California Fish and Game Commission

Compilation of Public Comments on Petition 2023-19MPA_AM1

This PDF file compiles public comments that were included as exhibits in meeting materials and supplemental handouts for Commission meetings **after the 2026 regional MPA petitions meetings, starting with the June 2026 Commission meeting**. Additional exhibits and supplemental handouts will be added after each Commission meeting, including those received by the public comment deadline, until the Commission takes final action on the petition.

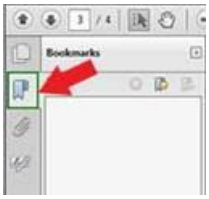
Note: Commission meeting materials include a representative selection of comments, rather than a comprehensive suite of all related comments received. Given the large volume of public comments received, the Commission has directed staff to summarize comments and provide a representative selection in meeting materials to reflect the range of perspectives shared. Commissioners are able to review a diversity of perspectives while still having access to all individual comments submitted, which are part of the Commission's administrative record. Members of the public may contact staff for access to any written comments not included in this document.

Last updated: through August 12-13, 2026 CFGC

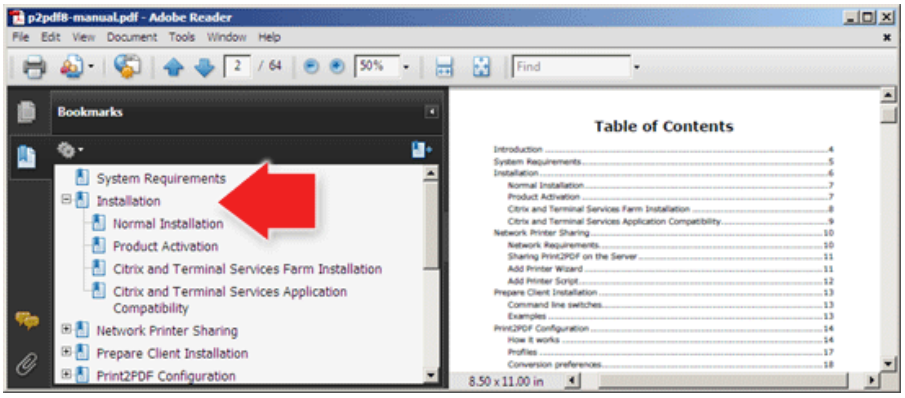
EASY GUIDE TO USING THE PACKET

1. Download and open the binder document using your Adobe Acrobat program/app.

2. If a bookmark panel does not automatically appear on either the top or left side of the screen, click/tap on the “bookmark symbol” located near the top left-hand corner.



3. To make adjustments to the view, use the Page Display option in the View tab. You should see something like:



4. We suggest leaving open the bookmark panel to help you move efficiently among the comments in the packet. It’s helpful to think of these bookmarks as a table of contents that allows you to go to specific points in the packet without having to scroll through hundreds of pages.

5. You can resize the two panels by placing your cursor in the dark, vertical line located between the panels and using a long click /tap to move in either direction.

6. You may also adjust the sizing of the documents by adjusting the sizing preferences located on the Page Display icons found in the top toolbar or in the View tab.

7. Do not hesitate to contact staff if you have any questions or would like assistance.

June 17-18, 2026
Commission Meeting

CITY OF MORRO BAY
CITY HALL

Re: City of Morro Bay Request for Inclusion in MPA Petition Process — Petitions 2023-19MPA, 2023-20MPA, 2023-28MPA-AM, 2023-33MPA, and 2023-34MPA

Dear Director Hertel and President Sklar,

On behalf of the Morro Bay City Council, we write to respectfully express our concern regarding the ongoing Marine Protected Area (MPA) petition process, specifically petitions 2023-19MPA, 2023-20MPA, 2023-28MPA-AM, 2023-33MPA, and 2023-34MPA to formally request that the City of Morro Bay be included as a recognized stakeholder in all future proceedings related to these petitions.

The City of Morro Bay is home to one of the Central Coast's most active commercial and recreational fishing communities. Our harbor, our local economy, and the livelihoods of our residents are deeply intertwined with the health and management of the marine areas immediately adjacent to our coastline. The petitions identified above propose significant changes to marine protected areas within or directly proximate to Morro Bay waters, including the proposed designation of the "Chitqawi SMCA" near Morro Rock (2023-19MPA), modifications to the Point Buchon SMCA and State Marine Reserve (2023-20MPA & 2023-34MPA), new MPA at Point Sal (2023-28MPA-AM), and the expansion of Point Conception SMR (2023-33MPA) — areas that fall within the daily fishing grounds, harbor access routes, and recreational use areas of our community.

The City of Morro Bay fully supports meaningful engagement with California Native American tribes in the stewardship of coastal resources, and we recognize the deep cultural and historical ties the Chumash peoples have to these waters. However, we are concerned that the current process has not included adequate outreach to or consultation with local municipalities whose

constituents will be directly and materially affected by any regulatory changes that result from these petitions. To our knowledge, the City of Morro Bay was not notified, consulted, or invited to participate in the petition review proceedings conducted to date, including the Tribal Committee meetings of August 2025 and April 2026, or the Fish and Game Commission meetings of April 21, May 5-6, and May 19, 2026.

We respectfully request the following:

1. That the City of Morro Bay be formally recognized as an affected local stakeholder in the review of petitions 2023-19MPA, 2023-20MPA, 2023-28MPA-AM, 2023-33MPA, and 2023-34MPA, and that we be added to all future notification and outreach lists related to these and any subsequent MPA petition proceedings that may impact our local waters.

2. That the California Department of Fish and Wildlife and the Fish and Game Commission provide the City with advance notice of, and an opportunity to provide public testimony at, all future Commission meetings, Tribal Committee meetings, and Marine Resources Committee meetings at which these petitions are discussed or acted upon.

3. That CDFW schedule a dedicated briefing with City Council representatives and local harbor stakeholders to explain the current status, proposed regulatory changes, and potential impacts of petitions2023-19MPA, 2023-20MPA, 2023-28MPA-AM, 2023-33MPA, and 2023-34MPA on Morro Bay's harbor operations, commercial fishing fleet, and coastal access.

4. That the City be afforded a meaningful opportunity to submit written comment and participate in any environmental or economic review process conducted prior to a final decision on any of these petitions.

Morro Bay understands the importance of science-based adaptive management of California's MPA network and the value of collaborative, inclusive governance. We believe that the communities living and working along the coast, including our commercial fishermen, recreational users, and harbor businesses, bring essential local knowledge and a legitimate stake in these decisions. A process that excludes local municipalities risks overlooking real-world impacts and undermining the public trust that is essential to successful, long-term marine stewardship.

We look forward to your response and to engaging constructively in this important process. Please direct correspondence to the Office of City Manager John Craig at the address above, or

by email at jcraig@morrobayca.gov. We are available at your earliest convenience to schedule a call or meeting.

