~~

~~(4) Russian River main stem below the confluence of the East Branch Russian River (Mendocino and Sonoma Counties), Laguna de Santa Rosa, and Santa Rosa Creek.~~

~~Minimum Flow: 300 cfs at the gauging station located on the main stem Russian River near Guerneville (Sonoma County).~~

~~(5) The Napa River (Napa County) between Trancas Avenue in Napa and Oakville Cross Bridge near Yountville.~~

~~Minimum Flow: 15 cfs at the gauging station at the Oak Knoll Bridge on the main stem Napa River.~~

~~(c) South Central Coast Streams — Special Low-Flow Closures: During December 1 through March 7, the following streams (subsections (c)(1) through (5)) will be closed to fishing when the department determines that stream flows are inadequate to provide fish passage for migrating steelhead trout and salmon. Closed streams will be reopened when the department determines flows are adequate for fish passage.~~

~~(1) Pescadero Creek and all anadromous reaches of San Mateo Co. coastal streams normally open for fishing, from Elliot Creek through Milagro Creek, shall be closed to all fishing when the department determines that the Pescadero Creek flows are impeding fish passage. (U. S. G. S. gauging station is on Pescadero Creek.)~~

~~(2) Aptos and Sequel Creeks (Santa Cruz Co.) shall be closed to all fishing when the department determines that the Sequel Creek flows are impeding fish passage. (U. S. G. S. gauging station on Sequel Creek.)~~

~~(3) The Pajaro River and Uvas, Llagas, and Corralitos Creeks (Santa Cruz, Monterey, & Santa Clara Cos.) shall be closed to all fishing when the department determines that the Pajaro River flows are impeding fish passage. (U. S. G. S. gauging station on the lower Pajaro River.)~~

~~(4) The main stem of the Salinas River (Monterey Co.), below its confluence with the Arroyo Seco River, shall be closed to all fishing when the department determines that the flows are impeding fish passage (U. S. G. S. Spreckels gauging station on the Salinas River.)~~

~~(5) The Arroyo Seco River (Monterey Co.) shall be closed to all fishing when the department determines that the flows are impeding fish passage. (Flows to be evaluated at U. S. G. S. Spreckels gauging station on the Salinas River and the U. S. G. S. gauging station near Geenfield on the Arroyo Seco River.)~~

~~(6) The San Lorenzo River and all its tributaries, as well as all anadromous reaches of coastal streams normally open for fishing in Santa Cruz Co. from the San~~

~~Lorenzo River north through Waddell Creek, shall be closed to all fishing when the department determines that the flow at the U.S.G.S. gauging station (#11160500) in the San Lorenzo River at Big Trees is less than 40 cfs.~~

~~(7) The Carmel River main stem, and the adjacent waters of San Jose, Gibson, Malpaso, and Soberanes Creeks that are west of Highway 1 (Monterey Co.), shall be closed to all fishing when the department determines that the flow at the U. S. G. S. gauging station near Carmel is less than 80 cfs.~~

~~(8) The Big Sur River main stem west of the Highway 1 bridge, all of Limekiln Creek and its tributaries, and the anadromous portions of all other Big Sur Coast streams west of Highway 1 in Monterey Co., from Granite Creek south to Salmon Creek, shall be closed to all fishing when the department determines that the flow at the U. S. G. S. gauging station on the Big Sur River is less than 40 cfs.~~

~~(9) The stream flow gauges referred to above in subsections (c)(6) through (8) will be checked on Tuesday and Friday of each week. The decision as to whether these rivers will be open or closed to fishing will take place only on Tuesday and Friday of each week. In the event that river flow differs later in the week, the fishing status for each specific river will not change until the day following the next scheduled reading.~~

~~(10) It shall be the responsibility of the angler to use the webpage designated in the sport fishing regulations booklet to obtain information on the status of any of the rivers or creeks listed above in subsections (c)(1) through (8).~~

~~Check the Department's regulations page at www.wildlife.ca.gov/regulations for Low-Flow Restrictions and information.~~

(a) Special low-flow conditions that determine stream closures for designated reaches in Del Norte, Humboldt, Mendocino, Sonoma, Napa, and Marin counties from September 1 through April 30 (also see Section 7.40(b) Alphabetical List of Hatchery Trout, Hatchery Steelhead, and Salmon Waters with Special Fishing Regulations):

(1) Streams may be closed if the flow at any of the designated gauging stations in subsections (a)(4) through (13) is inadequate to provide fish passage for migrating steelhead trout and salmon, as defined by the minimum flows set forth.

(2) It shall be the responsibility of the angler to use the department's low-flow fishing regulations website at <https://wildlife.ca.gov/Fishing/Inland/Low-Flow> to determine whether any stream in subsections (a)(4) through (13) will be open to fishing. The website will be updated no later than 1:00 p.m. each Monday, Wednesday, and Friday to determine stream closures on subsequent days, based on the following weekly schedule:

(A) If minimum flows are not met on Monday, the stream shall be closed the following Tuesday and/or Wednesday.

(B) If minimum flows are not met on Wednesday, the stream shall be closed the following Thursday and/or Friday.

(C) If minimum flows are not met on Friday, the stream shall be closed the following Saturday, Sunday, and/or Monday.

(3) Notwithstanding subsections (a)(1) through (2), the department may close or keep a stream reach closed to fishing even when the flow exceeds the minimum level on the scheduled flow determination day if the department is reasonably assured that the stream flow will fall below the minimum level on any day before the next flow determination day. The department may also reopen a stream at any time during a closed period if the flow exceeds the minimum level and the department is reasonably assured that it will remain above the minimum level until the next flow determination day.

(4) Smith River:

(A) The main stem Smith River from the confluence with Rowdy Creek to the confluence with the Middle Fork and South Fork. Minimum flow: 600 cfs at the USGS gauging station 11532500 on the Smith River near Crescent City, CA.

(B) The Middle Fork Smith River from the mouth to the confluence with Patrick Creek. Minimum flow: 600 cfs at the USGS gauging station 11532500 on the Smith River near Crescent City, CA.

(C) The South Fork Smith River from the mouth upstream approximately 1000 feet to the George Tryon Bridge and from the confluence with Craigs Creek to the confluence with Jones Creek. Minimum flow: 600 cfs at the USGS gauging station 11532500 on the Smith River near Crescent City, CA.

(D) The North Fork Smith River from the mouth to the confluence with Stony Creek. Minimum flow: 600 cfs at the USGS gauging station 11532500 on the Smith River near Crescent City, CA.

(5) Redwood Creek: The main stem Redwood Creek from the mouth to the confluence with Bond Creek. Minimum flow: 300 cfs at the USGS gauging station 11482500 on Redwood Creek at Orick, CA.

(6) Mad River: The main stem Mad River from the Hammond Trail Railroad Trestle to the confluence with Cowan Creek. Minimum flow: 200 cfs at the USGS gauging station 11481000 on the Mad River near Arcata, CA.

(7) Eel River:

(A) The mouth of the Eel River to the Cock Robin Island Bridge. Minimum flow: 350 cfs at the USGS gauging station 11477000 on the Eel River at

Scotia, CA. Exceptions to subsection 8.00(a)(7)(A), the mouth of the Eel River to the Cock Robin Island Bridge:

1. Legal fishing methods other than hook and line angling are permitted under all flows.

2. Hook and line angling from shore for non-salmonids is permitted under all flows.

(B) Main stem Eel River: The main stem Eel River from the Cock Robin Island Bridge to the confluence with the South Fork Eel River. Minimum flow: 350 cfs at the USGS gauging station 11477000 on the Eel River at Scotia, CA.

(C) South Fork Eel River: The South Fork Eel River from the mouth to the confluence with Rattlesnake Creek. Minimum flow: 340 cfs at the USGS gauging station 11476500 on the South Fork Eel River near Miranda, CA.

(D) Middle Fork Eel River: The Middle Fork Eel River from the mouth to the confluence with Bar Creek. Minimum flow: 340 cfs at the USGS gauging station 11476500 on the South Fork Eel River near Miranda, CA.

