

Staff Summary for May 19, 2026

5. Marine Protected Area (MPA) Petition 2023-34MPA**Today's Item****Information ☒****Action ☐**

Request to change the current take allowance at Farnsworth Onshore SMCA and Farnsworth Offshore SMCA to allow only recreational spearfishing.

Summary of Previous/Future Actions

• Received 20 MPA petitions; referred to the Marine Resources Committee and the Department for review	December 2023; February 2024
• Granted or denied all individual actions in the five “bin 1” MPA petitions	December 2024
• Received Department bin 2 petition evaluations for 10 non-tribally led or co-led petitions	April 15-16, 2026
• Received petitioners’ presentation and discussed region specific petitioned actions in bin 2 MPA petitions from Del Norte through Monterey counties	April 21, 2026
• Received petitioners’ presentation and discussed region specific petitioned actions in bin 2 MPA petitions from San Luis Obispo through Santa Barbara counties, northern Channel Islands, and Santa Barbara Island	May 5-6, 2026
• Today, receive petitioners’ presentation and discuss region-specific petitioned actions in bin 2 MPA petitions from Los Angeles through San Diego counties and Catalina Island	May 19, 2026
• Receive Department bin 2 evaluations for five tribally led or co-led petitions	Date to be determined

Background

In November 2023, the Commission received Petition 2023-34MPA (Exhibit 1), alongside 19 other petitions proposing changes to the state’s MPA network and management program. In February 2024, the Commission referred all MPA petitions to the Department for its evaluation and recommendation, while developing and updating guidance over time.

For detailed background information and key documents related to the process leading to this stage — including the companion document to the Department’s evaluations for non-tribally led or co-led petitions, the Department’s evaluations presentation, and a letter from the California Ocean Protection Council providing input to complement the Department’s evaluations — see the [Introduction to Bin 2 MPA Petitions and Evaluations](#).

Petition Amendments

Bin 2 petitioners were provided until March 2025 to submit formal amendments to their original petitions for inclusion in the Department’s evaluation; this petition was not formally amended by the March 2025 deadline.

Staff Summary for May 19, 2026

Overview of Actions in Petition 2023-34MPA Relevant to This Region

This petition, submitted by Environment California and Azul, proposes three actions to reclassify one SMCA and modify allowed uses at two other SMCAs; two of the proposed actions are located in this region (action numbers from the Department's evaluation are included for reference):

Action 2. Change the current take allowance at Farnsworth Onshore SMCA to allow only recreational spearfishing.

Action 3. Change the current take allowance at Farnsworth Offshore SMCA to allow only recreational spearfishing.

Stated Intent

The petitioners state that the proposed change is motivated by low compliance with existing "extremely complicated" Farnsworth Onshore/Offshore SMCA regulations and by concerns that the current level of protection is insufficient in the face of "growing threats related to climate change, increased human use, new ocean uses, and infrastructure projects such as offshore wind and aquaculture." They believe the proposed regulation changes will improve both compliance and the level of protection. See Exhibit 1 for more details.

Public Comments

The Commission has received public comments on MPA petitions continuously since petitions were submitted in late 2023. Staff has compiled into a single packet the comments received for this petition that were included in committee or Commission meeting binders or supplemental handouts from the December 2023 through the May 5-6, 2026 Commission meetings (Exhibit 2). Comments received after the May 5-6, 2026 Commission meeting, but before this meeting's comment deadline, are included as exhibits to this staff summary.

Petition Evaluations

On March 20, 2026, the Department publicly released its [evaluations and recommendations for the ten petitions that were not tribally led or co-led](#), including for Petition 2023-34MPA (Exhibit 3). The Department also released a [companion document](#), to offer essential context that is intended to be reviewed before the individual petition evaluations.

In addition, on March 20, 2026 the [California Ocean Protection Council \(OPC\), in its role as policy lead for the MPA network, sent a letter to the Commission](#) outlining its overarching perspectives on the MPA petitions, including the tribally led and co-led petitions (see [OPC news release, dated March 20, 2026](#)). OPC indicated that it plans to provide more detailed input on the bin 2 petitions using a policy lens, intended to complement the Department's evaluations. OPC now anticipates transmitting its evaluation for consideration at the June 2026 Commission meeting.

Today's Meeting

Today, the petitioners will present (Exhibit 8) Petition 2023-34MPA and describe any proposed changes since the March 2025 amendment deadline. This meeting provides petitioners with an opportunity to engage in dialogue with the Commission alongside robust public participation.

Staff Summary for May 19, 2026

All meeting participants are encouraged to review the [Regional Meeting Expectations and Guidelines](#) (included in the agenda) as a reference for engaging in today's meeting.

Significant Public Comments

1. In handwritten letters collected and transmitted by an environmental non-governmental organization, more than 50 central and southern California coastal residents express opposition to petitions proposing to increase commercial fishing access within MPAs, including Petition 2023-34MPA. The commenters state that, instead, they support petitions that would “expand or strengthen protections” within California’s MPA network, including Petition 2023-34MPA. (Exhibit 4)
2. Two California divers, in separate comments, urge the Commission to deny petitions that they believe would reduce protections or reopen MPAs to increased extraction, including Petition 2023-34MPA. They support petitions that will “strengthen protections” and tribally led petitions, noting that indigenous leadership is central to ocean stewardship. Both highlight the role that healthy oceans and MPAs play in California’s long-term environmental and economic sustainability. (See example in Exhibit 5.)
3. Student leaders from UC Riverside, UC San Diego, UC Irvine, and UCLA urge the Commission to “protect critical habitats” like kelp forests and rocky reefs within MPAs by supporting MPA petitions 2023-33, 2023-24 and 2023-34 . The submission includes over 21,000 student signatures and updates on related outreach efforts. (Exhibit 6)
4. A commercial fishing association opposes Petition 2023-34MPA, as well as petitions 2023-24MPA and 2023-33MPA, that propose to expand closures, arguing they would permanently eliminate essential lobster fishing grounds in areas already heavily restricted without clear scientific justification, and would cause substantial socioeconomic impacts. The association emphasizes that its fleet cannot support closures that would harm other local fisheries, noting that most fishermen rely upon multiple fisheries to sustain their livelihoods. (Exhibit 7)

Comments in the letter addressing other petitions and regional meetings are summarized under Agenda Item 6(A), General Public Comment.

Recommendation

Commission staff: Based on the day’s discussion, consider what additional information, if any, will be needed to inform a Commission decision on the petition.

Department: Deny, for the reasons detailed in Exhibit 3. In summary:

- The available information does not demonstrate that the proposed change to further restrict allowed gear types in the affected MPA would produce measurable ecological benefits to benthic species or the MPA network beyond current conditions.
- Concerns raised regarding illegal fishing are primarily related to enforcement challenges rather than regulatory confusion and are better addressed through non-regulatory measures.
- Longterm MPA monitoring data do not indicate declines in key protected resources, such as California hydrocoral.

Staff Summary for May 19, 2026

- Implementing the proposed change would be inconsistent with the original intent of the MPAs, unlikely to advance MLPA Goals, and would unnecessarily impact recreational and commercial fisheries.

Motion (N/A)

Tracking Number: (2023-34MPA
)

To request a change to regulations under the authority of the California Fish and Game Commission (Commission), you are required to submit this completed form to: California Fish and Game Commission, (physical address) 1416 Ninth Street, Suite 1320, Sacramento, CA 95814, (mailing address) P.O. Box 944209, Sacramento, CA 94244-2090 or via email to FGC@fgc.ca.gov. Note: This form is not intended for listing petitions for threatened or endangered species (see Section 670.1 of Title 14).

Incomplete forms will not be accepted. A petition is incomplete if it is not submitted on this form or fails to contain necessary information in each of the required categories listed on this form (Section I). A petition will be rejected if it does not pertain to issues under the Commission's authority. A petition may be denied if any petition requesting a functionally equivalent regulation change was considered within the previous 12 months and no information or data is being submitted beyond what was previously submitted. If you need help with this form, please contact Commission staff at (916) 653-4899 or FGC@fgc.ca.gov.

SECTION I: Required Information.

Please be succinct. Responses for Section I should not exceed five pages

1. **Person or organization requesting the change: Environment California Research and Policy Center and Azul**
Name of primary contact person: Laura Deehan, Environment California Research and Policy Center
Address: 3435 Wilshire Blvd., Suite 385, Los Angeles, CA, 90010
Telephone number: (415) 420-4710
Email address: Ideehan@environmentcalifornia.org
2. **Rulemaking Authority (Required)** - Reference to the statutory or constitutional authority of the Commission to take the action requested: Authority cited: Sections 200, 205(c), 265, 399, 1590, 1591, 2860, 2861 and 6750, Fish and Game Code; and Sections 36725(a) and 36725(e), Public Resources Code..
3. **Overview (Required)** - *Summarize the proposed changes to regulations:* In order to advance the goals of the California Marine Life Protection Act and better protect our ocean and coastal resources into the future, this joint petition submitted by Environment California RPC and Azul seeks to increase the level of protection and help to improve enforceability for three state MPAs. We request that the CA Fish & Game Commission: 1) upgrade Point Buchon State Marine Conservation Area (SMCA) to a no-take State Marine Reserve (SMR) to streamline and enhance enforcement and compliance and increase protection in the face of future stressors, and 2) modify the regulations of Farnsworth Onshore SMCA and Farnsworth Offshore SMCA to allow only recreational spearfishing within their boundaries, in order to better protect this highly sensitive, rare, and valuable ecosystem. There may be additional state MPAs in need of similar action, and we encourage the state to do its own analysis to identify existing MPAs in need of enhanced biodiversity conservation, streamlined enforcement, and increased ease of compliance.

4. **Rationale (Required)** - *Describe the problem and the reason for the proposed change:*
According to law enforcement updates and the [California Compliance Forums](#) convened by the MPA Collaborative Network, compliance with [Point Buchon SMCA/SMR](#) and [Farnsworth Onshore/Offshore SMCA](#) regulations is very low. The Compliance Forums found that compliance is particularly compromised in areas with confusing regulations, boundaries, or jurisdictions, and these MPA clusters are prime examples. The offshore/onshore boundary divisions of these MPA clusters, along with the extremely complicated regulations for both Farnsworth SMCAs, make it difficult for stakeholders to understand the two most important compliance-related questions: where is the MPA, and what does it allow?

In addition, since the California MPA network's creation, extensive peer-reviewed research has underscored the differences in outcomes between strongly and lightly protected marine areas. With coastal and marine ecosystems facing growing threats related to climate change, increased human use, new ocean uses, and infrastructure projects such as offshore wind and aquaculture, significant improvements to the existing MPA network are warranted to better protect our ocean and coastal resources into the future. The regulation changes proposed herein seek to improve conservation outcomes for California SMCAs with compliance issues and low levels of protection.

See attached Petition Narrative for full rationale and site-specific information.

SECTION II: Optional Information

5. **Date of Petition:** 11/29/2023
6. **Category of Proposed Change**
☐ Sport Fishing
☐ Commercial Fishing
☐ Hunting
☒ Other, please specify: MPAs, Section 632.
7. **The proposal is to:** *(To determine section number(s), see current year regulation booklet or <https://govt.westlaw.com/calregs>)*
☒ Amend Title 14 Section(s): [Westlaw regulations](#).
☐ Add New Title 14 Section(s):
☐ Repeal Title 14 Section(s):
8. **If the proposal is related to a previously submitted petition that was rejected, specify the tracking number of the previously submitted petition**
9. Or ☒ Not applicable.

10. **Effective date:** If applicable, identify the desired effective date of the regulation. If the proposed change requires immediate implementation, explain the nature of the emergency: As soon as is practicable for the State of California.
11. **Supporting documentation:** Identify and attach to the petition any information supporting the proposal including data, reports and other documents:
- a. Petition Narrative
 - b. Appendix A - Letters of support
 - i. Petitioner's letter of support
 - ii. Letter from Assemblymember Dawn Addis
 - iii. Joint letter from 9 leading scientists and co-authors of The MPA Guide
 - iv. Joint letter from 27 scientists, researchers, and educators
 - v. Joint letter from 20 NGOs
 - vi. Letter from Environmental Action signed by 2,487 member of the public
 - vii. Letter signed by 214 CALPIRG students
 - viii. Letter from 5 California college student leaders
 - ix. Petition signed by over 7,000 members of the public
12. **Economic or Fiscal Impacts:** Identify any known impacts of the proposed regulation change on revenues to the California Department of Fish and Wildlife, individuals, businesses, jobs, other state agencies, local agencies, schools, or housing:

The Point Buchon SMCA currently allows for the recreational and commercial take of salmon and albacore. While it is possible there may be very minor short-term economic impacts associated with closing the area, depending on the level of albacore fishing conducted within the existing SMCA, they are expected to be negligible. Salmon fishing is presently closed for all state waters, and the extremely poor status of salmon stocks no longer appear to support specific allowances in the state's MPA network. In addition, we argue that the long-term benefits provided by an increased level of protection and streamlined enforceability for this area will outweigh the short-term costs, especially in the face of climate change, increasing ocean uses and competition, and potential impacts from offshore wind development.

We acknowledge that the proposed regulations change to the Farnsworth SMCAs to may have some impact on the commercial market squid fishery and recreational sportfishing. However, the risk of damage to this highly sensitive ecological area is too high to allow even for pelagic fishing activities, which can result in bottom disturbance and bycatch. For instance, party boat patrons have often been observed dropping weighted lines that interact with bottom habitat in the Onshore SMCA (pers. comms with local recreational fisher wishing to remain anonymous). Further, these proposed regulation changes strongly align with and help to promote the high intrinsic and recreational value of the area, improving the safety and quality of recreation for divers, underwater photographers, and spearfishers.

13. **Forms:** If applicable, list any forms to be created, amended or repealed:

SECTION 3: FGC Staff Only

**Petition to Increase Level of Protection and Streamline Enforcement
for Several California State MPAs**

Joint Submission by Environment California and Azul

PETITION NARRATIVE

Overview

In order to advance the goals of the California Marine Life Protection Act (MLPA) and better protect our ocean and coastal resources into the future, this petition seeks to increase the level of protection and help to improve enforceability for three state MPAs. We request that the CA Fish & Game Commission: 1) upgrade Point Buchon State Marine Conservation Area (SMCA) to a no-take State Marine Reserve (SMR) to streamline and enhance enforcement and compliance and increase protection in the face of future stressors, and 2) modify the regulations of Farnsworth Bank Onshore SMCA and Farnsworth Bank Offshore SMCA to allow only for recreational spearfishing to take place within their boundaries, in order to better protect this highly sensitive, rare, and valuable ecosystem. There may be additional state MPAs in need of similar action, and we encourage the state to do its own analysis to identify existing MPAs in need of enhanced biodiversity conservation, streamlined enforcement, and increased ease of compliance.

Enforcement & compliance within California MPAs

The success of any MPA relies on effective enforcement and community support and understanding of regulations. A global synthesis of MPA outcomes identified being well-enforced as one of the five essential features predicting MPA success around the world (Edgar et al. 2014). Further, one of the explicit goals of the MLPA is to “ensure California’s MPAs have...adequate enforcement” (Goal 5, California MLPA).

However, despite laudable investment in enforcement, outreach, and education from the state, there is a high level of illegal fishing and other FGC violations occurring in and near some of California’s MPAs (California Statewide Compliance Forum 2022). The MPA Collaborative Network held over 15 virtual and in-person public fora gathering over 500 stakeholders from 2019 to 2020 to discuss MPA compliance concerns and to brainstorm ideas to address those concerns. The Forums found that compliance is particularly compromised in areas with confusing regulations, boundaries, or jurisdictions. Public awareness and understanding of MPA regulations is crucial for compliance, and confusing regulations and a lack of understanding of restrictions can contribute to unintentional violations. While some of California’s State Marine Conservation Areas (SMCAs) have limited take allowances and provide a relatively high level of conservation value to most species, other SMCAs currently have extensive and confusing regulations, and several are paired with onshore no-take State Marine Reserves (SMRs) to form an MPA cluster – making it even more difficult for stakeholders to understand the two most

important compliance-related questions for MPAs: where are they, and what do they allow?¹ Proposed stakeholder solutions include potential regulatory changes for fishing and other activities along the coast, as well as greater investment in education and outreach.

Complicated regulations also make it exceedingly difficult for law enforcement officers or the public monitoring these areas to visually assess whether a vessel's occupants are complying with on-the-water regulations. For instance, if an officer sees a vessel in an SMCA using rod and reel gear where fishing for some pelagic species is allowed but fishing for other species is prohibited, it is virtually impossible for that officer to tell whether the boaters are complying without boarding the vessel to assess the boaters' catch. This only increases the amount of time, resources, and dollars necessary to ensure compliance in these areas, as California's enforcement officers also contend with limited staffing and budgets (Murray and Hee 2019). The same is true around the world – in fact, research has shown that areas with a mixture of partial and full protection are up to twice as expensive to manage than a simpler, fully protected area (Ban et al. 2011).