Respectfully submitted,

Carla Wixom

Message:

May 26, 2026 Meghan Hertel, Director California Department of Fish and Wildlife 1416Ninth Street, 12th Floor Sacramento, California 95814 Re: MPA Petition Process —Petitions 2023-19MPA, 2023-20MPA, 2023-28MPA-AM, 2023-33MPA, and 2023-34MPA Dear Director Hertel, The Central Coast Women for Fisheries (CCWF) is a 501(c)(3) organization based in San Luis Obispo County, California. Our fishing businesses are small-scale, family-operated enterprises. CCWF represents those families. Our members include active commercial fishermen and charter boat captains, fishermen's wives and daughters and general fishing industry and community supporters. Our mission is to foster and promote a sense of the living culture of our fishing communities. We support the fishing community thru a variety of ways including scholarships, community events, public education of fisheries, a sculpture called "Those who wait" near the harbor entrance, a newsletter called the Pelorus, safety classes and equipment, and anything else we can do to support the fishermen and fisherwomen and their families. One of our fundraisers is selling shirts. Our latest shirt design is titled "Save the Morro Bay Fishermen - Protect An Endangered Species". California commercial fishers have significantly declined in numbers over the last 20 years. In 2004, California issued 7,184 commercial fishing licenses. In 2026, they issued 1,942. A 73% decline. They truly are the endangered species we should be protecting. With this understanding, we don't see the reason why it is necessary to add more Marine Protected Areas (MPA) that would further decrease fishing opportunities and further hurt the fishing community's ability to thrive. The Central Coast fishermen are already significantly challenged by the 2007 Marine Life Protection Act process that implemented 29 MPAs along our coast. MPAs are already around nearly every geographical point where large reefs exist, squeezing the nearshore fishers into small ribbon-reefs along our coast. The petition for Point Sal is particularly concerning since it is one of the only significant hard bottom habitats left open to fishing between San Luis Obispo and Santa Barbara. It is very important to several fisheries including live nearshore, sea bass, salmon, halibut, and Dungeness crab. The area North of Point Buchon is another hard bottom habitat close to port- highly utilized by commercial and recreational fishermen alike. The area near Morro Rock is also an area close to port, mostly utilized by small boat recreational fishermen but also used by the commercial squid and salmon fisheries. Because America imports over 80% of our seafood, The President signed Executive Order 14276 "Restoring American Seafood Competitiveness" in April 2025. In it, there is wording requiring reducing regulatory burden, improving access, and preventing closures. Adding more MPAs would be in direct violation of this EO. We hope that the Department of Fish and Wildlife Commission denies these petitions. Perhaps there are other ways the tribes can be involved with the management and naming of the existing MPAs. Sincerely, CCWF directors

Re: MPA petitions submitted by the Santa Ynez Band of Chumash Indians

The Santa Ynez Band of Chumash Indians would like to thank you for your ongoing work on the Marine Protected Area (MPA) petitions.

On behalf of the Tribe, I presented an overview of the Chitqawi petition at the May 5 public meeting. At that meeting, I provided a very brief explanation of some of the basic concepts and origin of tribal sovereignty in the United States. This is important to understand as it explains why Tribal petitions are different in both law and policy. Since that presentation, I have received a few questions (such as why is a federally recognized Tribe treated differently? and why is there separate tribal take?) as well as a request to put this information in writing, so with this letter I am responding to those questions so the Commission can review and consider this information in its process.

Before I address these questions however, I want to make clear that the Santa Ynez Band submitted these MPA petitions in 2023 first and foremost because these places—Mishopshno, Point Buchon and Chitqawi—are special and deserve protection. They are vitally important for their biodiversity and cultural resources. The purpose here is not to make a political point; it is for the Tribe to protect and return to the important ecosystems that they stewarded for thousands of years.

The general answer to the questions above is in United States Constitution. Article 1, Section 8, Clause 3 states that Congress has the power "To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes." Called the Indian Commerce Clause,[1] this one provision serves as the foundation for all law pertaining to Tribes.[2] Through a series of cases early in U.S. history referred to as the Marshall Trilogy, the Supreme Court relied upon this provision to clarify that Tribes are above all sovereigns. Although contained within the exterior boundary of the United States, they remain functioning, sovereign governments and retain all powers not inconsistent with their

[1] The Supreme Court had recently reaffirmed again that the Indian Commerce Clause is not limited to the common perception of commerce as meaning trade or economic transactions. A brief description of this can be found at: https://constitution.congress.gov/browse/essay/artI-S8-C3-9-1/ALDE_00012976/

[2] Throughout this letter the term "Tribes" refers to federally recognized Tribes.

"domestic" status. The California Attorney General has a brief but helpful definition of sovereignty here: https://oag.ca.gov/nativeamerican/tribal-sovereignty.

Because Tribes are governments, their members are actually dual citizens of both the United States and their respective Tribe. Also because they are governments, Tribes and their members are subject to different laws meant to protect their sovereignty. The clearest example of this is Title 25 of the United States Code, which is an entire section of federal law amounting to thousands of different statutes that apply only to Tribes and their members.[3] Thus different laws (such as the tribal take regulations that provide it is for federally recognized Tribes) can and do apply only to Tribes or their members and this is well within the law.

The fact that Tribes are governments also answers questions about whether tribally led initiatives or tribal take are racial classifications that might not be permitted in law. The simple answer is no. As noted above, the law has always dealt with Tribes and members as a political category of persons – not a racial category. This issue has been tested many times (starting with a case called *Morton v. Mancari* in 1974) but the answer never changes: Tribes and Tribal members are a political classification and as such, laws benefiting them do not run afoul of discrimination laws.

Similarly, tribal co-management/co-stewardship and other tribal rights to lands and water depend upon this same longstanding body of law that Tribes are sovereigns. The current MPA effort to provide support for tribally led MPAs is therefore rooted in this same legal framework. California Tribes were dispossessed of their lands and waters starting with the Spanish missions in the eighteenth century and this continued up to the twentieth century. The tribally led MPAs are very much an effort to put tribes back on the landscapes (and seascapes) from which they had been forcibly separated. In other words, these are not new efforts but a return to the oldest efforts of Tribal management. This is set out in the Governor's Statement of Administration Policy on Native American Ancestral Lands: https://www.gov.ca.gov/wp-content/uploads/2020/09/9.25.20-Native-Ancestral-Lands-Policy.pdf.

The bottom line is that the Commission is on solid legal ground in this process for tribally led MPs and tribal take, and has been for almost 250 years. I have tried to avoid too many citations and legal detail here, while providing enough for the Commission to know just how strong a foundation this process stands upon, but would be happy to discuss or share any further information on this that the Commission would like. We are here to help.

---

[3] If you would like to read about this status in more detail, the Native American Rights Fund has a very helpful blog post that summarizes these issues, although in more detail than I can do in this letter: https://narf.org/about-tribal-nations-united-states-treaties/

To the degree you receive any questions or comments about the nature of the role of federally recognized Tribes or tribal take under the regulations, please feel free to share this letter.