(8) Van Duzen River: The main stem Van Duzen River from the confluence with the main stem Eel River upstream to the end of Golden Gate Drive near Bridgeville (approximately 4,000 feet upstream from the Little Golden Gate Bridge). Minimum flow: 150 cfs at the USGS gauging station 11478500 on the Van Duzen River near Bridgeville, CA.

(9) Mattole River: The main stem Mattole River from 200 yards upstream of the mouth to the confluence with Honeydew Creek. Minimum flow: 320 cfs at the USGS gauging station 11469000 on the Mattole River near Petrolia, CA.

(10) All rivers, creeks, and streams that flow directly into the Pacific Ocean (and its bays), in Mendocino County, except for the Russian and Gualala rivers. This excludes sections and reaches above fish migration barriers. Minimum flow: 200 cfs at the USGS gauging station 11468000 on the Navarro River near Navarro, CA.

(A) Albion River: Main stem below the confluence with the South Fork Albion River.

(B) Alder Creek: Main stem below Tramway Gulch.

(C) Big River: Main stem below the confluence with Two Log Creek.

(D) Brush Creek: Main stem below the Lawson Bridge.

(E) Cottaneva Creek: Main stem below the confluence with South Fork Cottaneva Creek.

(F) Elk Creek: Main stem below the confluence with South Fork Elk Creek.

(G) Garcia River: Main stem below the Eureka Hill Road bridge.

(H) Greenwood Creek: Main stem below the log bridge about 1-½ miles east of Highway 1.

(I) Navarro River: Main stem below the Greenwood Road bridge.

(J) Noyo River: Main stem below Camp Noyo.

(K) Ten Mile River: Main stem below the confluence with the North Fork Ten Mile River, and the North Fork Ten Mile River below the confluence with Bald Hill Creek.

(L) Usal Creek: Main stem below Usal Road.

(11) All rivers, creeks, and streams that flow directly into the Pacific Ocean (and its bays), in Sonoma and Marin counties, except for the Russian River. This excludes sections and reaches above fish migration barriers. Minimum flow: 150 cfs at the USGS gauging station 11467510 on the South Fork Gualala River near Sea Ranch, CA.

(A) Gualala River: Main stem below the confluence with Wheatfield Fork and South Fork.

(B) Russian Gulch: Main stem below the confluence with the East Branch.

(C) Salmon Creek: Main stem below Highway 1.

(D) Walker Creek: Main stem below Highway 1.

(12) Russian River: The main stem Russian River below the confluence with the East Branch Russian River. Minimum flow: 300 cfs at the USGS gauging station 11467000 on the Russian River at Hacienda Bridge near Guerneville, CA.

(13) Napa River: The Napa River from the Oakville Cross Road bridge near Yountville to the Trancas Street bridge in Napa. Minimum flow: 15 cfs at the USGS gauging station 11458000 on the Napa River near Napa, CA.

(b) Special low-flow conditions that determine stream closures for designated reaches in San Mateo, Santa Clara, Santa Cruz, and Monterey counties from December 1 through March 7 (also see Section 7.40(b) Alphabetical List of Hatchery Trout, Hatchery Steelhead, and Salmon Waters with Special Fishing Regulations):

(1) Streams may be closed if the flow at any of the designated gauging stations in subsections (b)(4) through (10) is inadequate to provide fish passage for migrating steelhead trout and salmon, as defined by the minimum flows set forth.

(2) It shall be the responsibility of the angler to use the department's low-flow fishing regulations website at <https://wildlife.ca.gov/Fishing/Inland/Low-Flow> to determine whether any stream in subsections (b)(4) through (10) will be closed to fishing. The website will be updated no later than 1:00 p.m. each Tuesday and Friday to determine stream closures on subsequent days, based on the following weekly schedule. Note fishing is only legally allowed on Wednesday, Saturday, Sunday, legal holidays, and opening and closing days for the streams listed in subsections (b)(4) through (10).

(A) If minimum flows are not met on Tuesday, the stream shall be closed the following Wednesday.

(B) If minimum flows are not met on Friday, the stream shall be closed the following Saturday and/or Sunday.

(3) Notwithstanding subsections (b)(1) through (2), the department may close or keep a stream reach closed to fishing even when the flow exceeds the minimum level on the scheduled flow determination day if the department is reasonably assured that the stream flow will fall below the minimum level on any day before the next flow determination day. The department may also reopen a stream at any time during a closed period if the flow exceeds the minimum level and the department is reasonably assured that it will remain above the minimum level until the next flow determination day.

(4) Pescadero Creek: Pescadero Creek and all anadromous reaches of San Mateo County coastal streams normally open for fishing, from Elliot Creek through Milagro Creek. Minimum flow: 8 cfs at the USGS gauging station 11162500 on Pescadero Creek near Pescadero, CA.

(A) Butano Creek: Butano Creek from the mouth to county bridge on Pescadero-Bean Hollow Road.

(B) Pescadero Creek: Pescadero Creek from the mouth to the Stage Road bridge at Pescadero.

(C) San Gregorio Creek: San Gregorio Creek from the mouth to the Stage Road bridge at San Gregorio.

(5) The San Lorenzo River and all its tributaries, as well as all anadromous reaches of coastal streams normally open for fishing in Santa Cruz County from the San Lorenzo River north through Waddell Creek. Minimum flow: 40 cfs at the USGS gauging station 11160500 on the San Lorenzo River at Big Trees, CA.

(A) San Lorenzo River: San Lorenzo River from the mouth to the Lomond Street bridge in the town of Boulder Creek.

(B) Scott Creek: Scott Creek from the mouth to the confluence with Big Creek.

(C) Waddell Creek: Waddell Creek from the mouth to the Highway 1 bridge.

(6) Soquel Creek: Soquel Creek from the mouth to the confluence with East and West branch. Minimum flow: 40 cfs at the USGS gauging station 11160500 on the San Lorenzo River at Big Trees, CA.

(7) Aptos Creek: Aptos Creek from the mouth to the first bridge on Aptos Creek Road. Minimum flow: 40 cfs at the USGS gauging station 11160500 on the San Lorenzo River at Big Trees, CA.

(8) The main stem Carmel River, and the adjacent waters of San Jose, Gibson, Malpaso, and Soberanes creeks that are west of Highway 1 in Monterey County. Minimum flow: 80 cfs at the USGS gauging station 11143250 on the Carmel River near Carmel, CA.

(A) Carmel River: Carmel River main stem below the bridge at Robles Del Rio/ Esquiline Roads (Rosie's Bridge).

(B) Gibson Creek: Gibson Creek from the mouth to the Highway 1 bridge.

(C) Malpaso Creek: Malpaso Creek from the mouth to the Highway 1 bridge.

(D) San Jose Creek: San Jose Creek from the mouth to the Highway 1 bridge.

(E) Soberanes Creek: Soberanes Creek from the mouth to the Highway 1 bridge.

(9) The main stem Big Sur River west of the Highway 1 bridge, and the anadromous portions of all other Big Sur Coast streams west of Highway 1 in Monterey County, from Granite Creek south to Salmon Creek, except for Limekiln Creek. Minimum flow: 40 cfs at the USGS gauging station 11143000 on the Big Sur River near Big Sur, CA.

(10) Limekiln Creek: All of Limekiln Creek and its tributaries. Minimum flow: 40 cfs at the USGS gauging station 11143000 on the Big Sur River near Big Sur, CA.

Authority cited: Sections 200, 205, 265 and 270, Fish and Game Code. Reference: Sections 200, 205 and 265, Fish and Game Code.

Section 8.10, Title 14, CCR, is amended to read:

§ 8.10. Youth Fishing Derby, Susan River (Lassen County).

The Susan River, from the second railroad tunnel (the westernmost) on the Biz Johnson Trail downstream to the Riverside Bridge in the City of Susanville, is open to fishing on the Saturday preceding the trout season opener on ~~the Saturday preceding Memorial Day~~ last Saturday in April, only to persons under 16 years of age who are registered for the fishing derby sponsored by the Lassen County Sportsmen's Club. See Section 7.50(b)(149) for fishing regulations for the Susan River.

Authority cited: Sections 200, 205, 265, 270, 275 and 315, Fish and Game Code.

Reference: Sections 110, 200, 205 and 215, Fish and Game Code.