Higher levels of protection lead to greater benefits

Since the California MPA network's creation, extensive peer-reviewed research has underscored the differences in outcomes between strongly and lightly protected marine areas. We now know that highly and fully protected areas – those where little to no extractive or destructive activities are permitted – provide the greatest ecological and conservation benefits (Gronrud-Colvert et al. 2021). For instance, one meta-analysis of global MPAs found that fish biomass in fully protected ("no-take") MPAs is 343% higher than in partially-protected MPAs (Sala & Giakoumis 2018). Another global analysis found that weakly regulated areas showed minimal ecological benefits, while highly to fully protected areas showed higher abundance and biomass of commercially important species (Zupan et al. 2018). Similarly, a 24-year long timeseries of catch data in Kenya found that per-person daily catches increased 25 times faster in waters around fully protected MPAs than in areas that regulated fishing gear only (McClanahan 2021). In addition, fully protected areas have been shown to provide stronger climate adaptation and resilience benefits than lightly protected areas (Roberts et al. 2016). Finally – and importantly – an assessment of ecological effectiveness and social perceptions of MPAs in southern Australia found that partially protected areas had no more fish, invertebrates, or algae than unprotected areas; were poorly understood by coastal users; were not more attractive than unprotected areas; and were not perceived to have better marine life than unprotected areas. In addition, the fully protected areas were not only more effective ecologically, but were perceived more positively by local communities and visitors and assigned a higher value by local communities and visitors (Turnbull et al. 2021).

¹ The MPA Collaborative Network's Vetted Regulation Recommendations cite many instances where confusing boundaries and regulations are leading to unintended violations or accidental poaching in SMR/SMCA complexes. For examples, see lines 22, 37, 43, 47, 50, 51, 54, 55, 58, 62, 63, 65, 66, 71, 87, 90, 92, 97, 99, 104, 133, 145, 146, 148, 154, 155, and 165.

With coastal and marine ecosystems facing growing threats related to climate change, increased human use, new ocean uses, and infrastructure projects such as offshore wind and aquaculture, significant improvements to the existing MPA network are warranted to better protect our ocean and coastal resources into the future. Governor Newsom recently set the goal of protecting 30% of lands and coastal waters by 2030 ('30x30'), which was codified with the passage of SB337 in 2023. However, the area protected within the statewide MPA network represents far below 30% of our state waters. Only 12% of state waters are covered in highly to fully protected areas, and an additional 4% is covered in lightly protected areas that allow considerable human impacts within their boundaries. In total, only 16% of state waters are currently protected within an MPA. As the state works to achieve its 30x30 goal, the FGC and other agencies should consider where increases in the level of protection offered by existing California MPAs are warranted, to ensure the network is able to provide the best ecological and social outcomes possible.

Proposed regulation changes for California SMCAs with compliance issues and low levels of protection

Point Buchon SMCA

Point Buchon SMCA is located eight miles south of Morro Bay in San Luis Obispo County. It is part of an onshore-offshore pair of adjoining MPAs covering almost 19 square miles of rocky reefs, sandy seafloor and beaches, kelp forests, rocky intertidal areas, and offshore pinnacles. The adjoining no-take marine protected area, Point Buchon State Marine Reserve, covers the inshore portion of the MPA complex from the mean high tide line to the halfway point between the coast and the state waters limit. Point Buchon SMCA sits offshore of the SMR and encompasses more than 12 square miles of waters that range from about 200 to 400 feet deep.

Compliance with Point Buchon's regulations appears to be very low. The California Compliance Forum in San Luis Obispo cited "a high level of illegal offshore fishing and squid boats in the Point Buchon MPAs", and the Decadal Management Review revealed Point Buchon SMCA had the third highest number of violations for MPAs in Central Coast region over past decade ([DMR Report](#)). In 2022, it was listed among the top 10 MPAs with the highest MPA violations across the entire state ([Committee Staff Summary for July 20, 2023 MRC Meeting](#)).

At the same time, the potential for non-fishing impacts to the area are increasing. The Morro Bay Wind Energy Area (WEA) lies in the federal waters just outside of the Point Buchon SMCA, and the Bureau of Ocean Energy Management recently issued two leases for offshore wind development in the Morro Bay WEA. These offshore wind farms are anticipated to transmit power via undersea cables that connect with onshore power terminals, potentially at the nearby Diablo Canyon Power Plant located just outside the southern boundary of Point Buchon SMR. Offshore wind construction and operations are expected to impact the marine environment through increased ocean noise, the introduction of electromagnetic fields, alterations to existing habitats and hydrodynamics, and the possible release of contaminants (NOAA Fisheries). While the state of California is working closely with the federal government to minimize environmental

impacts, the region, and the Point Buchon SMR/SMCA complex, will experience some level of impact related to the development of heavily industrialized renewable energy projects. By minimizing ecosystem stressors, fully protected areas provide maximum resilience and greater opportunity to identify the cause of ecosystem impacts (Gronrud-Colvert et al. 2021).

Current regulations

Point Buchon SMCA currently allows for recreational and commercial salmon and albacore fishing within its boundaries. The current regulations read as follows:

“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource, EXCEPT:

Recreational and commercial take of salmon and albacore is allowed.”

California’s salmon fishery has experienced significant challenges due to the proliferation of dams, the loss of wetlands and estuaries, and recently, prolonged drought and increased warming that affects freshwater habitat. As a result, the entire fishery was closed in 2023. Sport fishing for albacore is largely centered from the California Channel Islands south to Ensenada. Given these circumstances, converting the Point Buchon SMCA into an SMR would provide full no-take protection for this important area with de minimis impacts to fishing activity.

In addition, the boundary between the SMCA and SMR is oriented as a diagonal line that runs parallel to the coastline. The headlands of Point Buchon hide the southeast corner of the SMCA/SMR complex from view from the north, allowing for poaching to occur more easily in the SMR. Enforcement officers patrolling the busier, more heavily trafficked waters to the north of the point aren’t able to see fishing boats that enter the SMR via the southeast corner of the SMCA, and unless enforcement officers take the time to cross the point to patrol this area specifically, vessels are able to fish in the SMR without being detected.

Proposed regulation change

We propose merging the Point Buchon SMR/SMCA complex into a single State Marine Reserve, creating a more enforceable protected area able to confer greater conservation benefits consistent with its intended role as an “anchor” protected area in the Central Coast region. The new, proposed regulations would reflect those of Point Buchon SMR, and would read as follows:

“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource.”

We also strongly recommend the state revisit installing a camera near the flagpole looking south at Point Buchon. A camera or the M2 radar system could inform officers and help address offshore poaching regularly occurring there.

Socioeconomic impacts

As mentioned above, the Point Buchon SMCA currently allows for the recreational and commercial take of salmon and albacore. While it is possible there may be very minor short-term economic impacts associated with closing the area depending on the level of albacore fishing conducted within the existing SMCA, they are expected to be negligible. Salmon fishing is presently closed for all state waters, and the extremely poor status of salmon stocks no longer appear to support specific allowances in the state's MPA network. In addition, we argue that the long-term benefits provided by an increased level of protection and streamlined enforceability for this area will outweigh the short-term costs, especially in the face of climate change, increasing ocean uses and competition, and potential impacts from offshore wind development.

Historical context and intent

The Point Buchon SMR/SMCA complex was placed near the Diablo Canyon Power Plant to align with the no-fishing zone already surrounding the power plant, thereby limiting the negative socio-economic effects on the local fishing community. The state decided to split the Point Buchon MPA into an onshore SMR and an offshore SMCA to minimize the impacts on recreational fishing in the area, allowing for recreational salmon fishing within the SMCA.

One of the objectives of the Point Buchon SMR/SMCA complex is to "Protect ecosystem structure, function, integrity and ecological processes...from disturbances both natural and human induced". In light of increased impacts from nearby offshore wind development areas, stronger protections are warranted for this MPA complex to continue meeting stated objectives.

Farnsworth Onshore and Offshore SMCAs

The Farnsworth Onshore/Offshore SMCA complex is located on the windward side of Santa Catalina Island, a little more than 20 miles south-southwest of the Southern California mainland. This SMCA complex protects a series of pinnacles and underwater mountains known as Farnsworth Bank, which is one of only four known locations of a rare purple hydrocoral and is a well-known, exceptional location for advanced SCUBA diving and underwater photography. Farnsworth Onshore SMCA also provides critical habitat for the endangered black abalone, which dwells in the intertidal zone, and the endangered white abalone, which inhabits the deeper, subtidal zone. The full SMCA complex protects the unique cooler water, wave-exposed portions of the "east islands" bioregion and includes a high diversity of productive, relatively high-exposure habitats, productive nearshore reefs and a wider shelf than found on the leeward side of Catalina Island.

Both SMCAs allow for several gear types and species to be targeted, with some slight differences between the two areas. The regulations themselves and also the regulation differences are challenging to understand, creating confusion and unintentional regulation violations. Commercial passenger fishing vessels (also known as "party boats") are also often

seen illegally fishing in Farnsworth Onshore SMCA, moving out if they see a patrol boat approaching ([MPA Collaborative Network's Vetted Regulation Recommendations](#) lines 146 & 147).

Current regulations

These SMCAs are currently “minimally protected” according to the MPA Guide framework (Grorud-Colvert et al. 2021), due to the substantial number of gear types allowed and species targeted. The regulations for Farnsworth Onshore SMCA are currently as follows:

“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource, EXCEPT:

Recreational take of market squid by hand-held dip net; white seabass and pelagic finfish (northern anchovy, barracudas, billfishes, dorado (dolphinfish), Pacific herring, jack mackerel, Pacific mackerel, salmon, Pacific sardine, blue shark, salmon shark, shortfin mako shark, thresher shark, swordfish, tunas, Pacific bonito, and yellowtail) by spearfishing; and marlin, tuna and dorado by trolling is allowed.

Commercial take of coastal pelagic species (northern anchovy, Pacific sardine, Pacific mackerel, jack mackerel, and market squid) by round-haul net, brail gear, and light boat; and swordfish by harpoon is allowed (no commercial take of marlin is allowed). Not more than five percent by weight of any commercial coastal pelagic species catch landed or possessed shall be other incidentally taken species.”

The regulations for Farnsworth Offshore SMCA are currently as follows:

“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource, EXCEPT:

Recreational take of market squid by hand-held dip net; white seabass by spearfishing; pelagic finfish (northern anchovy, barracudas, billfishes, dorado (dolphinfish), Pacific herring, jack mackerel, Pacific mackerel, salmon, Pacific sardine, blue shark, salmon shark, shortfin mako shark, thresher shark, swordfish, tunas, Pacific bonito, and yellowtail) by hook-and-line or spearfishing, and marlin, tuna and dorado by trolling is allowed.

Commercial take of coastal pelagic species (northern anchovy, Pacific sardine, Pacific mackerel, jack mackerel, and market squid) by round-haul net, brail gear, and light boat; and swordfish by harpoon is allowed (no commercial take of marlin is allowed). Not more than five percent by weight of any commercial coastal pelagic species catch landed or possessed shall be other incidentally taken species.”

The difference between the two is almost impossible to detect, leading to confusion about what is and isn't permitted, increasing chances of accidental violations, and possibly acting as a disincentive for law enforcement officers to enforce these MPAs and/or prosecutors to pursue these cases.

Proposed regulations

To simultaneously streamline regulations, increase the level of protection for this ecologically significant site, and honor the original intent of the SMCA complex to allow for recreational use, we propose adjusting the regulations for both SMCAs to allow only for recreational take via spearfishing. Spearfishing is a relatively low-impact activity that, with close attention to buoyancy and best practices, has a low likelihood of interaction with bottom habitat. The new, proposed regulations for both SMCAs (effectively merging them into one) would read as follows:

“It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource, EXCEPT:

Recreational take of white seabass and pelagic finfish (northern anchovy, barracudas, billfishes, dorado (dolphinfish), Pacific herring, jack mackerel, Pacific mackerel, salmon, Pacific sardine, Pacific bonito, and yellowtail by spearfishing.”

Socioeconomic impact

We acknowledge that closing this area to non-recreational spearfishing may have some impact on the commercial market squid fishery and recreational sportfishing. However, the risk of damage to this highly sensitive ecological area is too high to allow even for pelagic fishing activities, which can result in bottom disturbance and bycatch. For instance, party boat patrons have often been observed dropping weighted lines that interact with bottom habitat in the Onshore SMCA (pers. comms with local recreational fisher wishing to remain anonymous). Further, these proposed regulation changes strongly align with and help to promote the high intrinsic and recreational value of the area, improving the safety and quality of recreation for divers, underwater photographers, and spearfishers.

Historical context and intent

This area has been protected since 1973, when the California Fish and Game Commission designated Farnsworth Bank an ecological reserve. During the MLPA planning process, a much larger SMR protecting Farnsworth Bank was proposed in order to fully protect Farnsworth Bank and a variety of other ecologically important features nearby, such as the deep water squid spawning habitat. While CDFW’s Feasibility Analysis deemed that this historical proposal met feasibility criteria, the state decided upon the smaller onshore/offshore SMCA complex currently in place, with the intent of balancing conservation with recreational and commercial use. This pair of SMCAs are considered “backbone MPAs” for the backside of Catalina Island.

Relevance to MLPA Goals and DMR Recommendations

The changes proposed in this petition strongly align with [Goals 1, 2, and 5 of the Marine Life Protection Act \(MLPA\)](#). Notably, the first finding of the MLPA is: "2851. The Legislature finds and declares all of the following: (a) California’s marine protected areas (MPAs) were established on a piecemeal basis rather than according to a coherent plan and sound scientific guidelines. Many of these MPAs lack clearly defined purposes, effective management measures and enforcement. As a result, the array of MPAs creates the illusion of protection while falling far short of its potential to protect and conserve living marine life and habitat." Ten years later,

California's MPA network is no longer piecemeal, yet current MPAs with unduly complicated regulations risk this very same problem.

By increasing the level of protection for several minimally and lightly protected MPAs, the state will enhance the protection of marine life as well as the structure, function, and integrity of marine ecosystems, and will enhance these MPAs' ability to sustain, conserve, and protect marine life populations, including those that are commercially valuable. By streamlining regulations for these SMCAs, the state will help to ensure that California's MPAs are adequately enforced.

In addition, this petition helps to advance DMR Recommendation 4.b.) "Identify and utilize best science-based approaches to inform potential changes to the MPA Network in order to enhance Network performance." Since the creation of the MPA network, a decade of scientific peer-reviewed research from around the world has shown that highly to fully protected areas provide the greatest benefits for biodiversity conservation, and that partially protected areas only hinder enforcement, public understanding, and conservation outcomes.

In the face of growing threats related to climate change and increased human use, the state has the opportunity now to improve and enhance our MPA network to better protect our ocean and coastal resources into the future for generations to come.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

Environment California Research & Policy Center has one mission that drives everything we do: to protect our natural world. We envision a better, greener California: one that protects and restores more places where all life can thrive and offers us and our children the opportunity to live healthier, more enriching lives.

Azul is a grassroots organization working to conserve marine resources. We treasure the life-sustaining force of the ocean, as well as the physical and spiritual nourishment it provides us. We are a Gente powered and led effort, focused first on celebrating our rich Latino conservation traditions and connecting them to current solutions. Our work is based in authentic engagement, community building, and collaboration.

That's why we welcomed the goal set by Governor Newsom and his Administration of protecting 30% of lands and coastal waters by 2030 ('30x30'), which was codified with the passage of SB337 this Fall. This goal reflects the new scientific consensus that humanity must set aside much more of the ocean to sustain healthy marine life populations and ecosystems.

The State of California's network of Marine Protected Areas (MPAs), created by the Marine Life Protection Act (MLPA), has demonstrated that area-based marine protection works: during the state's recently completed Decadal Management Review (DMR), scientific analysis showed that the network has generally succeeded in protecting ocean habitats, increasing biomass of fishery-targeted species, and enhancing the climate resilience of California's coastal ecosystems.

However, the amount of coastal waters currently protected within the statewide MPA network falls far below the state's 30% goal. Only 12% of California state waters are covered in highly to fully protected areas – the types of protected areas known to provide the best conservation outcomes – and an additional 4% is covered in lightly protected areas that allow considerable human impacts within their boundaries. In total, 16% of state waters are currently protected within an MPA.

We must do more. Coastal and marine ecosystems face growing threats related to climate change and increased human use, as well as emerging threats from new ocean uses such as offshore wind and aquaculture. In the face of these threats, now is the time to make significant improvements to the existing MPA network via an adaptive management process to better protect our ocean and coastal resources in the future.

That is why we are submitting two petitions for rulemaking intended to strengthen the network's ability to conserve critical habitat types and better manage the network. Each of the two petitions stands on their own and are based on new and updated science that were not available to policymakers at the time of designating the original network. The areas we have proposed for expansion or strengthening are prime examples of where California's ocean life stands to benefit through new or updated permanent, area-based protections created under the MLPA.

The areas we are proposing are likely not the only areas that would fit the criteria for enhanced protection laid out in our petitions, nor are our criteria the only ecological criteria that could be used to systemically strengthen the existing network in line with the state's new 30x30 goal. We urge the Fish and Game Commission and all relevant state agencies to conduct analyses that will highlight the habitat types, species, and regions underserved by the current network, with an eye toward building a state MPA network that is resilient in the face of rising ocean temperatures, emerging threats, and continued pressure on endangered and threatened species.

Californians can be proud that we have led the way in ocean conservation over the past decades. It's time to take up the mantle of leadership once again, globally and nationally, not only to create a better future for the amazing life off of our own coasts, but also to inspire other decision makers to do so along every coastline, in every part of the ocean.

With your leadership, our groundbreaking marine protected area network can take its next leap forward.

