

Staff Summary for May 19, 2026

3. Marine Protected Area (MPA) Petition 2023-14MPA**Today's Item**Information Action

Request to allow the commercial take of sea urchin in Point Dume SMCA, Point Vicente SMCA (No Take), and Swami's SMCA.

Summary of Previous/Future Actions

- | | |
|--|---------------------------------|
| • Received 20 MPA petitions; referred to MRC and the Department for review | December 2023;
February 2024 |
| • Granted or denied all individual actions in the 5 "bin 1" MPA petitions | December 2024 |
| • Received Department bin 2 petition evaluations for 10 non-tribally led or co-led petitions | April 15-16, 2026 |
| • Received petitioners' presentation and discussed region specific petitioned actions in bin 2 MPA petitions from Del Norte through Monterey counties | April 21, 2026 |
| • Received petitioners' presentation and discussed region specific petitioned actions in bin 2 MPA petitions from San Luis Obispo through Santa Barbara counties, northern Channel Islands, and Santa Barbara Island | May 5-6, 2026 |
| • Today, receive petitioners' presentations and discuss region-specific petitioned actions in bin 2 MPA petitions from Los Angeles through San Diego counties and Catalina Island | May 19, 2026 |
| • Receive Department bin 2 evaluations for five tribally led or co-led petitions | Date to be determined |

Background

In November 2023, the Commission received Petition 2023-14MPA (Exhibit 1), alongside 19 other petitions proposing changes to the state's MPA network and management program. In February 2024, the Commission referred all MPA petitions to the Department for its evaluation and recommendation, while developing and updating guidance over time.

For detailed background information and key documents related to the process leading to this stage — including the companion document to the Department's evaluations for non-tribally led or co-led petitions, the Department's evaluations presentation, and a letter from the California Ocean Protection Council providing input to complement the Department's evaluations — see the [Introduction to Bin 2 MPA Petitions and Evaluations](#).

Petition Amendments

Bin 2 petitioners were provided until March 2025 to submit formal amendments to their original petitions for inclusion in the Department's evaluation; this petition was not amended by that deadline.

Staff Summary for May 19, 2026

Overview of Actions in Petition 2023-14MPA Relevant to This Region

This petition, submitted by the California Sea Urchin Commission, proposes to modify regulations at nine SMCAs to allow the commercial take of sea urchin; three of the nine SMCAs are located in this region (action numbers from the Department's evaluation are included for reference):

- Action 7. Add commercial take of sea urchin at Point Dume SMCA, where current regulations allow recreational spearfishing of white seabass and pelagic finfish; commercial take of coastal pelagic species by round haul net, brail gear, and light boat; commercial take of swordfish by harpoon; and a tribal take exemption for the Santa Ynez Band of Chumash Indians.
- Action 8. Add commercial take of sea urchin at Point Vincente SMCA (No-Take), where current regulations allow take incidental to permitted activities.
- Action 9. Add commercial take of sea urchin at Swami's SMCA, where current regulations allow recreational hook-and-line fishing from shore and recreational spearfishing of white seabass and pelagic finfish.

Stated Intent

The petitioner explains that the proposed change is motivated by "...the marine heat wave that started in 2014, [which] led to large declines in kelp and urchin landings, resulting in [a] federal fishery disaster declaration;" and that "allowing commercial urchin fishing within the listed SMCAs will improve the [economic] sustainability of the urchin industry and may also support kelp recovery efforts." See Exhibit 1 for more details.

Public Comments

The Commission has received public comments on MPA petitions continuously since petitions were submitted in late 2023. Staff has compiled into a single packet the comments received for this petition that were included in committee or Commission meeting binders or supplemental handouts from the December 2023 through the May 5-6, 2026 Commission meetings (Exhibit 2). Comments received after the May 5-6, 2026 Commission meeting, but before this meeting's comment deadline, are included as exhibits to this staff summary.

Petition Evaluations

On March 20, 2026, the Department publicly released its [evaluations and recommendations for the ten petitions that were not tribally led or co-led](#), including for Petition 2023-14MPA (Exhibit 3). The Department also released a [companion document](#), to offer essential context that is intended to be reviewed before the individual petition evaluations.

In addition, on March 20, 2026 the [California Ocean Protection Council \(OPC\), in its role as policy lead for the MPA network, sent a letter to the Commission](#) outlining its overarching perspectives on the MPA petitions, including the tribally led and co-led petitions (see [OPC news release, dated March 20, 2026](#)). OPC indicated that it plans to provide more detailed input on the bin 2 petitions using a policy lens, intended to complement the Department's evaluations. OPC now anticipates transmitting its evaluation for consideration at the June 2026 Commission meeting.

Staff Summary for May 19, 2026

Today's Meeting

Today, the petitioner will present Petition 2023-14MPA (proposed actions 7-9) and describe any proposed changes since the March 2025 amendment deadline. This meeting provides petitioners an opportunity to engage in dialogue with the Commission alongside robust public participation.

All meeting participants are encouraged to review the [Regional Meeting Expectations and Guidelines](#) (included in the agenda) as a reference for engaging in today's meeting.

Significant Public Comments

1. In handwritten letters collected and transmitted by an environmental non-governmental organization, more than 50 central and southern California coastal residents express opposition to petitions proposing to increase commercial fishing access within MPAs, including Petition 2023-14MPA. The commenters state that they, instead, support petitions that would “expand or strengthen protections” within California’s MPA network. (Exhibit 4)
2. The petitioner for Petition 2023-14MPA requests granting the petition, emphasizing that controlled harvest — particularly of purple sea urchin — could be implemented through an adaptive management or pilot framework aimed at reducing grazing pressure on kelp in MPAs. The petitioner cites studies indicating that targeted urchin removal can play a constructive ecological role in kelp recovery when conducted with appropriate safeguards. They characterize the petition as a practical, science-informed opportunity to support kelp restoration while sustaining California’s fishing communities and local food systems. (Exhibit 5)
3. Two California divers, in separate comments, urge the Commission to deny petitions that they believe would reduce protections or reopen MPAs to increased extraction — including petition 2023-14MPA. They support petitions that will “strengthen protections” and for tribally led petitions, noting that indigenous leadership is central to ocean stewardship. They highlight the role that healthy oceans and MPAs play in long-term environmental and economic sustainability across California. (Exhibit 6)
4. Student leaders from UC Riverside, UC San Diego, UC Irvine, and UCLA share comments from students and other community members expressing opposition to Petition 2023-14, instead urging the Commission to “protect critical habitats” like kelp forests and rocky reefs within MPAs by supporting MPA Petitions 2023-24, 2023-33, and 2023-34). The submission includes over 21,000 signatures and updates on related outreach efforts. (Exhibit 7)

Recommendation

Commission staff: Based on the day’s discussion, consider what additional information, if any, will be needed to inform a decision on the petition.

Staff Summary for May 19, 2026

Department: Deny all petition actions, for the reasons detailed in Exhibit 3. In summary:

- The proposed change to allow commercial urchin harvest within these SMCAs does not advance adaptive management recommendations from the Decadal Management Review nor address a current or emerging MPA management challenge.
- The change would conflict with the original goals of these MPAs and potentially undermine the long-term MPA monitoring program.
- There is no evidence to support that the proposed change would improve the sustainability of the urchin industry.
- Commercial urchin removal efforts are unlikely to result in meaningful and sustained kelp recovery without a clear understanding of the site-specific drivers of kelp loss.
- Statewide kelp restoration and management efforts should be guided by a kelp restoration and management plan, which is in development.

Motion (N/A)

Tracking Number: (____2023-14MPA__)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. Person or organization requesting the change (Required)

Name of primary contact person: David Goldenberg, Executive Director, California Sea Urchin Commission

Address: [REDACTED]

Telephone number: [REDACTED]

Email address: [REDACTED]

2. Rulemaking Authority (Required) - Reference to the statutory or constitutional authority of the Commission to take the action requested: Authority: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861, and 6750, Fish and Game Code, and Sections 36725(a) and 36725(e), Public Resources Code.

3. Overview (Required) - Summarize the proposed changes to regulations: Allow the commercial take of urchins in the following State Marine Conservation Areas (SMCAs):

- 1) Sea Lion Cove SMCA
- 2) Stewart's Point SMCA
- 3) Salt Point SMCA
- 4) Double Cone Rock SMCA
- 5) Naples SMCA
- 6) Anacapa Island SMCA
- 7) Point Dume SMCA
- 8) Point Vicente SMCA
- 9) Swami's SMCA

4. Rationale (Required) - Describe the problem and the reason for the proposed change: .
The commercial urchin fishery and the resiliency of California's kelp forests have been identified as being at risk due to climate change. This became a reality with the warm water event that started in 2014 and led to urchin barrens and a decline in kelp forests along the California coast, with declines

in kelp as high as 90% along the north coast. This resulted in a catastrophic decline in urchin landings (4.2 million pounds in 2013 down to 284,000 pounds in 2022), leading to a federal fishery disaster declaration. Allowing commercial urchin fishing within the listed SMCAs will improve the sustainability of the urchin industry and may also support kelp recovery efforts endorsed by the Fish and Game Commission (FGC), Department of Fish and Wildlife (DFW), and the Ocean Protection Council (OPC).