Section 28.25, Title 14 CCR, is amended to read:

§ 28.25. Barracuda, California.

Minimum size: Twenty-eight inches total length ~~or seventeen inches alternate length.~~

Authority cited: Sections 200, 205, 219, 265 and 275, Fish and Game Code.

Reference: Sections 200, 205, 255, 265, 270 and 275, Fish and Game Code.

Section 28.30, Title 14 CCR, is amended to read:

§28.30. Kelp Bass, Barred Sand Bass and Spotted Sand Bass.

- (a) Minimum size: Fourteen inches total ~~length or ten inches alternate length~~.
- (b) Limit: Five in any combination of species, except as provided in subsection (c).
- (c) Barred Sand Bass Limit: Notwithstanding subsection (b), a maximum of 4 barred sand bass may be taken or possessed.
- (d) Sunset Provision: Subsection (c) shall remain in effect until June 1, 2028, and as of that date is repealed.

Authority cited: Sections 200, 205, 219, 265 and 275, Fish and Game Code.

Reference: Sections 110, 200, 205, 219, 255, 265, 270 and 275, Fish and Game Code.

Section 28.32, Title 14 CCR, is amended to read:

§ 28.32. Pacific Bonito.

(a) Limit: Ten.

(b) Minimum size: Twenty-four inches fork length ~~or five pounds~~ except that:

Five fish less than twenty-four inches fork length ~~or weighing less than five pounds~~ may be taken and possessed.

~~(c) The provisions of this section shall only remain operative if the provisions of Section 8377 of the Fish and Game Code, pertaining to the commercial take of Pacific bonito, become operative on March 1, 1982 and remain operative.~~

Authority cited: Sections 200, 205, 219, 265 and 275, Fish and Game Code.

Reference: Sections 200, 205, 255, 265, 270 and 275, Fish and Game Code.

Section 28.35, Title 14 CCR, is amended to read:

§ 28.35. White Seabass.

(a) Minimum size: Twenty-eight inches total length ~~or twenty and one half inches alternate length.~~

(b) Season: Open all year.

(c) Limit: Three, except that only one fish may be taken in waters south of Pt. Conception between March 15 and June 15.

Authority cited: Sections 200, 255 and 265, Fish and Game Code.

Reference: Sections 200, 205, 255 and 265, Fish and Game Code.

Section 230 Subsection (g)(2) of, Title 14, CCR, is amended to read:

§ 230. Issuance of Permits for Contests Offering Prize for the Taking of Game Fish.

[...No changes to subsections (a) through (f)...]

(g) Permit Adjustments.

(1) The department will evaluate requests for adjustments to approved permits if such requests are received by the issuing regional office at least 30 days prior to the contest date. The department will accept or deny requests based on whether the date and water combination requested is available, whether the change violates any special conditions, and whether the change would be detrimental to the resource.

(2) Permittees may submit up to three ~~changes~~change requests, whether approved or denied, to the approved permit. Any additional change requests will require the submittal of a new application and fee payment.

[...No changes to subsections (h) through (o)...]

Authority cited: Sections 200, 205, 265, 713, 1050 and 2003, Fish and Game Code.

Reference: Sections 37, 67, 711, 713, 1050 and 2003, Fish and Game Code.

Section 701, Title 14, CCR, is amended to read:

§ 701. Sport Fishing Forms and Fees.

<i>Subsection</i>	<i>Application Type</i>	<i>Permit Fees (US\$)</i>	<i>Replacement Processing Fees (US\$)</i>
(a)	Declaration for Multi-Day Fishing Trip (FG 935 (Rev. 2/13)), incorporated by reference herein	5.75

ECONOMIC IMPACT STATEMENT

DEPARTMENT NAME California Fish and Game Commission	CONTACT PERSON David Thesell	EMAIL ADDRESS fgc@fgc.ca.gov	TELEPHONE NUMBER 916 902-9291
DESCRIPTIVE TITLE FROM NOTICE REGISTER OR FORM 400 Amend sec. 1.62 . . . 701, T.14, CCR Re: Sport Fishing Regs Update 2026			NOTICE FILE NUMBER Z

A. ESTIMATED PRIVATE SECTOR COST IMPACTS *Include calculations and assumptions in the rulemaking record.*

1. Check the appropriate box(es) below to indicate whether this regulation:

- | | |
|--|---|
| <input type="checkbox"/> a. Impacts business and/or employees | <input checked="" type="checkbox"/> e. Imposes reporting requirements |
| <input type="checkbox"/> b. Impacts small businesses | <input type="checkbox"/> f. Imposes prescriptive instead of performance |
| <input type="checkbox"/> c. Impacts jobs or occupations | <input checked="" type="checkbox"/> g. Impacts individuals |
| <input type="checkbox"/> d. Impacts California competitiveness | <input type="checkbox"/> h. None of the above (Explain below): |

*If any box in Items 1 a through g is checked, complete this Economic Impact Statement.
If box in Item 1.h. is checked, complete the Fiscal Impact Statement as appropriate.*

2. The California Fish and Game Commission estimates that the economic impact of this regulation (which includes the fiscal impact) is:
(Agency/Department)

- Below \$10 million
 Between \$10 and \$25 million
 Between \$25 and \$50 million
 Over \$50 million *[If the economic impact is over \$50 million, agencies are required to submit a [Standardized Regulatory Impact Assessment](#) as specified in Government Code Section 11346.3(c)]*

3. Enter the total number of businesses impacted: 0

Describe the types of businesses (Include nonprofits): N/A regulation only affects individual recreational fishing license holders.

Enter the number or percentage of total businesses impacted that are small businesses: 0

4. Enter the number of businesses that will be created: 0 eliminated: 0

Explain: Proposed changes clarify existing fishing regs without significant adverse changes to angling opportunities.

5. Indicate the geographic extent of impacts: Statewide
 Local or regional (List areas): _____

6. Enter the number of jobs created: 0 and eliminated: 0

Describe the types of jobs or occupations impacted: N/A. The proposed changes clarify existing fishing regulations and introduce a non-reporting fee for steelhead report cards that only affects individual anglers. No direct impact to businesses or jobs.

7. Will the regulation affect the ability of California businesses to compete with other states by making it more costly to produce goods or services here? YES NO

If YES, explain briefly: _____

ECONOMIC IMPACT STATEMENT (CONTINUED)

B. ESTIMATED COSTS *Include calculations and assumptions in the rulemaking record.*

1. What are the total statewide dollar costs that businesses and individuals may incur to comply with this regulation over its lifetime? \$ 348,000 annually
- a. Initial costs for a small business: \$ 0 Annual ongoing costs: \$ 0 Years: 1
- b. Initial costs for a typical business: \$ 0 Annual ongoing costs: \$ 0 Years: 1
- c. Initial costs for an individual: \$ 20 Annual ongoing costs: \$ 20 Years: 1
- d. Describe other economic costs that may occur: The cost to individuals is for a non-reporting fee for steelhead report cards. The fee can be avoided entirely if anglers return the cards to the Department.
2. If multiple industries are impacted, enter the share of total costs for each industry: N/A affects individual recreational fishing license holders.
3. If the regulation imposes reporting requirements, enter the annual costs a typical business may incur to comply with these requirements. *Include the dollar costs to do programming, record keeping, reporting, and other paperwork, whether or not the paperwork must be submitted.* \$ 20
4. Will this regulation directly impact housing costs? YES NO
If YES, enter the annual dollar cost per housing unit: \$ _____
Number of units: _____
5. Are there comparable Federal regulations? YES NO
- Explain the need for State regulation given the existence or absence of Federal regulations: Statute provides the California Fish and Game Commission the authority to establish sport fishing regulations (FGC sec. 200, 205).
- Enter any additional costs to businesses and/or individuals that may be due to State - Federal differences: \$ 0

C. ESTIMATED BENEFITS *Estimation of the dollar value of benefits is not specifically required by rulemaking law, but encouraged.*

1. Briefly summarize the benefits of the regulation, which may include among others, the health and welfare of California residents, worker safety and the State's environment: Benefits to maintaining the state's sport fisheries are mostly non-monetary. Preserves angling opportunities while improving data collection with regards to steelhead via the proposed non-reporting fee, which will ideally improve angler reporting and help the Department better manage the fishery.
2. Are the benefits the result of: specific statutory requirements, or goals developed by the agency based on broad statutory authority?
Explain: Statute provides Fish & Game Commission the authority to establish sport fishing regulations (FGC sec. 200, 205).
3. What are the total statewide benefits from this regulation over its lifetime? \$ Unknown
4. Briefly describe any expansion of businesses currently doing business within the State of California that would result from this regulation: None. These regulations reflect the annual changes to California's sport fishing regulations and do not induce a significant enough economic impact that would cause businesses to expand their operations in the short-term.