Sincerely,

Laura Deehan

Re: Strengthening and Expanding California's Marine Protected Area Network

Dear President Sklar and Honorable Commissioners,

As an Assemblymember and advocate for the health and vitality of California's coastal ecosystems, I write to express my support for the expansion of the state's network of Marine Protected Areas (MPAs) to include the expansion and strengthening of Point Buchon SMCA and Natural Bridges SMR. Protecting specific habitat areas, including the remaining areas of stable kelp forests, and increasing the rigor of existing marine protected areas are crucial steps in safeguarding our diverse marine species and ensuring the long-term well-being of the ecosystems off our shores.

The state of our ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Pollution, overfishing, offshore drilling and other human activities are threatening ocean habitat and marine species, while the changing climate increases the risk of extreme weather events and puts even greater stress on ocean ecosystems.^{2,3}

In the face of these mounting threats, California has a unique opportunity to take bold and effective action to conserve ocean habitats and ensure a greater abundance of life off our coast. Over two decades ago, the state passed the groundbreaking Marine Life Protection Act (MLPA), which called on the state to use one of the most powerful tools for ocean conservation: marine protected areas (MPAs).

³ Arafah-Dalmau et al., [Integrating climate adaptation and transboundary management: Guidelines for designing climate smart marine protected areas](#), One Earth 6, 1–19 November 17, 2023 ^a 2023 Published

MPAs, like state parks on land, protect unique and important ocean habitats from activities that can damage ocean life. Areas that are strongly protected have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate change on our oceans.⁴ California's network of MPAs, foreseen in the MLPA, celebrated its tenth-anniversary last year, and the state's decadal management review showed that marine life in existing reserves better withstood recent marine heatwaves, and reserves across the state had higher biomass of commercially caught fish than areas lacking protection.⁵ Now, we need to build on this system and maintain California's role as a leader, both nationally and globally, in the fight to protect more ocean habitats.

That's why I urge you to expand our state's network of MPAs within the adaptive management process of the Decadal Management Review. In particular, I am writing in support of the strengthening and expansion of Point Buchon SMCA and Natural Bridges SMR off the coast of my community.

We, as Californians, have a deep love for our ocean and feel a profound responsibility to participate in decisions that impact our state's coastal waters. Our ocean is not just a source of clean air, wildlife, and natural beauty but also a mystery that beckons exploration and discovery. It is our moral imperative to lead the nation and the world in taking bold actions to preserve the sea in our own backyard, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

In conclusion, we strongly urge you, Honorable Commissioners, to expand California's MPA network to encompass areas of persistent kelp, with a particular focus on safeguarding the strengthening and expansion of Point Buchon SMCA and Natural Bridges SMR.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this proposal.

Sincerely,

Re: Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

We, the undersigned scientists with expertise in marine conservation and the area-based management of marine ecosystems, are writing to express our support for the petition put forth by the Environment California Research & Policy Center seeking to increase the level of protection conferred to California marine ecosystems by the state's marine protected areas (MPAs).

Decades of global peer-reviewed research has shown that, when key enabling conditions are met, highly to fully protected areas that minimize or eliminate all destructive and extractive human activities confer the greatest ecological and biodiversity conservation benefits compared to lightly or minimally protected areas. When well-designed, strongly protected, and well-enforced, MPAs can increase the biomass, abundance, and size of species within their boundaries, enhance nearby fisheries when commercially-targeted species "spill over" into surrounding areas, promote the persistence of important habitat types, provide incredible opportunities for recreation and non-consumptive uses by local communities, and so much more. The larger sizes of animals inside these MPAs also makes a disproportionately large contribution to the reproductive output of the entire population. We have seen first-hand the types of outstanding outcomes that these protected areas can deliver. As co-authors and supporters of *The MPA Guide*, a scientific framework to identify different types of MPAs and connect these types of MPAs with the outcomes they are expected to achieve, we strongly endorse efforts to increase the level of protection conferred by California's MPAs.

Additionally, strong enforcement and compliance are critical for realizing conservation benefits. Where regulations are too weak or confusing, MPAs can fail to conserve the important ocean life and ecosystems they are intended to protect. Several of California's MPAs should be improved with streamlined regulations, amended boundaries, and the removal of allowances for certain gear types that have since proven too damaging for certain habitats or target species that have since experienced extreme declines.

Scientific guidance published over the last decade since the California MPA network was put in place has made it ever clearer what makes for a successful MPA. Updating the network to incorporate this new science within the adaptive management process will uphold the goals of the MLPA and ensure that California continues to lead on area-based marine protection, nationally and globally.

Thank you for your ongoing ocean conservation leadership and tireless efforts to protect California's ocean heritage.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

As scientists, researchers, and educators who work to understand our changing oceans and inspire the next generation of ocean stewards, we write to express our support for the expansion and strengthening of California's network of Marine Protected Areas (MPAs) to help safeguard the state's diverse marine ecosystems and ensure the long-term resilience of our ocean habitats.

Globally, the ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. California's coastal ecosystems have not been spared these global trends: Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Only an average of 55 Pacific leatherback turtles are now found foraging off California's coast every year, a notable decrease from the yearly average of 128 Pacific leatherbacks observed in the region from 1990 to 2003.² Marine heatwaves have doubled over the last 30 years and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.³

Now, California has a unique opportunity to take bold, effective and science-based action to conserve its marine biodiversity by expanding its groundbreaking network of state MPAs. MPAs, like state parks on land, protect unique and important ocean habitats from destructive human activities that can damage the integrity of marine ecosystems. Globally and in California, strongly protected and well-enforced MPAs have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate

["A Long-Term Decline in the Abundance of Endangered Leatherback Turtles, Dermochelys Coriacea, at a Foraging Ground in the California Current Ecosystem."](#) *Global Ecology and Conservation* 24 November 2020.

³ IPCC (2021). Summary for Policymakers. In: Climate Change 2021: The Physical Science Basis. Contribution of Working Group I to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change [Masson-Delmotte VP, Zhai A, Pirani SL, Connors C, Péan S, et al. (Eds.)].;

change on our oceans.⁴ Well-designed and well-implemented reserves better preserve natural interactions within ecosystems, allowing for greater resiliency in the face of rising global temperatures and changing environmental conditions.⁵

California's network of MPAs, established through the 1999 Marine Life Protection Act, celebrated its tenth anniversary last year. The state's recent Decadal Management Review (DMR) analyzed a decade of monitoring data and showed that the MPA network has generally been effective at protecting ocean habitats and increasing fisheries-targeted species' biomass.⁶ Now, in the face of increasing threats, we need to build on this system and maintain California's role as a national and global leader in the effort to protect our ocean habitats.

That's why we, as scientists, researchers, and educators, urge you to expand and strengthen our state's network of MPAs via the adaptive management process of the DMR.

Specifically, we support the expansion of the MPA network to include additional protections for California's most resilient kelp forests. While these vital and iconic ecosystems have faced declines statewide in recent years, kelp forests in some areas have persisted or bounced back quickly in the face of marine heatwaves and other disturbances.⁷ By expanding protections for these resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas, helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby. Globally, kelp restoration has been most successful in places adjacent to/contiguous with healthy kelp forest ecosystems.⁸

It is also vital that existing California MPAs are able to achieve their stated goals of conserving biodiversity and ecosystem health. We encourage the state to consider increasing protections for MPAs that are currently only lightly or minimally protected, especially in places where weaker or more complicated regulations lead to poor compliance and enforcement. Research has shown that highly and fully protected areas, where few if any destructive or extractive activities are allowed, provide greater ecological benefits than lightly or minimally protected areas.⁹ The

(2022), Global kelp forest restoration: past lessons, present status, and future directions. *Biol Rev*, 97: 1449-1475.

⁹ Kirsten Grorud-Colvert *et al.*, [The MPA Guide: A framework to achieve global goals for the ocean](#). *Science* **373**, eabf0861(2021). DOI:10.1126/science.abf0861

state's network currently protects 12% of state waters in highly- or fully-protected MPAs, as defined by Grorud-Colvert et al. (2021), which leaves 4% of the network lacking the most effective conservation protections.¹⁰ By expanding the level of protection to areas already identified as ecologically important, we can ensure that the area's vulnerable marine resources have the chance to recover and flourish.

Our ocean is not just a source of clean air, wildlife, and natural beauty but also a mystery that beckons exploration and discovery. It is our moral imperative to lead the nation and the world in taking bold actions to preserve the sea, ensuring its future and the well-being of the communities that rely on it for their survival and prosperity.

President Sklar and Honorable Commissioners, you have a chance to take up this imperative and champion the expansion and strengthening of California's network of Marine Protected Areas. By doing so, you will leave a lasting legacy of marine stewardship that will keep California at the forefront of ocean conservation, nationally and globally.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this urgent matter. Together, we can ensure a healthier, more abundant future for the unique marine ecosystems that define California.

or extractive activities are allowed, provide greater ecological benefits than lightly or minimally protected areas.⁵

Enhancing the protection of California's critical ocean habitats strongly aligns with Goals 1, 2, 3, and 4 of the MLPA by preserving natural diversity, sustaining marine life populations, protecting marine habitats for their intrinsic value, and improving recreational and educational opportunities while minimizing human disturbance.⁶ Safeguarding and further protecting critical marine habitats will ensure critical habitat preservation for diverse marine species, including endangered sea otters and commercially valuable fish.

In summary, we encourage you, Fish and Game Commissioners, to actively support strengthening and expanding California's Marine Protected Areas.

We appreciate your steadfast dedication to our ocean's well-being and consideration of this pressing issue. Working together, we can secure a more robust future for California's distinctive marine ecosystems.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

In solidarity with the shared responsibility for the well-being of our planet, particularly the oceans and coastlines we hold dear, we are reaching out as college students to express our firm support for the amplification and extension of California's Marine Protected Area (MPA) network. Understanding the critical importance of maintaining stable kelp ecosystems and safeguarding conserved ocean areas, we are committed to ensuring the prolonged vitality of our oceans and the myriad marine species that inhabit them.

The state of our ocean is at a critical juncture, with escalating global temperatures, declining biodiversity, and a growing number of endangered marine species. Northern California has lost more than 95% of its kelp forests since 2014, and kelp forests statewide have experienced declines over the past decade.¹ Only 50 Pacific leatherback turtles are now found foraging off California's coast, a notable decrease from the 178 Pacific leatherbacks observed from 1990 to 2003.² Marine heatwaves have doubled over the last 30 years, and have become more intense and longer in duration, putting stress on California's marine species and ecosystems.³

In the face of these mounting threats, California has a unique opportunity to take bold and effective action to conserve ocean habitats and ensure a greater abundance of life off our coast. Over two decades ago, the state passed the groundbreaking Marine Life Protection Act (MLPA), which called on the state to use one of the most powerful tools for ocean conservation: marine protected areas (MPAs).

¹ Meredith McPherson et. al, [Large-scale shift in the structure of a kelp forest ecosystem co-occurs with an epizootic and marine heatwave](#), Communications Biology, March 5, 2021

² Benson, Scott R., Karin A. Forney, Jeffrey E. Moore, Erin L. LaCasella, James T. Harvey, and James V. Carretta. ["A Long-Term Decline in the Abundance of Endangered Leatherback Turtles, Dermochelys Coriacea, at a Foraging Ground in the California Current Ecosystem."](#) *Global Ecology and Conservation* 24 (November 2020).

³ García-Reyes, Marisol, Andrew Leising, Rebecca Asch, Steven Bograd, and Tessa M Hill. Rep. Indicators of Climate Change in California, ["Coastal Ocean Temperature"](#), *California Office of Environmental Health Hazard Assessment*, 2022.

MPAs, like state parks on land, protect unique and important ocean habitats from activities that can damage ocean life. Areas that are strongly protected have been shown to be highly effective in conserving biodiversity, enhancing ecosystem resilience, and mitigating the impacts of climate change on our oceans.⁴ By providing areas that serve as buffers against climate change, fully protected MPAs adapt to changing environmental conditions because they better preserve natural interactions within ecosystems, allowing for greater resiliency.⁵

California's network of MPAs, foreseen in the MLPA, celebrated its tenth anniversary last year, and the state's Decadal Management Review (DMR) showed that MPAs effectively protect ocean habitats and increase fishery-targeted species' biomass. The DMR found that the older the MPA, the larger the increase in the biomass of fished species. Some ecological communities like kelp forests and rocky intertidal ecosystems within MPAs appeared more resilient and recovered more quickly after marine heatwaves than similar habitats outside MPAs.⁶ Now, we need to build on this system and maintain California's role as a national and global leader in the fight to protect more ocean habitats.

We support the expansion of the MPA Network to include critical, resilient kelp forests along California's coastline. While these vital and iconic ecosystems have faced declines statewide in recent years, kelp forests in some areas have persisted or bounced back quickly in the face of marine heatwaves and other disturbances.⁷ By expanding protections for these resilient forests under the MLPA, the state can minimize direct human impacts in these relatively healthy areas, helping to ensure their continued persistence and enhancing the effectiveness of restoration efforts for declining kelp ecosystems nearby.

It is also vital that existing California MPAs are able to achieve their stated goals of conserving biodiversity and ecosystem health. We encourage the state to consider increasing protections for MPAs that are currently only lightly or minimally protected, especially in places where weaker or more complicated regulations lead to poor compliance and enforcement. Research has shown that highly and fully protected areas, where few if any destructive or extractive activities are allowed, provide greater ecological benefits than lightly or minimally protected areas.⁸

As college students, we keenly feel the urgency to address the environmental crises, particularly along California's coast. Having grown up witnessing the impacts of climate change, it's clear

⁴ Arafteh-Dalmau et al., [Integrating climate adaptation and transboundary management: Guidelines for designing climate smart marine protected areas](#), One Earth 6, 1–19 November 17, 2023 ^a 2023 Published by Elsevier Inc.

that action is needed to limit harm to the environment. That's why we urge the Fish and Game Commission to make significant changes in preserving and protecting our vast ocean habitats, ensuring a meaningful and lasting impact for generations to come.

Our ocean is not just a provider of fresh air, diverse wildlife, and breathtaking scenery; it's also an enigma that calls us to explore and uncover its secrets. As college students, we believe it's our duty to be at the forefront of national and global efforts, taking bold steps to safeguard the ocean. This commitment ensures its future and the welfare of communities dependent on it for survival and prosperity.

In conclusion, we strongly urge you, Fish and Game Commissioners, to champion the expansion and fortification of California's network of Marine Protected Areas, with a particular focus on safeguarding kelp forests and reinforcing the protection of existing MPAs. By doing so, you will leave a lasting legacy of environmental stewardship.

Thank you for your unwavering commitment to the welfare of our ocean and for considering this urgent matter. Together, we can ensure a healthier, more abundant future for the unique marine ecosystems that define California.

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

CALPIRG Students is a statewide, student-run, and student-funded organization that works to protect the environment, make college affordable, and promote civic engagement. We have over 20,000 dues-paying members across the UC system and have been on campus for almost 50 years advocating for students on issues that students care about most. As part of our ongoing efforts to win better protections for California's ocean, we are submitting 214 signatures from our supporters on campuses across the state in support of Environment California Research & Policy's petitions for rulemaking in the state's adaptive management process for the California marine protected area network.

Each of the 214 people signed the following letter:

To: Governor Gavin Newsom

Sea otters bobbing in the surf. Whales diving deep to feed. Seabirds flying above. Our state's coastline is home to wildlife, large and small. As students and young people, we are proud to live in a state that has taken steps to protect this ocean heritage for future generations. California's network of marine protected areas are places that, just like state parks on land, help protect and restore ocean life.

I urge you to strengthen this network through the Decadal Management Review in line with your important goal of protecting 30 percent of our state waters by 2030. Specifically, I urge you to expand the network to protect the state's last remaining kelp forests, critical homes to fish and sea otters, and to strengthen existing areas that don't yet provide high levels of protection to ocean life.

With your support, California can expand this network of ocean parks to create a brighter future for the ocean life that calls our state home, and hopefully inspire others across the country and around the world to follow our lead.

As young people, we are working everyday to tackle the most pressing problems facing our ocean, our climate and our communities. That's why we are heartened to see state leaders like

Governor Newsom and the state legislature set bold and ambitious goals to protect more of our coastline.

But goals need to be followed by action to ensure the future health and abundance of our ocean wildlife and wild places. That's why our student members have been campaigning for better ocean protections, and why we are excited to have this opportunity in the Decadal Management Review to push our state's groundbreaking network of MPAs forward. An expanded, strengthened network will make our coasts more resilient in the face of climate change and give our ocean life a chance to thrive.

Thank you for this opportunity, and we look forward to working with you to continue to create a better future for California's coasts.

Sincerely,

A handwritten signature in black ink, appearing to read "Clara".

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

Environmental Action was founded in 1970, on the first Earth Day, as a community of grassroots environmental activists working for a cleaner, greener world. We are submitting the following 2,487 signatures in support of Environment California Research & Policy Center's petitions for rulemaking in the state's adaptive management process for the California Marine Protected Area network.

Each of the 2,487 people signed the following letter:

Dear Governor Newsom,

Sea otters bobbing in the surf. Whales diving deep to feed. Seabirds flying above. Our state's coastline is home to wildlife, large and small. As Californians, we've taken steps to protect this ocean heritage by creating a network of marine protected areas that, just like state parks on land, help protect and restore ocean life.