Thank you,

Natalie Landreth

California Fish and Wildlife Commission
P.O. Box 944209
Sacramento, CA 94244-2090

fgc@fgc.ca.gov

Dear Fish and Wildlife Commissioners:

I would like to oppose the proposed Petition 2023-19 Chitqawi SMCA by Morro Rock for the following reasons:

The petition removes all take allowance in an area used by both commercial and recreational fishermen, allowing only the Santa Ynez Chumash Band of Chumash Indians access.

In this day of divisiveness in our state, the removal of access of all users for one specific group is the opposite of inclusiveness and possibly leading to serious animosity towards the SYBCI as well as other tribes.

Taking away access from the local commercial and recreational fleet will have serious socioeconomic repercussions on a town that is known as a “fishing village”. This would impact hotels, marine supply stores, recreational fishing companies, private and public campgrounds, individual recreational fishermen, the only remaining fuel dock, ice plant, fish buyers as well as the commercial fishing fleet statewide. The proposed area is an important area fished for dungeness crab, rock crab, halibut, salmon and squid to name a few species. It is a well known rock cod area for the sport fishing fleet.

The lack of public engagement is a serious problem. The main stakeholders were not notified in any manner. Our Mayor and Harbor Director had no knowledge of something that has the serious potential to negatively impact the City of Morro Bay’s financial situation. The commercial fleet had no knowledge of the proposed MPA until late May 2026. The Salinan Indian Tribe had no knowledge until late June 2026.

Thank you for your attention.

Sincerely,
Melodye Bullis
Morro Bay resident since 2013

Subject: Public Comment: Opposition to MPA Petition 2023-19MPA (and/or Petition 2023-33MPA)

Categories: Exhibit

To whom it may concern,

I am a local morro bay resident and frequently fish the area from the rock to dog beach, recreationally. Fishing is a family tradition and I have invested and built roots into a community where I can raise my son in the same tradition.

Coincidently I grew up in Santa Ynez and have always respected the Chumash reservation. To be honest my best childhood friend's Dad was the previous Chief, and I have always supported them to have their land, and to move outside out of it and participate in the culture we all live in. We now all live here together and it's our country.

It is not right to take away our ability to fish in Morro Bay. You all have been doing a good job managing our fishery and will continue to do so. But to remove our right to fish in our own community would be devastating.

I am investing in my community and future in Morro Bay. We are purchasing a home and expecting our first son. There are other places and MPA's that can protect our wildlife. This will crush the local economy.

I studied socal cultural anthropology in school. Chumash is one of 52 language groups in California. However before other people came, they did not consider themselves the same group. Villages attacked each other constantly. To have a reservation 80 miles away claim our fishing grounds for themselves makes no sense.

Thank you for your consideration

Lucas Green

Categories: Exhibit

Dear Ms. Miller-Henson,
The area proposed for this SMCA is vital for Morro Bay's economy and culture. It has long been utilized for commercial and recreational fishing and must not be taken away. Furthermore, denying access to any take EXCEPT for members of one tribal group is unacceptable and discriminatory. This area must be saved for use by ALL people who wish to fish. There is no compelling reason to take it away from what it always has been.

Thank you for your serious consideration of this important matter.
Sincerely,
Nicole Dorfman

I am a 20+ year full time resident of Morro Bay, California. I am adamantly opposed to MPA Petition 2023-19MPA.

The proposed MPA would have a serious negative effect on the economy of Morro Bay, most particularly the commercial fishing industry, the recreational fishing industry, and the tourism industries - all of which are significant contributors to the Morro Bay economy and the City's General Fund (which provides the services and infrastructure Morro Bay citizens rely on).

Further, the Chumash were previously granted the Chumash Heritage National Marine Sanctuary, which comprises 4,543 square miles of coastal and ocean waters off the Central California coast, to include 116 miles of coast line.

Enough is enough.

Subject: OPPOSITION to the proposed Petition 2023-19 Chitqawi SMCA

July 28, 2026

Valerie Zera
Los Osos, CA

Melissa Miller-Henson
Executive Director
California Fish and Wildlife Commission

P.O. Box 944209
Sacramento, CA 94244-2090

Dear Fish and Wildlife Commissioners:

As a resident on the southern edge of Morro Bay in the town of Los Osos, I am submitting my strong opposition to the proposed Petition 2023-19 Chitqawi SMCA to the north side of Morro Rock.

Removing all take allowance in an area used by both commercial and recreational fishermen, and permitting only the Santa Ynez Chumash Band of Chumash Indians access will severely harm the Morro Bay economy, which is primarily generated by tourism.

Visitors to Morro Bay, famous as being a fishing port village, expect the ready availability of fresh, locally wild caught seafood in our restaurants and seafood markets. Large numbers of tourists also enjoy fishing from the shore, from small watercraft and from locally based fishing charters taking them for either shallow water or deep sea fishing adventures. Others travel here specifically to dive in local waters, to both admire the ocean bottom & to acquire fresh seafood.

The proposed Chitqawi SMCA would deprive both locals and tourists of the seafood species that are typically fished here including Dungeness crab, rock crab, halibut, salmon and squid. It is an especially well known rock cod area for the sport fishing fleet. People retire to Morro Bay (and other nearby) areas for the widely available outdoor activities, including fishing. Morro Bay is a tiny seaside city encompassing about 5.3 square miles. The proposed SMCA would be an out-of-proportion 3 square miles!

I respect the cultural heritage of California's Native American tribes, but am concerned that the proposed Chitqawi SMCA destroys the access rights of the general public in favor of a small select group. This is much like wealthy seaside landowners wishing to keep the public off "their" beaches. I firmly believe that the proposal constitutes a betrayal of the precepts of public trust, statutory authority, equal treatment, and transparency. California's marine resources belong to all Californians and should be managed under principles of equal access, sound science, and transparent public oversight.

The proposed Chitqawi SMCA will also lower the availability of fresh, wild caught seafood to our local residents at a time when the importance of this low fat source of protein is being pushed forward to the public. This is especially true for our local population's largest age group, about one-third of the total, which are individuals aged 65 and over. The Mediterranean Diet is currently the most popularly followed diet in the United States, and emphasizes the use of fresh seafood as the primary source of protein (over red meats).

Thank you for considering my input opposing the proposed Chitqawi SMCA, in
support of continued public and commercial access along all of Morro Bay and its surrounding seas.

Yours truly,

Valerie Zera

Subject: Opposition to MPA Petition 2023-19MPA (and/or petition 2023-33MPA)

My name is Ryan Oldenkamp, I am a 41 year old outdoorsman, fisherman, local business owner, and father of two children who grew up exploring the same coastline and hold the same love and passion for the coast that I do. My entire family are lifetime residence of the central coast. If you restrict access for us it would greatly impact our lives in more ways than you, could you imagine.