D. ALTERNATIVES TO THE REGULATION *Include calculations and assumptions in the rulemaking record. Estimation of the dollar value of benefits is not specifically required by rulemaking law, but encouraged.*

1. List alternatives considered and describe them below. If no alternatives were considered, explain why not: No alternatives were identified by or brought to the attention of Commission staff that would have the same desired regulatory effect. Thus, none were considered.

ECONOMIC IMPACT STATEMENT (CONTINUED)

2. Summarize the total statewide costs and benefits from this regulation and each alternative considered:

Regulation: Benefit: \$ Unknown Cost: \$ 348,000
Alternative 1: Benefit: \$ N/A Cost: \$ N/A
Alternative 2: Benefit: \$ N/A Cost: \$ N/A

3. Briefly discuss any quantification issues that are relevant to a comparison of estimated costs and benefits for this regulation or alternatives: Biological and ecological factors beyond the Department's control make it difficult to accurately quantify monetary costs and benefits for the annual adjustments to the state's sport fishing regulations.

4. Rulemaking law requires agencies to consider performance standards as an alternative, if a regulation mandates the use of specific technologies or equipment, or prescribes specific actions or procedures. Were performance standards considered to lower compliance costs? YES NO

Explain: Performance standards are not applicable and thus were not considered.

E. MAJOR REGULATIONS *Include calculations and assumptions in the rulemaking record.*

California Environmental Protection Agency (Cal/EPA) boards, offices and departments are required to submit the following (per Health and Safety Code section 57005). Otherwise, skip to E4.

1. Will the estimated costs of this regulation to California business enterprises exceed \$10 million? YES NO

***If YES, complete E2. and E3
If NO, skip to E4***

2. Briefly describe each alternative, or combination of alternatives, for which a cost-effectiveness analysis was performed:

Alternative 1: _____

Alternative 2: _____

(Attach additional pages for other alternatives)

3. For the regulation, and each alternative just described, enter the estimated total cost and overall cost-effectiveness ratio:

Regulation: Total Cost \$ _____ Cost-effectiveness ratio: \$ _____

Alternative 1: Total Cost \$ _____ Cost-effectiveness ratio: \$ _____

Alternative 2: Total Cost \$ _____ Cost-effectiveness ratio: \$ _____

4. Will the regulation subject to OAL review have an estimated economic impact to business enterprises and individuals located in or doing business in California exceeding \$50 million in any 12-month period between the date the major regulation is estimated to be filed with the Secretary of State through 12 months after the major regulation is estimated to be fully implemented?

YES NO

If YES, agencies are required to submit a Standardized Regulatory Impact Assessment (SRIA) as specified in Government Code Section 11346.3(c) and to include the SRIA in the Initial Statement of Reasons.

5. Briefly describe the following:

The increase or decrease of investment in the State: None.

The incentive for innovation in products, materials or processes: None.

The benefits of the regulations, including, but not limited to, benefits to the health, safety, and welfare of California residents, worker safety, and the state's environment and quality of life, among any other benefits identified by the agency: The objectives of this

policy include, but are not limited to, the maintenance of sufficient populations of all species of aquatic organisms to ensure their continued existence, and the maintenance of a sufficient resource to support a reasonable sport use.

FISCAL IMPACT STATEMENT

A. FISCAL EFFECT ON LOCAL GOVERNMENT *Indicate appropriate boxes 1 through 6 and attach calculations and assumptions of fiscal impact for the current year and two subsequent Fiscal Years.*

1. Additional expenditures in the current State Fiscal Year which are reimbursable by the State. (Approximate)
(Pursuant to Section 6 of Article XIII B of the California Constitution and Sections 17500 et seq. of the Government Code).

\$ _____

- a. Funding provided in _____
Budget Act of _____ or Chapter _____, Statutes of _____

- b. Funding will be requested in the Governor's Budget Act of _____
Fiscal Year: _____

2. Additional expenditures in the current State Fiscal Year which are NOT reimbursable by the State. (Approximate)
(Pursuant to Section 6 of Article XIII B of the California Constitution and Sections 17500 et seq. of the Government Code).

\$ _____

Check reason(s) this regulation is not reimbursable and provide the appropriate information:

- a. Implements the Federal mandate contained in _____

- b. Implements the court mandate set forth by the _____ Court.

Case of: _____ vs. _____

- c. Implements a mandate of the people of this State expressed in their approval of Proposition No. _____

Date of Election: _____

- d. Issued only in response to a specific request from affected local entity(s).

Local entity(s) affected: _____

- e. Will be fully financed from the fees, revenue, etc. from: _____

Authorized by Section: _____ of the _____ Code;

- f. Provides for savings to each affected unit of local government which will, at a minimum, offset any additional costs to each;

- g. Creates, eliminates, or changes the penalty for a new crime or infraction contained in _____

3. Annual Savings. (approximate)

\$ _____

4. No additional costs or savings. This regulation makes only technical, non-substantive or clarifying changes to current law regulations.

5. No fiscal impact exists. This regulation does not affect any local entity or program.

6. Other. Explain This regulation does not affect any local entity or program, but there may be some gains to local tax revenue based on increased angler opportunity. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the CA Constitution.

FISCAL IMPACT STATEMENT (CONTINUED)

B. FISCAL EFFECT ON STATE GOVERNMENT *Indicate appropriate boxes 1 through 4 and attach calculations and assumptions of fiscal impact for the current year and two subsequent Fiscal Years.*

1. Additional expenditures in the current State Fiscal Year. (Approximate)

\$ _____

It is anticipated that State agencies will:

a. Absorb these additional costs within their existing budgets and resources.

b. Increase the currently authorized budget level for the _____ Fiscal Year

2. Savings in the current State Fiscal Year. (Approximate)

\$ _____

3. No fiscal impact exists. This regulation does not affect any State agency or program.

4. Other. Explain The Department anticipates that there will be some effects on steelhead report card sales and revenue due to the proposed non-reporting fee. See addendum.

C. FISCAL EFFECT ON FEDERAL FUNDING OF STATE PROGRAMS *Indicate appropriate boxes 1 through 4 and attach calculations and assumptions of fiscal impact for the current year and two subsequent Fiscal Years.*

1. Additional expenditures in the current State Fiscal Year. (Approximate)

\$ _____

2. Savings in the current State Fiscal Year. (Approximate)

\$ _____

3. No fiscal impact exists. This regulation does not affect any federally funded State agency or program.

4. Other. Explain _____

FISCAL OFFICER SIGNATURE

DATE

The signature attests that the agency has completed the STD. 399 according to the instructions in SAM sections 6601-6616, and understands the impacts of the proposed rulemaking. State boards, offices, or departments not under an Agency Secretary must have the form signed by the highest ranking official in the organization.