I urge you to strengthen this network through the Decadal Management Review in line with your important goal of protecting 30 percent of our state waters by 2030. Specifically, I urge you to expand the network to protect the state's last remaining kelp forests, critical homes to fish and sea otters, and to strengthen existing areas that don't yet provide high levels of protection to ocean life.

With your support, California can expand this network of ocean parks to create a brighter future for the ocean life that calls our state home, and hopefully inspire others across the country and around the world to follow our lead.

Sincerely,

As a group that works to protect our most amazing and at risk wildlife across the country, we know that preserving and restoring habitats will be critical to seeing our ocean life thrive. Whether it's a return of sea otters to more of the coastline or more abundant seabirds flying above our heads, expanding and strengthening California's network of marine protected areas will create a more hopeful future for the wild animals that call the state's coastline home.

But the decisions made on California's coast will not only impact the state's wildlife: as with many environmental issues, California's actions here have the potential to reverberate far and wide. If the state acts with ambition during this adaptive management process to fulfill the state's 30 by 30 commitment, it can set the national standard for ocean conservation, leading the country and the globe forward to a better future for our oceans.

Sincerely,

Patrick Kelly-Fischer

Re: Petition to Modify CA Marine Protected Area Network to Enhance Protections for California's Most Resilient Kelp Forests; Petition to Increase Level of Protection and Streamline Enforcement for Several California State MPAs

Dear President Sklar and Honorable Commissioners,

From the foothills of the Sierras to the seaside of the Central Coast, Californians care about our ocean and the life that calls it home. That's why we are submitting the attached 7,549 signatures in support of our petitions for rulemaking in the Decadal Management Review adaptive management process.

Each of the 7,549 people signed the following letter:

Dear Governor Newsom,

California's coastline is home to stunning beaches, amazing wildlife, and is a true treasure for everyone who lives in or visits our state. That's why we've invested in protecting this ocean heritage through the creation of our state network of marine protected areas. Just like state parks on land, these areas help protect and restore ocean life.

Now we have an opportunity to strengthen this network through the Decadal Management Review. I urge you to use this process to advance your important goal of protecting 30% of our state waters by 2030. Specifically, I urge you to expand the network to protect the state's last remaining kelp forests, critical homes to fish and sea otters, and to strengthen existing areas that don't yet provide high levels of protection for ocean life.

With your leadership, California can expand this network of ocean parks to create a brighter future for our state's ocean life and continue to lead the country in ocean conservation.

Sincerely,

By expanding the state's MPA network to better protect areas of stable kelp and by strengthening protections for areas not currently achieving their conservation outcomes due to weak or confusing regulations, the state can help our coasts adapt and thrive in the face of rising temperatures and emerging threats.

With your leadership, we can create a better future for California's coastal ecosystems and the wildlife that calls them home.

Sincerely,

Laura Deehan
Director
Environment California

California Department of Fish and Wildlife's
Evaluation of 2023 Decadal Management Review Marine
Protected Area Petition:
**Reclassify Point Buchon SMCA to an SMR and Limit Allowable
Uses at Farnsworth Onshore and Offshore SMCAs to Recreational
Spearfishing (2023-34MPA)**

I. PETITION SUMMARY

CFGF Tracking Number	2023-34MPA
Petition Contact/Affiliation	Laura Deehan, Environmental California Research and Policy Center and Azul
Number of Proposed Actions	3
Affected MPAs	Point Buchon State Marine Conservation Area (SMCA), Farnsworth Onshore SMCA, Farnsworth Offshore SMCA
Petition Summary	Reclassify Point Buchon SMCA as a State Marine Reserve (SMR) and modify allowed uses at Farnsworth Onshore and Offshore SMCAs.
Link to StoryMap page	2023-34MPA

March 2026

II. CDFW DRAFT RECOMMENDATIONS AND BRIEF JUSTIFICATION

Note: If a change to the Marine Protected Area (MPA) regulations is not needed to address the proposed change, California Department of Fish and Wildlife (CDFW) did not evaluate the proposed change using the framework. However, CDFW may recommend an alternative pathway to achieving the desired outcome of the proposed change.

Petition Action ID and Proposed Action	Petitioner's Stated Rationale and Brief Justification for Proposed Actions	CDFW Draft Recommendation and Brief Justification
2023-34MPA_1 Reclassify Point Buchon SMCA to SMR to prohibit take.	The petitioner's stated intent for the proposed change is that compliance with Point Buchon SMCA/SMR regulations is very low and the current level of protection does not provide sufficient benefits. Change of classification will increase compliance and level of protection.	Deny. The proposed reclassification of Point Buchon SMCA as an SMR would not improve MPA design or function within the Network and would create unnecessary socioeconomic impacts. Scientific review shows that additional No-take protections would not increase habitat representation, ecological function, or connectivity beyond what the existing SMR/SMCA cluster already provides. Compliance concerns raised in the proposal are not supported by enforcement data, which indicate generally low citation levels and improving trends. Maintaining recreational and commercial salmon and albacore fishing aligns with the original design intent of the SMCA and balances conservation with community needs.

CDFW DRAFT EVALUATION 2023-34MPA Deehan

Petition Action ID and Proposed Action	Petitioner's Stated Rationale and Brief Justification for Proposed Actions	CDFW Draft Recommendation and Brief Justification
2023-34MPA_2 Change regulations to allow only recreational spearfishing within Farnsworth Onshore SMCA boundaries.	The petitioner's stated intent for the proposed change is that allowed take in the SMCA creates confusion and causes violations, and the current level of protection does not provide sufficient benefits. Change of regulations will increase compliance and level of protection.	Deny. Available information does not demonstrate that the proposed change to further restrict allowed gear types in the affected MPA would produce measurable ecological benefits to benthic species or the Network beyond current conditions. Concerns raised regarding illegal fishing are primarily related to enforcement challenges rather than regulatory confusion and are better addressed through non-regulatory measures. Longterm MPA monitoring data do not indicate declines in key protected resources, such as California hydrocoral. Implementing the proposed change would be inconsistent with the original intent of the MPAs, unlikely to advance MLPA Goals, and would unnecessarily impact recreational and commercial fisheries.
2023-34MPA_3 Change regulations to allow only recreational spearfishing within Farnsworth Offshore SMCA boundaries.	See 2023-34MPA_2.	Deny. See 2023-34MPA_2.

III. BIN 2 PETITION GROUPING: IDENTIFY TRIBALLY-LED PETITIONS

The 2023 MPA Petition Companion Document (Attachment 1) includes a summary of the process for identifying Tribally-led petitions, CDFW's outreach to all California Native American tribes¹ (tribes) throughout the petitions process, and a summary of outreach and engagement with Tribally-led petitioners. Tribally-led petitions were evaluated with the CDFW 2023 MPA Bin 2 Petition Evaluation Framework.

Tribal Components Questions	Answer and Explanation
Was the petition submitted by a California Native American tribe, representative designated by a tribe or tribal organization, or have a tribal co-sponsor? If yes, a. Does the proposed change explicitly aim to advance tribal co-management, subsistence harvesting, stewardship, and/or provide a tribal benefit through recognizing the cultural significance of an area? b. Is the proposed regulatory change explicitly linked to a tribe or tribes? (i.e. tribal exemption, tribal take only MPA, or new MPA for co-management).	No, this petition was not submitted by a tribe or representative designated by a tribe and does not have a tribal co-sponsor.

¹ California Native American tribe is the preferred term to use per the Governor's Office of Tribal Affairs when generally mentioning tribes of California, both federally and non-federally recognized.

IV. PETITION EVALUATION

EVALUATION NARRATIVE AND OVERVIEW FOR 2023–34MPA_1

The petitioner has requested to reclassify Point Buchon SMCA to an SMR. The proposed change aims to address the petitioner’s desire to “improve conservation outcomes for California SMCAs with compliance issues and low levels of protection.” The petition cites California Department of Fish and Wildlife (CDFW) law enforcement updates and outcomes from a series of compliance forums as identifying Point Buchon as a potential hotspot of low compliance (MPACN 2020a). The petitioner asserts that the perceived compliance issues could reduce the ecological benefits this MPA would otherwise provide to the Network.

The petitioner proposes merging the existing offshore Point Buchon SMCA with the adjacent onshore Point Buchon SMR to create a single, No-take MPA. The current SMCA regulations permit recreational and commercial fishing for salmon (*Oncorhynchus* spp.) and albacore (*Thunnus alalunga*). The petitioner states redesignation to an SMR would “increase the level of protection and help to improve enforceability” due to perceived low compliance and the headlands of Point Buchon allegedly obscuring the southeast corner from view, facilitating poaching (MPACN 2020a). They also cite anticipated impacts from “growing threats related to climate change, increased human use, new ocean uses, and infrastructure projects such as offshore wind and aquaculture” as reasons for “stronger protections.”

The petitioner asserts the proposed action aligns with one or more goals of the Marine Life Protection Act (MLPA). However, CDFW’s evaluation finds the proposed change:

- Is inconsistent with the goal of the MPA, as defined during the MLPA Initiative planning process,
- Does not align with the original intent of the MPA,
- Would not provide measurable benefits to the MPA Network beyond what is currently offered, and
- Would unnecessarily impact recreational and commercial fishing.

Since the onset of digital citation tracking in 2016, citations within Point Buchon SMCA were fewer than 10 citations per year until 2022, where MED issued 19 citations (Table 1), which MED attributed to reductions in rockfish bag limits implemented through emergency action for that year (CFGF 2022). While No-take MPAs are generally easier to enforce than partial take MPAs, Point Buchon SMCA balances the goals of the MLPA to provide recreational opportunities while affording a High Level of Protection (LOP). To improve compliance, MED increased enforcement, as well as education and outreach in partnership with the MPA Collaborative Network (MPACN), Ocean Protection Council, California Marine Sanctuary Foundation, Cal Poly San Luis Obispo, and others at Point

Buchon SMCA. Following these efforts, citations decreased to 14 citations in 2023 and none during 2024 or 2025. In addition to outreach and education, a Community Compliance Forum cited by the petitioner also recommended enhanced monitoring tools like M2 radar systems (MPACN 2020a), which CDFW supports. Reclassifying the SMCA to an SMR was not a recommended solution during these forums and is unlikely to benefit compliance more effectively than continued enforcement and outreach and education.

Point Buchon SMCA currently supports important near-port fishing opportunities for salmon and albacore when individuals of these species are present and fishing regulations allow. Prohibiting these fisheries would disproportionately affect local fishers who rely on a limited number of offshore access points along this portion of the coast without added ecological benefit. During the Central Coast MLPA Initiative planning process, inclusion of an SMCA portion within the Point Buchon cluster was intended to minimize socioeconomic impacts by allowing recreational and commercial fishing for albacore and salmon. Due to the selectivity of the fishing gear for these species, this MPA's design also met the Science Advisory Team (SAT) criteria for a High LOP. Together with the onshore SMR, the current SMCA is a backbone MPA (i.e., habitat replicate), facilitating ecological connectivity within the Network. This design aligns with MLPA Goals by balancing ecological protection with socioeconomic considerations.

Although reclassifying Point Buchon SMCA to an SMR would increase its LOP from High to Very High, this change is not expected to enhance the design of the MPA Network, as the MPA is already serving its ecological connectivity role, and is likely to provide minimal enhanced protection to salmon and albacore. Both species are migratory and their presence in the area varies on different temporal scales (e.g., seasonally, decadal), depending on a variety of atmospheric and oceanographic factors. Given the temporary presence of these species within the MPA and that compliance with MPA regulations has improved since 2022, CDFW anticipates the proposed change would have minimal ecological benefit beyond what is currently offered.

While offshore wind development areas are in the planning phase near Point Buchon, there is currently insufficient information to support the assertion that converting this partial-take MPA to a No-take MPA would increase ecological resilience or mitigate potential impacts from future infrastructure. Similarly, CDFW acknowledges the petitioner's concerns regarding other future stressors (e.g., climate change, human use, aquaculture) on California's coastal ecosystems; however, it is unlikely that prohibiting recreational and commercial fishing of salmon and albacore in Point Buchon SMCA would be more effective at increasing the MPA's resilience to these stressors than continuing education, outreach, and enforcement to ensure compliance.

In summary, the information reviewed by CDFW indicates that compliance at Point Buchon SMCA has improved since 2022 and that the proposal to convert the SMCA to an SMR is inconsistent with the original intent of the MPA, is unlikely to measurably enhance protection beyond what is currently offered, and thus, would unnecessarily impact recreational and commercial fishing opportunities for salmon and albacore. More appropriate adaptive management measures for this MPA include continuing education, outreach, enforcement, and supporting enhanced monitoring tools like M2 radar systems.

RECOMMENDATION FOR 2023–34MPA_1

Given these considerations, and the information in the evaluation questions below, **CDFW recommends California Fish and Game Commission (CFGF) DENY 2023–34MPA_1** proposed change to redesignate Point Buchon SMCA to an SMR.

EVALUATION NARRATIVE AND OVERVIEW FOR 2023–34MPA_2 & 2023–34MPA_3

The petitioner has requested to modify take regulations for Farnsworth Onshore and Offshore SMCAs. The proposed changes aim to address the petitioner’s overall stated problem to “improve conservation outcomes for California SMCAs with compliance issues and low levels of protection.” The petition cites CDFW law enforcement updates and outcomes from a series of compliance forums as identifying these two MPAs as potential hotspots of low compliance (MPACN 2020b). The petitioner asserts that the perceived compliance issues could cause potential negative effects on the ecological benefits these MPAs would otherwise provide to the Network.

The proposal requests to reduce the take allowance at Farnsworth Onshore and Farnsworth Offshore SMCAs to only allow recreational spearfishing. The petitioner states the two MPAs “are currently ‘minimally protected’... due to the substantial number of gear types allowed and species targeted.” The petitioner further states that the regulatory language of the two MPAs “is almost impossible to detect, leading to confusion about what is and isn’t permitted.” The petition also cites MPACN reports of alleged illegal activity by commercial passenger fishing vessels targeting groundfish at Farnsworth Offshore SMCA (MPACN 2020b). The petitioner asserts that the proposed action to allow spearfishing only would increase compliance and protection and align with one or more Goals of the MLPA. They also stated a need to better protect a highly sensitive, rare, and valuable ecosystem, specifically benthic habitats that support California hydrocoral (*Stylaster californicus*) and black (*Haliotis cracherodii*) and white (*Haliotis sorenseni*) abalone. However, given the evaluation presented below, CDFW finds the proposed change:

- Is inconsistent with the MLPA Initiative–established MPA Goals, which are still relevant today,
- Does not align with the original intent of the MPAs,

- Is unlikely to provide measurable benefits to the benthic habitat or the MPA Network beyond what is currently offered, and
- Would unnecessarily impact recreational and commercial fishing.

Farnsworth Onshore and Offshore SMCAs are part of a cluster of MPAs located on the windward side of Santa Catalina Island off southern California. The primary distinction in regulations between the two Farnsworth SMCAs is the take of pelagic finfish², where the Offshore SMCA allows recreational take of pelagic finfish by hook-and-line or spearfishing, and the Onshore SMCA allows recreational take of pelagic finfish by spearfishing only. All other recreational and commercial regulations are identical in both MPAs and include recreational take of market squid by hand-held dip net; white seabass by spearfishing; and marlin, tuna and dorado by trolling. The Farnsworth SMCAs also allow commercial take of coastal pelagic species³ by round-haul net, brail gear, and light boat; and swordfish by harpoon.

The petitioner's claims that the affected SMCAs are currently minimally protected are based on levels of protection defined in Grorud-Colvert et al.'s (2021) MPA Guide framework. The MPA Guide was developed to provide general guidance on MPA design and a consistent approach for categorizing and comparing MPAs at a global scale. However, the more appropriate resource for determining the LOP of California's MPAs is the MLPA Initiative regional LOPs assigned by the SAT. When designing California's MPA Network, scientists in each planning region specifically assigned each MPA an LOP that reflects region-specific fisheries, gear types, and species-habitat interactions, which were then extensively vetted through the regional stakeholder process.

During the MLPA Initiative Planning Process, the key purpose identified for the Farnsworth Onshore and Offshore SMCAs was to protect the unique pinnacles, habitats, and species on and around Farnsworth Bank (MLPA 2009a). The Blue Ribbon Task Force chose an MPA design that provided a High LOP while minimizing socioeconomic impacts to the commercial squid and swordfish harpoon fisheries. This was achieved by only allowing pelagic fishing and gear types, which had been assigned a High LOP by the SAT. Thus, regulations at both Farnsworth SMCAs were specifically designed to prohibit bottom-contact fishing gear to protect benthic habitats. Having met size and spacing SAT

² Albacore, bluefin, bigeye, and yellowfin tuna (*Thunnus* spp.); skipjack tuna (*Katsuwonus pelamis*); dorado (dolphinfish) (*Coryphaena hippurus*); striped marlin (*Kajikia audax*); thresher sharks (common, pelagic, and bigeye) (*Alopias* spp.); shortfin mako shark (*Isurus oxyrinchus*); blue shark (*Prionace glauca*); and Pacific swordfish (*Xiphias gladius*)

³ northern anchovy (*Engraulis mordax*), Pacific sardine (*Sardinops sagax*), Pacific mackerel (*Scomber japonicus*), jack mackerel (*Trachurus symmetricus*), and market squid (*Doryteuthis opalescens*)

guidelines (in addition to a High LOP), these MPAs were also designed as habitat replicates to facilitate ecological connectivity within the MPA Network.