No longer we will be able to spend our weekends poke pulling the jetty or surrounding rock piles for eel or grass bass, no longer will my children be able to learn life lessons like determining if the tide is coming or going, how many hours they have left before the sun sets or the tide makes an area inaccessible, what time of the year the spawning sand crabs are thick as a blanket under your feet when surfcasting. No longer we will be able to enjoy kayaking the kelp beds for rock cod and halibut, no longer we will be able to cook a fresh catch on the shore while enjoying a sunset. No longer will be able to explore tide pools and the true beauty that hides in them on a negative tide. No longer we will be able to have soul touching heart to heart conversations that only come up between a boy and his dad when casting a rod repeatedly. You see this is not just a piece of coast to me and family, it is our lives, it is heartbeat, it is our escape from a world that is glued to their devices and that doesn't hold the same values as we do. If you take this away I am worried that our family will not only lose all of this, but we will lose what connects us and hold us together as a family. Without this coastline to escape to I guess we can look at the photos we took of its beauty over the last 40 years for memories, however we would just be staring at the phone screen and not emersed in its beauty, but maybe that's what the world wants after all? Maybe you do to? Please ask yourself is this what you want for us and for many others who hold the same values?

Subject: Opposition to Petition 2023-19MPA - Proposed Chitqawi SMCA

Dear Commissioners,

I submit these comments as a Morro Bay resident and a natural-resource professional with more than 27 years of experience in upper-level wildlife and habitat management. I was educated in the University of California system, earning a B.S. in Wildlife Biology and an M.S. in Ecology, and spent my career working on complex conservation issues, including the regulation of harvest for nationally shared migratory bird populations. My background has taught me the importance of science-based decision-making, transparent public processes, and policies that strengthen -- rather than divide -- the communities that depend on natural resources.

I am writing to express my strong opposition to Petition 2023-19MPA, the proposal to establish the "Chitqawi State Marine Conservation Area" off Morro Bay.

My concerns fall into four major categories: public access, historical community use, lack of demonstrated biological need, and the divisive nature of the proposal.

1. Public Trust Resources Must Remain Accessible to All Californians

The coastline and nearshore waters off Morro Bay are public trust resources, managed for the benefit of the entire public. Generations of residents -- commercial fishermen, recreational anglers, families, divers, surfers, and visitors -- rely on this area for access, food, recreation, and cultural connection.

Creating a new MPA that restricts public use while granting a special exemption to a single group undermines the long-standing principle that public waters must remain open and equally accessible to everyone.

2. The Area Has Deep Historical Importance to the Whole Community

Morro Bay's nearshore waters have supported centuries of shared use:

- Commercial fishing that built the town's economy
- Recreational fishing and boating central to local culture
- Community events, harbor activities, and tourism
- Multi-generational family traditions tied to these waters

This proposal reframes a widely shared public space as belonging primarily to one group, despite the fact that the entire community has historical, cultural, and economic ties to this coastline.

3. No Biological or Ecological Justification Has Been Presented

After reviewing the petition and supporting materials, I see no scientific evidence that:

- Fish stocks in the proposed area are depleted
- Harvest pressure is unsustainable
- Existing MPAs are insufficient
- Additional restrictions would provide measurable ecological benefit

California already has one of the most comprehensive MPA networks in the world, created through a rigorous, science-driven process. Any new MPA should require clear, peer-reviewed biological justification -- which is absent here.

Creating a new MPA without demonstrated ecological need sets a troubling precedent and risks undermining public trust in the MPA system.

4. The Proposal Is Socially Divisive and Harmful to Community Cohesion

This petition has already created significant division within the Morro Bay community. Many residents feel blindsided by a proposal that:

- Was not developed through broad community engagement
- Grants exclusive access to one group while restricting others
- Reopens past conflicts over access and identity
- Risks pitting neighbor against neighbor

Marine policy should unify communities, not fracture them.

5. Additional Concerns

- Precedent: Approving a new MPA without biological need opens the door to future petitions based on social or political arguments rather than science.
- Economic impacts: Even small closures affect charter boats, tackle shops, tourism, and working waterfront businesses.

- Process integrity: The MPA network was created through years of public meetings, scientific review, and stakeholder negotiation. A petition-driven shortcut circumvents that process.
- Equity: Public waters should not be managed in a way that creates unequal access among Californians.

Conclusion

For these reasons, I respectfully urge the Commission to reject Petition 2023-19MPA. The proposal lacks scientific justification, undermines public access, disregards the shared history of the entire community, and is already causing unnecessary division.

Thank you for considering my comments.

Sincerely,

Tom Aldrich

Subject: Letter from Chairman Kahn re MPA proposal
Attachments: CA FGC - MPA Petition 2023-19MPA - 2026-06.16.pdf

Hello Commissioners –

Please see the attached letter from Chairman Kenneth Kahn, Santa Ynez Band of Chumash Indians. The Tribe would like to discuss accommodating users like those who testified in the May 5 meeting. Since MPAs are not on this week's agenda (except possibly public comment on items 3 and 27) the Tribe will not be present at this week's FGC meeting, but we will follow up with you as well as CNRA and CDFW to discuss this proposal.

Please note there is one error in the letter, Nakia Zavalla's email has two "l"s in it as cc'd here.

Please reach out with any questions.

Thank you,
Natalie

Re: MPA petition 2023-19MPA (Chitqawi)

The Santa Ynez Band of Chumash Indians would like to thank you for your ongoing work on the Marine Protected Area (MPA) petitions. We recognize this process takes several years and many meetings and we thank you for your service on the Fish and Game Commission throughout this process.

We presented on the above-captioned petition (Chitqawi) at the public meeting on May 5, 2026. The following day, the Commissioners indicated we are in "a solution space" for the MPA petitions. We are pleased to hear this as we were under the impression at various times that: (1) petitions could not be amended, (2) we had to keep to the original intent of the petition as filed in 2023, (3) onshore fishing rendered an application "low protection," and (4) low or moderate protection areas would likely not be accepted as MPAs, even though MPAs have varying levels of protection and some even have commercial fishing. Because of this information gleaned from various meetings, the Tribe felt constrained in the current petition process even though the Tribe itself is somewhat flexible in its approach.

Give the posture of the current petitions, and notwithstanding the petition as filed in 2023, the Tribe would like to find a way to adjust the petition so that it: (1) meets the scientific guidelines; (2) is sufficiently protective to satisfy protective criteria; (3) includes "tribal take" as set out in the regulations; and (4) disturbs few recreational users. We are open as to how the Commission would like to address this specifically, but we would agree, for example, to add to this petition recreational openings to address the public comments on May 5th. However, in doing so, we would want to be sure that the petition is still considered sufficiently protective to be considered as an MPA.

Chitqawi is unique and important for its natural and cultural resources for the many reasons outlined in the May 5 presentation. However, we would like to work with you to protect this special area while also striking a balance that meets the goals of the MPA network and allows residents recreational harvest.

To follow up on this, please contact our representatives in this matter, Nakia Zavalla (nzavala@chumash.gov) and Natalie Landreth (natalie@nashobaconsultingllc.com).