AGENCY SECRETARY

DATE

STD. 399 Addendum

Amend Sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88, 6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701 Title 14, California Code of Regulations

Re: Sport Fishing Regulations Update 2026

This regulatory proposal combines California Department of Fish and Wildlife (Department) and public requests for changes to Title 14, California Code of Regulations (CCR) sections 1.62, 1.73, 1.74, 2.10, 2.11, 4.20, 5.00, 5.65, 5.85, 5.88, 6.34, 6.35, 7.00, 7.40, 7.50, 8.00, 8.10, 28.25, 28.30, 28.32, 28.35, 230, and 701, for the 2026 sport fishing regulatory cycle. This proposal contains multiple updates that are grouped by general topic, as follows:

- Perform regulation “clean-up” to clarify sport fishing regulations -
 - i.e. remove sections in conflict with other laws, correct definitions, re-organize and standardize regulations for fishing during low-flow periods in creeks and rivers, change name of a waterbody consistent with federal legislation, and grammar corrections;
- increase angler opportunities -
 - i.e. adjust fishing boundaries and allow for use of live bait to target striped bass and other non-native fish, remove minimum size requirements for black bass in Lassen and Modoc counties re-open waters to fishing that were previously closed or under other restrictions, lengthening fishing seasons, and allowing improved real-time adjustment in closures of waters by the Department during low-flow periods;
- change fishing gear, measurement, and sampling-
 - i.e. adjust hook and weight restrictions, change gear boundaries, define the method to determine total length of fin fish to improve consistency and enforcement, and amend biological sampling requirements for anglers or commercial fishermen to provide tissue sample from non-hatchery salmon upon request by Department staff;
- protect vulnerable fish populations -
 - i.e. modify fishing boundaries to protect Chinook salmon, add restrictions for certain anadromous and inland (trout) waters, adjust bag limit and gear requirements for trout, add quantitative low-flow criteria for coastal waters to protect steelhead; and
- Clarify and improve administration of the steelhead report card.

These proposed regulatory changes are needed to effectively manage California's sport fisheries, and correct errors and inaccuracies in the existing regulations to reduce public confusion and improve regulatory enforcement.

While the majority of these proposed regulation revisions do not impose any costs to businesses or individuals, the proposed change for steelhead report cards discussed under Title 14 CCR sections 1.74, 5.88, and 701 introduces a \$20 non-reporting fee that can be avoided if the cardholder returns the card to the Department.

Steelhead Report Card changes

The card reporting period would be changed from a 12-month calendar period to a 9-month seasonal period to better align with seasonal adult steelhead run timing, improve data management, and assess non-compliant reporting. This reporting period would run from August 1st through April 30th of the following year, with the requirement for the card to be returned or reported to the Department by May 31st. The card would be required for anglers targeting any steelhead or Rainbow Trout in anadromous waters during the 9-month season. Anglers would be able to obtain the subsequent season card starting July 15th to allow time for the Department to process the previous season's cards returned by May 31st. Any card holder who fails to return/report by the May 31st deadline shall be subject to a non-return fee and will not be able to obtain any subsequent season's card until that fee is paid. From May 1st through July 31st of each year, anglers would not need a card to fish for steelhead or Rainbow Trout in anadromous waters.

Economic Impact Statement

A. Estimated Private Sector Costs Impacts

Answer 1: e. Imposes Reporting Requirements, and g. Impacts Individuals:

The Fish and Game Commission (Commission) is not aware of any private sector cost impacts that a representative private person or business would necessarily incur in reasonable compliance with the majority of the proposed action. The proposed changes provide clarification of existing regulations that are necessary for the continued preservation of the resource, while providing inland sport fishing opportunities and thus, the prevention of adverse economic impacts. These changes are not anticipated to change the level of fishing activity enough to affect the demand for goods and services related to sportfishing enough to impact the demand for labor, nor induce the creation of new businesses, nor eliminate or induce the expansion of businesses in California.

However, the proposed non-reporting fee for steelhead report cards would introduce a \$20 fee to any card holder failing to return/report by the May 31st deadline. Any angler who doesn't pay the non-reporting fee after the deadline will not be able to obtain any subsequent season's card until that fee is paid. This fee can be entirely avoided if the

angler returns the card in compliance with the regulation, or if anglers choose to fish in anadromous waters from May 1st through July 31st of each year, as they would not need a card to fish for steelhead or Rainbow Trout during that period.

B. Estimated Costs

Question 1. What are the total statewide dollar costs that businesses and individuals may incur to comply with this regulation over its lifetime?

The proposed non-reporting fee for steelhead report cards introduces a \$20 fee to any card holder failing to return/report by the May 31st deadline. Any angler who doesn't pay the non-reporting fee after the deadline will not be able to obtain any subsequent season's card until that fee is paid. This fee can be entirely avoided if the angler returns the card in compliance with the regulation, or if anglers choose to fish in anadromous waters from May 1st through July 31st of each year, as they would not need a card to fish for steelhead or Rainbow Trout during that period.

Department staff estimate that currently 30-35% of anglers return their steelhead report card, with an average of approximately 43,500 cards sold over the last six years¹, for an average of 30,450 to 28,275 non-returned cards. The proposed 20\$ non-return fee would mean a maximum potential of \$609,000-\$565,500 would be accrued in fines. However, this does not take into account a likely increase in return rates or the fact that not everyone will pay the fine, as suggested by the exact same changes from the lobster report card, which had an approximate 16% return rate from 2008-2011 without a non-return fee and increased reporting to 39%-54% after a non-return fee was implemented in 2014.

If the steelhead report card increased reporting rates similarly by 20-30%, the Department would have a projected 50-65% return rate and could potentially see 21,750 to 13,050 unreturned cards with a maximum imposed cost potential of \$435,000 to \$261,000 in non-reporting fees (averaging to **\$348,000 annually**). Several unknown factors may impact report card sales decreasing or increasing, such as anglers choosing to not purchase a card if a fine exists (lobster report card sales slightly increased after implementation of a fine), anglers choosing not to pay fines and opting out of participation in the future, anglers purchasing a card to target Rainbow Trout in anadromous waters (previously it was only targeting the anadromous life history form steelhead), or anglers who only purchased a card to fish in summer months (May-July) not needing to purchase a card due to the proposed changes.

C. Estimated Benefits

¹ <https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=178047&inline>

Question 1. Briefly summarize the benefits of the regulation, which may include among others, the health and welfare of California residents, worker safety and the State's environment:

Under the proposed regulations, the Commission anticipates benefits to the environment in the sustainable management of inland fishery resources. It is the policy of this state to encourage the conservation, maintenance, and utilization of the living resources of waters under the jurisdiction and influence of the state for the benefit of all the citizens of the state. The objectives of this policy include, but are not limited to, the maintenance of sufficient populations of all species of aquatic organisms to ensure their continued existence, and the maintenance of a sufficient resource to support a reasonable sport use. Adoption of scientifically-based sport fish seasons, size limits, and bag and possession limits provides for the maintenance of sufficient populations sport fish to ensure their continued existence.

The benefits of the proposed regulations are consistent with the sustainable management of California's sport fisheries, general health and welfare of California residents, and promotion of businesses that rely on sport fishing throughout California.

Shifting the reporting months to mirror the 9-month seasonal run timing of steelhead allows the Department to process Cards more efficiently and have data readily available to inform management strategies for the steelhead fishery statewide. By shifting the reporting period to 9 months, the Department will have time between seasons to assess non-compliance and can implement penalties prior to the subsequent year's card issues, including fees and prohibitions for non-compliant cardholders. This change is expected to increase reporting, which will increase data quality.

Additionally, the Department wants to better clarify that the card is required when targeting Coastal Rainbow Trout, *Oncorhynchus mykiss* in anadromous waters. There is currently a loophole in the language that allows an angler to state they are not fishing for steelhead, only Rainbow Trout, which technically does not require a card. For improved enforcement, the language would be updated to include both terms and would require anglers to have a report card and fill it out when targeting either Rainbow Trout or steelhead in anadromous waters.

Additionally, shifting the reporting period to mirror the seasonal run timing of returning and spawning steelhead between August to April will increase the ability to more accurately analyze data and manage steelhead runs. Adult steelhead are generally not present in most anadromous waters from May through July, so there is not a need to collect angler data during these months. Anglers will still be able to fish for Rainbow Trout/steelhead during these months in waters open to angling, however a card will not be required. Anglers will also be able to continue to harvest a hatchery steelhead if caught during these months and not have to report on the Card.

Fiscal Impact Statement

B. Fiscal Effect on State Government

Answer 4. Other.