The two MPAs replaced and expanded upon a previous, smaller protected area named Farnsworth Bank SMCA, which was established in 1972 by CFGC to prevent the collection and harvest of California hydrocoral. Farnsworth Bank, a high spot in the benthic topography within the SMCA, was also designated an Area of Special Biological Significance by the State Water Resources Control Board on March 21, 1974 and is widely visited by commercial diving vessels due to its pinnacles and hydrocoral densities. During the planning process, concerns about anchor damage to hydrocoral led the Blue Ribbon Task Force to recommend that CDFW evaluate and, if feasible, install a mooring system and prohibit anchoring (MLPA 2009a); however, no mooring system has been implemented, and anchoring remains allowed.

CDFW shares the petitioner's concerns regarding alleged illegal take of groundfish, indicated by vessels within Farnsworth Offshore SMCA that relocate when MED patrol vessels approach. However, the issue appears related to enforcement logistics rather than regulatory clarity, as MED has confirmed that the site's location makes intercepting violators difficult. CDFW supports non-regulatory measures to address illegal fishing, including enhanced surveillance tools like M2 radar, expanded use of geolocation applications, targeted public outreach to reduce unintentional noncompliance, and ensuring sufficient resources for enforcement.

Anchoring by diving and fishing vessels may pose a greater risk to benthic resources than alleged illegal fishing. For example, a 1981 State Water Resources Control Board water quality monitoring report identified boat anchors and chains as the primary threat to California hydrocoral at Farnsworth Bank, with additional impacts associated with scuba divers, and recommended installation of a permanent mooring or establishment of an anchor drop zone (SWRCB 1981). Just before the Farnsworth SMCAs were established, Love et al. (2010) reported light monofilament line as the most observed form of debris during four research submersible surveys at Farnsworth Bank and nearby areas, followed by anchor gear and heavy line/cable (Love et al. 2010). At present, the extent to which anchoring or illegal fishing with bottom contact gear has affected hydrocoral within the Farnsworth SMCAs since implementation is uncertain. Long-term MPA monitoring using remotely operated vehicles (ROVs) shows substantial increases across bioregions in California hydrocoral (up to 455%) following the 2013–2014 marine heatwave (Wong et al. 2026). Although Farnsworth was excluded from that analysis due to baseline data limitations, surveys as of 2021 indicate hydrocoral densities at Farnsworth were comparable to or higher than other sites surveyed during the same period (Table 2). Continued monitoring is needed to better assess and distinguish among the effects of anchoring, fishing, and other drivers on sensitive habitats within

Farnsworth Bank SMCAs, including hydrocoral populations and other benthic species. Such data could also inform the need for, and spatial extent of, a future designated anchoring drop zone or permanent mooring array.

Socioeconomic impacts to the commercial squid fleet were a key consideration in the MLPA Initiative planning process (MLPA 2009a). In the northern Channel Islands alone, about 25% of regional squid catch from 1999 to early 2003 occurred in areas later closed due to the establishment of the MPA Network (CDFW 2024). The Farnsworth Onshore and Offshore SMCAs continue to be important fishing areas for the commercial squid fleet, particularly Farnsworth Onshore SMCA (Figure 1), as well as to the commercial swordfish harpoon fishery. Given the California market squid (*Doryteuthis opalescens*) fishery's high sustainability⁴ and the fact that these areas already function as core components of the MPA Network, further reductions to the fishing grounds and restricting take to spearfishing only would impose socioeconomic costs without clear ecological benefit. From an MPA Network design perspective, the Farnsworth SMCAs fulfill their intended role as partial-take MPAs with a High LOP, while nearby No-take MPAs (Blue Cavern Onshore No-take SMCA and Long Point SMR) provide Very High LOPs. Modifying MPA regulations at Farnsworth would therefore be unlikely to improve habitat protection, connectivity, or MPA Network performance beyond what is currently offered.

In summary, available information does not demonstrate that further restricting allowed gear types in the affected MPAs would produce measurable ecological benefits beyond current conditions. Concerns raised regarding illegal fishing are primarily related to education, outreach, and enforcement challenges rather than regulatory shortcomings and are better addressed through non-regulatory measures. Monitoring data does not indicate declines in key protected resources, such as California hydrocoral, that would justify additional fishing restrictions. Implementing the proposed change would be inconsistent with the original intent of the MPAs, unlikely to advance MLPA Goals, and would unnecessarily impact recreational and commercial fishing.

RECOMMENDATION FOR 2023–34MPA_2 & 2023–34_3

Given these considerations, and the information in the evaluation questions below, **CDFW recommends CFGC DENY** both petition actions:

- **2023–34MPA_2**, Change regulations to allow only recreational spearfishing within Farnsworth Onshore SMCA boundaries, and

⁴ <https://www.seafoodwatch.org/stories/california-market-squid>;
<https://fisheries.msc.org/en/fisheries/cwpa-california-market-squid-purse-seine/>;
<https://www.fisheries.noaa.gov/species/california-market-squid/seafood>

- **2023–34MPA_3**, Change regulations to allow only recreational spearfishing within Farnsworth Offshore SMCA boundaries

EVALUATION QUESTIONS

2023–34MPA_1: Reclassify Point Buchon SMCA to SMR to prohibit take

QUESTION 1: DOES THE PROPOSED CHANGE SUPPORT THE MPA NETWORK IN MEETING ONE OR MORE OF THE MLPA GOALS AND ALIGN WITH MPA MASTER PLAN ADAPTIVE MANAGEMENT OBJECTIVES?

The MLPA Goals and Master Plan objectives are inextricably linked and act as the foundational tools that CDFW utilizes for effective adaptive management of the MPA Network. Individual MPAs in the Network were not necessarily designed to address all six Goals of the MLPA but instead were intended to act as an important component of a functioning Network that was designed to holistically address the MLPA Goals. As such, CDFW has evaluated this action within the broader adaptive management framework and how the proposed action may or may not align with the MLPA Goals/Master Plan objectives and advance MPA Network management. See Question 1 of Attachment 1 for the MLPA Goals and Master Plan objectives.

The petitioner asserts the proposed action aligns with MLPA Goals 1, 2, and 5 related to preserving natural diversity, sustaining marine life populations, and ensuring California's MPAs have clearly defined objectives, effective management measures and adequate enforcement and are based on sound scientific guidelines.

During the Central Coast MLPA Initiative planning process, Point Buchon SMCA was designed to protect and replicate hard and soft bottom habitat, protect benthic and forage species, protect larval sources, and minimize socio-economic impacts by allowing some recreational and commercial fishing (MLPA 2006b). This area is important to the formation of an ecologically sound MPA Network component, by linking these habitats to similar habitats in other parts of the region. This summary of objectives corresponds to Goals 2–6.

Thus, reclassification of Point Buchon SMCA to an SMR would offer no change in the design of the affected MPA in terms of Goals 2 and 5. Reclassifying Point Buchon SMCA as an SMR would meet MLPA Goal 1; however, given that compliance in this SMCA has improved since 2022 and that the presence of albacore and salmon is seasonal to decadal, the actual ecological benefit of a reclassification is anticipated to be minimal.

QUESTION 2A: DOES THE PROPOSED CHANGE ADVANCE ADAPTIVE MANAGEMENT RECOMMENDATIONS IN THE DECADAL MANAGEMENT REVIEW?

No. The petitioner asserts that the proposed change would:

"...advance DMR Recommendation 4.b.) 'Identify and utilize best science-based approaches to inform potential changes to the MPA Network in order to enhance Network performance.' Since the creation of the MPA network, a decade of scientific peer-reviewed research from around the world has shown that highly to fully protected areas provide the greatest benefits for biodiversity conservation, and that partially protected areas only hinder enforcement, public understanding, and conservation outcomes."

By design, Point Buchon SMCA already provides a High LOP, and together with the onshore SMR comprises part of the MPA Network backbone, facilitating ecological connectivity within the Network. Thus, the proposed change is unlikely to enhance MPA Network performance beyond what is currently provided and does not advance adaptive management recommendations in the DMR. See Question 5 for information reviewed by CDFW in this evaluation. See Question 2a of Attachment 1 for the Decadal Management Review and adaptive management Recommendations.

QUESTION 2B: IF NOT, DOES THE PROPOSED CHANGE ADDRESS A CURRENT OR EMERGING MPA MANAGEMENT CHALLENGE?

No. The proposed change does not address a current or emerging MPA management challenge.

QUESTION 3: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT EXISTING CFGC NON-MPA REGULATIONS, PERMITS, OR LEASES (E.G., KELP LEASES, AQUACULTURE LEASES, EXPERIMENTAL FISHING PERMITS)?

No. CDFW does not anticipate that CFGC would need to make conforming changes to other regulations, permits, or leases in response to the proposed change to these MPA regulations.

QUESTION 4: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT EXISTING REGULATIONS, PERMITS, LEASES, OR MANAGEMENT ACTIVITIES OF ANY OTHER AGENCY OR ENTITY?

No. The proposed change is not expected to affect existing regulations, permits, leases, or management activities of other agencies and entities.

QUESTION 5: ARE THERE SIGNIFICANT INFORMATION GAPS THAT NEED TO BE FILLED TO INFORM THE EVALUATION OF THE PROPOSED CHANGE?

No. CDFW has sufficient information to evaluate and make a recommendation on this proposal. When evaluating this petition, CDFW reviewed the information in the petition as well as information including but not limited to:

- Community Compliance Forum Reports (MPACN 2020a & 2020b),
- CDFW MED Data (Table 1), and
- MLPA Planning documents and related information (e.g., MLPA Goals and MPA Master Plan adaptive management objectives).

CDFW reviewed the available information and did not find that it supports the petitioner’s assertions that “compliance with Point Buchon SMCA/SMR... regulations is very low.” Furthermore, the information indicates that the proposed solution is inconsistent with the original intent of the MPA and unlikely to measurably enhance protection beyond what is currently offered, and thus, would unnecessarily impact recreational and commercial fishing opportunity.

QUESTION 6: ARE THERE SIGNIFICANT MANAGEMENT GAPS THAT NEED TO BE FILLED TO INFORM THE EVALUATION OF THE PROPOSED CHANGE?

No. CDFW has sufficient management information to proceed with the evaluation of this proposed change.

QUESTION 7A: WAS THE PROPOSED CHANGE CONSIDERED DURING THE MLPA INITIATIVE PLANNING PROCESS OR THE IMPLEMENTATION PROCESS OF MPAS AROUND THE NORTHERN CHANNEL ISLANDS?

No. All MPA arrays developed by the Regional Stakeholder Group during the Central Coast MLPA Initiative planning process included an offshore SMCA adjacent to an onshore SMR at Point Buchon. All three Regional Stakeholder Group proposals included recreational and commercial take of salmon, while two of the proposed arrays also included recreational and commercial take of albacore (MLPA 2006a). Species likely to benefit from this MPA included various invertebrates, groundfish, seabirds, and harbor porpoise (MLPA 2006b). The offshore Point Buchon SMCA was intended to work in concert with the adjacent onshore Point Buchon SMR. See Question 8 for more information on the original intent of this MPA.

QUESTION 7B: IS THERE NEW INFORMATION AVAILABLE, CHANGING CONDITIONS SINCE THE MLPA IMPLEMENTATION PHASE, AND/OR INFORMATION PRESENTED IN THE DMR THAT WARRANTS REEVALUATION OF THE PROPOSED CHANGE?

No. There is no information that has emerged since implementation of the MPA Network to support the proposed change.

QUESTION 8: IF THE PROPOSED CHANGE AFFECTS AN EXISTING MPA, DOES THE PROPOSED CHANGE ALIGN WITH THE ORIGINAL INTENT OF THE MPA IDENTIFIED DURING THE MLPA INITIATIVE PLANNING PROCESS OR THE IMPLEMENTATION PROCESS OF MPAS AROUND THE NORTHERN CHANNEL ISLANDS?

No. Redesignating Point Buchon SMCA to an SMR by removing recreational and commercial take of salmon and albacore does not align with original intent of the MPA. During the Central Coast MLPA Initiative planning process, one stated intent was to “provide additional protection for benthic species and typical forage species (squid and pelagic finfish) while allowing fishing for salmon and albacore” (Goal 2). Another Goal (Goal 5) was to minimize the socio-economic impacts by positioning the SMR on the north side of Diablo Security Closure and to allow fishing in the offshore SMCA. The SMCA was designed to work together with the onshore SMR as an MPA cluster, with the overall intention of balancing ecological protection and connectivity with social and economic considerations. The SMCA currently provides one of the few close-to-port offshore fishing opportunities for anglers along this portion of the coast targeting salmon and albacore.

QUESTION 9: DOES THE PROPOSED CHANGE IMPROVE INDIVIDUAL MPA OR MPA NETWORK DESIGN SO THAT IT BETTER ALIGNS WITH OR MEETS THE MPA SCIENCE GUIDELINES?

No. The MLPA requires that the design of individual MPAs and the statewide Network be based on the best readily available science and that MPAs be of adequate size, number, protection level, and location to meet MLPA Goals. The science guidelines developed by the SAT and outlined in the Master Plan provide this scientific foundation and serve as the starting point for evaluating alternative MPA proposals. Alignment with these guidelines depends on the LOP, which is determined by allowed take, and spatial configuration. More specifically, these guidelines require that an MPA must be at least 9 square miles and meet one of the three highest LOPs (i.e., Very High, High, or Moderate-high) to contribute to ecological goals such as habitat replication and representation.

Point Buchon SMCA, together with neighboring Point Buchon SMR, currently meets both minimum criteria (area and LOP), and thus already contributes to foundational ecological Network objectives. The proposed change would increase the SMCA’s LOP from High to Very High. However, since Point Buchon SMCA already meets both minimum criteria, this increase in protection is unlikely to measurably enhance protection beyond

the existing contribution to the Network. Therefore, implementation of the proposed change would not improve the design of the MPA Network. See Question 9 of Attachment 1 for the MPA Science Guidelines and additional context.

QUESTION 10A: DOES THE PROPOSED CHANGE ALIGN WITH CDFW FEASIBILITY GUIDELINES?

Yes. The proposed action to reclassify Point Buchon SMCA to an SMR to prohibit take aligns with CDFW Feasibility Guidelines. The change would result in one large SMR at Point Buchon within the existing boundaries of the SMCA/SMR complex. This single MPA configuration aligns with guidance in which distance offshore should “extend from the shoreline to the three-mile state water boundary.” Additionally, the north and south boundaries are already on readily determinable latitude lines. See Question 10a of Attachment 1 for the CDFW Feasibility Guidelines.

QUESTION 10B: IF NOT, IS THERE A RATIONALE FOR MOVING FORWARD WITH THE PROPOSED CHANGE OR AN ALTERNATIVE THAT COULD MEET THE INTENT BUT BETTER ALIGN WITH FEASIBILITY GUIDELINES?

Not applicable.

QUESTION 11: DOES THE PROPOSED CHANGE MAINTAIN OR IMPROVE ENFORCEABILITY OF MPA REGULATIONS?

Yes. Reducing take allowances and allowed activities in this MPA could improve enforceability. In general, No-take MPAs are easier to enforce than partial take MPAs. However, although MED confirmed a period of low compliance in 2022, this was following an emergency action reducing rockfish bag limits (CFGC 2021). Compliance issues are not uncommon after regulatory changes are enacted and they typically taper off after increased outreach and enforcement. Historically, citations within Point Buchon SMCA were fewer than 10 per year prior to 2022, when 19 citations were issued. Citations have since declined, with 14 in 2023 and no citations issued in 2024 or 2025 (Table 1). MED attributes the improved compliance to additional outreach and education efforts as well as enforcement presence. Recommended solutions from Community Compliance Forums cited by the petitioner include continued education, outreach, and support for enhanced monitoring tools like M2 radar systems. Continuing outreach and education efforts and enforcement presence may be as or more effective than the proposed regulatory change.

QUESTION 12: DOES THE PROPOSED CHANGE SIMPLIFY REGULATORY LANGUAGE OR ENHANCE PUBLIC UNDERSTANDING WITHOUT CHANGING THE INTENT OF THE MPA?

No. Although converting the SMCA to an SMR would further simplify the regulatory language, the proposed action would change the intent of the MPA.

QUESTION 13: DOES THE PROPOSED CHANGE MAINTAIN OR ENHANCE PROTECTION OF MARINE RESOURCES?

Yes. Redesignating Point Buchon SMCA to an SMR would maintain the existing protections within the MPA and could enhance protection for individuals of ocean salmon and albacore, for which recreational and commercial take is currently allowed. However, both species are migratory and their presence in the area varies on different temporal scales (e.g., seasonally, decadal), depending on a variety of atmospheric and oceanographic factors. Thus, the actual benefit the proposed change may have on these species is anticipated to be minimal. In addition, there may be benefits to other non-target species that may be incidentally taken and discarded during fishing for salmon and albacore.

QUESTION 14: DOES THE PROPOSED CHANGE PROVIDE MORE EQUITABLE ACCESS OPPORTUNITIES (E.G., FISHING, EDUCATIONAL, AND/OR OTHER RECREATIONAL OPPORTUNITIES) FOR TRADITIONALLY UNDERSERVED OR MARGINALIZED COMMUNITIES?

See Question 14 of Attachment 1.