Thank you,

Kenneth Kahn
Chairman
Santa Ynez Band of Chumash Indians

To: Melissa Miller-Henson
Executive Director
California Fish and Game Commission
P.O. Box 944209
Sacramento, CA
94224-2090

Date: July 25, 2026

Re: MPA No. 2023-19 MPA

Dear Ms. Miller-Henson

I respectfully oppose the proposed Chitqawi State Marine Conservation Area. Speaking as a former marine ecologist, I support protecting marine ecosystems in a manner that reflects an evidence-based footing. I find no verification that CDFW or any other agency has found this subregion to be biologically deficient or experiencing ecological decline. The original legislative intent behind California's State Marine Conservation Areas (SMCAs) formation was overwhelmingly biological and ecological, not based upon tribalism, religion, or ancestry.

The intent of the law has not changed since its formation in 1999.

Though I respect the cultural heritage of California's Native American tribes, I am concerned that this proposal plunders the access rights of the general public in favor of a small select group, based purely on tribalism,spiritual beliefs (i.e. religion) and/or genetics. I firmly believe that the proposal constitutes a betrayal of the precepts of public trust, statutory authority, equal treatment, and transparency.

California's marine resources belong to all Californians and should be managed under principles of equal access, sound science, and transparent public oversight. Placing an SMCA in the center of the Morro/Estero Bay complex would inflict lasting harm on sport and commercial fishing operations, as well as sabotaging businesses dependent on recreation and tourism in the town of Morro Bay, especially if this grants preferential harvesting rights to any

select group on the basis of tribalism, genetic racial determinants, or religion rather than applying the same conservation rules to everyone.

Marine conservation should unite the public, not divide it. Any exceptions to existing Marine Protected Area regulations should be supported by clear scientific evidence demonstrating that they will not undermine conservation goals or create unequal treatment under the law.

I urge you, as a Regional Manager involved in this decision,to reject the Chitqawi SMCA proposal in its current form and to instead pursue conservation policies that protect marine resources while ensuring equal treatment, public accountability, and broad public trust.

Thank you for considering my comments.

Dr. Richard J. Von Stein

Re: Support for Petition 19, 20, 21, 24, 27, 28, 29, 33, 34 and against petitions that would weaken the network (14,15 and 16).

Dear President Sklar and the Fish and Game Commission,

Please see attached letter of support for strengthening and expanding California's network of marine protected areas. Below is a petition signed by 15,901 California residents following one on one conversation in neighborhoods across the state.

We found strong support from residents across the state, and urge you to take the opportunity this fall to strengthen and expand California's model network of marine protected areas- especially around critical habitat like healthy kelp forests, and special places like Duxbury Reef, Point Sal and Mishosphno.

Thankyou,

Laura Deehan
State Director
Environment California

Dear President Sklar and Fish and Game Commissioners,

As decades of pollution, industrial-scale fishing and marine heat waves threaten the ocean, I urge you to expand California's marine protected areas to support marine wildlife.

Please protect the state's last remaining healthy kelp forests and strengthen enforcement in existing marine protected areas.

With your leadership, California can create safe harbor for wildlife, including sea otters, shore birds and sea turtles. And our state can continue to lead the country and the world in ocean conservation.

Sincerely,

Dr.	Catherine Rodriguez	San Diego	CA	92107
Dr.	Diane Sweeney	San Diego	CA	92107

August 7th, 2026

Re: Support for Petition 19, 20, 21, 24, 27, 28, 29, 33, 34 and against petitions that would weaken the network (14,15 and 16).

Dear President Sklar and Commissioners,

Please see attached petition of support to strengthen and expand California's network of marine protected areas. These 27,891 California residents signed an online petition as part of our outreach across the state following the regional MPA hearings this spring. We found strong support from across the state, and urge you to take this opportunity to strengthen and expand California's model network of marine protected areas- especially around critical habitat like healthy kelp forests.

Thankyou,

Laura Deehan
State Director
Environment California

Dear President Sklar and Commission,

The beauty of California's coastline -- its stunning beaches and amazing wildlife -- is an iconic treasure for everyone who lives in or visits our state. That's why California led the world in protecting this ocean heritage through the creation of our state network of marine protected areas. Just like state parks on land, these areas help protect and restore ocean life.

Now, for the first time since its creation more than a decade ago, we have an opportunity to strengthen this network. I urge you to take this opportunity to advance the goal of protecting 30% of our state waters by 2030.

Specifically, I urge you to strengthen and expand the marine protected areas around the state's last remaining kelp forests from Cabrillo State Marine Reserve in San Diego to Natural Bridges Marine Reserve in Santa Cruz, and create new marine protected areas at Point Sal and Mishopshno in the central coast. Please support conservation proposals to provide healthy habitat for threatened fish, sea otters, and sea turtles, and reject efforts to undermine the marine protected area network.

With your leadership, California can expand this network of ocean parks to create a brighter future for our state's ocean life and continue to lead the country in ocean

MORRO BAY
CHAMBER OF COMMERCE

July 22, 2026

California Fish and Wildlife Commission
P.O. Box 944209
Sacramento, CA 94244-2090
fgc@fgc.ca.gov

Re: Opposition to Petition 2023-19 – Chitqawi State Marine Conservation Area

Dear Fish and Wildlife Commissioners:

The Morro Bay Chamber of Commerce respectfully opposes Petition 2023-19, which proposes creating the Chitqawi State Marine Conservation Area adjacent to Morro Rock.

The Morro Bay Chamber of Commerce is dedicated to promoting a strong local economy and supporting the businesses that make our community thrive. Morro Bay's working waterfront is not only an important part of our history and identity, but it also remains a vital economic engine that supports jobs, tourism, recreation, and small businesses throughout the region. Any proposal that significantly affects access to our coastal waters deserves broad public participation, careful economic analysis, and thoughtful consideration of all stakeholders.

The proposed petition would prohibit commercial and recreational fishing activities within the designated area while allowing access solely to the Santa Ynez Chumash Band of Chumash Indians. While we recognize and respect the cultural significance of traditional tribal practices and support efforts to preserve California's cultural heritage, we are concerned that limiting access for all other user groups raises important questions about equity, public access, and the long-term impacts on the broader community.

Morro Bay has long been recognized as one of California's historic fishing communities. The commercial fishing industry and recreational fishing opportunities are deeply woven into the fabric of our local economy. Restricting access to this important fishing area would have consequences extending far beyond individual fishermen. Local hotels, restaurants, marine supply businesses, charter fishing operators, public and private campgrounds, fuel suppliers, the community's only remaining fuel dock, the local ice plant, fish buyers, seafood processors, and numerous other small businesses all benefit from a healthy working waterfront. These businesses, in turn, support local employment and generate significant economic activity throughout San Luis Obispo County.

The area identified in the petition is an important fishing ground for Dungeness crab, rock crab, halibut, salmon, squid, and other commercially valuable species. It is also a well-known recreational fishing area utilized by sportfishing vessels and individual anglers. Reducing access to these waters would have measurable economic consequences for businesses that depend on both commercial and recreational fishing.