Department staff estimate that currently 30-35% of anglers return their steelhead report card, with an average of approximately 43,500 cards sold over the last six years², for an average of 30,450 to 28,275 non-returned cards. The proposed 20\$ non-return fee would mean a maximum potential of \$609,000-\$565,500 would be accrued in fines, representing additional revenue for the Department. However, this does not take into account a likely increase in return rates or the fact that not everyone will pay the fine, as suggested by the exact same changes from the lobster report card, which had an approximate 16% return rate from 2008-2011 without a non-return fee and increased reporting to 39%-54% from 2014 to 2025.³

If the steelhead report card increased reporting rates similarly by 20-30%, the Department would have a projected 50-65% return rate and could potentially see 21,750 to 13,050 unreturned cards with a maximum revenue potential of \$435,000 to \$261,000 in accrued fines (average of \$348,000). Unknown factors include report card sales decreasing or increasing depending on some of the language changes, anglers choosing to not purchase a card if a fine exists (lobster report card sales slightly increased after implementation of a fine), anglers may choose not to pay fines and opt to not participate in the future thus decreasing sales in future years, anglers may be required to purchase a card now that they are targeting Rainbow Trout (previously it was only targeting the anadromous life history form steelhead), or anglers who only purchased a card to fish in summer months (May-July) may not need to purchase a card moving forward. Report card sales have also decreased significantly in the last three years, which may be establishing a new trend or reflect poor fishing years with subsequent bounce back years.

C. Fiscal Effect on Federal Funding of State Programs

Answer 3. No fiscal impact exists. This regulation does not affect any federally funded State agency or program.

SPORT FISHING REGULATIONS

Recommended Changes for 2027

PRESENTATION TO THE FISH AND GAME COMMISSION

April 15-16, 2026 | Maggie McCann

Fisheries Branch

Recommended Regulation Changes for 2027

26 regulation updates:

- 8 clean-up
- 7 increase opportunity
- 5 protective
- 4 gear and measuring
- Low-flow
- Steelhead Report Card

Regulation Text Clean-Up

Non-substantive changes to improve clarity:

- Consistencies between sections and with federal legislation
- Name changes and updated boundary descriptions
- Reordering and renumbering
- Grammar

More information on each recommendation available in the meeting materials:

- “Abbreviated Summary of Sport Fishing Regulation Change Concept Proposals for the 2026 Sport Fish Rulemaking”

Increased Fishing Opportunities

- Expand bait fish use in the Sacramento River
- Allow bait use during summer months in anadromous streams in Shasta and Tehama counties
- Remove black bass minimum size limits in Lassen and Modoc counties

Increased Fishing Opportunities (Continued)

- Re-open lower Battle Creek June 30 to December 31
- Return Fall River Pond and Fall River Lake to default trout regulations
- Revert Susan River to traditional trout season and update youth derby section

Increase Fishing Opportunities: the Klamath

- Trout angling within the Klamath Dam Removal project area
- Allow catch and release fishing within anadromous sections of the mainstem Klamath River from the Copco Road bridge at Copco to Lakeview Road bridge near Iron Gate
 - Fourth Saturday in May through August 31
- Restrictions include:
 - Only artificial lures with barbless hooks may be used
 - Zero bag limit for wild and hatchery trout / steelhead
 - Closed to the take and possession of Chinook Salmon

Changes to Fishing Gear and Sampling

- Allow use of a max. ¼ ounce weight directly attached below a hook
- Allow use of non-buoyant lures with treble hooks in part of the American, Sacramento, Feather, and Yuba Rivers
- For new genetic sampling in fisheries surveys, require salmon anglers to provide a tissue sample upon request
- Change the boundary for gear restrictions a half-mile downstream on the Eel River

Clarify Fish Measurements

- Public confusion about how to determine finfish length
- Fanning and swinging the tail is allowed for salmon and halibut
- Recommend allowing this for any species, unless otherwise clarified in regs
- Change “fish, mollusks, or crustaceans” to “fish and invertebrates”
- Remove alternate length measurements

Protective Changes

- To protect experimentally reintroduced Chinook Salmon:
 - Close the North Fork Feather River above Chester Diversion Dam
 - Close the North Yuba River above New Bullards Bar Dam
- Add special regulation sections for Clear Creek, Cow Creek, Cottonwood Creek, and Paynes Creek
- Change Antelope Creek boundary to be more protective for Central Valley steelhead

Protective Changes (Continued)

- Arroyo Seco River: Change the trout bag limit from 5 trout to 5 Brown Trout and 0 Rainbow Trout and restrict to artificial lures with barbless hooks only
- Add Trout Creek into 7.50(b)(90) to provide angling regulation protections for McCloud River Redband Trout

Steelhead Report Card Changes

- Require for steelhead and Rainbow Trout in anadromous waters
- Reporting period: Change from a 12-month period to a 9-month period
 - Season: August 1 through April 30
 - Report due: May 31
 - Card sale starts July 15
- Failure to return will result in fee
 - Card holder will not be able to obtain the next season's Card until the fee is paid

Low-Flow Changes

- Rewrite, reorganize, and simplify the text
- Language and grammar clean-up
- Standardize the naming of stream gages and consistency in boundaries to better align the low-flow section with the relevant fishing regulations
- Allow for split-block decisions
- Add a quantitative low-flow criteria to Pescadero, Aptos, and Soquel Creeks

Proposed Timeline

- April 16, 2026 Commission Meeting – Request to go Notice
- June 18, 2026 Commission Meeting – Discussion hearing
- August 13, 2026 Commission Meeting – Adoption hearing
- January 1, 2027 – If approved, requested effective date

Abbreviated Summary of Sport Fishing Regulation Change Concept Proposals for the 2026 Sport Fish Rulemaking

Updated 12/10/25

Proposals Submitted after the September WRC indicated with asterisk and highlighted text.

Regulation Language Clean Up:

***Section 1.62, Minimum and Maximum Size:** Amend section 1.62 to better define the method to determine total length of finfish. The proposal would clarify that total length is measured with the fish's mouth closed, laying flat on a horizontal surface, and that the tail may be pinched, fanned, or naturally swung. The proposal changes the phrase "fish, mollusks or crustaceans" to "finfish or invertebrates." The change also clarifies that measurement of invertebrate species is specified within the individual invertebrate regulations. (Submitted 2025 winter)

***Section 2.11, Special Fishing Methods – Lake County:** Remove section. In 2014, Clear Lake Hitch were listed under CESA as threatened and can no longer be taken without a CESA incidental take permit or MOU. This language conflicts with the take prohibitions for CLH and needs to be removed from Title 14. (Submitted 2025 winter)

Section 5.65, Regulations relating to American Shad: Include spearfishing as a method of take allowable in the Valley District. This will make 5.65 consistent with Section 2.30, which was updated in the 2025 to allow spearfishing as a method of take for American Shad in the Valley District. (Submitted 2024)

Section 5.85(a)(2): add 7.00 (which lists general regulations in each District) to the list of sections excepted from general statewide trout regulations. (Submitted in 2024)

Section 6.34: correct the definition of "Southern District" to the as-intended definition from the sport fish booklet. (Submitted 2025)

Sections 7.40(b) and 8.00: reorganize, condense, and clean up the language in the low-flow regulations, standardize the identification of stream gauges, remove streams from 8.00 that lack low-flow criteria, align 8.00 with 7.40(b) and clarify boundaries in both sets of regulations where descriptions are unclear, and add detailed line references between 8.00 and 7.40(b). (submitted 2024 and 2025)

Section 7.50(b)(90): Clean up and reorganize, group streams with similar regulations. (Submitted 2025)

Section 7.50(b)(146): The name of Squaw Valley Creek was changed by federal legislation through the Department of Interior's Order 3404 on 9/8/2022 to Yét Atwam Creek. This update will make the regulation text consistent with this change. (Submitted 2024)

Section 230(g)(2): Minor grammar correction. (submitted 2024)

Changes To Increase Fishing Opportunities

Section 4.20(d): Bait Fish Use in the Sacramento River (Shasta and Tehama Co.): move the upper limit of the Sacramento River upstream from Highway 32 Bridge to Deschutes Bridge. Allowing live fin fish to be used further up the Sacramento River will increase fishing opportunities on striped bass and other non-native fishes that are currently limited to lures and other methods. (submitted 2024)

Section 5.00(b) (Lassen and Modoc Co.): remove black bass minimum size requirement from all waters, except for Mountain Meadows Reservoir. Bass have had slow growth rates and stunted sizes, and this will improve population size structures. (Submitted 2024)

Section 7.00(b)(2): Increase fishing opportunity by allowing the use of bait during summer months within anadromous streams (when anadromous fish are not present). (Submitted 2024)