QUESTION 15: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT CONSUMPTIVE AND/OR NON-CONSUMPTIVE ACTIVITIES? IF SO, HOW?

Yes. The proposed action would decrease consumptive activities through eliminating commercial and recreational take of salmon and albacore in this MPA.

This is one of the few areas in the region that is close to port where there are opportunities for offshore salmon and albacore fishing when they are in the area and when state and federal fishing regulations allow. Both albacore and salmon are migratory and their presence in the area varies on different temporal scales (e.g., seasonally, decadal), depending on a variety of atmospheric and oceanographic factors, which can also impact their availability.

Non-consumptive activities would likely not be affected.

QUESTION 16: IS THE PROPOSED CHANGE CONSISTENT WITH THE CFGC JUSTICE, EQUITY, DIVERSITY AND INCLUSION POLICY?

See Question 16 of Attachment 1.

QUESTION 17: IS THE PROPOSED CHANGE CONSISTENT WITH THE CFGC COASTAL FISHING COMMUNITIES POLICY?

The following analysis was prepared by CFGC staff. See Question 17 of Attachment 1 for additional context on CFGC's response. The proposed change would reduce fishing access, particularly for commercial and recreational salmon and albacore fishery participants homeported in the coastal fishing communities of:

- Avila (Port San Luis, ~7 nautical miles (nm) away from area of proposed change), and
- Morro Bay (~7 nm away from area of proposed change).

QUESTION 18: DOES THE PROPOSED CHANGE INTERACT WITH OR HAVE THE POTENTIAL TO AFFECT PROPOSED CHANGES IN OTHER 2023 MPA PETITIONS?

Yes. The proposed change would conflict with the Tribally-led petition submitted by the Santa Ynez Band of Chumash Indians (2023-20MPA), which proposes a change (2023-20MPA_4) to add a tribal exemption for the Santa Ynez Band of Chumash Indians at Point Buchon SMCA.

2023-34MPA_2 & 2023-34MPA_3: Change regulations to allow only recreational spearfishing within Farnsworth Onshore & Farnsworth Offshore SMCAs boundaries

QUESTION 1: DOES THE PROPOSED CHANGE SUPPORT THE MPA NETWORK IN MEETING ONE OR MORE OF THE MLPA GOALS AND ALIGN WITH MPA MASTER PLAN ADAPTIVE MANAGEMENT OBJECTIVES?

The MLPA Goals and Master Plan objectives are inextricably linked and act as the foundational tools that CDFW utilizes for effective adaptive management of the MPA Network. Individual MPAs in the Network were not necessarily designed to address all six goals of the MLPA but instead act as an important component of a functioning Network that was designed to holistically address the MLPA Goals. As such, CDFW has evaluated this action within the broader adaptive management framework and how the proposed action may or may not align with the MLPA Goals/Master Plan objectives and advance MPA Network management. See Question 1 of Attachment 1 for the MLPA Goals and Master Plan objectives.

The petitioner asserts the proposed action aligns with MLPA Goals 1, 2, and 5 related to preserving natural diversity, sustaining marine life populations, and ensuring California's MPAs have clearly defined objectives, effective management measures and adequate enforcement and are based on sound scientific guidelines. During the MLPA Initiative Planning Process, the two affected MPAs were designed to meet Goals 1, 2, 4, 5, and 6. Thus the proposed change would offer no change in the design of these affected MPAs.

The affected MPAs were designed to balance conservation of unique, sensitive seafloor habitat and marine life, including California hydrocoral, while preserving opportunities for recreational fishing and the commercial squid and swordfish harpoon fleets. This intent is still relevant today.

The proposed change does not align with MPA Master Plan adaptive management objectives. Available information does not demonstrate that further restricting allowed gear types in the affected MPAs would produce measurable ecological benefits beyond current conditions (see Question 9 on how these MPAs meet SAT guidelines to serve as High LOP habitat replicates and Question 13 regarding whether the change would enhance protection of marine resources). Monitoring data does not indicate declines in key protected resources, such as California hydrocoral, that would justify additional restrictions. Concerns raised regarding illegal fishing are primarily related to enforcement challenges rather than regulatory shortcomings and are better addressed through non-regulatory measures. Implementing the proposed change would therefore be inconsistent with the original intent of the MPAs, unlikely to advance MLPA Goals, and would unnecessarily impact recreational and commercial fisheries.

QUESTION 2A: DOES THE PROPOSED CHANGE ADVANCE ADAPTIVE MANAGEMENT RECOMMENDATIONS IN THE DECADAL MANAGEMENT REVIEW?

No. The proposed change does not advance any adaptive management recommendations from the Decadal Management Review. The petition states that the proposed change would:

"...advance DMR Recommendation 4.b.) 'Identify and utilize best science-based approaches to inform potential changes to the MPA Network in order to enhance Network performance.' Since the creation of the MPA network, a decade of scientific peer-reviewed research from around the world has shown that highly to fully protected areas provide the greatest benefits for biodiversity conservation, and that partially protected areas only hinder enforcement, public understanding, and conservation outcomes."

The affected MPAs already meet the size, spacing, and LOP SAT guidelines to serve as habitat replicates, facilitating ecological connectivity within the MPA Network. Given the

Farnsworth MPAs already have a High LOP, the proposed change would not increase the LOP of these MPAs. See Question 2a of Attachment 1 for the Decadal Management Review and adaptive management Recommendations.

QUESTION 2B: IF NOT, DOES THE PROPOSED CHANGE ADDRESS A CURRENT OR EMERGING MPA MANAGEMENT CHALLENGE?

No. The proposed change does not address an emerging MPA management challenge. The petitioner’s stated problem related to the affected MPA’s current protection status is inaccurate (see Question 9 for how these MPAs meet SAT criteria to serve as habitat replicates with a High LOP). Concerns raised regarding illegal fishing are primarily related to education, outreach, and enforcement challenges rather than regulatory shortcomings and are better addressed through non-regulatory measures (see Question 11 related to compliance concerns and enforceability). Monitoring data does not indicate declines in key protected resources, such as California hydrocoral, that would justify additional fishing restrictions (see Question 13 related to the potential for the proposed action to maintain or enhance protection of marine resources).

QUESTION 3: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT EXISTING CFGC NON-MPA REGULATIONS, PERMITS, OR LEASES (E.G., KELP LEASES, AQUACULTURE LEASES, EXPERIMENTAL FISHING PERMITS)?

No. Farnsworth Onshore SMCA and Farnsworth Offshore SMCA both overlap with administrative kelp bed lease #105; however, neither existing nor proposed regulations include kelp harvest. Thus, the proposed change would not require CFGC to make conforming changes.

CDFW does not anticipate that CFGC would need to make conforming changes to other regulations, permits, or leases in response to the proposed change to these MPA regulations.

QUESTION 4: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT EXISTING REGULATIONS, PERMITS, LEASES, OR MANAGEMENT ACTIVITIES OF ANY OTHER AGENCY OR ENTITY?

No. While Farnsworth Offshore SMCA encompasses an existing Area of Special Biological Significance designated by the State Water Resources Control Board and Los Angeles Regional Water Quality Control Boards, it is unclear whether the proposed change would have direct or indirect effects on the management activities of the Water Boards. CDFW does not anticipate that the Santa Catalina Island Company and Santa Catalina Island Conservancy would need to update their Farnsworth Area of Special Biological Significance Compliance Plan in response to the proposed change.

This list may not be exhaustive. The proposed change may have the potential to affect existing regulations, permits, leases, or management activities of Tribal governments, other agencies, and entities not identified here.

QUESTION 5: ARE THERE SIGNIFICANT INFORMATION GAPS THAT NEED TO BE FILLED TO INFORM THE EVALUATION OF THE PROPOSED CHANGE?

No. CDFW has sufficient information to evaluate and make a recommendation on this proposal. When evaluating this petition, CDFW reviewed the information in the petition as well as information including but not limited to:

- The status of California hydrocoral (MPA long-term monitoring data; Wong et al. 2026),
- Prior reports of benthic impacts and debris at Farnsworth Bank (SWRCB 1981, Love et al. 2010),
- The status of the market squid fishery (CDFW 2024),
- CDFW’s enforcement and compliance data, and
- MLPA Initiative planning documents and related information (e.g., MLPA Goals and MPA Master Plan adaptive management objectives).

CDFW reviewed the available information, and the proposed solution is unlikely to enhance protection beyond what is currently offered, is inconsistent with the original intent of the MPA, and would unnecessarily impact recreational and commercial fishing opportunities.

QUESTION 6: ARE THERE SIGNIFICANT MANAGEMENT GAPS THAT NEED TO BE FILLED TO INFORM THE EVALUATION OF THE PROPOSED CHANGE?

No. CDFW has sufficient management information to proceed with the evaluation of this proposed change.

QUESTION 7A: WAS THE PROPOSED CHANGE CONSIDERED DURING THE MLPA INITIATIVE PLANNING PROCESS OR THE IMPLEMENTATION PROCESS OF MPAS AROUND THE NORTHERN CHANNEL ISLANDS?

No. During the MLPA Initiative Planning Process, none of the alternatives at Farnsworth were limited to spearfishing only. Take allowances at Farnsworth were heavily deliberated during the MLPA Planning Process, including several partial-take options as well as a single SMR that extended out to the three-mile state waters boundary (MLPA 2009b). This area was noted as a particular challenge due to high levels of commercial and recreational use in addition to military constraints on San Clemente Island (MLPA 2009c). The final configuration of MPAs that was adopted by CFGC balanced commercial and recreational take while protecting sensitive benthic habitat (MLPA 2009c).

QUESTION 7B: IS THERE NEW INFORMATION AVAILABLE, CHANGING CONDITIONS SINCE THE MLPA IMPLEMENTATION PHASE, AND/OR INFORMATION PRESENTED IN THE DMR THAT WARRANTS REEVALUATION OF THE PROPOSED CHANGE?

No. The petition states concerns with alleged illegal take of groundfish and the associated impacts to benthic habitat for California hydrocoral and abalone, as well as a lack of clarity in the existing regulations for allowable uses between Farnsworth Onshore and Offshore SMCAs. As stated in Question 7a, the regulations at the Farnsworth MPAs were carefully crafted and intentionally designed to support pelagic surface activities that are less likely to negatively impact the key species of California hydrocoral and the benthic habitat. Long-term MPA monitoring data using ROVs does not indicate declines in key protected resources, such as California hydrocoral, that would justify additional restrictions (see Question 13 related to protection of marine resources).

Concerns raised regarding illegal fishing are primarily related to education and outreach and enforcement challenges and less to do with public confusion around the MPA regulations (see Question 11 related to compliance concerns and enforceability) and would be better addressed through non-regulatory methods.

QUESTION 8: IF THE PROPOSED CHANGE AFFECTS AN EXISTING MPA, DOES THE PROPOSED CHANGE ALIGN WITH THE ORIGINAL INTENT OF THE MPA IDENTIFIED DURING THE MLPA INITIATIVE PLANNING PROCESS OR THE IMPLEMENTATION PROCESS OF MPAS AROUND THE NORTHERN CHANNEL ISLANDS?

No. The current regulations for both affected MPAs were designed to allow specific types of pelagic recreational and commercial fishing that minimize bottom contact and protect benthic habitat. The regulatory allowance for commercial squid and commercial swordfish by harpoon was included in these SMCAs to balance ecological objectives with socioeconomic concerns raised by the fleets.

Both MPAs, especially the Farnsworth Onshore SMCA, continue to be important fishing areas for California market squid. Commercial Fishing Block 807, which contains both MPAs, holds the highest total commercial value for market squid south of the Palos Verdes Peninsula, totaling over \$23 million from 2013–2024 (Figure 1).

QUESTION 9: DOES THE PROPOSED CHANGE IMPROVE INDIVIDUAL MPA OR MPA NETWORK DESIGN SO THAT IT BETTER ALIGNS WITH OR MEETS THE MPA SCIENCE GUIDELINES?

No. The MLPA requires that the design of individual MPAs and the statewide MPA Network be based on the best readily available science and that MPAs be of adequate size, number, protection level, and location to meet MLPA Goals. The science guidelines

developed by the SAT and outlined in the Master Plan were created specifically to provide this scientific foundation and serve as the starting point for evaluating alternative MPA proposals. Alignment with these guidelines depends on level of protection, which is determined by allowed take, and spatial configuration. More specifically, these guidelines require that an MPA must be at least 9 square miles and meet one of the three highest LOPs (i.e., Very High, High, or Moderate-high) to contribute to ecological goals such as habitat replication and representation.

Farnsworth Onshore and Offshore SMCAs currently meet both minimum criteria, and thus already contribute to foundational ecological Network objectives. Modifying the regulations to allow only recreational spearfishing would not change the existing High LOP. Since the proposed action would not change the size or LOP of the SMCAs, implementation would not improve the design of the individual MPAs or the MPA Network, nor would it enhance alignment with the MLPA Science Guidelines. See Question 9 of Attachment 1 for the MPA Science Guidelines and additional context.

QUESTION 10A: DOES THE PROPOSED CHANGE ALIGN WITH CDFW FEASIBILITY GUIDELINES?

Yes. The proposed change aligns with CDFW Feasibility Guidelines, as it would simplify the regulations, which has the potential to increase enforceability. See Question 10a of Attachment 1 for the CDFW Feasibility Guidelines.

QUESTION 10B: IF NOT, IS THERE A RATIONALE FOR MOVING FORWARD WITH THE PROPOSED CHANGE OR AN ALTERNATIVE THAT COULD MEET THE INTENT BUT BETTER ALIGN WITH FEASIBILITY GUIDELINES?

Not applicable.

QUESTION 11: DOES THE PROPOSED CHANGE MAINTAIN OR IMPROVE ENFORCEABILITY OF MPA REGULATIONS?

Yes. In general, reducing take allowances and allowed activities in these MPAs would enhance enforceability. It can be difficult for enforcement officers to intercept violators at Farnsworth Offshore SMCA if violators can detect and evade (e.g., dumping illegal catch overboard) patrol vessels before they arrive at the scene. However, MED has confirmed that most commercial sportfishing operations comply with the regulations. Since electronic citation tracking started in 2016, MED has issued fewer than seven citations per year in Farnsworth Offshore SMCA (with the exception of 15 citations in 2020) and fewer than three citations per year at Farnsworth Onshore SMCA (which averages to less than one per year in the 10-year span, Table 1).

Reducing the affected MPAs' take allowances to spearfishing only may address some of the petitioner's concerns with non-compliance and improve enforceability for the regulations; however non-regulatory efforts such as improved outreach and support for additional enforcement, including the use of technology like M2 radar, are alternative solutions that would support surveillance and help to address non-compliance at this site. These alternative solutions may be more effective than a regulatory change.

QUESTION 12: DOES THE PROPOSED CHANGE SIMPLIFY REGULATORY LANGUAGE OR ENHANCE PUBLIC UNDERSTANDING WITHOUT CHANGING THE INTENT OF THE MPA?

No. Although reducing take allowances/allowed activities in MPAs would simplify regulatory language, the proposed change to allow only spearfishing in both affected MPAs would change the intent of the MPAs to maintain other types of recreational pelagic fishing, as well as fishing for commercial squid and commercial swordfish by harpoon (see Question 8 for more information on intent of these MPAs).

QUESTION 13: DOES THE PROPOSED CHANGE MAINTAIN OR ENHANCE PROTECTION OF MARINE RESOURCES?

Yes. The proposed change to allow only recreational spearfishing in the Farnsworth Onshore and Offshore SMCAs would likely result in fewer hook-and-line fishery interactions with pelagic species. Although pelagic species may not be the primary species to benefit from MPAs in general, as many are highly mobile and have large geographic ranges, the proposed change may enhance protection when individuals are present in these MPAs.

During the MLPA Initiative Planning Process, the intention of both MPAs was to protect species associated with the benthic habitat; species listed as likely to benefit included rockfishes (*Sebastes* spp.), kelp bass (*Paralabrax clathratus*), scorpionfish (*Scorpaena guttata*), giant sea bass (*Stereolepis gigas*), sheephead (*Bodianus pulcher*), angel shark (*Squatina squatina*), lobster (*Panulirus interruptus*), rock scallops (*Crassadoma gigantea*), black abalone (*Haliotis cracherodii*), and white abalone (*Haliotis sorenseni*) (MLPA 2009d). Thus, the proposed change alone is unlikely to enhance protection of these benthic species.

The proposed change would maintain the overall LOP of both MPAs. At the individual MPA level, Farnsworth Onshore and Offshore SMCAs currently meet size and LOP SAT guidelines, and thus already contribute to foundational ecological Network objectives. Modifying the regulations to allow only recreational spearfishing would not change the existing High LOP.

Regarding protection of California hydrocoral, the petitioner states,

“the risk of damage to this highly sensitive ecological area is too high to allow even for pelagic fishing activities, which can result in bottom disturbance and bycatch. For instance, party boat patrons have often been observed dropping weighted lines that interact with bottom habitat...”

Anchoring is likely to pose a greater risk to benthic resources than alleged illegal groundfish take. Although the extent to which anchoring or illegal fishing with bottom contact gear has affected hydrocoral within the Farnsworth SMCAs since implementation is uncertain, long-term MPA monitoring using ROVs shows substantial increases in California hydrocoral (up to 455%) across bioregions following the 2013–2014 marine heatwave (Wong et al. 2026). Additionally, ROV surveys as of 2021 indicate hydrocoral densities at Farnsworth were comparable to or higher than other sites surveyed in the same year (Table 2). Thus, the proposed regulatory change is unlikely to enhance protection of California hydrocoral. Non-regulatory measures, such as the installation and ongoing maintenance of mooring buoys, would likely be a far more effective tool to protect California hydrocoral.