This proposal is consistent with goals and objectives 1.1, 1.5, 2.4, and 5.1 identified in the 2016 Master Plan for Marine Protected Areas (MPA), along with the identified design considerations relative to climate change impacts and preservation of diverse commercial uses. Managed urchin fishing can promote the stability of species diversity and abundance consistent with natural fluctuations in environmental conditions. We believe that commercial urchin fishing can help the recovery of kelp ecosystems impacted by over-abundant urchin populations (urchin barrens) ultimately caused by climate change. This belief is based on the kelp restoration projects funded by the OPC along the north coast that are showing promise. Our petition sets up an economical approach that can be used to expand this effort in selected SMCAs along the entire coastline.

Our proposal is consistent with the Master Plan by protecting habitats (kelp forests) while allowing commercial harvest, thus mitigating some of the significant negative impacts experienced by the fishery when the MPA network was established. The Master Plan also states that the MPA network should consider several factors, including the potential impacts of climate change and the diversity of commercial fishing. The proposal is also consistent with the comprehensive recommendations and science guidelines of DFW's Decadal Management Review, which acknowledged inadequate engagement with the fishing industry and the continuing need for adaptive management under a changing climate. DFW's JEDI Governance recommendation #6(c) clearly states the need to explore innovative approaches to engage the fishing industry in MPA research and management. The industry believes that with the collaboration of CDFW, FGC, OPC, NGO's, academic institutions, and the Tribes it can help address urchin barrens and ultimately restore kelp forests the ecosystems reliant upon them.

Our proposal is supported at the Sea Lion Cove and Double Cone Rock SMCAs by the MPA Collaborative recommendations. The Collaborative also supports continuing the commercial urchin harvest at Saunders Reef SMCA.

The commercial urchin fishery has a long track record of working with DFW, and in recent years with OPC, on research and management issues and is ready to continue that partnership using the recommended changes to the MPA network listed in this petition as an important step in fulfilling the goals of the Marine Life Protection Act and mandates in the Fish and Game Code to support sustainable commercial fisheries.

The science developed to date indicates that in areas lacking significant urchin predators, urchin populations can have negative cascading effects on kelp forests in MPAs and reference sites (Carr et.al., 2021). By functioning as predators, commercial urchin fishermen may help restore and protect kelp forests in MPAs. In accordance with the adaptive management elements of the Master Plan, decadal review, and DFW recommendations, we ask that this petition be collaboratively evaluated by all stakeholders through the rulemaking process of the FGC with respect to improving the resiliency of both the commercial urchin fishery and kelp forests to climate change.

SECTION II: Optional Information

5. **Date of Petition:**

6. **Category of Proposed Change**

- Sport Fishing
- Commercial Fishing
- Hunting
- Other, please specify:

7. **The proposal is to:** *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*

Amend Title 14 Section(s): 632(b)(30)(B) ...is allowed. The commercial take of urchins is allowed.

632(b)(16)(B)2...;-and Dungeness...~~is allowed.~~, and the commercial take of urchins is allowed.

632(b)(33)(B)...dip net. The commercial take of urchins is allowed.

632(b)(35)(B) ... is allowed. The commercial take of urchins is allowed.

632(b)(98)(B) ... 5. The commercial take of urchins is allowed.

632(b)(112)(B)1 ...commercial take of spiny lobster and urchins is allowed.

632(b)(117)(B)2 ...take of urchins; swordfish...

632(b)(119)(B) ...is allowed. The commercial take of urchins is allowed.

632(b)(138)(B) ... 4. The commercial take of urchins is allowed.

Add New Title 14 Section(s):

Repeal Title 14 Section(s):

8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition**

Or Not applicable.

9. **Effective date:** If applicable, identify the desired effective date of the regulation. If the proposed change requires immediate implementation, explain the nature of the emergency: 2025

10. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents: Red Sea Urchin Enhanced Status Report (See California Department of Fish and Game website). California Marine Life Protection Act Master Plan for Marine Protected Areas 2016 (See California Department of Fish and Game website). California’s Marine Protected Area Network Decadal Management Review 2022 (See California Department of Fish and Game website). Monitoring and Evaluation of Kelp Forest ecosystems in the MLPA Marine Protected Area Network (Carr et.al. 2021) (See California Department of Fish and Game website). MPA Collaborative Network (see website, Collaborative Vetted Regulation Recommendations)

11. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs,

other state agencies, local agencies, schools, or housing: No known negative economic or fiscal impacts of the proposed changes. It is expected that there will be some positive economic benefits by opening formally closed areas to commercial urchin fishing.

12. Forms: If applicable, list any forms to be created, amended or repealed:

CFGC Tracking Number	2023-14MPA
Petition Contact/Affiliation	David Goldenberg, Executive Director, California Sea Urchin Commission
Number of Proposed Actions	9
Affected MPAs	Sea Lion Cove, Stewarts Point, Salt Point, Double Cone Rock, Naples, Anacapa Island, Point Dume, Point Vicente, and Swami's State Marine Conservation Areas (SMCAs)
Petition Summary	Allow commercial take of sea urchins in 9 State Marine Conservation Areas
Link to StoryMap page	2023-14MPA

II. CDFW RECOMMENDATIONS AND BRIEF JUSTIFICATION

Note: If a change to the Marine Protected Area (MPA) regulations is not needed to address the proposed change, California Department of Fish and Wildlife (CDFW) did not evaluate the proposed change using the framework. However, CDFW may recommend an alternative pathway to achieving the desired outcome of the proposed change.

Petition Action ID and Proposed Action	Petitioner’s Stated Rationale and Brief Justification for Proposed Actions	CDFW Recommendation and Brief Justification
<p>2023-14MPA_1-9 Allow commercial urchin take at Sea Lion Cove, Stewarts Point, Salt Point, Double Cone Rock, Naples, Anacapa Island, Point Dume, Point Vicente, and Swami’s SMCAs.</p>	<p>The petitioner’s stated intent for the proposed change is “The marine heat wave that started in 2014 led to large declines in kelp and urchin landings, resulting in federal fishery disaster declaration,” and “allowing commercial urchin fishing within the listed SMCAs will improve the sustainability of the urchin industry and may also support kelp recovery efforts.”</p>	<p>Deny all petition actions. The proposed change to allow commercial urchin harvest within nine SMCAs does not advance adaptive management recommendations from the Decadal Management Review nor address a current or emerging MPA management challenge. Further, the change would conflict with the original goals of these MPAs and potentially undermine the long-term MPA monitoring program. There is no evidence to support the proposed change would improve the sustainability of the urchin industry. Commercial urchin removal efforts are unlikely to result in meaningful and sustained kelp recovery without a clear understanding of the site-specific drivers of kelp loss. Statewide kelp restoration and management efforts should be guided by the Kelp Restoration and Management Plan (KRMP), which is in development.</p>

III. BIN 2 PETITION GROUPING: IDENTIFY TRIBALLY-LED PETITIONS

The 2023 MPA Petition Companion Document (Attachment 1) includes a summary of the process for identifying Tribally-led petitions, CDFW’s outreach to all California Native American tribes¹ (tribes) throughout the petitions process, and a summary of outreach and engagement with Tribally-led petitioners. Tribally-led petitions were evaluated with the CDFW 2023 MPA Bin 2 Petition Evaluation Framework.

Tribal Components Questions	Answer and Explanation
<p>Was the petition submitted by a California Native American tribe, representative designated by a tribe or tribal organization, or have a tribal co-sponsor? If yes,</p> <ul style="list-style-type: none"> a. Does the proposed change explicitly aim to advance tribal co-management, subsistence harvesting, stewardship, and/or provide a tribal benefit through recognizing the cultural significance of an area? b. Is the proposed regulatory change explicitly linked to a tribe or tribes? (i.e. tribal exemption, tribal take only MPA, or new MPA for co-management). 	<p>No, this petition was not submitted by a tribe or representative designated by a tribe and does not have a tribal co-sponsor.</p>

¹ California Native American tribe is the preferred term to use per the Governor’s Office of Tribal Affairs when generally mentioning tribes of California, both federally and non-federally recognized.