Section 7.40(b)(11) (Battle Creek Shasta and Tehama cos.): re-open lower Battle Creek from 1,250 feet below Coleman Fish Hatchery weir to its confluence with the Sacramento June 30 to December 31, with the restriction "Only artificial lures with barbless hooks may be used." This change would provide recreational angling opportunity for native and non-native warmwater fish species and hatchery-origin trout and steelhead. (Submitted 2025)

***Section 7.40(b)(50)(2)(b) (Siskiyou Co.):** Increase fishing opportunity by allowing catch and release fishing within anadromous sections of the mainstem Klamath River from the Copco Road bridge at Copco to Lakeview Road bridge near Iron Gate (Siskiyou County). The open seasons would be a summer season from the fourth Saturday in May through August 31, with a restriction that only artificial lures with barbless hooks may be used. Additional restrictions include a zero bag limit for hatchery trout and steelhead as well as being closed to the take and possession of Chinook Salmon. This change would provide recreational angling opportunity for freshwater fish (*o.mykiss*) during the summer months within the Klamath Dam Removal project area. The proposed summer season regulations would provide consistency with currently open waters adjacent to and upstream of section 2(b). (Submitted 2025 winter)

Section 7.50(b)(47) Fall River Complex (Shasta and Siskiyou cos.). Remove (L) Fall River Pond and (M) Fall River Lake from 7.50(b)(47) Fall River Complex (Shasta and Siskiyou Cos.). Fall River Pond and Fall River Lake would default to T14 5.85(a)(1) statewide general trout regulations. (Submitted 2025)

Section 7.50(b)(149) Susan River (Lassen Co.) and Section 8.10 Susan River Youth Derby: Revert fishing regulations to the historic traditional trout opener (Last Saturday in April through Nov. 15). Update language to include a special open season for youths participating in the Youth Fishing Derby. This change will increase angler opportunity by lengthening the season in the spring and shortening the winter season. (Submitted 2024)

Section 8.00: For low-flow closures, allow the ability to make split block decisions instead of solid block decisions. This will allow for more streams to remain open. (Submitted 2025)

Gear-Related Changes

Section 2.10 subsections (b)3 and (b)4 Hook and Weight Restrictions: allow the usage of small lightweight weight directly attached below a hook and expansion of fishable waters with treble hooks on non-buoyant lures. (Submitted 2025)

Section 7.40(b)(40)(A)1-2, Eel River: Change gear restriction boundary line to align with more recognizable features for the boundary, resulting in a slight shift downstream, ~.5 miles. Not thought to be controversial. (Submitted 2024)

Protective Changes

Sections 6.35 and 7.00: To protect experimentally reintroduced Chinook fish, modify the Sierra district boundary in 6.35 to include a small section of Yuba County ("Yuba County east of New Bullards Bar Dam;"). Add two specific sections in 7.00(b), the North Fork Feather River (NFFR) above Chester Diversion Dam, and on the North Yuba River (NYR) above New Bullards Bar Dam, which will be closed to Chinook salmon fishing all year. (Submitted 2025)

Section 7.40(b): Add new special regulation sections for Clear Creek, Cow Creek, Cottonwood Creek, and Paynes Creek. Change Antelope Creek boundary to make angling more protective for Central Valley steelhead on this section. (Submitted 2024)

Section 7.50(b)(9): Arroyo Seco River (Monterey Co.): change the trout Bag Limit from 5 trout to 5 Brown Trout and 0 Rainbow Trout. Add a gear restriction of "only artificial lures with barbless hooks may be used". These measures would protect the native Coastal Rainbow Trout threatened by drought and degraded habitat conditions and as a result, would support steelhead population viability in the Salinas River watershed. (Submitted 2024)

Section 7.50(b)(90): Add Trout Creek into to provide angling regulation protections for McCloud River Redband Trout (MRRT), consistent with other streams in the MRRT Refugium. Trout Creek is currently the focus for other restoration opportunities and CDFW is developing plans with the USFS for meadow restoration, cattle exclusion fencing, and methods to remove non-native fish (dewatering) and repopulate with

genetically distinct MRRT, reclaiming all of Trout Creek for MRRT as the long-term conservation goal. California Trout submitted a letter in support of this change. (Submitted 2025)

Section 8.00: to add a quantitative low-flow criteria to Pescadero Creek and Aptos and Soquel Creeks that will reduce fishing opportunity on days when flows fall below determined thresholds. These new low-flow closures on Pescadero Creek and Aptos and Soquel Creeks will protect steelhead when they are most vulnerable. (Submitted 2025)

Other

Section 1.73, subsections (a) and (b): To accommodate the genetic sampling requirements of Parentage-Based Tagging (PBT) in fisheries surveys, amend biological sample collection requirements for commercial and recreational salmon fisheries to include the additional requirement of all persons fishing for salmon to provide a tissue sample from unmarked (i.e., adipose fin present) salmon upon request by an authorized agent or employee of the Department. (submitted 2025)

Steelhead Report Card Changes

Section 1.74, 5.88, and 701 relating to the Steelhead report card: To better align with seasonal adult steelhead run timing, improve data management, and assess non-compliant reporting, the Card reporting period would be changed from a 12-month calendar period to a 9-month seasonal period. The new Card reporting period would be August 1st through April 30th the following year and required to be returned or reported to the Department by May 31st. The Card would be required for anglers targeting any steelhead or Rainbow Trout in anadromous waters during the 9-month season. Anglers would be able to obtain the subsequent season Card starting July 15th to allow time for the Department to process the previous season's Cards returned by May 31st. Any Card holder who fails to return/report by the May 31st deadline shall be subject to a non-return fee and will not be able to obtain any subsequent season's Card until that fee is paid. From May 1st through July 31st of each year, anglers would not need a Card to fish for steelhead or Rainbow Trout in anadromous waters. (Submitted 2025)

These changes are necessary because:

- Current lack of data collection and inability to analyze data in a timely fashion. Shifting the reporting months to mirror the 9-month seasonal run timing of steelhead allows the Department to process Cards more efficiently and have data readily available to inform management strategies for the steelhead fishery statewide.

- Inability to enforce regulations and poor clarity in current regulations.

By shifting the reporting period to 9 months, the Department will have time between seasons to assess non-compliance and can implement penalties prior to the subsequent year's Card issues, including fees and prohibitions for non-compliant cardholders. This change is expected to increase reporting, which will increase data quality.

Additionally, the Department wants to better clarify that the Card is required when targeting Coastal Rainbow Trout, *Oncorhynchus mykiss* in anadromous waters. There is currently a loophole in the language that allows an angler to state they are not fishing for steelhead, only Rainbow Trout, which technically does not require a Card. For improved enforcement, the language would be updated to include both terms and would require anglers to have a report card and fill it out when targeting either Rainbow Trout or steelhead in anadromous waters.

- Increased data accuracy.

Shifting the reporting period to mirror the seasonal run timing of returning and spawning steelhead between August to April will increase the ability to more accurately analyze data and manage steelhead runs. Adult steelhead are generally not present in most anadromous waters from May through July, so there is not a need to collect angler data during these months. Anglers will still be able to fish for Rainbow Trout/steelhead during these months in waters open to angling, however a Card will not be required. Anglers will also be able to continue to harvest a hatchery steelhead if caught during these months and not have to report on the Card.

- Cost and time saving.

The low return rates result in poor data collection causes pressure on Department staff to validate the Card data, which can create fiscal impacts for additional staff time and monitoring programs. Implementation of a non-return fee and a seasonal report card has demonstrated significant increases in reporting from other report card programs and would reduce the effort and cost to validate steelhead Card data caused by low returns.

**MODOC COUNTY
BOARD OF SUPERVISORS**

ESTABLISHED IN 1874

204 S. COURT STREET
ALTURAS, CALIFORNIA 96101

PHONE: (530) 233-6201

December 10, 2024

California Fish and Game Commission
P.O. Box 944209
Sacramento, CA 94244-2090

To Whom This May Concern:

The Modoc County Board of Supervisors along with the Modoc County Fish, Game and Recreation Commission are in support of the California Department of Fish and Wildlife's proposal to change the following fishing regulations:

- 1) Lassen and Modoc Counties Black Bass Size Restriction
Change: Remove the minimum size requirement from all waters within Lassen and Modoc counties, with the exception of Mountain Meadows Reservoir in Lassen County, where the minimum size would remain twelve (12) inches.

Bass in most reservoirs within the county appear to have slow growth rates and stunted bass populations that seldom attain the minimum twelve (12) inch size limit. Having no size limit could increase the harvest of smaller bass and can increase the overall bass size within the reservoirs over time. This change will give anglers more opportunities to harvest bass where increased harvest is needed.

RE: Support for Proposed Regulation Changes to Battle Creek, Trout Creek, and Fall River Lake and Pond

Dear Commissioners,

On behalf of California Trout (CalTrout), I am writing in support of the proposed regulation changes to lower Battle Creek, Trout Creek (a tributary to the Upper McCloud River), and Fall River Lake and Pond.

Battle Creek: We support reopening lower Battle Creek from June 30 to December 31 for fishing with artificial lures and barbless hooks. This reach provides a valuable shore-based steelhead fishing opportunity while avoiding peak migration windows for listed Chinook salmon. The proposed regulation maintains protection for natural-origin fish and supports sustainable harvest of hatchery-origin steelhead, consistent with mitigation goals. Reopening this fishery could also provide modest control of non-native predatory fish such as Striped and Black Bass, with potential ecosystem benefits.

Trout Creek: We support updating regulations to include Trout Creek in section 7.50(b)(90), adopting catch and release-only regulations. Trout Creek supports a genetically distinct population of McCloud River Redband Trout and is a high-priority conservation stream. CDFW's efforts to secure and improve upstream barriers, paired with habitat restoration and regulatory protections, offer a promising path to recover this important native trout population. Regulation consistency with Swamp Creek and other MRRT streams in the Refugium is ecologically justified and necessary.

Fall River Lake and Pond: We support removing Fall River Lake and Pond from the Wild Trout designation and from section 7.50(b)(47). These waters were not part of the scientific justification for the Fall River Complex's wild trout designation and have historically been managed as stocked, put-and-take fisheries. Returning to general regulations and resuming stocking will restore angling opportunity, particularly for bait anglers and youth,

California Trout

435 Pacific Ave. Suite 200, San Francisco, CA 94133, (415) 392-8887 | www.caltrout.org

and respond to sustained community feedback, while leaving the core wild trout waters of the Fall River system protected.

Together, these proposals reflect a thoughtful approach to fishery management that balances native fish conservation with expanded angling opportunity. CalTrout appreciates the opportunity to provide input and strongly urges the Commission to adopt these proposed changes.

Sincerely,

A handwritten signature in black ink, appearing to read "Damon Goodman". The signature is written in a cursive style with a large, stylized "D" and "G".

Andrew Harris
President, Shasta-Trinity-Cascades Trout Unlimited
P.O. Box 992581, Redding, CA 96099
pres@stc-tu.org
530-632-3465

August 12, 2025

California Fish and Game Commission
P.O. Box 944209
Sacramento, CA 94244-2090

Dear Members of the California Fish and Game Commission,

I am writing on behalf of the Shasta-Trinity-Cascades chapter of Trout Unlimited, based in Redding. Our chapter strongly supports the proposed regulation change to make Trout Creek near the town of McCloud a catch-and-release only fishery. Trout Creek is one of just a handful of streams that harbor native McCloud redband trout. Compared to other streams that still have McCloud redbands, Trout Creek has the largest flow and the most dependable water source.

Our local chapter of Trout Unlimited supports conservation efforts on Trout Creek and we believe that zero-limit regulations will enhance the survival of this valued native California trout subspecies.

We urge the Commission to adopt this regulation. Thank you for considering our comments.

Sincerely,

A handwritten signature in black ink, appearing to read "Andrew Harris", written in a cursive style.

Andrew Harris

To: California Department of Fish and Wildlife
Attention: Samuel Plemons

From: Fall River Conservancy

Subject: Potential Angling Regulation Change and amendment to Fall River and the Designated Wild Trout Regulation

This communication is submitted by the Fall River Conservancy, a California nonprofit corporation (“FRC”) with respect to the possible change in the angling regulations of the California Department of Fish and Wildlife (the “Department”) which would remove the Fall River Lake (the “Lake”) and Fall River Pond (the “Pond”) from the wild trout designation and from section 7.50 of the Department’s regulations (the “Proposed Regulation Amendment”) to allow anglers to use bait and barbed hooks in the Lake and the Pond (but in no other portion of the Fall River Complex). We understand that the Department would, if the changes are adopted, commence stocking of the Lake and/or the Pond. (We understand that the Department, prior to March 1, 2021, stocked the Lake with up to 5,000 pounds (10,000 quantity) annually of catchable triploid rainbow trout for put and take angling. This was discontinued in March 2021 when the current regulations covering the Fall River Complex were adopted by the Fish and Game Commission (“FGC”).

Regarding the Proposed Regulation Amendment, FRC has been advised by the Department as follows:

1. Any planting of fish in the Lake or the Pond in the future would only involve triploid rainbow trout which cannot breed and therefore there would be no dilution of the genetic strain of the wild trout resident in the Fall River Complex.

2. In the years preceding March 2021, the Department discerned that there was minimal escapement of the planted fish from the Lake or the Pond into other reaches of the Fall River Complex. The FRC understands that there may be a small space between the stream bottom and the fish gates in the Lake and the Pond when inflows and outflows of water are occurring. The FRC recommends that the Department study the possible means of closing off this small gap before planting is re-commenced.
3. Any planted fish in the Lake or the Pond will be raised in hatcheries maintained by the Department which follow best practices to prevent disease or other infections from affecting the planted fish before their release.
4. Department wardens have regularly heard complaints from local anglers regarding the reduced angling opportunities in the Pond and the Lake due to the gear restrictions and bag limits adopted in 2021, including anglers voicing their desire to use bait while targeting trout and other species common in the Lake and the Pond (e.g., largemouth bass and bluegill). Angler complaints and limitations on angler opportunities are the impetus for the proposed Regulation Amendment.

The FRC notes that California Trout has furnished a letter to the Department supporting the Proposed Regulation Amendment.

Based upon and subject to the foregoing understandings, please be advised that the FRC is supportive of the Proposed Regulation Amendment. The FRC is especially attentive to the concerns expressed by local anglers as described above.

If the Department has any comments or questions regarding this submission, please contact the undersigned. The FRC has no objection to the Department furnishing this submission to the FGC if it chooses to do so.

Very truly yours,

FALL RIVER CONSERVANCY

By Rodney R. Peck, President

TO: California Department of Fish and Wildlife

RE: Letter of Support to California Department of Fish and Wildlife regarding proposed changes in fishing regulations.

The Lassen County Board of Supervisors is in support of the California Department of Fish and Wildlife's proposals to change the following fishing regulations:

1) Lassen and Modoc counties Black Bass Size Restriction

Change: Remove the minimum size requirement from all waters within Lassen and Modoc counties, with the exception of Mountain Meadows Reservoir in Lassen County, where the minimum size would remain 12 inches.

2) Susan River, Lassen County

Change: Revert the season to historic traditional trout opener (Last Saturday in April through Nov. 15). Update language to include special open season for youths participating in Youth Fishing Derby (the Saturday preceding the last Saturday of April).

Bass in most reservoirs within the county appear to have slow growth rates and stunted bass populations that seldomly attain the minimum 12-inch size limit. Having no size limit could increase harvest of smaller bass and can increase overall bass size within the reservoirs overtime. This change will give anglers more opportunities to harvest bass where increased harvest is needed.

Reverting the season in the Susan River to the traditional trout season will increase angler opportunity by lengthening the season in the spring and shortening the winter season. During much of the winter the river is typically unfishable (due to snow and/or ice), so the winter provides little opportunity. In addition, water in the Susan River can warm quickly in the late spring and early summer. Having the season open earlier will provide more opportunities to fish during better conditions.

Please direct any questions to the Lassen County Fish and Game Commission.

Sincerely,

A handwritten signature in blue ink that reads "Tom Neely".

Tom Neely, Chairman
Lassen County Board of Supervisors