QUESTION 14: DOES THE PROPOSED CHANGE PROVIDE MORE EQUITABLE ACCESS OPPORTUNITIES (E.G., FISHING, EDUCATIONAL, AND/OR OTHER RECREATIONAL OPPORTUNITIES) FOR TRADITIONALLY UNDERSERVED OR MARGINALIZED COMMUNITIES?

See Question 14 of Attachment 1.

QUESTION 15: DOES THE PROPOSED CHANGE HAVE THE POTENTIAL TO AFFECT CONSUMPTIVE AND/OR NON-CONSUMPTIVE ACTIVITIES? IF SO, HOW?

Yes. Changing the MPA regulations to allow only recreational spearfishing within the Farnsworth Onshore and Offshore SMCAs is likely to pose significant impacts to commercial squid fishing (Figure 1) and commercial harpoon fishing for swordfish.

The proposed change is not expected to affect non-consumptive activities.

QUESTION 16: IS THE PROPOSED CHANGE CONSISTENT WITH THE CFGC JUSTICE, EQUITY, DIVERSITY AND INCLUSION POLICY?

See Question 16 of Attachment 1.

QUESTION 17: IS THE PROPOSED CHANGE CONSISTENT WITH THE CFGC COASTAL FISHING COMMUNITIES POLICY?

The following analysis was prepared by CFGC staff. See Question 17 of Attachment 1 for additional context on CFGC's response. The proposed change would reduce fishing access, particularly for commercial coastal pelagic species (including squid) and

swordfish fishery participants, boat-based recreational anglers, and commercial passenger fishing vessel operators homeported in the coastal fishing communities of:

- San Pedro (~22-24 nm from area of proposed change),
- Ventura (~55-58 nm away from area of proposed change), and/or
- Channel Islands Harbor (Oxnard, ~53-56 nm away from area of proposed change).

There is potential to impact several fisheries currently authorized to use these MPA areas. The exemptions in this MPA cluster were carefully crafted to minimize impacts to select recreational and commercial fisheries while maintaining high levels of protection.

QUESTION 18: DOES THE PROPOSED CHANGE INTERACT WITH OR HAVE THE POTENTIAL TO AFFECT PROPOSED CHANGES IN OTHER 2023 MPA PETITIONS?

No. There are no potential interactions of effects on any of the other 2023 MPA petitions.

V. SUPPLEMENTAL ANALYSES, DATA AND INFORMATION, AND CITATIONS

TABLES AND FIGURES

Table 1. CDFW Marine Enforcement District total citations for Point Buchon State Marine Conservation Area (SMCA), Point Buchon State Marine Reserve (SMR), and Farnsworth Onshore and Offshore SMCAs between 2016 and 2025.

MPA	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Point Buchon SMCA	2	4	9	0	1	3	19	5	0	0
Point Buchon SMR	7	7	7	17	21	3	30	7	0	2
Farnsworth Offshore SMCA	7	4	1	5	15	3	6	0	2	2

Dear California FGC,

Throughout this year, we have engaged with local communities regarding the proposed changes to the Marine Protected Area network currently under consideration.

Attached please find comments from residents across the South and Central Coast. We ask that you take these perspectives into account during your decision-making process.

Best regards,

Srividya Maganti
Environment California

Dear California Fish and Game Commission,

I support expanding Marine Protected Areas (MPAs) because

Please help protect our oceans & marine
life - we need your help to make
a difference.

Dear California Fish and Game Commission,

I support expanding Marine Protected Areas (MPAs) because

the beautiful Pacific Ocean is an irreplaceable
Treasure. We must preserve + expand
our Marine Protected Areas. Cabrillo in
particular needs to be expanded. So many
more species could be protected.

Research shows that even for Fishers
people the areas around MPA's have
many many more species once the MPA
is established.

I've lived in San Diego all my life.

I SUPPORT the following proposals: I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

James Bonner
90802

Marine protected areas should remain protected from fishing because highly protected MPAs are among the most effective tools we have to safeguard and restore marine ecosystems. Opening MPAs to fishing would undermine this crucial effort.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Claudio Salem, Mamiraua
92647

Please protect and expand our MPAS. These habitats are crucial to the health of our whole planet...the ocean are the lungs of the earth. I am scuba diver and snorkeler who is in the ocean weekly. Please preserve this beautiful jewel of a coastline for humanity now, and future generations.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo

(San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

LEAH E MARCUS
92646

I work in an MPA, and it's amazing to observe how, when human impact is reduced, nature has so many tools to restore its balance. That is the minimum we should do.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Patricia Spina Salem, Laguna Ocean Foundation
92647

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Jess Weymouth, Artist
90803

MPA are important to protecting our critical habitats and marine life! We need to continue the great work that is being done and listen the the evidence and scholars doing the research!

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Vicky Lu
91007

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Isabelle Bart
92618

MPAs are important because they are our only defense in making sure the future has the chance to enjoy the ocean as much as we do.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Erin VandeVen, Oceana
90277

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Jacob Ramos
91709

Marine protected areas should remain protected from fishing because we need to protect them for future generations.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

William K Contrera
90025

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Emma Wright
90045

I am concerned because California has lost up to ~90–95% of kelp forests in some regions. As a mom, climate steward and volunteer at an aquarium, I want these areas and wildlife available for future generations. We need to build resilience to climate change and MPAs do so through their kelp forests assisting against carbon buildup.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Cat Santacruz, Not just a mom club
90802

Strengthening these MPAs is important to my work as a master's student at UCI in conservation science. Highly protected MPAs are some of the best tools we have to protect and restore marine ecosystems; Opening MPAs to fishing would undermine this.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Olivia Frigyes, UCI
92706

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Alyson Kao, UC Irvine Masters in Conservation and Restoration
91709

Our oceans are bearing the brunt of human-caused climate change. The planet would actually be cooling slightly if it were not for the oceans absorbing our excess CO2 emissions. Ocean acidification and overfishing is a huge concern. Please protect the MPA and the only home humans have.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Mark Costello, Suitelife Systems
90755

Marine protected areas should remain protected from fishing due to the instability of our kelp forests, and therefore many species in our ocean. To combat climate, we need these areas to remain protected to keep stabilize, and further revitalize, our ocean to what it was even 10 years ago.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Alexa Morris
90604

Strengthening these MPAs is important to me because my life,community,and work revolves around the ocean.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Jo Ann Canty
90630

Marine protected areas should remain protected from fishing because MPAs enable sustainable fishing in the long term due to spill over effects. Without MPAs, vulnerable species will continue to be exploited and the lack of biodiversity would increase the difficulty to fight climate change.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Sarah Shimizu, UCI MCRS
92614

Marine protected areas should remain protected from fishing because they are some of the best tools we have to protect and restore marine ecosystems. Opening MPA's to fishing would directly cause the decrease of the health and well being of these ecosystems.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Sydney Stravolo, Newport Mesa Unified School District
90604

I'm concerned because I've seen...A decline in kelp therefore a necessary habit for fish and marine life.

Protect the MPAs and expand them!

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Marion Jaikowski, LA county fire
90250

Everything we do impacts the ocean in one way or another. By establishing MPAs and conserving and protecting ocean habitats we open the ocean to more interesting biodiversity and beautiful ecosystems to bloom. We already destroyed much of our land, we need to protect our waters while we still can.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Kyle Wakamoto, UCI
90503

Strengthening these MPAs is important because without diverse marine ecosystems our planet will be destroyed. In just California alone, around 90% of kelp forests have been lost in some regions. These forests not only help keep our marine life in balance, but also our ecosystem as a whole. They absorb tons of carbon dioxide that we as humans are dumping into our environment; this only heats up our planet more and more.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Ryan Contreras
90604

Marine protected areas should remain protected from fishing to protect those ecosystems. If the balance is thrown off, many of the organisms will suffer. There are already so many commercial fishing sites in nearby locations, there is no need for any more.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Alyssa Makishima
90275

Kelp forests have declined by as much as 93% off some parts of the California coast since the marine heatwave known as the Blob and the ecosystem cascades that followed. MPAs are a powerful tool to protect and restore these essential habitats that provide shelter for fish, sequester carbon, and protect our coasts from increasingly severe storms. As an environmental writer, climate educator, and ocean freediver and swimmer, I've seen first hand the sharp contrast in richness of habitat between protected and unprotected areas. I urge you to give our coastal oceans every protection they need to benefit human communities and our non-human neighbors.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Greg Ayscue
90807

Marine protected areas should remain protected from fishing because our future generations should be able to continue on studying and understanding our planet. We are one planet and what goes on in the ocean influences what happens in the sky and land—it is all cyclical, nothing functions in a vacuum without the other. As a society that values quality of life and experiences, protecting our marine environments maintains that.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Christine Le
90505

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Rich tonti, American Legion Newport Beach
92646

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Dylan Burns
90403

As an avid surfer and environmentalist, I support MPAs and additional increased protection for the California coast. Marine scientists have confirmed how important kelp forests are to the local ecosystems, which thrive more when fishing is not allowed in these regions. California's coastal economy relies on healthy beaches, so let's promote them through more support for MPAs.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Elliott Wright
90045

Our current MPAs have shown how successful they can be in increasing ocean health outside of the MPA. Additionally, we need to start expanding to help the world reach our goal of 30% of our ocean protected by 2030. It's good for tourism, fisheries and the environment

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Kristen Gibbel
90802

California has made some great progress with Marine Protected Area in the past decades, we see and love so much about the lush wildlife in our home area. But we can't stop here or take the progress away, since California has lost up to ~90–95% of kelp forests in some regions. We need more protection, more MPAs now.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Ming Yang
90042

As a diver who has been to both MPA's and areas that are not protected, I have seen firsthand the abundance that comes with protections. Creating spillover and helping the fisherman communities as well. I see MPA's as a win-win for all people and our planet.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Marie McKenzie, Artist
93023

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo

(San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Arnold Simon, Retired

91362

We are immensely fortunate, as Californians, to live alongside the ocean. We must commit to protecting the marine life that makes our ocean flourish. Marine Protected Areas are highly impactful in protecting and restoring marine ecosystems. Opening MPAs to fishing would undermine this and devastate marine life, creating more waste and even weakening the benefits of a diverse marine life long term. MPAs are a feasible way to enjoy the benefits of a healthy ecosystem for many years.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Evelyn Menjivar

90280

I support strengthening and maintaining MPA protections, specifically against commercial fishing, because of all of the benefits and value that MPAs provide for local communities of people, and local communities of marine life. MPAs act as reservoirs and nurseries for marine life, that spill over the boundaries of MPA borders to recharge the surrounding Marine communities. Protecting MPAs is necessary if we want to continue enjoying the benefits that those MPAs give to the surrounding areas. The protected wildlife within MPAs is personally important to me because as a diver these are natural wonders that occur only in Southern California. They're tourist destinations and drive ecotourism revenue, but for me as a social local, these MPAs are my backyard, these are places I connect with nature in the marine wild spaces that I grew up with. We decided to protect them in the first place for important reasons. I passionately believe we should continue protecting them, and consider the benefits of increasing and expanding their protections.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Neal Harvey
90815

Without our reefs there will be no fish and without the fish the larger fish such as dolphins, sharks and whales will become extinct. We need to preserve our ecosystem.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

Debbie finley
92688

Strengthening these MPAs is important to me and to future generations because the ocean has the power to change lives. When I was eight years old, a school trip to Los Osos, California gave me my first glimpse of a tide pool — and the sea creatures I discovered there left an impression I carry to this day. That single experience shaped the way I see the natural world and my responsibility to protect it. Every child deserves that same opportunity, but with California having lost up to 90–95% of kelp forests in some regions, the ecosystems that make those moments possible are disappearing. Marine protected areas are one of the most effective tools we have to preserve these habitats so that wonder and discovery remain available to the next generation.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Roy Perez, Mission Hills Neighborhood Council

Marine protected areas should remain protected from fishing because highly protected MPAs are some of the best tools we have to protect and restore marine ecosystems; and, opening MPAs to fishing would undermine this.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

Mardly Pierre-Jerome
90808

Our very own survival will depend on protecting this marine food chain—we are all interconnected.

I SUPPORT the following proposals: Expanding Channel Islands MPAs to protect kelp forests and eelgrass, Expanding Point Dume (Malibu) MPA to protect kelp forests, Expanding Cabrillo (San Diego) MPA to protect kelp forests, Expanding Laguna Beach MPA to protect kelp forests, Elevating protections in Farnsworth Bank, Catalina Island MPA

I OPPOSE the following proposals: Opening up Channel Islands MPAs to commercial fishing, Opening up Point Dume (Malibu) MPA to commercial fishing, Opening up Swami's (San Diego) MPA to commercial fishing, Opening up Point Vicente MPA to commercial fishing

To: FGC
Subject: Support marine protections and stop extractive use in our oceans!!!

I strongly oppose any petitions that would reduce protections or reopen MPAs to increased extractive use (including proposal 2023-18, 2023-14, and 2023-15). Instead, I strongly strengthening and expanding MPAs, especially through Tribally Led efforts (2023-28, 2023-29, 2029-19, 2023-20; 2023-34, 2023-33, 2023-27, and 2023-33). I am a SCUBA diver who has spent lots of time diving at Catalina, the Channel Islands, and Laguna Beach, even conducting eelgrass and juvenile kelp bass research at Big Fisherman's Cove out of Two Harbors. I've seen firsthand how limiting take allows kelp forests and marine life to recover, creating thriving ecosystems that benefit everyone who depends on the ocean. The proposed expansion of protections for critical habitats like eelgrass and kelp—paired with Indigenous stewardship approaches—represents a forward-looking model grounded in both science and traditional ecological knowledge. Experiences abroad, including in Palau, highlight what's possible when marine ecosystems are truly prioritized—they become more resilient and economically valuable through tourism and fisheries spillover benefits. At a time when kelp forests and marine life face unprecedented threats, we should be strengthening protections, not weakening them. **I strongly urge the Commission to support the tribally led petitions and ensure Indigenous leadership remains central to ocean stewardship. Healthy oceans are the foundation for long-term environmental and economic sustainability across California, and MPAs are vital in establishing that health.**

Thanks for your consideration,
Sarah Wood

To: FGC
Subject: MPA support

As a California scuba diver who has spent time in MPAs around Catalina and along our coast, I've seen firsthand how protected areas allow marine life to rebound—schools of fish are larger, ecosystems feel balanced, and the experience is noticeably richer. In contrast, areas without strong protections show clear signs of decline. MPAs are a vital way to protect our ecosystems, and to stand by California's priority of maintaining Ocean health instead of giving in to extractive, big businesses. I very much oppose any proposals that weaken protections (2023-18, 14, and 15) I strongly support maintaining and strengthening California's MPA network (2023-33, 34, and 27), including the tribally led petitions (2023-28, 29, 19, and 20), which bring essential stewardship and traditional ecological knowledge into management. Protecting these areas is not just about conservation—it benefits coastal communities, businesses, and future generations alike.

Students

Dear California Fish and Game Commission, Governor Newsom, and Secretary Crowfoot,

Our ocean is in trouble. After decades of industrial fishing and new impacts from marine heat waves, many of the most beloved species are disappearing. One of the best things we can do to protect our ocean is protect critical habitats like kelp forests and rocky reefs. Marine protected areas, which prohibit destructive activities and allow ocean ecosystems to recover.

The South Coast is located at the convergence of two major ocean current systems and is thereby characterized by extremely variable oceanographic conditions and a strong gradient in water temperature along the coastline. Due to these unique conditions, our shores are filled with invertebrate species like California spiny lobster, garibaldi, leopard sharks, large pods of common dolphins, bat rays, giant black sea bass and humpback whales. Our marine protected areas help give safe havens for these animals, and many more.

As a student-directed and student-funded organization representing over 25,000 dues-paying student members in the state of California, we're urging you to take action to protect our ocean and our futures. We are proud of much of the work our state has been doing to protect nature, but in order to follow through on the vision of our state outlined in the Nature Based Solutions Executive Order N-82-20, and Senate Bill 337 (to conserve 30 percent of California's lands and coastal waters by 2030), we need to take further action.

As our planet changes, so must our approach to managing our oceans. Over the past three years, we've engaged with Californians up and down the state, from our inland schools, to the coasts, and have seen overwhelming public support, especially from students. After all, it will be today's youth that will be most impacted by the decisions made in the MPA Decadal Management Review process.