IV. PETITION EVALUATION

EVALUATION NARRATIVE AND OVERVIEW FOR 2023-14MPA_1-9

The petitioner has requested to allow commercial urchin harvest within nine SMCAs including Sea Lion Cove, Stewarts Point, Salt Point, Double Cone Rock, Naples, Anacapa Island, Point Dume, Point Vicente, and Swami's SMCAs, and Point Vicente No-take SMCA. The proposed change aims to address the petitioner's stated purpose to, "improve the sustainability of the urchin industry and [allowing commercial urchin harvest] may also support kelp recovery." Although the petitioner asserts the proposed actions align with one or more of the Master Plan objectives, CDFW's evaluation finds the proposal:

- Is inconsistent with the goals of these MPAs, as stated in the MLPA Initiative planning process,
- Does not align with the original intent of the MPAs,
- Would reduce protection levels for Double Cone Rock SMCA, Point Dume SMCA, and Point Vicente No-take SMCA and change the intended design of the 6 other SMCAs in a manner that would undermine the design of the MPA Network,
- Does not address a current or emerging MPA management challenge, and
- Would not advance management of the MPA Network.

The petitioner states that allowing commercial take of urchin in these SMCAs may benefit the urchin fishery and aid in kelp recovery. However, the petitioner did not provide information to support that these SMCAs are overgrazed by urchins. Urchins in heavily overgrazed areas are typically small, starved, and commercially non-viable, meaning urchin harvest from areas where kelp has been overgrazed would likely provide limited economic benefit to the fishery. Selective removal of large, marketable red urchins within barrens would minimally reduce urchin populations, resulting in little positive effect for kelp abundance. While urchin removal in controlled scientific studies has, in some cases, shown localized benefits to kelp recovery, restoration outcomes are highly variable and depend on multiple ecological and environmental factors (Eger 2022, Ward et al. 2022). Large-scale kelp declines, particularly in northern California, have been linked to marine heatwaves, ocean warming, and altered predator-prey dynamics, not solely to urchin abundance (Rogers-Bennett and Catton 2019).

The petition does not include any information on the status of kelp or urchin populations in the SMCAs, or other site-specific information to indicate restoration is needed in these SMCAs. Before pursuing restoration efforts, it is essential to identify whether a given habitat within a specific area needs restoration. It is also critical for kelp restoration efforts to implement intervention measures that address the site-specific ecological drivers of kelp loss. The petition does not make it clear if urchin barrens are a concern in

CDFW EVALUATION 2023-14MPA Goldenberg

these SMCAs. It is also unclear the extent to which commercial urchin removal efforts applied widely across the requested SMCAs would result in measurable, biologically meaningful benefits to help beyond what the MPA Network currently offers.

In addition to CDFW's assessment that the proposed change would not benefit management of the MPA Network, CDFW is concerned the proposed change would introduce regulatory complexity and negatively impact the Network design and long-term monitoring data. The proposed change would reduce protection levels for Double Cone Rock SMCA, Point Dume SMCA, and Point Vicente No-take SMCA, resulting in these three MPAs no longer serving their designed connectivity role in the Network as MPA habitat replicates. This change would also increase the spacing between key habitats within the MPAs and result in a loss of replication of multiple key habitats among the MPAs. Although the change would not reduce the Level of Protection (LOP) for the six non-replicate MPAs, these changes would nevertheless change the intent of the MPAs and their designed role in the MPA Network. Additionally, all nine affected MPAs are part of California's long-term MPA Monitoring Program. Allowing commercial take would alter ecological conditions, introducing variability that would compromise the comparability and integrity of long-term monitoring data. Finally, several MPAs overlap with federally managed areas, including National Marine Sanctuaries, which would necessitate coordination with federal partners.

RECOMMENDATION FOR 2023-14MPA_1-9

Given these considerations, and the information in the evaluation below, **CDFW recommends the California Fish and Game Commission (CFGC) DENY the nine petition actions** proposing to allow commercial urchin harvest in the following SMCAs:

- **2023-14MPA_1**, Sea Lion Cove SMCA,
- **2023-14MPA_2**, Stewarts Point SMCA,
- **2023-14MPA_3**, Salt Point SMCA,
- **2023-14MPA_4**, Double Cone Rock SMCA,
- **2023-14MPA_5**, Naples SMCA,
- **2023-14MPA_6**, Anacapa Island SMCA,
- **2023-14MPA_7**, Point Dume SMCA,
- **2023-14MPA_8**, Point Vicente No-take SMCA, and
- **2023-14MPA_9**, Swami's SMCA.

EVALUATION QUESTIONS

2023-14MPA_1-9: Allow commercial take of sea urchin in nine SMCAs.

QUESTION 1: DOES THE PROPOSED CHANGE SUPPORT THE MPA NETWORK IN MEETING ONE OR MORE OF THE MLPA GOALS AND ALIGN WITH MPA MASTER PLAN ADAPTIVE MANAGEMENT OBJECTIVES?

No. The MLPA Goals and Master Plan objectives are inextricably linked and act as the foundational tools that CDFW utilizes for effective adaptive management of the MPA Network. Individual MPAs in the Network were not necessarily designed to address all six Goals of the MLPA but instead act as an important component of a functioning Network that was designed to holistically address the MLPA Goals as a whole. As such, CDFW has evaluated this action within the broader adaptive management framework and how the proposed action may or may not align with the MLPA Goals/Master Plan objectives and advance MPA Network management. See Question 1 of Attachment 1 for the MLPA Goals and Master Plan Objectives.

The proposed change would not align with one or more of the MLPA Goals or the MPA Master Plan adaptive management objectives and consequently, would not advance management of the MPA Network. The nine proposed affected SMCAs were designed to meet several MLPA Goals that are still relevant today, including:

- Sea Lion Cove SMCA was designed to meet MLPA Goals 2 and 3
- Stewarts Point SMCA, an MPA within the larger Stewarts Point State Marine Reserve (SMR), was intended to provide recreational take allowances for the Kashia Band of Pomo Indians, a federally recognized tribe in Sonoma County, and was designed to meet Goals 1, 2, 3, and 5 along with the SMR.
- Salt Point SMCA was designed to meet MLPA Goals 3 and 5.
- Double Cone Rock SMCA was designed to meet MLPA Goals 1, 2, 4, 5, and 6.
- Naples SMCA was designed to meet MLPA Goal 3, 4, 5, and 6.
- Anacapa Island SMCA was designed to meet MLPA Goals 1, 2, and 4.
- Point Dume SMCA functions as an MPA cluster with Point Dume SMR and the SMCA was designed to meet Goals 1, 2, 3, 4, 5, and 6.
- Point Vicente SMCA is currently No-take and functions as an MPA cluster with Abalone Cove SMCA, and was designed to meet Goals 1, 2, 3, 4, 5, and 6.
- Swami's SMCA was designed to meet MLPA Goals 1, 2, 3, 4, 5 and 6.

The proposal to allow commercial urchin take from these SMCAs would not support these MPAs in meeting or advancing any of the goals beyond which these MPAs already offer. Adding another take allowance for commercial urchin in these MPAs is not

CDFW EVALUATION 2023-14MPA Goldenberg

consistent with MLPA Goals 1 or 2. Although the petitioner states that the urchin take may benefit kelp forests, there is not sufficient scientific evidence to verify commercial urchin take will have the desired effect of restoring kelp in these MPAs or that it is sustainable.

Regarding Goal 6, allowing commercial urchin harvest in Double Cone Rock SMCA would lower the LOP such that this MPA would no longer serve its connectivity objectives as intended in Goal 6. Point Dume SMCA functions as an MPA cluster with Point Dume SMR. Allowing commercial urchin harvest in the SMCA would lower the LOP such that this MPA cluster would no longer serve its connectivity objectives as intended in Goal 6. Point Vicente SMCA is currently No-take and functions as an MPA cluster with Abalone Cove SMCA. Allowing commercial urchin harvest in the SMCA would lower the LOP such that this MPA cluster would no longer serve its connectivity objectives as intended in Goal 6.

The petitioner asserts the proposed change to allow commercial urchin harvest in these nine MPAs is consistent with Regional Objectives 1.1, 1.5, 2.4, and 5.1 identified in Appendix C, D, E, and F of the 2016 Master Plan for Marine Protected Areas (CDFW 2016). However, meeting one or more of the regional objectives does not mean that the MPA with the proposed change would align with the MLPA Goals. In the broader adaptive management framework, the proposed change would not advance management of the MPA Network and in some cases, would compromise individual MPA design and MPA Network design.

QUESTION 2A: DOES THE PROPOSED CHANGE ADVANCE ADAPTIVE MANAGEMENT RECOMMENDATIONS IN THE DECADAL MANAGEMENT REVIEW?

No. The proposed change would not advance any of the adaptive management recommendations in the Decadal Management Review. See Question 2a of Attachment 1 for the Decadal Management Review and adaptive management Recommendations.

QUESTION 2B: IF NOT, DOES THE PROPOSED CHANGE ADDRESS A CURRENT OR EMERGING MPA MANAGEMENT CHALLENGE?

No. Although the petition states that the proposed change would address sustainability of the commercial urchin fishery and may contribute to kelp recovery, the proposed change does not address a current or emerging MPA management challenge. The proposed change would not benefit the long-term adaptive management of the statewide MPA Network without compromising the original intent of the affected MPAs and design of the Network.

QUESTION 3: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT EXISTING CFGC NON-MPA REGULATIONS, PERMITS, OR LEASES (E.G., KELP LEASES, AQUACULTURE LEASES, EXPERIMENTAL FISHING PERMITS)?

Yes. The proposed change interacts with California Code of Regulations (Cal. Code Regs.), title (tit.) 14, section 120.7, particularly subdivision (subd.) (a)(2). The petitioner states allowing commercial urchin harvest may benefit kelp recovery. However, it is unclear whether the petitioner intends to participate in these activities for the sole purpose of commercial urchin harvest, or if there is the intent to conduct research or restoration to improve the resiliency of kelp forests.

If the petitioner wishes to conduct commercial harvest of red urchin (*Mesocentrotus franciscanus*) as part of a research activity (i.e., kelp restoration research), Cal. Code Regs., tit. 14, section 120.7, subd. (a)(2) includes a provision that enables CDFW to issue an authorization letter to allow commercial harvest of red urchin (not purple urchin (*Strongylocentrotus purpuratus*)) within certain closed areas under specific conditions “to provide an economic incentive for cooperative sea urchin management and research activity.” However, there is currently no regulatory pathway that would allow commercial harvest of purple urchin for research activities in MPAs, or commercial harvest of purple or red urchin for kelp restoration in MPAs.

CDFW has existing mechanisms to authorize research exploring the benefits of urchin removal to advance kelp recovery through issuance of Scientific Collecting Permits and is exploring the use of Restoration Management Permits to authorize kelp restoration; although, existing regulations do not allow commercial urchin harvest for kelp restoration in MPAs. Until statewide management plans for kelp recovery and restoration are in place (i.e., the KRMP—see response to Question 6), authorizing urchin harvest for kelp restoration research should continue at the research scale versus larger-scale commercial harvest.

Additionally, the proposed change is related to petitions CFGC previously considered and denied:

- 2013 petition to allow take of sea urchins in MPAs,
- 2020 petition to enact emergency regulations for increased recreational take of purple urchins in Monterey. CFGC adopted related regulations in December 2020, but did not approve recreational culling of urchins within MPAs, and
- 2021 petition to authorize culling of red and purple sea urchin within Monterey SMCA.

QUESTION 4: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT EXISTING REGULATIONS, PERMITS, LEASES, OR MANAGEMENT ACTIVITIES OF ANY OTHER AGENCY OR ENTITY?

Yes. Salt Point SMCA adjoins Salt Point State Park, but it is unclear whether the proposed change would have direct or indirect effects on the management activities of the Department of Parks and Recreation.

National Oceanic and Atmospheric Administration, National Marine Sanctuaries: Sea Lion Cove, Stewarts Point, and Salt Point SMCAs overlap with Greater Farallones National Marine Sanctuary. Anacapa Island SMCA overlaps with Channel Islands National Marine Sanctuary.

There are Areas of Special Biological Significance that overlap with Anacapa Island and Point Dume SMCAs, however, it is unclear whether the proposed change would have direct or indirect effects on the management activities of the State and Regional Water Quality Control Boards related to the Areas of Special Biological Significance.

There are tribal exemptions for Naples, Anacapa Island, and Point Dume SMCAs for the Santa Ynez Band of Chumash Indians that could be impacted by the proposed action.

This list may not be exhaustive. The proposed change may have the potential to affect existing regulations, permits, leases, or management activities of Tribal governments, other agencies, and entities not identified here.

QUESTION 5: ARE THERE SIGNIFICANT INFORMATION GAPS THAT NEED TO BE FILLED TO INFORM THE EVALUATION OF THE PROPOSED CHANGE?

No. CDFW has sufficient information to evaluate and make a recommendation on this proposal. When evaluating this petition, CDFW reviewed the information in the petition as well as information including but not limited to:

- The status of the red urchin fishery,
- Existing science, regulations, and guidance pertaining to kelp recovery and restoration in California, and
- MLPA Planning documents and related information (e.g., MLPA Goals and MPA Master Plan adaptive management Objectives).

CDFW reviewed the available information and did not find that it supports the petitioner's assertion that, "allowing commercial urchin fishing within the listed SMCAs will improve the sustainability of the urchin industry and may also support kelp recovery efforts endorsed by [CFGF, CDFW], and the Ocean Protection Council." The petition did not

include evidence that these SMCAs need restoration or that the proposed change would support kelp recovery efforts in these SMCAs. Without direct evidence of a place-based need linking kelp declines to overgrazing by urchins, the proposed change is unlikely to result in measurable, biologically meaningful benefits to kelp beyond what the MPA Network currently offers. See Questions 1, 2, and 6 regarding the merits of this proposal related to advancing kelp recovery.

QUESTION 6: ARE THERE SIGNIFICANT MANAGEMENT GAPS THAT NEED TO BE FILLED TO INFORM THE EVALUATION OF THE PROPOSED CHANGE?

Yes. While urchin removal efforts specifically aimed at kelp recovery have, in some cases, shown localized benefits to kelp recovery, restoration outcomes are highly variable and depend on multiple ecological and environmental factors (Ward et al. 2022). Research in this area is ongoing and emerging. It is essential that kelp restoration and management is comprehensive and uses intervention strategies tailored to the specific drivers of kelp loss in a given area. CDFW has existing mechanisms to authorize research exploring the benefits of urchin removal to advance kelp recovery through issuance of Scientific Collecting Permits and is exploring the use of Restoration Management Permits to authorize kelp restoration; although, these regulations do not allow for commercial harvest. There is a need for clear, statewide guidance to inform the role of urchin take in kelp restoration and management.

CDFW, in partnership with the Ocean Protection Council, is developing a statewide, ecosystem-based, adaptive [Kelp Restoration and Management Plan \(KRMP\)](#) for giant kelp (*Macrocystis pyrifera*) and bull kelp (*Nereocystis luetkeana*). The KRMP will include a cohesive kelp management strategy that consists of three core components:

1. An innovative framework for ecosystem-based management of kelp forests,
2. A harvest management framework and other Fishery Management Plan elements required by the Marine Life Management Act, and
3. A Restoration Toolkit.

Any potential adaptive MPA management measures intended to restore California's kelp beds must align with MLPA Goals and be informed by statewide restoration and management plans such as the KRMP. The Decadal Management Review Recommendation 18 highlights the need for CDFW to "Develop a framework to evaluate and approve appropriate restoration and mitigation actions within MPAs and marine managed areas." CDFW has not developed this framework yet, but it could include fishery practices that may support restoration within MPAs and Marine Managed Areas. A decision-making framework for permitting restoration activities in MPAs is also in

CDFW EVALUATION 2023-14MPA Goldenberg

development and will work in conjunction with the KRMP to inform appropriate locations for restoration activities.

QUESTION 7A: WAS THE PROPOSED CHANGE CONSIDERED DURING THE MLPA INITIATIVE PLANNING PROCESS OR THE IMPLEMENTATION PROCESS OF MPAS AROUND THE NORTHERN CHANNEL ISLANDS?

No. The proposed change (e.g., commercial take of urchin) was not considered for any of the nine listed MPAs during the MLPA Initiative planning process. All nine MPAs were intended to achieve significant protection, either individually or as part of an MPA cluster, and thus commercial take allowances were not considered except in a few very limited cases where the take would not decrease overall protection.

QUESTION 7B: IS THERE NEW INFORMATION AVAILABLE, CHANGING CONDITIONS SINCE THE MLPA IMPLEMENTATION PHASE, AND/OR INFORMATION PRESENTED IN THE DMR THAT WARRANTS REEVALUATION OF THE PROPOSED CHANGE?

No. There is no information that has emerged since implementation of the MPA Network to support allowing commercial take of urchin in these MPAs.

QUESTION 8: IF THE PROPOSED CHANGE AFFECTS AN EXISTING MPA, DOES THE PROPOSED CHANGE ALIGN WITH THE ORIGINAL INTENT OF THE MPA IDENTIFIED DURING THE MLPA INITIATIVE PLANNING PROCESS OR THE IMPLEMENTATION PROCESS OF MPAS AROUND THE NORTHERN CHANNEL ISLANDS?

No. Allowing commercial take of urchin does not align with the original intent of any of the nine MPAs.

During the South Coast MLPA Initiative planning process, the Blue-Ribbon Task Force recommended a High LOP for Swami's MPA (MLPA 2009). However, one of State Parks' primary purposes for this area during the MLPA Initiative planning process was to allow recreational hook-and-line fishing from shore. This concession was made, but it lowered the LOP from High to Moderate-low. Although commercial take of urchin would maintain the Moderate-low protection of Swami's SMCA, allowing commercial take of urchins does not align with the original intent of the MPA, and would further divert from the Blue-Ribbon Task Force's recommendation for a High LOP at Swami's.

Naples SMCA has a Low LOP due to the allowance of commercial take of giant kelp by mechanical and hand harvest, which was intended to offset the socioeconomic impact of the Campus Point SMCA (No-take) on an existing kelp lease. However, no additional commercial take was considered or intended for this SMCA.

CDFW EVALUATION 2023-14MPA Goldenberg

Anacapa Island SMCA was intended to be a “limited take area” allowing for only recreational fishing for lobster and pelagic fish, and commercial fishing for lobster. Sea Lion Cove SMCA was designed “to provide protection for vulnerable intertidal habitat, abalone nursery and invertebrate communities” with “take of all invertebrates and marine aquatic plants prohibited.” The Salt Point SMCA was designed to “enhance recreational experience via proximity to Stewarts Point and Gerstle Cove SMR” (MLPA 2008). Allowing commercial take of urchins does not align with the original intents of these MPAs.

QUESTION 9: DOES THE PROPOSED CHANGE IMPROVE INDIVIDUAL MPA OR MPA NETWORK DESIGN SO THAT IT BETTER ALIGNS WITH OR MEETS THE MPA SCIENCE GUIDELINES?

No. The MLPA requires that the design of individual MPAs and the statewide Network be based on the best readily available science and that MPAs be of adequate size, number, protection level, and location to meet MLPA Goals. The science guidelines developed by the Science Advisory Team and outlined in the Master Plan were created specifically to provide this scientific foundation and serve as the starting point for evaluating alternative MPA proposals. Alignment with these guidelines depends on the LOP, which is determined by allowed take, and spatial configuration. More specifically, these guidelines require that an MPA must be at least nine square miles and meet one of the three highest LOPs (i.e., Very High, High, or Moderate-high) to contribute to ecological goals such as habitat replication and representation.

Six of the MPAs affected by this petition do not currently meet the minimum criteria for replicates, due to their LOP (Anacapa SMCA, Stewarts Point SMCA, and Swami’s SMCA) or both their size and LOP (Naples SMCA, Salt Point SMCA, and Sea Lion Cove SMCA). Given the proposal would not increase the size or LOP of these MPAs, it would not improve the design of these individual MPAs or the MPA Network, nor would it enhance alignment with the MLPA Science Guidelines.

Three of the MPAs affected by this petition (Double Cone Rock SMCA, Point Dume SMCA in a cluster with Point Dume SMR, and Point Vicente No-take SMCA in a cluster with Abalone Cove SMCA) currently serve their designed function as habitat replicates. The proposed change would lower the LOP of these three MPAs to Moderate-low, meaning they would no longer meet the minimum requirements to serve their designed connectivity role within the Network as habitat replicates. As a result, the proposed change would undermine the design of these individual MPAs and the overall MPA Network. See Question 9 of Attachment 1 for the MLPA Science Guidelines and additional context.

QUESTION 10A: DOES THE PROPOSED CHANGE ALIGN WITH CDFW FEASIBILITY GUIDELINES?

No. The proposed change would not align with the following Feasibility Guidelines: 'Take Regulations' guideline to "avoid allowing too many different uses." The change would add a different type and method of take (i.e., commercial take of urchin) to the MPA regulations for nine MPAs, which compromises enforceability of MPA regulations (see response to Question 11 regarding MPA regulation enforceability). See Question 10a of Attachment 1 for the CDFW Feasibility Guidelines.

QUESTION 10B: IF NOT, IS THERE A RATIONALE FOR MOVING FORWARD WITH THE PROPOSED CHANGE OR AN ALTERNATIVE THAT COULD MEET THE INTENT BUT BETTER ALIGN WITH FEASIBILITY GUIDELINES?

No. There is no alternative that would allow the commercial take of urchin in the nine MPAs while also meeting the CDFW Feasibility Guidelines.

QUESTION 11: DOES THE PROPOSED CHANGE MAINTAIN OR IMPROVE ENFORCEABILITY OF MPA REGULATIONS?

No. The proposed change does not maintain or improve enforceability of these MPA regulations. The proposed change adds another type of take allowance (e.g., commercial take of urchin), which compromises enforceability of MPAs by:

- Making it more difficult to discern if an activity is allowed when surveilling the MPA from afar,
- Increasing the potential for non-compliance with members of the public who observe the activity taking place in an MPA but are unfamiliar with the regulations.

QUESTION 12: DOES THE PROPOSED CHANGE SIMPLIFY REGULATORY LANGUAGE OR ENHANCE PUBLIC UNDERSTANDING WITHOUT CHANGING THE INTENT OF THE MPA?

No. The proposed change would change the intent of the MPA and does not simplify the regulatory language or enhance public understanding.

QUESTION 13: DOES THE PROPOSED CHANGE MAINTAIN OR ENHANCE PROTECTION OF MARINE RESOURCES?

No. The proposed change adds another take allowance that would decrease protection for urchins in all nine of the MPAs listed. This is of concern because red sea urchin populations have experienced lower abundance and diminished gonad size due to declines in its primary food source, kelp, particularly in northern California.

CDFW EVALUATION 2023-14MPA Goldenberg

The proposed change would also lower the LOP for three of the nine MPAs and thus, no longer serve their designed connectivity role within the Network as habitat replicates (see response to Question 9 regarding the design of individual MPAs and the MPA Network using MLPA Science Guidelines).

As to maintaining or enhancing kelp protection, without direct evidence of a placed-based need linking kelp declines to the specific driver(s), it is not likely that the proposed change would result in measurable, biologically meaningful benefits to kelp beyond what the MPA Network currently offers.

QUESTION 14: DOES THE PROPOSED CHANGE PROVIDE MORE EQUITABLE ACCESS OPPORTUNITIES (E.G., FISHING, EDUCATIONAL, AND/OR OTHER RECREATIONAL OPPORTUNITIES) FOR TRADITIONALLY UNDERSERVED OR MARGINALIZED COMMUNITIES?

See Question 14 of Attachment 1.

QUESTION 15: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT CONSUMPTIVE AND/OR NON-CONSUMPTIVE ACTIVITIES? IF SO, HOW?

Yes. This change has the potential to affect consumptive and non-consumptive activities. Allowing commercial urchin harvest within the nine MPAs would provide a new take opportunity that is not currently authorized and has potential to affect commercial urchin diving activities.

Red urchin landings were most affected in northern California, where the fishery experienced severe declines following the 2014-2016 marine heat wave (Fig. 1). Opening small areas could offer some initial harvest opportunities for red urchin divers in the north. However, the long-term benefit to the fishery would be limited due to the relatively small habitat area within these MPAs compared to the overall fishing grounds.

South of Point Conception, the urchin fishery was less affected overall by environmental events. As a result, the potential benefits of the proposed changes in those MPAs are expected to be minimal in both the short and long term.

The proposed change also has the potential to negatively affect non-consumptive activities, such as long-term research and monitoring. For example, the Partnership for Interdisciplinary Studies of Coastal Oceans (PISCO) conducts long-term monitoring of rocky reef habitat in each SMCA, except Sea Lion Cove SMCA. Adding another take allowance in these MPAs has the potential to introduce increased variability in the existing time series and would be detrimental to the long-term monitoring data.

QUESTION 16: IS THE PROPOSED CHANGE CONSISTENT WITH THE CFGC JUSTICE, EQUITY, DIVERSITY AND INCLUSION POLICY?

See Question 16 of Attachment 1.

QUESTION 17: IS THE PROPOSED CHANGE CONSISTENT WITH THE CFGC COASTAL FISHING COMMUNITIES POLICY?

The following analysis was prepared by CFGC staff. See Question 17 of Attachment 1 for additional context on CFGC's response.

The proposed would increase fishing access, particularly for commercial urchin fishing participants and the associated coastal fishing communities of:

- **2023-14MPA_1.** Sea Lion Cove SMCA
 - Noyo Harbor/Fort Bragg (~25 nautical miles (nm) from area of proposed change)
- **2023-14MPA_2.** Stewarts Point SMCA
 - Bodega Bay (~14 nm)
- **2023-14MPA_3.** Salt Point SMCA
 - Bodega Bay (~12 nm)
- **2023-14MPA_4.** Double Cone Rock SMCA
 - Noyo Harbor/Fort Bragg (~25 nm)
- **2023-14MPA_5.** Naples SMCA
 - Santa Barbara (~8 nm)
- **2023-14MPA_6.** Anacapa Island SMCA
 - Ventura Harbor (~10 nm)
 - Channel Islands Harbor (Oxnard) (~11-13 nm)
 - Santa Barbara (~25 nm)
- **2023-14MPA_7.** Point Dume SMCA
 - Port of Los Angeles (San Pedro) (~25 nm)
- **2023-14MPA_8.** Point Vicente SMCA
 - Oceanside Harbor (~6 nm)
 - Dana Point Harbor (~18 nm)
 - Santa Barbara (~28 nm)
- **2023-14MPA_9.** Swami's SMCA
 - Oceanside Harbor (~7 nm)
 - Dana Point Harbor (~18 nm)
 - San Diego Bay (~22 nm)

QUESTION 18: DOES THE PROPOSED CHANGE INTERACT WITH OR HAVE THE POTENTIAL TO AFFECT PROPOSED CHANGES IN OTHER 2023 MPA PETITIONS?

Yes. This petition has the potential to interact with petition 2023-27MPA_AM at Anacapa Island SMCA, where the petitioner is proposing to prohibit or limit lobster take to protect eelgrass from damage associated with anchoring and bottom gear. Granting this petition may result in increased anchoring in Anacapa Island SMCA. Granting 2023-27MPA is not anticipated to affect this petition.

This petition also has the potential to interact with petition 2023-33MPA_AM, which is proposing a westward expansion of Point Dume SMCA as well as adding recreational take from shore by hook-and-line and spearfishing. Although the petitions are not in conflict with each other, both are proposing to increase take at Point Dume in different ways. Granting both petition actions would result in an allowance for recreational take from shore by hook-and-line and spearfishing *and* an allowance for commercial take of urchin. Adding take allowances has the potential to compromise enforceability and introduce increased variability in temporal trends at this location and would be detrimental to long-term monitoring data.

V. SUPPLEMENTAL ANALYSES, DATA AND INFORMATION, AND CITATIONS
TABLES AND FIGURES

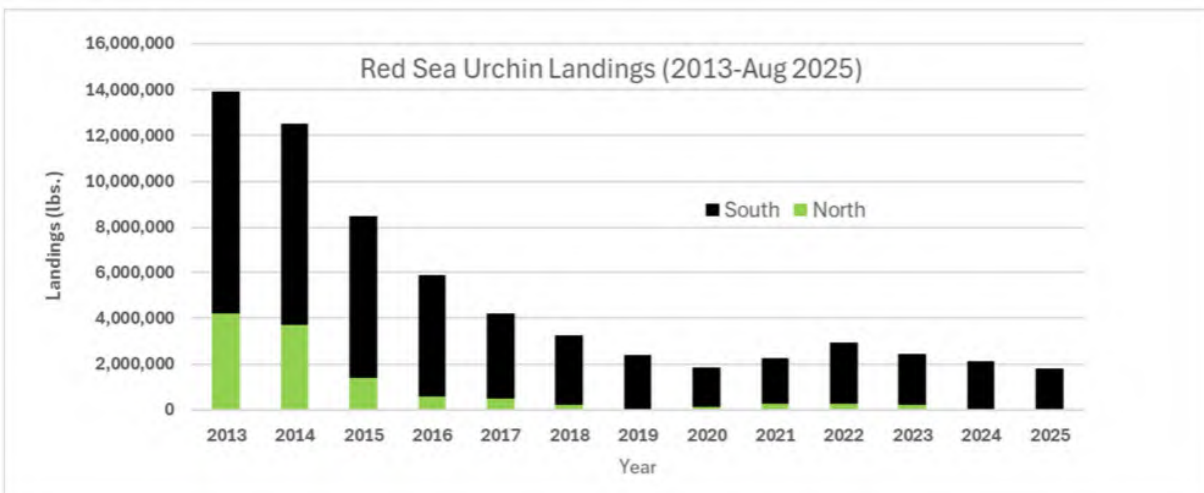

Figure 1. Statewide red sea urchin (*Mesocentrotus franciscanus*) annual landings (pounds of urchin) between 2013-2025. The north (green) and south (black) regions of the commercial fishery are demarcated by the Monterey and San Luis Obispo County line.

Dear California FGC,

Throughout this year, we have engaged with local communities regarding the proposed changes to the Marine Protected Area network currently under consideration.

Attached please find comments from residents across the South and Central Coast. We ask that you take these perspectives into account during your decision-making process.

Best regards,

Srividya Maganti
Environment California

Dear California Fish and Game Commission,

I support expanding Marine Protected Areas (MPAs) because

Please help protect our oceans & marine life - we need your help to make a difference.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Emma Wright
90045

I am concerned because California has lost up to ~90–95% of kelp forests in some regions. As a mom, climate steward and volunteer at an aquarium, I want these areas and wildlife available for future generations. We need to build resilience to climate change and MPAs do so through their kelp forests assisting against carbon buildup.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Cat Santacruz, Not just a mom club
90802

Strengthening these MPAs is important to my work as a master's student at UCI in conservation science. Highly protected MPAs are some of the best tools we have to protect and restore marine ecosystems; Opening MPAs to fishing would undermine this.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Olivia Frigyes, UCI
92706

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Alyson Kao, UC Irvine Masters in Conservation and Restoration
91709

Our oceans are bearing the brunt of human-caused climate change. The planet would actually be cooling slightly if it were not for the oceans absorbing our excess CO2 emissions. Ocean acidification and overfishing is a huge concern. Please protect the MPA and the only home humans have.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Mark Costello, Suitelife Systems
90755

Marine protected areas should remain protected from fishing due to the instability of our kelp forests, and therefore many species in our ocean. To combat climate, we need these areas to remain protected to keep stabilize, and further revitalize, our ocean to what it was even 10 years ago.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Alexa Morris
90604

Strengthening these MPAs is important to me because my life,community,and work revolves around the ocean.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Jo Ann Canty
90630

Marine protected areas should remain protected from fishing because MPAs enable sustainable fishing in the long term due to spill over effects. Without MPAs, vulnerable species will continue to be exploited and the lack of biodiversity would increase the difficulty to fight climate change.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Sarah Shimizu, UCI MCRS
92614

Marine protected areas should remain protected from fishing because they are some of the best tools we have to protect and restore marine ecosystems. Opening MPA's to fishing would directly cause the decrease of the health and well being of these ecosystems.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Sydney Stravolo, Newport Mesa Unified School District
90604

I'm concerned because I've seen...A decline in kelp therefore a necessary habit for fish and marine life.

Protect the MPAs and expand them!

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Marion Jaikowski, LA county fire
90250

Everything we do impacts the ocean in one way or another. By establishing MPAs and conserving and protecting ocean habitats we open the ocean to more interesting biodiversity and beautiful ecosystems to bloom. We already destroyed much of our land, we need to protect our waters while we still can.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Kyle Wakamoto, UCI
90503

Strengthening these MPAs is important because without diverse marine ecosystems our planet will be destroyed. In just California alone, around 90% of kelp forests have been lost in some regions. These forests not only help keep our marine life in balance, but also our ecosystem as a whole. They absorb tons of carbon dioxide that we as humans are dumping into our environment; this only heats up our planet more and more.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Ryan Contreras
90604

Marine protected areas should remain protected from fishing to protect those ecosystems. If the balance is thrown off, many of the organisms will suffer. There are already so many commercial fishing sites in nearby locations, there is no need for any more.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Alyssa Makishima
90275

Kelp forests have declined by as much as 93% off some parts of the California coast since the marine heatwave known as the Blob and the ecosystem cascades that followed. MPAs are a powerful tool to protect and restore these essential habitats that provide shelter for fish, sequester carbon, and protect our coasts from increasingly severe storms. As an environmental writer, climate educator, and ocean freediver and swimmer, I've seen first hand the sharp contrast in richness of habitat between protected and unprotected areas. I urge you to give our coastal oceans every protection they need to benefit human communities and our non-human neighbors.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Asya Graf
90802

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Greg Ayscue
90807

Marine protected areas should remain protected from fishing because our future generations should be able to continue on studying and understanding our planet. We are one planet and what goes on in the ocean influences what happens in the sky and land—it is all cyclical, nothing functions in a vacuum without the other. As a society that values quality of life and experiences, protecting our marine environments maintains that.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Christine Le
90505

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Rich tonti, American Legion Newport Beach
92646

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Dylan Burns
90403

As an avid surfer and environmentalist, I support MPAs and additional increased protection for the California coast. Marine scientists have confirmed how important kelp forests are to the local ecosystems, which thrive more when fishing is not allowed in these regions. California's coastal economy relies on healthy beaches, so let's promote them through more support for MPAs.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Elliott Wright
90045

Our current MPAs have shown how successful they can be in increasing ocean health outside of the MPA. Additionally, we need to start expanding to help the world reach our goal of 30% of our ocean protected by 2030. It's good for tourism, fisheries and the environment

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Kristen Gibbel
90802

California has made some great progress with Marine Protected Area in the past decades, we see and love so much about the lush wildlife in our home area. But we can't stop here or take the progress away, since California has lost up to ~90–95% of kelp forests in some regions. We need more protection, more MPAs now.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Ming Yang
90042

As a diver who has been to both MPA's and areas that are not protected, I have seen firsthand the abundance that comes with protections. Creating spillover and helping the fisherman communities as well. I see MPA's as a win-win for all people and our planet.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Marie McKenzie, Artist

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo

(San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing
Arnold Simon, Retired
91362

We are immensely fortunate, as Californians, to live alongside the ocean. We must commit to protecting the marine life that makes our ocean flourish. Marine Protected Areas are highly impactful in protecting and restoring marine ecosystems. Opening MPAs to fishing would undermine this and devastate marine life, creating more waste and even weakening the benefits of a diverse marine life long term. MPAs are a feasible way to enjoy the benefits of a healthy ecosystem for many years.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Evelyn Menjivar
90280

I support strengthening and maintaining MPA protections, specifically against commercial fishing, because of all of the benefits and value that MPAs provide for local communities of people, and local communities of marine life. MPAs act as reservoirs and nurseries for marine life, that spill over the boundaries of MPA borders to recharge the surrounding Marine communities. Protecting MPAs is necessary if we want to continue enjoying the benefits that those MPAs give to the surrounding areas. The protected wildlife within MPAs is personally important to me because as a diver these are natural wonders that occur only in Southern California. They're tourist destinations and drive ecotourism revenue, but for me as a social local, these MPAs are my backyard, these are places I connect with nature in the marine wild spaces that I grew up with. We decided to protect them in the first place for important reasons. I passionately believe we should continue protecting them, and consider the benefits of increasing and expanding their protections.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Neal Harvey
90815

Without our reefs there will be no fish and without the fish the larger fish such as dolphins, sharks and whales will become extinct. We need to preserve our ecosystem.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Debbie finley
92688

Strengthening these MPAs is important to me and to future generations because the ocean has the power to change lives. When I was eight years old, a school trip to Los Osos, California gave me my first glimpse of a tide pool — and the sea creatures I discovered there left an impression I carry to this day. That single experience shaped the way I see the natural world and my responsibility to protect it. Every child deserves that same opportunity, but with California having lost up to 90–95% of kelp forests in some regions, the ecosystems that make those moments possible are disappearing. Marine protected areas are one of the most effective tools we have to preserve these habitats so that wonder and discovery remain available to the next generation.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Roy Perez, Mission Hills Neighborhood Council

91345

Marine protected areas should remain protected from fishing because highly protected MPAs are some of the best tools we have to protect and restore marine ecosystems; and, opening MPAs to fishing would undermine this.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Mardly Pierre-Jerome
90808

Our very own survival will depend on protecting this marine food chain—we are all interconnected.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Anuradha Maganti

May 5, 2026

President Eric Sklar
California Fish and Game Commission

**RE: Support for California Sea Urchin Commission Petition 2023-14 MPA
May 19, 2026 Regional Meeting**

Dear President Sklar and Commissioners,

On behalf of the California Sea Urchin Commission (CSUC), I respectfully submit this letter requesting support for the CSUC petition 2023-14MPA at the upcoming May 19, 2026 Regional meeting to allow targeted commercial harvest of both purple (*Strongylocentrotus purpuratus*) and red (*Mesocentrotus franciscanus*) sea urchins within specified State Marine Conservation Areas.

Background and Scientific Context

For decades, California's commercial sea urchin divers have functioned as de facto stewards of kelp forest ecosystems. By harvesting urchins along the margins of kelp beds, divers historically reduced grazing pressure and supported kelp persistence and expansion. Long-term scientific observations support a more nuanced understanding of kelp–urchin dynamics. Multi-decade studies of the Point Loma kelp forest demonstrate no consistent relationship between fishing pressure and adverse kelp outcomes. California is now experiencing widespread kelp loss driven primarily by marine heat waves, disease impacts to key predators, and broader ecosystem disruption. These conditions have contributed to extensive urchin barrens.

Scientific literature and applied restoration efforts recognize urchin removal as a necessary and effective tool for kelp recovery. Targeted harvest—especially of purple urchins—can play a constructive ecological role when implemented with appropriate controls. The CSUC has co-funded an independent UC Santa Cruz study measuring sea urchin recruitment over a 37-year period. The findings, which have been shared with the Department of Fish and Wildlife, support that sea urchin harvests have no impact on recruitment in light of oceanographic cycle events. We look forward to the opportunity to engage with the scientific community in stakeholder meetings to support our petition before the Fish & Game Commission.

MLPA Alignment

The proposed actions are consistent with the goals of the Marine Life Protection Act, including protecting ecosystem function, sustaining marine populations, improving research opportunities, and ensuring MPAs function as an adaptive network.

Coastal Fishing Communities Policy

The California sea urchin fishery has experienced a dramatic decline, with landings dropping by more than 80% statewide. Providing a pathway for responsible participation in ecosystem management

through controlled harvest is consistent with the Commission's policy supporting coastal fishing communities.

Recommendation

The California Sea Urchin Commission respectfully requests that the Fish and Game Commission:

1. Approve Petition 2023-14MPA authorizing targeted commercial take; and
2. Advance an adaptive management or pilot framework allowing controlled harvest in MPAs, focusing on reducing grazing pressure of purple sea urchins.

Conclusion

This proposal represents a practical, science-informed opportunity to support kelp recovery while sustaining California's fishing communities and local food systems.

Respectfully submitted,

Sincerely,

A handwritten signature in black ink that reads "David J. Goldenberg". The signature is written in a cursive, flowing style.

David J. Goldenberg
Executive Director

To: FGC
Subject: Support marine protections and stop extractive use in our oceans!!!

I strongly oppose any petitions that would reduce protections or reopen MPAs to increased extractive use (including proposal 2023-18, 2023-14, and 2023-15). Instead, I strongly strengthening and expanding MPAs, especially through Tribally Led efforts (2023-28, 2023-29, 2029-19, 2023-20; 2023-34, 2023-33, 2023-27, and 2023-33). I am a SCUBA diver who has spent lots of time diving at Catalina, the Channel Islands, and Laguna Beach, even conducting eelgrass and juvenile kelp bass research at Big Fisherman's Cove out of Two Harbors. I've seen firsthand how limiting take allows kelp forests and marine life to recover, creating thriving ecosystems that benefit everyone who depends on the ocean. The proposed expansion of protections for critical habitats like eelgrass and kelp—paired with Indigenous stewardship approaches—represents a forward-looking model grounded in both science and traditional ecological knowledge. Experiences abroad, including in Palau, highlight what's possible when marine ecosystems are truly prioritized—they become more resilient and economically valuable through tourism and fisheries spillover benefits. At a time when kelp forests and marine life face unprecedented threats, we should be strengthening protections, not weakening them. **I strongly urge the Commission to support the tribally led petitions and ensure Indigenous leadership remains central to ocean stewardship. Healthy oceans are the foundation for long-term environmental and economic sustainability across California, and MPAs are vital in establishing that health.**

Thanks for your consideration,
Sarah Wood

From: Sarah Hamborg

To: FGC
Subject: MPA support

As a California scuba diver who has spent time in MPAs around Catalina and along our coast, I've seen firsthand how protected areas allow marine life to rebound—schools of fish are larger, ecosystems feel balanced, and the experience is noticeably richer. In contrast, areas without strong protections show clear signs of decline. MPAs are a vital way to protect our ecosystems, and to stand by California's priority of maintaining Ocean health instead of giving in to extractive, big businesses. I very much oppose any proposals that weaken protections (2023-18, 14, and 15) I strongly support maintaining and strengthening California's MPA network (2023-33, 34, and 27), including the tribally led petitions (2023-28, 29, 19, and 20), which bring essential stewardship and traditional ecological knowledge into management. Protecting these areas is not just about conservation—it benefits coastal communities, businesses, and future generations alike.

Students

Dear California Fish and Game Commission, Governor Newsom, and Secretary Crowfoot,

Our ocean is in trouble. After decades of industrial fishing and new impacts from marine heat waves, many of the most beloved species are disappearing. One of the best things we can do to protect our ocean is protect critical habitats like kelp forests and rocky reefs. Marine protected areas, which prohibit destructive activities and allow ocean ecosystems to recover.

The South Coast is located at the convergence of two major ocean current systems and is thereby characterized by extremely variable oceanographic conditions and a strong gradient in water temperature along the coastline. Due to these unique conditions, our shores are filled with invertebrate species like California spiny lobster, garibaldi, leopard sharks, large pods of common dolphins, bat rays, giant black sea bass and humpback whales. Our marine protected areas help give safe havens for these animals, and many more.

As a student-directed and student-funded organization representing over 25,000 dues-paying student members in the state of California, we're urging you to take action to protect our ocean and our futures. We are proud of much of the work our state has been doing to protect nature, but in order to follow through on the vision of our state outlined in the Nature Based Solutions Executive Order N-82-20, and Senate Bill 337 (to conserve 30 percent of California's lands and coastal waters by 2030), we need to take further action.

As our planet changes, so must our approach to managing our oceans. Over the past three years, we've engaged with Californians up and down the state, from our inland schools, to the coasts, and have seen overwhelming public support, especially from students. After all, it will be today's youth that will be most impacted by the decisions made in the MPA Decadal Management Review process.

Therefore, we are hereby stating our support for the following petitions to be approved:

- Petition 2023-24 (Laguna Beach SMCA (no-take))
- Petition 2023-33 (Point Dume SMCA, Cabrillo SMR)
- Petition 2023-34 (Farnsworth Onshore and Offshore SMCA)

We are hereby recommending denying the following petitions:

- Petition 2023-14 (Point Vicente SMCA (no-take), Swami's SMCA, Point Dume SMCA)

Best,

Jake Twomey, CALPIRG Students Board Chair

Voices for our Oceans

To: Governor Gavin Newsom, CA Fish and Game Commission,

While approximately 16% of California's coastal waters are conserved, only 12% have the level of protection scientists say is needed to defend against biodiversity loss and climate impacts. California's unique network of 124 Marine Protected Areas (MPAs) makes the state a global leader in protecting the critical habitats and life existing in and around our oceans. However, with a warming planet, and historic species extinctions, it is clear that California must strengthen and expand our existing network of protections with highly and fully protected MPAs. Highly protected areas only allow light extractive activities, while fully protected areas do not allow any extractive or environmentally destructive activities. **I am asking you to call for the adoption of more highly and fully protected marine areas, which must be the standard for protecting 30% of our ocean by 2030.**

Sincerely,

Voices for our Ocean (Extended)

Our oceans are amazing. In the Arctic Sea, polar bears hunt on ice floats. In the Atlantic, beaked whales surface for air, then dive thousands of yards underwater. Shelves of rock, layered with barnacles, seaweed, and snails, form habitats for sand crabs, striped bass, and lobster. In the Pacific, 15-foot long octopuses climb over boulders. And in oceans across the globe, coral reefs and give rise to thriving underwater communities, where sharks hunt, sea turtles glide, and seals forage.

But our oceans, and all the marine life they hold, face increasing risk:

1. Stop drilling: When we drill, we spill -- and black, sticky oil drowns birds and extinguishes vibrant underwater habitats. We need to stop offshore drilling in America's oceans.
2. Reduce plastics: Whales, seabirds, dolphins, and sea turtles all face health risks from the plastic pollution. We need to ban single-use plastic bags, foam cups, and foam takeout containers and tackle the larger problem of plastic waste
3. Protect threatened species: Acoustic noise, as well as certain fishing and shipping practices, threaten the health and safety of our marine mammals. We should stand up for our sea's most vulnerable animals and work to win policies that will protect our endangered ocean species.
4. Create protected areas: One of the best ways to replenish fish populations, protect ocean habitats and marine species, and build ocean resiliency in the face of climate change is to protect key habitats that sustain ocean life. In pursuit of fulfilling California's pledge to conserve 30% of our land and coastal waters by 2030, we support protecting 30% of our ocean are highly or fully protected.

We want to keep our oceans healthy and our sea animals safe so future generations can experience and wonder at the beauty of our seascapes. That's why we support added protections for our oceans.

	Representative, USAC, Los Angeles	be a global priority at this point however the lack of initiatives and efforts in the government spaces are appalling. I believe CALPIRG and this program is a step in the right direction!
Phoebe Chiu	Undergraduate Student Association Council Facilities Commissioner, Los Angeles	My name is Phoebe Chiu (she/her). I am an elected council member of UCLA and a long-term California resident, born in Oakland, raised in the San Francisco Bay Area, and attending UCLA. I vouch for increasing the number of California Marine Protected Areas (MPAs) to 30% of the coastline in this year's internal review process for the 30x30 Plan occurring within the California Department of Fish and Wildlife ending in April 2023. One of my favorite activities in California is visiting the tidepools by the beaches in Monterey and seeing the thriving wildlife. For me, marine life is one of the prettiest sights in California, and I want more of our community to have the opportunity to experience the natural beauties of our state by expanding the number of MPAs. Beyond that, the ocean is a critical tool to tackle climate change, with wetlands and seagrasses absorbing five times the carbon of land-based forests and wetland ecosystems being more protective than constructed seawalls. Also, while the fishing industry might provide pushback on increasing MPAs, protecting marine life is critical for ensuring a healthy fish population, especially if fish migrate closer to the polls if we allow the temperatures of our oceans to rise due to a lack of protection. Lastly, over 40% of the US population lives in coastal counties, and nearly 75% of coastal areas do not have adequate plans to address future sea level rise, which could be up to 6 ft. California is not immune to this issue. Therefore, I want to become a Voice for Our Oceans to call upon the California Department of Fish and Wildlife to consider younger and future generations at risk of displacement if we do not overhaul our plans to protect our homes and ocean.
Kristin Dobbin	Assistant professor of Cooperative Extension, Berkeley	It is critical that we follow our youth leaders in protecting our oceans and their futures
Kate Harrison	Councilmember, Berkeley City Council	They are the heart of our ecosystem.
Yan Zhao	Vice Mayor, City of Saratoga	According to scientists' research, at least 30% of California must be protected in order to protect the state from environmental collapse. Our oceans are obviously incredible homes to lots of

Expand Marine Protected Areas for ocean health

California's oceans are severely under threat from practices we have known for a while are dangerous, like offshore oil drilling and overfishing. From the sea otters in kelp forests to the whales far into the Pacific Ocean, the species that make our coastline special are suffering. It is time to stand up for our oceans and stop dangerous activities so our ecosystems can bounce back, and ensure that the oceans we grew up with will remain for generations to come.

Marine Protected Areas have helped habitats thrive away from harmful human activities in California. It only makes sense to continue what is working, and increase California's Marine Protected Areas to 30% in order to protect the oceans we all love. California, with its iconic coast, can be a leader on ocean conservation and set the standard for the country and the world to follow.

Oceans Day

By Hudson Truchard, S.B.
Mon May 13, 2024 | 6:03am

Add independent.com on Google

As a kid, I was constantly at the beach, its vast ecosystems inspiring me to pursue a career in a STEM field. To this day I chase the wonder I felt looking at the mini ecosystems of tide pools, fascinated by the diverse life my two sisters and I found within them.

In order to do my part and push the Legislature to truly start gearing toward passing more climate conscious bills, I went to Sacramento CalPIRG to take part in Oceans Day, a massive coalition of environmental organizations all working toward one important goal: ensuring California's oceans and coastlines remain the important social and environmental asset they are. We hosted a press conference where various senators and assemblymembers spoke on the sheer importance of the bills they were championing, and their hopes to make strides toward a more equitable, environmentally sustainable future for California.

To ensure that future generations can be instilled with the same wonder I felt as a child, we need to push for the expansion and continued protection of our Marine Protected Areas to guarantee that we are not just idly waiting for the inevitable collapse of California's amazing coastline. MPAs are shown to be a critically important tool that we need to utilize if we want to protect the immense biodiversity and cultural significance of our coastline as they protect marine species from threats like overfishing, pollution, and habitat destruction.

Letters to the Editor

We need to expand our Marine Protected Areas

More than 90% of Orange County's kelp forests have been lost since the 1980s due to overfishing of urchin-eating species like lobster and sheephead (Orange County Coastkeeper). These kelp forests are a key base for ocean ecosystems up and down the coast, homing countless species of marine animals. They are iconic parts of California's identity, and they are what make our oceans unique.

I have grown up in Laguna Beach, snorkeling through the kelp forests and watching them change through the years. Marine Protected Areas were established along Laguna Beach coasts in 2012, and since then, I have seen the beautiful ecosystems slowly build back to their true beauty.

The biodiversity along our beaches has thrived over the past 10 years, and I have seen firsthand the effectiveness of establishing Marine Protected Areas, which protect our ecosystems from harmful human activities that prevent them from thriving.

We need to protect our oceans so that they can thrive once again. By expanding Marine Protected Areas, we can revive more of these beautiful coastlines.