Equally concerning is the apparent lack of meaningful public outreach surrounding this proposal. Based on information shared with our organization, many of the primary stakeholders were unaware of the petition until very recently. Local commercial fishermen, recreational fishing interests, City leadership, and other community organizations were not provided adequate notice or opportunity to engage in discussions before the proposal advanced. Given the potential economic implications for Morro Bay, this level of outreach falls well short of what should be expected for a proposal of this magnitude.

The Chamber believes that public policy affecting coastal access and local economies should be developed through an open, transparent process that includes all affected parties. Decisions with potentially significant economic consequences should be informed by comprehensive data-driven socioeconomic analysis, as well as robust stakeholder engagement, prior to the State's continued consideration of establishing such an exclusionary zone in and around the waters of Morro Bay.

We respectfully request that the California Fish and Wildlife Commission deny Petition 2023-19, or at a minimum, postpone consideration until a thorough economic impact analysis has been completed and meaningful outreach has been conducted with the commercial fishing industry, recreational users, local governments, tribal representatives, business organizations, and the broader Morro Bay community.

Thank you for your consideration of our comments and for your commitment to ensuring a fair and transparent public process. We appreciate your service and respectfully ask that the concerns of Morro Bay's business community be given careful consideration.

Sincerely,

Alexis Jacobs, Chair, Board of Directors
Morro Bay Chamber of Commerce

July 30, 2026

California Fish and Game Commission
715 P Street, 16th floor
Sacramento, CA 95814
Email: fgc@fgc.ca.gov

Subject: MPA No:2023-19MPA

Dear Honorable Fish and Game Commission,

Please include the City of Morro Bay as an affected stakeholder in reviewing the proposed MPA. Please provide advanced notice of, and opportunity to provide public testimony at all future Commission meetings, Tribal Committee meetings and Marine Resources Committee meetings. The City of Morro Bay is a current and historical fishing village that must be included in any activities or decisions that impact the livelihood of the town and its residents. To limit decisions to the Chumash is discriminatory to the long- time residents of coastal towns along the central coast. The city must be afforded an opportunity to submit written comment and participate in any environmental economic review process regarding fishing and marine protected areas. The city and its residents are very concerned about overfishing and damaging the environment.

Thank you for your attention to this matter. Your consideration in this matter is appreciated.

Sincerely,

Sylvia Marson
Morro Bay, CA

June 26, 2026

California Fish and Wildlife Commission
P.O. Box 944209
Sacramento, CA 94244-2090
fgc@fgc.ca.gov

Dear Commissioners:

We are writing this letter in hopes you will reject Petition 2023-19 from the Santa Ynez Band of Chumash Indians. Their ask for their own Marine Protected Area (MPA) without any science or public input is just a move to take more ocean for themselves at the exclusion of California's state commercial fisheries.

The fisheries have worked with MPAs since they were established in California. These areas were scientifically designed and established throughout the State of California and at that time determined to satisfy the sciences driving MPAs forward.

The commercial fishing industry in California have already suffered the loss of grounds to MPAs, RCAs, Exclusion Zones, depth restrictions, and the possibility of losing miles and miles of productive ocean to wind farms.

As these things mount up we find ourselves having to travel further and further from home to work. This causes a great deal of added expense to the commercial fishermen and also the burning of additional diesel fuel to reach an area that we can fish in.

This, of course, adds a great deal to our carbon footprint, the time it takes to travel extra miles, and the continued concentration of fishermen in smaller and smaller areas. Fishermen will soon be fishing on top of each other devastating the grounds they are working in as those grounds become fewer and far between.

In conclusion, please consider the fishing industry as we seem to have been losing area now for about 25 or 30 years. Please put a stop to this policy before there is nothing left.

Sincerely,

Jeremiah O'Brien, Vice-president of Morro Bay Commercial Fishermen's Organization

Rcvd 5/18/24

Dear Fish and Game Commission,

I am submitting these comments for the record following yesterday's meeting regarding the proposed MPA expansion at Santa Rosa Island, as I was unable to speak publicly due to travel.

I am strongly opposed to the proposed expansion.

I come to this issue from a finance background, and I want to be direct: my concern is not emotional it is structural. Effective regulation requires not only conservation objectives but a clear accounting of costs, consequences, and accountability. On those grounds, this proposal is incomplete.

The existing regulatory framework governing this fishery quotas, seasonal restrictions, size limits already reflects a meaningful commitment to sustainability. Before layering additional closures on top of that framework, the Commission should be required to answer a straightforward question: **what is the economic impact, and who is responsible for assessing it?**

This is not a peripheral concern. A closure of this nature would have cascading effects on Santa Barbara Harbor and the surrounding economy affecting not just commercial fishermen, but restaurants, consumers, harbor businesses, and the broader supply chain that depends on a functioning local fleet. To advance a proposal of this scale without a rigorous, independent economic assessment and a defined mitigation plan would be a significant failure of due diligence.

I would also ask the Commission to consider the composition of the fleet it is regulating. The fishermen entering this industry today are not doing so for financial gain; margins are already razor thin. They are here because of deep commitment to their craft and to providing locally sourced seafood to this community. An additional closure of this nature, layered onto an already difficult operating environment, has a meaningful probability of being the regulatory threshold that permanently exits a significant portion of this fleet.

Once that knowledge, those relationships, and that infrastructure are gone, they do not come back.

I respectfully urge the Commission to require a formal economic impact assessment and a defined accountability structure for mitigation before this proposal advances. Conservation and economic responsibility are not mutually exclusive but both must be present for regulation to be sound.

Thank you for the opportunity to submit these comments.

Subject: Propsed Chumash MPA's

Melissa Miller-Henson.

The Santa Ynez band of Indians are attempting to extend and develop additional and new MPA's within the coastal waters of California. These recommendations and requests are not based on any science and will become private fishing grounds for their tribe.

This request for the take of publicly owned resources that belongs to ALL of us, will create animosity between tribal and non-tribal citizens of our state. Trust and honesty are an important part of fisheries regulations and should always be based on best science available. These petitions submitted by the Chumash Indians are nothing less than a resource GRAB.

The promise that the Indians would not actively pursue fishery regulations if granted a sanctuary is the same promise the Monterey Bay Marine Sanctuary made to both commercial and recreational fishers years ago upon it's designation. Something that has proven to be false.

The take of these areas will create large economic losses to commercial fishers. The Morro Bay petition area has generated thousands of pounds of troll King Salmon this year alone. It's a area that over the years salmon are historically attracted to. Case in point, on June 15, and 16th of this year I caught 86 King Salmon averaging 11.1 pounds apiece in the proposed Morro Bay Chumash MPA. The ex vessel price was over $10,000. I would be happy to provide my fish ticket to prove it. Not only do King salmon congregate in this location of Estero Bay but a California Fish and Wildlife records research will show that hundreds of tons of squid have also been harvested from this area. These is just a small example of economic importance of one of these areas.

It may not be politically correct to say but how can the state even entertain the thought of how so much can be given to so few. As a commercial fisher in my 56 year as a commercial fisher the fish I catch have never been mine. They have always belong to ALL the people, and I am just a way to access them for those you own them.

Please deny these shelf serving petitions. They are not based on science or need. Fishery regulations should never be based on politics or emotionalism. We can never make up for injustices that those before us may have done to the tribes.

Regards,

Mark Tognazzini

Email: mbcfo1972@gmail.com

California Fish and Game Commission
P.O. Box 944209
Sacramento, CA 94244-2090

Dear Fish and Game Commission,

The Morro Bay Commercial Fishermen's Organization is a 501c begun in 1972 and currently has ~ 90 members. We represent the working men and women of Morro Bay, California's waterfront. The MBCFO works closely with governmental organizations, NGO's, business groups and other stakeholders on several issues every year to support commercial fisheries, improve marine environments, and strengthen the social and economic health of our community.

RE: Petition 2023-19 Chitqawi SMCA Near Morro Bay:

This petition was discussed exclusively within the tribal community. The fishing community was completely excluded from any meaningful outreach in designing this petition. If the fishermen would have been consulted, they would have said absolutely not here.

This area is very important for multiple commercial fisheries and small boat fishermen. There is a salmon tack inside this area that has been utilized every year it was open for the last 75 years. Boats from all over the west coast are fishing salmon there now. It has also been highly utilized by the Dungeness crab, rock crab, and squid fisherman. Millions of dollars in landings have been taken out of this area over the years. The small boat fishermen fish the rocks here, especially when weather doesn't permit

travelling farther. It is rich in marine life, full of bait, and continues to this day to be an important local resource for many fishermen.

This will have significant negative impacts on the local seafood markets, marine tackle and supply shops, fuel dock, ice and bait supplies, and to the harbor department revenues. Before any decision is made, the socio-economic impacts need to be studied on such an important area so close to Morro Bay's harbor and so important to many fisheries – especially salmon.

It is a safety risk to take away Estero Bay for small boat fishermen. This will cause people to travel farther in unsafe conditions and will ultimately discourage people from going all together.

There are MPAs fairly close to the proposed Chitqawi SMCA at Piedras Blancas, Cambria, and Point Buchon so that further withdraw of fishing opportunity would be redundant and excessive.

It will increase fossil fuel consumption for fishermen that could be travelling only a few miles, now having to go several miles to fish.

This proposed tribal MPA area has been heavily fished without discrimination the last century, so there will be animosity towards the few tribal people allowed to fish there. And as a matter of fact, we have seen very few tribal people fishing. Very few tribes people, if any, do sustenance fishing around here – that is more in Northern California. And as a matter of another fact, the Santa Ynez band of Chumash are not local to Morro Bay.

RE: Petition 2023-20 Point Buchon SMCA

The area proposed in the northern expansion is an important area to local small boat nearshore fishermen. It is one of the few remaining reefs within 5 miles of Morro Bay. And again, allowing exemptions for only the Santa Ynez band of Chumash, is asking for division and animosity among fishermen. It also will be difficult to patrol. How are they going to discern who is legal and who is not? Does the Dept. of Fish and Wildlife really want to have to decide who is a legitimate tribe's person to fish? Any system has the potential to be ripe with fraud and very difficult to implement.

RE: Petition 2023-28 Point Sal SMR

This area is vital to multiple important commercial fisheries including salmon, Dungeness crab, rockfish, rock crab, squid, and halibut. Especially since it is one of the few reefs remaining open to fishing between Port San Luis and Point Conception. It would take away significant fishing opportunity from the Morro Bay, Port San Luis and Santa Barbara commercial fishing fleets - squeezing fishermen into ever smaller areas. It is also an important anchorage for fishermen making this a significant safety risk if this anchorage was not available. Vandenburg SMR is a large area covering over 32 square miles including Purisma which is another large reef now closed to fishing with the 2007 MPLA implementation. Adding another MPA at Pt. Sal is excessive, redundant, and unnecessary.

Dr. Ray Hilborn and Dr. Mark Carr, leading authorities on MPAs, agree that further evaluation of the effectiveness of the current MPAs needs to be done before adding more. Here is a link to their interview regarding MPAs: https://www.youtube.com/watch?v=4nnNZ2gcZQs&t=96s

Studies of California MPAs are revealing they are less effective than speculated. The following studies demonstrate MPAs are not increasing net biomass, not increasing biodiversity, and not increasing resilience to heat waves.

1. "A Synthesis of Ecological and Social outcomes from the California Marine Protected Area Network" January 2023 Caselle, Smith, Nickols, Lopazanski.

2. "Assessing the Population-level conservation effects of marine protected areas" March 2023 Ovando, Caselle, Costello, Deschenes, Gaines, Hilborn, Liu.

3. "A marine protected area network does not confer community structure resilience to a marine heatwave across coastal ecosystems" April 2023 Carr, Starr, Caselle, Smith, Free, Lopazanski, Brun, Anderson, Claudet, Dugan, Eurich, Francis, Hamilton, Mouillot, Raimondi, Ziegler, Nickols.

These petitions were proposed without scientific foundation, without socio-economic considerations, and without meaningful communications with the fishing community. They seem a long way from a “final evaluation” by Department of Fish and Wildlife.

The Chumash tribes were just given a huge National Marine Sanctuary to manage, isn’t that enough? A more reasonable approach would be to rename the existing MPAs with tribal names and include the tribes in management, rather than add more MPAs.

Sincerely,

Morro Bay Commercial Fishermen’s Organization

6/23/2026

To Whom it may concern,

I am opposed to a proposed MPA marine protected area that is before the Dept. of Fish and Wildlife Commission now. Chitqawi SMCA stretches from Morro Rock to Dog Beach. (Approximately) It's a three mile by three mile out. The only exemption for fishing of any kind is for the Santa Ynez Chumash.

Please do not allow petitions 2023-19, 2023-20 & 2023-28. This will have a dramatic financial impact on businesses in Morro Bay and surrounding areas.

What is the science and purpose for such a MPA in these areas?

My residence is on Morro Bay.

Please accept my letter in opposition.

Thank you,

Chris Spiros

Subject: Petition 2023-19 Chitqawi SMCA by Morro Rock and Petition 2023-20 Pt Buchon SMR

We would like to strongly urge you to **oppose** the wholly unnecessary Petition 2023-19 Chitqawi SMCA by Morro Rock and Petition 2023-20 Pt Buchon SMR.

If these are enacted, they will have a SERIOUS financial impact on Morro Bay. These waters are a sport fishing and commercial fishing area for salmon, rock, squid and Dungeness crab.

There are already 3 MPAs in this area. These additional closures will **severely** affect the livelihood of the Morro Bay fishermen both commercial and sport fishing. The residual effect of the dollars lost by restaurants that serve the locally caught fish and the hotels that host the visitors to Morro Bay to go fishing and dine at the restaurants will be felt by the whole area. Not to mention the property tax dollars from the fisherman that will no longer be able to afford to live here because of this ongoing loss of income.

Please consider the enormous unintended consequences of giving only one small group of people access to these waters.

Oppose Petition 2023-19 and Petition 2023-20.

Thank you for your consideration.

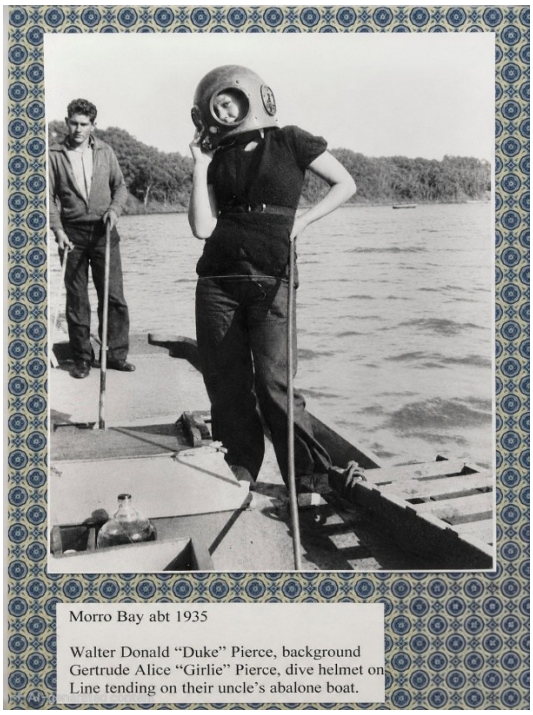
Regarding Chitqawi Marine Protected Area proposed in Morro Bay, California

To whom it may concern:
My name is Yvonne Davis, council member and enrollment secretary of the Salinan Tribe of Monterey & San Luis Obispo Counties. I myself, descend from multiple generations of Morro Bay natives. My mother and grandmother were each born in the town Morro Bay, CA, which only became a city, in 1964, a year before I was born. Beyond that, we come from ancestors of the Salinan Tribe who have lived, fished, raised families, in their chosen home of Morro Bay, and surrounding areas, from as far back as 15,000 years ago. My family line (in written records) goes back as far 1672 to Agata Maria. Salinans had no written language. This documentation comes from mission records, to where many Central Coast natives were gathered, to build the missions. My grandfathers were commercial fishermen, as well as other tribal family members, out of Morro Bay. Our tribal members continue to recreational fish out of Morro Bay today. Four of my grandmother's brothers, of Pierce Brothers Abalone, are seen here, in this now famous photograph. The next photo is of my grandmother, Gertrude "Girlie" Pierce Montgomery Beech, around 13 years old, donning a diving helmet of the time, while working with her older brother Duke (background) line tending while their uncle dove for abalone.



Morro Bay abt 1935

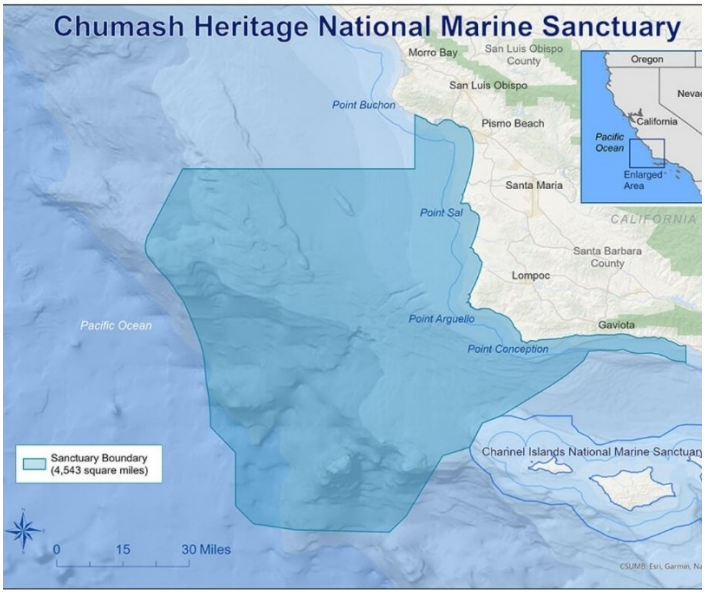
Line tending on their uncle's abalone boat.

I, and anyone I've talked to in my family, are opposed to the 3 proposed Marine Protected Areas. The following quote from NOAA, should have stopped this proposal in its tracks, but as you know, that last tidbit, "only the Santa Ynez Band of Chumash Indians, would have access and control of the waters in Salinan Territory", was thrown in at the last minute. Please note, the SYBCI is not the local tribe.

In an exact quote from NOAA, (a Government Agency):

"The National Oceanic and Atmospheric Administration (NOAA), explicitly acknowledges the Pacific coastal waters and ocean areas, just north of the Chumash Heritage National Marine Sanctuary, along the Central California coast, as the native homelands and ancestral waters of the Salinan Peoples."



We Salinans call Morro Rock “Lesa’mo”. This sacred Salinan spiritual location is in a series of volcanic peaks on the Central Coast known today as the Nine Sisters (formerly the 7 Sisters). As the original indigenous people of the area stretching from the Santa Maria River on to the north, from the headwaters of the Salinas River in south San Luis Obispo County, up along the Big Sur coastline, and throughout a large section of the San Joaquin Valley, the people today known as the Salinan Tribe of Monterey and San Luis Obispo Counties, hold ceremonies at Lesa’mo as our ancestors did for thousands and thousands of years. In the ship's log of one of the earliest European expeditions to this area in 1542 led by Juan Cabrillo, it is recorded that they were met by native people on grass (tule) rafts, a Salinan-style boat. Also recorded at Mission San Antonio in 1772, a Salinan woman named Agata Maria, born at Islay in 1672, told the padres that her grandfather's grandfather told a story of men in a giant winged bird that came across the ocean visiting Lesa’mo, and who planned to return someday. When Gaspar De Portola's expedition arrived in 1769, it signaled the start of many unwelcome changes and challenges for the Salinans.

In 2016, a replica of the San Salvador ship entered Morro Bay harbor. The Salinan Tribe hand-built tule boats in the ways of our ancestors, to paddle out in a reenactment of the meeting. Our history, rights, and sacred ceremonies here must be protected.

Morro Bay has been touted as a quaint fishing village, something droves of tourists come to see. No one wants to come have fish ‘n’ chips, with fish sent from other countries. There’s a turn in the country to go back to authentic, local, fresh, organic, time to jump on this wave or be left in the “everything imported” cesspool. Cheaper maybe, but because it’s just that, low quality.

Please listen to our local fisherman, natives of Morro Bay, and those who come here to enjoy what we have to offer by denying these 3 proposed MPAs in San Luis Obispo County.

Thank you,
Yvonne Davis