Therefore, we are hereby stating our support for the following petitions to be approved:

- Petition 2023-24 (Laguna Beach SMCA (no-take))
- Petition 2023-33 (Point Dume SMCA, Cabrillo SMR)
- Petition 2023-34 (Farnsworth Onshore and Offshore SMCAs)

We are hereby recommending denying the following petitions:

- Petition 2023-14 (Point Vicente SMCA (no-take), Swami's SMCA, Point Dume SMCA)

Best,

Jake Twomey, CALPIRG Students Board Chair

Voices for our Oceans

To: Governor Gavin Newsom, CA Fish and Game Commission,

While approximately 16% of California's coastal waters are conserved, only 12% have the level of protection scientists say is needed to defend against biodiversity loss and climate impacts. California's unique network of 124 Marine Protected Areas (MPAs) makes the state a global leader in protecting the critical habitats and life existing in and around our oceans. However, with a warming planet, and historic species extinctions, it is clear that California must strengthen and expand our existing network of protections with highly and fully protected MPAs. Highly protected areas only allow light extractive activities, while fully protected areas do not allow any extractive or environmentally destructive activities. **I am asking you to call for the adoption of more highly and fully protected marine areas, which must be the standard for protecting 30% of our ocean by 2030.**

Sincerely,

		delicate ecosystems remain some of the most vulnerable, yet least understood, areas of our shared world. Protecting our oceans is a foundational, non-negotiable element of any effort to chart out a sustainable future for future generations.
		I come from New Orleans, LA, one of the most unique and historically relevant places in the U.S. So much of our nation's history and present have come from my hometown. But year after year I have to watch helplessly as my city and the surrounding areas are consumed by rising seas. Each year during hurricane season I wait nervously hoping that another Hurricane Katrina won't completely decimate all that I love and hold dear. And as our ineffective state and federal government, dominated by those who still call climate change a hoax, continue to do nothing but exacerbate my city's environmental challenges, I fear that in no time at all it might be too late to save New Orleans. But it's not too late to fight for my hometown and definitely not too late to fight for coastal communities in my new home of California.
Ejaaz Mason	Lecturer in Earth Systems, Stanford University	Now is the time to act to save not only my home but all of the coastal communities around the world. As a leader of not only America but the entire world, California needs to be a shining example of what environmental sustainability can look like. So let's fight. Now, now, NOW!
Chase Hobbs-Morgan	Lecturer, UC Berkeley Geography	
Daphnie Sicre	Assistant Professor, UCR, Theatre, Film & Digital Production	As a former scuba diver, I have always loved the ocean and all the creature who live in it. We need to respect them and take care of them- there is only

Voices for our Ocean (Extended)

Our oceans are amazing. In the Arctic Sea, polar bears hunt on ice floats. In the Atlantic, beaked whales surface for air, then dive thousands of yards underwater. Shelves of rock, layered with barnacles, seaweed, and snails, form habitats for sand crabs, striped bass, and lobster. In the Pacific, 15-foot long octopuses climb over boulders. And in oceans across the globe, coral reefs and give rise to thriving underwater communities, where sharks hunt, sea turtles glide, and seals forage.

But our oceans, and all the marine life they hold, face increasing risk:

1. Stop drilling: When we drill, we spill -- and black, sticky oil drowns birds and extinguishes vibrant underwater habitats. We need to stop offshore drilling in America's oceans.
2. Reduce plastics: Whales, seabirds, dolphins, and sea turtles all face health risks from the plastic pollution. We need to ban single-use plastic bags, foam cups, and foam takeout containers and tackle the larger problem of plastic waste
3. Protect threatened species: Acoustic noise, as well as certain fishing and shipping practices, threaten the health and safety of our marine mammals. We should stand up for our sea's most vulnerable animals and work to win policies that will protect our endangered ocean species.
4. Create protected areas: One of the best ways to replenish fish populations, protect ocean habitats and marine species, and build ocean resiliency in the face of climate change is to protect key habitats that sustain ocean life. In pursuit of fulfilling California's pledge to conserve 30% of our land and coastal waters by 2030, we support protecting 30% of our ocean are highly or fully protected.

We want to keep our oceans healthy and our sea animals safe so future generations can experience and wonder at the beauty of our seascapes. That's why we support added protections for our oceans.

Name	Title	Quote of Support
Jodi Charrier	Natural Resource Management Specialist, NMFS, Santa Rosa	I'm passionate about conservation.
KC Fockler	Surfrider Foundation, Education Coordinator for North Orange County, Huntington Beach

	Representative, USAC, Los Angeles	be a global priority at this point however the lack of initiatives and efforts in the government spaces are appalling. I believe CALPIRG and this program is a step in the right direction!
Phoebe Chiu	Undergraduate Student Association Council Facilities Commissioner, Los Angeles	My name is Phoebe Chiu (she/her). I am an elected council member of UCLA and a long-term California resident, born in Oakland, raised in the San Francisco Bay Area, and attending UCLA. I vouch for increasing the number of California Marine Protected Areas (MPAs) to 30% of the coastline in this year's internal review process for the 30x30 Plan occurring within the California Department of Fish and Wildlife ending in April 2023. One of my favorite activities in California is visiting the tidepools by the beaches in Monterey and seeing the thriving wildlife. For me, marine life is one of the prettiest sights in California, and I want more of our community to have the opportunity to experience the natural beauties of our state by expanding the number of MPAs. Beyond that, the ocean is a critical tool to tackle climate change, with wetlands and seagrasses absorbing five times the carbon of land-based forests and wetland ecosystems being more protective than constructed seawalls. Also, while the fishing industry might provide pushback on increasing MPAs, protecting marine life is critical for ensuring a healthy fish population, especially if fish migrate closer to the polls if we allow the temperatures of our oceans to rise due to a lack of protection. Lastly, over 40% of the US population lives in coastal counties, and nearly 75% of coastal areas do not have adequate plans to address future sea level rise, which could be up to 6 ft. California is not immune to this issue. Therefore, I want to become a Voice for Our Oceans to call upon the California Department of Fish and Wildlife to consider younger and future generations at risk of displacement if we do not overhaul our plans to protect our homes and ocean.
Kristin Dobbin	Assistant professor of Cooperative Extension, Berkeley	It is critical that we follow our youth leaders in protecting our oceans and their futures
Kate Harrison	Councilmember, Berkeley City Council	They are the heart of our ecosystem.
Yan Zhao	Vice Mayor, City of Saratoga	According to scientists' research, at least 30% of California must be protected in order to protect the state from environmental collapse. Our oceans are obviously incredible homes to lots of

CALPIRG

Students

Name	Title	Quote of Support
		beautiful creatures. It's our duty and obligation to protect our oceans so that we can save the earth for the generation to come.
Maddalena Bearzi	President and co-founder of Ocean Conservation Society, Marina del Rey	At Ocean Conservation Society, we have been studying dolphins and whales off Southern California for over 25 years – one of the longest-running investigations on marine mammals worldwide. We believe that protecting the areas frequented by these animals, and including them in the design and expansion of MPAs and MPA networks, is essential to ensure that the connection between critical habitats remains unbroken.

Expand Marine Protected Areas for ocean health

California's oceans are severely under threat from practices we have known for a while are dangerous, like offshore oil drilling and overfishing. From the sea otters in kelp forests to the whales far into the Pacific Ocean, the species that make our coastline special are suffering. It is time to stand up for our oceans and stop dangerous activities so our ecosystems can bounce back, and ensure that the oceans we grew up with will remain for generations to come.

Marine Protected Areas have helped habitats thrive away from harmful human activities in California. It only makes sense to continue what is working, and increase California's Marine Protected Areas to 30% in order to protect the oceans we all love. California, with its iconic coast, can be a leader on ocean conservation and set the standard for the country and the world to follow.

Oceans Day

By Hudson Truchard, S.B.
Mon May 13, 2024 | 6:03am

Add independent.com on Google

As a kid, I was constantly at the beach, its vast ecosystems inspiring me to pursue a career in a STEM field. To this day I chase the wonder I felt looking at the mini ecosystems of tide pools, fascinated by the diverse life my two sisters and I found within them.

In order to do my part and push the Legislature to truly start gearing toward passing more climate conscious bills, I went to Sacramento CalPIRG to take part in Oceans Day, a massive coalition of environmental organizations all working toward one important goal: ensuring California's oceans and coastlines remain the important social and environmental asset they are. We hosted a press conference where various senators and assemblymembers spoke on the sheer importance of the bills they were championing, and their hopes to make strides toward a more equitable, environmentally sustainable future for California.

To ensure that future generations can be instilled with the same wonder I felt as a child, we need to push for the expansion and continued protection of our Marine Protected Areas to guarantee that we are not just idly waiting for the inevitable collapse of California's amazing coastline. MPAs are shown to be a critically important tool that we need to utilize if we want to protect the immense biodiversity and cultural significance of our coastline as they protect marine species from threats like overfishing, pollution, and habitat destruction.

Letters to the Editor

We need to expand our Marine Protected Areas

More than 90% of Orange County's kelp forests have been lost since the 1980s due to overfishing of urchin-eating species like lobster and sheephead (Orange County Coastkeeper). These kelp forests are a key base for ocean ecosystems up and down the coast, homing countless species of marine animals. They are iconic parts of California's identity, and they are what make our oceans unique.

I have grown up in Laguna Beach, snorkeling through the kelp forests and watching them change through the years. Marine Protected Areas were established along Laguna Beach coasts in 2012, and since then, I have seen the beautiful ecosystems slowly build back to their true beauty.

The biodiversity along our beaches has thrived over the past 10 years, and I have seen firsthand the effectiveness of establishing Marine Protected Areas, which protect our ecosystems from harmful human activities that prevent them from thriving.

We need to protect our oceans so that they can thrive once again. By expanding Marine Protected Areas, we can revive more of these beautiful coastlines.

To: The California Fish and Game Commission, fgc@fgc.ca.gov

Re: May 2026 Regional MPA Meetings – Opposition to MPA Petitions Affecting the California Spiny Lobster Fishery

Dear Fish and Game Commissioners,

Since 1994, the California Lobster & Trap Fishermen's Association (CLTFA), a 501(c)6 non-profit organization, has been established as a corporation to aid, encourage, and promote activities and affairs that maintain California Spiny Lobster populations off the coast and islands of the State of California at levels of maximum sustained yields as well as further the goal of viable and equitable access to such living marine resources by commercial fishermen licensed by the State of California. CLTFA is a well-respected organization within the California fishing community and represents the interests of vastly experienced trap fishermen from a variety of regions from Point Conception to San Diego. On behalf of CLTFA, we respectfully submit the following comments regarding MPA petitions specifically as it pertains to the bioregional meetings both past and upcoming.

First and foremost, we want to thank the Commission, the Department of Fish and Wildlife, and staff for all your diligent efforts over the past few weeks to host these regional meetings in the first place - We know it is not an easy task but we are extremely grateful for the opportunity to speak in our respective hometowns.

Please see our comments below on the petitions to be discussed on the May 19th meeting in San Clemente:

Petition 2023-24, Petition 2023-33, Petition 2023-34:

We oppose all petitions that propose the expansion or introduction of MPAs. They would permanently eliminate additional lobster fishing grounds in an area that is already heavily restricted by existing MPAs and coastal development without clear scientific evidence demonstrating measurable ecosystem or fishery benefits relative to the detrimental socioeconomic impact.

To reiterate, California's commercial spiny lobster fishery is managed under CDFW's Fishery Management Plan and is widely recognized as one of the state's most sustainably managed fisheries with seasonal closures, trap limits, size limits, and extensive monitoring already in

place. Additional closures would increase fishing efforts in the few remaining open areas (fishing compaction), raise operational safety concerns (more lines/competition in less space), and diminish economic stability on the community's small-scale fishermen, their families, beneficiaries, and working waterfronts. To quote one fisherman based out of Point Loma, CA, when asked specifically how Petition 2023-33 would impact him, he responded that, "if that closure goes through, it's game over for me. I will have to completely change my life and forgo the industry that I've invested so much in." This sentiment is representative of how almost all if not the entire fleet feels about losing more grounds.

Furthermore, we want to emphasize that we support tribes having access to existing MPAs, especially considering they were excluded from the original process over a decade ago. However, we do not feel the introduction of new closures that position tribes and fishermen against one another is the solution to developing a successful comanagement plan. It has been our ongoing stance that we have an interest in and respect for how we can work together to get tribes more access to fishing that they deserve, but many of their objectives being sought are well beyond our authority (permits, access to existing MPAs, etc.). More broadly, it is concerning to see well-funded external organizations influence decisions that could remove local access to areas fishermen also deeply value and consider sacred. We believe the collective focus should remain on building a fair and collaborative path forward for everyone involved.

Speaking on behalf of myself, I want to address Petition 2023-29 because I did not get the opportunity to speak on this. I take responsibility for not submitting my speaker card sooner or ceding time. We intentionally did *not* want to cede time because we felt it was more important for as many fishermen to speak as possible, and I'm so glad they did. After watching the meeting in San Mateo with 60+ speakers, I assumed that it would be the same in Goleta. I do apologize for disrupting the flow of the meeting by asking to speak, I would have been remiss had I not at least tried. Regarding the presentation, the petitioner mentioned the spillover effect in the lobster fishery as grounds to support their proposal. While that may be documented at other MPAs, **that does not mean that we support this petition.** We still rely on this area and more importantly, we have a fleet mentality that supports all of our local commercial fisheries regardless of the targeted species. We would never put our fishery first for the chance that it might be advantageous for us but put our colleagues and shipmates out of business. It should also be noted that almost every fisherman in our local lobster fleet participates in other fisheries (e.g. urchins, crab, groundfish, etc.) in order to diversify their efforts and earn a living that allows them and their families to live in this expensive area, so it would be self defeating to support this closure on the basis that it would "benefit" the lobster fishery, but eliminate everything else. I submitted

a [letter](#) for the April 14th Tribal Committee Meeting that further delves into our stance on this petition specifically.

Additionally, per my public comment on Petition 2023-33, I want to apologize if what I said was upsetting to anyone when I spoke about how disturbing it is to have proposed spatial loss taken by a non-local entity. I realized in the following days that that may have come off as insensitive to tribes given the fact that they had everything taken from them and in horrific ways; It was not, nor is it ever, my intention to be offensive or insensitive to what they have endured. As mentioned during general public comment, I have scheduled time with Calpirg students at UCSB and I am looking forward to connecting with them because I do believe we are on the same team, whether we are all aware of it or not. Lastly, I reached out to the petitioner of Petition 2023-33 with no response (see screenshot below), and am still unsure of the “communication” they put forth that “we did not respond to.” It is understandable that the Commission cannot police the outreach efforts on behalf of the petitioners as stated during the meeting, however we respectfully dispute any suggestion that we were unwilling to engage in communication regarding these proposals.

In closing, we want to thank you very much again for your time spent reading our letter. We know you have extremely busy lives and are grateful for all of your hard work and dedication throughout this process.

Ava Schulenberg
Executive Director, CLTFA

Cameron Cribben
President, CLTFA

Hi Laura this is Ava Schulenberg with CFSB and CLTFA I got your number from Cameron Cribben I hope you don't mind me reaching out. I know you mentioned you contacted CFSB at today's meeting and that someone responded on Monday but after talking with our team no one is aware of that interaction, but we certainly don't want to avoid giving credit where it's due so if you wouldn't mind giving me some more details about who you reached out to I would greatly appreciate it, thanks!

Petition 34: Strengthen and simplify enforcement

Farnsworth Bank Marine Protected Areas at Catalina Island

Farnsworth Offshore SMCA

Farnsworth Onshore SMCA

Farnsworth SMCA- onshore and offshore SMCA

MPA compliance & enforcement is essential to achieve conservation

Photo by M.Winscher

Two most important compliance-related questions for MPAs:
where are they, and what do they allow?

Farnsworth MPA: Compliance problems

- The Decadal Management Review identified enforcement as a crucial factor in MPA effectiveness.
- Both SMCAs at Farnsworth Bank allow several gear types and species to be targeted, with some slight differences between the two areas.
- The regulations themselves and also the regulation differences are challenging to understand, creating confusion and unintentional regulation violations.
- Commercial passenger fishing vessels (also known as “party boats”) are also often seen illegally fishing in Farnsworth Onshore SMCA, moving out if they see a patrol boat approaching
- Based on community concerns voiced during the Catalina Community Compliance Forum

MPA Collaborative Vetted Regulation

Recommendations

Los Angeles (Catalina Island)	Farnsworth Onshore SMCA	Rec take by spearfishing of white seabass and pelagic finfish; marline, tunas and dorado by trolling and market squid by hand held dip net. Commercial take of swordfish by harpoon, coastal pelagics by roundhaul net, brail gear and light boat	More difficult to assess whether poaching is occurring on the backside. Challenging/confusing for fishers
Los Angeles (Catalina Island)	Farnsworth Offshore SMCA	Rec take of pelagic finfish by hook and line or by spearfishing; white seabass by spearfishing; marlin, tunas and dorado by trolling and market squid by hand held dip net. Commercial take of swordfish by harpoon, coastal pelagics by roundhaul net, brail gear and light boat	CPFVs (party boats) are seen illegally fishing in Farnsworth Offshore SMCA, moving out if they see the CDFW patrol boat approaching. Regs restricting take of rockfish can be confusing for fishers/challenging to prove rockfish on board was taken outside

The difference between the two sets of rules is hard to detect—> confusion about what is and isn't permitted, increased chances of accidental violations, and possible disincentive for enforcement

New proposed language: “It is unlawful to injure, damage, take, or possess any living, geological, or cultural marine resource, EXCEPT: Recreational take of white seabass and pelagic finfish (northern anchovy, barracudas, billfishes, dorado (dolphinfish), Pacific herring, jack mackerel, Pacific mackerel, salmon, Pacific sardine, Pacific bonito, and yellowtail by spearfishing.”

New Proposal: Simplify and Strengthen protections

Growing Support:
40+ non profit organizations
30K+ Californians
Central coast small businesses
40+ marine scientists from
institutions include:
